China, Sichuan. Green, pruinose, sheath coriaceous shorter than internode, sheath ligule truncate glabrous, sheath blade ovate lanceolate or lanceolate, leaves ovate, see *Acta Phytotaxonomica Sinica* 23(6): 460-462, f. 1. 1985, *Journal of Bamboo Research* 11(3): 54. 1992.

I. hunanensis B.M. Yang

China, Hunan. Hardy, yellowish green, slender longitudinal stripes, sheath persistent hard and fragile, sheath ligule tiny, sheath blade linear-lanceolate erect, leaves ovate-lanceolate glabrous both sides, see *Acta Phytotaxonomica Sinica* 19(2): 259-260, f. 1. 1981.

I. inaequilaterus W.T. Lin & Z.M. Wu

China. Hardy, see *Acta Phytotaxonomica Sinica* 26(2): 147-148, f. 2. 1988.

I. lacunosus Wen

China, Fujian. Sheath greenish yellow tough and pliable, sheath auricles and cilia absent, sheath ligule truncate, sheath blade persistent lanceolate, leaves pubescent beneath, used for making handicrafts and for wrapping rice food, cultivated, see *Journal of Bamboo Research* 2(1): 70, f. 21. 1983.

I. latifolius (Keng) McClure (*Arundinaria latifolia* Keng; *Indocalamus lacunosus* T.H. Wen; *Indocalamus migoi* (Nakai ex Migo) Keng f.; *Sasamorpha chinensis* Nakai; *Sasamorpha latifolia* (Keng) Nakai; *Sasamorpha migoi* Nakai ex Migo)

China, Hunan, Zhejiang, Anhui. Hardy, sparsely hairy, sheath persistent shorter than internode, no sheath auricles, sheath ligule truncate, sheath blade lanceolate erect, leaves pubescent beneath, used for making handicrafts and for wrapping rice food, cultivated, slopes and forests, see *Sinensia* 6(2): 147, 153, f. 1. 1935, *Journal of the Shanghai Science Institute* 4(7): 163. 1939, *Sunyatsenia* 6(1): 37.

1941, *Claves Generum et Specierum Graminearum Primarum Sinicarum Appendice Nomenclatione Systematica* 152. 1957, *Journal of Bamboo Research* 2(1): 70, f. 21. 1983, *Journal of Zhejiang Forestry College* 8(1): 127-130. 1991, *Acta Phytotaxonomica Sinica* 29(5): 452-455. 1991.

I. longiauritus Hand.-Mazz. (*Arundinaria longiaurita* (Hand.-Mazz.) Hand.-Mazz.; *Arundinaria longiaurita* (Hand.-Mazz.) Demoly, nom. illeg., non *Arundinaria longiaurita* (Hand.-Mazz.) Hand.-Mazz.)

China, Henan, Hunan, Sichuan, Guizhou. Glabrous or shortly silky, node flat, sheath auricles developed and fal-ciform, sheath ligule truncate or slightly curved, sheath blade erect ovate, leaves ciliate beneath, used for making handicrafts and for wrapping rice food, cultivated, forest, shrubs, woods, shade or partial shade, see *Kaiserliche Akademie der Wissenschaften in Wien. Mathematisch-Naturwissenschaftliche Klasse. Anzeiger.* 62: 254. 1926, *Symbolae Sinicae* 7(5): 1271-1272. 1936, *Fieldiana, Botany* 24(2): 38-331. 1955, *Hong Kong Bamboos* 66. 1985, *Bambou, EBS Section France* 7: 22. 1990, *Acta Phytotaxonomica Sinica* 29(5): 452-455. 1991.

in English: long-ear cane

I. longiauritus Hand.-Mazz. var. *hengshanensis* H.R. Zhao & Y.L. Yang

China, Hunan. Sheath auricle semifalciform, see *Kaiserliche Akademie der Wissenschaften in Wien. Mathematisch-Naturwissenschaftliche Klasse. Anzeiger.* 62: 254. 1926, *Acta Phytotaxonomica Sinica* 23(6): 465. 1985.

I. longiauritus Hand.-Mazz. var. *semifalcatus* H.R. Zhao & Y.L. Yang

China, Luo, Sichuan. Sheath auricle semifalciform, see *Kaiserliche Akademie der Wissenschaften in Wien. Mathematisch-Naturwissenschaftliche Klasse. Anzeiger.* 62: 254. 1926, *Acta Phytotaxonomica Sinica* 23(6): 464. 1985.

I. longiauritus Hand.-Mazz. var. *yi yangensis* H.R. Zhao & Y.L. Yang

China. Leaves pubescent, see *Kaiserliche Akademie der Wissenschaften in Wien. Mathematisch-Naturwissenschaftliche Klasse. Anzeiger.* 62: 254. 1926, *Acta Phytotaxonomica Sinica* 23(6): 464. 1985.

China. Forest shade, see *Sinensia* 6: 147, 153, f. 1. 1935, *Journal of the Shanghai Science Institute* 4(7): 163. 1939, *Sunyatsenia* 6(1): 37. 1941, *Claves Generum et Specierum Graminearum Primarum Sinicarum Appendice Nomenclatione Systematica* 152. 1957, *Journal of Nanjing University, Natural Sciences* 23(3): 453-462. 1987, *Journal of Zhejiang Forestry College* 8(1): 127-130. 1991, *Acta Phytotaxonomica Sinica* 29(5): 452-455. 1991.

I. pedalis (Keng) P.C. Keng (*Arundinaria pedalis* Keng)

China. Rocky places, see *Journal of the Washington Academy of Sciences* 36(3): 76-86, f. 1-3. 1946, *Technical Bulletin of the National Forestry Research Bureau* 8: 12. 1948.

I. petelotii (A. Camus) Ohrnb. (*Arundinaria petelotii* A. Camus; *Sinarundinaria petelotii* (A. Camus) T.Q. Nguyen Vietnam. See *Notulae Systematicae* 14(3-4): 213-214, 252-253. 1951 [1952-1953], *Bot. Zhurn. (Moscow & Leningrad)* 75(2): 225. 1990.

I. pseudosinicus McClure

China, Hainan. Internodes of branches slender, sheath glabrous, leaves elliptic-lanceolate, similar to *Indocalamus sinica* (Hance) Nakai, see *Sunyatsenia* 6(1): 37-41, pl. 8. 1941.

I. pseudosinicus McClure var. *densinervillus* H.R. Zhao & Y.L. Yang

China. Small to tiny leaves, see *Sunyatsenia* 6(1): 37-41, pl. 8. 1941, *Acta Phytotaxonomica Sinica* 23(6): 464. 1985.

I. pumilus Q.H. Dai & C.F. Huang

China. Cultivated, see *Acta Phytotaxonomica Sinica* 24(5): 394-395, f. 2. 1986.

I. quadratus H.R. Zhao & Y.L. Yang

China, Hunan, Dongan. Densely hairy and powdery, sheath persistent, sheath auricles falciform, wavy cilia, sheath ligule truncate to convex dark purple, sheath blade linear triangular, 6-7 leaves on each twig, leaves ovate lanceolate, see *Acta Phytotaxonomica Sinica* 20(2): 216-217, f. 1. 1982.

I. sinicus (Hance) Nakai (*Arundinaria longiramea* Munro; *Arundinaria sinica* Hance; *Arundinaria wightii* Nees ex Benth.; *Arundinaria wightii* Nees)

China, Guangdong. One branch on each node of the culm or no branches at all, 5-9 leaves on each twig, 3-4 flowers on each spikelet, ornamental, cultivated, similar to *Indocalamus latifolius* (Keng) McClure, see *Flora Hongkongensis* 434. London 1861, *Annales des Sciences Naturelles, Botanique* 18: 235. 1862, *Transactions of the Linnean Society of London* 26(1): 19. 1868 and *Journal Arnold Arboretum* 6(3): 148. 1925, *Hong Kong Bamboos* 67. 1985, *Journal of Nanjing University, Natural Sciences* 26(2): 286. 1990.

Jap.* 632. 1976, *Bothalia* 14(1): 54. 1982, *Taxon* 49(2): 238. 2000.

in Japan: ohoba-ya-dake

I. tongchunensis K.F. Huang & Z.L. Dai

China, Fujian. Internode cylindrical, glossy, yellow, pruinose, culm sheath persistent, no sheath auricles and cilia, sheath ligule truncate or arcuate, sheath blade longer than the sheath and long lanceolate, 1 branch on each node of upper culm, 3-7 leaves on each twig, leaves ovate or ovate-lanceolate, in broad-leaved forests, see *Wuyi Science Journal* 6: 293-295. 1986.

I. victorialis P.C. Keng (*Arundinaria victorialis* (Keng f.) Demoly; *Bashania victorialis* (P.C. Keng) T.P. Yi; *Pseudosasa victorialis* (P.C. Keng) Yi)

China, Sichuan. Sheath persistent shorter than internode, sheath ligule truncate, sheath blade slender and long, one branch on each node or 3-4, 1-4 leaves on each branch, leaves lanceolate, see *Technical Bulletin of the National Forestry Research Bureau, Nanking, China* 8: 12. 1948, *Acta Phytotaxonomica Sinica* 1(1): 121, f. 7. 1951, *Journal of Bamboo Research* 12(2): 53-54. 1993, *Journal of Bamboo Research* 15(3): 6. 1996, *Bambou*, EBS Section France 29: 13. 1998.

I. vulgatus W.T. Lin & X.B. Ye (*Arundinaria vulgata* (W.T. Lin & X.B. Ye) W.T. Lin; *Pseudosasa vulgata* (W.T. Lin & X.B. Ye) W.T. Lin)

China. See *Acta Phytotaxonomica Sinica* 26(3): 233, f. 13. 1988, *Bulletin of Botanical Research* 12(4): 354-355. 1992, *Journal South China Agricultural University* 15(2): 79. 1994.

I. wilsonii (Rendle) C.S. Chao & C.D. Chu (also spelled ***wilsoni***) (*Arundinaria wilsonii* Rendle; *Indocalamus nubigenus* (Keng f.) T.P. Yi ex H.R. Zhao & Y.L. Yang; *Indocalamus shimenensis* B.M. Yang; *Indocalamus wilsonii* (Rendle) C.S. Chao & C.D. Chu; *Sasa nubigena* Keng f.; *Sasamorpha nubigena* (P.C. Keng) P.C. Keng; *Sinarundinaria wilsonii* (Rendle) Keng ex Keng f.; *Sinarundinaria wilsoni* (Rendle) P.C. Keng; *Yushania wilsonii* (Rendle) J.J.N. Campbell) (dedicated to the American (b. England, Chipping Campden, Gloucestershire) botanist Ernest Henry Wilson, 1876-1930 (d. near Worcester, Massachusetts, in a motor accident), traveler and plant collector, Kew gardener, to China in 1907-1908 and 1910 on behalf of the Arnold Arboretum; see J.H. Barnhart, *Biographical notes upon botanists*. 3: 503. 1965; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 438. 1972; Mary Gunn and Leslie E. Codd, *Botanical Exploration of Southern Africa*. 378. I. wuxiensis Yi

China, Sichuan. Mountains, silky, not pruinose, sheath persistent shorter than internode, sheath auricle falciform deciduous, sheath ligule truncate or slightly concave, sheath blade linear-lanceolate, one branch on each node, leaves lanceolate, see *Bulletin of Botanical Research* 5(4): 129-131, f. 6. 1985.

I. youxiuensis Yi

China. Mountains, see *Journal of Bamboo Research* 11(3): 53-54, f. 2. 1992.

Indochloa Bor = *Euclasta* Franch.

From Latin *Indus* "Indian" and Greek *chloa* "grass."

Panicoideae, Andropogoneae, Sorghinae, type *Indochloa clarkei* (Hack.) Bor, see *Österreichische Botanische Zeitschrift* 41: 49. 1891, *Bulletin de la Société d'Histoire Naturelle d'Autun* 8: 335-336, t. 8. 1895 and *The Botany of Bihar and Orissa* pt. 5: 1040. 1924, *Kew Bulletin* 9: 75-76. 1954, *Fieldiana, Botany* 24(2): i-ix, 1-390. 1955, *Flowering Plants of Jamaica* 1-848. 1972, *Kew Bulletin* 35(3): 704. 1980, *Flora Mesoamericana* 6: 386. 1994, *Fontqueria* 46: [i-ii], 1-259. 1997, *Contributions from the United States National Herbarium* 46: 241. 2003.

Indopoa Bor

From India and Greek *poa* "grass, fodder."

One species, India. Chloridoideae, Eragrostideae, annual, herbaceous, unbranched, auricles absent, ligule an unfringed membrane, leaf blades linear, plants bisexual,

inflorescence spicate, 4-6 female-fertile florets, spikelets solitary and flattened, 2 glumes subequal to very unequal, lemma bearing a geniculate awn with twisted column, palea awnless, 2 free lodicules, 3 stamens, ovary glabrous with apical appendage, 2 stigmas, caryopsis needle-like, rocky places, type *Indopoa paupercula* (Stapf) Bor, see E. Blatter and C. McCann, *The Bombay Grasses*. Scientific Monograph no. 5. The Imperial Council of Agricultural Research. Dehli 1935 (Reprinted 1984 by Bishen Singh Mahender Pal Singh, Dehradun, India), *Kew Bulletin* 13: 225. 1958, *Grasses of Burma, Ceylon, India and Pakistan* 520, 522-523. 1960, *Journal of Economic and Taxonomic Botany* 22(2): 491-494. 1998.

Species

I. paupercula (Stapf) Bor (*Tripogon pauperculus* Stapf)

India, Western Ghats. Glumes 1-nerved, see *Icones Plantarum* 25(t): 2442. 1896 and *Sci. Monogr. Imp. Council. Agric. Research* 5(266). 1935 [also *The Bombay Grasses* 266. 1935], *Kew Bulletin* 1958: 225. 1958.

Indoryza Henry & Roy = *Porteresia*
Tateoka, *Sclerophyllum* Griff.

Oryza from India.

Bambusoideae, Oryzodae, Oryzeae, see *Notulae ad Plantas Asiaticas* 3: 8. Calcutta 1851 and *American Journal of Botany* 51: 539-543. 1964, *Bulletin of the National Science Museum* 8: 406. Tokyo 1965, *Bulletin of the Botanical Survey of India* 8: 42-44. 1966, *Bulletin of the Botanical Survey of India* 10: 274. 1969, *Bulletin of the Torrey Botanical Club* 101: 244. 1974.

Indosasa McClure

From India plus the name *Sasa*.

Species 12-27, Laos, China and Vietnam. Bambusoideae, Bambusodae, Bambuseae, Shibataeinae, perennial, persistent, monopodial, shrubby and woody, leafy, each node with a bud, 3 branches at each node, nodes 2-ridged, rhizomes leptomorph, plants bisexual, pseudospikelets or single spikelets in loose fascicles, 2 glumes, lemma coriaceous, 3 lodicules membranous, 6 stamens, 3 stigmas, mountain, in forest, broad-leaved forest, along roadsides, sunny slopes, low hills, shade and partial shade, evergreen broad-leaved forest, type *Indosasa crassiflora* McClure, see *Lingnan University Science Bulletin* 9: 28-29. 1940, *Acta Phytotaxonomica Sinica* 21: 60-75. 1983, *Kew Bulletin* 44(2): 349-367. 1989, *Acta Phytotaxonomica Sinica* 29(5): 452-455. 1991, Z.-L. Li, *The Flora of China* Bambusoideae project, problems and current understanding of bamboo taxonomy in China. *The Bamboos* 5: 61-81. 1997, *Ecological Research* 16(3): 509-517. Sep 2001.

Species

I. acutiligulata Z.P. Wang & G.H. Ye (*Indosasa shibataeoides* McClure)

China. See *Lingnan University Science Bulletin* 9: 32. 1940, *Journal Nanjing University. Natural Sciences Edition* 1981(1): 100, f. 7. 1981, *Acta Phytotaxonomica Sinica* 29(5): 452-455. 1991.

I. angustata McClure

China, Guangxi, Vietnam. Young culm more or less pubescent, sheath auricles vestigial or undeveloped, sheath ligule densely pubescent, sheath blade lanceolate and scabrous, used for frame, growing in broad-leaved forests, see *Journal of the Arnold Arboretum* 23(1): 93. 1942.

I. angustifolia W.T. Lin

China. See *Acta Phytotaxonomica Sinica* 26(3): 225-226, f. 3. 1988.

I. bacquangensis Nguyen

Vietnam. See *Bot. Zhurn. (Moscow & Leningrad)* 76(6): 878. 1991.

I. breviligulata W.T. Lin & Z.M. Wu

China. See *Journal of Bamboo Research* 11(1): 33. 1992.

I. crassiflora McClure (*Indosasa gibbosa* (McClure) McClure; *Indosasa gibbosa* McClure; *Sinobambusa gibbosa* McClure)

China, Guangxi, Vietnam. Culm more or less pruinose, glabrous, wall thick to solid, sheath swollen, auricles absent, ligule truncate, sheath blade narrowly lanceolate to triangular, see *Lingnan University Science Bulletin* 9: 29, 58. 1940, *Journal of the Arnold Arboretum* 23(1): 93. 1942.

I. glabrata C.D. Chu & C.S. Chao

China, Guangxi. Glabrous, pruinose, culm sheath shedding late, sheath ligule arcuate, sheath blade narrowly lanceolate to triangular, edible shoot, used for fencing, see *Acta Phytotaxonomica Sinica* 21(1): 64, f. 1. 1983.

I. glabrata C.D. Chu & C.S. Chao var. *albo-hispidula* (Q.H. Dai & C.F. Huang) C.S. Chao & C.D. Chu (also spelled *albohispidula*) (*Indosasa albo-hispidula* Q.H. Dai & C.F. Huang)

China, Guangxi. Young culms densely covered with white tomentum, sheath shorter than internode, sheath auricles undeveloped, sheath blade lanceolate, used for fencing and for papermaking, see *Acta Phytotaxonomica Sinica* 21(1): 64, f. 1. 1983, *Journal of Bamboo Research* 3(1): 47, f. 1. 1984, *Flora Reipublicae Popularis Sinicae* 9(1): 212. 1996.

I. hispida McClure

China, Guangdong, Yunnan, Vietnam. Young culms densely covered with white or yellowish tomentum, tough sheath shedding late, sheath blade lanceolate, sheath auricles developed, sheath ligule ciliate, see *Lingnan University Science Bulletin* 9: 31. 1940.

I. ingens Hsueh (also J.R. Xue) & Yi

China, Yunnan. Green to purplish green, minutely tomentose, culm sheath caducous and coriaceous, no sheath auricles, sheath ligule more or less truncate, used as fence and frame, see *Acta Botanica Yunnanica* 5(1): 39-41, f. 1. 1983.

I. laotica (A. Camus) C.S. Chao & Renvoize (*Arundinaria laotica* A. Camus)

Laos. See *Bulletin du Muséum d'Histoire Naturelle, sér. 2* 3(8): 760. 1931, *Kew Bulletin* 44: 365. 1989.

I. levigata Z.P. Wang & G.H. Ye (*Indosasa shibataeoides* McClure)

China, Hunan. Young culms pruinose, sheath papery and pruinose, no sheath auricles, sheath ligule arcuate and ciliate, sheath blade ovate to lanceolate, one leaf on each twig, leaf blades elliptic to lanceolate to long-elliptic, see *Lingnan University Science Bulletin* 9: 32. 1940, *Journal Nanjing University. Natural Sciences Edition* 1981(1): 99-100, f. 6, 7. 1981, *Acta Phytotaxonomica Sinica* 29(5): 452-455. 1991.

I. lipoensis C.D. Chu & K.M. Lan

China, Lipo, Guizhou. Young culms minutely pubescent and not pruinose, three branches on each node, culm sheath deciduous, sheath auricles coarsely hairy and ciliate, sheath ligule arched and shortly ciliate, sheath blade lanceolate to triangular, 2-4 leaves on each twig, see *Bamboo Res.* 1982(1): 3, f. 3. 1982.

I. longispicata W.H. Hsiung & C.S. Chao

China, Guangxi. Young culms minutely pubescent, basal internodes pruinose, sheath auricles small and shortly ciliate, sheath ligule very short and ciliate, used for making frames, growing in evergreen broad-leaved forest, mountains, see *Acta Phytotaxonomica Sinica* 21(1): 71-73, f. 5. 1983.

I. lunata W.T. Lin

China. See *Acta Phytotaxonomica Sinica* 26(3): 226-227, f. 4. 1988.

I. macula W.T. Lin & Z.M. Wu

China. See *Acta Phytotaxonomica Sinica* 26(3): 227-228, f. 5. 1988.

I. parvifolia C.S. Chao & Q.H. Dai

China, south Guangxi. Young culms shortly pubescent, below joint a pruinose ring, culm sheath orange to reddish and shorter than internode, sheath auricles sickle-shaped, sheath ligule very short and ciliate, used for fencing, see *Acta Phytotaxonomica Sinica* 21(1): 67-69, f. 3. 1983.

I. patens C.D. Chu & C.S. Chao

China, north Guangxi. Young culms purplish and densely pubescent, sheath shorter than internode and orange-reddish, sheath auricles wrinkled, sheath ligule ciliate and more or less truncate, edible shoots, construction materials,

fencing, growing in evergreen broad-leaved forest, low mountains, hills, see *Acta Phytotaxonomica Sinica* 21(1): 73, f. 6. 1983.

I. pusilloaurita W.T. Lin

China. See *Bulletin of Botanical Research* 12(4): 351, f. 2. 1992.

I. shibataeoides McClure (*Indosasa acutiligulata* Z.P. Wang & G.H. Ye; *Indosasa levigata* Z.P. Wang & G.H. Ye; *Indosasa tinctilimba* McClure)

China, Guangdong. Small to dwarf, young culms pruinose, internodes irregularly asymmetric or zigzag, three branches per node, sheath caducous, sheath blade triangular to broadly lanceolate, sheath ligule truncate, sheath auricle thinly ciliate, usually 1-2 leaves on each twig, ornamental, cultivated, see *Lingnan University Science Bulletin* 9: 32-33. 1940, *Journal Nanjing University. Natural Sciences Edition* 1981(1): 99-100, f. 6, 7. 1981, *Acta Phytotaxonomica Sinica* 29(5): 452-455. 1991.

I. singulispicula Wen

China. See *Journal of Bamboo Research* 7(1): 29-30, f. 4. 1988.

I. sinica C.D. Chu & C.S. Chao

China, Guangxi, Yunnan, south Guizhou. Young culms pruinose and coarse, pruinose ring below joint, sheath coriaceous, sheath blade triangular lanceolate, sheath auricles small and minutely pubescent, sheath ligule ciliate and arcuate, used for construction material, fences, growing in evergreen broad-leaved forest, low mountains, low altitudes, edge of forest, hills, see *Acta Phytotaxonomica Sinica* 21(1): 65-67, f. 2. 1983, *Acta Phytotaxonomica Sinica* 29(5): 452-455. 1991.

I. sondongensis Nguyen

Vietnam. See *Bot. Zhurn. (Moscow & Leningrad)* 76(6): 877. 1991.

I. spongiosa C.S. Chao & B.M. Yang

China. Young culms pruinose above and below joint, nodes swollen, papery to tough sheath caducous and shorter than internode, sheath blade lanceolate, sheath auricle absent, sheath ligule short and villous, 3-5 leaves on each branch, leaf blades lanceolate or ovate-lanceolate, ornamental, used for weaving, see *Bamboo Res.* 1982(1): 14, f. 1. 1982.

I. suavis W.T. Lin & Z.J. Feng

China. See *Acta Phytotaxonomica Sinica* 30(6): 557-558, f. 1, 1-4. 1992.

I. tinctilimba McClure (*Echinochloa crusgalli* var. *siberiana* (Asch. & Schweinf.) Chevalier; *Indosasa shibataeoides* McClure; *Panicum crusgalli* var. *siberiana* Asch. & Schweinf.; *Panicum sieberianum* (Asch. & Schweinf.) Asch. & Schweinf.; *Panicum sieberianum* (Asch. & Schweinf.) Sickenb.)

China. See *Species Plantarum* 1: 56. 1753, *Illustration de la Flore d'Égypte* 3: 189 et Suppl. 777. 1887 and *Mémoires de l'Institut Égyptien* 4: 300. 1901, *Revue de Botanique Appliquée et d'Agriculture Coloniale* 13: 902. 1933, *Lingnan University Science Bulletin* 9: 32-33. 1940, *Journal Nanjing University. Natural Sciences Edition* 1981(1): 99-100, f. 6, 7. 1981, *Acta Phytotaxonomica Sinica* 29(5): 452-455. 1991.

I. triangulata J.R. Xue & T.P. Yi (*Arundinaria triangulata* (J.R. Xue & T.P. Yi) C.S. Chao & G.Y. Yang)

Isachna Post & O. Kuntze

Orthographic variant of *Isachne* R. Br.

Isachne R. Br.

From the Greek *isos* "equal, similar" and *achne* "chaff, glume, scale," referring to the lemmas and glumes, or to two equal florets; see Robert Brown, *Prodrum florae Novae Hollandiae.* 196. London 1810.

About 50(-60)/(80-)100-110 species, tropical and subtropical and warm regions, mostly in Asia and tropical Africa. Panicoideae, Panicodae, Isachneae, annual or perennial, often aquatic or semiaquatic, caespitose, herbaceous, erect or decumbent and ascending, sometimes scandent, often geniculate at base, rhizomatous or stoloniferous, creeping and branched rhizomes, nodes glabrous or tuberculate, culm internodes hollow, ligule a ciliate rim, leaves linear to linear-lanceolate, plants bisexual, inflorescence a loose and open panicle, spikelets not subtended by bristles, spikelets deciduous and solitary on slender pedicels, with hermaphrodite florets or without hermaphrodite florets, 2 fertile disarticulating florets, florets similar or dissimilar in shape, upper floret crustaceous and perfect or female, lower floret male and herbaceous, two glumes more or less equal and awnless, lower glume 3- to 9-nerved, upper glume 5- to 9-nerved, lemmas similar or dissimilar, lower lemma variable, upper lemma indurated and rounded to broadly elliptic, palea awnless, 2 lodicules fleshy and glabrous, 3 stamens, ovary glabrous, 2 stigmas, small grain dorsally compressed, weed species mostly hygrophilous, food plant, native pasture species, mostly in marshy ground and wet situations, lower and upper montane forest, rainforest, shady places, forest shade, a difficult genus, type *Isachne australis* R. Br., see *Species Plantarum* 1: 55. 1753, *Prodrum Florae Novae Hollandiae* 196. 1810, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 3,1(2-3): 195, 328. 1834, *J. Linn. Soc. Bot.* 19: 30. 1881 and *Fl. Trop. Afr.* 9: 13. 1917, *Hook. Ic. Species

I. adstans (Steud.) Miq. (*Panicum adstans* Steud.)

Malaya/Malaysia. See *Synopsis Plantarum Glumacearum* 1: 94. 1854, *Flora van Nederlandsch Indië* 3: 461. 1855.

I. albens Trinius (*Isachne buettneri* Hack.; *Isachne griffithii* Munro; *Isachne latifolia* Munro; *Panicum albens* (Trin.) Trin. ex Steud.)

India, Indonesia, Nepal. Perennial, slender to stout, tufted, erect or decumbent, ascending or scrambling, branched, clump forming, leaf sheaths glabrous, leaves oblong to lanceolate and hispid, panicle effuse densely flowered, spikelets persistent and oblong to obovoid, lower floret crustaceous, native pasture species, readily eaten by cattle, growing in water, wet places, see *Species Graminum* 1828-1836, *Nomenclator Botanicus. Editio secunda* 2: 252. 1841, *Verhandlungen des Botanischen Vereins für die Provinz Brandenburg und die angrenzenden Länder* 31: 69. 1889, *The Flora of British India* 7: 23. 1896 and *Journal of the Straits Branch of the Royal Asiatic Society* 44: 206. 1905, *Philippine Journal of Science* 1(Suppl.): 350. 1906, *Botanical Magazine* 56: 5. 1942, *Reinwardtia* 2(2): 280. 1953, *Acta Phytotaxonomica Sinica* 10(1): 11. 1965, *Taxon* 22: 117. 1973, *Cytologia* 40: 453-462. 1975, *Journal of Cytology and Genetics* 20: 205-206. 1985.

I. albens Trinius var. ***elatuscula*** (Ohwi) Jansen (*Isachne elatuscula* Ohwi)

Asia. See *Botanical Magazine* 56: 5. 1942, *Reinwardtia* 2(2): 280. 1953.

I. albens Trinius var. ***glandulifera*** Keng f. (*Isachne albens* Trin.)

Asia. See *Acta Phytotaxonomica Sinica* 10(1): 11. 1965.

I. albens Trinius var. ***hirsuta*** Hook.f. (*Isachne hirsuta* (Hook.f.) Keng f.)

Asia. See *The Flora of British India* 7: 23. 1896 and *Acta Phytotaxonomica Sinica* 10(1): 11. 1965.

I. albens Trinius var. ***magna*** (Merr.) Jansen (*Isachne beneckeii* var. *magna* Merr.; *Isachne magna* (Merr.) Merr.)

Asia. See *Philippine Journal of Science* 1(Suppl.): 350. 1906, *Philippine Journal of Science* 5: 327. 1910, *Reinwardtia* 2(2): 280. 1953.

I. albens Trinius var. ***sylvestris*** (Ridl.) Jansen (*Isachne sylvestris* Ridl.)

Asia. See *Journal of the Straits Branch of the Royal Asiatic Society* 44: 206. 1905, *Reinwardtia* 2(2): 279-280. 1953.

I. albomarginata Jansen

Asia, Mount Kinabalu, Borneo. Perennial, see *Reinwardtia* 2(2): 279. 1953.

I. albomarginata Jansen var. ***hirsuta*** Jansen

Asia, Borneo. Perennial, see *Reinwardtia* 2(2): 279. 1953.

I. angladei C. Fischer

South India, Tamil Nadu. Indeterminate species, perennial, wiry, woody, bamboo-like, climbing or spreading, branched, leaf sheaths very loose and glabrous, leaf blades linear, panicle with erect-spreading branches, spikelets obovoid, glumes cuspidate and longer than the spikelets, see *Kew Bulletin* 1932: 323. 1932.

I. angusta Nash (*Isachne angusta* Nees ex Steud.)

Mauritius, Madagascar. See *Synopsis Plantarum Glumacearum* 1: 96. 1854 and *Bulletin of Miscellaneous Information Kew* 1920: 28. 1920.

I. angustifolia Nash

Central America, the Caribbean. Decumbent, herbaceous, densely clumped, see *Bulletin of the Torrey Botanical Club* 30(7): 377. 1903.

in Spanish: yerba-de-alambre

I. arfakensis Ohwi

Western New Guinea. Marshy places, open areas, see *Botanical Magazine* (Tokyo) 56: 4. 1942.

I. arundinacea (Sw.) Griseb. (*Dichantherium viscidellum* (Scribn.) Gould; *Isachne glaucescens* (Kunth) Pittier; *Isachne panicea* Trin.; *Panicum arundinaceum* Sw.; *Panicum glaucescens* Kunth)

Southern America, Bolivia, Peru, Jamaica, Mexico, Ecuador, Brazil. Perennial, herbaceous, tall, long-stemmed, bamboo-like, coarse, scandent, clambering, trailing or dangling, hanging down, weakly scrambling, vinelike with pendent branches, leaf blades narrowly lanceolate acuminate or attenuate, inflorescence light green, dense inflorescence, exerted pyramidal panicle, spikelets orbicular or oblong, lemma elliptic, grains green to purplish dark, weedy, open areas, roadbank, forest edge, similar to *Isachne ligulata*, see *Nova Genera et Species Plantarum seu Prodromus* 24. 1788, *Nova Genera et Species Plantarum* 1: 104. 1815

[1816], *De Graminibus Paniceis* 253. 1826, *Flora of the British West Indian Islands* 553. 1864 and *Circular, Division of Agrostology, United States Department of Agriculture* 19: 2. 1900, *Bol. Tecn. Ministerio de Agricultura y cria* 1: 49. Caracas 1937, *Brittonia* 32: 357. 1980.

in Spanish: zacate

I. beneckeii Hackel (*Isachne beneckeii* var. *depauperata* Hack. ex Merr.; *Isachne depauperata* (Hack. ex Merr.) Merr.; *Isachne pauciflora* Hack.; *Isachne pauciflora* var. *depauperata* (Hack. ex Merr.) Jansen)

Southeast Asia, Java. See *Österreichische Botanische Zeitschrift* 51: 459. 1901, *Philippine Journal of Science* 1(Suppl. 5): 350. 1906, *Philippine Bur. Gov. Lab. Bull.* 35: 80. 1906, *Philippine Journal of Science* 5: 327. 1910, *An Enumeration of Philippine Flowering Plants* 1: 58. 1922, *Reinwardtia* 2(2): 288. 1953.

I. bicolor Naik & B.W. Patunkar

India, Maharashtra. Perennial, ascending, stiff, creeping, rhizomatous, hirsute leaf blades linear-lanceolate to ovate-lanceolate, panicle few-flowered, long exserted peduncle, dark purple spikelets, florets rounded on back, panicle branches and pedicels glandular, in open moist grassland, see *Bull. Bot. Survey India* 15: 157-158. 1973.

I. borii Hemadri (for the Irish (b. at Tramore, Co. Waterford) botanist Norman Loftus Bor, 1893-1972 (London), agrostologist, plant collector, 1921-1948 Indian Forest Service, Forest Botanist of the Forest Research Institute (Dehra Dun), 1945 President of the Indian Botanical Society, 1948-1959 Assistant Director Kew, 1931 Fellow of the Linnean Society, author of *Manual of Indian Forest Botany*. Oxford University Press, London 1953, with Mukat Behari Raizada wrote *Some Beautiful Indian Climbers and Shrubs*. Bombay Natural History Society - Oxford University Press, Bombay 1982, contrib. to *Indian Forester*. See J.H. Barnhart, *Biographical notes upon botanists*. 1: 220. 1965; C.E. Hubbard, "Norman Loftus Bor (1893-1972)." in *Kew Bulletin*. 30(1): 1-4. 1975; Carolyn M.K. Pope, "A bibliography of the work of Dr. N.L. Bor." in *Kew Bulletin*. 30(1): 4-10. 1975).

India, Maharashtra. Rare species, annual, erect, slender, hirsute leaf blades linear and flat, loose panicle with capillary branches, pedicels glandular, spikelets globose, florets callus with a tuft of long white silky hairs, glumes subequal, grows in moist places, see *Indian Forester* 97(4): 223-225, pl. 1, figs. 1-8. 1971.

I. bourneorum Fischer

India, Tamil Nadu, Kerala. Perennial, erect or ascending, branched, leaf blades linear-lanceolate, rhizomatous, inflorescence a lax panicle with stiff branches, spikelets obovoid, glumes cuspidate-acuminate, florets dissimilar, see *Grasses of Burma ...* 579. 1960.

I. buettneri Hack. (*Isachne albens* Trin.; *Isachne bomoensis* Vanderyst; *Isachne brixhii* Vanderyst; *Isachne minutula*

Benth.; *Isachne mortehani* Vanderyst; *Isachne pynaertii* Vanderyst) (named for the German botanist and ornithologist Oscar Alexander Richard Büttner, 1858-1927, traveler, botanical collector, 1884-1886 in North Angola and Zaïre, 1890-1892 in Togo; see Anthonius Josephus Maria Leeuwenberg, "Isotypes of which holotypes were destroyed in Berlin." *Webbia*. 19: 861-863. 1965; Ignatz Urban, *Geschichte des Königlichen Botanischen Museums zu Berlin-Dahlem (1815-1913). Nebst Aufzählung seiner Sammlungen*. Dresden 1916; F.N. Hepper and Fiona Neate, *Plant Collectors in West Africa*. 15. 1971; J.H. Barnhart, *Biographical notes upon botanists*. Boston 1965; Frank Nigel Hepper, "Botanical collectors in West Africa, except French territories, since 1860." in *Comptes Rendus de l'Association pour l'étude taxonomique de la flore d'Afrique*, (A.E.T.F.A.T.). 69-75. Lisbon 1962)

Tropical Africa. Perennial, hard, scrambling, herbaceous, sap from the stem, forest glades, submontane, flooded places, see *Species Graminum* 1828-1836, *Nomenclator Botanicus. Editio secunda* 2: 252. 1841, *Verhandlungen des Botanischen Vereins für die Provinz Brandenburg und die angrenzenden Länder* 31: 69. 1889, *The Flora of British India* 7: 23. 1896 and *Journal of the Straits Branch of the Royal Asiatic Society* 44: 206. 1905, *Philippine Journal of Science* 1(Suppl.): 350. 1906, *Bulletin agricole du Congo Belge* 16: 688-689. 1925, *Botanical Magazine* 56: 5. 1942, *Reinwardtia* 2(2): 280. 1953, *Acta Phytotaxonomica Sinica* 10(1): 11. 1965.

in Sierra Leone: kegbil, kemegbir, muli, muri, ndewe, sankabesukwi, sunkabesukwi

I. caillei A. Chev. (for the French explorer Octave Caille, botanist, plant collector; see J.H. Barnhart, *Biographical notes upon botanists*. Boston 1965; F.N. Hepper and Fiona Neate, *Plant Collectors in West Africa*. 16. 1971)

French Guinea. See *Revue internationale de botanique appliquée et d'agriculture tropicale* 14: 41. 1934.

I. clarkei Hook.f. (after Charles Baron Clarke, 1832-1906 (Kew, Surrey), mathematician, worked on Indian botany, specialist on Cyperaceae, 1869-1871 Superintendent Calcutta Botanical Gardens, his writings include *Compositae indica*. London [1876] and *A Review of the Ferns of Northern India*. London 1880; see J.H. Barnhart, *Biographical notes upon botanists*. 1: 352. 1965; H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 146. Oxford 1964; G. Murray, *History of the collections contained in the Natural History Departments of the British Museum*. 1904; Ernest Nelmes and William Cuthbertson, *Curtis's Botanical Magazine Dedications, 1827-1927*. 242-244. [1931]; Isaac Henry Burkill, *Chapters on the History of Botany in India*. 144-146. Delhi 1965)

Sikkim, Meghalaya, Nagaland. Annual, erect, weak, slender, more or less delicate, hirsute foliage, leaf blades elliptic

or lanceolate, ligule fringed, panicle effuse with spreading branches, spikelets globose, glumes sparsely hairy, found in marshy places, see *The Flora of British India* 7: 24. 1896 and *Grasses of Burma, Ceylon, India and Pakistan (excluding Bambuseae)* 579. 1960, *Taxon* 24: 512. 1975, *Cytologia* 40: 453-462. 1975.

I. clementis Merr. (for the Reverend Joseph Clemens, (born Cornwall) 1862-1932 (d. New Guinea), Chaplain in U.S. Army (but retired around 1925), with his wife Mary Knapp Clemens (née Strong) collected orchids on Mount Kinabalu and plants in the Philippines, his writings include "The cleft mountain." *Brit. N. Born. Herald.* vol. L, 14: 143-144. 1932, "Mount Kinabalu: a naturalist's description." *Brit. N. Born. Herald.* vol. LI, 1: 7. 1933 and "Mount Kinabalu: the roaring falls of Pinokok." *Brit. N. Born. Herald.* vol. LI, no. 23. 1933. See Jeffrey J. Wood, Reed S. Beaman and John H. Beaman, *The Plants of Mount Kinabalu: Orchids*. I. minutula (Gaudich.) Kunth (*Isachne buettneri* Hack.; *Isachne minutula* Benth.; *Panicum minutulum* Gaudich.)

Pacific. See *Révision des Graminées* 1: Suppl. 1829, *Voyage autour du Monde* 410. 1829, *Révision des Graminées* 2: 407. pl. 117. 1831, *Plantae Junghuhnianae* 3: 379. 1854, *Verhandlungen des Botanischen Vereins für die Provinz Brandenburg und die angrenzenden Länder* 31: 69. 1889 and *Blumea* 3: 465. 1940, *Micronesica* 18(2): 55. 1982[1984].

I. multiflora (Thwaites) Ferguson (*Isachne australis* var. *multiflora* Thwaites; *Isachne multiflora* (Thwaites) Trimen, nom. illeg., non *Isachne multiflora* (Thwaites) Ferguson)

Sri Lanka. Perennial, erect, hollow, leaf sheaths rounded, leaf blades linear and acuminate, panicle with ascending branches, upper floret pistillate, lower floret perfect, glumes ovate and obtuse, in marshy areas, see *Enumeratio Plantarum Zeylaniae* 361. 1864, *J. Roy. Asiat. Soc., Ceylon Branch* 6: 69. 1880, *A Systematic Catalogue of the Flowering Plants and Ferns in Ceylon* 104. 1885 and *Handb. Fl. Ceylon* 5: 127. 1900, *Grasses of Ceylon ...* 582. 1960.

I. myosotis Nees (*Panicum myosotis* (Nees) Steud.)

Indonesia, Southeast Asia, the Philippines. See *Hooker's Journal of Botany and Kew Garden Miscellany* 2: 98. 1850, *Synopsis Plantarum Glumacearum* 1: 96. 1854, *Bulletin de l'Herbier Boissier &*: 721. 1899 and *Philippine Journal of Science* 5: 168. 1910, *Botanical Magazine* (Tokyo) 38(447): 58. 1924, *Reinwardtia* 2(2): 286. 1953.

I. mysorensis Sundararaghavan

India, Karnataka. Rare species, annual, weak, delicate, erect, softly hirsute leaf blades ovate to ovate-elliptic, leaf sheaths hirsute, loose panicle, globose spikelets, glumes hispid to hirsute on back, lemmas concave and coriaceous, in moist areas, rocky crevices, see *Indian Forester* 97(6): 304-307, pl. 1. 1971.

I. nipponensis Ohwi

Korea, Southeast Asia, Taiwan, China. Understory species, see *Botanical Magazine* 38(447): 58. 1924, *Acta Phytotaxonomica et Geobotanica* 4(1): 30-31. 1935, *Flora of Japan supplement* 933. 1936.

I. nipponensis Ohwi var. *kiangsiensis* Keng f.

Southeast Asia. See *Acta Phytotaxonomica et Geobotanica* 4(1): 30-31. 1935, *Acta Phytotaxonomica Sinica* 10(1): 21. 1965.

I. nipponensis Ohwi var. *minor* (Honda) Nemoto (*Isachne myosotis* var. *minor* Honda)

Southeast Asia. See *Botanical Magazine* 38(447): 58. 1924, *Acta Phytotaxonomica et Geobotanica* 4(1): 30-31. 1935, *Flora of Japan supplement* 933. 1936, *Acta Phytotaxonomica Sinica* 10(1): 21. 1965.

I. oreades (Domin) Bor (*Panicum aequiglume* Hook.f., nom. illeg., non *Panicum aequiglume* Hack. & Arechav.; *Panicum oreades* Domin)

India, Tamil Nadu. Rare species, perennial, ascending, leaf blades lanceolate and hirsute, panicle effuse with spreading branches, spikelets acute or obovoid, florets included, glumes acute-obtuse and smooth, allied to *Isachne globosa*, see *The Flora of British India* 7: 44. 1896 and *Bibliotheca Botanica* 85: 297. 1915, *Grasses of Burma, Ceylon, India and Pakistan (excluding Bambuseae)* 582. 1960.

I. pallens Hillebr.

U.S., Hawaii. Woods, see *Flora of the Hawaiian Islands* 504. 1888.

in English: Kauai blood grass

I. pangrangensis Zollinger & Moritzi (also spelled *pangerangensis*) (*Isachne firmula* Büse; *Isachne pangerangensis* Zoll. & Moritzi; *Panicum rhabdinum* Steud.; *Panicum rhignon* Steud.) (named after Gunung Gede-Pangrango, near Bogor, West Java, Indonesia) (from the Greek *rhabdos* “a rod, stick, a magic wand”; Greek *rhigoo* “to be rigid, to be cold,” *rhigos* “cold, frost”)

Southeast Asia, Indonesia. Tiny highland grass, found in meadow and grassland areas, subalpine, see *Systematisches Verzeichniss der von H. Zollinger in den Jahren 1842-1844* 102. 1845-1846, *Plantae Junghuhnianae* 3: 288, 379. 1854, *Synopsis Plantarum Glumacearum* 1: 95-96. 1854 and *Philippine Journal of Science* 3: 167. 1908, *Blumea* 3: 471. 1940, *Blumea* 4(3): 530. 1941, *Reinwardtia* 2(2): 288, f. 9b. 1953.

I. polygonoides (Lam.) Döll (*Isachne trachyspermum* (Nees) Nees; *Isachne trachyspermum* (Nees) Balansa, nom. illeg., non *Isachne trachyspermum* (Nees) Nees; *Panicum parviflorum* R. Br.; *Panicum polygonoides* Lam.; *Panicum polygonoides* Müll. Hal., nom. illeg., non *Panicum polygonoides* Lam.; *Panicum trachyspermum* Nees)

Venezuela, Bolivia, Peru, Costa Rica, Mexico, Guatemala, Brazil. Annual, aquatic or semiaquatic, emergent, decumbent, ascending, prostrate, forming colonies, leaf blades narrowly ovate, light green inflorescence, ovate panicle with right-angled or reflexed stiff branches, spikelets orbicular, lower lemma elliptic and membranous, upper lemma coriaceous, encountered in wetlands, inundated fields, marshy places, swampy grassland, in or near water, shallow water, riverbanks, stream margin, see *Encyclopédie Méthodique, Botanique* 4: 742. 1798, *Prodromus Florae Novae Hollandiae* 192. 1810, *Flora Brasiliensis seu Enumeratio Plantarum* 2: 212. 1829, Berthold Carl Seemann (1825-1871), “Abstract of a journal kept during the voyage of *H.M.S. Herald*.” Hook., *J. Bot. Kew Gdn. Misc.* 4: 18-26, 82-92, 212-217, 238-242. 1852, *The Botany of the Voyage of H.M.S. Herald, under the Command of Captain Henry Kellett, R.N., C.B., during the Years 1845-1851*. Published under the authority of the Lords Commissioners of the Admiralty by Berthold Seemann ... naturalist of the expedition. 224. London 1852-1857 [Gramineae by William Munro and Nees], *Botanische Zeitung, Berlin* 19(44): 323. 1861, *Flora Brasiliensis* 2(2): 273. 1877, *Journal de Botanique (Morot)* 4: 137. 1890 and *Monogr. Digitalia* 523. 1950, *Fieldiana, Botany* 24(2): 38-331. 1955, *Ceiba* 19(1): 1-118. 1975, *Willdenowia* 11(2): 333-341. 1981, *Flora Mesoamericana* 6: 376-377. 1994, M.J. Balick, M.H. Nee & D.E. Atha, “Checklist of the vascular plants of Belize” *Memoirs of the New York Botanical Garden* 85: i-ix, 1-246. 2000.

I. puberula Bor

Thailand. Indeterminate species, see *Dansk Botanisk Arkiv* 23: 147. 1965.

I. pubescens Swallen

Guatemala. Sprawling, scandent, trailing, edge of forest, clearings, wet places, rocky riverbanks, roadbanks, along roadsides, see *Contributions from the United States National Herbarium* 29(9): 426. 1950.

I. pulchella Roth ex Roemer & Schultes (*Isachne pulchella* Roth, nom. illeg., non *Isachne pulchella* Roth ex Roem. & Schult.; *Sphaerocaryum pulchellum* (Roth ex Roem. & Schult.) Merr.; *Sphaerocaryum pulchellum* A. Camus, nom. illeg., non *Sphaerocaryum pulchellum* (Roth ex Roem. & Schult.) Merr.; *Studelella pulchella* (Roth ex Roem. & Schult.) Honda)

Tropical Asia, Southeast Asia, Australia. Annual, aquatic, ascending, slender, branched, stoloniferous, often glandular, leaf blades ovate-lanceolate and hirsute, narrow and purplish panicle with spreading branches, spikelets globose, glumes unequal and glabrous, found in creek, confused with *Isachne miliacea*, see *Systema Vegetabilium* 2: 476. 1817, *Mant.* 2: 265. 1824 and *Philippine Journal of Science* 11: 52. 1916, *Flore Générale de l'Indo-Chine* 7: 514. 1923, *Journal of the Faculty of Science: University of Tokyo, Botany* 3(2): 259. 1930, *Kew Bulletin* 321-322. 1952, *Fl. Malaya* 3: 120. 1971.

I. pygmaea Griseb.

Jamaica, the Caribbean. Rare species, see *Flora of the British West Indian Islands* 553. 1864 and A.S. Hitchcock, *Manual of the Grasses of the West Indies* 1936, C.D. Adams, *Flowering Plants of Jamaica* 1972.

I. pynaertii Vanderyst (*Isachne buettneri* Hack.)

Africa. See *Verhandlungen des Botanischen Vereins für die Provinz Brandenburg und die angrenzenden Länder* 31: 69. 1889 and *La Compagnie du Kasai*, à l'Exposition de Tervuren en 1910. Bruxelles 1910, M.W. Hilton-Simpson, *Land and Peoples of the Kasai*. Being a narrative of a two years' journey among the cannibals of the Equatorial Forest and other savage tribes of the south-western Congo. London 1911, E. Torday and T.A. Joyce, *Notes ethnographiques sur les Populations habitant les Bassins du Kasai et du Kwango Oriental*. Bruxelles 1922, *Bulletin agricole du Congo Belge* 16: 688. 1925.

I. refracta Hook.f.

Africa, Cameroon. See *Journal of the Linnean Society, Botany* 1: 227. 1864.

I. rigens (Sw.) Trin. (*Isachne ligulata* Swallen; *Panicum rigens* Sw.; *Panicum rigens* Mez, nom. illeg., non *Panicum rigens* Sw.; *Panicum rigens* Salzm. ex Steud., nom. illeg., non *Panicum rigens* Sw.)

Central and South America. Caespitose, montane to alpine, herbaceous, erect, decumbent, scrambling, trailing, sprawling, scandent, rooting at the nodes, forming colonies or large stands, growing in open areas, along roadsides, roadbanks, subpáramos, slope, primary forest, see *Nova Genera et Species Plantarum seu Prodrum* 23. 1788, *De Graminibus Paniceis* 252. 1826, *Synopsis Plantarum Glumacearum* 1: 76. 1854 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 34(1): 141. 1904, James Francis Macbride (1892-1976), "Gramineae. Flora of Peru" *Field Museum of Natural History, Botanical Series* 13(1/1): 96-261. 1936, *Caldasia* 2(8): 305. 1943, *Fieldiana, Botany* 24(2): 38-331. 1955, *Flowering Plants of Jamaica* 1972.

I. rigida Nees ex Miq. (*Isachne rigida* Hook.f.)

Dutch Indies. See *Flora van Nederlandsch Indië* 3: 461. 1857, *The Flora of British India* 7: 24. 1896.

in Thailand: yaa phak kai, ya phak khai, ya phak kai

I. rigidifolia (Poir.) Urb. (*Agrostis rigidifolia* Poir.; *Ichnanthus trinii* (Kunth) Pilg.; *Milium rigidifolium* (Poir.) Roem. & Schult.; *Panicum rigidifolium* (Poir.) Kunth; *Panicum rigidifolium* Trin., nom. illeg., non *Panicum rigidifolium* (Poir.) Kunth; *Panicum trinii* Kunth)

West Indies, the Caribbean. Climbing, see *Encyclopédie Méthodique, Botanique* Suppl. 1: 257. 1810, *Systema Vegetabilium* 2: 319. 1817, *Révision des Graminées* 1: 37. 1829, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 88. 1833 and *Symbolae Antillarum* 4: 85. 1903, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 11(104): 245. 1931, *Flora of the Netherlands Antilles* 1: 121-203. 1963, *Flora of the Lesser Antilles, Leeward and Windward Islands* 3: 25-220. 1979.

in Martinique: petit calumet

I. salzmännii (Trin. ex Steud.) Renvoize (*Isachne ventricosa* (Lam.) Döll; *Panicum brizoides* Salzm. ex Döll; *Panicum salzmännii* Trin. ex Steud.; *Panicum ventricosum* Lam.)

South America. Annual, decumbent, rooting at the lower nodes, leaf blades linear-lanceolate acute, panicle oblong with branches flexuous and ascending, spikelets orbicular, lower floret male, upper floret female, in wet places, see *Encyclopédie Méthodique, Botanique* 1: 173. 1791, *Synopsis Plantarum Glumacearum* 1: 95. 1854, *Flora Brasiliensis* 2(2): 274, pl. 35. 1877 and *Kew Bulletin* 39(1): 184. 1984, *The Grasses of Bahia* 99. 1984.

I. sapini Vanderyst (*Panicum sapini* (Vanderyst) Robyns)

Africa. Marshy places, see *Bulletin agricole du Congo Belge* 16: 688. 1925, *Mémoires de l'Institut Royal Colonial Belge; Section des Sciences Naturelles et Médicales* 34. 1932.

I. scabrosa Hook.f.

India, Khasi Hills. Perennial, erect or suberect, rambling, geniculate, leaf sheaths loose and hirsute, leaf blades linear-lanceolate and acuminate, leaves rigid and very scabrous, panicle compound and effuse with pyramidal branches, spikelets globose and deciduous, grows in shady places, along riverbanks and streams, see *Enum. Fl. Pl. Nepal* 1: 136. 1978.

I. schmidtii Hack.

Thailand. Along streams and riverbanks, see *Botanisk Tidsskrift* 24: 99. 1901.

I. semitalis Ridl.

Malay Peninsula. See *The Flora of the Malay Peninsula* 5: 237. 1925.

I. setosa C.E.C. Fisch. (*Isachne setosa* Hook.f.)

India, Karnataka, Tamil Nadu, Western Ghats, Kerala. Rare species, annual, low, slender, erect, fibrous roots, leaf sheaths hirsute, leaf blades ovate to ovate-elliptic, narrow panicle with stiff branches, spikelets obovoid-elliptic, glumes caudate-acuminate, upper glume longer than the floret, montane grasslands, bogs, related to *Isachne bourneorum*, see *Kew Bulletin* 1932: 247. 1932.

I. sikkimensis Bor

India, Sikkim. Annual, weak, erect, decumbent, leaf sheaths glabrous or sparsely hirsute, softly hairy leaf blades elliptic or linear-lanceolate, panicle effuse with flexuous branches, pedicels without glandular bands, spikelets smooth and elliptic, florets included, lemmas concave, see *Taxon* 21: 340-341. 1972, *Kew Bulletin* 115. 1949, *Cytologia* 40: 453-462. 1975, *Enum. Fl. Pl. Nepal* 1: 136. 1978.

I. smitinandiana A. Camus (named after the botanist Tem Smitinand, 1920-1995, orchid taxonomist, plant collector with M. Raymond and also with Hermann Otto Sleumer (1906-1993) and B. Hansen, Director of the Royal Thailand Department of Forestry, wrote *Thai Plant Names*. Royal Forest Department. Bangkok 1980, coauthor with Gunnar Seidenfaden of *The Orchids of Thailand*. 1959-1965; see I.H. Vegter, *Index Herbariorum*. Part II (6), *Collectors S. Regnum Vegetabile* vol. 114. 1986)

Southeast Asia, Thailand. Wet places, rocky sites, see *Notulae Systematicae. Herbarium du Museum de Paris* 14: 256. 1952.

in Thailand: yaa naai tem, ya nai tem

I. swaminathanii Ved Prakash & S.K. Jain

India, Maharashtra. Perennial, erect, decumbent, robust, stiff, leaf blades linear-lanceolate to broadly-lanceolate, effuse panicle pyramidal with flexuous branches, spikelets globose, glumes glabrous or setose, grows in damp and shady places, sand, rocky areas, see *Proceedings of the Indian Academy of Sciences. Plant Sciences* 92(1): 19-22. 1983.

I. veldkampii Bhatt & Nagendran

India, Maharashtra. Annual, very low, erect, leaf sheaths and blades glabrous, leaf blades ovate, panicle branches glandular, spikelets globose, glumes minutely hairy, coriaceous lemmas elliptic and concave with woolly hairs at the base, see *Curr. Sci.* 52: 258-259. 1983.

I. walkeri (Arn. ex Steud.) Wight & Arn. ex Thw. (*Isachne nilagirica* Hochst.; *Isachne walkeri* (Arn. ex Steud.) Wight & Arn. ex Hook.f.; *Panicum walkeri* Arn. ex Steudel)

Southern India, Sri Lanka. Perennial, creeping, stout, erect or ascending, decumbent, robust, tangled, rooting at the nodes, leaf sheaths rounded and more or less hirsute to ciliate, leaf blades acuminate and linear-lanceolate to linear, long slender roots, panicle very lax with spreading pyramidal branches, few-flowered, ovoid spikelets glabrous to pubescent, lower floret perfect, upper floret perfect or rudimentary, glumes glabrous or sparsely hairy on back, stigmas purple, found in open areas, montane forests, underwood, openings, along trails, shade or partial shade, slopes, see *Synopsis Plantarum Glumacearum* 1: 97. 1854, *Enum. Pl. Zeyl.* 361. 1864, *A Systematic Catalogue of the Flowering Plants and Ferns in Ceylon* 104. 1885, *The Flora of British India* 7: 26. 1896 and *Handb. Fl. Ceylon* 5: 129. 1900, *Grasses of Ceylon* 110. 1956, *Grasses of Burma ...* 582. 1960.

Isalus J. Phipps = *Tristachya* Nees

About three species, Madagascar. Panicoideae, Panicodae, Arundinelleae, perennial, herbaceous, unbranched, caespitose, leafy, auricles absent, ligule fringed or ciliate, plants bisexual, open inflorescence paniculate, spikelets in triplets, two subequal glumes 3-nerved, palea present, 3 stamens, ovary hairy, 2 stigmas, sometimes referred to *Tristachya*, type *Isalus humbertii* (A. Camus) J.B. Phipps, see *Flora Brasiliensis seu Enumeratio Plantarum* 2: 458. 1829 and *N. Amer. Fl.* 17(8): 578. 1939, *Kirkia* 5: 229-234, 235-258. 1966, *Kew Bulletin* 21(1): 119-124. 1967, *Kew Bulletin* 26(1): 111-123. 1971, *Kew Bulletin* 26(1): 111-123. 1971, *Flora Mesoamericana* 6: 378. 1994, *Contributions from the United States National Herbarium* 46: 627-628. 2003.

Species

I. betsileensis (A. Camus) J.B. Phipps (*Danthoniopsis betsileensis* (A. Camus) A. Camus; *Tristachya betsileensis* A. Camus)

Madagascar. See *Bulletin de la Société Botanique de France* 104: 160. 1957, *Bulletin de la Société Botanique de France* 105: 246. 1958, *Kirkia* 5(2): 233. 1966, *Kew Bulletin* 26(1): 111-123. 1971.

I. humbertii (A. Camus) J.B. Phipps (*Danthoniopsis humbertii* (A. Camus) Conert; *Tristachya humbertii* A. Camus)

Madagascar. See *Bulletin de la Société Botanique de France* 73: 401. 1926, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 77(2-3): 324. 1957, *Kirkia* 5(2): 233. 1966, *Kew Bulletin* 26(1): 111-123. 1971.

I. isalensis (A. Camus) J.B. Phipps (*Danthoniopsis isalensis* A. Camus)

Madagascar. See *Bulletin de la Société Botanique de France* 105: 245. 1958, *Kirkia* 5(2): 233. 1966, *Kew Bulletin* 26(1): 111-123. 1971.

Ischaemopogon Griseb. = *Ischaemum* L.

Greek *ischaimos* “staunching blood, styptic” and *pogon* “beard,” Theophrastus (*HP.* 9.15.3) applied *ischaimos* to a plant used as a styptic, a species of *Andropogon*.

Panicoideae, Andropogonodae, Andropogoneae, Andropogoninae, or Panicoideae, Andropogoneae, Ischaeminae, type *Ischaemopogon latifolius* (Spreng.) Griseb., see *Species Plantarum* 2: 1049. 1753, *Flora of the British West Indian Islands* 560. 1864 and *N. Amer. Fl.* 17: 94. 1909, *Flora Mesoamericana* 6: 386-387. 1994, *Contributions from the United States National Herbarium* 46: 275-276. 2003.

Ischaemum L. = *Argopogon* Mimeur, *Colladoa* Cav., *Digastrum* (Hack.) A. Camus, *Ischaemopogon* Griseb., *Ischoemum* J. St.-Hil., *Meoschium* P. Beauv., *Schoenanthus* Adans.

From the Latin *ischaemon* for a kind of styptic herb (Plinius), Greek *ischo*, *ischein* “to restrain, hold, check” and *haima* “blood,” *ischaimos* “staunching blood, styptic,” the seeds of some species were used to stop bleeding; see Carl Linnaeus, *Species Plantarum*. 1049. 1753 and *Genera Plantarum*. Edition 5. 469. 1754.

Some 60-65/73 species, tropics and subtropics, mostly in Asia. Panicoideae, Andropogonodae, Andropogoneae, Andropogoninae, or Panicoideae, Andropogoneae, Ischaeminae, perennial or sometimes annual, herbaceous, erect or scrambling, sprawling, sometimes decumbent, rhizomatous or stoloniferous, branched or unbranched, internodes solid or hollow, auricles present or absent, ligule membranous, leaf sheaths keeled, leaf blades linear or linear-lanceolate, leaves apex acuminate, plants bisexual, inflorescence terminal and axillary, appressed spike-like racemes paired or occasionally digitate, on the back of the raceme a prominent rachis segment, spikelets paired and dissimilar, pedicelled spikelet variable, sessile spikelets dorsally flattened, rachis joints thickened, 2 florets, lower floret usually staminate or sterile, upper floret perfect or pistillate, glumes subequal, lower glume 7- to 11-nerved and often

furrowed, upper glume 5- to 11-nerved, upper lemma nearly always awned, palea present, 2 lodicules free and fleshy, 3 stamens, ovary glabrous, 2 stigmas, weed species, native pasture species, sometimes causes milk taint, grows in seasonally wet or waterlogged areas, near water, savannah, rainforest, damp places, marshy areas and stream banks, coastal sand, coastal dunes, sandy soils, poor soils, shady places or open habitats, many species with taxonomic status questionable, genus difficult to distinguish from *Andropogon*, type *Ischaemum muticum* L., see *Species Plantarum* edition 1, 2: 1049. 1753, *Familles des Plantes* 2: 38, 602. 1763, *Essai d'une Nouvelle Agrostographie* 111, 167. 1812, *Icones et Descriptiones Plantarum, quae aut sponte ...* 5: 37, t. 460. 1799, *Flora of the British West Indian Islands* 560. 1864, *Monographiae Phanerogamarum* 6: 200-253. 1889 and *N. Amer. Fl.* 17: 94. 1909, *Bulletin du Muséum d'Histoire Naturelle* 27: 372. 1921, *Revue internationale de botanique appliquée et d'agriculture tropicale* 31: 211, 213. 1951, *Grasses of Burma ...* 171-186. 1960, *Annals of the Missouri Botanical Garden* 75: 866-873. 1988, *Bothalia* 21(2): 163-170. 1991, *Flora Mesoamericana* 6: 386-387. 1994, *Plant, Cell and Environment* 25(4): 557-566. Apr 2002, *Functional Ecology* 14(3): 388-396. June 2000, Lilliana M. Giussani, J. Hugo Cota-Sánchez, Fernando O. Zuloaga and Elizabeth A. Kellogg, "A molecular phylogeny of the grass subfamily Panicoideae (Poaceae) shows multiple origins of C4 photosynthesis." *Am. J. Bot.* 88: 1993-2012. 2001, *Global Change Biology* 7(6): 693-707. Species

I. abrahamii Ravi, Mohanan & Rajesh (dedicated to Dr. A. Abraham, the founder-Director of the Tropical Botanic Garden and Research Institute (TBGRI) in Palode near Thiruvananthapuram in Kerala)

India, Kerala. Perennial, nonaquatic, tufted, robust, erect to decumbent, rooting at the lower nodes, long and silvery-hairy racemes, grows in wet areas, margin of water channels, allied to *Ischaemum elimalayanum* Sreek. et al., see N. Ravi, N. Mohanan, T. Shaju, M.S. Kiran Raj and R. Rajesh, "Three more new species of *Ischaemum* L. (Poaceae) from Kerala, India." in *Bot. Bull. Acad. Sin.* 42: 223-230. 2001.

I. afrum (J.F. Gmelin) Dandy (*Andropogon afer* J.F. Gmel.; *Andropogon brachyatherus* Hochst.; *Andropogon pilosus* Klein ex Willd.; *Ischaemum brachyatherum* (Hochst.) Fenzl ex Hack.; *Ischaemum glaucostachyum* Stapf; *Ischaemum pilosum* (Klein ex Willd.) Wight)

Tropical Africa, Kalahari, India. Perennial, wiry, glaucous, drooping, densely tufted, erect, clump forming, with a scaly and strong rhizome, sheath glabrous and round, ligule a membrane hairy or glabrous, inflorescence terminal, slender and subdigitate racemes rarely solitary, spikelets paired, pedicellate spikelet usually sterile and awnless or rarely awned, sessile spikelet lanceolate, short and bent awn on each spikelet, glumes hairy, lower glume of sessile spikelets concave and 2-keeled, lower lemma enclosing a male floret, cultivated or naturalized, succulent, a serious weed, grass for hay-making, gives a very rough hay, fodder, useful grazing especially when green before flowering, moderately relished by cattle, edible grain, ruderal, used as thatching material for huts and houses, growing in heavy black turf, clay soil, black soil, dry bushland, cultivated ground, near water, drained plains, rocky riverbanks, savannah, grassland, crevices, slopes, see *Systema Naturae ... editio decima tertia, aucta, reformata* 2: 166. 1791 and *Flora Capensis* 7: 328. 1898 and *The Flowering Plants of the Anglo-Egyptian Sudan* 3: 476. f. 120. 1956.

in English: turf grass

in India: ghod kunda, kanigyanhullu, khavo, khund, kunda, nuth

in Nigeria: dadeppure, kaashin beeraa

in South Africa: baangras, lidjiesrooigras, turfgras, tweevingergras

in Sudan: boos, ankoog

Tropical and subtropical Asia, Sumatra, China. Perennial, very variable in all its parts, caespitose, erect or ascending, decumbent at the base, sprawling, often rooting at the lower nodes, often branched at the base, auricles ciliate, leaf blades linear to linear-lanceolate, leaf sheaths glabrous to densely villous, inflorescence appressed, racemes two, lower floret staminate, upper floret perfect, found in

secondary forest, lawns, disturbed areas, pastures, lowlands, ponds, grassy stream banks, see *Species Plantarum* 2: 1049. 1753, *Observationes Botanicae* 6: 35. 1791, *Icones Stirpium Rariorum* 1, t. 1. 1791, *Encyclopédie Méthodique. I. polystachyum Presl var. *hillii* Fosberg & Sachet (P.J.R. Hill)

Caroline Islands. See *Reliquiae Haenkeanae* 1(4-5): 328. 1830 and *Micronesica* 18(2): 66-67. 1982[1984].

I. polystachyum Presl var. ***polystachyum*** (*Ischaemum digitatum* var. *polystachyum* (J. Presl) Hack.)

Guam. Endangered species, see *Reliquiae Haenkeanae* 1(4-5): 328. 1830, *Monographiae Phanerogamarum* 6: 233. 1889.

I. raizadae Hemadri & Billore

India, Maharashtra. Rare and threatened species, annual, erect, leaf blades linear-lanceolate, inflorescence of two racemes, sessile spikelet lanceolate, grows on rocks, along streams, rocky crevices, near water, similar to *Ischaemum kingii* Hook.f. and *Ischaemum diplopogon* Hook.f., see *Indian Forester* 96(4): 318-321. 1970, M.P. Nayar & A.R.K. Sastry (eds.) *Red Data Book of Indian Plants*. vol. 2: 189. Calcutta, Botanical Survey of India 1988.

I. rangacharianum C.E.C. Fischer (*Ischaemum aristatum* Rang., nom. illeg., non *Ischaemum aristatum* L.) (Ranga Acharyar)

India. Annual, erect, low fodder value, see Kadambi Rangachari, *A Handbook of Some South Indian Grasses* 151.

Chennai 1921, C.E.C. Fischer, "New little known plants from south India: II." *Kew Bulletin* 1933: 352-353. 1933, N. Ravi, N. Mohanan, T. Shaju, M.S. Kiran Raj and R. Rajesh, "Three more new species of *Ischaemum* L. (Poaceae) from Kerala, India." in *Bot. Bull. Acad. Sin.* 42: 223-230. 2001.

in India: chenkode pullu

I. rivale Hack. (*Ischaemum pilosum* Nees ex Trimen, nom. nud., non (Klein) Hackel; *Spodiopogon rivalis* (Hack.) Thwaites ex Ferguson)

Sri Lanka. Perennial, much-branched, ligule very short, leaf sheaths glabrous with margins ciliate, leaf blades linear-lanceolate, 2-4 racemes, sessile spikelets with lower floret staminate or sterile and upper floret perfect or pistillate, pedicellate spikelets with lower floret staminate or sterile and upper floret pistillate, see *Species Plantarum* 2: 1049. 1753, *A Systematic Catalogue of the Flowering Plants and Ferns in Ceylon* 107. 1885, *Monographiae Phanerogamarum* 6: 228. 1889 and *Handb. Fl. Ceylon* 5: 217. 1900, *Grasses of Ceylon* 176. 1956, *Grasses of Burma ...* 184. 1960.

I. rugosum Salisb. (*Andropogon arnottianus* (Nees) Steud.; *Andropogon griffithsiae* (Nees ex Steud.) Steud.; *Andropogon rugosus* Steud.; *Andropogon segetum* (Trin.) Steud.; *Andropogon tong-dong* Steud.; *Colladoa distachya* Cav., also spelled *distachia*; *Ischaemum colladoa* Spreng.; *Ischaemum rugosum* Gaertn., nom. illeg., non *Ischaemum rugosum* Salisb.; *Ischaemum rugosum* var. *distachyum* (Cav.) Merr.; *Ischaemum rugosum* var. *segetum* (Trin.) Hack.; *Ischaemum segetum* Trin.; *Meoschium arnottianum* Nees, *Meoschium griffithii* Nees & Arn.; *Meoschium griffithsiae* Nees ex Steud.; *Meoschium royleanum* Nees ex Steud.; *Meoschium rugosum* (Salisb.) Nees; *Meoschium rugosum* Wall.; *Meoschium wightianum* Nees)

Tropical and temperate Asia. Annual or perennial, herbaceous, very variable, straggling, erect or strongly geniculate at the base, ascending, decumbent and rooting at the lower nodes, emergent, robustly tufted, often strongly branched at the base, purplish, leafy, bearded nodes, ligule glabrous or ciliolate, leaf sheath densely hairy and long-auricled, hairy leaves oblong to lanceolate, sheaths loose and rather inflated, inflorescence terminal and well exerted, racemes paired arising from the top of the culms, sessile spikelet 2-flowered, lower floret staminate, upper floret perfect, lower glume of sessile spikelet strongly transversely ribbed and hard, slender and twisted awn, pedicellate spikelets usually developed often rudimentary, its roots sometimes aerial, sometimes the grain is used as food, native pasture species, valued for grazing, animal food, good forage and fodder, eaten by cattle and horses when young and fresh, also used as hay, invasive plant, potential seed contaminant, naturalized, in Malaysia infests rubber and vegetables, bad and noxious weed of ricefields and irrigation ditches, young

plants very similar in appearance to rice, growing in water, moist and wet habitats, low-lying black soil, in open and wet grasslands, tank margins, in damp places along stream banks and marshy areas, in roadside ditch, roadside gravel, edge of road, drainage ditches, at field edge, areas permanently flooded with water, see *Icones Stirpium Rariorum* 1, pl. 1. 1791, *Icones et Descriptiones Plantarum, quae aut sponte ...* 5: 37. t. 460. 1799, *Supplementum Carpologicae* 3: 1, t. 1. 1805, *Systema Vegetabilium, editio decima sexta* 1: 298. 1825, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. I. semisagittatum Roxb. var. ***dasyanthum*** Hack.

Asia. See *Monographiae Phanerogamarum* 6: 209. 1889.

I. timorensis Kunth (*Andropogon asthenos* Steud.; *Andropogon blumii* Nees ex Steud.; *Andropogon timorensis* (Kunth) Steud.; *Ischaemum indicum* (Houtt.) Merr.; *Ischaemum tenellum* Roxb.; *Phleum indicum* Houtt.; *Spodiopogon blumii* Nees ex Steud.)

Tropical and temperate Asia, India, Sri Lanka. Perennial or annual, often aromatic, much-branched, slender, herbaceous, hollow, glabrous, erect, decumbent, straggling, scrambling, spreading, creeping, slanting, stoloniferous to substoloniferous, shallow rooted, sometimes rooting at the lower nodes, ligule a short fringed membrane, leaf sheaths hairy and fringed, blade stiff, inflorescence well exerted composed of 2-3 racemes, axillary and terminal flowering shoots, 2 flowers, spikelets paired alternate on one side of the rachis, lower floret male, upper floret bisexual, keel of

the upper glume not winged, palea hyaline, useful forage grass for cattle, fodder readily eaten by animals, well grazed by horses and sheep, used as pasture grass in more humid areas, invasive, noxious weed species aggressive and difficult to eradicate, naturalized, useful for erosion control, common in open grassy places, terraces, at forest edge, ditches, tea plantations, cleared forests, along roadsides, forest margins, moist areas, in fields along road, in pastures, bare or disturbed areas, similar to *Ischaemum aristatum* L., see *Species Plantarum* 2: 1049. 1753, *Natuurlijke Historie* 13: 198, t. 90, f. 2. 1782, *Exposition des Familles Naturelles* 1: 78. 1805, *Flora Indica; or Descriptions ...* 1: 324. 1820, *Révision des Graminées* 369, t. 98. 1830, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. I. timorensis Kunth var. ***zeylanicum*** Hack. (*Ischaemum timorensis* var. *petiolatum* Hack. ex Trimen; *Ischaemum zeylanicum* Bor; *Spodiopogon obliquivalvis* sensu Thw., pro parte, non Nees)

Southern India, Sri Lanka. Perennial, herbaceous, sprawling, branched, usually decumbent, rooting at the lower nodes, ligule membranous, leaf blades lanceolate to elliptic-lanceolate, racemes two, lower florets staminate, upper florets perfect, in moist habitats, see *Révision des Graminées* 369, t. 98. 1830, *Enum. Pl. Zeyl.* 365. 1864, *A Systematic Catalogue of the Flowering Plants and Ferns in Ceylon* 107. 1885, *Monographiae Phanerogamarum* 6(1): 230. 1889 and *Grasses of Burma, Ceylon, India and Pakistan* 186. 1960.

I. triticeum R. Br. (*Andropogon triticiformis* Steud.)

Tropical southeastern Asia, Papua New Guinea, Australia, New South Wales, Queensland. Perennial, decumbent trailing, rooting and branching at the nodes, sheath glabrous, ligule hairy, racemes exserted, lower glume smooth and winged on the keels, upper glume keeled, lower lemma

male, pedicellate spikelets with both florets male, running cover plant, sand binder, coastal sand dunes, see *Prodromus Florae Novae Hollandiae* 205. 1810, *Synopsis Plantarum Glumacearum* 1: 376. 1854.

I. tropicum B.K. Simon

Australia, Northern Territory. See *Austrobaileya* 3(1): 88, f. 4. 1989.

I. tumidum Stapf ex Bor

Tropical Asia, India. Erosion control, see *Kew Bulletin* 1951: 450. 1952.

I. vembanadense Patil & D'Cruz

India, Kerala. Aquatic habit, see *Journal of the Bombay Natural History Society* 70(2): 324. 1973[1974], N. Ravi, N. Mohanan, T. Shaju, M.S. Kiran Raj and R. Rajesh, "Three more new species of *Ischaemum* L. (Poaceae) from Kerala, India." in *Bot. Bull. Acad. Sin.* 42: 223-230. 2001.

I. wayanadense Ravi, Mohanan & Shaju (Kerala, Wayanad District)

India, Kerala. Perennial, nonaquatic, tufted, reddish, creeping and spreading culms, rooting at the lower nodes, sessile spikelets with entire upper lemma, grows in wet areas, paddy field, margin of water channels, along roadsides, cultivated fields, allied to *Ischaemum vembanadense* Patil & D'Cruz, see N. Ravi, N. Mohanan, T. Shaju, M.S. Kiran Raj and R. Rajesh, "Three more new species of *Ischaemum* L. (Poaceae) from Kerala, India." in *Bot. Bull. Acad. Sin.* 42: 223-230. 2001.

Ischnanthus Roemer & Schultes =
Ichnanthus P. Beauv., *Ischnanthus* (Engler)
Tiegh. (Loranthaceae)

From the Greek *ischnos* "thin, slender" and *anthos* "a flower," Greek *ichnos* "a track, footprint, footstep."

Panicoideae, Paniceae, Paspalinae, see *Species Plantarum* 1: 55. 1753, *Essai d'une Nouvelle Agrostographie* 56, 57, t. 12, f. 1. 1812, *Systema Vegetabilium* 2: 28, 497. 1817, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 3,1(2-3): 195, 320. 1834, *Bulletin de la Société Botanique de France* 42: 260. 1895 and *Contributions from the United States National Herbarium* 46: 257-270, 276. 2003.

Ischnochloa Hook.f. = Microstegium Nees,
Pogonatherum P. Beauv.

From the Greek *ischnos* "thin, slender" and *chloe, chloa* "grass."

One species, Asia, Himalayas. Panicoideae, Andropogonodae, Andropogoneae, Andropogoninae, or Panicoideae,

Andropogoneae, Saccharinae, annual, herbaceous, small, short, delicate, leaf blades elliptic, ligule a fringed membrane, plants bisexual, inflorescence racemose, terminal raceme, spikelets in pairs compressed dorsiventrally, two glumes more or less equal, lower glume 2-keeled with ciliate keels, upper glume 3-nerved, palea present, 2 free and fleshy lodicules, 3 stamens, ovary glabrous, 2 stigmas, sometimes referred to *Microstegium*, type *Ischnochloa falconeri* Hook.f., see *Essai d'une Nouvelle Agrostographie* 56, 176, pl. 11, f. 7. 1812, *A Natural System of Botany* 2nd edition 447. 1836, *Hooker's Icones Plantarum* 25: t. 2466. 1896 and *Kew Bulletin* 35(4): 816. 1981, A.K. Goel and B.P. Niyal, "On the occurrence of a few grasses in Pakistan and Nepal (*Ischaemum impressum*, *Ischnochloa falconeri*, *Microstegium vimineum*, *Puccinellia tenuiflora*)." *Journal of Economic and Taxonomic Botany* 4(3): 43. 1983, *Contributions from the United States National Herbarium* 46: 276, 292, 540-541. 2003.

Species

I. monostachya L. Liou

Asia.

Ischnurus Balf.f. = *Lepturus* R. Br.

From the Greek *ischnos* "thin, slender" and *oura* "a tail."

One species, Socotra. Chloridoideae, Leptureae, annual, herbaceous, small, tufted, ligule a fringed membrane, plants bisexual, inflorescence spicate nondigitate, spikelets solitary, one glume per spikelet, upper glume obtuse, palea present, 2 stigmas, sometimes referred to *Lepturus*, type *Ischnurus pulchellus* Balf.f., see *Prodromus Florae Novae Hollandiae* 207. 1810, *Proceedings of the Royal Society of Edinburgh* 12: 98. 1883.

Species

I. pulchellus Balf.f. (*Lepturus pulchellus* (Balf.f.) Clayton)

Africa. See *Proceedings of the Royal Society of Edinburgh* 12: 98. 1883 and *Kew Bulletin* 37(3): 420. 1982.

Ischurochloa Büse = *Bambusa* Schreber

From the Greek *ischyros* "strong" and *chloe*, *chloa* "grass," some suggest from *ischoureo* "suffer from retention of urine."

Bambusoideae, Bambusodae, Bambuseae, or Bambusoideae, Bambuseae, Bambusinae, type *Ischurochloa spinosa* (Roxb. ex Buch.-Ham.) Büse, see *Genera Plantarum* 1: 236. 1789, *Species Plantarum. Editio quarta* 2: 245. 1799, *Plantae Junghuhnianae* 3: 389-390. 1854 and *Blumea*, Suppl. 3: 106. 1946, *Taxon* 6(7): 203. 1957, *Contributions from the United States National Herbarium* 39: 29-35. 2000.

Iseilema Andersson

From the Greek *isos* "equal" and *eilema* "a veil, covering, involucre," alluding to the four involucral spikelets; see Nils Johann Andersson (1821-1880), in *Nova Acta Regiae Societatis Scientiarum Upsaliensis* Ser. 3, 2: 250. Uppsala 1856.

About 20 species, Southeast Asia, India to Australia, Indomalayan region. Panicoideae, Andropogonodae, Andropogoneae, Andropogoninae, annual or perennial, tufted, slender, erect, branched, often wiry, shoots aromatic, auricles absent, leaf blades narrow and linear, ligule a very short membrane fringed or ciliate fringed, leaves and spathes often with conspicuous glands, plants bisexual, inflorescence a leafy false open panicle, each racemes with boat-shaped spatheoles at base, spikelets dissimilar, racemes with one sessile female spikelet and two male spikelets surrounded by four sterile spikelets, the sessile and homogamous spikelets fused at their base into a single unit, female spikelet sessile awned, lower floret reduced to a lemma, upper floret perfect, two glumes more or less equal, lower glume 8- to 10-nerved, upper glume 3-nerved, pedicellate spikelets staminate or barren, palea usually absent, 2 fleshy lodicules, 1-3 stamens, ovary glabrous, 2 stigmas, fruit compressed, weed species, native pasture species, quick-growing forage grass, highly palatable and nutritious fodder for short periods, attractive, useful for soil erosion control, growing on relatively fertile cracking clay soils, in natural grassland dominated by Mitchell grass (*Astrebla* spp.), tropical savannah, heavy soils, open habitats, open grassland, in Australia often associated with *Astrebla* F. Muell. ex Benth., resembling *Apluda*, type *Iseilema prostratum* (L.) Andersson, see *Nova Acta Regiae Societatis Scientiarum Upsaliensis* Ser. 3, 2: 250-251. 1856 and *Nature* 255: 220-221. 1975, *Australian Journal of Entomology* 38(3): 204-218. Aug 1999, *Austral. Ecology* 27(3): 284-290. June 2002, *Weed Biology and Management* 4(2): 86-94. June 2004, *Journal of Phytopathology* 153(1): 1-4. Jan 2005.

Species

I. anthephoroides Hack.

India, Madhya Pradesh, Asia tropical. Annual, good fodder, should be fed green before flowering or in the flowering stage, see *Monographiae Phanerogamarum* 6: 683. 1889.

in India: bhathi, bhuri, chengalli gaddi, fudali, fudali bhati, gadru, garar musyal, jejjegyaan hullu, jejjegyan hullu, jejjegyanhullu, masuri, musar, mushel, tambad gota, thenggaai nari pul

I. calvum C.E. Hubb.

Australia. See *Hooker's Icones Plantarum* 33: t. 3286. 1935.

I. ciliatum C.E. Hubb.

Australia. See *Hooker's Icones Plantarum* 33: t. 3286. 1935.

Australia. See *Hooker's Icones Plantarum* 33: t. 3286. 1935.

I. dolichotrichum C.E. Hubb. (Greek *dolichos* "long" and *thrix*, *trichos* "hair")

Australia, Queensland, Northern Territory. Annual, dwarf, aromatic, leaves and the acutely keeled spathes with conspicuous glands, outer spikelets with white silky hairs at the base, female spikelet sessile and lanceolate, see *Hooker's Icones Plantarum* 33: t. 3285. 1935.

in English: long-stemmed Flinders grass

I. eremaicum S.T. Blake (from the Greek *eremos* "lonely, solitary, desert, lone," *eremia* "desert," referring to the habitat)

South Australia, Queensland, Northern Territory, Western Australia. Annual, dwarf, erect, nonaromatic, leaves lanceolate and flat, racemes more or less exserted from the sheaths, the four involucrel spikelets each with two glumes, outer spikelets with white silky hairs at the base, female spikelet sessile and lanceolate, arid regions, useful for soil erosion control, see *Proceedings of the Royal Society of Queensland* 49: 83. 1938.

in English: Flinders grass

I. fragile S.T. Blake

Australia, Northern Territory. See *Proceedings of the Royal Society of Queensland* 49: 85. 1938.

I. holmesii S.T. Blake

Australia. See *Papers from the Department of Botany, University of Queensland* 2(3): 59. 1944.

I. laxum Hack. ex Duthie (*Iseilema laxum* Hack., nom. illeg., non *Iseilema laxum* Hack. ex Duthie)

Asia tropical, India, Tamil Nadu, Uttar Pradesh, Maharashtra, Andhra Pradesh, Gujarat, Kerala, Madhya Pradesh, Sri Lanka. Perennial and variable, weak, straggling, erect, ascending, tufted, leafy, simple or branched or sparingly branched, very slender, stout and hard rootstock sometimes shortly creeping, wiry root fibers, leaf blades flat, short ligule truncate and ciliate, leaves linear and soft, inflorescence a long and narrow linear false panicle, involucrel spikelets whorled, bisexual spikelets narrowly lanceolate, homogamous spikelets all pedicelled and staminate, pedicelled spikelet staminate, boat-shaped bracts, spatheoles without tubercles, useful grass, sweet scented when fresh, cut for fodder, forage, very palatable to cattle but not to sheep, used mainly for pasture but also for both hay and silage, much eaten by buffaloes, best before flowering, useful for erosion control, common in on seasonally waterlogged soils, swamps, low lying lands, heavy soils, black soils, canals, riverbanks, trenches, see *The Fodder Grasses of Northern India* 43. 1888, *Monographiae Phanerogamarum* 6: 682. 1889 and *Handb. Fl. Ceylon* 5: 251. 1900,

Grasses of Ceylon 199. 1956, *Grasses of Burma* ... 188. 1960.

in English: musal grass

in India: bharwan, botri jara, change, champ, chhat, dangers, dangeers, erra chengali gaddi, fuli, gandhi, gandi, gandwel, ghorayal, gonda, gondal, karar gandhel dungarko, katri, luinji, machaori, machauri, machi malwa, machuri, malwajari, masan, masel, masuri, moshi, musal, musar, musel, mushan, mushel, musial, musrut, pandasual, shata, tambit, tambrut, tenganaari pullu, thambur, thenga nari pillu, thengina naaru hullu, tikha lodan, tollu hanchi hullu

I. macratherum Domin (Greek *makros* "large, long" and *ather* "an awn, stalk, barb, bristle, chaff, spine, prickle")

Queensland, Northern Territory, Western Australia. Annual, dwarf, densely tufted, branched, erect to spreading at the base, stems reddish and glabrous, young shoots aromatic, leaves glandular near the margins and reddish, dense panicles with acutely keeled spathe, female spikelets awned, the raceme remains wrapped in its spatheole, useful for erosion control, generally not grazed when young, allied to *Iseilema vaginiflorum* Domin, usually on cracking clay soils and medium-textured red earths, palatable to stock when sufficient bulk has grown, see *Genera Graminum* 360-361. 1986.

in English: bull Flinders grass

I. membranaceum (Lindley) Domin (*Anthistiria membranacea* Lindley; *Iseilema actinostachys* Domin; *Iseilema mitchellii* Andersson)

Australia, South Australia, Queensland, Northern Territory, Western Australia, New South Wales. Annual, ephemeral, variable, dwarf, quick growing, tufted, glabrous, leafy, erect and branched, sometimes aromatic, stems greenish and sometimes reddish, leaf blades usually flat, ligule short and membranous, very small racemes very shortly bearded and exserted from the strongly keeled and papery spathes, the four involucrel spikelets sterile or male, female spikelet sessile and lanceolate, pedicellate spikelets male or sterile, grain borne among the small leaves, very palatable when young, high forage value, excellent and nutritious hay, spreads rapidly by seed, will tolerate temporary flooding, it does not stand heavy stocking, grows on heavy cracking clays, dry parts, gray clays, open grassland, see Sir Thomas Livingstone Mitchell (1792-1855), *Journal of an Expedition into the Interior of Tropical Australia, in Search of a Route from Sydney to the Gulf of Carpentaria* ... 88. London 1848 and *Bibliotheca Botanica* 85: 280. 1915.

in English: small Flinders grass, Flinders grass, Landsborough grass (named for the English (b. Ayrshire) plant collector William Landsborough, 1825-1886 (d. Caloundra, Queensland), farmer, Queensland explorer, sent plants to F. Mueller, son of Rev. David Landsborough (1779-1854, d. Ayrshire), wrote *Journal of Landsborough's Expedition from Carpentaria, in Search of Burke and Wills*. With a map

showing his route. Melbourne 1862 and *Landsborough's Exploration of Australia*. From Carpentaria to Melbourne, with special reference to the settlement of available country. Edited by James Stuart Laurie ..., with a *Systematic Arrangement of Carpentarian Plants*, by F. Mueller. London [1866]; see Tom Bergin, *In the Steps of Burke & Wills*. Sydney 1981; Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 411-412. London 1994; Jonathan Wantrup, *Australian Rare Books, 1788-1900*. 234-239. Hordern House, Sydney 1987)

I. prostratum (L.) Andersson (*Andropogon prostratus* L.; *Anthistiria prostrata* (L.) Willd.; *Anthistiria wightii* Nees ex Steud.; *Cymbopogon glandulosus* Spreng.; *Iseilema wightii* (Nees ex Steud.) Andersson)

India, Asia tropical, Sri Lanka. Perennial, tufted, straggling, often quite prostrate, thin, variable, leaf blades flat, linear false panicle spreading, homogamous spikelets all pedicelled and staminate, pedicelled spikelet staminate, smooth spatheoles tuberculate on the midnerve, clusters of spikelets usually exerted from the bracts, good fodder, best before flowering, useful grass, hay and silage, young plants with an unpleasant odour or sweet scented, found on heavy and light soils, low lying, black soil, swampy ground, sandy flats, see *Mantissa Plantarum* 2: 304. 1771, *Species Plantarum* 4: 901. 1806, *Plantarum Minus Cognitarum Pugillus* 2: 14. 1815, *Synopsis Plantarum Glumacearum* 1: 400. 1854, *Nova Acta Regiae Societatis Scientiarum Upsaliensis* Ser. 3, 2: 251. Uppsala 1856, *The Fodder Grasses of Northern India* 43. 1888, *Monographiae Phanerogamarum* 6: 682. 1889 and *Handb. Fl. Ceylon* 5: 251. 1900, *Grasses of Ceylon* 199. 1956, *Grasses of Burma* ... 188. 1960, *Journal of Cytology and Genetics* 20: 205-206. 1985.

in English: achi grass

in India: achi, buri, chhoti garpa, gandel, gandeli, gandheli, gandhi, ganni, gauni, ghania, ghod, ghor masan, ghora musan, gondral, mabil, mahals, moshi, musan, mushaa, mushad, musel, mussan, pulsu malwa gadi, sona, tambit, tambrut, ukri, yerra kala kasuvu

I. thorelii A. Camus

Southeast Asia. See *Bulletin du Muséum d'Histoire Naturelle* 24: 540. 1918.

in Thailand: yaa plong haang, ya plong hang

I. trichopus (Benth.) C.E. Hubb. (*Anthistiria membranacea* var. *trichopus* Benth.)

Australia. See *Flora Australiensis: A Description* ... 7: 544. 1878 and *Hooker's Icones Plantarum* 33: t. 3286. 1935.

I. vaginiflorum Domin (sheathed flowers, Latin *vagina*, *ae* "sheath, scabbard, the covering, husk")

Australia, Queensland. Annual, caespitose, coarse, branched, leafy, reddish or purple at the base, erect and spreading from the base, erect and geniculate at the base, leaves linear and more or less reddish, racemes enclosed by spathes and spatheoles, sterile involucre spikelets each with one glume, fertile sessile spikelet female and awned, pedicellate spikelets male or sterile, spatheole strongly indurated, seeds heavily, not aromatic or rarely, native pasture species, very palatable, grazed, palatable green or dry, not always palatable when coarse and dry, high forage value, makes excellent nutritious hay if cut early, an increaser species, useful for rangeland revegetation, allied to *Iseilema macratherum* Domin, similar to *Iseilema membranaceum* (Lindley) Domin, grows on heavy soils, semiarid and arid regions, red earths and cracking clay soils, open grassland, after heavy rains, see *Bibliotheca Botanica* 85: 281, t. 12, f. 2, t. 13, f. 1. 1915.

in English: red Flinders grass, red gulf grass, barcoo grass, Flinders grass

I. windersii C.E. Hubb. (after M. Winders, original collector)

Queensland, Northern Territory, Western Australia. Annual, dwarf, aromatic, erect to spreading, spathes glandular on keel, racemes exerted, female spikelet awned, dry tropical and subtropical regions, see *Hooker's Icones Plantarum* 33: t. 3284. 1935.

in English: scented Flinders grass

Ixalum Forst.f.

Ixalos, *ixalon*, epith. of the ibex, or bounding, springing, Greek *ixale* "goat's skin," see *Florulae Insularum Australium Prodrum* 92. 1786.

Ixophorus Schtdl. = Ixophorus Nash, Setaria P. Beauv.

From the Greek *ixos* "mistletoe, bird-lime" and *phoros* "bearing, carrying," referring to the single, sticky bristle.

About 1-3 species, Mexico. Panicoideae, Panicodae, Paniceae, or Panicoideae, Paniceae, Setariinae, annual or perennial, herbaceous, unbranched, caespitose, auricles absent, ligule a fringed membrane, plants bisexual, inflorescence spicate and open, spikelets borne singly and subtended by solitary bristles, second floret female-only, hermaphrodite florets absent, spikelets solitary, two glumes herbaceous very unequal, lower glume 3-nerved, upper glume 11-nerved, lemmas mucronate, lower lemma cartilaginous, palea winged keels clasping edge of upper floret, 2 free and fleshy lodicules, stamens 0, ovary glabrous, 2 red stigmas,

species of open habitats, weedy places, type *Ixophorus unisetus* (J. Presl) Schltldl., see *Species Plantarum* 1: 55. 1753, *Essai d'une Nouvelle Agrostographie* 51, 178. 1812, *Flora Brasiliensis seu Enumeratio Plantarum* 2: 237. 1829, *Reliquiae Haenkeanae* 1(4-5): 319. 1830, *Synopsis Plantarum Glumacearum* 1: 49. 1855 [1853], *Linnaea* 31(4): 420-422, 747. 1861-1863, *An Illustrated Flora of the Northern United States* 1: 125. 1896 and *Beiträge zur Biologie der Pflanzen* 10(1): 42. in Honduras: zacate blanco

in Mexico: hierba blanca de Honduras, Honduras, pitillo, zacate blanco

in Nicaragua: zacate chompipe

J

Jacquesfelia J. Phipps = *Danthoniopsis* Stapf

For the French botanist Henri Jacques-Félix, born 1907, explorer, plant collector in West Africa (Guinea and Ivory Coast), from 1930 to 1966 Services Agronomiques d'Outre-Mer, his writings include *La vie et la mort du Lac Tchad*. Rapports avec l'agriculture et l'élevage. [France. Ministère des Colonies. Direction de l'Agriculture, de l'Élevage et des Forêts. Bulletin agronomique. no. 3] Nogent-sur-Marne 1947 and *Géographie des dénudations et dégradations du sol au Cameroun. Conditions physiques et humaines*. [Ministère de la France d'Outre-Mer. Direction de l'Agriculture, etc. Section Technique d'Agriculture Tropicale. Bulletin scientifique. no. 3] Nogent-sur-Marne 1950; see Auguste Jean Baptiste Chevalier (1873-1956), *Flore vivante de l'Afrique Occidentale Française ... Les Polygalées* en collaboration avec M. H. Jacques-Félix. 1: xxvii-xxx. Paris 1938; F.N. Hepper and F. Neate, *Plant Collectors in West Africa*. 41. 1971.

Arundinelleae, type *Jacquesfelia dinteri* (Pilg.) J.B. Phipps, see *Hooker's Icones Plantarum* 31: t. 3075. 1916, *Kirkia* 4: 115. 1964, *Kirkia* 5: 235-258. 1966, *Kew Bulletin* 21(1): 119-124. 1967, *Kew Bulletin* 26(1): 111-123. 1971.

Jansenella Bor

After the Dutch botanist Pieter Jansen, 1882-1955, agrostologist, worked on Malesian grasses; see J.H. Barnhart, *Biographical notes upon botanists*. 2: 246. 1965; T.W. Bosser, compil., *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 195. 1972.

One species, India, Chennai, Assam, Sri Lanka. Panicoideae, Panicodae, Arundinelleae, annual, herbaceous, unbranched, not aromatic, weak, rooting at the lower nodes, leaf blades lanceolate, ligule short unfringed membrane, plants bisexual, inflorescence paniculate and contracted, small compact panicles, spikelets flattened and mostly paired, 2 florets, lower floret neuter, upper floret perfect with a twisted and geniculate awn, 2 glumes unequal to very unequal acuminate or awn-tipped, lower glume 3-nerved, upper glume 5-nerved, lemma of lower floret glabrous, lemma of upper floret ciliate bilobed, palea keels winged or palea wingless, 2 free lodicules, 3 stamens, ovary

glabrous, 2 stigmas, moist places, swamps, hills, related to *Arundinella* and *Danthoniopsis*, type *Jansenella griffithiana* (Müll. Stuttg.) Bor, see *Kew Bulletin* 10: 96. 1955, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 77(2-3): 226-354, f. 18. 1957, *Kirkia* 5: 235-258. 1966, *Kew Bulletin* 21(1): 119-124. 1967, *Kew Bulletin* 26(1): 111-123. 1971.

Species

J. griffithiana (Müll. Stuttg.) Bor (*Arundinella avenacea* Thwaites; *Arundinella avenacea* Munro ex Thwaites; *Arundinella campbelliana* Lisboa; *Arundinella griffithiana* (Müll. Stuttg.) Bor; *Danthonia griffithiana* Müll. Stuttg.; *Danthoniopsis griffithiana* (Müll. Stuttg.) Bor)

India, Bombay; Sri Lanka. Annual, decumbent or stoloniferous, ligule shortly membranous or absent, leaf blades thin, panicle compact and densely flowered, glumes glabrous or hirsute, upper lemma hairy, marshy meadows, see *Botanische Zeitung. Berlin* 14(20): 347. 1856, *Enum Pl. Zeyl.* 362. 1864, *Journal of the Bombay Natural History Society* 5: 346. 1890 and *Indian Forest Records* 1: 73. 1938, *Flora of Assam* 5: 187. 1940, *Kew Bulletin* 10: 98. 1955, *Grasses of Ceylon* 101. 1956, *Grasses of Burma ...* 426. 1960.

Jarava Ruiz & Pavon = *Achnatherum* P. Beauv., *Stipa* L.

About 10-59 species, South America. Stipoideae, Stipeae, or Pooideae, Stipeae, Stipinae, perennial, caespitose, herbaceous, unbranched, auricles absent, ligule an unfringed membrane, plants bisexual, inflorescence paniculate and contracted, spikelets ovate, female-fertile floret terminal, 2 glumes very unequal to more or less equal, upper glume 1-nerved, plumose awns, lemmas fusiform, palea present, 3 stamens, wind dispersion, species of open habitats, used for thatching in the Andes, usually referred to *Achnatherum* and *Stipa*, type *Jarava ichu* Ruiz & Pav., see *Species Plantarum* 1: 78. 1753, *Flora Peruviana, et Chilensis Prodrumus* 2. Madrid 1794, *Flora Peruviana, et Chilensis* 1: 5, t. 6, f. b. Madrid 1798-1802, *Essai d'une Nouvelle Agrostographie* 19-20, 146, pl. 6, f. 7. 1812, *Species Graminum Stipaceorum* 42. 1842, *Flora Chilena* 6: 275, 278, 280. 1854 and *Anales del Museo Nacional de Montevideo* 4(22): III, IV, 38, 45, 98. 1901, *Contr. Jardinea Steudel = *Phacelurus* Griseb., *Rhytachne* Desv. ex Ham.

Dedicated to the French botanist Désiré Édélestan (Édélestan) Stanislas Aimé Jardin, 1822-1896 (Brest), traveler, 1845-1848 plant collector in West Africa (from Senegal to Gabon, etc.), Inspector General of the French Navy, among his writings are *Une fête chez les Noukahiviens*. Extrait d'Un Voyage en Océanie. Rochefort-sur-mer, Paris 1881, *Le Cafétier et le Café. Monographie historique, scientifique et commerciale de cette rubiacée*. Suivie d'un index bibliographique. Paris 1895, "Herborisations sur la côte occidentale d'Afrique ... 1845-1848." in *Nouvelles Annales de la Marine et des Colonies*. Paris 1850-1851 and *Aperçu sur la flore du Gabon*. Paris 1891; see J.H. Barnhart, *Biographical notes upon botanists*. 2: 247. 1965; S. Lenley et al., *Catalog of the manuscript and archival collections and index to the correspondence of John Torrey*. Library of the New York Botanical Garden. 461. Boston, Mass. 1973; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933; Ignatz Urban, editor, *Symbolae Antillanae*. 3: 67. Berlin 1902; Elmer Drew Merrill, *Contr. U.S. Natl. Herb.* 30(1): 166-167. 1947; J. Vallot, "Études sur la flore du Sénégal." in *Bull. Soc. Bot. de France*. 29: 182. Paris 1882; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. Philadelphia 1964; F.N. Hepper and F. Neate, *Plant Collectors in West Africa*. 42. 1971.

About 3 species, tropical Africa. Panicoideae, Andropogonodae, Andropogoneae, Rottboelliinae, perennial, caespitose, robust, coarse, tough, culm leaves, auricles absent, leaf blades linear, ligule a fringed membrane, plants bisexual, inflorescence spicate or paniculate, spikelets paired, mixed in the same inflorescence male and female-fertile spikelets, male spikelets with glumes, 2 glumes very unequal or subequal, lower glume 4-6-nerved, upper glume 3-nerved, palea keel-less 2-nerved or nerveless, 2 free and fleshy lodicules, 3 stamens, ovary glabrous, 2 stigmas, rain-forest, savannah, type *Jardinea gabonensis* Steud., see *Supplementum Plantarum* 13, 114. 1781 [1782], *Prodromus Plantarum Indiae Occidentalis* xiv, 11, 12. 1825, *Spicilegium florae rumelicae et bithynicae* ... 2: 423-424. 1846

Clayton, "The genus *Rhytachne* (Gramineae)." *Kew Bulletin* 32(4): 767-771. 1978.

Species

J. congoensis Franch. ex Hack. (*Rytachne congoensis* Hack.)

Tropical Africa. See *Contributions a la flore du Congo Francais* 13. 1896.

J. gabonensis Steud. (*Elionurus gabonensis* (Steud.) Robertry; *Phacelurus congoensis* (Hack.) Van der Zon; *Phacelurus gabonensis* (Steud.) Clayton; *Rhytachne congoensis* Hack.; *Rhytachne gabonensis* (Steud.) Hack.; *Rottboellia gabonensis* (Steud.) Robertry; *Rytachne gabonensis* (Steud.) Hack.)

Africa. Tufted, herbaceous, leaves rough to scabrid, along roadsides, savannah, see *Synopsis Plantarum Glumacearum* 1: 360. 1854, *Monographiae Phanerogamarum* 6: 276-277. 1889 and *Petite Flore de l'Ouest-Africain* 409. 1954, *Boissiera. Mémoires du Conservatoire de Botanique et de l'Institut de Botanique Systématique de l'Université de Genève* 70. 1960, *Kew Bulletin* 32(3-4): 665-672, 767-771. 1978, *Kew Bulletin* 35(4): 817. 1981, *Wageningen Agricultural University Papers* 92-1(2): 521 557. 1992.

J. kibambeensis Vanderyst

Tropical Africa. See *Bulletin de la Société Botanique de Belgique* 55: 31. 1922.

Joachima Tenore = Beckmannia Host

Pooideae, Poaeae, Alopecurinae, type *Joachima phalaroides* Ten., see *Icones et Descriptiones Graminum Austriacorum* 3: 5. 1805, *Flora Napolitana* 1: ix, 16. 1811, *Cat. Pl. Hort. Neap.* 53. 1813 and *Index Kewensis* suppl. 12: 74. 1959, *Contributions from the United States National Herbarium* 48: 140-141, 409. 2003.

Joannegria Chiov. = *Lintonia* Stapf, *Negria* Chiov., *Negria* F. Muell. (Gesneriaceae)

For the Italian botanist Giovanni Negri, 1877-1960, professor of botany, from 1925 to 1949 Director of the Orto Botanico at Firenze, his works include *Erbario figurato*. Milano 1904 and *Atlante dei principali funghi commestibili e velenosi*. Torino 1908; see J.H. Barnhart, *Biographical notes upon botanists*. 2: 542. 1965; T.W. Bossert, compil., *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 283. Boston, Mass. 1972.

Cynodonteae, type *Negria melicoides* Chiov., see *Fragmenta Phytographiae Australiae* 7: 151. 1871 and *Hooker's Icones Plantarum* 30: t. 2944, 2949. 1911, *Annali di Botanica* 10(3): 410-411. 1912, *Annali di Botanica* 11: 1. 1913.

Jouvea E. Fourn. = *Rhachidospermum* Vasey

For the French botanist Joseph Duval-Jouve, 1810-1883; see J.H. Barnhart, *Biographical notes upon botanists*. 1: 488. 1965; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 110. 1972.

About 2 species, Central America and Mexico, Pacific coast. Chloridoideae, Cynodonteae, Monanthochloinae, perennial bunchgrass, herbaceous, low, thorny to spinescent, erect, decumbent, ascending, caespitose, stoloniferous, creeping, trailing, rhizomatous, auricles absent, ligule a dense line of hairs, leaf blades linear and pungent, leaves distichously arranged, plants dioecious, male and female inflorescences very different, a panicle exerted or fully included, male inflorescence an exerted raceme, pistillate spikelets in clusters, male spikelets sessile, female inflorescence a single spikelet subtended by a prophyll and embraced by an upper leaf-sheath, female spikelet thorn-like, sponge-like rachilla, 2-8 florets, glumes absent, lemma tubular, small palea enclosed by lemma, lodicules absent, stamens 3, ovary glabrous, stigmas 2, male inflorescence an exerted raceme, invasive, weed, on coastal sand dunes, beach sand, open habitats, sandy places, related to *Monanthochloe*, type *Jouvea straminea* E. Fourn., see *Bulletin de la Société Botanique de Belgique* 15(3): 475-476. 1876, *Botanical Gazette* 15: 106, 110, t. 12. 1890 and *Bulletin Torrey Botanical Club* 66: 315-325. 1939 [The morphology and phylogenetic position of the genus *Jouvea* (Gramineae)], *Die natürlichen Pflanzenfamilien, Zweite Auflage* 14d: 168. 1956, *Ceiba* 19(1): 1-118. 1975, *Fieldiana: Botany, New Series* 4: 1-608. 1980, *Flora Novo-Galiciana* 14: 1-436. 1983, *Memoir San Diego Society of Natural History* 16: 1-66. 1989, *Flora Mesoamericana* 6: 258-259. 1994, *Contributions from the United States National Herbarium* 41: 129, 192. 2001, *Flora of Ecuador* 68: 13-14. 2001.

Species

J. pilosa (Presl) Scribner (*Brizopyrum pilosum* J. Presl; *Poa preslii* Kunth; *Rhachidospermum mexicanum* Vasey)

Mexico, Central America, Costa Rica, Ecuador, El Salvador, Guatemala, Honduras, Nicaragua, Panama. Ascending, decumbent, trailing, rooting at the nodes, strongly rhizomatous, leaves rigid, clumped, forming mats or dense turfs, sandy places, beach sand, mangrove areas, dunes, see *Reliquiae Haenkeanae* 1(4-5): 280. 1830, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 326. 1833, *Botanical Gazette* 15(5): 106, 110, t. 12. 1890, *Bulletin of*

the *Torrey Botanical Club* 23: 143. 1896 and *Brittonia* 23(3): 293-324. 1971.

in El Salvador: abrojo

J. straminea E. Fourn.

Mexico to north Ecuador. Perennial, wiry, glabrous, sometimes stoloniferous, creeping, spreading, clumped, forming small tussocks and mats, ligule a rim of short hairs, leaf blades with spiny margins, inflorescence slender to wiry, female flowering structure curved and needle-like, forage, sandy plains, seasonally inundated areas, muddy flats, beach sand, dunes, see *Bulletin de la Société Botanique de Belgique* 15(3): 475-476. 1876 and *Phytologia* 37(4): 317-407. 1977, *Cuscatlania* 1(6): 1-29. 1991.

Joycea H.P. Linder = *Chionochloa* Zotov, *Danthonia* sensu lato, *Notodanthonia* Zotov, *Rytidosperma* Steud.

Named for the Australian botanist Dr. Joyce Winifred Vickery M.B.E. (1908-29 May 1979), agrostologist from Sydney, scientist, botanical collector, at the National Herbarium of New South Wales, Royal Botanic Gardens, assistant botanist in 1936, she was the first woman to be appointed as a scientific professional officer in the NSW Public Service, a member of the Linnean Society since 1930, her research was almost entirely on the family Poaceae; see Alison Holland, "Joyce Vickery (1908-1979) botanist," in Heather Radi (editor), *200 Australian Women: A Redress Anthology*, Women's Redress Press Inc, Sydney 1988, Claire Hooker, "Joyce Winifred Vickery: Taxonomic Botanist," *Australasian Science*, vol. 21, no. 7, p. 46. 2000, Claire Hooker, "Joyce Winifred Vickery (1908-1979), Botanist and Conservationist," in John Ritchie and Diane Langmore (eds.), *Australian Dictionary of Biography*, vol. 16, pp. 452-453. Melbourne University Press, Melbourne, 2002, A.E. Orchard, *A History of Systematic Botany in Australia*, in *Flora of Australia* vol. 1, 2nd edition, ABRS. 1999.

A genus of 3 species, Australia. Arundinoideae, Dantho-
nieae, or Danthonioideae, Dantho-
nieae, perennial, cae-
spitose, rhizomatous, unbranched or branched, leaves
mainly basal, auricles absent, flowering culms leafless,
ligule fringed or ciliate, plants bisexual, open inflorescence
paniculate, solitary spikelets, 2 subequal glumes 1-7-
nerved, incomplete florets distal, lemmas bilobed, palea
present, 2 ciliate and fleshy lodicules, 3 stamens, ovary
glabrous, 2 red stigmas, shade or partial shade, open habi-
tats, temperate grassland, often in *Danthonia*, closely
related to *Austrodanthonia* and *Notodanthonia*, type *Joycea*
pallida (R. Br.) H.P. Linder, see *Flore Française ...*
Troisième Édition 3: 32. 1805, *Prodromus Florae Novae*
Hollandiae 177. 1810, *Systema Vegetabilium* 2: 690. 1817,

Species

J. clelandii (Vickery) Linder (*Danthonia clelandii* Vickery;
Notodanthonia clelandii (Vickery) Veldkamp; *Ryti-*
dosperma clelandii (Vickery) Connor & Edgar)

South Australia. Loosely caespitose, without rhizomes,
inflorescence broadly paniculate, spikelets with 4-6 florets,
in light shade, see *Contributions from the New South Wales*
National Herbarium 1(5): 297. 1950, *Contributions from*
the New South Wales National Herbarium 2(3): 275. 1956,
New Zealand Journal of Botany 17(3): 332. 1979, *Taxon*
29: 296. 1980, *Telopea* 6(4): 612. 1996.

in English: wallaby grass

J. lepidopoda (N.G. Walsh) H.P. Linder (*Danthonia lepi-*
dopoda N.G. Walsh)

Australia, Victoria. Spreading, loosely caespitose, rhizoma-
tous, see *Muelleria* 7(3): 384. 1991, *Telopea* 6(4): 612.
1996.

in English: wallaby grass

J. pallida (R. Br.) H.P. Linder (*Avena brownii* (R. Br.)
Spreng.; *Avena pallida* Thunb.; *Chionochloa pallida* (R.
Br.) S.W.L. Jacobs; *Danthonia pallida* R. Br.; *Danthonia*
pallida (Thunb.) Roem. & Schult., nom. illeg., non *Dan-*
thonia pallida R. Br.; *Danthonia pallida* Petrie, nom. illeg.,
non *Danthonia pallida* R. Br.; *Danthonia penicillata* var.
pallida (R. Br.) F. Muell. ex Maiden & Betche; *Danthonia*
penicillata var. *pallida* (R.Br.) Rodway; *Notodanthonia pal-*
lida (R. Br.) Veldkamp)

Australia, ACT, New South Wales, Victoria. Caespitose,
herbaceous, robust, tussocky, without rhizomes, inflores-
cences paniculate, spikelets with 3-6 bisexual florets, poor
acid soil, woodlands and forests, understorey, alpine
regions, see *Prodromus Plantarum Capensium*, ... 22. 1794,
Prodromus Florae Novae Hollandiae 177. 1810, *Systema*
Vegetabilium 2: 657. 1817, *Systema Vegetabilium*, editio
decima sexta 1: 336. 1825 and *The Tasmanian Flora*: 267.

tributions from the New South Wales National Herbarium

2(3): 272-275. 1956, *Taxon* 29: 297. 1980, *Taxon* 31: 742.
1982, *Telopea* 6(4): 611. 1996.

in English: silvertop wallaby grass, red anther wallaby
grass

K

Kampmannia Steud.

Name of uncertain application, see *Synopsis Plantarum Glumacearum* 1: 34-35. 1855 [1853] and *Genera Graminum* 376. 1986, *Flora of New Zealand* 5: 614. 2000.

Species

K. zeylandica Steud.

New Zealand.

Kampochloa W.D. Clayton = Ctenium Panzer

One species, Angola and Zambia. Chloridoideae, Cynodonteae, perennial, herbaceous, unarmed, densely tufted, unbranched, leaves mainly basal, auricles absent, plants bisexual, single raceme shortly pedicellate, male or sterile floret dorsally awned, 2 glumes unequal or very unequal, upper glume with an oblique dorsal awn, 1-4 vestigial lemmas long-awned, glumes and fertile lemma like *Ctenium*, fertile floret without sterile lemmas below it, palea present, 2 free and fleshy lodicules, 3 stamens, ovary glabrous, 2 stigmas, rocky places, type *Kampochloa brachyphylla* Clayton, see *Ideen zu einer künftigen Revision der Gattungen der Gräser*. 38, 61. München 1813, *Denkschriften der Bayer[ischen]. Botanischen Gesellschaft in Regensburg* 4: 311, t. 13, f. 1-2. 1813 [1814] and *North American Flora* 17(8): 579-638. 1939, *Kew Bulletin* 21: 103. 1967, *Flora Mesoamericana* 6: 290-291. 1994.

Species

K. brachyphylla Clayton

Africa. See *Kew Bulletin* 21: 103. 1967.

Kaokochloa De Winter

From the Kaokoveld, southwest Africa, and *chloe*, *chloa* "grass."

One species, southern Africa. Chloridoideae, Pappophoreae, annual, glandular, herbaceous, branched, geniculate or prostrate at base, rooting at the nodes, auricles absent, ligule a fringe of hairs, plants bisexual, inflorescence paniculate open to contracted, spikelets disarticulating between the glumes, 2 subequal glumes 9-11-nerved, lemmas cori-

aceous with 2 lateral nerves, large awns and smaller awns, palea present, 2 free and fleshy lodicules, ovary glabrous, 3 stamens, yellow anthers, 2 stigmas, in semidesert, hill-sides, flats, type *Kaokochloa nigrirostris* De Winter, see *Bothalia* 7: 479. 1961, *Kew Bulletin* 40: 737-744. 1985, Khidir W. Hilu and Lawrence A. Alice, "Evolutionary implications of *matK* indels in Poaceae." *Am. J. Bot.* 86: 1735-1741. 1999.

Species

K. nigrirostris De Winter

Namibia. Annual, tufted to loosely tufted, decumbent, lemmas curled inward at base of the awns, awns glabrous and purplish, growing in sandy or gravelly soils, see *Bothalia* 7: 480. 1961.

Karoochloa Conert & Türpe = Danthonia DC. s.l., Rytidosperma Steudel

Grass, *chloa*, from the Karoo.

About 4 species, southern Africa. Arundinoideae, Dantho- nieae (Arundineae), or Danthonioideae, Dantho- nieae, annual or perennial, herbaceous, unbranched, unarmed, stoloniferous, tufted, auricles absent, leaf sheaths hairy, ligule a fringe of hairs, plants bisexual, contracted inflores- cence paniculate, spikelets solitary, 2 glumes subequal or more or less equal, lower glume 3- to 5-nerved, upper glume 3- to 7-nerved, lemmas fringed with white hairs, palea present, 2 lodicules free and ciliate, 3 stamens, ovary gla- brous, 2 stigmas, species of open habitats, among rocks, grassland, sometimes included in *Rytidosperma* Steud., placed by some authors in *Danthonia* sensu lato, type *Kar- roochloa curva* (Nees) Conert & Türpe, see *Flore Française ... Troisième Édition* 3: 32. 1805, *Prodromus Florae Novae Hollandiae* 177. 1810, *Systema Vegetabilium* 2: 690. 1817, *Synopsis Plantarum Glumacearum* 1: 425. 1854 and *Con- tributions from the New South Wales National Herbarium* 2(3): 249-325. 1956, *New Zealand Journal of Botany* 1: 87, 104, 122. 1963, *Senckenbergiana Biologica* 50: 290, 295. 1969, *Taxon* 29: 293-298. 1980, H.P. Linder and G.A. Ver- boom, "Generic limits in the *Rytidosperma* (Dantho- nieae, Poaceae) complex." *Telopea* 6(4): 611-612. 1996, *Contri- butions from the United States National Herbarium* 46: 277. 2003.

Species

K. curva (Nees) Conert & Türpe (*Danthonia bachmannii* Hack.; *Danthonia curva* Nees; *Danthonia curva* var. *elongata* Stapf) (after the German naturalist and medical practitioner Franz (Frans) Ewald Bachmann, 1856- ca.1916, collector in Pondoland and Cape; see J. Lanjouw and F.A. Stafleu, *Index Herbariorum*. Part II, *Collectors A-D*. Regnum Vegetabile vol. 2. 1954; Evelyn Mary (Eve) Palmer (1918-1998) & Norah Pitman, *Trees of Southern Africa*. 1: 611. Cape Town 1972; Mary Gunn and Leslie E. Codd, *Botanical Exploration of Southern Africa*. 84. Cape Town 1981; Frans A. Stafleu and Erik A. Mennega, *Taxonomic literature. Supplement I: A-Ba*. 232-235. Königstein 1992; J.H. Barnhart, *Biographical notes upon botanists*. 1: 98. 1965; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 19. 1972).

South Africa. Perennial or annual, tufted, stoloniferous, leaf sheaths glabrous, lemmas pubescent, lemma lobes with short bristles, palea pubescent, pasture, weed, useful for erosion control, usually in damp or shady habitats, along roadsides, see *Florae Africae Australioris Illustrationes Monographicae* 328. 1841, *Bulletin de l'Herbier Boissier* 3(8): 385. 1895, *Flora Capensis* 7: 532. 1899 and *Senckenbergiana Biologica* 50: 295, 298. 1969.

K. purpurea (L.f.) Conert & Türpe (*Avena purpurea* L.f.; *Danthonia purpurea* (L.f.) P. Beauv. ex Roem. & Schult.; *Danthonia purpurea* (L.f.) P. Beauv.; *Danthonia purpurea* P. Beauv. ex Roem. & Schult.; *Danthonia purpurea* var. *setosa* Nees ex Drège; *Danthonia setosa* Nees).

South Africa. Perennial, tufted, tussocks forming, shortly rhizomatous, leaf sheaths hispid, leaves pubescent and curved, spikelets on slender pedicels, glumes purple, lemma pilose and tomentose, central awn geniculate, palea pubescent, pasture, found in mountain, grassland, along roadsides, see *Supplementum Plantarum* 112. 1781, *Sp. Pl.* (edition 4): 450. 1797, *Systema Vegetabilium* 2: 690. 1817, *Florae Africae Australioris Illustrationes Monographicae* I. Gramineae. 325. 1841, *Linnaea* 20: 254. 1847 and *Senckenbergiana Biologica* 50: 303. 1969.

K. schismoides (Stapf ex Conert) Conert & Türpe (*Danthonia curva* Nees; *Danthonia schismoides* Stapf ex Conert)

South Africa. Annual, tufted, prostrate, leaf sheaths glabrous, lemmas pubescent or glabrous, palea pubescent, growing in dry mountainous areas, see *Florae Africae Australioris Illustrationes Monographicae* 328. 1841 and *Senckenbergiana Biologica* 46: 180. 1965, *Senckenbergiana Biologica* 50: 298-299. 1969, *Bothalia* 18: 119-122. 1988.

K. tenella (Nees) Conert & Türpe (*Danthonia tenella* Nees; *Karoochloa schismoides* (Stapf ex Conert) Conert & Türpe)

South Africa. Annual, tufted, leaf sheaths hispid, glumes purplish, central awn geniculate, palea glabrous, common in sandy soils, disturbed areas, see *Florae Africae Australioris Illustrationes Monographicae* 324, 328. 1841 and *Senckenbergiana Biologica* 50: 298-299, 308. 1969, *Bothalia* 18: 111-114. 1988.

Kengia Packer = *Cleistogenes* Keng,

Diplachne P. Beauv., *Jarrilla* Rusby

(Caricaceae), *Jarrilla* I.M. Johnst.

(Caricaceae), *Moliniopsis* Gand., *Moliniopsis*

Hayata, *Orinus* Hitchcock

About 10-18 species, temperate Eurasia, China, Turkey. Chloridoideae, Eragrostideae, or Chloridoideae, Cynodonteae, perennial, herbaceous, leaf blades linear, ligule fringed and more or less membranous, plants bisexual, inflorescence spicate or paniculate, lax racemes, 2 glumes more or less equal or unequal, lower glume 1- to 5-nerved, upper glume 1- to 7-nerved, cleistogamous spikelets concealed within the upper leaf-sheaths, 5- to 7-nerved lemmas, palea present, lodicules absent, 3 stamens, open habitats, dry open places, related to *Leptochloa*, sometimes referred to *Diplachne*, type *Kengia serotina* (L.) Packer, see *Essai d'une Nouvelle Agrostographie* 80-81, 160, pl. 16, f. 9. 1812, *A Manual of the Botany of the Northern United States* 588. 1848, *Flora Europae* 25: 354. 1891 and *Torreyia* 21: 47. 1921, *Contributions from the Gray Herbarium of Harvard University* 70: 78. 1924, *Botanical Magazine* (Tokyo) 39: 258. 1925, *J. Wash. Acad. Sci.* 23: 136. 1933, *Sinensia* 5(1-2): 147-157. 1934, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 78(2): 208-245. 1959 [Beiträge zur Monographie der Gattungen *Cleistogenes* und *Neyraudia*], *Botaniska Notiser* 113(3): 289-294. 1960, *Kew Bulletin* 35: 701. 1980, *Taxon* 43: 123. 1994, *Bull. Bot. Res.* 15, 4: 433-436. 1995, *Taxon* 49: 239-260. 2000, Chen Liang, D.L. Michalk and G.D. Millar, "The ecology and growth patterns of *Cleistogenes* species in degraded grasslands of eastern Inner Mongolia, China" *Journal of Applied Ecology* 39(4): 584. August 2002, *Acta Bot. Sinica* 46(1): 35-45. 2004, Yu, H. & Zhao, N.-X., "Synopsis of Chinese *Kengia* (Poaceae)." *Ann. Bot. Fennici* 42: 47-55. 2005, *Botanical Journal of the Linnean Society* 148(1): 57-72. May 2005.

Species

K. andropogonoides (Honda) Packer (*Cleistogenes andropogonoides* Honda)

China. See *Report of the First Scientific Expedition to Manchoukou* 4: 98. 1936, *Botaniska Notiser* 113(3): 292. 1960.

Keniochloa Meld. = *Agrostis* L., *Colpodium* Trin.

Kenya, Mt. Kenya and Greek *chloe*, *chloa* "grass."

Poeae, type *Keniochloa chionogeiton* (Pilg.) Melderis, see *Species Plantarum* 1: 61-63. 1753, *Fundamenta Agrostographiae* 119, t. 7. 1820, *Neue Entdeckungen im ganzen Umfang der Pflanzenkunde* 2: 37, 58. 1821 and *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 9(87): 510. 1926, *Repertorium Specierum Novarum Regni Vegetabilis, Beihefte* 40(Anhang 1): 87, f. 2. 1930, *Svensk Botanisk Tidskrift* 50(4): 538, 540, 542, f. 1,1-2, 2. 1956, *Fl. Fenn.* 5: 29. 1971, *Novosti Sist. Vyss. Rast.* 17: 7. 1980, *Taxon* 41: 556. 1992, O. Hedberg & I. Hedberg, "The genus *Colpodium* (Gramineae) in Africa." *Nordic Journal of Botany* 14(6): 601-607. 1994, *Taxon* 44: 611-612. 1995.

Kerinozoma Steud. = *Xerochloa* R. Br.

Greek *kerinos* "wax-colored, yellow like wax" and *zoma* "a belt."

Panicoideae, Panicoideae, Paniceae, type *Kerinozoma suraboja* Steud., see *Prodromus Florae Novae Hollandiae* 196. 1810, *Synopsis Plantarum Glumacearum* 1: 358. 1854 [1855] and *Bulletin of the Tokyo Science Museum* 18: 4. 1947.

Kerriochloa C.E. Hubbard

Dedicated to the Northern Irish physician Arthur Francis George Kerr, 1877-1942 (d. Hayes, Kent), botanist, 1923 Fellow of the Linnean Society, from 1902 to 1920 medical officer in Siam, from 1920 government botanist, plant collector, his writings include "A Siamese mountain Flora." *Geograph. Jour. London*. 1911: 202-203, "Meteorological observations made in Chiangmai, 1910-1914." *Jour. Siam Soc.* 17: 21-34. 1923, "Carl Roebelen." *Journal of the Siam Society. Natural History Supplement*. [= *Jour. Siam Soc. Nat. Hist. Suppl.*] [Obituary of this orchid hunter of Siam] 7(2): 132-134. 1927, "Fruit and seeds in the drift on Kaw Tao." *Jour. Siam Soc. Nat. Hist. Suppl.* 8: 103-117. 1930, "Poisoning by Pak wan (*Meliantha suavis*) in Siam." *Trans. Roy. Soc. Trop. Med. Hyg.* 25: 141-143. 1931, "Notes on introduced plants in Siam." *Jour. Siam Soc. Nat. Hist. Suppl.* 8(3): 197-212. 1931, "Additional notes on introduced plants." *Jour. Siam Soc. Nat. Hist. Suppl.* 8(4): 334-335. 1932 and "Early botanists in Thailand." *Jour. Thailand Res. Soc., Nat. Hist. Suppl.* [31 individuals, their travels and works; plate is portrait of Kerr] 12(1): 1-27, 1 plate. 1939, coauthor and editor of William Grant Craib's *Florae Siamensis Enumeratio*. A list of the plants known from Siam with records of their occurrence. Siam Society, Bangkok Times Press, Bangkok 1931.

One species, Asia, Thailand. Panicoideae, Andropogonodae, Andropogoneae, Andropogoninae, perennial, slender, herbaceous, decumbent, auricles absent, ligule an unfringed membrane, plants bisexual, inflorescence terminal and sometimes also axillary, racemes with several sessile spikelets laterally compressed, 2 glumes subequal, lower glume of sessile spikelet not grooved, upper glume awned, palea present, 2 free lodicules 2-dentate, 3 stamens, ovary glabrous, 2 stigmas, pedicelled spikelet lanceolate and much reduced, open habitats, related to *Ischaemum*, type *Kerriochloa siamensis* C.E. Hubb., see *Hooker's Icones Plantarum* 35: t. 3494. 1951.

Species

K. siamensis C.E. Hubb. (*Ischaemum siamense* (C.E. Hubb.) Roberty)

Asia. See *Hooker's Icones Plantarum* 35: t. 3494. 1951, *Bulletin du Muséum d'Histoire Naturelle, sér. 2* 29: 189. 1957, *Boissiera*. 9: 345. 1960.

Kielboul Adans. = *Aristida* L.

Arundinoideae, Aristideae, or Aristidoideae, Aristideae, see *Species Plantarum* 1: 82. 1753, *Familles des Plantes* 2: 31, 539. 1763 and *Meded. Rijks.-Herb.* 54: 9. 1926, *Kurtziana* 1: 123-206. 1961, *Flora Mesoamericana* 6: 253-257. 1994, *Flora del Valle de Tehuacán-Cuicatlán* 3: 1-35. 1994, *Flora of Ethiopia and Eritrea* 7: 76-85. 1995, *Annals of the*

Kiharapyrum Á. Löve = *Aegilops* L.

Pooideae, Triticoideae, Triticeae, Triticinae, recognized as segregate of *Aegilops*, type *Kiharapyrum umbellulatum* (Zhuk.) Á. Löve, see *Species Plantarum* 2: 1050-1051. 1753 and *Feddes Repert.* 91: 225-228. 1980, *Biologisches Zentralblatt* 101(2): 207. 1982, *Feddes Repertorium* 95(7-8): 495. 1984, *Taxon* 41: 555-556. 1992, *Taxon* 44: 611-612. 1995, *Contributions from the United States National Herbarium* 48: 20-23, 409. 2003.

Species

K. umbellulatum (Zhuk.) Á. Löve (*Aegilops umbellulata* Zhuk.; *Kiharapyrum umbellulata* (Zhuk.) Á. Löve; *Triticum umbellulatum* (Zhuk.) Bowden)

Greece, Turkey. Related to wheat, see *Repertorium Specierum Novarum Regni Vegetabilis, Beihefte* 55: 216, t. 15. 1929, *Canadian Journal of Botany* 37: 666. 1959, *Feddes Repert.* 91: 236. 1980, *Biologisches Zentralblatt* 101(2): 207. 1982, *Feddes Repertorium* 95(7-8): 495. 1984, *Agric. Univ. Wageningen Pap.* 94-7: 374-380. 1994.

Kinabaluchloa K.M. Wong

After Mt. Kinabalu, highest peak in Malaysia.

A genus of 2 known species, Peninsular Malaysia, Sabah, Sarawak, Brunei and Malaysian Borneo. Bambuseae, Bambusinae, sympodial, erect to suberect, leaning, scrambling, drooping, never climbing, open tufted, very long single internodes, nodes prominent, sheath blade narrowly lanceolate to linear, 9-17 leaves on each branch, pseudospikelets subtended by a large conspicuous bract, 2-3 small empty bracts, 1-2 perfect flowers and a vestigial terminal flower, 1 empty glume, 2-3 bracts subtending prophyllate buds, 3 lodicules, 6 stamens, 3 stigmas plumose, highland bamboos, culm internodes used for making musical instruments (*sompoton* and *engkrui*) and blowpipes, found in lower montane and upper forests, type *Kinabaluchloa wrayi* (Stapf) K.M. Wong, see Datin Margaret Luping, Chin Wen and E. Richard Dingley, editors, *Kinabalu - Summit of Borneo*. The Sabah Society, Kota Kinabalu, Sabah, Malaysia 1978, *Kew Bulletin* 48(3): 517-532. 1993, *PROSEA* 7: 151. 1995, K.M. Wong, *Bamboo - The Amazing Grass*. A guide to the diversity and study of bamboos in Southeast

Asia. International Plant Genetic Resources Institute (IPGRI) and University of Malaya 2004.

Species

K. nebulosa K.M. Wong

Peninsular Malaysia. Erect, open, scrambling, tufted, thin-walled, culm sheaths black hairy, inflorescence on a leafy branch, montane forest, see *Kew Bulletin* 48(3): 526, f. 5. 1993.

in English: Brunei thin-walled bamboo, Sabah scrambling bamboo, Sarawak thin-walled bamboo

K. wrayi (Stapf) K.M. Wong (*Bambusa wrayi* Stapf) (named for L. Wray, 1853-1942)

Peninsular Malaysia. Densely tufted, erect, drooping or leaning, thin-walled, nodes prominent, inflorescence on leafless branch, clustered pseudospikelets at each node, long slender internodes used to make blowpipes, montane forest, see *Bulletin of Miscellaneous Information Kew* 1893: 14. 1893, *Annals of the Royal Botanic Garden, Calcutta*. 7: 49, pl. 46. 1896 and *Gard. Bull. Sing.* 16: 73. 1958, *Kew Bulletin* 48(3): 524, f. 4. 1993.

in English: Malaysian thin-walled bamboo

in Malaysia: buloh bersumpitan, buloh sewor, buluh sumpitan.

Klemachloa R. Parker = *Dendrocalamus* Nees

From the Greek *klema*, *klematos* "a shoot, twig" and *chloe*, *chloa* "grass."

Monotypic genus, Burma/Myanmar. Bambusoideae, Bambusoideae, Bambuseae, or Bambusoideae, Bambuseae, Bambusinae, perennial, woody bamboos, found in forest, type *Klemachloa detinens* R. Parker, see *Linnaea* 9(4): 476-477. 1835 and *Indian Forester* 58: 7. 1932, *Journal of South China Agricultural University* 10(2): 40-47. 1989 [The genus *Dendrocalamus* Nees and its neighboring two new genera from China], *Journal of Bamboo Research* 8(1): 25-43, f. 6-10 and 8(4): 30-36. 1989, *Bamboo Research in Asia* 1990(1): 3. 1990, *Bamb. Res.* 42: 5-6. 1990, Z.-L. Li, The *Flora of China* Bambusoideae project, problems and current understanding of bamboo taxonomy in China. The *Bamboos* 5: 61-81. 1997, *Contributions from the United States National Herbarium* 39: 54-55. 2000.

Species

K. detinens R.N. Parker (*Dendrocalamus detinens* (R. Parker) H.B. Naithani & Bennet)

Burma. See *Indian Forester* 58: 7. 1932, *Indian Forester* 117(1): 68. 1991.

Knappia J.E. Smith = *Mibora* Adans.

Named in honor of the British botanist John Leonard Knapp, 1767-1845 (Alveston, Glos), soldier, corresponded with J.E. Smith, 1796 Fellow of the Linnean Society, among his works are *Arthur, or the Pastor of the Village*. A poem. London 1818, *Gramina britannica*. London 1804 and *The Journal of a Naturalist*. London 1829. See J.H. Barnhart, *Biographical notes upon botanists*. 2: 301. 1965; T.W. Borsert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 214. 1972; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933; James Sowerby and J.E. Smith, *English Botany, or Coloured Figures of British Plants*. London 1790-1814.

Genus dedicated to the German botanist Georg Ludwig (Georgius Ludovicus) Koeler, 1765-1807, physician, pharmacologist, author of G.L. Koeleri ... *Descriptio Graminum in Gallia et Germania tam sponte nascentium quam humana industria copiosus provenientium*. Francofurti ad Moenum 1802. See J.H. Barnhart, *Biographical notes upon botanists*. 2: 308. 1965; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. 1917-1933; Christiaan Hendrik Persoon, *Synopsis plantarum*. 1: 97. 1805; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 735. Stuttgart 1993; Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 488. Ansbach 1852.

About 35-60 species, north and south temperate regions throughout the world. Pooideae, Poodae, Avenae, or Pooideae, Poeae, Aveninae, annual or perennial, herbaceous, usually tufted, erect or ascending, sometimes geniculate at

base, rarely shortly rhizomatous, glabrous nodes, internodes hollow, auricles absent, ligule membranous and short, sheaths margins free, basal sheaths sometimes swollen into bulbs, leaf blades flat or inrolled, leaves basal, plants bisexual, inflorescence a spike or a dense and ovoid panicle, spikelets compressed laterally, flowers bisexual, 2 glumes unequal, lower glume narrow 1- to 3-nerved, upper glume acute or acuminate 3- to 5-nerved, lemma acute and sometimes short-awned or awnless or mucronate, palea 2-keeled and 2-toothed, 2 lodicules free and membranous, 3 stamens, anthers yellow, ovary glabrous and without apical appendage, 2 stigmas, glabrous fruit small and slightly compressed laterally, weed species, native pasture species, some taxa are good livestock forage, important components of prairies, rainforest, in dry grassland and rocky places, pampas, open habitats, species closely intergrading, there is considerable taxonomic confusion concerning this genus, intergeneric hybrids with *Trisetum* Pers., taxonomic situation around *Koeleria* and *Trisetum* Pers. confused and unsatisfactory, extreme variations within the species, type *Koeleria gracilis* Pers., see *Species Plantarum* 1: 67. 1753, *Flora Aegyptiaco-Arabica* LX, 27, 60. 1775, *Synopsis Plantarum* 1: 97. 1805, *Essai d'une Nouvelle Agrostographie* 88, 153, t. 18, f. 1. 1812, *Fundamenta Agrostographiae* 127, 149, t. 9, 13. 1820, *Mantissa* 2: 13, 222. 1824, *Hortus Regius Botanicus Berolinensis* 1: 126-127. 1827, *Conspectus regni vegetabilis per gradus naturalis evoluti. Species

K. alpicola Gren. & Godr.

Europe. See *Fl. France* 3: 527. 1856.

K. altaica (Domin) Krylov (*Koeleria eriostachya* var. *altaica* Domin)

Europe, Siberia, Eurasia. Found in mountain slopes, subalpine mountain meadow, on rocky benches, desert steppe, sandy soils, see *Bibliotheca Botanica* 65: 163. 1907, *Fl. Sibir. Occ.* 2: 261. 1928.

K. argentea Griseb. (*Trisetum litwinowii* subsp. *argentea* (Griseb.) Tzvelev)

Europe, Asia. Perennial, dry soils, see *Bibliotheca Botanica* 14(65): 115. 1907, *Novosti Sist. Vyss. Rast.* 7: 65. 1970 [1971].

K. asiatica Domin (*Koeleria cairnesiana* Hultén; *Koeleria ledebourii* Domin; *Koeleria mariae* V. Vassil.) (after the German botanist Carl (Karl) Friedrich (Carolus Fridericus) von Ledebour, 1785-1851, professor of botany, botanical collector, traveler with Carl Anton Meyer (1795-1855) and Alexander A. von Bunge (1803-1890), author of *Flora altaica*. Berolini [Berlin] 1829-1833 and *Flora rossica*. Stuttgartiae 1842-53. See Johann Anton Weinmann (1782-1858), *Der botanische Garten der Kaiserlichen Universität zu Dorpat im Jahre 1810*. Dorpat 1810; J.H. Barnhart, *Biographical notes upon botanists*. 2: 358. 1965; H.N. Cloukie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 198. Oxford 1964; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 741. Stuttgart 1993; A. Lasègue, *Musée botanique de Benjamin Delessert*. Paris 1845; Ignatz Urban, *Geschichte des Königlichen Botanischen Museums zu Berlin-Dahlem (1815-1913). Nebst Aufzählung seiner Sammlungen*. Dresden 1916; Mariella Azzarello Di Misa, a cura di, *Il Fondo Antico della Biblioteca dell'Orto Botanico di Palermo*. 151. Regione Siciliana, Palermo 1988; Stafleu and Cowan, *Taxonomic literature*. 2: 805-808. 1979)

Europe, Siberia, Russia, Ural Mountains. Caespitose, lacking rhizomes, culms densely and finely pubescent, panicle interrupted at the base, 2-3 florets, glumes purple and membranous, lemmas pubescent to tomentose and purple to almost black, predominantly arctic, grows in dry tundra, see

Bulletin de l'Herbier Boissier, sér. 2, 5(10): 947. 1905, *Acta Universitatis Lundensis* 38(1): 190, f. 1b, 2g. 1942.

in English: oriental koeler's grass

K. asiatica Domin subsp. **atroviolacea** (Domin) Tzvelev (*Koeleria alpina* Steud.; *Koeleria atroviolacea* Domin; *Koeleria cairnesiana* Hultén)

Siberia, Russia. Open mountain meadows, dark brown soil, see *Novosti Sist. Vyss. Rast.* 7: 65, 70. 1970 [1971].

K. bergii Hieron. (*Koeleria kurtzii* Hack. ex Kurtz; *Koeleria permollis* Nees ex Steud.; *Koeleria permollis* Döll, nom. illeg., non *Koeleria permollis* Nees ex Steud.)

Europe, Spain, Argentina. Shortly awned, see *Synopsis Plantarum Glumacearum* 1: 293. 1854, *Boletín de la Academia Nacional de Ciencias, Córdoba, Argentina* 3: 376. 1881, *Boletín de la Academia Nacional de Ciencias, Córdoba, Argentina* 16: 261. 1899 and *Repertorium Specierum Novarum Regni Vegetabilis* 2: 91. 1906, *Bibliotheca Botanica* 65: 122-123. 1907, *Bol. Soc. Argent. Bot.* 27: 65. 1991.

K. berythea Boiss. & Blanche (*Lophochloa berythea* (Boiss. & Blanche) Bor; *Rostraria berythea* (Boiss. & Blanche) Holub)

Europe, Spain. See *Diagnoses plantarum orientalium novarum, ser. 1*, 3(4): 135. 1859 and *Bibliotheca Botanica* 65: 271. 1907, *Taxon* 16: 68. 1967, *Folia Geobotanica et Phytotaxonomica* 9(3): 271. 1974.

K. boliviensis (Domin) A.M. Molina (*Koeleria boliviensis* (Domin) Domin; *Koeleria gracilis* subsp. *boliviensis* (Domin) Domin; *Koeleria gracilis* var. *boliviensis* Domin) South America. Perennial, caespitose, leaf blades acute, spikelets 2-flowered, glumes lanceolate obtuse, lemmas lanceolate 2-dentate, rocky slopes, see *Syn. Pl.* 1: 97. 1805 and *Repertorium Specierum Novarum Regni Vegetabilis* 2: 93-94. 1906, *Bibliotheca Botanica* 65: 175, 237. 1907, *Parodi-ana* 8(1): 61. 1993.

K. brevis Steven (*Koeleria dengenii* Domin; *Koeleria lobata* (M. Bieb.) Roem. & Schult.; *Koeleria splendens* var. *degenii* (Domin) Stojan. & Stef.)

Europe, Turkey.

in English: blue hairgrass

K. calderonii A.M. Molina

South America. See *Boletín de la Sociedad Argentina de Botánica* 26(3-4): 223, f. 2. 1990, *Parodi-ana* 8(1): 40-67. 1993.

K. capensis Nees (*Aira capensis* Steud., nom. illeg., non *Aira capensis* L.f.; *Airochloa uniflora* Hochst.; *Koeleria capensis* (Steud.) Nees; *Koeleria convoluta* Steud.; *Koeleria convoluta* Hochst. ex Steud.; *Koeleria convoluta* var. *densiflora* Domin; *Koeleria cristata* (L.) Pers. var. *brevifolia* (Nees) C.E. gracilis var. *convoluta* (Steud.) Hedberg; *Koeleria pyramidata* var. *brevifolia* (Nees) Cufod.; *Koeleria pyramidata* var. *convoluta* (Steud.) Cufod.)

South Africa. Perennial, caespitose or densely tufted, wiry, erect, fibrous roots, ligule a short membrane, leaf blade rolled and wiry or thread-like, short leaves mostly basal, dense and compact spike-like inflorescence sometimes open, spikelets awnless, glumes unequal, lemmas more or less hyaline, forming clumps or small dense tussocks, pasture, good fodder for stock and wild game, palatable, common in dry to wet areas, rocky hillsides, near streams, mountainous areas, montane grassland, shrubland, steep slopes, among rocks, see *Flora* 12: 486. 1829, *Linnaea* 7(3): 321. 1832, *Synopsis Plantarum Glumacearum* 1: 293. 1854, *Flora* 38: 330. 1855 and *Bibliotheca Botanica* 14: 111. 1907, *Bulletin of Miscellaneous Information Kew* 1936: 500. 1936, *Bothalia* 18: 114-119. 1988, *Annals of the Missouri Botanical Garden* 75: 866-873. 1988, *Opera Botanica* 121: 159-172. 1993, *Bothalia* 26(1): 53-61. 1996.

in English: crested koeleria, koeleria, koeleria grass, prairie June grass, Junegrass

in southern Africa: koeleria polgras, polgras, winterpolgras, strandgras; boshwane, boshwane (Sotho)

K. caucasica Trin. ex Domin (*Koeleria albovii* Domin; *Koeleria caucasica* (Domin) B. Fedtsch.; *Koeleria ledebourii* Domin)

Russia. Perennial bunchgrass, see *Bibliotheca Botanica* 14(65): 161. 1907, *Not. Syst. Georg. Inst. Bot. Tbilissi* 40: 68-72. 1984, *Newslett. Int. Organ. Pl. Biosyst. (Oslo)* 26/27: 13-14. 1997.

K. caudata (Link) Steud. (*Airochloa caudata* Link; *Dactylis caudata* Brot.; *Koeleria caudata* (Brot.) Mutel; *Koeleria caudata* var. *algeriensis* Domin; *Koeleria crassipes* Lange)

Europe, Algeria, Spain, Morocco. Useful for erosion control, see *Flora Lusitanica* 1: 100. 1804, *Flore Francaise* 4: 84, t. 84, f. 602. 1837, *Linnaea* 17(4): 405. 1844, *Synopsis Plantarum Glumacearum* 1: 293. 1854 and *Anales del Instituto Botánico A. J. Cavanilles* 36: 308. 1979[1980], *Taxon* 34: 346-351. 1985, *Travaux de l'Institut Scientifique, Université Mohammed V. Série Botanique* 35: 1-168. 1988, *Boletim da Sociedade Broteriana, ser. 2* 64: 35-74. 1991.

K. cheesemanii (Hack.) Petrie (*Koeleria novozelandica* var. *pubiculmis* Domin; *Trisetum cheesemanii* Hack.) (after the New Zealand (born at Hull, Yorks) botanist Thomas Frederic (Frederick) Cheeseman, 1846-1923 (Auckland, New Zealand), explorer, botanical collector, from 1854 to New Zealand, 1873 Fellow of the Linnean Society, Curator of the Auckland Museum, in May 1923 he was awarded the Linnean Gold Medal by the Linnean Society of London, he is best known for his *Manual of the New Zealand Flora*. Wellington 1906, his works include "Notice of the Discovery of a Species of Burmanniaceae, a Family new to the New Zealand Flora." *T.N.Z.I.* 41: 140-143. 1909, "On the

systematic botany of the Islands to the south of New Zealand." *Subantarctic Islands of New Zealand*. 2: 389-471. 1909 and "The Vascular Flora of the Macquarie Island." *Sci. Rep. Aust. antarct. Exped. 1911-1914*. Ser. C, 7, part 3, 1-63. 1919, with William Botting Hemsley (1843-1924) wrote *Illustrations of the New Zealand Flora*. [The plates drawn by Miss Matilda Smith, 1854-1926] Wellington 1914. See J.H. Barnhart, *Biographical notes upon botanists*. 1: 338. 1965; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933; R. Glenn, *The Botanical Explorers of New Zealand*. Wellington 1950; J. Lanjouw and F.A. Stafleu, *Index Herbariorum*. Part II, *Collectors A-D*. Regnum Vegetabile vol. 2. 1954; O.E. Schulz, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem*. 10: 551. 1929)

New Zealand. Caespitose to densely caespitose, montane, occasionally rhizomatous, villous or pubescent, stiff hard leaves, very dense oblong panicle, glumes subequal, lemma acute to acuminate entire or mucronate or shortly awned, awn apical or subapical, found on rocky exposed ground at high altitudes, often confused with *Trisetum cheesemanii* Hack., see *Transactions and Proceedings of the New Zealand Institute* 35: 281. 1903, *Bibliotheca Botanica* 65: 116-117. 1907, *Transactions and Proceedings of the New Zealand Institute* 48: 192. 1916, *New Zealand Journal of Botany* 37: 55. 1999.

K. convoluta Hochst. ex Steud. (*Koeleria capensis* Nees; *Koeleria convoluta* Steud.; *Koeleria cristata* (L.) Pers. var. *convoluta* (Steud.) C.E. Hubb.; *Koeleria gracilis* var. *convoluta* (Steud.) Hedberg; *Koeleria pyramidata* var. *convoluta* (Steud.) Cufod.)

Europe, Africa. K. nitidula Velen.

Europe, Bulgaria. Perennial, small.

K. novozelandica Domin (*Koeleria gintlilii* Domin; *Koeleria novozelandica* var. *parvula* Domin; *Koeleria novozelandica* var. *typica* Domin; *Koeleria superba* Domin)

New Zealand. Perennial, alpine, variable, erect, tufted or rhizomatous, lax and slender, ligule membranous, narrow panicles spike-like, glumes subequal, lemma mucronate or awned, drained and well drained areas, stony places, see *Handbk. N.Z. Fl.* 334. 1864, *Indig. Grasses N.Z.* t. 38. 1879 and *Bibliotheca Botanica* 65: 116-118, 126. 1907, *Transactions and Proceedings of the New Zealand Institute* 48: 192. 1916, *N.Z. J. Agric. Res.* 3: 728-733. 1960, *New Zealand Journal of Botany* 37: 51-61. 1999.

K. pectinata (Lam.) Shinnars (*Koeleria tuberosa* Pers.; *Poa pectinata* Lam.)

Europe. See *Tableau Encyclopédique et Méthodique ... Botanique* 1: 182. 1791, *Syn. Pl.* 1: 97. 1805 and *Rhodora* 58: 93-96. 1956.

K. permollis Nees ex Steud. (*Koeleria bergii* Hieron.; *Koeleria bergii* var. *aristulata* Domin; *Koeleria bergii* var. *minor* Domin; *Koeleria bergii* var. *patagonica* Domin; *Koeleria bergii* var. *typica* Domin; *Koeleria permollis* Döll, nom. illeg., non *Koeleria permollis* Nees ex Steud.)

South America, Argentina, Bolivia, Peru, Uruguay. Perennial, erect, caespitose, herbaceous, shortly rhizomatous, flat leaf blades linear and acute, spikelets 2-3-flowered, glumes lanceolate with scabrous keels, lemmas lanceolate mucicous or mucronate, lower lemma glabrous, rocky places, see *Synopsis Plantarum Glumacearum* 1: 293. 1854, *Flora Brasiliensis* 2(3): 125. 1878, *Boletín de la Academia Nacional de Ciencias, Córdoba, Argentina* 3: 376. 1881 [or 1879] and *Repertorium Specierum Novarum Regni Vegetabilis* 2: 91. 1906, *Bibliotheca Botanica* 65: 122-123. 1907, *Flora Illustrada de Entre Ríos (Argentina)* 6(2): 1-551. 1969, *Flora de la Provincia de Buenos Aires* 4(2): 1-624. 1970, *Boletín de la Sociedad Argentina de Botánica* 27(1-2): 65-71. 1991, *Parodiana* 8(1): 57. 1993.

K. phleoides (Vill.) Pers. (*Festuca cristata* L.; *Festuca phleoides* Vill.; *Koeleria brachystachya* DC.; *Koeleria gerardii* (Vill.) Shinnars; *Lophochloa cristata* (L.) Hyl.; *Lophochloa phleoides* (Vill.) Rchb.; *Rostraria cristata* (L.) Tzvelev; *Trisetaria phleoides* (Vill.) Nevski; *Trisetum cristatum* (L.) Potztl; *Trisetum phleoides* (Vill.) Trin., nom. illeg., non *Trisetum phleoides* (d'Urv.) Kunth)

Africa, Asia and Europe. Annual, caespitose, fibrous roots, spike-like panicle cylindrical, lower lemmas villous, upper lemmas reduced, good fodder, see *Species Plantarum* 76. 1753, *Flora Delphinalis* 7. 1785 [1786], *Syn. Pl.* 1: 97.

1805, *Diagnoses plantarum orientalium novarum*, ser. 2, 4: 134. 1859, *Histoire des Plantes de Dauphiné* 1: 249. 1786, *Synopsis Plantarum* 1: 97. 1805, *Catalogus plantarum horti botanici monspeliensis* 120. 1813, *Flora Germanica Excursionaria* 42. 1830, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 1: 65. 1830, *Flora Orientalis* 573. 1884 and *Bibliotheca Botanica* 65: 257, 268. 1906, *Bot. Not.* 1953: 355. 1953, *Rhodora* 58: 95. 1956, *Willdenowia* 5: 119. 1968, *Novosti Sist. Vyss. Rast.* 7: 47. 1970 [1971].

in English: Mediterranean hair grass

in French: fétuque crêtée

in Morocco: sibouss

K. praeandina A.M. Molina

South America, Argentina. See *Boletín de la Sociedad Argentina de Botánica* 26(3-4): 221, f. 1. 1990, *Parodiana* 81(1): 40-67. 1993.

K. pumila (Desf.) Domin (*Avena pumila* Desf.; *Lophochloa pumila* (Desf.) Bor)

Asia, Europe, North Africa. Annual, dry riverbeds, see *Flora Atlantica* 1: 103. 1798, *Révision des Graminées* 1: 102. 1829 and *Repertorium Specierum Novarum Regni Vegetabilis* 2: 31. 1906, *Bulletin de la Société d'Histoire Naturelle de l'Afrique du Nord* 33(4): 93. 1942, *Grasses of Burma, Ceylon, India and Pakistan (excluding Bambuseae)* 445. 1960, *Novosti Sist. Vyss. Rast.* 7: 48. 1970 [1971], *Folia Geobotanica et Phytotaxonomica* 11(1): 83. 1976, *Lagascalia* 12: 290-292. 1984, *Bothalia* 18: 114-119. 1988, *Bothalia* 26(1): 53-61. 1996.

K. pyramidata (Lam.) P. Beauv. (*Achaeta geniculata* E. Fourn.; *Koeleria cristata* (L.) Pers. pro parte; *Koeleria cristata* Pers.; *Koeleria cristata* var. *elegantula* (Domin) Beetle; *Koeleria elegantula* Domin; *Koeleria genevensis* Domin; *Koeleria kernerii* Ujhelyi; *Koeleria lamarckii* Ujhelyi; *Koeleria macranthera* (Ledeb.) Mann; *Koeleria montana* (Hausm.) Dalla Torre; *Koeleria tristis* Domin; *Poa pyramidata* Lam.)

Turkey, Europe. Perennial, tufted, small, erect, in small clumps, ligule short and truncate, no auricles, forage, very resistant to drought, found in very poor soils dry to very dry, sand, stony places, see *Tableau Encyclopédique et Méthodique ... Botanique* 1: 183. 1791, *Synopsis Plantarum* 1: 97. 1805, *Essai d'une Nouvelle Agrostographie* 84, 166, 175. 1812, *Synopsis Plantarum Glumacearum* 1: 293. 1854, *Mexicanas Plantas* 2: 109. 1886 and *Bibliotheca Botanica* 65: 153, 172, 238-239, t. 14, f. 6-7. 1907, *Flora Europaea: Check-list and Chromosome Index* Cambridge Univ. Press. 1982, *Phytologia* 54(1): 3. 1983, *Taxon* 34: 727-730. 1985,

Systematic Botany 19(1): 6-20. 1994, *International Organization of Plant Biosystematists Newsletter* 24: 15-19. 1995.

in English: crested hair grass

in Mexico: zacate de cresta

K. rigoorum Edgar & Gibb

New Zealand. Loose and slender, erect and often geniculate at base, reddish, slender rhizomes, leaf sheaths ribbed, erect inflorescence paniculate, glumes subequal, lemma entire or mucronate or awned, awn apical to subapical, damp habitats, wet areas, see *New Zealand Journal of Botany* 37: 59-61, f. 5. 1999.

K. sclerophylla P.A. Smirn. (*Koeleria theodoriana* Klokoy; *Koeleria wolgensis* (P.A. Smirn.) P.A. Smirn.)

Europe, Russia, Eurasia. Indeterminate species, see *Feddes Repertorium* 30: 399-400. 1932.

K. setacea (Pers.) DC. (*Koeleria tuberosa* var. *setacea* Pers.)

Europe. See *Synopsis Plantarum* 1: 97. 1805, *Cat. Hort. Monsp.* 118. 1813.

K. vallesiana (Honck.) Gaudin (*Koeleria alpicola* Gren. & Godr.; *Koeleria andreanszkyi* Ujhelyi; *Koeleria epauneroi* Kerguélen; *Koeleria gandreanszkyi* Kerguélen, also spelled *gandreanszkyi*; *Koeleria linkii* Kunth; *Koeleria pauneroi* Ujhelyi; *Koeleria pectinata* (Lam.) Shinners; *Koeleria setacea* Pers.; *Koeleria setacea* (Pers.) DC.; *Koeleria vallesiana* (Honck.) Bertol.) (Valais, Switzerland)

Europe, Switzerland, Algeria, Morocco. Densely tufted, grayish green leaves, silvery-green or purplish flower spikes, a pioneer grass, useful for erosion control, found in steppic grasslands, see *Tableau Encyclopédique et Méthodique ... Botanique* 1: 182. 1791, *Alpina* 3: 47. 1808 and *Bibliotheca Botanica* 65: 85-86. 1907, *Rhodora* 58: 95. 1956, *Annales Historico-Naturales Musei Nationalis Hungarici* 55: 189, 193. 1963 [1964], *Boissiera*. 23: 72. 1974, *Lejeunia* 75: 203-204. 1975, *Flore Descriptive et Illustrée de la France (de la Corse et des Contrées Limitrophes)* 5: 545. 1979, *Taxon* 34: 346-351. 1985, *Proceedings of the Royal Society of London, Series B, Biological Sciences* 223: 459-473. 1985, *Travaux de l'Institut Scientifique, Université Mohammed V. Série Botanique* 35: 1-168. 1988.

in English: Somerset hair grass, Somerset grass

in Morocco: tagifuft, tilibit, amuman

K. vallesiana (Honck.) Gaudin subsp. *castellana* (Boiss. & Reut.) Domin (*Koeleria castellana* Boiss. & Reut.; *Koeleria vallesiana* subsp. *castellana* Domin; *Koeleria villosa* Boutigny, non Pers.)

Europe. See *Bibliotheca Botanica* 65: 86. 1907.

K. vallesiana (Honck.) Gaudin subsp. *vallesiana* (*Koeleria aurata* Bubani)

Europe, Spain.

K. vallesiana (Honck.) Gaudin var. *intermedia* (Timb.-Lagr.) Kupfer (*Koeleria setacea* var. *intermedia* Timb.-Lagr.)

Europe. See *Boissiera*. 23: 72. 1974.

K. ventanica A.M. Molina

South America. See *Boletín de la Sociedad Argentina de Botánica* 26(3-4): 228, f. 4. 1990.

K. vurilochensis C.E. Calderón ex Nicora

South America. See *Flora Patagónica* 3: 66. 1978.

K. vurilochensis C.E. Calderón ex Nicora var. *patagonica* (Domin) A.M. Molina (*Koeleria bergii* var. *patagonica* Domin)

South America. See *Boletín de la Academia Nacional de Ciencias, Córdoba, Argentina* 3: 376. 1879 and *Bibliotheca Botanica* 65: 123. 1907, *Parodiana* 8(1): 57. 1993.

K. vurilochensis C.E. Calderón ex Nicora var. *vurilochensis*

South America. See *Flora Patagónica* 3: 66. 1978.

Koordersiochloa Merr. = *Lycochloa*

Samuelsson, *Pseudostreptogyne* A. Camus, *Streblochaete* Hochst. ex Pilg.

For the Dutch botanist Sijfert Hendrik Koorders, 1863-1919, forester, at Bogor (Buitenzorg), in the Dutch East Indian Forest Service, author of *Zakflora voor Java*. Batavia en Noordwijk 1893, *Die Kultur des Sono-Kling-Baumes*. 1895, *Flora von Tjibodas*. Batavia 1918-1923 and *Die Piperaceae von Java*. Amsterdam 1908, husband of the German-born Dutch botanist Anna Koorders-Schumacher (1870-1934). See J.W. Ijzerman, *Dwars door Sumatra ... Beschreven door J.W. Ijzerman, ... S.H. Koorders, etc.* 1895; J.H. Barnhart, *Biographical notes upon botanists*. 2: 313. 1965; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 217. 1972; S. Lenley et al., *Catalog of the manuscript and archival collections and index to the correspondence of John Torrey*. Library of the New York Botanical Garden. 253. 1973; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. 1917-1933; Stafleu and Cowan, *Taxonomic literature*. 2: 645-648. 1979.

Pooideae, Poodae, Meliceae, perennial, see *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 37: (Beibl. 85) 61. 1906, *Philipp. J. Sci., Bot.* 12: 67. 1917, *Bulletin de la Société Botanique de France* 77: 476. 1930, *Arkiv för Botanik utgivet av K. Svenska Vetenskapsakademien* 25(8): 4. 1933.

Species

K. javanica Merr.

Indonesia. See *Philipp. J. Sci. Bot.* 12: 67. 1917.

Korycarpus Zea ex Lag. = *Corycarpus* Spreng., *Diarrhena* P. Beauv., *Korycarpus* Lag.

From the Greek *korys*, *korythos*, *korytha* "helmet" and *karpos* "fruit."

Pooideae, Diarrheneae, type *Korycarpus arundinaceus* Zea ex Lag., see *Essai d'une Nouvelle Agrostographie* 142, 160, 162, t. 25, f. 2. 1812, *Genera et species plantarum* 4, 34. 1816, *Systema Vegetabilium, editio decima sexta* 1: 123. 1824 and *Flora of the Prairies and Plains of Central North America* 114. 1932, E.D. Merrill, *Index rafinesquianus*. The plant names published by C.S. Rafinesque, etc. 75. Jamaica Plain, Massachusetts, U.S. 1949, *Bulletin of the Torrey Botanical Club* 118: 128-136. 1991 [A revision of *Diarrhena* (Poaceae) in the United States], *Contributions from the United States National Herbarium* 48: 238, 269, 419. 2003.

Kralikella Coss. & Durieu = *Tripogon* Roem. & Schult.

Chloridoideae, Cynodonteae, see *Systema Vegetabilium* 2: 34, 600. 1817, *Bulletin de la Société Dauphinoise pour l'échange des Plantes* 66. 1876 and *Contributions from the United States National Herbarium* 41: 130, 231. 2001.

Kralikia Cosson & Durieu = *Tripogon* Roem. & Schult.

After the French botanist Jean-Louis Kralik, 1813-1892, from 1855 to 1885 curator of the Cosson Herbarium, plant collector in Corsica and Algeria, with J. Billon [and Alphonse Maille, 1813-1865, posth.] published *Catalogue des Reliquiae Mailleanae*. Paris 1869. See Louis Félicien Joseph Caignart de Saulcy, *Voyage autour de la mer Morte et dans les terres bibliques, exécuté de décembre 1850 à avril 1851*. [with a *Catalogue des plantes observées en Syrie et en Palestine ...* par MM. de Saulcy et Michon. Rédigé par MM. E. Cosson et Kralik] Paris 1853; Ernest Saint-Charles Cosson (1819-1889), *Compendium florum atlanticae*. Paris 1881-1887 and *Répertoire alphabétique des principales localités mentionnées dans le Compendium et le Conspectus florum atlanticae ...* Par E. Cosson ... avec le concours de MM. L. Kralik, A. Letourneux, etc. 1882; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993; J.H. Barnhart, *Biographical notes upon botanists*. 2: 317. 1965; Ethelyn Maria Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*.

219. 1972; H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 195. Oxford 1964.

Chloridoideae, Cynodonteae, type *Kralikia africana* Coss. & Durieu, see *Systema Vegetabilium* 2: 34, 600. 1817, *Bulletin de la Société Botanique de France* 14: 89. 1867 and *Contributions from the United States National Herbarium* 41: 130, 231. 2001.

Species

K. africana Cosson & Durand (*Arcangelina africana* (Cosson & Durand) Kuntze; *Kralikella africana* (Cosson & Durand) Coss. & Durieu; *Oropetium africanum* (Cosson & Durand) Chiov.; *Oropetium africanum* (Cosson & Durand) Pilg.)

Africa. See *Bulletin de la Société Botanique de France* 14: 89. 1867, *Revisio Generum Plantarum* 2: 759. 1891, *Bulletin de la Société Dauphinoise pour l'échange des Plantes* 66. 1876 and *Annuario del Reale Istituto Botanico di Roma* 8: 345. 1908, *Engler's botanische Jahrbucher* 74: 15. 1947.

Kralikiella Batt. & Trab. = *Kralikia* Coss. & Durieu, *Tripogon* Roem. & Schult.

The diminutive of the genus *Kralikia*.

Chloridoideae, Cynodonteae, see *Systema Vegetabilium* 2: 34, 600. 1817, *Fl. Alg. Monocot.* 245. 1895 and *Contributions from the United States National Herbarium* 41: 130, 231. 2001.

Kratzmannia Opiz = *Agropyron* Gaertn.

Pooideae, Triticeae, Hordeinae, see *Novi Commentarii Academiae Scientiarum Imperialis Petropolitanae* 14(1): 539-540. 1770, *Oekon.-Techn. Fl. Böhm.* 1: 398. 1836, *Seznam Rost. Kvet. Cesk.* 56. 1852 and *Ill. Fl. N.U.S.* edition 2. 1: 283. 1913, *Contributions from the United States National Herbarium* 48: 25-42, 419. 2003.

Krombholzia Rupr. ex Fournier = *Krombholzia* E. Fourn., *Zeugites* P. Browne

For the Bohemian botanist Julius Vincenz von Krombholz, 1782-1843 (d. Praha), physician, mycologist, M.D. Erfurt 1811, professor of theoretical surgery, his writings include *Anatomische Beschreibung eines sehr merkwürdigen Anencephalus*. Prague 1827, *Tafeln zu dem mykologischen Werke von K.* 1824, *Conspectus fungorum esculentorum*. Prag 1820, *Gerichtlich-medizinische Untersuchungen, nebst Gutachten*. Prag 1841 and *Naturgetreue Abbildungen und Beschreibungen der essbaren, schädlichen und verdächtigen Schwämme*. Prag 1831-1846. See [Gesellschaft Deutscher Naturforscher und Aertze], *Bericht über die [15th] Versammlung ... in Prag im Sept. 1837*, von Grafen K. Sternberg und Professor J.V. Edl. v. K. 1838; J.H. Barnhart, *Biographical notes upon botanists*. 2: 322. 1965; T.W. Bosser, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 220. 1972; A. Lasègue, *Musée botanique de Benjamin Delessert*. Paris 1845.

Centothecoideae, Centotheceae, or Panicoideae, Centotheceae, type *Krombholzia mexicana* Rupr. ex E. Fourn., see *The Civil and Natural History of Jamaica in Three Parts* 341. 1756, *Species Plantarum. Editio quarta* 4: 204. 1805, *Révision des Graminées* 2: 485, t. 157. 1831, *Bulletin de la Société Botanique de Belgique* 15(3): 464. 1876, *Biologia Centrali-Americana; ... Botany ...* 3(20): 577. 1885 and *Contributions from the United States National Herbarium* 17(3): 368. 1913, *Flora Novo-Galiciana* 14: 413. 1983, *Contributions from the United States National Herbarium* 46: 277, 639-641. 2003.

Ktenosachne Steud. = *Rostraria* Trin.

From the Greek *ktenos* "a comb, ribs, rake" and *achne* "chaff, glume."

Argentina, the Caribbean, Chile, Mexico, Peru, U.S., Uruguay. Pooideae, Poeae, Aveninae, type *Ktenosachne tenerrima* Steud., see *Fund. Agrost.* 149, t. 13. 1820, *Syn. Pl. Glumac.* 1: 150. 2-3 Mar 1854 [1855] and *Contributions from the United States National Herbarium* 48: 419, 604. 2003.

L

Lachnagrostis Trin. = *Agrostis* L.

Greek *lachne* “wool, woolly hair, downy” and *agrostis* “grass, weed, couch grass,” *Agrostis* L.

Pooideae, Poaceae, Agrostidinae, this genus is generally included within *Agrostis* L., type *Lachnagrostis filiformis* (G. Forst.) Trin., see *Species Plantarum* 1: 61-63. 1753, *Fundamenta Agrostographiae* 128, t. 10. 1820, *Flora Chilena* 6: 320. 1854 and *Records Dom. Mus.* 5(15): 142-143. 1965, *Fl. Fenn.* 5: 29. 1971, *Darwiniana* 24: 187-216. 1982, *Taxon* 41: 556. 1992, *New Zealand Journal of Botany* 33: 1-33. 1995 [New Zealand species of *Deyeuxia* P. Beauv. and *Lachnagrostis* Trin. (Gramineae: Aveneae)], *Taxon* 44: 611-612. 1995, *Telopea* 9(3): 439-448. 2001 [The genus *Lachnagrostis* (Gramineae) in Australia], *Contributions from the United States National Herbarium* 48: 419-420. 2003, *EPPO Bulletin* 34(2): 219-227. Aug 2004.

Species

L. ammobia Edgar

New Zealand. Perennial, coastal, slender to lax, tufted, leaf sheath ribbed, ligule acute, narrow leaves, loose panicle, lemma very densely hairy, awn more or less straight, sand dunes, damp sand, sandy habitats, see *New Zealand Journal of Botany* 33(1): 14-15, f. 3. 1995.

L. billardieri (R. Br.) Trin. (*Agrostis billardieri* R. Br.; *Agrostis diffusa* Banks & Sol. ex Hook.f.; *Agrostis labillardieri* Roem. & Schult.; *Agrostis solandri* F.Muell., p.p.; *Avena filiformis* Labill.; *Deyeuxia billardieri* (R. Br.) Kunth; *Calamagrostis aemula* var. *billardieri* (R. Br.) Maiden & Betche; *Calamagrostis billardierei* (R. Br.) Steud.; *Calamagrostis billardieri* (R.Br.) Steud.; *Deyeuxia billardierei* (R. Br.) Kunth; *Vilfa billardieri* (R.Br.) P. Beauv.) (named for the French explorer Jacques Julien Houtton de Labillardière, 1755-1834, botanist, traveler, from 1791-1795 on expedition to find the French navigator Jean François de Galaup de la Pérouse (1741-1788), among his works *Icones plantarum Syriae rariorum*. Lutetiae Parisiorum [Paris] 1791 [1791-1812], *Relation du voyage à la recherche de la Pérouse*. Paris [1800] and *Novae Hollandiae plantarum specimen*. Parisiis 1804-1806 [1807]. See J.H. Barnhart, *Biographical notes upon botanists*. 2: 331. 1965; H.M. Cooper, *French Exploration in South Australia*. Adelaide 1952; John Dunmore, *French Explorers in the Pacific*. New South Wales Herb.* 1: 101-119. 1941, *Muelleria* 7(2): 147, 149, f. 2b, 3. 1989, *New Zealand Journal of Botany* 33: 1-33. 1995, *Telopea* 9(3): 445. 2001.

in English: sand wind grass, coastal blown grass, blown grass, coast blown grass

L. elata Edgar

New Zealand. Perennial, slender to lax, tufted, more or less geniculate at base, ligule truncate to tapering, leaf sheath membranous to submembranous, very loose panicle, glumes more or less equal, lemma glabrous or hairy, awn present or rarely absent, awn straight or curved, awn length very variable, floodplains, see *New Zealand Journal of Botany* 33(1): 18, f. 5. 1995.

L. filiformis (Forst.f.) Trinius (*Agrostis avenacea* J.F. Gmelin; *Agrostis chamissonis* (Trin.) in English: bent grass, avens bent grass, blown grass, common blown grass, New Zealand wind grass, bents, fairy grass, Pacific bent, Pacific bentgrass

in Hawaii: he'upuea

L. glabra (Petrie) Edgar (*Deyeuxia glabra* Petrie)

New Zealand. Perennial, coastal, loose, sprawling, stoloniferous, leaf sheath ribbed and membranous, ligule oblong,

soft leaves, inflorescence paniculate contracted and spreading, glumes equal to subequal, awn straight, sandy areas, floodplains, see *Transactions and Proceedings of the Royal Society of New Zealand* 46: 36. 1914, *New Zealand Journal of Botany* 33(1): 20-22. 1995.

L. leptostachys (Hook.f.) Zotov (*Agrostis leptostachys* Hook.f.; *Deyeuxia filiformis* var. *leptostachya* (Hook.f.) Zotov; *Deyeuxia forsteri* var. *micrathera* Hack.)

New Zealand. Tufted, coastal, erect, leaf sheath membranous, ligule oblong, delicate panicle very lax, glumes equal to subequal, awn straight or curved, stony areas, rocky places, grassland, see *Révision des Graminées* 1: 77. 1829, *Flora Antarctica* 1: 94. 1845 and *Manual of the New Zealand Flora* 869. 1906, *The Subantarctic Islands of New Zealand* 2: 474. 1909, *Transactions of the Royal Society of New Zealand* 73: 235. 1943, *Records of the Dominion Museum* 5: 143. 1965, *New Zealand J. Bot.* 33: 19-20, 23. 1995.

L. littoralis (Hack.) Edgar (*Deyeuxia forsteri* var. *littoralis* Hack.; *Lachnagrostis filiformis* var. *littoralis* (Hack.) Zotov)

New Zealand. Annual, coastal, tufted, ligule oblong, panicle more or less contracted and spreading, glumes smooth, rocky places, see *Fundamenta Agrostographiae* 128, t. 10. 1820, *Révision des Graminées* 1: 77. 1829 and *Manual of the New Zealand Flora* 869. 1906, *Bibliotheca Botanica* 85: 352. 1915, *Transactions of the Royal Society of New Zealand* 73: 235. 1943, *Records of the Dominion Museum* 5: 142-143. 1965, *New Zealand Journal of Botany* 33(1): 23-26, f. 9. 1995.

L. littoralis (Hack.) Edgar subsp. *littoralis*

New Zealand. Annual, coastal, panicle branches slender, glumes equal to subequal, awn geniculate and twisted near base, see *New Zealand DSIR Bull.* 219: 170. 1977, *New Zealand Journal of Botany* 33(1): 23-26. 1995.

L. littoralis (Hack.) Edgar subsp. *salaria* Edgar

New Zealand. Annual, coastal, coarse, stiff, tough, robust, leaf sheath membranous, glumes unequal to dissimilar, awn straight or curved, see *New Zealand Journal of Botany* 33(1): 23-26. 1995.

L. lyallii (Hook.f.) Zotov (*Agrostis lyallii* Hook.f.; *Deyeuxia filiformis* var. *lyallii* (Hook.f.) Petrie; *Deyeuxia filiformis* var. *lyallii* (Hook.f.) Zotov; *Deyeuxia forsteri* var. *lyallii* (Hook.f.) Hack.; *Deyeuxia forsteri* var. *semiglabra* Hack.; *Lachnagrostis filiformis* var. *semiglabra* (Hack.) Zotov) (named for the British (b. Kincardineshire) naturalist David Lyall, 1817-1895 (Cheltenham, Glos), British Columbia Boundary Commission, surgeon, explorer, plant collector, botanist, 1839-1842 on Ross's Antarctic Voyage, 1847 New Zealand, 1852 with Edward Belcher (1799-1877) in the Arctic (a search for the lost Franklin expedition), 1862 Fellow of the Linnean Society. See J.H. Barnhart, *Biographical notes upon botanists.* 2: 415. 1965; H.N. Clokie,

Account of the Herbaria of the Department of Botany in the University of Oxford. 204. Oxford 1964; R. Glenn, *The botanical explorers of New Zealand.* Wellington 1950; Captain Sir Edward Belcher, *The Last of the Arctic Voyages, Being a Narrative of the Expedition in HMS Assistance ... in Search of Sir John Franklin.* London 1855; G.A. Doumani, editor, *Antarctic Bibliography.* Washington, Library of Congress 1965-1979; John T. Walbran, *British Columbia Coast Names, 1592-1906.* To Which are Added a Few Names in Adjacent United States Territory, Their Origin and History. First Edition. Akrigg & Helen B. Akrigg, *British Columbia Place Names.* Victoria: Sono Nis Press, 1986)

New Zealand. Perennial, stoloniferous, short, erect or geniculate at base, densely or loosely tufted, leaf sheath submembranous, flat or inrolled leaves, lax or contracted panicles, glumes subequal, awn geniculate, open habitats, grassland, see *Fundamenta Agrostographiae* 128, t. 10. 1820, *Révision des Graminées* 1: 77. 1829, *Flora Novae-Zelandiae* 1: 297. 1853 and *Manual of the New Zealand Flora* 869. 1906, *The Subantarctic Islands of New Zealand* 2: 474. 1909, *Transactions of the Royal Society of New Zealand* 73: 235. 1943, *Records of the Dominion Museum* 5: 142. 1965.

L. pilosa (Buchanan) Edgar (*Agrostis pilosa* A. Rich., nom. illeg., non *Agrostis pilosa* Retz.; *Agrostis pilosa* Lens & A. Rich., nom. illeg., non *Agrostis pilosa* Retz.; *Deyeuxia pilosa* Buchanan; *Lachnagrostis richardii* Zotov)

New Zealand. Perennial, tufted, robust, harsh, erect, ligule rounded, large panicles stiffly contracted and loose, clustered spikelets, glumes equal to subequal, coastal and inland, lowland to alpine, see *Voyage de découvertes de l'Astrolabe ... Part [1]: Essai d'une flore de la Nouvelle-Zélande* 134, t. 23. Paris 1832, *Indigenous Grasses of New Zealand* add. et corrig. 11. 1880 and *Manual of the New Zealand Flora* 869. 1906, *Bibliotheca Botanica* 85: 352. 1915, *Transactions of the Royal Society of New Zealand* 73: 235. 1943, *Records of the Dominion Museum* 5: 143. 1965, Stafleu & Cowan, *Taxonomic literature.* 1: 697. Utrecht 1976, *New Zealand Journal of Botany* 33(1): 27-28. 1995.

L. pilosa (Buchanan) Edgar subsp. *nubifera* Edgar

New Zealand. Perennial, coastal, hairy lemma, awn straight and short, found in damp areas, grassland, see *New Zealand Journal of Botany* 33(1): 28, f. 10. 1995.

L. pilosa (Buchanan) Edgar subsp. *pilosa* (*Deyeuxia pilosa* Buchanan)

New Zealand. Perennial, variable in size, robust, smooth to scabrid culms, wide flat leaves, awn geniculate, see *New Zealand Journal of Botany* 33(1): 27-28. 1995.

L. sodiroana (Hack.) Rúgolo & A.M. Molina (*Agrostis sodiroana* Hack.)

Ecuador. See *Österreichische Botanische Zeitschrift* 52(2): 61. 1902, *La Botánica en el Nuevo Milenio: Memorias del Tercer Congreso Ecuatoriano de Botánica* 26, f. 1. 2002.

L. striata (Colenso) Zotov (*Agrostis striata* Colenso; *Deyeuxia forsteri* var. *humilior* Hack.)

New Zealand. Perennial, low, erect or ascending, tufted, leaf sheath membranous, ligule oblong, panicle contracted and loose, glumes subequal, lemma densely hairy, awn straight, lowland to subalpine, see *Transactions and Proceedings of the New Zealand Institute* 21: 107. 1889 and *Manual of the New Zealand Flora* 869. 1906, *Bibliotheca Botanica* 85: 352. 1915, *Transactions of the Royal Society of New Zealand* 73: 235. 1943, *Records of the Dominion Museum* 5: 142. 1965.

L. tenuis (Cheeseman) Edgar (*Deyeuxia billardierei* var. *tenuis* Petrie ex Cheeseman; *Deyeuxia billardierei* var. *tenuis* Cheeseman; *Deyeuxia tenuis* (Cheeseman) Zotov; *Deyeuxia tenuis* (Petrie ex Cheeseman) Zotov; *Lachnagrostis tenuis* (Petrie ex Cheeseman) Edgar)

New Zealand. Tufted, coastal, robust, stiff, leaf sheath coriaceous, ligule truncate, leaves narrow and inrolled, panicle branches erect to spreading, glumes strongly keeled, central awn geniculate, slopes, salt marshes, see *Manual of the New Zealand Flora* 870. 1906, *Records of the Dominion Museum* 5: 139. 1965, *New Zealand Journal of Botany* 33(1): 30-32. 1995.

L. uda Edgar

New Zealand. Perennial, subalpine to alpine, loose, leaf sheath membranous, leaf blades flat or folded, panicle contracted and loose, glumes equal to subequal, mucronate or awned, short straight awn, damp habitat, boggy spots and boggy ground, see *New Zealand Journal of Botany* 33(1): 32, f. 11. 1995.

Lachnochloa Steudel

From the Greek *lachne* “wool, down” and *chloe*, *chloa* “grass.”

Oryzae, type *Lachnochloa pilosa* Steud., see *Synopsis Plantarum Glumacearum* 1: 5. 1855 [1853] and *Genera Graminum* 376. 1986.

Species

L. pilosa Steud.

West Africa. Type lost.

Lachryma-jobi Ortega = Coix L.

Job's tears, Latin *lachryma*, *lacrima* “a tear.”

Panicoideae, Andropogoneae, Coicinae, see *Species Plantarum* 2: 972. 1753, *Syst. Nat.* edition 10, 1261. 1759, *Tabulae Botanicae* 30 (“Lachryma-job”). 1773 and *Contributions from the United States National Herbarium* 46: 162-163, 277. 2003.

Lachrymaria Fabr. = Coix L., Lachrymaria Heist. ex Fabr.

Latin *lachryma*, *lacrima* “a tear,” referring to the fruit.

Panicoideae, Andropogoneae, Coicinae, see *Species Plantarum* 2: 972. 1753, *Syst. Nat.* edition 10, 1261. 1759, *Enumeratio Methodica Plantarum* 208. 1759 and *Contributions from the United States National Herbarium* 46: 162-163, 277. 2003.

Lacryma Medik. = Coix L.

From the Latin *lachryma*, *lacrima* “a tear.”

Panicoideae, Andropogoneae, Coicinae, see *Species Plantarum* 2: 972. 1753, *Syst. Nat.* edition 10, 1261. 1759, *Philosophische Botanik* 1: 177. Mannheim 1789 and *Contributions from the United States National Herbarium* 46: 162-163, 277. 2003.

Laertia Gromov = Laertia Gromov ex Trautv., Leersia Sw., Leersia Sol. ex Sw.

Ehrhartoideae, Oryzae, Oryzinae, see *Species Plantarum* 1: 55. 1753, *Nova Genera et Species Plantarum seu Prodrum* 21. 1788, *Genera Plantarum* 45. 1789, *Essai d'une nouvelle Agrostographie*. 2: 153, t. 4, f. 2. 1812 and *Rhodora* 5(52): 118. 1903, *Rhodora* 18(215): 239. 1916, *Rhodora* 30(353): 84. 1928, *Acta Botanica Cubana* 4: 1-11. 1980, *Acta Facultatis Rerum Naturalium Universitatis Comenianae, Botanica* 33: 63-67. 1986, *New Zealand Journal of Botany* 29: 117-129. 1991, *Webbia* 49(2): 265-329. 1995, *Contributions from the United States National Herbarium* 39: 64-67. 2000.

Lagurus L. = Avena Scop.

From the Greek *lagos* “a hare” and *oura* “a tail,” referring to the shape of the paniculate inflorescence; see Carl Linnaeus, *Species Plantarum*. 81. 1753 and *Genera Plantarum*. Edition 5. 34. 1754.

One species, Mediterranean. Pooideae, Poodae, Aveneae, or Pooideae, Poeae, Agrostidinae or Aveninae, annual, slender, elegant, tufted, erect or ascending, flexible, softly hairy to velvety, herbaceous, simple or branching at base, ligule obtuse to truncate, leaf blade flat, auricles absent, arching and downy leaves linear to narrowly lanceolate to

linear-lanceolate, plants bisexual, inflorescence softly hairy and fluffy of chasmogamous spikelets, dense spike-like panicle more or less ovoid to oblong-cylindric, spikelets overlapping and compressed laterally, 1 bisexual floret, 2 glumes more or less unequal and hairy or villous, lemma shorter than glumes and bifid at apex, lemma awned from dorsal surface, awn bent, palea 2-keeled or not keeled, 2 toothed and free lodicules, 3 stamens, ovary glabrous, 2 white stigmas, small fruit, weed species, ornamental, often grown for its 2-inch seed heads, grows on sands near the sea, in sand dunes, open habitats, maritime regions, disturbed places, type *Lagurus ovatus* L., see *Species Plantarum* 1: 81. 1753, *Introductio ad Historiam Naturalem* 74. Prague 1777 and *Nuovo Giornale Botanico Italiano* 49: 133-204. 1942, *Flora de la Provincia de Buenos Aires* 4(2): 35. 1970, *Willdenowia* 19: 405-412. 1990, *Global Ecology and Biogeography* 7(5): 367-378. Sep 1998, *Grasses: Systematics and Evolution* 61-74. 2000, *Molecular Phylogenetics and Evolution* 21(2): 198-217. 2001, *Contributions from the United States National Herbarium* 48: 420. 2003.

Species

L. ovatus L.

Mediterranean. Annual, tufted, erect or geniculate, velvety, leaf sheath round and membranous, ligule membranous and pubescent, leaf blade flat and softly pubescent, spike-like panicle dense and ovoid, very soft flower heads silky and bristly, 1 floret, glumes 1-nerved, lemma with 2 awn-tipped lateral teeth, anthers yellow, the dense seed heads resist shattering, low grazing value, dry-flower ornamental and attractive, naturalized elsewhere, weed species of disturbed areas, coastal dunes, sandy soils, maritime sands, along roadsides, in gardens, under trees and shrubs, see *Species Plantarum* 1: 81. 1753, *Introductio ad Historiam Naturalem* 74. Prague 1777, *Florae Siculae Synopsis* 1: 127. 1843 and *Beihefte zum Botanischen Centralblatt* 51(2): 294. 1934, *Nuovo Giornale Botanico Italiano* 47: 234. 1940, *Nuovo Giornale Botanico Italiano* 49: 185. 1942, *Colloques Phytosociologiques* 12: 81. 1983, *Lagascalia* 15: 119-124. 1988, *Bothalia* 18: 114-119. 1988, *Willdenowia* 19: 405, 407, f. 1A. 1990, *Anales del Jardín Botánico de Madrid* 47: 411-417. 1990, *Boletim da Sociedade Broteriana, ser. 2* 63: 29-66. 1990, *South African Journal of Botany* 61: 60-65. 1995, *Bothalia* 26(1): 63-67. 1996.

in English: bunny's tail, bunny tail grass, hare's foot, hare's tail grass, rabbit-tail grass, hare's tail, dwarf hare's tail, bouquet grass

in French: queue-de-lièvre

in Italian: coda di lepore

in Spanish: rabillo de conejo, lágrimas de la Virgen

in German: Hasenschwänzchen, Hasenschwanzgras, Samtgras, Südliches Hasenschwanzgras

in South Africa: haasstert, haasstertgras, klossiesgras, plu-isiesgras

L. ovatus L. subsp. *nanus* (Guss.) Messeri (*Lagurus ovatus* var. *globosus* Zohary; *Lagurus ovatus* var. *microcephalus* Sennen & Mauricio; *Lagurus ovatus* var. *nanus* Guss.)

Italy, Sicily. See *Florae Siculae Synopsis* 1: 127. 1843 and *Beihefte zum Botanischen Centralblatt* 51(2): 294. 1934, *Nuovo Giornale Botanico Italiano* 49: 185. 1942, *Willdenowia* 19: 405-412. 1990.

L. ovatus L. subsp. *vestitus* (Messeri) H. Scholz (*Lagurus nitens* Lojac.; *Lagurus ovatus* subsp. *vestitus* (Messeri) Brullo; *Lagurus ovatus* var. *vestitus* Messeri)

Italy, Sicily, Aegean Islands. See *Flora Sicula* (Lojacono) 3: 286. 1908-1909, *Nuovo Giornale Botanico Italiano* 47: 234. 1940, *Colloques Phytosociologiques* 12: 81. 1983, *Willdenowia* 19: 407. 1990.

Lamarckia Moench (original spelling

Lamarkia, non Lamarckia Olivi) =

Achyrodes Boehmer, *Chrysurus* Pers.,

Moench mut. Koeler, *Lamarkia* Vahl

(Solanaceae), *Pterium* Desv., *Tinaea* Garzia

After the French (b. Picardy) biologist Jean Baptiste Antoine Pierre de Monnet (Monet) de Lamarck, 1744-1829 (d. Paris), a great naturalist, botanist, zoologist, palaeontologist, conchologist, from 1761 to 1768 in the French army, from 1778 to 1793 botanist at the Jardin des Plantes in Paris (Jardin du Roi), naturalist and a forerunner of Darwin's theory of evolution, from 1793 to 1829 professor of zoology at the Museum d'Histoire Naturelle in Paris, his writings include *Flore française* Paris 1778 and *Philosophie Zoologique*. [First edition, two volumes in one, 8 vo.] Paris 1822, contributor of the botanical part of the *Encyclopédie méthodique*. Paris, Liège 1783-1817, his works cover a broad spectrum of subjects, from botany to chemistry, meteorology, zoology and geology. See Leslie J. Burlingame, in *D.S.B.* 7: 584-594. 1981; Frans A. Stafleu, *Linnaeus and the Linnaeans: The Spreading of Their Ideas in Systematic Botany, 1735-1789*. Utrecht 1971; Stafleu and Cowan, *Taxonomic literature*. 2: 730-734. 1979; G.C. Wittstein, *Etymologisch-botanisches Handwörterbuch*. 497. 1852; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 739. One species, Mediterranean, Middle East. Pooideae, Poodae, Poeae, Dactylidinae, annual, tufted, erect or ascending or decumbent at the base, herbaceous, golden yellow often tinged purple when mature, glabrous, smooth, auricles absent, ligule acute and membranous, sheaths inflated or keeled, leaf blade flat and narrow, leaves linear and acute, hollow internodes, plants bisexual, panicle unilateral or a false spike, panicle secund and branched, branches short and erect, spikelets dimorphic, deciduous clusters of 3 fertile spikelets, the terminal spikelet of each fascicle fertile, fertile spikelets with 1 bisexual floret on a slender stipe and 1 rudimentary or vestigial floret on a long rachilla internode, 2 glumes subequal and short-awned, fertile lemma broader bearing a fine straight awn, sterile spikelets intermixed with the others, palea keels wingless, 2 lodicules membranous and glabrous, 3 stamens, ovary glabrous and elliptic, 2 white stigmas, fruit grooved and glabrous, sometimes a weedy species in disturbed ground, decorative attractive inflorescence, cultivated and naturalized elsewhere in the wild, dry places, open habitats, terrace walls, road verges, mountain gullies, type *Lamarckia aurea* (L.) Moench, see *Definitiones generum Plantarum ...* edition 3: 420. Lipsiae [Leipzig] 1760, *Methodus Plantarum Horti Botanici ...* 201. 1794, *Descriptio graminum in Gallia et*

Species

L. aurea (L.) Moench (*Achyrodes aureum* (L.) Kuntze; *Chrysurus aureus* (L.) P. Beauv. ex Spreng.; *Chrysurus aureus* (L.) Besser; *Chrysurus cynosuroides* Pers.; *Cynosurus aureus* L.)

Mediterranean. Annual, slender, erect or decumbent at the base, tufted or loosely tufted, shining golden yellow, small, glabrous, flat leaf blade, leaf sheaths inflated or keeled, ligule an unfringed membrane, leaves often overtopping the inflorescence, silky and contracted inflorescence, panicle unilateral and ovate-oblong, spikelets of two kinds, spikelets heteromorphic forming clusters, fertile spikelets hidden, each fertile spikelet surrounded by several sterile spikelets, hermaphrodite florets 2 per spikelet, sterile spikelets awnless with 2-8 empty lemmas, fertile spikelet 1-flowered with straight awns, lemma pubescent near the tip, palea narrowly elliptic, anthers yellow, ovary glabrous, fodder plant, cultivated and ornamental, HCN-glucoside, rather weedy species of disturbed areas, often in sandy soils, cliff ledges, in nonwetlands, on open ground, rocky hillsides, stony places, see *Species Plantarum* 1: 73. 1753, *Methodus Plantarum Horti Botanici ...* 201. 1794, *Syn. Pl.* 1: 80. 1805, *Systema Vegetabilium, editio decima sexta* 1: 296. 1825, *Revisio Generum Plantarum* 2: 758. 1891 and *Taxon* 31(1): 70. 1982, *Taxon* 33: 126-134. 1984, *Fl. Cyprus* 2: 1727. 1985, *Boletim da Sociedade Broteriana, ser. 2* 63: 153-205. 1990, *Taxon* 49(2): 249. 2000.

in English: golden top, goldentop grass, comb grass, feathery barley grass

in French: lamarckia doré

in Morocco: sibouss

Lamarckia Moench = *Lamarckia* Moench, *Lamarckia* Medik. (Malvaceae), *Lamarckia* G. Don (Solanaceae)

For the French biologist Jean Baptiste Antoine Pierre de Monnet de Lamarck, 1744-1829, naturalist, botanist, zoologist, palaeontologist, conchologist.

Pooideae, Poaeae, Dactylidinae, see *Methodus Plantas Horti Botanici* ... 201. 1794, *A General History of the Dichlamydeous Plants* 4: 400, 487. 1838 and *Contributions from the United States National Herbarium* 48: 420-421. 2003.

Lamprothyrus Pilger

From the Greek *lampros* "shining, bright, glossy" and *thyrus* "a panicle," referring to the inflorescence.

About 2-3 species, tropical South America, Bolivia to Argentina. Arundinoideae, Arundineae, or Danthonioideae, Danthoneae, perennial, herbaceous, caespitose, leaf sheaths open, ligule a fringe of hairs, narrow linear leaves, plants gynodioecious, open or contracted inflorescence paniculate plume-like, 4-10-12 florets and a rudiment, bisexual florets lacking, spikelets compressed, 2 glumes very unequal and often nerveless, 3 awns recurving, lemmas villous with well-developed awned lateral lobes, palea pilose, 2 lodicules hairy or glabrous, stamens absent, female spikelets with 3 minute staminodes, ovary glabrous, 2 stigmas, rocky places, along roads, shrubby slopes, hill slopes, dry areas, stream banks, type *Lamprothyrus hieronymi* (Kuntze) Pilg., see *Revisio Generum Plantarum* 3(3): 373. 1898 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 37(Beibl. 85): 58. 1906, *Die Systematik und Anatomie der Arundineae* 130-131. 1961, *Kurtziana* 12-13: 119-132. 1979, *Revista de Ciencias (San Marcos)* 74: 48-57. 1986, *Fieldiana, Botany, New Series* 24: 1-126. 1990, *Annals of the Missouri Botanical Garden* 80(2): 512-517. 1993, *Contributions from the United States National Herbarium* 46: 277-278. 2003.

Species

L. hieronymi (Kuntze) Pilg. (*Danthonia hieronymi* (Kuntze) Hack.; *Danthonia hieronymi* var. *pyramidata* Pilg. ex Rojas; *Danthonia hieronymi* var. *tincta* Pilg. ex Rojas; *Lamprothyrus hieronymi* var. *hieronymi*; *Lamprothyrus hieronymi* var. *jujuyensis* (Kuntze) Pilg.; *Lamprothyrus hieronymi* var. *nervosus* Pilg.; *Lamprothyrus hieronymi* var. *pyramidatus* Pilg.; *Lamprothyrus hieronymi* var. *tinctus* Pilg.; *Lamprothyrus hieronymi* (Kuntze) Pilg.; *Lamprothyrus venturii* Conert; *Triraphis hieronymi* Kuntze; *Triraphis hieronymi* var. *jujuyensis* Kuntze)

Bolivia, Peru. A cyanogenetic grass, erect, forming clumps or small mats, acute leaf blades linear or filiform, lax panicle oblong, spikelets 4- to 12-flowered, used for building purposes, rocky places, stream embankment, dry areas, open hillsides, see *Revisio Generum Plantarum* 3: 374. 1893, *Revisio Generum Plantarum* 3(3): 373-374. 1898 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 37(Beibl. 85): 58-59. 1906, *Anales del Museo Nacional de Buenos Aires* 13: 484. 1906, *Revista del Jardín Botánico y Museo de Historia Natural del Par-*

aguay 2: 168. 1930, *Die Systematik und Anatomie der Arundineae* 128, 130-131. 1961.

in Bolivia: paja

L. peruvianus Hitchc.

Peru, Ecuador, Bolivia. Perennial, dense, erect, robust, tussocky, leaves mostly basal, leaf sheaths open, ligule a dense rim of hairs, leaf blades linear filiform, inflorescence a narrow pyramidal panicle, spikelets linear 3- to 8-flowered, glumes lanceolate, slopes, along roadsides, shrubby areas, closely related to *Lamprothyrus hieronymi*, see *Proceedings of the Biological Society of Washington* 36: 195. 1923, *Nómina de las plantas recolectadas en el Valle de Cochabamba* 2: 17-86. 1966, *Annals of the Missouri Botanical Garden* 80(2): 512-517. 1993.

Langsdorffia Regel = *Eustachys* Desv., *Langsdorffia* Mart. (Balanophoraceae), *Langsdorffia* Raddi (Arecaceae), *Langsdorffia* (Sm.) Raf. (Solanaceae), *Langsdorffia* Leandro (Rutaceae), *Langsdorffia* C. Agardh (Balanophoraceae)

Named for the German surgeon Georg Heinrich von Langsdorff, 1774-1852, explorer, naturalist, 1803-1806 Krusenstern Expedition (Adam Johann von Krusenstern, 1770-1846), in Brazil, plant collector, with Friedrich Ernst Ludwig von Fischer (1782-1854) published *Plantes recueillies pendant le voyage des Russes autour du monde*. Tubingue 1810, *Bemerkungen auf einer Reise um die Welt in den Jahren 1803 bis 1807 ... Mit ... Kupfern*, etc. Frankfurt am Main 1812, *Bemerkungen über Brasilien*. Heidelberg 1821 and *Phantasmatum sive machinarum ad artis obstetriciae exercitia facientium vulgo Fantôme dictarum brevis historia*. Dissertatione inaugurali delineata, etc. Gottingae [1797]. See J.H. Barnhart, *Biographical notes upon botanists*. 2: 343. 1965; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 227. 1972; H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 197. Oxford 1964; A. Lasègue, *Musée botanique de Benjamin Delessert*. Paris 1845; Emil Bretschneider (1833-1901), *History of European Botanical Discoveries in China*. [Reprint of the original edition 1898] Leipzig 1981.

Chloridoideae, Cynodonteae, Chloridinae, type *Eustachys petraea* (Sw.) Desv., see *Nova Genera et Species Plantarum seu Prodromus* 25. 1788, *Nouveau Bulletin des Sciences, publié par la Société Philomatique de Paris* 2: 188-189. 1810, *Journal von Brasilien, oder Vermischte Nachrichten aus Brasilien, auf Wissenschaftlichen Reisen Gesammelt* 2: 179, t. 5. 1818, *Memorie di Matematica e di Fisica della*

Società Italiana delle Scienze 18(2): 345. 1820, *Denkschriften der Königlichen Akademie der Wissenschaften zu Muenchen* 7: 229. 1821, *Conspectus Regni Vegetabilis* 4. 1828, *Flora Telluriana* 3: 74. 1836, *Index Seminum* (St. Petersburg) 26. 1863 and *Flora Mesoamericana* 6: 288-289. 1994, *Contributions from the United States National Herbarium* 41: 117-118, 130. 2001.

Lappago Schreber = *Tragus* Haller

From Latin *lappa*, *ae* “burdock,” *lappago* “a plant resembling a bur,” referring to the prickly flowers; see Manlio Cortelazzo & Paolo Zolli, *Dizionario etimologico della lingua italiana*. 3: 651. Zanichelli, Bologna 1983.

Chloridoideae, Cynodonteae, Zoysiinae, or Chloridoideae, Cynodonteae, Traginae, see *Species Plantarum* 2: 1049. 1753, *Historia Stirpium Indigenarum Helvetiae Inchoata* 2: 203. 1768, *Flora Pedemontana* 2: 241. 1785, *Genera Filicum* 55. 1789, *Synopsis Plantarum Germaniae* 1: 440. 1792, *Hortus Bengalensis, or a Catalogue ...* 82. 1814, *Flora Indica; or Descriptions ...* 1: 284. 1820, *Neue Entdeckungen im ganzen Umfang der Pflanzenkunde* 3: 15. 1822, *Annales des Sciences Naturelles; Botanique, sér.* 3 19: 373. 1853, *Memorie della Reale Accademia delle Scienze di Torino* 387. 1854, *Synopsis Plantarum Glumacearum* 1: 112. 1854, *Anales de la Sociedad Científica Argentina* 16: 111. 1883, *The Flora of British India* 7: 97. 1896 and *Adv. Frontiers Pl. Sci.* 5: 159. 1963, *Contributions from the United States National Herbarium* 41: 130, 220-221. 2001.

Lappagopsis Steud. = *Axonopus* P. Beauv.

Resembling *Lappago* Schreb.

Panicoideae, Paniceae, Paspalinae, type *Lappagopsis bijuga* Steud., see *Essai d'une Nouvelle Agrostographie* 12, 154. 1812, *Synopsis Plantarum Glumacearum* 1: 112. 1855 [1854] and *Contr. U.S. Natl. Herb.* 12: 142. 1908, *Proceedings of the Biological Society of Washington* 24: 132, 135. 1911, *Advancing Frontiers of Plant Sciences* 5: 1-186. 1963, *Revista de la Academia Colombiana de Ciencias Exactas, Físicas y Naturales* 26(98): 13-23. 2002, *Contributions from the United States National Herbarium* 46: 116-134, 278. 2003.

Lasiacis (Griseb.) A. Hitchc. = *Lasiacis* A. Hitchc., *Pseudolasiacis* A. Camus

From the Greek *lasios* “shaggy, woolly, hairy” and *ake*, *akis* “tip, thorn, a sharp point,” referring to the fruit, to the floret.

About 20 species, tropical and subtropical America. Panicoideae, Panicoideae, Paniceae, Panicinae, *Panicum* sect.

Lasiacis Griseb., perennial, rarely annual, persistent, herbaceous or woody, robust, hollow to solid, suffrutescent or subwoody, terrestrial, bushy, erect, bamboo-like, creeping, sprawling, clambering, straggling, arching, decumbent, climbing, more or less scandent, branched, leaf blades linear to elliptic usually lacking pseudopetioles, ligule membranous more or less fringed, rhizomatous, stoloniferous, plants bisexual, inflorescence paniculate open or contracted, panicle base included in the uppermost leaf sheath or exerted, 2-flowered, fruiting spikelets oblique to round subglobose black and shiny when mature, glumes and lower lemma oily when mature, 2 glumes very unequal, lower glume 5- to 13-nerved, upper glume 7- to 15-nerved, lemmas hairy, upper lemma with a shallow excavation, sometimes with a second sterile lemma, palea present, 2 free and fleshy lodicules, 3 stamens, ovary glabrous, 2 stigmas, berry-fruited, forest, under trees, forest margins, disturbed forest, along paths, drainage ditches, see *Species Plantarum* 1: 55. 1753, *Systema Naturae, Editio Decima* 2: 871. 1759, *Flora of the British West Indian Islands* 551. 1864, *Gen. Pl.* 3(2): 1103. 1883 and *Contributions from the United States National Herbarium* 15: 16. 1910, *Contr. U.S. Natl. Herb.* 22: 13. 1920, *Bull. Mens. Soc. Linn. Lyon* 14: 72. 1945, *Fieldiana, Botany* 24(2): 38-331. 1955, *Annals of the Missouri Botanical Garden* 65: 637-637. 1978, *Annals of the Missouri Botanical Garden* 65(4): 1133-1254. 1978, *Flora Mesoamericana* 6: 318-321. 1994, *Flora Fanerogámica Argentina* 19(1): 11-16. 1995, *Memoirs of the New York Botanical Garden* 78: 509-540. 1996 [Poaceae - Flora of St. John, U.S. Virgin Islands], *Adansonia, Sér.* 3 21(2): 231-237. 1999, *Am. J. Bot.* 88: 1993-2012. 2001, *Contributions from the United States National Herbarium* 46: 278-283. 2003, *Am. J. Bot.* 90: 796-821. 2003.

Species

L. sp.

in Ecuador: carricillo trepador

in Mexico: carricillo, pacab, tzaicuó

L. anomala Hitchc. (*Panicum latifolium* var. *tomentellum* Döll)

Brazil, Venezuela, Trinidad. Perennial, caespitose, erect, decumbent, creeping, climbing, arching, clambering, often scrambling over other plants, bamboo-like or liana-like, more or less woody, leaf blades ovate to narrowly-elliptic, ligule membranous, panicle ovate or oblong sparsely branched with branches spreading to slightly reflexed, branches of inflorescence puberulent as well as scabrous, spikelets globose 3-flowered, spikelets with 2 glumes and 2 sterile lemmas subtending the fertile floret, forest margins, savannahs, riverbanks, on sandy soils, see *Flora Brasiliensis* 2(2): 207. 1877 and *Journal of the Washington Academy of Sciences* 9: 37. 1919, *Annals of the Missouri Botanical Garden* 65(4): 1162. 1978.

L. divaricata (L.) Hitchc. (*Lasiacis harrisii* Nash; *Lasiacis sloanei* (Griseb.) Hitchc.; *Panicum bambusoides* Desv. ex Ham.; *Panicum chauvinii* Steud.; *Panicum divaricatum* L.; *Panicum divaricatum* C. Presl ex Griseb., nom. illeg., non *Panicum divaricatum* L.; *Panicum divaricatum* Michx., nom. illeg., non *Panicum divaricatum* L.; *Panicum divaricatum* var. *glabrum* Kuntze; *Panicum divaricatum* var. *stenostachyum* Griseb.; *Panicum sloanei* Griseb.)

South America. Perennial, arching, bamboo-like, erect, trailing, decumbent, procumbent, leaning, scandent, hollow, leaf blades linear-lanceolate glabrous, panicle ovate or oblong with ascending branches, spikelets obovate, a second sterile lemma absent, fodder, handicrafts, medicinal value, roots boiled with *Chiococca alba* (L.) A.S. Hitchc. (Rubiaceae) to relieve kidney pain, found in woods, along roadsides, in moist thickets, bushy hillsides, see *Systema Naturae, Editio Decima* 2: 871. 1759, *Flora Boreali-Americana* 1: 50. 1803, *Prodromus Plantarum Indiae Occidentalis* 10. 1825, *Synopsis Plantarum Glumacearum* 1: 68. 1853, *Flora of the British West Indian Islands* 551. 1864, *Revisio Generum Plantarum* 2: 784. 1891 and *Contr. U.S. Natl. Herb.* 12: 119. 1908, *Contributions from the United States National Herbarium* 15: 16. 1910, *Botanical Gazette* 51: 302. 1911, *Torreya* 13: 274. 1913, *Ann. Missouri Bot. Gard.* 65: 1164. 1978.

in Mexico: carricillo, carrizo, carrizo de ratón, ishcatichiya, mehensit, pichut, pitut, sit

in West Indies: small cane, wild cane

L. divaricata (L.) Hitchc. var. *austromericana* Davidse (*Lasiacis leptostachya* Hitchc.)

Colombia to northern Argentina, Brazil. Climbing, arching, leaning, bamboo-like, rooting at the lower nodes, leaf blades more or less glabrous to sparsely hairy, suffrutescent, common in rain forest, forest margin, along roadsides, see *Contributions from the United States National Herbarium* 15: 16. 1910, *Contributions from the United States National Herbarium* 22(1): 19, t. 16. 1920, *Annals of the Missouri Botanical Garden* 64(2): 374. 1977 [1978].

in Argentina: caña

L. divaricata (L.) Hitchc. var. *divaricata* (*Lasiacis harrisii* Nash; *Panicum bambusoides* Desv. ex Ham.; *Panicum chauvinii* Steud.; *Panicum divaricatum* L.; *Panicum divaricatum* C. Presl ex Griseb., nom. illeg., non *Panicum divaricatum* L.; *Panicum divaricatum* Michx., nom. illeg., non *Panicum divaricatum* L.; *Panicum divaricatum* var. *glabrum* Kuntze; *Panicum divaricatum* var. *stenostachyum* Griseb.)

South America. Leaning, arching, bamboo-like, scandent, found in open disturbed habitats, forest, grassy areas, shade or partial shade, see *Systema Naturae, Editio Decima* 2: 871. 1759, *Flora Boreali-Americana* 1: 50. 1803, *Prodromus Plantarum Indiae Occidentalis* 10. 1825, *Synopsis Plantarum Glumacearum* 1: 68. 1853, *Flora of the British West Indian Islands* 551. 1864, *Revisio Generum Plantarum*

2: 784. 1891 and *Contr. U.S. Natl. Herb.* 12: 119. 1908, *Contributions from the United States National Herbarium* 15: 16. 1910, *Botanical Gazette* 51: 302. 1911, *Torreya* 13: 274. 1913, *Ann. Missouri Bot. Gard.* 65: 1164. 1978.

L. divaricata (L.) Hitchc. var. *leptostachya* (Hitchc.) Davidse (*Lasiacis leptostachya* Hitchc.)

Central America. Scrambling bamboo-like grass, scandent, arching, leaning, weak, pendent, found in forest, woods, see *Contributions from the United States National Herbarium* 15: 16. 1910, *Contributions from the United States National Herbarium* 22(1): 19, t. 16. 1920, *Annals of the Missouri Botanical Garden* 64(2): 375. 1977 [1978].

in Nicaragua: carrizo

L. grisebachii (Nash) Hitchc. (*Panicum grisebachii* Nash)

Belize, Nicaragua, Mexico. Trailing, shade, forest, woods, see *Bulletin of the Torrey Botanical Club* 35: 301. 1908, *Botanical Gazette* 51: 302. 1911.

L. grisebachii (Nash) Hitchc. var. *lindeliiana* Davidse

South America. See *Botanical Gazette* 51: 302. 1911, *Annals of the Missouri Botanical Garden* 64(2): 375. 1977 [1978].

L. ligulata Hitchc. & Chase (*Panicum divaricatum* Ekm.; *Panicum divaricatum* L.; *Panicum divaricatum* var. *puberulum* Griseb.; *Panicum divaricatum* var. *puberulum* Sodiro, nom. illeg., non *Panicum divaricatum* var. *puberulum* Griseb.; *Panicum fruticosum* Salzm. ex Steud.; *Panicum maculatum* var. *pilosum* E. Fourn.; *Panicum megacarpum* Steud. ex Lechler)

West Indies to Brazil, Bolivia. Perennial bunchgrass, caespitose, vinelike, erect, straggling, more or less clambering, spreading, climbing, leaning, scrambling, arching, robust, weak, hollow, ligule membranous puberulent, leaf sheaths deciduous puberulent or glabrous, leaf blades lanceolate acuminate, shortly rhizomatous, terminal inflorescence, ovate panicle, reflexed or spreading panicle branches, spikelets globose to obovate with 2 glumes and 1 sterile lemma subtending the fertile floret, lower glume acute, second sterile lemma absent, forming dense impenetrable colonies, disturbed habitats, forest margins, along streams, among shrubs, see *Species Plantarum* 1: 333. 1753, *Systema Naturae, Editio Decima* 2: 871. 1759, *Synopsis Plantarum Glumacearum* 1: 74. 1853, *Berberides Americae Australis* 56. 1857, *Flora of the British West Indian Islands* 551. 1864, *Genera Plantarum* 3: 875, 899. 1883, *Mexicanas Plantas* 2: 32. 1886, *Anales de la Universidad Central del Ecuador* 3(25): 478. 1889 and *Bulletin of the Torrey Botanical Club* 28: 555, 557. 1901, *Contributions from the United States National Herbarium* 15: 16. 1910, *Contributions from the United States National Herbarium* 18(7): 337. 1917, *Ann. Missouri Bot. Gard.* 65: 1179. 1978, *Blumea* 32: 174. 1987.

in Bolivia: tacuarilla

in Peru: nángkuchip

L. linearis Swallen

Central America, Guatemala. Creeping, scrambling, scandent, rooting at the lower nodes, growing in colonies, forest, see *Phytologia* 4(7): 427. 1953.

L. nigra Davidse (*Panicum divaricatum* var. *molle* Schltld. & Cham.)

South America. Perennial, bambusoid, caespitose, woody, erect, decumbent, ascending, scandent, scrambling, clambering, vining, climbing, pendent, arching, hanging over shrubs, hollow, branched at the nodes, narrowly lanceolate leaf blades asymmetrical at the base, leaf sheaths ciliate on the margins, inflorescence exerted from uppermost sheath, spikelets obovate with 2 glumes and 1 sterile lemma subtending the fertile floret, fruits black at maturity, fodder, in forest, along streams, understory, disturbed areas, slopes, among shrubs, see *Linnaea* 6(1): 33. 1831, *Flora of the British West Indian Islands* 551. 1864 and *Contributions from the United States National Herbarium* 15: 16. 1910, *Phytologia* 29(2): 152. 1974.

in Mexico: carricillo

L. oaxacensis (Steud.) Hitchc. (*Lasiacis rhizophora* (E. Fourn.) Hitchc.; *Panicum oaxacense* Steud.)

South America. Creeping, scandent, shade, secondary forest, forming colonies, see *Synopsis Plantarum Glumacearum* 1: 73. 1853, *Mexicanas Plantas* 2: 31. 1886 and *Proceedings of the Biological Society of Washington* 24: 145. 1911, *Fieldiana: Botany, New Series* 4: 1-608. 1980.

L. oaxacensis (Steud.) Hitchc. var. ***maxonii*** (Swallen) Davidse (*Lasiacis maxonii* Swallen)

Central America. Scandent, shade, see *Flora of the British West Indian Islands* 551. 1864 and *Contributions from the United States National Herbarium* 15: 16. 1910, *Proceedings of the Biological Society of Washington* 24: 145. 1911, *Annals of the Missouri Botanical Garden* 30(2): 231. 1943, *Annals of the Missouri Botanical Garden* 64(2): 375. 1977 [1978].

L. oaxacensis (Steud.) Hitchc. var. ***oaxacensis*** (*Panicum oaxacense* Steud.)

South America. Bamboo-like, ascending, rhizomatous, creeping, glossy inflorescence, open habitats, forest edge, forest floor, riverbanks, see *Synopsis Plantarum Glumacearum* 1: 73. 1853 and *Proceedings of the Biological Society of Washington* 24: 145. 1911.

L. procerrima (Hack.) Hitchc. (*Panicum procerrimum* Hack.; *Panicum scariosum* Trin. ex Steud.)

South America. Perennial or annual, coarse, subwoody, loosely tufted, erect, decumbent, slender, glabrous, branching, rooting at the nodes, glaucous, hanging over shrubs, straggling, trailing over vegetation, forming colonies, leaf sheaths more or less glabrous, ligules membranous, leaf blades lanceolate cordate, black inflorescences, forage, useful for erosion control, found along roadsides, in forest,

along riverbanks, disturbed areas, understory, clearings, secondary growth, forest edge, see *Nomenclator Botanicus. Editio secunda* 2: 263. 1841 and *Österreichische Botanische Zeitschrift* 51: 431. 1901, *Proceedings of the Biological Society of Washington* 24: 145. 1911.

in Colombia: cañuela trepadora

in El Salvador: carrizo de cohetera

in Mexico: carricillo, carricillo de la sierra

L. rhizophora (E. Fourn.) Hitchc. (*Panicum rhizophorum* E. Fourn.)

South America. Herbaceous, creeping, scandent, trailing, spreading, erect, rooting at the nodes, shade, secondary forest, forming colonies, grassy slopes, understory, clearings, secondary growth, forest edge, disturbed forest, see *Synopsis Plantarum Glumacearum* 1: 73. 1853, *Flora of the British West Indian Islands* 551. 1864, *Mexicanas Plantas* 2: 31. 1886 and *Contributions from the United States National Herbarium* 15: 16. 1910, *Proceedings of the Biological Society of Washington* 24: 145. 1911, *Contr. U.S. Natl. Herb.* 17: 253. 1913, *Ann. Missouri Bot. Gard.* 65: 1201. 1978, *Fieldiana: Botany, New Series* 4: 1-608. 1980.

L. rugelii (Griseb.) Hitchc. (*Lasiacis lancifolia* Swallen; *Lasiacis papillosa* Swallen; *Panicum rugelii* Griseb.) (after the American (b. in Germany) botanist Ferdinand Ignatius Xavier Rugel, 1806-1879, surgeon, botanical explorer, pharmacist, plant collector (in Southwest States, Europe and Cuba); see J.H. Barnhart, *Biographical notes upon botanists*. 3: 190. 1965; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 235. 1972; G. Murray, *History of the collections contained in the Natural History Departments of the British Museum*. 1: 178. London 1904; Stafleu and Cowan, *Taxonomic literature*. 4: 979-980. [d. 1878] 1983)

Mexico, the Caribbean, Cuba. Vinelike, erect, arching, tough, climbing, along trails, forest, hills, shrub, slopes, see *Catalogus plantarum cubensium* ... 233. 1866 and *Contr. U.S. Natl. Herb.* 12: 183-258. 1909, *Botanical Gazette* 51: 302. 1911, *Publications of the Carnegie Institution of Washington* 436: 349. 1934.

L. rugelii (Griseb.) Hitchc. var. ***pohlii*** Davidse (*Panicum rugelii* Griseb.)

Central America. Climber, arching, erect or semierect, trailing, scandent, bushy, shade, along trails, secondary forest, forming colonies, grassy slopes, understory, clearings, secondary growth, forest edge, disturbed forest, see *Flora of the British West Indian Islands* 551. 1864, *Catalogus plantarum cubensium* ... 233. 1866 and *Contr. U.S. Natl. Herb.* 12: 183-258. 1909, *Contributions from the United States National Herbarium* 15: 16. 1910, *Botanical Gazette* 51: 302. 1911, *Annals of the Missouri Botanical Garden* 64(2): 375. 1977 [1978].

L. rugelii (Griseb.) Hitchc. var. **rugelii** (*Lasiacis divaricata* var. *divaricata*; *Lasiacis lancifolia* Swallen; *Lasiacis papillosa* Swallen; *Panicum rugelii* Griseb.)

South America, Belize. Bamboo-like, erect, arching, scandent, along trails, forest, hills, forest edge, shrub, slopes, low forest, understory, see *Catalogus plantarum cubensium* ... 233. 1866 and *Contr. U.S. Natl. Herb.* 12: 183-258. 1909, *Contributions from the United States National Herbarium* 15: 16. 1910, *Botanical Gazette* 51: 302. 1911, *Publications of the Carnegie Institution of Washington* 436: 349. 1934.

L. ruscifolia (Kunth) Hitchc. (*Lasiacis compacta* (Sw. ex Wikstr.) Hitchc.; *Lasiacis glabra* Swallen; *Lasiacis globosa* Hitchc.; *Lasiacis liebmannaiana* (E. Fourn.) Hitchc.; *Lasiacis ruscifolia* (Kunth) Hitchc. & Chase, nom. illeg., non *Lasiacis ruscifolia* (Kunth) Hitchc.; *Panicum compactum* Sw. ex Wikstr.; *Panicum liebmannianum* E. Fourn.; *Panicum liebmannianum* var. *depauperatum* E. Fourn.; *Panicum liebmannianum* var. *liebmannianum*; *Panicum ruscifolium* Kunth; *Panicum ruscifolium* var. *ruscifolium*)

South and Central America. Perennial, decumbent, vinelike, bamboo-like, creeping, erect and arching, hollow, leaf blades ovate to ovate-lanceolate, leaves glabrous or villous, terminal inflorescence paniculate, panicle rather dense, spikelets globose, forage, medicinal, handicrafts, disturbed forest, moist areas, shade, forest, clearings, understory, forest edge, over shrubs, see *Nova Genera et Species Plantarum* 1: 101-102. 1815 [1816], *Adnotationes Botanicae* 14. 1829, *Flora of the British West Indian Islands* 551. 1864, *Mexicanas Plantas* 2: 33. 1886 and *Contributions from the United States National Herbarium* 15: 16. 1910, *Proceedings of the Biological Society of Washington* 24: 145. 1911, *Botanical Gazette* 51(4): 301. 1911, *Contributions from the United States National Herbarium* 18(7): 339. 1917, *Contributions from the United States National Herbarium* 17(3): 251. 1913, *Ceiba* 4(5): 287. 1955, *Ann. Missouri Bot. Gard.* 65: 1208. 1978.

in Mexico: carricillo, carrillo, kcuca, mehensit, otatillo, pacab, sit, thimaloon pakab, tsahib kw'a', tsakam pakanb, tsay' kw's, tseey, tseey kw'a pulik, tsooy kw'a, tzaicuo

L. ruscifolia (Kunth) Hitchc. var. **ruscifolia** (*Lasiacis compacta* (Sw. ex Wikstr.) Hitchc.; *Lasiacis glabra* Swallen; *Lasiacis liebmannaiana* (E. Fourn.) Hitchc.; *Panicum ruscifolium* Kunth)

South America. Bamboo-like, erect, arching, more or less prostrate to climbing, scandent, found in shady places, open areas, disturbed forest, understory, moist places, see *Nova Genera et Species Plantarum* 1: 101-102. 1815 [1816], *Adnotationes Botanicae* 14. 1829, *Mexicanas Plantas* 2: 33. 1886 and *Proceedings of the Biological Society of Washington* 24: 145. 1911, *Botanical Gazette* 51(4): 301. 1911, *Contributions from the United States National Herbarium* 18(7): 339. 1917, *Contributions from the United States*

National Herbarium 17(3): 251. 1913, *Ceiba* 4(5): 287. 1955, *Ann. Missouri Bot. Gard.* 65: 1208. 1978.

L. ruscifolia (Kunth) Hitchc. var. **velutina** (Swallen) Davidse (*Lasiacis velutina* Swallen)

Honduras, Nicaragua. Erect and arching, branched, vinelike and bamboo-like, growing over shrubs, see *Proceedings of the Biological Society of Washington* 24: 145. 1911, *Ceiba* 4(5): 288. 1955, *Annals of the Missouri Botanical Garden* 64(2): 375. 1977 [1978] *Ceiba* 42(1): 1-71. 2001[2002].

L. scabrior Hitchc. (*Lasiacis ruscifolia* (Kunth) Hitchc.)

South America. Bambusoid, shrubby, reedlike, erect, strong, large, hollow stem, scandent or semiscandent, climbing, arching, leaning, hanging, sprawling, spreading, lower nodes rooting, weedy species, forest, shade and partial shade, along trails, openings, clearings, floodplains, open areas, forest edge and near, disturbed forest, secondary forest, see *Nova Genera et Species Plantarum* 1: 101-102. 1815 [1816] and *Proceedings of the Biological Society of Washington* 24: 145. 1911, *Proceedings of the Biological Society of Washington* 40: 85. 1927.

in Mexico: carrizo

in Peru: nángkuchip

L. sloanei (Griseb.) Hitchc. (*Ichnanthus lanceolatus* Scribn. & J.G. Sm.; *Lasiacis divaricata* (L.) Hitchc.; *Panicum divaricatum* C. Presl ex Griseb., nom. illeg., non *Panicum divaricatum* L.; *Panicum latifolium* Ham., nom. illeg., non *Panicum latifolium* L.; *Panicum sloanei* Griseb.)

South America, the Caribbean. Erect and arching, internodes hollow, bamboo-like, clumped, scandent, clambering, climbing, rooting at the nodes, leaf blades membrane-like, old fields, forest edge, shade, into shrubs and on trees, primary and secondary forest, along trails, see *Systema Naturae, Editio Decima* 2: 871. 1759, *Enumeratio Systematica Plantarum* 17. 1760, *Nova Genera et Species Plantarum (quarto edition)* 2(7): 197, t. 125. 1817 [1818], *Prodromus Plantarum Indiae Occidentalis* 10. 1825, *Flora of the British West Indian Islands* 551. 1864, *Bulletin, Division of Agrostology United States Department of Agriculture* 4: 36-37, t. 5. 1897 and *Contributions from the United States National Herbarium* 15: 16. 1910, *Botanical Gazette* 51: 302. 1911, *Syst. Bot.* 12: 193. 1987.

in Mexico: otate

L. sorghoidea (Desv. ex Ham.) Hitchc. & Chase (*Drake-Brockmania haareri* (Stapf & C.E. Hubb.) S.M. Phillips; *Heterocarpha haareri* Stapf & C.E. The Caribbean, Argentina, Mexico, Brazil. Perennial, caespitose, bamboo-like, vinelike, canelike, branched, rooting at the nodes, rhizomatous or stoloniferous, climbing, solitary or clumped, suffrutescent, scrambling, trailing, clambering, erect and arching down, scandent, sprawling, leaning, leaves narrowly lanceolate, open inflorescence paniculate, ovate to oblong panicle with ascending or spreading branches, spikelets subglobose with 2 glumes and 1 sterile lemma subtending the fertile floret, second sterile lemma absent, weedy grass, into shrubs and on trees, forest edge, primary woods, secondary forest, along streams, inundated plains, limestone, understory, see *Histoire des plantes de la Guiane Française* 1: 51. 1775, *Nova Genera et Species Plantarum seu Prodrum* 24. 1788, *Tableau Encyclopédique et Méthodique ... Botanique* 1: 74, t. 43, f. 3. 1791, *Anales de Sociedad Científica Argentina* 16: 129. 1813, *Prodrum Plantarum Indiae Occidentalis* 10. 1825, *Systema Vegetabilium, editio decima sexta* 1: 316. 1825, *De Graminibus Paniceis* 208. 1826, *Linnaea* 6(1): 33. 1831, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 120. 1833, *Abhandlungen der Böhmisches Gesellschaft der Wissenschaften, nebst der Geschichte derselben* 3: 550. 1845, *Synopsis Plantarum Glumacearum* 1: 74. 1853 [1855], *Flora of the British West Indian Islands* 551-552. 1864, *Anales de Sociedad Científica Argentina* 16: 107. 1883, *Mexicanas Plantas* 2: 31-33. 1886, *Anales de la Universidad Central del Ecuador* 3(25): 478. 1889 and *Contributions from the United States National Herbarium* 12(3): 140. 1908, *Botanical Gazette* 51: 302. 1911, *Proceedings of the Biological Society of Washington* 24: 145.

1911, *Contributions from the United States National Herbarium* 18(7): 338. 1917, *Contr. U.S. Natl. Herb.* 22: 25-26. 1920, *Symbolae Antillarum* 8: 751. 1921, *Proceedings of the Biological Society of Washington* 40: 85. 1927, *Bulletin of Miscellaneous Information Kew* 1929: 263. 1929, *Notas del Museo de la Plata, Botánica* 8: 95. 1943, *Flora of Tropical East Africa Gramineae* 2: 184. 1974, *Annals of the Missouri Botanical Garden* 64(2): 375. 1977 [1978], *Ann. Missouri Bot. Gard.* 65: 1179, 1229. 1978, *Flora of the Lesser Antilles, Leeward and Windward Islands* 3: 25-220. 1979.

in Brazil: canna de passarinho

in Colombia: cola da caballo

in Mexico: otate

in Peru: nángkuchip

L. sorghoidea (Desv. ex Ham.) Hitchc. & Chase var. **sorghoidea** (*Lasiacis maculata* (Aubl.) Urb.; *Lasiacis sorghoidea* (Desv.) Hitchc. & Chase; *Lasiacis sorghoidea* (Desv. ex Ham.) Hitchc. & Chase; *Panicum lanatum* var. *sorghoideum* (Desv. ex Ham.) Griseb.; *Panicum maculatum* Aubl.; *Panicum martinicense* Griseb.; *Panicum sorghoideum* Desv. ex Ham.)

Mexico and West Indies, northern Argentina. Perennial, erect and arching, clambering, scandent, climbing into shrubs and small trees, leaning, leaf blades pubescent, panicle branches ascending to spreading, spikelets subglobose with 2 glumes and 1 sterile lemma subtending the fertile floret, forest margins, along streams, secondary forest, along the forest edge, see *Histoire des plantes de la Guiane Française* 1: 51. 1775, *Nova Genera et Species Plantarum seu Prodrum* 24. 1788, *Prodrum Plantarum Indiae Occidentalis* 10. 1825, *Flora of the British West Indian Islands* 551-552. 1864 and *Contributions from the United States National Herbarium* 18(7): 338. 1917, *Contr. U.S. Natl. Herb.* 22: 25-26. 1920, *Symbolae Antillarum* 8: 751. 1921.

L. standleyi Hitchc. (*Lasiacis longiligula* Swallen; *Lasiacis lucida* Swallen; *Lasiacis scabrior* Hitchc.)

South America. Erect, scandent, creeping, scrambling, stoloniferous, long decumbent, clambering, rooting at the nodes, forming colonies, riparian, moist forest, understory, primary forest, disturbed sites, see *Species Plantarum* 1: 55, 58. 1753, *Species Plantarum. Editio quarta* 4(2): 638, 800. 1805 [1806], *Mém. Acad. Roy. Sci. Hist. (Bruxelles)* 1804: 41. 1807, *Flora of the British West Indian Islands* 551. 1864 and *Contr. U.S. Natl. Herb.* 15: 13-16. 1910, *Proceedings of the Biological Society of Washington* 40: 85-86. 1927, *Annals of the Missouri Botanical Garden* 30(2): 231-232. 1943.

Lasiagrostis Link = *Achnatherum* P. Beauv.,
Macrochloa Kunth, *Stipa* L.

Greek *lasios* “shaggy, woolly” and *agrostis*, *agrostidos* “grass, weed, couch grass.”

Pooideae, Stipeae, Stipinae, *Stipa* sect. *Lasiagrostis* (Link) Hack., type *Lasiagrostis calamagrostis* (L.) Link, see *Species Plantarum* 1: 78. 1753, *Essai d'une Nouvelle Agrostographie* 19, 146, pl. 6, f. 7. 1812, *Hortus Regius Botanicus Berolinensis* 1: 99. 1827, *Révision des Graminées* 1: 58. 1829, *Species Graminum Stipaceorum* 87, 94. 1842 and *Contr. U.S. Natl. Herb.* 24(6-7): 181, 216. 1925, *Contributions from the United States National Herbarium* 48: 15-18, 421, 432, 617-650. 2003, Francisco M. Vázquez and Mary E. Barkworth, “Resurrection and emendation of *Macrochloa* (Gramineae: Stipeae).” *Botanical Journal of the Linnean Society* 144(4): 483-495. 2004.

Lasiochloa Kunth = *Tribolium* Desv.

From the Greek *lasios* “shaggy, woolly, velvety” and *chloa*, *chloa* “grass.”

Danthonioideae, Danthoniaeae, type *Lasiochloa longifolia* (Schrad.) Kunth, see *Mémoires de la Société d'Agriculture, Sciences et Arts d'Angers* 1: 168, t. 7, f. 2. 1831, *Révision des Graminées* 2: 556-557, t. 193. 1832 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 119(4): 445-507. 1997, *Contributions from the United States National Herbarium* 46: 283, 622. 2003.

Lasiolytrum Steud. = *Arthraxon* P. Beauv.,
Phalaris L.

Greek *lasios* “shaggy, woolly” and *elytron* “sheath, cover, scale, husk.”

Panicoideae, Andropogoneae, Andropogoninae, type *Lasiolytrum hispidum* (Thunb.) Steud., see *Species Plantarum* 1: 54-55. 1753, *Flora Japonica*, ... 44. 1784, A.M.F.J. Palisot de Beauvois, *Essai d'une nouvelle Agrostographie*. 111, t. 11, f. 6. (Dec.) 1812, *Flora* 29: 18. 1846, *Mémoires de la Société des Sciences Naturelles de Cherbourg* 5: 299. 1857 and *Taxon* 41: 567. 1992, *Taxon* 44: 611-612. 1995, *Contributions from the United States National Herbarium* 46: 104-110, 283. 2003.

Lasiorrhachis (Hackel) Stapf = *Andropogon*
L., *Miscanthidium* Stapf, *Saccharum* L.,
Spodiopogon Trin.

From the Greek *lasios* “shaggy, woolly” and *rhachis* “rachis, axis, midrib of a leaf.”

One species, Madagascar. Panicoideae, Andropogonodae, Andropogoneae, Andropogoninae, or Panicoideae, Andropogoneae, Saccharinae, *Andropogon* subg. *Lasiorrhachis* Hack., perennial, herbaceous, unbranched, tufted, leaves basal, auricles absent, ligule an unfringed membrane, leaf blades linear to lanceolate, plants bisexual, hairy inflorescence paniculate, 2 glumes more or less equal, lower glume 2-keeled 6- to 9-nerved, upper glume 5- to 7-nerved, palea present, 2 free and fleshy lodicules, 3 stamens, ovary hairy, 2 stigmas, see *Species Plantarum* 1: 54. 1753, *Species Plantarum* 2: 1045-1046. 1753, *Fundamenta Agrostographiae* 192, t. 17. 1820, *Monographiae Phanerogamarum* 6: 471. 1889 and *Flora of Tropical Africa* 9: 89. 1917, *Hooker's Icones Plantarum* 32: t. 3124. 1927, *Adansonia* sér. 2, 8(4): 513-522. 1968, *Kew Bulletin* 27(3): 447-450. 1972, *Fl. Trop. E. Afr. Gramineae* 770. 1982, *Taxon* 41: 556. 1992, *Flora Mesoamericana* 6: 378-379. 1994, *Taxon* 44: 611-612. 1995, T.R. Hodkinson, M.W. Chase, M.D. Lledo, N. Salamin and S.A. Renvoize, “Phylogenetics of *Miscanthus*, *Saccharum* and related genera (Saccharinae, Andropogoneae, Poaceae) based on DNA sequences from ITS nuclear ribosomal DNA and plastid trnL intron and trnL-F intergenic spacers.” *Journal of Plant Research* 115: 381-392. 2002, *Contributions from the United States National Herbarium* 46: 20-64, 550-557, 607. 2003.

Species

L. perrieri (A. Camus) Bosser (*Erianthus perrieri* A. Camus)

Madagascar. See *Flora* 68(8): 141. 1885 and *Bulletin de la Société Botanique de France* 71: 1182. 1924, *Hooker's Icones Plantarum* 32: t. 3124. 1927, *Adansonia* n. s., 8: 515. 1968, *Kew Bulletin* 27: 449. 1972.

Lasiorrhachis (Hackel) Stapf

Orth. var. *Lasiorrhachis*, see *Hooker's Icones Plantarum* 32: t. 3124. 1927.

Lasiostega Benth. = *Bouteloua* Lag., *Buchloe*
Engelm.

From the Greek *lasios* “shaggy, woolly, velvety” and *stega*, *stegos* “roof, cover.”

Chloridoideae, Cynodonteae, Boutelouinae, see *Varietades de Ciencias, Literatura y Artes* 2(4,21): 134, 141. 1805, *Gen. Sp. Nov.* 5. 1816, *Plantas Hartwegianas imprimis Mexicanas* 347. 1857, *Transactions of the Academy of Science of St. Louis* 1: 432. 1859 and *Contributions from the United States National Herbarium* 41: 20-33, 35, 130. 2001.

Lasiotrichos Lehm. = *Fingerhuthia* Nees,
Fingerhuthia Nees ex Lehm.

From the Greek *lasios* “shaggy, woolly, velvety” and *thrix*, *trichos* “hair.”

Chloridoideae, Cynodonteae, Uniolinae, see *Delectus Semeninum quae in Horto Hamburgensium Botanico* 1834: 7. 1834 and *Contributions from the United States National Herbarium* 41: 121, 130. 2001.

Lasiurus Boiss. = *Loxodera* Launert,
Rottboellia L.f.

Greek *lasios* “shaggy, woolly, velvety” and *oura* “a tail,” referring to the nature of the erect and hairy inflorescence.

About 1-3 species, tropical East Africa, Mali to India. Panicoideae, Andropogonodae, Andropogoneae, Rottboelliinae, perennial, caespitose, erect, woody or herbaceous, persistent, rhizomatous, silky cataphylls, auricles absent, ligule shortly ciliate, stiff leaf blades linear, plants bisexual, inflorescence a single raceme terminal and axillary, racemes silky-villous, spikelets in pairs or in triplets, lower floret male, 2 sessile and 1 pedicelled spikelet at each node or 1 sessile and 1 pedicelled, 2 glumes unequal and acuminate, lower glume subcoriaceous and 2-keeled or entire, upper lemma entire and awnless, lower floret male, palea present, 2 lodicules free and fleshy, 3 stamens, ovary glabrous, 2 stigmas, native pasture species, useful fodder grass, moderate tolerance to salinity, open habitats, alluvial soils, sandy soils or light brown sandy soils, on dry sandy soils, desert and subdesert, arid zones and conditions, related to *Coelorachis* Brongn., type *Lasiurus hirsutus* (Forssk.) Boiss., see *Supplementum Plantarum* 13, 114. 1781 [1782], *Diagnoses plantarum orientalium novarum* ser. 2. 3(4): 145-146. 1859 and *Bulletin of Miscellaneous Information Kew* 1927: 264. 1927, *Kirkia* 3: 121. 1963, *Boletim da Sociedade Broteriana*, ser. 2 37: 80, 82. 1963, *Journ. Bombay Nat. Hist. Soc.* 60: 764. 1964, *Kew Bulletin* 35: 451-452. 1980.

Species

L. hirsutus (Forssk.) Boiss. (*Coelorachis hirsuta* (Forssk.) Brongn.; *Coelorachis hirsuta* (Forssk.) Brongn. ex B.D. Jacks., nom. illeg., non *Coelorachis hirsuta* (Forssk.) Brongn.; *Elionurus hirsutus* (Forssk.) Munro ex Benth.; *Ischaemum hirsutum* Nees ex Steud., nom. illeg., non *Ischaemum hirsutum* Spreng.; *Ischaemum mastrucatum* Trin.; *Rottboellia hirsuta* Vahl not Spreng. 1824; *Rottboellia hirsuta* (Forssk.) Vahl; *Saccharum aegyptiacum* var. *hirsutum* (Forssk.) Andersson; *Saccharum hirsutum* Forssk.; *Triticum aegilopoides* Forssk.)

North Africa, Arabia, India. Perennial, glaucous, tufted, erect, woody to subwoody at the base, wiry stems, inflorescences

racemose densely villous, spikelets often in threes, 2 sessile spikelets and 1 pedicelled, lower glume flat, nutritious fodder, good palatability, high grazing value, hay, good thatching grass, edible seed used in mixture with *bajra*, weaver’s brushes from the roots, drought-resistant, useful stabilizing sand dunes, in sandy deserts, in light soil, see *Flora Aegyptiaco-Arabica* 16. 1775, *Symbolae Botanicae*, ... 1: 2. 1790, *Voyage autour du Monde* 65. 1831, *Mémoires de l’Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 2(1): 298. 1832, *Synopsis Plantarum Glumacearum* 1: 361. 1854, *Öfversigt af Förhandlingar: Kongl. in English: sewan grass, tabas grass

in Arabic: gerfis, gerfiz

in Mali: guerfis

in Morocco: mmu hamla

in Niger: amaesa, gerfis, gerfiz, oerhafnechku

in India: bhanjuri, gawan, sewan, shewar, shinwan, sin, siwan

in Pakistan: karera

L. scindicus Henrard (also spelled *sindicus*) (*Lasiurus hirsutus* auct., non *L. hirsutus* (Vahl) Boiss., nom. illeg.; *Rottboellia hirsuta* auct., non *Rottboellia hirsuta* Vahl, nom. illeg.; *Triticum aegilopoides* Forssk.)

Asia, India, Afghanistan, Arabia, Mali, Sudan, Somalia, Ethiopia. Perennial, often woody, stiff, tough, rhizomatous, erect or ascending, simple or much-branched, suffruticose, clump-forming, stout woody rhizome, silky cataphylls, ligule a fringe of hairs, stiff leaves flat or involute, inflorescence silky-villous to hirsute, racemes terminal and erect, rachis joints densely hirsute, glumes unequal and ciliate-hirsute, lower glume lanceolate and 2-toothed, valuable fodder, grazed by livestock, useful for erosion control, abundant on sand and stony steppe, dry open plains, on rocky ground, sandy soils, shallow silty-sandy soils, desert and subdesert, gravelly soils, see *Flora Aegyptiaco-Arabica* 26. 1775 and *Blumea* 4(3): 514. 1941, *Kew Bull.* 35: 451-452. 1980, *Journal of Cytology and Genetics* 21: 152-154. 1986, *Annali di Botanica* 45: 75-102. 1987, *Annals of the Missouri Botanical Garden* 81(4): 775-783. 1994.

in Arabic: qamh staejri, thamam, da’ah, du’avy, hadid

in Somalia: sephar, sefar, doongara, dunghara, dungar, dungara

Latipes Kunth = *Leptothrium* Kunth

From the Latin *latipes*, *edis* “broad-footed, with a broad stalk.”

Chloridoideae, Cynodonteae, Zoysiinae, type *Latipes senegalensis* Kunth, see *Révision des Graminées* 1: 53, 156, 261. 1829, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 171. 1833, *Synopsis Plantarum Glumacearum* 1: 112. 1854 and *Plantae Novae vel Minus Notae ex Aethiopia* 22. 1928, *Kew Bulletin* 27(1): 151. 1972, *Annals of the Missouri Botanical Garden* 81(4): 784-791. 1994, *Webbia* 56(1): 175-179. 2001, *Contributions from the United States National Herbarium* 41: 130, 137. 2001.

Lechlera Steud. = *Calamagrostis* Adans.,
Lechlera Griseb. (Iridaceae), *Relchela* Steud.,
Solenomelus Miers (Iridaceae)

Dedicated to the German botanist Wilibald (Willibaldus) Lechler, 1814-1856, naturalist, pharmacist, explorer, 1850-1855 Chile, author of *Berberides Americae australis*. [Edited by G. Zeller] Stuttgartiae 1857. See H. Gunckel, "Breves anotaciones sobre el botánico Willibald Lechler y un comentario sobre algunas Ciperáceas Lechlerianas." *Revista Univ.* (Santiago) 33(1): 13-26. 1948; August Weberbauer, *Die Pflanzenwelt der peruanischen Andes in ihren Grundzügen dargestellt*. 15. Leipzig 1911; J.H. Barnhart, *Biographical notes upon botanists*. 2: 357. 1965; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. 1917-1933; I. Urban, *Geschichte des Königlichen Botanischen Museums zu Berlin-Dahlem (1815-1913). Nebst Aufzählung seiner Sammlungen*. Dresden 1916; Friedrich Anton Wilhelm Miquel, 1811-1871, "Species aliquot novas valdivianas, a Domino W. Lechler collectas." *Linnaea*. 25: 650-654. 1853; Georg Heinrich Mettenius (1823-1866), *Filices Lechlerianae Chilenses ac Peruanae* cura Rudolf Friedrich Hohenacker editae. Leipzig 1856-59.

Pooideae, Poaeae, Aveninae, see *Familles des Plantes* 2: 31, 530. 1763, *Tentamen Florae Germanicae* 1: 34. 1788, *Proc. Linn. Soc. London* 1: 122. 1842, *Synopsis Plantarum Glumacearum* 1: 101. 1854, *Berberides Americae Australis* 53. 1857 and *Die Naturl. Pflanzenfam.* edition 2 15a: 483. 1930, *Contributions from the United States National Herbarium* 48: 191-227, 421, 602. 2003.

Lecomtella A. Camus

After the French botanist Paul Henri Lecomte, 1856-1934, naturalist, zoologist, traveler, plant collector, from 1906 Director of the Laboratoire de Phanérogamie of the Muséum d'Histoire Naturelle, among his numerous writings are *Les Arbres à Gutta-percha*. Paris 1899, *Le coton*. Paris 1900, *Le Vanillier*. Avec la collaboration de M.C. Chalot. Paris 1901, "Voyage botanique en Extrême-Orient." *Bull. Soc. Hist. Nat.* 25: 269-302. 1912, *Lauracées de Chine et d'Indo-Chine*. Paris 1913, "Voyage botanique en

Extrême-Orient." *Bull. Soc. Hist. Nat.* 26: 213-251. 1913, "Le genre Korthalsella et la tribu des Bifariées de van Tieghem." *Bull. Mus. Hist. Nat.* (Paris) 22: 260-267. 1916, *Atlas de bois de l'Indochine*. Paris [1919], *Les bois de l'Indochine*. Paris 1925 and "Botanique et Colonies." *Rev. Sci.* (Revue Rose). 21: 652-654. 1931, editor of *Flore générale de l'Indo-Chine*. Paris 1907-1950, founder and editor of *Notulae systematicae*. Paris 1909-1934. See A. Lacroix, *Notice historique sur quatre botanistes*, etc. [On P.H. Lecomte, etc.] Paris 1938; J.H. Barnhart, *Biographical notes upon botanists*. 2: 358. 1965; Ethelyn Maria Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933; J.W. Harshberger, *The Botanists of Philadelphia and Their Work*. 149. 1899; Elmer Drew Merrill, *Contr. U.S. Natl. Herb.* 30(1): 187. 1947; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. Philadelphia 1964; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993; Stafleu & Cowan, *Taxonomic literature*. 2: 782-803. 1979.

One species, Madagascar. Panicoideae, Panicodae, Paniceae (Boivinelleae), perennial, unarmed, bamboo-like, herbaceous, branched, auricles absent, leaf blades acuminate to lanceolate, ligule a fringe of hairs, plants bisexual, contracted inflorescence paniculate, male and female-fertile spikelets in different parts of the same inflorescence branch, several male spikelets below and a bisexual spikelet at tip, lower floret male, upper floret of the hermaphrodite spikelet female-only, male spikelets florets with membranous lemmas, male florets 3-staminate, 2 glumes more or less equal or unequal, palea 2-keeled, 2 free and fleshy lodicules, ovary glabrous, 2 slender stigmas, forest edge, type *Lecomtella madagascariensis* A. Camus, see *Comptes Rendus Hebdomadaires des Séances de l'Académie des Sciences* 181: 174-177, 567-568. 1925.

Species

L. madagascariensis A. Camus

Madagascar. Inflorescence a contracted panicle, lower glume 3-nerved, upper glume 7-nerved, forest margins, see *Compt. Rend. Hebd. Séances Acad. Sci.* 181: 567. 1925.

Leersia Swartz = *Aplexia* Raf., *Asperella* Juss., *Asprella* Schreb., *Blepharochloa* Endl., *Ehrhartia* Weber, *Ehrhartia* F.H. Wigg., *Endodia* Raf., *Homalocenchrus* Miég., *Laertia* Gromov, *Leersia* Sol., *Leersia* Sol. ex Sw., *Pseudoryza* Griff., *Turraya* Wall.

Named after the German botanist Johann Georg Daniel Leers, 1727-1774, apothecary, author of *Flora herborenensis*. (Vita J.D.L. scripta ab Henricus Paulus Leers.) *Herbornae*

Nassoviorum [Herborn, Nassau] 1775. See J.H. Barnhart, *Biographical notes upon botanists*. 2: 361. 1965; Jonas C. Dryander, *Catalogus bibliothecae historico-naturalis Josephi Banks*. London 1796-1800; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933; Olof Peter Swartz (1760-1818), *Nova genera et species plantarum seu Prodrromus descriptionum vegetabilium maximam partem incognitorum*. 1, 21. Stockholm, Uppsala & Åbo 1788.

About 15-18 species, throughout the tropics, warm temperate and subtropical regions. Bambusoideae, Oryzodae, Oryzeae, Oryzinae, or Ehrhartoideae, Oryzeae, Oryzinae, perennial or rarely annual, weak and slender, aquatic or semiaquatic, herbaceous, loosely tufted, upright to decumbent, rooting at the lower nodes, rhizomatous with slender creeping rhizomes, stoloniferous or caespitose, nodes hairy or glabrous, internodes solid or hollow, stems often have small white stiff bristles on the swollen nodes, no auricles, leaf sheaths scabrous, ligules truncate and membranous to rather firm, leaf blades linear and narrow, absence of pseudopetioles, plants bisexual, pale green inflorescence paniculate and open, panicles well exerted, spikelets with bisexual floret, acuminate perfect florets, solitary spikelets strongly compressed laterally and shortly pedicellate, spikelets overlapping on the branches, reduced floret absent, glumes reduced or absent, lemma keeled and nerved, sterile lemmas absent, awned or awnless, palea keeled, 2 lodicules free and fleshy, usually 6 or 1-2-3 stamens, ovary glabrous, 2 stigmas, grain reddish brown to brown and compressed, sometimes hidden cleistogenes in the leaf sheaths, moderately important food species, used as fodder, seeds are eaten by waterfowl, weeds or rice, shade species, growing in muddy or sandy stream banks and shores, riverbanks, woodland shade, marshland, in shallow water or swampy ground, rainforest, grasslands, pampas, open habitats, resembling *Luziola*, allied to *Oryza* L. and linked to *Chikusichloa* Koidzumi, type *Leersia oryzoides* (L.) Sw., see *Acta Helvetica, Physico-Mathematico-Anatomico-Botanico-Medica* 4: 307. 1760, *Historia Stirpium Indigenarum Helvetiae Inchoata* 2: 201. 1768, *Primitiae Florae Holsaticae* 63-64. 1780, *Nova genera et species plantarum seu Prodrromus descriptionum vegetabilium maximam partem incognitorum*. 1, 21. 1788, *Genera Plantarum* 45. 1789, *Species Plantarum. Species

L. denudata Launert

North to tropical East Africa, western Transvaal. Perennial, rare, aquatic, tufted, slender, culm nodes velvety, lemma and palea finely ciliate, growing in swampy grasslands, vleis, wet meadows, seasonally flooded areas, see *Senckenbergiana Biologica* 46(2): 144, f. 23. 1965.

L. drepanothrix Stapf

Tropical Africa. Annual or perennial, loosely tufted, shortly rhizomatous, wet places, marshy areas, see *Journal de Botanique (Morot)* 19: 107. 1905.

L. friesii Meld.

Central and eastern tropical Africa. Perennial, rare, aquatic, spongy, robust, rhizomatous, creeping rhizome, culm nodes glabrous, growing in swampy grasslands, swamps, marshes,

vleis, seasonally flooded areas, see *Svensk Botanisk Tidsskrift* 40: 225. 1946.

L. hexandra Swartz (*Asprella australis* (R. Br.) Roem. & Schult.; *Asprella hexandra* (Sw.) P. Beauv.; *Asprella hexandra* (Sw.) Roem. & Schult.; *Asprella mexicana* (Kunth) Roem. & Schult.; *Homalocenchrus angustifolius* Kuntze; *Homalocenchrus gouinii* (E. Fourn.) Kuntze; *Homalocenchrus hexandrus* (Sw.) Döll; *Oryza hexandra* var. *grandiflora* Döll; *Oryza hexandra* var. *hexandra*; *Oryza mexicana* (Kunth) Döll; *Pharus ciliatus* Retz.; *Pseudoryza ciliata* (Retz.) Griff.)

Pantropical. Perennial, herbaceous, aquatic or semiaquatic, ricelike, moisture loving, floating, wiry, scrambling, branched, creeping and ascending, decumbent and rooting from lower nodes, culm nodes hairy and velvety, rhizomatous with long branching creeping rhizomes, scabrous leaf sheaths terete and tightly wrapped around the stem, thin ligule membranous and truncate, leaf blades flat or involute, very rough leaves with sharp margins, open or slightly contracted panicle oblong and terminal, spikelets laterally compressed and more or less secund, pale green flushed with purple spikelets scabrid and with 1 bisexual floret, glumes reduced or absent, lemma nerved and keeled, keel of lemma spinously ciliate, palea nerved and keeled, lemma and palea keels stiffly ciliate, 6 stamens, a weed of rice paddy, invasive, may become a noxious weed in drainage channels, leaves together with sand used by women for cleaning calabashes, native pasture species, high in crude proteins and low in fiber, hay, palatable when young and green, valuable fodder, forage, grazed by horses, a favorite food of many water birds, generally grows on heavy-textured clay soils in swamps and valley bottoms, swampy ground, alluvial deposits, floodplains, in water along the edge of vleis, in running fresh water, in wetlands, in very damp ground, moist savannahs or inundated, paddy fields, in and around swamps and creeks, shallow dams, wet depressions, in shallow standing water, along shorelines and water courses, muddy or sandy stream banks and shores, dams and ditches in standing water, floating mats in water, irrigation channels, open meadows, permanently wet places, permanent swamps, drainage channels, see *Nova*

Species

L. dolichomerithalla (Hayata) Nakai (*Bambusa albo-lineata* (McClure) L.C. Chia; *Bambusa dolichomerithalla* Hayata; *Bambusa multiplex* var. *multiplex*; *Bambusa textilis* var. *albo-lineata* McClure)

Asia, China, Japan, Taiwan. Growing along streams, see *Icones plantarum formosananarum nec non et contributiones ad floram formosanam*. 6: 146-148, f. 55. 1916, *Journal of Japanese Botany* 9(1): 16. 1933, *Fl. Taiwan* 5: 751, pl. 1054. 1978, *Guihaia* 8(2): 121-122, 124. 1988.

in English: blow-pipe bamboo

in Japan: hifuki-dake

Lenormandia Steudel = *Chrysopogon* Trin., *Mandelorna* Steudel, *Vetiveria* Bory

For the French botanist Sébastien-René Lenormand, 1796-1871, botanical collector for his herbarium. See A. Lasègue, *Musée botanique de Benjamin Delessert*. Paris 1845; J.H. Barnhart, *Biographical notes upon botanists*. 2: 369. 1965; T.W. Bossert, compil., *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 234. 1972; S. Lenley et al., *Catalog of the manuscript and archival collections and index to the correspondence of John Torrey*. Library of the New York Botanical Garden. 462. 1973; H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 198. Oxford 1964; Ignatz Urban, *Geschichte des Königlichen Botanischen Museums zu Berlin-Dahlem (1815-1913). Nebst Aufzählung seiner Sammlungen*. Dresden 1916.

Panicoideae, Andropogoneae, Sorghinae, see *Species Plantarum* 2: 1045. 1753, *Flora Cochinchinensis* 538, 552. 1790, *Pl. Pugill.* 2: 10. 1815, *Fundamenta Agrostographiae* 187-188. 1820, *Bull. Sci. Soc. Philom. Paris* 1822: 43. 1822, *Flora* 33: 229. 1850, *Synopsis Plantarum Glumacearum* 1: 359. 1854 [1855], *Die Natürlichen Pflanzenfamilien* 2(2): 28. 1887 and *American Midland Naturalist* 4: 212. 1915, *Bulletin de l'Institut Française d'Afrique Noire* 22: 106. 1960, *Boissiera. Mémoires du Conservatoire de Botanique et de l'Institut de Botanique Systématique de l'Université de Genève* 9: 291. 1960, J.F. Veldkamp, “A revision of *Chrysopogon* Trin. including *Vetiveria* Bory (Poaceae) in Thailand and Malesia with notes on some other species from Africa and Australia.” in *Austrobaileya* 5: 503-533. 1999, *Contributions from the United States National Herbarium* 46: 159-161, 283, 285, 634-635. 2003.

Lepargochloa Launert = *Loxodera* Launert, *Rhytachne* Desv. ex Ham.

Greek *lepos* “bark, husk, scale,” *lepargos* “with white coat or feathers or skin” and *chloa* “grass.”

One species, tropical southern Africa. Panicoideae, Andropogonodae, Andropogoneae, Rottboelliinae, perennial, herbaceous, unbranched, decumbent, auricles absent, leaf blades linear, ligule an unfringed membrane, plants bisexual, inflorescence nondigitate, spikelets in pairs, 2 glumes

subequal, lower glume 7-nerved, upper glume 3-nerved, palea 2-nerved 2-keeled, 2 free and fleshy lodicules, 3 stamens, ovary glabrous, 2 stigmas, sometimes referred to *Loxodera*, type *Lepargochloa rhytachnoides* Launert, see *Prodromus Plantarum Indiae Occidentalis* xiv, 11-12. 1825 and *Boletim da Sociedade Broteriana, ser. 2* 37: 80, 82-83. 1963, *Boletim da Sociedade Broteriana, ser. 2* 40: 65, f. 1, t. 1. 1966, *Kew Bulletin* 23: 295. 1969, *Kew Bulletin* 32(4): 767-771. 1978.

Species

L. rhytachnoides Launert (*Loxodera rhytachnoides* (Launert) Clayton)

Africa, Angola. See *Boletim da Sociedade Broteriana, ser. 2* 37: 83. 1963, *Kew Bulletin* 32(3): 580. 1978.

Lepeocercis Trin. = *Dichanthium* Willemet

From the Greek *lepos* “bark, husk, scale” and *kerkis* “a measuring rod, shuttle.”

Panicoideae, Andropogoneae, Sorghinae, type *Lepeocercis serrata* (Retz.) Trin., see *Species Plantarum* 2: 1045. 1753, *Mantissa Plantarum* 2: 301-302. 1771, *Flora Aegyptiaco-Arabica* 173. 1775, *Observationes Botanicae* 5: 21. 1789, *Annalen der Botanik. editor Usteri* 18: 11. 1796, *Fundamenta Agrostographiae* 203, t. 18. 1820, *Révision des Graminées* 1: 365, t. 96. 1830, *Edinburgh New Philosophical Journal* 18: 184-185. 1835, *Florae Africae Australioris Illustrationes Monographicae* 98. 1841, *Plantae Javanicae Rariores* 52. 1848, *Die Natürlichen Pflanzenfamilien* 2(2): 28. 1887 and *Contributions from the United States National Herbarium* 46: 192-193, 283. 2003.

Lepideilema Trin. = *Streptochaeta* Schrader ex Nees

From the Greek *lepis*, *lepidos* “a scale, bract, husk” and *eilema* “a veil, covering, involucre, coil.”

Anomochlooideae, Streptochaeteae, type *Lepideilema lancifolium* Trin., see *Flora Brasiliensis seu Enumeratio Plantarum* 2: 536-537. 1829, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 1(1): 93. 1830 and *Contributions from the United States National Herbarium* 39: 113-114. 2000.

Lepidopironia A. Rich. = *Chloris* Sw., *Tetrapogon* Desf.

From the Greek *lepis*, *lepidos* “scale” and *pyros* “grain, wheat.”

Chloridoideae, Cynodonteae, type *Lepidopironia cenchri-formis* A. Rich., see *Nova Genera et Species Plantarum seu Prodromus* 25. 1788, *Flora Atlantica* 2: 388, 389, t. 255. 1799 [1800], *Tentamen Florae Abyssinicae ...* 2: 422, 442, t. 101. 1847 [1848, 1851], *Beitrag zur Flora Aethiopiens ...* 310. 1867, *Bulletin Mensuel de la Société Linnéenne de Paris* 2: 1070. 1893 and *Die natürlichen Pflanzenfamilien, Zweite Auflage* 14d: 101. 1956, *Kew Bulletin* 16: 250. 1962, *Flora of Ethiopia and Eritrea* 7: 159-163. 1995.

Lepidurus Janchen = *Aegilops* L., *Parapholis* C.E. Hubb.

From the Greek *lepis*, *lepidos* “scale” and *oura* “tail.”

Pooideae, Poaeae, Ammochloinae, type *Lepidurus incurvus* (L.) Janch., see *Species Plantarum* 2: 1050-1051. 1753 and *Wiener Botanische Zeitschrift* 93: 85. 1944, *Blumea, Supplement* 3: 14. 1946, *Feddes Repert.* 91: 225-228. 1980, *Taxon* 41: 555-556. 1992, *Taxon* 44: 611-612. 1995, *Contributions from the United States National Herbarium* 48: 421, 477. 2003.

Lepitoma Steud. = *Pleuropogon* R. Br.

From the Greek *lepis* “scale” and *tome*, *tomos*, *temno* “division, section, to slice.”

Pooideae, Meliceae, type *Lepitoma brevifolia* Torr. ex Steud., see *Chloris Melvilliana* 31. 1823, *Nomenclator Botanicus. Editio secunda* 2: 29, 355. 1841 and *Contributions from the United States National Herbarium* 48: 421, 504-505. 2003.

Lepiurus Dumort. = *Lepturus* R. Br.

From the Greek *lepis* “scale” and *oura* “tail.”

Chloridoideae, Leptureae, see *Species Plantarum* 2: 1490. 1763, *Prodromus Florae Novae Hollandiae* 207. 1810, *Observations sur les Graminées de la Flore Belgique* 90, 140, 146. 1824.

Leptagrostis C.E. Hubb.

From the Greek *leptos* “slender, thin” and *agrostis*, *agrostidos* “grass, weed, couch grass.”

One species, Old World tropics, Ethiopia. Arundineae, perennial, herbaceous, unarmed, unbranched, caespitose, auricles absent, leaf blades linear, ligule a fringe of hairs, plants bisexual, contracted inflorescence paniculate, panicle narrowly elliptic-oblong with short ascending branches, spikelets 1-flowered, 2 glumes unequal and acuminate, lower glume 1-nerved, upper glume 3-nerved, callus

long-bearded to woolly, lemma membranous with a short awn, palea 2-nerved, 2 free and membranous lodicules, 3 stamens, ovary glabrous, 2 stigmas, related to *Crinipes*, type *Leptagrostis schimperiana* (Hochst.) C.E. Hubb., see *Bulletin of Miscellaneous Information Kew* 1937: 63. 1937, *Kew Bull.* 1939: 645. 1940, S. Phillips, *Flora of Ethiopia and Eritrea* 7: 67. 1995.

Species

L. schimperiana (Hochst.) C.E. Hubb. (*Calamagrostis schimperiana* Hochst.)

Africa, Ethiopia. Perennial, tufted, erect, leaf blades finely acuminate, leaf sheaths bearded, ligule ciliate, rare, see *Flora* 38: 202. 1855 and *Bulletin of Miscellaneous Information Kew* 1937: 63. 1937.

Leptaspis R. Br. = *Scrotochloa* Judz.

Greek *leptos* "slender" and *aspis* "a shield," the fruit is enclosed in the enlarged glume, referring to the lemma shell-shaped of the female spikelet.

Five species, Old World tropics. Bambusoideae, Oryzodae, Phareae, or Pharoideae, Phareae, type *Leptaspis banksii* R. Br., perennial, herbaceous, caespitose, rhizomatous, leafy, clumped, decumbent, sprawling, spreading, rooting at the nodes, thick roots, auricles absent, ligule a short fringed membrane, leaf sheaths compressed, leaf blades not sagittate, plants monoecious, spikelets with 1 floret, inflorescence paniculate and open, panicle on a long peduncle, spikelets paired, staminate spikelets small and pedicelled, pistillate spikelets large and sessile, 2 or often 3 glumes, lemma asymmetrical, female lemma closed and inflated, male florets 6 staminate, palea present, lodicules present, stamens absent, ovary glabrous, 3 stigmas, fruits stiffly pubescent, forest shade, partial shade, rainforest, type *Leptaspis banksii* R. Br., see Robert Brown, *Prodromus Florae Novae Hollandiae* 211. London 1810, *Synopsis Plantarum Glumacearum* 1: 8, 416. 1854, *Enumeratio Plantarum Zeylanicae* 5: 357. 1864, *Bulletin de la Société Botanique de France* 19: 326. 1872, *Boletim da Sociedade Broteriana* 5: 211, t. G, f. A. 1887, *Fl. Cap.* 7: 319. 1898 and *Bot. Arch.* 1: 212. 1922, *Bulletin du Muséum National d'Histoire Naturelle* 30: 513. 1924, *Bulletin of Miscellaneous Information Kew* 1927: 40, 78. 1927, *Botanical Magazine* (Tokyo) 56: 3. 1942, *Reinwardtia* 2: 305. 1953, *Taiwania* 16(2): 214. 1971, *Phytologia* 56: 299-304. 1984, *Smithsonian Contributions to Botany* 65: 1-27. 1987 [The Phareae and Streptogyneae (Poaceae) of Sri Lanka: a morphological-anatomical study], *Flora of Australia* 43: 84, 86, 93. 2002, Fabian A. Michelangeli, Jerrold I. Davis and Dennis Wm. Stevenson, "Phylogenetic relationships among Poaceae and related families as inferred from morphology, inversions in the plastid genome, and sequence data from the mitochondrial and plastid genomes. *Am. J. Bot.* 90: 93-

106. 2003, *African Journal of Ecology* vol. 42, issue s1: 48-50. Aug 2004.

Species

L. banksii R. Br.

Australia. See *Prodromus Florae Novae Hollandiae* 211. 1810.

L. tararaensis Jansen (*Scrotochloa tararaensis* (Jansen) Judz.)

Papua New Guinea. See *Reinwardtia* 2(2): 304. 1953, *Phytologia* 56(4): 300. 1984.

L. urceolata (Roxb.) R. Br. (*Leptaspis manillensis* Steud.; *Leptaspis zeylanica* Nees ex Steud.; *Pharus urceolatus* Roxb.; *Scrotochloa urceolata* (Roxb.) Judz.)

Malaysia, the Philippines, West Africa, Pacific. Perennial, erect, broad elliptic leaves tapering at both ends, pseudopetioles glabrous, slender panicles in whorls, sticky utricles covered with hooked hairs, pistillate florets oblong, growing in rocky dry areas in forest, hills, lowlands, forest floor, understory, see *Flora Indica; or, Descriptions of Indian Plants* 3: 611-612. 1832, *Plantae Javanicae Rariores* 1: 23, t. 6. 1838, *Synopsis Plantarum Glumacearum* 1: 8. 1855 [1853] and *Phytologia* 56(4): 300. 1984.

in English: shield grass

in the Philippines: alaplal, baliotus, budhak-budhak, handalokot, madlong, rokok-dokot, salingdaget, talingagito

in Thailand: nieo maa, niao ma, lek nok khum, nok khum

in New Guinea: shakhuau

Malayan names: rumput babi, getah puyoh, sayong tikus, tampok gelang, tampok relang

L. zeylanica Nees ex Steud. (*Leptaspis cochleata* Thwaites; *Leptaspis comorensis* A. Camus; *Leptaspis conchifera* Hack.)

Tropical Africa, Asia, Sri Lanka. Herbaceous, rhizomatous, erect, ascending, sprawling, spreading, creeping, rooting at the lower nodes, leaf blades asymmetrical, shallow rhizome, stiff inflorescence paniculate, panicle ovate with branches in whorls of 2-3, terrestrial, tillering, leaves lanceolate, pseudopetioles densely pubescent, pistillate florets sub-round, 6 stamens, inflated fruits, growing in forest, undergrowth, forest shade, see *Synopsis Plantarum Glumacearum* 1: 8. 1853, *Enumeratio Plantarum Zeylanicae* 5: 357. 1864, *Boletim da Sociedade Broteriana* 5: 211, t. G, f. A. 1887 and *Handb. Fl. Ceylon* 5: 191. 1900, *Bulletin du Muséum National d'Histoire Naturelle* 30: 513. 1924, *Grasses of Ceylon* 22. 1956, *Grasses of Burma* ... 617. 1960.

in Liberia: pini gon

in Madagascar: tsingolovolo

in Sierra Leone: esuta, hongu

in Zaire: sasani

Leptatherum Nees = *Microstegium* Nees,
Pollinia Trin.

From the Greek *leptos* “slender” and *ather* “stalk, barb, spine, chaff, prickle, awn.”

Panicoideae, Andropogonodae, Andropogoneae, Andropogoninae, or Panicoideae, Andropogoneae, Saccharinae, type *Leptatherum royleanum* Nees, see *Plantarum Minus Cognitarum Pugillus* 2: 10. 1815, *Fundamenta Agrostographiae* 188. 1820, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 2(4): 304. 1832, *A Natural System of Botany* 447. 1836, *Proceedings of the Linnean Society of London* 1: 92. 1841, *Enumeratio Plantarum in Japonia Sponte Crescentium ...* 2: 190, 609. 1877, *Gen. Pl.* 3(2): 1127. 1883, *Die Natürlichen Pflanzenfamilien* 2(2): 24. 1887 and *Flore Agrostologique du Congo Belge* 89. 1929, *Novosti Sist. Vyss. Rast.* 1966: 15. 1966, *Contributions from the United States National Herbarium* 46: 283, 292, 541-542. 2003.

Leptocanna L.C. Chia & H.L. Fung =
Leptocanna (N.H. Xia) Chia & Fung,
Schizostachyum Nees

From the Greek *leptos* “slender” and *kanna* “reed, cane.”

Monotypic, China, southern Yunnan. Bambusoideae, Bambuseae, Melocanninae, culms caespitose, rhizomes short and stout, apex pendulous or climbing, branches spreading horizontally, sheaths deciduous, auricles glabrous, leaves lanceolate or oblong-lanceolate, spikelets fusiform, montane forest, hills, evergreen hardwood forests, type *Leptocanna chinensis* (Rendle) L.C. Chia & H.L. Fung, see *Flora Brasiliensis seu Enumeratio Plantarum* 2: 535. 1829 and *Acta Phytotaxonomica Sinica* 19(2): 212-214, pl. 7. 1981, *Journal of Tropical and Subtropical Botany* 1(1): 5. 1993, *Contributions from the United States National Herbarium* 39: 112. 2000.

Species

L. chinensis (Rendle) L.C. Chia & H.L. Fung (*Schizostachyum chinense* Rendle)

China. Fresh sheath purplish red then turning straw colored, sheath blade broad-linear, used in weaving, ornamental, see *Journal of the Linnean Society, Botany* 36: 448. 1904, *Acta Phytotaxonomica Sinica* 19(2): 213-214, pl. 7. 1981.

Leptocarydion Hochst. ex Stapf =
Leptocarydion Stapf

From the Greek *leptos* “delicate, thin, slender, small” and *karydion* “small nut,” the diminutive of *karyon* “nut.”

One species, eastern and southern Africa. Chloridoideae, Eragrostideae, annual, herbaceous, unarmed, loosely or densely tufted, decumbent, sometimes rooting at the nodes, internodes solid, auricles absent, ligule a short fringed membrane, plants bisexual, inflorescence feathery and contracted with numerous long slender crowded racemes, spikelets solitary and lanceolate, 2 glumes unequal, lower glume shorter than the lowest lemma, lemmas long-awned and keeled, palea keels wingless, 2 free and fleshy lodicules, 2 stamens, ovary glabrous, dark stigmas, ornamental, growing in clumps, desert, savannah, dry open places, woodland, dry areas, closely related to *Leptochloa* P. Beauv. and *Trichoneura* Andersson, see *Flora Capensis* 7: 316. 1898.

Species

L. vulpiastrum (De Not.) Stapf (*Diplachne alopecuroides* (Steud.) Eyles; *Diplachne vulpiastrum* (De Not.) Schweinf.; *Leptocarydion alopecuroides* (Steud.) Stapf; *Rhabdochloa vulpiastrum* De Not.; *Triodia vulpiastrum* (De Not.) K. Schum.; *Uralepis alopecuroides* Steud.)

Tropical Africa. Annual, tufted, erect or ascending, geniculate, ligule a short membrane, leaf blades lanceolate to ovate to lanceolate-oblong, inflorescence densely spiciform, narrow silky feathery panicle, spikelets several-flowered, lower glume finely acute, upper glume acute or obtuse, lemmas narrowly oblong, straight awn, weed, pasture, fodder, growing on sandy soil, dry open places, rocky hillsides, riverine woodland, mopane veld, open bushland, wooded grassland, sometimes in the shade, see *Die Pflanzenwelt Ost-Afrikas* C: 113. 1895 and *Flora Capensis* 7: 648. 1900, *Transactions of the Royal Society of South Africa* 5: 307. 1916.

in English: spade grass

in Tanzania: uhighii, uhighii

Leptocercus Raf. = *Lepturus* R. Br.

Greek *leptos* “delicate, thin, slender” and *kerkos* “a tail.”

Chloridoideae, Leptureae, see *Prodromus Florae Novae Hollandiae* 207. 1810, C.S. Rafinesque, *American Monthly Magazine and Critical Review* 4: 190. 1819.

Leptocereus Raf. = *Leptocereus* (A. Berger)
Britton & Rose (Cactaceae), *Lepturus* R. Br.

Chloridoideae, Leptureae, see C.S. Rafinesque, *Jour. Phys. Chim. Hist. Nat.* 89: 262. 1819 and *Annual Report of the Missouri Botanical Garden* 16: 79. 1905, *Contributions from the United States National Herbarium* 12(10): 433. 1909.

Leptochloa P. Beauv. = *Anoplia* Steud., *Baldomiria* Herter, *Diachroa* Nutt., *Diacisperma* Kuntze, *Diplachne* P. Beauv., *Disakisperma* Steud., *Ipnium* Phil., *Kengia* Paker, *Leptostachys* Meyer, *Oxydenia* Nutt., *Rabdochloa* P. Beauv.

From the Greek *leptos* “slender” and *chloe*, *chloa* “grass,” referring to the inflorescences.

About (3-)27/50 species, tropics and subtropics. Chloridoideae, Eragrostideae, or Chloridoideae, Cynodonteae, annual or perennial bunchgrass, woody or herbaceous, coarse, erect, rhizomatous or stoloniferous, caespitose or decumbent, glabrous nodes, auricles absent, ligule membranous and more or less ciliate to fringed, sheath margins smooth, leaf blades flat or involute, leaves linear or linear-lanceolate, plants bisexual, inflorescence a panicle exerted, lax and hispid slender racemes on a central axis, few to many spiciform racemes often whorled, spikelets solitary closely imbricate and flattened or subterete, florets bisexual 1 to several, much of the inflorescence often enclosed by leaf sheaths, spikelets not borne in leaf sheaths axils, uppermost floret awnless or shortly awn-tipped, 2 more or less equal glumes awnless, lemmas awnless or shortly awned, entire or incised lemmas nerved and sometimes mucronate, palea 2-nerved and 2-keeled, 2 truncate lodicules free and fleshy, stamens 2-3, ovary glabrous without the apical appendage, 2 short plumose stigmas, cleistogamous spikelets present or absent, shade species, some fodders, weed, native pasture species, common in dry and swampy soils, open habitats, disturbed places, woodland and grassland, savannah, rainforest, pampas, a variable genus, a difficult genus with serious taxonomic problems, *Diplachne* was previously included in *Leptochloa*, type *Leptochloa virgata* (L.) P. Beauv., see A.M.F.J. Palisot de Beauvois, *Essai d'une nouvelle Agrostographie* 71, 80-81, 84, 160-161, 176, pl. 15-17, f. 1, 3, 9. 1812, *The Genera of North American Plants* 1: 76. 1818, *Primitiae Florae Essequiboensis* ... 73-74. 1818, *Transactions of the American Philosophical Society, new series*, 5: 147. 1835, *A Manual of the Botany of the Northern United States* 588. 1848, *Synopsis Plantarum Glumacearum* 1: 210, 287. 1854 [1855], *Anales de la Universidad de Chile* 36: 211. 1870, *Nomencl. Bot.* 2: 554. 1873 and *Lexikon Generum Phanerogamarum* 169. 1903, *Ill. Fl. North. U.S. Canada*, edition 2, 229. 1919, *Contributions from the United States National Herbarium* 24(6): 180, 187. 1925, *Revista Sudamericana de Botánica* 6(5-6): 145, f. 10. 1940, *Botaniska Notiser* 113: 291. 1960, *Kariba Studies*, vol. II. Manchester University Press, Manchester 1962, *Flora of the Netherlands Antilles* 1: 121-203. 1963, *Primates* 10: 103-148. 1969, *Zambian Papers* 5. Manchester University Press, Manchester 1971, *Blumea* 19: 61-64. 1971, S.T. Blake, “*Plinthanthesis* and *Danthonia* and a

review of the Australian species of *Leptochloa* (Gramineae).” *Contributions from the Queensland Herbarium* 14: 3. 1972, *Brittonia* 31: 399-404. 1979, *Brunonia* 3(2): 247-269. 1980 [The genus *Leptochloa* Beauv. (Poaceae, Eragrostideae) in Australia and Papua New Guinea.], *Kew Bulletin* 37: 133-162. 1982, *Los Generos de Gramineas de America Austral.* 1987, *Folia Primatologica* 48: 78-120. 1987, *Taxon* 42: 413-417. 1993, *American Journal of Botany* 81: 622-629. 1994, *Taxon* 43: 123. 1994, *Flora Mesoamericana* 6: 260-261. 1994, *Darwiniana* 33(1-4): 233-256. 1995 [Los géneros *Diplachne* y *Leptochloa* (Gramineae, Eragrostaceae) de la Argentina y países limítrofes.], H.P. Species

L. anoplia Nees (*Anoplia mexicana* Nees ex Steud.; *Chloris anoplia* (Nees) E. Fourn. ex Hemsl.) (from the Greek *anoplos* “without the *hoplon* or large shield, unarmed”)

Mexico. See *Linnaea* 19(6): 691. 1847, *Synopsis Plantarum Glumacearum* 1: 210. 1854, *Biologia Centrali-Americana*; ... *Botany* ... 3(19): 558. 1885.

L. aquatica Scribn. & Merr.

Mexico. In shallow water, see *Bulletin, Division of Agronomy United States Department of Agriculture* 24: 26. 1901.

L. barbata(Desv.) Parodi ex Nicora (*Eleusine barbata* Desv.; *Leptochloa barbata* Desv. ex Killeen)

Brazil. See *Mémoires de la Société d'Agriculture, Sciences et Arts d'Angers* 1: 208. 1831 and *Annals of the Missouri Botanical Garden* 77(1): 164. 1990, *Hickenia* 2(19): 91. 1993.

L. caudata (K. Schum.) N.W. Snow (*Diplachne caudata* K. Schum.)

Africa. See *Die Pflanzenwelt Ost-Afrikas* C: 113. 1895 and *Novon* 8(1): 77. 1998.

L. chinensis (L.) Nees (*Poa chinensis* L.; *Poa malabarica* Retz., nom. illeg., non *Poa malabarica* L.)

Tropical Asia, China, Vietnam, India, Sri Lanka, Thailand. Annual or perennial, herbaceous and very leafy, aquatic or semiaquatic, stout to slender, branched, smooth, tufted, erect or ascending, creeping, erect or geniculate, decumbent and rooting from nodes, leaf sheaths loose and smooth, leaves oblong and acute or finely pointed, ligule membranous with fine hairs, inflorescence of numerous slender and flexuous racemes, large open panicle of racemes arranged in whorls, stalked spikelets, loosely imbricate florets, glumes unequal and strongly keeled, lower glume hairy, lemma ovate and hairy, palea with inrolled margins, red plumose stigmas, grain rugulose and compressed, good hay, highly palatable, native pasture species, a good fodder for the cattle, grains used in times of scarcity, noxious weed species of waste fields and paddy fields, a major weed of rice cultivation in the Mekong Delta, growing in heavy wet soil, lowland areas, irrigation channels, open waste places, plains, marshy areas, swampy places, open habitats, heavy or light soils, related to *Leptochloa panicea* (Retz.) Ohwi and very similar to *Leptochloa coerulescens*, see *Species Plantarum* 1: 69. 1753, *Observationes Botanicae* 5: 19. 1798, *Sylloge Plantarum Novarum* 1: 4. 1824 [1822], *Enum. Pl. Australasia, New South Wales, Queensland. Perennial, young shoots extravaginal, see *Prodromus Florae Novae Hollandiae* 181. 1810, *Systema Vegetabilium* 2: 574. 1817, *Synopsis Plantarum Glumacearum* 1: 279. 1854, *Flora Australiensis: A Description ...* 7: 643. 1878 and *Agricultural Gazette of New South Wales* 20: 307. 1909, *Botanisches Archiv* 5(3-4): 192. 1924, *Bulletin of Miscellaneous Information Kew* 1941: 26. 1941, *Contributions from the Queensland Herbarium* 14: 6. 1972, *Brunonia* 3: 262. 1980, *Novon* 8(1): 77. 1998.

L. decipiens (R. Br.) Stapf ex Maiden subsp. **decipiens** (*Poa decipiens* R. Br.)

Australasia, New South Wales, Queensland. Young shoots extravaginal, see *Agricultural Gazette of New South Wales* 20: 307. 1909.

L. decipiens (R. Br.) Stapf ex Maiden subsp. **peacockii** (Maiden & Betche) N. Snow (*Diplachne peacockii* Maiden & Betche; *Leptochloa peacockii* (Maiden & Betche) Domin)

Australasia, New South Wales, Queensland. Perennial, young shoots extravaginal or intravaginal, tufted or tussock-forming, ligule truncate and erose, blade flat, racemes 1-sided on a central axis, spikelets overlapping, 4-6 florets, glumes keeled, palea 2-keeled and silky, grows in floodplains, occasional flooding, see *Agricultural Gazette of New South Wales* 15: 925. 1904, *Agricultural Gazette of New South Wales* 20: 307. 1909, *Bibliotheca Botanica* 85: 379. 1915, *Brunonia* 3: 263. 1980, *Novon* 8(1): 77. 1998.

L. digitata (R. Br.) Domin (*Cynodon polystachya* R. Br.; *Eleusine digitata* (R. Br.) Spreng.; *Eleusine polystachya* (R. Br.) F. Muell.; *Leptochloa subdigitata* Trin.; *Leptochloa subdigitata* Trin. ex Steud.; *Poa digitata* R. Br.; *Rhabdochloa subdigitata* (Trin. ex Steud.) Kuntze)

Western Australia, South Australia, Queensland, New South Wales, Northern Territory. Perennial, erect, wiry, stout and woody, canelike, vigorous, sparse foliage, semiaquatic, densely clumped, often or sometimes rhizomatous, ligule a membranous ciliate rim, leaf blades narrow and channelled, racemes 1-sided and subdigitate, spikelets oblong-lanceolate and overlapping, 3-8 florets, glumes acute and keeled, lemma ovate-oblong and sometimes more or less mucronate at the summit, palea 2-keeled, bearded short callus, large clumps harbour feral pigs, useful for soil erosion control, low forage value, culms used as thatching for rural outbuildings, found in moist places and semiarid, swamps and water courses, irrigation areas, low-lying areas, along creek banks, similar to and confused with *Eleusine indica* (L.) Gaertner, see *Prodromus Florae Novae Hollandiae* 182, 187. 1810, *Systema Vegetabilium, editio decima sexta* 4: Cur. Post. 36. 1827, *Nomenclator Botanicus. North and South America, Mexico to Argentina. Annual to short-lived perennial or biennial bunchgrass, wiry, erect, coarse, few-stemmed, caespitose, flat sheaths, ligule a membranous ciliate rim, leaves scabrous or slightly rough, leaf blades flat or folded, inflorescence with a sprangled appearance, racemes spreading or ascending on a central axis, 8- to 10-flowered, spikelets overlapping on short pedicels and densely packed, axillary cleistogenes, racemes of cleistogamous spikelets often found in the axils of lower sheaths, glumes subequal, upper lemmas keeled, palea ciliate and 2-keeled, seeds rough, extremely drought-tolerant, ornamental, cultivated, fodder and forage, nutritious, moderately palatable to very palatable, useful for erosion control, common in rocky hills and canyons, roadbanks, in rocky sites as well as rocky soils, on rocky slopes, on open upland sites, dry hills and valleys, sandy soils, along washes and canyons in desert scrub and desert grassland, see *Tableau Encyclopédique et Méthodique ... Botanique* 1: 189. 1791, *Flora Boreali-Americana* 1: 66. 1803, *Nova Genera et Species Plantarum* 1: 169. 1815 [1816], *Descriptio ube-*

Cosmopolitan, tropics and subtropics. Annual or perennial or biennial, polymorphic, rapid growing, aquatic or semi-aquatic, leafy, more or less tufted to densely tufted, tussocky, strongly developed fibrous roots, rhizomatous, stoloniferous, geniculate and ascending but mostly erect,

rooting and branching from the lower nodes, ligule membrane-like, leaves linear, inflorescences often completely exerted, racemes numerous, spikelets not overlapping, lemma rounded on the back and tipped with a short mucro, caryopsis dorsally compressed, weed, pasture, highly palatable, grazed by stock and game, low fodder value, salt-tolerant, useful for erosion control, competes for nutrients and space, found in saline land, lake margins, shallow water, wet sites, marshy ground, seasonally flooded depressions and swamps on sandy or clayey soil, margins of pools and streams, in vleis and brackish soils, on the fringe of waterholes and streams and in gilgais, shallow depressions on scalded surfaces and clay pans, similar to *Diplachne caudata*, see *Species Plantarum* 69. 1753, *Fl. Palaest.* 13. 1756, *Systema Naturae, Editio Decima* 2: 876. 1759, *Species Plantarum, Editio Secunda* 1: 108. 1762, *Tableau Encyclopédique et Méthodique ... L. nealleyi Vasey (*Leptochloa stricta* E. Fourn. ex Hemsl., nom. illeg., non *Leptochloa stricta* Trin. ex Steud.; *Leptochloa stricta* E. Fourn.) (after G.C. Nealley)

North America, U.S., Texas, Mexico. Annual, erect, simple, glabrous, leaves glabrous, hairy ligule, several racemes, glumes subequal, forage, common in open areas, see *Bulletin of the Torrey Botanical Club* 12: 7. 1885, *Biologia Centrali-Americana; ... Botany ...* 3: 566. 1885, *Mexicanas Plantas* 2: 147. 1886.

in English: Nealley's sprangletop, Nealley sprangletop

L. neesii (Thwaites) Benth. (*Cynodon neesii* Thwaites; *Cynodon polystachya* R. Br., also spelled *polystachyus*; *Eleusine polystachya* (R. Br.) F. Muell.; *Leptochloa brownii* C.E. Hubb.; *Leptochloa polystachya* (R. Br.) Benth., nom. illeg., non *Leptochloa polystachya* (Michx.) Kunth; *Rhabdochloa polystachya* (R. Br.) Kuntze)

India, Indonesia, Sri Lanka, Australia. Annual or short-lived perennial or biennial, stout, robust, prostrate, branched, rooting at the nodes, tufted, tussocky, many-noded, leaf blades linear-lanceolate and finely pointed, ligule membranous, leaf sheaths papery, lower sheaths distinctly keeled, leaves viscid, panicle loose to dense and shortly exerted, spikelets usually 1-flowered, glumes membranous, grain not grooved, a weed of flood-irrigated crops, low forage value, grass readily eaten by cattle, found in dry and arid zones, disturbed wet ground, wet places, marshy areas, drainage ditches, swamps, seasonally flooded depressions, rice fields, see *Prodromus Florae Novae Hollandiae* 187. 1810, *Enumeratio Plantarum Zeylaniae* 371. 1864, *Flora Australiensis: A Description ...* 7: 617. 1878, *Journal of the Linnean Society, Botany* 19: 108. 1881, *Fragmenta Phytographiae Australiae* 1: 216. 1889, *Revisio Generum Plantarum* 2: 788. 1891 and *Kew Bulletin* 1941: 26. 1941, *Grasses of Ceylon* 84. 1956, *Ceylon J. Sci., Biol. Sci.* 2(2): 125. 1969.

L. obtusiflora Hochst. (*Eleusine obtusiflora* (Hochst.) Blatt.; *Leptochloa obtusiflora* Trin. ex Steud.)

Tropical Africa, Tanzania, Angola, Uganda, Sudan. Perennial, tufted, vigorous, slender, glaucous, branching culms, variable, erect, ascending, scrambling, straggling, leaf blades linear, panicle with many erect spikes or slender flexuous ascending racemes, spikelets narrowly oblong 6- to 14-flowered, glumes subequal, lemma keeled and shortly hairy, florets not bearded from the callus, quite palatable, well grazed, often a weed of disturbed ground, shows no toxicity, useful for erosion control, can be used for reseeding denuded land in not very dry areas, excellent drought tolerance, growing in dry bush, deciduous bushland, on shallow stony soil, in open thicket and grassland, on sandy and clay soils, loams and alluvial soils, loose sandy loams, red clays, see *Nomenclator Botanicus. Editio secunda* 2: 30. 1841, *Flora* 38: 203. 1855 and *Records of the Botanical Survey of India* 8: 505. 1936.

in Somalia: hubnali, luguli, anadug

L. panicea (Retz.) Ohwi (*Aira filiformis* J. König ex Roxb.; *Eleusine filiformis* Pers.; *Festuca filiformis* Lam., nom. illeg., non *Festuca filiformis* Pourret; *Leptochloa brachiata* Steud.; *Leptochloa filiformis* (Lam.) P. Beauv.; *Leptochloa filiformis* (Pers.) P. Beauv.; *Leptochloa paniculata* E. Fourn.; *Leptochloa polystachya* Benth. sensu Burkill; *Poa panicea* Retz.)

Tropical Africa, tropical Asia, China and Japan. Annual or short-lived perennial, green, smooth, tufted, slender, ascending, simple or branched, ligule ciliate, leaves linear and shortly acuminate, panicle main branches loose, spiciform racemes, spikelets 2- to 5-flowered, glumes subequal linear-lanceolate, lemmas hairy on the back and 2-toothed, palea membranous, grain wrinkled, weed species naturalized in tropics, good fodder grass eaten by cattle when young, native pasture species, grains eaten by baboons, shade, found in low sandy soil, dry sandy soils, along rivers, roadsides, wet or damp sites, in or near water, mudflats, grassland, bush, inundated areas, evergreen scrubs, riverbanks, related to *Leptochloa chinensis* (L.) Nees, very similar to *Leptochloa filiformis* (Pers.) P. Beauv., see *Observationes Botanicae* 3: 11. 1783, *Tableau Encyclopédique et Méthodique ... Botanique* 1: 191. 1791, *Syn. Pl.* 1: 87. 1805, *Essai d'une Nouvelle Agrostographie* 71, 163, 166. 1812, *Flora Indica; or Descriptions ...* 1: 328. 1820, *Synopsis Plantarum Glumacearum* 1: 209. 1854, *Bulletin de la Société Botanique de France* 27: 296. 1880, *Fl. in English: sprangletop, mucronate sprangletop, red sprangletop, slendergrass

L. panicea (Retz.) Ohwi subsp. ***panicea***

Tropical Africa, South Africa, China, India, Sri Lanka, Vietnam, Indonesia. Naturalized in neotropics, see *Botanical Magazine* (Tokyo) 55(655): 311. 1941.

L. panicoides (J. Presl) A.S. Hitchc. (*Diplachne halei* Nash; *Diplachne panicoides* (J. Presl) McNeill; *Diplachne scabra* (Nees) Nicora; *Eragrostis panicoides* (J. Presl) Steud.; *Leptochloa floribunda* Döll; *Leptochloa halei* (Nash) Scribn. & Merr.; *Leptochloa scabra* Nees; *Megastachya panicoides* J. Presl)

North America, U.S., South America. Annual, emergent, herbaceous, erect or decumbent, branching culms, glabrous, leaves glabrous, ligule glabrous, compact panicle, glumes subequal, awnless lemmas, forage, troublesome weed in water-seeded rice, found in wetlands, shallow canals, marshes and wet habitats, moist open sandy areas, see *Agrostografia Brasiliensis* 2: 435. 1829, *Reliquiae Haenkeanae* 1(4-5): 283. 1830, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 343. 1833, *Synopsis Plantarum Glumacearum* 1: 278. 1854, *Flora Brasiliensis* 2(3): 89, t. 26. 1878, *New York Botanical Garden* 1(4): 292-293. 1899 and *Bulletin, Division of Agrostology United States Department of Agriculture* 24: 27. 1901, *American Journal of*

Botany 21(3): 137. 1934, *Brittonia* 31(3): 402. 1979, *Hickenia* 2(19): 91. 1993, *Darwiniana* 33(1-4): 233-256. 1995. in English: Amazon sprangletop, salt meadow grass in Mexico: zacate

L. peacockii (Maiden & Betche) Domin (*Diplachne peacockii* Maiden & Betche; *Leptochloa decipiens* (R. Br.) Stapf ex Maiden; *Leptochloa decipiens* (R. Br.) Druce, nom. illeg., non *Leptochloa decipiens* (R. Br.) Stapf ex Maiden; *Leptochloa decipiens* subsp. *peacockii* (Maiden & Betche) N. Snow; *Poa decipiens* R. Br.)

New South Wales, Queensland. Perennial, tufted or tussock-forming, ligule truncate and erose, blade flat, racemes 1-sided on a central axis, spikelets overlapping, 4-6 florets, glumes keeled, palea 2-keeled and silky, grows in floodplains, rocky places on gravelly sites, occasional flooding, see *Prodromus Florae Novae Hollandiae* 181. 1810 and *Agricultural Gazette of New South Wales* 15: 925. 1904, *Agricultural Gazette of New South Wales* 20: 307. 1909, *Bibliotheca Botanica* 85: 379. 1915, *Report. Botanical Exchange Club. London* 1916: 632. 1917, *Contributions from the Queensland Herbarium* 14: 1-19. 1972, *Brunonia* 3: 263. 1980, *Novon* 8(1): 78. 1998.

L. procera Nees

Brazil. Perennial, see *Sylloge Plantarum Novarum* 1: 2. 1824, *Voyage autour du Monde* Phan. (8): 48. 1831.

L. rupestris C.E. Hubb.

Somalia, Ethiopia, Yemen, Kenya. Perennial, slender, thin, wiry, branched, erect, scandent, weakly ascending, spreading, straggling, slender rhizomes, divergent or reflexing leaf blades narrowly lanceolate acute, inflorescence narrowly elliptic or narrowly oblong, racemes ascending, spikelets 1-flowered, glumes subequal, lemma keeled and hairy, rocky hillisides, slopes, mountains, rocky places and rough scrub, near water and by irrigation ditches, in areas of good rainfall, see *Kew Bulletin* 1941: 195. 1941.

L. scabra Nees (*Diplachne scabra* (Nees) Nicora; *Leptochloa langloisii* Vasey; *Leptochloa liebmannii* E. Fourn. ex Hemsl.; *Leptochloa liebmannii* E. Fourn.; *Leptochloa uninervia* (J. Presl) Hitchc. & Chase; *Megastachya uninervia* J. Presl) (after the French-born American botanist Auguste Barthélemy Langlois, 1832-1900, clergyman, 1855 United States (Louisiana), wrote *Catalogue provisoire de plantes phanérogames et cryptogames de la Basse-Louisiane*. Pointe-à-la-Hâche [1887]. See J.H. Barnhart, *Biographical notes upon botanists*. 2: 343. 1965; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 227. 1972; S. Lenley et al., *Catalog of the manuscript and archival collections and index to the correspondence of John Torrey*. 256. 1973; J.W.

Harshberger, *The Botanists of Philadelphia and Their Work*. 266. Philadelphia 1899)

North and South America, Mexico, Bolivia, Brazil, Paraguay. Annual, herbaceous, robust, usually erect, caespitose, branched from the lower nodes, glabrous, clumped, terrestrial or semiaquatic, leaf blades linear acuminate long-attenuate, leaf sheaths flattened and keeled, leaves scabrous, ligule a short ciliate membrane, long and narrow inflorescence somewhat nodding, spikelets oblong laterally compressed, 3- to 6-flowered, glumes unequal, first glume acute, second glume ovate-lanceolate, lemmas keeled ovate-lanceolate with margins ciliolate, 2 lodicules, 3 stamens, a weed of rice, common in open gravelly sites, tropical lowland, sandy soil, disturbed forest, along edge of river, roadsides, moist open ground, see *Agrostografia Brasiliensis* 2: 435. 1829, *Reliquiae Haenkeanae* 1(4-5): 283. 1830, *Bulletin of the Torrey Botanical Club* 12: 7. 1885, *Biologia Centrali-Americana*; ... *Botany* ... 3: 565. 1885, *Mexicanas Plantas* 2: 147. 1886 and *Contributions from the United States National Herbarium* 18(7): 383. 1917, *Hickenia* 2(19): 91. 1993.

in English: rough sprangletop

L. simoniana N. Snow

Australia. Annual, tufted, erect, herbaceous, hollow, see *Novon* 10: 238. 2000.

L. southwoodii N. Snow & B.K. Simon

Australia. Annual, tufted, ascending to erect, herbaceous, hollow, similar to *Leptochloa ligulata* and *Leptochloa simoniana*, see *Austrobaileya* 5: 138. 1997.

L. uniflora Hochst. ex A. Rich. (*Agrostis montana* Rottler ex Hook.f., nom. illeg., non *Agrostis montana* Krock., neque R. Br.; *Craspedorhachis uniflora* (Hochst. ex A. Rich.) Chippind.; *Cynodon gracilis* Nees ex Steud.; *Leptochloa gracilis* Wight ex Steud., nom. illeg., non *Leptochloa gracilis* Nees; *Rhabdochloa uniflora* (Hochst. ex A. Rich.) Kuntze)

Tropical Africa, Ethiopia, Ghana, Nigeria, Yemen, southern India, Sri Lanka. Annual or short-lived perennial, rare, simple or sparsely branched, slender, tufted, erect, geniculately ascending, spreading by runners rooting at the nodes, leaf sheaths membranous, ligule membranous, leaf blades lanceolate to oblong to lanceolate-oblong, inflorescence spicate spirally arranged, loose panicle, spiciform racemes slender and flaccid, very slender lateral spikes, spikelets in 2 overlapping rows, 1-flowered bisexual, 2 glumes equal and strongly keeled, 3 stamens, grain smooth, grazed by game, succulent, palatable, grain used by local people, a weed of cultivation, found in bushveld, damp sandy soils, under trees, cultivated farm land, wooded grassland, deciduous bush, rocky soil, shallow soil, shade or dense shade, hilly slopes, see *Tentamen Florae Abyssinicae* ... 2: 409. 1850, *Synopsis Plantarum Glumacearum* 1: 213. 1854, *Enum. Pl. Zeyl.* 5: 371. 1864, *Revisio Generum Plantarum*

L. viscida (Scribner) Beal (*Diplachne viscida* Scribn.)

North America, U.S., Arizona. Annual, sheaths auricles present, see *Bulletin of the Torrey Botanical Club* 10(1): 30. 1883, *Grasses of North America for Farmers and Students* 2: 434. 1896 and *Monocotiledóneas Mexicanas: una Sinopsis Florística Poaceae*. 2000.

in English: sticky sprangle top, sprangletop

in Spanish: zacate salado pagajoso

Leptochloopsis H.O. Yates = *Leptochloopsis* Yates, *Uniola* L.

Resembling the related genus *Leptochloa*.

Two species, America, Puerto Rico. Chloridoideae, Cynodonteae, Uniolinae, perennial, unarmed, herbaceous, caespitose, plants bisexual, inflorescence spicate, spikelets imbricate and flattened, 2 glumes unequal or subequal, palea awnless, free and fleshy lodicules, 3 stamens, 2 stigmas, dry slopes, grassy roadsides, open habitats, type *Leptochloopsis virgata* (Poir.) H.O. Yates, see *Species Plantarum* 1: 71. 1753 and *Ill. Fl. N. U.S.* (edition 2) 1: 248. 1913, *The Southwestern Naturalist* 11(3): 382, 384, 389. 1966, *Contributions from the United States National Herbarium* 41: 137, 232-234. 2001.

Species

L. condensata (Hitchc.) H.O. Yates (*Uniola condensata* Hitchc.)

South and Central America. See *Contributions from the United States National Herbarium* 24(8): 345. 1927, *The Southwestern Naturalist* 11(3): 389. 1966.

L. virgata (Poir.) H.O. Yates (*Eleusine procera* Spreng. ex Steud.; *Poa virgata* Poir.; *Uniola racemiflora* Trin.; *Uniola sparta* Trin.; *Uniola virgata* (Poir.) Griseb.)

U.S., the Caribbean, Jamaica. Perennial, see *Encyclopédie Méthodique, Botanique* 5: 78. 1804, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 4,2(1): 55. 1836, *Linnaea* 10(3): 307. 1836, *Nomenclator Botanicus. Editio secunda* 1: 549. 1840, *Flora of the British West Indian Islands* 531. 1864 and *The Southwestern Naturalist* 11(3): 384. 1966.

in English: limestone grass

Leptochloris Kuntze = *Trichloris* E. Fourn. ex Benth.

From the Greek *leptos* “slender” and the genus *Chloris* Swartz.

Chloridoideae, Cynodonteae, Chloridinae, see *Nova Genera et Species Plantarum seu Prodrromus* 1, 25. 1788, *Variedades de Ciencias, Literatura y Artes* 2(4): 143. 1805, *Journal of the Linnean Society, Botany* 19: 102. 1881, *Mexicanas Plantas* 2: 142. 1886, *Die Natürlichen Pflanzenfamilien* 2(2): 59. 1887, *Revisio Generum Plantarum* 2: 771. 1891 and *Division of Botany, Circular (United States Department of Agriculture)* 32: 7. 1901, *U.S. Dept. Agric. Bull.* 772: 190. 1920, Adolf Pascher (1881-1945), *Die Süßwasser-Flora Deutschlands, Österreichs und der Schweiz* 4: 88, 103. 1927, *Brigham Young University Science Bulletin: Biological Series* 19(2): 1-133. 1974, *Flora Mesoamericana* 6: 287-289. 1994, *Flora of Ecuador* 68: 105-106. 2001, *Contributions from the United States National Herbarium* 41: 39-52, 222-223. 2001.

Leptocoryphium Nees = *Anthaenantia* P. Beauv., *Anthenantia* P. Beauv.

From the Greek *leptos* “slender” and *koryphe* “a summit, hilltop.”

One species, South and Central America, West Indies, the Caribbean. Panicoideae, Panicodae, Paniceae, Paspalinae, perennial, herbaceous, unbranched, bulbous, erect, tufted, leaves basal, auricles absent, ligule a fringed membrane, leaf blades linear or filiform, plants bisexual, open inflorescence paniculate, erect panicle with short branches filiform, spikelets lanceolate and villous, 2-flowered, 1 glume per spikelet, lower glume absent, lemma margins gaping, upper lemma hyaline at the tip, palea 2-nerved, 2 free and fleshy lodicules, 3 stamens, ovary glabrous, 2 reddish stigmas, open habitats, open grassland, savannah and burned savannah, damp places, type *Leptocoryphium lanatum* (Kunth) Nees, see *Essai d'une Nouvelle Agrostographie* 48, 151, t. 10, f. 7. 1812, *Flora Brasiliensis seu Enumeratio Plantarum* 2: 83-85. 1829, *Révision des Graminées* 1: 28. 1829, *Synopsis Plantarum Glumacearum* 1: 34. 1855 [1853], *Botanische Zeitung. Berlin* 19(43): 314. 1861, *Anales de Sociedad Científica Argentina* 16: 102. 1883 and *N. Amer. Fl.* 17: 146. 1912, *Blumea* 21(1): 49. 1973, *Flora Novogaliciana* 14: 218-220, f. 15. 1983, *Flora Mesoamericana* 6: 371. 1994, *Flora Fanerogámica Argentina* 19(1): 11-16. 1995, *Acta Botánica Mexicana* 51: 62. 2000, *Contributions from the United States National Herbarium* 46: 65-66. 2003.

Species

L. lanatum (Kunth) Nees (*Anthaenantia lanata* (Kunth) Benth.; *Anthaenantia lanata* var. *mollis* (Nees) Arechav.; *Anthaenantia lanatum* (Kunth) Benth.; *Anthenantia lanata* (Kunth) Benth.; *Leptocoryphium lanatum* var. *genuinum* Döll; *Leptocoryphium lanatum* var. *molle* (Nees) Döll; *Leptocoryphium molle* Nees; *Milium juncooides* Speng.; *Milium molle* (Nees) Kunth; *Milium lanatum* (Kunth) Roem. & Schult.; *Panicum fusciflorum* Steud.; *Paspalum lanatum* Kunth)

Mexico to Argentina. Perennial, caespitose, erect, tuberous, spikelets pedicellate and flattened, upper glume lanceolate, lower lemma lanceolate, palea keel-less, medicinal, damp places, open savannah, see *Nova Genera et Species Plantarum* 1: 94, t. 29. 1815 [1816], *Systema Vegetabilium, editio decima sexta* 2: 322. 1817, *Flora Brasiliensis seu Enumeratio Plantarum* 2: 84. 1829, *Révision des Graminées* 1: 28. 1829, *Synopsis Plantarum Glumacearum* 1: 93. 1854, *Flora Brasiliensis* 2(2): 121. 1877, *Journal of the Linnean Society, Botany* 19: 39. 1881, *Anales de Sociedad Científica Argentina* 16: 105 (or 126). 1883, *Anales del Museo Nacional de Montevideo* 1: 96. 1894.

in Nicaragua: walang

Leptoloma Chase = *Digitaria* Haller

Greek *leptos* “slender, thin, narrow” and *loma* “border,” referring to the margins of the lemma.

One or 0 species, North America. Panicoideae, Panicoideae, Paniceae, or Panicoideae, Paniceae, Digitariinae, perennial, herbaceous, rhizomatous, caespitose, knotty base, auricles absent, ligule an unfringed membrane, plants bisexual, inflorescence paniculate, spikelets pedicellate, 1 glume per spikelet or, palea 2-nerved, 2 lodicules, 3 stamens, ovary glabrous, 2 stigmas, grassland, sometimes referred to *Digitaria*, type *Leptoloma cognata* (also spelled *cognatum*) (Schult.) Chase, see *Species Plantarum* 1: 55. 1753, *Enumeratio Methodica Plantarum* 207. 1759, *Systema Naturae, Editio Decima* 846, 855, 1359. 1759, *Historia Stirpium Indigenarum Helvetiae Inchoata* 2: 244. 1768, *Flora Carniolica, Editio Secunda* 1: 52. 1771, *Mantissa* 2: 235. 1824, *De Graminibus Paniceis* 48, 76. 1826, *Flora Brasiliensis seu Enumeratio Plantarum* 2: 20, 85, 87. 1829, *A Manual of the Botany of the Northern United States* 611. 1848, *Flora Australiensis: A Description ...* 7: 464. 1878 and *Flora Pyrenaea ...* 4: 256. 1901, *Proceedings of the Biological Society of Washington* 19(34): 191-192. 1906, *Notulae Systematicae. Herbarium du Museum de Paris* 2: 216. 1912, *Contributions from the Texas Research Foundation, Botanical Studies* 1(1): 1. 1950, *The Southwestern Naturalist* 15(3): 391. 1971, *Contributions from the United States National Herbarium* 46: 193-213, 284. 2003.

Leptophyllochloa C.E. Calderón = *Koeleria* Pers.

From the Greek *leptophyllos* “with thin leaves” and *chloe*, *chloa* “grass.”

One species, Argentina, Chile. Pooideae, Poaceae, Aveninae, type *Leptophyllochloa micrathera* (E. Desv.) C.E. Calderón, see *Syn. Pl.* 1: 97. 1805, *Flora Chilena* 6: 352. 1854 and *Flora Patagónica* 3: 69-70. 1978, *Contributions from the United States National Herbarium* 48: 409-419, 421. 2003.

Species

L. micrathera (E. Desv.) C.E. Calderón (*Koeleria cristata* Pers.; *Koeleria micrathera* (E. Desv.) Griseb.; *Koeleria philippiana* E. Desv.; *Leptophyllochloa micrathera* (E. Desv.) C.E. Calderón ex Nicora; *Trisetum aereanthum* Phil.; *Trisetum araeanthum* Phil.; *Trisetum brachyatherum* Phil.; *Trisetum depauperatum* Phil.; *Trisetum laxiflorum* Phil.; *Trisetum laxum* Phil.; *Trisetum micratherum* E. Desv.; *Trisetum nemorosum* Phil.)

South America. Shortly awned, lemma 3-nerved, see *Flora Chilena* 6: 352-353. 1854, *Linnaea* 33(3-4): 291. 1864,

Anales de la Universidad de Chile 43: 566-568. 1873, *Abhandlungen der Königlichen Gesellschaft der Wissenschaften zu Göttingen* 19: 251. 1874, *Symbolae ad Floram Argentinam. Zweite ...* 292. 1879 [also in *Abh. Königl. Ges. Wiss. Göttingen Phys. Cl.* 24(1): 1-345. 1879], *Anales de la Universidad de Chile* 94: 26, 28. 1896 and *Bibl. Bot.* 65: 125. 1907, *Flora Patagónica* 3: 70. 1978, *Parodiana* 5(2): 341-345. 1989.

Leptopogon Roberty = *Andropogon* L.

From the Greek *leptos* “thin, slender, small” and *pogon* “beard.”

Panicoideae, Andropogoneae, Andropogoninae, see *Species Plantarum* 2: 1045-1046. 1753 and *Boissiera. Mémoires du Conservatoire de Botanique et de l'Institut de Botanique Systématique de l'Université de Genève* 9: 193. 1960, *Fl. Trop. E. Afr. Gramineae* 770. 1982, *Taxon* 41: 556. 1992, *Taxon* 44: 611-612. 1995, *Contributions from the United States National Herbarium* 46: 20-64, 284. 2003.

Leptopyrum Raf. = *Leptopyrum* Rchb. (Ranunculaceae)

Greek *leptos* and *pyros* “wheat.”

Pooideae, see C.S. Rafinesque, *Medical Repository* 5: 351. 1808, *Flora Germanica Excursoria* 747. 1832, *Genera Graminum* 376. 1986.

Leptosaccharum (Hackel) A. Camus = *Eriochrysis* P. Beauv.

From the Greek *leptos* “thin, slender, small” plus *Saccharum* L.

One species, Paraguay, Brazil. Panicoideae, Andropogonodae, Andropogoneae, Andropogoninae, or Panicoideae, Andropogoneae, Saccharinae, *Saccharum* subg. *Leptosaccharum* Hack., perennial, herbaceous, unbranched, caespitose, leaves basal, auricles absent, ligule fringed, plants bisexual, contracted inflorescence paniculate, spikelets solitary and hairy, 1 glume per spikelet, palea nerveless, 2 free and fleshy lodicules, 3 stamens, ovary glabrous, 2 stigmas, see *Species Plantarum* 1: 54. 1753, *Essai d'une Nouvelle Agrostographie* 8, t. 4, f. 11. 1812, *Die Natürlichen Pflanzenfamilien* 2(2): 24. 1887, *Monographiae Phanerogamarum* 6: 29. 1889 and *Bulletin de la Société Botanique de France* 70: 736. 1923, *Bulletin of the Botanical Society of Bengal* 8: 143-148. 1954, *Flora Illustrata Catarinense* 1(Gram.): 443-906. 1982, *Contributions from the United States National Herbarium* 46: 239-240, 284. 2003.

Species

L. filiforme (Hack.) A. Camus (*Eriochrysis filiformis* (Hack.) Filg.; *Saccharum filiforme* Hack.)

South America, Paraguay. Upper glume 3-nerved, palea keels lacking, see *Monographiae Phanerogamarum* 6: 29. 1889 and *Bulletin de la Société Botanique de France* 70: 737. 1923, *Novon* 7(3): 231, f. 1. 1997.

Leptostachys G. Meyer = *Leptochloa* P. Beauv.

From the Greek *leptos* “thin, slender” and *stachys* “a spike.”

Chloridoideae, Cynodonteae, type *Leptostachys virgata* (L.) G. Mey., see *Systema Naturae, Editio Decima* 876. 1759, *Essai d'une nouvelle Agrostographie* 71, 80-81, 84, 160-161, 176, pl. 15-17, f. 1, 3, 9. 1812, *The Genera of North American Plants* 1: 76. 1818, *Primitiae Florae Essequiboensis* ... 73-74. 1818, *Transactions of the American Philosophical Society, new series*, 5: 147. 1835, *A Manual of the Botany of the Northern United States* 588. 1848, *Synopsis Plantarum Glumacearum* 1: 210, 287. 1854 [1855], *Anales de la Universidad de Chile* 36: 211. 1870, *Nomencl. Bot.* 2: 554. 1873 and *Lexikon Generum Phanerogamarum* 169. 1903, *Ill. Fl. North. U.S. Canada*, edition 2, 229. 1919, *Contributions from the United States National Herbarium* 24(6): 180, 187. 1925, *Revista Sudamericana de Botánica* 6(5-6): 145, f. 10. 1940, *Botaniska Notiser* 113: 291. 1960, *Flora of the Netherlands Antilles* 1: 121-203. 1963, S.T. Blake, “*Plinthanthesis* and *Danthonia* and a review of the Australian species of *Leptochloa* (Gramineae).” *Contributions from the Queensland Herbarium* 14: 3. 1972, *Brittonia* 31: 399-404. 1979, *Kew Bulletin* 37: 133-162. 1982, *Los Generos de Gramineas de America Austral.* 1987, *American Journal of Botany* 81: 622-629. 1994, *Taxon* 43: 123. 1994, H.P. Linder & G.A. Verboom, “Generic limits in the *Rytidosperma* (Danthonieae, Poaceae) complex.” *Telopea* 6(4): 597-627. 1996, H.P. Linder, “Nomenclatural corrections in the *Rytidosperma* complex (Danthonieae, Poaceae).” *Telopea* 7(3): 269-274. 1997, N. Snow, “Nomenclatural changes in *Leptochloa* P. Beauv. sensu lato (Poaceae, Chloridoideae).” *Novon* 8: 78. 1998, *Contributions from the United States National Herbarium* 41: 130-137. 2001.

Leptothrium Kunth = *Isorchilus* R. Br. (Orchidaceae) *Latipes* Kunth, *Leptothrium* Kunth (Orchidaceae)

From the Greek *leptothrios*, *leptothrion* “with thin, fine leaves,” *thrion* “fig-leaf, leaf, petal.”

About 1-2 species, Senegal, Pakistan, the Caribbean. Chloridoideae, Cynodonteae, Zoysiinae, perennial, stemmy,

fibrous, spreading at base, herbaceous, branched, unarmed, caespitose, auricles absent, ligule a fringe of hairs, plants bisexual, inflorescence a false spike or an open false raceme, peduncle bearing a pair of spikelets, elongated false racemes, warty spikelets, florets curved downward, peduncles cuneate and ciliate with hooked hairs on the margins, 2 glumes unequal to very unequal and longer than the floret, lower glume modified and recurved, upper glume flattened and enfolding the floret, lemma 1-nerved and acute, palea reduced, 2 free and fleshy or membranous lodicules, stamens 3, ovary glabrous, 2 stigmas, grains consumed as food, fodder, palatable, food for camels, native pasture species, colonizer of bare ground, open areas, arid soils, arid climates, open well-drained habitats, on sandy desert soils, coastal dunes, stabilized dunes, open seashore, open bush and grassland, dry bushland, type *Leptothrium rigidum* Kunth, see *Hortus Kewensis; or, a Catalogue ... The Second Edition* 5: 209. 1813, *Nova Genera et Species Plantarum* 1: 340. 1815 [1816], *Révision des Graminées* 1: 53, 156, 261. 1829 and *Plantae Novae vel Minus Notae ex Aethiopia* 22. 1928, *Webbia* 56(1): 175-179. 2001, *Contributions from the United States National Herbarium* 41: 130, 137. 2001.

Species***L. rigidum* Kunth**

South America, the Caribbean. Perennial, spikelets solitary, lower glume flattened and recurving, sandy dunes, see *Révision des Graminées* 1: 53, 156, 261. 1829.

***L. senegalense* (Kunth) W.D. Clayton (also spelled *senegalensis*) (*Lappago latipes* Steud.; *Latipes inermis* Chiov.; *Latipes senegalensis* Kunth)**

Tropical Africa, Somalia, south-western Asia, Pakistan. Perennial bunchgrass, short-lived, densely tufted, mat-forming, slender, fibrous, erect, wiry, ligule a ring of hairs, leaves flat and narrow, inflorescence linear, spikelets paired and awnless, lower glume a flat recurved tail, glumes more or less prickly, asymmetric spikelet and glumes, seeds eaten by humans, excellent drought tolerance, valuable forage, palatable, cultivated fodder, native pasture species, used for reseeding denuded ground, on open sandy areas, open bushland, sand dunes, sandy desert soil, bare ground, arid soils, coastal dunes, stony plains, sandy thickets, orange soil, red or orange sand, see *Révision des Graminées* 1: 53, 261. 1829, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 171. 1833, *Synopsis Plantarum Glumacearum* 1: 112. 1854 and *Plantae Novae vel Minus Notae ex Aethiopia* 22. 1928, *Kew Bulletin* 27(1): 151. 1972, *Annals of the Missouri Botanical Garden* 81(4): 784-791. 1994, *Webbia* 56(1): 175-179. 2001.

in English: hook grass

in Arabic: askanit, tigurit

in Mali: ainguiem, askanit, firri

in Mauritania: tigurit, tугurit, tougourit

in Niger: mâ-tittin

in Somalia: rarmay, chediore, chebiore

Leptothrix (Dumort.) Dumort. =
Hordelymus (Jess.) Jess. ex Harz, *Hordelymus*
(Jessen) Jessen in Harz, *Hordelymus* (Jessen)
Jessen, *Hordelymus* (Jessen) Harz

From the Greek *leptos* "fine, small, thin" and *thrix, trichos* "hair," *leptothrix* "with fine hair."

Elymus sect. *Leptothrix* Dumort., type *Elymus europaeus* L., see *Species Plantarum* 1: 84. 1753, *Systema Naturae*, edition 12 2: 101. 1767, *Beschreibung der Gräser* 2: 15, t. 24, f. 1. 1772, *Observations sur les Graminées de la Flore Belgique* 92. 1823 [1824], *Deutschlands Gräser und Getreidearten ...* 202. Leipzig 1863, *Bulletin de la Société Botanique de Belgique* 7: 66. 1868, *Landwirthschaftliche Samenkunde* 2: 1147. 1885 and *Taxon* 49(2): 250. 2000.

Lepturella Stapf = *Oropetium* Trin.

The diminutive of the genus *Lepturus*.

One species, West tropical Africa. Chloridoideae, Eragrostideae, annual, herbaceous, unarmed, caespitose, dwarf, short, branched, small, auricles absent, ligule membranous, plants bisexual, inflorescence spicate, 1 or 2 glumes per spikelet, lower glume 0-nerved, upper glume 1-nerved, palea 2-nerved 2-keeled, 2 free lodicules, 3 stamens, ovary glabrous, 2 dark stigmas, open habitats, see *Fundamenta Agrostographiae* 98, t. 3. 1820 and *Bulletin de la Société Botanique de France: Mémoires* 8(d): 222. 1912, *Hooker's Icones Plantarum* 34: t. 3341. 1937, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 74: 14. 1945.

Species

L. aristata Stapf (*Oropetium aristatum* (Stapf) Pilg.)

Africa. See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 74: 14. 1947.

Lepturidium Hitchc. & Ekman =
Brachyachne (Benth. & Hook.f.) Stapf

Referring to the genus *Lepturus*.

One species, Cuba. Chloridoideae, Cynodonteae, perennial, rare, unbranched, slender, herbaceous, wiry, decumbent, caespitose, auricles absent, hairy leaf sheaths overlapping, ligule fringed, plants presumably dioecious, inflorescence racemose, raceme single, appressed and solitary spikelets overlapping, spikelets laterally compressed 2-flowered, glumes narrow subequal, lower glume keeled, upper glume rounded enclosing florets, male spikelets with 2 glumes,

lemma 2-denticulate mucronulate, open areas, white sand, salty flats, sometimes referred to *Brachyachne*, type *Lepturidium insulare* Hitchc. & Ekman, see *Genera Plantarum* 3: 1164. 1883 and *Hooker's Icones Plantarum* 31: t. 3099. 1922, *Manual of the Grasses of the West Indies* 111. 1936, L. Catus Guerra "Las gramíneas (Poaceae) de Cuba, I." *Fontqueria* 46: 1-259. 1997, *Contributions from the United States National Herbarium* 41: 137. 2001.

Species

L. insulare Hitchc. & Ekman

The Caribbean. Saline flats, see *Manual of the Grasses of the West Indies* 111, f. 71. 1936.

Lepturopetium Morat

Related grass genera *Lepturus* and *Oropetium*.

Two species, Pacific, Polynesia, New Caledonia. Chloridoideae, perennial, herbaceous, unarmed, branched, decumbent, wiry, slender, auricles absent, linear leaves, ligule a fringed membrane, plants bisexual, inflorescence spicate, 1-3 racemes digitate, spikelets solitary and sessile with 1 fertile floret and a lanceolate sterile lemma, spikelets laterally compressed and partly sunk, 2 glumes unequal and dissimilar, upper glume 5-7-nerved, fertile lemma keeled and awned, palea 2-nerved 2-keeled, lodicules present, 3 stamens, ovary glabrous, 2 stigmas, open areas, coastal, similar to *Lepturus*, related to *Austrochloris*, type *Lepturopetium kuniense* Morat, see *Fundamenta Agrostographiae* 98, t. 3. 1820 and *Bulletin de la Société Botanique de France: Mémoires* 8(d): 222. 1912, *Hooker's Icones Plantarum* 34: t. 3341. 1937, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 74: 14. 1945, *Adansonia: recueil périodique d'observations botanique, n.s.* 20(4): 377-378, t. 1. 1981, *Micronesica* 18(2): 45-102. 1982 [1984].

Species

L. kuniense Morat

Pacific. Single spike, see *Adansonia* 20(4): 378, t. 1. 1981.

L. marshallense Fosberg & Sacht

Marshall Islands. See *Micronesica* 18(2): 72. 1982 [1984].

Lepturopsis Steudel = *Rhytachne* Desv. ex Ham., *Rhytachne* Desv.

Resembling *Lepturus* R. Br.

Panicoideae, Andropogoneae, Rottboelliinae, type *Lepturopsis triaristata* Steud., see *Prodromus Plantarum Indiae Occidentalis* xiv, 11-12. 1825, *Synopsis Plantarum Glumacearum* 1: 357-358. 1854 and *Flora of Tropical Africa* 9: 85. 1917, *Bulletin de l'Institut Française d'Afrique Noire*

22: 108. 1960, *Boissiera* 9: 71. 1960, *Kew Bulletin* 32(4): 767-771. 1978, *Contributions from the United States National Herbarium* 46: 284, 545-546. 2003.

Lepturus R. Br. = *Ischnurus* Balf.f., *Lepiurus* Dumort., *Leptocercus* Raf., *Monerma* P. Beauv., *Parapholis* C.E. Hubb.

Slender-tailed, from the Greek *leptos* "slender" and *oura* "tail," referring to the slender inflorescences or to the linear lanceolate glume; see Robert Brown, *Prodromus florum Novae Hollandiae*. 207. London 1810.

A genus of about 8-14 species, Old World tropics, shores of Indian and Pacific Oceans. Chloridoideae, Leptureae, or Cynodonteae, perennial or annual, herbaceous, tufted, decumbent, forming mats, often stoloniferous, internodes solid, auricles absent, ligule very short unfringed membrane or membranous with a ciliate margin, leaf blades flat or enfolded, leaves finely acute to pungent, plants bisexual, inflorescence a single spike or a single cylindrical bilateral raceme, spike terminal on culms, spikelets deeply embedded within racemes, spikelets solitary inserted in cavities along the rachis, floret perfect 1 rarely 2, terminal spikelet falling with the uppermost lateral spikelet, glumes very unequal 1 per spikelet or 2, upper glume appressed to the axis and covering the embedded spikelet, lower glume usually lacking or reduced to a scale, lemmas awnless and membranous, palea present, 2 free and fleshy lodicules, 3 stamens, ovary glabrous, 2 stigmas, sandbinder, open habitats, coastal, sandy beaches, seashores, resembling *Hainardia*, related to *Oropetium* and *Lepturopetium*, type *Lepturus repens* (G. Forst.) R. Br., see *Florulae Insularum Australium Prodromus* 9. Goettingen 1786, *Tableau Encyclopédique et Méthodique ... Botanique* 1: 204. 1791, *Species Plantarum. Species

L. anadabolavensis A. Camus

Madagascar. See *Bulletin de la Société Botanique de France* 102: 122. 1955.

L. calcareus Cope

Socotra. See *Kew Bulletin* 47(4): 655. 1992.

L. cinereus Burcham

Solomon Islands. See *Contributions from the United States National Herbarium* 30: 424. 1948.

L. copeanus B.K. Simon

Australia. Annual, see *Fl. Australia* 44B: 460. 2005.

L. gasparricensis Fosberg

Marshall Islands. See *Occasional Papers of the Bernice Pauahi Bishop Museum* 21(14): 293. 1955.

L. geminatus C.E. Hubb.

Australia, Queensland. Rare, perennial, short spikes, spikelets opposite, 1 bisexual floret, upper glume acuminate, sand dunes.

L. hildebrandtii I. Hansen & Potztl

Pacific. See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 76: 269. 1954.

L. minutus B.K. Simon

Australia. Annual, small, decumbent, see *Flora of Australia* 44B: 461. 2005.

L. pilgerianus I. Hansen & Potztl

Asia. See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 76: 268. 1954.

L. pulchellus (Balf.f.) Clayton (*Ischnurus pulchellus* Balf.f.)

Africa. See *Proceedings of the Royal Society of Edinburgh* 12: 98. 1883 and *Kew Bulletin* 37(3): 420. 1982.

L. radicans (Steud.) A. Camus (*Monerma radicans* (Steud.) Hack.; *Ophiuros radicans* Steud.)

Tropical East Africa, Madagascar. Annual or short-lived perennial, branched to strongly branched, thin, tough, stoloniferous, smooth, creeping, prostrate, decumbent, erect, mat-forming, leaf blades linear-lanceolate to long-acuminate, leaf sheaths papery and glabrous, auricles glabrous, leaves finely pointed, spikes usually shortly exserted, spikelets lanceolate, usually 1-flowered, lower glume absent, upper glume acuminate to caudate, a good lawn grass, a weed of lawns and orchards, disturbed roadsides, sands, grassland near the sea, light shade, see *Synopsis Plantarum Glumacearum* 1: 430. 1855, *Monographiae Phanerogamarum* 6: 320. 1889 and *Annales de la Société Linnéenne de Lyon, sér. 2*, 69: 87. 1923, *Grasses of Ceylon* 62, pl. 7. 1956, *Ceylon J. Sci., Biol. Sci.* 2(2): 125. 1959, *Grasses of Burma ...* 585. 1960.

L. repens (G. Forst.) R. Br. (*Lepturus aciculatus* Steud.; *Lepturus repens* R. Br.; *Monerma repens* (G. Forst.) P. Beauv.; *Rottboellia repens* G. Forst.)

Eastern Africa, Southeast Asia, Sri Lanka, northern Australia, Polynesia. Perennial beach grass, quite variable, strongly branched, smooth, tufted, prostrate or decumbent, creeping, sprawling, spreading, running, stoloniferous with branched stolons, frequently rooting at the nodes, mat-forming, auricles glabrous, leaf sheaths glossy and loose, ligule tiny and membranous with a fringe of hairs, leaf blades lanceolate and stiff, leaves finely pointed, slender terminal spikes narrow and cylindrical, spikes prominently exserted, spikelets often 2-flowered, spikelets solitary embedded in cavities, lower glume absent, upper glume awned and linear-lanceolate, lemma and palea hyaline, useful for erosion control, coastal sandbinder, usually found in salt-spray zone, seashores, coral sands, sand dunes, rocky and sandy shores, limestone rocks, along roadsides, savannahs, see *Florulae Insularum Australium Prodrromus* 9. Goettingen 1786, *Prodromus Florae Novae Hollandiae* 207. 1810, *Essai d'une Nouvelle Agrostographie* 117, 168, 177. 1812 and *Handb. Fl. Ceylon* 5: 307. 1900, *Grasses of Ceylon* 62.

1956, *Ceylon J. Sci., Biol. Sci.* 2(2): 25. 1959, *Grasses of Burma ...* 585. 1960, Naomi Kingston, Steve Waldren & Una Bradley, "The phytogeographical affinities of the Pitcairn Islands: a model for south-eastern Polynesia?" *Journal of Biogeography* 30(9): 1311-1328. Sep 2003.

in English: creeping lawngrass, creeping sand grass, beach grass, bunch grass, Pacific Island thintail

in Guam: lasaga

L. repens (G. Forst.) R. Br. var. **cinereus** (Burcham) Fosberg (*Lepturus cinereus* Burcham)

New Zealand, islands of the Pacific Ocean. Semiprostrate, creeping, perennial, rigid, rooting at the nodes, distally ascending, ligule membranous and minutely ciliate, leaf sheath coriaceous, leaf blades linear-lanceolate, spike narrow-cylindrical, single floret, spikelets embedded in cavity of the rachis, glumes lanceolate and coriaceous, lower glume absent or present on uppermost spikelet, lodicules oblong, near upper tide limit, coral ledge, see *Prodromus Florae Novae Hollandiae* 207. 1810 and *Contributions from the United States National Herbarium* 30: 424. 1948, *Occasional Papers of the Bernice Pauahi Bishop Museum* 15(3): 292. 1955, *N.Z. DSIR Bull.* 219: 171. 1977, *New Zealand Journal of Botany* 34: 447-461. 1996.

L. repens (G. Forst.) R. Br. var. **pubescens** Nowack

New Guinea. Densely pubescent, upper glumes acuminate, found on sandy beaches.

L. repens (G. Forst.) R. Br. var. **repens**

East Africa. Perennial, glabrous, mat-forming, tough, harsh, creeping to erect, rudiment of lower glume, upper glumes 7- to 11-nerved acuminate to long caudate, lemmas sometimes awn-tipped, useful sandbinder, on sandy and rocky seashores.

L. stoddartii Fosberg

Australia. See *Brittonia* 40(1): 53, f. 1. 1988, *Flora of Australia* 44B: 421. 2005.

L. xerophilus Domin

Australia. Perennial, rare, see *Biblioth. Bot.* 20(85): 412. 1915.

Lepyroxis Fourn. = *Muhlenbergia* Schreb., *Polypogon* Desf.

Greek *lepyron* "rind, husk, shell."

Chloridoideae, Cynodonteae, Muhlenbergiinae, see *Mantissa Plantarum* 1: 31. 1767, *Genera Plantarum* 44. 1789, *Systema Naturae ... editio decima tertia, aucta, reformata* 2: 171. 1791, *Flora Atlantica* 1: 66-67. 1798 [1800], *De Graminibus unifloris et sesquifloris* 189, 190, 297, t. 5, f. 8. Leucophrys Rendle = *Brachiaria* (Trin.) Griseb.

From the Greek *leukophrys* "white-browed," *ophrys* "brow, eyebrow."

One species, tropical and southern Africa, Namibia, South-west Africa. Panicoideae, Panicodae, Paniceae, type *Leucophrys mesocoma* (Nees) Rendle, perennial, stiff, much-branched, geniculate, woody, bushy, persistent, nodes swollen, auricles absent, leaves needle-like to spiny, leaf sheaths open, ligule a fringe of hairs, plants bisexual, contracted inflorescence paniculate, spikelets pedicellate paired or solitary, proximal incomplete florets male, 2 glumes pilose to villous, hairs in the middle of the upper glume, palea 2-nerved 2-keeled, 2 free and fleshy lodicules, 3 stamens, ovary glabrous, 2 stigmas, palatable, pasture, utilized by animals when young, open habitats, desert or semidesert, sandy stream beds, dry water courses, sometimes referred to *Brachiaria* sensu lato, sometimes included in *Brachiaria*, type *Leucophrys mesocoma* (Nees) Rendle, see *De Graminibus Paniceis* 51, 125, 266. 1826, *Flora Rossica* 4(14): 469. 1853, L.K.G. Pfeiffer (1805-1877), *Nomenclator Botanicus* 1: 453. Cassellis [Kassel] 1872, *Catalogue of the African Plants Collected by Dr. F. Welwitsch in 1853-61* 2: 171, 193-194. 1899 and *Flora of Tropical Africa* 9: 504. 1919, *Bulletin of Miscellaneous Information Kew* 1923(9): 315. 1923, *Journal of Botany, British and Foreign* 69(2): 54. 1931, *Mitteilungen der Botanischen Staatssammlung München* 8: 147-163. 1970, *Annals of the Missouri Botanical Garden* 75: 866-873. 1988, *Bothalia* 18: 119-122. 1988.

Species

L. mesocoma (Nees) Rendle (*Brachiaria mesocoma* (Nees) A. Camus; *Panicum mesocomum* Nees)

South Africa, Angola. Perennial, coarse, tufted, geniculate, profusely branched from the swollen nodes, shrub-like, woody, brittle, leaf blades expanded or rolled, glaucous to blue-green, leaves stiff and brittle, ligule a fringe of short silky hairs, leaf sheaths papery and densely glandular,

contracted and interrupted panicle, spikelets hairy, lower glume 3-nerved, upper glume 5- to 7-nerved, upper glume and lemma of lower floret hairy or fringed, palea indurated, palatable, in sandy riverbeds, see *Florae Africae Australioris Illustrationes Monographicae* 34. 1841, *Catalogue of the African Plants Collected by Dr. F. Welwitsch in 1853-61* 2(1): 194. 1899 and *Bulletin de la Société Botanique de France* 77: 640. 1930.

in South Africa: withaargras, weißbärgengras

Leucopoa Griseb. = *Festuca* L.,
Hesperochloa (Piper) Rydb., *Leiopoa* Ohwi,
Wasatchia M.E. Jones

From the Greek *leukos* “white” and *poa* “grass,” referring to the appearance of the grass.

About 1-6 species, northern America, Asia, Himalayas. Pooideae, Poodae, Poeae, or Pooideae, Poeae, Loliinae, perennial, herbaceous, tufted, rhizomatous, auricles absent, ligule an unfringed membrane, narrow leaves, plants bisexual, inflorescence a panicle open or contracted, spikelets pedicellate, 2 glumes unequal, palea 2-nerved 2-keeled, 2 free and membranous lodicules, 3 stamens, ovary hairy, 2 stigmas, often referred to *Festuca*, type *Leucopoa sibirica* Griseb. (*Leucopoa sibirica* (Turcz. & Trin.) Griseb. ex Ledeb.), nom. illeg. superfl. for *Poa albida* Turcz. & Trin., see *Species Plantarum* 1: 73-74. 1753, *Flora Rossica* 4(13): 383, 388. 1852, *United States Geological Exploration [sic] of the Fortieth Parallel. Leymus Hochst. = *Aneurolepidium* Nevski, *Anisopyrum* (Griseb.) Gren. & Duval, *Eremium* Seberg & Linde-Laursen, *Malacurus* Nevski, *Triticum* L.

An anagram of *Elymus* L.

About 30-40 species, Northern Hemisphere temperate, central Asia and North America, Argentina. Pooideae, Triticoideae, Triticeae, or Pooideae, Triticeae, Hordeinae, perennial, herbaceous, usually glaucous, harsh, unbranched, rhizomatous, turf-forming, auricles present or absent, ligule an unfringed membrane, sheath margins free, leaves pungent and stiff, plants bisexual, inflorescence spicate linear, spikelets 4- or 5-flowered, spikelets paired or in triplets, glumes 2 acute to shortly awned, lemma acute to shortly awned, palea 2-nerved 2-keeled, ciliate lodicules present, 3 stamens, long anthers, ovary hairy, stigmas white, some

useful sand-binders, found in steppes, open habitats, often saline, alkaline or dunes, coastal sand dunes, often littoral or halophytic, type *Leymus arenarius* (L.) Hochst., see *Species Plantarum* 1: 85. 1753, *Reliquiae Haenkeanae* 1(4-5): 265. 1830, *Flora* 31: 118. 1848, *Flora Rossica* 4(13): 343. 1852 and *Nom. Prop. Int. Bot. Congr. Species

L. aemulans (Nevski) Tzvelev (*Agropyron aemulans* (Nevski) N.M. Kusn.; *Aneurolepidium aemulans* Nevski; *Elymus aemulans* (Nevski) Nikif.)

Asia. See *Fl. Kazakhst.* 1: 300. 1956, *Hereditas* 121(2): 191-195. Nov 1994.

L. ajanensis (V.N. Vassil.) Tzvelev (*Asperella ajanensis* V.N. Vassil.; *Elymus ajanensis* Roshev. ex Vorosch.; *Elymus*

interior Hultén; *Elymus mollis* subsp. *interior* (Hultén) Bowden; *Leymus interior* (Hultén) Tzvelev; *Leymotrix ajanensis* (V.N. Vassil.) Kharkev. & Prob.; *Leymus mollis* subsp. *interior* (Hultén) Á. Löve & D. Löve; *Leymus mollis* subsp. *interior* (Hultén) Á. Löve)

Asia, Siberia, Russia. See *Flora of Alaska and Neighboring Territories: A Manual of the Vascular Plants* 270. 1942, *Canadian Journal of Botany* 35: 972. 1957, *Flora Arctica URSS* 2: 253. 1964, *Novosti Sist. Vyss. Rast.* 9: 59. 1972, *Botaniska Notiser* 128(4): 503. 1975 [1976], *Bot. Zhurn. (Moscow & Leningrad)* 68(10): 1408. 1983, *Feddes Repertorium* 95(7-8): 477. 1984, *Bot. Zhurn. (Moscow & Leningrad)* 70(1): 126-128. 1985.

L. akmolinensis (Drob.) Tzvelev (*Aneurolepidium akmolinense* (Drob.) Nevski; *Elymus akmolinensis* Drobow; *Leymus paboanus* subsp. *akmolinensis* (Drob.) Tzvelev; *Leymus paboanus* subsp. *korshinskyi* (Korsh.) Tzvelev)

Asia, Russia. Perennial, rhizomatous, more or less caespitose, stiff leaves, useful for erosion control, see *Flora URSS* 2: 708. 1934, *Novosti Sist. Vyss. Rast.* 8: 65-66. 1971, *Grassland of China* 2: 44-47. 1993.

L. alaicus (Korsh.) Tzvelev (*Aneurolepidium alaicum* (Korsh.) Nevski; *Aneurolepidium ugamicum* (Drobow) Nevski; *Elymus alaicus* Korsh.; *Elymus angustiformis* Drob.; *Elymus ugamicus* Drobow; *Leymus angustiformis* (Drob.) Tzvelev; *Leymus ugamicus* (Drobow) Tzvelev)

Asia temperate. Glumes large, lemmas awn-tipped, found in dry hillsides among shrubs, see *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 4(4): 77, 102. 1896 and *Flora URSS* 2: 704. 1934, *Flora Uzbekistanica* 1: 304, 540. 1941, *Novosti Sist. Vyss. Rast.* 10: 50. 1973, *Claves Plantarum Xinjiangensium* 1: 184. 1982.

L. alaicus (Korsh.) Tzvelev subsp. *alaicus* (*Elymus alaicus* Korsh.; *Elymus ugamicus* Drobow)

Asia temperate.

L. alaicus (Korsh.) Tzvelev subsp. *karataviensis* (Roshev.) Tzvelev (*Aneurolepidium karataviense* (Roshev.) Nevski; *Elymus karataviensis* Roshev.; *Leymus karataviensis* (Roshev.) Tzvelev)

Asia temperate. Useful for erosion control, see *Flora URSS* 2: 705. 1934, *Novosti Sist. Vyss. Rast.* 10: 50. 1973, *Grassland of China* 2: 44-47. 1993.

L. alaicus (Korsh.) Tzvelev subsp. *petraeus* (Nevski) Tzvelev (*Aneurolepidium petraeum* Nevski; *Leymus petraeus* (Nevski) Tzvelev)

Russia. See *Novosti Sist. Vyss. Rast.* 10: 50. 1973, *Claves Plantarum Xinjiangensium* 1: 184. 1982.

L. ambiguus (Vasey & Scribn.) D.R. Dewey (*Elymus ambiguus* Vasey & Scribn.; *Elymus ambiguus* var. *ambiguus*; *Elymus villiflorus* Rydb.; *Leymus innovatus* (Beal) Pilger

subsp. *ambiguus* (Vasey & Scribn.) Á. Löve; *Elymus villiflorus* Rydb.)

U.S., Colorado. Perennial, on rocky areas, see *Contributions from the United States National Herbarium* 1(8): 280. 1893 and *Bulletin of the Torrey Botanical Club* 32(11): 609-610. 1905, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 74: 6. 1947, *Taxon* 29(1): 168. 1980, *Taxon* 29(1): 168. 1982, *Brittonia* 35: 32. 1983, *American Journal of Botany* 71: 609-625. 1984, *Systematic Botany* 9: 279-294. 1984.

in English: Colorado wildrye

L. angustus (Trin.) Pilg. (*Aneurolepidium angustum* (Trin.) Nevski; *Elymus angustus* Trin.; *Triticum angustum* (Trin.) F. Herm.)

Asia, China, Mongolia, Russia. Perennial, erect, blue to glaucous, strongly rhizomatous, more or less short rhizomes, robust, arched inflorescences, spikes slender and narrow, lemmas pubescent, forage, native pasture, grazed, used for brooms and paper, growing in mountains, dry hillsides, desert flat, low mountains, along railroad tracks, sandy riversides, wet sites, near rivers, low drainage areas, silty clay soils, saline sites, floodplains, steppe and mountain steppe, slopes, irrigation ditches, low places, salt marshes and sandy soils, sandy banks, along dry waterways, along roadsides, salty drainage ditches, salt lakes, dry sandy areas, poorly drained areas, wet saline, heavy soils, heavily grazed areas, meadows, cultivated lands, dry water-drainage areas, see *Flora Altaica* 1: 119. 1829 and *Flora URSS* 2: 700. 1934, *Verhandlungen des Botanischen Vereins für die Provinz Brandenburg und die angrenzenden Länder* 76: 42. 1936, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 74(1): 8. 1947.

in English: Altai wildrye

L. angustus (Trin.) Pilg. subsp. *macroantherus* D.F. Cui

Asia, China. See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 74(1): 8. 1947, *Acta Botanica Yunnanica* 12: 57-66. 1990, *Annals of Botany* 73: 195-203, 471-479. 1994, *Grassland of China* 1995(1): 16-20. 1995, *Bulletin of Botanical Research* 18(2): 148, f. 3. 1998.

L. arenarius (L.) Hochst. (*Elymus arenarius* L.; *Elymus glaucus* Regel; *Triticum arenarium* (L.) F. Herm.)

Eurasia. Perennial, blue to glaucous, tall, stout, rather coarse, erect or spreading, strongly rhizomatous, sod-forming, short ligule truncate, rigid leaves flat or involute during drought, compact spikes, spikelets paired at rachis nodes, glumes equal and finely hairy, fodder, useful sand-binders and for dune and shoreline stabilization, suitable for erosion control, naturalized elsewhere, cultivated in Japan for ropes, mats and paper, growing in rocky seashore, coastal sand dunes, calcareous places, seashore dunes, on gravels, see *Species Plantarum* 1: 83. 1753, *Neue Entdeckungen im*

ganzen Umfang der Pflanzenkunde 2: 72. 1821, *Flora* 31: 118. 1848 and *Verhandlungen des Botanischen Vereins für die Provinz Brandenburg und die angrenzenden Länder* 76: 43. 1936, *Bot. Zhurn. (Moscow & Leningrad)* 51: 1107. 1966, *Turun yliopiston julkaisu - Annales Universitatis Turkuensis, Sarja A II, Biologia-Geographica* 3: 1-12. 1982 [also *Ann. Univ. Fenn. Abo.*, A 3: 1-12. 1982], *Watsonia* 18: 415-417. 1991, *Annals of Botany* 73: 195-203, 471-479. 1994, *Watsonia* 21: 365-368. 1997, S. Greipsson and H. El-Mayas, "Arbuscular mycorrhizae of *Leymus arenarius* on coastal sands and reclamation sites in Iceland and response to inoculation." *Restoration Ecology* vol. 8, issue 2: 144-150. June 2000.

in English: lyme grass, sea lyme grass, rancheria grass, beach wildrye, European dune grass

L. chinensis (Trin.) Tzvelev (*Agropyron chinense* (Trin.) Ohwi; *Agropyron pseudoagropyrum* (Trin. ex Griseb.) Franch.; *Agropyron pseudoagropyrum* (Trin. ex Griseb.) P. Candargy; *Agropyron turuchanense* Reverd.; *Agropyron uninerve* P. Candargy; *Agropyrum chinense* (Trin.) Ohwi; *Agropyrum pseudoagropyrum* (Trin. ex Griseb.) Franch.; *Aneurolepidium chinense* (Trin.) Kitag.; *Aneurolepidium pseudoagropyrum* (Trin. ex Griseb.) Nevski; *Elymus chinensis* (Trin.) Keng; *Elymus chinensis* (Trin.) T. Koyama, nom. illeg., non *Elymus chinensis* (Trin.) Keng; *Elymus macrourus* subsp. *turuchanensis* (Reverd.) Tzvelev; *Elymus pseudoagropyrum* (Trin. ex Griseb.) Turcz.; *Elymus pseudoagropyrum* (Trin. ex Griseb.) Trin. ex Turcz.; *Elymus turuchanensis* (Reverd.) Czer.; *Leymus pseudoagropyrum* (Trin. ex Griseb.) Tzvelev; *Roegneria turuchanensis* (Reverd.) Nevski; *Triticum chinense* Trin.; *Triticum pseudoagropyrum* Trin. ex Griseb.)

Asia, China, Mongolia, Russia. Perennial, robust, stout, rhizomatous, dense inflorescence, slender and narrow spikes, single spikelets, fodder, growing along roadsides, alluvial soils, disturbed agricultural areas, sandy loams, rocky soils, grass steppe, desert steppe, stabilized sand dunes, coarse gravelly sites, see *Enumeratio Plantarum, quas in China Boreali* 72. 1833, *Flora Rossica* 4(13): 343. 1852, *Bulletin de la Société Impériale des Naturalistes de Moscou* 1: 63. 1856, *Plantae Davidianae ex Sinarum Imperio* 340. 1884, *Nouvelles archives du muséum d'histoire naturelle sér. 2* 7: 150. 1884 and *Archives de Biologie Végétale Pure et Appliquée* 1: 23, 43. 1901, *Flora URSS* 2: 626, 710. 1934, *Acta Phytotaxonomica et Geobotanica* 6(3): 150. 1937, *Report of the Institute of Scientific Research, Manchoukuo* 2: 50, 281. 1938, *Sunyatsenia* 6(1): 66. 1941, *Novosti Sist. L. fasciculatus (Roshev.) Tzvelev (*Aneurolepidium fasciculatum* (Roshev.) Nevski; *Elymus fasciculatus* Roshev.; *Leymus divaricatus* subsp. *fasciculatus* (Roshev.) Tzvelev) Eurasia. See *Flora URSS* 2: 709. 1934, *Novosti Sist. Vyss. Rast.* 9: 63. 1972.

L. flavescens (Scribn. & J. G. Sm.) Pilg. (*Elymus arenicola* Scribn. & J. G. Sm., also spelled *arenicolus*; *Elymus flavescens* Scribn. & J. G. Sm.; *Leymus arenicola* (Scribn. & J.G. Sm.) Pilger)

North America, U.S. Perennial, growing in the sand dunes, see *Bulletin, Division of Agrostology United States Department of Agriculture* 8: 8, f. 1. 1897, *Circular, Division of Agrostology, United States Department of Agriculture* 9: 7. 1899 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 74: 6. 1947.

in English: yellow wildrye

L. flexilis (Nevski) Tzvelev (*Aneurolepidium flexile* Nevski; *Elymus flexilis* (Nevski) N.M. Kusn.)

Asia.

L. innovatus (Beal) Pilger (*Elymus brownii* Scribn. & J.G. Smith; *Elymus innovatus* Beal; *Elymus innovatus* f. *glabratus* (Bowden) B. Boivin; *Elymus innovatus* f. *innovatus*; *Elymus innovatus* f. *laxatus* Lepage; *Elymus innovatus* subsp. *innovatus*; *Elymus innovatus* subsp. *velutinus* Bowden; *Elymus innovatus* var. *glabratus* Bowden; *Elymus innovatus* var. *innovatus*; *Elymus innovatus* var. *velutinus* Bowden; *Elymus innovatus* var. *velutinus* (Bowden) Hultén ex R.L. Taylor & MacBryde; *Elymus mollis* R. Br., nom. illeg., non *Elymus mollis* Trin.; *Leymus velutinus* (Bowden) Á. Löve & D. Löve)

Northern America, Canada, U.S., California. Perennial, erect, tufted, with creeping rhizomes, deep and spreading roots, coarse foliage, ligule short and truncate, leaves

blue-green to yellow-green upon maturity, inflorescence a terminal spike dense and purple in color, 2 spikelets at each node, each spikelet 3- to 5-flowered, purple or gray glumes narrow and hairy, lemmas hairy with short awns, low germination, hard to grow from seed, found in alpine and subalpine regions, sandy to gravelly soils, along roadsides and river drainage, grows in dense stands, hybridizes with some species of *Agropyron* Gaertner to produce sterile hybrids, see *Botanical Appendix to Captain Franklin's Narrative* 732. 1823, *Contributions from the United States National Herbarium* 1(8): 280. 1893, *Grasses of North America for Farmers and Students* 2: 650. 1896, *Bulletin, Division of Agrostology United States Department of Agriculture* 8: 7, t. 4. 1897 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 74: 6. 1947, *Nature Canada* 79: 178. 1952, *Canadian Journal of Botany* 37: 1146. 1959, *Canadian Journal of Botany* 42: 597. 1964, *Botaniska Notiser* 128(4): 503. 1975 [1976], *Canadian Journal of Botany* 56(2): 192. 1978, *Taxon* 29(1): 168. 1980, *Provancheria* 12: 102. 1981.

in English: hairy wildrye, fuzzy spiked wildrye, downy lyme grass, downy ryegrass, boreal wildrye

L. karelinii (Turcz.) Tzvelev (*Aneurolepidium karelinii* (Turcz.) Nevski; *Elymus angustiformis* Pavlov; *Elymus karelinii* Turcz.; *Elymus kirghisorum* Drob.; *Elymus kugalsensis* Nikitin; *Elymus kuznetzovii* (Pavlov) Pavl.; *Elymus turgaicus* Roshev.; *Leymus karelinii* (Turcz.) Chohanov; *Leymus kugalsensis* (Nikitina) Tzvelev; *Leymus kuznetzovii* (Pavl.) Tzvelev)

Russia, Asia temperate. Perennial, natural pasture, useful for erosion control, found in disturbed sites, along roadsides and river drainage, rocky areas, sandy soils, see *Bulletin de la Société Impériale des Naturalistes de Moscou* 29(1): 64. 1865 and *Flora Kirgizskoi SSR* 2: 218. 1950, *Flora Kazakhstana* 1: 322. 1956, *Not. arenarius subsp. *mollis* (Trin.) Tzvelev; *Leymus mollis* (Trin.) Hara; *Triticum molle* (Trin.) F. Herm.)

Northern America, Canada, U.S., Asia, China, Japan. Perennial, adapted to coastal areas, not caespitose, does not form dense stands, littoral, erect, hairy, strongly rhizomatous, sheaths glabrous, ligule a fringed hairy membrane, flowering culm nodes rooting at the lower nodes, inflorescence compact and densely spicate, spikelets sessile, hairs on the margins of the lemmas, anthers on long filaments, leaves used for weaving basket handles and packstraps, a sand binder grass, useful for erosion control and revegetation, growing on dunes and sandy places near seashore or high tide line, upper tide flats, sandy beaches, sandy areas, beach dunes, lakeshores, in disturbed gravel, around the margins of ponds, see *Species Plantarum* 1: 83. 1753, *Neue Entdeckungen im ganzen Umfang der Pflanzenkunde* 2: 72. 1821, *De Plantis Labradoricis Libri Tres* 20. Lipsiae 1830, *Reliquiae Haenkeanae* 1(4-5): 265. 1830, *Flora* 31: 118. 1848, *The Flora of Canada* 2: 706. 1862, *Bulletin, Division of Agrostology United States Department of Agriculture* 11: 55-56, t. 14. 1898 and *Journal of the College of Science, Imperial University of Tokyo* 27: 24. 1910, *Rhodora* 17: 102. 1915, *Kongliga Svenska Vetenskapsakademiens Handlingar* III 5: 153. 1927, *Verhandlungen des Botanischen Vereins für die Provinz Brandenburg und die angrenzenden Länder* 76: 43. 1936, *Botanical Magazine* (Tokyo) 52: 232. 1938, *Flora of Alaska and Neighboring Territories; A Manual of the Vascular Plants* 270. 1942, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 74(1): 6. 1947, *Le Naturaliste Canadien* 82: 189-193. 1955, *Canadian Journal of Botany* 35: 969-970, 980-981. 1957, *Bot. Atkins; *Leymus simplex* var. *luxurians* (Scribner & Williams) Beetle; *Leymus triticoides* subsp. *multiflorus* (Gould) Á. Löve)

Northern America, Mexico, U.S., California. Perennial, vigorous, bright green deciduous foliage, grows fast, aggressive plant, useful for erosion control and for stabilizing stream banks, revegetation, forage, used in basketry, tolerates heavy clay soils, partial shade, along streams, rich soil, poor drainage and seasonal floodings, under trees, see *Proceedings of the Academy of Natural Sciences of Philadelphia* 14: 99. 1862, *Geological Survey of California, Botany* 2: 326. 1880, *Botanical Gazette* 10: 258. 1885, *Bulletin, Division of Agrostology United States Department of Agriculture* 11: 58. 1898 and *Archives de Biologie Végétale Pure et Appliquée* 1: 57. 1901, *A Flora of California* 1: 186. 1912, *Werdenda* 1(2): 3. 1923, *Madroño* 8(2): 46-47. 1945, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 74: 6. 1947, *Taxon* 29(1): 168. 1980, *Brittonia* 35: 32. 1983, *American Journal of Botany* 71(5): 619. 1984, *Phytologia* 55(3): 212. 1984, *Feddes Repertorium* 95: 482. 1984.

in English: alkali rye grass, beardless wildrye, creeping wildrye, alkali rye

in South Africa: kruipwildrog, wildekoring

L. x multiflorus (Gould) Barkworth & R.J. Atkins (*Elymus triticoides* Buckley subsp. *multiflorus* Gould; *Leymus multiflorus* (Gould) Á. Löve; *Leymus multiflorus* (Gould) Barkworth & R.J. Atkins; *Leymus triticoides* (Buckley) Pilg.; *Leymus triticoides* (Buckl.) Pilger subsp. *multiflorus* (Gould) Á. Löve)

Northern America, U.S., Mexico. Perennial, in partial shade, under trees, see *Proceedings of the Academy of Natural Sciences of Philadelphia* 14: 99. 1862 and *Madroño* 8(2): 46-47. 1945, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 74: 6. 1947, *Taxon* 29(1): 168. 1980, *American Journal of Botany* 71(5): 619. 1984, *Feddes Repertorium* 95: 482. 1984.

L. x vancouverensis (Vasey) Pilg. (*Elymus vancouverensis* Vasey; *Elymus x vancouverensis* nm. *californicus* Bowden; *Elymus x vancouverensis* nm. *crescentianus* Bowden; *Elymus x vancouverensis* Vasey (pro sp.); *Elymus x vancouverensis* nm. x *vancouverensis*; *Leymus vancouverensis* (Vasey) Pilg.; *Leymus x vancouverensis* var. *crescentianus* Bowden; *Leymus x vancouverensis* var. *vancouverensis*) (nm. = nothomorph, a term used in taxonomy to designate different hybrid forms derived from the same parent species, ranking essentially as a variety)

Northern America, Canada, U.S. Beaches, see *Bulletin of the Torrey Botanical Club* 15: 48, 218. 1888 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 74: 6. 1947, *Canadian Journal of Botany* 35: 975-976. 1957.

Libertia Lejeune = *Bromus* L., *Libertia* Dumort. (Liliaceae), *Libertia* Spreng. (Iridaceae, Iridoideae, Sisyrinchieae), *Tekel* Adans. (Iridaceae)

Named for the Belgian (by birth) botanist Marie-Anne Libert, 1782-1865, botanical collector, author of *Mémoires sur des cryptogames observées aux environs de Malmédy*. Paris 1826 and *Plantae cryptogamicae* quas in Arduenna collegit M.A. Libert, ... fasciculus primus [- quartus]. Leodii [Liège, Luik] 1830-1837. See Editor Morren, *Marie-Anne Libert de Malmédy, sa vie et ses oeuvres*. Gand 1868; J.H. Barnhart, *Biographical notes upon botanists*. 2: 378. 1965; T.W. Bossert, compil., *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 237. 1972.

Pooideae, Bromeae, type *Libertia arduennensis* Lej., see *Species Plantarum* 1: 76. 1753, *Familles des Plantes* 2: 497. 1763, *Commentationes Botanicae* 9. 1822, *Revue de la Flore des Environs de Spa* 22. 1824, *Systema Vegetabilium, editio decima sexta* 1: 127, 168. 1824 [1825], *Nova Acta Phys.-Med. Acad. Caes. Leop.-Carol. Nat. Cur.* 12: 755, 757. 1825, *Hort. brit.* edition 2: 498. 1830, *Edinburgh New Philos. J.* 15: 383. 1833, *Linnaea* 19: 382. 1846 and *U.S.D.A. Div. Agrostol. Bull.* 23: 1-66. 1900, *Brittonia* 7: 421. 1952, *Notes Roy. Bot. Gard. Edinburgh* 30: 366. 1970, *Bot. Jahrb. Syst.* 102: 447. 1981, *Taxon* 41: 559. 1992, *Taxon* 44: 611-612. 1995, *New Zealand J. Bot.* 40: 437-456. 2002, *Contributions from the United States National Herbarium* 48: 154-191, 425. 2003.

Libyella Pamp. = *Mibora* Adans., *Sphenopus* Trin.

Dedicated to Libya, in North Africa.

One species, Libya. Pooideae, Poodae, Aveneae, annual, herbaceous, low, tufted, leaves basal, auricles absent, ligule a fringed membrane, plants bisexual with hidden cleistogones in the leaf sheaths, inflorescence spicate, short racemes sparse, spikelets solitary, lowest spikelet female and hidden in the uppermost leaf sheath, 1 or 2 small glumes per spikelets, single female spikelet with 2 glumes (according to Watson and Dallwitz) or glumes absent from female spikelet (according to *Genera Graminum*), palea 2-nerved 2-keeled, 2 free and membranous lodicules or absent, 3 stamens, ovary glabrous, 2 stigmas, coastal, sandy places, see *Familles des Plantes* 2: 495. 1763, *Observations sur les Plantes des Environs d'Angers* 45. 1818, *Fundamenta Agrostographiae* 135. 1820 and *Boll. Soc. Bot. Ital.* 1925: 151. 1925, *Bulletin de la Société d'Histoire Naturelle de l'Afrique du Nord* 32: 220. 1941, *Contributions from the United States National Herbarium* 48: 450-451. 2003.

Species

L. cyrenaica (E.A. Durand & Barratte) Pamp. (*Poa cyrenaica* E.A. Durand & Barratte)

North Africa, Mediterranean. Tiny, spikelets 1-flowered, glumes 0- to 1-nerved, see *Florae Libyae Prodrromus* 268. 1910, *Bollettino della Società Botanica Italiana* 151. 1925.

Limnas Trin. = *Greenia* Nutt., *Greenia* S. Wallman (Liliaceae), *Sclerachne* Torr. ex Trin.

From the Greek *limnas*, *limnados*, *limnaios* “of the marsh, stagnant,” *limne* “a marsh.”

Two species, Russia, Siberia, Central Asia. Pooideae, Poodae, Aveneae, perennial, herbaceous, auricles absent, ligule an unfringed membrane, plants bisexual, inflorescence paniculate, panicle dense to contracted, spikelets pedicellate and laterally compressed, 2 subequal glumes 3-nerved, lemma with geniculate dorsal awn, palea nerved, 2 free and membranous lodicules, 2-3 stamens, ovary glabrous, 2 stigmas, stony places, slopes, open habitats, woods, related to *Alopecurus*, type *Limnas stelleri* Trin., see *De Fructibus et Seminibus Plantarum* 2: 188. Apr-Mai 1791, *Fundamenta Agrostographiae* 116, t. 6. 1820, *Transactions of the American Philosophical Society, new series*, 5: 142. 1835, *Plantae Javanicae Rariores* 15, t. 4. 1838, *Nomenclator Botanicus. Editio secunda* 2: 45. 1841, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 6,4(3-4): 273, 275. 1841, *Synopsis Plantarum Glumacearum* 1: 421. 1854 and *Bot. Zhurn.* 72(3): 391. 1987.

Species

L. malyshevii O.D. Nikif.

Russia. See *Bot. Zhurn.* 72(3): 391. 1987.

L. stelleri Trin.

Siberia. See *Fundamenta Agrostographiae* 116, t. 6. 1820.

Limnetis Rich. = *Spartina* Schreb.

Latin *limnestis*, *limnetis* for a plant called also *Centaurea major*, Greek *limnetis*, *limnatis*, *limnetes* “living in marshes.”

Chloridoideae, Cynodonteae, or Chloridoideae, Zoysieae, Sporoboloniae, see *Species Plantarum* 1: 71. 1753, *Genera Plantarum* 43. 1789, *Flora Boreali-Americana* 1: 64. 1803, *Syn. Pl.* 1: 72. 1805, *Catalecta Botanica* 3: 10. 1806, *A Sketch of the Botany of South-Carolina and Georgia* 1: 95, t. 4, f. 2. 1816, *A Manual of Botany for the Northern States* 14. 1817, *Descriptio uberior Graminum* 55. 1817, *The Genera of North American Plants* 1: 38. 1818, *Boston J. Nat.*

Hist. 1: 136. 1835, *A Manual of Botany* 301. 1840 and *Rhodora* 49(580): 114. 1947, *Iowa State College Journal of Science* 30(4): 471-574. 1956, *Contributions from the United States National Herbarium* 41: 138, 195-200. 2001.

Limnodea L.H. Dewey = *Greenia* Nutt., *Greenia* S. Wallman (Liliaceae), *Limnodea* Dewey ex Coult., *Sclerachne* Torr. ex Trin., *Thurberia* Benth., *Thurberia* A. Gray (Malvaceae)

From the Greek *limnodes* “marshy,” or derived from the genus *Limnas* Trin.

One species, southern U.S., Mexico. Pooideae, Poodae, Aveneae, or Pooideae, Poeae, Aveninae, annual or perennial, herbaceous, caespitose, branched, auricles absent, leaf blades flat, ligule an unfringed membrane, plants bisexual, inflorescence paniculate, spikelets pedicellate, 2 subequal glumes 3-nerved, lemma keeled and awned, palea 2-nerved, 2 free and membranous lodicules, 3 stamens, ovary glabrous, 2 stigmas, open habitats, prairies, plains, resembling *Cinna*, type *Limnodea arkansana* (Nutt.) L.H. Dewey, see *De Fructibus et Seminibus Plantarum* 2: 188. Apr-Mai 1791, *Fundamenta Agrostographiae* 116, t. 6. 1820, *Transactions of the American Philosophical Society, new series*, 5: 142. 1835, *Plantae Javanicae Rariores* 15, t. 4. 1838, *Nomenclator Botanicus. Editio secunda* 2: 45. 1841, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 6,4(3-4): 273, 275. 1841, *Synopsis Plantarum Glumacearum* 1: 421. 1854, *Memoirs of the American Academy of Arts and Science, new series* 5: 308. 1854, *Journal of the Linnean Society, Botany* 19: 58. 1881, *Contributions from the United States National Herbarium* 2(3): 518. 1894 and *Bot. Zhurn.* 72(3): 391. 1987, *Sida* 19(1): 195-200. 2000 [*Cinna* and *Limnodea* (Poaceae): not congeneric], *Ecology Letters* 5(5): 676-684. Sep 2002, *Global Change Biology* 8(11): 1118-1129. Nov 2002, *Contributions from the United States National Herbarium* 48: 381, 426, 608, 654. 2003.

Species

L. arkansana (Nutt.) L.H. Dewey (*Cinna arkansana* (Nutt.) G.C. Tucker; *Greenia arkansana* Nutt.; *Limnas arkansana* (Nutt.) Trin. ex Steud.; *Limnas pilosa* (Trin.) Steud.; *Limnodea arkansana* var. *arkansana*; *Limnodea arkansana* var. *pilosa* (Trin.) Scribn.; *Muhlenbergia hirtula* Steud.; *Sclerachne arkansana* (Nutt.) Torr. ex Trin.; *Sclerachne pilosa* Trin.; *Stipa demissa* Steud.; *Thurberia arkansana* (Nutt.) Benth. ex Vasey; *Thurberia pilosa* (Trin.) Vasey)

U.S., Arkansas. Lax panicle, glumes coriaceous and acute, lemma 2-dentate, palea keels wanting, grassy plains, see *Fundamenta Agrostographiae* 116, t. 6. 1820, *Transactions*

of the American Philosophical Society, new series, 5: 142. 1835, *Nomenclator Botanicus. Editio secunda* 2: 45. 1841, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 6,4(3-4): 274-275. 1841, *Synopsis Plantarum Glumacearum* 1: 130, 180, 421. 1854, *Department of Agriculture. Special Report* 63: 16. 1883, *Contr. U.S. Natl. Herb.* 2(3): 518. 1894 and *Bulletin, Division of Agrostology United States Department of Agriculture* 7(edition 3): 139. 1900, *Harvard Papers in Botany* 1(9): 62. 1996.

in English: Ozark grass

Limnopoia C.E. Hubb.

From the Greek *limne* "pool of standing water, marsh" and *poa* "grass."

One species, Asia, India. Panicoideae, Panicodae, Isachneae, annual or perennial, aquatic, trailing, creeping, herbaceous, glaucous, branched, very slender, auricles absent, leaf sheath inflated, ligule a fringe of hairs, small leaf blades, plants bisexual, inflorescence a single raceme unilateral and contracted, spikelets mostly paired, without hermaphrodite florets, 2 florets dissimilar, the upper floret in each spikelet female, the lower floret male, sessile spikelets embedded, 2 glumes more or less equal, lemmas obtuse, lower lemma membranous and narrowly ovate, upper lemma cartilaginous and elliptic, lower palea oblong 2-keeled 2-nerved, 2 free and fleshy lodicules, 0 or 3 stamens in the lower floret, ovary glabrous, 2 red stigmas, tangled stems, forming floating mats, found in waterlogged marshy areas, type *Limnopoia meeboldii* (C.E.C. Fisch.) C.E. Hubb., see *Hooker's Icones Plantarum* 35: t. 3432. 1943, *Grasses of Burma ...* 583. 1960.

Species

L. meeboldii (C.E.C. Fisch.) C.E. Hubb. (*Coelachne meeboldii* C.E.C. Fisch.) (after the German botanist Alfred Karl Meebold, 1863-1952, traveler and botanical collector, from 1928 to 1938 traveled widely in Australia, South Africa and southwest U.S., novelist and essayist, poet, his works include *Indien*. München 1908 [1907]; see I.H. Vegter, *Index Herbariorum*. Part II (4), *Collectors M. Regnum Vegetabile* vol. 93. 1976; Mary Gunn & Leslie E. Codd, *Botanical Exploration of Southern Africa*. 249. Cape Town 1981)

Southern India. Delicate, weak, elongate, nodes glabrous, leaf sheaths very short, leaf blades linear-lanceolate and acute-acuminate, spike-like raceme single, spikelets obovoid-oblong, lower glume oblong-lanceolate 3-nerved, upper glume obovate 3- to 5-nerved, lower lemma 7-nerved, 3 stamens, floating on the surface of water, vulnerable and probably a very rare species, see *Kew Bulletin* 1934: 169. 1934, *Hooker's Icon. Pl.* 35: t. 3432. 1943.

Lindbergella Bor = Lindbergia Bor

For the Finnish botanist Harald Lindberg, 1871-1963, from 1910 at the Helsinki Botanical Museum, traveler, author of *Enumeratio plantarum in Fennoscandia orientali sponte et subsoponte nascentium*. Helsinki [1901], son of the bryologist and professor of botany at Helsingfors University Sextus Otto Lindberg (1835-1889). See J.H. Barnhart, *Biographical notes upon botanists*. 2: 383. 1965; Stafleu and Cowan, *Taxonomic literature*. 3: 29-38. Utrecht 1981; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 238. 1972; S. Lenley et al., *Catalog of the manuscript and archival collections and index to the correspondence of John Torrey*. 268. 1973; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 743. Stuttgart 1993.

One species, Cyprus. Pooideae, Poodae, Poeae, annual, herbaceous, auricles absent, narrow leaf blades, ligule an unfringed membrane, inflorescence paniculate and open, panicle branches whorled, spikelets several-flowered, 2 glumes very unequal to subequal, lemmas appressed pubescent and mucronate, palea 2-nerved 2-keeled, 2 joined or free lodicules, 3 stamens, ovary glabrous, 2 stigmas, open habitats, slopes, rocky places, confused with *Eragrostis*, related to *Eremopoa*, see *Årsbok-vousikirja. Societas Scientiarum Fennica ...* 20(7): 5. Helsinki 1942, *Acta Soc. Sci. Fenn.* n. s. B, 2(7): 8. 1946, *Svensk Botanisk Tidskrift* 62: 467. 1968, *Svensk Botanisk Tidskrift* 63: 368. 1969, *Acta Botanica Yunnanica* 3(4): 399, f. 7, 13-20. 1981.

Species

L. sintenisii (H. Lindb.) Bor (*Lindbergia sintenisii* (H. Lindb.) Bor; *Poa sintenisii* H. Lindb.)

Cyprus. Panicle branches and pedicels slender and flexuous, glumes 3- to 5-nerved, lemmas coriaceous and keeled, see *Flora of Cyprus* 63: 368. 1969.

Lindbergia Bor = Lindbergella Bor

For the Finnish botanist Harald Lindberg, 1871-1963, see J.H. Barnhart, *Biographical notes upon botanists*. 2: 383. 1965.

Pooideae, Poodae, Poeae, see *Årsbok-vousikirja. Societas Scientiarum Fennica ...* 20(7): 5. Helsinki 1942, *Acta Soc. Sci. Fenn.* n. s. B, 2(7): 8. 1946, *Svensk Botanisk Tidskrift* 62: 467. 1968, *Svensk Botanisk Tidskrift* 63: 368. 1969, *Acta Botanica Yunnanica* 3(4): 399, f. 7, 13-20. 1981.

Lingnania McClure = Bambusa Schreb.

Bambusoideae, Bambusodae, Bambuseae, or Bambusoideae, Bambuseae, Bambusinae, often in *Bambusa*, type

Lingnania chungii (McClure) McClure, see *Genera Plantarum* 1: 236. 1789, *Species Plantarum. Editio quarta* 2: 245. 1799, *Revisio Generum Plantarum* 2: 760. 1891 and *Lingnan Science Journal* 15(4): 639-643, f. 1, pl. 28, 29. 1936, *Lingnan University Science Bulletin* 9: 35. 1940, *Journal of the Arnold Arboretum* 23(1): 101. 1942, *Acta Phytotaxonomica Sinica* 18(2): 214. 1980, *Journal of Bamboo Research* 1(1): 34. 1982, *Acta Phytotaxonomica Sinica* 24(5): 395. 1986, *Journal of Bamboo Research* 5(2): 41, f. 1. 1986, *Journal of Tropical and Subtropical Botany* 1(1): 8. 1993, Li, Z.-L., "The Flora of China Bambusoideae project - problems and current understanding of bamboo taxonomy in China." *The Flora of China* 5: 61-81. 1997, *Contributions from the United States National Herbarium* 39: 29-35, 68. 2000.

Linkagrostis Rom. García, Blanca & C. Morales = *Agrostis* L.

Referred to *Agrostis* L. and after the German (b. Hildesheim) botanist Johann Heinrich Friedrich Link, 1767-1851 (d. Berlin), M.D. Göttingen 1789, nature philosopher, zoologist, 1811-1815 Director of the Botanical Garden at Breslau, 1815-1851 professor of botany at Berlin, his writings include *Florae goettingensis specimen*. [Goettingen] [1789] and *Icones selectae anatomico-botanicae*. Berlin 1839-1842. See H.A.M. Snelders, in *D.S.B.* 8: 373-374. 1981; J.H. Barnhart, *Biographical notes upon botanists*. 2: 388. 1965; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 239. 1972; Miguel Colmeiro y Penido, *La Botánica y los Botánicos de la Península Hispano-Lusitana*. Madrid 1858; Jonas C. Dryander, *Catalogus bibliothecae historico-naturalis Josephi Banks*. 5: 328. London 1796-1800; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. Philadelphia 1964; A. Lasègue, *Musée botanique de Benjamin Delessert*. Paris 1845; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993; Ignatz Urban, *Geschichte des Königlichen Botanischen Museums zu Berlin-Dahlem (1815-1913). Nebst Aufzählung seiner Sammlungen*. Dresden 1916; Antonio José Cavanilles, *Icones et Descriptiones Plantarum*. 4: 61. 1798; Emil Bretschneider, *History of European Botanical Discoveries in China*. Leipzig 1981; Stafleu & Cowan, *Taxonomic literature*. 3: 65-70. Utrecht 1981.

One species, northeast Africa, Iberian Peninsula. Pooideae, Poodae, Poeae, Aveneae, perennial, stoloniferous, herbaceous, unbranched, auricles absent, ligule an unfringed membrane, plants bisexual, inflorescence paniculate and contracted, spikelets pedicellate, 2 subequal glumes 1-nerved, lemmas leathery awnless to mucronate, palea short to very reduced, 2 free lodicules, 3 stamens, ovary glabrous, 2 stigmas, shade species, damp places, sometimes referred

to *Agrostis*, type *Linkagrostis juressi* (Link) Romero Garcia, Blanca & Morales, see *Candollea* 42(1): 379-388. 1987.

Species

L. juressi (Link) Romero Garcia, Blanca & Morales (*Agrostis juressi* Link)

Africa, Mediterranean. See *Journal für die Botanik* 2: 312. 1799 and *Candollea* 42(1): 383. 1987.

Linosparton Adans. = *Lygeum* L., *Lygeum* Loeffl. ex L.

Greek *linon* "a net" and *sparton* "a rope, bond."

Lygeae, see *Genera Plantarum edition 5* 27, [522]. 1754, *Familles des Plantes* 2: 34, 571. 1763.

Lintonia Stapf = *Joannegria* Chiov., *Negria* Chiov.

After A. Linton, plant collector in East Africa, see Hepper & F. Neate, *Plant Collectors in West Africa*. 50. Utrecht 1971.

Two species, tropical eastern and southeastern Africa. Chloridoideae, Cynodonteae, perennial, unarmed, herbaceous, branched, tufted, sometimes rhizomatous, auricles absent, ligule a short membrane with a ciliate margin, leaf blades acuminate, plants bisexual, digitate or nondigitate inflorescence, tough unilateral racemes, spikelets ovoid and solitary, 2-4 fertile florets followed by sterile florets, floret cluster rounded at base, 2 glumes very unequal, body of lemma 5- to 11-nerved, lemmas awned and hairy to pubescent, fertile lemmas membranous, short subapical awn, palea keels wingless, 2 free and fleshy lodicules, stamens 3, ovary glabrous, 2 stigmas, red sandy soil, shade species or species of open habitats, shade of bushes, dry savannahs, seasonally flooded places or wet areas, heavy soils, *Acacia-Commiphora* bushland, type *Lintonia nutans* Stapf, see *Hooker's Icones Plantarum* 30: t. 2944, 2949. 1911, *Annali di Botanica* 10(3): 410-411. 1912, *Annali di Botanica* 11: 1. 1913.

Species

L. brizoides (Chiov.) C.E. Hubb. (*Joannegria brizoides* Chiov.)

Tropical Africa. Perennial, rare, stoloniferous, tussock-forming, leaf blades densely pilose, inflorescence racemose, loosely ascending racemes, spikelets subglobose to broadly elliptic, 4-7 florets, lower glume broadly lanceolate and acute, upper glume broadly ovate subacute to emarginate, lemmas ovate deeply concave, stout subapical awn, see *Flora of Tropical Africa* 10: 149. 1937.

L. nutans Stapf (*Joannegria melicoides* (Chiov.) Chiov.; *Lintonia nutans* var. *melicoides* (Chiov.) Chiov.; *Negria melicoides* Chiov.)

Eastern and southeastern Africa, Kenya. Perennial, tufted, shortly stoloniferous, tussock, leaf blades glabrous, digitate or subdigitate racemes, spikelets wedge-shaped, 4-10 florets, glumes 1-nerved, lower glume narrowly lanceolate and acuminate, upper glume oblong and obtuse, lemmas elliptic to obovate and villous, lemma bilobed, awn scabrid, found in vleis, grassland, *Acacia* bushland, abandoned fields, black clay, see *Hooker's Icones Plantarum* 30: t. 2949. 1911, *Annali di Botanica* 10(3): 411. 1912, *Annuario del Reale Istituto Botanico di Roma* 11: 231. 1913.

Lithachne P. Beauv. = *Lithacne* Poir.

Greek *lithos* "a stone" and *achne* "husk, glume," referring to the nature of the glumes.

Four species, tropical South America, Central America, Mexico to Argentina, West Indies. Bambusoideae, Oryzodae, Olyreae, or Bambusoideae, Olyreae, Olyrinae, perennial, caespitose, unarmed, woody or herbaceous, unbranched, broad-leaved, auricles present or absent, drooping leaves, leaf blades asymmetric and truncate-based, plants monoecious, without hermaphrodite florets, all the fertile spikelets unisexual, inflorescence terminal and axillary, a terminal male panicle, a single female spikelet, asymmetric fertile florets apically truncate, 2 glumes papery more or less equal, female lemma laterally compressed, palea present, 3 lodicules, stamens absent, ovary glabrous, 2 stigmas plumose, male spikelets on filiform pedicels, forest shade, forest understory, moist forest, above streams, fields, related to *Olyra*, type *Lithachne axillaris* P. Beauv., see *Essai d'une nouvelle Agrostographie, ou nouveaux genres des Graminées*. 135, 166, 168, t. 24, f. 2. Paris 1812, *Dict. Sci. Nat.* 27: 60. 1823 and *Contributions from the United States National Herbarium* 12(6): 183-258. 1909, *Brittonia* 32(4): 495-501. 1980, *Brittonia* 32(4): 495-501. 1981 [A new species of *Lithachne* (Poaceae: Bambusoideae) and remarks on its sleep movements], *Revista de Biología Tropical* 40: 47-72. 1992 [Morphology, anatomy and cytology of the genus *Lithachne* (Poaceae: Bambusoideae)], *Flora Mesoamericana* 6: 215-216. 1994, *Fontqueria* 46: [i-ii], 1-259. 1997, *American Bamboos* 280-282. 1999, *Contributions from the United States National Herbarium* 39: 68. 2000.

Species

L. horizontalis Chase

Brazil. Stoloniferous, herbaceous, more or less scandent, see *Journal of the Washington Academy of Sciences* 25(4): 189, f. 1. 1935.

L. humilis Soderstr.

Honduras. Riverbanks, along streams, forest shade, among rocks, see *Brittonia* 32(4): 496, f. 1, 2a-c. 1980.

L. pauciflorus (Sw.) P. Beauv. (also *pauciflora*) (*Lithachne axillaris* P. Beauv.; *Olyra axillaris* Lam.; *Olyra pauciflora* Sw.; *Olyra pauciflora* var. *atrocarpa* Kuntze; *Olyra pauciflora* var. *leucocarpa* Kuntze; *Stipa pauciflora* (Sw.) Raspail)

Tropical South America. Caespitose, forming clumps, leaf blades lanceolate to ovate and acuminate at the apex, upper sheaths overlapping, ligules membranous, inflorescences contracted, male spikelets linear-lanceolate attenuate, dry to wet forests, riverbanks, along streams, forest, understory, see *Nova Genera et Species Plantarum seu Prodrromus* 21. 1788, *Encyclopédie Méthodique, Botanique* 4: 547. 1797, *Essai d'une nouvelle Agrostographie* 135, 166, 168, t. 24, f. 2. Paris 1812, *Annales des Sciences Naturelles* I 5: 449. 1825 and *Phytologia* 37(4): 317-407. 1977, *Hickenia* 1: 73-78. 1977, *Monographs in Systematic Botany from the Missouri Botanical Garden* 45: i-xi, 1-1286. 1993.

L. pinetii (C. Wright ex Griseb.) Chase (*Olyra pineti* C. Wright ex Griseb.)

The Caribbean, Cuba. Moist sites, see *Memoirs of the American Academy of Arts and Sciences, new series* 8: 532. 1862[1863] and *Proceedings of the Biological Society of Washington* 21: 182. 1908.

Lithagrostis Gaertner = *Coix* L.

From the Greek *lithos* "a stone" and *agrostis*, *agrostidos* "grass, weed, couch grass," referring to the seeds.

Panicoideae, Andropogoneae, Coicinae, see *Species Plantarum* 2: 972. 1753, *Syst. Nat.* edition 10, 1261. May-June 1759, *De Fructibus et Seminibus Plantarum* 1: 7. 1788 and *Contributions from the United States National Herbarium* 46: 162-163, 284. 2003.

Littledalea Hemsley

For St. George R. Littledale, c. 1851-1931, traveler, 1893-1895 East Turkestan and Tibet (in company with Mrs. Littledale), botanical and zoological collector in Tibet, author of "A Journey across Central Asia." in *Geograph. Journ.* III: 446-475. 1894 and "A Journey across Tibet from North to South and West of Ladak." in *Geograph. Journ.* VII: 453-483. 1896. See Thyselton Dyer, *Kew Bulletin* 1896: 99-100; W.B. Hemsley, *Kew Bulletin* 1896: 207-216; Emil Bretschneider (1833-1901), *History of European Botanical Discoveries in China*. [Reprint of the original edition 1898] Leipzig 1981; Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 432. London 1994.

About 3 species, central Asia, western China. Pooideae, Poodae (or Tritricodae), Poeae, or Bromaeae, perennial, herbaceous, rhizomatous, margins of leaf sheaths overlapping, auricles absent, ligule an unfringed membrane, plants bisexual, open inflorescence paniculate, panicle loosely contracted, spikelets cuneate to oblong and pedicellate, 2 membranous glumes subequal to very unequal, lower glume 1- to 3-nerved, upper glume 5- to 7-nerved, large awnless lemmas, palea 2-nerved 2-keeled, 2 free and membranous lodicules, 3 stamens, ovary hairy, 2 stigmas, open areas, stony places, hillsides, slopes, see *Hooker's Icones Plantarum* 25: t. 2472. 1896.

Species

L. alaica (Korsh.) Petrov & Kom. (*Bromus alaicus* Korsh.)

Russia. See *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 4(4): 101. 1896 and *Flora URSS* 2: 553. 1934.

L. racemosa Keng

China. See *Contributions from the Biological Laboratory of the Chinese Association for the Advancement of Science. Section Botany.* 9(2): 136, f. 15. 1934 [also *Contributions from the Biological Laboratory of the Science Society of China: Botanical Series*].

L. tibetica Hemsl.

China, Tibet. See *Hooker's Icones Plantarum* 25(3): t. 2472. 1896, *Bull. Misc. Inform. Kew* 1896(119): 215. 1896 and *Claves Generum et Specierum Graminearum Primarium Sinicarum Appendice Nomenclatione Systematica* 173. 1957.

Lodicularia P. Beauv. = *Hemarthria* R. Br.

Latin *lodícula*, *ae* “a small coverlet, blanket, hypogynous scale,” dim. of *lodix*, *icis* “coverlet, counterpane.”

Panicoideae, Andropogoneae, Rottboelliinae, type *Lodicularia fasciculata* (Lam.) P. Beauv., see *Tableau Encyclopédique et Méthodique ... Botanique* 1: 204. 1791, *Essai d'une Nouvelle Agrostographie* 108, 166, 176, t. 21, f. 6. 1812, *Ann. Sci. Nat. (Paris)* 5: 307. 1825, *Révis. Gramin.* 1: 153. 1829, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 2(1): 248. 1832, *Reise um die Erde* 2: 71. 1834, *Florae Africae Australioris Illustrationes Monographicae* I. Gramineae. 128. 1841, *Synopsis Plantarum Glumacearum* 1: 358. 1854 and *Contr. Biol. Lab. Chin. Assoc. Advancem. Sci.* 10: 202. 1936, *Claves Gen. Sp. Gram. Prim. Sinic.* 240. 1957, *Fl. Tsinling*, 1(1): 188. 1976, *Blumea* 45: 443-475. 2000 [Revision of *Hemarthria* (Gramineae-Andropogoneae-Rottboelliinae)], *Contributions from the United States National Herbarium* 46: 247-248, 284. 2003.

Lojaconoa Gand. = *Festuca* L., *Lojaconoa* E. G. Bobrov (Fabaceae, alt. Leguminosae)

Dedicated to the Italian botanist Michele Lojacono Pojero, 1853-1919, “assistente provvisorio nel Regio Orto Botanico di Palermo,” a disciple of Agostino Todaro (1818-1892), his writings include *Le isole Eolie*. Palermo 1878, *Monografia dei trifogli di Sicilia*. Palermo 1878, “Revisione dei trifogli dell'America settentrionale.” *Nuovo Giorn. Bot. Ital.* 15: 113-198. 1883, “Clavis specierum *Trifoliorum*.” *Nuovo Giorn. Bot. Ital.* 15: 225-278. 1883 and “Sulla *Chorisia speciosa* S. Hil., a Palermo.” *Boll. Soc. Mutuo Soccorso*. 9: 13-15. 1911. See T.W. Bossert, compil., *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 242. 1972; Ethelyn Maria Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flow-ering Plants of Mexico*. Philadelphia 1964.

Pooideae, Poeae, Loliinae, type *Lojaconoa caerulescens* (Desf.) Gand., see *Species Plantarum* 1: 73-74. 1753, *Flora Americae Septentrionalis*; or, ... 2: 478. 1814, *Flora Europaea* 25: 341. 1891 and *Ill. Fl. U.S. Canad.*, edition 2, 1: 269. 1913, *Bot. Zhurn. (Moscow & Leningrad)* 52: 1598. 3-30 Nov 1967, *Watsonia* 16: 300. 1987, *Contributions from the United States National Herbarium* 48: 312-368. 2003.

Lolium Krecz. & Bobrov

Referring to *Lolium*.

One species, central Asia, eastern Mediterranean. Pooideae, Poodae, Poeae, or Pooideae, Poeae, Loliinae, annual, herbaceous, auricles absent, ligule an unfringed membrane, plants bisexual, raceme unilateral or spike, spikelets several-flowered, 2 glumes subequal or unequal, upper glume 3-nerved, lemmas coriaceous and shortly awned, palea 2-nerved 2-keeled, 2 free and membranous lodicules, 3 stamens, ovary glabrous, 2 stigmas, in dry places, open areas, type *Lolium orientale* (Boiss.) Krecz. & Bobrov, see *Monographia Festucarum Europaeorum* 154. 1882 and *Izv. Imp. Bot. Sada Petra Velikago* 14(Suppl. 2): 87. 1915, *Fl. URSS* 2: 531, 544, 766. 1934, *Bulletin de la Société Impériale des Naturalistes de Moscou* 47: 80. 1938, *K. Danske Vid. Selsk., Biol. Skrift.* 14(4): 67. 1965, *Bot. J. Linn. Soc.* 76: 348. 1978.

Species

L. subulatum (Sol. ex P. Russell) Eig (*Agropyron subulatum* (Banks & Sol.) Roem. & Schult.; *Agropyron subulatum* (Sol. ex P. Russell) Roem. & Schult.; *Festuca orientalis* (Boiss.) Fedtsch., nom. illeg., non *Festuca orientalis* Kern (1938); *Festuca orientalis* Kern, nom. illeg., non *Festuca orientalis* (Hack.) V. Krecz. & Bobrov (1934); *Festuca orientalis* (Hack.) V. Krecz. & Bobrov; *Lolium orientale*

(Boiss.) Krecz. & Bobrov; *Nardurus orientalis* Boiss.; *Nardurus subulatus* (Banks & Sol.) Bor; *Nardurus subulatus* (Sol. ex P. Russell) Bor; *Triticum subulatum* Banks & Sol.; *Triticum subulatum* Sol. ex P. Russell)

Eurasia. Glumes subequal, lemmas rounded 5-nerved, useful for erosion control, see Alexander Russell (ca. 1715-1768), *The Natural History of Aleppo* 2: 244. London 1794 [edition 2, in two volumes, revised, enlarged, and illustrated with notes, by Patrick Russell (1727-1805)], *Systema Vegetabilium* 2: 761. 1817, *Diagn. Pl. Orient.* ser. 1, 7: 127. 1846 and *Journal of Botany, British and Foreign* 75: 185-186, 189. 1937.

Lolium L. = *Arthrochortus* Lowe, *Craepalia* Schrank, *Crypturus* Link

From the Latin name for a troublesome weed or a darnel, *lolium*, *ii* (Plinius, Vergilius, T. Maccius Plautus, Ovidius); *lolium* denotes not edible food, from Akkadian *la*, Hebrew *lo* “of negation, not, no, without” and *lehem* “food, grain, bread,” Akkadian *lewi*, *lemu*, *le’emu* “to take food,” see Carl Linnaeus, *Species Plantarum*. 83. 1753 and *Genera Plantarum*. Edition 5. 36. 1754; Giovanni Semerano, *Dizionario della lingua Latina e di voci moderne*. 2(2): 459. Firenze 1994.

About 8 species, Europe, temperate Eurasia, North Africa, exact native range obscure. Pooideae, Poodae, Poeae, or Pooideae, Poeae, Loliinae, annual or perennial, herbaceous, variable habit, erect, tufted or caespitose, stoloniferous or rhizomatous or decumbent, more or less decumbent to erect, rhizomes spreading, culm nodes glabrous, culm internodes hollow, unbranched above, auricles present, ligule membranous, leaves linear, plants bisexual, inflorescence a terminal spike simple or single, solitary spikelets sessile and in two-ranked heads or distichous, florets perfect, upper floret reduced, spikelets compressed laterally, disarticulation above glumes and between florets, glumes 1 per spikelet or 2, lower glumes reduced or absent, upper glume exerted and stiff, lemmas acute and dorsally convex or rounded on the back, lemma membranous to coriaceous, awn subterminal or absent, hairy callus absent, callus short, palea 2-keeled, lodicules present, 3 stamens, ovary glabrous, white plumose stigmas, pasture grasses, open habitats, valuable fodder and lawn grasses, used as seed mixtures for roadside restoration, the annual species are troublesome invasive weeds of cereal crops, some species is considered toxic to livestock, this is a difficult genus, all species of *Lolium* are more or less interfertile and intergrading, several intergeneric hybrids within the genus, many species hybridizes freely, hybridization occurs with *Festuca* L., type *Lolium perenne* L., see *Species Plantarum* 1: 83. 1753, Franz von Paula von Schrank (1747-1835), *Baiersche Flora* 1: 102, 382. 1789, *Essai d'une Nouvelle Agrostographie* 99, 162,

177. 1812, *Observations sur les Graminées de la Flore Belgique* 97, 98, 99. 1823 [1824], *Linnaea* 17(4): 386-387. 1844, *Hooker's Journal of Botany and Kew Garden Miscellany* 8: 301. 1856, *Flore de France ... Prospectus* 3: 612. 1856 and *Grasses of Ceylon* 45. 1956, *Techn. Bull. U.S.D.A.* (or *U.S. Dept. Agric. Tech. Bull.*, or *Technical Bulletin, United States Department of Agriculture*) 1392: 1-65. 1968, *Dominguezia* 1: 1-23. 1978, *Novon* 3(3): 239-243. 1993, *Fragmenta Floristica et Geobotanica* 41(2): 521-536. 1996, *Botanical Journal of the Linnean Society* 141(2): 177-181. Species

L. canadense Michx. ex Roem. & Schult. (*Lolium canadense* Michx. ex Brouss.; *Lolium canadense* Bernh. ex Rouville; *Melica altissima* Walter, nom. illeg., non *Melica altissima* L.)

Europe, America. See *Flora Caroliniana, secundum ...* 78. 1788, *Elenchus Plantarum Horti Botanici Monspelienensis* 35. 1805, *Systema Vegetabilium* 2: 893. 1817, Paul Gervais de Rouville (1823-1907), *Monographie du genre Lolium* 27. Montpellier 1853.

L. canariense Steud.

Africa, Spain, Canary Islands. Annual, useful for erosion control, see *Synopsis Plantarum Glumacearum* 1: 340. 1854 and *Techn. Bull. U.S.D.A.* 1392: 30. 1968.

in Spanish: jollo canario

L. loliaceum (Bory & Chaub.) Hand.-Mazz. (*Lolium perenne* subsp. *rigidum* (Gaudin) Á. Löve & D. Löve; *Lolium perenne* var. *rigidum* (Gaudin) Coss. & Durieu; *Lolium rigidum* Gaudin; *Lolium rigidum* subsp. *lepturoides* (Boiss.) Sennen & Mauricio; *Lolium rigidum* Gaudin var. *rottboellioides* Heldr. ex Boiss.; *Lolium subulatum* Vis.; *Rottboellia loliacea* Bory & Chaub.)

Mediterranean region. Annual, caespitose, erect or decumbent, unbranched, internodes hollow, leaves auriculate, ligule membranous and truncate, leaf blades acute to obtuse, a green to purple cylindrical spike erect or curved, spikelets never exceeding the glume, glumes 1 per spikelet, the terminal spikelet with 2 glumes, lemma unawned or awned or mucronate, palea narrowly elliptic to narrowly obovate, anthers yellow, ovary glabrous, fruit compressed and elliptical, weed species of roadsides and crops, waste places, occurs in open habitats, maritime coasts and habitats, sandy areas, often maritime-arenicolous, often confused with maritime forms of *Lolium rigidum* Gaudin, see *Agrostologia Helvetica, definitionem* ... 1: 334-335. 1811, *Expédition scientifique de Morée*. Section des sciences physiques. Tome III. - 2e partie. Botanique. 3: 46. 1832, *Flora Dalmatica* 1d: 90, t. 3. 1842, *Diagnoses plantarum orientalium novarum, ser. 1, 2* (fasc. 13): 67. 1853, *Exploration Scientifique de l'Algérie* 2: 194. 1855 and *Annalen des K. K. Naturhistorischen Hofmuseums* 28: 32. 1914, *Catalogo de la flora del Rif oriental* ... 135. 1933, *Folia Geobotanica et Phytotaxonomica* 10(3): 273. 1975, *Lagascalia* 12: 286-290. 1984, *Annali di Botanica* 45: 75-102. 1987, *Boletim da Sociedade Broteriana, ser. 2* 61: 281-304. 1988, *Bothalia* 18: 114-119. 1988, *Boletim da Sociedade Broteriana, ser. 2* 63: 153-205. 1990, *Fitologija* 39: 72-77. 1991, *Annals of the Missouri Botanical Garden* 81(4): 784-791. 1994, *Bothalia* 27: 75-82. 1997.

in English: rigid ryegrass, annual ryegrass, Wimmera ryegrass, stiff ryegrass

L. lowei Menezes

Portugal, Madeira, Spain, Canary Islands. Vulnerable species.

L. multiflorum Lam. (*Lolium aristatum* Lag.; *Lolium gaudinii* Parl., nom. inval.; *Lolium italicum* A. Braun; *Lolium italicum* var. *italicum*; *Lolium italicum* var. *muticum* Döll; *Lolium multiflorum* f. *microstachyum* Uechtr.; *Lolium multiflorum* subsp. *italicum* (A. Braun) Schinz & R. Keller; *Lolium multiflorum* var. *diminutum* Mutel; *Lolium multiflorum* var. *italicum* (A. Braun) Beck; *Lolium multiflorum* var. *multiflorum*; *Lolium multiflorum* var. *muticum* DC.; *Lolium perenne* L.; *Lolium perenne* subsp. *multiflorum* (Lam.) Husnot; *Lolium perenne* var. *aristatum* Willd.; *Lolium perenne* var. *italicum* (A. Braun) Parnell; *Lolium perenne* var. *multiflorum* (Lam.) Parnell; *Lolium perenne* var. *multiflorum* (Lam.) Coss. & Durieu; *Lolium scabrum* J. Presl; *Lolium siculum* Parl.; *Lolium temulentum* var. *multiflorum* (Lam.) Kuntze)

Mediterranean, Europe, exact native range obscure. Annual or biennial to short-living perennial, herbaceous, loosely tufted, often branched, slender to very robust and rather stout, erect or spreading or decumbent, dark green, dark swollen joints, leaves auriculate with curved auricles, sheaths of the lower leaves purple-red to pink, upper sheath

sometimes scabrid, ligule quite short and membranous, leaf blades acute and shiny, green spike-like inflorescence, spikes erect or curved, spikelets (6-)10- to 14-flowered (up to 20-25) applied on the axis by one of their sides, florets not turgid at maturity, glumes 1 per spikelet, the terminal spikelet with 2 glumes, glumes lanceolate or narrowly oblong and shorter than spikelet, lemmas usually awned or unawned, awn straight, palea 2-keeled with keels winged, anthers yellow or purple, ovary glabrous, ornamental grass widely naturalized in temperate regions, a successful invader of post-agricultural succession in the Inland Pampa grasslands in Argentina, cultivated and occasionally escaped, soil improver, quick ground cover, hay, useful for fodder and for erosion control, palatable and highly nutritious, a valuable pasture grass, dry or very wet soils are not suitable, sensitive to summer drought, requires mild or warm climates, shade intolerant, very sensitive to winter cold and winter flooding, if well established can survive short periods of flooding, weed species of roadsides and waste places, disturbed sites, open habitats, fields, pastures and gardens, along edge of road, hybridizes freely with *Lolium perenne* L. and *Lolium rigidum* Gaudin, hybridizes very rarely with *Festuca pratensis* Huds. and *Festuca arundinacea* Schreb., some authors consider Italian ryegrass to be a variety or subspecies of the very closely related *Lolium perenne* L., see *Species Plantarum* 1: 83. 1753, *Flore Françoise* 3: 621. 1779, *Species Plantarum. Editio quarta* 1: 642. 1797, *Flore Française ... Europe, Egypt to Morocco. Perennial, annual or short-lived perennial, herbaceous, easily established, robust, erect or spreading or decumbent, loosely to densely tufted, dark green to yellowish green to straw-colored, often purplish at the base, roots are densely fasciculate, slender and long thin culms, sparsely leafy, auricles present or absent and often tapering to a narrow point, very fast leaf turnover leaf sheath a round structure, sheaths of the inferior leaves red to purple red to pinkish, ligule short and greenish to transparent, leaf blades acute and shiny, stout flower head, flattened terminal spike green or purple, spikes erect or curved, spikelets applied on the axis by one of their sides, chasmogamous spikelets, florets without awns, glumes 1 per spikelet, the terminal spikelet with 2 glumes, upper glume lanceolate or narrowly oblong and shorter than spikelet, lemmas awnless or minutely awned, palea acute and 2-keeled with scabrous keels, ovary apex glabrous, fruit dorsiventrally compressed, variable species cultivated and frequently escaped, sown for pastures, cultivated fodder, provides good forage and hay, the plant tillers freely, nutritious and palatable, infusion of plant drunk for stopping diarrhoea, older plants can become tough and unpalatable, lawns and playing fields, soil improver, used for stabilization of soils, useful for erosion control, sensitive to intense frost and to high temperatures, very sensitive to winter flooding and to drought, dry or wet soils are not suitable, susceptible to rust, a very variable species widely naturalized in temperate regions, typical of oceanic and mild climates, often found in rainy climates, quite sensitive to shade, tolerates heavy grazing, weed species of waste places and roadsides, ditches, open habitats, fields and field borders, on disturbed sites, pastures, tracks, lawns, river flats, riverbanks, sand dunes, hybridizes with *Festuca pratensis* Huds. and more rarely with *Festuca arundinacea* Schreb., hybridizes with *Lolium multiflorum* Lam., the entire plant is considered toxic, contains loliolide and several alkaloids, can cause rye-grass staggers in stock, see *Species Plantarum* 1: 83. 1753, *Species Plantarum, Editio Secunda* 122. 1762, *Flora Anglica, Editio Altera* 1: 55. 1778, *Flore Française* 3: 621. 1779, *Flora Oxoniensis* 50. 1794, *Flore des Environs de Paris* 62. 1799, *Enumeratio Plantarum in Partibus Saellandiae Septentrionalis et Orientalis* 1: 36. Europe, Mediterranean, Egypt, Tunisia to Morocco. Annual, solitary or not densely tufted, herbaceous, robust, stiff, scabrous or glabrous, stout, erect or geniculate or subprostrate, branched or unbranched, often rooting from the lower nodes, auricles present and clawlike or absent, sheaths glabrous to scaberulous, ligule membranous and obtuse to truncate, leaf blade flat and ribbed, green flattened terminal single erect spike, florets turgid at maturity, florets awned or awnless, glume lanceolate and usually equalling spikelet, glumes 1 per spikelet, 2 equal glumes on terminal spikelet, upper glume rigid, lemmas acute and swollen at maturity, awn subterminal straight or curved or hooked, palea acute with scabrous keels, anthers yellow, ovary glabrous, fruit swollen at maturity, troublesome weed species widely naturalized, medicinal value, the grains and probably the entire plant as well are poisonous, occurs in waste places and ballast, in cultivated or fallow lands, wheat fields, disturbed areas, paddocks, gardens, along roadsides, see *Species Plantarum* 1: 83. 1753, *Flore Française* 3: 621. 1779, *Baiersche Flora* 1: 382. 1789, *An Arrangement of British Plants, Third Edition* 1796, *Species Plantarum. One species, South America. Pooideae, Poodae, Poeae, or Pooideae, Poeae, Brizinae, perennial, herbaceous, tufted, auricles absent, old sheaths fibrous, ligule an unfringed membrane, plants bisexual, cleistogamous or chasmogamous, inflorescence paniculate, 2 glumes more or less equal, near the base of each wing of the lemma a translucent region, palea 2-nerved 2-keeled, 2 free and membranous lodicules, 3 or 1 stamens, ovary glabrous, 2 stigmas, sometimes referred to *Briza*, type *Lombardochloa rufa* (J. Presl) Roseng. & B.R. Arrill., see *Species Plantarum* 1: 70. 1753, *Reliquiae Haenkeanae* 1(4-5): 282. 1830, *An Introduction to the Natural System of Botany* 450. 1836, *Synopsis Plantarum Glumacearum* 1: 288. 1854 and *Ill. Species

L. rufa (J. Presl) Roseng. & B.R. Arrill. (*Briza rufa* (J. Presl) Steud.; *Chascolytrum rufum* J. Presl; *Poidium rufum* (J. Presl) Matthei)

Uruguay. Perennial, glumes 3-nerved, see *Reliquiae Haenkeanae* 1(4-5): 282. 1830, *Nomenclator Botanicus. Editio secunda* 1: 225. 1840 and *Boletín de la Facultad de Agronomía de Universidad de la República, Montevideo* 105: 30. 1968, *Willdenowia* 8: 98. 1975, *Anales de la Facultad de Química de Montevideo* 9: 260. 1979[1982].

Lophacme Stapf = *Chloris* Sw., *Enteropogon* Nees

From the Greek *lophos* "a crest" and *akme* "the top, summit."

About two species, southern tropical Africa. Chloridoideae, Cynodonteae, or Eragrostideae, perennial, tufted, herbaceous, unbranched, unarmed, leaves mainly basal, auricles absent, ligule a fringed or unfringed membrane, plants bisexual, spike-like digitate or subdigitate racemes, spikelets solitary and lax, 1-3 fertile florets with 1-5 sterile florets, spikelets sometimes subtended by very minute and hairy

scales, 2 linear glumes unequal, lemmas keeled long awned, palea keels wingless, 2 free and toothed lodicules, 3 stamens, ovary glabrous, 2 dark stigmas, damp places, savannah, open grassland or streamsides, shade or open habitats, related to *Trichoneura*, similar to *Ectrosia* and *Chloris*, type *Lophacme digitata* Stapf, see *Genera et species plantarum* 5. 1816, *Systema Vegetabilium* 2: 607. 1817, *Intr. Nat. Syst. Bot.* 448. 1836, *Flora Capensis* 7(2): 316. 1898 and *Flora Capensis* 7(4): 647-648. 1900, *Annuario del Reale Istituto Botanico di Roma* 8: 350. 1908, *Claves Generum et Specierum Graminearum Primarum Sinicarum Appendice Nomenclatione Systematica* 197. 1957, *Australian Journal of Botany, Supplementary Series* 5: 31. 1972, *Kew Bulletin* 38(1): 61-62. 1983, *Journal of Cytology and Genetics* 20: 205-206. 1985.

Species

L. digitata Stapf

South Africa. Perennial, slender, tufted, rhizomatous, basal sheaths fibrous, awn longer than the floret, ligule a fringed membrane, open habitats, open highveld sourveld, see *Flora Capensis* 7(4): 647-648. 1900.

L. parva Renvoize & Clayton

Zambia. Perennial, shade species, ligule an unfringed truncate membrane, see *Kew Bulletin* 38(1): 61, f. 1. 1983.

Lophatherum Brongn. = *Acroelytrum* Steud., *Allelothea* Steud.

From the Greek *lophos* "a crest" and *ather* "stalk, barb, spine," the awns are crested, referring to sterile lemmas.

Two species, tropical Asia, Indomalayan region. Centothecoideae, Centothecaceae, perennial, tufted or caespitose, erect, herbaceous, sometimes roots modified into fusiform tubers, culm internodes solid or hollow, ligule membranous and ciliolate, leaf blades linear-lanceolate to lanceolate to ovate-lanceolate, leaf sheaths truncate, leaves glabrous or hairy, false petioles, plants bisexual, inflorescence of loose or dense racemes unilateral, spikelets short-pedicelled falling entire, hermaphrodite florets, 1 proximal perfect floret, 2-(-9)-13 distal barren florets, 2 muticous glumes subequal, lower glume 5-nerved, upper glume 7-nerved, sterile lemmas several, awns of the sterile lemmas hooked at maturity, palea 2-nerved, 2 free and fleshy lodicules, 2-3 stamens, shade, moist regions, along rivers, type *Lophatherum gracile* Brongn., see *Voy. Coquille, Bot. Phanérogamie [Voyage autour du Monde]* 49-50, t. 8. 1831 [1829], *Flora* 29: 20. 1846, *Synopsis Plantarum Glumacearum* 1: 117, 300, 428. 1854 and *Bulletin of the Nanjing Botanical Garden, Mem. Camus; *Lophatherum humile* Miq.; *Lophatherum japonicum* Steud.; *Lophatherum lehmannii* Nees ex Steud.; *Lophatherum multiflorum* Steud.; *Lophatherum pilosulum* Steud.; *Lophatherum zeylanicum* Hook.f.)

South India, China and Japan, Sri Lanka, New Guinea, Australia. Perennial with root tubers, tufted, ascending to erect, shortly rhizomatous, leaf sheaths shiny and many-nerved, ligule minute, usually glabrous leaf blades narrow lanceolate and acute, inflorescence a spike-like panicle, spikelet on a short stalk, fertile floret 1, 2-13 sterile florets in an apical tuft, glumes boat-shaped and muticous, lemma with a short terminal barbed awn, palea narrow, stamens 2, a good fodder plant, foliage eaten by animals, leaves used in Chinese medicine, juice from the root used to add flavour to rice wine, a grass of the forest and shady places, see *Voy. Coquille, Bot. Phan.* 49-50, t. 8. 1831 [alt. *Voyage autour du Monde* 2(2): 49-50, t. 8. 1831], *Flora* 29: 20-21. 1846, *Systematisches Verzeichniss der im Indischen Archipel* 102. 1845-1846, *Synopsis Plantarum Glumacearum* 1: 300, 428. 1854, *Annales Museum Botanicum Lugduno-Batavi* 2: 282. 1866, *Enumeratio Plantarum in Japonia Sponte Crescentium ...* 2(1): 180. 1877, *Journal of the Linnean Society, Botany* 20: 300. 1883, *Bulletin de l'Herbier Boissier* 7(9): 707-708, 737. 1899 and *Handb. Sun Yat Sen* 1988-1989: 14-20. 1988-1989, *Investigatio et Studium Naturae* 12: 48-65. 1992.

in English: common lophatherum, sasagrass

in Japan: sasa-kusi

in China: dan zhu ye, tan chu yeh, tan chu, tan chu yé

in Thailand: ai lek mai phai, phai pen lek, yaa khui mai phai, ya khui mai phai, ya phai

Malayan names: rumput jarang-jarang, rumput kelurat, rumput kelorak, rumput kerurat, rumput ubi buloh

L. sinense Rendle

China. See *Journal of the Linnean Society, Botany* 36(254): 421. 1904.

Lophochlaena Nees = Pleuropogon R. Br.

From the Greek *lophos* “a crest” and *chlaena*, *chlaenion* “cloak.”

Pooideae, Meliceae, type *Lophochlaena californica* Nees, see *Chloris Melvilliana* 31. 1823, *Annals of Natural History* 1: 283. 1838, *Proceedings of the American Academy of Arts and Sciences* 8: 409. 1872, *The Grasses of the United States* 40. 1883 and *Journal of the Washington Academy of Sciences* 28(2): 52, f. 1. 1938, *American Journal of Botany* 28: 360. 1941, *Taxon* 27(4): 375. 1978, *Madroño* 33(2): 146. 1986, *Novon* 4(1): 17. 1994, *Contributions from the United States National Herbarium* 48: 431, 504-505. 2003.

Lophochloa Rchb. = Aegialina Schult. & Schult.f., Aegialitis Trin., Rostraria Trin.

From the Greek *lophos* “a crest, tuft” and *chloe*, *chloa* “grass,” possibly referring to the appearance of *Lophochloa cristata* (L.) Hylander.

About 60-100 species, cosmopolitan, north and south temperate. Pooideae, Poodae, Poeae, Aveneae, or Aveninae, annual or perennial, glabrous or pubescent, herbaceous, ligule an unfringed membrane, leaves flat, a narrow or open panicle compact or loose, spikelets compressed laterally, persistent glumes subequal and keeled, lowest lemmas sessile, awns present or absent, palea present, 2 lodicules membranous and ciliate or glabrous, ovary glabrous, intergrading, usually found in open habitats, meadows, upland grasslands, slopes, mountain slopes, weedy places, sometimes or often included in *Koeleria* Pers. and *Rostraria* Trinius, type *Lophochloa phleoides* (Vill.) Rchb., see *Syn. Pl.* 1: 97. 1805, *Fundamenta Agrostographiae* 127, 149, t. 9, 13. 1820, *Mant.* 2: 13, 222. 1824, *Flora Germanica Excursoria* 42. 1830, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Lopholepis Decne. = *Holboellia* Hook.,
Holboellia Wall., *Lopholepis* (J. Sm.) J. Sm.
(Grammitidaceae)

From the Greek *lophos* "a crest" and *lepis* "scale," referring to the nature of the florets, to the keeled glumes.

One species, Asia, Sri Lanka, India. Chloridoideae, Cynodonteae, annual, unarmed, tufted, herbaceous, unbranched or sparsely branched, auricles absent, leaf blades small and cordate at the base, ligule an unfringed narrow membrane, plants bisexual, inflorescence a simple cylindrical false spike or raceme, tiny solitary spikelets resembling the head of a bird, floret 1 perfect, 2 coriaceous glumes more or less equal, lower glume keel crested by a wing bearing spiny hairs, upper glume cymbiform and keeled, palea 2-keeled, lodicules absent, ovary glabrous, 2 stigmas, sand binder and stabilizer, open habitats, sandy places, dry and arid zones, disturbed areas, type *Lopholepis ornithocephala* (Hook.) Steud., see *Species Plantarum* 2: 1083. 1753, *Plantes recueillies pendant le voyage des Russes autour du monde* 8, t. 7. 1810, *Tentamen Florae Napalensis Illustratae* 23. Calcutta and Serampore 1824-1826, *Botanical Miscellany* 2: 144. 1831, *Archives du Muséum d'Histoire Naturelle* 1: 147. 1839, *Genera Filicum* t. 51. 1840, *Journal of Botany, being a Second Series of the Botanical Miscellany* 4: 56. 1842, *The Botany of the Voyage of H.M.S. Herald* 229. 1854, *Ferns British & Foreign* 85. 1866.

Species

L. ornithocephala (Hook.) Steud. (*Holboellia ornithocephala* Hook.)

Southern India, Sri Lanka. Annual, slender, smooth, erect or ascending, leaf blades lanceolate and acuminate to long-pointed, leaf sheaths membranous, panicle linear-oblong and exserted, glumes cuspidate, see *Botanical Miscellany* 2: 144. 1831, *Archives du Muséum d'Histoire Naturelle* 1: 147. 1839, *Synopsis Plantarum Glumacearum* 1: 112. 1854 and *Handb. Fl. Ceylon* 5: 189. 1900, *Grasses of Ceylon* 103. 1956, *Ceylon J. Sci., Biol. Sci.* 2(2): 126. 1959, *Grasses of Burma ...* 682, f. 80. 1960.

Lophopogon Hackel = *Apocopsis* Nees,
Germainia Balansa & Poitr., *Sclerandrium*
Stapf & C.E. Hubb.

Bearded florets, from the Greek *lophos* "a crest, tuft" and *pogon* "beard."

About 2-3 species, India. Panicoideae, Andropogonodae, Andropogoneae, Andropogoninae, annual or perennial, small, herbaceous, low, tufted, simple or branched, plants bisexual, contracted and digitate inflorescence, 2 short racemes appressed and headlike, spikelets imbricate and paired, fertile spikelets more or less laterally compressed, lower sessile spikelets male only, pedicellate spikelets awned, 2 glumes truncate and unequal, lower glume of fertile spikelet shorter than upper, upper lemma bilobed and awned, lodicules absent, 2 stamens, open areas, related to *Polytrias*, type *Lophopogon tridentatus* (Roxb.) Hack., see *Proceedings of the Linnean Society of London* 1: 93-94. 1841, *Bulletin de la Société d'Histoire Naturelle de Toulouse* 7: 344, f. 1-9. 1873, *Flora Australiensis: A Description ...* 7: 518. 1878, *Die Natürlichen Pflanzenfamilien* 2(2): 26. 1887, *Monographiae Phanerogamarum* 6: 254-255. 1889, *Journal de Botanique (Morot)* 4: 83. 1890 and *Bulletin du Muséum d'Histoire Naturelle* 25: 285. 1919, *Icones Plantarum* 33: t. 3262. 1935, *Die natürlichen Pflanzenfamilien, Zweite Auflage* 14e: 124. 1940, *Thai Forest Bulletin. Botany* 6: 35, 46. 1972.

Species

L. duthiei Stapf ex Bor

India. See *Grasses of Burma, Ceylon, India and Pakistan (excluding Bambuseae)* 689. 1960.

L. kingii Hook.f.

India. See *The Flora of British India* 7: 149. 1896.

L. tridentatus (Roxb.) Hack. (*Andropogon tridentatus* Roxb.; *Apocopsis tridentata* Benth.; *Saccharum tridentatum* (Roxb.) Spreng.)

India. Useful fodder grass, best before flowering, see *Flora Indica; or Descriptions ...* 1: 261. 1820, *Systema Vegetabilium, editio decima sexta* 1: 283. 1825, *Journal of the Linnean Society, Botany* 19: 67. 1881, *Monographiae Phanerogamarum* 6: 254. 1889.

Lophopyrum Á. Löve = *Elymus* L., *Elytrigia*
Desv., *Psammopyrum* Á. Löve, *Thinopyrum* Á.
Löve, *Trichopyrum* Á. Löve

From the Greek *lophos* "a crest, tuft" and *pyros* "wheat."

About 10-11 species, Mediterranean, Eurasia, Iran, Caucasus. Pooideae, Triticoideae, Triticeae, or Pooideae, Triticeae, Hordeinae, perennial, stout, herbaceous, simple, glabrous, tufted, ligule an unfringed membrane, plants bisexual,

inflorescence spicate, spikelets solitary and sessile, 2 subequal glumes 3- to 9-nerved, palea 2-nerved 2-keeled, 2 free and membranous lodicules, 3 stamens, ovary hairy, 2 stigmas, open areas, coastal, sandy dunes and beaches, sometimes referred to and included in *Elytrigia* Desv. and *Elymus* L., many species have been moved to *Thinopyrum* Á. Löve, type *Lophopyrum elongatum* (Host) Á. Löve, see *Nouveau Bulletin des Sciences, publié par la Société Philomatique de Paris* 2: 190. 1810, *Observations sur les Graminées de la Flore Belgique* 95. 1823 [1824], *Index Kewensis* 1: 836. 1893 and *American Midland Naturalist* 4: 227. 1915, *Prop. Soc.* 91: 443. 1985, *Travaux de l'Institut Scientifique, Université Mohammed V. Série Botanique* 35: 1-168. 1988, *Contributions from the United States National Herbarium* 48: 431, 690-694. 2003.

Loudetia Hochst. ex A. Braun = *Tristachya* Nees

Perhaps the genus was named for one Loudet, German dentist.

Panicoideae, Arundinelleae, see *Flora Brasiliensis seu Enumeratio Plantarum* 2: 458. 1829, *Flora* 24(2): 713. 1841 and *N. Amer. Fl.* 17(8): 578. 14 July 1939, *Fieldiana, Botany* 24(2): 1-390. 1955, *Kirkia* 5: 235-258. 1966, *Kew Bulletin* 21(1): 119-124. 1967, *Kew Bulletin* 26(1): 111-123. 1971.

Loudetia Hochst. ex Steud. = *Loudetia* Hochst. ex A. Braun, *Loudetia* Steud., *Trichopteryx* Nees

Perhaps the genus was named for one Loudet, German dentist.

About 26-34 species, tropical and southern Africa, Madagascar and South America. Panicoideae, Panicodae, Arundinelleae, perennial or rarely annual, herbaceous, slender, robust, erect, caespitose, auricles absent, ligule fringed, plants bisexual, open or contracted inflorescence paniculate, spikelets lanceolate solitary or paired, 2 florets, awned or awnless, 2 glumes very unequal, lower glume shorter than the female-fertile lemma, lower lemma 3-nerved, upper lemma pilose with 2 short acute lobes, usually deciduous awn geniculate with a twisted column, palea 2-nerved 2-keeled, 2 lodicules free and fleshy, 2 or rarely 3 stamens, ovary glabrous without the apical appendage, brown to dark stigmas, bottlebrush appearance of the inflorescence, growing in open habitats, on dry soils, savannah woodland, deciduous bushland, poor shallow soils, humid places, hillsides, swampy areas, type *Loudetia elegans* Hochst., see *Flora Brasiliensis seu Enumeratio Plantarum* 2: 458. 1829, *An Introduction to the Natural System of Botany* 449. 1836, *Flora* 24(2): 713. 1841, *Index Sem. Species

L. acuminata (Stapf) C.E. Hubb. (*Trichopteryx acuminata* Stapf)

Africa. Unpalatable, see *Bulletin of Miscellaneous Information Kew* 1897: 297. 1897 and *Bulletin of Miscellaneous Information Kew* 1934: 429. 1934.

L. angolensis C.E. Hubb.

Africa. See *Bulletin of Miscellaneous Information Kew* 1934: 426. 1934.

L. annua (Stapf) C.E. Hubbard (*Trichopteryx annua* Stapf; *Trichopteryx thorbeckii* Pilg.)

Tropical Africa. Annual, erect, browsed by cattle when young, see *Bulletin of Miscellaneous Information Kew* 1897: 298. 1897 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 51(3-4): 415. 1914, *Bulletin of Miscellaneous Information Kew* 1934: 429. 1934, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 77(2-3): 226-354, f. 18. 1957, *Gram. Cameroun* 2: 369. 1992.

in Gambia: kereng fenio

in Guinea-Bissau: ovil

in Nigeria: bindin kuregée, bundin kuregée, cammeya, gwodnu susi, gwodnu susi, nione sule, tsigiàà, tsiigàà, tsikàà, wutsiyar gwankii, wuziyar gwanki, wutsiyar kuréégée, wutsiyar zoomoo, wutsiyar zumu

in Senegal: è vèt éma, evet ema

L. annua (Stapf) C.E. Hubbard var. *thorbeckii* (Pilg.) Jacq.-Fél.

Africa. See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 51(3-4): 415. 1914, *Adansonia*, sér. 2, 12: 234. 1972.

L. arundinacea (Hochst. ex A. Rich.) Steud. (*Trichopteryx arundinacea* (Hochst. ex A. Rich.) Hack.; *Trichopteryx nigritiana* Stapf; *Trichopteryx simplex* Rendle; *Trichopteryx verticillata* De Wild.; *Tristachya arundinacea* Hochst. ex A. Rich.)

Senegal, Angola, Mozambique. Perennial, robust, tufted, tussock, erect, nodes silky, leaf blades linear, open panicle with whorled branches, spikelets loosely paired, lower lemma male glabrous, upper lemma pubescent acutely 2-dentate, upper floret callus truncate or emarginate, awn weakly geniculate with loosely twisted column, 2 stamens, browsed by cattle when young, used for thatching, savannah, dry and poor soils, swamps, grassland, open woodland, bushland, rocky places, see *Tentamen Florae Abyssinicae*

... 2: 417. 1850, *Synopsis Plantarum Glumacearum* 1: 238. 1854, *Abhandlungen der Königlichen Akademie der Wissenschaften in Berlin* 2: 129. 1891 [1892], *Bulletin of Miscellaneous Information Kew* 1897: 297. 1897 and *Annales de la Société Scientifique de Bruxelles* 29: 160. 1920.

in Nigeria: ajo, ata, tsintsiyar duutsee

in Senegal: paldinagh

in Sierra Leone: cili, ewabe, fiila, filesaxe, kawalan, kewelin, ke bonkolo, nepelabana, niaboli, putaka, segera, sera, seran, silangina

L. arundinacea (Hochst. ex A. Rich.) Steud. var. *tricantha* C.E. Hubb. ex Hutch. (*Colpodium tibeticum* Bor; *Paracolpodium tibeticum* (Bor) E.B. Alexeev; *Trichopteryx arundinacea* var. *tricantha* Peter; *Trichopteryx convoluta* De Wild.; *Trichopteryx dobbelaerei* De Wild.; *Trichopteryx elegans* var. *hensii* De Wild.; *Trichopteryx grisea* K. Schum.)

Tropical Africa. Glumes tuberculate-setose, see *Synopsis Plantarum Glumacearum* 1: 238. 1854 and *Annales de la Société Scientifique de Bruxelles* 29: 147, 152. 1920, *Repertorium Specierum Novarum Regni Vegetabilis, Beihefte* 40: 96. 1930, *Flora of West Tropical Africa* 2: 544. 1936, *Die Pflanzenwelt Ost-Afrikas* C: 109. 1936, *Kew Bulletin* 8(2): 270. 1953, *Novosti Sistematiki Vysshikh Rastenii [New Delhi]* 18: 95. 1981.

L. bidentata Berhaut

Africa. See *Mémoires de la Société Botanique de France* 1953-54: 11. 1954.

L. camerunensis (Stapf) C.E. Hubb. (*Trichopteryx camerunensis* Stapf)

Africa. See *Bulletin of Miscellaneous Information Kew* 1897: 296. 1897 and *Bulletin of Miscellaneous Information Kew* 1934: 431. 1934.

L. cerata (Stapf) C.E. Hubb. (*Trichopteryx cerata* Stapf)

Africa. See *Kew Bulletin* 1934: 429. 1934.

L. coarctata (A. Camus) C.E. Hubbard (*Tristachya coarctata* A. Camus; *Tristachya triticoides* A. Camus & C.E. Hubb. ex Chev.)

Tropical Africa. Perennial, densely tufted, fodder, inundated soil, poor drained places, moist meadows, sandy loam, see *Bulletin of Miscellaneous Information Kew* 1934: 428. 1934, *Bulletin de la Société Botanique de France* 80: 774. 1934, *Revue internationale de botanique appliquée et d'agriculture tropicale* 1934: 43. 1934.

in Guinea: kuligi, kuliji, laque dawa

in Guinea-Bissau: udo banoro, udo bunoro

L. crassipes C.E. Hubb.

Africa. See *Kew Bulletin* 1934: 430. 1934.

L. cuanzensis Lubke & Phipps

Angola. Rocky slopes, see *Boletim da Sociedade Brotariana*, ser. 2 41: 195. 1967.

L. demeusii (De Wild.) C.E. Hubb. (*Trichopteryx demeusei* De Wild., also spelled *demeusii*; *Trichopteryx lembeaensis* Vanderyst)

Africa. See *Annales de la Société Scientifique de Bruxelles* 39: 149. 1920, *Bulletin agricole du Congo Belge* 13: 341. 1922, *Bulletin of Miscellaneous Information Kew* 1934: 429. 1934.

L. densispica (Rendle) C.E. Hubb. (*Trichopteryx densispica* Rendle)

South Africa, Angola, Guinea. Perennial, tufted, dense spike-like inflorescence, lower glume obtuse and tubercled, upper glume and lower lemma glabrous, found in open habitats, open grassland, see *Catalogue of the African Plants Collected by Dr. F. Welwitsch in 1853-61* 2(1): 214. 1899 and *Bulletin of Miscellaneous Information Kew* 1934: 428. 1934.

L. echinulata C.E. Hubb.

Africa. See *Kew Bulletin* 1949: 354. 1949.

L. esculenta C.E. Hubb. (*Tristachya esculenta* (C.E. Hubb.) Conert)

Sudan. Grain crop species, edible grains, see *Kew Bulletin* 1949: 352. 1949, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 77(2-3): 300. 1957.

L. filifolia Schweick.

South Africa, Madagascar. Perennial, branched, tufted, wiry, slender, thin, glumes shortly awned or not, in mountainous slopes, rocky sites, cliffs, crevices, stony places, see *Bulletin of Miscellaneous Information Kew* 1935: 207. 1935.

L. flammida (Trin.) C.E. Hubbard (*Arundinella flammida* Trin.; *Loudetia phragmitoides* (Peter) C.E. Hubb.; *Trichopteryx flammida* (Trin.) Benth.; *Trichopteryx flammida* T. Durand & Schinz; *Trichopteryx phragmitoides* Peter)

Bolivia, Brazil, Paraguay. Perennial, tussocky, clumped, erect, caespitose, nodes bearded, leaf blades linear with tapering base, leaves tough and acuminate, drooping feathery inflorescence, dense panicle narrowly oblong, spikelets solitary or loosely clustered, lower floret male, glumes subequal and persistent, upper lemma 2-dentate with a geniculate awn, 2 stamens, damp or marshy ground, open areas, wet sand, edge of stream, see *Species Graminum* 1828-1836, *Journal of the Linnean Society, Botany* 19: 59, 98. 1881 and *Repertorium Specierum Novarum Regni Vegetabilis, Beihefte* 40(1): Anhang 96. 1930, *Bulletin of Miscellaneous Information Kew* 1934: 428. 1934, *Bulletin of Miscellaneous Information Kew* 1936: 321. 1936, *Arnaldoa* 8(1): 45-48. 2001[2002].

L. flavida (Stapf) C.E. Hubb. (*Trichopteryx flavida* Stapf; *Trichopteryx glabra* Hack.)

East tropical Africa, Ghana, Transvaal. Perennial, variable, tufted, coarse, erect, leafy, compact, swollen at the base, leaf blades narrowly linear, basal leaf sheaths woolly, panicle branches and axis glabrous or pubescent, spikelets borne singly or in pairs, glumes glabrous shortly awned or sharply tipped, upper lemma with clavate hairs, lower lemma acute, awn flexuous, 3 stamens, grazed, found in rocky soils, slopes, deciduous bushland, woodland, shallow rocky soil, vleis, grassland, vlei margins, open savannah woodland, related to *Loudetia pennata*, see *Bulletin of Miscellaneous Information Kew* 1897: 298. 1897 and *Bulletin de l'Herbier Boissier, sér. 2, 1*: 770. 1901, *Bulletin of Miscellaneous Information Kew* 1934: 429. 1934.

in English: pointed russet grass

in Upper Volta: fegjirdi, gommessa hogo

L. gossweileri C.E. Hubb.

Tropical Africa. See *Bulletin of Miscellaneous Information Kew* 1934: 428. 1934.

L. grisea (K. Schum.) Pilg. (*Trichopteryx grisea* K. Schum.)

Tropical Africa. See *Die Pflanzenwelt Ost-Afrikas* C: 109. 1936, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 14: 94. 1938.

L. hordeiformis (Stapf) C.E. Hubbard (*Arundinella hordeiformis* (Stapf) Roberty; *Trichopteryx hordeiformis* Stapf)

Tropical Africa. Annual, inflorescence bottlebrush-like, fodder, browsed when young, useful for erosion control, stabilization of dunes, highly adapted to colonize shifting sand, widely planted to repair or stabilize dune areas, found in disturbed areas, sandy soil, shifting dunes, see *Bulletin of Miscellaneous Information Kew* 1897: 297. 1897 and *Bulletin of Miscellaneous Information Kew* 1934: 431. 1934, *Petite Flore de l'Ouest-Africain* 392. 1954, *Bulletin de l'Institut Française d'Afrique Noire* 17: 56. 1955.

in Gambia: kereng fenio, kereng fenjo, kereng penio

in Niger: butal-idjiré, fono dibba, fulafula, kokorga-lani, taelaewlaew, tchitchyia

in Nigeria: bindin kureegéé, bundin kureegéé, cammeya, gwodnu susi, tsiigàà, tsiikàà, wutsiyar gwankii, wutsiyar kureegéé, wutsiyar zoomoo

in Senegal: las a tat, lasatat

in Upper Volta: plumga

L. jaegeriana A. Camus (named for the French botanist Paul Jaeger, b. 1905, traveler, professor of Botany, Faculty of Pharmacy, Strasburg, botanical collector, author of "Espèces végétales de l'étage altitudinal des monts Loma (Sierra Leone)." *Bulletin de l'IFAN* 27A: 34-120. 1965 and "Le recensement des plantes vasculaires et les originalités du peuplement végétal des monts Loma en Sierra Leone (Afrique Occidentale)." *Bothalia* 14: 539-542. 1983; see

J.H. Barnhart (1871-1949), *Biographical notes upon botanists*. Boston 1965; F.N. Hepper & Fiona Neate, *Plant Collectors in West Africa*. 41. 1971; F. Nigel Hepper, "Botanical collectors in West Africa, except French territories, since 1860." in *Comptes Rendus de l'Association pour l'étude taxonomique de la flore d'Afrique*, (A.E.T.F.A.T.). 69-75. Lisbon 1962; P. Jaeger and M. Lamotte, "Les richesses floristiques et faunistiques des monts Loma (Sierra Leone)." *Bulletin de l'IFAN* 28A: 1149-1190. 1966; P. Jaeger, N. Halle and J.G. Adam, "Contribution à l'étude des Orchidées des Monts Loma (Sierra Leone)." *Adansonia* 8: 265-310. 1968; P. Jaeger and J.G. Adam, "Les forêts de l'étage culminant du Nimba Libérien." *Adansonia* 15: 177-188. 1975)

Tropical Africa, Sierra Leone. See *Journal d'Agriculture Tropicale et de Botanique Appliquée* 1(5-6): 212, f. 1-8. 1954.

L. kagerensis (K. Schum.) C.E. Hubbard ex Hutch. (*Trichopteryx kagerensis* K. Schum.; *Trichopteryx kapiriensis* De Wild; *Trichopteryx reflexa* Pilg.; *Trichopteryx simplex* var. *crinata* Rendle; *Trichopteryx spiranthera* K. Schum.; *Tristachya kagerensis* (K. Schum.) A. Chev.)

Tanzania. Perennial, tufted, wiry, slender, glaucous, erect or ascending, basal leaf sheaths silky, leaf blades linear, panicle elliptic-oblong with ascending branches, spikelets setose, upper lemma emarginate, 2 stamens, grazed by cattle, fodder, used for thatching, growing in open grassland, poor soil, rocky hillsides, shallow soil, floodplains, closely related to *Loudetia simplex*, see *Die Pflanzenwelt Ost-Afrikas* C: 109. 1895, *Catalogue of the African Plants Collected by Dr. F. Welwitsch in 1853-61* 2(1): 214. 1899 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 33: 52. 1902, *Annales de la Société Scientifique de Bruxelles* 39: 155. 1920, *Revue internationale de botanique appliquée et d'agriculture tropicale* 14: 23. 1934, *Flora of West Tropical Africa* 2: 544. 1936, *Fl. Trop. Afr.* 10: 28. 1937.

L. lanata (Stent & Rattray) C.E. Hubb. (*Trichopteryx lanata* Stent & Rattray)

Zimbabwe, Angola, Zambia, South Africa. Perennial, caespitose, velvety to woolly, leaf sheaths velvety, leaves hard and thick, open panicle, glumes obtuse, usually in sandveld, edge of vleis, see *Proceedings of the Rhodesia Scientific Association* 32: 39. 1933, *Bulletin of Miscellaneous Information Kew* 1934: 429. 1934.

in English: woolly russet grass

L. migiurtina (Chiov.) C.E. Hubb. (*Trichopteryx migiurtina* Chiov.)

Ethiopia, Somalia. Perennial, tufted, panicle loosely contracted and lanceolate, very slender and flexuous awn, see *Plantae Novae vel Minus Notae e regione Aethiopica* 30. 1928 [1911-1951, also *Plantae Novae vel Minus Notae ex Aethiopia*, series published in different journals], *Kew Bulletin* 1934: 429. 1934.

L. pedicellata (Stent) Chippind. (*Tristachya pedicellata* Stent).

South Africa. Perennial, tufted, ligule fringed, spikelets in triads, lower glume ovate, lower lemma 7-nerved, pasture, thatching grass, see *Bothalia* 1: 178. 1923, *The Grasses and Pastures of South Africa* 280. 1955.

L. pennata (Chiov.) C.E. Hubb. (*Trichopteryx pennata* Chiov.)

Ethiopia, Somalia. Perennial, tufted, densely setose, panicle branches hirsute, very slender and flexuous awn, in sandy places, see *Annuario del Reale Istituto Botanico di Roma* 7: 69, t. 6. 1897 and *Nuovo Giornale Botanico Italiano*, n.s., 26: 79. 1919, *Plantae Novae vel Minus Notae e regione Aethiopica* 30. 1928 [1911-1951, also *Plantae Novae vel Minus Notae ex Aethiopia*, series published in different journals], *Kew Bulletin* 1934: 428-429. 1934 [also *Bulletin of Miscellaneous Information Kew* 1934: 428. 1934], *Atti della reale accademia d'Italia. Memorie della classe di scienze fisiche, matematiche e naturali* 11(2): 64. 1940.

L. phragmitoides Hochst.

Tropical Africa, Gabon, Malawi. Robust, tall, loose inflorescence paniculate plume-like, along roadsides.

L. phragmitoides (Peter) C.E. Hubbard (*Arundinella flammida* Trin.; *Loudetia flammida* (Trin.) C.E. Hubb.; *Trichopteryx phragmitoides* Peter)

Tropical Africa. Perennial, canelike, densely tufted, tall, tussock, stout, pithy, robust, hollow, leaf sheaths and ligules pubescent, feathery and soft inflorescence, spikelets loosely paired, lower glume lanceolate, lower lemma glabrous, upper lemma hirsute, awn not deciduous with a short column, ornamental, found in marshy places, swamps, moist bottomlands, open savannah, wet savannah, see *Species Graminum* 1828-1836 and *Repertorium Specierum Novarum Regni Vegetabilis, Beihefte* 40(1): Anhang 96. 1930, *Bulletin of Miscellaneous Information Kew* 1934: 428. 1934, *Bulletin of Miscellaneous Information Kew* 1936: 321. 1936, J. Okot-Okumu, "Primary production and decomposition of *Loudetia phragmitoides* (A. Peter) in the littoral wetland of a small satellite lake (L. Nabugabo, Uganda)." *African Journal of Ecology* 42(s1): 108-113. Aug 2004.

in English: erapo grass

in Guinea-Bissau: balabaque, sulunhantamo

in Nigeria: erapo, tsintsiyar maza

L. ramosa (Stapf) C.E. Hubb. (*Danthoniopsis ramosa* (Stapf) Clayton; *Pleioneura ramosa* (Stapf) J.B. Phipps; *Rattraya ramosa* (Stapf) Butzin; *Trichopteryx ramosa* Stapf)

Africa. See *Bulletin of Miscellaneous Information Kew* 1897: 298. 1897 and *Bulletin of Miscellaneous Information Kew* 1936(5): 321, 324. 1936, *Kew Bulletin* 21(1): 123. 1967, *Kew Bulletin* 26(1): 111-123. 1971, *Boletim da*

Sociedade Broteriana, ser. 2 46: 419. 1972[1973], *Taxon* 27(2-3): 301. 1978.

L. simplex (Nees) C.E. Hubb. (*Arundinella simplex* (Nees) Roberty; *Loudetia elegans* Hochst.; *Trichopteryx elegans* Hack.; *Trichopteryx elegans* var. *subulifolia* Franch.; *Trichopteryx gracilis* Peter; *Trichopteryx incompta* Franch.; *Trichopteryx nigritiana* Stapf; *Trichopteryx simplex* Rendle; *Trichopteryx simplex* var. *gracilis* Rendle; *Tristachya simplex* (Nees))

Tropical Africa, South Africa, Kalahari. Perennial, very variable, compact, unbranched, tufted to loosely tufted to densely tufted, nodes with ring of hairs, leaf blade variable, lowest leaf sheaths densely hairy at the base and splitting into fibers, ligule an inconspicuous ring of short hairs, leaves hairy or glabrous, a contracted or open and loose panicle with whorled branches, spikelets solitary or in pairs, glabrous awn, glumes unequal and truncate, lower glume obtuse, upper lemma bifid, 2 stamens, weed species, thatching grass, low palatability or unpalatable when mature and dry, grazed when young, useful for erosion control, not very tolerant of drought, common on red clay soil, edges of vleis, deciduous bushland, on seasonally flooded grasslands, stony slopes, red earth, open grassland, sands plain, poor veld, hillsides and rocky hillsides, poor shallow sandy soils, wet sands, in shade of trees, poorly drained sandy soils, on riverine plains, see *Florae Africae Australioris Illustrationes Monographicae* 269. 1841, *Flora* 1841: 713. 1841, *Bulletin de la Société d'Histoire Naturelle d'Autun* 8: 373. 1895, *Bulletin of Miscellaneous Information Kew* 1897: 297. 1897, *Catalogue of the African Plants Collected by Dr. F. Welwitsch in 1853-61* 2(1): 214. 1899 and Alfred Barton Rendle (1865-1938) et al., "Catalogue of the Plants collected by Mr. and Mrs. P.A. Talbot in the Oban District of South Nigeria." *British Museum Trustees, Natural History*. London 1913, *Repertorium Specierum Novarum Regni Vegetabilis, Beihefte* 40: 95. 1930, *Bulletin of Miscellaneous Information Kew* 1934: 431. 1934, *Petite Flore de l'Ouest-Africain* 392. 1954, *Bulletin de l'Institut Française d'Afrique Noire* 17: 56. 1955, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 77(2-3): 260. 1957.

in English: russet grass, common russet grass, besem grass

in Angola: lukomba

in Nigeria: burde, kalde, sufuwel, tsintsiyar duutsee, yawrondu

in Senegal: paldinagh

in southern Africa: besemgras, stingelgras; tshula (Venda)

in Tanzania: luyange

in Upper Volta: domsawo, domshao, pisiirdi, pisiirgol, pitiirdi

L. stipoides (Hack.) Conert (*Arundinella stipoides* Hack.; *Trichopteryx stipoides* (Hack.) Hackel ex Elliott)

Tropical Africa, Madagascar. See *Sitzungsberichte der kaiserlichen Akademie der Wissenschaften. Wien. Mathematisch-naturwissenschaftlichen Classe. Abteilung I* 89: 123. 1884, *Journal of the Linnean Society, Botany* 29: 65. 1891 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 77(2-3): 256. 1957.

L. togoensis (Pilg.) C.E. Hubbard (*Arundinella togoensis* (Pilg.) Roberty; *Trichopteryx crinita* Stapf; *Trichopteryx figarii* Chiov.; *Trichopteryx togoensis* Pilg.)

Tropical Africa, Togo. Annual, tufted, spikelets in triplets, lower lemma 5-nerved, palea lacking, low grazing value, browsed when young, used to make brooms and hats, found in wooded savannah, sandy loam, around seasonal ponds, dry places, shallow soil, see *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 34(1): 128. 1904, *Journal de Botanique (Morot)* 19: 106. 1905, *Bollettino della Società Botanica Italiana* 1917: 69. 1917, *Bulletin of Miscellaneous Information Kew* 1934: 431. 1934, *Petite Flore de l'Ouest-Africain* 392. 1954, *Bulletin de l'Institut Française d'Afrique Noire* 17: 56. 1955.

in Arabic: kaya, nyamaya

in Mali: firala nkasan, gombi sogo, ngasan seladé, nkasan, selberé

in Niger: binya nabitji, fôno sunfey, kokorga-bundi, milmlilo'n dutshi, taelaewlaew

in Nigeria: kaya, kela tselim, nyamaya, tsintsiyaa, tsintsiyaa

in Senegal: firgala ukasa, firghala ukasa

in Togo: sangombe

in Upper Volta: balanplè, celbi, kiu guma, samsogo, selbo, sutu, zaié

L. vanderystii (De Wild.) C.E. Hubb. (*Trichopteryx anthoxanthoides* Stapf ex Vand.; *Trichopteryx ganaense* Vanderyst; *Trichopteryx vanderystii* De Wild.; *Tristachya anthoxanthoides* Stapf ex Vanderyst)

Tropical Africa. See *Annales de la Société Scientifique de Bruxelles* 29: 160. 1920, *Bulletin agricole du Congo Belge* 11: 113. 1920, *Bulletin of Miscellaneous Information Kew* 1934: 428. 1934.

Loudetiopsis Conert = *Diandrostachya* (C.E. Hubb.) Jacq.-Fél., *Dilophotriche* (C.E. Hubb.) Jacq.-Fél.

Resembling *Loudetia*.

About 10-11/13 species, tropical West Africa, South America. Panicoideae, Panicodae, Arundinelleae, perennial or rarely annual, herbaceous or with woody reedlike culms, large, unarmed, erect, unbranched, ligule fringed, plants bisexual, open or contracted inflorescence paniculate, spikelets in triplets, peduncle often hooked, 2 glumes very

unequal, lower glume 3-5-nerved, upper glume 3-nerved, lower lemma 3-nerved, upper lemma 2-dentate glabrous to pubescent, female-fertile lemma longer than the lower glume, palea 2-nerved 2-keeled, 2 free and fleshy lodicules, 2 stamens, ovary glabrous, 2 red stigmas, suitable for thatching, open areas, savannah, woodland, damp or swampy areas, rocky places, bare ground, related to *Loudetia*, type *Loudetiopsis ambiens* (K. Schum.) Conert, see *Flora Brasiliensis seu Enumeratio Plantarum* 2: 458, 460. 1829 and *Bulletin of Miscellaneous Information Kew* 1934: 431. 1934, *Bulletin of Miscellaneous Information Kew* 1936(5): 320, 321, 322. 1936, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 77(2-3): 226-354, f. 18. 1957, *Journal d'Agriculture Tropicale et de Botanique Appliquée* 7: 407-408. 1960, *Kirkia* 5: 235-258. 1966, *Kew Bulletin* 21(1): 119-124. 1967, *Kew Bulletin* 26(1): 111-123. 1971, *Contributions from the United States National Herbarium* 46: 177, 285. 2003.

Species

L. ambiens (K. Schum.) Conert (*Loudetia ambiens* (K. Schum.) C.E. Hubb.; *Trichopteryx ambiens* K. Schum.)

Africa. See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 24(3): 335. 1897 and *Bulletin of Miscellaneous Information Kew* 1934: 431. 1934, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 77(2-3): 281. 1957.

L. baldwinii (C.E. Hubb.) J.B. Phipps (*Loudetia baldwinii* C.E. Hubb.) (dedicated to John Thomas Baldwin, Jr., 1910-1974, botanical collector in Guinea, Liberia, Mexico, Amazonas, Venezuela, Brazil, collected plant specimens for the United States National Herbarium)

Tropical Africa, Liberia. Lower lemma 5- to 7-nerved, 3 stamens, see *Kew Bulletin* 1949: 356. 1949, *Kirkia* 5(2): 249. 1966.

L. capillipes (C.E. Hubb.) Conert (*Loudetia capillipes* C.E. Hubb.)

Tropical Africa. See *Bulletin of Miscellaneous Information Kew* 1934: 432. 1934, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 77(2-3): 284. 1957.

L. chevalieri (Stapf) Conert (*Diandrostachya chevalieri* (Stapf) Jacq.-Fél.; *Tristachya chevalieri* Stapf)

Tropical Africa. See *Bulletin de la Société Botanique de France* 8: 219. 1912, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 77(2-3): 290. 1957, *Journal d'Agriculture Tropicale et de Botanique Appliquée* 7: 408. 1960.

L. chrysothrix (Nees) Conert (*Diandrostachya chrysothrix* (Nees) Jacq.-Fél.; *Tristachya chrysothrix* Nees; *Tristachya chrysothrix* f. *chrysothrix*; *Tristachya chrysothrix* f. *pallida* Hack.)

South America, Africa. Perennial, tufted, tussocky, leaf blades filiform or linear, inflorescence terminal and unbranched, peduncle with subapical hook, lower glume narrowly ovate, upper glume lanceolate, 2 stamens, rocky places, see *Flora Brasiliensis seu Enumeratio Plantarum* 2: 460. 1829 and *Bulletin de l'Herbier Boissier, sér. 2, 4(3)*: 278. 1904, *Journal d'Agriculture Tropicale et de Botanique Appliquée* 7: 408. 1906, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 77(2-3): 285. 1957.

in Bolivia: pasto

L. falcipes (C.E. Hubb.) J.B. Phipps (*Loudetia falcipes* C.E. Hubb.)

Tropical Africa. Lower lemma 5- to 7-nerved, 3 stamens, see *Kew Bulletin* 1957: 61. 1957, *Kirkia* 5(2): 249. 1966.

L. fulva (C.E. Hubb.) Conert (*Diandrostachya fulva* (C.E. Hubb.) Jacq.-Fél.; *Tristachya fulva* C.E. Hubb.)

Tropical Africa. See *Bulletin of Miscellaneous Information Kew* 1934: 434. 1934, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 77(2-3): 287. 1957, *Journal d'Agriculture Tropicale et de Botanique Appliquée* 7: 408. 1960.

L. glabrata (K. Schum.) Conert (*Loudetia glabrata* (K. Schum.) C.E. Hubb.; *Trichopteryx glabrata* K. Schum.)

Tropical Africa. See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 24: 336. 1897 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 77(2-3): 287. 1957.

L. glabrinodis (C.E. Hubb.) Conert (*Diandrostachya glabrinodis* (C.E. Hubb.) J.B. Phipps; *Tristachya glabrinodis* C.E. Hubb.)

Tropical Africa. See *Kew Bulletin* 1949: 358. 1949, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 77(2-3): 288. 1957, *Boletim da Sociedade Broteriana, ser. 2* 41: 202. 1967.

L. kerstingii (Pilg.) Conert (*Trichopteryx kerstingii* Pilg.; *Tristachya kerstingii* (Pilg.) C.E. Hubb.) (dedicated to the German traveler Otto Kersting, b. 1863 (Riga), explorer, plant collector in West Africa, 1897-1909 Togo Rep. (formerly French Togoland). See F. Nigel Hepper, "Botanical collectors in West Africa, except French territories, since 1860." in *Comptes Rendus de l'Association pour l'étude taxonomique de la flore d'Afrique*, (A.E.T.F.A.T.). 69-75. Lisbon 1962; J.H. Barnhart, *Biographical notes upon botanists*. Boston 1965; Ignatz Urban, *Geschichte des Königlichen Botanischen Museums zu Berlin-Dahlem (1815-1913). Nebst Aufzählung seiner Sammlungen*. Dresden 1916; Anthonius Josephus Maria Leeuwenberg, "Isotypes of which holotypes were destroyed in Berlin." *Webbia*. 19: 861-863. 1965; F.N. Hepper & F. Neate, *Plant Collectors in West Africa*. 44. 1971)

Africa. See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 34(1): 128. 1934, *Bulletin of Miscellaneous Information Kew* 1934: 435. 1934, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 77(2-3): 289. 1957.

L. occidentalis (Jacq.-Fél.) Clayton (*Dilophotriche occidentalis* Jacq.-Fél.)

Tropical Africa. See *Journal d'Agriculture Tropicale et de Botanique Appliquée* 7: 408. 1960, *Kew Bulletin* 21(1): 123. 1967.

L. pobeguini (Jacq.-Fél.) W.D. Clayton (*Dilophotriche pobeguini* Jacq.-Fél.)

Tropical Africa. Annual, tufted, growing in moist places, see *Journal d'Agriculture Tropicale et de Botanique Appliquée* 7: 408. 1960, *Kew Bulletin* 21(1): 123. 1967, *Kew Bulletin* 26(1): 111-123. 1971.

in Guinea-Bissau: udubunoro

L. purpurea (C.E. Hubb.) Conert (*Danthoniopsis purpurea* (C.E. Hubb.) Jacq.-Fél.; *Tristachya purpurea* C.E. Hubb.)

Tropical Africa. See *Bulletin of Miscellaneous Information Kew* 1935(5): 308. 1935, *Revue internationale de botanique appliquée et d'agriculture tropicale* 30: 424. 1950, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 77(2-3): 292. 1957.

L. scaettae (A. Camus) Clayton (*Diandrostachya scaettae* (A. Camus) J.B. Phipps; *Tristachya scaettae* A. Camus)

Tropical Africa. See *Bulletin de la Société Botanique de France* 85: 556. 1939, *Kew Bulletin* 21(1): 123. 1967, *Boletim da Sociedade Broteriana, ser. 2* 41: 202. 1967.

L. ternata (Stapf) Conert (*Loudebia ternata* (Stapf) C.E. Hubb.; *Trichopteryx ternata* Stapf)

Tropical Africa. See *Journal de Botanique (Morot)* 19: 106. 1905, *Bulletin of Miscellaneous Information Kew* 1934: 431. 1934, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 77(2-3): 282. 1957, *Journal d'Agriculture Tropicale et de Botanique Appliquée* 7: 408. 1960.

L. thoroldii (C.E. Hubb.) J.B. Phipps (*Loudebia thoroldii* C.E. Hubb.)

Tropical Africa. See *Kew Bulletin* 1957: 62. 1957, *Kirkia* 5(2): 249. 1966.

L. trigemia (C.E. Hubb.) Conert (*Loudebia trigemia* C.E. Hubb.)

Tropical Africa. Lower lemma 5- to 7-nerved, 3 stamens, see *Bulletin of Miscellaneous Information Kew* 1934: 432. 1934, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 77(2-3): 283. 1957.

L. tristachyoides (Trin.) Conert (*Arundinella tristachyoides* (Trin.) Roberty; *Danthoniopsis tristachyoides* (Trin.) Jacq.-Fél.; *Danthoniopsis tuberculata* (Stapf) Jacq.-Fél.; *Dilophotriche tristachyoides* (Trin.) Jacq.-Fél.; *Panicum*

tristachyoides Trin.; *Tristachya microstachya* Nees ex Steud.; *Tristachya tristachyoides* (Trin.) C.E. Hubb.; *Tristachya tuberculata* Stapf)

Tropical Africa. Perennial, tufted, low grazing value, see *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 4,2(1): 106. 1836, *Synopsis Plantarum Glumacearum* 1: 238. 1854, *Bulletin of Miscellaneous Information Kew* 1897: 294. 1897 and *Contr. U.S. Natl. Herb.* 24 (8): 423. 1927, *Bull. Misc. Inform. Kew* 1935: 309. 1935, *Revue internationale de botanique appliquée et d'agriculture tropicale* 30: 423, 424. 1950, *Petite Flore de l'Ouest-Africain* 392. 1954, *Bulletin de l'Institut Française d'Afrique Noire* 17: 56. 1955, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 77(2-3): 291. 1957, *Journal d'Agriculture Tropicale et de Botanique Appliquée* 7: 408. 1960.

in Guinea: alafasyen, wodion

in Guinea-Bissau: udu-bunoro, udubunoro

in Sierra Leone: fainyinyogi, foni, keep, kulebinyi

L. villosipes (C.E. Hubb.) Conert (*Loudebia villosipes* C.E. Hubb.)

Tropical Africa. See *Kew Bulletin* 1949: 355. 1949, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 77(2-3): 283. 1957.

Louiella C.E. Hubb. & J. Léonard

One species, tropical Africa, Sudan. Panicoideae, Panicodae, Paniceae, perennial, aquatic, floating or decumbent, erect or decumbent, herbaceous, branched, rhizomatous, culm internodes spongy, auricles absent, ligule a very short fringed membrane, plants bisexual, inflorescence racemose, open panicle, spikelets pedicellate paired or appressed, 2 glumes very unequal, short lower glume nerveless and truncate, upper glume 5- to 7-nerved and long acuminate, lower lemma caudate-acuminate, palea 2-nerved, 2 free and fleshy lodicules, stamens 3, ovary glabrous, 2 stigmas, found in seasonal ponds, bogs and muds, along floodplains, stagnant mires type *Louiella fluitans* C.E. Hubb. & J. Léonard, see *Bulletin du Jardin Botanique de l'État* 22: 316-317. 1952.

Species

L. fluitans C.E. Hubb. & J. Léonard

Central African Republic, Zaire. Perennial, palea keel-less, forming dense and huge floating mats.

Loxodera Launert = Lepargochloa Launert, Plagiarthron Duv.

From the Greek *loxos* "oblique, twisted, crooked."

About three-five species, Angola, tropical southern Africa. Panicoideae, Andropogonodae, Andropogoneae, Rottboelliinae, perennial, herbaceous, simple, tufted, auricles absent, ligule membrane-like, plants bisexual, inflorescence a single terminal stout raceme, spikelets paired, pedicellate spikelets awnless and sometimes much reduced, lower floret male, callus bearded, 2 glumes subequal, lower glume 7-9-nerved, upper glume 3-nerved, palea awnless 2-nerved, 2 fleshy lodicules, 3 stamens, ovary glabrous, 2 stigmas, savannah, sandy riverbeds, damp areas, riverbanks, drainage ditches, related to *Urelytrum*, type *Loxodera rigidiuscula* Launert, see *Bulletin de la Société Botanique de Belgique* 90: 187. 1958, *Boletim da Sociedade Broteriana, ser. 2* 37: 80-83. 1963, *Senckenbergiana Biologica* 46: 121-122. 1965, *Boletim da Sociedade Broteriana, ser. 2* 41: 58, t. 1. 1967, *Kew Bulletin* 23: 295. 1969, *Kirkia* 8: 8. 1971, *Kew Bulletin* 32: 580, 767-771. 1978.

Species

L. bovonei (Chiov.) Launert (*Loxodera rigidiuscula* Launert; *Rhytachne bovonei* (Chiov.) Chiov.; *Rhytachne pilosa* Ballard & C.E. Hubb.; *Rottboellia bovonei* Chiov.)

Africa. See *Annali di Botanica* 13: 36. 1914, *Nuovo Giornale Botanico Italiano, new series* 26: 73. 1919, *Bulletin of Miscellaneous Information Kew* 1934: 108. 1934, *Boletim da Sociedade Broteriana, ser. 2* 37: 81. 1963, *Senckenbergiana Biologica* 46(2): 122. 1965.

L. caespitosa (C.E. Hubb.) Clayton (*Loxodera caespitosa* (C.E. Hubb.) Simon; *Phacelurus caespitosus* C.E. Hubb.)

Tropical Africa, Tanzania. Tufted, herbaceous, see *Bulletin of Miscellaneous Information Kew* 1928(1): 35-36. 1928, *Kirkia* 8: 8. 1971, *Kew Bulletin* 32(3): 580. 1978.

L. epectinata (Napper) Launert (*Lasiurus epectinatus* Napper)

Africa. See *Boletim da Sociedade Broteriana, ser. 2* 37: 82. 1963, *Kirkia* 3: 121. 1963.

L. ledermannii (Pilg.) Clayton ex Launert (*Elionurus ledermannii* Pilg.; *Lasiurus maitlandii* Stapf & C.E. Hubb.; *Loxodera ledermannii* (Pilg.) Clayton, nom. illeg., non *Loxodera ledermannii* (Pilg.) Clayton ex Launert; *Rottboellia maitlandii* (Stapf & C.E. Hubb.) Pilg.) (after the Swiss horticulturist Carl Ludwig Ledermann, 1875-1958, traveler, explorer, collected in West Cameroon (Kamerun, Cameroun), wrote "Eine botanische Wanderung nach Deutsch-Adamaua." *Mitteil. Deutsch. Schutzge.* 25: 20-55. 1912; see F.N. Hepper and F. Neate, *Plant Collectors in West Africa*. 48-49. 1971; René Letouzey, "Les botanistes au Cameroun." in *Flore du Cameroun*. 7: 1-110. Paris 1968; Frank Nigel Hepper, "Botanical collectors in West Africa, except French territories, since 1860." in *Comptes Rendus de l'Association pour l'étude taxonomique de la flore d'Afrique*, (A.E.T.F.A.T.). 69-75. Lisbon 1962; F.N. Hepper, "C. Ledermann's botanical collecting localities in Kamerun

(Cameroun) 1908-1909." *Kew Bulletin*. 29(2): 365-381. 1974)

Africa. See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 45: 207. 1910, *Bulletin of Miscellaneous Information Kew* 1927: 264. 1927, *Die natürlichen Pflanzenfamilien, Zweite Auflage* 14e: 139. 1940, *Senckenbergiana Biologica* 46(2): 121. 1965, *Kew Bulletin* 20: 258. 1966.

L. strigosa (Gledhill) Clayton (*Urelytrum strigosum* Gledhill)

Guinea, Sierra Leone. Pedicelled spikelet shortly awned, savannah, slopes, see R. Schnell, "Végétation et flore de la région montagneuse du Nimba." *Mém. l'IFAN* 22: 1-604. 1952, *Boletim da Sociedade Broteriana, ser. 2* 41: 58, t. 1. 1967, N.H.A. Cole, *The Vegetation of Sierra Leone*. Njala University College Press. 1968, *Kew Bulletin* 23: 295. 1969, J.K. Morton, "Phytogeography of the West African mountains." in D.H. Valentine, editor. *Taxonomy, Phytogeography and Evolution*. 221-236. Academic Press, London, United Kingdom. 1972, J.K. Morton, "Montane Vegetation." in *Plant Ecology in West Africa*, G.W. Lawson (editor), 247-271. John Wiley and Sons Ltd., United Kingdom. 1986.

Loydia Delile = *Lloydia* Reichenb.

(Liliaceae), *Lloydia* Salisb. ex Reichenb.

(Liliaceae), *Lloydia* Delile, *Pennisetum* Rich.

For the Welsh (b. Cardiganshire, Wales) antiquary Edward Lloyd (Lluyd, Llhwyd, Lhuyd, Lhwyd, Llwyd) (Eduardus Luidius), 1660-1709 (d. Oxford), botanist, philologist, geologist, traveler, pioneer of modern researches into the Celtic languages, 1682 admitted into Jesus college at Oxford, studied natural history under Robert Plot (1640-1696), assistant to Martin Lister, 1690-1709 Keeper of the Ashmolean Museum (first Keeper was Robert Plot, in 1683), 1708 Fellow of the Royal Society, among his writings are *Archaeologia Britannica*. Oxford 1707, *E. Luidii ... de fluviorum, montium, urbium*, etc., in *Britannia nominibus adversaria posthuma*. 1719 and *E. Luidii ... Lithophylacii Britannici ichnographia*. Londini 1699, he made numerous contributions to the *Philosophical Transactions of the Royal Society*. See R.W.T. Gunther, comp. and edit., *Life and Letters of Edward Lhwyd*. Oxford 1945; Johann Heinrich Linck, *De stellis marinis liber singularis ... Accedunt E. Luidii, de Reaumur, et D. Kade hujus argumenti opuscula*. Lipsiae 1733; Robert Morison, *Plantarum historiae universalis oxoniensis*. Oxford 1699; R. Pulteney, *Historical and Biographical Sketches of the Progress of Botany in England*. 2: 110-116. London 1790; [John Ray], *The Correspondence of J. Ray*. Edited by E. Lankester. 482-484. London 1848; J.M. Edmonds, *D.S.B.* (or *Dictionary of Scientific Biography*. Editor in Chief Charles Coulston Gillispie.) 8: 307-308. New York 1981; Ray Desmond, *Dictionary of British*

& *Irish Botanists and Horticulturists*. 428. London 1994; H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 199. Oxford 1964; Dawson Turner, *Extracts from the Literary and Scientific Correspondence of R. Richardson, of Bierly, Yorkshire: Illustrative of the State and Progress of Botany* [Edited by D. Turner. - Extracted from the memoir of the Richardson family, by Mrs. D. Richardson] Yarmouth 1835; James Britten, *The Sloane Herbarium ... revised and edited by J.E. Dandy*. London 1958; M. Hadfield et al., *British Gardeners: A Biographical Dictionary*. London 1980.

Panicoideae, Paniceae, Cenchrinae, type *Loydia peregrina* Delile, see *Syn. Pl.* 1: 72. 1805, *Flora Germanica Excursionaria* 102. 1830, *Ind. Sem. Horti. Monsp.* [3]. 1844 and *Contr. U.S. Natl. Herb.* 22: 210. 1921, *Bot. Zhurn.* 74: 1059-1061. 1989, *Flora Mesoamericana* 6: 371-374. 1994, *Flora of Ethiopia and Eritrea* 7: 259-275. 1995, *Contributions from the United States National Herbarium* 46: 527-536. 2003.

Loxostachys Peter = *Cyrtococcum* Stapf,
Pseudechinolaena Stapf

From the Greek *loxos* "oblique, twisted, crooked" and *stachys* "a spike." Panicoideae, Paniceae, Panicinae, see *Agrostografia Brasiliensis* 41. 1823, *Fl. Brit. India* 7: 28, 58. 1896 and *Flora of Tropical Africa* 9: 15, 494-495, 746. 1917-1919, *Repertorium Specierum Novarum Regni Vegetabilis, Beih.* 40(1): 203-204, Anh. 55. 1930, *Fieldiana, Botany* 24(2): 38-331. 1955, *Flora of Tropical East Africa* 451-898. 1982.

Lucaea Kunth = *Arthraxon* P. Beauv.,
Pleuroplitis Trin.

After the German botanist August Friedrich Theodor Lucaea, 1800-1848, pharmacist, botanical collector, editor of *Berlinisches Jahrbuch für die Pharmacie*, etc. Berlin 1818, etc.; see J.H. Barnhart, *Biographical notes upon botanists*. 3: 407. 1965.

Panicoideae, Andropogoneae, Andropogoninae, type *Lucaea gracilis* Kunth, see A.M.F.J. Palisot de Beauvois, *Essai d'une nouvelle Agrostographie*. 111, t. 11, f. 6. (Dec.) 1812, *Fundamenta Agrostographiae* 174-175, t. 16. 1820, *Révision des Graminées* 2: 489, t. 159. 1831, *Edinburgh New Philosophical Journal* 18: 181. 1835, *Tentamen Florae Abyssinicae ...* 2: 447. 1850, *Beiträge zur Flora der Cap Verdischen Inseln* 152. 1852, *Plantae Junghuhnianae* 3-4: 366, 467. 1854-1855, *Synopsis Plantarum Glumacearum* 1: 413-414. 1854 [1855], *Bulletin de l'Académie Impériale des Sciences de Saint Pétersbourg*, sér. 3, 10: 369, 375. 1866 and *Contributions from the United States National Herbarium* 46: 104-110, 285, 539-540. 2003.

Ludolfia Willd. = *Arundinaria* Michaux,
Bambusa Schreb., *Ludolfia* Adans. (Aizoaceae)

Presumably after the German botanist Michael Matthias Ludolff, 1705-1756, physician, professor in Berlin, author of *Dissertatio ... de vomitu*. Lugduni Batavorum 1721 and *Resp. Dissertatio de artuum amputatione rite administranda*. Praes. S.P. Hilschero. Jenae [1718].

Bambusoideae, Bambuseae, Arundinariinae, type *Ludolfia macrosperma* (Michx.) Willd., see *Familles des Plantes* 2: 244. 1763, *Flora Caroliniana, secundum ...* 81. 1788, *Flora Boreali-Americana* 1: 73-74. 1803, *Der Gesellschaft naturforschender Freunde zu Berlin Magazin für die neuesten Entdeckungen in der gesammten Naturkunde* 2: 320. Arrozia Kunth, *Caryochloa* Trin., *Hydrochloa*
P. Beauv., *Luciola* Sm. (Juncaceae), *Luzula*
DC. (Juncaceae)

From *Luzula* DC.

Species 11, tropical South America, Venezuela, southern Brazil, southern U.S. to Argentina. Ehrhartoideae, Oryzeae, Luziolinae or Bambusoideae, Oryzodae, Oryzeae, perennial or annual, herbaceous, unarmed, low growing, leafy, branched, stoloniferous, decumbent, ligule an unfringed membrane, plants monoecious, panicle unisexual, terete spikelets solitary and pedicellate, the staminate and pistillate spikelets in separate panicles or on the same inflorescence, male spikelet terminal, female spikelet axillary, all the fertile spikelets unisexual, female spikelet lemma awnless, male spikelet lemma membranous, male spikelet 1-floreted and 6-18 staminate, glumes absent, no stamens, ovary glabrous, 2 stigmas, swamps and lakes, in shallow

water, type *Luziola peruviana* Juss. ex J.F. Gmel., see *Genera Plantarum* 33. 1789, *Systema Naturae ... editio decima tertia, aucta, reformata* 2: 637. 1791, *Flore Française ... Species

L. bahiensis (Steud.) Hitchc. (*Caryochloa bahiensis* Steud.; *Luziola alabamensis* Chapm.; *Luziola bahiensis* var. *alabamensis* (Chapm.) Prod.; *Luziola bahiensis* var. *bahiensis*; *Luziola contracta* Hack.; *Luziola longivalvula* Döll; *Luziola pusilla* S. Moore; *Luziola striata* Balansa & Poit.)

Brazil, southern U.S. to Argentina. Perennial, aquatic, emergent, erect, slender, floating, caespitose, densely clumped, leaves basal, forming colonies, stoloniferous and rhizomatous, deeply-rooted, leaf blades stiffly erect or ascending, female panicle ovate, male inflorescence solitary terminal, moist places, small ponds, swamps, riverbanks and streamlets, shallow water, standing water, shade, savannah, wet soil, marsh, savannah marsh, see *Synopsis Plantarum Glumacearum* 1: 5. 1853 [1855], *Flora of the Southern United States* 584. 1860, *Flora Brasiliensis* 2(2): 17. 1871, *Bulletin de la Société d'Histoire Naturelle de Toulouse* 12: 231, t. 4, f. 2. 1878, *Transactions of the Linnean Society of London* 4: 507, t. 37, f. 1-8. 1895 and *Österreichische Botanische Zeitschrift* 52: 8. 1902, *Contributions from the U.S. National Herbarium* 12(6): 234. 1909, *Botanisches Archiv* 1: 242. 1922, *Grasses of Bahia* 46. 1984, *Sida* 15(4): 619-622. 1993.

L. brasiliensis Moric. (*Luziola doelliana* Prod.; *Luziola peruviana* Juss. ex J.F. Gmel.; *Luziola pittieri* Lucas) (after the German botanist Johann Christoph Döll, 1808-1885, librarian; see J.H. Barnhart, *Biographical notes upon botanists*. 1: 461. 1965; T.W. Bossert, compil., *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 104. Boston, Mass. 1972; Stafleu and Cowan, *Taxonomic literature*. 1: 665-666. Utrecht 1976)

Venezuela, Brazil. Perennial, erect, leaves basal, leaf blades sharply acute, male panicle terminal, female panicle axillary, female spikelets round, swampy areas, see *Systema Naturae ... editio decima tertia, aucta, reformata* 2: 637. 1791, *Nov. Gen. Sp.* 1: 199. 1816, *Syst. Veg.* 1: 250. 1825, *Plantes nouvelles d'Amérique*. 94, t. 60. Genève 1840 and *Kongliga Svenska Vetenskapsakademiens Handlingar* 34(6): 12, t. 8A. 1900, *Botanisches Archiv* 1: 240. 1922, *Journal of the Washington Academy of Sciences* 32(6): 159, f. 3. 1942, *Sida* 15(4): 619-622. 1993.

L. brasiliensis (Trin.) Pilg. (*Arrozia micrantha* Schrad. ex Kunth; *Caryochloa brasiliensis* Trin.; *Luziola brasiliensis* (Trin.) Swallen; *Luziola micrantha* (Schrad. ex Kunth) Benth.)

Brazil. See *De Graminibus Paniceis* 248. 1826, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 11. 1833, *Journal of the Linnean Society, Botany* 19(115, 116): 55. 1881 and *Die Natürlichen Pflanzenfamilien* (edition 2) 14d: 157. 1956, *Annals Missouri Botanical Garden* 52: 473. 1965.

L. caespitosa Swallen

Brazil. Perennial, caespitose, erect to ascending, leaves mostly basal, leaf sheaths compressed, leaf blades linear, panicles bisexual terminal, male spikelets oblong, female spikelets round, wet soil, swampy ground, see *Annals of the Missouri Botanical Garden* 52(3): 473. 1965.

L. divergens Swallen

Brazil. See *Annals of the Missouri Botanical Garden* 52(3): 475. 1965.

L. fluitans (Michx.) Terrell & H. Rob. (*Hydrochloa carolinensis* P. Beauv.; *Hydrochloa caroliniensis* var. *caroliniensis*; *Hydrochloa fluitans* (Michx.) Torr., nom. illeg., non *Hydrochloa fluitans* (L.) Hartm.; *Hydropyrum fluitans* (Michx.) Kunth; *Luziola caroliniana* Trin. ex Steud.; *Luziola caroliniensis* (P. Beauv.) Raspail; *Zizania fluitans* Michx.)

U.S., Mexico, Guatemala. Aquatic, emergent, floating, forming large colonies, marshes, streams, lakes, see *Flora Boreali-Americana* 1: 75. 1803, *Essai d'une nouvelle Agrostographie* 135, 165, 182. 1812, *Annales des Sciences Naturelles (Paris)* 5: 304. 1825, *Compendium of the Flora of the Northern and Middle States* 354, 403. L. fluitans (Michx.) Terrell & H. Rob. var. *fluitans* (*Festuca capillaris* Lilj.; *Hydrochloa capillaris* (Lilj.) Hartm.)

U.S., Mexico. See *Utkast til en Svensk Flora* 48. 1798, *Genera Graminum* 8. 1819 and *Bulletin of the Torrey Botanical Club* 101(5): 244. 1974.

L. fluitans (Michx.) Terrell & H. Rob. var. *oconnorii* (R. Guzmán) G.C. Tucker (*Hydrochloa caroliniensis* var. *oconnori* R. Guzmán)

Mexico. See *Essai d'une Nouvelle Agrostographie* 135, 165, 182, pl. 3. f. 18, pl. 24, f. 4. 1812 and *Bulletin of the Torrey Botanical Club* 101(5): 244. 1974, *Phytologia* 48(1): 77, 79. 1981, *Journal of the Arnold Arboretum* 69(3): 272. 1988.

L. fragilis Swallen

Venezuela, Bolivia, southern Brazil. Decumbent, aquatic, submerged and emergent, floating, rooted at the nodes, leaf blades linear acute, female panicle reduced, male and female spikelets in separate panicles on the same plant, forming colonies, shallow water, lakes and streams, drainage ditches, see *Annals of the Missouri Botanical Garden* 52(3): 474. 1965, *Brittonia* 23(3): 293-324. 1971.

L. gracillima Prod.

Mexico, Paraguay, Argentina. Perennial, emergent, male flowers terminal, shallow water, pools, see *Botanisches Archiv* 1: 241. 1922.

L. peruviana Juss. ex J.F. Gmelin (*Luziola bahiensis* (Steud.) Hitchc.; *Luziola brasiliana* Moric.; *Luziola doelliana* Prod.; *Luziola leiocarpa* Lindm.; *Luziola mexicana* Kunth; *Milium natans* Spreng.)

South America, the Caribbean, U.S. Perennial, herbaceous, decumbent, ascending, floating, aquatic, slender, rooting at the nodes, leaves basal, leaf blades linear acuminate, emergent, panicles unisexual, male panicle terminal sparsely branched, female panicle axillary, swampy areas, streams, moist forest, along the edge of pond, shallow water, ditches, standing water, see *Systema Naturae ... editio decima tertia, aucta, reformata* 2: 637. 1791, *Nova Genera et Species Plantarum* 1: 199. 1815 [1816], *Systema Vegetabilium, editio decima sexta* 1: 250. 1825, *Plantes nouvelles d'Amérique*. 94, t. 60. Genève 1840, *Synopsis Plantarum Glumacearum* 1: 5. 1855 [1853] and *Kongliga Svenska Vetenskapsakademiens Handlingar* 34(6): 12, t. 8A. 1900, *Contributions from the United States National Herbarium* 12(6): 234. 1909, *Botanisches Archiv* 1: 240. 1922, *Journal of the Washington Academy of Sciences* 32(6): 159, f. 3. 1942, *Flora de la Provincia de Buenos Aires* 4(2): 35, 85-101. 1970, *Sida* 15(4): 619-622. 1993.

L. spruceana Benth. ex Döll (*Luziola spiriformis* Andersson ex Balansa & Poit.; *Luziola subintegra* Swallen) (dedicated to the English (b. Ganthorpe, near Malton) botanist Richard Spruce, 1817-1893 (Yorkshire, Coneysthorpe, Castle Howard, near Malton), naturalist, traveler, cartographer, botanical explorer, plant collector, bryologist, from June 1849 to 1864 in South America (Venezuela, Brazil, Peru, Ecuador, Bolivia, on the Amazon and Andes), collected cinchona plants and seeds, his writings include "Palmae amazonicae." *J. Linn. Soc., Bot.* 11(50-51): 65-183. 1869 and *Hepaticae of the Amazon and of the Andes of Peru and*

Ecuador. London [1884-]1885; see R.G.C. Desmond, in *D.S.B.* 12: 594. 1981; Alfred Russell Wallace, editor, *Notes of a Botanist on the Amazon & Andes ... during the Years 1849-1864* by Richard Spruce. London 1908; Stafleu & Cowan, *Taxonomic literature*. 5: 816-820. 1985; J.H. Barnhart, *Biographical notes upon botanists*. 3: 312. 1965; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 379. 1972; G. Murray, *History of the collections contained in the Natural History Departments of the British Museum*. 1: 184. London 1904; E.M. Oxford 1992; Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 647-648. London 1994)

Paraguay, Venezuela, Suriname, Brazil, the Caribbean, Honduras. Perennial, aquatic, floating, spreading, emergent, stoloniferous, forming mat or colonies, lake, streams, ponds, shallow water, see *Flora Brasiliensis* 2(2): 18-19. 1871, *Bulletin de la Société d'Histoire Naturelle de Toulouse* 12: 232, t. 5. 1878 and *Annals of the Missouri Botanical Garden* 30(2): 165. 1943, *Cuscutlania* 1(6): 1-29. 1991, *Contributions from the United States National Herbarium* 39: 69-71. 2000.

L. subintegra Swallen (*Luziola spruceana* Benth. ex Döll)

South America, the Caribbean. Perennial, robust, herbaceous, aquatic, emergent, stoloniferous, spreading, creeping, floating, leaf blades linear attenuate scabrous acuminate, inflorescence pistillate axillary, forming dense floating mats, in coastal areas, ponds, ditches, canals, see *Flora Brasiliensis* 2(2): 18-19. 1871 and *Contributions from the United States National Herbarium* 22: 463. 1922, *Fl. Suriname* 1(1): 310. 1943, *Annals of the Missouri Botanical Garden* 30(2): 165. 1943, *Fl. Guy. Franç.* 1: 100. 1955, *Cuscutlania* 1(6): 1-29. 1991.

Lycochloa Samuelson = *Koordersiochloa* Merr., *Pseudostreptogyne* A. Camus, *Streblochaete* Hochst. ex Pilg.

From the Greek *lykos* "a wolf" and *chloe*, *chloa* "a grass."

One species, Lebanon, Syria. Pooideae, Poodae, Meliceae, perennial, rhizomatous, herbaceous, auricles absent, ligule

an unfringed membrane, connate sheath margins, plants bisexual, inflorescence racemose, lax single raceme, solitary spikelets shortly pedicelled and distant, 2 florets, rachilla tough, 2 glumes unequal, upper glume 5-nerved, distal florets clustered, lemmas coriaceous, awn dorsal, palea 2-nerved, 2 fleshy lodicules joined, rocky places, related to *Schizachne*, type *Lycochloa avenacea* Samuelsson, see *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 37: (Beibl. 85) 61. 1906, *Philipp. J. Sci., Bot.* 12: 67. 1917, *Bulletin de la Société Botanique de France* 77: 476. 1930, *Arkiv för Botanik utgivet av K. Svenska Vetenskapsakademien* 25(8): 4. 1933.

Species

L. avenacea Samuelsson

Syria. See *Arkiv för Botanik utgivet av K. Svenska Vetenskapsakademien* 25(8): 4. 1933.

Lycurus Kunth = *Muhlenbergia* Schreb.,
Pereilema J. Presl, *Pleopogon* Kunth

Greek *lykos* “a wolf” and *oura* “a tail,” an allusion to the inflorescence.

About three species, southwestern and southeastern U.S. to Argentina, Ecuador. Chloridoideae, Cynodonteae, Eragrostidae, Muhlenbergiinae, perennial, low, herbaceous, erect, caespitose, internodes solid, auricles absent, sheaths ciliate, ligule membranous, leaves narrow and not pungent, plants bisexual, inflorescence a narrow spiciform panicle exerted, axillary inflorescences present, clusters of paired spikelets, 1 floret per spikelet, spikelets laterally compressed and lightly keeled, upper spikelet long pedicellate and perfect, lower spikelet staminate, 2 glumes subequal or unequal, lower glume 2-awned and 2- to 3-nerved, upper glume with 1 awn, lemma 3-nerved with a slender terminal awn, palea hairy awnless, lodicules truncate, 3 stamens, ovary glabrous, 2 stigmas, native pasture species, open areas, rocky places, plains, rocky hills, allied to *Muhlenbergia* Schreb., type *Lycurus phleoides* Kunth, see *Genera Plantarum* 44. 1789, *Systema Naturae ... editio decima tertia, aucta, reformata* 2: 171. 1791, *Nova Genera et Species Plantarum* 1: 141, 142, pl. 45. 1815 [1816], *Systema Vegetabilium, editio decima sexta* 4(2): 32. 1827, *Reliquiae Haenkeanae* 1(4-5): 233, t. 37, f. a-f. 1830, *J. Acad. Nat. Sci. Philadelphia*, ser. 2, 1: 189. Aug 1848, *Proceedings of the Academy of Natural Sciences of Philadelphia* 4: 25. 1848, August Heinrich Rudolph Grisebach (1814-1879), *Plantae lorentzianae*. 207-208. Muldavin, Paul Neville and Glenn Harper, “Indices of grassland biodiversity in the Chihuahuan desert ecoregion derived from remote sensing.” *Conservation Biology* 15(4): 844-855. Aug 2001.

Species

L. phalaroides Kunth (*Lycurus brevifolius* Scribn. ex Beal; *Lycurus phleoides* Kunth; *Lycurus phleoides* var. *brevifolius* Scribn. ex Beal; *Muhlenbergia lycuroides* Vasey ex Beal)

U.S. to Argentina, Mexico. Perennial, caespitose, erect or decumbent, knotty base, ligule membranous, leaf blades flat or folded, narrow inflorescence, spikelets usually paired and shortly awned, first spikelet rudimental, glumes subequal lanceolate, 2 lodicules, 3 stamens, dry disturbed grassland, see *Nova Genera et Species Plantarum* 1: 142, pl. 45. 1815 [1816], *Grasses of North America for Farmers and Students* 2: 239, 271. 1896 and *Phytologia* 57(4): 288. 1985.

L. phleoides Kunth (*Lycurus phalaroides* Kunth; *Lycurus phleoides* var. *glaucifolius* Beal; *Lycurus phleoides* var. *phleoides*; *Pleopogon setosum* Nutt.)

South America. Perennial, herbaceous, caespitose, erect, decumbent at base, aromatic, forming small clumps, inflorescence terminal and erect, fodder, growing in open areas, see *Nova Genera et Species Plantarum* 1: 142, pl. 45. 1815 [1816], *Proceedings of the Academy of Natural Sciences of Philadelphia* 4: 25. 1848, *J. Acad. Nat. Sci. Philadelphia*, ser. 2, 1: 189. Aug 1848, *Grasses of North America for Farmers and Students* 2: 239, 271. 1896 and *Contr. U.S. Natl. Herb.* 17(3): 305. 1913.

in English: wolf tail

in Mexico: cola de rata, zacate lobero

L. setosus (Nutt.) C. Reeder (*Lycurus alopecurus* Griseb.; *Lycurus phleoides* var. *glaucifolius* Beal; *Pleopogon setosum* Nutt.)

U.S., Mexico. Perennial, herbaceous, caespitose, along roadsides, see *Nova Genera et Species Plantarum* 1: 142, pl. 45. 1815 [1816], *Proceedings of the Academy of Natural Sciences of Philadelphia* 4: 25. 1848, *J. Acad. Nat. Sci. Philadelphia*, ser. 2, 1: 189. Aug 1848, *Pl. Lorentz.* 207-208. 1874, *Abhandlungen der Königlichen Gesellschaft der Wissenschaften zu Göttingen* 19: 255-256. 1874, *Grasses of North America for Farmers and Students* 2: 271. 1896 and *Ill. Fl. N. U.S.* (edition 2) 1: 184. 1913, *Phytologia* 57(4): 287. 1985, *Madroño* 44(4): 334-346. 1997.

Lygeum Loeffl. ex L. = *Linosparton* Adans.,
Lygeum L., *Spartum* P. Beauv.

Greek *lygion* “switch,” *lygizo* “to bend,” the plants are very flexible, fibers used for mats, sails and ropes; Latin and Greek *ampelodesmos*, ancient name for *Lygeum spartum*, used in Sicily for tying up vines (Plinius).

One species, Mediterranean region, southeast Spain, Libya, Algeria. Stipoideae, Lygeae, perennial, herbaceous, wiry, junciform, tufted, coarse, branched, rhizomatous with scaly rhizomes, ligule an unfringed membrane, auricles absent, wiry leaf blades, plants bisexual, single spikelet enclosed by a spatheole, large spikelets 2- to 3-flowered, glumes lacking, lemmas villous and coriaceous, palea awnless, lodicules absent, 3 stamens, ovary glabrous, 1 stigma, spikelets with female-fertile florets only, useful for erosion control, used for paper and making rope, food plant for *Melanargia occitanica*, growing in dry open places, dry salt marshes,

salt steppes, sandy soils, type *Lygeum spartum* L., see *Genera Plantarum* edition 5: 27, 522. 1754, *Familles des Plantes* 2: 34, 571. Paris 1763, *Essai d'une nouvelle Agrostographie, ou nouveaux genres des Graminées*. 178. Paris 1812, *Conspectus Regnum Vegetabilis...* 55. 1828, *Prodromus Florae Hispanicae* 1: 33. 1861, *Österreichische Botanische Zeitschrift* 31: 45. 1881 and *Revista Argentina de Agronomía* 28: 81-99. 1961.

Species

L. spartum Loeffl. ex L. (*Lygeum spartum* L.)

Mediterranean. Perennial, herbaceous, much used for papermaking, see *Fl. Pakistan* 143: 39. 1982.

in English: esparto grass

in French: sparte du Sud

in Spain: esparto, espart, espart bord, espart albardi

in Malta: halfa

in Morocco: sennâq, sennâg, sennâga, tasennâgt, l-halfa, talâmt, tirawt, âmenzal, gousmir, guzmir, sparte

M

Maclurochloa K.M. Wong

After the taxonomist Floyd Alonzo McClure, 1897-1970, American bamboo specialist.

A monotypic genus endemic to Peninsular Malaysia. Bambusinae, scrambling, clambering bamboo, trailing over the ground or entangled with the vegetation, lower montane forests, type *Maclurochloa montana* (Ridley) K.M. Wong, see *Kew Bulletin* 48(3): 528, f. 6. 1993, *Plant Resources of Southeast Asia* 7: 17, 34. 1995.

Species

M. montana (Ridl.) K.M. Wong (*Bambusa klossii* Ridl.; *Bambusa montana* (Ridl.) Holttum; *Bambusa pauciflora* Ridl.; *Dinochloa montana* Ridl.)

Peninsular Malaysia. Mountain forest, see *Journal of the Straits Branch of the Royal Asiatic Society* 44: 210. 1905, *The Flora of the Malay Peninsula* 5: 259. 1925, *Kew Bulletin* 11: 206. 1956, *Gard. Bull. Sing.* 16: 76, 77, 79, f. 21. 1958, *Kew Bulletin* 48(3): 528, f. 6. 1993.

Local name: buluh padi

in Thailand: phai lueai, phai luei

Maclurolyra C. Calderón and Söderstrom

After the taxonomist Floyd Alonzo McClure, 1897-1970, American bamboo specialist, economic botanist, 1919-1940 in China, from 1941 at the Smithsonian Institution, Washington, D.C., author of *Bamboos of the Genus Phyllostachys*. U.S. Department of Agriculture Handbook. no. 114. U.S.D.A. Washington D.C. 1957 and *The Bamboos*. Smithsonian Institution Press 1993; see J.H. Barnhart, *Biographical notes upon botanists*. 2: 420. Boston 1965; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 259. 1972; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. Philadelphia 1964; I.C. Hedge & J.M. Lamond, *Index of Collectors in the Edinburgh Herbarium*. Edinburgh 1970; Stafleu & Cowan, *Taxonomic literature*. 3: 215. Utrecht 1981; Floyd Alonzo McClure, *Chinese Handmade Paper*, edited by Elaine Koretsky, Bird & Bull Press 1986; *Hand Papermaking* 2(1). Summer 1987.

One species, Panama, Colombia. Bambusoideae, Oryzodae, Olyreae, or Bambusoideae, Olyreae, Olyrinae, perennial,

unarmed, herbaceous, simple, tufted, flowering culms leafy, rhizomes pachymorph, basal culm internode not swollen, thick ligule, leaves mainly basal, plants monoecious, inflorescence a raceme-like panicle hidden within the uppermost sheaths, male and female-fertile spikelets mixed in the inflorescence, all the fertile spikelets unisexual, female spikelet lanceolate with herbaceous glumes, male spikelets without glumes and florets with 3 fertile stamens or 6-staminate, lemma 7-nerved, palea present, 3-4 lodicules, stamens 0, ovary glabrous, 2 stigmas, forest, along trail, resembling *Rehia*, type *Maclurolyra tecta* C.E. Calderón & Soderstr., see Cleofé E. Calderón & Thomas R. Soderstrom, "Morphological and Anatomical Considerations of the Grass Subfamily Bambusoideae Based on the New Genus *Maclurolyra*." *Smithsonian Contributions to Botany* 11: 1-55. 1973, *Smithsonian Contributions to Botany* 44: 1-27. 1980, *Brittonia* 34: 25-29. 1982, *Flora Mesoamericana* 6: 212. 1994, *American Bamboos* 282-284. 1999, *Contributions from the United States National Herbarium* 39: 71. 2000.

Species

M. tecta C.E. Calderón & Soderstr.

Panama, Colombia. Male inflorescence above, female inflorescence below, leaf anatomy bambusoid, forest edge, see *Smithsonian Contributions to Botany* 11: 6. 1973.

Macroblepharus Philippi = Eragrostis Wolf

From the Greek *makros* "long, large" and *blepharon* an "eyelid," *blepharis* "eyelash."

Chloridoideae, Cynodonteae, or Chloridoideae, Eragrostideae, Eragrostidinae, type *Macroblepharus contractus* Phil., see *Genera Plantarum* 23. 1776, *Icones et Descriptiones Graminum Austriacorum* 4: 15. 1809, *Linnaea* 29(1): 100-101. 1858 and *Acta Bot. Neerl.* 15: 157. 1966, *Contributions from the United States National Herbarium* 41: 81-115, 139. 2001.

Macrobriza (Tzvelev) Tzvelev

From the Greek *makros* "long, large" plus *Briza* L.

Pooideae, Poeae, Brizinae, *Briza* sect. *Macrobriza* Tzvelev, type *Briza maxima* L., see *Species Plantarum* 1: 70. 1753

and *Novosti Sist. Vyss. Rast.* 21. 1970, *Bot. Zhurn. (Moscow & Leningrad)* 78(10): 91. 1993, *Contributions from the United States National Herbarium* 48: 146-151. 2003.

Macrochaeta Steudel = *Pennisetum* Rich.,
Sericura Hassk.

From the Greek *makros* “long” and *chaite* “bristle, long hair.”

Panicoideae, Panicodae, Paniceae, or Panicoideae, Paniceae, Cenchrinae, see *Synopsis Plantarum* 1: 72. 1805, *Enumeratio Plantarum Horti Botanici Berolinensis*, ... 1036-1037. 1809, *Essai d'une Nouvelle Agrostographie* 59. 1812, *Flora* 25(Beibl. 2): 2. 1842, *Systematisches Verzeichniss der im Indischen Archipel* 60. 1854, *Memorie della Reale Accademia delle Scienze di Torino*, ser. 2 14: 374-375. 1854, *Flora Brasiliensis* 2(2): 305, 308. 1877 and *Contr. U.S. Natl. Herb.* 22: 210-211. 1921, *Flora of Tropical Africa* 9: 956-957, 962, 966. 1934, *Amer. J. Bot.* 64: 161-176. 1977, *Econ. Bot.* 31: 163-174. 1977, *Flora Mesoamericana* 6: 371-374. 1994, *Contributions from the United States National Herbarium* 46: 527-536, 569. 2003.

Macrochloa Kunth = *Stipa* L.

From the Greek *makros* “long” and *chloe, chloa* “a grass.”

About 2-3 species, America, U.S. Pooideae, Stipeae, Stipinae, type *Macrochloa tenacissima* (L.) Kunth, see *Species Plantarum* 1: 78. 1753, *Centuria I. Plantarum* ... 6. 1755, *Révision des Graminées* 1: 58-59. 1829, *Species Graminum Stipaceorum* 94. 1842, *Synopsis Plantarum Glumacearum* 1: 132. 1854 and *Contr. U.S. Natl. Herb.* 24(7): 216. 1925, *Gayana, Botánica* 13: 1-137. 1965 [Estudio crítico de las gramíneas del género *Stipa* en Chile], *Acta Botanica Malacitana* 21: 161, 163. 1996, *Contributions from the United States National Herbarium* 48: 432. 2003, F.M. Vázquez & Mary E. Barkworth, “Resurrection and emendation of *Macrochloa* (Gramineae: Stipeae).” *Botanical Journal of the Linnean Society* 144(4): 483-495. Apr 2004.

Species

M. gigantea (Link) Hack. (*Celtica gigantea* F.M. Vázquez & M.E. Barkworth; *Lasiagrostis gigantea* (Link) Trin. & Rupr.; *Macrochloa arenaria* (Brot.) Kunth; *Stipa arenaria* Brot.; *Stipa gigantea* Link)

Europe, Portugal. See *Journal für die Botanik* 2: 313. 1799, *Flora Lusitanica* 1: 86. 1804, *Révision des Graminées* 1: 59. 1829, *Species Graminum Stipaceorum* 96. 1842, *Catalogue Raisonné des Graminées du Portugal* 16. 1880 and *Boletim da Sociedade Broteriana*, ser. 2 64: 35-74. 1991.

M. tenacissima (L.) Kunth (*Lasiagrostis tenacissima* (L.) Trin. & Rupr.; *Stipa tenacissima* L.)

Europe, Spain. See *Amoen. Acad.* 4: 266. 1759, *Révision des Graminées* 1: 58. 1829, *Species Graminum Stipaceorum* 94. 1842 and *Annali di Botanica* 45: 75-102. 1987.

Macronax Raf. = *Arundinaria* Michx.

Bambusoideae, Bambuseae, Arundinariinae, see *Flora Boreali-Americana* 1: 73-74. 1803, *Syn. Pl.* 1: 101-102. 1805, *Medical Repository* ser. 2, 5: 353. 1808, *Der Gesellschaft naturforschender Freunde zu Berlin Magazin für die neuesten Entdeckungen in der gesammten Naturkunde.* 2: 230, 320. Berlin 1808, *Catalogue du Jardin ... Razoumoffsky ... à Gorenki ...* 6. 1812, *Systema Vegetabilium* 2: 55, 846. 1817, *Bulletin de la Société Nationale d'Acclimatation de France*, sér. 3, 5: 774, f. 43-50. 1878 and *Synopsis der mitteleuropäischen Flora* 2, 1: 772. 1902, *Journal of the Arnold Arboretum* 6(3): 145-153. 1925, *Acta Phytotax. Geobot.* 10(4): 264. 1941, *Journal of Japanese Botany* 18(7): 350, 364. 1942, E.D. Merrill, *Index rafinesquianus*. 76. 1949, *Taxon* 6(7): 207. 1957, *Smithsonian Contrib. Bot.* 9: 21-40, f. 7-18. 1973, *Acta Phytotaxonomica et Geobotanica* 30(4-6): 145. 1979, *Ann. Bot.* 48: 407-410. 1981, *Journal of Bamboo Research* 1(2): 38, 42, 171, 175. 1982, *Journal Nanjing University. Natural Sciences Edition* 1982: 95. 1982, *Journal of Bamboo Research* 2: 20. 1983, *Journal of Bamboo Research* 3(2): 23, 25, t. 1. 1984, W.D. Clayton & S.A. Renvoize “Genera graminum.” *Kew Bulletin, Additional Series* 13: 45. 1986, *Smithsonian Contr. Botany* 72: 1-75. 1988, *Kew Bulletin* 44: 351. 1989, *Journal of Bamboo Research* 10(3): 28-30. 1991, *J. Bamb. Res.* 12(4): 1-6. 1993, *J. Bamb. Res.* 13(1): 1-23. 1994, *Contributions from the United States National Herbarium* 39: 18-24. 2000.

Macrostachya A. Rich. = *Enteropogon* Nees

From the Greek *makros* “long” and *stachys* “a spike.”

Chloridoideae, Cynodonteae, Chloridinae, see *An Introduction to the Natural System of Botany* second edition. 448. 1836, *Tentamen Florae Abyssinicae* ... 2: 408. 1850, *Journal of the Linnean Society, Botany* 19: 101. 1881 and *Contributions from the United States National Herbarium* 41: 78-79, 139. 2001.

Maillea Parlatore = *Phleum* L.

For the French botanist Alphonse Maille, 1813-1865, botanical collector in Syria; see J.H. Barnhart, *Biographical notes upon botanists.* 2: 437. 1965; H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford.* 206. Oxford 1964; Ethelyn Maria Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University.* Cambridge, Mass. 1917-1933; Jean-Louis Kralik & J. Billon, *Catalogue des Reliquiae Mailleanae.* Paris

1869; F.N. Hepper & F. Neate, *Plant Collectors in West Africa*. 53. Utrecht 1971; C.H. Steinberg, *Webbia* 32(1): 31. 1977.

One species, Greece, Mediterranean region. Pooideae, Poeae, Alopecurinae or Pooideae, Poodae, Aveneae, annual, herbaceous, auricles absent, leaf sheaths inflated, leaf blades narrowly linear, ligule an unfringed membrane, plants bisexual, contracted inflorescence paniculate, 2 glumes subequal keeled and winged, palea 1-nerved, 0 lodicules, 2 stamens, ovary glabrous, 2 stigmas, sometimes referred to *Phleum*, see Filippo Parlatore, *Plantae novae vel minus notae opusculis diversis...* 31. Parisii 1842 and *Acta agriculturae scandinavica* 1(1): 1-138. 1975, *Journal of the Linnean Society, Botany* 76(4): 337-340. 1978, *Flora Mesoamericana* 6: 242. 1994, *Plant Systematics and Evolution* 203: 11-25. 1996, *Willdenowia* 29(11-12): 45-49. 1999, *Contributions from the United States National Herbarium* 48: 432, 491-494. 2003.

Species

M. urvillei Parl.

Mediterranean islands. Glumes 1-nerved, palea keel-less.

Maizilla Schltldl. = *Paspalanthium* Desv.,
Paspalum L.

Maize, *Zea mays*.

Panicoideae, Paniceae, Paspalinae, type *Maizilla stolonifera* (Bosc) Schltldl., see *Systema Naturae, Editio Decima* 846, 855, 1359. 1759, *Transactions of the Linnean Society of London* 2: 83, t. 16. 1794, *Mémoires de la Société d'Agriculture, Sciences et Arts d'Angers* 1: 163. 1831, *Botanische Zeitung, Berlin* 8: 601, 605. 1850 and *Contr. U.S. Natl. Herb.* 12: 116. 1908, *Contributions from the United States National Herbarium* 46: 285, 441, 443-527. 2003.

Malacurus Nevski = *Elymus* L., *Leymus* Hochst.

From the Greek *malakos* "soft" and *oura* "tail."

One species, Central Asia, Turkestan. Pooideae, Triticoideae, Triticeae, or Pooideae, Triticeae, Hordeinae, perennial, herbaceous, tufted or caespitose, auricles present, ligule an unfringed membrane, plants bisexual, inflorescence spicate, spikelets paired, 2 reduced glumes subequal or unequal, palea 2-keeled, 2 free and membranous lodicules, 3 stamens, ovary hairy, 2 stigmas, sometimes referred to *Leymus*, type *Malacurus lanatus* (Korsh.) Nevski, see *Species Plantarum* 1: 83. 1753, *Flora* 31: 118. 1848, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg: VIIIe Série: Classe Physico-Mathématique* 4(4): 102. 1896 and Thomas Archibald Sprague (1877-1958) et

al., *Nomenclature Proposal by British Botanists* 121. London 1929, *Journal of the Faculty of Science: University of Tokyo, Botany* 3(1): 20. 1930, *Acta Univ. As. Med. Ser.* 8, 17, 38. 1934, *Canad. J. Bot.* 42: 554. 1964, *Novosti Sist. Vyssh. Rast.* 6: 21. 1970, *Systematic Botany* 9: 279-294. 1984, *Taxon* 41: 562-563. 1992, *Annals of Botany* 73: 195-203. 1994, *Taxon* 44: 611-612. 1995.

Species

M. lanatus (Korsh.) Nevski

Eurasia. Glumes 1-nerved.

x Maltea B. Boivin = x *Pucciphippsia* Tzvelev

Phippsia x *Puccinellia*.

See *Le Naturaliste Canadien* 94: 526. 1967, *Novosti Sist. Vyssh. Rast.* 8: 76. 1971, *Genera Graminum* 375. 1986, *Contributions from the United States National Herbarium* 48: 432, 601. 2003.

Maltebrunia Kunth = *Oryza* L., *Potamophila* R. Br., *Prospytochloa* Schweick.

About 3-5 species, Africa, Madagascar, Tanzania, Gabon. Bambusoideae, Oryzodae, Oryzeae, perennial, erect, leaf blades lanceolate to narrowly ovate and usually pseudopetiolate, ligule an unfringed membrane, stoloniferous, plants bisexual, open inflorescence paniculate, spikelets bisexual flattened, 1 fertile floret above 2 sterile lemmas, glumes absent or vestigial, fertile lemma awnless, sterile lemmas subulate, palea nerved and keeled, 2 free lodicules, 6 stamens usually, ovary glabrous, 2 plumose stigmas, in forest, rain forest, type *Maltebrunia leersioides* Kunth, see *Species Plantarum* 1: 333. 1753, *Prodromus Florae Novae Hollandiae* 211. 1810, *Révision des Graminées* 1: 6. 1829, *Journal of the Linnean Society, Botany* 18: 14-134. 1881 and *Bulletin de l'Herbier Boissier, sér. 2*, 1(6): 555. 1901, *Der Züchter. Zeitschrift für theoretische und angewandte Genetik* 31(4): 193-195. 1961, C.E. Hubbard, *Hooker's Icones Plantarum* 36: t. 3595. 1962, *Blumea* 32: 174. 1987, Song Ge, Ang Li, Bao-Rong Lu, Shou-Zhou Zhang, & De-Yuan Hong, "A Phylogeny of the Rice Tribe Oryzeae (Poaceae) based on *MatK* Sequence Data." *American Journal of Botany* 89(12): 1967-1972. 2002.

Species

M. leersioides Kunth (*Oryza leersioides* (Kunth) Steud.; *Potamophila leersioides* (Kunth) Benth.)

Tropical and southern Africa. See *Révision des Graminées* 1: 183, t. 3. 1830, *Synopsis Plantarum Glumacearum* 1: 3. 1855 [1853], *Journal of the Linnean Society, Botany* 18: 55. 1881.

M. letestui (Koechlin) Koechlin (*Maltebrunia gabonensis* C.E. Hubb.; *Maltebrunia le-testui* (Koechlin) Koechlin; *Maltebrunia letestui* (Koechlin) F.T. Hubb.; *Potamophila letestui* Koechlin) (dedicated to the French (b. Caen) colonial administrator (*Administrateur des Colonies*) Georges Marie Patrice Charles Le Testu, 1877-1967 (d. Caen), traveler, explorer, plant collector in West Africa, 1900-1902 Dahomey, 1904-1906 Mozambique, 1907-1934 Gabon and Ubangi-Shari, 1935 Botanic Garden at Caen; see Auguste Jean Baptiste Chevalier (1873-1956), *Flore vivante de l'Afrique Occidentale Française*. 1: xxvii-xxx. Paris 1938; N. Hallé, in *Adansonia*. sér. 2, 7: 263-273. 1967; F.N. Hepper and F. Neate, *Plant Collectors in West Africa*. 50. 1971; H. Lecomte, *Les Bois de la Forêt d'Analamazaotra*. Madagascar 1922; François Pellegrin (1881-1965), *La Flore du Mayombe* d'après les Récoltes de M. Georges Le Testu. [in *Mémoires de la Société Linnéenne de Normandie*. XXVI volume. Two parts.] Caen 1924-1928)

Gabon. See *Bulletin de la Société Botanique de France* 108: 243. 1961, *Flore du Gabon* 5: 243. 1962, *Hooker's Icones Plantarum* 36: t. 3595. 1962.

M. prehensilis Nees (*Oryza prehensilis* (Nees) Steud.; *Potamophila prehensilis* (Nees) Benth.; *Prosphytochloa prehensilis* (Nees) Schweick.)

South Africa. See *Florae Africae Australioris Illustrationes Monographicae* I. Gramineae. 194. 1841, *Synopsis Plantarum Glumacearum* 1: 3. 1855 [1853], *Genera Plantarum* 3: 1116. 1883 and *Der Züchter. Zeitschrift für theoretische und angewandte Genetik* 31(4): 194-195. 1961, *Annals of the Missouri Botanical Garden* 75: 866-873. 1988.

M. schliebenii (Pilg.) C.E. Hubb. (*Potamophila schliebenii* Pilg.) (after the German (b. Saxony) botanist Hans-Joachim Eberhardt Schlieben, 1902-1975 (d. Essen, Germany), plant collector (in Tanzania), photographer and writer; see J.H. Barnhart, *Biographical notes upon botanists*. 3: 229. 1965; Mary Gunn and Leslie E. Codd, *Botanical Exploration of Southern Africa*. 316. Cape Town 1981; Anthonius Josephus Maria Leeuwenberg, "Isotypes of which holotypes were destroyed in Berlin." in *Webbia*. 19: 861-863. 1965)

Africa. See *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 11: 652. 1932, *Hooker's Icones Plantarum* 36: t. 3595. 1962.

Malya Opiz = *Ventenata* Koeler

Dedicated to the Bohemian-Austrian botanist Joseph Karl (Carl) Maly, 1797-1866, physician, M.D. Prague 1823, his works include *Enumeratio plantarum phanerogamicarum imperii austriaci universi*. Vindobonae [Wien] 1848 and

Oekonomisch-technische Pflanzenkunde, etc. Wien 1864. See J.H. Barnhart, *Biographical notes upon botanists*. 2: 441. 1965; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 251. 1972; Ethelyn Maria Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933; R. Zander, F. Encke, G. Buchheim, & S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993; I.C. Hedge & J.M. Lamond, *Index of Collectors in the Edinburgh Herbarium*. Edinburgh 1970.

Pooideae, Poaceae, Agrostidinae, see *Fl. Herborn*. 41. 1775, *Descriptio Graminum in Gallia et Germania* 272. 1802 and *Contributions from the United States National Herbarium* 48: 432, 688. 2003.

Mandelorna Steud. = *Chrysopogon* Trin., *Lenormandia* Steudel, *Vetiveria* Bory

An anagram of *Lenormandia* Steud., dedicated to the French botanist Sébastien-René Lenormand, 1796-1871, botanical collector for his herbarium; see A. Lasègue, *Musée botanique de Benjamin Delessert*. Paris 1845; J.H. Barnhart, *Biographical notes upon botanists*. 2: 369. 1965; T.W. Bossert, compil., *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 234. 1972; S. Lenley et al., *Catalog of the manuscript and archival collections and index to the correspondence of John Torrey*. Library of the New York Botanical Garden. 462. 1973; H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 198. Oxford 1964.

Panicoideae, Andropogoneae, Sorghinae, type *Mandelorna insignis* Steud., see *Species Plantarum* 2: 1045. 1753, *Flora Cochinchinensis* 538, 552. 1790, *Plantarum Minus Cognitarum Pugillus* 2: 10. 1815, *Fundamenta Agrostographiae* 187-188. 1820, *Bull. Sci. Soc. Philom. Paris* 1822: 43. 1822, *Flora* 33: 229. 1850, *Synopsis Plantarum Glumacearum* 1: 359. 20-21 July 1854 [1855], *Die Natürlichen Pflanzenfamilien* 2(2): 28. 1887 and *American Midland Naturalist* 4: 212. 1915, *Bulletin de l'Institut Française d'Afrique Noire* 22: 106. 1960, *Boissiera. Mémoires du Conservatoire de Botanique et de l'Institut de Botanique Systématique de l'Université de Genève* 9: 291. 1960, J.F. Veldkamp, "A revision of *Chrysopogon* Trin. including *Vetiveria* Bory (Poaceae) in Thailand and Malesia with notes on some other species from Africa and Australia." *Austrobaileya* 5: 503-533. 1999, *Contributions from the United States National Herbarium* 46: 159-161. 2003.

Manisuris L. = *Coelorachis* Brongn.,
Hackelochloa Kuntze, *Hemarthria* R. Br.,
Mnesithea Kunth, *Peltophorus* Desv.,
Phacelurus Griseb., *Rottboellia* L.f.

Greek *manos* “loose, sparse, flaccid, rare” and *oura* “a tail,” referring to the appearance of the spikes, resembling a string of minute beads.

One to several species, Asia, India, Tropics. Panicoideae, Andropogonodae, Andropogoneae, Rottboelliinae, perennial, herbaceous, branched, plants bisexual, inflorescence spicate or racemose, male and female-fertile spikelets mixed in the inflorescence, sessile spikelet awnless, lower floret barren, rachis segments extremely slender with a cupule-like structure formed by a sterile pedicel positioned along 1 margin of the internode, 2 glumes, lower glume keeled, lemmas 0- 2-nerved, palea and lodicules present, 3 stamens, inflorescence disarticulating into floral units consisting of a sessile spikelets, pedicellate spikelet and internode, open habitats, dry areas, grassy prairies, often included in *Mnesithea* Kunth, type *Manisuris myuros* L., see C. Linnaeus, *Mantissa Plantarum*. 2: 164, 300. 1771, *Supplementum Plantarum* 13, 114. 1781 [1782] *Nouveau Bulletin des Sciences, publié par la Société Philomatique de Paris* 2: 188. 1810, *Prodromus Florae Novae Hollandiae* 207. 1810, *Révision des Graminées* 1: 153-154. 1829, *Voyage autour du Monde* 2: 64, f. 14. 1829 [1831], *Spicilegium florae rumelicæ et bithynicæ ...* 2: 423-424. 1846 [1844], *Die Natürlichen Pflanzenfamilien* 2(2): 25. 1887, *Revisio Generum Plantarum* 2: 776. 1891, *The Flora of British India* 7: 152. 1896 and *Bull. Misc. Inform. Torr., nom. illeg., non *Rottboellia cylindrica* Willd.; *Tripsacum cylindricum* Michx.)

U.S., Florida. See *Flora Caroliniana, secundum ...* 249. 1788, *Flora Boreali-Americana* 1: 60. 1803, *Transactions of the American Philosophical Society, new series*, 5: 151. 1835, *Pacific Railroad Reports* 4: 149. 1857, *Revisio Generum Plantarum* 2: 779. 1891 and *North American Flora* 17(1): 85. 1909, *Manual of the Southeastern Flora* 41. 1933, *Blumea* 31(2): 290. 1986.

in English: pitted jointgrass

M. forficulata C.E.C. Fisch. (*Glyphochloa forficulata* (C.E.C. Fisch.) Clayton)

India. See *Bulletin of Miscellaneous Information Kew* 1933: 353. 1933, *Kew Bulletin* 35(4): 815. 1981.

M. granularis (L.) Sw. (*Cenchrus granularis* L.; *Hackelochloa granularis* O. Kuntze; *Manisuris granularis* (L.) L.f.; *Manisuris granularis* L.; *Mnesithea granularis* (L.) de Koning & Sosef; *Ryttilix granularis* Skeels)

Tropics, the Philippines. Perennial, erect, much-branched, hairy, leaves margins ciliate, slender spikes, spikelets in pairs, 2 equal glumes green, grazed and stacked, not much relished by cattle, sometimes considered to be a good fodder, found in disturbed soil, open waste places, old fields, clearings, see *Mantissa Plantarum* 2: 575. 1771, *Nova Graminum Genera* 40, t. 1, f. 4-7. 1779, *Amoenitates Academicæ ...* 10: 40. 1779, *Nova Genera et Species Plantarum seu Prodromus* 25. 1788, *Revisio Generum Plantarum* 2: 776. 1891 and *Blumea* 31(2): 295. 1986.

in India: agi-mali-gadi, dhaturu ghas, kangni, ratop

in the Philippines: gingetkaran

in Thailand: yaa kha naeng

M. impressa (Griseb.) Kuntze (*Coelorachis impressa* (Griseb.) Nash; *Manisuris leonina* Hitchc. & Chase; *Mnesithea impressa* (Griseb.) de Koning & Sosef; *Rottboellia impressa* Griseb.)

The Caribbean, Cuba. See *Catalogus plantarum cubensium ...* 235. 1866, *Revisio Generum Plantarum* 2: 780. 1891 and *North American Flora* 17(1): 85. 1909, *Contributions from the United States National Herbarium* 18(7): 275. 1917, *Blumea* 31(2): 291. 1986.

M. leonina Hitchc. & Chase (*Coelorachis impressa* (Griseb.) Nash; *Manisuris impressa* (Griseb.) Kuntze;

Mnesithea impressa (Griseb.) de Koning & Sosef; *Rottboellia impressa* Griseb.) (named for the collector, Fr. León)

Cuba. Found in pine woods, see *Catalogus plantarum cubensium* ... 235. 1866, *Revisio Generum Plantarum* 2: 780. 1891 and *North American Flora* 17(1): 85. 1909, *Contributions from the United States National Herbarium* 18(7): 275. 1917, *Blumea* 31(2): 291. 1986.

M. myuros L. (*Peltophorus myurus* (L.) Desv.; *Peltophorus myurus* (L.) P. Beauv., nom. illeg., non *Peltophorus myurus* (L.) Desv.; *Rottboellia myuros* (L.) Benth.)

India. Good fodder grass, see *Mantissa Plantarum* 300. 1767, *Nouveau Bulletin des Sciences, publié par la Société Philomatique de Paris* 2: 188. 1810, *Essai d'une Nouvelle Agrostographie* 119, 167, t. 21, f. 11. 1812 and *Cytologia* 51: 43-50. 1986, *Science and Culture* 54: 335. 1988, *Journal of Cytology and Genetics* 29(2): 125-131. 1994, *Taxon* 49(2): 252. 2000.

in India: nalla panuku, nallapanuku, waritsira pillu, waritsira pullu

M. selloana (Hack.) Kuntze (*Coelorachis selloana* (Hack.) Camus; *Coelorhachis selloana* (Hack.) A. Camus; *Mnesithea selloana* (Hack.) de Koning & Sosef; *Rottboellia selloana* Hack.)

Brazil. See *Flora Brasiliensis* 2(4): 312. 1883, *Revisio Generum Plantarum* 2: 780. 1891 and *Annales de la Société Linnéenne de Lyon, sér. 2*, 68: 197. 1922, *Flora Illustrada de Entre Ríos (Argentina)* 6(2): 447-508. 1969, *Blumea* 31(2): 292. 1986, *Darwiniana* 30(1-4): 87-94. 1990.

M. striata (Nees ex Steud.) Kuntze (*Coelorachis striata* (Nees ex Steud.) A. Camus; *Mnesithea striata* (Nees ex Steud.) de Koning & Sosef; *Rottboellia striata* Nees ex Steud.)

America. See *Synopsis Plantarum Glumacearum* 1: 361. 1854, *Revisio Generum Plantarum* 1(2): 780. 1891 and *Annales de la Société Linnéenne de Lyon, sér. 2*, 68: 197. 1922, *Blumea* 31(2): 292. 1986.

Mapira Adans. = *Olyra* L.

A vernacular name.

Bambusoideae, Olyreae, Olyrinae, see *Systema Naturae, Editio Decima* 1253, 1261, 1379. 1759, *Familles des Plantes* 2: 39, 574. 1763 and *Smithsonian Contributions to Botany* 69: 1-79. 1989, *Systematic Botany* 17(1): 25-28. 1992, *Flora Mesoamericana* 6: 210-212. 1994, *Memoirs of the New York Botanical Garden* 78: 509-540. 1996, *Contributions from the United States National Herbarium* 39: 82-88. 2000.

Massia Balansa = *Eriachne* R. Br.

Arundinoideae (or Panicoideae), Eriachneae, type *Massia trisetata* (Nees ex Steud.) Balansa, see *Prodromus florae Novae Hollandiae*. 183. 1810, *Essai d'une Nouvelle Agrostographie* 72-73, 146. 1812, *Anales de la Universidad de Chile* 36: 207-208. 1870, *Journal de Botanique (Morot)* 4(8): 165. 1890 and *Acta Phytotaxonomica et Geobotanica* 11: 183. 1942, *Bulletin of the Torrey Botanical Club* 88: 11-20. 1961, M.H.J. van Eck-Boorsboom, "A revision of *Eriachne* R. Br. (Gramineae) in Asia and Malesia." *Blumea* 26: 127-138. 1980, M. Lazarides, "The genus *Eriachne* (Eriachneae, Poaceae)." *Australian Systematic Botany* 8(3): 355-452. 1995.

Species

M. trisetata (Nees ex Steud.) Balansa (*Eriachne trisetata* Nees ex Steud.; *Megalachne zeylandica* Thwaites, also spelled *zeylanica*)

Sri Lanka, India, Southeast Asia, Australia, Northern Territory, Queensland, Western Australia. Perennial, tussock-forming, erect and simple, smooth, leaf sheaths bearded at mouth, leaves curly when dry, loose inflorescence, drooping panicle, floret shorter than the glumes, each floret with an apically-awned lemma and 2-awned palea, glumes subequal, awns of the palea slightly shorter than the awn of the lemma, weed, see *Synopsis Plantarum Glumacearum* 1: 237. 1854, *Enumeratio Plantarum Zeylanicae* 5: 372, 444. London Dec. 1864, *Journal de Botanique (Morot)* 4(8): 165. 1890 and *Handb. Fl. Ceylon* 5: 266. 1900, *Grasses of Ceylon* 52. 1956, *Ceylon J. Sci., Biol. Sci.* 2(2): 23. 1959.

in Sri Lanka: pini tuttiri, pinituttiri, pinitutturu

Matrella Pers. = *Zoysia* Willd.

Chloridoideae, Cynodonteae, Zoysiinae, type *Matrella juncea* Pers., see *Mantissa Plantarum* 2: 185. 1771, *Der Gesellschaft Naturforschender Freunde zu Berlin, neue Schriften* 3: 440-441. 1801, *Syn. Pl.* 1: 73. 1805 and *Philippine Journal of Science (ser. C)* 7(4): 230. 1912, *Blumea* 26(1): 169-175. 1980, *Contributions from the United States National Herbarium* 41: 139, 240. 2001.

Matudacalamus Maekawa = *Aulonemia* Goudot

For the Mexican botanist Eizi Matuda, 1894-1978, from Japan to Mexico 1922, 1950-1978 University of Mexico, among his many writings are "El género *Datura* en México." *Bol. Soc. Bot. Méx.* 14: 1-13. 1952, *Las Commelinaceas del Estado de México*. Toluca 1956 and *Las Ciperaceas del Estado de México*. Toluca 1959. See J.H. Barnhart, *Biographical notes upon botanists*. 2: 463. 1965; T.W. Bossert, *Biographical dictionary of botanists repre-*

sented in the Hunt Institute portrait collection. 258. 1972; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. 1964; R. Zander, F. Encke, G. Buchheim & S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993; Irving William Knobloch, compil., "A preliminary verified list of plant collectors in Mexico." *Phytologia Memoirs*. VI. Plainfield, N.J. 1983.

Bambusoideae, Bambuseae, Arthrostylidiinae, type *Matudacalamus laxus* F. Maek., see *Annales des Sciences Naturelles; Botanique, sér. 3* 5: 75-76. 1846 and *Journal of Japanese Botany* 36(10): 343, 345. 1961, *Smithsonian Contributions to Botany* 9: 58. 1973, *Annals of the Missouri Botanical Garden* 72(4): 864-873. 1985, *Brittonia* 40: 22-31. 1988, *Annals of the Missouri Botanical Garden* 77(2): 353-358. 1990, *Novon* 1(2): 76-87. 1991, *Novon* 2(2): 81-110. 1992, *Flora Mesoamericana* 6: 198-199. 1994, *Brittonia* 49(4): 503-507. 1997, *Contributions from the United States National Herbarium* 39: 25-29. 2000.

Mays Mill. = *Zea* L.

From the Mexican vernacular name for maize.

Panicoideae, Andropogoneae, Tripsacinae, see *Species Plantarum* 2: 971-972. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition* 1754, *De Fructibus et Seminibus Plantarum*1: 6, t. 1, f. 9. 1788, *Enumeratio Stirpium Transsilvaniae* 3: 281. 1816 and *Contributions from the United States National Herbarium* 46: 286, 635-639. 2003.

Mayzea Raf. = *Zea* L.

For *Zea* L.

Panicoideae, Andropogoneae, Tripsacinae, see *Species Plantarum* 2: 971-972. 1753, *The Gardeners Dictionary ... Abridged ... fourth edition* 1754, *De Fructibus et Seminibus Plantarum* 1: 6, t. 1, f. 9. 1788, *Enumeratio Stirpium Transsilvaniae* 3: 281. 1816, C.S. Rafinesque, *Medical Flora* 2: 241. 1830, *Flora Telluriana* 1: 85, 86. 1836 [1837], *Sylva Telluriana*. 1: 17. 1838 and E.D. Merrill, *Index rafinesquianus* 76. 1949, *Contributions from the United States National Herbarium* 46: 286, 635-639. 2003.

Medusather P. Candargy = *Cuviera* Koeler, *Hordelymus* (Jess.) Jess. ex Harz, *Hordelymus* (Jessen) Jessen in Harz, *Hordelymus* (Jessen) Harz

From *Medusa* and *ather* "an awn."

Pooideae, Triticoideae, Triticeae, *Elymus* sect. *Medusather* Griseb., see *Descriptio Graminum in Gallia et Germania* 328 [382]. 1802, *Deutschlands Gräser und Getreidearten* ... 202. Leipzig 1863, *Landwirtschaftliche Samenkunde* 2: 1147. 1885 and *Archives de Biologie Végétale Pure et Appliquée* 1: 18, 38. 1901, *Taxon* 49(2): 250. 2000.

Megalachne Steud. = *Pantathera* Phil.

Greek *megas*, *megale* "big, large" and *achne* "husk, glume."

Two species, Chile, Juan Fernandez Islands. Pooideae, Poodae, Poeae or Pooideae, Stipeae, Duthieinae, perennial, herbaceous, caespitose, auricles absent, leaf sheaths glabrous, ligule an unfringed membrane, plants bisexual, open panicle, spikelets several-flowered and long awned, floret callus bearded, 2 glumes herbaceous and aristulate to long awned, lemma coriaceous and keeled, long flexuous terminal awn, palea 2-nerved 2-keeled, 2 free and membranous lodicules, 3 stamens, ovary hairy, 2-3 stigmas, rocky areas, slopes, related to *Festuca* L., type *Megalachne berteroniana* Steud., see *Synopsis Plantarum Glumacearum* 1: 237. 1854, *Botanische Zeitung. Berlin* 14(37): 649. 1856, *Enumeratio Plantarum Zeylaniae* 372. 1864 and *Boletín de la Sociedad de Biología de Concepción* 48: 165-172. 1974, *Willdenowia* 8(2): 386-387. 1978, *Contributions from the United States National Herbarium* 48: 432, 476. 2003.

Species

M. berteroniana Steud. (*Bromus fernandezianus* (Phil.) Skottsb.; *Bromus megalachne* Pilg.; *Pantathera avenacea* Hemsl.; *Pantathera fernandeziana* Phil.)

Juan Fernandez Islands. See *Synopsis Plantarum Glumacearum* 1: 237. 1854, *Botanische Zeitung. Berlin* 14(37): 649. 1856, *Report on the Scientific Results of the Voyage of H.M.S. Challenger* 1(3): 61. 1884 and *Repertorium Specierum Novarum Regni Vegetabilis* 16: 386. 1920, *The Natural History of Juan Fernandez and Easter Island* 2: 102, f. 1i. 1922, *Gayana, Bot.* 43: 95. 1986.

M. masafuerana (Skottsb. & Pilg.) Matthei (*Bromus masafueranus* Skottsb. & Pilg.; *Megalachne masafuerana* (Skottsb. & Pilg.) H. Scholz)

See *Repertorium Specierum Novarum Regni Vegetabilis* 16: 385. 1920, *Boletín de la Sociedad de Biología de Concepción* 48: 171, f. 1a, c-e. 1974, *Willdenowia* 8(2): 386. 1978.

Megaloprotachne C.E. Hubb.

Greek *megas*, *megale* "big," *protos* "first" and *achne* "husk, glume."

About 1-2 species, southern tropical and South Africa. Panicoideae, Panicodae, Paniceae, annual, herbaceous, tufted, erect or decumbent, sometimes rooting at the lower nodes,

auricles absent, ligule a fringed membrane, plants bisexual, inflorescence subdigitate or digitate, spike-like racemes or narrow panicle, racemes not deciduous, spikelets paired, lower floret male, upper floret acuminate, 2 glumes more or less equal, lower glume glabrous as long as spikelet, upper glume densely hairy and 3-nerved, palea keels wingless, 2 free and fleshy lodicules, 3 stamens, ovary glabrous, 2 stigmas, confused with *Digitaria*, type *Megaloprotachne albescens* C.E. Hubb., shade or open areas, sandy soils, mopane savannah, see *Bulletin of Miscellaneous Information Kew* 1929: 320-322. 1929.

Species

M. albescens C.E. Hubb.

South Africa. Annual, erect or decumbent, lower leaf sheaths woolly, in sandveld, see *Bulletin of Miscellaneous Information Kew* 1929: 321-322. 1929.

M. glabrescens Roiv.

South Africa, South America. Annual, erect or decumbent, leaf sheaths glabrous, in sandveld, see *Relatório Anual do Departamento de Botânica do Estado São Paulo* 11(1): 40. 1974.

Megastachya P. Beauv. = *Eragrostis* Wolf, *Leptochloa* P. Beauv.

Greek *megas* “big, large” and *stachys* “spike,” referring to the very large spikes.

About 1-2 species, southern tropical Africa. Centothecoideae, Centothecoaceae, annual or short-lived perennial, herbaceous, branched, erect or decumbent, sometimes stoloniferous, secondary shoots from the rooting nodes, leaf blades narrowly lanceolate, auricles absent, ligule an unfringed membrane, plants bisexual, inflorescence with capillary branchlets, open panicle, spikelets 8- 20-flowered on slender pedicles, 2 unequal glumes 3-4-nerved, lemmas mucronate, palea keels ciliolate, stamens 2 or 3, ovary glabrous, 2 stigmas, in cultivated areas, in forest, along trail, shade species, rainforest, on sandy soils, damp and wet sites, in swampy forests, type *Megastachya mucronata* (Poir.) P. Beauv., see *Species Plantarum* 68. 1753, *Systema Naturae, Editio Decima* 875. 1759, *Genera Plantarum* 23. 1776, *Flora Caroliniana, secundum...* 80. 1788, *Methodus Plantas Horti Botanici ...* 185. 1794, *Flora Boreali-Americana* 1: 69-70, t. 11. 1803, *Icones et Descriptiones Graminum Austriacorum* 4: 15. 1809, *Enumeratio Plantarum Horti Botanici Berolinensis ...* 1: 108. 1809, *Essai d'une Nouvelle Agrostographie* 15, 71, 74, 167, 173-175, f. 5. 1812, *Mantissa* 2: 327. 1824, *Reliquiae Haenkeanae* 1(4-5): 284. 1830, *Florae Africae Australioris Illustrationes Monographicae* I. Gramineae. 384. 1841, *Hooker's Journal of Botany and Kew Garden Miscellany* 2: 101-102. 1850, *Synopsis Plantarum Glumacearum* 1: 269, 272. 1854, *Fl.*

Austral. 7: 642, 645. 1878, *Journal of the Linnean Society, Botany* 19: 117. 1881, *Gen. Pl.* 3(2): 1187. 1883, *Biologia Centrali-Americana; ... Botany ...* 3: 572. 1885, *Mexicanas Plantas* 2: 119. 1886 and *Ill. Fl. North. U.S. Canada*, edition 2, 229. 1919, *Contr. U.S. Natl.* 24(6): 180. 1925, *Acta Bot. Neerl.* 15: 157. 1966, *Flora of Ethiopia and Eritrea* 7: 63. 1995.

Species

M. mucronata (Poir.) P. Beauv. (*Centotheca madagascariensis* (Lam.) Hack.; *Centotheca mucronata* (Poir.) Kuntze; *Eragrostis madagascariensis* (Lam.) Steud.; *Megastachya madagascariensis* (Lam.) Chase; *Poa madagascariensis* Lam.; *Poa mucronata* Poir.)

Tropical Africa, South Africa, Gabon. Annual or weak perennial, decumbent, tufted, rooting at the lower nodes, sometimes stoloniferous, leaves broadly lanceolate, open panicle oblong with ascending and spreading branches, spikelets narrowly oblong 8-10-flowered, evergreen forest, forest shade or in partial shade, woodland, swampy places, see *Encyclopédie Méthodique, Botanique* 5: 91. 1804, *Nouveau Bulletin des Sciences, publié par la Société Philomatique de Paris* 2: 189. 1810, *Essai d'une Nouvelle Agrostographie* 74, 167. 1812, *Synopsis Plantarum Glumacearum* 1: 269, 272. 1854, *Journal of the Linnean Society, Botany* 29: 66. 1891, *Revisio Generum Plantarum* 2: 765. 1891 and *Bulletin of Miscellaneous Information Kew* 1929: 320-322. 1929, *Arquivos do Instituto de Biologia Vegetal* 1: 235. 1935.

in Nigeria: ilulu okhankwo, oke ako ozo

Megathyrsus (Pilger) B.K. Simon & S.W.L. Jacobs

Two species. Panicoideae, Paniceae, Melinidinae, *Panicum* subg. *Megathyrsus* Pilg., see *North Amer. Fl.* 3(2): 200, 203. 1915, *Fl. Trop. Afr.* 9(4): 639, 642. 1920, *Notizbl. Bot. Gart. Berlin-Dahlem* 104: 242. 1931, *Am. J. Bot.* 88: 1988-1992, 1993-2012. 2001, *Austrobaileya* 6(3): 571-574. 2003 [*Megathyrsus*, a new generic name for *Panicum* subgenus *Megathyrsus*], *Am. J. Bot.* 90: 796-821. 2003, *Contributions from the United States National Herbarium* 46: 629-634. 2003.

Species

M. maximus (Jacq.) B.K. Simon & S.W.L. Jacobs (*Panicum maximum* Jacq.; *Urochloa maxima* (Jacq.) R.D. Webster)

Lesser Antilles. See *Icones Plantarum Rariorum* 1: 2, t. 13. 1781 and *Darwiniana* 22: 24. 1979, *Austral. Paniceae* 241. 1987, Renata Reinheimer, Raúl Pozner, & Abelardo C. Veggetti, “Inflorescence, spikelet, and floral development in *Panicum maximum* and *Urochloa plantaginea* (Poaceae).” *Am. J. Bot.* 92: 565-575. 2005.

M. maximus (Jacq.) B.K. Simon & S.W.L. Jacobs var. *coloratus* (C.T. White) B.K. Simon & S.W.L. Jacobs (*Panicum maximum* var. *coloratum* C.T. White)

Australia. Cultivated, see *Queensland Agricultural Journal* 49: 112. 1938.

M. maximus (Jacq.) B.K. Simon & S.W.L. Jacobs var. *pubiglumis* (K. Schum.) B.K. Simon & S.W.L. Jacobs (*Panicum maximum* var. *pubiglume* K. Schum.; *Panicum maximum* var. *pubiglume* K. Melanocenchris Nees = *Gracilea* J. König ex Hook.f., *Ptiloneilema* Steud., *Roylea* Nees ex Steud.

Black millet, from the Greek *melas*, *melanos* “black” and *kenchros* “millet”; or referring to the appearance of the racemes.

About 3 species, tropical Africa, India, and Sri Lanka. Chloridoideae, Cynodonteae, annual or perennial, herbaceous, ascending, tufted, compact at the base, internodes hollow, glandular, leaves sometimes mainly radical or basal, auricles absent, ligule a fringe of hairs, leaf sheaths coriaceous, plants bisexual, inflorescence a false spike or a simple or racemose panicle, racemes cuneate terminated by a forked bristle, spikelets 2-flowered in disarticulating clusters, fertile spikelets dorsally flattened, upper floret male and staminate, lower floret perfect, sometimes present a third floret neuter or much reduced, 2 glumes hairy hirsute and persistent, lower glume 1-nerved, upper glume 3-nerved, lemmas shortly 3-awned and hairy, palea 2-awned, 2 minute lodicules free and fleshy, 3 stamens, ovary glabrous, 2 stigmas, open habitats, saline flats, hillsides, dry plains, arid zones, sandy pans, woodlands, type *Melanocenchris royleana*

Nees, see *Der Gesellschaft Naturforschender Freunde zu Berlin, neue Schriften* 4: 218. 1803, John Lindley (1799-1865), Editor, *The botanical register* [or *Edwards's botanical register*]. 33 volumes. London, 1815-1847, *Museum Senckenbergianum* 2: 142. 1837, *Proceedings of the Linnean Society of London* 1: 94-95. 1841, *Nomenclator Botanicus. Editio secunda* 2: 475. 1841, *Illustrationes Plantarum Orientalium* auctoribus Comite Jaubert et Eduardo Spach ... 4: 36-38, pl. 326. Species

M. abyssinica (R. Br. ex Fresen.) Hochst. (*Eutriana abyssinica* R. Br.; *Eutriana abyssinica* R. Br. ex Fresen.; *Gracilea royleana* Hook.f.; *Gracilea royleana* var. *plumosa* (Jaub. & Spach) Hook.f.; *Melanocenchris plumosa* Jaub. & Spach; *Pennisetum plumosum* Hochst. & Steud.; *Ptiloneilema plumosum* Steud.)

Northeastern Africa, Arabia, northwestern India. Perennial or annual, small or very small, delicate, xerophytic desert grass, low to dwarf, solitary or densely tufted, slender, leaves filiform, burrlike deciduous racemes, little clusters of hairy spikelets, glumes densely ciliate below, eaten by cattle when young, on gravelly soils, dry plains, stony hillsides, dry and barren soil, see *Museum Senckenbergianum* 2: 142. 1837, *Illustrationes Plantarum Orientalium* 4: 37. 1850-1853, *Synopsis Plantarum Glumacearum* 1: 102, 201. 1854, *Flora* 38: 274. 1855, *The Flora of British India* 7: 284. 1896.

in India: mahtar mulmul, patdu, swill bhuski

M. jacquemontii Jaub. & Spach (*Gracilea royleana* Hook.f.; *Melanocenchris royleana* Nees)

India, Asia. Annual, spikelets in separate clusters, glumes hairy and awned, grazed by cattle when young, elegant, found in sandy or stony ground, see *Proceedings of the Linnean Society of London* 1: 94. 1841, *Illustrationes Plantarum Orientalium* 4: 36, pl. 325. 1850-1853, *The Flora of British India* 7: 284. 1896.

in India: bedari, dongri, guli, landgeyakussal, phulsi

M. monoica (König ex Rottler) C.E.C. Fisch. (*Gracilea nutans* Hook.f.; *Melanocenchris monoica* (Rottler) C.E.C. Fisch.; *Melanocenchris monoica* Kuntze; *Melanocenchris perrotetii* Jaub. & Spach; *Melanocenchris rothiana* Nees; *Pommereulla monoica* Rottler)

Southern India, Sri Lanka. Perennial, erect to ascending, glabrous, compact, leaf blades lanceolate and acute, hairy ligule, leaf sheaths pilose and imbricate, spiciform racemes, cluster of spikelets, 3 florets, glumes subequal and densely ciliate, lower lemma entire, relished by cattle, see *Nova*

Graminum Genera 31. 1780 [21 Dec 1779], *Der Gesellschaft naturforschender Freunde zu Berlin, neue Schriften* 4: 218. 1803, *Novae Plantarum Species* 33. 1821, *Proceedings of the Linnean Society of London* 1: 94, 95. 1841, *Nomenclator Botanicus. Editio secunda* 2: 379. 1841, *Illustrationes Plantarum Orientalium* 4: 38, pl. 326. 1850-1853, *Revisio Generum Plantarum* 1(2): 780. 1891, *The Flora of British India* 7: 283, 300. 1896 and *Handb. Sci.* 2(2): 123. 1959, *Grasses of Burma ...* 473, 620, f. 74. 1960.

in India: achanthalagaddi, erupe nalagaddi

Melica L. = *Beckeria* Bernh., *Bromelica* (Thurber) Farw., *Claudia* Opiz, *Dalucum* Adans., *Verinea* Merino

From the Greek name *melike* (*meli* “honey”) for a grass, or from Latin *herba(m) medica(m)* “grass from Media,” *melicus, a, um* “Median”; or from Latin *melica, ae* for a kind of vessel (Marcus Terentius Varro). See C. Abegg-Mengold, *Die Bezeichnungsgeschichte von Mais, Kartoffel und Ananas in Italienischen*. Bern 1979; Carl Linnaeus, *Species Plantarum*. 66. 1753 and *Genera Plantarum*. 5th edition. 76. 1754; Manlio Cortelazzo & Paolo Zolli, *Dizionario etimologico della lingua italiana*. 3: 738. Zanichelli, Bologna 1983.

About 70-80 species, temperate regions. Pooideae, Poodae, Meliceae, perennial, herbaceous, unbranched, erect or not, scandent or not scandent, stems flimsy to stout, tufted, clumped, rhizomatous, rhizomes creeping, usually tuberos, internodes hollow, auricles present or absent, sheath margins joined, ligule membranous fringed or unfringed, leaf blades linear and arching, plants bisexual, cleistogamous or chasmogamous, inflorescence open or contracted, a single raceme or panicle, fertile florets 1-3, upper floret sterile, clavate pedicelled mass of sterile florets, 2 papery glumes unequal to subequal, lower glume 1-7-nerved, upper glume 3-7-nerved, lemma not flabellate, palea 2-nerved 2-keeled, 2 lodicule joined and fleshy, 3 stamens, ovary glabrous without the apical appendage, 2 stigmas, ornamental and very variable, toxic for cattle and horses when grazed in large amounts, shade species, dry stony slopes, species of open habitats, type *Melica nutans* L., see *Species Plantarum* 1: 66. 1753, *Familles des Plantes* 2: 34, 548. 1763, *Mantissa Plantarum* 31. 1767, *Systematisches Verzeichnis* 20, 40. 1800, *Observations sur les Graminées de la Flore Belgique* 109. 1823, *Observations sur les Graminées de la Flore Belgique* 109. 1823 [1824], *Lotos* 3: 67. in Uruguay: pasto bandera

M. bauhinii All. (*Dalucum bauhinii* (All.) Bubani; *Melica litoralis* Phil., nom. illeg., non *Melica littoralis* (Gouan) Raspail; *Melica litoralis* var. *litoralis*) (after the two Swiss brothers Bauhin, Caspar (Casper, Gaspard) (1560-1624, Basel) and Jean Johannes (1541-1613, Montbéliard, Württemberg-Montbéliard), herbalists and botanists. Caspar B., professor of anatomy and botany at Basel University, was the first to establish a scientific system of nomenclature, distinguished between genus and species, among his writings are *Pinax theatri botanici ... sive index* in Theophrasti, Dioscoridis, Plinii et botanicorum qui à saeculo scripserunt opera plantarum etc. Basiliae Helvet. 1623, *De dolore colico*. Basel 1581, *Institutiones anatomicae corporis virilis et muliebris historiam exhibentes*. Lyons 1604, *De remedium formulis Graecis, Arabibus & Latinis usitatis ... Iuniorum medicorum usum editi*. Frankfurt 1619 and *Vivae imagines partium corporis humani*. [4th first edition. under this title] Basel 1620, Caspar Bauhin was a pupil of the great Fabricius ab Aquapendente (or Girolamo Fabrizzi, Geronimo Fabrizio, Girolamo Fabrici) (1533-1619) at Padua (like Harvey and Johann Schultes, 1595-1645). Jean J. B. studied at Montpellier under Rondelet and at Zürich under Gesner, collaborated with Jacques Daleschamps at Lyon, traveler, physician to Duke Frederick of Württemberg, his works include *De Plantis à divinis sanctis ve nomen habentibus ... Additae sunt Conradi Gesneri ... Epistolae hactenus non editae, à Casparo Bauhinus, etc.* Basiliae 1591, *Histoire notable de la rage des loups*. Montbéliard 1591, *De auxiliis adversus pestem*. Montbéliard 1607 and *Historia novi et admirabilis fontis*. Montisbeligardi [Montbéliard or Mümpelgard, E. France] 1598, he was co-author (with Johann Heinrich Cherler, ca. 1570-ca.1610, & Dominique Chabrey, 1610-1669) of *Historia Plantarum universalis*. Ebroduni [Yverdon] 1650-1651. See J.H. Barnhart, *Biographical notes upon botanists*. 1: 140 and 141. 1965; Ludovic Légré, *La Botanique en Provence au XVIe siècle. Les deux Bauhin*. Marseille 1904; Johann Schultes (Scultetus) (1595-1645), *Cheiroplotheke [graecae] seu ... armamentarium chirurgicum*. Shope, "History of mycological collectors in Colorado." *Mycologia* 21: 292-296. 1929; Joseph Ewan, *Rocky Mountain Naturalists*. The University of Denver Press 1950; Edward H. Graham, "Botanical studies in the Uinta Basin of Utah and Colorado." *Annals of Carnegie Mus. Pittsburgh* 26: 8-24. 1937; Edith M. Allison, "Bibliography and history of Colorado botany." *Univ. Colorado Studies* 6: 51-76. 1908)

Northern America, U.S. Perennial, see *Proceedings of the Academy of Natural Sciences of Philadelphia* 37: 47. 1886, *Proceedings of the Davenport Academy of Natural Sciences* 7: 240. 1899 and *Vascular Plants of the Pacific Northwest* 1: 619. 1969.

in English: Alaska oniongrass

M. subulata (Griseb.) Scribn. var. *subulata*

Northern America, U.S. Perennial, see *Proceedings of the Academy of Natural Sciences of Philadelphia* 37: 47. 1886 [or 1885] and *Vascular Plants of the Pacific Northwest* 1: 1-914. 1969.

in English: Alaska oniongrass

M. taurica K. Koch (*Melica ciliata* subsp. *taurica* (K. Koch) Tzvelev; *Melica micrantha* Boiss. & Hohen.)

Europe, Russia. Perennial, found on rocky slopes, see *Linnaea* 21: 395. 1848, *Diagnoses plantarum orientalium novarum* 2(13): 53. 1854.

M. tenuis Hack. & Arech.

Southern Brazil to northern Argentina, Uruguay. Perennial, spikelets narrowly obovate, low forage value, stony places, see *Anales del Museo Nacional de Montevideo* 1(5): 450, t. 57. 1896.

M. torreyana Scribn. (*Melica imperfecta* var. *sesquiflora* Torr. ex Scribn.)

U.S., California. Open habitats, dry rocky soil, see *Proceedings of the Academy of Natural Sciences of Philadelphia* 1885: 43. 1885.

in English: Torrey's melica

M. transsilvanica Schur (*Melica ciliata* subsp. *transsilvanica* (Schur) Celak.)

Europe, Russia, Turkey. Perennial, rhizomatous, poisonous grass, occurs on high steppe grassland, open meadow area, clearings and around edges of the woods, shallow rocky soil, calcareous soil, see *Verh. Mitth. Siebenbürg. Vereins Naturwiss. Hermannstadt* 4: 86. 1853 or *Sert. Fl. Transsilv.* 4: 86. 1853, *Enum. Pl. Transs.* 764. 1866 and *Fragmenta Floristica et Geobotanica* 17: 251-256. 1971, *Novosti Sist. Vyss. Rast.* 10: 85. 1973, *Berichte des Geobotanischen Instituts der Eidg. Techn. Hochschule Stiftung Rübel* 57: 182-192. 1991, *Grassland of China* 1995(1): 16-20. 1995, *Newslett. Int. Organ. Pl. Biosyst. (Oslo)* 26/27: 13-14. 1997.

M. turczaninowiana Ohwi (*Melica gmelinii* Turcz. ex Trin., nom. illeg., non Roth) (for the Russian botanist Porphir Kiril Nicolai Stepanowitsch Turczaninow, 1796-1863 (or 1864), traveler, botanical explorer, administrator; see J.H. Barnhart, *Biographical notes upon botanists.* 3: 408. 1965; Emil Bretschneider (1833-1901), *History of European Botanical Discoveries in China.* [Reprint of the original edition 1898] Leipzig 1981; H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford.* 257. Oxford 1964; E.M. Hempel; *Melica violacea* var. *violacea*)

Southern America, Bolivia, Chile. Palea back scabrous, see *Mantissa Plantarum* 31. 1767, *Icones et Descriptiones Plantarum, quae aut sponte ...* 5: 48, pl. 472-473, f. 2. 1799, *Synopsis Plantarum Glumacearum* 1: 290. 1854, *Flora Chilena* 6: 378. 1854, *Anales de la Universidad de Chile* 48: 572. 1873, *Boletín de la Academia Nacional de Ciencias, Córdoba, Argentina* 3: 375. 1881 and *Repertorium Specierum Novarum Regni Vegetabilis* 25(7-13): 111, 116, 122-123. 1928, R.C. Foster, "A catalogue of the ferns and flowering plants of Bolivia." *Contributions from the Gray Herbarium of Harvard University* 184: 1-223. 1958, *Flora de la Provincia de Buenos Aires* 4(2): 316. 1970, *Feddes Repertorium* 84(7-8): 557. 1973.

M. virgata Turcz. ex Trin.

Asia, Mongolia. On mountain steppe, rocky slopes, rocky soil, sandy soils, sandy and gravelly soil, meadow along a stream, see *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 1(4): 369. 1830.

Melinis P. Beauv. = *Mildbraediochloa* Butzin, *Monachyron* Parl., *Monachyron* Parl. ex Hook., *Rhynchelytrum* Nees, *Suardia* Schrank, *Tricholaena* Schrad. ex Schult. & Schult.f., *Tristegis* Nees

From the Greek *meline* "millet, Italian millet, *Panicum miliaceum*" (Herodotus) or a kind of *Setaria*; Latin *milium*, *ii* "millet" (Vergilius, Plinius and Marcus Terentius Varro); see Ambroise Marie François Joseph Palisot de Beauvois, *Essai d'une nouvelle Agrostographie, ou nouveaux genres des Graminées.* 54, t. 11, f. 4. Paris 1812.

About 11/(20-)22 species, tropical or subtropical, Mediterranean area, from Africa to India. Panicoideae, Panicodae, Paniceae, or Panicoideae, Paniceae, Melinideae, annual or perennial, aromatic, viscidly pubescent, herbaceous, sprawling, stoloniferous or tufted, culms ascending to decumbent at base and rooting from lower nodes, nodes hairy, solid to hollow internodes, auricles absent, ligule a line of hairs, leaves narrow and linear-lanceolate, plants bisexual, inflorescence a dense panicle with slender branches, 2 florets, lower floret sterile or male, upper floret bisexual, solitary spikelets pedicellate with an awned sterile lemma below the unawned fertile floret, 1 or 2 unequal

glumes, lower glume tiny or scale-like, upper glume often awned and 5- to 7-nerved, lemmas unequal, upper lemma glabrous and laterally compressed, palea present or absent, 2 fleshy or membranous lodicules, 3 stamens, ovary glabrous, stigmas 2, leaves and grains eaten by baboons, useful for erosion control, cultivated fodder, native pasture species, weed, shade species, open habitats, savannah, rainforest, woodland, sandy areas, grassland, disturbed ground, sometimes confused with *Rhynchelytrum* Nees, type *Melinis minutiflora* P. Beauv., see *Species Plantarum* 1: 55. 1753, *Essai d'une Nouvelle Agrostographie* 54, t. 11, f. 4. 1812, Franz von Paula von Schrank (1747-1835), *Plantae rariores horti academici monacensis* 58. Tanzania to Zimbabwe, Mozambique. Perennial, very variable, caespitose or rarely tufted, erect or ascending, geniculate, panicle narrowly ovate, spikelets narrowly ovate, lower glume ovate, upper glume 7-nerved, lower floret male or sterile, lower palea present, savannah, see *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 34(1): 133. 1904, *Nuovo Giornale Botanico Italiano* 26: 78. 1919, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 57: 198, 200-201. 1921, *Flora of Tropical Africa* 9: 892, 919. 1930, *Bulletin du Jardin Botanique de l'État* 9: 193, t. 3. 1932, *Bibliotheca Botanica* 138: 90. 1988.

M. drakensbergensis (C.E. Hubb. & Schweick.) Clayton (*Rhynchelytrum drakensbergense* C.E. Hubb. & Schweick.)

South Africa, Transvaal. Indeterminate species, mountains, see *Catalogue of the African Plants Collected by Dr. F. Welwitsch in 1853-1861* 2(1): 200. 1899 and *Bulletin of Miscellaneous Information Kew* 1936(5): 323-324. 1936, *Kew Bulletin* 33(1): 22. 1978.

M. effusa (Rendle) Stapf (*Melinis effusa* Stapf; *Melinis minutiflora* var. *effusa* Rendle)

Tropical Africa. Perennial, straggling, tufted, ascending, rarely erect, leaf blades often tomentose, panicle ovate to narrowly ovate, spikelets narrowly ovate, lower floret sterile, montane, grassland, disturbed places, open habitats, hillsides, see *Catalogue of the African Plants Collected by Dr. F. Welwitsch in 1853-1861* 2(1): 200. 1899 and *Bulletin of Miscellaneous Information Kew* 1922: 310. 1922, *Bulletin of Miscellaneous Information Kew* 1926: 444. 1926, *Flora of Tropical Africa* 509. 1982, *Bibliotheca Botanica* 138: 97. 1988.

in Nigeria: wutsiyar kurege, wutsiyar kureje

M. kallimorpha (Clayton) Zizka (*Rhynchelytrum kallimorphon* Clayton)

East Africa, Zambia, Tanzania, Angola, Kalahari. Annual, tufted, rhizomatous, upper glume and lower lemma awned, shade species, growing in sandy areas, woodland, edge of plain, understory, see *Kew Bulletin* 33(1): 22. 1978, *Bibliotheca Botanica* 138: 64. 1988.

M. longiseta (A. Rich.) Zizka (*Panicum macrotrichum* Steud.; *Rhynchelytrum longisetum* (A. Rich.) Stapf & C.E. Hubb.; *Saccharum longisetum* (A. Rich.) Walp.; *Tricholaena longiseta* A. Rich.)

Tanzania, Mozambique, Nigeria, Namibia, South Africa. Perennial, erect, tufted to loosely caespitose, erect or geniculately ascending, panicle narrowly oblong to linear, spikelets ovate, lower floret male, lower glume ovate, upper glume densely hairy on the keel, lower lemma glabrous on the keel, lower palea keels scaberulous, open woodland, sandy soils, see *Encyclopédie Méthodique. Botanique ... Supplément* 4: 275. 1816, *Tentamen Florae Abyssinicae ...* 2: 446. 1850, *Annales Botanicae Systematicae* 3: 793. 1852, *Synopsis Plantarum Glumacearum* 1: 92. 1854, *Catalogue of the African Plants Collected by Dr. F. Tropics. Perennial with hairy stems, very variable, tufted, strongly aromatic and viscid-glandular throughout, molasses-scented, branching and spreading, quick growing and vigorous, rather coarse, basally prostrate, decumbent to suberect, geniculately ascending and rooting at lower nodes, stoloniferous, forming loose and large tussocks, leaf blades linear-lanceolate, sheaths often hairy to pilose, ligule a ciliate rim, leaves minutely to densely hairy and sticky when fresh, narrow but loose purplish to pink-mauve open inflorescence, 2 florets, lower floret male, upper floret fertile, glumes and lower lemma glabrous, upper glume 2-lobed and prominently 7-nerved, sterile lemma 2-lobed and awned, bisexual lemma awnless, sometimes aggressive habit, herbage suitable for pasture improvement, cultivated and naturalized throughout tropics, excellent fodder plant, cultivated for forage, very palatable to stock, valuable grass for cattle once they become used to the smell, excellent for grazing, roots used as a purgative, weed grass naturalized throughout tropics, contains a strong scented volatile oil foul or sweet smelling, insect-repellent, anti-tick deterrent properties, diuretic, antidiarrhetic, not tolerant of heavy grazing and waterlogging, fire-sensitive, resistant to

drought, useful for erosion control and for soil conservation, pioneer grass, ruderal, usually occurs in warm coastal areas, open ground, hillsides, wasteland, open disturbed places, woodland, riverine forests, savannah, in both moist and dry areas, clearings, dry thickets, in shady places and rocky slopes in sub humid and humid climates, on steep slopes with poor soils, on well drained sites, sandy soil, on rocky ground, roadbanks, grasslands, old pasture, see *Essai d'une Nouvelle Agrostographie* 54, t. 11, f. 4. 1812, *Plantae rariorum horti academici monacensis* t. 58. 1820, *Horae Physicae Berolinenses* 29, 47, 54, t. 7. 1820, *Annales des Sciences Naturelles (Paris)* 5: 299. 1825, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Madagascar, Africa Sub Saharan South Africa. Perennial, small to dwarf, densely tufted, erect, unbranched, sparse foliage, nodes conspicuously bearded, inconspicuous ligule rimlike, basal sheaths strongly overlapping and hairy at the base, blue-green blades rolled and expanded, leaves hard and stringy, inflorescence a narrow or open panicle, spikelets with long hairs pink sometimes cream to purplish, ornamental, moderately palatable to relatively unpalatable, useful for erosion control, in South Africa traditional healers use it to chase away ominous clouds, found in disturbed veld, open veld, undisturbed open grassland, stony slopes, sandy to sandy loam soils, on very shallow and poor soil, clayey soils, bushveld, in rocky areas, see *Species Plantarum* 2: 1045-1046. 1753, *Bulletin de la Société d'Histoire Naturelle d'Autun* 8: 355-357. 1895, *Flora Capensis* 7: 442. 1899 and *Österreichische Botanische Zeitschrift* 51: 464. 1901, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 34(1): 131-132. 1904, *Annali di Botanica* 8: 310. 1911, *Journal of the Linnean Society, Botany* 40: 232-233. 1911, *Giornale Botanico Italiano* n.s. 26: 78. 1919, *Bulletin du Muséum d'Histoire Naturelle* 25: 202. 1919, *Bulletin agricole du Congo Belge* 11: 107, 108. 1920, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 57: 198-199. 1921, *Flora of Tropical Africa* 9: 892, 895-897. 1930, *Repertorium Specierum Novarum Regni Vegetabilis, Beihefte* 40(1): 259. 1931, *Fl. East Africa, Malawi, Angola, Tanzania. Perennial, tufted, rhizomatous, thick rhizome, upper glume and lower lemma awned, found in shady areas, wet soil, near water, see *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 57: 199-200. 1921, *Flora of Tropical Africa* 9: 886, 887, 889. 1930, *Biblioth. Bot.* 138: 67, 80. 1988.

M. tenuissima Stapf (*Melinis gracilis* Pilg.; *Melinis tenuissima* var. *abyssinica* Stapf)

Tropical Africa, Malawi. Perennial or annual, tufted, thin, slender, scrambling, leaf blades tapering to a point, sheaths rolled and hairy, ligule a ring of short hairs, auricles present, open and loose inflorescence, delicate ovate panicle,

spikelets 1-flowered and bisexual, lower floret sterile, smooth pedicels, 2 glumes, lower glume a minute scale, upper glume 5-nerved and minutely rough, white awn, very tiny lodicules, 3 stamens, feathery stigmas, found near water and riverbanks, bush, woodland, among tall grasses or shrubs, grassland, open ground, disturbed sites, arable grassland, see *Hooker's Icones Plantarum* 27: t. 2660. 1900, F.R. Rudolf Schlechter (1872-1925), *Kolonial-Wirtschaftliches Komitee. Westafrikanische Kautschuk-Expedition ... 1899/1900 ...* 268. Berlin 1900.

Melinum Link = *Melinum* Medik.

(Lamiaceae), *Zizania* L.

From the Greek *meline* "millet, Italian millet, *Panicum miliaceum*" (Herodotus) or a kind of *Setaria*; Latin *milium*, *ii* "millet" (Vergilius, Plinius and Marcus Terentius Varro), or from Greek *melinos* "yellowish."

Ehrhartoideae, Oryzeae, Zizaniinae, type *Melinum palustre* (L.) Link, see *Species Plantarum* 2: 991. 1753, *Mantissa Plantarum* 295. 1771, *Staatswirtsch. Vorlesungen der Churpfälzischen Phys.-ökon. Ges.* 1: 200. Mannheim 1791, Johann Heinrich Friedrich Link (1767-1851), *Handbuch zur Erkennung der nutzbarsten und am häufigsten vorkommenden Gewächse* 1: 96. 1829 and *Phytologia* 72: 6. 1992, *Sida* 17(3): 533-549. 1997, *Contributions from the United States National Herbarium* 39: 116-118. 2000.

Melocalamus Benth.

From the Greek *melon* "an apple" and *kalamos* "reed."

About 1-9 species, southern China, eastern Himalayas, Vietnam, northern Thailand, Assam to Bangladesh. Bambusoideae, Bambusoideae, Bambuseae, Bambusinae, perennial, sympodial, manifold branching, unarmed, climber, scrambling, scandent, arching, spreading, shrubby, leafy, woody, tufted to densely tufted, joint swollen, culm often zigzag, sheath persistent and hard to coriaceous, culm sheath white powdery when young, sheath blade broadly triangular, rhizomes pachymorph, leaves large, leaf auricles distinct, narrow ligule, leaf blades pseudopetiolate, plants bisexual, cluster of pseudospikelets at each node of a branch, spikelets 2-flowered, 2 glumes more or less equal, paleas 2-keeled, 3 lodicules, 6 stamens, ovary glabrous, 2-3 stigmas, fruit globose edible, fleshy pericarp, forest, lowland, evergreen forest, clearings, resembling *Dinochloa*, type *Melocalamus compactiflorus* (Kurz) Benth. & Hook.f., see *J. Linn. Soc. Bot. London* 19: 134. 1881, *Genera Plantarum* 3: 1095, 1212. 1883 and *Kew Bulletin* 1936: 251-254. 1936, *Acta Phytotax. Sin.* 30(2): 163-168. 1992, Z.-L. Li, The *Flora of China* Bambusoideae project, problems and current understanding of bamboo taxonomy in China. *The Bamboos* 5: 61-81. 1997.

Species

M. arrectus T.P. Yi (*Dinochloa bambusoides* Q.H. Dai)

China. Scandent or slanting, solid at the base, hollow the upper part, one side of branch with longitudinal grooves, young culm with whitish pubescence, a ring of thick white powder below each joint, sheath coriaceous shedding late, sheath auricles inconspicuous to indistinct, sheath ligule arcuate, sheath blade erect and triangular to ovate-triangular, used in weaving, see *Bamboo Species & Cultivation in Guangxi*. p. 9, f. 7. 1987, *Acta Botanica Yunnanica* 10(4): 440-441, f. 3. 1988, *Fl. Reipubl. Pop. Sin.* 9(1): 37. 1996.

M. compactiflorus (Kurz) Benth. & Hook.f. (*Dinochloa compactiflora* (Kurz) McClure; *Melocalamus compactiflorus* (Kurz) Bentham; *Pseudostachyum compactiflorum* Kurz; *Pseudostachyum glomeriflorum* Kurz)

Thailand, Myanmar, India, Bangladesh, China, Vietnam. Scrambling, evergreen, scandent, spreading, arching, climbing over tall trees, culms asymmetric and zigzag, densely tufted, arborescent, sheath hard and fragile, sheath auricles developed, sheath ligule almost truncate, large inflorescence on a leafless branch, interrupted panicle, clusters of pseudospikelets, 2 fertile florets and 1 empty terminal, 2 glumes 2-toothed, 3 lodicules long-ciliate, 6 stamens free, ovary glabrous, 2-3 stigmas plumose, used for making baskets, secondary forest, see *Journal of the Asiatic Society of Bengal* 42: 252. 1873, *Genera Plantarum* 3: 1212. 1883 and *Kew Bulletin* 1936: 253. 1936[1937].

in Bangladesh: lota bans

in India: bethus bans, kalibans, latha, lota, lotabans

in Thailand: bo, bu, buh, lai khrua, lai mong, phai hang chang, phai haang chaang, sai tan, sai tang, sai wan, waa boh, wa bo

in Vietnam: ca truc, tre lim

M. compactiflorus (Kurz) Benth. & Hook.f. var. **fimbriatus** (J.R. Xue & C.M. Hui) D.Z. Li & Z.H. Guo

China. Sheath hard and fragile, see *Acta Phytotaxonomica Sinica* 30(2): 167-168, f. 1, 5-9. 1992, *Acta Botanica Yunnanica* 23(2): 178, pl. 1. 2001.

M. elevatissimus Hsueh [also Xue] & T.P. Yi (*Dinochloa elevatissima* (J.R. Xue & T.P. Yi) Bennet)

China, Tibet. Scandent or slanting, pruinose below each joint, sheath coriaceous shedding late, sheath auricles lacking, sheath blade concave and pubescent, large leaves oblong-lanceolate and chartaceous, used in weaving, growing in hardwood forests, see *Journal of Bamboo Research* 2(1): 28-30, f. 1. 1983, *Van Vigyan* 27(2): 121. 1989 [Dehra Dun, India, Society of Indian Foresters].

M. fimbriatus Hsueh & C.M. Hui (*Melocalamus fimbriatus* J.R. Xue & C.M. Hui)

China. Scandent, nodes convex, manifold branching on each node, culm sheath caducous and coriaceous, sheath

auricles indistinct, sheath ligule distinct, sheath blade ovate lanceolate, 8-10 leaves on each twig, leaf auricle lacking, shoots edible, see *Acta Phytotaxonomica Sinica* 30(2): 167-168, f. 1, 5-9. 1992.

M. gracilis R.B. Majumdar (*Dinochloa elevatissima* (R.B. Majumdar) Bennet)

India. Auricles deciduous and nonfalcate, see *Fl. Ind. Enumerat.-Monocot.* 278. 1989, *Monogr. Bamboo* 82. 1993.

M. gracilis W.T. Lin

China. See *Journal South China Agricultural University* 14(3): 110-111, f. 1. 1993.

M. indicus R.B. Majumdar (*Dinochloa indica* (R.B. Majumdar) Bennet; *Melocalamus compactiflorus* K.C. Malick)

India, Assam, Manipur. Arching over the trees and hanging downward, evergreen, scandent, nodes with woody rings, culm sheaths deciduous, leaves twisted at the apex, spikelets 2-flowered, lower floret sterile and upper hermaphrodite, 2 glumes, lemmas ciliate on the margins, short paleas, 3 lodicules ciliate, 6 stamens, see *Bulletin of the Botanical Survey of India* 25(1-4): 236. 1983[1985], *Van Vigyan* 27(2): 121. 1989.

M. mastersii (Munro) R.B. Majumdar (*Arundarbor mastersii* (Munro) Kuntze; *Bambusa mastersii* Munro; *Dinochloa mastersii* (Munro) Majumdar)

India. Arching, scandent, see *Transactions of the Linnean Society of London* 26(1): 113. 1868, *Revisio Generum Plantarum* 2: 761. 1891 and *Fl. Ind. Enumerat.-Monocot.* 278. 1989, *Monogr. Bamboo* 82. 1993.

M. ningmingensis Ohrnb. (*Melocalamus gracilis* W.T. Lin)

China. See *Journal South China Agricultural University* 14(3): 110-111, f. 1. 1993.

M. scandens Hsueh & C.M. Hui

Tropical south Asia, China. Scandent, manifold branching on node, culm sheath coriaceous and falling late, large sheath blade erect and ovate-lanceolate, 4-10 leaves lanceolate on each twig, used for weaving, mountains, valleys, see *Acta Phytotaxonomica Sinica* 30(2): 163, 166-167, f. 1, 1-4. 1992.

Melocanna Trin. = Beesha Kunth

From the Greek *melon* "an apple" and *kanna* "a reed, cane," referring to the fruit, a berry the size of an avocado.

About 1-3 species, tropical and subtropical, Asia, Indo-Malaysia, eastern India to Myanmar, Bangladesh. Bambusoideae, Bambusodae, Bambuseae, Melocanninae, perennial, woody, sympodial, arborescent, branched, unarmed, erect or nodding, shrubby or treelike, persistent, well-spaced, clumps open to very open, singly, thick-walled at the base, internodes white-waxy below the node, rhizomes

pachymorph, the flowering culms leafy, culms woody and persistent, many branches, leaves broad, auricles present or absent, culm sheaths often persistent and leathery, plants bisexual, flowering iterant, inflorescence paniculate, a single perfect flower, pseudospikelets secundly arranged, each pseudospikelet embraced by a spathe-like bract, 2 to 4 empty glumes awnless and pointed, lemma pungent, palea rounded and unkeeled, lodicules present, stamens 6 or 5-7, ovary appendage hollow, 3 feathery stigmas or 2-4, fruit pyriform with fleshy pericarp, planted species, charcoal of high absorbing power prepared from the plants, the culms contain abundant amounts of a secretion commonly known as *tabasheer* and used in medicine, type *Melocanna bambusoides* Trin., see *Neue Entdeckungen im ganzen Umfang der Pflanzenkunde 1820-1822, Journal de Physique, de Chimie, d'Histoire Naturelle et des Arts* 95: 151. 1822, *Clav. Agrostogr. Antiq.* 105, 397. 1822, *Allgemeine Naturgeschichte* 3(1): 422. 1841, *Deutsch. Fl.* 6: 6. 1846, *Synopsis Plantarum Glumacearum* 1: 332. 1854, *Flora van Nederlandsch Indië* 3: 418. 1855, *Catalogus plantarum quae in Horto botanico bogoriensi ...* 20. 1866, *Transactions of the Linnean Society of London* 26(1): 133-134. 1868, *Journal of the Asiatic Society of Bengal. Part 2. Natural History* 39(2): 89, t. 6, f. 1, 2, 29. 1870, *Forest Flora of British Burma* 2: 564. 1877, *Journal Linn. Soc., Bot.* 19: 31. 1881 and *Transactions of the Linnean Society* 6: 401-425. 1904, *Fieldiana, Botany* 24(2): 38-331. 1955, *Kew Bulletin* 2: 206. 1956, *Agriculture Handbook* 193: i-iii, 1-74. 1961, *Journal of the Bombay Natural History Society* 59: 696-697. 1962, *Bot. Zhurn.* 50: 1288-1304. 1965, *Bot. Zhurn.* 53: 1688-1703. 1968, *Ann. Bogor.* 5: 109-115. 1970, *Bulletin of the Botanical Survey of India* 22(1-4): 176. 1980, *Fl. Ind. Enumerat.-Monocot.* 281. 1989, *Indian Forester* 117(1): 68. 1991, *Flora Reipublicae Popularis Sinicae* 9(1): i-xxvi, 1-761. 1996, *Bamboos of the World* 324-325. 1999, *Contributions from the United States National Herbarium* 39: 71. 2000.

Species

M. arundina Parkinson (*Melocanna humilis* Kurz)

India, Assam, Myanmar. Evergreen, tufted, dark green, hollow, nodes thickened, very short culm sheaths rounded and inflated, leaves lanceolate to linear-lanceolate and obtuse at the base, leaf sheaths glabrous with long deciduous bristles at the mouth, culms used for fencing and construction purposes, see *Indian Forester* 61: 326. 1935.

M. baccifera (Roxb.) Kurz (*Bambusa baccifera* Roxb.; *Bee-sha baccifera* Kunth ex B.D. Jacks.; *Beesha baccifera* (Roxburgh) Kunth; *Beesha rheedii* Kunth; *Melocanna baccifera* (Roxb.) Kurz ex Skeels; *Melocanna baccifera* (Roxb.) Kurtz ex Skeels; *Melocanna bambusoides* Trinius; *Nastus baccifer* Roxb. ex Raspail; *Nastus baccifera* (Roxb.) Roxb. ex Raspail; *Ochlandra rheedii* (Kunth) Benth. & Hook.f. & Gamble)

Bangladesh, Myanmar, northeastern India, Sikkim. Evergreen, sympodial, culms erect and straight, strong, smooth, pendulous tips, nodes inconspicuous and not swollen, white ring below the nodes, branching from midculm upward, vigorously rhizomatous, elongated slender rhizome necks, internodes hollow, culm sheath deciduous or persistent, sheath auricles indistinct, sheath ligule very short, leaf sheaths glabrous, leaves long lanceolate or oblong lanceolate, along one side of the axis groups of pseudospikelets, 1 fertile floret and 1 abortive, 2-4 glumes shortly mucronate, ovary ovoid, recurved stigmas, large fruit berry-like, fruit shapes variable, fruits easily germinating often while still on the plant, widely cultivated in many Asian countries, flowers gregariously, aggressive and fast growing, forming diffuse and open clumps, eradication very difficult, durable culms for mat-making and construction, for making floats, baskets, very good pulp for paper, edible young shoots, edible fruits as famine food, grows on well watered and drained sandy clay loam, fertile loam, moist areas, dry sandy slopes, lower hill forests, sandy soils, alluvial soil, see Hendrik Adriaan van Rheede tot Draakestein (1637-1691), *Hortus Indicus Malabaricus*. [commentariis illustravit Johannes Commelinus] Amstelodami [Amsterdam] 1678-1703, *Hort. Bengal.* 25. 1814, *Plants of the Coast of Coromandel* 3: 37-38, t. 243. 1819, *Neue Entdeckungen im ganzen Umfang der Pflanzenkunde* 2: 43. 1821, *Syn. Pl.* 1: 253. 1822, *Annales des Sciences Naturelles (Paris)* série I 5: 442. 1825, *Révision des Graminées* 1: 141. 1829, *Enum. in Thailand: fai kriap, o lo, phai kriap

Menstruocalamus Yi = *Monstruocalamus* Yi, *Sinobambusa* Makino ex Nakai, *Yuezhuea* Yi

A monotypic genus, China. Bambuseae, Arundinariinae, or Bambusoideae, Bambuseae, Shibataeinae, long internodes, 3-11 branches at each node, raceme or panicle terminal, 3 stamens, 2 stigmas, ornamental, hedges, type *Menstruocalamus sichuanensis* (T.P. Yi) T.P. Yi, see *Journal of the Arnold Arboretum* 6(3): 152. 1925, *Taxon* 6(7): 209. 1957, *Agriculture Handbook* 193: i-iii, 1-74. 1961, *Kew Bulletin* 44(2): 349-367. 1989, *Journal of Bamboo Research* 11(1): 38, 40, 41, f. 1. 1992, *A Compendium of Chinese Bamboo* 221. 1994, *Flora Reipublicae Popularis Sinicae* 9(1): i-xxvi, 1-761. 1996.

Species

M. sichuanensis (Yi) Yi (*Chimonobambusa sichuanensis* (Yi) Wen; *Sinobambusa sichuanensis* Yi; *Yuezhuea sichuanensis* (Yi) Yi)

China, Sichuan. Sympodial, sheath shedding late or persistent, purplish green, no sheath auricles, sheath ligule truncate, sheath blade linear-lanceolate, 3 or more branches on each node, leaves slender lanceolate, ornamental, grown as living fence, see *Bulletin of Botanical Research, Harbin* 2(4): 105-107, f. 4. 1982, *J. Bamboo Res.* 6(3): 33. 1987, *Acta Phytotaxonomica Sinica* 29(5): 452-455. 1991, *J. Bamboo Res.* 11(1): 40-41, f. 1. 1992, *Compend. Chin. Bamboo* 221. 1994.

in China: yueyue-zhu shu, yueyue-zhu, yue yue zhu

Meoschium P. Beauv. = *Ischaemum* L.

Probably an anagram of *Ischoemum*.

Panicoideae, Andropogoneae, Ischaeminae, type *Meoschium aristatum* P. Beauv., see *Species Plantarum* 2: 1049. 1753, *Icones Stirpium Rariorum* 1, t. 1. 1791, *Exposition des Familles Naturelles* 1: 78. 1805, *Essai d'une Nouvelle Agrostographie* 111, 167. 1812, *Flora Indica; or Descriptions ...* 1: 322. 1820, *Novae Plantarum Species* 62. 1821, *Mantissa* 2: 435. 1824, *Annals and Magazine of Natural History* 1: 284. 1838, *The Botany of Captain Beechey's Voyage* 246. 1838, *Gramineae* 65-68. 1841, *Nova Acta Phys.-Med. Acad. Caes. Leop.-Carol. Nat. Cur.* 19(Suppl. 1): 198-200. 1843, *Synopsis Plantarum Glumacearum* 1:

375. 1854, *Monographiae Phanerogamarum* 6: 203. 1889 and *N. Amer. Fl.* 17: 94. 1909, *Regnum Veg.* 127: 57. 1993.

Merathrepta Raf. = *Danthonia* DC.

Danthonioideae, Danthonieae, see *Fl. Franç.* 3: 32. 1805, *The Genera of North American Plants* 1: 71. 1818, Constantine Samuel Rafinesque (1783-1840), *Seringe Bull. Bot.* 1: 221. 1830, *Proceedings of the California Academy of Sciences* 2: 182. 1863, *Annual Report of the New York State Museum* 22(87): 55. 1869, *Geological Survey of California, Botany* 2: 294. 1880, *Bulletin of the Torrey Botanical Club* 10: 52. 1883, *Index Kewensis* 2: 211. 1894, *Botanical Gazette* 21: 133. 1896, *Erythea* 7: 103. 1899 and *Circular, Division of Agrostology, United States Department of Agriculture* 30: 5-7. 1901, *Contributions from the United States National Herbarium* 11: 122-123. 1906, *Muhlenbergia; A Journal of Botany* 5: 120. 1909, *Botanischer Jahresbericht* 37: 128. 1911, J.W. Vickery, "A revision of the Australian species of *Danthonia*." in *Contributions from the New South Wales National Herbarium*. 2(3): 249-325 (268). 1956, *Flora Mesoamericana* 6: 250-251. 1994, *Sendtnera* 3: 11-93. 1996, *Contributions from the United States National Herbarium* 46: 170-177, 288. 2003.

Meringurus Murb.

Pooideae, Poodae, Aveneae, or Pooideae, Poeae, Aveninae, see *Acta Universitatis Lundensis* 36(1): 27. 1900, *Genera Graminum* 376. 1986.

Merisachne Steud. = *Triplasis* P. Beauv.

Greek *meris, meros* "part, portion, share" and *achne* "husk, glume."

Chloridoideae, Cynodonteae, type *Merisachne drummondii* Steud., see *Flora Caroliniana, secundum ...* 78. 1788, *Prodromus Florae Novae Hollandiae* 182. 1810, *Essai d'une Nouvelle Agrostographie* 81, pl. 16, f. 10. 1812, *A Manual of the Botany of the Northern United States* 589. 1848, *Synopsis Plantarum Glumacearum* 1: 117. 1854 [1855], *Flora of the Southern United States* 560. 1860, *Die Natürlichen Pflanzenfamilien* 2(2): 68. 1887 and *Contributions from the United States National Herbarium* 41: 141, 230-231. 2001.

Merostachys Sprengel = *Brasilocalamus* Nakai, *Merostachys* Nakai (Crassulaceae)

Greek *meris, meros* "part, portion, share" and *stachys* "spike."

About 40-46 species, Argentina to Guatemala, mainly Brazil. Bambusoideae, Bambusodae, Bambuseae, Arthrostylidiinae, perennial, erect, scrambler, scandent or not in upper portion, clambering, more or less arching, persistent, branched, leafy, unarmed, sympodial, tree or shrub, woody, clump forming, at each node multiple branches from flat triangular plate, blade of culm-sheath constricted at base, ligule an unfringed membrane, plants bisexual, inflorescence spatheate, dense unilateral raceme or a single spike, spikelets single or in triplets and sessile or subsessile, bracts at the base of the lowest spikelets, 2 or 1 glumes per spikelet, lemma and palea tough, 3 free and membranous lodicules, 3 stamens, ovary glabrous, 2 stigmas hispid to plumose, found in forest, rain forest, coastal forest, forest shade, forest slopes, sandy soil, closely related to *Rhipidocladum*, type *Merostachys speciosa* Spreng., see *Systema Vegetabilium* 1: 132, 249, f. 37b-n. 1824 and *Journal of Japanese Botany* 9(1): 10. 1933, *Botanical Magazine* (Tokyo) 49: 74. 1935, *Fieldiana, Botany* 24(2): 38-331. 1955, *Flora Illustrada Catarinense* 1(Gram.-Supl.): 1-78. 1967, *Smithsonian Contributions to Botany* 9: 1-148. 1973, *Novon* 8(4): 408-428. 1988, *Novon* 2(2): 81-110. 1992 [New taxa and nomenclatural combinations of Mesoamerican grasses (Poaceae)], *Flora Mesoamericana* 6: 201-202. 1994, *Novon* 7(3): 285-307. 1997 [Twelve new species of *Merostachys* (Poaceae: Bambusoideae: Bambuseae) from Brazil], Emmet J. Judziewicz et al., *American Bamboos*. 181-185. Smithsonian Institution Press, Washington and London 1999, *Contributions from the United States National Herbarium* 39: 71-75. 2000.

Species

M. sp.

in Brazil: taquara

M. abadiana Send.

Brazil, Itatinga, Abadia. See *Novon* 5(1): 77, f. 1. 1995.

M. annulifera Send.

Brazil. Erect, robust, solid, clambering over other plants, densely clumped, much-branched, thick- or thin-walled, pubescent below the nodes, culm leaves caducous, foliage blades pendent, see *Novon* 7(3): 286, f. 1. 1997.

M. argentea Send.

Brazil. Leafy, forest slopes, see *Novon* 7(3): 287, f. 2. 1997.

M. argyronema Lindm.

Brazil. See *Kongliga Svenska Vetenskapsakademiens Handlingar* 34(6): 22, t. 15. 1900, *Fieldiana, Botany* 24(2): 38-331. 1955, *Smithsonian Contributions to Botany* 9: 1-148. 1973.

M. bifurcata Send.

Brazil. Erect, climbing, thin- or thick-walled, branched, clumped, shady forest, see *Novon* 7(3): 290, f. 3. 1997.

M. bradei Pilg. (*Merostachys pluriflora* Munro ex E.G. Camus) (named for German-born botanist Alexander Curt Brade, 1881-1971, botanical collector in Brazil and Costa Rica. See "Relatório da excursão à Serra da Bocaina, no Estado de São Paulo, realizada pelo naturalista A.C. Brade, de 18 de Abril a 24 de Maio de 1951." *Rodriguésia* xxvi. Brazil. See *Novon* 5(1): 94, f. 10. 1995.

M. sparsiflora Rupr.

Brazil. Leaf blades narrowly ovate to lanceolate and acuminate, spikelets slender lanceolate in 2 ranks, lower glume narrowly ovate acute to acuminate, upper glume narrowly ovate acuminate, lemma narrowly ovate acute, forest, see *Bambuseae* 37, t. 10, f. 32. 1839.

M. speciosa Spreng.

Brazil. See *Systema Vegetabilium, editio decima sexta* 2: 132, 249, f. 37b-n. 1825 [1824] and *Kew Bulletin* 56(3): 627-638. 2001 [*Merostachys* Spreng. (Poaceae, Bambusoideae, Bambuseae): a new species from Brazil and critical notes on "group *speciosa*"].

M. ternata Nees

Eastern Brazil. Erect, arching, leaning, scandent, clambering, leaf blades ovate to narrowly ovate asymmetric and acuminate, leaf sheaths strongly fimbriate, spikelets stout densely packed, lower glume ovate acuminate, upper glume ovate-oblong mucronate, lemma lanceolate acute, forest and disturbed forest, along roadsides, see *Flora Brasiliensis seu Enumeratio Plantarum* 2: 529. 1829.

M. vestita McClure & L.B. Sm.

Brazil. See *Flora Illustrada Catarinense* 1(Gram.-Supl.): 72-73, t. 12, f. i-j. 1967.

Merxmüllera Conert

After the German botanist Hermann Merxmüller, 1920-1988, among his writings are "Compositen-Studien I." *Mitt. Bot. Staatssamml. München* 1: 33-46. 1950 and *Prodromus einer Flora von Südwestafrika*. 1966-1972, with Wolfgang Engelhardt wrote [Was lebt in Tümpel, Bach und Weiher?] *The Young Specialist Looks at Pond-life*, etc. [Translated by Heather J. Fisher ... Edited and adapted by Roderick C. Fisher.] London 1964, with A. Schreiber & Peter Frederick Yeo wrote "Aster L." in *Flora Europaea*. 4: 112-116. 1976; see Gustav Hegi, [*Alpenflora*.] *Flora alpina*, etc. [Translated from the German edition revised by H. Merxmüller.]

Milano 1953; Mary Gunn & Leslie E. Codd, *Botanical Exploration of Southern Africa*. 251. Cape Town 1981.

About 15-16 species, South and southwest Africa. Arundinoideae, Arundineae, Danthonieae, perennial, armed or unarmed, tuberous or not, tufted, herbaceous, unbranched, auricles absent, the sheaths form a bulbous structure below the soil surface, ligule a fringe of hairs, leaf blades usually pungent, plants bisexual, inflorescence racemose or paniculate, 2 subequal glumes 1-5-nerved, female-fertile lemmas awned, awn twisted, palea notched, 2 lodicules free and membranous. 3 stamens, ovary glabrous, 2 plumose stigmas, species of open habitats, often in mountains, slopes, sometimes included in *Rytidosperma* Steud. and *Danthonia* s.l., type *Merxmüllera davyi* (C.E. Hubb.) Conert, see *Senckenbergiana Biologica* 51(1-2): 129-133. 1970, *Senckenbergiana Biologica* 56(1-3): 145-152. 1975.

Species***M.* sp.**

in South Africa, Lesotho: moseha

M. ambalavaoensis (A. Camus) Conert (*Danthonia ambalavaoensis* A. Camus)

Africa. See *Bulletin de la Société Botanique de France* 107: 210. 1960, *Senckenbergiana Biologica* 51(1-2): 132. 1970.

M. arundinacea (Bergius) Conert (*Andropogon arundinaceus* Bergius; *Andropogon arundinaceus* (Roxb.) Voigt, nom. illeg., non *Andropogon arundinaceus* Bergius; *Andropogon arundinaceus* Heyne ex Hook.f., nom. illeg., non *Andropogon arundinaceus* Bergius; *Andropogon arundinaceus* Scop., nom. illeg., non *Andropogon arundinaceus* Bergius; *Andropogon arundinaceus* Willd., nom. illeg., non *Andropogon arundinaceus* Bergius; *Andropogon bergii* Roem. & Schult.; *Anthistiria arundinacea* Roxb.; *Avena elephantina* Thunb.; *Danthonia arundinacea* (Bergius) Schweick.; *Danthonia elephantina* (Thunb.) Nees)

South Africa. Perennial bunchgrass, tufted to densely tufted, tussocky, tall, reedlike, panicle contracted, glumes pubescent, lemma lobe bristly, lemma back hairy, on mountains, see *Descriptiones Plantarum ex Capite Bonae Spei, ...* 356. 1767, *Flora Carniolica, Editio Secunda* 274. 1772, *Prodromus Plantarum Capensium, ...* 23. 1794, *Species Plantarum* 4: 906. 1806, *Systema Vegetabilium* 2: 813. 1817, *Florae Africae Australioris Illustrationes Monographicae* 334. 1841, *Hort. Calcutt.* 706. 1845, *The Flora of British India* 7: 243. 1896 and *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 14(122): 197-198. 1938, *Senckenbergiana Biologica* 51: 132. 1970.

M. aureocephala (J.G. Anderson) Conert (*Danthonia aureocephala* J.G. Anderson)

South Africa. Perennial, tufted, panicle contracted, glumes golden-brown, lemma backs hairy, alpine grass, in

mountains, grassy slopes, see *Bothalia* 8: 170. 1964, *Senckenbergiana Biologica* 51: 132. 1970.

M. cincta (Nees) Conert (*Danthonia cincta* Nees)

South Africa. Perennial, tufted, reedlike, panicle dense and contracted, glumes 1-nerved, found in damp areas, sandy habitats, moist places, stream banks, mountain slopes, see *Florae Africae Australioris Illustrationes Monographicae* 332. 1841 and *Senckenbergiana Biologica* 51: 132. 1970.

M. cincta (Nees) Conert subsp. ***sericea*** N.P. Nigel

South Africa. Perennial, tussocky, sandy soil, see *Senckenbergiana Biologica* 51: 132. 1970, *South African Journal of Botany* 65(1): 105. 1999.

M. davyi (C.E. Hubb.) Conert (*Danthonia davyi* C.E. Hubb.) (after the British botanist Joseph Burt Davy (1870-1940), agrostologist, farmer, student of the flora of California, founder of the Pretoria National Herbarium, traveler, 1903 a Fellow of the Linnean Society, he wrote *A Manual of the Flowering Plants and Ferns of the Transvaal with Swaziland, South Africa*. London (Longmans, Green & Co.) 1926-1932, "The vernacular and botanical names of some South African plants." *Transv. Agric. J.* 2: 298-313. 1904, *Check-Lists of the Forest Trees and Shrubs of the British Empire*. Oxford 1935, and *The Classification of Tropical Woody Vegetation-Types*. Oxford 1935; see Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 122. London 1994; Frans A. Stafleu & Erik A. Mennega, *Taxonomic literature. Supplement III*. 271-274. 1995; Mary Gunn & Leslie E. Codd, *Botanical Exploration of Southern Africa*. Cape Town 1981; Alain Campbell White & Boyd Lincoln Sloane, *The Stapelieae*. Pasadena 1937; J.H. Barnhart, *Biographical notes upon botanists*. 1: 427. Boston 1965; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. 1964)

South Africa, Transvaal, Malawi. Perennial, wiry, tufted, tussocky, tough, forming large clumps, feathery, drooping leaves, dense panicle, glumes nerved, lemma lobes adnate to the central awn, used for making brushes, found in mountainous areas, open stream banks, rocky places, slopes, see *Flore Française ... Troisième Édition* 3: 32. 1805, *Systema Vegetabilium* 2: 690. 1817 and *Bulletin of Miscellaneous Information Kew* 1936: 501. 1936, *Kew Bulletin*, 1939: 645. 1940, *Senckenbergiana Biologica* 51: 132. 1970.

M. decora (Nees) Conert (*Danthonia decora* Nees; *Danthonia zeyheriana* Steud.; *Danthonia zeyheriana* var. *trichostachya* Stapf; *Danthonia zeyheriana* var. *zeyheriana* C.E. Hubb.)

South Africa. Perennial, tufted, culm bases bulbous and buried, old leaf sheaths persistent and woolly, panicle contracted, lemma backs hairy, growing in sandy soils, mountain slopes, see *Florae Africae Australioris Illustrationes Monographicae* 332. 1841, *Synopsis Plantarum Glumacearum* 1: 244. 1854, *Flora Capensis* 7: 522. 1899 and

Mitteilungen der Botanischen Staatssammlung München 10: 299-308. 1971.

M. disticha (Nees) Conert (*Danthonia disticha* Nees; *Rytidosperma disticha* (Nees) Cope; *Rytidosperma distichum* (Nees) Cope)

South Africa. Perennial bunchgrass, densely tufted, densely clumped, erect, unbranched, tough, wiry, mat-forming, ligule a ring of short hairs, leaf blades with sharp edges, leaves tough and filiform, leaf sheath usually glabrous, inflorescence a flattened spike or spike-like panicle, two rows of flattened spikelets, lemmas fringed along the margin, central awn geniculate, weed, unpalatable, very low grazing value, adapted to a wide range of habitats, coastal regions, montane bogs, deep soils, near streams, veld, marshes, slopes, open grassland, see *Florae Africae Australioris Illustrationes Monographicae* 335. 1841 and *Senckenbergiana Biologica* 51: 132. 1970, *Fl. Zambesiaca* 10(2): 9. 1999.

in English: wiry danthonia, mountain wire grass, copper wire grass

in South Africa: koperdraaddanthonia, koperdraadgras, bergkoperdraad, moseha, suurpol

M. drakensbergensis (Schweick.) Conert (also spelled *drakensbergensis*) (*Danthonia drakensbergensis* Schweick.)

South Africa, Natal Drakensberg. Perennial, tufted to densely tufted, clump forming, leaf blade very stiff and tightly folded, old leaf blades break off and two segments curl backwards, ligule an inconspicuous short membrane, panicle loosely contracted and interrupted, the very hard leaves are not grazed at all, used for making brooms and hats, handicrafts, ropes and mats, usually in stream banks, deep soil, seeps, high mountain grassveld, see *Senckenbergiana Biologica* 51: 132. 1970.

in English: broom grass

in South Africa: besemgras, molala-hlolo, moseha, mosea, moswa, mosua

M. dura (Stapf) Conert (*Danthonia brachyacme* Pilg.; *Danthonia dura* Stapf)

South Africa. Perennial bunchgrass, shortly rhizomatous, plant base not bulbous, panicle loosely contracted and nodding, lemma back glabrous, usually in sandy or stony soils, arid areas, see *Flora Capensis* 7: 527. 1899 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 44: 114. 1909, *Senckenbergiana Biologica* 51: 132. 1970, *Bothalia* 18: 111-114. 1988.

M. guillarmodiae Conert (*Merxmuellera guillarmodiae* Conert) (named for Amy Frances May Gordon Jacot Guillarmod (née Hean), 1911-1992, see Mary Gunn & Leslie E. Codd, *Botanical Exploration of Southern Africa*. 200. Cape Town 1981)

South Africa, Lesotho. Perennial, tufted, lemma pubescent, rocky areas, grassland, moist habitats, see *Senckenbergiana Biologica* 56: 145. 1975.

M. lupulina (Thunb.) Conert (*Avena lupulina* Thunb.; *Danthonia coronata* Trin.; *Danthonia lupulina* (Thunb.) P. Beauv. ex Roem. & Schult.)

South Africa. Perennial, tufted, culm bases bulbous and buried, leaf sheaths persistent and woolly, panicle contracted, found in sandy mountain slopes, see *Prodromus Plantarum Capensium*,... 23. 1794, *Systema Vegetabilium* 2: 690. 1817, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 1(1): 70. 1830 and *Mitteilungen der Botanischen Staatssammlung München* 10: 306. 1971.

M. macowanii (Stapf) Conert (*Danthonia macowanii* Stapf) (after the British (b. Hull, Yorks) botanist Peter MacOwan, 1830-1909 (Uitenhage, C.P., S. Africa), professor of chemistry, Director of the Botanical Garden at Capetown 1881-1892, 1885 Fellow of the Linnean Society, Government Botanist 1892-1905, Secretary of the South Africa Botanical Exchange Society, among his writings are "Personalia of botanical collectors at the Cape." *Trans. S. Afr. Philos. Soc.* 4(1): xxx-liii. 1884-1886, "Notulae capenses." *J. Linn. Soc. Bot.* 10: 480-482. 1869, *Catalogue of South African Plants*. Grahamstown 1866, "New Cape plants." *J. Linn. Soc. Bot.* 25: 385-394. 1889, *The Collecting and Preserving of Botanical Specimens*. [Cape Town 1893] and *Report Upon the Botanic Gardens Government Herbarium, Cape Town, for the Year 1891*. Capetown 1892, with Harry Bolus wrote "Catalogue of printed books and papers relating to South Africa. Part I, Botany." in *Trans. S. Afr. Philos. Soc.* 2(3): 111-187. 1880-1881, "Novitates capenses: description of new plants from the Cape of Good Hope." *J. Linn. Soc. Bot.* 18: 390-397. 1881 and *The Olive at the Cape*. Wynberg 1897. See J.H. Verduyn den Boer, *Botanists at the Cape*. Cape Town and Stellenbosch 1929; Mia C. Karsten, *The Old Company's Garden at the Cape and Its Superintendents: Involving an Historical Account of Early Cape Botany*. Cape Town 1951; Gilbert Westacott Reynolds (1895-1967), *The Aloes of South Africa*. 57, 58, 65. Balkema, Rotterdam 1982; John Hutchinson (1844-1972), *A Botanist in Southern Africa*. 643-644. London 1946; Mary Gunn & Leslie E. Codd, *Botanical Exploration of Southern Africa*. 240-242. Cape Town 1981; J.H. Barnhart, *Biographical notes upon botanists*. 2: 432. 1965; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 248. 1972; H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 205. 1964; S. Lenley et al., *Catalog of the manuscript and archival collections and index to the correspondence of John Torrey*. Library of the New York Botanical Garden. 278. 1973; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. 1917-1933;

A. White & B.L. Sloane, *The Stapelieae*. Pasadena 1937; R. Zander, F. Encke, G. Buchheim, & S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993; I.C. Hedge & J.M. Lamond, *Index of Collectors in the Edinburgh Herbarium*. Edinburgh 1970).

South Africa. Perennial, tufted, erect, forming dense clumps, sheaths persistent, ligule a fringe of hairs, leaves tightly folded with age, inflorescence a long loosely contracted interrupted panicle, spikelets on short branches, lemma lobes adnate to central awn, the dried folded stiff leaves used for making food and grain baskets, beer strainers, hats and mats, hard leaves unpalatable, found in marshy areas, stream banks, alpine and subalpine regions, in mountain grassveld, pools, see *Flora Capensis* 7: 527. 1899 and *Senckenbergiana Biologica* 51: 132. 1970.

in South Africa: moseha

M. papposa (Nees) Conert (*Danthonia papposa* Nees)

South Africa. Perennial, rare, tufted, very long tufts of hairs on the lemmas, lemma hairy and pubescent, central awn geniculate, see *Florae Africae Australioris Illustrationes Monographicae* 333. 1841 and *Senckenbergiana Biologica* 51: 133. 1970.

M. rangei (Pilg.) Conert (*Danthonia rangei* Pilg.)

South Africa. Perennial, tufted, upper nodes black or dark, basal sheaths persistent, leaf blades cylindrical, panicle contracted, central awn geniculate, pasture, on dry sandy areas, see *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 43: 386. 1909, *Senckenbergiana Biologica* 51: 133. 1970, *Bothalia* 18: 119-122. 1988, Melvin R. Duvall, Jeffrey D. Noll, & Alexandra H. Minn, "Phylogenetics of Paniceae (Poaceae)." *Am. J. Bot.* 88: 1988-1992. 2001.

M. rufa (Nees) Conert (*Avena lanata* Schrad., nom. illeg., non *Avena lanata* (L.) Koeler; *Danthonia lanata* (Schrad.) Schrad.; *Danthonia lanata* var. *lanata*; *Danthonia lanata* var. *major* Nees; *Danthonia macrocephala* Stapf; *Danthonia rufa* Nees)

South Africa. Perennial, tufted, base bulbous and buried, leaf sheaths persistent and woolly, panicle globose, spikelets densely clustered, central awn geniculate, on sandy soils, mountain slopes, burned veld, see *Göttingische gelehrte Anzeigen (unter der Aufsicht der Königl. Gesellschaft der Wissenschaften)* 3: 2075. 1821, *Mantissa* 2: 386. 1824, *Florae Africae Australioris Illustrationes Monographicae* 329-330. 1841, *Flora Capensis* 7: 522. 1899 and *Mitteilungen der Botanischen Staatssammlung München* 10: 306. 1971.

M. setacea N.P. Barker

South Africa. See *Bothalia* 21(1): 27, f. 1. 1991.

M. stereophylla (J.G. Anderson) Conert (*Danthonia stereophylla* J.G. Anderson)

South Africa. Perennial, tufted or densely tufted, ligule a short membrane, leaf blade tightly folded, very stiff leaves rigid and erect, contracted and shortly branched panicle, lemma backs glabrous, central awn geniculate and twisted, not grazed, common in alpine grasslands, see *Bothalia* 7: 419. 1960, *Senckenbergiana Biologica* 51: 133. 1970.

in South Africa: lesuwane

M. stricta (Schr.) Conert (*Avena hexandra* Steud.; *Chaetobromus fascicularis* Nees; *Chaetobromus strictus* (Schr.) Nees; *Danthonia fascicularis* (Nees) Steud.; *Danthonia stricta* Schrad.; *Pentameris stricta* (Schr.) Nees)

Lesotho, South Africa. Perennial bunchgrass, tufted to densely caespitose, erect, panicle loosely contracted and interrupted, lemma lobes bristly, useful for erosion control, found in a variety of habitats, rocky places, see *Mantissa* 2: 383. 1824, *Flora* 12(31): 486. 1829, *Linnaea* 7(3): 313. 1832, *Florae Africae Australioris Illustrationes Monographicae* I. Gramineae. 341-342. 1841, *Synopsis Plantarum Glumacearum* 1: 243. 1854 and *Senckenbergiana Biologica* 51: 129. 1970.

M. tsaratananensis (A. Camus) Conert (*Danthonia tsaratananensis* A. Camus)

Madagascar. See *Bulletin de la Société Botanique de France* 74: 692. 1927, *Senckenbergiana Biologica* 51: 133. 1970.

Mesosetum Steud. = *Bifaria* (Hack.) Kuntze, *Peniculus* Swallen

From the Greek *mesos* “in the middle, middle” and the Latin *saeta* (*seta*), *ae* “a bristle, hair.”

About 30-35 species, Mexico to Brazil, Central America, tropical South America. Panicoideae, Panicodae, Paniceae, or Panicoideae, Paniceae, Paspalinae, annual or perennial, herbaceous, tufted, stoloniferous, auricles absent, ligule fringed, plants bisexual, inflorescence of a solitary raceme slender and 1-sided, spikelets solitary arranged in 2 rows and often hairy along the nerves, lower floret male or sterile, upper floret hermaphrodite, 2 glumes unequal, lower glume awnless or awned, upper glume 3- 7-nerved, upper lemma acute to mucronate, palea 2-nerved, 2 free and fleshy lodicules, 3 stamens, ovary glabrous, 2 stigmas, savannah, type *Mesosetum cayennense* Steud., see *Synopsis Plantarum Glumacearum* 1: 118. 1855 [1854], *Österreichische Botanische Zeitschrift* 47: 75. 1897, *Revisio Generum Plantarum* 3[3]: 359. 1898 and *Proceedings of the Biological Society of Washington* 24: 121, 123. 1911, *American Journal of Botany* 19: 581. 1932, *Brittonia* 2(4): 363-392. 1937 [The grass genus *Mesosetum*], *Die natürlichen Pflanzenfamilien, Zweite Auflage* 14e: 70. 1940, *Acta Amazonica* 19: 47-114. 1989[1990] [Revisão de *Mesosetum* Steudel (Gramineae):

Paniceae)], *Flora Mesoamericana* 6: 355. 1994, *Contributions from the United States National Herbarium* 46: 135, 288-292, 527. 2003.

Species

M. agropyroides Mez

Brazil, Bolivia. Perennial, caespitose, erect, leaf blades linear to linear-lanceolate pubescent, rigid racemes, spikelets villous, elliptic-lanceolate, lower glume acute, lower and upper glumes 5-nerved, lower lemma 5-nerved with a palea, moist savannahs, similar to *Mesosetum gibbosum* Renvoise & Filg. and *Mesosetum penicillatum* Mez, see *Repertorium Specierum Novarum Regni Vegetabilis* 15: 125. 1918.

M. alatum Filg. (*Mesosetum agropyroides* Mez)

Brazil. See *Repertorium Specierum Novarum Regni Vegetabilis* 15: 125. 1918, *Brittonia* 39(2): 306. 1987.

M. annuum Swallen (*Mesosetum multicaule* Swallen)

Brazil. Rocky places, wet sites, slopes, open areas, see *Brittonia* 2(4): 377-379. 1937.

M. ansatum (Trin.) Kuhl. (*Panicum ansatum* Trin.; *Panicum ansatum* var. *linearifolium* S. Moore; *Thrasya ansata* (Trin.) Pilg.)

Brazil. Rhachis winged, see *Species Graminum* 1828-1836, *Transactions of the Linnean Society of London, Botany* ser. 2, 4: 505. 1895 and *Comissão de Linhas Telegraficas Estratégicas de Matto-Grosso ao Amazonas, Botanica* 67(Bot. 11): 42-43, 90. 1922, *Die natürlichen Pflanzenfamilien, Zweite Auflage* 14e: 69. 1940, *Acta Botanica Venezuelica* 14(4): 7-93. 1985[1987].

M. arenarium Swallen (*Mesosetum aequiglume* Swallen; *Mesosetum ansatum* (Trin.) Kuhl.)

Brazil. Sandy places, slopes, gravelly, see *Species Graminum* 1828-1836 and *Comissão de Linhas Telegraficas Estratégicas de Matto-Grosso ao Amazonas, Botanica* 67(Bot. 11): 42-43, 90. 1922, *Brittonia* 2(4): 380-382. 1937.

M. bifarium (Hack.) Chase (*Bifaria bifaria* (Hack.) Kuntze; *Bifaria caudiculata* (Hack.) Kuntze; *Mesosetum caudiculatum* (Hack.) Swallen; *Panicum bifarium* Hack.; *Panicum caudiculatum* Hack.)

Brazil. Lower glume awned, see *Österreichische Botanische Zeitschrift* 47: 76. 1897, *Revisio Generum Plantarum* 3(2): 359. 1898 and *Proceedings of the Biological Society of Washington* 24: 123. 1911, *Brittonia* 2(4): 369-370. 1937.

M. blakei Swallen (*Mesosetum tabascoense* Beetle) (to honor the American botanist Sidney Fay Blake, 1892-1959, bibliographer, traveler, correspondent of Degener and Fogg, among his writings are *New Plants from Guatemala and Honduras*. Washington 1922, *Native Names and Uses of Some Plants of Eastern Guatemala and Honduras*. Washington 1922 and *New Plants from Oaxaca*. Cambridge, Mass. 1918, with Alice Cary Atwood (1876-1947) wrote *Geographical Guide to Floras of the World*. Washington

1942; see J.H. Barnhart, *Biographical notes upon botanists*. 1: 196. 1965; T.W. Bossert, compil., *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 40. 1972; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. University of Pennsylvania Press, Philadelphia 1964; S. Lenley et al., *Catalog of the manuscript and archival collections and index to the correspondence of John Torrey*. Library of the New York Botanical Garden. 33. 1973; J. Ewan, editor, *A Short History of Botany in the United States*. New York and London 1969; Frans A. Stafleu & Erik A. Menega, *Taxonomic literature. Supplement II*. 190-195. Königstein 1993; Joseph Ewan, *Rocky Mountain Naturalists*. The University of Denver Press 1950; Carol Green Wilson, *Alice Eastwood's Wonderland: The Adventures of a Botanist*. California Academy of Sciences, San Francisco 1955; R. Zander, F. Encke, G. Buchheim, & S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993)

Guatemala, Mexico, Nicaragua. Perennial, erect, stoloniferous, medicinal, open areas, plains, see *Brittonia* 2(4): 390-391. 1937, *Phytologia* 35(3): 222. 1977.

in Nicaragua: walang

M. cayennense Steud. (*Mesosetum rottboellioides* (Kunth) Hitchc.; *Panicum rottboellioides* Kunth)

Guatemala, Brazil, Nicaragua. Perennial, tufted, erect, leaf blades linear, ligule ciliate, spikelets oblong-lanceolate sparsely pilose, lower glume blunt or emarginate, sandy places, similar to *Mesosetum rottboellioides* (Kunth) Hitchc., see *Nova Genera et Species Plantarum* 1: 96, t. 32. 1815 [1816], *Synopsis Plantarum Glumacearum* 1: 118. 1855 [1854] and *Contributions from the United States National Herbarium* 12(6): 211. 1909.

M. chaseae Luces (*Mesosetum cardonum* Luces; *Mesosetum cayennense* Steud.; *Mesosetum stoloniferum* Swallen)

Venezuela, Brazil. Rocky soil, slopes, see *Synopsis Plantarum Glumacearum* 1: 118. 1855 [1854] and *Journal of the Washington Academy of Sciences* 32(6): 160, f. 5. 1942, *Contributions from the United States National Herbarium* 29(9): 412. 1950, *Boletín de la Sociedad Venezolana de Ciencias Naturales* 15(80): 19-20, f. 12. 1953.

M. chlorostachyum (Döll) Chase (*Mesosetum chaseae* Luces; *Mesosetum chlorostachyum* (Döll) Kuhlm., nom. illeg., non *Mesosetum chlorostachyum* (Döll) Chase; *Panicum chlorostachyum* Döll)

Brazil. Perennial or annual, tufted, see *Flora Brasiliensis* 2(2): 173, t. 28a. 1877 and *Proceedings of the Biological Society of Washington* 24: 122. 1911, *Comissão de Linhas Telegraficas Estratégicas de Matto-Grosso ao Amazonas, Botanica* 67(Bot. 11): 42-43, 90. 1922, *Journal of the Washington Academy of Sciences* 32(6): 160, f. 5. 1942, *Acta Amaz.* 19: 77. 1989.

M. comatum Swallen

Argentina. See *Journal of the Washington Academy of Sciences* 30(5): 215. 1940.

M. compressum Swallen (*Mesosetum chlorostachyum* (Döll) Chase)

Brazil. See *Flora Brasiliensis* 2(2): 173, t. 28a. 1877 and *Proceedings of the Biological Society of Washington* 24: 122. 1911, *Brittonia* 2(4): 367-369, f. 1. 1937.

M. elytrochaetum (Hack.) Swallen (*Bifaria elytrochaeta* (Hack.) Kuntze; *Mesosetum compressum* Swallen; *Panicum elytrochaetum* Hack.)

Brazil. See *Flora Brasiliensis* 2(2): 173, t. 28a. 1877, *Österreichische Botanische Zeitschrift* 47: 77. 1897, *Revisio Generum Plantarum* 3(2): 359. 1898 and *Proceedings of the Biological Society of Washington* 24: 122. 1911, *Brittonia* 2(4): 367-370, f. 1. 1937.

M. exaratum (Trin.) Chase (*Mesosetum elytrochaetum* (Hack.) Swallen; *Mesosetum exaratum* (Trin.) Kuhlm., nom. illeg., non *Mesosetum exaratum* (Trin.) Chase; *Panicum exaratum* Trin.)

Brazil. See *De Graminibus Paniceis* 160. 1826, *Flora Brasiliensis* 2(2): 173, t. 28a. 1877, *Österreichische Botanische Zeitschrift* 47: 77. 1897, *Revisio Generum Plantarum* 3(2): 359. 1898 and *Proceedings of the Biological Society of Washington* 24: 121-122. 1911, *Comissão de Linhas Telegraficas Estratégicas de Matto-Grosso ao Amazonas, Botanica* 67(Bot. 11): 42-43, 90. 1922, *Brittonia* 2(4): 367-370, f. 1. 1937, *Acta Amazonica* 19: 47-114. 1989[1990].

M. ferrugineum (Trin.) Chase (*Mesosetum eriochrysoides* (Nees) Kuhlm.; *Mesosetum exaratum* (Trin.) Chase; *Mesosetum tenue* Renvoize & Filg.; *Panicum eriochrysoides* Nees; *Panicum ferrugineum* Trin.)

Central and southern Brazil. Perennial, slender, shortly rhizomatous, leaf sheaths densely packed, leaf blades linear or linear-lanceolate pilose pungent, spikelets densely hairy ferruginous, upper glume acute or acuminate, upper lemma and palea lanceolate, cerrado, see *De Graminibus Paniceis* 159-160. 1826, *Flora Brasiliensis seu Enumeratio Plantarum* 2: 103. 1829 and *Proceedings of the Biological Society of Washington* 24: 121-122. 1911, *Comissão de Linhas Telegraficas Estratégicas de Matto-Grosso ao Amazonas, Botanica* 67(Bot. 11): 42, 90. 1922, *Kew Bulletin* 39(1): 180. 1984.

in Brazil: grama

M. filifolium F.T. Hubb. (*Mesosetum angustifolium* (Swallen) Swallen; *Peniculus angustifolius* Swallen)

British Honduras, Venezuela. Erect, clumped, savannah, slopes, dry rocky slopes, grassland, sandy places, open areas, see *Synopsis Plantarum Glumacearum* 1: 118. 1855 [1854] and *Proceedings of the American Academy of Arts and Sciences* 49(8): 494. 1913, *American Journal of Botany*

19(7): 581, f. 1. 1932, *Journal of the Washington Academy of Sciences* 23(10): 460. 1933.

M. gibbosum Renvoize & Filg. (*Mesosetum ferrugineum* (Trin.) Chase)

Brazil. Perennial, knotty base, rhizomatous, leaf blades linear pungent, spikelets densely pilose, upper glume ovate, cerrado, see *De Graminibus Paniceis* 159. 1826 and *Proceedings of the Biological Society of Washington* 24: 122. 1911, *Kew Bulletin* 39(1): 181. 1984.

M. loliiforme (Hochst. ex Steud.) Chase (*Mesosetum acuminatum* Swallen; *Mesosetum altum* Swallen; *Mesosetum curtifolium* Swallen; *Mesosetum elongatum* Mez; *Mesosetum gibbosum* Renvoize & Filg.; *Mesosetum latifolium* Swallen; *Mesosetum loliiforme* (Steud.) Chase; *Mesosetum longifolium* Swallen; *Mesosetum molle* Swallen; *Mesosetum pubescens* Swallen; *Mesosetum sclerochloa* (Trin.) Hitchc.; *Mesosetum tenuifolium* Swallen; *Panicum loliiforme* Hochst. ex Steud.)

West Indies to Brazil, Venezuela. Perennial or short-lived perennial, prostrate, decumbent at base, sparsely or strongly stoloniferous or tufted, stolons absent or present, leaf blades linear to linear-lanceolate, leaves pilose or velvety pubescent, inflorescence a solitary 1-sided spike, slender spikes, spikelets ovate-lanceolate, lower glume keeled, upper glume triangular, lower lemma pubescent, upper lemma and palea glabrous, common in sandy soils, cerrado, savannah, gravel, wet sandy bank, grassland, open chapada, see *Species Graminum* 1828-1836, *Synopsis Plantarum Glumacearum* 1: 56, 118. 1853 [1855 or 1854] and *Contributions from the United States National Herbarium* 12(6): 212. 1909, *Botanical Gazette* 51: 302. 1911, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 56(Beibl. 125): 9. 1921, *Brittonia* 2(4): 382-388. 1937, *Kew Bulletin* 39(1): 181. 1984.

M. longiaristatum Filg. (*Mesosetum loliiforme* (Hochst. ex Steud.) Chase)

Brazil. See *Synopsis Plantarum Glumacearum* 1: 56. 1853 and *Botanical Gazette* 51: 302. 1911, *Brittonia* 39(2): 308. 1987.

M. pappophorum (Nees) Kuhl. (*Mesosetum longiaristatum* Filg.; *Panicum pappophorum* Nees; *Panicum pappophorum* var. *tenerius* Döll)

Brazil. See *Flora Brasiliensis seu Enumeratio Plantarum* 2: 104. 1829, *Flora Brasiliensis* 2(2): 175. 1877 and *Comissão de Linhas Telegraficas Estratégicas de Matto-Grosso ao Amazonas, Botanica* 67(Bot. 11): 90. 1922, *Brittonia* 39: 308. 1987, *Acta Amaz.* 19: 99. 1989.

M. penicillatum Mez (*Mesosetum elegans* Swallen; *Mesosetum pappophorum* (Nees) Kuhl.; *Panicum pappophorum* Nees; *Panicum pappophorum* var. *rigidus* Döll)

Brazil. See *Flora Brasiliensis seu Enumeratio Plantarum* 2: 104. 1829, *Flora Brasiliensis* 2(2): 175. 1877 and *Repertorium Specierum Novarum Regni Vegetabilis* 15: 124. 1918, *Comissão de Linhas Telegraficas Estratégicas de Matto-Grosso ao Amazonas, Botanica* 67(Bot. 11): 90. 1922, *Brittonia* 2(4): 375-376. 1937.

M. pittieri Hitchc.

Panama. M. stoloniferum Swallen (*Mesosetum chaseae* Luces)

Guatemala. Erect, long stolons absent or present, stoloniferous, see *Journal of the Washington Academy of Sciences* 32(6): 160, f. 5. 1942, *Contributions from the United States National Herbarium* 29(9): 412. 1950.

M. wrightii Hitchc.

Cuba, the Caribbean. See *Contributions from the United States National Herbarium* 12(6): 211. 1909.

Metasasa W.T. Lin = *Acidosasa* C.D. Chu & C.S. Chao ex Keng f.

From the Greek *meta* "change, sharing, next to" plus *Sasa* Makino & Shib.

Monotypic or two species, China, Guangdong, Xinhui Xian. Bambusoideae, Bambusodae, Bambuseae, Arundinariinae, perennial, monopodial, unarmed, two branches at each node, culms woody and persistent, rhizomes leptomorph, flowering culms leafy, cylindrical, internodes cylindrical, auricles inconspicuous, culm sheaths deciduous, ligule present, plants bisexual, open inflorescence paniculate, spikelets solitary, 2 very unequal glumes, palea present, 3 free and membranous lodicules, 6 stamens, 2 or 3 stigmas, type *Metasasa carinata* W.T. Lin, see *Journal of Bamboo Research* 1(2): 31. 1982, *Acta Phytotaxonomica Sinica* 26(2): 144-146, f. 1. 1988, Chao Chi-Son & S. A. Renvoize, "A revision of the species described under *Arundinaria* (Gramineae) in southeast Asia and Africa." *Kew Bulletin* 44(2): 349-367. 1989, *Act. Phyt. Sin.* 29(6): 520, f. 1. 1991, *Taxon* 46(1): 106. 1997.

Species

M. albofarinosa W.T. Lin (*Acidosasa nanunica* (McClure) C.S. Chao & G.Y. Yang; *Indocalamus nanunicus* McClure; *Metasasa albo-farinosa* W.T. Lin)

China, Guangdong. Cylindrical culm, one side of branch flat, finely pubescent, no sheath auricles and cilia, sheath ligule short and small, sheath blade erect, 2 branches on each node, 2-4 leaves on each twig, leaves lanceolate to ovate lanceolate, see *Lingnan University Science Bulletin* 9: 25. 1940, *Guihaia* 10(1): 19-20, f. 4. 1990, *Acta Phytotaxonomica Sinica* 39(1): 39. 2001.

M. carinata W.T. Lin (*Acidosasa nanunica* (McClure) C.S. Chao & G.Y. Yang; *Arundinaria nanunica* (McClure) C.D. Chu & C.S. Chao; *Indocalamus nanunicus* McClure; *Pseudosasa nanunica* (McClure) Z.P. Wang & G.H. Ye)

China, Guangdong. Type species, culm sheath caducous, sheath auricles and cilia inconspicuous, sheath blade small lanceolate, 2 branches at each node erect or spreading, 4-5 leaves on each twig, see *Lingnan University Science Bulletin* 9: 25. 1940, *Journal of Nanjing Technological College of Forest Products* 1980(3): 26. 1980, *Journal Nanjing University. Natural Sciences Edition* 1981(1): 97. 1981, *Acta Phytotaxonomica Sinica* 26(2): 145-146, f. 1. 1988, *Acta Phytotax. Sin.* 39(1): 39. 2001.

Metcalfia Conert = *Danthoniastrum* (J. Holub) Holub

After the British botanist Charles Russell Metcalfe, 1904-1991, plant anatomist, traveler, botanical explorer, plant collector in W. Cameroon (1937 with Hutchinson), Keeper

of the Jodrell Laboratory at Royal Botanic Gardens, Kew, his writings include "The wood structure of *Fokienia hodginsii* and certain related Coniferae." *Kew Bull.* 420-425. 1931, "The structure and botanical identity of some scented woods from the East." *Kew Bull. Misc. Inf.* 1933(1): 3-15, pl. 1-4. 1933, "The structure of some sandalwoods and their substitutes and of some other little known scented woods." *Bull. Misc. Inform.* 4: 165-195. 1935, "Some thoughts on the structure of bamboo leaves." *Bot. Mag.* (Tokyo) 69: 391-400. 1956 and *Anatomy of the Monocotyledons. Gramineae.* London 1960, with Laurence Chalk (1896-1979) wrote *Anatomy of the Dicotyledons.* London 1950 [with the assistance of Mary Margaret Chattaway (born 1899), Frederick Reginald Richardson (born 1915), C.L. Hare, & E.M. Slat-ter]. See J.H. Barnhart, *Biographical notes upon botanists.* 2: 480. 1965; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection.* 265. 1972; J. Ewan, editor, *A Short History of Botany in the United States.* 52. New York and London 1969; F.N. Hepper & F. Neate, *Plant Collectors in West Africa.* 55. 1971; Elmer Drew Merrill, *Contr. U.S. Natl. Herb.* 30(1): 211. 1947; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico.* Philadelphia 1964.

One or two species, Mexico, Balkans, Caucasus. Pooideae, Poodae, Aveneae, or Stipoideae, Stipeae, or Arundinoideae, Danthoneae, or Pooideae, Stipeae, Duthieinae, perennial, herbaceous, tufted, auricles present, ligule unfringed, plants bisexual, inflorescence paniculate, narrow panicle, spikelets paired and several-flowered, 2 subequal or unequal glumes 7-9-nerved, lemmas awned and thinly coriaceous, palea 2-nerved 2-keeled, 3 free and membranous lodicules, 2 stamens, ovary hairy, 2 plumose stigmas, open areas, stony hills, sometimes confused with *Danthonia* and *Helictotrichon*, type *Metcalfia mexicana* (Scribn.) Conert, taxonomic confusion, see *Willdenowia* 2(3): 417-419. 1960, *Botanical Magazine* 77(909): 69-72. 1964, *Willdenowia* 4: 399. 1968, *Folia Geobotanica et Phytotaxonomica* 5: 435. 1970, *Kew Bulletin* 40(4): 727-729. 1984 [1985], *Contributions from the United States National Herbarium* 48: 450. 2003.

Species

M. compacta (Boiss. & Heldr.) Clayton (*Arrhenatherum compactum* (Boiss. & Heldr.) Potztal; *Avena compacta* Boiss. & Heldr.; *Avenastrum compactum* (Boiss. & Heldr.) Halácsy; *Danthonia compacta* (Boiss. & Heldr.) Grossh.; *Danthonia compacta* Boiss. & Heldr.; *Danthoniastrum compactum* (Boiss. & Heldr.) Holub; *Helictotrichon compactum* (Boiss. & Heldr.) Henrard)

Europe, Greece. See *Diagnoses plantarum orientalium novarum* 1(7): 122-123. 1846 and *Conspectus Florae Graecae* 3: 370. 1904, *Flora Kavkaz* (2nd edition) 1: 217. 1939, *Blumea* 3(3): 430. 1940, *Willdenowia* 4: 399. 1968, *Folia*

Geobotanica et Phytotaxonomica 5: 436. 1970, *Kew Bulletin* 40(4): 728. 1985, *Fitologija* 39: 72-77. 1991.

M. mexicana (Scribn.) Conert (*Danthonia mexicana* Scribn.)

Mexico. Fodder, see *Proceedings of the Academy of Natural Sciences of Philadelphia* 43(2): 301, t. 13, f. 7, 7a-7d. 1891 and *Willdenowia* 2: 417. 1960.

in Mexico: zacate avenaceo, zacate mexicano avenaceo.

Mezochloa Butzin = *Alloteropsis* J. Presl

After the German botanist Carl Christian Mez, 1866-1944, professor of botany at Breslau, from 1899 to 1910 professor of botany at Halle, from 1910 to 1935 Director of the Königsberg Botanical Garden, contributor to C.F.P. von Martius *Flora Brasiliensis* (Bromeliaceae), contributor to Engler *Das Pflanzenreich* (Bromeliaceae, Myrsinaceae, Theophrastaceae, etc.), founder and editor of *Botanisches Archiv*. Königsberg 1922-1938, among his writings are *Lauraceae americanae*. Berlin 1889, "Spicilegium Laureanum." *Arbeiten Königl. Bot. Gart. Breslau*. 1(1): 71-166. 1892, "Bromeliaceae." *Monogr. Phan.* 9: 1-990. 1896, "Novae species Panicearum. *Notizbl. Bot. Gart. Berlin-Dahlem*. 7: 45-78. 1917, "Additamenta monographica 1919. I. Bromeliaceae." *Repert. Spec. Nov. Regni Veg.* 16: 2-10. 1919, "Gramineae novae vel minus cognitae. IV. Stipeae cont." *Repert. Spec. Nov. Regni Veg.* 17: 204-214. 1921 and "Stylagrostis, novum graminearum genus." *Bot. Arch.* 1: 20. 1922. See J.H. Barnhart, *Biographical notes upon botanists*. 2: 484. 1965; Hermann Hager, *Das Mikroskop und seine Anwendung*. Berlin 1908; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. 1917-1933; E.D. Merrill, in *Bernice P. Bishop Mus. Bull.* 144: 135. 1937 and *Contr. U.S. Natl. Herb.* 30: 212. 1947; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 266. 1972; S. Lenley et al., *Catalog of the manuscript and archival collections and index to the correspondence of John Torrey*. Library of the New York Botanical Garden. 291. 1973; August Weberbauer (1871-1948), *Die Pflanzenwelt der peruanischen Andes in ihren Grundzügen dargestellt*. 33. Leipzig 1911; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. Philadelphia 1964; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993.

Panicoideae, Paniceae, Paspalinae, type *Mezochloa aubertii* (Mez) Butzin, see *Reliquiae Haenkeanae* 1(4-5): 343-344, t. 47. 1830, *Niger Flora* 558. 1849 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 34(1): 134. 1904, *Flora of Tropical Africa* 9: 486. 1919, *Willdenowia* 4: 209, 211. 1966, *Contributions from the United States National Herbarium* 46: 16. 2003.

Mibora Adans. = *Chamagrostis* Borkh., *Knappia* Sm., *Libyella* Pamp., *Micagrostis* Juss., *Rothia* Borkh., *Sturmia* Hoppe

Two species, western Europe, Mediterranean, Eurasia. Pooideae, Poeae, Milliinae, or Pooideae, Poodae, Aveneae, annual, herbaceous, dwarf, tufted, leaves basal, auricles absent, narrow leaf blades, ligule an unfringed membrane, plants bisexual, inflorescence a unilateral raceme, spikelets shortly pedicellate solitary and flattened, 2 glumes membranous and obtuse, lemma rounded and obtuse, palea 2-nerved, 0-2 lodicules, 3 stamens, ovary glabrous, 2 stigmas pubescent, type *Mibora minima* (L.) Desv., open areas, sandy soils, damp places, see *Familles des Plantes* 2: 495. 1763, Moriz Balthasar Borkhausen (1760-1806), *Tentamen dispositionis plantarum Germaniae seminiferarum ...* 43. Darmstadt 1792, August Wilhelm Eberhard Christoph Wibel (1775-1813), *Primitiae Florae Werthemensis* 126. Ienae [Jena] 1799, *English Botany* 16: 1127. 1803, *Essai d'une Nouvelle Agrostographie* 167, pl. 8, f. 4. 1812, *Observations sur les Plantes des Environs d'Angers* 45. 1818, *Fundamenta Agrostographiae* 135. 1820, *Dictionnaire des Sciences Naturelles [Second édition]* 31: 17. 1824, *Syn. Mitteleur. Fl.* 2, 1: 118. 1899 and *Boll. Soc. Bot. Ital.* 1925: 151. 1925, *Bulletin de la Société d'Histoire Naturelle de l'Afrique du Nord* 32: 220. 1941, *Preslia* 46(2): 168. 1974, *Taxon* 49(2): 243. 2000, *Contributions from the United States National Herbarium* 48: 232-233, 409, 450-451, 604, 651. 2003.

Species

M. maroccana (Maire) Maire (*Libyella maroccana* Maire)

North Africa. See *Bulletin de la Société d'Histoire Naturelle de l'Afrique du Nord* 32: 220. 1941.

M. minima (L.) Desv. (*Agrostis minima* L.; *Chamagrostis minima* Borkhausen; *Chamagrostis littorea* Samp.; *Chamagrostis minima* (L.) Berkhout ex Wibel; *Chamagrostis verna* (P. Beauv.) Sloboda; *Knappia agrostidea* Sm.; *Knappia verna* Trin.; *Knappia vernalis* Trin.; *Mibora verna* (Persoon) P. Beauv.; *Mibora verna* P. Beauv.; *Sturmia minima* Hoppe; *Sturmia minima* (L.) Hoppe; *Sturmia verna* Pers.)

Mediterranean. Annual, tufted, filiform and erect, leaf sheath flattened, ligule membranous, see *Species Plantarum* 63. 1753, *Primitiae Florae Werthemensis* 126. 1799, *Flora Britannica* 3: 1387. 1804, *Syn. Pl.* 1: 76. 1805, *Essai d'une Nouvelle Agrostographie* 167, pl. 8, f. 4. 1812, *Observations sur les Plantes des Environs d'Angers* 45. 1818, *Fundamenta Agrostographiae* 114, t. 8, f. 4. 1820, *Species Graminum* 1: t. 17. 1824 and *Annuario da Academia Polytechnica do Porto* 14: 145. 1921, *Preslia* 46(2): 168. 1974, *Boletim da Sociedade Broteriana, ser. 2* 63: 153-205. 1990.

in English: early sand-grass, sand bent

in French: mibora printanière, poil de chat, famine

Micagrostis Juss. = *Mibora* Adans.

Latin *mica* "grain, a little bit" plus *agrostis*.

Pooideae, Poaeae, Miliinae, see *Familles des Plantes* 2: 495. 1763, *Observations sur les Plantes des Environs d'Angers* 45. 1818, *Dictionnaire des Sciences Naturelles [Second édition]* 31: 17. 1824 and *Contributions from the United States National Herbarium* 48: 450-451. 2003.

Michelaria Dumort. = *Bromus* L.

Pooideae, Bromeae, type *Michelaria bromoidea* (Lej.) Dumort., see *Species Plantarum* 1: 76. 1753, *Observations sur les Graminées de la Flore Belgique* 77. 1823 [1824], *Annales des Sciences Naturelles (Paris)* 5: 439, 459, t. 10, f. 1. 1825, *Bull. Soc. Roy. Bot. Belg.* 2: 319. 1863, *Bulletin de la Société Botanique de Belgique* 6: 399. 1867, *Bulletin de la Société Botanique de Belgique* 7: 60. 1868, *Consp. Fl. Eur.* 824. 1882, *Plantae Europaeae* 1: 117. 1890 and *U.S.D.A. Div. Agrostol. Bull.* 23: 1-66. 1900, *Synopsis der mitteleuropäischen Flora* 2: 602. 1901, *List of British Plants*, 2nd edition 133. 1928, *Brittonia* 7: 421. 1952, *Bull. Soc. Roy. Bot. Belgique*, 7(1): 59-60. 1968, *Notes Roy. Bot. Gard. Edinburgh* 30: 366. 1970, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 102: 447. 1981, *Taxon* 41: 559. 1992, *Collectanea Botanica a Barcinonensi Botanico Instituto Edita* 22: 151. 1993, *Taxon* 44: 611-612. 1995, *Contributions from the United States National Herbarium* 48: 154-191, 451. 2003.

Micraira F. Muell.

From the Greek *mikros* "small" and the genus *Aira* L., a small *Aira*.

A genus of 16 species, Australia, Western Australia, Northern Territory. Arundinoideae, Micraireae, or Danthonioideae, perennial, much-branched, herbaceous, mosslike, small, low, minute, densely packed and mat-forming, short internodes, auricles absent, leaf blades very small and very narrow, leaf sheaths completely covering the culms, spiral phyllotaxys, plants bisexual, open or contracted inflorescence spicate or paniculate or racemose, 2 glumes more or less equal, lemma muticous or mucronate, palea 2-keeled and many nerved or nerveless, lodicules absent, 2 stamens, ovary glabrous, 2 stigmas, these plants revive after dehydration, type *Micraira subulifolia* F. Muell., see Sir Ferdinand Jacob Heinrich von Mueller (1825-1896), *Fragmenta Phytographiae Australiae* 5: 208. 1866 and C.E. Hubbard, "Gramineae Australienses: III." *Kew Bull. Misc. Inf.* no. 3, 25-31. 1941, W.D. Clayton, "Studies in the Gramineae: XIII." *Kew Bulletin* 21(1): 99-110. 1967, D.F. Gaff and P.K. Latz, "The occurrence of resurrection plants in the Australian flora." *Aust. J. Bot.* 26: 485-492. 1978, M. Lazarides,

"*Micraira* F. Muell. (Poaceae, Micrairoideae)." *Brunonia* 2: 67-84. 1979, M. Lazarides, "New taxa of tropical Australian grasses (Poaceae)." *Nuytsia* 5(2): 290-296. 1984[1985], *New Phytologist* 156(3): 327-349. Dec 2002, *Flora of Australia* vol. 44B, Poaceae 3: 119-131. 2005.

Species***M. adamsii*** Lazarides

Australia. See *Brunonia* 2: 71. 1979.

M. brevis M.D. Barrett & R.L. Barrett

Western Australia.

M. compacta Lazarides

Australia. See *Brunonia* 2: 75. 1979.

M. dentata Lazarides

Australia. See *Brunonia* 2: 76. 1979.

M. dunlopü Lazarides (named after Clyde R. Dunlop, born in Brisbane on 26 Jan 1946, Conservation Commission of the Northern Territory, Darwin, DNA, see C.R. Dunlop & D.M.J.S. Bowman, *Atlas of the Vascular Plant Genera of the Northern Territory*. Aust. Flora & Fauna Series No. 6. Austral. Govt. Publ. Service, Canberra 1986; C.R. Dunlop, *Checklist of Vascular Plants of the Northern Territory*. Conserv. Comm. of N.T., Darwin 1990; G.L. Leach, C.R. Dunlop, M.J. Barritt, P.K. Latz, & N. Australia. See *Brunonia* 2: 78. 1979.

M. subspicata Lazarides

Australia. See *Brunonia* 2: 79. 1979.

M. subulifolia F. Muell.

Australia, Queensland. See *Fragmenta Phytographiae Australiae* 5: 208. 1867 and *Proc. Roy. Soc. Queensl.* 74: 46. 1964.

M. tenuis Lazarides

Australia. See *Brunonia* 2: 81. 1979.

M. viscidula Lazarides

Australia. Perennial, viscid, glandular, see *Nuytsia* 5(2): 295-296. 1984.

in English: mountain couch

Microbambus K. Schumann = *Guaduelia* Franch., *Microbambusa* Franch.

From the Greek *mikros* "small" plus *bambos*, *bambusa*, etc.

Guaduelleae, type *Microbambus macrostachys* K. Schum., see *Genera Plantarum* 1: 236. 1789, *Bulletin Mensuel de la Société Linnéenne de Paris* 1: 676. 1887, *Die Natürlichen Pflanzenfamilien* 2(2): 95. 1887, *J. Bot. Paris* 3: 305. 1889, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 24(3): 336, t. 4. 1897, *Bulletin Mensuel de la Société Linnéenne de Paris (sér. 2)* 3: 18. 1898 and *Wissenschaftlichen Ergebnisse der zweiten deutschen Zentral-Afrika-Expedition*, *Botanik* 2: 93. 1922, *Kew Bulletin* 16: 247-250. 1962, *Wageningen Agricultural University Papers* 92, 1(2): 1-557. 1992.

Microbriza Parodi ex Nicora & Rúgolo = *Briza* L., *Monostemon* Henr., *Poidium* Nees

From the Greek *mikros* "small" plus *Briza* L.

Two species, South America, Brazil to Argentina. Pooideae, Poodae, Poeae, or Pooideae, Poeae, Brizinae, perennial, herbaceous, tufted, auricles absent, leaf sheaths fibrous when old or dead, ligule an unfringed membrane, plants bisexual, open inflorescence paniculate, panicle compact, clusters of 2-3-flowered spikelets ovate to rounded, 2 glumes more or less equal, lower glume 3-nerved, lemmas broadly ovate and coriaceous, palea 2-nerved 2-keeled, 2 free and membranous lodicules, 1 stamen, ovary glabrous, 2 stigmas, exposed-cleistogamous or chasmogamous, in marshy soils, moist places, confused with *Isachne* R. Br., type *Microbriza poimorpha* (J. Presl) Parodi ex Nicora & Rúgolo, see *Species Plantarum* 1: 70. 1753, *An Introduction to the Natural System of Botany* 450. 1836, *Synopsis Plantarum Glumacearum* 1: 288. 1854 and *Mededeelingen van's Rijks-Herbarium Leiden* 40: 72. 1921, *Willdenowia. Beihefte* 8: 1-168. 1975, *Darwiniana* 23(1): 279-309. 1981, *Boletim do Instituto de Biociências, Universidade Federal do Rio Grande do Sul* 41: 1-191. 1987, *Cladistics* 14: 287-

296. 1998, *Contributions from the United States National Herbarium* 48: 146-151, 451, 453, 582-583. 2003.

Species

M. brachychaete (Ekman) Parodi ex Nicora & Rúgolo (*Briza brachychaete* Ekman; *Poidium brachychaetum* (Ekman) Matthei)

Southern America. See *Arkiv för Botanik utgivet av K. Svenska Vetenskapsakademien* 13(10): 60, t. 4, f. 3. 1913, *Willdenowia. Beihefte* 8: 107. 1975, *Darwiniana* 23(1): 296. 1981.

M. poimorpha (Presl) Parodi ex Nicora & Rúgolo (*Briza hackelii* (Lindm.) Ekman; *Briza poaemorpha* (J. Presl) Henrard; *Briza poimorpha* (J. Presl) Henrard; *Isachne hackelii* Lindm.; *Isachne poaemorpha* (J. Presl) Mez ex Ekman; *Microbriza poaemorpha* (J. Presl) Parodi ex Nicora & Rúgolo; *Microbriza poimorpha* (J. Presl) Nicora & Rúgolo; *Monostemon tuberculatus* Balansa ex Henrard; *Panicum poaemorphum* J. Presl; *Poidium poaemorphum* (J. Presl) Matthei; *Poidium poimorphum* (J. Presl) Matthei)

South America. See *Reliquiae Haenkeanae* 1(4-5): 310. 1830 and *Kongliga Svenska Vetenskapsakademiens Handlingar* 34(6): 11, t. 5. 1900, *Arkiv för Botanik utgivet av K. Svenska Vetenskapsakademien* 13(10): 61. 1913, *Mededeelingen van's Rijks-Herbarium* 40: 73. 1921, *Willdenowia. Beihefte* 8: 108. 1975, *Darwiniana* 23(1): 295. 1981.

Microcalamus Franchet = *Microcalamus* Gamble, *Neomicrocalamus* P.C. Keng

From the Greek *mikros* "small" and *kalamos* "reed," like a bamboo.

About 1-4 species, Cameroon, Gabon, Equatorial Guinea, Congo, tropical West Africa. Panicoideae, Panicodae, Paniceae, perennial, herbaceous, creeping, rhizomatous, stoloniferous, auricles absent, leaf blades lanceolate to ovate, ligule membranous more or less fringed to lacinate, plants bisexual, open or often contracted inflorescence paniculate, spikelets pedicellate laterally compressed, 2 glumes unequal to very unequal, upper lemma exerted lanceolate acute with a green crest, palea present, 2 free and fleshy lodicules, 3 stamens, ovary glabrous, 2 stigmas, shade, rain-forest, forest, forest floor, forest shade, type *Microcalamus barbinodis* Franch., see *Journal de Botanique (Morot)* 3(17): 282, f. B. 1889, *Journal of the Asiatic Society of Bengal. Part 2. Natural History* 59(2): 207, pl. 7. 1890 and *Wageningen Agricultural University Papers* 92, 1(2): 1-557. 1992.

Species

M. barbinodis Franch. (*Microcalamus aspidistrula* Stapf; *Microcalamus glaber* Stapf)

Tropical Africa. Rhizomatous, see *Journal de Botanique (Morot)* 3(17): 282, f. B. 1889 and *Hooker's Icones Plantarum* t. 3070, f. . 1916, *Flora of Tropical Africa* 9: 493-494. 1919.

M. convallarioides Stapf

Africa, Gabon. See *Hooker's Icones Plantarum* t. 3070. 1916.

Microcalamus Gamble = *Microcalamus* Franch., *Neomicrocalamus* P.C. Keng, *Racemobambos* Holttum, *Thamnocalamus* Munro

Greek *mikros* and *kalamos* "reed."

Asia, India, Vietnam, China, Bhutan. Bambuseae, Racemobambosinae, type *Microcalamus prainii* Gamble, see *Flora Boreali-Americana* 1: 73. 1803, *Transactions of the Linnean Society of London* 26(1): 33, 34, 157. 1868, *Gen. Pl.* 3(2): 1208. 1883, *Die natürlichen Pflanzenfamilien, Zweite Auflage* 2: 93. 1887, *Journal of the Asiatic Society of Bengal. Part 2. Natural History* 59(2): 207, pl. 7. 1890, *Annals of the Royal Botanic Garden, Calcutta.* 7: 21-22, pl. 19. 1896 and *Les Bambusées* 54. 1913, *The Gardens' Bulletin Singapore* 15: 268, 272. 1956 [also *Gardens' Bulletin, Straits Settlements*], *Phytomorphology* 1: 88 (1956, *Journal of Bamboo Research* 2(1): 38. 1983, *Journal of Bamboo Research* 2(2): 10. 1983, *Journal of Bamboo Research* 5(2): 13. 1986, *Kew Bulletin* 44(2): 349-367. 1989.

Microchlaena Spreng. = *Ehrharta* Thunb., *Microchlaena* Kuntze, *Microchlaena* Wallich ex R. Wight & Arnott (Sterculiaceae), *Microchlaena* Ching (Dryopteridaceae), *Microchlaena* R. Br., *Microchlaena* Endl. (Sterculiaceae)

Greek *mikros* "small" and *chlaena* "cloak."

Ehrhartoideae, Ehrharteae, see *Kongl. Vetenskaps Akademiens Handlingar* 40: 217, pl. 8. 1779, *Prodromus Florae Novae Hollandiae* 210. 1810, *A Numerical List of Dried Specimens* no. 1173. 1829, *Genera Plantarum* 1: 114. 1830, *Prodromus Florae Peninsulae Indiae Orientalis* 1: 71. 1834, *Icones Plantarum Indiae Orientalis* t. 882. 1840, *Genera Plantarum* 1004. 1840, *Nomenclator Botanicus. Editio secunda* 2: 783. 1841, *Bulletin de l'Herbier Boissier* 6(12): 965-966. 1898 and *Bulletin of the Fan Memorial Institute of Biology* 8(5): 322-327, pl. 6, f. 1. 1938, *Acta Phytotaxonomica Sinica* 9(1): 99. 1964.

Microchloa R. Br. = *Micropogon* Pfeiffer, *Rendlia* Chiov.

From the Greek *mikros* "small" and *chloe, chloa* "a grass," an allusion to the small size of the plant; see Robert Brown, *Prodromus Florae Novae Hollandiae*. 208. London 1810.

About 4-6 species, tropics and subtropics. Chloridoideae, Cynodonteae, Chloridineae, annual or perennial, unbranched, low, slender and wiry, delicate, mat-forming, usually decumbent, tufted, internodes solid, auricles absent, ligule fringed, leaves narrow linear and stiff, plants bisexual, inflorescence a slender single spike or solitary very slender racemes often curved or curling, 1 floret, 2-rowed spikelets solitary and sessile, semiterete rachis, 2 glumes subequal or more or less equal enclosing the florets, lower glume keeled, upper glume flat and rounded, lemma concealed, 3-nerved lemma keeled and shorter than the glumes, palea winged, 2 free and fleshy lodicules, 3 stamens, ovary glabrous, 2 stigmas, open habitats, steppes, bare open places, rainforest, hard soils, dry savannah, shallow soil, related to *Harpochloa* and *Ctenium*, type *Microchloa setacea* (Roxb.) R. Br., see *Plants of the Coast of Coromandel* 2: 17, t. 132. 1798, *Prodromus Florae Novae Hollandiae* 187, 208. 1810, *A Numerical List of Dried Specimens* 3807. 1831, *Nomenclator botanicus* 2: 310. 1847, *Fragmenta Phytographiae Australiae* 8: 113. 1873, *Revisio Generum Plantarum* 2: 764. 1891, *Transactions of the Linnean Society of London, Botany* 4: 57, t. 10, f. 7-12. 1894, *Catalogue of the African Plants Collected by Dr. F. Welwitsch in 1853-61* 2(1): 219. 1899 and *Flora Capensis* 7: 637. 1900, *Repertorium Specierum Novarum Regni Vegetabilis* 10: 119. 1911, *Annali di Botanica* 13: 53. 1914, *Hooker's Icones Plantarum* 31: t. 3099. 1922, *Kew Bulletin* 1933: 502-503. 1933 [also *Bulletin of Miscellaneous Information Kew*], *Proceedings of the Rhodesia Scientific Association* 32: 59. 1933, *Die natürlichen Pflanzenfamilien, Zweite Auflage* 14d: 82, 84. 1956, *Kew Bulletin* 16: 471-476. 1963, E. Launert, "A taxonomic revision of the genus *Microchloa* R. Br. (Gramineae, Chloridoideae, Chloridineae)." *Senckenbergiana Biologica* 47(4): 291-301. Frankfurt a. M. 1966, *Flora Mesoamericana* 6: 291. 1994, *Global Ecology and Biogeography* 7(6): 441-455. Nov 1998, *Contributions from the United States National Herbarium* 41: 141, 192. 2001, *New Phytologist* 156(3): 327-349. Dec 2002, *Botanical Journal of the Linnean Society* 148(1): 57-72. May 2005.

Species

M. caffra Nees (*Microchloa kunthii* Desv.)

South Africa, Lesotho, Tanzania, Zambia. Perennial bunchgrass, short, thin, wiry, unbranched, erect, densely tufted, forming small to tiny clumps, dense basal leaf cover, leaf sheaths rounded, basal sheaths break up into fine fibers when old, leaf blade wiry and narrow, ligule an inconspicuous

fringe of short hairs, leaves needle-like generally folded or rolled, very narrow unilateral or solitary spike often slightly curved, spikelets all borne on one side, strongly keeled glumes, low mass-yield, very low grazing value, palatable to relatively palatable, a pioneer grass useful for erosion control, suitable for stabilization of bare shallow soils, found in shallow soils, low lying areas, hard dry soil, in open sandy areas, shallow soils on rocky outcrops, moist soil, grassland, woodland, in disturbed and overgrazed areas, stony soils, rocky sites, slopes, sometimes near vleis, very similar to *Microchloa kunthii*, see *Prodromus Florae Novae Hollandiae* 208. 1810, *Mémoires de la Société d'Agriculture, Sciences et Arts d'Angers* 1: 179. 1831, *Florae Africae Australioris Illustrationes Monographicae* 246. 1841 and *Bothalia* 24(1): 92-96. 1994.

in English: pincushion grass, sickle grass

in South Africa: elsgras, gewöhnliches sichelgras

M. indica (L.f.) P. Beauv. (*Microchloa indica* (L.f.) Hack.; *Microchloa indica* (L.f.) Kuntze, nom. illeg., non *Microchloa indica* (L.f.) P. Beauv.; *Microchloa indica* var. *gracilis* Rendle; *Microchloa kunthii* Desv.; *Microchloa setacea* (Roxb.) R. Br.; *Nardus indica* L.f.; *Rottboellia setacea* Roxb.)

Tropics and subtropics. Annual, tufted or loosely tufted or solitary, delicate, small, very slender, erect or sometimes decumbent, weakly ascending, straggling, leaf sheaths keeled and not fibrous, leaf blades flat or folded tapering to a point, roots short and fibrous, solitary inflorescence curved when old, spikelets narrowly ovate or elliptic, shade species, grazed by all stock, shallow soils, damp sandy soil, roadsides, bushland, gravel, bare soil, swampy areas, overgrazed places, grassland, along roadsides, see *Supplementum Plantarum* 105. 1782, *Plants of the Coast of Coromandel* 2: 17, t. 132. 1798, *Prodromus Florae Novae Hollandiae* 208. 1810, *Essai d'une Nouvelle Agrostographie* (Atlas) 13, t. 20, f. 8. 1812, *Mémoires de la Société d'Agriculture, Sciences et Arts d'Angers* 1: 179. 1831, *Revisio Generum Plantarum* 3(2): 356. 1898, *Catalogue of the African Plants Collected by Dr. F. Welwitsch in 1853-61* 2(1): 219. 1899 and *Repertorium Specierum Novarum Regni Vegetabilis* 7(152-156): 373. 1909, *Senckenbergiana Biologica* 47(4): 291-301. 1966, *Flora Illustrata Catarinense* 1(Gram.): 1-435. 1981, *Flora Reipublicae Popularis Sinicae* 10(1): 88, pl. 27, f. 6-7. 1990, *Annals of the Missouri Botanical Garden* 81(4): 768-774. 1994.

in Mali: dugu konsina, fukobi, kulumbi, narkatabeli

in Nigeria: wicco falandu, wicco jalandu

in Somalia: arfo, harfo, harpho

in Upper Volta: hondo korlangal, kollaade, kollaangal, mbugaga, sutuhanga

in Bolivia: pajita

in India: kunda punookoo, navilu bannada hullu, panshiru

M. indica (L.f.) P. Beauv. var. *indica*

Bolivia, Brazil, Chile, Paraguay, Uruguay.

M. indica (L.f.) P. Beauv. var. *tenuis* Hack. & Stuck.

Argentina. See *Anales Museo Nacional de Historia Natural de Buenos Aires* 21: 113. 1911.

M. kunthii Desv. (*Microchloa abyssinica* Hochst. ex A. Rich.; *Microchloa abyssinica* Hochst.; *Microchloa elongata* R. Br.; *Microchloa indica* (L.f.) P. Beauv.; *Microchloa indica* var. *kunthii* (Desv.) B.S. Sun & Z.H. Hu; *Paspalum tenuissimum* M.E. Jones)

Tropics. Perennial, small to low, slender, densely tufted, tussocks, erect, wiry, sometimes compact mat-forming, leaves mostly basal, leaf blades wiry filiform, a dense mass of fibers surrounding the base, basal sheaths break up into fine fibers when old, ligule an inconspicuous ring of short hairs, inflorescence very narrow, solitary racemes curved when old, glumes equal and lanceolate, lemma ovate with margins densely ciliate, palea keels ciliate, 3 stamens, fodder, palatability unknown, low grazing value, grazed by domestic stock, found in shallow soil, montane grassland at high altitudes, stony hillsides, bushland, rocky or stony outcrops, rocky slopes, disturbed grassland, disturbed ground, gravelly soil, waterlogged places, well drained slopes, scrubland, open areas, open sandy patches, along trails and roadsides, among rocks, see *Supplementum Plantarum* 105. 1782, *Essai d'une Nouvelle Agrostographie* (Atlas) 13, t. 20, f. 8. 1812, *Mémoires de la Société d'Agriculture, Sciences et Arts d'Angers* 1: 179. 1831, *Numerical List of Dried Specimens* 3807. 1831, *Flora* 24(Intell.): 19. 1841, *Tentamen Florae Abyssinicae ...* 2: 404. 1850, *Transactions of the Linnean Society of London, Botany* 4: 36. 1894 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 62, Beibl. 141: 48, 61. 1928, *Contributions to Western Botany* 18: 24. 1935, *Senckenbergiana Biologica* 47(4): 291-301. 1966, *Flora Illustrata Catarinense* 1(Gram.): 1-435. 1981, *Memoir San Diego Society of Natural History* 12: 1-140. 1981, *Flora Reipublicae Popularis Sinicae* 10(1): 88, pl. 27, f. 6-7. 1990.

in English: pincushion grass

in Mexico: pasto

in Nigeria: wicco sondu

in Somalia: agar

in South Africa: elsgras

Microlaena R. Br. = *Ehrharta* Thunb.,
Microchlaena Kuntze, *Microchlaena* Wallich
 ex R. Wight & Arnott (Sterculiaceae),
Microchlaena Ching (Dryopteridaceae),
Microlaena Endl. (Sterculiaceae)

From the Greek *mikros* “small” and *chlaena*, *chlaenion* “cloak,” referring to the outer glumes, to the spikelets with minute glumes; see Robert Brown, *Prodromus florae Novae Hollandiae*. 210. London 1810.

About 5-10 species, Southeast Asia, the Philippines, Australia, New Zealand, Oceania. Bambusoideae, Oryzodae, Ehrharteae, or Ehrhartoideae, Ehrharteae, perennial, slender, wiry, stoloniferous and caespitose, scrambling, herbaceous or woody and persistent, branching at nodes, culm nodes glabrous, culm internodes hollow, auricles present or absent, ligule a membrane fringed or unfringed, leaves linear to linear-lanceolate, when present the hidden cleistogenes in the leaf sheaths, plants bisexual, inflorescence open, a single raceme or a narrow panicle, spikelets solitary and 3-flowered, spikelets with 1 bisexual flower, the 2 lower florets sterile and reduced to lemmas, 2 glumes very small to very minute, sterile lemmas awned and scabrous, fertile lemma acuminate but awnless, palea nerved or nerveless, 2 lodicules free and membranous, 1-2-4-6 stamens, ovary glabrous, 2 stigmas plumose and white, fruit compressed, shade species, open habitats, lawn grasses, they can invade large areas, sometimes referred to and included in *Ehrharta* Thunb., type *Microlaena stipoides* (Labill.) R. Br., see *Kongl. Vetenskaps Academiens Handlingar* 40: 217, pl. 8. 1779, *Prodromus Florae Novae Hollandiae* 210. 1810, *A Numerical List of Dried Specimens* no. 1173. 1829, *Genera Plantarum* 1: 114. 1830, *Prodromus Florae Peninsulae Indiae Orientalis* 1: 71. 1834, *Icones Plantarum Indiae Orientalis* t. 882. 1840, *Genera Plantarum* 1004. 1840, *Nomenclator Botanicus. Editio secunda* 2: 783. 1841, *Flora Novae-Zelandiae* 1: 288, t. 65a. 1853, *Flora Tasmaniae* 2: 205, t. 155A. 1860, *Fragmenta Phytographiae Australiae* 7: 89. 1870, *Transactions and Proceedings of the New Zealand Institute* 12: 356, t. 10. 1880, *Transactions and Proceedings of the New Zealand Institute* 21: 105. 1889, *Bulletin de l'Herbier Boissier* 6(12): 965-966. 1898, *Bulletin of Miscellaneous Information Kew* 1899: 114. 1899 and *The Subantarctic Islands of New Zealand* 2: 472. 1909, *Transactions and Proceedings of the New Zealand Institute* 43: 253. 1911, *Repertorium Specierum Novarum Regni Vegetabilis* 17(19-30): 292. 1921, *Bulletin of the Fan Memorial Institute of Biology* 8(5): 322-327, pl. 6, f. 1. 1938, *Transactions and Proceedings of the Royal Society of New Zealand* 73: 235. 1943, *Bulletin of the Tokyo Science Museum* 18: 10. 1947, *Acta Phytotaxonomica Sinica* 9(1): 99. 1964, *Blumea* 28: 181-194. 1982, *New Zealand J. Bot.* 36: 565-586. 1998, *Flora of New Zealand* 5: 44-52. 2000, *Contributions from the United States National Herbarium*

Species

M. avenacea (Raoul) Hook.f. (*Diplax avenacea* Raoul; *Ehrharta diplax* F. Muell.; *Ehrharta diplax* var. *diplax*; *Microlaena avenacea* var. *avenacea*)

New Zealand. Perennial, usually caespitose, blue green tussock, shortly rhizomatous, sometimes stolons rooting at nodes, leaf sheath smooth or scabrid, ligule membranous, wide sword-like drooping leaves, arching flower stems, inflorescence paniculate, glumes unequal, palea membranous, 1-2 stamens, groundcover plant, fast growing, high waterlogging tolerance, high wind tolerance, in New Zealand host of the toxic *Claviceps purpurea* (Fr.) Tulasne, occurs on stream banks, seepages, shade, see *Annales des Sciences Naturelles; Botanique, sér. 3* 2: 116. 1844, *Handbook of the New Zealand Flora* 320. 1864, *Fragmenta Phytographiae Australiae* 7: 90. 1870 and *Blumea* 28: 181-194. 1982.

in English: bush rice grass

M. carsei Cheeseman (*Microlaena avenacea* var. *carsei* (Cheeseman) Zotov) (named for Harry Carse, 1857-1930, botanical collector in New Zealand, the Herbarium near Christchurch is named after him; see E.J. Godley, “Biographical notes (29) Harry Carse (1857-1930).” *Newsletter / New Zealand Botanical Society* 51: 13-16. 1998)

New Zealand. Perennial, shortly rhizomatous, elongate slender internodes, leaf sheath glabrous, ligule triangular, shortly branched inflorescence, slender panicle, numerous solitary spikelets, glumes unequal, palea membranous, 2 stamens, open areas, forest, see *Handbook of the New Zealand Flora* 320. 1864 and *Transactions and Proceedings of the New Zealand Institute* 47: 47. 1915, *Transactions and Proceedings of the Royal Society of New Zealand* 73: 235. 1943, *New Zealand J. Bot.* 36: 578-579. 1998.

M. ciliatitertex Ohwi

Asia, Indonesia. See *Bulletin of the Tokyo Science Museum* 18: 10. 1947.

M. polynoda (Hook.f.) Hook.f. (*Diplax polynoda* Hook.f.; *Ehrharta multinoda* F. Muell.; *Microlaena ramosissima* Colenso)

New Zealand. Perennial, chasmogamous and cleistogamous, scrambling, many noded, rhizomatous, reedlike or bambusiform, cataphylls, ligule ciliate, leaf sheath keeled, short inflorescence, glumes unequal, stamens 4, sometimes confused with *Anemanthele lessoniana* (Steud.) Veldkamp, see *Flora Novae-Zelandiae* 290. 1853, *Handbook of the New Zealand Flora* 320. 1864, *Fragmenta Phytographiae Australiae* 7: 90. 1870, *Transactions and Proceedings of the New Zealand Institute* 21: 105. 1889 and *New Zealand J. Bot.* 36: 580-582. 1998.

M. stipoides (Labill.) R. Br. (*Ehrharta stipoides* Labill.)

Indonesia, Australia, Southeast Asia. Perennial, small, slender, prostrate, tufted, contracted or spreading short rhizomes, stems arching, sheaths with silky auricles, ligule membranous, leaves hairy with apex finely pointed, a narrow drooping panicle or a raceme, spikelets pedicellate and solitary, florets 3, glumes minute, sterile lemmas rough and long awned, fertile lemma awnless and pointed, palea nerved, usually 4 stamens, seed head curving and narrow, produces both chasmogamous and cleistogamous spikelets, cleistogenes occur in *Ehrharta stipoides* Labill., dense cover plant with invasive tendency, provides fodder, will produce a large bulk of green feed, browning off if not watered but will reshoot from small rhizomes at a hint of rain, responsive to added nitrogen, lawn grass, ornamental, pasture and turf, recommended for lawns on semishaded sites under trees, sand dune restoration, extremely valuable during dry periods, high wind and salt wind tolerance, high drought tolerance, low soil fertility high tolerance, tolerant of heavy grazing and acid soils, commonly found in woodland on sandstone and clay soils, disturbed sites, shaded or semishaded sites, semishade in forests, along streams, high fertility, grazed situations, see *Novae Hollandiae Plantarum Specimen* 1: 91, t. 118. 1805 [1804], *Prodromus Florae Novae Hollandiae* 210. 1810 and *New Zealand J. of Botany* 15: 531-534. 1977, *Diversity* 16: 51-52. 2000.

in English: weeping grass, meadow rice grass, weeping rice grass, slender rice grass, microlaena

M. stipoides (Labill.) R. Br. var. ***breviseta*** Vickery (*Ehrharta stipoides* Labill. var. *breviseta* (Vickery) L.P.M. Willemse)

Queensland, New South Wales. Bushy, spikelets purplish, shade species, tolerates sunny sites, see *Telopea* 1(1): 43. 1975, *Blumea* 28(1): 193. 1982.

M. stipoides (Labill.) R. Br. var. ***micrantha*** Domin

Australia, Queensland. See *Prodromus Florae Novae Hollandiae* 210. 1810.

M. stipoides (Labill.) R. Br. var. ***stipoides***

Australia, New South Wales, Malesia, Pacific Islands. Perennial, rhizomatous, extravaginal branching, multinoded stems, small auricles, ligule ciliate, spikelets green, shade

species, damp places, see *Prodromus Florae Novae Hollandiae* 210. 1810.

M. tasmanica (Hook.f.) Hook.f. ex Benth. (*Diplax tasmanica* Hook.f.)

Tasmania. Perennial, tufted or short creeping rhizome, slender stems, leaves flat with apex pointed, erect panicles loose and narrow or pyramidal, small spikelets on slender stalks, erosion control, see *Flora Tasmaniae* 2: 105, t. 155. 1858, *Flora Australiensis: A Description ...* 7: 552-553. 1878 and *Blumea* 28(1): 193. 1982.

M. tasmanica (Hook.f.) Hook.f. ex Benth. var. ***subalpina*** F. Muell. ex Benth. (*Ehrharta tasmanica* var. *subalpina* (F. Muell. ex Benth.) L.P.M. Willemse)

Tasmania. See *Flora Australiensis: A Description ...* 7: 552-553. 1878 and *Blumea* 28(1): 193. 1982.

M. tasmanica (Hook.f.) Hook.f. ex Benth. var. ***tasmanica***
Tasmania.

Micropogon Pfeiff. = *Microchloa* R. Br.

From the Greek *mikros* "small" and *pogon* "a beard."

Chloridoideae, Cynodonteae, Chloridinae, see *Prodromus Florae Novae Hollandiae* 208. 1810, *Nomenclator botanicus* 2: 310. 1847 and *Senckenbergiana Biologica* 47(4): 291-301. 1966, *Contributions from the United States National Herbarium* 41: 141. 2001.

Micropyropsis Romero Zarco & Cabezudo = *Micropyrum* (Gaudin) Link

Resembling the related genus *Micropyrum*.

One species, Spain. Pooideae, Poodae, Poeae, perennial, herbaceous, tuberous, basal internode cormlike, ligule an unfringed membrane, plants bisexual, inflorescence a bilateral raceme, 2 glumes very unequal, lower glume 1-nerved, upper glume 3-nerved, lemma with slender subterminal awn, palea 2-nerved 2-keeled, 2 free and membranous lodicules, 3 stamens, ovary glabrous, 2 stigmas, damp ground, damp sandy places, similar to *Micropyrum* (Gaudin) Link, type *Micropyropsis tuberosa* Romero Zarco, see *Lagascalia* 11(1): 95. 1983, *Anales del Jardín Botánico de Madrid* 45: 273. 1988.

Species

M. tuberosa Romero Zarco

Spain.

Micropyrum (Gaudin) Link

From the Greek *mikros* "small" and *pyros* "wheat."

About 3 species, Mediterranean. Pooideae, Poodae, Poeae, *Triticum* sect. *Micropyrum* Gaudin, annual, herbaceous, auricles absent, ligule an unfringed membrane, plants bisexual, inflorescence racemose or paniculate, raceme bilateral, spikelets several-flowered in 2 opposite rows, awns present or absent, 2 subequal glumes obtuse to acute, lower glume 1-3-nerved, upper glume 3-5-nerved, lemmas coriaceous obtuse to emarginate, palea 2-nerved 2-keeled, 2 free and membranous lodicules, 3 stamens, ovary glabrous without the apical appendage, 2 stigmas, open habitats, dry places, type *Micropyrum tenellum* (L.) Link, see *Flora Helvetica* 1: 366. 1828, *Atti Riunione Sci. Ital.* 481. 1841, *Linnaea* 17(4): 397. 1844 and *Syn. Mitteleur. Fl.* 2(1): 537. 1900, *Bulletin de la Société d'Histoire Naturelle de l'Afrique du Nord* 28: 386. 1937, *Engler's Botanische Jahrbucher* 74: 576. 1949, *Fl. Afrique N.* 3: 211. 1955, *Botanical Journal of the Linnean Society* 76: 350. 1978, *Nordic Journal of Botany* 1(1): 17-26. 1981, *Lagascalia* 11(1): 95. 1983, *Anales del Jardín Botánico de Madrid* 45: 273. 1988.

Species

M. patens (Brot.) Rothm. ex Pilg. (*Brachypodium patens* (Brot.) Nyman; *Catapodium patens* (Brot.) Rothmaler & P. Silva; *Micropyrum albaredae* Paunero; *Micropyrum tenellum* subsp. *patens* (Brot.) Rivas Mart.; *Nardurus patens* (Brot.) Hack.; *Triticum patens* Brot.)

Central and southwestern Europe, Spain, Portugal. Useful for erosion control, see *Fl. Lusit.* 1: 120. 1804, *Sylloge Florae Europaeae* 425. 1854-55 and *Agronomia Lusitana* 1: 248. 1939, *Engler's Botanische Jahrbucher* 74: 567, 576. 1949, *Lagascalia* 15(Extra): 117. 1988, *Boletim da Sociedade Broteriana, ser. 2* 61: 281-304. 1988, *Boletim da Sociedade Broteriana, ser. 2* 64: 35-74. 1991.

Soc.* 91: 439. 1985, *Anales del Jardín Botánico de Madrid* 42: 221-225. 1985, *Société pour l'Echange des Plantes Vasculaires de l'Europe et du Bassin Méditerranéen: Bulletin* 21: 68. 1986, *Anales de Biología, Facultad de Biología, Universidad de Murcia* 13: 26. 1987, *Lagascalia* 15(Extra): 117. 1988, *International Organization of Plant Biosystematists Newsletter* 13: 16. 1989, *Boletim da Sociedade Broteriana, ser. 2* 63: 153-205. 1990, *Lagascalia* 20(1): 161-166. 1997. in French: catapode des graviers

Microstegium Nees = *Coelarthron* Hook.f., *Ephobopogon* Steud., *Ischnochloa* Hook.f., *Leptatherum* Nees, *Nemastachys* Steud., *Pollinia* Trin., *Pollinia* Spreng., *Psilopogon* Hochst.

From the Greek *mikros* "small, tiny" and *stegē*, *stegos* "roof, cover," referring to small lemmas and to small spikes.

About 15 species, Asia tropical and subtropical. Panicoideae, Andropogonodae, Andropogoneae, Andropogoni-nae, or Panicoideae, Andropogoneae, Saccharinae, annual or perennial, variable, herbaceous, creeping or rambling, tufted or sprawling, decumbent, more or less branched and rooting from lower nodes, internodes solid, sheaths terete, auricles absent, leaves narrow-elliptic or lanceolate and often with a short false petiole, ligule short and membranous, plants bisexual, inflorescence terminal, digitate or solitary racemes bearing pairs of sessile and pedicellate spikelets, spikelets 2-flowered and similar, lower floret very variable, lower floret male or sterile (when present) or reduced to a single scale, upper floret perfect, 2 glumes more or less equal to subequal, lower glume with a median concavity, upper glume mucronate or shortly awned, tiny cordate lemmas, upper lemma linear to cordate, lemma of lower floret awnless, palea present or absent, 2 lodicules free and fleshy, stamens 3 or rarely 2, ovary glabrous, 2 stigmas, invasive weed species, shady places, related to *Eulalia*, type *Microstegium willdenovianum* Nees ex Lindl., see *Species Plantarum* 2: 1045. 1753, *Essai d'une Nouvelle Agrostographie* 56, 176, pl. 11, f. 7. 1812, *Plantarum Minus Cognitarum Pugillus* 2: 10. 1815, *Fundamenta Agrostographiae* 188. 1820, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Mildbraediochloa Butzin = Melinis P.

Beauv.

After the German botanist Gottfried Wilhelm Johannes Mildbraed, 1879-1954, traveler and explorer, plant collector, 1908 Duke of Mecklenbur's first expedition to Cameroon and 1910-1911 second expedition from Congo to Lake Chad (also Cameroon and Fernando Po), 1913 Keeper of Berlin Bot. Mus., 1928 Likomba, among his writings are "Plantae Tessmannianae Peruvianae II." *Notizbl. Bot. Gart. Berlin-Dahlem*. 9(84): 260-268. 1925, "Plantae Tessmannianae Peruvianae III." *Notizbl. Bot. Gart. Berlin-Dahlem*. 9(89): 964-997. 1926, "Acanthaceae novae." *Notizbl. Bot. Gart. Berlin-Dahlem*. 11(101): 63-71. 1930 and "Beiträge zur Flora von Deutsch-Südwestafrika." *Notizbl. Bot. Gart. Berlin*. 15: 448-471, 633-634. 1940, 15: 757-761. 1942, with Franz Otto Koch wrote *Die Banane ihre Kultur und Verbreitung*. Berlin 1926. See J.H. Barnhart, *Biographical notes upon botanists*. 2: 489. Boston 1965; F.N. Hepper & F. Neate, *Plant Collectors in West Africa*. 56. 1971; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 267. 1972; Adolf Friedrich Georg Ernst Albert Eduard, Duke of Mecklenburg (b. 1882), *Wissenschaftliche Ergebnisse der Deutschen Zentralafrika-Expedition 1907-1908*, unter Führung Adolf Friedrichs ... Band ii. *Botanik*. Leipzig 1914 and *From the Congo to the Niger and the Nile. An Account of the German Central African Expedition of 1910-1911*. Duckworth 1913; Anthonius Josephus Maria Leeuwenberg, "Isotypes of which holotypes were destroyed in Berlin." in

Webbia. 19(2): 862. 1965; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993.

One species, tropical Africa. Panicoideae, Paniceae, Melinidinae, or Panicoideae, Panicodae, Paniceae, perennial, herbaceous, plants bisexual, contracted paniculate inflorescence, pedicellate spikelets, 2 glumes unequal, upper glume membranous and awned, upper lemma laterally compressed and awned, 2 stigmas, type *Mildbraediochloa reynaudioides* (C.E. Hubb. ex Mildbr.) Butzin, rainforest, see *Willdenowia* 6(2): 288. 1971, *Bibliotheca Botanica* 138: 1-149. 1988.

Species

M. reynaudioides (C.E. Hubb. ex Mildbr.) Butzin (*Melinis reynaudioides* (C.E. Hubb. ex Mildbr.) Zizka; *Rhynchelytrum reynaudioides* (C.E. Hubb. ex Mildbr.) C.E. Hubb. ex Mildbr.)

Africa. See *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 13: 697. 1937, *Kew Bull.* 1939: 649. 1940.

Miliarium Moench = Milium L.

Latin *miliaris*, *a*, *um* or *milliarius* "belonging to millet."

Pooideae, Poaceae, Miliinae, see *Species Plantarum* 1: 61. 1753, *Familles des Plantes* 2: 34. 1763, *Methodus Plantas Horti Botanici* ... 204. 1794 and *Contributions from the United States National Herbarium* 46: 292-294. 2003, *Contributions from the United States National Herbarium* 48: 451-452. 2003.

Miliastrum Fabr. = Setaria P. Beauv.

Resembling *milium*.

Panicoideae, Paniceae, Setariinae, see *Species Plantarum* 1: 55, 61. 1753, *Enumeratio Methodica Plantarum* 206. 1759, *Familles des Plantes* 2: 34. 1763, *Methodus Plantas Horti Botanici* ... 204. 1794, *Essai d'une Nouvelle Agrostographie* 51, 178. 1812, *Flora Brasiliensis seu Enumeratio Plantarum* 2: 237. 1829, *Synopsis Plantarum Glumacearum* 1: 49. 1855 [1853] and *Contr. U.S. Natl. Herb.* 22(3): 156. 1920, J.F. Veldkamp, "Miscellaneous notes on southeast Asian Gramineae: 9. *Setaria* and *Paspalidium*." *Blumea* 39: 373-384. 1994, R.D. Webster, "Nomenclatural changes in *Setaria* and *Paspalidium* (Poaceae: Paniceae)." *Sida* 16: 439-446. 1995, *Contributions from the United States National Herbarium* 46: 441-442. 2003.

Milium Adans. = Panicum L.

Latin *milium*, *ii* "millet."

Panicoideae, Paniceae, Panicinae, see *Species Plantarum* 1: 61. 1753, *Familles des Plantes* 2: 34. 1763, *Methodus Plantas Horti Botanic ...* 204. 1794 and *Contr. U.S. Natl. Herb.* 15: 13-15. 1910, *Contributions from the United States National Herbarium* 46: 292-294. 2003, *Contributions from the United States National Herbarium* 48: 451-452. 2003.

Miliium L. = *Miliarium* Moench, *Miliium* Adans.

Latin *miliium*, ii “millet,” Greek *meline*; see Carl Linnaeus, *Species Plantarum*. 61. 1753 and *Genera Plantarum*. 5th edition. 30. 1754; S. Battaglia, *Grande dizionario della lingua italiana*. X: 383. Torino 1978; H. Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 386. 1996.

About 3-6 species, north temperate, Eurasia, North America. Pooideae, Poodae, Aveneae, or Stipeae, or Pooideae, Poeae, Miliinae, annual or perennial, erect, herbaceous, stems in loose tussocks or loosely tufted, stoloniferous or caespitose, culm internodes hollow, auricles absent, ligule an unfringed membrane, leaf blades flat and linear to undulate, plants bisexual, inflorescence paniculate, panicles loose or contracted, spikelets 1-flowered, floret dorsally compressed, spikelets with female-fertile florets only, glumes 2 more or less equal awnless, lemmas rounded and awnless, palea present, 2 free and membranous lodicules, stamens 3, ovary glabrous, 2 stigmas, ornamental, food source for game birds, ground cover, open habitats, woodlands, shade species, type *Miliium effusum* L., see *Species Plantarum* 1: 61. 1753, *Familles des Plantes* 2: 34. 1763, *Methodus Plantas Horti Botanic ...* 204. 1794, *Prodromus stirpium in horto ad Chapel Allerton vigentium*. 20. Miscanthidium Stapf = *Miscanthus* Andersson

Referring to the genus *Miscanthus*.

About 6-7/10 species, tropical and southern Africa. Panicoideae, Andropogonodae, Andropogoneae, Andropogoninae, or Panicoideae, Andropogoneae, Saccharinae, perennial, herbaceous, erect, rhizomatous, ligule an unfringed membrane, plants bisexual, spicate or paniculate inflorescence, spikelets paired, 2 glumes more or less equal or subequal, lower glume 2-keeled, upper glume 1-3-nerved, palea present, 2 free and fleshy lodicules, 3 stamens, 2 stigmas, sometimes referred to *Miscanthus*, hybrids with *Saccharum*, type *Miscanthidium teretifolium* (Stapf) Stapf, see *Öfversigt af Förhandlingar: Kongl. Svenska Vetenskaps-Akademien* 12: 165-166. 1855, *Primitiae Florae Amurensis* 331. 1859, *Monographiae Phanerogamarum* 6: 121. 1889, *Die Pflanzenwelt Ost-Afrikas* 5(50): 96. 1895 and *Contributions from the United States National Herbarium* 9: 399. 1905, *Flora of Tropical Africa* 9: 89-90. 1917, *Flore Générale de l'Indo-Chine* 7: 243. 1922, *Bulletin de la Société Botanique de France* 71: 1182. 1924, *Die natürlichen Pflanzenfamilien, Zweite Auflage* 14e: 113. 1940, William Julius Eggeling (b. 1909), *An Annotated List of the Grasses of the Uganda Protectorate* 44. 1944, *Journal of Japanese Botany* 25(1-2): 7. 1950, *Bulletin de la Société Botanique de France* 106: 338-339. 1959, *Kirkia* 3: 120. 1963, *J. Miscanthus Andersson = *Miscanthidium* Stapf, *Sclerostachya* (Andersson ex Hack.) A. Camus, *Triarrhena* (Maxim.) Nakai, *Xiphagrostis* Coville

Stalked spikelets, from the Greek *mischos* "stalk, pedicel" and *anthos* "flower," referring to the pedicellate spikelets; in form *miskos* "shell, husk."

About 17-20 species, mainly Southeast Asia, Old World tropics, Africa. Panicoideae, Andropogonodae, Andropogoneae, Andropogoninae, or Panicoideae, Andropogoneae, Saccharinae, perennial with invasive tendencies, strong and robust, tall, clump-forming, rhizomatous or tufted, stems reedlike or canelike, nodes solid and erect, internodes solid, auricles absent, leaf sheath loose, leaves narrow and with rough edges, ligule membrane-like and fringed or densely

ciliate, plants bisexual, inflorescence subdigitate or paniculate and terminal, tough raceme rachis, arching and pubescent racemes bearing many small spikelets, spikelets bisexual and paired, pedicellate spikelets, 2-flowered, upper floret hermaphrodite, lower floret sterile, 2 glumes almost membranous to papery and more or less equal, lower glume convex or keeled, upper lemma entire or bidentate, callus with long fine hairs, a spreading involucreal beard from the callus, palea awnless and nerveless, 2 lodicules free and fleshy or 0, 2-3 stamens, ovary glabrous, 2 stigmas, ornamental, cultivated for the spectacular flower heads and foliage, one of the most economical renewable energy crops, lawn specimens, weed species, biofuel and power source, energy and fiber production, construction material, fiberboards, thatching, wind filters, screening, horse and animal bedding, some species useful for making paper, tolerate sea sprays and strong winds, usually extremely hardy, growing in streamsides, open places, hillsides, ponds and streams, marshes and moist soils, meadows, forest margins, related to *Saccharum*, *Miscanthidium*, and *Sclerostachya*, intergeneric hybrids with *Saccharum* L., type *Miscanthus capensis* (Nees) Andersson, see *Öfversigt af Förhandlingar: Kongl. Svenska Vetenskaps-Akademien* 12: 165-166. 1855, *Primitiae Florae Amurensis* 331. 1859, *Monographiae Phanerogamarum* 6: 121. 1889, *Die Pflanzenwelt Ost-Afrikas* 5(50): 96. 1895 and *Contributions from the United States National Herbarium* 9: 399. 1905, *Flora of Tropical Africa* 9: 89-90. 1917, *U.S. Dept. Agric. Bull.* 772: 254. 1920, *Flore Générale de l'Indo-Chine* 7: 243. 1922, *Bulletin de la Société Botanique de France* 71: 1182. 1924, *Die natürlichen Pflanzenfamilien, Zweite Auflage* 14e: 113. 1940, William Julius Eggeling, *An Annotated List of the Grasses of the Uganda Protectorate* 44. 1944, *Journal of Japanese Botany* 25(1-2): 7. 1950, *Claves Generum et Specierum Graminearum Primarum Sinicarum Appendice Nomenclatione Systematica* 233. 1957, *Bulletin de la Société Botanique de France* 106: 338-339. 1959, *Bull. Plantarum Glumacearum 1: 408. 1855 and *Taxon* 33(3): 442. 1984.

M. floridulus (Labill.) Warb. ex K. Schum. & Lauterb. (*Erianthus floridulus* (Labill.) Schult.; *Eulalia japonica* Trin.; *Miscanthus formosanus* A. Camus; *Miscanthus japonicus* Andersson; *Miscanthus japonicus* (Trin.) Andersson; *Miscanthus ryukyensis* Honda; *Saccharum floridulum* Labill.; *Xiphagrostis floridula* (Labill.) Coville)

Southeast Asia, Asia temperate and tropical, Taiwan, Pacific Islands, Ryūkyū Island. Perennial clump grass, deep green, tall, robust and huge, tufted, stout and hollow reedlike culms, rhizomes short and thick, leaf sheath hairy at the base, leaves elongate and drooping, scabrid-toothed leaf margins, pyramidal and erect terminal panicles, slender racemes branched at base, paired spikelets lanceolate and acute, feathery flower clusters mature from a light reddish tan to silver, lower glume lanceolate, glumes herbaceous, lemmas lanceolate and hyaline, palea hyaline, stems used to make torches, noxious weed species, aggressive and invasive pest, potential seed contaminant, ornamental, fluffy silver plumes, cultivated, used for biomass energy production, can be used in seaside gardens, tolerates salty and coastal conditions, tolerates wind and salt spray, hardness is questionable, unopened flower spikes edible, closely related to *Miscanthus sacchariflorus* (Maxim.) Benth., grows on moist soils in meadows, open places, see *Sertum Austro-Caledonicum* Pars prior 13, t. 18. Parisii 1824, *Mantissa* 3(Add. 1): 563. 1827, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. M. nepalensis (Trinius) Hackel (*Diandranthus nepalensis* (Trin.) L. Liou; *Erianthus nepalensis* (Trin.) Steud.; *Eulalia nepalensis* Trin.)

India, Sikkim, Asia temperate and tropical, Bhutan, Nepal. Perennial, stout and silky, shining bronze inflorescences nodding and plumose, leaves more or less glabrous, ornamental, invasive, moist places, shade, waste areas, roadsides, see *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 2(3): 333. 1832, *Nomenclator Botanicus. Editio secunda* 1: 567. 1840, *Monographiae Phanerogamarum* 6: 104. 1889 and *Flora Xizangica* 5: 313, f. 174. 1987.

in English: Himalayan fairy grass, Nepal silver grass

M. nudipes (Grisebach) Hackel (*Diandranthus nudipes* (Griseb.) L. Liou; *Erianthus nudipes* Griseb.)

India, Sikkim. Silky, inflorescences nodding and plumose, leaves more or less pilose, wet places, see *Nachrichten von der Königlichen Gesellschaft der Wissenschaften und von der Georg-Augusts-Universität* 1868: 92. 1868, *Monographiae Phanerogamarum* 6: 109. 1889 and *Bulletin*

du Muséum d'Histoire Naturelle 25: 670. 1919, *Kew Bulletin* 8: 273-274. 1953, *Pl. Taxonomic Soc. Korea, Seoul* 1972: 18. 1972, *Flora Xizangica* 5: 312, f. 143. 1987.

M. oligostachyus Stapf (*Miscanthus matsumurae* Hack.)

Asia, Japan. Dense clump forming, bamboo-like leaves, silver flowers, see *Bulletin of Miscellaneous Information Kew* 1898: 227. 1898 and *Bulletin de l'Herbier Boissier, sér. 2*, 4(6): 532. 1904, *Botanical Magazine* 47: 296. 1933, *Journal of Japanese Botany* 19: 226. 1943, *Grasses of Japan and its Neighboring Regions* 517. 1987.

in English: small Japanese silver grass

M. sacchariflorus (Maxim.) Benth. (*Imperata saccharifera* Andersson; *Imperata saccharifera* Andersson ex Benth.; *Imperata sacchariflora* Maxim.; *Miscanthus saccharifer* Benth.; *Miscanthus sacchariflorus* (Maxim.) Hack.; *Tiarrrhena sacchariflora* (Maxim.) Nakai; *Triarrhena sacchariflora* (Maxim.) Nakai)

Asia temperate, China, Japan. Perennial, rhizomatous with long invasive rhizomes, creeping, stiff leaves linear and acute, green or reddish finely hairy panicles, flimsy racemes, silky and narrow spikelets, ornamental, weed, wind hardy, useful for edges of ponds and streams, occurs on flood plains and riverbanks in meadows, maritime exposure, along roadsides, roadside ditch, closely related to *Miscanthus floridulus* (Labill.) Warb. ex K. Schum. & Lauterb., see *Mémoires Présentés à l'Académie Impériale des Sciences de Saint Pétersbourg par Divers Savans et lus dans ses Assemblées* 9: 331. 1859, *Journal of the Linnean Society, Botany* 19: 65. 1881, *Die Natürlichen Pflanzenfamilien* 2: 23. 1887, *Monographia Andropogonearum* 102. 1889 and *Journal of Japanese Botany* 25(1-2): 7. 1950, *Bull. Fac. Agric. Mie University* 17: 57, 59. 1958, *Pl. Taxonomic Soc. Korea, Seoul* 1972: 17-18. 1972, *Journal of Huazhong Agricultural University* (Suppl.): 56-60. 1989.

in English: Amur silver grass, silver plume grass, silver banner grass, Chinese silver grass

M. sinensis Andersson (*Erianthus japonicus* (Trin.) P. Beauv.; *Eulalia japonica* Trin.; *Eulalia japonica* var. *gracillima* (Hitc.) Grier; *Miscanthus japonicus* (Trin.) Andersson; *Miscanthus matsudae* Honda; *Miscanthus matsudae* var. *glabrescens* Honda; *Miscanthus sinensis* f. *glaber* Honda; *Miscanthus sinensis* f. *gracillimus* (Hitc.) Ohwi; *Miscanthus sinensis* f. *sinensis*; *Miscanthus sinensis* f. *variegatus* (Beal) Beetle; *Miscanthus sinensis* f. *zebrinus* (Beal) Beetle; *Miscanthus sinensis* var. *gracillimus* A.S. Hitchc.; *Miscanthus sinensis* var. *variegatus* Beal; *Miscanthus sinensis* var. *zebrinus* Beal; *Ripidium japonicum* (Trin.) Trin.; *Saccharum japonicum* Thunb., nom. illeg., non *Saccharum japonicum* Houtt.; *Xiphagrostis japonica* (Thunb.) Coville; *Xiphagrostis japonicus* (Trin.) Coville)

Eastern Asia, Asia temperate and tropical. Perennial with a clump forming habit, erect and rigid, shortly rhizomatous, tufted, tough, robust, not stoloniferous, large and impenetrably

dense clumps, ligule a short ciliate rim or long-ciliate, blue green erect or arching leaves acute and linear, leaf sheaths stiff and papery, brown or reddish purple branching panicles, numerous silky spreading racemes, spikelets lanceolate and paired, cultivated and naturalized, quite drought-tolerant, extremely hardy, biofuel, potential biomass for energy generation, useful for making paper, grown as an ornamental, many cultivars, immature flower spikes edible, the plant diuretic and refrigerant, usually occurs in wetlands, grassy places, moist meadows on slopes in lowland and mountains, occasionally found in nonwetlands, see *Transactions of the Linnean Society of London, Botany* 2: 328. 1794, *Essai d'une Nouvelle Agrostographie* 14, 162, 177. 1812, *Fundamenta Agrostographiae* 169. 1820, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. in English: silver grass, Japanese plume grass, Japanese silver grass, miscanthus, eulalia, Chinese silver grass, Chinese fairy grass, zebra grass, maiden grass

in Danish: japansk græs, Elefantgræs

in Japan: susuki

in China: mang jing, mang

in Vietnam: say

M. sinensis Anderss. subsp. **purpurascens** (Andersson) Tzvelev (*Miscanthus purpurascens* Andersson; *Miscanthus sinensis* var. *purpurascens* (Anderss.) Rendle; *Miscanthus sinensis* var. *purpurascens* (Andersson) Matsum.)

Asia temperate, China, Japan, Russia. Ornamental, dark green and reddish leaf blades, flowers silvery white, see *Öfversigt af Förhandlingar: Kongl. Svenska Vetenskaps-Akademien* 12: 136, 166-167. 1856 [or 1855] and *Journal of the Linnean Society, Botany* 36: 348. 1904, *Zlaki SSSR* 693. 1976.

in English: purple silver grass, flame grass

M. sinensis Anderss. subsp. **sinensis**

Asia temperate, China, Japan, Russia. Ornamental, naturalized.

in English: Japanese silver grass, eulalia

M. sinensis Anderss. var. **condensatus** (Hack.) Makino (*Miscanthus condensatus* Hack.; *Miscanthus sinensis* subsp. *condensatus* (Hack.) T. Koyama; *Xiphagrostis condensatus* (Hack.) W. Wight)

Asia, Japan. A compact plant, bold leaves, red flowers, see *Bulletin de l'Herbier Boissier* 7(9): 639. 1899 and *U.S. Department of Agriculture Bureau of Plant Industry Bulletin* 137: 17. 1909, *Botanical Magazine (Tokyo)* 27: 254. 1913, *Grasses of Japan and its Neighboring Regions* 518. 1987, Yu-Chung Chiang, Barbara A. Schaal, Chang-Hung Chou, Shong Huang, & Tzen-Yuh Chiang, "Contrasting selection modes at the *Adh1* locus in outcrossing *Miscanthus sinensis* vs. inbreeding *Miscanthus condensatus* (Poaceae)." *Am. J. Bot.* 90: 561-570. 2003.

M. sinensis Anderss. var. **formosanus** Hack.

Asia, Taiwan. See *Öfversigt af Förhandlingar: Kongl. Svenska Vetenskaps-Akademien* 12: 136. 1856 and *Bulletin de l'Herbier Boissier, sér. 2*, 4(6): 526. 1904.

M. sinensis Anderss. var. **sinensis**

Australia. Leaves green.

M. sinensis Anderss. var. **variegatus** Beal (*Miscanthus sinensis* f. *variegatus* (Beal) Beetle)

Australia. Leaves green and white or cream-white longitudinally striped, see *Öfversigt af Förhandlingar: Kongl. Svenska Vetenskaps-Akademien* 12: 136. 1856, *Grasses of*

North America for Farmers and Students 2: 25. 1896 and *Phytologia* 38(3): 175. 1978.

in English: variegated Japanese silver grass

M. sinensis Anderss. var. **zebrinus** Beal (*Miscanthus sinensis* f. *variegatus* (Beal) Beetle; *Miscanthus sinensis* f. *zebrinus* (Beal) Beetle; *Miscanthus zebrinus* (Beal) Nak. ex Matsum.)

Australia. Erect, horizontal banding, leaves green and white to yellowish transversely striped, see *Öfversigt af Förhandlingar: Kongl. Svenska Vetenskaps-Akademien* 12: 136. 1856, *Grasses of North America for Farmers and Students* 2: 25. 1896 and *Phytologia* 38(3): 175. 1978.

in English: zebra grass

M. szechuanensis Keng ex S.L. Zhong (*Diandranthus szechuanensis* (Keng ex S.L. Zhong) L. Liou; *Diandranthus yunnanensis* (A. Camus) L. Liou)

Asia, China. See *Bulletin du Muséum d'Histoire Naturelle* 25: 670. 1919, *Claves Generum et Specierum Graminearum Primarium Sinicarum Appendice Nomenclatione Systematica* 233. 1957, *J. SouthW. Agricultural University* 1982(4): 80. 1982, *Vascular Plants of the Hengduan Mountains* 2: 2297. 1994, *Flora Reipublicae Popularis Sinicae* 10(2): 14. 1997.

M. taylorii Bor (*Miscanthus nudipes* subsp. *taylorii* (Bor) Y.N. Lee)

Tibet. See *Monographiae Phanerogamarum* 6: 109. 1889 and *Kew Bulletin* 8: 273. 1953, *Pl. Taxonomic Soc. Korea, Seoul* 1972: 18. 1972.

M. tinctorius (Steudel) Hackel (*Miscanthus sieboldii* Honda; *Saccharum tinctorium* Steud.)

Japan. Perennial, tufted, leaves broad-linear, inflorescence erect, exerted corymbs, spikelets acute and tufted-pubescent, glumes coriaceous and brown, see *Synopsis Plantarum Glumacearum* 1: 469. 1855, *Monographiae Phanerogamarum* 6: 103. 1889 and *Journal of the Faculty of Science: University of Tokyo, Botany* 3: 390. 1930, *Botanical Magazine* 47: 296. 1933, *Acta Phytotaxonomica et Geobotanica* 11: 150. 1942.

M. transmorrisonensis Hayata

Taiwan. Evergreen and fast growing clumping grass, narrow green leaves, golden and sparsely branched panicles, silky arching spikes, delicate and showy flowers, ornamental, drought resistant, can handle sandy or heavy soils, tolerates partial shade or sun, excellent for erosion control, similar to *Miscanthus floridulus* (Labill.) Warb., see *Journal of the College of Science, Imperial University of Tokyo* 30(1): 404-405. 1911.

in English: evergreen miscanthus, Taiwanese miscanthus, Formosa miscanthus, evergreen maiden grass

M. violaceus (K. Schum.) Pilger (*Erianthus flavescens* K. Schum.; *Erianthus violaceus* K. Schum.; *Erianthus*

violascens K. Schum.; *Miscanthidium violaceum* (K. Schum.) Robyns)

Africa, Uganda, Zaire. See *Die Pflanzenwelt Ost-Afrikas* 5(50): 96. 1895 and *Flore Agrostologique du Congo Belge* 82. 1929, *Die Natürlichen Pflanzenfamilien* 2nd edition 14e: 113. 1940.

in Tanzania: eishanga, ishanga

M. wardii Bor (*Miscanthus nudipes* subsp. *wardii* (Bor) Y.N. Lee) (for the British (b. Manchester) plant collector Francis (Frank) Kingdon Ward, 1885-1958 (d. London), 1907 Shanghai, 1909-1956 collected in China, Burma, Tibet, and Thailand, 1920 Fellow of the Linnean Society, son of Harry Marshall Ward (1854-1906, d. Devon); see T.W. Bossert, compil., *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 212. 1972; M. Hadfield et al., *British Gardeners: A Biographical Dictionary*. London 1980; R. Desmond, *The European Discovery of the Indian Flora*. Oxford 1992; Charles Lyte, *The Plant Hunters*. 151-165. London 1983; E.H.M. Fletcher, *Story of the Royal Horticultural Society, 1804-1968*. Oxford 1969; R. Zander, F. Encke, G. Buchheim, & S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993; J.H. Barnhart, *Biographical notes upon botanists*. 3: 458. 1965)

Tibet. Riverbeds, see *Monographiae Phanerogamarum* 6: 109. 1889 and *Kew Bulletin* 8: 274. 1953, *Pl. Taxonomic Soc. Korea, Seoul* 1972: 18. 1972.

M. yunnanensis (A. Camus) Keng (*Diandranthus yunnanensis* (A. Camus) L. Liou; *Miscanthus nudipes* subsp. *yunnanensis* A. Camus)

Asia, China. See *Bulletin du Muséum d'Histoire Naturelle* 25: 670. 1919, *Sinensia* 10: 290. 1939, *Flora Reipublicae Popularis Sinicae* 10(2): 14. 1997.

Mitwabochloa J.B. Phipps = *Mitwabachloa*
J.B. Phipps, *Piptostachya* (C. E. Hubbard)
Phipps, *Zonotriche* (C.E. Hubb.) J.B. Phipps

Tropical Africa, Congo-Kinshasa, Mitwaba, Plateau des Kibara. Panicoideae, Panicodae, Arundinelleae, type *Mitwabochloa brunnea* Phipps, savannah, see *Kirkia* 5: 235-258. 1966, *Boletim da Sociedade Broteriana, ser. 2* 41: 199. 1967, *Kew Bulletin* 21(1): 119-124. 1967.

Mnesithea Kunth = *Coelorachis* Brongn.,
Diperium Desv., *Dipterum* Desv.,
Hackelochloa Kuntze, *Heteropholis* C.E.
Hubb., *Peltophorus* Desv., *Ratzeburgia* Kunth,
Rytilyx Raf. ex Hitchc., *Thyridostachyum* Nees

Possibly named after Mnesitheus Atheniensis medicus (IV a.C.), see Bertier, J., *Mnésithée et Dieuchès*, Leiden 1972, he was a doctor and herbalist from Athens; according to other authors the generic name from the Greek *mnesis* "memory, remembrance," *mnemon* "mindful, remembering," *mnaomai* "to think on, to remember," referring to an aspect of another genus.

About 1-20 species, Indomalaysia, Afghanistan to Thailand, India, Sri Lanka, Southeast Asia, Indonesia. Panicoideae, Andropogonodae, Andropogoneae, Rottboelliinae, perennial, leafy, rather slender, herbaceous, caespitose, culm internodes solid, auricles absent, ligule an unfringed membrane, leaves linear, plants bisexual, inflorescence terminal and axillary of single cylindrical raceme pedunculated, strap-like pedicel, racemes linear bearing pairs of sessile and unawned spikelets, pedicelled spikelet vestigial or absent, spikelets all on the same side, sessile spikelet 2-flowered, upper floret perfect, lower floret barren, 2 glumes more or less equal, lower glume wingless, upper glume 3-nerved, palea awnless, lodicules present, 3 stamens, ovary glabrous, 2 stigmas, used for fodder or for thatching, damp grassland, marshy places, type *Mnesithea laevis* (Retz.) Kunth, see *Supplementum Plantarum* 13, 114. 1781 [1782], *Nouveau Bulletin des Sciences, publié par la Société Philomatique de Paris* 2: 188. 1810, *Révision des Graminées* 1: 153-154. 1829, *Rel. Haenk.* 1: 329. 1830, *Voyage autour du Monde* 2: 64, f. 14. 1829 [1831], *Mémoires de la Société d'Agriculture, Sciences et Arts d'Angers* 1: 180, t. 9, f. 3. 1831, *Révision des Graminées* 2: 487, t. 158. 1831, *A Natural System of Botany* 2nd edition: 379. 1836, *Die Natürlichen Pflanzenfamilien* 2(2): 25. 1887, *Revisio Generum Plantarum* 2: 776. 1891 and *United States Department of Agriculture: Bulletin* 772: 278. 1920, *Hooker's Icones Plantarum* 36: t. 3548. 1956, *Blumea* 31: 281-307. 1986, *Austrobaileya* 3(1): 79-99. 1989, T.J. Killeen, "The grasses of Chiquitania, Santa Cruz, Bolivia." *Annals of the Missouri Botanical Garden* 77(1): 125-201. 1990, *Flora of the Guianas. Mniochloa Chase

From the Greek *mnion* "moss, seaweed" and *chloe*, *chloa* "grass," referring to the habit, to the appearance.

One or two species, Cuba, the Caribbean. Bambusoideae, Oryzodae, Olyreae, or Bambusoideae, Olyreae, Olyrinae, perennial, straggling, unarmed, herbaceous, delicate, erect, weak, slender, tuberous, caespitose, low growing, unbranched, flowering culms leafless, rhizomes pachymorph, ligule an unfringed or fringed membrane, leaf blades lanceolate to ovate, plants monoecious, inflorescence spicate, sexes on separate racemes of a pair, male and female-fertile spikelets on different branches of the same inflorescence, female spikelet narrowly elliptic, 2 glumes herbaceous more or less equal, male spikelets without glumes, male florets 1-3 staminate, lemma cartilaginous, female lemma awnless, palea awnless, lodicules present, stamens 0, shady places, rocky areas, type *Mniochloa pulchella* (Griseb.) Chase, see *Proceedings of the Biological Society of Washington* 21: 185-186, t. 4. 1908, *Contributions from the United States National Herbarium* 12(6): 183-258. 1909, *Manual of the Grasses of the West Indies* 1-439. 1936, *Brittonia* 37: 22-35. 1985, *Annals of the Missouri Botanical Garden* 80(4): 846-861. 1993 [Endemic herbaceous bamboo genera of Cuba (Poaceae: Bambusoideae: Olyreae)], *Fontqueria* 46: [i-ii], 1-259. 1997, *Contributions from the United States National Herbarium* 39: 76. 2000.

Species

M. pulchella (Griseb.) Chase (*Digitaria pulchella* Griseb.; *Panicum strephiodoides* Hack.; *Strephium pulchellum* (Griseb.) C. Wright)

The Caribbean. Small, tufted to trailing, leaf blades acute and tapering, see *Catalogus plantarum cubensium ...* 231. 1866, *Annales de la Academia de Ciencias Médicas, Fisicas y Naturales de la Habana* 8: 202. 1871 and *Österreichische Botanische Zeitschrift* 51: 291. 1901, *American Bamboos* 285-287. 1999.

Moenchia Wender. ex Steud. = *Moenchia* Medik. (Liliaceae), *Moenchia* A.W. Roth (Brassicaceae), *Moenchia* Ehrhart (Caryophyllaceae), *Paspalum* L.

Named after the German (b. Kassel) botanist Conrad Moench, 1744-1805 (d. Marburg), pharmacist, chemist, M.D. Marburg 1781, in 1781 professor of botany at Collegium Medicum Carolinianum at Kessel, founder of the Marburg Botanic Garden, an opponent of Linnaeus, a follower of Friedrich Kasimir Medikus (1736-1808), his works include *Enumeratio plantarum indigenarum Hassiae*. Cassellis [Kassel] 1777, *Methodus plantas horti botanici et agri Marburgensis a staminum situ describendi*. Marburgi Catorum [Marburg] 1794-1802, *Systematische Lehre von denen gebräuchlichsten einfachen und zusammengesetzten Arzneymitteln*. Marburg 1795, *Einleitung zur Pflanzenkunde*. Marburg 1798 and *Verzeichniss ausländischer Bäume und Stauden*. Frankfurt & Leipzig 1785; see William T. Stearn, in *D.S.B.* 9: 434. 1981; J.H. Barnhart, *Biographical notes upon botanists*. 2: 500. 1965; Mariella Azzarello Di Misa, a cura di, *Il Fondo Antico della Biblioteca dell'Orto Botanico di Palermo*. 194. Regione Siciliana, Palermo 1988; R. Zander, F. Encke, G. Buchheim, & S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 752. Stuttgart 1993; Frans A. Stafleu, *Linnaeus and the Linnaeans: The Spreading of Their Ideas in Systematic Botany, 1735-1789*. Utrecht 1971; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. Philadelphia 1964.

Panicoideae, Paniceae, Paspalinae, see *Species Plantarum* 1: 128. 1753, *Systema Naturae, Editio Decima* 846, 855, 1359. 1759, *Neues Magazin für Aerzte*. 5: 203. Leipzig 1783 [see also J.F. Ehrhart, *Beiträge zur Naturkunde*. Hannover und Osnabrück 1787-1792, the articles in the *Beiträge* were previously published in various journals, e.g. *Neues Magazin für Aerzte*. Editor E.G. Baldinger. Leipzig 1779-1800], *Tentamen Florae Germanicae* 1: 273. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. 1917-1933.

About 2-5 species, temperate Eurasia, western Europe to western Siberia, east Asia, China. Arundinoideae, Arundineae, or Danthonieae, perennial, variable to very variable in habit, herbaceous, coarse, erect, tufted, clump forming, more or less creeping, lowest internodes short and swollen, cushion of spiky leaf sheaths rounded on the back, leaves mostly basal or in the lower part of the culm, auricles absent,

ligule fringed or ciliate, plants bisexual, open or contracted inflorescence paniculate, florets 2-several, spikelets glabrous and tapering to a point, between the florets elongated rachilla internodes, 2 glumes unequal or more or less equal, glumes shorter than lowest lemma, lower glume 1-3-nerved, upper glume 1-5-nerved, linear to lanceolate lemmas with entire tips, palea 2-nerved, 2 fleshy lodicules joined or free, 3 stamens, ovary glabrous, 2 stigmas, basal culm internodes storage organs, species of open habitats or in shade, wet areas, heaths, moorland, moist grassland, related to *Hakonechloa*, confused with *Eragrostis* and *Festuca*, type *Molinia varia* Schrank, see *Baiersche Flora* 1: 100, 334, 336. Moliniopsis Gand. = *Cleistogenes* Keng, *Kengia* Packer

Resembling the genus *Molinia* Schrank.

Eragrostideae, see *Baiersche Flora* 1: 336. 1789, *Reisen im Amur-Lande* 201, 244, t. 8, f. 15-21. 1868, *Bulletin de l'Herbier Boissier* 7(9): 704. 1899 and *Botanical Magazine* 29: 312. 1915, *Botanical Magazine* (Tokyo) 39: 258. 1925, *Botanical Magazine* (Tokyo) 41: 14. 1927, *Journal of the Faculty of Science: University of Tokyo, Botany* 3: 439-440. 1930, *Journal of Japanese Botany* 10: 693. 1934, *Sinensia* 5: 147. 1934, *Botanical Magazine* (Tokyo) 50: 669. 1936, *Sinensia* 11: 409. 1940, *Botaniska Notiser* 113: 291. 1960, *Bot. Zhurn.* 74: 1675-1678. 1989, *Taxon* 43: 123. 1994.

Moliniopsis Hayata

Resembling *Molinia* Schrank.

Arundinoideae, Arundineae, or Danthonieae, type *Moliniopsis japonica* (Hack.) Hayata, see *Baiersche Flora* 1: 336. 1789, *Reisen im Amur-Lande* 201, 244, t. 8, f. 15-21. 1868, *Bulletin de l'Herbier Boissier* 7(9): 704. 1899 and *Botanical Magazine* 29: 312. 1915, *Botanical Magazine* (Tokyo) 39: 258. 1925, *Botanical Magazine* (Tokyo) 41: 14. 1927, *Journal of the Faculty of Science: University of Tokyo, Botany* 3: 439-440. 1930, *Journal of Japanese Botany* 10: 693. 1934, *Sinensia* 5: 147. 1934, *Botanical Magazine* (Tokyo) 50: 669. 1936, *Sinensia* 11: 409. 1940, *Botaniska Notiser* 113: 291. 1960, *Bot. Zhurn.* 74: 1675-1678. 1989, *Taxon* 43: 123. 1994, *Contributions from the United States National Herbarium* 46: 296. 2003.

Monachather Steudel

Alluding to the solitary spike, from the Greek *monachos* "solitary, monk," *monos* "solitary" and *ather* "an awn."

A monotypic genus, Australia. Arundinoideae, Arundineae, or Danthonioideae, Danthonieae, perennial, caespitose, herbaceous, base almost bulbous or tuberous and woolly, unbranched, nodes glabrous, no auricles, leaf blade flat or grooved, ligule an unfringed membrane-like, bisexual spikelets with 3-8 crowded hermaphrodite florets, 2 glumes

more or less equal and acute, lemma deeply 2-lobed, palea 2-nerved 2-keeled, 2 free and fleshy lodicules, 3 stamens, ovary glabrous, 2 stigmas, small fruit longitudinally grooved, ornamental when in dense stands, most common on sandy red earths and clayey sands, arid grassland, open habitats, sometimes treated as a synonym for *Danthonia* DC., sometimes referred to *Danthonia* s.l., type *Monachather paradoxa* Steud., see E.G. von Steudel, *Synopsis Plantarum Glumacearum* 1(3): 247. 1854, *Fl. Austral.* 7: 590, 592. 1878 and J.W. Vickery, "A revision of the Australian species of *Danthonia*." *Contributions from the New South Wales National Herbarium* 2(3): 249-325 (268). 1956, *Contributions from the Queensland Herbarium* 14: 1-19. 1972, *Flora of Australia* 44: 21. 2005.

Species

M. paradoxus Steudel (also spelled *paradoxa*) (*Danthonia bipartita* F. Muell.)

New South Wales, Northern Territory, Queensland, South Australia, Victoria, Western Australia. Perennial, caespitose, rhizomatous, tufted or tussock grass, leafy, slender, the base of the plant more or less swollen, nodes geniculate, ligule membranous, lower leaf sheaths very woolly, bright green leaf blades, flat leaves striate and grooved, plants bisexual, racemes or raceme-like panicles, greenish inflorescence few spikeleted, spikelets on short pedicels and sparse, florets crowded, lower glume 13-19-nerved, upper glume 11-13-nerved, lemma deeply bifid, lemmas densely hairy with a bent and twisted central awn, lemma subglobose or broadly turbinate, callus bearded or hairy, native pasture species, palatable and nutritious, readily grazed, very hardy, fire tolerant, drought-resistant, suitable for dry situations, grows in arid grasslands and dry places, indicator of good range condition, see *Synopsis Plantarum Glumacearum* 1: 247. 1854, *Fragmenta Phytographiae Australiae* 1: 160. 1859.

in Australia: bandicoot grass, mulga oats, broad-leaved wanderrie grass

Monachne P. Beauv. = *Eriochloa* Kunth, *Panicum* L.

Greek *monos* "solitary, one" and *achne* "husk, glume."

Panicoideae, Paniceae, Panicinae, type *Monachne racemosa* P. Beauv., see *Species Plantarum* 1: 55. 1753, *Systema Naturae, Editio Decima* 872. 1759, Ambroise Marie François Joseph Palisot de Beauvois (1752-1820), *Essai d'une nouvelle Agrostographie, ou nouveaux genres des Graminées*. 48-49, 151, 168, t. 10, figs. 7, 9, 10. Paris 1812, *Nova Genera et Species Plantarum* 1: 94-95, t. 30. 1815 [1816], *A Sketch of the Botany of South-Carolina and Georgia* 1(2): 102-103. 1816, *Systema Vegetabilium* 2: 468.

1817, *Systema Vegetabilium, editio decima sexta* 1: 313. 1825 [1824], *Mantissa* 2: 258. 1824, *Annales des Sciences Naturelles, Botanique* I 5: 299. 1825, *Annales des Sciences d'Observation* 1: 448. 1829, *Révision des Graminées* 1: 35. 1829, *Révision des Graminées* 2: 403, t. 115. 1831, *Memorie della Reale Accademia delle Scienze dell'Istituto di Bologna* 2: 596, t. 41, f. 1. 1850 and *Bulletin of the Torrey Botanical Club* 30(7): 374. 1903, *Symbolae Antillarum* 4: 85. 1903, *Contributions from the United States National Herbarium* 12(6): 208. 1909, *Contr. U.S. Natl. Herb.* 15: 13-15. 1910, *N. Amer. Fl.* 17: 157. 1912, *Revista Sudamericana de Botánica* 9: 118. 1953, *Contributions from the United States National Herbarium* 46: 233-239, 296-297, 306-441. 2003.

Monachyron Parl. = *Melinis* P. Beauv., *Monachyron* Parl. ex Hook., *Rhynchelytrum* Nees

From the Greek *monos* "solitary, one" and *achyron* "chaff, husk."

Panicoideae, Paniceae, Melinidinae, type *Monachyron villosum* Parl., see *Essai d'une Nouvelle Agrostographie* 54, t. 11, f. 4. 1812, *Systema Vegetabilium* 2: 457. 1817, *A Natural System of Botany*, 2nd edition, 378, 446-447. 1836, *Linnaea* 11(Litt.-Ber.): 129. 1837, *Niger Flora* 190-191. 1849, *Flora italiana, ossia descrizione delle piante ...* 1: 131. 1850, *Tentamen Florae Abyssinicae ...* 2: 445. 1850, *Conspectus Florae Africae* 5: 771. 1894 and *Österreichische Botanische Zeitschrift* 51: 464. 1901, *Annuario del Reale Istituto Botanico di Roma* 8: 310. 1907, *Flora of Tropical East Africa* 451-898. 1982, *Wageningen Agricultural University Papers* 92-1(2): 1-557. 1992, *Contributions from the United States National Herbarium* 46: 287, 297, 545. 2003.

Monandraira E. Desv. = *Deschampsia* P. Beauv.

From the Greek *monos* "single, one," *aner, andros* "stamen" plus the genus *Aira* L.

Pooideae, Poeae, Agrostidinae, see *Essai d'une Nouvelle Agrostographie* 91, 149, 160. 1812, *Révision des Graminées* 2: 457, t. 142. 1831, *A Manual of the Botany of the Northern United States* 605. 1848, *Flora Chilena* 6: 341-343, t. 79, f. 1. 1854, *Anales de la Universidad de Chile* 43: 565. 1873 and *Kongliga Svenska Vetenskapsakademiens Handlingar* 56: 175. 1916, *Darwiniana* 8: 454, 467. 1949, *Contributions from the United States National Herbarium* 48: 245-256, 453. 2003.

Monanthochloe Engelm. = *Halochloa* Griseb., *Halochloa* Kütz. (Algae), *Monanthochloë* Engelm., *Solenophyllum* Baillon

Greek *monos* “only, one,” *anthos* “flower” and *chloe*, *chloa* “grass,” referring to the unisexual flowers.

About 2-3 species, southern U.S., Mexico, Cuba, the Caribbean, Argentina. Chloridoideae, Cynodonteae, Monanthochloinae, perennial, wiry, herbaceous, decumbent, erect, stoloniferous, rhizomatous, mat-forming to shrubby, auricles absent, ligule a ciliate rim or membrane, sheaths not ciliate, leaves short and distichous, leaf blades pungent, plants dioecious, partially included inflorescence, single spikelet embraced and partially concealed by upper leaf sheaths, female spikelet subterete, male florets 3 staminate, glumes absent, lemma nerved and acute, palea margins overlapping and enfolding caryopsis, palea keels winged, lodicules absent, 0 stamens, 3 staminodes, ovary glabrous, 2 stigmas, growing in seashores and inland salt pans, alkaline places, moist sandy saline soil, gypsum, open habitats, wetland, closely related to *Distichlis* Raf., type *Monanthochloe littoralis* Engelm., see *Botanische Zeitung*. Berlin 1: 55. 1843, *Transactions of the Academy of Science of St. Louis* 1: 436-437, pl. 13-14. 1859, *Abhandlungen der Königlichen Gesellschaft der Wissenschaften zu Göttingen* 24: 285. 1879, *Histoire des Plantes* 12: 235. 1893 and *Gram. Bonar.* 4th edition: 28. 1946, *Physis* 20(59): 1-3. 1954, *Recent Advances in Botany* 1: 133-145. 1961, *Gram. Afr. Trop.* 1: 94. 1962, *Madroño* 18: 33-39. 1965, *Kurtziana* 5: 369-391. 1969, *Willdenowia* 5: 472. 1969, *Taxon* 33: 126-134. 1984, *Flora Mesoamericana* 6: 258. 1994, *Contributions from the United States National Herbarium* 41: 127, 142, 195. 2001.

Species

M. acerosa (Griseb.) Engelm. (*Halochloa acerosa* Griseb.)

South central Argentina. See *Anales del Museo Nacional de Buenos Aires* 7: 194. 1879, *Symbolae ad Floram Argentinam*. Zweite ... 285. 1879.

M. littoralis Engelm.

Mexico and Cuba, southern U.S., California, Point Conception to Mexican border. Perennial marsh grass, creeping and wiry stems, somewhat prostrate, clusters of short and curved leaves, tolerates no drainage and seasonal flooding, common in salt marshes, coastal, host species for *Cordylanthus maritimus* Nutt. ex Benth. subsp. *maritimus*, see *Prodromus Systematis Naturalis Regni Vegetabilis* 10: 598. 1846, *Transactions of the Academy of Science of St. Louis* 1: 437, pl. 13-14. 1859 and Gregory B. Noe & Joy B. Zedler, “Differential effects of four abiotic factors on the germination of salt marsh annuals.” *Am. J. Bot.* 87: 1679-1692. 2000.

in English: shore grass

Monathera Raf. = *Ctenium* Panz., *Monocera* Elliott

From the Greek *monos* “only, one” and *ather* “stalk, barb, awn.”

Chloridoideae, Cynodonteae, see *Ideen zu einer künftigen Revision der Gattungen der Gräser* 38, 61. München 1813, *Denkschriften der Bayer[ischen]. Botanischen Gesellschaft in Regensburg* 4: 311, t. 13, f. 1-2. 1813 [1814] [preprinted from *Denkschr. k. Akad. Wiss. München*], *A Sketch of the Botany of South-Carolina and Georgia* 1: 176. 1816, C.S. Rafinesque, *American Monthly Magazine and Critical Review* 4: 190. 1819, *Jour. Phys. Chim. Hist. Nat.* 89: 262. 1819 and *North American Flora* 17(8): 579-638. 1939, *Contributions from the United States National Herbarium* 41: 57-58, 142. 2001.

Monelytrum Hackel = *Monelytrum* Hackel ex Schinz

From the Greek *monos* “one, single” and *elytron* “sheath, cover, scale, husk.”

Two species, southwest Africa, Angola. Chloridoideae, Cynodonteae, annual or perennial, herbaceous, unarmed, stoloniferous, tufted, decumbent, blue-green, usually unbranched, auricles absent, leaf sheaths rounded, ligule a fringed membrane, plants bisexual, bristly inflorescence spicate, cylindrical false raceme, sterile spikelets terminal and awnlike, glumes 1 per spikelet or 2 and very unequal, upper glume dorsally compressed and awned, lemmas shortly awned or mucronate, palea 2-nerved 2-keeled, 2 lodicules free and fleshy, 3 stamens, ovary glabrous, 2 reddish stigmas, open habitats, sandy soils, rocky places, stony soils, slopes, hillsides, seasonally moist areas, type *Monelytrum luederitzianum* Hack., see *Verhandlungen des Botanischen Vereins für die Provinz Brandenburg und die angrenzenden Länder* 30: 140. 1888 and *Bulletin of Miscellaneous Information Kew* 1934: 197. 1934.

Species

M. annuum Gooss. (*Monelytrum luederitzianum* Hack.)

Africa. See *Bulletin of Miscellaneous Information Kew* 1934: 197. 1934.

M. luederitzianum Hack. ex Schinz (also spelled *lüderitzianum*) (*Monelytrum annuum* Gooss.; *Monelytrum luederitzianum* Hack.) (after the German merchant and botanical collector August Lüderitz (1838-1922) and his brother Franz Adolph Eduard Lüderitz (1834-1886), one of the chief protagonists of the German colonial politics, perished in Namibia; see Hubert Henoeh, *Adolph Lüderitz. Eine*

biographische Skizze, etc. [1910] [Koloniale Abhandlungen. Hft. 25.]; Wilhelm Schuessler, *Adolf Lüderitz. Ein deutscher Kampf um Südafrika 1883-1886*. Geschichte des ersten Kolonialpioniers im Zeitalter Bismarcks. Bremen [1936]; *Die Erschliessung von Deutsch-Südwest-Afrika durch Adolf Lüderitz*. Oldenburg 1945; Mary Gunn and Leslie E. Codd, *Botanical Exploration of Southern Africa*. 233. Cape Town 1981).

Namibia, Angola, South Africa. Perennial or annual, tufted, erect, mostly unbranched, sometimes stoloniferous to strongly stoloniferous, leaf sheaths of basal leaves flattened, ligule a dense fringe of short hairs, leaf blades expanded, leaves margins with stiff and slightly spiny hairs, inflorescence a single false spike, spikelets arranged in groups and falling in clusters, 1 bisexual floret, lower glume 0-nerved, upper glume 5- 7-nerved, upper glume and lemmas awned, pioneer grass, ground cover, stony soils, pans, disturbed areas, see *Verhandlungen des Botanischen Vereins für die Provinz Brandenburg und die angrenzenden Länder* 30: 140. 1888 and *Bulletin of Miscellaneous Information Kew* 1934: 197. 1934.

in English: Lüderitz grass

in South Africa: Lüderitzgras

Monerma P. Beauv. = *Hainardia* Greuter,
Lepturus R. Br., *Rottboellia* L.f.

From the Greek *monos* “alone, solitary” and *herma*, *hermatos* “support, prop,” *moneres* “solitary,” referring to the single and outer glume.

Eragrostideae, Leptureae, types *Monerma repens* (G. Forst.) P. Beauv. or *Monerma monandra* P. Beauv., see *Species Plantarum* 53. 1753, *Supplementum Plantarum* 13, 114. 1781 [1782], *Species Plantarum. Editio quarta* 1: 464. 1797, *Anales de Ciencias Naturales* 3: 11. 1801, *Prodromus Florae Novae Hollandiae* 207. 1810, *Essai d'une Nouvelle Agrostographie* ou nouveaux genres des Graminées. 116-117, 168, 176-177, t. 20, f. 10. 1812, *Systema Vegetabilium* 2: 799-800. 1817, *Mantissa* 2: 441. 1824, *Annales des Sciences Naturelles (Paris)* 5: 304. 1825, *Voyage autour du Monde exécuté pendant les Années 1836 et 1837 sur la Corvette la Bonite ... Botanique* 412. 1826, *Nomenclator Botanicus. Editio secunda* 156. 1841, *Exploration Scientifique de l'Algérie* 2: 214. 1855, *Synopsis Plantarum Glumacearum* 1: 430. 1855, *Monographiae Phanerogamarum* 6: 320. 1889, *Index Kewensis* 2: 256. 1894 and *Contr. U.S. Natl. Herb.* 24: 201. 1925, H. Runemark, “A revision of *Parapholis* and *Monerma* (Gramineae) in the Mediterranean.” in *Bot. Not.* 115: 1-17. 1962, *Boissiera. Mémoires du Conservatoire de Botanique et de l'Institut de Botanique Systématique de l'Université de Genève* 13: 178. 1967, *Gayana, Botánica* 42: 1-157. 1985, *Kew Bulletin, Additional Series* 13: 111, 229. 1986, *New Zealand Journal of*

Botany 29: 101-116. 1991, *Feddes Repert.* 106: 169-171. 1995, *Harvard Pap. Bot.* 8: 63-65. 1996, *Contributions from the United States National Herbarium* 46: 284, 546-548. 2003

Monilia Gray

An anagram of the generic name *Molinia* Schrank, or from the Latin *monile*, *monilis* “a necklace, collar,” pl. *monilia*, see *Baiersche Flora* 1: 100, 334. 1789, *A Natural Arrangement of British Plants ...* 2: 110. London 1821 and *U.S. Dept. Agric. Bull.* 772: 50. 1920.

Monium Stapf = *Anadelphia* Hackel

From the Greek *monios* “solitary, savage,” *monia* “solitude, celibacy.”

About 7 species, tropical West Africa, Guinea. Panicoideae, Andropogonodae, Andropogoneae, Andropogoninae, *Anadelphia* sect. *Monium* (Stapf) Clayton, annual or perennial, tufted, herbaceous, sheaths nerved, ligule an unfringed membrane, plants bisexual, open inflorescence paniculate, spikelets paired, shorter spikelets hermaphrodite, pedicelled spikelet often very reduced, 2 glumes subequal, lower glume 5- 7-nerved, upper glume 3-nerved, palea absent or present, 2 fleshy lodicules, 3 stamens, ovary glabrous, 2 stigmas, rainforest, sometimes included in *Anadelphia*, type *Monium macrochaetum* Stapf, see *Species Plantarum* 2: 1045. 1753, *Essai d'une Nouvelle Agrostographie* 132-133, 160. 1812, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 6: 240-241. 1885, *Die Natürlichen Pflanzenfamilien* 2(2): 27. 1887 and *Journal de Botanique (Morot)* 19: 100. 1905, *Flora of Tropical Africa* 9: 399-400. 1919, *Revue internationale de botanique appliquée et d'agriculture tropicale* 30: 172. 1950, H. Jacques-Félix, “Les Graminées (Poaceae) d'Afrique tropicale. I. Généralités, classification, description des genres.” *Bull. Sci. Inst. des Recherches Agronomiques tropicales* 8. I.R.A.T. Paris 1962, *Kew Bulletin* 20: 275-285. 1966.

Species

M. congestum Jacq.-Fél.

Africa. See *Revue internationale de botanique appliquée et d'agriculture tropicale* 30: 184. 1950.

M. funereum Jacq.-Fél. (*Anadelphia funerea* (Jacq.-Fél.) Clayton)

Africa. See *Revue internationale de botanique appliquée et d'agriculture tropicale* 30: 186. 1950, *Kew Bulletin* 20: 281. 1966.

M. macrochaetum Stapf (*Anadelphia macrochaeta* (Stapf) Clayton; *Hypogynium macrochaetum* (Stapf) Robery)

Africa. See *Flora of Tropical Africa* 9: 400. 1919, *Boissiera*. 9: 185. 1960, *Kew Bulletin* 20: 281. 1966.

M. monianthum Jacq.-Fél.

Africa. See *Revue internationale de botanique appliquée et d'agriculture tropicale* 30: 184. 1950.

M. rufum Jacq.-Fél.

Africa. See *Revue internationale de botanique appliquée et d'agriculture tropicale* 30: 182. 1950.

M. trepidarium (Stapf) Jacq.-Fél. (*Andropogon trepidarius* Stapf)

Africa. See *Journal de Botanique (Morot)* 19: 100. 1905, *Revue internationale de botanique appliquée et d'agriculture tropicale* 30: 182. 1950.

M. trichaetum Reznik (*Anadelphia trichaeta* (Reznik) Clayton, nom. illeg., non *Monium trichaetum* Reznik; *Hypogynium trichaetum* (Reznik) Roberty; *Pobeguinea trichaeta* (Reznik) Jacq.-Fél.)

Africa, Guinea. See *Bulletin du Muséum d'Histoire Naturelle*, sér. 2, 4: 1046. 1932, *Revue internationale de botanique appliquée et d'agriculture tropicale* 30: 174. 1950, *Boissiera*. 9: 183. 1960, *Kew Bulletin* 20: 281. 1966.

Monocera Elliott = *Ctenium* Panz., *Monathera* Raf., *Monocera* W. Jack (Elaeocarpaceae), *Monoceras* auct. ex Steudel (Elaeocarpaceae)

Greek *monos* “alone, lonely, one” and *keras* “a horn,” referring to the spike.

Chloridoideae, Cynodonteae, type *Monocera aromatica* (Walter) Elliott, see *Species Plantarum* 1: 515. 1753, *Flora Caroliniana, secundum ...* 249. 1788, *Ideen zu einer künftigen Revision der Gattungen der Gräser* 38, 61. München 1813, *Denkschriften der Bayer[ischen]. Botanischen Gesellschaft in Regensburg* 4: 311, t. 13, f. 1-2. 1813 [1814] [preprinted from *Denkschr. k. Akad. Wiss. München*], *A Sketch of the Botany of South Carolina and Georgia* 1(2): 176. 1816, C.S. Rafinesque, *American Monthly Magazine and Critical Review* 4: 190. 1819, *Jour. Phys. Chim. Hist. Nat.* 89: 262. 1819, *Malayan Miscell.* 1(5): 42-43. 1820, *Nomenclator Botanicus. Editio secunda* 2: 159. 1841, *Forest Flora of British Burma* 1: 164. 1877 and *North American Flora* 17(8): 579-638. 1939, *Contributions from the United States National Herbarium* 41: 57-58, 142. 2001.

Monochaete Döll = *Doelochloa* Kuntze, *Gymnopogon* P. Beauv.

From the Greek *monos* “alone, lonely, one” and *chaite* “bristle, long hair.”

Chloridoideae, Cynodonteae, *Gymnopogon* sect. *Monochaete* (Döll) Pilg., type *Monochaete fastigiata* (Nees) Döll, see *Essai d'une Nouvelle Agrostographie* 41, 164. 1812, *Flora Brasiliensis seu Enumeratio Plantarum* 2: 430. 1829, *Flora Brasiliensis* 2(3): 78-79. 1878, *Preliminary Catalogue of Anthophyta and Pteridophyta Reported as Growing Spontaneously within One Hundred Miles of New York* 69. 1888, *Revisio Generum Plantarum* 2: 773. 1891 and *Die natürlichen Pflanzenfamilien, Zweite Auflage* 14d: 94. 1956, *Brittonia* 23(3): 293-324. 1971, *Contributions from the United States National Herbarium* 41: 73, 124-127, 142. 2001.

Monocladus L.C. Chia, H.L. Fung & Y.L. Yang = *Bonia* Balansa, *Gaoligongshania* D.Z. Li, J.R. Xue & N.H. Xia

From the Greek *monos* “alone, single” and *klados* “a branch.”

About 1-4-6 or 0 species, southern China, Guangdong, Guangxi, Hainan, Indochina. Bambusoideae, Bambusodae, Bambuseae, perennial, sympodial, solid undershrub, caespitose, culms apex pendulous or subscaudent, branched, 1 branch at each node, rhizomes stout and short, flowering culms leafy, sheath persistent and coriaceous, large dark purple auricles, ligule short, rhizomes pachymorph, plants bisexual, pseudospikelets fascicled, 2 glumes, palea present, 3 free and glabrous lodicules, 6 stamens, ovary glabrous, 3 stigmas, plants used to make paper, living fences and hedge, often considered a synonym of *Bonia*, type *Monocladus saxatilis* L.C. Chia, H.L. Fung & Y.L. Yang, see *Journal de Botanique (Morot)* 4: 29. 1890 and *Bamb.* 136. 1913, *Symbolae Sinicae* 7(5): 1270-1271. 1936, Emil Bretschneider, *History of European Botanical Discoveries in China*. 911-912. Leipzig 1981, L.C. Chia, H.L. Fung, & Y.L. Yang, “*Monocladus*, genus novum bambusoidearum (Poaceae).” *Acta Phytotaxonomica Sinica* 26(3): 211-216, f. 1. 1988, *Acta Phytotaxonomica Sinica* 33(6): 598, 600-601, f. 1. 1995, N.H. Xia “A study of *Bonia* (Gramineae: Bambusoideae).” *Kew Bulletin* 51(3): 565-569. 1996, D.Z. Li & J.R. Xue, “The diversity and conservation of bamboos in Yunnan, China.” *The Bamboos* 6: 83-94. 1997.

Species

M. amplexicaulis L.C. Chia, H.L. Fung & Y.L. Yang (*Bonia amplexicaulis* (L.C. Chia, H.L. Fung & Y.L. Yang) N.H. Xia)

China. Margin of ligule glabrous, culms farinose, young culm with waxy white powder, sheath shortly tomentose, sheath auricles broadly sickle-like often bending outward, sheath ligule with entire margins, sheath blade cordate or narrowly cordate, leaf sheath hairy, leaf auricles broadly ovate and slanting upward, leaves shortly pubescent

beneath, planted as hedge, used in papermaking, weaving, see *Acta Phytotaxonomica Sinica* 26(3): 215-216, f. 2: 1-3. 1988, *Kew Bulletin* 51(3): 568. 1996.

M. laevigatus L.C. Chia, H.L. Fung, & Y.L. Yang (*Bonia levigata* (L.C. Chia, H.L. Fung, & Y.L. Yang) N.H. Xia; *Monocladus levigatus* L.C. Chia, H.L. Fung, & Y.L. Yang)

China. Smooth, glabrous, sheath shortly pubescent, margin of ligule glabrous, sheath ligule entire, sheath ovate-lanceolate and rounded at base, sheath auricle sickle-shaped, forage, papermaking, growing in montane areas, see *Acta Phytotaxonomica Sinica* 26(3): 216, f. 2, 4-5. 1988, *Kew Bulletin* 51(3): 568. 1996.

M. megalothyrsus (Hand.-Mazz.) T.P. Yi (*Arundinaria megalothyrsa* Hand.-Mazz.; *Gaoligongshania megalothyrsa* (Hand.-Mazz.) D.Z. Li, J.R. Xue, & N.H. Xia; *Indocalamus megalothyrsa* (Hand.-Mazz.) C.S. Chao & C.D. Chu; *Yushania megalothyrsa* (Hand.-Mazz.) T.H. Wen)

China. See *Symbolae Sinicae* 7(5): 1270-1271. 1936, *J. Nanjing Techn. Forest Prod.* 1981(3): 33-44, f. 1-6. 1981 [also *Journal of Nanjing Technological College of Forest Products*], *Journal of Bamboo Research* 6(3): 34. 1987, *Journal of Bamboo Research* 12(2): 54. 1993.

in China: gongshanzhu shu

M. parviflosculus W.T. Lin

China. See *Journal of Bamboo Research* 12(3): 3-4, f. 3. 1993.

M. saxatilis L.C. Chia, H.L. Fung, & Y.L. Yang (*Bonia saxatilis* (L.C. Chia, H.L. Fung, & Y.L. Yang) N.H. Xia)

China, Guanxi, Guangdong. Type species, culms covered with white wax when young, sheaths velutinous, sheath auricle sickle-shaped and often curved outward, sheath blade lanceolate erect or extending outside, leaf auricle almost sickle-like often curved outward, fodder, used in papermaking and for making bamboo hats, see *Acta Phytotaxonomica Sinica* 26(3): 213-215, f. 1. 1988, *Kew Bulletin* 51(3): 567. 1996.

M. saxatilis L.C. Chia, H.L. Fung, & Y.L. Yang var. **solidus** (C.D. Chu & C.S. Chao) L.C. Chia, H.L. Fung, & Y.L. Yang (*Bonia saxatilis* var. *solida* (C.D. Chu & C.S. Chao) D.Z. Li; *Bonia solida* (C.D. Chu & C.S. Chao) N.H. Xia; *Indocalamus solidus* C.D. Chu & C.S. Chao; *Monocladus solidus* (C.D. Chu & C.S. Chao) L.C. Chia)

China, Guanxi. Culm arcuate or arching in the upper portion, 1 flat branch, somewhat pruinose below joints, sheath persistent, sheath auricles distinct or developed and embracing the culm, sheath blade narrowly lanceolate to triangularly lanceolate and not embracing the culm, leaves narrowly lanceolate and glabrous beneath, leaf sheath pruinose and glabrous, leaf auricles developed and ciliate, leaf ligule very short and shortly ciliate, used in papermaking, found growing in limestone hills, see *Acta Phytotaxonomica Sinica* 18(1): 26, f. 2. 1980, *Acta Phytotaxonomica Sinica*

26(3): 215. 1988, *Kew Bulletin* 51(3): 567-568. 1996, *Flora Reipublicae Popularis Sinicae* 9(1): 40, 42. 1996, *Acta Botanica Yunnanica* 22(1): 44. 2000.

M. solidus (C.D. Chu & C.S. Chao) L.C. Chia (*Bonia saxatilis* var. *solida* (C.D. Chu & C.S. Chao) D.Z. Li; *Bonia solida* (C.D. Chu & C.S. Chao) N.H. Xia; *Indocalamus solidus* C.D. Chu & C.S. Chao; *Monocladus saxatilis* var. *solidus* (C.D. Chu & C.S. Chao) L.C. Chia, H.L. Fung & Y.L. Yang)

China. Margin of ligule ciliate, sheaths glabrous, see *Acta Phytotaxonomica Sinica* 18(1): 26, f. 2. 1980, *Acta Phytotaxonomica Sinica* 26(3): 215. 1988, *Kew Bulletin* 51(3): 567-568. 1996, *Flora Reipublicae Popularis Sinicae* 9(1): 40, 42. 1996, *Acta Botanica Yunnanica* 22(1): 44. 2000.

Monocymbium Stapf

From the Greek *monos* "single" and *kymbe* "boat," *kymbos* "cavity," alluding to the solitary racemes, to the shape of the spathe of the racemes.

About 3-4 species, tropical and southern Africa, Sudan, Angola, Sierra Leone. Panicoideae, Andropogonodae, Andropogoneae, Andropogoninae, perennial, densely caespitose, clumps forming, leafy, herbaceous, wiry, tough when old, auricles absent, ligule membranous and unfringed, leaf blades linear to lanceolate, plants bisexual, inflorescence paniculate, solitary racemes sheathed by a papery spathe and grouped into a compound panicle, spatheoles cymbiform, spikelets in pairs, sessile spikelets dorsally compressed and bisexual, pedicellate spikelets male and awnless, 2 glumes more or less equal, lower glume keeled, upper glume awned, upper lemma bilobed with glabrous awn, palea absent, 2 free and fleshy lodicules, stamens 3, ovary glabrous, stigmas 2, weed species, good fodder when still young, species of open habitats, in sour grassland, savannah, moist soils, grassy hillsides, rain forest, related to *Anadelphia*, type *Monocymbium ceresiiforme* (Nees) Stapf, see *Flora of Tropical Africa* 9: 386-387. 1919, *Annals of the Missouri Botanical Garden* 75: 866-873. 1988.

Species

M. ceresiiforme (Nees) Stapf (*Andropogon ceresiiformis* Nees; *Hypogynium ceresiiforme* (Nees) Roberty)

Tropical Africa, Gabon. Perennial, very variable, loosely or densely tufted, tussocky, erect or ascending, decumbent, slender, delicate, wiry, leafy and weak, dwarf or short, occasionally or sometimes rhizomatous, leaf blade flattened, leaf sheath smooth, ligule shortly membranous, open inflorescence paniculate, compound panicle linear and open, solitary spatheate racemes, several racemes sheathed by a chartaceous spathe, ovate reddish spatheoles, softly hairy elliptic spikelets, 1 spikelet sessile and with a twisted awn,

1 spikelet pedicellate and awnless, weed species, ornamental, thatching grass, low grazing value, good fodder while young, decreasing palatability with age, usually in sour grassland, veld, savannah, acid soils, sandy soils, gravel, slopes, hillsides, moist soil or wet places, woodland, see *Florae Africae Australioris Illustrationes Monographicae* I. Gramineae. 109. 1841 and *Flora of Tropical Africa* 9: 386-387. 1919, *Boissiera*. 9: 192. 1960.

in English: oatgrass, wild oat grass, wild oats, boat grass
in Cameroon: shamanho

in Senegal: garlaban, khat lek, matifalbene

in Southern Africa: hawergras, wildehawergras, bootjiegras, meseletso, mobeseletso; tshinwamulwadze (Venda)

in Upper Volta: jantaaje, jantaare, yantaare

M. deightonii C.E. Hubb. (after the British mycologist Frederick Claude Deighton, 1903-1992, botanist in Sierra Leone and Gold Coast, author of *Diseases of Cultivated and Other Economic Plants in Sierra Leone*. Government of Sierra Leone [Freetown] 1956 and "Vernacular Botanical Vocabulary for Sierra Leone," Crown Agents for Oversea Governments and Administrations on behalf of the Government of Sierra Leone [London, U.K.] 1957; see J.H. Barnhart (1871-1949), *Biographical notes upon botanists*. 1: 435. Boston 1965)

Africa, Sierra Leone. See *Kew Bulletin* 1949: 347. 1949.

M. lanceolatum C.E. Hubb. ex Hutch. & Dalziel

Africa, Sierra Leone. See *Bulletin of Miscellaneous Information Kew* 1936(5): 313. 1936.

M. nimbanum Jacq.-Fél.

Tropical Africa. See *Revue internationale de botanique appliquée et d'agriculture tropicale* 30: 176. 1950.

Monodia S.W.L. Jacobs

From the Greek *monos* (alone, single) and *odous* (tooth), referring to the single lemma awn.

One species, tropical Australia, Western Australia. Chloridoideae, Triodieae, perennial, strongly xeromorphic habit, tufted, erect, auricles absent, leaf blades flat or folded, ligule a fringe of hairs, leaves hard and pungent, plants bisexual, contracted inflorescence paniculate or spicate, spikelets shortly pedicellate and 1-flowered, upper floret not stipitate, 2 subequal glumes 3-11-nerved, 3-9-nerved lemmas, awn more or less circular to wavy, palea keels wingless, 2 free and fleshy lodicules, 3 stamens, ovary glabrous, 2 stigmas, open habitats, coastal grasslands, stony places, sandstone, resembling *Stipa* and *Triodia*, type *Monodia stipoides* S.W.L. Jacobs, see *Kew Bulletin* 40(3): 659-661. 1985,

S.W.L. Jacobs, "*Spinifex (Triodia, Plectrachne, Symplectrodia and Monodia: Poaceae) in Australia*," in *Desertified Grasslands: Their Biology and Management*. (Ed: G.P. Chapman) Academic Press, London, 47-62. 1992.

Species

M. stipoides S.W.L. Jacobs

Northern Western Australia. hummock-forming, ligule a line of hairs, leaf blades pungent, single floret per spikelet, glumes acute awnless, lemma with a single long awn, see *Kew Bulletin* 40(3): 659. 1985.

Monopogon Presl = *Tristachya* Nees

From the Greek *monos* "one, single" and *pogon* "beard."

Panicoideae, Arundinelleae, type *Monopogon avenaceus* J. Presl, see *Flora Brasiliensis seu Enumeratio Plantarum* 2: 458. 1829, *Reliquiae Haenkeanae* 1(4-5): 324, t. 44. 1830 and *Bulletin, Division of Agrostology United States Department of Agriculture* 24: 23. 1901, *N. Amer. Flora* 17(8): 578. 1939, *Kirkia* 5: 235-258. 1966, *Kew Bulletin* 21(1): 119-124. 1967, *Kew Bulletin* 26(1): 111-123. 1971, *Contributions from the United States National Herbarium* 46: 297, 627-628. 2003.

Monospatha W.T. Lin = *Sinarundinaria*

Nakai

Bambusoideae, Bambuseae, Arundinariinae, type *Monospatha triloba* W.T. Lin, see *Journal of Japanese Botany* 11(1): 1. 1935, *Acta Phytotaxonomica Sinica* 27(3): 228, f. 1, 1-4. 1989, *Journal of Bamboo Research* 13(4): 1-3, f. 1. 1994, *Journal of South China Agricultural University* 16(3): 49. 1995, *Contributions from the United States National Herbarium* 39: 112-113. 2000.

Monostachya Merr. = *Notodanthonia* Zotov, *Rytidosperma* Steud.

From the Greek *monos* "one, single" and *stachys* "spike," 1-spiked.

About 4 species, the Philippines, Papua New Guinea. Danthonioideae, Danthonieae, or Arundineae, perennial, herbaceous, montane, low, leaves mainly basal, mat-forming, ligule fringed, plants bisexual, terminal spikelet perfect, 2 subequal glumes 3-nerved, palea 2-nerved, fleshy lodicules present, 3 stamens, ovary glabrous, 2 stigmas, often referred to *Rytidosperma* and *Danthonia* sensu lato, type *Monostachya centrolepidoides* Merr., see *Synopsis Plantarum Glumacearum* 1: 425. 1854, *Transactions of the Royal Society of Victoria* 1(2): 38 [39]. 1889 and *Philippine Journal of Science* 5: 330-331. 1910, *New Zealand Journal*

of Botany 1: 104, 122. 1963, S.T. Blake, “*Plinthanthesis* and *Danthonia* and a review of the Australian species of *Leptochloa* (Gramineae).” *Contributions from the Queensland Herbarium* 14: 3. 1972, *Taxon* 29: 293-298. 1980, *Taxon* 31: 737-743. 1982, H.P. Linder & G.A. Verboom, “Generic limits in the *Rytidosperma* (Danthonieae, Poaceae) complex.” *Telopea* 6(4): 597-627. 1996, *Sendtnera* 3: 11-93. 1996, H.P. Linder, “Nomenclatural corrections in the *Rytidosperma* complex (Danthonieae, Poaceae).” *Telopea* 7(3): 269-274. 1997.

Species

M. craigii (Veldkamp) S.W.L. Jacobs (*Danthonia craigii* Veldkamp; *Notodanthonia craigii* (Veldkamp) Veldkamp; *Rytidosperma craigii* (Veldkamp) H.P. Linder)

New Guinea. See *The Alpine Flora of New Guinea* 2: 1172, f. 378. 1979, *Taxon* 29: 298. 1980, *Taxon* 31(4): 739. 1982, *Telopea* 6(4): 613. 1996.

M. montis-wilhelmi (Veldkamp & Fortuin) S.W.L. Jacobs (*Danthonia montis-wilhelmi* Veldkamp & Fortuin; *Notodanthonia montis-wilhelmi* (Veldkamp & Fortuin) Veldkamp; *Rytidosperma montis-wilhelmii* (Veldkamp & Fortuin) H.P. Linder)

New Guinea, Chimbu, Wilhelm Mt. See *The Alpine Flora of New Guinea* 2: 1171. 1979, *Taxon* 29: 298. 1980, *Taxon* 31(4): 739. 1982, *Telopea* 6(4): 614. 1996.

M. nardifolia (Veldkamp) S.W.L. Jacobs (*Danthonia nardifolia* Veldkamp; *Notodanthonia nardifolia* (Veldkamp) Veldkamp; *Rytidosperma nardifolia* (Veldkamp) H.P. Linder)

New Guinea. See *The Alpine Flora of New Guinea* 2: 1174. 1979, *Taxon* 29: 298. 1980, *Taxon* 31(4): 739. 1982, *Telopea* 6(4): 614. 1996.

M. oreoboloides (F. Muell.) Hitchc. (*Danthonia oreoboloides* (F. Muell.) Stapf; *Festuca oreoboloides* F. Muell.; *Notodanthonia oreoboloides* (F. Muell.) Veldkamp; *Rytidosperma oreoboloides* (F. Muell.) H.P. Linder)

Australia. See *Transactions of the Royal Society of Victoria* 1(2): 38 [39]. 1889, *Hooker's Icones Plantarum* 27(1): t. 2606. 1899 and *Brittonia* 2(2): 107. 1936, *Taxon* 29: 298. 1980, *Telopea* 6(4): 614. 1996.

Monostemon Henrard = *Briza* L.,
Microbriza Parodi ex Nicora & Rúgolo,
Poidium Nees

From the Greek *monos* “one, single” and *stemon* “stamen.”

Pooideae, Poaceae, Brizinae, see *Species Plantarum* 1: 70. 1753, *Reliquiae Haenkeanae* 1(4-5): 310. 1830, *An Introduction to the Natural System of Botany* 450. 1836, *Synopsis Plantarum Glumacearum* 1: 288. 1854 and *Mededeelingen van's Rijks-Herbarium* 40: 72-73. 1921, *Willdenowia*

Beiheft 8: 1-168. 1975, *Darwiniana* 23(1): 292, 295. 1981, *Contributions from the United States National Herbarium* 48: 146-151, 451, 453, 582-583. 2003.

Monroa Torrey = *Munroa* Torrey

Orth. var.

Chloridoideae, Cynodonteae, Munroinae, see *Rep. Explor. Railroad Pacif. Ocean* 4: 158. 1856 [1857] and *Revista del Museo de La Plata (Nueva Serie), Sección Botánica* 34: 171-193. 1934, *Notas del Museo de la Plata, Botánica* 2: 4. 1937, *American Journal of Botany* 48: 565-573. 1961, *Boletín de la Academia Nacional de Ciencias, Córdoba, Argentina* 52(3-4): 229-252. 1978, *Kew Bulletin* 37: 133-162. 1982, *Sida* 14: 531-549. 1991, *American Journal of Botany* 81: 622-629. 1994, *Contributions from the United States National Herbarium* 41: 174. 2001.

Moorea Lemaire = *Cortaderia* Stapf,
Moorea Rolfe (Orchidaceae)

To commemorate the Scottish botanist David Moore (Muir, until 1828), 1808-1879 (Glasnevin, Dublin), botanical collector, from 1829 to 1834 at Trinity College Garden, in 1861 a Fellow of the Linnean Society, from 1838 to 1879 Curator of Glasnevin Garden (3 km northwest of the centre of the city of Dublin), brother of Charles Moore (1820-1905) and father of Sir Frederick Moore (1857-1949), among his works are *Guide to the Royal Botanic Gardens, Glasnevin*. [Revised and enlarged by Professor William Ramsay McNab, 1844-1889, Scottish botanist.] Dublin 1885 and *The Mosses of Ireland*. Dublin 1873, with the British botanist and entomologist Alexander Goodman More (1830-1895) wrote *Contributions towards a Cybele Hibernica*, being outlines of the geographical distribution of plants in Ireland. Dublin and London 1866. See N. Colgan & Reginald William Scully (1858-1935), *Contributions towards a Cybele Hibernica*. 2nd edition. Dublin 1898; J.H. Barnhart, *Biographical notes upon botanists*. 2: 508. 1965; E. Charles Nelson, “National Botanic Gardens, Glasnevin, Retrospect and Prospect.” *Curtis's Botanical Magazine* 12(4): 181-185. Nov 1995; E. Charles Nelson & E.M. McCracken, *The Brightest Jewel: A History of the National Botanic Gardens, Glasnevin, Dublin*. Kilkenny 1987; T.W. Bossert, compil., *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 272. 1972; H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 214. Oxford 1964; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. 1917-1933; G. Murray, *History of the collections contained in the Natural History Departments of the British Museum*. 1: 169. London 1904; Ernest Nelses & William Cuthbertson, *Curtis's Botanical*

Magazine Dedications, 1827-1927. 183-184. [1931]; Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 496-497. 1994; I.C. Hedge & J.M. Lamond, *Index of Collectors in the Edinburgh Herbarium*. Edinburgh 1970.

Danthonioideae, Danthonieae, type *Moorea argentea* (Nees) Lem., see *Saggio sulla Storia Naturale del Chili ...* 154-155. Bologna 1782, *Flora Brasiliensis seu Enumeratio Plantarum* 2: 462. 1829, *Gramineae* 21. 1841, *L'Illustration horticole* 2 (Misc.): 14-15. 1855, *Gardener's chronicle, ser. 3* 8: 7. 1890, *Gardener's Chronicle, ser. 3* 22(570-571): 378, 396. 1897 and *Synopsis der mitteleuropäischen Flora* 2(1): 325. 1900, *Gardener's Chronicle, ser. 3* 34: 400. 1903, *Contributions from the United States National Herbarium* 46: 163-166, 297. 2003.

Moorochloa Veldkamp

Panicoideae, see *Flora Graeca* 1(2): 44, t. 59. 1808 and *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 7: 70. 1917, *Bulletin of Miscellaneous Information Kew* 1936(5): 323. 1936, *Reinwardtia* 12(2): 138-139. 2004.

Mosdenia Stent

Dedicated to Mr. E.A. Galpin's farm Mosdene, near Naboomspruit, Transvaal.

One species, South Africa. Chloridoideae, Cynodonteae, perennial, herbaceous, unbranched, long stoloniferous, cataphylls, leaves basal, auricles absent, ligule an unfringed to lacinate membrane, plants bisexual, inflorescence a single spike, spikelets single and with female-fertile florets only, female-fertile floret terminal on the rachilla, 2 glumes membranous and subequal, upper glume 1-nerved, lemmas carinate, palea 2-nerved 2-keeled, 2 lodicules free and fleshy, 3 stamens, ovary glabrous, 2 stigmas, species of open habitats, bushveld, dry savannah, granite, on sandy soil, savannah, type *Mosdenia waterbergensis* Stent, see *Bothalia* 1: 170. 1922 [1923].

Species

M. leptostachys (Ficalho & Hiern) Clayton (*Mosdenia phleoides* (Hackel) Stent; *Perotis phleoides* Hackel; *Sporobolus leptostachys* Ficalho & Hiern)

South Africa. Perennial, creeping, inflorescence densely spike-like, solitary spikelets awnless arranged in whorls or spirals, 1 bisexual floret, glumes glabrous 1-nerved, see *Kew Bulletin* 25(2): 250. 1971.

Moulinsia Raf. = *Aristida* L., *Moulinsia* Cambess. (Sapindaceae), *Moulinsia* Blume (Sapindaceae)

Arundinoideae, Aristideae, or Aristidoideae, Aristideae, type *Aristida lanosa* Muhl. ex Elliott (syn. *Moulinsia lanosa* Raf. ex B.D. Jacks.), see *Species Plantarum* 1: 82. 1753, *A Sketch of the Botany of South-Carolina and Georgia* 1(2): 143. 1816, *Mémoires du Muséum d'Histoire Naturelle* 18: 27, t. 2. 1829, Constantine Samuel Rafinesque (1783-1840), *Seringe Bull. Bot.* 1: 221. 1830, *Florae Senegambiae Tentamen* 118, t. 28. Paris, London 1830-1833 [23 June 1831], *Rumphia* 3: 119. 1848 [1849] and *Mededeelingen van's Rijks-Herbarium* 54: 9. 1926, Elmer D. Merrill, *Index rafinesquianus*. 76. 1949, *Flora of Ethiopia and Eritrea* 7: 76-85. 1995, *Acta Botánica Mexicana* 63: 1-45. 2003, *Contributions from the United States National Herbarium* 46: 69-104, 297. 2003.

Moya Acosta-Solís = *Chusquea* Kunth, *Moya* Griseb. (Celastraceae)

Bambusoideae, Bambuseae, Chusqueinae, see *Journal de Physique, de Chimie, d'Histoire Naturelle et des Arts* 95: 151. 1822, *Synopsis Plantarum* 1: 254. 1822, *Abhandlungen der Königlichen Gesellschaft der Wissenschaften zu Göttingen* 19: 111, t. 1, f. 3. 1874, *Abhandlungen der Königlichen Gesellschaft der Wissenschaften zu Göttingen* 24: 84. 1879 and *Mededeelingen van's Rijks-Herbarium* 29: 1. 1916, *Die Natürlichen Pflanzenfamilien* 147(20b): 405. 1942, *Contr. Inst. Ecuatoriano Ci. Nat.* 71: 39, 43. 1969.

Muantijamvella J.B. Phipps = *Tristachya* Nees

Africa, South Africa, Angola.

Panicoideae, Arundinelleae, type *Muantijamvella huillensis* (Rendle) J.B. Phipps, see *Flora Brasiliensis seu Enumeratio Plantarum* 2: 458. 1829, *Reliquiae Haenkeanae* 1(4-5): 324, t. 44. 1830, *Catalogue of the African Plants Collected by Dr. F. Welwitsch in 1853-61* 2(1): 217. 1899 and *Bulletin, Division of Agronomy United States Department of Agriculture* 24: 23. 1901, *N. Amer. Flora* 17(8): 578. 14 July 1939, *Kirkia* 4: 106. 1964, *Kirkia* 5: 235-258. 1966, *Kew Bulletin* 21(1): 119-124. 1967, *Kew Bulletin* 26(1): 111-123. 1971, *Kew Bulletin* 26(1): 111-123. 1971, *Flora Mesoamericana* 6: 378. 1994, *Contributions from the United States National Herbarium* 46: 627-628. 2003.

Muehlenbergia Hedwig

Orthographic variant of *Muhlenbergia* Schreber, see *Genera Plantarum*. 40. 1806.

Muhlenbergia Schreber = *Acroxis* Steud.,
Anthipsimus Raf., *Bealia* Scribn., *Calycodon*
 Nutt., *Chaboissaea* Fourn., *Clomena* P. Beauv.,
Crypsinna Fourn., *Dactylogramma* Link,
Dilepyrum Michaux, *Diplachyrium* Nees,
Epicampes Presl, *Hubbardochoa* Auquier,
Lepyroxis Fourn., *Lycurus* Kunth,
Podosaemum Kunth, *Podosemum* Desv.,
Sericrostis Raf., *Tosagris* P. Beauv.,
Trichochloa DC., *Trichochloa* P. Beauv.,
Vaseya Thurber

For the American Rev. Gotthilf Heinrich (Henry) Ernest (Ernst) Muhlenberg (Mühlenberg), 1753-1815 (Lancaster), Lutheran minister, amateur botanist, among his works are *Catalogus plantarum Americae septentrionalis*. Lancaster 1813 and *Descriptio uberior graminum et plantarum calamariarum Americae septentrionalis indigenarum et cicurum*. Philadelphia 1817; see John Christopher Schwab, *The Descendants of Henry Melchior Muhlenberg*. [New Haven, Conn. 1911]; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 755. Stuttgart 1993; William Jay Youmans, editor, *Pioneers of Science in America*. New York 1896; J.H. Barnhart, *Biographical notes upon botanists*. 2: 523. 1965; Jeanette E. Graustein, *Thomas Nuttall, Naturalist. Explorations in America, 1808 - 1841*. Harvard University Press 1967; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 276. 1972; A. Lasègue, *Musée botanique de Benjamin Delessert*. 319. Paris 1845; S. Lenley et al., *Catalog of the manuscript and archival collections and index to the correspondence of John Torrey*. Library of the New York Botanical Garden. 301. 1973; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. 1917-1933; J. Ewan, editor, *A Short History of Botany in the United States*. New York and London 1969; J.W. Harshberger, *The Botanists of Philadelphia and Their Work*. 92-97. 1899; William Darlington, *Memorials of John Bartram and Humphry Marshall*. 466-474. Philadelphia 1849; Israel Smith Clare, *A brief history of Lancaster County*. Argus 1892; Jonas C. Dryander, *Catalogus bibliothecae historico-naturalis Josephi Banks*. London 1796-1800; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. Philadelphia 1964; William Darlington, *Reliquiae Baldwinianae*. Philadelphia 1843.

About 150-160 species, mainly in Central and North America, subtropical and warm temperate, southern U.S. to Andes, south Asia, Himalayas to Japan. Chloridoideae, Cynodonteae, Muhlenbergiinae, annual or perennial, very variable, herbaceous, caespitose or not, erect, decumbent and rooting from nodes, rhizomatous, mat-forming, branched above or unbranched, nodes glabrous, internodes

solid or hollow, auricles present or absent, ligule a membrane ciliate or not, leaves flat and narrow, plants bisexual, inflorescence exerted or partially included in upper sheath, dense and flexuous panicles, cleistogamous spikelets present or absent, spikelets solitary and not subtended by sterile bristles, floret 1 bisexual, 2 subequal glumes 0-3-nerved, spikelets disarticulating above the glumes, chartaceous or membranous lemmas with 3 usually prominent nerves, lemma entire or emarginate usually with a terminal awn, palea glabrous or hairy usually subequal to lemma, 0-2 free and fleshy lodicules, 2-3 stamens, ovary glabrous, 2 reddish stigmas, weed species, native pasture species, fodders, roots used for brooms, habitat variable, arid and semi-arid regions, dry open grassland, allied to *Sporobolus* R. Br., type *Muhlenbergia schreberi* J.F. Gmel., see *Genera Plantarum* 1: 44-45. 1789, *Systema Naturae ... editio decima tertia, aucta, reformata* 2: 171. 1791, *Flora Boreali-Americana* 1: 40, 54. 1803, *Nouveau Bulletin des Sciences, publié par la Société Philomatique de Paris* 2: 187-190. 1810, *Essai d'une Nouvelle Agrostographie* 28-29, t. 8, f. 2, 3. 1812, *Catalogus plantarum horti botanici monspeliensis* 151. 1813, *Mémoires du Muséum d'Histoire Naturelle* 2: 72. 1815, *Nova Genera et Species Plantarum* 1: 141-142, pl. 45. 1815 [1816], *Syst. M. x involuta Swallen (pro sp.)

North America, U.S., Texas. See *American Journal of Botany* 19(5): 436, f. 2. 1932, *Manual of the Vascular Plants of Texas* 232. 1970.

M. xanthodas Soderstr.

Mexico. See *Contributions from the United States National Herbarium* 34(4): 173. 1967.

Munroa Torrey = *Hemimunroa* Parodi,
Hemimunroa (Parodi) Parodi, *Monroa* Torrey,
Munroa Hack.

Named for Sir William Munro, 1818-1880 (Somerset), British botanist, plant collector, agrostologist, 1834-1838 India, 1847 Kashmir, 1870-1875 Barbados, in 1840 a Fellow of the Linnean Society, wrote "A monograph of the Bambusaceae, including descriptions of all the species." *Trans. Linn. Soc. London*. 26: 1-157. 1868. See T.W. Bossert, compil., *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 278. 1972; E. Bretschneider, *History of European Botanical Discoveries in China*. 1981; H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 216. Oxford 1964; Warren R. Dawson, *The Banks Letters, a Calendar of the Manuscript Correspondence of Sir Joseph Banks*. London 1958; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. 1917-1933; R. Zander, F. Encke, G. Buchheim, & S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993; Mea Allan, *The Hookers of Kew*. London 1967; Leonard Huxley, *Life and Letters of Sir J.D. Hooker*. 199. London 1918; Isaac Henry Burkill, *Chapters on the History of Botany in India*. Delhi 1965; Ralph Randles Stewart, *An Annotated Catalogue of the Vascular Plants of West Pakistan and Kashmir*. Karachi 1972; Ignatz Urban, editor, *Symbolae Antillanae*. 3: 91. Berlin 1902; I.C. Hedge & J.M. Lamond, *Index of Collectors in the Edinburgh Herbarium*. Edinburgh 1970.

Some 5 species, western U.S., Canada to Mexico, Central Andes, Peru to Argentina. Chloridoideae, Cynodonteae, Munroinae, annual, herbaceous, decumbent, low, prostrate, spreading, sometimes rooting at the nodes, mat-forming, branched, long stolons, leaves in fascicles and mostly basal, auricles absent, ligule a line of hairs, leaf blades pungent, plants bisexual or gynomonoecious, inflorescence a panicle, spikelets sessile and clustered, glumes unequal and present or absent or 2 or 1, second glume awnless, lemmas emarginate or bilobed and mucronate or awned, palea glabrous, lodicules absent or present, 2-3 stamens, 2-3 stigmas, in dry areas, sandy dunes, open habitats, dry plains, related to *Erioneuron* and *Dasyochloa*, type *Munroa squarrosa*

(Nutt.) Torr., see *Rep. Explor. Railroad Pacif. Ocean* 4: 158. 1856 [1857], *Die Natürlichen Pflanzenfamilien* 2(2): 65. 1887, *Verzeichniss der von Friedrich Philippi auf der Hochebene der Provinzen Antofagasta und Tarapacá gesammelten Pflanzen* 8: 90. 1891, *Rev. May 2005.

Species

M. andina Phil. (*Hemimunroa andina* (Phil.) Parodi; *Hemimunroa andina* var. *brevisetata* (Hack.) Parodi; *Munroa andina* var. *andina*; *Munroa andina* var. *brevisetata* Hack.; *Munroa multiflora* Phil.)

South America, Chile. Small, low, gynomonoecious, spikelets 5-8-flowered subsessile, glumes unequal, lower glume acute, upper glume rounded or mucronate, palea truncate, see *Verzeichniss der von Friedrich Philippi auf der Hochebene der Provinzen Antofagasta und Tarapacá gesammelten Pflanzen* 8: 90. 1891 and *Annuaire du Conservatoire et Jardin Botaniques de Genève* 17: 294. 1914.

M. argentina Griseb.

Argentina, Bolivia. Small, leaf blades pungent, basal spikelet 2-flowered, distal spikelet 3-flowered, glumes pungent, lemma fimbriate, palea truncate, dry arid sites, see *Abhandlungen der Königlichen Gesellschaft der Wissenschaften zu Göttingen* 24: 300. 1879 and *Revista Mus. La Plata* 34: 187. 1934.

M. decumbens Phil.

South America, Chile, Bolivia. Small, gynomonoecious, spikelets 6-10-flowered, lower spikelets 2-glumed, terminal spikelet with lower glume reduced or absent, glumes unequal, lemmas 3-lobed, sandy soils, see *Verzeichniss der von Friedrich Philippi auf der Hochebene der Provinzen Antofagasta und Tarapacá gesammelten Pflanzen* 8: 90. 1891.

M. mendocina Phil.

Argentina. See *Anales de la Universidad de Chile* 36: 210. 1870.

M. squarrosa (Nutt.) Torrey (*Crypsis squarrosa* Nutt.; *Munroa squarrosa* var. *floccuosa* Vasey ex Beal; *Munroa squarrosa* var. *squarrosa*)

North America, U.S. Branched, slender stolons, glumes unequal to subequal, found in dry open areas, sandy soils, see *The Genera of North American Plants* 1: 49. 1818, *Pacif. Railr. Rep.* 4(5,4): 158. 1857, *Grasses of North America for Farmers and Students* 2: 456. 1896.

in English: false buffalo grass

Mustelia Cav. ex Steud. = *Chusquea* Kunth, *Mustelia* Steud., *Mustelia* Spreng. (Asteraceae, alt. Compositae)

Latin *mustela* “a weasel.”

Bambusoideae, Bambuseae, Chusqueinae, see *Der Botanische Garten der Universität zu Halle, Erster Nachtrag* 28. 1801, *Transactions of the Linnean Society of London* 6: 152. 24-27 May 1802, *Species Plantarum. Editio quarta* 3: 1775. 1804, *Synopsis Plantarum* 1: 254. 1822, *Journal de Physique, de Chimie, d'Histoire Naturelle et des Arts* 95: 151. 1822, *Nomenclator Botanicus. Editio secunda* 2: 168. 1841 and *Annals of the Missouri Botanical Garden* 82: 581-592. 1995, *Contributions from the United States National Herbarium* 39: 36-52. 2000.

Mygalurus Link = *Vulpia* Gmelin

Greek *mygale* “shrew-mouse, field-mouse” and *oura* “a tail,” Latin *mygale, es* “a small species of mouse.”

Pooideae, Poeae, Loliinae, type *Mygalurus caudatus* Link, see *Species Plantarum* 1: 73. 1753, Carl [Karl] Christian Gmelin (1762-1837), *Flora Badensis Alsatica* et confinium regionum cis et transrhena plantae a lacu bodamico ... Karlsruhe 1805-1826, *Enumeratio Plantarum Horti Regii Berolinensis Altera* 1: 92. 1821, *Genera Plantarum* 101. 1836, *Die Natürlichen Pflanzenfamilien* 2(2): 75. 1887 and *Contr. U.S. Natl. Herb.* 10: 3. 1906, *Botaniska Notiser* 130: 173-187. 1977, *Nordic Journal of Botany* 1(1): 17-26. 1981, *Contributions from the United States National Herbarium* 48: 454, 690-694. 2003.

Myriachaeta Moritzi = *Thysanolaena* Nees

From the Greek *myria* “many” and *chaite* “bristle, long hair.”

Panicoideae, Thysanolaeneae, type *Myriachaeta arundinacea* Zoll. & Moritzi, see *Edinburgh New Philosophical Journal* 18: 180. 1835, *Systematisches Verzeichniss der von H. Zollinger in den Jahren 1842-1844* 101. 1846, *Synopsis Plantarum Glumacearum* 1: 404. 1855 [1854] and *Blumea*

35(2): 451. 1991, *Contributions from the United States National Herbarium* 46: 297, 617. 2003.

Myriocladus Swallen

From the Greek *myrios* “many, myriad, numberless” and *kladion* “a branchlet, a small branch,” *klados* “a branch.”

About 12-20 species, Venezuela, Brazil, Guyana. Bambusoideae, Bambusodae, Bambuseae, or Bambusoideae, Bambuseae, Arthrostylidiinae, perennial, sympodial, unicaspitate, unarmed, canelike or tree, woody and persistent, more or less simple, hollow or solid, flowering culms leafy, culm sheaths persistent and thickened, thickets forming, rhizomes pachymorph, leaf blades leathery, leaves imbricate above an elongated internode, terminal unilateral racemes along a central axis, spikelets sessile or pedicelled, spikelets with 2 fertile and 1 sterile florets, 2-3 glumes, palea nerved, 3 membranous lodicules, 3 stamens, stigmas 2, on sandstone, woodlands, savannah hills, along streams and stream banks, type *Myriocladus virgatus* Swallen, see J.A. Steyermark & collaborators, “Botanical Exploration in Venezuela.” in *Fieldiana, Bot.* 1951-1952, *Fieldiana, Botany* 28(1): 34, f. 4. 1951, *Taxon* 6: 205. 1957, *Memoirs of the New York Botanical Garden* 9: 237-249. 1957, *Memoirs of the New York Botanical Garden* 18(2): 11-22. 1969, *Smithsonian Contributions to Botany* 9: 1-148. 1973, *Novon* 1(2): 76-87. 1991, *Brittonia* 50(1): 430-446. 1998 [A revision of *Myriocladus* (Poaceae: Bambusoideae: Bambuseae)], *American Bamboos* 186-189. 1999, *Contributions from the United States National Herbarium* 39: 76-78. 2000.

Species

M. cardonae Swallen (named for the Catalan explorer Félix Cardona Puig, 1903-1982, geographer, botanical collector in Brazil and Venezuela, the most important twentieth century traveler and explorer in the Venezuelan Guiana, in 1927, with Juan Mundo and his son, explored the slopes of the Auyantepui for over 3 months, he was the first European to see what we know today as Angel Falls, the world's highest waterfall. See Pere (Pedro) Grases, “*Fèlix Cardona i Puig. Mite i realitat al cor d'Amèrica del Sud (Assaig d'interpretació personal)*.” Caracas: Terra Ferma, Patronat de Cultura del Centre Català de Caracas. Ajuntament de Malgrat, Generalitat de Catalunya, Institut Català de Cooperació Iberoamericana, Institut Municipal d'Història de l'Ajuntament de Barcelona. L'Hospitalet de Llobregat, 1983; Eduardo Röhl, *Historia de las ciencias geográficas de Venezuela (1498-1948)*. Caracas, Edición de Héctor Pérez Marchelli, 1990; Francisco Escamilla Vera, *Geografía de Venezuela* 9. Caracas, Oxford University Press 1998)

Venezuela. See *Fieldiana, Botany* 28(1): 35. 1951, *Memoirs of the New York Botanical Garden* 9(3): 237-278. 1957,

Smithsonian Contributions to Botany 9: 1-148. 1973, *Smithsonian Contr. Bot.* 56: 28. 1984, *Brittonia* 50(1): 430-446. 1998.

M. churunensis Swallen

Venezuela, Río Churún. Erect, forming small colonies, see *Memoirs of the New York Botanical Garden* 9(3): 237-278. 1957, *Acta Botanica Venezuelica* 2(5-8): 132. 1967.

M. distantiflorus Swallen (*Myriocladus confertus* Swallen; *Myriocladus purpureus* Swallen; *Myriocladus variabilis* Swallen; *Myriocladus wurdackii* Swallen) (dedicated to the American botanist John Julius Wurdack, 1921-1998, plant collector; see Julien Alfred Steyermark (1909-1988), "New Species of Rubiaceae from Peru collected by John Wurdack." *Bol. Soc. Venez. Ci. Nat.* 25: 232-244. 1964; J.A. Steyermark & collaborators, "Botanical Exploration in Venezuela." in *Fieldiana, Bot.* 1951-1952; Bassett Maguire (1904-1991), "Guttiferae." in B. Maguire, J.J. Wurdack, & collaborators, "The Botany of the Guayana Highland — part IV(2)." *Memoirs of the New York Botanical Garden* 10(4): 21-32. 1961, "Rapateaceae." in B. Maguire, J.J. Wurdack, & collaborators, "The Botany of the Guayana Highland-part VI." *Mem. New York Bot. Gard.* 12(3): 69-102. 1965; Bassett Maguire & Y.-C. Hung, "Styracaceae." in B. Maguire, J.J. Wurdack and collaborators, "The Botany of the Guayana Highland — part X." *Mem. New York Bot. Gard.* 29: 204-223. 1978; Bassett Maguire, J.A. Steyermark & D.G. Frodin, "Araliaceae." in B. Maguire, J.J. Wurdack, & collaborators, "The Botany of the Guayana Highland — part XII." *Mem. New York Bot. Gard.* 38: 46-84. 1984; Lois Brako & James Lee Zarucchi, *Catalogue of the Flowering Plants and Gymnosperms of Peru*. 1249-1250. Missouri Botanical Garden, St. Louis, Missouri 1993; Laurence J. Dorr, "In Memoriam. John J. Wurdack, 1921-1998." in *Plant Science Bulletin*. 44(2): 41. Summer 1998)

Venezuela. Erect, forming colonies, moist ground, see *Memoirs of the New York Botanical Garden* 9(3): 248, f. 4c-f, I, and 396-398. 1957.

M. exsertus Swallen (*Myriocladus simplex* Swallen)

Venezuela. Savannah, along stream banks, see *Memoirs of the New York Botanical Garden* 9(3): 242, f. 3c. 1957.

M. grandifolius Swallen (*Myriocladus paraquensis* Swallen)

Venezuela, Amazonas, Cerro Sipapo, Paráque. Savannah, along stream banks, open forest, forest, see *Fieldiana, Botany* 28(1): 34, f. 4. 1951, *Taxon* 6: 205. 1957, *Memoirs of the New York Botanical Garden* 9(3): 245-246, f. 3h-j. 1957.

M. involutus Judz. & Davidse

Venezuela. See *Novon* 1(2): 83, f. 4. 1991.

M. longiramosus Swallen (*Myriocladus affinis* Swallen; *Myriocladus paruensis* Swallen)

Venezuela, Amazonas, Serrania Parú, Río Parú. Borders of woodlands, see *Memoirs of the New York Botanical Garden* 9(3): 243-244, f. 3e-g. 1957.

M. neblinaensis Swallen

Venezuela, Amazonas, Río Yatua, Cerro de Neblina. Savannah, see *Memoirs of the New York Botanical Garden* 9(3): 240, f. 1. 1957.

M. paludicolus Swallen (*Myriocladus paludicola* Swallen)

Venezuela. Erect, see *Memoirs of the New York Botanical Garden* 9(3): 246, 248, f. 4b. 1957.

M. simplex Swallen

Venezuela. Savannah, along stream banks, see *Memoirs of the New York Botanical Garden* 9(3): 242, f. 2. 1957.

M. steyermarkii Swallen (*Myriocladus gracilis* Swallen)

Venezuela. Short wiry culms, solitary raceme of 3-5 spikelets borne laterally, see *Memoirs of the New York Botanical Garden* 9(3): 247, f. 3a and 393, 395, f. 74. 1957.

M. virgatus Swallen (*Myriocladus maguirei* Swallen)

Venezuela. Erect, savannah, see *Fieldiana, Botany* 28(1): 34, f. 4. 1951, *Memoirs of the New York Botanical Garden* 9(3): 239, f. 3b. 1957.

**Myriostachya (Benth.) Hook.f. =
Myriostachya J.D. Hook.**

From the Greek *myrios* "many, numberless, a great many, countless" and *stachys* "spike," alluding to the spikes.

One species, south India to Indochina, Indonesia. Chloridoideae, Eragrostideae, *Eragrostis* sect. *Myriostachya* Benth., perennial, robust, herbaceous, unarmed, simple or sparsely branched, rhizomatous, rhizomes pachymorph, semiaquatic, often floating, leaves mainly basal, auricles absent, ligule a fringed and narrow membrane, leaf blades long acuminate and finely pointed, plants bisexual, inflorescence spicate and paniculate, long and narrow panicle, racemes deciduous, spikelets solitary closely imbricate, florets perfect, 2 awned glumes more or less unequal or subequal, lemmas coriaceous acuminate, palea 2-nerved 2-keeled, 2 free and fleshy lodicules, 3 stamens, ovary glabrous, 2 stigmas plumose, found in brackish water, river margins, banks of tidal rivers, see *Journal of the Linnean Society, Botany* 19: 117. 1881, *The Flora of British India* 7: 327. 1897.

Species

M. wightiana (Nees ex Steud.) Hook.f. (*Dinebra verticillata* Wight ex Steud.; *Eragrostis wightiana* (Nees ex Steud.) Benth.; *Leptochloa wightiana* Nees ex Steud.; *Myriostachya longispicula* (Hook.f.) Senaratna; *Myriostachya wightiana* var. *longispicula* Hook.f.)

Sri Lanka, India, Thailand, Malay Peninsula. Perennial, tussocky, compressed, ligule a line of hairs, floating rhizomes, coriaceous blades, leaf sheaths coriaceous, cylindrical panicle, numerous racemes, spikelets pedicellate, acuminate glumes linear-lanceolate tapering to a long subulate awn, lemmas keeled glabrous, marshy places, see

Synopsis Plantarum Glumacearum 1: 209, 216. 1854, *Icones Plantarum* 14: t. 1381. 1882, *The Flora of British India* 7: 327. 1896 and *Grasses of Ceylon* [also *Peradeniya Manual*] 8: 66. 1956, *Ceylon J. Sci., Biol. Sci.* 2(2): 125. 1959, *Grasses of Burma ...* 518. 1960.

N

Nabelekia Roshevitz = *Anatherum* P. Beauv., *Anatherum* Nábelek, *Festuca* L.

For Frantisek Nábelek, 1884-1965, Moravian professor of botany, author of *Iter-turcico-persicum*. Bruno 1923-1929. See J.H. Barnhart, *Biographical notes upon botanists*. 2: 534. 1965; T.W. Bossert, compil., *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 280. 1972; Stafleu & Cowan, *Taxonomic literature*. 3: 678-679. 1981.

Panicoideae, Andropogoneae, Andropogoninae or Pooideae, Poeae, Loliinae, type *Nabelekia tauricola* (Nábelek) Roshev., see *Species Plantarum* 1: 73-76. 1753, *Essai d'une Nouvelle Agrostographie* 128, 150. 1812 and *Ill. Fl. U.S. Canad.* edition 2, 1: 269. 1913, *Watsonia* 16: 300. 1987, *Contributions from the United States National Herbarium* 46: 19-20. 2003, *Contributions from the United States National Herbarium* 48: 312-368. 2003.

Narduretia Villar = *Vulpia* Gmelin

Pooideae, Poodae, Poeae, or Pooideae, Poeae, Loliinae, type *Narduretia delicatula* (Lag.) Villar (also *deliculata*), see *Flora Atlantica* 1: 88, t. 12. 1798, *Flora Badensis Alsatica* 1: 8. 1805, *Varietades de Ciencias, Literatura y Artes* 4(19): 39. 1805, *Compendium Florae Germaniae. Editio altera* 1: 193. 1836, *Genera Plantarum* 101. 1836, *Synopsis Florae Germanicae et Helveticae* 809. 1837, *Index Sem. Hort. Genuensis* 26. 1847, *Prodromus Florae Hispanicae* 1: 90. 1861 and *Bulletin de la Société d'Histoire Naturelle de l'Afrique du Nord* 16: 100-102. 1925, *Botaniska Notiser* 130(2): 186. 1977, *Nordic Journal of Botany* 1(1): 20, 24. 1981, *Watsonia* 16: 300. 1987, *Flora Mesoamericana* 6: 228. 1994, *Bothalia* 27: 75-82. 1997, *Flora Mediterranea* 8: 307-313. 1998, *Bothalia* 29(2): 335-341. 1999, *Systematic Botany* 27(2): 241-251. 2002, *Contributions from the United States National Herbarium* 48: 690-694. 2003.

Narduroides Rouy

Resembling *Nardurus*.

One species, Mediterranean. Pooideae, Poodae, Poeae, annual, herbaceous, erect, slender, rigid, stiff, auricles absent, linear leaves, ligule an unfringed membrane, plants

bisexual, rigid unilateral inflorescence spicate or racemose, spikelets solitary and appressed, spikelets sessile and more or less sunken in 2 opposite rows, 2 glumes subequal and side-by-side, lemmas coriaceous, palea present, 2 free and membranous lodicules, 3 stamens, ovary glabrous, 2 stigmas, adapted to saline soils, type *Narduroides salzmannii* (Boiss.) Rouy, see *Flore de France* 14: 301. 1913.

Species

N. salzmannii (Boiss.) Rouy (*Catapodium salzmannii* (Boiss.) Boiss.; *Festuca salzmannii* (Boiss.) Boiss. ex Coss.; *Nardurus salzmannii* Boiss.)

Mediterranean. Hainardieae, raceme unilateral, spikelets 4- to 6-flowered, dry places, see *Voyage botanique dans le midi de l'Espagne* 2: 667. 1844 and *Taxon* 33: 351-354. 1984, *International Organization of Plant Biosystematists Newsletter* 13: 16. 1989.

Nardurus (Bluff, Nees & Schauer) Rchb. = *Vulpia* C.C. Gmelin

From the Greek *nardos* "spikenard, a fragrant shrub."

Pooideae, Poodae, Poeae, or Pooideae, Poeae Loliinae, *Brachypodium* sect. *Nardurus* Bluff, Nees & Schauer, see *Species Plantarum* 1: 73. 1753, *Flora Badensis Alsatica* 1: 8. 1805, *Essai d'une Nouvelle Agrostographie* 101, 155, 180. 1812, *Systema Vegetabilium* 2: 745. 1817, *Observations sur les Graminées de la Flore Belgique* 99, 100. 1824, *Compendium Florae Germaniae. Editio altera* 1: 193. 1836, *Genera Plantarum* 101. 1836, *Synopsis Florae Germanicae et Helveticae* 809. 1837, *Prodromus Florae Hispanicae* 1: 90. 1861, *Die Natürlichen Pflanzenfamilien* 2(2): 75. 1887 and *Synopsis der mitteleuropäischen Flora* 2(1): 539. 1900, *Flore de l'Afrique du Nord* 3: 215. 1955, *Botanical Journal of the Linnean Society* 76(4): 350. 1978, *Nordic Journal of Botany* 1(1): 24. 1981, *Contributions from the United States National Herbarium* 48: 454, 690-694. 2003.

Nardus L. = *Natschia* Bubani

Greek *nardos* "spikenard," Latin *nardus*, *i* and *nardum* "nard," Hebrew *nerd*, Akkadian *nadû* "to pour, to let water flow, to scatter"; see Carl Linnaeus, *Species Plantarum*. 53. 1753 and *Genera Plantarum*. Edition 5. 27. 1754.

One species, Europe; western Asia; Caucasus. Stipoideae or Arundinoideae, Nardeae, or Pooideae, Nardeae, perennial, stiff, tough, robust, stout, dense, wiry, tufted, internodes hollow, leaves mainly basal, auricles absent, ligule an unfringed membrane, filiform leaf blades, plants bisexual, inflorescence a single unilateral spike or raceme very slender, spikelets solitary and dorsally compressed, spikelets 1-flowered without rachilla extension, 1-2 glumes persistent and tiny or weakly developed, lower glume reduced to a rim, upper glume usually suppressed or severely reduced, lemma strongly 2-keeled, palea nerved, lodicules absent, 3 stamens, ovary glabrous, 1 stigma, species of open habitats, moorland, swamps, pastures, swampy pasture, damp areas, moist ground, type *Nardus stricta* L., see *Species Plantarum* 1: 53. 1753, *Species Plantarum, Editio Secunda* 78. 1762, *Hortus Regius Monspeliensis* 33. 1762, *Supplementum Plantarum* 105. 1781 [1782], *Tableau Encyclopédique et Méthodique ... Botanique* 1: 152. 1791, *Synopsis Florae Germanicae et Helveticae*. 830. *Francofurti ad Moenum* 1836-37, *Deutsch. Fl.* 6: 4. 1846 and *Flora Pyrenaea per ordine naturales gradatim digesta* 4: 405. Carnelli, Marco Madella, Jean-Paul Theurillat & Brigitta Ammann, "Aluminum in the opal silica reticulate of phytoliths: a new tool in palaeoecological studies." *Am. J. Bot.* 89: 346-351. 2002, *Contributions from the United States National Herbarium* 48: 454-455, 467. 2003, *Am. J. Bot.* 91: 1709-1725. 2004, *Environmental Microbiology* 7(6): 780-788. June 2005.

Species

N. stricta L. (*Nardus glabriculumis* Sakalo; *Nardus stricta* var. *glabriculumis* (Sakalo) Tzvelev)

Eurasia. Perennial, tufted, slender, erect, shortly creeping rhizome, leaf sheath coriaceous, leaf blade pungent and hard, spikelets 1-flowered, glumes much reduced, lemma with a weak central nerve, palea membranous, no lodicules, very unpalatable, invasive grass, noxious weed naturalized elsewhere, see *Species Plantarum*. 1: 53. 1753 and *Regnum Veg.* 127: 69. 1993, A.C. Cook, D.T. Tissue, S.W. Roberts & W.C. Oechel, "Effects of long-term elevated [CO₂] from natural CO₂ springs on *Nardus stricta*: photosynthesis, biochemistry, growth and phenology." *Plant, Cell and*

Environment 21(4): 417-425. Apr 1998, *Journal of Ecology* 87(2): 330-340. Mar 1999, *Grass and Forage Science* 54(3): 195-207. Sep 1999, *New Phytologist* 152(2): 355-363. Nov 2001, *Functional Ecology* 16(5): 664-670. Oct 2002, *Environmental Microbiology* 6(10): 1070-1080. Oct 2004.

in English: mat grass, nard grass, moor matgrass

in India: sama

Narenga Bor = *Saccharum* L.

Two species, Indochina, Malaysia, Southeast Asia. Panicoideae, Andropogonodae, Andropogoneae, Andropogoninae, or Panicoideae, Andropogoneae, Saccharinae, perennial, herbaceous, robust, stout, tough, solid internodes, stoloniferous, ligule an unfringed membrane, plants bisexual, dense and woolly inflorescence paniculate with paired spikelets, spikelets sessile and pedicellate, two glumes subequal, lodicules present, 3 stamens, ovary glabrous, sometimes referred to *Saccharum* L., intergeneric hybrids with *Saccharum* L. and *Sclerostachya* (Hackel) A. Camus, type *Narenga porphyrocoma* (Hance ex Trimen) Bor, see *Species Plantarum* 1: 54. 1753 and *Fl. Assam* 5: 315. 1940, *Indian Forester* 66: 267. 1940, *Contributions from the United States National Herbarium* 46: 297, 550-557. 2003.

Species

N. fallax (Balansa) Bor (*Erianthus chrysothrix* Hack.; *Erianthus fallax* (Balansa) Ohwi; *Erianthus fallax* (Balansa) Jansen, nom. illeg., non *Erianthus fallax* (Balansa) Ohwi; *Erianthus longifolius* (Munro ex Benth.) A. Camus; *Eriochrysis longifolia* Munro; *Saccharum fallax* Balansa; *Saccharum longifolium* Munro ex Benth.)

India. See *Journal of the Linnean Society, Botany* 19(115-116): 66. 1881, *Journal de Botanique (Morot)* 4(4): 80-81. 1890, *Österreichische Botanische Zeitschrift* 41: 6. 1891 and *Flore Générale de l'Indo-Chine* 7: 246. 1922, *Bulletin of the Tokyo Science Museum* 18: 2. 1947, *Kew Bulletin* 1948: 162. 1948, *Reinwardtia* 2(2): 275. 1953.

N. fallax (Balansa) Bor var. *aristata* (Balansa) L. Liou (*Saccharum fallax* var. *aristatum* Balansa)

Northeastern India, China, Vietnam. See *Journal de Botanique (Morot)* 4: 81. 1890 and *Flora Reipublicae Popularis Sinicae* 10(2): 37. 1997.

N. fallax (Balansa) Bor var. *fallax* (*Erianthus chrysothrix* Hack.; *Erianthus fallax* (Balansa) Ohwi; *Erianthus fallax* (Balansa) Jansen, nom. illeg., non *Erianthus fallax* (Balansa) Ohwi; *Erianthus longifolius* (Munro ex Benth.) A. Camus; *Eriochrysis longifolia* Munro; *Saccharum fallax* Balansa; *Saccharum longifolium* Munro ex Benth.)

China. See *Journal of the Linnean Society, Botany* 19 (115-116): 66. 1881, *Journal de Botanique (Morot)* 4(4): 80-81. 1890, *Österreichische Botanische Zeitschrift* 41: 6. 1891 and *Flore Générale de l'Indo-Chine* 7: 246. 1922, *Bulletin*

of the Tokyo Science Museum 18: 2. 1947, *Kew Bulletin* 1948: 162. 1948, *Reinwardtia* 2(2): 275. 1953.

N. porphyrocoma (Hance ex Trimen) Bor (*Eriochrysis narenga* Nees ex Steud.; *Eriochrysis porphyrocoma* Hance ex Trimen; *Saccharum narenga* (Nees ex Steud.) Hack.; *Saccharum porphyrocoma* (Hance ex Trimen) Hack.; *Saccharum porphyrocoma* var. *hasianum* Hack.)

India. Young leaves browsed by cattle, culms used for thatching and screens, a good soil binder useful for erosion control, see *Synopsis Plantarum Glumacearum* 1: 411. 1855 [1854], *Journal of Botany, British and Foreign* 14(166): 294. 1876, *Monographiae Phanerogamarum* 6: 119-120. 1889 and *Indian Forester* 56: 267, 316. 1940, *Caryologia* 37: 351-357. 1984.

in India: barota, bata, ganeria, kanwal, ronsa, tanwar

in Thailand: khaem pom

Nassella Desvaux = *Nassella* (Trin.) E. Desv.

From the Latin *nassa*, *ae* “a fish basket,” “a basket for catching fish.”

About 15-116 species, mostly South America, Bolivia, northern Chile, northwestern Argentina, Andes. Stipoideae, Stipeae, or Pooideae, Stipeae, Stipinae, *Urachne* subg. *Nassella* Trin., perennial, rarely annual, caespitose, herbaceous, branched sometimes, internodes hollow, auricles absent, sheaths open, ligule membranous and truncate, blade acuminate, leaves valvate or flat, plants bisexual, inflorescence a contracted or open panicle with asymmetric laterally compressed florets, spikelet with a single gibbous to fusiform floret, 2 glumes nerved and lanceolate, lemma often with a corona or crown, lemma strongly convolute and coriaceous, lemma margins enclosing palea, awn readily deciduous and twisted or geniculate, callus short and blunt to long and sharp, palea hyaline and usually nerveless, 2 lodicules membranous and glabrous, 1-3 stamens, ovary glabrous, 2 stigmas, weed species, species of open habitats, pampas, some species have caused poisoning to mammals, closely related to *Hesperostipa* and *Piptochaetium* and *Achnatherum*, formerly included within and sometimes referred to the genus *Stipa* L., an Andean segregate of *Stipa*, type *Nassella pungens* E. Desvaux, see *Species Plantarum* 1: 78. 1753, *Fundamenta Agrostographiae* 109. 1820, *Flora Brasiliensis seu Enumeratio Plantarum* 2: 375. 1829, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Species

N. airoides (E. Ekman) Barkworth (*Stipa airoides* E. Ekman)

Argentina. See *Arkiv för Botanik utgivet av K. Svenska Vetenskapsakademien* 11(4): 31, t. 4, f. 2. 1912, *Taxon* 39(4): 609. 1990.

N. ancoraimensis F. Rojas (Bolivia, La Paz, Prov. Omasuyos, Ancoraimes, Cerro del Calvario)

Bolivia, Peru. See *Gayana, Botánica* 54(2): 165-166, f. 4. 1997.

N. arcaensis (Speg.) Torres (*Stipa arcaensis* Speg.; *Stipa paniculata* Hitchc.)

Argentina, Cuesta de Las Arcas. See *Anales del Museo de Historia Natural de Montevideo* 4: 131-132, f. 37. 1901, *Contributions from the United States National Herbarium* 24(7): 286. 1925, *Comisión de Investigaciones Científicas* 13: 13. Buenos Aires 1997.

N. arcuata (R.E. Fries) Torres (*Stipa arcuata* R.E. Fries)

Argentina, Bolivia. Perennial, leaf blades linear acuminate, oblong panicle, glumes lanceolate glabrous acuminate, pungent callus, see *Nova Acta Regiae Societatis Scientiarum Upsaliensis, ser. 4*, 1: 172. 1905, *Comisión de Investigaciones Científicas* 13: 13, f. 2A, a. 1997.

N. arechavaletae (Speg.) Barkworth (*Stipa arechavaletae* Speg.)

Uruguay. See *Anales del Museo Nacional de Montevideo* 4(2): 85-87, f. 19. 1901, *Taxon* 39(4): 609. 1990.

N. argentinensis (Speg.) Peñailillo (*Stipa argentinensis* Speg.; *Stipa neesiana* Trin. & Rupr. var. *virescens* Hack.)

Argentina. See *Species Graminum Stipaceorum* 27-28. 1842 and *Anales del Museo Nacional de Buenos Aires* 11:

100. 1904, *Revista Argentina de Botánica* 1: 45. 1925, *Kurtziana* 3: 30. 1966, *Gayana, Botánica* 55(2): 86. 1998 [1999].

N. asplundii Hitchc. (*Piptatherum obtusum* Nees & Meyen; *Stipa obtusa* (Nees & Meyen) Hitchc.) (for the Swedish botanist Eric (Erik) Asplund, 1888-1974, plant collector in Cuba and South America, his writings include *Contributions to the Flora of the Bolivian Andes*. Stockholm 1926 and "Eine neue Balanophoraceen — Gattung aus Bolivien." *Svensk Bot. Tidskr.* 22(1-2): 261-277. 1928; see Frans A. Stafleu & Erik A. Mennega, *Taxonomic literature. Supplement I: A-Ba*. 198. Königstein 1992)

South America, Bolivia, Peru. Perennial, herbaceous, caespitose, bunchgrass, erect or geniculate, leaves mainly basal, auricles hairy, ligule truncate, lax inflorescence reddish to purplish, glumes lanceolate subequal acuminate, pastures, puna, see *Gramineae* 18-19. 1841 and *Contributions from the United States National Herbarium* 24(7): 284. 1925, *Contributions from the United States National Herbarium* 24(8): 394. 1927.

N. ayacuchensis (Tovar) Barkworth (*Stipa ayacuchensis* Tovar) (Peru, Huamanga, Ayacucho)

South America, Peru. See *Opuscula Botánica Pharmaciae Complutensis* [now *Rivasgodaya*] 4: 85. 1988 [Universidad Complutense de Madrid], *Taxon* 39(4): 609. 1990.

N. brachychaetoides (Speg.) Barkworth (*Stipa brachychaetoides* Speg.)

Argentina. Dunes, see *Revista Argentina de Botánica* 1(1): 29. 1925, *Taxon* 39(4): 609. 1990.

N. brachyphylla (Hitchc.) Barkworth (*Nassella curviseta* (Hitchc.) Barkworth; *Nassella holwayii* (Hitchc.) Barkworth; *Nassella inconspicua* (J. Presl) Barkworth; *Stipa brachyphylla* Hitchc.; *Stipa curviseta* Hitchc.; *Stipa depauperata* Pilg. var. *glabrata* Pilg.; *Stipa holwayii* Hitchc.; *Stipa inconspicua* J. Presl)

Ecuador, Peru, Bolivia. Perennial, low, caespitose, herbaceous, alpine, tussocky, forming small clumps, short ligule, linear leaves fine and round in section, narrow inflorescence, reddish to purple glumes lanceolate, long and bent awns, growing on sandy soils, puna, slopes, grassy areas, volcanic soil, see *Reliquiae Haenkeanae* 1(4-5): 227. 1830 and *Contributions from the United States National Herbarium* 24(7): 275, 282, 287. 1925, *Taxon* 39(4): 609-610. 1990.

N. brasiliensis (A. Zanín & Longhi-Wagner) Peñailillo (*Stipa brasiliensis* A. Zanín & Longhi-Wagner)

South America. See *Bradea, Boletim do Herbarium Bradeanum* 5(33): 342-343, f. 1. 1990, *Gayana, Botánica* 55(2): 86. 1998 [1999].

N. burkartii (Torres) Barkworth & Torres (*Stipa burkartii* Torres) (named for the Argentine botanist Arturo E. Burkart (1906-1975), agronomist, author of "Bibliografía del

botánico argentino Lorenzo R. Parodi (1895-1966)." *Bol. Soc. Argent. Bot.* 12: 7-16. 1968; see J.H. Barnhart, *Biographical notes upon botanists*. 1: 284. 1965)

Argentina. See *Comisión de Investigaciones Científicas* 12: 17, f. 2, C, c, f. 4,b. 1993, *Taxon* 50(2): 453. 2001.

N. cabreræ Torres (also spelled *cabrerai*) (dedicated to the Argentine botanist Angel Lulio Cabrera, 1908-1999, professor emeritus of systematic botany, National University of La Plata, Director, Botanical Institute, San Isidro, Argentina, author of "El Aster *Haplopappus* y las especies vecinas que crecen en los alrededores de Buenos Aires." *Revista Chilena de Historia Natural* 1929, "Apuntes sobre la vegetación de las dunas de Juancho." *Notas del Museo de La Plata, La Plata* (Buenos Aires), 1936; son of the zoologist Angel Cabrera, 1879-1960; see J.H. Barnhart, *Biographical notes upon botanists*. 1: 295. 1965)

South America, Argentina. See *Comisión de Investigaciones Científicas* 13: 14-15, f. 1, I, i. 1997.

N. caespitosa Griseb. (*Nassella caespitosa* var. *caespitosa*; *Nassella inconspicua* (J. Presl) Barkworth; *Oryzopsis caespitosa* (Griseb.) Ball; *Oryzopsis caespitosa* var. *caespitosa*; *Stipa caespitosa* (Griseb.) Speg.; *Stipa caespitosa* var. *subtypica* Speg.; *Stipa caespitosa* var. *typica* Speg.; *Stipa inconspicua* J. Presl; *Stipa plagiostephana* Speg.; *Stipa violacea* Hitchc.)

Argentina. See *Reliquiae Haenkeanae* 1(4-5): 227. 1830, *Abhandlungen der Königlichen Gesellschaft der Wissenschaften zu Göttingen* 19: 258. 1874, *Journal of the Linnean Society, Botany* 22: 58. 1885 and *Anales del Museo Nacional de Montevideo* 4(2): 117-120, f. 31a-c, d-f. 1901, *Report. Botanical Exchange Club. London*. 1914: 28. 1915, *Contributions from the United States National Herbarium* 24(7): 282. 1925, *Revista Argentina de Botánica* 1: 36. 1925, *Taxon* 39(4): 610. 1990.

N. carettei (Hauman) Torres (*Stipa carettei* Hauman) (for Eduardo Carette, botanical collector in Argentina with the Belgian botanist Lucien Leon Hauman-Merck (1880-1965) and Carlos Bruch)

South America, Argentina. See *Anales del Museo Nacional de Buenos Aires* 29: 399, f. 2. 1917, *Comisión de Investigaciones Científicas* 13: 16. 1997.

N. catamarcensis Torres

South America, Argentina, Catamarca. See *Comisión de Investigaciones Científicas* 13: 17, f. 2, I, i. 1997.

N. cernua (Stebbins & Á. Löve) Barkworth (*Stipa cernua* Stebbins & Löve; *Stipa pulchra* var. *cernua* (Stebbins & Löve) Beetle; *Stipa pulchra* var. *cernua* (Stebbins & Löve) Beetle & Tofsrud)

North America, U.S., California. Perennial, tufted, in rather large clumps, basal leaves numerous and very narrow, blue-green waxy coating, open panicle with slender branches, spikelets densely bearded at the base, long and needle-like

awns can injure cattle, noxious weed, occurs under dry conditions, chaparral, slope habitats, see *American Journal of Botany* 2: 301. 1915, *Madroño* 6(4): 137-141, f. 1, pl. 13, f. 1, 3. 1941, *Leaflets of Western Botany* 5(2): 35. 1947, *Taxon* 39(4): 609. 1990.

in English: nodding needle grass, nodding tussock grass, nodding stipa, foothill needle grass, needle grass

N. chaparensis F. Rojas

South America, Bolivia, Cochabamba, Chaparé. Caespitose, leaf blades linear, oblong panicle, glumes subequal oblong-lanceolate acuminate, see *Gayana, Botánica* 54(2): 167-168, f. 6. 1997.

N. charruana (Arechav.) Barkworth (*Stipa charruana* Arechav.; *Stipa longicylindrica* Kuntze)

Argentina, Uruguay. See *Anales del Museo Nacional de Buenos Aires* 4: 181, f. 3. 1895, *Revisio Generum Plantarum* 3(2): 372. 1898 and *Taxon* 39(4): 609. 1990.

N. chilensis (Trin.) E. Desv. (*Caryochloa chilensis* Spreng.; *Caryochloa chilensis* Spreng. ex Trin.; *Nassella chilensis* var. *chilensis*; *Nassella floribunda* Phil.; *Nassella landbeckii* Phil.; *Nassella landbeckii* var. *eremophila* Phil.; *Nassella landbeckii* var. *landbeckii*; *Nassella laxiflora* Phil.; *Nassella major* (Trin. & Rupr.) E. Desv.; *Nassella meyeniana* (Trin. & Rupr.) Parodi; *Nassella obscura* Phil.; *Nassella planifolia* Phil.; *Nassella ramosa* (Nees) E. Desv.; *Nassella ramosa* E. Desv.; *Nassella sadae* Phil.; *Piptatherum laeve* Meyen; *Piptatherum lindleyanum* Nees; *Piptatherum ramosum* Nees, pro parte; *Urachne aemulans* Steud. ex Lechler; *Urachne chilensis* Trin.; *Urachne gigantea* Steudel; *Urachne major* Trin. & Rupr.; *Urachne meyeniana* Trin. & Rupr.; *Urachne ramosa* Steudel; *Urachne ramosa* Steud. & Hochst.) (for Luis Christian Ludwig Landbeck, 1807-1890, plant collector in Chile; see *Sendtnera* 4: 47. 1997)

Southern America, Chile, Andes. Often branched from the upper nodes, sheaths glabrous or pubescent, ligule short and pilose, leaf blade strongly convolute and stiff, glumes subequal and veined, callus obtuse, lemma smooth and shiny, awn caducous, palea glabrous and reduced, found in ballast, see *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 3,1(2-3): 123. 1834, *Gramineae* 16-17. 1841, *Nom. Bot.* edition 2, 2: 731. 1841, *Species Graminum Stipaceorum* 20-21. 1842, *Novorum Actorum Academiae Caesareae Leopoldinae-Carolinae Naturae Curiosorum* 1: 148-149. Breslau et Bonn 1843, *Synopsis Plantarum Glumacearum* 1: 123. 1854, *Flora Chilena* 6: 265-266. 1854, *Linnaea* 33(3-4): 277, 279. 1864 [1865], *Anales de la Universidad de Chile* 43: 558. 1873, *Anales de la Universidad de Chile* 93: 727, 729. 1896 and *Darwiniana* 7(3): 379, f. 5. Buenos Aires 1947, *Flora Patagónica* 8(3): 289-333. 1978, *Gayana, Bot.* 47(1-2): 18-19, 22. 1990.

in English: Chilean tussock grass

N. clarazii (Ball) Barkworth (*Stipa clarazii* Ball; *Stipa clarazii* var. *bulbosa* Speg.; *Stipa clarazii* var. *clarazii*; *Stipa longiglumis* Phil.; *Stipa quadrifaria* Kuntze) (dedicated to Georges Claraz, 1832-1930, plant collector in Argentina)

South America, Argentina. See *Linnaea* 33(3-4): 286. 1864, *Journal of the Linnean Society, Botany* 21: 237. 1884, *Revisio Generum Plantarum* 3(3): 369, 372. 1898 and *Anales del Museo Nacional de Montevideo* 4(2): 73. 1901, *Taxon* 39(4): 609. 1990.

N. coquimbensis (Matthei) Peñailillo (*Stipa coquimbensis* Matthei)

Chile, Región de Coquimbo. Perennial, vulnerable species, see *Gayana, Botánica* 13: 35. 1965, *Gayana, Botánica* 55(2): 86. 1998 [1999].

N. cordobensis (Speg.) Barkworth (*Stipa cordobensis* Speg.; *Stipa cordobensis* var. *tuberculata* F.A. Roig; *Stipa papillosa* (Hack.) Hitchc.; *Stipa tenuis* var. *papillosa* Hack.)

South America. See *Anales de la Universidad de Chile* 36: 204. 1870 and *Anales del Museo Nacional de Montevideo* 4(2): 141-143, f. 42. 1901, *Anales del Museo Nacional de Buenos Aires* 14: 83. 1911, *Contributions from the United States National Herbarium* 24(7): 277. 1925, *Revista de la Facultad de Ciencias Agrarias [Universidad Nacional de Cuyo]* 11(1-2): 83-84, t. 18. Mendoza 1964 [1966], *Taxon* 39(4): 609. 1990, *Comisión de Investigaciones Científicas* 13: 18. 1997.

N. crassiflora (Roseng. & B.R. Arrill.) Barkworth (*Nassella meyeniana* (Trin. & Rupr.) Parodi; *Stipa crassiflora* Roseng. & B.R. Arrill.)

South America. See *Species Graminum Stipaceorum* 20. 1842 and *Darwiniana* 7(3): 379, f. 5. 1947, *Boletín de la Facultad de Agronomía de Universidad de la Republica, Montevideo* 72: 30, t. 8. 1964, *Taxon* 39(4): 609. 1990.

N. curamalalensis (Speg.) Barkworth (*Stipa curamalalensis* Speg.; *Stipa tenuissima* var. *curamalalensis* (Speg.) Hack.)

South America, Uruguay, Curamalál. See *Anales del Museo Nacional de Montevideo* 4(2): 160-162, f. 49. 1901, *Anales del Museo Nacional de Buenos Aires* 21: 83. 1911, *Taxon* 39(4): 609. 1990.

N. curviseta (Hitchc.) Barkworth (*Nassella brachyphylla* (Hitchc.) Barkworth; *Stipa curviseta* Hitchc.)

South America. Perennial, caespitose, erect, basal sheath pubescent, convolute leaf blades acuminate, ovate panicle with flexuous branches, glumes lanceolate acuminate, pungent callus, hairy 2-geniculate awn, see *Contributions from the United States National Herbarium* 24(7): 275, 282. 1925, *Taxon* 39(4): 609. 1990.

N. dasycarpa (Hitchc.) Torres (*Stipa dasycarpa* Hitchc.; *Stipa trollii* Pilg.) (named for the German botanist Karl [Carl] Troll, 1899-1975, geographer, traveler, botanical collector in Bolivia, Colombia, Eritrea, India, Mexico, collector

of tropical Andean mosses, younger brother of Wilhelm Troll (1897-1978); see J.H. Barnhart, *Biographical notes upon botanists*. 3: 402. 1965; T.W. Bossert, compilation, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 407. Boston, Mass. 1972)

South America, Argentina. See *Contributions from the United States National Herbarium* 24(7): 281. 1925, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 11(108): 777. 1933, *Comisión de Investigaciones Científicas* 13: 19. 1997.

N. depauperata (Pilg.) Barkworth (*Nassella inconspicua* (J. Presl) Barkworth; *Nassella mexicana* (Hitcch.) R.W. Pohl; *Stipa depauperata* Pilg.; *Stipa depauperata* var. *glabrata* Pilg.; *Stipa depauperata* var. *humilis* Pilg.; *Stipa leptothera* Speg. var. *atroviolacea* Hack.)

South America, Peru. Herbaceous, fine leaves, narrow inflorescence, long awns, purple glumes, found along roadsides, disturbed sites, grassy areas, páramos, see *Reliquiae Haenkeanae* 1(4-5): 227. 1830 and *Anales del Museo Nacional de Montevideo* 4: 133, f. 8. 1901, *Repertorium Specierum Novarum Regni Vegetabilis* 6: 154. 1908, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 56 (Beibl. 123): 23. 1920, Volkmar Vareschi (1906-1991), *Flora de Los Páramos de Venezuela*. Universidad de Los Andes. Merida — Venezuela 1970, *Taxon* 39(4): 609-610. 1990, Karl Weidmann, *Páramos venezolanos*. Caracas 1991.

N. depauperata (Pilg.) Barkworth var. *depauperata* (*Stipa depauperata* var. *depauperata*; *Stipa depauperata* var. *humilis* Pilg.; *Stipa leptothera* var. *atroviolacea* Hack.)

South America, Peru. See *Anales del Museo Nacional de Montevideo* 4(2): 133-135, f. 8. 1901, *Repertorium Specierum Novarum Regni Vegetabilis* 6: 154. 1908, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 56(Beibl. 123): 23. 1920, *Taxon* 39(4): 609-610. 1990.

N. depauperata (Pilg.) Barkworth var. *glabrata* (Pilg.) Torres (*Stipa depauperata* var. *glabrata* Pilg.)

South America, Peru. See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 56(Beibl. 123): 23. 1920, *Taxon* 39(4): 609-610. 1990, *Comisión de Investigaciones Científicas* 13: 20. 1997.

N. duriuscula (Phil.) Barkworth (*Nassella duriuscula* (Phil.); *Stipa barbinodis* Phil.; *Stipa duriuscula* Phil.)

South America. See *Linnaea* 33(3-4): 282. 1864, *Anales de la Universidad de Chile* 93: 721. 1896 and *Taxon* 39(4): 610. 1990.

N. elata (Speg.) Torres (*Nassella elata* (Speg.); *Stipa caespitosa* var. *elata* Speg.)

South America, Argentina. See *Anales del Museo Nacional de Montevideo* 4(2): 117, 119, f. 31g-i. 1901, *Comisión de Investigaciones Científicas* 13: 20. 1997.

N. entrerriensis (Burkart) Peñailillo (*Stipa entrerriensis* Burkart)

South America. See *Boletín de la Sociedad Argentina de Botánica* 12: 285, f. 1. 1968, *Gayana, Botánica* 55(2): 86. 1998 [1999].

N. exserta Phil. (*Nassella gigantea* (Steud.) Muñoz-Schick; *Nassella melanocarpa* Phil.; *Urachne aemulans* Steud. ex Lechler; *Urachne gigantea* Steud.; *Urachne melanocarpa* Phil.)

South America. Perennial, glabrous, rhizomatous, leaves acuminate to acute, see *Synopsis Plantarum Glumacearum* 1: 123. 1854, *Berberides Americae Australis* 52. 1857, *Linnaea* 33(3-4): 278. 1864, *Anales de la Universidad de Chile* 43: 558. 1873 and *Gayana, Botánica* 47(1-2): 23. 1990.

N. fabrisii Torres (for Humberto Antonio Fabris, 1924-1976, botanist and collector in Argentina; see *Bol. Soc. Arg. Bot.* 15: 332. 1974; A.L. Cabrera & H.A. Fabris, *Hickenia* 1(31): 164. 1978; H.A. Fabris et al., *Hickenia* 1(41): 223. 1980)

South America, Argentina. See *Comisión de Investigaciones Científicas* 13: 20, f. 2, H, h. 1997.

N. famatinensis Torres

South America, Argentina, Sierra de Famatina. See *Comisión de Investigaciones Científicas* 13: 21, f. 1, H. 1997.

N. filiculmis (Delile) Barkworth (*Stipa cerasiensis* Kuntze; *Stipa filiculmis* Delile; *Stipa filiculmis* var. *major* Speg.; *Stipa filiculmis* var. *minor* Speg.; *Stipa leucogluma* Steud.; *Stipa trichocaulos* Phil.)

Southern America, Argentina, Ceres. See *Annales des Sciences Naturelles; Botanique, sér. 3* 12: 367. 1849, *Synopsis Plantarum Glumacearum* 1: 420. 1854, *Anales de la Universidad de Chile* 93: 718. 1896, *Revisio Generum Plantarum* 3(3): 369, 371. 1898 and *Anales del Museo Nacional de Montevideo* 4(22): 146. 1901, *Taxon* 39(4): 610. 1990.

N. formicarum (Delile) Barkworth (*Stipa formicarum* Delile)

North America, Europe. See *Annales des Sciences Naturelles; Botanique, sér. 3* 12: 327. 1849 and *Taxon* 39(4): 610. 1990.

in English: tropical tussock grass

N. gibba (Phil.) M. Muñoz-Schick (*Nassella exserta* Phil. var. *asperata* Parodi; *Piptochaetium gibbum* Phil.)

South America. See *Linnaea* 33(3-4): 278. 1864, *Anales de la Universidad de Chile* 93: 731. 1896 and *Darwiniana* 7(3): 390, f. 8B, B(1). 1947, *Gayana, Botánica* 47(1-2): 26. 1990.

N. gigantea (Steud.) M. Muñoz-Schick (*Nassella aemulans* Phil.; *Nassella exserta* Phil.; *Nassella exserta* var. *exserta*; *Nassella fuscescens* Phil.; *Nassella gigantea* (Steud.) Muñoz; *Nassella melanocarpa* Phil.; *Nassella pugae* Phil.;

Urachne aemulans Steud. ex Lechler; *Urachne gigantea* Steud.; *Urachne melanocarpa* Phil.) (Frid. or Fed. Puga)

South America, Argentina. Caespitose, weedy, see *Synopsis Plantarum Glumacearum* 1: 123. 1854, *Berberides Americae Australis* 52. 1857, *Linnaea* 33(3-4): 278. 1864, *Anales de la Universidad de Chile* 43: 558. 1873, *Anales de la Universidad de Chile* 93: 728-729. 1896 and *Gayana, Botánica* 47(1-2): 23. 1990.

N. glabripoda Torres

South America, Argentina. See *Comisión de Investigaciones Científicas* 13: 22, f. 1, F. 1997.

N. glabripoda Torres var. *glabripoda*

Argentina. See *Comisión de Investigaciones Científicas* 13: 22, f. 1, F. 1997.

N. glabripoda Torres var. *planifolia* Torres

Argentina. See *Comisión de Investigaciones Científicas* 13: 22-23. 1997.

N. hirtifolia (Hitchc.) Barkworth (*Stipa hirtifolia* A.S. Hitchc.)

Chile. Perennial, vulnerable species, see *Contributions from the United States National Herbarium* 24(7): 285. 1925, *Taxon* 39(4): 610. 1990.

N. holwayii (Hitchc.) Barkworth (*Nassella brachyphylla* Phil.; *Nassella brachyphylla* (Hitchc.) Barkworth; *Stipa holwayii* Hitchc.) (for Edward Willet Dorland Holway, 1853-1923, and Mary M. Holway)

South America, Bolivia. Perennial, caespitose, erect, leaf blades smooth acuminate, lax panicle narrowly oblong to ovate with ascending branches, glumes lanceolate acuminate, bearded callus pungent, sandy places, puna, rocky soils, see *Contributions from the United States National Herbarium* 24(7): 275, 287. 1925, *Taxon* 39(4): 609-610. 1990.

N. huallancaensis (Tovar) Barkworth (*Stipa huallancaensis* Tovar)

South America, Peru, Huayanca. See *Publicaciones del Museo de Historia Natural "Javier Prado." Serie B. Botánica* 33: 11. 1985, *Taxon* 39(4): 610. 1990.

N. hunzikeri (Caro) Barkworth (*Stipa hunzikeri* Caro) (for Armando T. Hunziker, 1919-2001, central Argentine flora, Instituto Multidisciplinario de Biología Vegetal (Universidad Nacional de Córdoba), Solanaceae, Amaryllidaceae, Amaranthus, Cactaceae, with Antonio Krapovickas (b. 1921), P. Maldonado, D.R. Hunziker, Rosa Subils (b. 1929); brother of Juan Héctor Hunziker (1925-2003). See *Hickenia* 1(12): 71. 1977; *Bol. Soc. Argent. Bot.* 20: 271-272. 1982, *Lorentzia* 7: 17. 1993; *Darwiniana* 39(3-4): 355. 2001; *Taxon* 51: 393. 2002; Armando T. Hunziker, *Catálogo de los tipos "Grisebachianos" conservados en Córdoba*. Córdoba 1960)

South America, Argentina. See *Kurtziana* 3: 75-79, f. 14. 1966, *Taxon* 39(4): 610. 1990.

N. hyalina (Nees) Barkworth (*Stipa hyalina* Nees)

South America. Perennial, caespitose, sheath ribbed, ligule membranous and truncate, blade ribbed, panicle exserted, spikelets gaping, glumes unequal, lemma scabrous, corona with spines, callus curved and silky, awn twice-bent, a weed of disturbed areas, see *Taxon* 39(4): 610. 1990.

N. ibarrensensis (Kunth) Laegaard (*Nassella ibarrensensis* (Kunth) Peñailillo; *Stipa ibarrensensis* Kunth; *Stipa patulifolia* Pilg.)

South America, Ecuador, Ibarra. See *Nova Genera et Species Plantarum* 1: 125. 1815 [1816] and *Novon* 8(1): 30. 1989, *Gayana, Botánica* 55(2): 86. 1998 [1999].

N. inconspicua (J. Presl) Barkworth (*Nassella caespitosa* Griseb.; *Nassella depauperata* (Pilg.) Barkworth; *Stipa caespitosa* var. *lilloi* Hack.; *Stipa caespitosa* var. *subelata* Speng.; *Stipa inconspicua* J. Presl; *Stipa sodiroana* Hack.; *Urachne haenkeana* Trin. & Rupr.; *Urachne inconspicua* Trin. & Rupr.)

South America. Perennial bunchgrass, erect, herbaceous, caespitose, forming clumps or small clumps, foliage erect, ligule small to minute, short leaves pointed, inflorescence erect to spreading, oblong panicle, spikelets purplish, glumes acute lanceolate or acuminate, hairy awns, growing in grassland, heavily grazed areas, see *Reliquiae Haenkeanae* 1(4-5): 227. 1830, *Species Graminum Stipaceorum* 20. 1842 and *Anales del Museo Nacional de Montevideo* 4(2): 117, 120, f. 31. 1901, *Anales del Museo Nacional de Buenos Aires* 21: 72. 1911, *Taxon* 39(4): 609-610. 1990.

N. johnstonii Parodi (*Nassella pungens* E. Desv.) (for the American botanist Ivan Murray Johnston, 1898-1960, in Chile 1925-1926, professor of botany at Harvard 1938-1960, specialist on Boraginaceae, his writings include "Expedition of the California Academy of Sciences to the Gulf of California in 1921. The botany (the vascular plants)." *Proc. Calif. Acad. Sci.* Ser. 4, 12: 951-1218. 1924, "The botanical activities of Thomas Bridges." *Contr. Gray Herb.* 81: 98-106. 1928, "Papers on the flora of northern Chile. 1. The coastal flora of the departments of Chañaral and Taltal; 2. The flora of the Nitrate Coast; 3. Undescribed species from the cordilleras of Atacama." *Contr. Gray Herb.* 85: 1-172. 1929 and "A study of Nolanaceae." *Proc. Amer. Acad. Arts.* 71(1): 1-87. [Philadelphia 1936]. See J.H. Barnhart, *Biographical notes upon botanists.* 2: 259. 1965; Richard A. Howard, "Ivan Murray Johnston, 1898-1960." *J. Arnold Arb.* 42: 1-9. 1961; J. Ewan, editor, *A Short History of Botany in the United States.* 43, 122. New York and London 1969; E.D. Merrill, "A botanical bibliography of the islands of the Pacific." *Contr. U.S. Natl. Herb.* 30(1): 167. 1947; Erwin G. Gude, *California Place Names: The Origin and Etymology of Current Geographical Names.* University of California Press, Berkeley 1974 [1949]; T.W.

Bossert, compil., *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 199. 1972; I.K. Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. 1964; R. Zander, F. Encke, G. Buchheim & S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993; Joseph Ewan, *Rocky Mountain Naturalists*. The University of Denver Press 1950; Irving William Knobloch, compil., "A preliminary verified list of plant collectors in Mexico." *Phytologia Memoirs*. VI. 1983)

South America, Peru, Chile, Atacama. See *Flora Chilena* 6: 268, t. 75, f. 1. 1854 and *Darwiniana* 7(3): 373. 1947.

N. juergensii (Hack.) Barkworth (*Stipa juergensii* Hack.; *Stipa jurgensii* Hack.) (for C. Jürgens, collected 1906-1921, Brazil)

South America. See *Repertorium Specierum Novarum Regni Vegetabilis* 7: 314. 1909, *Repert. Spec. Nov. Regni Beih.* 35: 103. 1925, *Taxon* 39(4): 610. 1990.

N. juncea Phil. (*Nassella chilensis* var. *juncea* (Phil.) M. Muñoz-Schick)

South America, Chile. See *Linnaea* 33(3-4): 277. 1864 and *Gayana, Bot.* 47: 22. 1990.

N. karstenii (Hitc.) Peñailillo (*Stipa karstenii* Hitc.) (for the German botanist Gustav Karl Wilhelm Hermann Karsten, 1817-1908, traveled in Colombia, Ecuador, Mexico, Venezuela, author of *Florae Columbiae ... Berolini 1858[1859]-1869, Plantae Columbiana. Fasciculus primus*. Halis Saxonum [Halle] 1857 [reprinted, *Linnaea* 28: 241-256. 1856 and 257-282, 387-462. 1857]. See J.H. Barnhart, *Biographical notes upon botanists*. 2: 272. 1965; R. Tryon, *Taxon* 12: 103-105. 1963; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. 1: 382. Cambridge, Mass. 1917-1933; *Brittonia* 49: 32. 1997; I. Urban, *Geschichte des Königlichen Botanischen Museums zu Berlin-Dahlem (1815-1913). Nebst Aufzählung seiner Sammlungen*. 1916; *La phytographie ou l'art de décrire les végétaux considérés sous différents points de vue*. Paris 1880; R. Zander, F. Encke, G. Buchheim & S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993)

Colombia. See *Contributions from the United States National Herbarium* 24(7): 274. 1925, *Gayana, Botánica* 55(2): 86. 1998 [1999].

N. lachnophylla (Trin.) Barkworth (*Stipa cumingiana* Trin.; *Stipa cumingiana* var. *cumingiana*; *Stipa cumingiana* var. *lachnophylla* (Trin.) Trin. & Rupr.; *Stipa hirta* Phil.; *Stipa lachnophylla* Trin.; *Stipa laxa* E. Desv.; *Stipa leiocarpa* Nees ex Steud.) (after Hugh Cuming, 1791-1865 (d. London), British traveler and plant collector in South America, Fellow of the Linnean Society 1832, shell collector; see A. Lasègue, *Musée botanique de Benjamin Delessert*. Paris

1845; Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 183-184. London 1994; Gordon Douglas Rowley, *A History of Succulent Plants*. 1997)

Chile. Perennial, vulnerable species, see *Species Graminum Stipaceorum* 29. 1842, *Flora Chilena* 6: 283. 1854, *Synopsis Plantarum Glumacearum* 1: 124. 1854, *Linnaea* 33(3-4): 283. 1864 and *Taxon* 39(4): 610. 1990.

N. laevissima (Phil.) Barkworth (*Nassella longearistata* Phil.; *Piptochaetium collinum* Phil.; *Piptochaetium laevissimum* Phil.; *Stipa breviculmis* Hitc.; *Stipa laevissima* (Phil.) Speg.; *Stipa lahittei* Parodi)

Chile. Perennial, vulnerable species, see *Linnaea* 33(3-4): 280. 1864, *Anales de la Universidad de Chile* 93: 728, 733. 1896 and *Anales del Museo Nacional de Montevideo* 4: 6. 1901, *Contributions from the United States National Herbarium* 24(7): 284. 1925, *Notas del Museo de la Plata, Botánica* 3: 28, f. 3. 1938, *Physis* (Buenos Aires) 15: 305. 1939, *Taxon* 39(4): 610. 1990.

N. lepida (A. Hitchc.) Barkworth (*Stipa eminens* subsp. *andersonii* (Vasey) E. Murray; *Stipa eminens* var. *andersonii* Vasey; *Stipa hassei* Vasey; *Stipa lepida* A.S. Hitchc.; *Stipa lepida* var. *andersonii* (Vasey) A.S. Hitchc.; *Stipa lepida* var. *lepida*) (after the American (but German-born) botanist Hermann Edward Hasse, 1836-1915, physician, bryologist, mycologist and plant collector; see J.H. Barnhart, *Biographical notes upon botanists*. 2: 137. 1965; S. Lenley et al., *Catalog of the manuscript and archival collections and index to the correspondence of John Torrey*. Library of the New York Botanical Garden. 216. 1973; J. Ewan, editor, *A Short History of Botany in the United States*. New York and London 1969)

North America, California. Perennial, fodder, occurs under dry conditions, chaparral, slope habitats, open hillsides, dry ridges, see *Contributions from the United States National Herbarium* 3(1): 54. 1892, *Contributions from the United States National Herbarium* 1(8): 267. 1893 and *American Journal of Botany* 2: 302-303. 1915, *Kalmia* 12: 25. 1982, *Taxon* 39(4): 610. 1990.

in English: foothill needle grass, small-flower tussock grass, foothill stipa, small-flowered needle grass

in Mexico: pasto

N. leptocoronata (Roseng. & B.R. Arrill.) Barkworth (*Stipa leptocoronata* Roseng. & B.R. Arrill.)

South America. See *Boletín de la Facultad de Agronomía de Universidad de la Republica, Montevideo* 72: 16, t. 2-3. 1964, *Taxon* 39(4): 610. 1990.

N. leptothera (Speg.) Torres (*Stipa leptothera* Speg.)

South America, Argentina, Alpine mountains; see *Anales del Museo Nacional de Montevideo* 4: 133, f. 8. 1901, *Comisión de Investigaciones Científicas* 13: 25, f. 2, C, c. 1997.

N. leucotricha (Trin. & Rupr.) R.W. Pohl (*Stipa ciliata* Scheele; *Stipa leucotricha* Trin. & Rupr.)

North America, U.S., Mexico. Sheaths usually hispid, cleistogenes frequently present in the lower sheaths, ligule truncate, blade flat to convolute, panicle open, glumes subequal, callus sharp, lemma constricted below the crown, awn twice-geniculate, a dominant species, provides good forage, grows mostly in open grasslands, in woodlands, similar to *Nassella pulchra* (A.S. Hitchc.)

Barkworth, in northern Mexico intergrades with *Nassella mucronata* Kunth, see *Species Graminum Stipaceorum* 54. 1842, *Linnaea* 22(3): 342. 1849 and *Taxon* 39(4): 610. 1990.

in English: Texas tussock grass, Texas winter grass, Texas needle grass, Texas nassella, spear grass

in Mexico: flechilla bulbosa

N. ligularis (Griseb.) Barkworth & Torres (*Stipa ligularis* (Griseb.) Speg.; *Stipa neesiana* var. *ligularis* Griseb.)

South America. See *Species Graminum Stipaceorum* 27-28. 1842, *Abhandlungen der Königlichen Gesellschaft der Wissenschaften zu Göttingen* 24: 298. 1879 and *Anales del Museo Nacional de Montevideo* 4(2): 91-93, f. 21. 1901, *Contr. U.S. Natl. Herb.* 24(7): 277. 1925, *Kurtziana* 2: 110. 1965, *Taxon* 50(2): 456. 2001.

N. linearifolia (E. Fourn.) R.W. Pohl (*Milium inconspicuum* Griseb. ex E. Fourn.; *Oryzopsis florulenta* Pilg.; *Stipa florulenta* (Pilg.) Parodi; *Stipa florentula* (Pilg.) Parodi; *Stipa linearifolia* E. Fourn.; *Stipa linearifolia* E. Fourn. ex Hemsl.)

Costa Rica, Guatemala, Bolivia. Perennial, erect, branched, leaf blades linear, ligule hyaline, glumes subequal ovate-lanceolate acuminate reddish to purplish, forming dense clumps, fodder, palatable, see *Mexicanas Plantas* 2: 73-74. 1886 and *Revista del Museo de La Plata* (secc. Bot.) 6: 228, 307. 1944, *Fieldiana, Botany, New Series* 4: 336. 1980.

in Mexico: pasto

N. longicoronata (Roseng. & B.R. Arrill.) Barkworth (*Stipa longicoronata* Roseng. & B.R. Arrill.)

South America. See *Boletín de la Facultad de Agronomía de Universidad de la República, Montevideo* 72: 20, t. 4-5. 1964, *Taxon* 39(4): 610. 1990.

N. longiglumis (Phil.) Barkworth (*Nassella clarazii* (Ball) Barkworth; *Stipa clarazii* Ball; *Stipa longiglumis* Phil.; *Stipa quadrifaria* Kuntze)

Chile. Perennial, see *Linnaea* 33(3-4): 286. 1864, *Journal of the Linnean Society, Botany* 21: 237. 1884, *Revisio Generum Plantarum* 3(3): 369, 372. 1898 and *Taxon* 39(4): 609-610. 1990.

N. macrathera (Phil.) Barkworth (*Stipa macrathera* Phil.)

Chile. Perennial, see *Anales de la Universidad de Chile* 93: 720. 1896 and *Taxon* 39(4): 610. 1990.

N. major (Trin. & Rupr.) Desv. (*Nassella chilensis* (Trin.) E. Desv.; *Nassella major* (Trin.) E. Desv.; *Urachne chilensis* Trin.; *Urachne major* Trin. & Rupr.)

South America, Peru, Chile, Atacama. See *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 3,1(2-3): 123. 1834, *Species Graminum Stipaceorum* 20-21. 1842, *Novorum Actorum Academiae Caesareae Leopoldinae-Carolinae Naturae Curiosorum* 1: 148. Breslau et Bonn 1843, *Synopsis Plantarum Glumacearum* 1: 123. 1854, *Flora Chilena* 6: 265-266. 1854, *Linnaea* 33(3-4): 277, 279. 1864, *Anales de la Universidad de Chile* 43: 558. 1873, *Anales de la Universidad de Chile* 93: 727, 729. 1896 and *Darwiniana* 7(3): 379, f. 5. Buenos Aires 1947, *Gayana, Bot.* 47: 18-19. 1990.

N. manicata (E. Desv.) Barkworth (*Stipa manicata* E. Desv.)

South America, Argentina, Uruguay. Glabrous, ligule truncate, blade flat to convolute, panicle open, callus sharp, lemma constricted below the crown, white crown ciliate, awn twice-geniculate, resembles *Nassella leucotricha* (Trin. & Rupr.) R.W. Pohl, and *Nassella pulchra* (A.S. Hitchc.) Barkworth, sometimes misidentified as *Nassella formicarum* (Delile) Barkworth, see *Flora Chilena* 6: 288. 1854 and *Taxon* 39(4): 610. 1990.

N. megapotamia (Spreng. ex Trin.) Barkworth (also *megapotamica*) (*Stipa latifolia* Hack. & Arechav., nom. illeg., non *Stipa latifolia* (L.) Raspail; *Stipa latissimifolia* Kuntze; *Stipa manicata* var. *latifolia* (Hack. & Arechav.) Speg.; *Stipa manicata* var. *latifolia* Speg.; *Stipa manicata* var. *media* Speg.; *Stipa megapotamia* Spreng. ex Trin.; *Stipa megapotamica* Trin. & Rupr.; *Stipa quinquenervis* Hack.)

South America. Perennial, caespitose, ligule truncate and membranous, blade ribbed, panicle exerted and contracted, glumes subequal and nerved, lemma scabrous, corona with spines, callus densely silky, awn twice bent, see *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 1(1): 77. 1830, *Species Graminum Stipaceorum* 38. 1842, *Anales del Museo Nacional de Montevideo* 4: 183, f. 4. 1895, *Revisio Generum Plantarum* 3(3): 369. 1898 and *Anales del Museo Nacional de Montevideo* 4(2): 77-78. 1901, *Verhandlungen der kaiserlich-königlichen zoologisch-botanischen Gesellschaft in Wien* 65(1-2): 73. 1915, *Taxon* 39(4): 610-611. 1990.

N. melanosperma (J. Presl) Barkworth (*Nassella bonariensis* (Henrard & Parodi) Barkworth; *Stipa bonariensis* Henrard & Parodi; *Stipa melanosperma* J. Presl; *Stipa melanosperma* var. *erythrina* Hack.; *Stipa melanosperma* var. *melanosperma*)

South America. See *Reliquiae Haenkeanae* 1(4-5): 226. 1830 and *Repertorium Specierum Novarum Regni Vegetabilis*

6(21-26): 345. 1909, *Repertorium Specierum Novarum Regni Vegetabilis* 23: 178. 1926, *Taxon* 39(4): 609, 611. 1990.

N. mexicana (Hitchc.) R.W. Pohl (*Piptochaetium mexicanum* (Hitchc.) Beetle; *Stipa depauperata* Pilg.; *Stipa mexicana* Hitchc.)

South America. Perennial bunchgrass, alpine, weak, tufted, growing in grass clumps, small bunches, foliage soft and spreading, narrow leaves, long narrow to spreading inflorescence, chasmogamous and cleistogamous spikelets, glumes acuminate purple or reddish, very long awns, meadow grass, growing on mountains, on dry slopes, mountain meadows, grassland, roadbanks, heavily grazed areas, among rocks, see *Contributions from the United States National Herbarium* 24(7): 247, t. 52, f. 5-6. 1925, *Phytologia* 54(1): 4. New York 1983, *Taxon* 39(4): 611. 1990.

N. meyeniana (Trin. & Rupr.) Parodi (*Nassella corniculata* Hack.; *Nassella pubiflora* (Trin. & Rupr.) E. Desv.; *Piptatherum laeve* Meyen; *Piptatherum ramosum* Nees; *Piptochaetium laeve* Pilg.; *Stipa laevis* (Trin. & Rupr.) Parodi; *Urachne laevis* Trin. & Rupr.; *Urachne meyeniana* Trin. & Rupr.) (dedicated to the German (Baltic German, Prussian, b. Tilsit) botanist Franz Julius Ferdinand Meyen, 1804-1840 (d. Berlin), physician, M.D. Berlin 1826, traveler, professor of botany at the University of Berlin, ship's physician, his writings include *Reise um die Erde ausgeführt auf dem Königlich Preussischen Seehandlungs-Schiffe Prinzess Louise, commandirt von Capitain W. Wendt, in den Jahren 1830, 1831 und 1832 ... Erster Theil. Historischer Bericht. 1834, Zweiter Theil ... 1835 and Grundriss der Pflanzengeographie. Berlin 1836; see Hans Querner, in D.S.B. 9: 344-345. 1981; R. Zander, F. Encke, G. Buchheim & S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993; J.H. Barnhart, *Biographical notes upon botanists*. 2: 482. 1965; J. Ewan, editor, *A Short History of Botany in the United States*. 116. New York and London 1969; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 265. 1972; E. Bretschneider, *History of European Botanical Discoveries in China*. 1981; A. Lasègue, *Musée botanique de Benjamin Delessert*. Paris 1845; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. 1917-1933; Elmer Drew Merrill, *Contr. U.S. Natl. Herb.* 30: 211. 1947; G. Murray, *History of the collections contained in the Natural History Departments of the British Museum*. 1: 168. London 1904; August Weberbauer, *Die Pflanzenwelt der peruanischen Andes in ihren Grundzügen dargestellt*. 9-10. of Mexico. Philadelphia 1964; Günther Schmid, *Chamisso als Naturforscher. Eine Bibliographie*. Leipzig 1942)

South America, Bolivia, Ecuador, Peru. Perennial, rhizomatous, erect, forming small or large clumps, leaf blades linear, drooping to lax inflorescence paniculate, contracted panicle with short branches, glumes subequal oblong-lanceolate acuminate, alpine, growing in mountain, roadside ditch, bank of arroyo, volcanic soil, see *Species Graminum Stipaceorum* 20-21. 1842, *Novorum Actorum Academiae Caesareae Leopoldinae-Carolinae Naturae Curiosorum* 1: 148. 1843 and *Repertorium Specierum Novarum Regni Vegetabilis* 6: 155. 1908, *Revista del Museo de La Plata (Nueva Serie), Sección Botánica* 6(25): 229, 305. 1944, *Darwiniana* 7(3): 379, f. 5. 1947.

N. meyeri Torres (for Teodoro Meyer, b. 1910, Herbarium in San Miguel de Tucumán, Argentina, botanical collector in Argentina, Bolivia, Brazil, Paraguay, with H.O. Sleumer (1906-1993); see T. Meyer, "Arboles indigenas de frutos comestibles del noreste argentino." *Lilloa* 3: 233-242. 1938; *Bot. Jahrb. Syst.* 77: 117. 1956; *Fl. Patagonica* 10: 677. 1978)

South America, Argentina. See *Comisión de Investigaciones Cientificas* 13: 26, f. 2, E, e. 1997.

N. mucronata (Kunth) R.W. Pohl (*Stipa chapulcensis* E. Fourn.; *Stipa grisebachii* E. Fourn.; *Stipa grisebachii* E. Fourn. ex Hemsl.; *Stipa mucronata* Kunth; *Stipa setigera* J. Presl; *Stipa trochlearis* Nees & Meyen)

South America, Ecuador, Peru, Chile, Atacama. Perennial bunchgrass, loosely caespitose, erect, alpine, subshrubby, basal leaves, leaf blades pointed, inflorescence red purple, lax oblong panicle, glumes lanceolate acuminate, fodder, on hillsides, pastures, steep slopes, disturbed areas, stony places, on disturbed roadsides, see *Nova Genera et Species Plantarum* 1: 125-126. 1815 [1816], *Reliquiae Haenkeanae* 1(4-5): 226. 1830, *Nova Acta Physico-medica Academiae Caesareae Leopoldino-Carolinae Naturae Curiosorum Exhibentia Ephemerides sive Observationes Historias et Experimenta* 19 (Suppl. 1): 19. 1841, *Mexicanas Plantas* 2: 74. 1886 and *Contr. U.S. Natl. Herb.* 24(7): 223. 1925, *Taxon* 39(4): 611. 1990.

in Mexico: flechilla puntiaguda, pasto

N. nardoides (Phil.) Barkworth (*Danthonia nardoides* Phil.; *Stipa calchaquia* Speg.; *Stipa nardoides* (Phil.) Hack. ex Hitchc.)

Bolivia, Argentina, Peru, Chile, Atacama. Perennial, basal sheaths hairy, leaf blades acicular rigid, oblong panicle, glumes lanceolate acuminate, sandy soils, stony places, puna, see *Anales del Museo Nacional de Montevideo* 4(2): 107, f. 27. 1901, *Contributions from the United States National Herbarium* 24(7): 271. 1925, *Taxon* 39(4): 611. 1990.

N. neesiana (Trin. & Rupr.) Barkworth (*Stipa contracta* Phil.; *Stipa eminens* Nees, nom. illeg., non *Stipa eminens* Cav.; *Stipa fernandeziana* Phil., nom. illeg., non *Stipa fernandeziana* (Trin. & Rupr.) Steud.; *Stipa hispidula* Phil.; *Stipa longiflora* Steudel; *Stipa neesiana* Trin. & Rupr.; *Stipa neesiana* f. *contorta* Hack.; *Stipa neesiana* f. *depauperata* Hack.; *Stipa neesiana* var. *chilensis* Trin. & Rupr.; *Stipa neesiana* var. *fernandeziana* Trin. & Rupr.; *Stipa neesiana* var. *glabrata* Arechav.; *Stipa neesiana* var. *hirsuta* Arechav.; *Stipa neesiana* var. *hispidula* (Speg.) Speg.; *Stipa neesiana* var. *virescens* Hackel; *Stipa setigera* forma *glabrata* (Arechav.) Speg.; *Stipa setigera* forma *hispidula* Speg.; *Stipa setigera* var. *glabrata* Arechav. ex Speg.; *Stipa setigera* var. *glabrata* (Arechav.) Speg.; *Stipa setigera* var. *hispidula* Speg.; *Stipa skottsbergii* Pilger; *Stipa sublaevis* Speg.; *Stipa trachysperma* Phil.; *Urachne longiflora* Steud.) (Juan Fernández Island, Chile, see C. Marticorena, T.F. Stuessy and C.M. Baeza, "Catalogue of the vascular flora of the Robinson Crusoe or Juan Fernández Islands, Chile." *Gayana Bot.* 55(2): 187-211. 1998) (for the Swedish botanist Carl Johan Fredrik Skottsberg, 1880-1963, author of "Die Flora der Desventuradas-Inseln (San Felix und San Ambrosio) nach den Sammlungen F. Johows und mit Einfügung seiner hinterlassenen Schriften herausgegeben und ergänzt von C. Skottsberg." *Göteborgs Kungl. Vetensk.-Viterh.-Samh. Handl.*, ser. 5, B, 5(6): 1-88. 1937, "Pehr Kalm." *Kunliga Svenska vetenskapsakademiens levnadsteckningar.* 139: 221-503. 1951. See Robert Knuds Friedrich Pilger, 1876-1953, "Gramineae novae, a cl. K. Skottsberg in Patagonia australi et in Fuegia collectae." *Repert. Spec. Nov. Regni Veg.* 12: 304-308. 1913)

South America. Perennial, caespitose, tussocky, forming clumps, sheaths glabrous to slightly hispid, leaves hairless or sparsely hairy, smooth ligule with long trichomes or tufts of hairs, blade flat to convolute or somewhat inrolled, loose panicle erect to nodding, cleistogamous spikelets often present in the basal sheaths, purplish glumes linear-lanceolate and hyaline, callus sharp, awn twice-geniculate, raised crown between the awn and the seed, seeds have very sharp points that have been reported to penetrate and damage the skin and eyes of livestock, tolerates drought and heavy grazing, regarded as a serious emerging weed, a prolific seeder, seeds remain viable for many years, it is very invasive and forms dense stands in pastures, bushland and roadsides, see *Reliquiae Haenkeanae* 1(4-5): 226. 1830, *Nomenclator Botanicus. Editio secunda* 2: 731. 1841, *Species Graminum Stipaceorum* 27-28. 1842, *Synopsis Plantarum Glumacearum* 1: 124. 1854, *Linnaea* 33(3-4): 284-285. 1864, *Anales de la Universidad de Chile* 43: 560. 1873, *Anales del Museo Nacional de Montevideo* 1: 254. 1894, *Anales de la Universidad de Chile* 93: 719. 1896, *Anales*

del Museo Nacional de Montevideo 1: 314. 1896 and *Anales del Museo Nacional de Montevideo* 4(2): 82, f. a-c., 97. 1901, *Anales del Museo Nacional de Buenos Aires* 11: 100. 1904, *Anales del Museo Nacional de Buenos Aires* 21: 78. 1911, *Revista Argentina de Botánica* 1(1): 45. 1925, *Bol. Fac. Agron. Montevideo* 72: 12. 1964, *Kurtziana* 3: 30. 1966, *Taxon* 39(4): 611. 1990.

in English: Uruguayan tussock grass, Chilean needle grass

N. neesiana (Trin. & Rupr.) Barkworth var. *neesiana*

South America. Perennial, erect, strongly caespitose, tussocky, leaf sheath pubescent, ligule ciliate to ciliolate, open panicle with drooping branches, glumes unequal, corona/crown with spines, awn geniculate, column twisted and hairy, palea membranous, 2 lodicules, cleistogamous and chasmogamous flowers, noxious weed, found along roadsides, pastures, see *Taxon* 39(4): 611. 1990.

N. nidulans (Mez) Barkworth (*Stipa nidulans* Mez)

South America. See *Repertorium Specierum Novarum Regni Vegetabilis* 17(13-18): 205. 1921, *Taxon* 39(4): 611. 1990.

N. niduloides (Caro) Barkworth (*Stipa niduloides* Caro)

South America. See *Kurtziana* 3: 86-90, f. 17. 1966, *Taxon* 39(4): 611. 1990.

N. novarae Torres (also spelled *novari*) (for the Ingeniero Agrónomo, Lázaro Juan Novara, b. 1944, botanist in Argentina, Herbario Universidad de Salta (Buenos Aires), Facultad de Ciencias Agronómicas (Universidad Nacional de Córdoba), worked with Gloria Estela Barboza, M. Matesevach, Franco Ezequiel Chiarini, S. Bruno, author of "Catálogo de la flora de la Puna en el noroeste argentino." *Aportes Bot. Salta.* Ser. Misceláneas 2 (1): 1-56. 2003. See *Kurtziana* 29(1): 89-90. 2001; *Bonplandia* (Corrientes) 7: 13. 1993)

South America, Argentina. See *Comisión de Investigaciones Científicas* 13: 29-30, f. 2, D, d. 1997.

N. nubicola (Speg.) Torres (*Stipa nubicola* Speg.)

South America, Argentina. See *Anales del Museo Nacional de Montevideo* 4: 129, f. 36. 1901, *Comisión de Investigaciones Científicas* 13: 30, f. 2, B, b. 1997.

N. nutans (Hack.) Barkworth (*Stipa nutans* Hack.; *Stipa nutans* var. *nutans*)

South America. See *Repertorium Specierum Novarum Regni Vegetabilis* 7: 315. 1909, *Taxon* 39(4): 611. 1990.

N. pampagrlandensis (Speg.) Barkworth (*Stipa pampagrlandensis* Speg.)

Bolivia, Argentina. Caespitose, erect, leaf blades acuminate, oblong panicle lax to contracted, glumes subequal oblong acuminate, see *Anales del Museo Nacional de Montevideo* 4: 158, f. 48a-c. 1901, *Taxon* 39(4): 611. 1990, *Comisión de Investigaciones Científicas* 13: 31. 1997.

N. pampeana (Speg.) Barkworth (*Stipa pampeana* Speg.)

South America. See *Taxon* 39(4): 611. 1990.

N. paramilloensis (Speg.) Torres (*Stipa gilliesii* Hitchc.; *Stipa paramilloensis* Speg.; *Stipa perrigida* Speg.) (for the Scottish physician John Gillies, 1792-1834 (d. Edinburgh), botanist, naval surgeon, M.D. 1817, 1820-1828 in Argentina, plant collector in South America, correspondent of John Miers (1789-1879) and William Jameson (1796-1873). See J.H. Barnhart, *Biographical notes upon botanists*. 2: 50. 1965; A. Lasègue, *Musée botanique de Benjamin Delessert*. 486. Paris 1845; John Miers, *Travels in Chile and la Plata*. 1: 226. London 1826; H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 171. Oxford 1964; R. Zander, F. Encke, G. Buchheim & S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993)

South America, Argentina, Paramillo de Uspallata. See *Anales del Museo Nacional de Montevideo* 4: 139, f. 41. 1901, *Contributions from the United States National Herbarium* 24(7): 278. 1925, *Revista Argentina de Botánica* 1(1): 41. 1925, *Comisión de Investigaciones Científicas* 13: 31. 1997.

N. parodii (Matthei) Barkworth (*Stipa parodii* Matthei)

South America, Argentina. See *Gayana, Botánica* 13: 89. 1965, *Taxon* 39(4): 611. 1990.

N. parva Torres

South America, Argentina. See *Comisión de Investigaciones Científicas* 13: 32, f. 1, E, e. 1997.

N. pauciciliata (Roseng. & Izag.) Barkworth (*Stipa megapotamia* Spreng. ex Trin.; *Stipa megapotamia* var. *pauciciliata* Roseng. & Izag.; *Stipa megapotamica* var. *pauciciliata* Roseng. & Izag.; *Stipa pauciciliata* (Roseng. & Izag.) Roseng., B.R. Arrill. & Izag.)

South America. Useful for erosion control, see *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 1(1): 77. 1830 and *Boletín de la Sociedad Argentina de Botánica* 9: 288, 290, f. 17-20, t. 1, f. 5-6. 1961, *Gramíneas Uruguayas* 80, f. 23. 1970, *Taxon* 39(4): 611. 1990.

N. pfisteri (Matthei) Barkworth (*Stipa pfisteri* Matthei) (for C. Pfister, collector in Chile, Región de Tarapacá, Región de Coquimbo, Región del Libertador Bernardo O'Higgins. See B. Messerli, M. Grosjean, Th. Hofer, L. Núñez, C. Pfister, "From nature-dominated to human-dominated environmental changes." *Quaternary Science Reviews* 19(1-5): 459-479. 2000; B. Messerli, M. Grosjean, Th. Hofer, L. Núñez, C. Pfister, "From nature-dominated to human-dominated environmental changes." in E. Ehlers and T. Kraft (editors) *Understanding the Earth System: Compartments, Processes and Interactions*. Chapter 13, 195-205. 2001)

South America. See *Gayana, Botánica* 13: 89. 1965, *Taxon* 39(4): 611. 1990, *Gayana, Botánica* vol. 59(1): 1-6. 2002.

N. philippii (Steud.) Barkworth (*Stipa bavioensis* Speg.; *Stipa bavioensis* var. *bavioensis*; *Stipa bavioensis* var. *minor* Speg.; *Stipa lenta* Hitchc.; *Stipa philippii* Steud.) (named for the German botanist Rudolph Amandus (Rodolfo, Rudolf Amando) Philippi, 1808-1904, traveler, botanical explorer and plant collector, studied in Berlin, in 1851 emigrated to Chile, Director of the Museo nacional de Chile (in Santiago), from 1853 to 1874 professor of botany and zoology at Santiago, 1853-1854 expedition Atacama desert, 1892-1904 founder and editor of the *Anales del Museo nacional* (Chile), his writings include "Observaciones sobre la flora de Juan Fernández." *Anales Univ. Chile*. 13: 157-169. 1856, *Florula atacamensis*. Halis Saxonum [Halle] 1860, "*Sertum mendocinum*. N. tenuis (Phil.) Barkworth (*Stipa argentina* Speg.; *Stipa puelches* Speg.; *Stipa tenuis* Phil.; *Stipa tenuis* var. *argentina* (Speg.) Speg.)

South America, Argentina. Useful for erosion control, growing on sandy areas, dry places, see *Anales de la Universidad de Chile* 36: 204. 1870, *Contribucion al estudio de la flora de la Sierra ...* 67. 1896 and *Anales del Museo Nacional de Montevideo* 4(2): 81. 1901, *Revista Argentina de Botánica* 1: 47. 1925, *Taxon* 39(4): 612. 1990.

N. tenuissima (Trin.) Barkworth (*Stipa cirrosa* E. Fourn.; *Stipa cirrosa* E. Fourn. ex Hemsl.; *Stipa geniculata* Phil.; *Stipa mendocina* Phil.; *Stipa oreophila* Speg.; *Stipa subulata* E. Fourn.; *Stipa subulata* E. Fourn. ex Hemsl.; *Stipa tenuissima* Trin.; *Stipa tenuissima* var. *oreophila* (Speg.) Speg.; *Stipa tenuissima* var. *planicola* Speg.)

North America, U.S., Mexico, Argentina. Perennial bunchgrass, erect, tufted, fountain-like clumped, slender and wiry culms, pubescent below the lower nodes, ligule acute, hair-like foliage, bright green blade usually rolled and stiff, very open inflorescence, a silvery soft nodding panicle loosely contracted, glumes subequal, callus blunt, awn almost

central, long showy awns, 2 lodicules, chasmogamous and cleistogamous flowers, fodder, an attractive and ornamental species with invasive tendency, highly drought resistant, cold hardy, can be used in erosion control, usually propagated from seed, tendency to self sow abundantly, occurs naturally on rocky slopes, dry open woods and dry prairies, in open exposed grasslands, see *Anales de la Universidad de Chile* 27: 339. 1865, *Anales de la Universidad de Chile* 36: 204. 1870, *Mexicanas Plantas* 2: 75. 1886 and *Anales del Museo Nacional de Montevideo* 4: 155. 1901, *Taxon* 39(4): 612. 1990, *Phytologia* 74: 17. 1993, *Auck. Bot. Soc. J.* 51: 31-33. 1996.

in English: Mexican feather grass, Mexican needle grass, white tussock, fine stem tussock grass, wiry spear grass, wiry needle grass, fine-leaves nassella, Texas needle grass
in Mexico: pasto

in South Africa: katdoogras, saagtandpolgras, witgras, witpolgras

N. torquata (Speg.) Barkworth (*Stipa torquata* Speg.)

South America, Uruguay, Argentina, Estación Tornquiát, Sierra Ventana. See *Anales del Museo Nacional de Montevideo* 4(2): 88-89, f. 20. 1901, *Taxon* 39(4): 612. 1990.

N. trachyphylla Henrard (*Nassella pubiflora* (Trin. & Rupr.) E. Desv.; *Nassella trichophylla* Henrard)

Bolivia. Caespitose, weak, leaf blades filiform and pubescent, glumes lanceolate subequal acute, see *Species Graminum Stipaceorum* 21. 1842, *Flora Chilena* 6: 264. 1854 and *Mededeelingen van's Rijks-Herbarium* 40: 57. 1921.

N. trichotoma (Nees) Hack. ex Arechav. (*Agrostis trichotoma* Nees ex Trin.; *Oryzopsis trichotoma* (Nees) Druce; *Piptatherum macrantherum* Nees ex Steud. ex B.D. Jacks.; *Piptochaetium trichotomum* (Nees) Griseb.; *Stipa macrathera* Speg., nom. illeg., non *Stipa macrathera* Phil.; *Stipa trichotoma* Nees; *Urachne macrathera* Nees ex Steud.; *Urachne trichotoma* (Nees) Trin.)

South America. Perennial, vigorous, erect, caespitose, forming dense tussock, diffusely fibrous root system, sheaths open, whitish ligule membranous and rounded at the tip, blade rolled and very stiff, leaves green and rough, drooping inflorescence, purplish at flowering and golden brown at maturity, lax panicle multibranching, seed head breaks off whole, floret asymmetric or gibbous, glumes lanceolate and swollen around floret at base, callus acute and bearded, lemma strongly tuberculate, awn eccentric arising from one side, awn straight to twice-geniculate, palea nerveless, 2 lodicules, yellowish seed, chasmogamous and cleistogamous flowers, seeds may remain dormant for several years, a noxious weed extremely invasive and competitive, naturalized elsewhere, if left uncontrolled it can form complete ground cover overtaking all other vegetation, useful for erosion control, can rapidly colonise weak pastures, reproduction by seeds only, primary natural method of dis-

persal is by wind, unpalatable, indigestible to stock, tuft of basal hair and the awn of the seed allows it to catch on the fleece of sheep, tolerant of flood and drought, rarely found in swampy or heavily timbered areas, common in open scrub and open forest lands, mountain grasslands, disturbed places, see *Flora Brasiliensis seu Enumeratio Plantarum* 2: 375. 1829, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 3,1(2-3): 124. 1834, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. South America. See *Boletín de la Sociedad Argentina de Botánica* 12: 140. 1968, *Phytologia* 47(6): 445, f. a-b. 1981, *Taxon* 39(4): 612. 1990.

N. viridula (Trin.) Barkworth (*Stipa nuttalliana* Steudel; *Stipa parviflora* Nutt. ex Steud., nom. illeg., non *Stipa parviflora* Desf.; *Stipa parviflora* Nutt., nom. illeg., non *Stipa parviflora* Desf.; *Stipa sparta* [Trin. misapplied by] Hooker; *Stipa viridula* Trin.)

North America, U.S., Canada. Perennial bunchgrass, tufted, long-lived, deep fibrous root system, culms pubescent beneath the lower node, ligule truncate to rounded, leaves flat and involute, columnar-shaped panicle loosely contracted, spikelets narrow and loose, callus sharp, awns bent twice, awns do not trouble livestock, a pioneer grass, a weak tolerance to shade, a good drought tolerance, moderately tolerant of flooding, reproduces from seed and through tillering, useful for erosion control and for surface mine reclamation, revegetation, fodder, good forage, moderately to highly palatable, highly nutritious, used for hay and pasture production, seeds eaten by small mammals and songbirds, occasionally hybridizes with *Achnatherum hymenoides* (Roemer & Schultes) Barkworth (*Stipa sensu lato*), generally found in semiarid and continental climates, frequently on sandy soils, found on foothills, open hillsides and parks, in mountain meadows, canyons, open woodlands, in grasslands and open woods, see *The Genera of North American Plants* 1: 59. 1818, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 4,2(1): 39. 1836, *Nomenclator Botanicus. Nastus Jussieu = *Chloothamnus* Büse,
Oreiostachys Gamble, *Stemmatospermum* P.
Beauv.

From the Greek *nastos*, *naston* "close-pressed, firm," *nastos* is the Greek name for a kind of reed, referring to the stem, treelike.

About 7-24 species, from Madagascar to the Solomon Islands, Reunion Island, Sumatra, Papua New Guinea, Indonesia. Bambusoideae, Bambusodae, Bambuseae, Bambusiinae, Hickeliinae, perennial, unarmed, sympodial, slender, erect, scrambling, scandent, climbing, woody, many branches at each node, treelike, persistent, internodes usually hollow, rhizomes pachymorph, ligule fringed or unfringed, plants bisexual, inflorescence semelauctant or determinate, open or contracted panicle or a raceme borne on a leafy branch, spikelets with one fertile floret and a rachilla extension, glumes 3-5/4-6 or several lemma membranous, palea present, 3 free and membranous lodicules, 6 stamens, ovary narrowly cylindrical and hairy, 3 stigmas, usually shoots are not eaten because of the bitter taste, culms used to make flutes and arrow heads, forming extensive and dense thickets, montane forest, mixed lower montane rainforest, alpine grasslands, mossy forest, disturbed forest areas, alluvial forest, uplands, type *Nastus borbonicus* J.F. Gmelin, see *Genera Plantarum* 34. 1789, *Systema Naturae ... editio decima tertia, aucta, reformata* 2: 580. 1791, *Essai d'une nouvelle Agrostographie, ou nouveaux genres des Graminées*. 144, 145, t. 25, f. 5. Strawberry Press, Mill Valley, California 1997; John Peter Jessop (b. 1939), "Itinerary of Rudolf Schlechter's collecting trips in Southern Africa." *J. S. Afr. Bot.* 30(3): 129-146. 1964; Stafleu & Cowan, *Taxonomic literature*. 5: 205-213. 1985; R. Zander, F. Encke, G. Buchheim & S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 775. 1993; A. White & B.L. Sloane, *The Stapelieae*. Pasadena 1937; Merle A. Reinikka, *A History of the Orchid*. Timber Press 1996; N. Hall, *Botanists of the Eucalypts*. Melbourne 1978 & Supplement 1980)

Papua New Guinea. Erect, see *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 52(1-2): 174. 1914, *Blumea* 2: 71, 72. 1936, *Kew Bulletin* 10: 594. 1956, *Kew Bulletin* 21: 287. 1967.

N. schmutzii S. Dransfield (for Fr. E. Schmutz S.V.D., b. 1932, botanical collector in Indonesia)

Indonesia. Climbing, scrambling, see *Reinwardtia* 9(4): 388, f. 2. 1980.

N. tsaratananensis A. Camus

Madagascar, Mount Tsaratanana. Climbing, leaning, see *Bulletin de la Société Botanique de France* 72: 26. 1925.

Nastus Lunell = *Cenchrus* L.

From the Greek *nastos, naston* "close-pressed, firm," *nastos* is the Greek name for a kind of reed, referring to the stem, treelike.

Panicoideae, Paniceae, Cenchrinae, see *Species Plantarum* 2: 1049-1050. 1753, *Flora Caroliniana, secundum ...* 79. 1788 and *Ill. Fl. N.U.S.* edition 2. 1: 166. 1913, *American Midland Naturalist* 4: 214. 1915, *Contributions from the United States National Herbarium* 46: 144-150, 297. 2003.

Natschia Bubani = *Nardus* L.

Pooideae, Nardeae, see *Species Plantarum* 1: 53. 1753 and *Flora Pyrenaea ...* 4: 405. 1901, *American Midland Naturalist* 2: 36-54. 1911, *Brenesia* 19-20. 617-618. 1982,

Contributions from the United States National Herbarium 48: 454-455, 467. 2003.

Navicularia Raddi = *Ichnanthus* P. Beauv.,
Navicularia Fabr. (Lamiaceae, alt. Labiatae)

Latin *navicula* “a small vessel,” *navicularius*, a “belonging to a small ship or boat.”

Panicoideae, Paniceae, Paspalinae, type *Navicularia lanata* Raddi, see *Species Plantarum* 1: 55. 1753, *Enumeratio Methodica Plantarum* 48. 1759, *Essai d'une Nouvelle Agrostographie* 56, 57, t. 12, f. 1. 1812, *Agrostografía Brasiliensis* 38-40, t. 1, f. 5. 1823, *Flora Brasiliensis seu Enumeratio Plantarum* 2: 136. 1829, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 3,1(2-3): 195, 320. 1834 and *J. Wash. Acad. Sci.* 13(9): 174. 1923, *Mus. Paraense Emílio Goeldi, Ser. Guias* 9(2): 279-293. 1993, *Contributions from the United States National Herbarium* 46: 257-270, 298-298. 2003.

Nazia Adans. = *Tragus* Haller

Chloridoideae, Cynodonteae, Zoysiinae, or Chloridoideae, Cynodonteae, Traginae, type *Nazia racemosa* (L.) Kuntze, see *Species Plantarum* 2: 1049. 1753, *Familles des Plantes* 2: 31, 582. 1763, *Historia Stirpium Indigenarum Helvetiae Inchoata* 2: 203. 1768, *Flora Pedemontana* 2: 241. 1785, *Neue Entdeckungen im ganzen Umfang der Pflanzenkunde* 3: 15. 1822, *Mantissa* 2: 205. 1824, *Flora Brasiliensis seu Enumeratio Plantarum* 2: 286. 1829, *Revisio Generum Plantarum* 2: 780. 1891, *Bulletin, Division of Agrostology United States Department of Agriculture* 4: 12. 1897, *Bulletin, Division of Agrostology United States Department of Agriculture* (edition 1) 28, f. 324. 1899 and *Anales del Museo Nacional de Buenos Aires* 11: 58. 1904, *Contributions from the United States National Herbarium* 12(6): 183-258. 1909, *Kew Bulletin* 36(1): 55-61. 1981, *Contributions from the United States National Herbarium* 41: 175, 220-221. 2001.

Neeragrostis Bush = *Eragrostis* Wolf

One or two species, northern and Central America, Mexico. Chloridoideae, Cynodonteae, or Chloridoideae, Eragrostideae, Eragrostidinae, annual, herbaceous, creeping, decumbent, rooting at the nodes, mat-forming, pubescent or villous, stoloniferous, auricles absent, sheaths glandular, ligule a line of hairs, leaf blades triangular, plants dioecious, inflorescence a panicle exerted or partially included in upper sheath, hermaphrodite florets absent, dimorphic spikelets, 2 glumes unequal, second glume awnless, lemma

entire and awned or mucronate, palea vestigial in female spikelets, 2 free and fleshy lodicules truncate, male florets 3-staminate, ovary glabrous, 2 stigmas, open areas, sandy soil, riverbanks, clearings, related to *Distichlis* and *Monanthochloe*, sometimes referred to *Eragrostis*, type *Neeragrostis weigeltiana* Bush, see *Genera Plantarum* 23. 1776, *Tableau Encyclopédique et Méthodique ... Botanique* 1: 185. 1791, *Icones et Descriptiones Graminum Austriacorum* 4: 15. 1809 and *Transactions of the Academy of Science of St. Louis* 13: 175-178, 180. 1903, *Rhodora* 28: 113-115. 1926, *Rev. Argentina de Agronomía* 29: 1-11. 1962, *Acta Bot. Neerl.* 15: 157. 1966, *Iowa State Journal of Research* 51(3): 323-325. 1977, *Rhodora* 80: 390-403. 1980, *Monocotiledóneas Mexicanas: una Sinopsis Florística* 10: 7-236. 2000, *Contributions from the United States National Herbarium* 41: 81-115, 175. 2001.

Species

N. contrerasii (R.W. Pohl) P.M. Peterson (*Eragrostis contrerasii* R.W. Pohl; *Eragrostis hypnoides* (Lam.) Britton, Sterns & Poggenb.) (named for Elias Contreras, 1961-1972 collected in Belize, Guatemala, Mexico, worked with Cyrus Longworth Lundell; see *Rhodora* 77: 105-140. 1975, *Wrightia* 5: 84. 1975, *Wrightia* 6: 42. 1979, *Ann. Missouri Bot. Gard.* 80: 240. 1993, *Ann. Missouri Bot. Gard.* 84: 731. 1997)

Mexico. Annual, creeping, see *Tableau Encyclopédique et Méthodique ... Botanique* 1: 185. 1791, *Preliminary Catalogue of Anthophyta and Pteridophyta Reported as Growing Spontaneously within One Hundred Miles of New York* 69. 1888 and Ralph L. Roys, “The Ethnobotany of the Maya.” *Middle American Research Series*. New Orleans 1931, *Iowa State Journal of Research* 51(3): 323, f. 1. 1977, *Smithsonian Contributions to Botany* 87: 35. 1997.

N. reptans (Michx.) Nicora (*Eragrostis capitata* (Nutt.) Nash; *Eragrostis reptans* (Michx.) Nees; *Eragrostis reptans* (Michx.) J. Presl, nom. illeg., non *Eragrostis reptans* (Michx.) Nees; *Eragrostis weigeltiana* Bush; *Megastachya fasciculata* E. Fourn.; *Megastachya reptans* (Michx.) P. Beauv.; *Neeragrostis weigeltiana* Bush; *Poa capitata* Nutt.; *Poa dioica* Michx. ex Poir.; *Poa hypnoides* Lam.; *Poa reptans* Michx.; *Poa weigeltiana* Rchb. ex Trin.) (for the German botanist Christoph Weigelt, d. 1828, physician, plant collector (Suriname); see J.H. Barnhart, *Biographical notes upon botanists*. 3: 471. 1965; Antoine Lasègue, *Musée botanique de M. Benjamin Delessert*. 1845)

America. Creeping, see *Flora Boreali-Americana* 1: 69-70, t. 11. 1803, *Essai d'une Nouvelle Agrostographie* 74, 167, 175. 1812, *Flora Brasiliensis seu Enumeratio Plantarum* 2: 514. 1829, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 1(4): 410. 1830, *Reliquiae Haenkeanae* 1(4-5): 275. 1830, *Transactions of the American Philosophical Society*, new series, 5: 146.

1835, *Mexicanas Plantas* 2: 120. 1886 and *Manual of the Flora of the Northern States and Canada* 1042. 1901, *Transactions of the Academy of Science of St. Louis* 13(7): 178, 180. 1903, *Revista Argentina de Agronomía* 29: 5. 1963.

Neesiochloa Pilger

For the German (b. near Erbach, Hesse) botanist Christian Gottfried (Daniel) Nees von Esenbeck, 1776-1858 (d. Breslau, Wroclaw), physician, 1800 medical doctor Giessen, editor of Robert Brown, *Vermischte botanische Schriften*. Nürnberg 1825-1835, from 1818 to 1858 President of the Deutschen Akademie der Naturforscher *Leopoldina*, professor of botany, botanical collector, among his works are *Handbuch der Botanik*. Nürnberg 1820-1821, *Hornsuchia*, novum plantarum brasiliensium genus. Ratisbonae [Regensburg] [1882], *Systema laurinarum*. Berolini [Berlin] 1836 and *Genera et species Asterearum*. Vratislaviae [Breslau] 1832, brother of the German botanist Theodor Friedrich Ludwig Nees von Esenbeck (1787-1837); see J.H. Barnhart, *Biographical notes upon botanists*. 2: 542. 1965; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 283. 1972; Johannes Proskauer, in *D.S.B.* 10: 11-14. 1981; Günther Schmid, *Chamisso als Naturforscher*. Eine Bibliographie. Leipzig 1942; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. Philadelphia 1964; A. Lasègue, *Musée botanique de Benjamin Delessert*. Paris 1845; S. Lenley et al., *Catalog of the manuscript and archival collections and index to the correspondence of John Torrey*. Library of the New York Botanical Garden. 464. 1973; Ethelyn (Daliaette) Maria Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933; E.D. Merrill, *Contr. U.S. Natl. Herb.* 30: 227. 1947; Stafleu & Cowan, *Taxonomic literature*. 3: 705-712. 1981; R. Zander, F. Encke, G. Buchheim & S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993; I.C. Hedge & J.M. Lamond, *Index of Collectors in the Edinburgh Herbarium*. Edinburgh 1970; Leonard Huxley, *Life and Letters of Sir J.D. Hooker*. London 1918.

One species, northeast Brazil. Chloridoideae, Cynodonteae, annual, herbaceous, unarmed, erect, caespitose, auricles absent, ligule membranous with ciliate fringe, leaf blades linear with hispid margins, plants bisexual, open inflorescence with long pedicels, an open panicle very sparsely branched or an open raceme, solitary spikelets round to orbicular, 2 glumes ovate more or less equal, second glume awned, lemma emarginate and shortly awned, palea keels ciliate, lodicules acute to acuminate, 3 stamens, ovary glabrous, 2 reddish stigmas, in open disturbed places, damp ground, poor soil, type *Neesiochloa barbata* (Nees) Pilg., see *Agrostologia Brasiliensis* 2: 477. 1829, *Mémoires de la Société d'Agriculture, Sciences et Arts d'Angers* 1: 208.

1831, *Enumeratio Plantarum* 1833 and *Contributions from the United States National Herbarium* 41: 175. 2001.

Species

N. barbata (Nees) Pilger (*Briza barbata* (Nees) Trin.; *Calotheca barbata* Nees; *Chascolytrum barbatum* (Nees) Kunth; *Eleusine barbata* Desv.; *Leptochloa barbata* (Desv.) Parodi ex Nicora)

South America. Slender, leaf blades acuminate pilose hispid, inflorescence oblong, spikelets 7- to 10-flowered, glumes subequal glabrous, lowest lemma awned, see *Flora Brasiliensis seu Enumeratio Plantarum* 2: 477. 1829 [also *Agrostologia Brasiliensis* 2: 477. 1829], *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 1(4): 363. 1830, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 373. 1833 and *Hickenia* 2(19): 91. 1993.

Negria Chiov. = *Lintonia* Stapf, *Negria* F. Muell. (Gesneriaceae)

For the Italian botanist Giovanni Negri, 1877-1960, professor of botany, from 1925 to 1949 Director of the Istituto Botanico and Orto Botanico at Firenze, collector in East Africa, Ethiopia, Somalia, his works include *Erbario figurato*. Milano 1904, Etiopia. *Appunti di una escursione botanica nell'Etiopia meridionale ...* (Marzo-Agosto 1909). Roma 1913 and *Atlante dei principali funghi commestibili e velenosi*. Torino 1908; see J.H. Barnhart, *Biographical notes upon botanists*. 2: 542. 1965; E. Schmid, *Webbia* 25(1): 47-51. 1970; T.W. Bossert, compil., *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 283. 1972; P. Luzzi, "L'Orto Botanico Giardino dei Semplici." in *Museo Nazionale di Storia Naturale a Firenze: ipotesi di insediamento*. Alinea Editrice, Firenze 1987; Guido Moggi, "Il Museo Botanico ed il Giardino dei Semplici dell'Università di Firenze." *Boll. Soc. It. Iris*. 26-39. 1975.

Cynodonteae, type *Negria melicoides* Chiov., see *Fragmenta Phytographiae Australiae* 7: 151. 1871 and *Hooker's Icones Plantarum* 30: t. 2944, 2949. 1911, *Annali di Botanica* 10(3): 410-411. 1912, *Annuario del Reale Istituto Botanico di Roma* 11: 231. 1913.

Nemastachys Steud. = *Microstegium* Nees

From the Greek *nema* "thread" and *stachys* "a spike."

Panicoideae, Andropogoneae, Saccharinae, type *Nemastachys taitensis* Steud., see *A Natural System of Botany* 2nd edition 447. 1836, *Synopsis Plantarum Glumacearum* 1: 357. 1854 and *Kew Bulletin* 7(2): 209-223. 1952,

Contributions from the United States National Herbarium 46: 292, 298. 2003.

Nematopoa C.E. Hubb.

From the Greek *nema*, *nematos* “thread” and *poa* “grass, pasture grass,” referring to the capillary branchlets of the inflorescence, to the filiform inflorescence branches.

One species, tropical southern Africa. Arundinoideae, Danthonieae, perennial, herbaceous, densely to loosely tufted, leaf blades filiform flexuous, auricles absent, ligule fringed or ciliate, plants bisexual, inflorescence paniculate, spikelets pedicellate and flattened, 2 unequal glumes more or less nerved, lemmas membranous 2-dentate with a long flexuous central awn, palea present, 2 minute fleshy lodicules, 3 stamens, ovary glabrous, 2 reddish stigmas, moist places, damp ground, type *Nematopoa longipes* (Stapf & C.E. Hubb.) C.E. Hubb., see *Kew Bulletin* 12: 51. 1957.

Species

N. longipes (Stapf & C.E. Hubb.) C.E. Hubb. (*Crinipes longipes* (Stapf & C.E. Hubb.) C.E. Hubb.; *Triraphis longipes* Stapf & C.E. Hubb.)

South Africa. See *Kew Bulletin* 1935: 306. 1935, *Kew Bull.* 12: 52. 1957.

Neoaulacolepis Rauschert = *Aniselytron* Merrill, *Aulacolepis* Ettingsh. (Pinaceae), *Aulacolepis* Hack., *Calamagrostis* Adans.

Greek *neos* “new” and the genus *Aulacolepis* Hackel, Greek *aulax*, *aulakos* “a furrow” and *lepis* “a scale.”

Aveneae, type *Neoaulacolepis treutleri* (Kuntze) Rauschert, see *Familles des Plantes* 2: 31, 530. 1763, *Tentamen Florae Germanicae* 1: 34. 1788, *Revisio Generum Plantarum* 2: 780. 1891, *Sitzungsberichte der kaiserlichen Akademie der Wissenschaften. Wien. Mathematisch-naturwissenschaftlichen Classe. Abteilung I* 102: 135, 147. 1893 and *Repertorium Specierum Novarum Regni Vegetabilis* 3(42-43): 241-242. 1906, *Philippine Journal of Science* 5(4): 328-330. 1910, *Taxon* 31(3): 561. 1982, *The Gardens' Bulletin Singapore* 37(2): 213-223. 1984 [1985], *Illustrated Guide of the Genus Astragalus in Iran* 738. 1989.

Neobambus Keng ex Keng f. = *Neobambus* Keng f., *Sinobambusa* Nakai, *Sinobambusa* Makino ex Nakai

From the Greek *neos* “new” plus *bambus*, *bambusa*.

Bambusoideae, Bambuseae, Shibataeinae, type *Neobambus dolichanthus* (Keng) Keng ex Keng f., see *Journal of the Arnold Arboretum* 6(3): 152. 1925, *Sinensia* 7(3): 418, f. 6. 1936, *Technical Bulletin of the National Forestry Research Bureau (China)* 8: 15. 1948, *Taxon* 6(7): 209. 1957, *Journal*

of Bamboo Res. 1: 140-164. 1982, *Kew Bulletin* 44(2): 349-367. 1989, *Contributions from the United States National Herbarium* 39: 79, 113. 2000.

Neobouteloua Gould

After the Spanish botanist Estéban Boutelou y Soldevilla, 1776-1813 (Madrid), professor in Madrid; see Yahya Ibn Muhammad called Ibn Al-'Auwán, *Libro de Agricultura ... Arreglo hecho ... por D. C. Boutelou, precedido de una introducción de D. E. Boutelou* etc. 1878; Miguel Colmeiro y Penido, *La Botánica y los Botánicos de la Península Hispano-Lusitana*. Madrid 1858; *Genera et Species Plantarum*. 1816.

One species, Argentina and Chile. Chloridoideae, Cynodonteae, perennial, herbaceous, unarmed, decumbent, rhizomatous, auricles absent, narrow leaf blades, ligule fringed, plants bisexual, open inflorescence, racemes closely spaced, spikelets flattened or compressed laterally, 1 fertile floret and a cluster of 2-4 rudiments, 2 glumes unequal, lemma keeled and 3-awned, palea present, 2 tiny and free lodicules, 3 stamens, ovary glabrous, 2 reddish stigmas, open areas, plains, prairies, hillsides, slopes, dry habitats, pampas, a segregate from *Chondrosium*, type *Neobouteloua lophostachya* (Griseb.) Gould, see *Boletín de la Sociedad Argentina de Botánica* 12: 106-108, f. 1-2. 1968, *Contributions from the United States National Herbarium* 41: 175. 2001.

Species

N. lophostachya (Griseb.) Gould (*Bouteloua lophostachya* Griseb.; *Bouteloua lophostachya* Griseb.; *Bouteloua nana* Griseb.)

Argentina. See *Abhandlungen der Königlichen Gesellschaft der Wissenschaften zu Göttingen* 24: 302-303. 1879 and *Boletín de la Sociedad Argentina de Botánica* 12: 108, f. 1-2. 1968.

Neohouzeaua A. Camus = *Schizostachyum* Nees

Named for Jean Houzeau de Lehaie, 1867-1959, explorer, botanical collector, author of *Le bambou, son Étude, sa culture, son emploi*. Mons 1906, “La culture des bambous dans le Sud-Ouest de la France.” *Bull. Soc. Dendr. Fr.* 14: 233-266. 1909.

About 2-7 species, Southeast Asia, Vietnam, China, Bhutan, Bangladesh to Thailand, Burma (Myanmar), India. Bambusoideae Bambusodae, Bambuseae, Melocanninae, perennial, sympodial, bushy or shrubby, slender, woody, scandent, persistent, branched, one or more branches at each node, main branch usually growing separately, rhizomes pachymorph, leaves with transverse veinlets, plants bisexual, inflorescence paniculate, 2 or 3 slender pseudospikelets

at each node, palea absent, 6 stamens monadelphous, ovary with stiff apical appendage, 3 stigmas, wild or cultivated, lowlands, in evergreen forest, type *Neohouzeaua mekongensis* A. Camus, see *Flora Brasiliensis seu Enumeratio Plantarum* 2: 535. 1829 and *Bulletin du Muséum National d'Histoire Naturelle* 28(1): 100. 1922, *Taxon* 6(7): 206. 1957, *Agriculture Handbook* 193: 1-74. 1961, *Contributions from the United States National Herbarium* 39: 112. 2000.

Species

N. coradata T.H. Wen & Q.H. Dai (*Schizostachyum coradatum* (T.H. Wen & Dai) N.H. Xia)

China. Scandent, manifold branching, branches clustered or verticillate, young culm green, sheath auricles ovate to broadly elliptic, sheath ligule broadly arcuate with a ciliate margin, sheath blade ovate to ovate-lanceolate and erect, leaves oblong-lanceolate, cultivated, edible shoots, used for weaving, binding material, see *Journal of Bamboo Research* 10(1): 12, f. 1. 1991, *Journal of Tropical and Subtropical Botany* 1(1): 5. 1993.

N. dulloa (Gamble) A. Camus (also *dullooa*) (*Schizostachyum dulloa* (Gamble) Majumdar; *Teinostachyum dullooa* Gamble)

Vietnam, Bhutan, India, Bangladesh. Erect, leaning, slender, thin-walled, open tufted, nodes more or less swollen, many branches at each node, culm sheath glabrous, sheath blade narrowly lanceolate and tapering, inflorescence on leafy branch, wild and cultivated, used for buildings purposes and basketry, light constructions and mats, poles and umbrellas, culms used as floats, see *Annals of the Royal Botanic Garden, Calcutta*. 7: 101, pl. 89. 1896 and *Bulletin du Muséum National d'Histoire Naturelle* 28(1): 101. 1922, *Florae Indicae Enumeratio: Monocotyledonae, Bambusoideae* Botanical Survey of India, Flora of India, Series 4, 281. Calcutta 1989.

Burma. Erect, see *Bulletin of Miscellaneous Information Kew* 1923: 91-92. 1923.

Neohusnotia A. Camus = *Acroceras* Stapf, *Panicum* L.

For the French botanist Pierre Tranquille Husnot, 1840-1929, bryologist, agrostologist, botanical collector, traveler, his works include *Catalogue des cryptogames recueillis aux Antilles françaises en 1868*. Caen 1870, *Flore analytique et descriptive des mousses du Nord-Ouest*. Cahan (Orne) [Caen] [1873] and *Muscologia gallica*. Cahan [Caen] 1884-1894, editor of the *Revue bryologique*. vols. 1-53. 1874-1926. See Ernest Roussel, *Énumération des champignons récoltés par M. T. Husnot aux Antilles françaises en 1868*. [Extrait du Bulletin de la Société Linnéenne de Normandie, etc.] Caen 1870; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 187. 1972; J.H. Barnhart, *Biographical notes upon botanists*. 2: 222. 1965; Auguste Jean Baptiste Chevalier (1873-1956) et al., *Travaux bryologiques dédiés à la mémoire de Pierre-Tranquille Husnot*. Paris 1942; H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 188. Oxford 1964; Ignatz Urban, editor, *Symbolae Antillanae*. 3: 65. Berlin 1902; S. Lenley et al., *Catalog of the manuscript and archival collections*

and index to the correspondence of John Torrey. Library of the New York Botanical Garden. 234. Boston, Mass. 1973; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933.

Panicoideae, Paniceae, Panicinae, type *Neohusnotia tonkinensis* (Balansa) A. Camus, see *Species Plantarum* 1: 55, 58. 1753, *Journal de Botanique (Morot)* 4(7): 140. 1890 and *Contr. U.S. Natl. Herb.* 15: 13-15. 1910, *Flora of Tropical Africa* 9: 621-622, 624-625. 1920, *Bulletin du Muséum National d'Histoire Naturelle* 26(7): 664. 1921, *Journal of the Faculty of Science: University of Tokyo, Sect. 3 Botany* 9: 94. 1965, *Boletim do Museu Paraense Emílio Goeldi, Série Botânica* 17(2): 297-314. 2001, *Contributions from the United States National Herbarium* 46: 13-14, 298, 306-441. 2003.

Neoleleba Widjaja

The generic name from *Leleba*, used by Rumphius in 1743.

Five species, Indonesia. Bambusoideae, Bambusodae, Bambuseae, or Bambusoideae, Bambuseae, Bambusinae, sympodial, thin, erect, scrambling, branching only in the upper part, pseudospikelets compressed or flat, lodicules absent, elongated and hairy ovary, type *Neoleleba atra* (Lindl.) Widjaja, see *Genera Plantarum* 1: 236. 1789, *Syst. Veg.* 7, 2: 1345. 1830 and *Reinwardtia* 11(2): 57-152. 1997.

Species

N. amahussana (Lindl.) Widjaja (*Arundarbor amahussana* (Lindl.) Kuntze; *Bambusa amahussana* Lindl.; *Bambusa atra* var. *amahussana* (Lindl.) Merr.)

Indonesia. See *The Penny Cyclopaedia* of the Society for the Diffusion of Useful Knowledge. C. Knight, 3: 357. London 1833-1843, *Journal of the Asiatic Society of Bengal* 39(2): 86. 1870, *Revisio Generum Plantarum* 2: 761. 1891 and E.D. Merrill (1876-1956), *An interpretation of Rumphius's Herbarium Amboinense*. Manila 1917 [Work begun by Charles Budd Robinson, 1871-1913], *Reinwardtia* 11(2): 112-113. 1997.

N. atra (Lindl.) Widjaja (*Arundarbor atra* (Lindl.) Kuntze; *Bambusa atra* Lindl.)

Indonesia. See *Species Plantarum. Editio quarta* 2: 245. 1799, *Systema Vegetabilium* 7(2): 1345-1346. 1830, *Transactions of the Linnean Society of London* 26(1): 118-119. 1868, *Journal of the Asiatic Society of Bengal* 39(2): 86. 1870, *Revisio Generum Plantarum* 2: 761. 1891 and *Die Flora der deutschen Schutzgebiete in der Südsee* 186-188. 1900, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 52: 175. 1914, *Kew Bulletin* 21: 268-271. 1967, *Reinwardtia* 11(2): 114. 1997.

N. glabra Widjaja

Indonesia. See *Reinwardtia* 11(2): 116-118. 1997.

N. hirsuta (Holtum) Widjaja (*Bambusa hirsuta* Holtum) Indonesia, New Guinea. Inflorescences terminating leafy branches, see *Kew Bulletin* 21: 271. 1967, *Reinwardtia* 11(2): 118. 1997.

N. inaurita Widjaja

Indonesia. See *Reinwardtia* 11(2): 119. 1997.

Neomicrocalamus Keng f. = *Racemobambos* Holtum

Greek *neos* plus the generic name *Microcalamus*.

About 7 species, subtropical forest, Bhutan, India, China, Vietnam. Bambuseae, *Racemobambosinae*, sympodial, pluricaespitose, slender, scandent or semiscandent, culms hollow or solid, culm wall thick, manifold branching, internodes more or less smooth, rhizomes pachymorph, sheath thin with acute top, culm sheaths tough and more or less smooth, leaf sheaths glabrous, auricles absent, leaves small, flowering semelauctant, inflorescence an apical or axial panicle, 1-2 glumes, 6 stamens, one stigma, dense foliage, forest, shade, near rivers or streams, type *Neomicrocalamus prainii* (Gamble) Keng f., see *J. Bot. (Morot)* 3(17): 282, f. B. 1889, *J. Asiat. Soc. Bengal, Pt. 2, Nat. Hist.* 59(2): 207. 1890 and *The Gardens' Bulletin Singapore* 15: 268, 272. 1956, *Phytomorphology* 1: 88. 1956, *Journal of Bamboo Research* 2(2): 10. 1983, Chao Chi-Son & S.A. Renvoize, "A revision of the species described under *Arundinaria* (Gramineae) in southeast Asia and Africa." *Kew Bulletin* 44(2): 349-367. 1989, S. Dransfield, "A new species of *Racemobambos* (Gramineae: Bambusoideae) from Sulawesi with notes on generic delimitation." *Kew Bulletin* 47(4): 707-711. 1992, *Wageningen Agricultural University Papers* 92-1(2): 1-557. 1992, *Edinburgh Journal of Botany* 51(3): 324. 1994, C.M.A. Stapleton, D.Z. Li & N. Jia-Ron, "A new combination in *Cephalostachyum* with notes on names in *Neomicrocalamus* (Gramineae-Bambusoideae)." *Kew Bulletin* 52(3): 699-702. 1997.

Species

N. andropogonifolius (Griff.) Stapleton (*Bambusa andropogonifolia* Griff.; *Neomicrocalamus ringshu* Stapleton)

Bhutan. Pluricaespitose, dense, culms smooth and hollow, semiscandent, culm sheaths tough and smooth, leaf sheaths glabrous, auricles absent, wild, see *Itinerary Notes of Plants Collected in the Khasyah and Bootan Mountains* 2: 124. 1848 and *Edinburgh Journal of Botany* 51(3): 325-326. 1994.

Local names: langma, ula, ringshu

N. clarkei (Gamble ex Brandis) R.B. Majumdar (*Arundinaria clarkei* Gamble ex Brandis)

India. Shrubby, solid, leaves oblong-lanceolate with a thick ciliate petiole, see *Indian Trees* 666. 1906, *Flora Indicae*

Enumeratio: Monocotyledonae, Bambusoideae Botanical Survey of India, Flora of India, series 4, 279. Calcutta 1989, *Edinburgh Journal of Botany* 51(3): 325. 1994.

N. dongvanensis T.Q. Nguyen

Vietnam. See *Bot. Zhurn. (Moscow & Leningrad)* 76(6): 877. 1991.

N. microphyllus (J.R. Xue and T.P. Yi) Keng f. & T.P. Yi (*Drepanostachyum microphyllum* (J.R. Xue & T.P. Yi) Keng f. ex Yi; *Neomicrocalamus microphyllus* J.R. Xue & T.P. Yi; *Racemobambos microphylla* (J.R. Xue & T.P. Yi) Keng f. & T.H. Wen; *Sinocalamus microphyllus* J.R. Xue & T.P. Yi)

China, Tibet. Slanting the top of the culm, glabrous, glossy, green or greenish, not pruinose, sheath persistent, sheath auricles lacking, sheath ligule tiny and convex, sheath blade erect and long slender, leaves lanceolate, in evergreen hardwood forests, riverbanks, see *Journal of the Yunnan Forestry College* 1: 71-73, f. 2. 1982, *Journal of Bamboo Research* 2(1): 35, t. 5. 1983, *Journal of Bamboo Research* 2(2): 14. 1983, *Journal of Bamboo Research* 5(2): 13. 1986, *Journal of Bamboo Research* 12(4): 46. 1993.

N. prainii (Gamble) P.C. Keng (*Arundinaria prainii* (Gamble) Gamble; *Microcalamus prainii* Gamble; *Racemobambos prainii* (Gamble) Keng f. & T.H. Wen; *Thamnocalamus prainii* (Gamble) E.G. Camus (named for the British botanist Sir David Prain, 1857-1944 (Surrey), professor of botany at Calcutta, 1884-1887 Indian Medical Service, Royal Botanical Garden at Calcutta 1887-1905, Fellow of the Linnean Society 1888 (President 1916-1919), from 1905 to 1922 Director of Kew, 1905 Fellow of the Royal Society, 1907-1920 editor of *Curtis's Botanical Magazine*. See J.H. Barnhart, *Biographical notes upon botanists*. 3: 106. 1965; T.W. Bossert, compil., *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 316. 1972; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. 1917-1933; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. 594. India, Meghalaya, China Tibet. Climbing, slender, scandent, small, curving, wiry, thin, smooth, many branches clustered, wall thick to solid, joint swollen, thin sheaths with sharp tips, low and short sheath ligule circular, sheath blade acicular, variable leaves oblong to lanceolate, inflorescence terminal or axillary, spikelets 3- to 6-flowered, uppermost floret imperfect, 2-3 glumes, lemmas falcate, paleas falcate and 2-keeled, 3 lodicules, 6 stamens, 3 plumose stigmas, see *Journal of the Asiatic Society of Bengal. Part 2. Natural History* 59(2): 207, pl. 7. 1890, *Annals of the Royal Botanic Garden, Calcutta*. 7: 21-22, pl. 19. 1896 and *Les Bambusées* 54. 1913, *Journal of Bamboo Research* 2(2): 10. 1983, *Journal of Bamboo Research* 5(2): 13, 26. 1986, *Florae Indicae Enumeratio: Monocotyledonae, Bambusoideae* 279. Calcutta 1989, *Kew Bulletin* 47(4): 707-711. 1992, *Edinburgh Journal of Botany* 51(3): 326. 1994.

in India: kevva, sampit, uppit, usepeit

N. setigerus (Gamble) J.R. Xue and T.P. Yi (*Ochlandra setigera* Gamble)

China. See *Annals of the Royal Botanic Garden, Calcutta*. 7: 128, t. 115. 1896 and *Flora Xizangica* 5: 50. 1987.

N. yunnanensis (Wen) Ohrnb. (*Racemobambos yunnanensis* Wen)

China. Scandent, see *Journal of Bamboo Research* 5(2): 11. 1986.

Neomolinia Honda & Sakis. = *Diarrhena* P. Beauv., *Neomolinia* Honda

Dedicated to the Chilean (b. Guaraculen, Talca) botanist Giovanni Ignazio (Juan Ignacio, Juan Ignatius) Molina, 1737-1829 (d. Bologna, Italy), Jesuit priest, missionary, plant collector, 1768 to Italy, professor of natural sciences, his writings include *Compendio della storia del regno del Chili*. Bologna 1776, *Saggio sulla storia naturale del Chili*. Bologna 1782, *Saggio sulla storia civile del Chili*. Bologna 1787 and *Memorie di storia naturale* lette in Bologna. Bologna 1821. See H. Gunckel, "Don Juan Ignacio Molina. Su vida, sus obras y su importancia científica." *Revista Univ.* 14(1-2): 195-216, 14(3-4): 320-341. [Santiago] 1929 and *Bibliografía Moliniana*. Santiago 1980; J.H. Barnhart, *Biographical notes upon botanists*. 2: 503. Boston 1965; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 271. 1972; L. Polgar, *Bibliography of the History of the Society of Jesus*. Rome 1967; Francisco Guerra, in *D.S.B.* 9: 458. 1981.

Pooideae, Diarrheneae, *Diarrhena* sect. *Neomolinia* (Honda) Tzvelev, type *Neomolinia faurei* (Hack.) Honda,

see *Essai d'une Nouvelle Agrostographie* 142, 160, 162, t. 25, f. 2. 1812, *Genera et species plantarum*, quae aut novae sunt aut nondum recte cognoscuntur... 34. Neosasamorpha Tatew. = *Sasa* Makino & Shibata

From the Greek *neos* "new" plus *Sasa* and Greek *morphe* "a form, shape."

Bambusoideae, Bambuseae, Arundinariinae, type *Neosasamorpha asagishiana* (Makino & S. Uchida ex Nakai) Tatew., see *Botanical Magazine* (Tokyo) 15(168): 18, 25, 27. 1901, *Acta Phytotax. & Geobot. Kyoto* 9: 159, 227. 1940, M. Tatewaki, "Hokkaido sasarui no bunrui [Classification of genus *Sasa* in Hokkaido.]" *Hokkaido Ringyô-kaihô* 38(1): 4-9, 38(2): 1-9, 38(3): 1-8, 38(4): 1-10, 38(6): 1-11, 38(8): 1-13. 1940, *Bibliography of Cultivated Trees and Shrubs* hardy in the cooler temperate of the northern hemisphere ... 635. Bot.* 64(2): 42. 1989, *Taxon* 45: 543. 1996, *Taxon* 48: 377. 1999, *Taxon* 49(2): 235-238. 2000, *Contributions from the United States National Herbarium* 39: 111-112. 2000.

Neoschischkinia Tzvelev = *Agrostis* L.

For the Russian botanist Boris Konstantinovich Schischkin [also Shishkin, Siskin], 1886-1963, traveler, botanical explorer, professor of botany, worked with Alexander Alfonsovich Grossheim (1888-1948), Sergei Vassilievich [Vasilievich] Juzepczuk (1893-1959), Leonid Efimovic Rodin (b. 1907) & L.F. Pravdin. See J.H. Barnhart, *Biographical notes upon botanists*. 3: 228. 1965; T.W. Bossert,

Biographical dictionary of botanists represented in the Hunt Institute portrait collection. 353. 1972; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993.

Pooideae, Poae, Agrostidinae, type *Neoschischkinia elegans* Tzvelev, see *Species Plantarum* 1: 61-63. 1753, *Diagnoses Plantarum Novarum Hispanicarum* 27. 1842 and *Bot. Zhurn.* (Moscow and Leningrad) 53: 309. 1968, *Fl. Fenn.* 5: 29. 1971, *Taxon* 41: 556. 1992, *Taxon* 44: 611-612. 1995, *Contributions from the United States National Herbarium* 48: 42-89, 467. 2003.

Neosinocalamus Keng f. = *Bambusa* Schreb., *Dendrocalamus* Nees

From the Greek *neos* plus *Sinocalamus*.

Bambusoideae, Bambusodae, Bambuseae, or Bambusoideae, Bambuseae, Bambusinae, culm often arcuate and drooping, sympodial, manifold branching, culm wall thin, sheath hard but fragile, leaf auricles absent, inflorescence a pseudopanicule, 6 stamens, 2-3 stigmas, type *Neosinocalamus affinis* (Rendle) Keng f., see *Genera Plantarum* 1: 236. 1789, *Species Plantarum. Editio quarta* 2: 245. 1799, *Linnaea* 9(4): 476-477. 1835 and *Indian Forester* 58: 7. 1932, *Lingnan University Science Bulletin* 9: 66-67. 1940, *Acta Phytotaxonomica Sinica* 18: 211-216. 1980, *Journal of Bamboo Research* 2(2): 12, 148. 1983, *Kew Bulletin, Additional Series* 13: 54-55. 1986, *Journal of Bamboo Research* 7(4): 9, 13. 1988, *Journal of South China Agricultural University* 10(2): 43, 45-46. 1989, Z.L. Li, *The Flora of China Bambusoideae project, problems and current understanding of bamboo taxonomy in China. The Bamboos* 5: 61-81. 1997, *Contributions from the United States National Herbarium* 39: 29-35, 54-55, 79. 2000.

Neostapfia Burt Davy = *Davyella* Hackel, *Stapfia* Chodat (Algae), *Stapfia* Burt Davy

After the Austrian botanist Otto Stapf, 1857-1933, traveler, 1900-1922 Keeper of the Herbarium of the Royal Botanic Gardens, Kew, 1922-1933 editor of the *Botanical Magazine*, among his numerous and valuable publications are *On the Flora of Mount Kinabalu in North Borneo*. London 1894 and *The Aconites of India*. Calcutta 1905; see J.H. Barnhart, *Biographical notes upon botanists*. 3: 317. 1965; Mia (Maria) Caroline Karsten, *The Old Company's Garden at the Cape and its Superintendents*. Cape Town 1951; James Edgar Dandy (1903-1976), in *The Journal of Botany*. 69: 54. (Feb.) 1931; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 380. 1972; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. Philadelphia 1964; S. Lenley et al., *Catalog of the manuscript and*

archival collections and index to the correspondence of John Torrey. Library of the New York Botanical Garden. 382. 1973; Ethelyn Maria Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933; Leonard Huxley, *Life and Letters of Sir Joseph Dalton Hooker*. London 1918; Stafleu & Cowan, *Taxonomic literature*. 5: 839-843. 1985; R. Zander, F. Encke, G. Buchheim & S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993; Emil Bretschneider, *History of European Botanical Discoveries in China*. [Reprint of the original edition, St. Petersburg 1898] Leipzig 1981; Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 650. London 1994.

One species, U.S., California. Chloridoideae, Orcuttieae, or Chloridoideae, Cynodonteae, Orcuttiinae, annual, herbaceous, unarmed, aromatic, erect to ascending, decumbent, auricles absent, ligule absent, plants bisexual, inflorescence a single raceme, a spike-like panicle, glumes absent, lemma membranous and whorled, palea present, 2 tiny lodicules, 3 stamens, ovary glabrous, 2 stigmas, found in seasonally inundated areas, vernal pools, type *Neostapfia colusana* (Burt Davy) Burt Davy, see *Reise um die Erde* 2: 14. 1834, *Bulletin de l'Herbier Boissier* 5: 947. 1897, *Erythea, a Journal of Botany, West American and General*. 6(11): 109. Berkeley, California 1898, *Erythea* 7: 43. 1899, *Österreichische Botanische Zeitschrift* 49: 134. 1899 and B. Crampton, "The grass genera *Orcuttia* and *Neostapfia*: a study in habitat and morphological specialization." *Madroño* 15: 97-110. 1959, J.R. Reeder, "The tribe Orcuttieae and the subtribes of Pappophoreae (Gramineae)." *Madroño* 18: 20-28. 1965, J.R. Reeder, "Systematics of the tribe Orcuttieae (Gramineae) and the description of a new segregate genus, *Tuctoria*." *American Journal of Botany* 69(7): 1082-1095. 1982, *Kew Bulletin* 40: 737-744. 1985, *Contributions from the United States National Herbarium* 41: 66, 175, 219. 2001, *Plant, Cell and Environment* vol. 27, issue 5: 627-639. May 2004.

Species

N. colusana Davy (*Anthochloa colusana* (Burt Davy) Scribn.; *Davyella colusana* (Burt Davy) Hack.; *Neostapfia colusana* (Burt Davy) Burt Davy; *Stapfia colusana* Burt Davy)

Southwestern U.S., California, Colusa County. Threatened grass, annual, ascending, decumbent base, leaves overlapping, panicles cylindrical, spikelets sessile, glumes wanting, lemma flabellate, viscid, aromatic, see *Erythea* 6(11): 110, pl. 3. 1898, *Bulletin, Division of Agrostology United States Department of Agriculture* 17: 221, f. 517. 1899, *Österreichische Botanische Zeitschrift* 49: 134. 1899, *Erythea* 7: 43. 1899.

in English: Colusa grass

Neostapfiella A. Camus

The diminutive of *Neostapfia*.

Three species, Madagascar. Chloridoideae, Cynodonteae, annual, herbaceous, stoloniferous, leaves mainly basal, leaf sheaths compressed, auricles absent, ligule a fringed membrane, plants bisexual, inflorescence spicate, 1-4 racemes digitate, solitary spikelets with 1 or 2 female fertile florets, 2 glumes membranous acute, lemma keeled and not winged with a long subapical awn, palea present, savannah, similar to *Chloris*, type *Neostapfiella perrieri* A. Camus, see *Bulletin Mensuel de la Société Linnéenne de Lyon* 5: 4, 6. 1926, A. Camus, "Le genre *Neostapfiella* A. Camus." *Notulae Systematicae. Herbarium du Museum de Paris* 11: 189-192. 1944.

Species

N. chloridiantha A. Camus

Madagascar. Callus oblong, see *Bulletin Mensuel de la Société Linnéenne de Lyon* 5: 4. 1926.

N. humbertiana A. Camus

Madagascar. See *Notulae Systematicae. Herbarium du Museum de Paris* 11: 191. 1944.

N. perrieri A. Camus

Madagascar. Callus linear and pungent, see *Bulletin Mensuel de la Société Linnéenne de Lyon* 5: 6. 1926.

Nephelochloa Boiss.

From the Greek *nephele* "a cloud" and *chloe*, *chloa* "grass," Latin *nephela*, *nefela* "a kind of thin cake," in Greek legend Nephele was the wife of Atamas and mother of Phrixus and Helle; Pseudo Apuleius Barbarus in his *Herbarium* applied Latin *nephelion* to a plant called also *personata* (Latin *personata*, *ae*, is a kind of large burdock (Plinius), said to be synonymous with *persolata* or *persollata*, the brown mullein).

One species, western Asia. Pooideae, Poodae, Aveneae, annual, herbaceous, auricles absent, ligule an unfringed membrane, plants bisexual, open inflorescence paniculate with lowest whorl of branches sterile, pedicellate and flattened spikelets several-flowered, two glumes unequal, lemmas membranous shortly awned, palea present, 2 free and membranous lodicules, 3 stamens, ovary glabrous, 2 stigmas, open areas, dry habitats, related to *Eremopoa*, type *Nephelochloa orientalis* Boiss., see *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 1(4): 373. 1830, *Mémoires Présentés à l'Académie Impériale des Sciences de Saint Pétersbourg par Divers Savans et lus dans ses Assemblées* 2: 526. 1835, *Enumeratio Plantarum Novarum* 1: 1. 1841, *Diagnoses plantarum orientalium novarum* ser. 1. 1(5): 72. 1844, *Flora*

Rossica 4(13): 366-367. 1852 and R.R. Mill, "Eremopoa, Nephelochloa, Catabrosella, Colpodium, Hyalopoa, Catabrosa, Paracolpodium." in P.H. Davis (editor), *Flora of Turkey and the East Aegean Islands* 9: 486-501. 1985.

Species

N. orientalis Boiss.

Eurasia. See *Diagnoses plantarum orientalium novarum* ser. 1. 1(5): 72. 1844.

Nestlera Steud. = Bouteloua Lag., Nestlera Spreng. (Asteraceae)

For the Alsatian botanist Chrétien Géofroy (Christian Gottfried) Nestler, 1778-1832, professor of botany and pharmacy, author of *Index Plantarum quae in Horto Academ. Argentiniensi* anno 1817 viguerunt. Argentorati [Strasbourg], studied with L.C. Richard, worked with Jean Baptiste Mougeot (1776-1858). See J.H. Barnhart, *Biographical notes upon botanists*. 2: 545. 1965; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. 539. University of Pennsylvania Press, Philadelphia 1964; A. Lasègue, *Musée botanique de Benjamin Delessert*. 289. Paris 1845; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. 1: 514. 1917-1933; R. Zander, F. Encke, G. Buchheim & S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993; I.C. Hedge & J.M. Lamond, *Index of Collectors in the Edinburgh Herbarium*. 114. Edinburgh 1970; Stafleu & Cowan, *Taxonomic literature*. 3: 728-729. 1981.

Chloridoideae, Cynodonteae, Boutelouinae, see *Varietades de Ciencias, Literatura y Artes* 2(4,21): 134, 141. 1805, *Gen. Sp. Nov.* 5. 1816, *Anleitung zur Kenntniss der Gewächse* 2(2): 568, 911. 1818, *Nomenclator Botanicus. Editio secunda* 2: 192. 1841, *Bulletin of Miscellaneous Information Kew* 1895: 25. 1895 and *Contributions from the United States National Herbarium* 41: 20-33, 175. 2001.

Neurachne R. Br.

From the Greek *neuron* "nerve" and *achne* "husk, glume," referring to the many-nerved glumes.

About 6 species, Australia. Panicoideae, Panicodae, Neurachneae, perennial, densely tufted, herbaceous, erect, more or less branching, shortly rhizomatous, shortly spreading or creeping horizontal rhizomes, extravaginal shoots, auricles absent, ligule fringed, leaves mostly basal and linear, hairy or glabrous nodes and solid internodes, plants bisexual, spike-like raceme or single spike, spikelets solitary and bearded at the base, hermaphrodite and sterile spikelets on the same plant, 2 florets, lower floret male or sterile, upper floret bisexual, 2 large tough glumes subequal and longer

than the florets, lower glume 3- to 7-nerved, upper glume 7- to 13-nerved, fertile lemma membranous to hyaline with ciliate margins, callus hairs white, palea 2-nerved, 2 free and fleshy lodicules, 3 stamens, ovary glabrous, 2-3 stigmas, stock fodder, weed species, semisarid and arid regions, open habitats, white sands, deep red sandy soils, Mallee heath, sandstone, light woodland, Mulga scrub, type *Neurachne alopecuroidea* R. Br., see Robert Brown, *Prodromus florae Novae Hollandiae*. 196. London 1810 and *Contributions from the Queensland Herbarium* 13: 3, 4. 1972, *Australian Journal of Botany* 33: 317-336. 1985, *Kew Bulletin, Additional Series* 13: 267, 377. 1986, *Austral. Ecology* 25(1): 48-57. Feb 2000, *Am. J. Bot.* 88: 1993-2012. 2001 [A molecular phylogeny of the grass subfamily Panicoideae (Poaceae) shows multiple origins of C₄ photosynthesis.], *Austral. Ecology* 27(1): 85-93. Feb 2002, *Am. J. Bot.* 90: 796-821. 2003 [A molecular phylogeny of Panicum (Poaceae: Paniceae): tests of monophyly and phylogenetic placement within the Panicoideae.], *New Phytologist* 161(2): 341-370. Feb 2004 [The evolution of C₄ photosynthesis.], *Journal of Biogeography* 31(5): 787-805. May 2004.

Species

N. alopecuroidea R. Br. (also *alopecuroides*) (*Panicum alopecuroides* (R. Br.) Spreng., nom. illeg., non *Panicum alopecuroides* L.) (as the genus *Alopecurus* L.)

Victoria, South Australia, Western Australia. Perennial, tufting, short spreading rhizomes, leaves mostly basal and bluish gray, inflorescence a silvery single spike-like raceme oblong or ovoid-oblong, reduced basal spikelets, spikelets bearded at the base, glumes acuminate, fertile lemma glabrous or silky-ciliate on the margin, white sands, ornamental and decorative in flower, grows everywhere, see *Prodromus Florae Novae Hollandiae* 196. 1810, *Systema Vegetabilium, editio decima sexta* 1: 309. 1825.

in English: foxtail mulga-grass, wallaby grass

N. lanigera S.T. Blake

South Australia, Western Australia. Woolly at the base, leaves mostly basal, densely woolly or hairy leaf-sheaths, green racemes, spikelets bearded at the base, glumes acuminate and pubescent or villous, fertile lemma shortly ciliate on the upper margins, very similar and closely allied to *Neurachne alopecuroidea* R. Br., see *Contributions from the Queensland Herbarium* 13: 10. 1972.

N. minor S.T. Blake

Western Australia. Hairy interior of the leaf-sheaths, closely allied and similar to *Neurachne alopecuroidea* R. Br., see *Contributions from the Queensland Herbarium* 13: 12. 1972.

N. munroi (F. Muell.) F. Muell. (*Panicum munroi* F. Muell.) (after James Munro, M.L.A. for North Melbourne from 1874, Premier of Victoria 1890-1892)

Queensland, Victoria, Northern Territory, New South Wales, South Australia, Western Australia. Perennial, stiff, erect, tufting, short creeping rhizomes, stems slender with hairy nodes, leaves mainly basal and prickly pointed, inflorescence a single silky spike or raceme narrowly oblong, hairy spikelets, susceptible to overgrazing, stony soils, stony ground, deep red sands, palatable to stock.

in English: slender-headed mulga-grass, window mulga-grass, mulga grass

N. queenslandica S.T. Blake

Queensland. Stems silky-hairy below the racemes, spikelets in groups, proximal male-only floret, closely allied to *Neurachne munroi* (F. Muell.) F. Muell., see *Contributions from the Queensland Herbarium* 13: 16. 1972.

N. tenuifolia S.T. Blake

Queensland, Northern Territory. Forming tussocks, stems with glabrous nodes, leaves strongly inrolled and very slender, similar to *Neurachne munroi* (F. Muell.) F. Muell., rare species, see *Contributions from the Queensland Herbarium* 13: 18. 1972.

Neurolepis Meissn. = *Planotia* Munro,
Platonia Kunth

From the Greek *neuron* “nerve” and *lepis*, *lepidos* “scale.”

About 9/21-22 species, Trinidad, and Venezuela, Guayana Highland, Colombia, Ecuador, Peru, High Andean forest. Bambusoideae, Bambusodae, Bambuseae, or Bambusoideae, Bambuseae, Chusqueinae, perennial, sympodial, erect, reedlike to grass-like, herbaceous to woody to subwoody, simple, internodes solid, forming large clumps, unarmed, rhizomes pachymorph, leaves erect and very large, leaf blades linear and leathery, ligule a fringed membrane, blades continuous with the sheaths, plants bisexual, large terminal panicle, flowering culms leafy, 2 glumes more or less equal, lemma 3- to 7-nerved, palea 2-nerved, 3 free and membranous lodicules, 3-6 stamens, ovary glabrous, 2 stigmas, in open places, meadows, forests, montane forest, cloud forest, swampy meadow, shrubby open vegetation, low brush, slopes, forest margins, rocky slopes, along streams and riverbanks, cliffs, woods, páramos, paramillo, cool moist habitats, cool forest, related to *Chusquea* Kunth and *Arthrostylidium*, see *Journal de Physique, de Chimie, d'Histoire Naturelle et des Arts* 95: 151. 1822, *Révision des Graminées* 1: 139. 1829, *Révision des Graminées* 1: 327, t. 76. 1830, *Linnaea* 9(4): 486. 1835, Carl Friedrich Meisner (Meissner) (1800-1874), *Plantarum vascularium genera*. 1: 426 and 2: 325. Clark, “Two new species of *Neurolepis* (Poaceae: Bambuseae) from Colombia.” *Novon* 6(2): 150-156. 1996, L.G. Clark, “Six new species of *Neurolepis* (Poaceae: Bambusoideae: Bambuseae) from Ecuador and Peru.” *Novon* 6(4): 335-350. 1996, *American Bamboos* 223-229. 1999, Jørgensen & León, “Catalogue of the Vascular Plants of Ecuador.” *Monogr. Syst. Bot. Miss. Bot. Garden* 75. 1999, *Contributions from the United States National Herbarium* 39: 79-81, 105-106. 2000.

Species

N. acuminatissima (Munro) Pilg. (*Chusquea aristata* Munro; *Neurolepis aristata* (Munro) Hitchc.; *Planotia acuminatissima* Munro)

Venezuela. See *Transactions of the Linnean Society of London* 26(1): 61, 72. 1868 and *Die Natürlichen Pflanzenfamilien* 1: 21. 1906, *Contributions from the U.S. National Herbarium* 24(8): 313. 1927, *Bamboo Sci. Cult.* 17(1): 60. 2003.

N. angusta Swallen (*Neurolepis densiflora* Swallen)

Venezuela, Colombia. See *Memoirs of the New York Botanical Garden* 9(3): 249, 399. 1957.

N. aperta (Munro) Pilg. (*Neurolepis ingens* (Pilg.) Pilg.; *Planotia aperta* Munro; *Planotia ingens* Pilg.)

Colombia, Ecuador. Coarse, see *Transactions of the Linnean Society of London* 26(1): 73. 1868, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 25(5): 721. 1898 and *Die Natürlichen Pflanzenfamilien* 1: 21. 1906.

in Colombia: cañuela, chusque de páramo, chusquea de páramo, pañuela

N. aristata (Munro) Hitchc. (*Chusquea aristata* Munro; *Neurolepis acuminatissima* (Munro) Pilg.; *Neurolepis stuebelii* (Pilg.) Pilg.; *Neurolepis tessellata* (Pilg.) Pilg.; *Neurolepis weberbaueri* Pilg.; *Planotia acuminatissima* Munro; *Planotia stuebelii* Pilg.; *Planotia tessellata* Munro, also spelled *tessellata*)

Colombia, Ecuador, Peru. Erect, shrubby, canelike, dense stands, leaves stiff, inflorescences erect, see *Transactions of the Linnean Society of London* 26(1): 61, 72. 1868, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 25(5): 720. 1898 and *Die Natürlichen Pflanzenfamilien* 1: 21. 1906, *Repertorium Specierum*

Novarum Regni Vegetabilis 17(19-30): 446. 1921, *Contributions from the U.S. National Herbarium* 24(8): 313. 1927, *Bamboo Sci. Cult.* 17(1): 60. 2003.

N. asymmetrica L.G. Clark (*Neurolepis aristata* (Munro) Hitchc.)

Ecuador, Bolivia. Densely tufted, shrubby, forming clumps, see *Plantarum vascularium genera secundum ordines ...* 1: 426. 1843, *Transactions of the Linnean Society of London* 26(1): 61. 1868 and *Die Natürlichen Pflanzenfamilien* 1: 21. 1906, *Contributions from the United States National Herbarium* 24(8): 313. 1927, *Novon* 6(4): 336, f. 1 A-C. 1996.

N. diversiglumis Soderstr.

Amazonas, Venezuela, Brazil. See *Memoirs of the New York Botanical Garden* 18(2): 16-18, 20, f. 2-3. 1969.

N. elata (Kunth) Pilg. (*Chusquea elata* (Kunth) Nees; *Neurolepis nobilis* (Munro) Pilg.; *Planotia elata* (Kunth) Munro; *Planotia nobilis* Munro; *Platonia elata* Kunth)

Colombia, Ecuador. See *Révision des Graminées* 1: 327, t. 76. 1830, *Transactions of the Linnean Society of London* 26(1): 71, 72. 1868 and *Die Natürlichen Pflanzenfamilien* 1: 21. 1906.

in Ecuador: bretaña

N. fimbriligulata L.G. Clark (*Chusquea aristata* Munro; *Neurolepis aristata* (Munro) Hitchc.)

Ecuador, Peru. Shrubby, see *Plantarum vascularium genera secundum ordines ...* 1: 426. 1843, *Transactions of the Linnean Society of London* 26(1): 61. 1868 and *Die Natürlichen Pflanzenfamilien* 1: 21. 1906, *Contributions from the United States National Herbarium* 24(8): 313. 1927, *Novon* 6(4): 336, 338, f. 1 A-C, 2. 1996.

N. fimbriligulata L.G. Clark subsp. ***fimbriligulata***

Ecuador. See *Novon* 6(4): 338, f. 2. 1996.

N. fimbriligulata L.G. Clark subsp. ***peruviana*** L.G. Clark
Peru, Amazonas. See *Novon* 6(4): 338, 342, f. 2, 2 G. 1996.

N. glomerata Swallen (*Neurolepis densiflora* Swallen; *Neurolepis nigra* Swallen)

Venezuela. Inflorescences erect, see *Memoirs of the New York Botanical Garden* 9(3): 399-400. 1957.

N. laegaardii L.G. Clark (*Neurolepis aristata* (Munro) Hitchc.) (named for the Danish botanist Simon Laegaard, Department of Systematic Botany, Institute of Biological Sciences, Aarhus University, Denmark, botanical collector in Ecuador, worked with Lynn G. Clark, M.J. Stern, S.A. Renvoize, Kjeld A. Holmen. See *Syst. Bot.* 15: 632. 1990; *Brittonia* 48: 256. 1996; *Aliso* 15: 10, 24. 1996 [24 June 1997]; *Novon* 6: 423. 1996)

Ecuador, northern Andes. Erect, see *Plantarum vascularium genera secundum ordines ...* 1: 426. 1843, *Transactions of the Linnean Society of London* 26(1): 61. 1868 and *Die*

Natürlichen Pflanzenfamilien 1: 21. 1906, *Contributions from the United States National Herbarium* 24(8): 313. 1927, *Novon* 6(4): 336, 338, 342, f. 1 A-C, 2, 3 A-D. 1996.

N. mollis Swallen

Colombia, Venezuela. Caespitose, clumped, rhizomes pachymorph, see *Journal of the Washington Academy of Sciences* 21(1): 14. 1931.

N. nana L.G. Clark

Ecuador. See *Plantarum vascularium genera secundum ordines ...* 1: 426. 1843, *Transactions of the Linnean Society of London* 26(1): 61. 1868 and *Die Natürlichen Pflanzenfamilien* 1: 21. 1906, *Contributions from the United States National Herbarium* 24(8): 313. 1927, *Novon* 6(4): 336, 338, 342, 344, f. 1 A-C, 2, 3 A-D, 4. 1996.

N. nobilis (Munro) Pilg. (*Neurolepis elata* (Kunth) Pilg.; *Planotia nobilis* Munro; *Platonia elata* Kunth)

Colombia, Ecuador. Páramos, see *Révision des Graminées* 1: 327, t. 76. 1830, *Transactions of the Linnean Society of London* 26(1): 72. 1868 and *Die Natürlichen Pflanzenfamilien* 1: 21. 1906.

in Colombia: sorbitana

N. petiolata Davidse and L.G. Clark

Colombia. Clump forming, found along riverbanks, see *Novon* 6(2): 153, f. 4. 1996.

N. pittieri McClure

Costa Rica, Brazil, Venezuela, Panama. Caespitose, erect leaves, growing in clumps, see *Plantarum vascularium genera secundum ordines ...* 1: 426. 1843 and *Die Natürlichen Pflanzenfamilien* 1: 21. 1906, *Journal of the Washington Academy of Sciences* 32(6): 181, f. 8. 1942.

in Venezuela: cogollo

N. rigida L.G. Clark (*Chusquea aristata* Munro; *Neurolepis aristata* (Munro) Hitchc.)

Ecuador. Shrubby, see *Transactions of the Linnean Society of London* 26(1): 61. 1868 and *Contributions from the United States National Herbarium* 24(8): 313. 1927, *Novon* 6(4): 347, f. 1 D-H. 1996.

in Ecuador: nagrán

N. silverstonei Davidse and L.G. Clark (named for Philip [Felipe] Arthur Silverstone-Sopkin, b. 1939, botanical collector in Colombia, collector of tropical Andean mosses and orchids, worked with Jorge Eduardo Ramos-Pérez, A.H. Gentry, A. Henao, A. Duque, H. Bayona, R.T. González, L.H. Ramos, N. Paz, Roger Eriksson, William Gerald D'Arcy, D. Garcés, I. Cabrera. See P.A. Silverstone-Sopkin & J.E. Ramos-Pérez, "Floristic exploration and phytogeography of the Cerro del Torrá, Chocó, Colombia." pages 169-186. in S.P. Churchill, H. Balslev, E. Forero and J.L. Luteyn (editors), *Biodiversity and Conservation of Neotropical Montane Forests*. New York Botanical Garden, Bronx. 1995; *Phytologia* 71: 104. 1991; *Caldasia* 17: 3. 1992;

Novon 6: 150. 1996; *Orquideologia* 20: 225. 1996; *Monogr. Syst. Bot. Missouri Bot. Gard.* 64: 108. 1997; *Novon* 7: 194. 1997; *Icon. Nevroctola Raf. = *Uniola* L.

Greek *neuron* "nerve."

Chloridoideae, Cynodonteae, Uniolinae, or Chloridoideae, Eragrostideae, Uniolinae, see *Species Plantarum* 1: 71. 1753, C.S. Rafinesque, *Neogenyton, or Indication of Sixty-Six New Genera of Plants of North America*. 4. 1825, *Seringe Bull. Bot.* 1: 221. 1830, *Index Kewensis* 2: 311. 1894 and *Ill. Fl. U.S. Canada* edition 2, 1: 248. 1913, E.D. Merrill, *Index rafinesquianus*. 76. 1949, *Contributions from the United States National Herbarium* 41: 175, 232-233. 2001.

Nevroloma Raf. = *Glyceria* R. Br., *Nevroloma* Spreng. (Brassicaceae)

From the Greek *neuron* "nerve" and *loma* "border, margin, fringe, edge."

Pooideae, Meliceae, type *Nevroloma canadensis* (Michx.) Raf., see *Flora Boreali-Americana* 1: 71. 1803, *Prodromus Florae Novae Hollandiae* 1: 179. 1810, *Systema Vegetabilium, editio decima sexta* 2: 888. 1825, C.S. Rafinesque, *Journal de Physique, de Chimie, d'Histoire Naturelle et des*

Arts 89: 106. 1819 and E.D. Merrill, *Index rafinesquianus*. 76. 1949, *Contributions from the United States National Herbarium* 48: 371-379, 467. 2003.

Nevskiella Krecz. & Vved. = *Bromus* L.

Named for Sergei Arsenjevic Nevski, 1908-1938, author of "Bromeae tribus Graminearum naturalis." *Trudy Sredne-Aziatsk. Gosud. Univ. Ser. 8b, Bot. 17*: 14-15. 1934, "Beiträge zur Flora des Kuhitang-Tau und seiner Vorgebirge. Resumé." *Trudy Bot. Inst. Akad. Nauk SSSR, Ser. 1, Fl. Sist. Vyss. Rast. 4*: 199-346. 1937 and "Beiträge zur Kenntnis der Wildwachsenden Gersten in Zusammenhang mit der Frage über den Ursprung von *Hordeum vulgare* L. und *Hordeum distichum* L. (Versuch einer Monographie der Gattung *Hordeum* L.)" *Trudy Bot. Inst. Akad. Nauk SSSR, Ser. 1, Fl. Sist. Vyss. Rast. 5*: 64-255. 1941.

Pooideae, Bromeae, type *Nevskiella gracillima* (Bunge) Krecz. & Vved., see *Species Plantarum* 1: 76. 1753, *Mémoires Présentés à l'Académie Impériale des Sciences de Saint Pétersbourg par Divers Savans et lus dans ses Assemblées* 8: 527. 1851 and *U.S.D.A. Div. Agrostol. Bull. 23*: 1-66. 1900, *Trudy Sredne-Aziatsk. Gosud. Univ. Ser. 8b, Bot. 17*: 14-15, 22. 1934, *Brittonia* 7: 421. 1952, *Bot. Jahrb. Syst.* 102: 447. 1981, *Taxon* 41: 559. 1992, *Taxon* 44: 611-612. 1995, *Contributions from the United States National Herbarium* 48: 154-191, 467. 2003.

Neyraudia Hook.f. = *Neraudia* Gaudich. (Urticaceae)

The anagram of *Reynaudia* Kunth, named for A.A. Reynaud, b. 1804, botanical collector in Burma, Cape see 1829 Collection Blossenville/Reynaud, *Expédition de la Gabarre La Chevrette*, Indian Ocean, 1827-1828.

Some 2-6 species, Old World tropics. Chloridoideae, Cynodonteae, perennial, erect, unarmed, branched, woody, stout and reedlike, persistent, loosely or densely tufted, shortly rhizomatous, rhizomes pachymorph, culms filled with pith, culm internodes solid, ligule a line of hairs, auricles absent, leaves linear with a filiform apex, plants bisexual, inflorescence a large open nodding and plumose panicle, spikelets 4- to 8-flowered and gaping at maturity, the florets all bisexual or the lowest sterile, 2 glumes unequal, second glume awnless, lemmas cleft with a recurved awn, palea glabrous, 2 lodicules acute to acuminate, 3 stamens, ovary glabrous, 2 stigmas, found in woodland, along streams, on riverbanks, clearings, very similar to and confused with *Arundo* L. and *Phragmites* Adans., type *Neyraudia madagascariensis* (Kunth) Hook.f., see *Species Graminum* 1: t. 87. 1827, *Révision des Graminées* 2: 273, t. 48. 1830, *Journal of the Linnean Society, Botany* 19: 112. 1881, *The Flora of British India* 7: 305. 1896 and *American Midland Naturalist* 3: 332.

1914, *Fl. Trop. Afr.* 9: 22. 1917, *Repertorium Specierum Novarum Regni Vegetabilis, Beihefte* 40(1): 309. 1938, *Bulletin de la Société Botanique de France* 103: 272. 1956, H.J. Conert, "Beiträge zur Monographie der Gattungen *Cleistogenes* und *Neyraudia*." *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 78(2): 208-245. 1959, *Acta Bot. Sin.* 9: 67. 1960, *Bulletin Torrey Botanical Club* 88: 148. 1961, *Kew Bulletin* 21: 113-117. 1967, *Taxon* 17: 168-169. 1968, *Kew Bulletin* 37: 133-162. 1982, *Blumea* 37(1): 227-237. 1992, *Journal of Biogeography* 27(5): 1049-1064. Sep 2000, *Contributions from the United States National Herbarium* 41: 176. 2001, *Restoration Ecology* 13(1): 49-60. Mar 2005, *Botanical Journal of the Linnean Society* vol. 148, issue 1: 57-72. May 2005.

Species

N. arundinacea (L.) Henr. (*Aristida arundinacea* L.; *Arundo madagascariensis* Kunth; *Neyraudia madagascariensis* (Kunth) Hook.f.; *Triraphis madagascariensis* (Kunth) Hook.f. ex Prain)

Tropical Africa, Asia tropical. Forming large clumps, low fodder value, only young shoots eaten by animals, see *Mantissa Plantarum* (altera) 2: 186. 1771, *Révision des Graminées* 2: 273, t. 48. 1830, *Plantae Junghuhnianae* 3: 343. 1854 and *Bengal Plants* 1219. 1903, *Mededeelingen van's Rijks-Herbarium* 58: 8. 1929, *Blumea* 3: 439. 1940, *Journal of Cytology and Genetics* 21: 152-154. 1986.

in India: bansi, bichhroo, naltura

N. curvipes Ohwi

Asia, Borneo. Perennial, reedlike, feathery panicles, see *Bulletin of the Tokyo Science Museum* 18: 9. 1947.

N. madagascariensis (Kunth) Hook.f. (*Arundo boivinii* Steud.; *Arundo henslowiana* Nees; *Arundo madagascariensis* Kunth; *Arundo thouarii* (P. Beauv.) T. Durand & Schinz (also *thouarsii*); *Donax thouarii* P. Beauv. (also *thouarsii*); *Neyraudia madagascariensis* var. *genuina* A. Camus; *Neyraudia thouarsii* Pilger ex Peter; *Triraphis madagascariensis* (Kunth) Hook.f. ex Prain) (after the British clergyman Rev. John Stevens Henslow, 1796-1861 (Hitcham, Suffolk), botanist, mineralogist, plant geographer, 1818 fellow of the Linnean Society, 1819 member of the Geological Society of London, founder of the Cambridge Philosophical Society, 1822 professor of mineralogy at Cambridge, 1824 ordained, 1825-1861 professor of botany at Cambridge, 1832/1833 Vicar of Cholsey (Berkshire), 1837 Rector of Hitcham (Suffolk), among his publications are *Suggestions towards an Enquiry into the Present Condition of the Labouring Population of Suffolk*. Hadleigh 1844, *An Account of the Roman Antiquities Found at Rougham, near Bury St. Edmund's* on the fifteenth of September, 1843. Bury [1843], *Roman-British remains. On the Materials of Two Sepulchral Vessels Found at Warden, Co. Beds.* Cam-

bridge 1846, *The Principles of Descriptive and Physiological Botany*. London 1835, *A Dictionary of English and Latin Terms*, used in botanical descriptions. [Issued, in parts, with Maund's *Botanic Garden*, vol. 10-13], *A Dictionary of Botanical Terms*. London s.d. and *A Catalogue of British Plants*. Cambridge 1829, he was co-author with Edmund Skepper (1825-1867) of *Flora of Suffolk*. London and Bury St. Edmund's [1860], 1837-1846 co-editor with Benjamin Maund (1790-1863) of *The Botanist*. London, correspondent of Hooker, Bentham, Darwin and Berkeley, among his students were Charles Darwin and Richard Thomas Lowe (1802-1874), his daughter Frances Harriet (1825-1874) was the first wife of J.D. Hooker. See L. Jenyns, *Memoir of the Rev. John Stevens Henslow*. London 1862; R.T. Gunther, *Early Science in Cambridge*. Oxford 1937; Elisabeth Leedham-Green, *A Concise History of the University of Cambridge*. Cambridge, University Press 1996; J.H. Barnhart, *Biographical notes upon botanists*. 2: 161. 1965; N. Barlow, editor, *Darwin and Henslow, the Growth of an Idea: Letters 1831-1860*. London 1967; R. Zander, F. Encke, G. Buchheim & S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Asia, India. See *Révision des Graminées* 2: 273. 1830, *The Botany of Captain Beechey's Voyage* 248. 1838, *Synopsis Plantarum Glumacearum* 1: 423. 1854, *Plantae Jung-huhnianae* 3: 343. 1854, *Conspectus Florae Africae* 5: 875. 1894, *The Flora of British India* 7: 305. 1896 and *Bengal Plants* 1219. 1903, *Flore Générale de l'Indo-Chine* 7: 549. 1923, *Repertorium Specierum Novarum Regni Vegetabilis, Beihefte* 40(1): 309. 1938.

N. mezii (Janowski) Veldkamp (*Neyraudia acarifera* (Trin.) Conert; *Panicum acariferum* Trin.; *Thysanolaena mezii* Janowski)

Asia, China. See *Species Graminum* 1: t. 87. 1827 and *Repertorium Specierum Novarum Regni Vegetabilis* 17(477-480): 86. 1921, *Botanische Jahrbücher für Systematik,*

Pflanzengeschichte und Pflanzengeographie 78(2): 240-244. 1959, *Blumea* 37(1): 231. 1992.

N. montana Keng

Asia. See *Sinensia* 6(2): 151, 156. 1935.

N. reynaudiana (Kunth) Keng ex Hitchc. (*Arundo reynaudiana* Kunth; *Arundo zollingeri* Büse; *Neyraudia arundinacea* var. *zollingeri* (Büse) Henrard; *Neyraudia madagascariensis* var. *zollingeri* (Büse) Hook.f.; *Phragmites zollingeri* Steud.; *Triodia grandiflora* Vasey)

East Himalayas. Perennial, tall, leafy, erect, often densely tufted, stem filled with a soft pith, leaf sheaths smooth, leaf blade linear and smooth, ligule with white hairs, large terminal panicle finely branched and silvery, 2 empty glumes and an empty lemma at the base of the spikelet, lower and upper glumes narrow, lemmas awned and silvery hairy with long ciliate margins, paleas narrowly lanceolate, common on roadsides, open places, grasslands, see *Révision des Graminées* 2: 275, t. 49. 1830, *Plantae Jung-huhnianae* 3: 343. 1854, *Synopsis Plantarum Glumacearum* 1(3): 196. 1855 [1854], *Contributions from the United States National Herbarium* 1(2): 59. 1890, *Revisio Generum Plantarum* 2: 789. 1891, *Contributions from the United States National Herbarium* 2(3): 538. 1894, *The Flora of British India* 7: 305. 1896, *Grasses of North America for Farmers and Students* 2: 471. 1896 and *New Mexico Agricultural Experiment Station: Bulletin* 81: 129. 1912, *Mededeelingen van's Rijks-Herbarium* 58: 8. 1929, *American Journal of Botany* 21(3): 131. 1934, *Blumea* 3: 439. 1940, *American Journal of Botany* 48(7): 572. 1961, *Brittonia* 26(1): 60. 1974, *Phytologia* 27(6): 442-443. 1974.

in English: Burma reed

in Thailand: fong, lao, phong

Nicoraella Torres = *Anatherostipa* (Hack. ex Kuntze) Peñailillo

Pooideae, Stipeae, Stipinae, type *Nicoraella bomanii* (Hauman) Torres, see *Species Plantarum* 1: 78. 1753, Ernst Gottlieb von Steudel (1783-1856), *Synopsis plantarum glumacearum*. 1: 121. Stuttgartiae 1854, *Revisio Generum Plantarum* 3(2): 372. 1898 and *Anales del Museo Nacional de Montevideo* 4: III, 36. 1901, *Bulletin of Miscellaneous Information Kew* 1923(8): 301-303. 1923, *Contr. U.S. Natl. Herb.* 24(7): 216. 1925, *Blumea, Supplement* 3: 63. 1946, *Revista Argentina de Agronomía* 17(3): 201. 1950, *Gayana, Botánica* 13: 1-137. 1965, *Boletín de la Sociedad Argentina de Botánica* 12: 268-283. 1968, *Boletín de la Sociedad Argentina de Botánica* 11(4): 239. 1969, *Kew Bulletin* 40(4): 727-729. 1984[1985], Patricio Peñailillo B., "Anatherostipa, un nuevo género de Poaceae (Stipeae) / Anatherostipa, a new genus of Poaceae (Stipeae)." *Gayana, Botánica* 53(2): 277-284. 1996, A.M. Torres, "Nicoraella (Gramineae) un nuevo genero para America del Sur."

Comisión de Investigaciones Científicas 13: 69-77. 1997, *Gayana, Botánica* 54(2): 163-182. 1997, *Contributions from the United States National Herbarium* 48: 109-110, 467. 2003.

Nipponobambusa Muroi = *Sasa* Makino and Shibata

From Japan and *Bambusa*.

Bambusoideae, Bambuseae, Arundinariinae, type *Nipponobambusa sawadai* (Makino) Muroi (also *sawadae*), see *Bulletin de l'Herbier Boissier* 7(9): 716. 1899 and *Botanical Magazine* (Tokyo) 15(168): 18, 25, 27. 1901, *Journal of Japanese Botany* 3(1): 4. 1926, *Journal of Japanese Botany* 5(5): 21. 1928, *Journal of Japanese Botany* 6: 15. 1929, *Journal of the Faculty of Science, Hokkaido University, series 5, Botany* 26: 180. 1931, *Journal of Japanese Botany* 10(9): 576-577. 1934, *Acta Phytotax. & Geobot. Kyoto* 9: 159, 227. 1940, M. Tatewaki, "Hokkaido sasarui no bunrui [Classification of genus *Sasa* in Hokkaido]" *Hokkaido Ringyô-kaihô* 38(1): 4-9, 38(2): 1-9, 38(3): 1-8, 38(4): 1-10, 38(6): 1-11, 38(8): 1-13. 1940, H. Muroi, "*Nipponobambusa* Muroi, a new genus of the Bambusaceae." in *Hyogo-ken Chuto-kyoiku Hakubutsugaku Zasshi (Hyogo Prefecture Journal, Second edition, Natural History)* 6: 88-90. 1940, *Amatores Herbarii* 10: 212. 1942, *Botanical Magazine* (Tokyo) 56: 508. 1942, *Bibliography of Cultivated Trees and Shrubs* hardy in the cooler temperate of the northern hemisphere ... 635. Jamaica Plains, Massachusetts [The Arnold Arboretum of Harvard University] 1949, *Japanese Bamboos (Take to Sasa)* (edition 2) 331. 1956, *Taxon* 6(7): 206, 208. 1957, *Taxon* 27: 424. 1978, *J. Jap. Bot.* 64(2): 42. 1989, *Taxon* 45: 543-544. 1996, *Taxon* 48: 359-360, 377. 1999, *Taxon* 49(2): 235-238, 545-546. 2000, *Contributions from the United States National Herbarium* 39: 81, 111-112. 2000.

Nipponocalamus Nakai = *Arundinaria* Michaux, *Pleioblastus* Nakai

From Japan and Greek *kalamos* "reed."

Bambusoideae, Bambuseae, Arundinariinae, *Pleioblastus* subg. *Nipponocalamus* (Nakai) Murata, type *Nipponocalamus simonii* (Carrière) Nakai, see *Flora Boreali-Americana* 1: 73-74. 1803 and *Journal of the Arnold Arboretum* 6(3): 145. 1925, *Journal of Japanese Botany* 18(7): 350, 355, 364. 1942, *Smithsonian Contributions to Botany* 9: 1-148. 1973, *Acta Phytotaxonomica et Geobotanica* 30(4-6): 145. 1979, *Kew Bulletin* 44(2): 349-367. 1989, *Castanea* 62: 8-21. 1997, *Contributions from the United States National Herbarium* 39: 18-24, 81, 106, 111-112. 2000.

Nivieria Seringe = *Triticum* L.

Probably from *niveus* "snowy, snow," referring to the habit.

Pooideae, Triticeae, Triticinae, type *Nivieria monococcum* (L.) Ser., see *Species Plantarum* 1: 85-87. 1753, *Annales des Sciences Physiques et Naturelles, d'Agriculture et de l'Industrie, Publiées par la Société Royale d'Agriculture, etc., de Lyon*. 5: 103-196, pl. 2-10. 1842 [*Descriptions et figures des céréales européennes*] and *Taxon* 35: 144-149. 1986, *Wageningen Agricultural University Papers* 94-7: 1-512. 1994, *Contributions from the United States National Herbarium* 48: 468, 676-684. 2003.

Normanboria Butzin = *Acrachne* Wight & Arn. ex Chiov., *Arthrochloa* J.W. Lorch, *Arthrochloa* R. Br.

For the Irish (b. at Tramore, County. Waterford) botanist Norman Loftus Bor, 1893-1972 (London), agrostologist, plant collector, 1921-1948 Indian Forest Service, Forest Botanist of the Forest Research Institute (Dehra Dun), 1945 President of the Indian Botanical Society, 1948-1959 Assistant Director Kew, 1931 fellow of the Linnean Society, author of *Manual of Indian Forest Botany*. Oxford University Press, London 1953 and *The Grasses of Burma, Ceylon, India and Pakistan*. 1960, with Mukat Behari Raizada wrote *Some Beautiful Indian Climbers and Shrubs*. Bombay Natural History Society - Oxford University Press, Bombay 1982, contributed to *Indian Forester*. See J.H. Barnhart, *Biographical notes upon botanists*. 1: 220. 1965; C.E. Hubbard, "Norman Loftus Bor (1893-1972):" in *Kew Bulletin*. 30(1): 1-4. 1975; Carolyn M.K. Pope, "A bibliography of the work of Dr. N.L. Bor." in *Kew Bulletin*. 30(1): 4-10. 1975; Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 86. 1994.

Chloridoideae, Cynodonteae, or Chloridoideae, Eragrostideae, Eleusininae, see *Annuario del Reale Istituto Botanico di Roma* 8(3): 361-362. 1908, *Blumea, Supplement* 3: 44. 1946, *Journal of the Indian Botanical Society* 39(3): 490, f. 1-5. 1960, *Taxon* 27(2-3): 301. 1978, *Kew Bulletin* 37(1): 158-159. 1982, *Journal of Cytology and Genetics* 25: 322-323. 1990, *Edinburgh J. Bot.* 57(2): 282. 2000.

Nothoholcus Nash = *Holcus* L.

From the Greek *nothos* "false, bastard" and the genus *Holcus* L.

Pooideae, Poaeae, Holcinae, type *Nothoholcus lanatus* (L.) Nash, see *Species Plantarum* 2: 1047-1048. 1753 and *An Illustrated Flora of the Northern United States* 1: 109, 214. 1913, *Contributions from the United States National Herbarium* 48: 387-388, 468. 2003.

Notholcus Nash ex Hitchc. = *Notholcus*
Hitchc.

From the Greek *nothos* “false, bastard” and the genus *Holcus* L., orth. var. *Nothoholcus* Nash.

Pooideae, Poaeae, Holcinae, see *Species Plantarum* 2: 1047-1048. 1753, *Systema Naturae, Editio Decima* 2: 1305. 1759 and *A Flora of California* 1: 126. 1912, *An Illustrated Flora of the Northern United States* 1: 109, 214. 1913, *American Journal of Botany* 2: 304. 1915, *Contributions from the United States National Herbarium* 48: 387-388, 468. 2003.

Notochloë Domin (also spelled Notochloe)

From the Greek *notos* “south” and *chloe, chloa* “grass,” a southern grass.

One species, southeastern Australia, Blue Mountains district. Arundinoideae, or Danthonioideae, Danthonieae, perennial, caespitose, erect, herbaceous, unbranched, auricles absent, ciliate ligule, leaves mainly basal, blade flat or inrolled, plants bisexual, inflorescences shortly paniculate, a short lax panicle with 5-10 green spikelets, 8-14 bisexual florets, spikelets pedicellate, 2 glumes very unequal glabrous and awnless, lemmas toothed or 3-lobed, palea 2-toothed and 2-keeled, 2 lodicules free and fleshy, 3 stamens, ovary glabrous, 2 stigmas, in moist shady areas, sandstones, swamps, similar to *Triodia* and *Plinthanthesis*, type *Notochloe microdon* (Benth.) Domin, see Karel Domin, *Repertorium Specierum Novarum Regni Vegetabilis* 10: 117. 1911, *Flora of Australia* vol. 44 B, Poaceae 3: 34. 2005.

Species

N. microdon (Benth.) Domin (*Triraphis microdon* Benth.)

New South Wales. Perennial, tufted, rhizomatous, leaf sheath enclosing the culm, ligule a ciliate rim, blade flat and ribbed, culm nodes exposed, glumes very unequal and 2-toothed, lemma tip tridentate, palea with scabrous and wingless keels, upland swamps, rare and threatened species, see *Flora Australiensis: A Description ...* 7: 605. 1878 and *Repertorium Specierum Novarum Regni Vegetabilis* 10: 117. 1911, J.D. Briggs & J.H. Leigh, *Rare or Threatened Australian Plants*. Melbourne, Australia: CSIRO Publications. 1996.

Notodanthonia Zotov = *Rytidosperma* Steud.

From the Greek *notos* “south” and the genus *Danthonia* DC.

About 5 species, northern and eastern Australia, New Zealand. Danthonioideae, Danthonieae, perennial, herbaceous, tufted, flowering culms leafless, simple, leaves basal, auricles absent, ligule fringed, leaf blades linear to linear-lanceolate, plants bisexual, open inflorescence paniculate, spikelets solitary and pedicellate, 2 glumes more or less

equal, palea present, 2 free and ciliate lodicules, 3 stamens, 2 stigmas, shade or light shade, wet habitats, very similar to *Austrodanthonia*, sometimes referred to *Danthonia s.l.*, type *Notodanthonia unarede* (Raoul) Zotov, see *Journal of Botany, British and Foreign* 2: 416. 1843, *Synopsis Plantarum Glumacearum* 1: 425. 1854 and Victor Dmitrievich Zotov (1908-1977), *New Zealand Journal of Botany*. 1: 104, 107, 108, 110-114, 116-119, 122, 123. 1963, S.T. Blake, “*Plinthanthesis* and *Danthonia* and a review of the Australian species of *Leptochloa* (Gramineae).” *Contributions from the Queensland Herbarium* 14: 3. 1972, H.P. Linder & G.A. Verboom, “Generic limits in the *Rytidosperma* (Danthonieae, Poaceae) complex.” *Telopea* 6(4): 597-627. 1996, C.M. Baeza P., “Los géneros *Danthonia* DC. y *Rytidosperma* Steud. (Poaceae) en América — Una revisión.” *Sendtnera* 3: 11-93. 1996, H.P. Linder, “Nomenclatural corrections in the *Rytidosperma* complex (Danthonieae, Poaceae).” *Telopea* 7(3): 269-274. 1997, *Flora of Australia* vol. 43, Poaceae 1: 164, 171, 214, 222, 246, 270, 309. 2002, *Ecological Management and Restoration* vol. 4, iss. 2: 133-139. Species

N. gracilis (Hook.f.) Zotov (*Danthonia gracilis* Hook.f.; *Danthonia semiannularis* var. *gracilis* (Hook.f.) Hook.f.; *Rytidosperma gracile* (Hook.f.) Connor & Edgar; *Thonandia gracilis* (Hook.f.) H.P. Linder)

New Zealand, New South Wales, Tasmania. Loosely caespitose, innovation buds extravaginal, leaf sheaths long-hairy, very close to *Notodanthonia semiannularis* (Labill.) Zotov, see *Prodromus Florae Novae Hollandiae* 177. 1810, *Flora Novae-Zelandiae* 1: 303, t. 69 B. 1853, *Handbook of the New Zealand Flora* 333. 1864 and *New Zealand Journal of Botany* 1: 78-136. 1963, *New Zealand Journal of Botany* 17(3): 330. 1979, *Telopea* 6(4): 612. 1996.

N. longifolia (R. Br.) Veldkamp (*Avena longifolia* (R. Br.) Spreng.; *Danthonia longifolia* R. Br.; *Danthonia penicillata* var. *longifolia* (R. Br.) F. Muell. ex Maiden & Betche; *Rytidosperma longifolium* (R. Br.) Connor & Edgar; *Thonandia longifolia* (R. Br.) H.P. Linder)

Australia, from Queensland to South Australia. Caespitose, innovation buds intravaginal, leaf sheaths glabrous, inflorescence paniculate, very close to *Notodanthonia semiannularis* (Labill.) Zotov, see *Taxon* 29: 296. 1980.

N. semiannularis (Labill.) Zotov (*Arundo semiannularis* Labill.; *Danthonia penicillata* var. *semiannularis* (Labill.) Maiden & Betche; *Danthonia penicillata* var. *semiannularis* (Labill.) Rodway; *Danthonia semiannularis* (Labill.) R. Br.; *Rytidosperma semiannulare* (Labill.) Connor & Edgar)

New South Wales, South Australia, Tasmania, Victoria. Caespitose, innovation buds intravaginal, leaves basal, see *Novae Hollandiae Plantarum Specimen* 1: 26, t. 33. 1804,

Prodromus Florae Novae Hollandiae 177. 1810 and *Tasmanian Fl.* 267. 1903, *A Census of New South Wales Plants* 22. 1916, *New Zealand Journal of Botany* 1: 116. 1963, *New Zealand J. Bot.* 17: 332. 1979.

in English: Tasmanian wallaby grass

Notonema Raf. = *Agrostis* L.

Greek *notos* “south, back” and *nema* “thread.”

Pooideae, Poaeae, Agrostidinae, type *Agrostis arachnoides* Elliott (nom. illeg. hom. for *Agrostis elliottiana* Schult.), see *Species Plantarum* 1: 61-63. 1753, *A Sketch of the Botany of South-Carolina and Georgia* 1(2): 134. 1816, *Mant.* 2: 202. 1824, C.S. Rafinesque, *Neogenyton, or Indication of Sixty-Six New Genera of Plants of North America*. 4. 1825, *Bulletin Botanique [Genève]* 1: 220. 1830 [also *Seringe Bull. Bot.* 1: 220. 1830], *Index Kewensis* 2: 319. 1894 and E.D. Merrill, *Index rafinesquianus*. 76. 1949, *Symbolae Botanicae Upsaliensis* 17(1): 1-112. 1960, *Fl. Fenn.* 5: 29. 1971, *Gayana, Botánica* 47: 3-7. 1990, *Parodiana* 7(1-2): 179-255. 1992, *Taxon* 41: 556. 1992, *Parodiana* 8(2): 129-151. 1993, *Taxon* 44: 611-612. 1995, *Gayana, Botánica* 54(2): 91-156. 1997, *Contributions from the United States National Herbarium* 48: 42-89, 468. 2003.

Nowodworskya Presl = *Polypogon* Desf.

After Johann Nowodworsky, d. 1811, professor of botany.

Pooideae, Poaeae, Agrostidinae, *Polypogon* sect. *Nowodworskya* (J. Presl) Tzvelev, type *Nowodworskya agrostoides* J. Presl, see *Flora Aegyptiaco-Arabica* 17. 1775, *Prospectus de l'Histoire des Plantes de Dauphiné* 16. 1779, *Flora Atlantica* 1: 66-67. 1798 [1800], *Reliquiae Haenkeanae* 1: 351, t. 80. 1830, *Synopsis Plantarum Glumacearum* 1: 184. 1854, *Anales de la Universidad de Chile* 43: 562. 1873, Friedrich [Federico] Richard Adalbert Johow (1859-1933), *Estudios sobre la flora de las Islas de Juan Fernandez ...* 136. Johows und mit Einfügung seiner hinterlassenen Schriften herausgegeben und ergänzt von C. Skottsberg.” *Göteborgs Kungl. Vetensk.-Vitterh.-Samh. Handl.*, ser. 5, B, 5(6): 1-88. 1937, *Trudy Bot. Inst. Akad. Nauk S.S.S.R., Ser. 1, Fl. Sist. Vyssh. Rast.* 3: 143. and 4: 339. 1937, *Symbolae Botanicae Upsaliensis* 17(1): 1-112. 1960, C. Muñoz, “Recuerdos del Profesor Federico Adalberto Johow 1859-1933.” *Mus. Nac. Hist. Nat., Ser. Educ.* no. 10. 1974, *Contributions from the United States National Herbarium* 48: 468, 583-588. 2003.

O

Ochlandra Thwaites = *Beesha* Munro, *Beesha* Kunth, *Irulia* Bedd.

From the Greek *ochlos* “crowd, mass” and *aner, andros* “man, stamen, male.”

About 7-9/12 species, southern and southwestern India, Kerala, Tamil Nadu, Karnataka; Sri Lanka; Madagascar. Bambusoideae, Bambusodae, Bambuseae, or Bambusoideae, Bambuseae, Melocanninae, perennial, woody, sympodial, erect, shrubby, caespitose, culms more or less closely spaced, unarmed, reedlike, persistent, gregarious, small, thin-walled, flowering culms leafy, rhizomes pachymorph, ligule a short unfringed membrane, leaf blades erect or reflexed, plants bisexual, spikelets narrowly conical and 1-flowered, bracts subtending primary pseudo-spikelets, 2-5 or few to several glumes subequal, transitional glumes, palea rounded, 1-15 free and membranous lodicules, 15-120 stamens, long ovary appendage, 3-8 stigmas, fruit with fleshy pericarp, used for basketry and mat-making, leaves used for thatching, usually forming dense and impenetrable thickets, wet lowlands, dry forests, undergrowth, rainforest, in forest, hillsides, lower montane areas, along streams and riverbanks, evergreen and semievergreen forests, type *Ochlandra stridula* Moon ex Thwaites, see *Journal de Physique, de Chimie, d'Histoire Naturelle et des Arts* 95: 151. 1822, George Henry Kendrick Thwaites (1812-1882) and Joseph Dalton Hooker (1817-1911) [Collaborator: William Ferguson, 1820-1887], *Enumeratio plantarum zeylaniae: An Enumeration of Ceylon Plants*. 5: 376. London [1858-] 1864, *Transactions of the Linnean Society of London* 26: 144. 1868, *The Flora Sylvatica for Southern India* 239, t. 234. Madras [1869-1874], *Annals of the Royal Botanic Garden, Calcutta*. 7: 125. 1896 and *Bull. de la Société Linnéenne de Lyon* 9: 185-188. 1945, *Taxon* 6(7): 201. 1957, *Agriculture Handbook* 193: i-iii, 1-74. 1961, *Smithson. Contr. Bot.* 72: 66. 1988, *Rheedea* 4(1): 25, f. 1. 1994, M. Kumar, “A re-investigation on the taxonomy of the genus *Ochlandra* Thw. (Poaceae-Bambusoideae.)” *Rheedea* 5(1): 63-89. 1995, *Flora Reipublicae Popularis Sinicae* 9(1): 1-761. 1996, *Contributions from the United States National Herbarium* 39: 35, 64, 81-82. 2000, *Botanical Journal of the Linnean Society* 138(1): 1-7. Jan 2002, *New Phytologist* 162(1): 25-44. Apr 2004, *Forest Pathology* 34(5): 329-333. Oct 2004.

Species

O. beddomei Gamble (for the British botanist Richard Henry Beddome, 1830-1911, colonial army officer, 1848 entered Indian Army, 1860-1882 head of the Forestry Department South India, interested in Indian ferns, 1882 F.L.S., botanical collector in India and Sri Lanka, dedicated the genera *Beddomea* Hook.f. (Meliaceae) and *Beddomiella* Dixon (a bryophyte). See Charles J. Édouard Morren, *Correspondance botanique*. Liège 1874 and 1884; I. Urban, *Geschichte des Königlichen Botanischen Museums zu Berlin-Dahlem (1815-1913). Nebst Aufzählung seiner Sammlungen*. 1916; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. 1: 70. 1917-1933; Isaac Henry Burkill, *Chapters on the History of Botany in India*. Delhi 1965; J.H. Barnhart, *Biographical notes upon botanists*. 1: 152. Boston 1965; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. 122. 1964; R. Desmond, *The European Discovery of the Indian Flora*. Oxford 1992; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 701. Stuttgart 1993; Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 60. London 1994)

India, Kerala. Erect, arching, shrubby, gregarious, reedlike, thin walled, nodes solitary, culm sheaths persistent, leaves oblong-lanceolate, short inflorescence, spicate panicle terminal, few spikelets in short bracteate verticils, glumes hirsute and long-mucronate, lemmas glabrous and mucronate, paleas membranous, 5 lodicules unequal, several stamens, ovary glabrous, 5-6 plumose stigmas, culms used for making baskets and mats, raw material for pulp, see *Annals of the Royal Botanic Garden, Calcutta*. 7: 124. 1896 and *Rheedea* 4(1): 25, f. 1. 1994, *Rheedea* 5(1): 66, f. 1. 1995.

O. capitata (Kunth) Camus (*Bambusa capitata* (Kunth) Willd. ex Ruprecht; *Beesha capitata* (Kunth) Munro; *Cathariostachys capitata* (Kunth) S. Dransf.; *Nastus capitatus* Kunth)

Madagascar. See *Révision des Graminées* 1: 325, t. 75. 1830, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 3(1): 626-627. 1835, *Transactions of the Linnean Society of London* 26(1): 145. 1868 and *Les Bambusées* 183. 1913, *Mémoires de l'Institut Scientifique de Madagascar*,

Série B, Biologie Végétale 6: 1-272. 1955, *Kew Bulletin* 53(2): 378, 391. 1998.

O. ebracteata Raizada and Chatterji

India, Kerala. Erect, shrubby, arborescent, reedlike, tufted, clumped, smooth, gregarious, leaves narrow to broadly oblong-lanceolate, clusters of crowded sessile spikelets, 2-3 glumes minute, 3-5 lemmas, paleas many-nerved, 3 lodicules variable, stamens monadelphous, ovary small and compressed, 7-9 twisted stigmas, used in paper industry and for making baskets, a powder from the dried seeds used as cattle feed, found along streams, see *Indian Forester* 89: 362. 1963, *Rheedea* 5(1): 68, f. 2. 1995.

in India: valleeta, valleta

O. perrieri A. Camus (*Valiha perrieri* (A. Camus) S. Dransf.)

Madagascar. See *Bulletin de la Société Botanique de France* 82: 310. 1935, W.C. Lin, "The species and distribution of bamboos in the Republic of Malagasy (Madagascar), East Africa." *Special Bulletin of Taiwan Forestry Research Institute no. 4*: 24, 34. 1967, *Kew Bulletin* 53(2): 388. 1998.

O. scriptoria (Dennst.) Fisch. (*Bambusa scriptoria* Dennst.; *Beesha rheedii* Kunth; *Beesha rheedii* Munro; *Bheesa rheedii* Kunth; *Melocanna rheedii* Steudel; *Ochlandra rheedii* (Kunth) Benth. and Hook.f. ex Gamble; *Ochlandra scriptoria* Fischer) (for the Dutch botanist Hendrik (Henricum, Henricus, Henric) Adriaan (Adrien) van Rheedee (Reede) tot Draakestein (Draakensteen, Drakestein, Drakenstein) (Rheedius a Drackenstein), 1637-1691, colonial administrator, with the Dutch East India Company, 1669-1676 Malabar, from 1684 India, among his works the famous *Hortus indicus malabaricus*. Amstelodami 1678[-1703]; see J.H. Barnhart, *Biographical notes upon botanists*. 3: 149. 1965; R. Pulteney, *Historical and Biographical Sketches of the Progress of Botany in England*. in India: ammei, ammei ottal, amnei, beesha, bheesa, chithu, hode, huda, kolanji, mai-eetta, nanyura, ottal, vaate, vanta nalagi

O. setigera Gamble (*Neomicrocalamus setigerus* (Gamble) J.R. Xue & T.P. Yi)

India, Tamil Nadu. Smooth, erect, straggling, small, reed-like, tufted, thick, naked below, much branched above, nodes swollen, internodes whitish below the nodes, culm sheaths persistent and papery, leaves oblong-lanceolate acuminate and rounded at the base into a petiole, leaf sheaths with short decurrent auricles fringed with long stiff bristles, leaves used as fodder, culms used for basket and mat making, see *Annals of the Royal Botanic Garden, Calcutta*. 7: 128, t. 115. 1896 [*The Bambuseae of British India*, in *Annals of the Royal Botanic Garden, Calcutta*, vol. 7. 1896], *The Flora of British India* 7: 420. 1896, *Bamb. Brit. Ind.* 128, t. 115. 1896 and *Flora Xizangica* 5: 50. 1987, *Rheedea* 4(1): 25, f. 2. 1994, *Rheedea* 5(1): 72, f. 4. 1995.

O. sivagiriana (Gamble) E.G. Camus (*Ochlandra rheedii* var. *sivagiriana* Gamble; *Ochlandra scriptoria* var. *sivagiriana* (Gamble) Fischer) (found in Sivagiri)

India, Tamil Nadu, Kerala. Straggling, reedlike, gregarious, shrubby, erect, leaves attenuate at the base into a short

petiole, 6 lodicules, 27-32 or 50-60 stamens, 5 plumose stigmas, culms used for fencing, similar to *Ochlandra scriptoria* (Dennst.) Fischer, see *Annals of the Royal Botanic Garden, Calcutta*. 7: 122. 1896 and *Les Bambusées* 181. 1913, *Flora of the Presidency of Madras* 10: 1863. London 1934, *Rheedea* 5(1): 74, f. 5. 1995

O. stridula Moon ex Thwaites (*Bambusa stridula* Moon; *Beesha stridula* Munro; *Beesha stridula* (Moon ex Thwaites) Munro; *Ochlandra stridula* var. *maculata* (Trimen) Gamble; *Teinostachyum maculatum* Trimen)

Sri Lanka. Arching, uniaespitose, soft, rhizomes pachymorph, densely clumped, inner and outer ligule hard, leaf sheath hard and thick, pseudospikelets, spikelets ovate, 3 transitional glumes mucronate and many-nerved, lodicules whorled, ovary glabrous, see *A Catalogue of the Indigenous and Exotic Plants Growing in Ceylon* 26. 1840, *Enumeratio Plantarum Zeylaniae* 5: 376. 1864, *Transactions of the Linnean Society of London* 26(1): 145. 1868, *Journal of Botany, British and Foreign* 23: 273. 1885, *Annals of the Royal Botanic Garden, Calcutta*. 7(1): 123, 124, pl. 109. 1896 and *Handb. Fl. Ceylon* 5: 318. 1900, *Grasses of Ceylon* 24. 1956, *Smithsonian Contributions to Botany* 72: 1-75. 1988, *Rheedea* 5(1): 76, 78, f. 6. 1995.

in Sri Lanka: bata

O. stridula Moon ex Thw. var. *maculata* (Trimen) Gamble (*Ochlandra maculata* (Trimen) Trimen; *Teinostachyum maculatum* Trimen)

Sri Lanka. See *Journal of Botany, British and Foreign* 23: 273. 1885, *Annals of the Royal Botanic Garden, Calcutta*. 7(1): 124. 1896 and *Smithsonian Contributions to Botany* 72: 67, 71. 1988.

O. talbotii Brandis (also *talboti*) (*Ochlandra rheedii* var. *sivagiriana* sensu Talbot, not Gamble) (named for the Irish botanist William Alexander Talbot, 1847-1917, in the Indian Forest Service, 1884 F.L.S., 1901-1909 Bombay conservator of Forests, from 1911 in Switzerland, author of Systematic list of the trees, shrubs and woody climbers of the Bombay Presidency ... Bombay 1894 [edition 2, 1902; edition 3, reprint, *The Trees, Shrubs and Woody Climbers of the Bombay Presidency* ... Poona 1949]. See J.H. Barnhart, *Biographical notes upon botanists*. 3: 357. 1965; R. Desmond, *The European Discovery of the Indian Flora*. Oxford 1992; Isaac Henry Burkill, *Chapters on the History of Botany in India*. Delhi 1965; Leonard Huxley, *Life and Letters of Sir Joseph Dalton Hooker*. London 1918; Ethelyn Maria Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. 1: 678. Cambridge, Mass. 1917-1933; Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 670-671. London 1994)

India, Karnataka. Arborescent, graceful, erect and arching, scandent, slender, reedlike, drooping at the top, growing in dense clumps, nodes swollen, culm sheaths smooth and ciliate on the margins, leaves pointed and cordate or

subacute at the base, leaf sheaths smooth and bearded with long stiff bristles, inflorescence erect and terminal, 3-6 glumes hairy and mucronate, lemmas acute, 6-7 lodicules, 25-40 exerted stamens, 5 plumose stigmas, used for basket and mat making, found growing in the rain forests, along riverbanks and nallahs, see *Indian Trees* 684. 1906, *Rheedea* 5(1): 72, f. 4. 1995.

O. travancorica (Bedd.) Benth. ex Gamble (*Beesha travancorica* Bedd.; *Bheesa travancorica* Bedd.; *Melocanna travancorica* Muell.; *Ochlandra travancorica* (Bedd.) Benth.; *Ochlandra travancorica* Benth.)

India. Arborescent or shrubby, erect, reedlike, gregarious, nodes swollen, thin walls, culm sheaths wrinkled, inflorescence subverticillate, spicate panicle, large fertile spikelets, usually 3 glumes, three lodicules lanceolate unequal, up to 120 stamens monadelphous, ovary narrow, 5-6 plumose stigmas, used for *hookah* pipes and as a fuel, raw material mainly for paper manufacture, leaves used for thatching, small culms for making flutes, fodder for horses during scarcity, leaves eaten by elephants, useful for erosion control and as a soil binder, planted along margins of ponds, moist areas, rich loamy soil, banks of streams, lower slopes, undergrowth in evergreen and semievergreen forests, see Sir Ferdinand Jacob Heinrich von Mueller (1825-1896), *Select Plants* (exclusive of timber trees) readily eligible for Victorian industrial culture, with indication of their native countries and some of their uses. Melbourne 1872, *Flora Sylvatica for Southern India* 239, t. 234. 1873, William Robert Guilfoyle (1840-1912), *Fibres from Plants, Indigenous and Introduced, Eligible for Industrial Culture and Experiment in Victoria*. [Department of Agriculture, Victoria] Melbourne 1894, *Annals of the Royal Botanic Garden, Calcutta*. 7: 125, 126. 1896 and *Rheedea* 4(1): 28, f. 3. 1994, *Rheedea* 5(1): 82, 85, f. 8, 9. 1995.

in English: reed bamboo, elephant bamboo, elephant grass.

in India: eera kalli, eera katti, eerakalli, eeral, eetta, erakatti, eral, etta, garte, hodake, ila kalli, iral, irttal, irttagalli, irul, ita-kalli, kaairttal, kagamungil, kar-eetta, kar-etta, nanal, odai, ote, othe, vei

O. travancorica Benth. var. *hirsuta* Gamble

India. Arborescent or shrubby, erect, reedlike, gregarious, leaf sheaths hairy, 3 lodicules, up to 120 stamens, ovary narrow, 5 plumose stigmas, raw material for paper manufacture, along stream banks, see *Annals of the Royal Botanic Garden, Calcutta*. 7: 125, 126. 1896.

O. wightii (Munro) Fischer (*Bambusa wightii* Munro; *Ochlandra brandisii* Gamble; *Teinostachyum wightii* (Munro) Beddome; *Teinostachyum wightii* Beddome) (for the British (b. East Lothian) botanist Robert Wight, 1796-1872 (d. Berks), East India Company, surgeon, traveler, plant collector; see Nathaniel Wallich (1786-1854), *Plantae Asiaticae Rariores*. London 1830-1832; J.H. Barnhart, *Biographical notes upon botanists*. 3: 493. 1965; T.W. Bossert,

India, Kerala, Tamil Nadu. Erect, shrubby, tufted, gregarious, reedlike, thin walls, leaves acuminate with a short petiole wrinkled beneath, inflorescence verticillate, glumes up to 4, lemmas membranous, one lodicule, stamens up to 60 monadelphous, ovary glabrous, 5 plumose stigmas, suitable for paper pulp, used for basket and mat making, leaves used as fodder, see *Transactions of the Linnean Society of London* 26(1): 111. 1868, *Flora Sylvatica for Southern India* 233. 1873, *Annals of the Royal Botanic Garden, Calcutta.* 7: 126. 1896 and *Flora of the Presidency of Madras* 10: 1864. 1934, *Kew Bulletin* 149. 1935 [also *Bulletin of Miscellaneous Information Kew* 1935: 149. 1935], *Rheedea* 5(1): 88, f. 10. 1995.

in India: ira-calli, irakalli, ira-kalli

Ochlopoa (Asch. & Graebn.) H. Scholz = Poa L.

From the Greek *ochlos* "crowd, mass."

Pooideae, Poeae, Poinae, *Poa* sect. *Ochlopoa* Asch. & Graebn., type *Ochlopoa annua* (L.) H. Scholz, see *Species Plantarum* 1: 67-68. 1753, *Nova Genera et Species Plantarum* 1: 158. 1815 [1816] and *Synopsis der mitteleuropäischen Flora* 2: 387. 1900, *Svensk Botanisk Tidskrift* 32: 296. 1938, *Bot. Not.* 1953(3): 354. 1953, *Fl. Afrique Nord* 3: 78.

Ochthochloa Edgew.

From the Greek *ochthos* "hill, tubercle, bank" and *chloe*, *chloa* "grass."

One species, northeast Africa, Arabia, Ethiopia, Somalia, Sind. Chloridoideae, Eragrostideae, perennial, herbaceous, branched, unarmed, tuberous, sprawling, stoloniferous, tufted, auricles absent, ligule a fringed membrane, leaves stiff and pungent, plants bisexual, inflorescence spicate and digitate, spikelets solitary strongly laterally compressed, 2 very unequal glumes awned or awnless and shorter than the lemmas, upper glume keeled, lower glume exceeding the lowest lemma, lemmas keeled acute or shortly awn-tipped, palea keels ciliate, ovary glabrous, 2 stigmas, probably a very good fodder for cattle, species of open habitats, desert to semidesert, hillsides, sand dunes, a segregate from *Brachychloa* S.M. Phillips, type *Ochthochloa compressa* (Forssk.) Hilu, see *Journal of the Asiatic Society of Bengal* 11: 26-27. 1842 and *Kew Bulletin* 36(3): 560. 1981 and 37: 158. 1982, *Annals of the Missouri Botanical Garden* 81(4): 784-791. 1994.

Species

O. compressa (Forssk.) Hilu (*Eleusine arabica* Hochst. ex Steud.; *Eleusine caespitosa* A. Rich.; *Eleusine compressa* (Forssk.) Asch. & Schweinf. ex C. Chr.; *Eleusine flagellifera* Nees; *Ochthochloa dactyloides* Edgew.; *Panicum compressum* Forssk.)

Africa, Arabia, Ethiopia. Perennial, wiry, hard, much-branched, stoloniferous, prostrate or ascending, creeping, bulblike rooting nodes, ligule a short membrane with a long ciliate fringe, leaves flat or slightly inrolled, inflorescence of secund digitate racemes, spikelets disarticulating above glumes, lemmas entire and mucronate, palea present, ovary glabrous, useful for forage and hay, very good fodder both for horses and cattle, suitable for erosion control, saline soil, sandy beaches, sandy soils, plains, see *Flora Aegyptiaco-Arabica* 18. 1775, *Linnaea* 16(2): 220. 1842, *Journal of the Asiatic Society of Bengal* 11: 27. 1842, *Tentamen Florae Abyssinicae ...* 2: 412. 1850, *Synopsis Plantarum Glumacearum* 1: 211. 1854 and *Dansk Botanisk Arkiv* 4(3): 12. 1922, *Kew Bulletin* 36(3): 560. 1981, *Journal of Cytology and Genetics* 21: 152-154. 1986.

in India: bharu, chembri, chemri, chhembar, chhimbar, chhimber, chubrei, dubra, ganth dob, ganthia, ganthil, ghan-til, ghatil, ghurdub, kharimbar

in Somalia: hari hari

Odontelytrum Hackel

From the Greek *odous*, *odontos* “tooth” and *elytron* “sheath, cover, scale, husk.”

One species, Ethiopia, Yemen, eastern and northeastern Africa. Panicoideae, Panicoideae, Paniceae, perennial, herbaceous, unarmed, aquatic, floating, smooth, spongy, branched, long stoloniferous, prostrate, trailing, auricles absent, sheaths inflated, ligule a membrane fringed or unfringed, leaves flat, plants bisexual, inflorescence a cylindrical raceme or a false spike, spikelets solitary and sessile, single spikelet subtended by a lobed scale, inflorescence enveloped by the uppermost leaf sheath, 1 or 2 very unequal glumes per spikelet, palea present, lodicules absent, 3 stamens, 1 or 2 long-exserted stigmas, open habitats, in water, ponds, stagnant or running water, in muddy margins of pools, wadis, type *Odontelytrum abyssinicum* Hack., see *Österreichische Botanische Zeitschrift* 48: 86. 1898 and *Flora of Tropical East Africa* 451-898. 1982.

Species

O. abyssinicum Hack.

Eastern Africa. Perennial, rare, decumbent, aquatic, soft, spongy, rooting at the nodes, often forming floating mats, ligule a very short membrane, inflorescence racemose of a solitary terminal spike-like raceme partially enclosed by the uppermost leaf sheath, spikelets narrowly lanceolate and dorsally compressed, lobed herbaceous scale or involucre, lower glume absent or minute, upper lemma narrowly obtuse, lakes, flooded grassland, abundant around pools and headwaters.

Odysea Stapf

The genus was named after Odysseus, in Greek legend, son of Laertes and Anticleia, husband of Penelope, daughter of Icarus, and father by her of Telemachus; in Latin Ulysses or Ulixes; possibly referring to the travels of this plant through taxonomic classifications and nine different genera.

Two species, Africa, Ethiopia, Yemen, Transvaal, Namibia. Chloridoideae, Eragrostideae, Eleusininae, perennial, xerophytic, creeping, herbaceous, armed, glaucous, profusely branched, long rhizomatous, flowering culms leafy, young shoots covered with hard scale leaves, leaf sheaths densely imbricate, ligule a fringe of hairs, salty leaves, woody leaf blades rigid and pungent, leaves distichous and nonauriculate, plants bisexual, contracted globose inflorescence, short crowded racemes, spikelets solitary and pedicellate, two glumes unequal or very unequal, lemmas mucronate and scarious, palea present, 2 lodicules free and fleshy, 3 stamens, ovary glabrous, 2 stigmas, older leaves hard and prickly, sand binder, species of open habitats, desert soils,

savannah, coastal sand dunes, saline soils, sometimes under *Diplachne* P. Beauv., related to *Leptochloa* P. Beauv., type *Odysea paucinervis* (Nees) Stapf, see *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 43(1): 94. 1909, *Hooker's Icones Plantarum* 31: t. 3100. 1922, *Flore des Spermatophytes du Parc National Albert* 3: 166. 1955.

Species

O. mucronata (Forssk.) Stapf (*Aeluropus mucronatus* (Forssk.) Asch.; *Aeluropus pungens* (Vahl) Boiss., nom. illeg., non *Aeluropus pungens* (M. Bieb.) Koch; *Eragrostis pungens* Schweinf.; *Festuca mucronata* Forssk.; *Festuca pungens* Vahl)

Arabia, Red Sea coasts, Yemen. Perennial, spiny, much-branched, woody, stiff, rounded, bush-forming or colonies, spreading, rhizomatous, ligule a fringe of hairs, very stiff leaves inrolled and pungent, dense headlike inflorescence of crowded racemes, glumes more or less equal or unequal, lemmas silky villous on nerves and mucronate, forming prickly bushes, abundant on sand dunes near the sea, see *Flora Aegyptiaco-Arabica* 22. 1775, *Symbolae Botanicae*, ... 1: 10, t. 2. 1790, *Beitrag zur Flora Aethiopiens* ... 297, 310. 1867, *Flora Orientalis* 5: 595. 1884 and *Hooker's Icones Plantarum* 31: t. 3100. 1922.

in Arabic: schocham, schoncham, shawkham

in Somalia: guban gub, gubangub, afrug

O. paucinervis (Nees) Stapf (*Dactylis paucinervis* Nees; *Diplachne cinerea* Hack.; *Diplachne paucinervis* (Nees) Stapf ex Rendle)

Tropical Africa, Namibia, Tanzania. Perennial, glaucous, halophytic, erect or geniculate, branched at the base, rigid, woody at the base, deeply rhizomatous with very long rhizomes, stoloniferous, low mat-forming, spiny shoots at the nodes, leaf blades slightly rolled, leaf sheaths rounded, leaves stiff and pungent, ligule membranous with a margin of hairs, inflorescence a short dense ovoid head, panicle dense and compact, spikelets flattened, lemmas with a short awn, pasture, little grazing value, eaten only when young, useful for erosion control, sand binder, usually found in brackish or saline soils, coastal dunes, savannah, near rivers, on sandy alkaline soils, see *Florae Africae Australioris Illustrationes Monographicae* 429. 1841, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 11: 403. 1889, *Catalogue of the African Plants Collected by Dr. F. Welwitsch in 1853-61* 2: 227. 1899 and *Hooker's Icones Plantarum* 31: t. 3100. 1922.

in English: prickly brack grass

in South Africa: brakkweek, steekgras, steekriet

in German: brackquecke

Oedipachne Link = *Eriochloa* Kunth

From the Greek *oidipous* “the swollen-footed,” *oideo* and *pous*, and *achne* “chaff, glume.”

Panicoideae, Paniceae, Melinidinae, see *Systema Naturae*, *Editio Decima* 872. 1759, *Hortus Regius Botanicus Bero-linensis* 1: 51. 1827 and *Kurtziana* 2: 95-106. 1965, *Contributions from the United States National Herbarium* 46: 233-239, 298. 2003.

Oedogocalamus Z.P. Wang & G.H. Ye ex Wen
= *Oligostachyum* Z.P. Wang & G.H. Ye

From the Greek *oideo*, *oidao* “swell, become swollen,” *oidema*, *oidematos* “swelling, tumour” and *kalamos* “reed.”

Bambuseae, Arundinariinae, see T.H. Wen, “New Taxa of Bambusoideae in China.” *Journal of Bamboo Research* 3(2): 23-47, f. 1-10. 1984, *Contributions from the United States National Herbarium* 39: 18-24. 2000.

Oedogonatus Z.P. Wang & G.H. Ye ex Wen
= *Oligostachyum* Z.P. Wang & G.H. Ye

From the Greek *oideo*, *oidao* “swell, become swollen,” *oidema*, *oidematos* “swelling, tumour.”

Bambuseae, Arundinariinae, see T.H. Wen, “New Taxa of Bambusoideae in China.” *Journal of Bamboo Research* 3(2): 23-47, f. 1-10. 1984, *Contributions from the United States National Herbarium* 39: 18-24. 2000.

Oligostachyum Z.P. Wang & G.H. Ye =
Arundinaria Michx., *Clavinodum* Wen,
Oedogocalamus Z.P. Wang & G.H. Ye ex Wen,
Oedogonatus Z.P. Wang & G.H. Ye ex Wen

From the Greek *oligos* “few, little” and *stachys* “a spike,” few spikelets on the rachis.

A genus of 14-18 species, China. Bambusoideae, Bambuseae, Arundinariinae, rhizomes monopodial or sympodial, culms erect, 3 branches at each node, sheath caducous and coriaceous or chartaceous, sheath auricles present or absent, leaves bandlike lanceolate, inflorescences racemose, 3 stamens, 3 stigmas, type *Oligostachyum sulcatum* Z.P. Wang & G.H. Ye, see *Flora Boreali-Americana* 1: 73-74. 1803 and *J. Nanjing Univ. Nat. Sci.* 1: 95-101. 1982, T.H. Wen, “New Taxa of Bambusoideae in China.” *Journal of Bamboo Research* 3(2): 23-47, f. 1-10. 1984, *J. Nanjing Univ. Nat. Sci.* 24(1): 163-166. 1988, *Kew Bulletin* 44(2): 349-367. 1989, *Contributions from the United States National Herbarium* 39: 18-24. 2000.

Species

O. bilobum W.T. Lin & Z.J. Feng

China. See *Journal of Bamboo Research* 13(2): 23-25, f. 7. 1994.

O. fujianense Z.P. Wang & G.H. Ye (*Oligostachyum scabriflorum* var. *scabriflorum*)

China. See *J. Bamboo Res.* 1(2): 144, 154, f. 9. 1982, *Journal Nanjing University. Natural Sciences Edition* 1: 97-98, 101, f. 1. 1982

O. glabrescens (Wen) P.C. Keng & Z.P. Wang (*Sinobambusa glabrescens* Wen)

China, Fujian. Young culm pruinose, three branches on each node, sheath auricles absent or weak, sheath ligule arcuate shortly pubescent, sheath blade narrow, leaves lanceolate finely pubescent beneath, see *Journal of Bamboo Research* 1(2): 20, 144, 154, f. 9. 1982, *J. Nanjing Univ. Nat. Sci.* 24(1): 163-166. 1988, *Journal Nanjing University. Natural Sciences Edition* 26(3): 488. 1990.

O. gracilipes (McClure) G.H. Ye & Z.P. Wang (*Arundinaria gracilipes* (McClure) C.D. Chu & C.S. Chao; *Semiarundinaria gracilipes* McClure)

China, Hainan. Internode swollen, purple, young culm white pubescent, sheath shedding late, cilia absent, ligule top truncate, sheath blade erect linear-lanceolate, leaves ovate-lanceolate, see *Lingnan University Science Bulletin* 9: 47. 1940, *Journal of Nanjing Technological College of Forest Products* 1980(3): 26. 1980, *Journal Nanjing University. Natural Sciences Edition* 26(3): 488. 1990, *J. Bamboo Res.* 13(1): 9. 1994.

O. hupehense (J.L. Lu) Z.P. Wang & G.H. Ye (*Arundinaria hupehensis* (J.L. Lu) C.S. Chao & G.Y. Yang; *Oligostachyum hupehensis* (J.L. Lu) Z.P. Wang & G.H. Ye; *Pleioblastus hupehensis* J.L. Lu)

China, Hubei. Young culm purplish green, 3 branches at each node, a pruinose ring below the node, green tough sheath shorter than internode, sheath auricles and cilia absent, sheath ligule arcuate, leaves lanceolate, see *J. Henan Agric. Coll.* 1981(2): 73, f. 5. 1981, *Journal Nanjing University. Natural Sciences Edition* 24(1): 164. 1988, *Journal of Bamboo Research* 13(1): 8. 1994.

O. lanceolatum G.H. Ye & Z.P. Wang

China, Zhejiang. Young culm purplish green, 3 branches at each node, sheath caducous dark green, sheath ligule purple with wavy margin, sheath blade lanceolate dark green, 2-3 leaves on each twig, leaves oblong-lanceolate to lanceolate, see *Journal Nanjing University. Natural Sciences Edition* 24(1): 163, f. 1. 1988.

O. lubricum (Wen) P.C. Keng (*Arundinaria lubrica* (Wen) C.S. Chao & G.Y. Yang; *Semiarundinaria lubrica* Wen)

China, Zhejiang, Jiangxi, Fujian. Young culm glabrous, not pruinose, internode semicylindrical to flat, sheath green, 3

branches on each node, sheath auricles purple ovate, sheath ligule purple, sheath blade green broad-lanceolate, 3-4 leaves on each twig, leaves lanceolate, edible shoot, see *Journal of Bamboo Research* 2(1): 64, f. 17. 1983, *Journal Nanjing University. Natural Sciences Edition* 22(3): 415. 1986, *Acta Phytotaxonomica Sinica* 29(5): 452-455. 1991, *J. Bamboo Res.* 13(1): 14. 1994.

O. nuspiculum (McClure) Z.P. Wang & G.H. Ye (*Arundinaria lima* (McClure) C.D. Chu & C.S. Chao; *Arundinaria nuspicula* (McClure) C.D. Chu & C.S. Chao; *Semiarundinaria lima* McClure; *Semiarundinaria nuspicula* McClure)

China, Hainan. Nodding spikelets, joint swollen, internode cylindrical, slender branches, see *Lingnan University Science Bulletin* 9: 50. 1940, *Acta Phytotaxonomica Sinica* 18(1): 25, 29. 1980, *Journal Nanjing University. Natural Sciences Edition* 1: 95-101. 1982.

O. oedogonatum (Z.P. Wang & G.H. Ye) Q.F. Zheng & K.F. Huang (*Arundinaria oedogonata* (Z.P. Wang & G.H. Ye) H.Y. Zou; *Clavinodum oedogonatum* (Z.P. Wang & G.H. Ye) T.H. Wen; *Pleioblastus oedogonatus* Z.P. Wang & G.H. Ye)

China, Fujian, Jiangxi. Grayish green to dark green pruinose, culm joint swollen, 3-5 or more branches on each node, sheath coriaceous to papery, small auricles falciform and deciduous, sheath ligule arching, sheath blade lanceolate, cultivated, ornamental, see *Journal Nanjing University. Natural Sciences Edition* 1: 91-108, f. 1-7. 1981, *Wuyi Science Journal* 2: 93. 1982 [also *Wuyi shan keji tongxun*], *Journal of Bamboo Research* 3(2): 25, f. 1. 1984, *Journal of Bamboo Research* 13(1): 11. 1994.

in China: zhongjie zhu

O. paniculatum G.H. Ye & Z.P. Wang

China. See *Journal Nanjing University. Natural Sciences Edition* 26(3): 485. 1990

O. puberulum (Wen) G.H. Ye & Z.P. Wang (*Sinobambusa puberula* Wen)

China, Guangxi. Internode silky with longitudinal stripes, 3-5 branches on each node, 2-3 leaves on each twig, small tough lanceolate leaves pubescent beneath, see *Journal of Bamboo Research* 2(1): 58, f. 11. 1983, *Journal Nanjing University. Natural Sciences Edition* 26(3): 486. 1990.

O. pulchellum (Wen) G.H. Ye & Z.P. Wang (*Sinobambusa pulchella* Wen)

China, Guangdong. Young culm pubescent with longitudinal veins, usually three branches on each node, sheath auricles spreading and ciliate, sheath ligule truncate glabrous, sheath blade narrow-lanceolate and deciduous, 2-4 leaves on each twig, leaves broadly lanceolate finely pubescent beneath, see *Journal of Bamboo Research* 1(2): 16, 150, f. 6. 1982, *Journal Nanjing University. Natural Sciences Edition* 26(3): 486. 1990.

O. scabriflorum (McClure) Z.P. Wang & G.H. Ye (*Arundinaria maculosa* C.D. Chu & C.S. Chao; *Arundinaria scabriflora* (McClure) C.D. Chu & C.S. Chao; *Semiarundinaria scabriflora* McClure)

China, Guangxi, Guangdong, Fujian. Young culm dark green with small purple spots, 3 branches on each node, glabrous, sheath greenish, no sheath auricles and cilia, sheath blade green or greenish, leaves narrow-lanceolate, cultivated, see *Lingnan University Science Bulletin* 9: 52. 1940, *Journal of Nanjing Technological College of Forest Products* 1980(3): 26. 1980, *Acta Phytotaxonomica Sinica* 18(1): 29. 1980, *Journal of Bamboo Research* 1: 30. 1981, *Journal of Nanjing Technological College of Forest Products* 1981(3): 34, f. 2. 1981, *Journal Nanjing University. O. xiaohuangku Y. Zhang & X.L. Ding

China. See *Journal of Bamboo Research* 15(3): 18, 22. 1996.

Olmeca Soderstr.

The Olmec people lived in hot, humid lowlands along the Gulf Coast in what is now southern Veracruz and Tabasco states in southern Mexico; the Olmec domain extends from the Tuxtlas mountains in the west to the lowlands of the Chontalpa in the east; the first elaborate pre-Columbian culture of Mesoamerica.

Two species, Mexico. Bambusoideae, Bambusodae, Bambuseae, or Bambusoideae, Bambuseae, Guaduiniae, perennial, erect and lax, sympodial, rhizomatous, unarmed, tree-like or arborescent, persistent, solid, thick-walled, woody, unicaspitose, stems solitary, branched, culms sheaths often with irritating hairs, elongated neck, rhizomes pachymorph, flowering culms leafy, plants bisexual, inflorescence a panicle, spikelets pedicellate, 2 glumes unequal, palea present, 3 free and membranous lodicules, 3 stamens, ovary glabrous, 2-3 stigmas, fleshy fruits, tropical rain forest, understory, wet slopes, evergreen forest, along roadsides, primary forest, related to *Aulonemia* Goudot, type *Olmeca reflexa* Soderstr., see T.R. Soderstrom, "Olmeca, a new genus of Mexican bamboos with fleshy fruits." *American Journal of Botany* 68(10): 1361-1373. 1981, T.R. Soderstrom, "Validation of the generic name *Olmeca* and its two species (Poaceae: Bambusoideae)." *Phytologia* 51(2): 161. 1982, Carmen Aguilera, *Flora y fauna Mexicana. Mitología y tradiciones*. 137-138. Editorial Everest Mexicana México s.d.[1985], X. Londoño and P.M. Peterson, "*Guadua sarcocarpa* (Poaceae: Bambuseae), a new species of Amazonian bamboo with fleshy fruits." *Systematic Botany* 16(4): 630-638, f. 1-3. 1991, *Flora Mesoamericana* 6: 196-197. 1994, *American Bamboos* 247-250. 1999, *Contributions from the United States National Herbarium* 39: 82. 2000.

Species

O. recta Soderstr.

Mexico. Erect below and lax above, rhizome pachymorph, see *American Journal of Botany* 68(10): 1365. 1981, *Phytologia* 51(2): 161. 1982.

O. reflexa Soderstr.

Mexico. Erect and lax, rhizome pachymorph, primary forest, montane rain forest, see *American Journal of Botany* 68(10): 1369. 1981, *Phytologia* 51(2): 161. 1982.

Olyra L. = *Lepturopsis* Steud., *Mapira* Adans.

From the Greek *olyra* "rice wheat," Theophrastus (*HP*. 8.9.2) and Dioscorides, Latin *olyra*, *ae* applied by Plinius to a kind of grain, called also *arinca*, which resembles spelt.

About 22-24 species, tropical America, Africa. Bambusoideae, Oryzodae, Olyreae, or Bambusoideae, Olyreae, Olyrinae, perennial, woody to subwoody, some species completely herbaceous, slender, erect, branched, persistent,

caespitose, twining, scrambling, climbing, clambering, more or less scandent, leaning, creeping rootstock, leaf blades lanceolate with short pseudopetiole, leaves on the main stem as well as branches, ligule membrane-like fringed or unfringed, auricles present or absent, plants monoecious, open or contracted inflorescence paniculate with separate male and female spikelets, female spikelets terminal, male spikelets basal and usually shorter than the females, fertile spikelets unisexual, floret indurated, two glumes very unequal, male spikelets without glumes, palea present, 3 free and membranous lodicules, no stamens, ovary glabrous, 2 stigmas, shade species, in forest, wet tropical forests, lowland forests, rain forest, pathsides, swamp forest, upland forest, forest margins, moist forest, formerly related to *Panicum*, type *Olyra latifolia* L., see *Systema Naturae, Editio Decima* 1253, 1261, 1379. 1759, *Familles des Plantes* 2: 39, 574. 1763, *Essai d'une Nouvelle Agrostographie* 135, 166, 168, t. 24, f. 2. 1812, *Conspectus Regni Vegetabilis* 50. 1828, *Flora Brasiliensis* 2(2): 315, 327, 328. 1877 and *Field Museum of Natural History, Botanical Series* 13(1/1): 96-261. 1936, *Blumea, Supplement* 3: 62. 1946, *American Journal of Botany* 70(5, part 2): 129-130. 1983, *African Studies Monographs* 3: 109-130. 1983, *Brittonia* 37: 22-35. 1985, *Revista de Ciencias (San Marcos)* 74: 48-57. 1986, T.R. Soderstrom and F.O. Zuloaga, "A revision of the genus *Olyra* and the new segregate genus *Parodiolyra* (Poaceae: Bambusoideae: Olyreae)." *Smithsonian Contributions to Botany* 69: 1-79. 1989, *Annals of the Missouri Botanical Garden* 77(1): 125-201. 1990, E.J. Judziewicz and F.O. Aug 2004.

Species

O. sp.

in Ecuador: gramalote

in Peru: "insun chëxëti ro"

O. amapana Soderstr. & Zuloaga

Brazil, Amapá. Moist forests, see *Smithsonian Contributions to Botany* 69: 5, f. 1-2, 15. 1989.

O. buchtienii Hackel

Bolivia. See *Repertorium Specierum Novarum Regni Vegetabilis* 11: 20. 1912, *Contributions from the U.S. National Herbarium* 24(8): 291-556. 1927, *Contributions from the Gray Herbarium of Harvard University* 184: 1-223. 1958, *Smithsonian Contributions to Botany* 69: 8. 1989.

O. caudata Trinius (*Olyra dimidiata* Hochst. ex Steud.; *Olyra pittieri* Hack.; *Olyra speciosa* Mez)

South America. Perennial, rhizomatous, inflorescence erect, growing in clumps, in forests, undergrowth, see *Systema Naturae, Editio Decima* 1253, 1261, 1379. 1759, *Linnaea* 10(3): 292. 1836, *Synopsis Plantarum Glumacearum* 1: 36. 1853 and *Österreichische Botanische Zeitschrift* 51: 461. 1901, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 56(Beibl. 125): 7. 1921, *Smithsonian Contributions to Botany* 69: 10. 1989.

in Peru: shashap

O. ciliatifolia Raddi (*Olyra cuneatifolia* Desv.)

South America, Guyana to Argentina. Disturbed areas, see *Agrostografia Brasiliensis sive enumeratio plantarum ad familias naturales graminum et ciperoidarum spectantium, quas in Brasilia ...* 19. Lucca [1823], *Mémoires de la Société d'Agriculture, Sciences et Arts d'Angers* 1: 210. 1831, *Flora Brasiliensis* 2(2B): 34-342, t. 12-49. 1877 and *Smithsonian Contributions to Botany* 69: 12. 1989, *Edinburgh Journal of Botany* 48: 73-80. 1991.

in Spanish: taquarilla

O. davidseana Judz. & Zuloaga (dedicated to Gerrit Davidge)

Brazil. In lowland forests, moist sites, see *Systematic Botany* 17(1): 25, 27, f. 1. 1992.

O. ecaudata Döll

Central and South America. Wet places, in forests, see *Flora Brasiliensis* 2(2): 326. 1877 and *Smithsonian Contributions to Botany* 69: 14, f. 8a-b. 1989.

O. fasciculata Trinius (*Olyra heliconia* Lindman)

Argentina, Peru, Panama, Bolivia and southern Brazil. Forests, see *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 3,1(2-3): 113. 1834 and *Kongliga Svenska Vetenskapsakademiens Handlingar* 34(6): 11, t. 6. 1900, *Smithsonian Contributions to Botany* 69: 17, f. 8c, g. 1989, *Annals of the Missouri Botanical Garden* 77(1): 165. 1990.

in Peru: pinguil shucush

in Spanish: taquarilla, tacuarilla

O. filiformis Trin.

Brazil. Annual or perennial, forests, edges of forests, see *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 3,1(2-3): 115. 1834 and *Smithsonian Contributions to Botany* 69: 19, f. 17a-b. 1989.

O. glaberrima Raddi (*Olyra corcovadensis* Wawra; *Olyra glaberrima* var. *glaberrima*; *Olyra obliqua* Desv.; *Olyra semiovata* Trin.; *Olyra semiovata* var. *pubescens* Hack.;

Olyra semiovata var. *pubiflora* Hack.; *Olyra semiovata* var. *semiovata*; *Olyra yucatana* Chase)

South America, Guatemala, Belize, Mexico, eastern Brazil. Moist forests, see *Agrostografia Brasiliensis* sive enumeratio plantarum ad familias naturales graminum et ciperoidarum spectantium, quas in Brasilia ... 19. Lucca [1823], *De Graminibus Paniceis* ... 249. Petropoli 1826, *Mémoires de la Société d'Agriculture, Sciences et Arts d'Angers* 1: 210. 1831, Heinrich Ritter Wawra von Fernsee (Ritter von Fernsee) (1831-1887), *Botanische Ergebnisse der Reise seiner Majestät des Kaisers von Mexico Maximilian I. nach Brasilien* (1859-1860). 180, t. 95. Wien 1866 and *Bulletin de l'Herbier Boissier* 4(3): 276. 1904, *Proceedings of the Biological Society of Washington* 21: 178. 1908, *Repertorium Specierum Novarum Regni Vegetabilis* 8(157-159): 46. 1910, *Arkiv för Botanik utgivet av K. Svenska Vetenskapsakademien* 11(4): 28. 1912, *Smithsonian Contributions to Botany* 69: 20, f. 30e-f. 1989.

O. holttumiana Soderstr. & Zuloaga (after the British botanist Richard Eric Holttum, 1895-1990, traveler and botanical explorer; see J.H. Barnhart, *Biographical notes upon botanists*. 2: 197. 1965; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 180. 1972; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993; Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 351. London 1994) Panama. Arching, see *Kew Bulletin* 41(3): 722. 1986.

Tokyo Bot.* 3: 110. 1930, *Acta Phytotaxonomica et Geobotanica* 10: 134. 1941, E.D. Merrill, *Index rafinesquianus*. The plant names published by C.S. Rafinesque, etc. 75. 1949, *Taxon* 29: 652-653. 1980, *Journal of the Arnold Arboretum* 66: 188. 1985, *Bulletin of the Torrey Botanical Club* 118: 128-136. 1991, *Contributions from the United States National Herbarium* 48: 269. 2003.

Ophiochloa Filgueiras, Davidse & Zuloaga

From the Greek *ophis* "a snake, serpent" and *chloe*, *chloa* "grass," serpentine endemic grass.

One species, Brazil. Panicoideae, Panicodae, Paniceae, or Panicoideae, Paniceae, Paspalinae, perennial, herbaceous, erect, densely tufted, stiff, auricles absent, ligule a fringe of hairs, plants bisexual, inflorescence spicate or racemose, erect or drooping raceme, spikelets imbricate and sessile, 1 glume per spikelet, lower glume lacking, lower lemma narrow and ciliate, palea present, 2 free and fleshy lodicules, 2-3 stamens, ovary glabrous, 2 stigmas, type *Ophiochloa hydrolithica* Filg., Davidse & Zuloaga, see *Novon* 3(4): 360-366. 1993 [*Ophiochloa*, a new endemic serpentine grass genus (Poaceae: Paniceae) from the Brazilian cerrado vegetation], *Contributions from the United States National Herbarium* 46: 298. 2003.

Species

O. hydrolithica Filg., Davidse & Zuloaga

Brazil.

Ophismenus Poir.

See also *Oplismenus* P. Beauv., see *Encyclopédie Méthodique, Botanique*, Suppl. 4: 271. 1816.

Ophiurinella Desv. = *Stenotaphrum* Trin.

The diminutive of the genus *Ophiuros*.

Panicoideae, Paniceae, Setariinae, or Panicoideae, Panicodae, Paniceae, type *Ophiurinella micrantha* Desv., see *Fundamenta Agrostographiae* 175-176. 1820, *Mémoires de la Société d'Agriculture, Sciences et Arts d'Angers* 1: 179, t. 8, f. 4. 1831 and Jonathan Deininger Sauer (b. 1918), "Revision of *Stenotaphrum* (Gramineae: Paniceae) with attention to its historical geography." *Brittonia* 24(2): 202-222. 1972, *Flora of Tropical East Africa* 451-898. 1982, *Crop Science (Florida)* 22: 469-473. 1982, *Flora*

Mesoamericana 6: 364. 1994, *Flora Fanerogámica Argentina* 19(1): 11-16. 1995, *Contributions from the United States National Herbarium* 46: 608-609. 2003.

Ophiuros Gaertner f. = *Ophiurus* Gaertn., *Ophiurus* R. Br., *Rottboellia* L.f.

From the Greek *ophis* "a snake, serpent" and *oura* "tail," referring to the spikes; see Joseph Gaertner (1732-1791), *De fructibus et seminibus plantarum*. Stuttgart, Tübingen 1788.

About 4 species, northeastern tropical Africa, southern China, Australia. Panicoideae, Andropogonodae, Andropogoneae, Rottboelliinae, annual or perennial, base of the culm often swollen and bulbous, branched, caespitose, forming clumps, auricles absent, ligule a fringed membrane, leaves flat, plants bisexual, inflorescence spatheate of single fragile cylindrical pedunculated racemes, racemes symmetrical linear bearing single and sessile spikelets in 2 rows, pedicellate spikelet absent, spikelets with 2 florets, the lower floret male and the upper bisexual, the longer spikelets sterile and reduced to the adnate pedicel, 2 glumes more or less equal, lower glume oblong coriaceous and more or less winged, palea present, 2 free and fleshy lodicules, 3 stamens, ovary glabrous, 2 stigmas, fodder, damp places, open plains, wet grassland, savannah, related to *Heteropholis*, type *Ophiuros corymbosus* (L.f.) C.F. Gaertn., see *Supplementum Plantarum* 13, 114. 1781 [1782], *Supplementum Carpologicae* 1(1): 3, t. 181, f. 3. 1805, *Prodromus Florae Novae Hollandiae* 1: 206. 1810, *Die Natürlichen Pflanzenfamilien* 2(2): 25. 1887 and *Blumea* 45(2): 443-475. 2000.

Species

O. exaltatus (L.) O. Kuntze (*Aegilops exaltata* L.; *Hemarthria coromandelina* Steud.; *Ophiuros corymbosa* C.F. Gaertn.; *Ophiuros corymbosus* (L.f.) C.F. Gaertn.; *Ophiurus corymbosus* (L.f.) C.F. Gaertn.; *Ophiurus exaltatus* (L.) Kuntze; *Rottboellia cochinchinensis* (Lour.) Clayton; *Rottboellia corymbosa* L.f.; *Rottboellia exaltata* (L.) L.f.; *Stegosia cochinchinensis* Lour.)

Sri Lanka, India, China, Australia. Perennial, erect, leaf blades linear, leaf sheaths short and smooth, fodder grass, eaten by cattle when young and green, used for thatching, see *Mantissa Plantarum* 575. 1771, *Nova Graminum Genera* 22. 1779, *Supplementum Plantarum* 114. 1781, *Flora Cochinchinensis* 51. 1790, *Synopsis Plantarum Glumacearum* 1: 358. 1854, *Revisio Generum Plantarum* 2: 780. 1891 and *Kew Bulletin* 35(4): 817. 1981, *Blumea* 45(2): 469. 2000.

in India: bara swati, barsali, bhursali, chotoe, gunit, hutia, kinangu pillu, konda panuku, pedda panookoo, pedda panuku, pedda panuku gaddi, sontha, sonthe, sothu alagu pillu

in the Philippines: girum, talangiu

in Thailand: yaa khayong, ya khayong, yaa ko, ya ko, ya prong khai, yaa prong khaai

O. megaphyllus Stapf ex Haines

India, Darjeeling. Leafy, stout, swollen at the base, leaves oblong with ciliate margins, racemes curved, eaten by cattle when young and green, used for thatching, marshy places, see *The Botany of Bihar and Orissa* 5: 1058. 1921-1925.

in Thailand: yaa khaao phot, ya khaao phot phi

O. papillosus Hochst. (*Ophiuros aethiopicus* Rupr. ex Steud.)

East Sudan, Ethiopia. Annual, erect, much-branched, robust, stout, leaf blades and sheaths coarsely hispid, inflorescence paniculate, a compound panicle, racemes cylindrical and straight, lower glume of sessile spikelet grooved and pitted, fodder, a troublesome weed, see *Flora* 27(16): 248. 1844, *Synopsis Plantarum Glumacearum* 1: 360. 1854.

Ophiurus R. Br.

Orthographic variant of *Ophiuros* Gaertner; see Robert Brown, *Prodromus florum Novae Hollandiae*. 206. London 1810.

Opizia Presl = *Bouteloua* Lag., *Casiostega* Galeotti

Dedicated to Philipp (Filip, Philip) Maximilian Opiz, 1787-1858, Czech botanist. See J.H. Barnhart, *Biographical notes upon botanists*. 3: 31. 1965; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 294. 1972; H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 219. Oxford 1964; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. 1917-1933; Stafleu and Cowan, *Taxonomic literature*. 3: 839-841. 1981; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. Philadelphia 1964; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993.

One species, North America, southern Mexico, Cuba, the Caribbean. Chloridoideae, Cynodonteae, Boutelouinae, perennial, herbaceous, stoloniferous, auricles absent, leaf blades acuminate, ligule a membrane-like, plants dioecious, inflorescence spicate, raceme rachis persistent, spikelets deciduous and subtended by solitary bristles, one-floreted, without hermaphrodite florets, male spikelets with glumes, 2 glumes very unequal, palea present, 2 free and fleshy lodicules, no stamens, ovary glabrous, 2 stigmas, open habitats, shallow soils, dry hillsides, type *Opizia stolonifera* J. Presl, see *Varietades de Ciencias, Literatura y Artes*

2(4,21): 134, 141. 1805, *Gen. Sp. Nov.* 5. 1816, *Reliquiae Haenkeanae* 1(4-5): 293, t. 41, f. 1-11. 1830, *Bulletin de l'Académie Royale des Sciences et Belles-lettres de Bruxelles* 9: 232. 1842, *Botanical Gazette* 21: 137. 1896, *Circular, Division of Agrostology, United States Department of Agriculture* 15: 6-7. 1899 and *Genera Graminum* 249. 1986 *Flora Mesoamericana* 6: 295-296. 1994, *Contributions from the United States National Herbarium* 41: 20-33, 38, 176. 2001.

Species

O. stolonifera J. Presl (*Bouteloua dimorpha* Columbus)

Mexico. Perennial, sward-forming, ligule membranous, female inflorescence of racemes enclosed by uppermost leaf-sheath, fodder, ornamental, see *Reliquiae Haenkeanae* 1(4-5): 293, t. 41, f. 1-11. 1830 and *Aliso* 18(1): 63. 1999. in Mexico: hayal-suuk, pasto de conejo, sabana

Oplismenopsis Parodi

Resembling the genus *Oplismenus*.

One species, southern America. Panicoideae, Panicoideae, Paniceae, or Panicoideae, Paniceae, Paspalinae, perennial, aquatic, herbaceous, spongy, rhizomatous, auricles absent, leaf blades cordate, ligule a fringed membrane, plants bisexual, open inflorescence spicate or paniculate, loose racemes, spikelets pedicellate, two glumes unequal, lower lemma acuminate to shortly awned, upper lemma awnless, palea present 2-keeled, 2 free and fleshy lodicules, 3 stamens, ovary glabrous, 2 stigmas, pampas, coastal woodlands, in water, similar to *Echinochloa*, type *Oplismenopsis najada* (Hack. & Arechav.) Parodi, see *Histoire des plantes de la Guiane Française* 1: 83-84, t. 32. 1775 and *Notas del Museo de la Plata, Botánica* 2: 2, 4, f. 1. 1937, *Flora Fanerogámica Argentina* 19(1): 11-16. 1995, *Contributions from the United States National Herbarium* 46: 298-299. 2003.

Species

O. najada (Hack. & Arechav.) Parodi (*Echinochloa najada* (Hack. & Arechav.) Parodi; *Panicum amadryadum* Arechav. ex Hicken; *Panicum najadum* Hack. & Arechav.)

Argentina, Uruguay. Floating, leaf blades lanceolate to narrowly ovate, open racemes, spikelets borne singly, lower glume awned, upper lemma coriaceous, see *Anales del Museo Nacional de Montevideo* 1: 125, t. 7bis, 8. 1894 and *Chloris Platensis Argentina* 30. 1910, *Physis. Revista de la Sociedad Argentina de Ciencias Naturales* 8: 75. 1925, *Notas del Museo de la Plata, Botánica* 2(Bot. 11): 4, f. 1. 1937, Aliscioni et al., "A molecular phylogeny of *Panicum* (Poaceae: Paniceae): tests of monophyly and phylogenetic placement within the Panicoideae." *Am. J. Bot.* 90: 796-821. 2003.

Oplismenus P. Beauv. = *Hekaterosachne* Steud., *Hippagrostis* Kuntze, *Hoplismenus* Hassk., *Orthopogon* R. Br.

From the Greek *hoplismos*, *hoplisis* “a weapon, equipment for war, arming,” referring to the awned spikelets; see Ambroise Palisot de Beauvois (1752-1820), *Flore d'Oware et de Benin en Afrique*. 2: 14. Paris 1810.

About 5-10 species, mostly tropics and subtropics. Panicoideae, Panicoideae, Paniceae, or Panicoideae, Paniceae, Panicinae, or Setariinae, annual or perennial, herbaceous, weak, branched, trailing, creeping, stoloniferous, decumbent and rooting from nodes, stems leafy and flimsy, mat-forming, hairy nodes, solid or hollow internodes, auricles absent, ligule a membranous hairy rim, short leaves broadly lanceolate or linear to ovate, plants bisexual, inflorescence terminal with several spicate and short racemes, solitary or paired spikelets lanceolate and secund, florets 2, upper floret bisexual, lower floret sterile or male and often reduced to a lemma, two glumes membranous more or less equal and awned, first glume tapering to a long awn, awn attached to the two lower glumes, sterile lemma longer than the glume, upper lemma mucronate or shortly awned, awns often sticky, palea present, 2 fleshy lodicules, stamens 3, ovary glabrous, 2 stigmas, fruit slightly grooved and compressed, some species with sticky or viscid secretion on the awns, native pasture species, bird food, ornamental grass, weed species, usually found in cool shady forests, primary and secondary montane rain forest and cloud forest, grasslands, pampas, type *Oplismenus africanus* P. Beauv., see *Species Plantarum* 1: 55. 1753, *Observationes Botanicae* 3: 10. 1783, *Flore d'Oware* 2: 14, 15, t. 68, f. 1. 1810, *Prodromus Florae Novae Hollandiae* 194. 1810, *Essai d'une Nouvelle Agrostographie* 54, 169. 1812, *Fundamenta Agrostographiae* 181. 1820, *Cat. Hort. Bogor.* 16. 1844, *Tentamen Florae Abyssinicae ...* 2: 377. 1850, *Synopsis Plantarum Glumacearum* 1: 46, 118. 1854 [1855], *Flora Brasiliensis* 2(2): 144. 1877, *Indig. Grasses N.Z.* t. 11. 1878, *Revisio Generum Plantarum* 2: 776. 1891 and *Contr. U.S. Natl. Herb.* 22(3): 123. 1920, *U.S. Dept. Agric. Bull.* 772: 238. 1920, *Fieldiana, Botany* 24(2): 38-331. 1955, *Kew Bulletin* 33: 147-157. 1978, U. Species

O. aemulus (R. Br.) Roemer & Schultes (*Orthopogon aemulus* R. Br.)

New Guinea, Australia, Queensland, New South Wales, Victoria. Perennial, weak, smooth, scrambling or trailing, rooting at the nodes, ligule membranous and ciliate, dark green and wavy leaves, sparsely branched erect panicles racemose, spikelets crowded, glumes awned and nerved, slender flexuous awn, fodder grass, browsed by native animals and stock, ornamental, ground cover, sometimes forming mats, suggested for reclamation, grows along the streams, moist gullies, in shaded forests, in and around dams, in moist shady areas, rainforest, includes *Oplismenus aemulus* (R. Br.) Roemer & Schultes var. *lasiorhachis* Domin, see *Prodromus Florae Novae Hollandiae* 194. 1810, *Systema Vegetabilium* 2: 487. 1817 and *Bibliotheca Botanica* 85: 328-329. 1915, *Phanerogamarum Monographiae* 13: 1-213. 1981.

in English: Australian basketgrass, basket grass, creeping shade grass, creeping beard-grass, wavy beard-grass

Tropics, Africa, Asia, America, Paleotropics. Annual or perennial, creeping, trailing, weak, prostrate or procumbent, ascending from a long decumbent and rambling rooting base, more or less glabrous, leafy and slender, simple or more often branched upward, rooting from the lower nodes, hairy internodes, leaf blades sparsely hispid, ligule truncate, leaf sheaths densely pubescent, leaves lanceolate and acuminate to narrowly ovate, inflorescence very narrowly paniculate, 1-sided spike-like racemes, erect or spreading bristled racemes clustered, spikelets paired on unequal stalks, small hairy spikelets oblong-lanceolate, greenish flowers, lower floret reduced to lemma, 2 glumes hairy, awns of glumes very slender and scabrid, 3 stamens, anthers

yellow to reddish, stigmas white, forming open clumps and patches in understory, more or less grazed, forage, pasture grass, relished by cattle when young and green, good hay, used by indigenous people to treat pregnancy, weed at edge of road near pasture, grassland borders, fields and groves, moist places, beach sand, along roadsides, in partial shade and open shade of secondary forest, under the shade of trees and bamboos, clearings in secondary forest, swampy places, see *Flora Indica ... nec non Prodromus Florae Capensis* 24, t. 12, f. 1. 1768, *Observationes Botanicae* 3: 10. 1783, *Tableau Encyclopédique et Méthodique ... Pantropical, Australia, Southeast Asia, China, India, Indonesia, Japan, Taiwan, Malaysia, Sri Lanka, tropical Africa, Pacific, Mexico, Guatemala, Venezuela. Perennial, slender, procumbent and erect, straggling, erect and branching from a decumbent base, creeping, stoloniferous, long trailing, robust, more or less puberulent, many noded, often rooting at lowermost nodes, internodes glabrous or hairy, ligule a ciliate membrane hairy on the upper surface, leaf sheath minutely hairy to densely pubescent, leaves narrow-elliptic to ovate and covered with minute stiff hairs, ascending inflorescence racemose and developed, spikelets secund, purplish spikelets in fascicles and sometimes hairy, glumes subequal and awned, purple awn on the lower glume, upper lemma smooth and shiny, sticky seeds, native pasture species, excellent fodder or fodder of no value, eaten or grazed or rejected, invasive species, potential seed contaminant, in New Caledonia the presence of the sticky seeds of this species indicate a bad time for fishing, resembles *Oplismenus hirtellus* (L.) P. Beauv., weed, open areas, forest, in disturbed areas, plantations in or near the forest, taro plantation, scrub, in the fringes of gardens, lowlands, on moist soil in shady places, shaded woodland, in shady places under trees, gully, see *Species Plantarum* 1: 57. 1753, *Systema Naturae, Editio Decima* 870. 1759, *Supplementum Plantarum* 107. 1781, *Observationes Botanicae* 4: 17. 1786, *Collectanea* 3: 237. 1789, *Observationes Botanicae* 5: 17. 1789, *Tableau Encyclopédique et Méthodique ... Bishop Museum Bulletin* 84: 68. 1931, *Flora of the Netherlands Antilles* 1: 121-203. 1963, *Flora of the Lesser Antilles, Leeward and Windward Islands* 3: 25-220. 1979, *Memoir San Diego Society of Natural History* 12: 1-140. 1981, *Flora Fanerogámica Argentina* 19(1): 11-16. 1995, *Memoirs of the New York Botanical Garden* 85: i-ix, 1-246. 2000.

in English: short-leaf basket grass, basket grass, woods grass, running mountain grass

in Mexico: pasto sombra, zacate barbón

O. thwaitesii Hook.f.

Sri Lanka. Annual, trailing, rooting at the lower nodes, leaf sheaths pubescent, leaf blades villous to hirsute, erect inflorescence, see *Handb. Fl. Ceylon* 5: 169. 1900, *Grasses of Ceylon* 129. 1956, *Grasses of Burma ...* 318. 1960.

O. undulatifolius (Arduino) P. Beauv. (*Oplismenus africanus* var. *capensis* (Hochst.) Stapf; *Oplismenus africanus* var. *simplex* (K. Schum. ex Engl.) Stapf; *Oplismenus capensis* Hochst.; *Oplismenus hirtellus* (L.) P. Beauv.; *Oplismenus hirtellus* subsp. *capensis* (Hochst.) Mez ex U. Scholz; *Oplismenus hirtellus* subsp. *undulatifolius* (Ard.) U. Scholz; *Oplismenus simplex* K. Schum. ex Engl.; *Oplismenus undulatifolius* (Ard.) Roem. & Schult., nom. illeg., non *Oplismenus undulatifolius* (Ard.) P. Beauv.; *Orthopogon undulatifolius* (Ard.) Spreng.; *Panicum hirtellum* L.; *Panicum kraussii* Steud.; *Panicum undulatifolium* Ard.)

Tropics and subtropics, Africa, China, Taiwan, India, Indonesia, Southeast Asia, Australia. Perennial or annual, simple or branched below, prostrate, trailing, ascending from a long rambling base, often rooting at the nodes, loose sheaths, ligule membranous and truncate, small ovate and undulate leaves, racemes contracted, spikelets clumped or arranged in fascicles, one fertile floret, glumes with sticky awns, one sterile lemma, weed species, eaten by goats and sheep, grows near and along the streams, in moist and shady places, in forest shade, on sandy soil, mountain habitats, woodlands, very similar to *Oplismenus compositus* (L.) P. Beauv., see *Systema Naturae, Editio Decima* 870. 1759, *Animadversionum botanicarum specimen alterum* 14, t. 4. 1764, *Prodromus Florae Novae Hollandiae* 194. 1810, *Essai d'une Nouvelle Agrostographie* 54, 168, 170-171. 1812, *Systema Vegetabilium. Editio decima quinta* 2: 482. 1817, *Systema Vegetabilium, editio decima sexta* 1: 306.

1824 [1825], *Flora* 1(7): 114. 1846, *Synopsis Plantarum Glumacearum* 1: 45. 1853 [1854], *Sitzungsberichte der Königlich Preussischen Akademie der Wissenschaften (zu Berlin)* 1: 48. 1894, *Flora Capensis* 7: 417. 1899 and *Bibliotheca Botanica* 85: 329. 1915, *Botanical Magazine* (Tokyo) 39: 302. 1925, *Journal of the Faculty of Science: University of Tokyo, Botany* 3: 274. 1930, *Botanical Magazine* (Tokyo) 55: 546. 1941, *Manual of the Korean Grasses* 30. 1966, *Phanerogamarum Monographiae* 13: 113, 147. 1981, *Acta Phytotaxonomica Sinica* 22(6): 471. 1984, *Journal of Economic and Taxonomic Botany* 22(2): 491-494. 1998.

in French: oplismène à feuilles ondulées

in Italian: miglio ondulato

in Japan: kechijimizasa

O. undulatifolius (Ard.) P. Beauv. var. ***mollis*** Domin (*Oplismenus hirtellus* f. *imbecillis* (R. Br.) Scholz)

New Guinea, Australia, Queensland, New South Wales. Perennial, weak, trailing or scrambling, much-branched, rooting at the nodes, grayish green leaves densely hairy, ligule membranous at the base, panicles erect, spikelets in small clusters or fascicles, straight and rigid awns on glumes, lower lemma embracing the fertile floret, grows in shady coastal forests, littoral rainforest, suggested for reclamation, see *Prodromus Florae Novae Hollandiae* 194. 1810, *Essai d'une Nouvelle Agrostographie* 54, 168, 170. 1812 and *Bibliotheca Botanica* 85: 329. 1915, *Phanerogamarum Monographiae* 13: 127. 1981.

in English: soft beard-grass

Orcuttia Vasey

Dedicated to the American (California) botanist Charles Russell Orcutt, 1864-1929, plant collector and naturalist, 1882-1886 Baja California, editor of *The West American Scientist*. vols. 1-21. 1881-1919, he is best known for his *Flora of Southern and Lower California*. San Diego 1885, *Botany of Southern California*. San Diego 1901 and *American Plants*. San Diego 1907-1912. See H. Du Shane, *The Baja California Travels of Charles Russel Orcutt*. Los Angeles 1971; G.P. Trujillo, *Bibliografía de Baja California*. Tijuana 1967; Ira L. Wiggins, *Flora of Baja California*. 42. Stanford, California 1980; G. Murray, *History of the collections contained in the Natural History Departments of the British Museum*. 1: 172. London 1904; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 295. 1972; S. Lenley et al., *Catalog of the manuscript and archival collections and index to the correspondence of John Torrey*. Library of the New York Botanical Garden. 318. 1973; E.M. Tucker,

Catalogue of the library of the Arnold Arboretum of Harvard University. 1917-1933.

Five species, U.S., California, Mexico. Chloridoideae, Orcuttieae, or Chloridoideae, Cynodonteae, Orcuttiinae, annual, herbaceous, aquatic, floating, unbranched, aromatic, auricles absent, ligule absent, plants bisexual, inflorescence a spike or raceme, spikelets laterally flattened, distichous spikelets, 2 glumes more or less equal, many-nerved glumes more or less toothed and papery, lemma acuminate lobed, palea present, lodicules absent, 3 stamens, 2 stigmas, growing in seasonally inundated areas, type *Orcuttia californica* Vasey, see *Bulletin of the Torrey Botanical Club* 13: 219, pl. 60. 1886, *Erythea, a Journal of Botany, West American and General* 6: 109. Berkeley, California 1898 and 7: 43. 1899, *Österreichische Botanische Zeitschrift* 49: 134. 1899 and *Bulletin of the Torrey Botanical Club* 68: 149-156. 1941, *Madroño* 15: 97-110. 1959, *A California Flora 1959, Madroño* 18: 20. 1965, *American Journal of Botany* 69: 1082-1095. 1982, F.T. Species

O. californica Vasey (*Orcuttia californica* var. *californica*; *Orcuttia californica* var. *inaequalis* (Hoover) Hoover; *Orcuttia californica* var. *viscida* Hoover; *Orcuttia inaequalis* Hoover; *Orcuttia viscida* (Hoover) Reeder)

California, U.S., Mexico. See *Bulletin of the Torrey Botanical Club* 13: 219, pl. 60. 1886 and *Madroño* 3: 229. 1936, *Bulletin of the Torrey Botanical Club* 68(3): 154-155. 1941, *Phytologia* 47(3): 221. 1980.

O. inaequalis Hoover (*Orcuttia californica* Vasey; *Orcuttia californica* var. *inaequalis* (Hoover) Hoover)

U.S. See *Bulletin of the Torrey Botanical Club* 13: 219, pl. 60. 1886 and *Madroño* 3: 229. 1936, *Bulletin of the Torrey Botanical Club* 68(3): 154-155. 1941, *Manual of the Grasses of the United States* (edition 2, revised by A. Chase) 1951, *American Journal of Botany* 69(7): 1082-1095. 1982, *The Jepson Manual: Higher Plants of California* 1993.

in English: San Joaquin Valley Orcutt grass

O. pilosa Hoover

U.S. Endangered species, rare, see *Bulletin of the Torrey Botanical Club* 68(3): 155-156. 1941.

in English: hairy Orcutt grass

O. tenuis A. Hitchc.

U.S. In open sandy soil, see *American Journal of Botany* 21(3): 131. 1934.

in English: slender Orcutt grass

O. viscida (Hoover) Reeder (*Orcuttia californica* var. *viscida* Hoover)

U.S. See *Bulletin of the Torrey Botanical Club* 13: 219, pl. 60. 1886 and *Bulletin of the Torrey Botanical Club* 68(3): 155. 1941, *Phytologia* 47(3): 221. 1980, *American Journal of Botany* 69(7): 1082-1095. 1982.

in English: Sacramento Orcutt grass

Oreostachys Gamble = *Nastus* Juss.

From the Greek *oreios* “from the mountains” and *stachys* “spike.”

Bambusoideae, Bambusodae, Bambuseae, Bambusinae, Hickeliinae, type *Oreostachys pullei* Gamble, see *Genera Plantarum* 34. 1789, *Systema Naturae ... editio decima tertia, aucta, reformata* 2: 580. 1791 and *Verhandelingen der Koninklijke Nederlandsche Akademie van Wetenschappen: Afdeling Natuurkunde: Tweede Sectie* 10: 685. 1908, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 52: 174. 1914, *Bulletin du Muséum National d'Histoire Naturelle* 25(2): 672. 1919, *Journal of the Arnold Arboretum* 6(3): 152. 1925, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 62: 460. 1929, *Blumea* 2: 71. 1936, *Kew Bulletin* 10: 594. 1956.

Oreobambos K. Schumann = *Oreobambos* K. Schumann

From the Greek *oros* “mountain” plus *Bambos*.

One species, Uganda to Zimbabwe, tropical East Africa. Bambusoideae, Bambusodae, Bambuseae, Bambusinae, perennial, in dense clumps, woody, arborescent, arching, spreading, drooping, unarmed, persistent, flowering culms leafy, sympodial, rhizomes pachymorph, plants bisexual, inflorescence cupuliform of pseudospikelets, involucre-like bracts surrounding the spikelets, 2 flowers, glume 1 per spikelet, lemmas more or less equal, palea keeled, lodicules absent, 6 stamens, ovary hairy, 1 stigma, flowering culms leafy, forest, along the streams, in the shade of trees, clearings in evergreen forest, type *Oreobambos buchwaldii* K. Schum., see *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 1: 178. 1896 and *Fl. Trop. E. Afr. Gram.* 1: 13, f. 4. 1970.

Species

O. buchwaldii K. Schum. (for the German botanist Johannes Buchwald, 1869-1927, collector in Tanzania, with A. Engler in East Africa, worked with Karl Otto Robert

Peter Paul Graebner (1871-1933). See J.H. Barnhart, *Biographical notes upon botanists*. 1: 275. 1965; I. Urban, *Geschichte des Königlichen Botanischen Museums zu Berlin-Dahlem (1815-1913). Nebst Aufzählung seiner Sammlungen*. Dresden 1916)

Africa, Burundi, Malawi. Soft hollow bamboo, weak, smooth, shiny, forming clumps, sheaths finely hairy, leaves lanceolate to oblong, flowers bisexual, bracts forming loose cup-shaped heads, 6 stamens, ovary with silky hairs at the apex, stems used for pig fences and for making baskets, in open habitats, along rivers, swamp forest, evergreen rain-forest, on rocky slopes, along mountain streams, see *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 1: 178. 1896.

in English: large green bamboo, Buchwa bamboo (Mount Buchwa in Zimbabwe)

in Malawi: liulawe, tolanje

Oreocalamus Keng = *Chimonobambusa* Makino

From the Greek *oros* “mountain” and *kalamos* “a reed, cane.”

Bambusoideae, Bambuseae, Arundinariinae, Shibataeinae, or Bambusoideae, Bambuseae, Arundinariinae, type *Oreocalamus szechuanensis* (Rendle) Keng, see *Annals of the Royal Botanic Garden, Calcutta*. 7: 130, t. 119. 1896 and *Botanical Magazine* (Tokyo) 28(329): 153. 1914, *Plantae Wilsonianae* 2(1): 64. 1914, *Sunyatsenia* 4(3-4): 146-151, t. 37. Canton 1940, *Technical Bulletin of the National Forestry Research Bureau* 8: 15. 1948, *Taxon* 6(7): 201-202. 1957, *Acta Botanica Yunnanica* 2(1): 91-92, 96-99, pl. 3, 4. 1980, *Acta Phytotaxonomica Sinica* 21(1): 96-99, pl. 2. 1983, *Acta Botanica Yunnanica* 5(1): 42-44, 45-46, pl. 3, 4. 1983, *Kew Bulletin, Additional Series* 13: 48. 1986, *Journal of Bamboo Research* 5(2): 22. 1986, *Journal Nanjing University. Natural Sciences Edition* 22(3): 416. 1986, *Kew Bulletin* 44(2): 349-367. 1989, *Contributions from the United States National Herbarium* 39: 36, 89. 2000.

Oreochloa Link

From the Greek *oros* “mountain” and *chloe, chloa* “grass.”

Four species, southern Europe. Pooideae, Poodae, Seslerieae, perennial, herbaceous, rhizomatous, caespitose, auricles absent, leaf sheaths with joined margins, ligule an unfringed membrane, plants bisexual, contracted inflorescence paniculate, raceme unilateral, spikelets imbricate and 3- to 7-flowered, 2 glumes very unequal or subequal, lemmas membranous and keeled, palea present, lodicules present, 3 stamens, ovary glabrous, 2 stigmas, open habitats, montane, rocky places, sometimes referred to *Sesleria*, type

Oreochloa disticha (Wulfen) Link, see Petri Arduini ... *Animadversionum botanicarum* specimen. Patavii 1759, *Flora Carniolica* 189. 1760, Petri Harduini veronensis horti publici patavini custodis *animadversionum botanicarum specimen alterum*. Venetia 1764, *Hortus Regius Botanicus Berolinensis* 1: 44. 1827 and *Ind. Nom. Genericorum* 3: 1607. 1979.

Species

O. blanka Deyl (*Oreochloa disticha* subsp. *blanka* (Deyl) Kupfer)

Central Europe. See *Opera Botanica Cechica* 3: 244. 1946, *Boissiera*. 23: 54. 1974.

O. disticha (Wulfen) Link (*Poa disticha* Wulfen; *Sesleria disticha* (Wulfen) Pers.)

Europe. See *Nicolai Josephi Jacquin Miscellanea austriaca* ... 2: 74. 1781 and *Boissiera*. 23: 54. 1974.

O. pedemontana Reut. (*Sesleria pedemontana* (Reut.) Steud.)

See *Flora Novae-Zelandiae* 126. 1852, *Synopsis Plantarum Glumacearum* 1: 296. 1854.

O. seslerioides (All.) K. Richt. (*Poa seslerioides* All., also spelled *sesleroides*)

Europe. See *Flora Pedemontana* 2: 246. 1785.

Oreopoa Gand. = *Poa* L.

From the Greek *oros* "mountain" and *poa* "grass, pasture grass."

Pooideae, Poeae, Poinae, type *Poa alpina* L., see *Species Plantarum* 1: 67-68. 1753, *Flora Europaea* 26: 186. 1891 and *Ill. Fl. U.S. Canada* edition 2, 1: 252. 1913, *Contributions from the United States National Herbarium* 48: 468, 505-580. 2003.

Orinus Hitchc.

From the Greek *oros* "mountain" alluding to the habitat, or Greek *orino* "move, excite."

About 2-4 species, China, Kashmir, Nepal, western Himalayas. Chloridoideae, perennial, herbaceous, unarmed, rhizomatous, tufted, rhizomes pachymorph, widely spreading scaly rhizomes, auricles absent, ligule membranous, leaves pungent, plants bisexual, without hidden cleistogenes, inflorescence spicate and nondigitate, racemes erect or ascending on a central axis, spikelets solitary and shortly pedicellate, 2 glumes subequal, upper glume 3-nerved, lemmas keeled hairy acute to mucronate, palea keels pilose, 3 stamens, 2 stigmas, useful stabilizers of dunes, sand-binding grasses, open habitats, montane, desert sand dunes, shifting sands, at high altitude, slopes, related to *Kengia*,

type *Orinus arenicola* Hitchc., see *Journal of the Washington Academy of Sciences* 23: 136. 1933, *Kew Bulletin* 1951: 454. 1952, *Claves Generum et Specierum Graminearum Primarium Sinicarum Appendice Nomenclatione Systematica* 176. 1957.

Species

O. anomala Keng ex Keng f. & L. Liou (*Orinus anomala* Keng)

China. Culms loosely tufted, erect, leaf blades stiff, ligule erose, linear panicle, see *Claves Generum et Specierum Graminearum Primarium Sinicarum Appendice Nomenclatione Systematica* 176. 1957, *Acta Botanica Sinica* 9: 68. 1960.

in China: ji zhua cao

O. kokonorica (K.S. Hao) Keng (*Cleistogenes kokonorica* Hao; *Diplachne kokonorica* (Hao) Conert; *Kengia kokonorica* (Hao) Packer)

China. Erect, more or less smooth, leaf sheaths glabrous, ligule lacerate, leaf blades stiff, narrow panicle, glumes lanceolate, see *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 68(5): 582. 1938, *Claves Generum et Specierum Graminearum Primarium Sinicarum Appendice Nomenclatione Systematica* 176. 1957, *Fl. Ill. Pl. Prim. Sin. Gramin.* 284. f. 230. 1959, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 78(2): 230. 1959, *Botaniska Notiser* 113: 293. 1960.

in China: qing hai gu sha cao

O. thoroldii (Stapf ex Hemsley) Bor (*Cleistogenes thoroldii* (Stapf ex Hemsley) Roshev.; *Diplachne thoroldii* Stapf ex Hemsley; *Orinus arenicola* Hitchcock) (for the British explorer William Grant Thorold, surgeon Captain of the Indian Medical Service, 1891-1892 botanical collector in Tibet with Capt. Hamilton Bower. See Emil Bretschneider (1833-1901), *History of European Botanical Discoveries in China*. 807. [Reprint of the original edition 1898] Leipzig 1981; H. Bower, *Geogr. Journal* 1: 385-408. 1893; W.B. Hemsley, "On two small collections of dried plants from Tibet." *Linn. Soc. Journal* 30: 101-140. 1894; Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 90, 684. London 1994)

China. Erect, slender, roots woolly, leaf sheaths hirsute, ligule lacerate, see *Journal of the Linnean Society, Botany* 30(206): 121. 1894 and *Journal of the Washington Academy of Sciences* 23: 136. 1933, *Kew Bulletin* 1951: 454. 1952, *Fl. Kazakhst.* 1: 208. 1956.

in China: gu shao cao

O. tibeticus N.X. Zhao

Asia. Erect, densely pilose, leaf sheaths pilose, ligule lacerate, see *Acta Botanica Yunnanica* 16(3): 228, f. 1. 1994. in China: xi zang gu sha cao

Oriza J. St.-Hil. = *Leersia* Sw., *Oryza* L.

Bambusoideae, Oryzodae, Oryzeae, Oryzinae, or Ehrhar-toideae, Oryzeae, Oryzinae, see *Species Plantarum* 1: 55. 1753, *Nova Genera et Species Plantarum seu Prodrum* 21. 1788, *Exposition des Familles Naturelles* 1: 87. 1805 and Ludwig von Sarnthein (1861-1914) & Karl Wilhelm von Dalla Torre von Thurnberg-Sternhoff (1850-1928), *Flora der gefürsteten Grafschaft Tirol ...* 6: 142. Innsbruck 1900-1913, *Acta Botanica Cubana* 4: 1-11. 1980, *Acta Facultatis Rerum Naturalium Universitatis Comenianae, Botanica* 33: 63-67. 1986, *Contributions from the United States National Herbarium* 39: 64-67, 89-92. 2000.

Ornithocephalochloa Kurz = *Thuarea* Pers.

From the Greek *ornis*, *ornithos* “a bird,” *kephale* “head” and *chloe*, *chloa* “grass, young grass.”

Paniceae, type *Ornithocephalochloa arenicola* Kurz, see *Syn. Pl.* 1: 110. 1805, *Journal of Botany, British and Foreign* 18: 332, t. 171, f. 1-18. 1875.

Ornithospermum Dumoulin = *Echinochloa*

P. Beauv.

From the Greek *ornis*, *ornithos* “a bird” and *sperma* “seed.”

Panicoideae, Paniceae, Panicinae, see *Species Plantarum* 1: 55. 1753, *Fl. Bourg.* 1: 495. 1782, *Essai d'une Nouvelle Agrostographie* 53, 161, 169, t. 11, f. 2. 1812, *Observations sur les Graminées de la Flore Belgique* 137-138. 1823 [1824], *Flora Brasiliensis seu Enumeratio Plantarum* 2: 255. 1829, *A Manual of the Botany of the Northern United States* 614. 1848 and *Contributions from the United States National Herbarium* 46: 215-224, 303. 2003.

Oropetium Trin. = *Chaetostichium* C.E.

Hubb., *Kralikella* Coss. & Dur., *Lepturella* Stapf

Possibly from the Greek *oros* “mountain” and *pedion* “a plain, flat, open country, a field.”

About 3-6 species, Africa to India. Chloridoideae, Eragrostideae, perennial, rarely annual, variable, low to dwarf, small to tiny, herbaceous, unarmed, tufted, erect, compressed culms, leaves nonauriculate, leaf blades filiform, ligule a membrane ciliolate or unfringed, plants bisexual, inflorescence a single straight to curved spike or raceme, spikelets solitary and distichous embedded in the axis, floret 1 bisexual, 2 or 1 glumes persistent per spikelet, lower glume absent or small, upper glume concealing the floret, lemma emarginate to bidentate, palea narrow, 2 free and fleshy minute lodicules or absent, 3 stamens, ovary

glabrous, 2 dark stigmas, in open habitats, arid regions, bare ground, eroded places, mountains, shallow soil, rocky sites, outwash from the rocky hills, sometimes referred to *Tri-pogon* Roem. & Schult., type *Oropetium thomaeum* (L.f.) Trin., see *Fundamenta Agrostographiae* 98. 1820 and *Bulletin de la Société Botanique de France: Mémoires* 8(d): 222. 1912, *Hooker's Icones Plantarum* 34: t. 3341. 1937, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 74: 14. 1945, *Kew Bulletin* 30: 467-470. 1975, *New Phytologist* 154(1): 15-28. Apr 2002, *New Phytologist* 156(3): 327-349. Dec 2002, *New Phytologist* 165(2): 391-410. Feb 2005, *Botanical Journal of the Linnean Society* 148(1): 57-72. May 2005 [Caryopsis morphology of the Chloridoideae (Gramineae) and its systematic implications].

Species

O. aristatum (Stapf) Pilger (*Lepturella aristata* Stapf)

Tropical Africa. Perennial bunchgrass, appressed culms, lemma awned, low grazing value, in rocky places, crevices, shallow soil, see *Bulletin de la Société Botanique de France: Mémoires* 8: 222. 1912, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 74: 14. 1947.

in Mali: dedu na, dedu ia, dedu ya

O. capense Stapf (*Lepturella capensis* (Stapf) Stapf; *Oropetium erythraeum* Chiov.)

Eastern tropical Africa, southern Africa, Somalia, Ethiopia. Perennial, low to dwarf, densely tufted, leaves usually pilose, solitary spike or raceme straight or curved, spikelets more or less deeply embedded, upper glume acute, low grazing value, eaten by sheep, found in open habitats, arid places, deciduous bushland, slopes, on steep mountain side, disturbed veld, shallow soil, rocky or gravelly sites, see *Flora Capensis* 7: 742. 1900, *Annuario del Reale Istituto Botanico di Roma* 2: 366. 1905, *Bulletin de la Société Botanique de France* 58(8): 223. 1912, *Bulletin de la Société d'Histoire Naturelle de l'Afrique du Nord* 33(4): 90. 1942, *Willdenowia* 14(1): 160. 1984.

in English: dwarf grass

n Mali: dedu na, dedu ia, dedu ya

in Somalia: nilo kois

in South Africa: haasgras

O. hesperidum Maire (*Oropetium capense* var. *hesperidum* (Maire) H. Scholz & P. König)

Morocco. See *Flora Capensis* 7: 742. 1900, *Bulletin de la Société d'Histoire Naturelle de l'Afrique du Nord* 33(4): 90. 1942, *Willdenowia* 14(1): 160. 1984.

O. minimum (Hochst.) Pilg. (*Chaetostichium majusculum* C.E. Hubb.; *Chaetostichium minimum* (Hochst.) C.E. Hubb.; *Chaetostichium minimum* var. *macrochaetum* Chiov., also spelled *macrochaetum*; *Chaetostichium minimum* var.

microchaetum Chiov.; *Lepturus minimus* Hochst.; *Oropetium majusculum* (C.E. Hubb.) Cufod.)

Tropical Africa, Arabia, Somalia. Perennial, densely tufted, dwarf, leaves densely pilose, curved inflorescence coiled or rarely straight, spikelets superficially embedded, upper glume acuminate or awned, lemma mucronate, growing in rocky areas, grassy plains, shallow depressions, dry sandy soils, open rocky ground, see *Flora* 38: 332. 1855 and *Hooker's Icones Plantarum* 34: t. 3341. 1937, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 74: 14. 1947, *Webbia* 8: 107-108. 1951, *Kew Bulletin* 1957: 60. 1957, *Bulletin du Jardin Botanique National de Belgique* 38: 1285. 1968, *Kew Bulletin* 50: 601-604. 1995.

in Somalia: harfo

O. thomaeum (L.f.) Trin. (*Nardus thomaea* L.f.; *Rottboellia thomaea* (L.f.) J. König; *Rottboellia thomaea* (L.f.) Willd.) (India, Madras, St. Thomé)

Tropical Africa, India, Kenya, Ethiopia, Somalia, Sri Lanka, Indochina, Burma. Perennial or annual, dwarf, densely tufted, strongly branched, leaf sheaths nerved, inflorescence straight or curved, spikelets distichous and deeply embedded, upper glume acute, lower glume obtuse, slopes, in shallow soil, granitic areas, dry and arid zones, see *Supplementum Plantarum* 105. 1781, *Der Naturforscher* 23. 1788, *Species Plantarum. Editio quarta* 1: 464. 1797, *Fundamenta Agrostographiae* 98, t. 3. 1820, *Enum. Pl. Zeyl.* 5: 363. 1864 and *Handb. Fl. Ceylon* 5: 271. 1900, *Grasses of Ceylon* 91. 1956, *Ceylon J. Sci., Biol. Sci.* 2(2): 126. 1959, *Grasses of Burma ...* 474. 1960, *Kew Bulletin* 50: 601-604. 1995.

in India: kuravan thodu pul

Orostachys Steudel = Hordelymus (Jess.)

Jess. ex Harz, *Hordelymus* (Jessen) Jessen in Harz, *Hordelymus* (Jessen) Harz, *Orostachys* Fisch. (Crassulaceae)

Greek *oros* “mountain” and *stachys* “a spike.”

Pooideae, Triticeae, Triticeae, see *Mémoires de la Société Impériale des Naturalistes de Moscou* 2: 270. 1809, *Nomenclator Botanicus. Editio secunda* 2: 233. 1841, *Deutschlands Gräser und Getreidearten...* 202. Leipzig 1863, *Landwirtschaftliche Samenkunde* 2: 1147. Berlin 1885.

Orrhopygium Á. Löve = Aegilops L.

From the Greek *orropygion*, *orsopygion*, *orthopygion* “rump of birds, tail, rump of any animal,” *orros* “rump, end of the *os sacrum*,” Latin *orrrhopygium* (a false read. for *orthopygium*), *orthopygium* “the rump and tail feathers of birds.”

Pooideae, Triticeae, Triticeae, type *Orrhopygium caudatum* (L.) Á. Löve, see *Species Plantarum* 1: 85. 1753, *Species Plantarum* 2: 1050-1051. 1753, *Flore de France* 3: 601. 1856 and *Feddes Repert.* 91: 225-228. 1980, *Biologisches Zentralblatt* 101(2): 206. 1982, *Taxon* 41: 555-556. 1992, *Taxon* 44: 611-612. 1995, *Contributions from the United States National Herbarium* 48: 20-23, 468. 2003.

Ortachne Nees ex Steudel = Anatherostipa (Hack. ex Kuntze) Peñailillo, *Lorenzochloa* J.R. Reeder & C. Reeder, *Ortachne* Steudel, *Orthachne* Hughes, *Parodiella* J. & C. Reeder, *Parodiella* Speg. (Fungi), *Stipa* L.

About 2-3 species, Patagonia, Antarctic, Peru, Andes. Pooideae, Stipeae, Stipinae, or Stipoideae, Stipeae, perennial bunchgrass, tufted to densely caespitose, herbaceous, short, unbranched, leaf blades filiform and rather spiny-tipped, leaves erect and rigid, plants bisexual, open inflorescence, a narrow few-flowered panicle, 1-flowered spikelets, 2 glumes awnless, glumes and lemma membranous, glumes shorter than floret, awn persistent, large lemma gradually narrowing to thick stiff awn, palea membranous, lodicules present, 3 stamens, open habitats, hilltops, páramos, montane woodland, among rocks, steep slopes, related to *Stipa*, type *Ortachne retorta* Nees ex Steud., see *Species Plantarum* 1: 78. 1753, Ernst Gottlieb von Steudel (1783-1856), *Synopsis plantarum glumacearum.* 1: 121. Stuttgartiae 1854, *Anales de Sociedad Científica Argentina* 9: 178. 1880, *Journal of the Linnean Society, Botany* 19: 81. 1881 and *Anales del Museo Nacional de Montevideo* 4(22): IV, 135. 1901, *Bulletin of Miscellaneous Information Kew* 1923(8): 301-303. 1923, *Contr. U.S. Natl. Herb.* 24(7): 216. 1925, *Gayana, Botánica* 13: 1-137. 1965, *Boletín de la Sociedad Argentina de Botánica* 12: 268-283. 1968, *Boletín de la Sociedad Argentina de Botánica* 11(4): 239. 1969, *Kew Bulletin* 40(4): 727-729. 1984[1985], *Flora Mesoamericana* 6: 244-245. 1994, *Gayana, Botánica* 53(2): 277-284. 1996, *Contributions from the United States National Herbarium* 48: 109-110, 431, 468-469, 477. 2003.

Species

O. breviseta Hitchc. (*Stipa breviseta* (Hitchc.) Martic. & Quezada, nom. illeg., non *Stipa breviseta* Caro & E.A. Sánchez; *Stipa yatesensis* Martic. & Quezada)

Chile. See *Journal of the Washington Academy of Sciences* 17: 141. 1927, *Gayana, Botánica* 42(1-2): 152. 1985, *Gayana, Botánica* 43(1-4): 149. 1986.

O. erectifolia (Swallen) W.D. Clayton (*Lorenzochloa erectifolia* (Swallen) Reeder & C. Reeder; *Muhlenbergia erectifolia* Swallen; *Parodiella erectifolia* (Swallen) Reeder & C. Reeder)

South America, Colombia, Ecuador. Caespitose, foliage erect, densely clumped, páramos, see *Journal of the Washington Academy of Sciences* 21(1): 15. 1931, *Boletín de la Sociedad Argentina de Botánica* 12(279): 279-280, f. 1A-B, D-F, 3. 1968, *Boletín de la Sociedad Argentina de Botánica* 11(4): 239. 1969, *Kew Bulletin* 40(4): 729. 1985.

O. rariflora (Hook.f.) Hughes (*Muhlenbergia rariflora* Hook.f.; *Ortachne retorta* Steud.; *Ortachne retorta* Nees ex Steud.; *Stipa rariflora* (Hook.f.) Benth.; *Stipa retorta* (Nees ex Steud.) Mez, nom. illeg., non *Stipa retorta* Cav.)

South America, Falkland Islands. See *Flora Antarctica* 2: 371. 1846, *Synopsis Plantarum Glumacearum* 1: 121. 1854, *Journal of the Linnean Society, Botany* 19: 81. 1881 and *Repertorium Specierum Novarum Regni Vegetabilis* 17: 208. 1921, *Bulletin of Miscellaneous Information Kew* 1923: 301. 1923.

Orthachne Hughes = *Ortachne* Nees ex Steud.

Orthachne var.

Pooideae, Stipeae, Stipinae, see *Bulletin of Miscellaneous Information Kew* 1923(8): 301-303. 1923, *Contributions from the United States National Herbarium* 48: 468-469. 2003.

Orthoclada P. Beauv.

With straight shoots, from the Greek *orthos* “upright, straight” and *klados* “branch.”

About 2 species, tropical Africa, Zambia, Tanzania, Zaire, Amazon, tropical South America, southern Mexico, West Indies. Centothecoideae, Centothecaeae, or Bambusoideae, Oryzodae, Centothecaeae, or Panicoideae, Centothecaeae, perennial, herbaceous, unarmed, tufted, coarse, rhizomatous, branched only at base, erect or sometimes decumbent, rooting at the lower nodes, flowering culms leafy, auricles present, large leaf blades narrowly elliptic with well developed pseudopetioles, ligule a ciliolate membrane-like, plants bisexual, inflorescence spicate or paniculate and not sticky, large loose panicle with long and very fine branches, spikelets solitary and pedicellate, 1- to 4-flowered and all florets bisexual, upper floret disarticulating below lemma, two glumes unequal to very unequal, lemmas acuminate or with an awn tip, palea present, 2 free and fleshy lodicules, 2-3 stamens, ovary glabrous, 2 stigmas, resembling *Pharus*, shade, evergreen or semideciduous forest, along streams and rivers, forest floor, hills, in moist tropical lowland, type *Orthoclada rariflora* (Lam.) P. Beauv., see *Encyclopédie Méthodique, Botanique* 4: 746. 1798, *Essai d'une Nouvelle*

Agrostographie 69-70, 168, 170, t. 14, f. 9. 1812 and *Fl. Malay Pen.* 3: 122. 1907, W.C. Burger, (editor), *Flora Costaricensis*. [R.W. Pohl, Family 15. Gramineae] *Fieldiana: Botany, New Series* 4: 1-608. 1980, *Taxon* 30: 615. 1981, *Flora Mesoamericana* 6: 248. 1994, *Contributions from the United States National Herbarium* 46: 303-304. 2003.

Species

O. africana C.E. Hubb.

Zambia, Zimbabwe. See *Hooker's Icones Plantarum* 35: t. 3419. 1940.

O. laxa (Rich.) P. Beauv. (*Aira laxa* Rich.; *Orthoclada laxa* P. Beauv.; *Orthoclada rariflora* (Lam.) P. Beauv.; *Orthoclada rariflora* var. *lanceolata* Döll; *Orthoclada rariflora* var. *rariflora*; *Orthoclada rariflora* var. *sesquiflora* Döll; *Orthoclada rariflora* var. *sesquitertia* Döll; *Panicum rariflorum* Lam., nom. illeg. superfl.; *Panicum rariflorum* (J.C. Mikan ex Trin.) Makino & Nemoto, nom. illeg., non *Panicum rariflorum* Lam.; *Panicum rariflorum* J. Presl ex Steud., nom. illeg., non *Panicum rariflorum* Lam.; *Poa rariflora* (Lam.) Roem. & Schult.; *Poa subumbellata* Roem. & Schult.; *Setaria rariflora* J.C. Mikan ex Trin.)

French Guiana, Venezuela, Costa Rica, Brazil. Perennial, erect, hollow, terete, caespitose, branched only at base, more or less decumbent, geniculate or creeping, rooting at the lower nodes, leaf sheaths open, leaf blades acuminate, terminal open ovate panicle, spikelets lanceolate and laterally flattened, glumes lanceolate, two stamens, sometimes weedy, forming colonies, riverbanks, along streams and rivers, clearings, open areas, see *Actes de la Société d'Histoire Naturelle de Paris* 1: 106. 1792, *Encyclopédie Méthodique, Botanique* 4: 746. 1798, *Essai d'une Nouvelle Agrostographie* 70, 149, 168, 170, t. 14, f. 9. 1812, *Systema Vegetabilium* 2: 570. 1817, *Neue Entdeckungen im ganzen Umfang der Pflanzenkunde* 2: 78. 1821, *Synopsis Plantarum Glumacearum* 1: 51. 1853, *Flora Brasiliensis* 2(3): 118, f. 35. 1878 and *Flora of Japan* 1475. 1925, *Brittonia* 23(3): 293-324. 1971.

in Mexico: cadillo

Orthopogon R. Br. = *Oplismenus* P. Beauv.

From the Greek *orthos* “upright” and *pogon* “a beard.”

Panicoideae, Paniceae, Panicinae, type *Orthopogon compositus* (L.) R. Br., see Robert Brown (1773-1858), *Prodromus florae Novae Hollandiae et Insulae van-Diemen*. 194. London 1810, *Flore d'Oware* 2: 14-15, t. 68, f. 1. 1807 [1810] and *U.S. Dept. Agric. Bull.* 772: 238. 1920, *Contr. U.S. Natl. Herb.* 22: 123. 1920, *Contributions from the United States National Herbarium* 46: 299-303, 304. 2003.

Orthoraphium Nees = *Stipa* L.

From the Greek *orthos* “upright” and *rhaphis*, *rhaphidos*, *raphis* “a needle, raphe.”

Pooideae, Stipeae, Stipinae, type *Orthoraphium roylei* Nees (*Stipa orthoraphium* Steudel), see *Species Plantarum* 1: 78. 1753, *Proceedings of the Linnean Society of London* 1: 94. 1848, *Grasses of North-Western India* 27. 1883 and *Repertorium Specierum Novarum Regni Vegetabilis* 17(486-491): 207. 1921, *Contr. U.S. Natl. Herb.* 24(7): 216. 1925, *Sinensia* 4(11): 322-324, f. 2. 1934, *Journal of Japanese Botany* 17(7): 404. 1941, *Flora of Japan* 101. 1953, *Claves Generum et Specierum Graminearum Primarum Sinicarum Appendice Nomenclatione Systematica* 214. 1957, *Flora Tsinlingensis* 1(1): 150. 1976, *Grasses of Japan and its Neighboring Regions* 519. 1987, *Contributions from the United States National Herbarium* 48: 617-650. 2003.

x *Oryticum* C.P. Wang & S.H. Tang

Oryza x *Triticum*, China, *Oryticum oryzoides* C.P. Wang & S.H. Tang [*Oryza sativa* x *Triticum aestivum*], see *Acta Phytotaxonomica Sinica* 20(2): 179-181, pl. 1. 1982, *Genera Graminum* 375. 1986.

Oryza L. = *Leersia* Sol. ex Sw., *Oriza* J. St.-Hil., *Orysa* Desv., *Padia* Moritzzi

From the Latin and Greek *oryza* “rice,” Arabic *eruz*, Tamil *arisi* or *erisi*, Malayalam *ari*; see Carl Linnaeus, *Species Plantarum*. 333. 1753 and *Genera Plantarum*. Edition 5. 155. 1754; P. Sella, *Glossario latino emiliano*. Città del Vaticano 1937; Salvatore Battaglia, *Grande dizionario della lingua italiana*. Torino 1961-1989 etc.; Helmut Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 444-445. Basel 1996; Manlio Cortelazzo & Paolo Zolli, *Dizionario etimologico della lingua italiana*. 4: 1091. Bologna 1985; Ernest Weekley, *An Etymological Dictionary of Modern English*. 2: 1236. New York 1967.

About 18-22/25-28 species, tropics and subtropics. Bambusoideae, Oryzodae, Oryzeae, Oryzinae, or Ehrhartoideae, Oryzeae, Oryzinae, annual or perennial, tufted, aquatic or semiaquatic, flimsy to robust, shortly rhizomatous, herbaceous, unbranched or branched, erect or decumbent and rooting from lower nodes, culms internodes hollow, ligule membranous, auricles present and hairy, blade flat with smooth or scabrid margins, leaves linear to linear-lanceolate, plants bisexual, inflorescence an open and drooping panicle, spikelets usually solitary and strongly laterally compressed, spikelets pedicelled, 3 florets, 2 florets reduced to sterile lemmas, 1 fertile floret, two glumes present to absent, sterile lemmas leathery, fertile coriaceous uppermost lemma keeled and awned or awnless, palea nerved

and keeled, 2 lodicules membranous, stamens 6, ovary glabrous, 2 stigmas, African and Asian rices are principally carbohydrate sources, nomenclature of wild rices has been very confused, because of the complicated variation of inter- and intraspecies there has so far been much confusion in taxonomy and nomenclature, these are basically aquatic plants but some species grows on the slope of mountains with no standing water, weedy rice is a troublesome weed widespread all over the world — in partial or full shade, full sun, open and often flooded areas, rainforests, pampas, grasslands, humid forests, open swamps, hybridizes with *Triticum* L., resembling *Leersia*, type *Oryza sativa* L., see Carl Linnaeus, *Species Plantarum* 1: 333. 1753, *Genera Plantarum*. Edition 5. 155. 1754, *Nova Genera et Species Plantarum seu Prodrum* 1, 21. 1788, *Exposition des Familles Naturelles* 1: 87. 1805, *Journal de Botanique, Appliquée à l'Agriculture, à la Pharmacie, à la Médecine et aux Arts* 1: 76, 77. 1813, *Révision des Graminées* 1: 6. 1829, H.G.L. Reichenbach (1793-1879), *Repertorium herbarii sive nomenclator generum plantarum systematicus, synonymicus et alphabeticus* ... 36. Dresden und Leipzig 1841 [also *Der deutsche Botaniker* ... Erster Band. *Das Herbarienbuch*.], *Systematisches Verzeichniss der von H. Zollinger in den Jahren 1842-1844* 103. 1845, *J. Linn. Soc. Bot.* 19: 54. 1881, *Histoire des Plantes* 12: 165, 166, 291. 1893, *The Flora of British India* 7: 93. 1896 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 52(1-2): 168. 1914, *Bibliotheca Botanica* 85(1): 333. 1915, *Gen. in Iraq: birinj

in Sanskrit: vriki

O. alta Swallen (*Oryza latifolia* Desv.; *Oryza latifolia* var. *grandispiculis* A. Chev.)

South America, Brazil, Paraguay. Perennial or annual, aquatic or semiaquatic, erect, broad leaves, panicles open, large to small grain and wide leaf width, may form floating mats, found in savannah, in wet places, along the streams, rivers, lake edges, canals in deep waters, sometimes in woodlands, close to *Oryza latifolia* Desv., see *Journal de Botanique, Appliquée à l'Agriculture, à la Pharmacie, à la Médecine et aux Arts* 1: 77. 1813 and *Revue internationale de botanique appliquée et d'agriculture tropicale* 12: 1027. 1932, *Publications of the Carnegie Institution of Washington* 461: 156, t. 1-2. 1936, *Brittonia* 23(3): 293-324. 1971, *Darwiniana* 30(1-4): 87-94. 1990, *Japanese Journal of Genetics* 70: 47-55. 1995.

O. australiensis Domin

Northern Australia. A weakly perennial species, erect, tufted, rhizomatous, strap-shaped leaves gray-green or dark green, nodes glabrous, panicles open with axis scabrous, spikelets pear-shaped, pedicel hairy, soft and wispy awns, grains eaten, fodder plant, grows in open habitats, found in undulating plains of *Eucalyptus* and *Leptochloa* or box woodland, in wet places, swamps or adjacent to swamps, edges of freshwater lagoons, seasonally dry pools, seasonally wet depression, alluvial streams, seasonal/intermittent freshwater ponds/marshes, sometimes grown by Aborigines, see *Bibliotheca Botanica* 85(1): 333. 1915.

in English: native rice

O. barthii A. Chev. (*Oryza breviligulata* A. Chev. & Roehr.; *Oryza glaberrima* subsp. *barthii* (A. Chev.) de Wet; *Oryza longistaminata* A. Chev. & Roehr.; *Oryza perennis* Moench; *Oryza perennis* subsp. *barthii* A. Chev.; *Oryza stapfii* Roshev.) (dedicated to the German traveler and explorer Heinrich Barth, 1821-1865, studied archeology, history, geography and law at the University of Berlin, 1844 graduated, 1849 British expedition to Bornu from Tripoli across the Sahara, appointed professor of geography at Berlin University and president of the Geographical Society, he published his discoveries in the five volume *Travels and Discoveries in North and Central Africa; Being a Journal of an Expedition Undertaken under the Auspices of H.B.M.'s Government in the Years 1849-1855*. London 1857-1858; met the German explorer and plant collector Eduard Vogel (1829-1856). See August Heinrich Petermann, 1822-1878, geographer, traveler, his writings include *African Discovery*. London 1854, *The Search for Franklin*. London 1852 and *An Account of the Progress of the Expedition to Central Africa ...* under Messrs. Richardson, Barth, Overweg and Vogel, in the years 1850, 1851, 1852 and 1853. London 1854; E. Weller, *Leben und Wirken August Petermanns*. Leipzig 1914; F.N. Hepper and Fiona Neate, *Plant Collectors in West Africa*. 8, 83. Utrecht 1971; J.H. Barnhart, *Biographical notes upon botanists*. Tropical Africa, Nigeria, West Africa, Parc national de Waza, Yaéré floodplains, Yaoundé. Annual wild floating rice species, robust, rare, erect to semierect or decumbent, long-stemmed, rooting at the lower nodes, short ligule rounded or truncate, compact to open panicles rarely having secondary branching, spikelets large, long and strong scabrid awns, sterile lemmas lanceolate, panicles shattering very early,

starchy roots, among the worst weed in West Africa and Sahel, wild ancestor species of *Oryza glaberrima* Steud., seeds eaten by humans, these plants are harvested by the people as food, spontaneously growing in a deep-water area in African savannah, forming weedy hybrids with cultivated rice, good grazing for all stock when young or before flowering, found in mopane or savannah woodlands, ponds, in deep or shallow water, seasonally flooded lands, rivers, streams, swamps, stagnant water and slowly flowing water or pools, depressions, see *Methodus Plantarum Horti Botanici* ... 197. 1797, *Synopsis Plantarum Glumacearum* 1: 3. 1855 [1853] and *Bulletin du Muséum National d'Histoire Naturelle* 16(7): 405-406. 1911, *Comptes Rendus de l'Académie des Sciences, Série 2, Méc. Phys. Chim. Sci., Univers. Sci. Terre* 159: 561. 1914, *Kulturpflanze* 29: 198. 1981, *Blumea* 32: 19. 1987.

O. brachyantha A. Chev. & Roehr.

Africa, Guinea, Sudan. Annual or short-lived perennial, aquatic, very slender culms and seeds, found in ponds, in shallow water, seasonally flooded lands, rivers, streams, swamps, stagnant water and slowly flowing water or pools, depressions.

in Senegal: malo sina

O. eichingeri A. Peter (*Oryza collina* (Trimen) S.D. Sharma & Shastry; *Oryza latifolia* var. *collina* (Trimen) Hook.f.; *Oryza sativa* var. *collina* Trimen)

Central Africa Republic, Côte d'Ivoire/Ivory Coast, Democratic Republic of Congo, Kenya, Rwanda, Tanzania, Uganda, Sri Lanka. Perennial wild rice, sometimes aquatic, short, hard and slender culms, erect, glabrous ligule, with or without rhizomes, panicles open to intermediately open to contracted, chlorophyllous veins across the length of the immature spikelets, grazed by wild animals, seeds eaten by birds, related to *Oryza officinalis* Wall. ex Watt, grown in the areas from shaded to half shaded, in seasonally wet situations, forest undergrowth, in undisturbed forests, gallery or evergreen forests, or forest margins, grows in damp or flooded sites such as pools, water holds, marshy places, pools in forests, streams or riverbanks and beds, in ditches, in sandy or gray loamy clay soils, confused with *Oryza rhizomatis* Vaughan, see *Journal of Botany, British and Foreign* 27: 169. 1889, *The Flora of British India* 7: 92. 1896 and *Indian Journal of Genetics and Plant Breeding* 25: 168. 1965, *Fl. Trop. East. Africa, Gramineae* 1: 31. 1970, *J. Linn. Soc., Bot.* 103: 160. 1990, *Acta Genetica Sinica* 24(5): 424-431. 1997.

O. glaberrima Steud. (*Oryza barthii* A. Chev. subsp. *glaberrima*)

West Africa, Nigeria, Sierra Leone. Annual, highly variable species, stout, mostly glabrous, dryland types and floating types, weak stalks, often rooted at the nodes, more or less branched or simple culms, reddish appearance, short and round ligules, compact panicles, flowers self-fertilizing, spikelets awnless, white grain and usually red husks, edible grain, sweet taste, keeps well after cooking, competes better with weeds, its grains tend to split, removing the husk is laborious, high nutritional quality, a carbohydrate source, baby foods, rice beer, gruel made from the seeds, Mandingo and Susu people use rice flour and honey to make a sweet-tasting bread, genetic interaction between African rice's wild and cultivated races, root eaten raw for diarrhoea, usually found in swampy and wet sites, see *Synopsis Plantarum Glumacearum* 1: 3. 1855 [1853] and *Bulletin du Muséum National d'Histoire Naturelle* 16(7): 405-406. 1911, *Revue internationale de botanique appliquée et d'agriculture tropicale* 26: 58. 1946, *Kulturpflanze* 29: 198. 1981, *Japan. J. Genet.* 60: 225-234. 1985, Khidir W. Hilu and Lioudmila V. Sharova, "Evolutionary implications of substitution patterns in prolamin genes of *Oryza glaberrima* (African rice, Poaceae) and related species." *Am. J. Bot.* 89: 211-219. 2002.

in English: African rice, Fula rice, glaberrima rice, red rice
in French: riz africain, riz de Casamance, riz de Baga, riz pluvial africain, vieux riz, riz flottant

in Cameroon: erisi (Banyong)

in Gambia: deberro, faton ndure, Fula mano, hombo fingo, keberro, keberro tima, mama saguia, mamading saguia, marboe saguia, ndure sanneh, nduree sanneh, sanun dingo, sona sanneh, tunkung gunakon, yakka, yakka ba

in Guinea: Baga-malé, djina suma, djina suna, gete, malé, riz de Baga

in Mali: ara geu, issa-mo (river rice), mou-bér (great rice), simoba

in Nigeria: babu rashi, betso, biya gero, buza (names for a special beer made from rice and honey), dan ciso, dan kashin shanu, dan mai zudan, dan tako, dan tanko, jan irin gari, osikapa obara obara, shinkaafaa sheefe, shinkaafaar biyau, shinkaafaa, tamba, tanko

in Senegal: diuna, malu

in Sierra Leone: apala, bomboto male, eko, epaser, gobe, kebele, koe, kokovaiye, Kono, kore, koro, kpakpati, kwe, mala, malai, male, malla, malo, malu, mande, mantalei, maro, marrai, maru, mba, mbei, njangei, nio, pa, paga, pakalaba, patimi, payaka, pele, res, sanganye, suma, yake

O. glumaepatula (also spelled ***glumipatula***) Steud. (*Oryza cubensis* Ekman ex Gotoh & Okura; *Oryza paraguayensis* Wedd. ex E. Fourn.; *Oryza perennis* Moench, nom. dub. var. *cubensis* Sampath, nom. nud.; *Oryza perennis* var. *glumipatula* (Steud.) C. Chev.; *Oryza rufipogon* Griff.)

Tropical regions of Central and South America. Perennial, tufted, scrambling, brittle culm near the base, diploid wild-rice species, vegetatively propagating, rapid and vigorous development of adventitious roots and shoots from each node, the life cycle of this species dependent on the water level variation, a potential use for restoration, sometimes included in *Oryza rufipogon* Griff., a floating meadow, distributed in wet areas and marshlands, in swamps and marshes, in open ditches and pools, beside rivers, near to cultivated rice fields, usually with deep water, in open habitats, see *Methodus Plantas Horti Botanici* ... 197. 1797, *Notulae ad Plantas Asiaticas* 3: 5, t. [Ic, t. Asiat.] 144, f. 2. 1851, *Synopsis Plantarum Glumacearum* 1: 3. 1855 [1853] and *Revue internationale de botanique appliquée et d'agriculture tropicale* 12: 1028. 1932, *J. Soc. Trop. Agric. Taihoku Univ.* 5: 363 f. 1. 1933, *Indian J. Genet. Pl. Breed.* 25(20): 157-167. 1965.

O. grandiglumis (Döll) Prod. (*Oryza latifolia* var. *grandiglumis* (Döll) A. Chev.; *Oryza sativa* var. *grandiglumis* Döll)

Brazil, Bolivia, Colombia, Peru. Perennial, aquatic or semi-aquatic, emergent, submerged or half-submerged, floating, tall, broad leaves membranous, pubescent ligule, inflorescence spicate, panicles open and lax, glumes are as long as lemmas and paleas, sterile lemma the same length as fertile lemma and palea, forage, found in savannah or woodland, wetlands, grows in water at river edges or wet places having clay and alluvial soils, small pools, in open and shaded habitats, formerly inundated ground, see *Species Plantarum* 1: 333. 1753, *Journal de Botanique, Appliquée à l'Agriculture, à la Pharmacie, à la Médecine et aux Arts* 1: 77. 1813, *Flora Brasiliensis* 2(2): 8. 1871 and *Botanisches Archiv* 1: 233. 1922, *Revue internationale de botanique appliquée et*

d'agriculture tropicale 12: 1207. Paris 1932, *Blumea* 32: 174. 1987.

in Brazil: arroz do brejo

in Peru: arrocillo

O. granulata Nees & Arn. ex G. Watt (*Oryza granulata* Nees & Arn. ex Hook.f., nom. illeg., non *Oryza granulata* Nees & Arn. ex G. Watt; *Oryza granulata* Nees & Arn. ex Steud.; *Oryza meyeriana* (Zoll. & Moritzi) Baillon subsp. *granulata* Nees & Arnott ex Watt; *Oryza meyeriana* subsp. *granulata* (Nees & Arn. ex G. Watt) Tateoka; *Oryza meyeriana* var. *granulata* Nees & Arnott ex Watt; *Oryza meyeriana* var. *granulata* (Nees & Arn. ex G. Watt) Duistermaat)

Tropical Asia, mountains, Southeast Asia. Perennial, short, loosely tufted or stoloniferous, stiffly erect to ascending, nodes glabrous, leaf blade lanceolate, ligule membranous collar-shaped, shortly rhizomatous, compact panicles usually without secondary branching, fertile spikelets always awnless, sterile lemmas subulate, fertile lemma awnless, variations about the seeds, weedy rice is a troublesome weed widespread all over the world, can give severe infestation in Vietnam and other Southeast Asian countries, found in deciduous forest, shady place under trees, dry woods, bamboo thickets, hilly places, on limestone hills or mountains, in damp places beside streams, waterfalls, near water holes, or seasonally dry, sloping land, moist deciduous forests, rarely on grass slopes, not found in standing water and usually grows in complete or partial shade, see *Synopsis Plantarum Glumacearum* 1: 3. 1853 [1854], *Dictionary of the Economic Products of India* 5: 500. 1891, *Histoire des Plantes* 12: 166. 1893, *The Flora of British India* 7: 93. 1896 and *Handb. Fl. Ceylon* 5: 183. 1900, *Grasses of Ceylon* 37. 1956, *Grasses of Burma* ... 604. 1960, *Botanical Magazine* (Tokyo) 75: 460. 1962, *Blumea* 32: 185. 1987.

in English: jungle oryza

in Indonesia: rumput lorodan, lorodan pari

in Thailand: khaao nok, khao-nok

in Vietnam: [us]a con cong

O. jeyporensis Govindaswami & Krishnam.

India, Orissa. Indeterminate species, endemic rice of wetlands of Eastern Ghats, see *Science and Culture* 24: 236. 1958.

O. latifolia Desv. (*Oryza alta* Swallen; *Oryza latifolia* Desv. var. *grandispiculis* A. Chev.; *Oryza latifolia* Humb. & Bonpl.; *Oryza latifolia* var. *latifolia*; *Oryza platyphylla* Schult. & Schult.f.; *Oryza sativa* var. *latifolia* (Desv.) Döll)

Central and South America, southern Mexico to northern Argentina. Perennial or annual, short to tall, leaf sheaths green, broad leaves, ligules with purple lines, ligule of lower leaves obtuse, panicles open, awned or awnless, spikelets deciduous, lemma and palea black, seed coat dark to brown to reddish, forms a related group with *Oryza alta* Swallen

and *Oryza grandiglumis* (Döll) Prod., forage, found in low forest, rainforest, secondary growth forest, in open or semi-open habitats, fringe of cultivated land, open woodland, pasture, cultivated fields, open swamps, wet places, hill slopes, high ridges, coastal belts, savannah, forest margin, in or near water, edges of lakes, streams, riverbanks or pool edges, on rocks, alluvium, sandy seashore, moist clay, rarely salts flats or near hot sulfur springs, see *Species Plantarum* 1: 333. 1753, *Methodus Plantas Horti Botanici ...* 197. 1797, *Journal de Botanique, Appliquée à l'Agriculture, à la Pharmacie, à la Médecine et aux Arts* 1: 77. 1813, *Systema Vegetabilium* 7(2): 1364. 1830, *Reliquiae Haenkeanae* 1(4-5): 208. 1830, *Flora Brasiliensis* 2(2): 7. 1871, *Journal of Botany, British and Foreign* 27: 169. 1889, *The Flora of British India* 7: 92. 1896 and *Bulletin du Muséum d'Histoire Naturelle* 27: 456, f. 41, t. 18. 1921, *Revue internationale de botanique appliquée et d'agriculture tropicale* 12: 1027. 1932, *Publications of the Carnegie Institution of Washington* 461: 156, t. 1-2. 1936, *Istituto Botanico della R. Laboratorio Crittogamico Pavia, Atti* 7(1): 15. 1946, *Brittonia* 23(3): 293-324. 1971, *Darwiniana* 30(1-4): 87-94. 1990, *Blumea* 37(1): 232. 1992, *Japanese Journal of Genetics* 70: 47-55. 1995.

in English: broad-leaf rice, broadleaf rice

in Colombia: arrocillo

in Thailand: yaa lamaan

O. longiglumis Jansen

Asia tropical, Indonesia, Papua New Guinea. Perennial, tufted, erect to semierect, not stoloniferous, ligule collar-shaped, leaf sheath tight, nodes glabrous, leaf blade linear, panicles intermediately open, spikelet horizontally inserted on the pedicel, sterile lemmas narrow and flexuous, fertile lemma awned, found in forest areas, grows on low-lying seasonally wet areas such as swamps, water holes of stream beds, usually grow as scattered plants in full to partial shaded conditions, in organic loamy soils, see *Reinwardtia* 2(2): 312, f. 13b. 1953.

O. longistaminata A. Chev. & Roehr. (*Oryza barthii* A. Chev.; *Oryza perennis* Moench; *Oryza perennis* subsp. *barthii* A. Chev.)

Tropical Africa, South Africa, Madagascar, Namibia. Perennial, terrestrial, soft, spongy, robust, thick, long rhizomatous with an extensive creeping rhizome system, stems elongating to keep pace with the rising flood, often decumbent and rooting from the lower nodes, long ligule acute pointed, panicle compact with branches ascending, scabrous deciduous oblong spikelets, sterile lemmas lanceolate, rigid awn, the grains readily shattering, forms weedy hybrids with cultivated rice, high grazing value, fodder, forage when young, seeds eaten, tendency of self-incompatibility and a high outcrossing rate, a noxious weed well adapted to the aquatic environment, very competitive with rice, among the worst weeds in West Africa and Sahel, thatching grass,

common in swamps and floodplains, streams, rivers, deep water, flooded grasslands, seasonal ponds, inundated meadows, shallow ponds, riverbanks, see *Methodus Plantas Horti Botanici ...* 197. 1797, *Synopsis Plantarum Glumacearum* 1: 3. 1855 [1853] and *Bulletin du Muséum National d'Histoire Naturelle* 16(7): 405-406. 1911, *Comptes Rendus de l'Académie des Sciences, Série 2, Méc. Phys. Chim. Sci., Univers. Sci. Terre* 159: 561. 1914, *Kulturpflanze* 29: 198. 1981, *Blumea* 32: 19. 1987.

O. manilensis Merr. (*Oryza minuta* Presl; *Oryza minuta* var. *minuta*)

The Philippines, Luzon. See *Reliquiae Haenkeanae* 1(4-5): 208. 1830 and *Philippine Journal of Science* 3: 219. 1908.

O. meridionalis Ng (*Oryza perennis* Moench)

Northern Australia, Queensland, Western Australia. Annual or perennial, not stoloniferous, sometimes forming small tufts, erect to geniculate, leaf sheath tight and inflated, nodes glabrous, leaf blade linear, fertile lemma awned, weed of wet areas, produce large numbers of seeds under a range of inundation regimes, floodplains, wetlands, see *Botanical Journal of the Linnean Society* 82(4): 328. 1981.

O. meyeriana (Zoll. & Moritzi) Baill. (*Padia meyeriana* Zoll. & Moritzi)

Asia, Indonesia, the Philippines. Perennial, loosely tufted or stoloniferous, erect to ascending, ligule collar-shaped, nodes glabrous, leaf blade ovate-lanceolate to linear, fertile lemma awnless, eaten by cattle, grains good flavouring, see *Systematisches Verzeichniss der von H. Zollinger in den Jahren 1842-1844* 103. 1846, *Dictionary of the Economic Products of India* 5: 500. 1891, *Histoire des Plantes* 12: 166. 1893 and *Botanisches Archiv* 1: 234. 1922, *Botanical Magazine (Tokyo)* 75: 460. 1962, *Blumea* 32: 185. 1987.

J. Rice Sci.* 10(3): 138-142. 1996, *Journal of Cytology and Genetics* 31(2): 195-198. 1996.

in Thailand: ya la man

O. neocaledonica Morat

New Caledonia. Perennial and highly endangered species, loosely tufted, short, narrowly lanceolate and dark green leaves, open panicles, hooked hairs on the surfaces of

lemma and palea, awnless, shade species, found in sclerophyllous forest, in temporarily flooded black clay soils on schists, understory, see *Bulletin du Muséum National d'Histoire Naturelle, Série 4 Miscellanea* 16(1). 1994.

O. nivara S.D. Sharma & Shastry (*Oryza sativa* f. *spontanea* Roshev., nom. illeg.)

South and Southeast Asia, tropical Asia. Annual, short to intermediate height, not stoloniferous, semierect to decumbent, nodes glabrous, panicles usually compact, spikelets large, fertile lemma strongly awned, caryopsis deciduous at maturity, a wild relative of rice, forms weedy hybrids with cultivated rice, valuable as food supplement (in India and Sri Lanka), discovered to be the only known source of resistance for the grassy stunt virus (GSV) biotype one, usually found in swampy areas, seasonal swamp, at edge of pond and tanks, beside streams, in ditches, in or around rice fields, grows in shallow water, in seasonally dry and open habitats, dry ponds, similar to *Oryza sativa* L., see *Indian Journal of Genetics and Plant Breeding* 25: 161. 1965.

O. officinalis Wallich ex G. Watt (*Oryza minuta* J. Presl; *Oryza minuta* var. *sylvatica* (Camus) Veldkamp; *Oryza officinalis* Wall.)

Tropical Asia, Southeast Asia. Annual or perennial, tufted, stoloniferous, erect to semierect, leaf sheath tight and inflated, ligule collar-shaped, nodes glabrous, leaf blade linear, panicle whorled at base, fertile lemma awned or awnless, weed, eaten by cattle, can give severe infestation in Vietnam and other Southeast Asian countries, used medicinally (China), is a kind of holy plant and is protected within sanctuaries of Buddhist temples, grown spontaneously, from half shaded area in a forest margin to a disturbed sunny area, see *Journal de Botanique, Appliquée à l'Agriculture, à la Pharmacie, à la Médecine et aux Arts* 1: 77. 1813, *Reliquiae Haenkeanae* 1(4-5): 208. 1830, *A Numerical List of Dried Specimens* no. 8635. 1848, *Dictionary of the Economic Products of India* 5: 500. 1891 and *Bulletin du Muséum d'Histoire Naturelle* 27: 456, f. 41, t. 18. 1921, *Botanical Magazine* (Tokyo) 75: 422. 1962, *Blumea* 37(1): 232. 1992, *Chin. J. Rice Sci.* 10(3): 138-142. 1996, *Journal of Cytology and Genetics* 31(2): 195-198. 1996.

O. punctata Kotschy ex Steud.

Tropical Africa, Madagascar, Asia. Perennial or annual, terrestrial or aquatic, stout, spongy, hollow, erect of two morphological types, diploid and tetraploid, soft and split ligules, panicles open, basal panicle branches widely spreading, seeds eaten as a famine-food, grains dehulled and boiled with water or milk, noxious weed, grains and stems eaten by baboons, common in open and disturbed areas, in a half shaded stable area, in open or semiopen habitats, forest margins, grassland and thickets, floodplain pans, degraded mopane scrub, open bush or shifting cultivation fields and rice fields, in swampy areas, wet places,

swampy streams, around water holes and pools, in shallow water, on riverbanks that flood to 1-m depth, see *Synopsis Plantarum Glumacearum* 1: 3. 1855 [1853] and *Feddes Repertorium* 104: 215-226. 1993, *Japanese Journal of Genetics* 70: 47-55. 1995.

O. rhizomatis Vaughan

Sri Lanka. Perennial, erect, rhizomatous, panicles open without whorled basal panicle branches, spikelets inserted near the base of lowest panicle branches, often awnless, closely related to *Oryza officinalis* Wallich ex Watt, grows in swampy or periodically flooded areas, usually in full sun or partial shade, this species has been found in an open grasslands, found in tropical forest, open and tall scrub with grassy openings, see *Journal of Botany, British and Foreign* 27: 169. 1889, *The Flora of British India* 7: 92. 1896 and *Indian Journal of Genetics and Plant Breeding* 25: 168. 1965, *Fl. Trop. East. Africa, Gramineae* 1: 31. 1970, *International Rice Research News Letter* 14(4): 5. 1989, *J. Linn. Soc., Bot.* 103: 160. 1990 [also *Botanical Journal of the Linnean Society* 103: 160, f. 1. 1990], *Acta Genetica Sinica* 24(5): 424-431. 1997.

O. ridleyi Hook.f.

Tropical Asia, Southeast Asia. Perennial, tufted, erect to semierect, stoloniferous, leaf sheath tight, auricles often

present, ligule glabrous, nodes glabrous, leaf blade linear, panicles open, fertile lemma awned, papery lemma and palea, sterile lemmas narrow and flexuous, commonly in full shade, found in old secondary and evergreen or dipterocarp forests, shaded forest floors, flooded rainforests, old and abandoned rubber plantations, dense thicket or less commonly open spaces, grows in marshes or riverbanks near streams, see *The Flora of British India* 7: 93. 1896.

G. Watt.; *Oryza sativa* var. *savannae* Körn.; *Oryza sativa* var. *sundensis* Körn.)

Temperate and tropical Asia, Southeast Asia. Annual or perennial, variable, tufted or stoloniferous, upright, decumbent, scrambling, nodes glabrous, with adventitious roots, often rhizomatous, roots fibrous, plant height variable depending on the depth of water, lower stems floating and rooting at the nodes, extravaginal branching at higher nodes, open leaf sheaths tight and inflated, acute to acuminate ligule membranous, coarse foliage, floating or emergent leaves, auricles present or absent, open panicles long with loosely ascending branches, glumes reduced to minute ridges on the stalk, 3 florets, the lower 2 sterile and glume-like, the upper 1 fertile, awn of fertile lemma very variable, lemma and palea black to dark, anthers yellow or brown, stigma purple, grains red-brown, husk reddish to rust color, grain eaten in times of famine in India and Brazil, reproduces by seed and vegetatively from rhizomes, probable progenitor of cultivated rice, a noxious weed, invasive, forms weedy hybrids with cultivated rice, red rice is the most common weedy biotype of the cultivated rice (*Oryza sativa* var. *sylvatica*) in all rice growing areas with temperate climate, can give severe infestation in Vietnam and other Southeast Asian countries, rich in ecological and geographical variations, grazed by cattle and buffaloes, rejected by cattle because of its hard foliage, found in swamps and

marshes, in open ditches, swampy grassland, ponds, along riverbanks, at the edges of lakes, and in or at the margins of rice fields, in deep water areas, shallow waters, riverine floodplains, lake edge, seasonal/intermittent freshwater ponds or marshes, standing or slow-running water, see *Species Plantarum* 1: 333. 1753, *Methodus Plantas Horti Botanici ...* 197. 1797, *Journal de Botanique, rédigé par une société de botanistes* 1: 76. 1813, *Nomenclator Botanicus* 577. 1821, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Southeast Asia or Ethiopia. Annual or perennial, numerous cultivars, many varieties are differentiated, tufted, semi-aquatic, stout, upright and arching, unbranched, extensive root system, leaf sheath ribbed and smooth, leaf blades linear, long and pointed ligules, hairy auricles membranous and curved, leaves in two ranks, panicle more or less exerted or partially included in upper leaf sheath, loose terminal panicle arching and open, spikelets large and persistent, 3 florets, lowest 2 florets sterile, uppermost floret female, each flower is surrounded by a lemma and palea at the base of which are two small glumes, glumes scale-like, sterile lemmas awnless, fertile lemma awned and nerved, awn terminal and straight, palea keeled, one of the world's two major human food crops, grain crop, cattle food, hay for animal feeding, rice straw is retained for feeding draught animals, rice bran is fed to domestic animals, beverage base, cereal, oil/fat, starch, fodder, fiber for papermaking, hay fairly palatable, noxious weed, potential seed contaminant, excess feeding of rice straw leads to toxicity because of high oxalates, little drought tolerance, rice has the capacity to neutralize the soil on which it is growing, stem borers affect the stalk, army worms and grasshoppers cause major leaf damage, found along drains and channels, in areas seasonally wet, in standing water, in wetlands, swampy areas, moist deciduous forests, see *Species Plantarum* 1: 333. 1753, *Flora Cochinchinensis* 1: 215. 1790, *Journal de Botanique, rédigé par une société de botanistes* [Edited by Desvaux] 1: 76. O. schlechteri Pilger

Papua New Guinea, Indonesia. Perennial, tufted, erect, stoloniferous, short, small-sized grass, leaf sheath tight, leaf blade linear, short narrow leaves with pubescent auricles and short ligule, nodes hairy, panicles short and open, with two glumes at the base of the spikelet, fertile lemma awnless, found in undisturbed forests, on land slips, loose rocks, beside rivers in humid conditions, grows in shade or partial sun, this species is the closest to the genus *Leersia* Sw., see *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 52(1-2): 168. 1914.

Oryzidium C.E. Hubb. & Schweick.

Referring to the generic name *Oryza* L.

Monotypic, southern tropical Africa. Panicoideae, Panicoideae, Paniceae, perennial, spongy, herbaceous, floating and submerged, unarmed, branched, long stoloniferous, culm sheaths persistent, internodes spongy, auricles absent, ligule a fringe of hairs, plants bisexual, inflorescence paniculate with lanceolate spikelets, lower floret male, upper floret female, spikelets solitary and pedicellate, two glumes unequal, lower glume an ovate scale, upper glume with a long straight stiff awn, lemmas mucronate, palea present, 2 lodicules free and fleshy, no stamens, ovary glabrous, 2 stigmas, open habitats, in permanent water, type *Oryzidium barnardii* C.E. Hubb. & Schweick., see *Bulletin of Miscellaneous Information Kew* 1936(5): 326, 328, f. 2. 1936.

Species

O. barnardii C.E. Hubb. & Schweick. (for the British marine biologist Keppel Harcourt Barnard, 1887-1964,

ichthyologist and invertebrate specialist, studied botany and zoology at Cambridge 1905-1908, F.L.S. 1921, botanical collector in South Africa and Mozambique, 1946-1956 Director of the South African Museum. See Mary Gunn and Leslie E. Codd, *Botanical Exploration of Southern Africa*. 89. 1981; Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 46. London 1994; *Proc. Linn. Soc.* 177: 117-119. 1966; R.F.H. Summers, *A History of the South African Museum, 1825-1975*. Cape Town 1975)

Zimbabwe, Zambia to southwest Africa. Perennial, rooting and branching at the lower nodes, leaf sheaths papery, lower glume small and obtuse, upper glume awned, lower lemma acuminate, floating species, in vleis, see *Bulletin of Miscellaneous Information Kew* 1936(5): 328, f. 2. 1936.

Oryzopsis Michaux = *Dilepyrum* Raf.,
Eriocoma Nutt., *Fendleria* Steud., *Piptatherum*
P. Beauv., *Urachne* Trin.

Greek *oryza* "rice" and *opsis* "appearance"; see André Michaux (1746-1803), *Flora Boreali-Americana*. 1: 51. Paris 1803.

Some 4-35 species, northern hemisphere, Middle East, temperate and subtropics. Stipoideae, Stipeae or Pooideae, Stipeae, Stipinae or Arundinoideae, Stipeae, perennial, tufted, clumped, unbranched above, nodes glabrous, culm leaves present, culm internodes solid or hollow, leaf blades flat or rolled, auricles absent, ligule membranous, plants bisexual, cleistogamous or chasmogamous, open inflorescence paniculate, spikelets 1-flowered, dorsally compressed floret, 2 glumes unequal or subequal, lemma more or less coriaceous, awn deciduous and not twisted, palea coriaceous and 2-nerved, 2-3 free lodicules, 3 stamens, ovary glabrous, 2 stigmas, woodland, dry mountain slopes, sometimes in *Piptatherum* and *Achnatherum*, type *Oryzopsis asperifolia* Michx., see *Flora Boreali-Americana* 1: 51, t. 9. 1803, *Medical Repository*, ser. 2, 5: 353. 1808, *Essai d'une nouvelle Agrostographie, ou nouveaux genres des Graminées*. 17, 18, 173. Osterdamia Neck. ex Kuntze = Osterdamia Kuntze, Zoysia Willd.

Chloridoideae, Cynodonteae, Zoysiinae, type *Osterdamia matrella* (L.) Kuntze, see *Der Gesellschaft Naturforschender Freunde zu Berlin, neue Schriften* 3: 440-441. 1801, *Revisio Generum Plantarum* 2: 781. 1891 and *Contributions from the United States National Herbarium* 41: 177, 240. 2001.

Otachyrium Nees

From the Greek *ous*, *otos* "an ear" and *achyron* "chaff, husk."

About 7-8 species, tropical South America, Amazon, West Indies. Panicoideae, Panicodae, Paniceae, or Panicoideae, Paniceae, Paspalinae, annual or perennial, herbaceous, erect, sometimes geniculate, rhizomatous, tufted, auricles absent, ligule a fringed membrane, plants bisexual, inflorescence spicate or paniculate, open or contracted panicle, spikelets paired and pedicellate, florets hermaphrodite present or absent, two short glumes subequal, upper glume much shorter than spikelet, lower lemma 3-nerved, upper lemma coriaceous to papery, palea thickened, 2 lodicules free and fleshy, 3 stamens, ovary glabrous, 2 stigmas, open habitats, rocky areas, marshy places, wet ground, inundated plains, savannah, grasslands, sandy areas, difficult to distinguish from *Panicum*, type *Otachyrium junceum* Nees, see *Flora Brasiliensis seu Enumeratio Plantarum* 2: 271-272. 1829 and T. Sendulsky and T.R. Soderstrom, "Revision of the South American genus *Otachyrium* (Poaceae: Panicoideae)." *Smithsonian Contributions to Botany* 57: 1-24. 1984, *Am. J. Bot.* 88: 1988-1992, 1993-2012. 2001, *Contributions from the United States National Herbarium* 46: 305. 2003, *Am. J. Bot.* 90: 796-821. 2003.

Species***O. aquaticum*** Send. & Soderstr.

Brazil. Perennial, erect, tufted or shortly rhizomatous, leaf blades ascending acute, panicle oblong sparsely branched, spikelets congested ovate or ovate-oblong, lower glume ovate 1-nerved, upper glume ovate 3-nerved, lower lemma ovate-oblong 3-nerved, upper lemma smooth, resembles *Otachyrium pterygodium*, see *Smithsonian Contributions to Botany* 57: 4, f. 1. 1984.

O. boliviensis Renvoise

Bolivia. Perennial, tufted, erect, hispid, spongy, nodes bearded, leaf blades linear and cordate at base, oblong panicle, spikelets ovate, unequal glumes, in moist sites, see *Gramíneas de Bolivia* 415. 1998.

O. grandiflorum Send. & Soderstr.

Amazonas, Brazil, Venezuela. See *Smithsonian Contributions to Botany* 57: 7, f. 2. 1984.

O. piligerum Send. & Soderstr.

Brazil. Perennial, lemma sulcate, see *Smithsonian Contributions to Botany* 57: 9, f. 3. 1984.

O. pterygodium (Trin.) Pilg. (*Otachyrium junceum* Nees; *Panicum cayennense* Lam.; *Panicum neurophyllum* Spruce ex Döll; *Panicum pterigodium* Trin.; *Panicum pterygodium* Trin.; *Pterigodium junceum* Nees ex Martius, Orchidaceae)

South America. Perennial, leaf blades flat, lower palea keels ciliate, see *Tableau Encyclopédique et Méthodique ... Botanique* 1: 173. 1791, *De Graminibus Paniceis* 227-228. 1826, *Dictionnaire des Sciences Naturelles* 44: 6. 1826, *Flora Brasiliensis seu Enumeratio Plantarum* 2: 271. 1829, *Flora Brasiliensis* 2(2): 254. 1877 and *Contr. U.S. Natl. Herb.* 15: 70. 1910, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 11(104): 239. 1931.

O. seminudum Hack. ex Send. & Soderstr. (*Panicum versicolor* Döll)

Brazil. Caespitose, see *Flora Brasiliensis* 2(2): 254. 1877 and *Smithsonian Contributions to Botany* 57: 14, f. 5. 1984.

O. succisum (Swallen) Send. & Soderstr. (*Digitaria gracilis* Guss.; *Otachyrium inaequale* Pilg.; *Panicum gracile* Leconte, nom. illeg., non *Panicum gracile* R. Br.; *Panicum gracile* (Guss.) Muell.; *Panicum nitidum* var. *gracile* Fourn.; *Panicum succisum* Swallen; *Setaria inaequalis* (F. Muell.) R.D. Webster)

South America. Terrestrial, scabrous to hirsute leaves, inflorescence terminal, lemma sulcate, see Carl Fredrik Nyman (1820-1893), *Sylloge florae Europaeae ... Supplementum ...* 70. 1865, *Fragmenta Phytographiae Australiae* 8: 189. 1874, *Mexicanas Plantas* 2: 21. 1886 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 30(1): 133. 1901, *Notizblatt des Botanischen*

Gartens und Museums zu Berlin-Dahlem 11(104): 239. 1931, *Brittonia* 7: 391. 1952, *Smithsonian Contributions to Botany* 57: 17, f. 6. 1984, *Sida* 16(3): 443. 1995.

O. versicolor (Döll) Henrard (*Chaetochloa versicolor* E.P. Bicknell; *Otachyrium truncatum* Pilg.; *Panicum truncatum* Nees, nom. illeg., non *Panicum truncatum* Trin.; *Panicum versicolor* Döll; *Panicum versicolor* (E.P. Bicknell) Nieuwl., nom. illeg., non *Panicum versicolor* Döll)

Bolivia and Paraguay, Venezuela, Brazil. Perennial, caespitose, erect, hard, nodes glabrous or pubescent, strong, rhizomatous with a knotty rhizome, leaf blades erect, panicles ovate to oblong, ovate spikelets, glumes subequal, forming clumps, damp ground, grassy roadsides, savannah, sandy places, along marshy areas, marshy grassland, see *Flora Brasiliensis seu Enumeratio Plantarum* 2: 215. 1829, *Flora Brasiliensis* 2(2): 254. 1877, *Bulletin of the Torrey Botanical Club* 25(2): 105, pl. 329. 1898 and *American Midland Naturalist* 2: 64. 1911, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 11(104): 239. 1931, *Blumea* 4(3): 511. 1941, *Gramíneas de Bolivia* 413. 1998.

Oatea (McClure & E.W. Smith) C.E.**Calderón & Soderstrom = *Sinarundinaria*****Nakai**

From the Mexican vernacular name *otate*; in some areas *otate* is applied to the types of cane or bamboo with solid stalks, see Louise C. Schoenhals, *A Spanish-English Glossary of Mexican Flora and Fauna*. 80. Hidalgo, México 1988.

Two-three species, Mexico and Central America. Bambusoideae, Bambusodae, Bambuseae, or Bambusoideae, Bambuseae, Guaduinae, *Yushania* subg. *Oatea* McClure & E.W. Sm., perennial, solid, slender, erect to leaning, arching or weeping, clumped, woody and persistent, walls thick, unarmed, rhizomes pachymorph, flowering culms leafy, culm internodes hollow, culm leaves sheaths persistent or deciduous, plants bisexual, open inflorescence paniculate, pedicellate spikelets, 2-7 female fertile florets and 1 rudimentary floret, 2 short-awned glumes very unequal to more or less equal, lemmas carinate, palea present, 3 lodicules free and membranous, 3 stamens, ovary glabrous, 2 plumose stigmas, humid tropical forests, deciduous or subdeciduous forest, along riverbanks, stream beds, damp ground, hillsides, trails, mountain slopes, sometimes referred to *Sinarundinaria* Nakai, type *Oatea acuminata* (Munro) C.E. Calderón & Soderstr., see *Journal of Japanese Botany* 11(1): 1. 1935, *Acta Phytotaxonomica Sinica* 6(4): 355-356. 1957, F.A. McClure, "Genera of bamboos native to the New World (Gramineae: Bambusoideae)." *Smithsonian Contributions to Botany* 9: 1-148. 1973, C.E. Calderón and T.R. Soderstrom, "The genera of Bambusoideae (Poaceae) of the American continent: keys and comments." *Smithsonian*

Contributions to Botany 44: 1-27. 1980, *Flora Novo-Galiciana* 14: 1-436. 1983, Rafael Guzmán M., M. del C. Anaya C. and F.J. Santana M., "El género *Otatea* (Bambusoideae), en Mexico y Centroamerica." *Bolet. del Instituto de Botánica Universidad de Guadalajara* 5(10): 1-20. 1984, *Kew Bulletin* 44(2): 349-367. 1989, *Cuscatlania* 1(6): 1-29. 1991, *Flora Mesoamericana* 6: 196. 1994, A. Reyes-García and M. Sousa S., "Depresión central de Chiapas. Species

O. spp.

in Mexico: gui yaa, qui yaa

O. acuminata (Munro) Calderón & Soderstrom (*Arthrostylidium longifolium* (E. Fourn.) E.G. Camus, nom. illeg., non *Arthrostylidium longiflorum* Munro; *Arundinaria acuminata* Munro; *Arundinaria longifolia* E. Fourn.; *Otatea aztecorum* (McClure & E.W. Sm.) C.E. Calderón & Soderstrom; *Yushania acuminata* (Munro) McClure; *Yushania aztecorum* McClure & E.W. Sm.)

Mexico, Honduras, Costa Rica. Perennial, erect, arching, clumped, shrubby, cultivated, forming colonies, used for handicrafts, very ornamental, see *Transactions of the Linnean Society of London* 26(1): 25. 1868, *Mexicanas Plantas* 2: 131. 1886 and *Les Bambusées* 68, pl. 22, f. A. 1913, *Smithsonian Contributions to Botany* 9: 66, 116, 119, f. 46, 47A-M. 1973, *Smithsonian Contributions to Botany* 44: 21. 1980, *Flora Novo-Galiciana* 14: 280-282, f. 17. 1983, *Boletín del Instituto de Botánica Universidad de Guadalajara* 5(10): 8. 1984, *Flora del Valle de Tehuacán-Cuicatlán* 3: 1-35. 1994.

in English: Mexican weeping bamboo

in Colombia: caña brava

in Mexico: carrizo, oate, oate dulce

O. acuminata (Munro) Calderón & Soderstrom subsp. *acuminata*

Mexico. See *Smithsonian Contributions to Botany* 44: 21. 1980.

O. acuminata (Munro) Calderón & Soderstrom subsp. *aztecorum* (McClure & E.W. Sm.) R. Guzmán, Anaya & Santana (*Otatea acuminata* (Munro) C.E. Calderón & Soderstr.; *Otatea aztecorum* (McClure & E.W. Sm.) C.E. Calderón & Soderstrom; *Yushania aztecorum* McClure & E.W. Sm.)

Mexico. Sometimes cultivated, used for handicrafts, see *Smithsonian Contributions to Botany* 9: 116, 119, f. 46, 47A-M. 1973, *Smithsonian Contributions to Botany* 44: 21. 1980, *Bolet. del Instituto de Botánica Universidad de Guadalajara* 5(10): 8. 1984.

in Mexico: oate, oate dulce.

O. fimbriata Soderstr. (*Otatea fimbriata* Soderstr. ex McVaugh)

Colombia, Mexico, Honduras. Erect, smooth, slender, waxy, used for brooms, ornamental, see *Flora Novo-Galiciana* 14: 280-282, f. 17. 1983.

in Colombia: caña brava

in Mexico: carrizo, mutu, oate, oate de hoja ancha

Ottochloa Dandy = *Hemigymnia* Griff.
(Boraginaceae), *Hemigymnia* Stapf

Named for the Austrian botanist Otto Stapf, 1857-1933, traveler, from 1882 to 1889 assistant with Kerner von Marilaun in Wien, 1900-1922 keeper of the Herbarium of the Royal Botanic Gardens, Kew, 1908-1916 botanical secretary of the Linnean Society, 1922-1933 editor of the *Botanical Magazine*, contributor to Daniel Oliver (1830-1916), *Flora of Tropical Africa* (Apocynaceae, Verbenaceae, Myristicaceae, Gramineae, etc.), contributor to Harvey and Sonder, *Flora Capensis* (Apocynaceae, Laurineae, Proteaceae, etc.), contributed to Hooker's *Icones Plantarum*, among his numerous and valuable publications are *On the Flora of Mount Kinabalu in North Borneo*. London 1894 and *The Aconites of India*. Calcutta 1905; see J.H. Barnhart, *Biographical notes upon botanists*. 3: 317. 1965; Mia C. Karsten, *The Old Company's Garden at the Cape and Its Superintendents*. Cape Town 1951; James Edgar Dandy (1903-1976), in *The Journal of Botany*. 69: 54. (Feb.) 1931; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 380. 1972; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. Cambridge, Mass. 1917-1933; Leonard Huxley, *Life and Letters of Sir Joseph Dalton Hooker*. London 1918; Stafleu and Cowan, *Taxonomic literature*. 5: 839-843. Utrecht 1985; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993; Emil Bretschneider (1833-1901), *History of European Botanical Discoveries in China*. [Reprint of the original edition, St. Petersburg 1898] Leipzig 1981; Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 650. London 1994.

About 4-6 species, Old World tropical regions. Panicoideae, Panicoideae, Paniceae, perennial, herbaceous, rambling, tufted or stoloniferous, slender scrambling decumbent culms rooting at the base, glabrous nodes, leaf sheaths rounded, ligule very short and membranous or absent, leaf

blades linear to lanceolate, plants bisexual, inflorescence paniculate with branches and pedicels filiform, few-flowered panicle, racemes along a central axis, slender unilateral rachis, solitary spikelets or paired or in clusters, spikelets more or less glabrous and strongly compressed, 2 florets, spikelets awnless, lower floret neuter or staminate and reduced to the lemma, upper floret bisexual, glumes equal to more or less equal, upper glume shorter than spikelet, lower lemma depressed on the back, upper lemma leathery and mucronulate, palea present, 2 free lodicules fleshy and glabrous, 3 stamens, ovary glabrous, 2 reddish stigmas, fruit small and compressed, weed species, in moist shaded sites, rainforest, ponds, shady places near water, damp places, meadows, swampy areas, type *Ottochloa nodosa* (Kunth) Dandy, see *Species Plantarum* 69. 1753, *Calcutta Journal of Natural History and Miscellany of the Arts and Sciences in India* 3: 363. 1842, *Contributions à la flore du Congo Français* 38. 1896 and *Flora of Tropical Africa* 9: 741. 1920, *The Flora of the Malay Peninsula* 5: 228. 1925, *Journal of Botany, British and Foreign* 69(2): 54-55. 1931, *Blumea* 4: 530-531. 1941, *Reinwardtia* 2(2): 313, f. 14. 1953, M. Lazarides, "The genus *Ottochloa* Dandy (Gramineae) in Australia and its relationship to *Ichnanthus oblongus* Hughes." *Australian Journal of Botany* 7: 328-346. 1961, *Blumea* 21(1): 1-80. 1973, *Wageningen Agricultural University Papers* 92-1(2): 1-557. 1992.

Species

O. fusca (Ridl.) Dandy (*Hemigymnia fusca* Ridl.; *Panicum creperum* Reeder)

Asia. See *The Flora of the Malay Peninsula* 5: 228. 1925, *Journal of Botany, British and Foreign* 69(2): 55. 1931, *Journal of the Arnold Arboretum* 29: 267. 1948.

O. gracillima C.E. Hubbard

Australia, Queensland, New South Wales. Perennial, slender and spreading, forming sprawling mats, long and slender culms rooting at the base, sheaths glabrous or hispid, dark green leaves linear-lanceolate, panicles sparsely branched, lower lemma sterile and without palea, bisexual upper lemma wrinkled and apiculate, grows near water, in moist shady sites, ponds, grazed by native marsupials, see *Bulletin of Miscellaneous Information Kew* 1934: 445. 1934.

in English: shade grass

O. grandiflora Jansen

West New Guinea. See *Reinwardtia* 2(2): 313, f. 14. 1953.

O. nodosa (Kunth) Dandy (*Digitaria divulsa* Mez; *Digitaria urochloides* Büse; *Hemigymnia arnottiana* (Nees ex Steud.) Stapf; *Hemigymnia multinodis* Stapf; *Ichnanthus oblongus* Hughes; *Ottochloa arnottiana* (Nees ex Steud.) Dandy; *Panicum aequabile* Domin; *Panicum arnottianum* Nees ex Steud.; *Panicum letouzeyi* Renvoize; *Panicum*

multinode J. Presl, nom. illeg., non *Panicum multinode* Lam.; *Panicum nodosum* Kunth; *Panicum urochloides* (Büse) Boerl.)

Southeast Asia, India, Indonesia, the Philippines, Sri Lanka, Thailand, Gabon, Congo, Zaire, China, Taiwan, Australia, Queensland. Perennial, slender, erect and decumbent, scandent, creeping at base, climbing over other shrubs and trees, rooting at basal nodes, ligule a row of hairs, leaf sheaths ciliate, inflorescence variable, panicles with stiffly spreading branches, lower branches often whorled, lower floret neuter, upper floret hermaphrodite, glumes shorter than the spikelets, economic plant, useful for erosion control, forage for cattle and sheep, grazed by sheep, moderately palatable, weed species abundant under coconut, rubber and oil-palm plantations, a troublesome weed if ungrazed, not tolerant of heavy grazing or cutting, found in forest, rice fields, rainforests, riverbanks, disturbed habitats, moist places, meadows, similar to *Ottochloa gracillima* C.E. Hubb., see *Reliquiae Haenkeanae* 1(4-5): 303. 1830, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 97. 1833, *Plantae Junghuhnianae* 3: 382. 1854, *Synopsis Plantarum Glumacearum* 1: 59. 1854, *Annales du Jardin Botanique de Buitenzorg* 8: 62. 1890, *Contributions à la flore du Congo Français* 38. 1896 and *Bibliotheca Botanica* 85: 297. 1915, *Flora of Tropical Africa* 9: 742. 1920, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 56(Beibl. 125): 7. 1921, *Bulletin of Miscellaneous Information Kew* 1923(9): 328. 1923, *Journal of Botany, British and Foreign* 69(2): 55. 1931, *Monogr. Digitaria* 202. 1950, *Grasses of Ceylon* 119. 1956, *Grasses of Burma ...* 318. 1960, *Kew Bulletin* 34(3): 553. 1979 [1980].

in English: slender panic grass

in Indonesia: rumput pait, sukut pring-pringan

in Laos: chaax kh'aa

in Malaysia: rumput pait, rumput rawa, rumput sarang buaya

in the Philippines: banig-usa, bariri-magwakat, kauakauayan, kawakawayanan, kumut-usa

in Thailand: yaa khui phai khon, ya khui phai khon, ya-khui-phaikhon, ya laman, yaa lamaan

O. nodosa (Kunth) Dandy var. ***micrantha*** (Balansa ex A. Camus) S.M. Phillips & S.L. Chen (*Hemigymnia arnottiana* var. *micrantha* Balansa ex A. Camus; *Ottochloa nodosa* var. *micrantha* (Balansa) Keng f.; *Panicum nodosum* var. *micranthum* Balansa)

Asia, Vietnam. See *Journal de Botanique (Morot)* 4: 142. 1890 and *Flore Générale de l'Indo-Chine* 7: 455. 1922, *Journal of Botany, British and Foreign* 69(2): 55. 1931, *Iconographia Cormophytorum Sinicorum* 5: 160, f. 7150. 1976, *Novon* 13(4): 467-468. 2003.

Oxyanthe Steud. = *Oxyanthera* Brongn.
(Orchidaceae), *Phragmites* Adans.

From the Greek *oxys* “acid, sour, sharp” and *anthos* “flower.”

Arundinoideae, Arundineae, type *Oxyanthe japonica* (Steud.) Steud., see *Species Plantarum* 1: 81. 1753, *Familles des Plantes* 2: 34, 559. 1763, *Voyage autour du Monde* 2: 197. 1834, *Flora* 29: 20. 1846, *Flora Rossica* 4(13): 393. 1852, *Synopsis Plantarum Glumacearum* 1: 197. 1855 [1854] and *American Midland Naturalist* 3: 332. 1914, *Contributions from the United States National Herbarium* 46: 306, 537-539. 2003.

Oxychloris Lazarides

From the Greek *oxys* “sharp” and the genus *Chloris*, alluding to the long pungent callus.

One species, Australia. Chloridoideae, Cynodonteae, annual or short-lived perennial, tufted or caespitose, herbaceous, glabrous nodes, spongy internodes, no auricles, ligule a short fringed membrane, leaf sheath glabrous to pubescent, plants bisexual, inflorescence spicate and digitate, spikes digitate and more or less appressed or divergent, spikelets solitary, spikelets 3- to 8-flowered and disarticulating above the glumes, lowermost floret bisexual, sterile floret without paleas, two glumes very unequal and keeled, fertile lemma smaller than sterile lemmas, fertile lemma with a sharp-pointed base and a stout awn, lemmas dark brown when mature, hairy and pungent callus, palea present, lodicules absent, 3 stamens, ovary glabrous, 2 reddish stigmas, small trigonous fruit, growing on heavy soils under gidgee, in dry savannah, on red-earth soils under mulga, open habitats, disturbed areas, creek banks, along water courses, in saline areas, on low rocky hills, sometimes referred to *Chloris*, type *Oxychloris scariosa* (F. Muell.) Lazarides, see Michael Lazarides, “New taxa of tropical Australian grasses (Poaceae).” *Nuytsia* 5(2): 273-303. 1985.

Species

O. scariosa (F. Muell.) Lazarides (*Chloris scariosa* F. Muell.)

Western Australia, Queensland, Northern Territory, South Australia, New South Wales. Annual or short-lived perennial, densely tufted, erect, simple or branched, wiry, spikes erect to spreading, spikelets densely clustered and imbricate, 6 florets, fertile only lowest floret, lower glume elliptic to linear, upper glume narrow-oblongate and apex bifid, very broad fertile lemma with membranous winglike margins, in arid and lower rainfall areas, see *Fragmenta Phytographiae Australiae* 6: 85. 1867 and *Nuytsia* 5(2): 283. 1984 [1985].

in English: winged chloris, wing chloris

Oxydenia Nutt. = *Leptochloa* P. Beauv.

From the Greek *oxys* “sharp, sour” and *aden* “gland.”

Chloridoideae, Cynodonteae, type *Eleusine filiformis* Pers., see *Syn. Pl.* 1: 87. 1805, *Essai d'une Nouvelle Agrostographie* 71, 161. 1812, *The Genera of North American Plants* 1: 76. 1818, *Nomencl. Bot.* 2: 554. 1873, *Index Kewensis* 2: 392. 1894 and *Contributions from the United States National Herbarium* 41: 130-137, 177. 2001.

Oxyrhachis Pilger

From the Greek *oxys* “sharp” and *rhachis* “rachis, axis, midrib of a leaf.”

One species, tropical Africa, Madagascar. Panicoideae, Andropogonodae, Andropogoneae, Rottboelliinae, perennial, herbaceous, unbranched, caespitose, leaves mostly basal, auricles absent, ligule fringed, plants bisexual, inflorescence terminal, a single narrow spike or cylindrical raceme with rhachis fragile, spikelets solitary and awnless, sessile spikelets in 2 opposite rows, callus strongly oblique, lower floret barren, 2 glumes smooth more or less equal, lower glume coriaceous lanceolate wingless, upper glume 2-nerved, palea present or absent, 2 lodicules free and fleshy, 3 stamens, ovary glabrous, 2 stigmas, open habitats, bogs, streamsides, marshy places, wet sites, related to *Ophiuros*, type *Oxyrhachis mildbraediana* Pilg., see *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 11: 655. 1932.

Species

O. gracillima (Baker) C.E. Hubb. (*Rottboellia gracillima* Baker)

Tropical Africa, Madagascar. Perennial, rare, densely tufted, leaves filiform, slender inflorescence, pedicellate spikelets absent, see *Journal of the Linnean Society, Botany* 22: 533. 1887 and *Hooker's Icones Plantarum* 35: t. 3454. 1947.

O. gracillima (Baker) C.E. Hubb. subsp. *occidentalis* Gledhill

Sierra Leone. See *Boletim da Sociedade Broteriana, ser. 2* 41: 61, t. 3. 1967.

Oxytenanthera Munro = *Houzeaubambus* Mattei, *Scirpobambus* Kuntze

From the Greek *oxytes* “sharpness, of acute angles, acidity,” *oxytenes* “pointed” and *anthera* “anther,” an allusion to the nature of the anthers.

About 1-2/16 species, tropical Africa, Transvaal, Asia. Bambusoideae, Bambusodae, Bambuseae, or Bambusoideae, Bambuseae, Bambusinae, perennial, arborescent,

often climbing, erect and arching slightly near the tips, shrubby or small tree, leafy, woody and persistent, branched, unarmed, caespitose, forming dense clumps, rhizomes pachymorph, auricles absent, culm leaves deciduous, culm sheaths persistent, ligule an unfringed membrane, leaf blades linear-lanceolate to lanceolate, inflorescence a false spike, plants bisexual, flower heads conspicuously spherical, hermaphrodite and sterile spikelets on the same plant, spikelets 1- to 2-flowered, each spikelet cluster subtended by a papery sheath, spikelet deciduous with 1-4 glumes attached, 2 glumes very unequal or 1-3 lemmas pungent, palea present, lodicules absent, 6 stamens joined at the base, ovary glabrous with an apical appendage, 3 stigmas, fruit a caryopsis crowned with the persistent bases of the styles, stems used for light construction and fencing, basketry and poles, shade species, under trees, savannah woodland, river valleys, along streams and water courses, sometimes included in and referred to as *Dendrocalamus* Nees, type *Oxytenanthera abyssinica* (A. Rich.) Munro, see *Tent. Fl. Abyss.* 2: 439. 1850, *Transactions of the Linnean Society of London* 26(1): 126-127. 1868, *Die Natürlichen Pflanzenfamilien* 2(2): 96. 1887 and *Lexicon* 509. 1903, *Die Natürlichen Pflanzenfamilien*, Nachtrag 3: 21. 1906, *Boll. Soc. Ort. Mutuo Soccorso*. Palermo 8(6): 84. 1910, *Taxon* 6(7): 206. 1957, *Kyoto University African Studies* 7: 37-129. 1972, *Kyoto University African Studies* 10: 143-212. 1976, *Indian Forester* 109: 306-308. 1983, *African Studies Monographs* 3: 109-130. 1983.

Species

O. abyssinica (A. Rich.) Munro (*Bambusa abyssinica* A. Rich.; *Houzeaubambus borzii* (Mattei) Mattei; *Oxytenanthera borzii* Mattei) (after the Italian botanist Antonino Borzì, 1852-1921, professor of botany, 1883-1892 founder and Director of the New Botanical Garden of Messina, 1892-1921 Orto Botanico of Palermo, among his writings are "Per l'inaugurazione delle feste del primo Giubileo centennale del R. Orto Botanico di Palermo (12 maggio 1895)." Palermo 1895, "Le specie di *Ficus* viventi a piena area nel R. Orto Botanico di Palermo." *Boll. R. Orto Bot.* 1(3-4): 156-161. Palermo 1897, "Coltura delle piante da gomma elastica." *Boll. R. Orto Bot.* 4: 59-79. Palermo 1905, "Ulteriori esperienze sulla coltura dell'*Agave sisalana* in Sicilia." *Boll. R. Orto Bot.* 7(1-2-3): 17-28. Palermo 1908 and "Sulla coltura delle palme, particolarmente delle specie di *Washingtonia* a scopo industriale, in Sicilia." *Boll. R. Orto Bot. Giardino Colon.* 10(1-2-3): 102-107. Palermo 1911. See T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 46. 1972; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. University of Pennsylvania Press, Philadelphia 1964; J.H. Barnhart, *Biographical notes upon botanists*. 1: 224. 1965; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933)

Tropical Africa. Perennial, tufted, unarmed, erect or ascending, leafy, woody, stout, thick-walled, strong, more or less hollow-stemmed, rhizomatous, clumps forming and impenetrable thickets, drooping culms, arching slightly near the tips, leaf sheaths overlapping, culm sheaths covered with dark brown bristly hairs, blades oblong and lanceolate very acutely acuminate, spikelets 1-2 flowered, upper flowers bisexual, lower flowers sterile, spikelets in dense globose axillary clusters, 2-4 glumes persistent and 1-4 deciduous with floret, lemmas pungent, stamens 6 monadelphous, ovary hairless, 3 hairy stigmas, flowering periodic, reproduces itself from seed, propagated by root division, ornamental, widely used for building purposes and basket works, roof rafters, walking sticks, spear shafts, hammock poles, canoe, arrows, implement handles, cattle fences, forage plant, seeds important food in times of famine, young shoots edible, leaf browsed by cattle, alcoholic drink obtained from the plant (*Ulanzi*, a fermented bamboo sap obtained by tapping young bamboo shoots during the rainy season), plants eaten by chimpanzees, found in the foothill forests, wooded hillsides, in damp places, gardens, along riverbanks, in dry forest, savannah, moist or dry conditions, termite mounds, see *Tentamen Florae Abyssinicae ...* 2: 439. 1850, *Transactions of the Linnean Society of London* 26(1): 126-127. 1868 and *Bot. Jahrb. Syst.* 39(3-4): 601. 1907, *Boll. Soc. Ort. Mutuo Soccorso*. Palermo 8(6): 84. 1910, *Boll. R. Orto Bot. Giardino Colon.* 8: 36. Palermo 1909, *Taxon* 6(7): 206. 1957.

Chloridoideae, Cynodonteae, Sporobolinae, see *Natuurlijke Historie* 2(4): 382. 1775, *Introductio ad Historiam Naturalem* 72. 1777, *Supplementum Plantarum* 37, 252. 1782, *Hortus Kewensis; or, a Catalogue ...* 1: 48. 1789, *Hortus Kewensis; or, a Catalogue ...* 3: 498. 7 Aug-1 Oct 1789, *Suppl. Pl. Pyr.* 8. 1818, *Ionios Anthologia* 2: 448. 1834, *Nom. Bot.* edition 2, 1: 449. 1840, *Nomenclator Botanicus. Editio secunda* 2: 280. 1841, *Bericht über die zur Bekanntmachung geeigneten Verhandlungen der Königlich Preussischen Akademie der Wissenschaften zu Berlin* 1853: 498. post 15 1853, *J. Linn. Soc. Bot.* 6: 54. 1862 and *Hooker's Icones Plantarum* 35(3): 1-11, plate 3457. 1947, *Fl. Afr. Nord* 2: 89. 1953, *Bull. Research Council of Israel* 11D: 91-126. 1962, *Systematic Botany* 4: 267-280. 1979, *Contributions from the United States National Herbarium* 41: 56-57, 177. 2001.

Paneion Lunell = *Poa* L.

From the Greek *paneios*, *panikos*, *paneion*, *panikon* “panic,” *Paneion* “sanctuary of Pan,” *Paneia* “festival of Pan at Delos”; Latin *panion* for a plant, also called *satyrior*.

Pooideae, Poeae, Poinae, see *Species Plantarum* 1: 67-68. 1753 and *American Midland Naturalist* 4: 221. 1915,

Contributions from the United States National Herbarium 48: 473, 505-580. 2003.

Panicastralla Moench = *Echinaria* Desf.

Resembling *Panicum*.

Pooideae, Poodae, Seslerieae, see *Species Plantarum* 2: 1049. 1753, *Methodus Plantas Horti Botanici ...* 205-206. 1794, *Flora Atlantica* 2: 385. 1799.

Panicularia Fabr. = *Panicularia* Colla
(Pteridophyta, Dicksoniaceae), *Panicularia*
Heist. ex Fabr., *Poa* L.

From the Latin *panicula*, *panucula*, *panucla*, *paniculus* “a tuft, panicle.”

Pooideae, Poeae, Poinae, see *Species Plantarum* 1: 67-68. 1753, *Enumeratio Methodica Plantarum* 207. 1759, *Herbarium Pedemontanum* 6: 235. 1836 and *Contributions from the United States National Herbarium* 48: 473-476, 505-580. 2003.

Paniculum Arduino = *Panicum* L.

From the Latin *panicula*, *panucula*, *panucla*, *paniculus* “a tuft, panicle,” see Petri Arduini ... *Animadversionum botanicarum* specimen. Patavii 1759, Petri Arduini veronensis horti publici patavini custodis *animadversionum botanicarum specimen alterum*. Venetia 1764, *J. Bot.* 28: 293-295. 1890 and *Kew Bulletin* 1935: 90. 1935.

Panicoideae, Panicodae, Paniceae, or Panicoideae, Paniceae Panicinae, see *Species Plantarum* 1: 55, 58. 1753 and *Contributions from the United States National Herbarium* 46: 306-441, 537. 2003.

Panicum L. = *Acostia* Swallen, *Chasea*
Nieuwl., *Coleataenia* Griseb., *Dicanthelium*
(A.S. Hitchc. & Chase) Gould, *Dichantherium*
(Hitchc. & Chase) Gould, *Dileucaden* (Raf.)
Steud., *Dileucaden* Raf., *Eatonia* Raf.,
Eriolytrum Kunth, *Milium* Adans., *Monachne*
P. Beauv., *Neohusnotia* A. Camus,
Phanopyrum (Raf.) Nash, *Phanopyrum* Raf.,
Polyneura Peter, *Psilochloa* Launert, *Setiacis*
S.L. Chen & Y.X. Jin, *Steinchisma* Raf.,
Talasium Spreng.

From a classical Latin name for millet, *panicum*, *i* (*panus*, *i* “the thread, a tumor, spike, panicle, an ear of millet,” Akkadian *panu* “to turn”), Italian panic grass, *Panicum*

italicum L. or *Setaria italica* (L.) Beauv.; see Carl Linnaeus, *Species Plantarum*. 55. 1753 and *Genera Plantarum*. edition 5. 29. 1754.

About 370-470/600 species pantropical, mostly tropical, subtropical and warm temperate regions. Panicoideae, Panicodae, Paniceae, Panicinae, annual or perennial, varied habit, woody and persistent or herbaceous, rhizomatous or stoloniferous, erect to decumbent, forming creeping mats or tussocks or aquatic clumps, hairy or glabrous nodes, solid or hollow internodes, sometimes lowest internodes thickened into a cormlike base, auricles present or absent, ligules membranous and ciliate, blade rolled in bud, leaves linear-lanceolate to linear-ovate to thread-like, plants bisexual, inflorescence paniculate to racemose with solitary or rarely paired spikelets falling entire at maturity, branched flower heads, awnless dorsally compressed spikelets, 2 florets, lower floret sterile or male, upper floret hermaphrodite, glumes unequal, lower glume minute and truncate to awned, upper glume as long as spikelet and rounded on the back, upper lemma stiff or hardened, palea present, 2 free and fleshy lodicules, 3 stamens, ovary glabrous and without the apical appendage, 2 stigmas reddish to red, many species grown as grain crop since prehistoric times, weed species, cultivate fodder, native pasture grasses, foliage palatable to stock and native animals, seeds eaten by seed-eating birds and small rodents, ornamental, myrmecophy, sand-binding, tops may accumulate sufficient nitrates to be harmful to browsers, leaves might cause photosensitization, growing in rainforest, forest and swamp, stream margins and stream banks, shores and disturbed habitats, roadsides and cropland, grassland, sand hills and claypans in semiarid regions, in shade and in open habitats, deserts, savannah, high variability of this genus, sometimes or often referred to *Urochloa* P. Beauv., *Dichantherium* (Hitchc. & Chase) Gould and *Brachiaria* (Trin.) Griseb., nomenclature of several species has been changed and is still changing, type *Panicum miliaceum* L., see *Species Plantarum* 1: 55, 58. 1753, *Familles des Plantes* 2: 34. 1763, *Flora Graeca* 1(2): 44, t. 59. 1808, *Prodromus Florae Novae Hollandiae* 190. 1810, *Essai d'une Nouvelle Agrostographie* 49, 168, t. 10, f. 10. 1812, *Journal de Physique, de Chimie, d'Histoire Naturelle et des Arts* 89: 104. 1819, *De Graminibus Paniceis* 51, 53, 125, 266, 184. 1826, *Systema Vegetabilium, editio decima sexta* 4(2): 22, 30. 1827, *Révision des Graminées* 1: 219. 1829, *Bulletin Botanique [Genève]* 1: 220. 1830, *Nomenclator Botanicus. Species

P. sp.

in English: panic grass

in Mexico: camalote, zacate de loma

in Peru: canarana, penacho, shukushina, shukushkina, tabo-quinha, toro urcu

in Guinea-Bissau: bucansole, iufo iufo

in Niger: billéri, dil yarô, jéjéku, trilo, zozoz

in Senegal: baket, salguf

in Sierra Leone: apende, faditi, faliti, foni, funfuri, fure-funfuri, kegbel, muli, muri, ndewe, ndiwi, ngalei-hei, nyina-foni, peni fafagbi, penipagbel, sankabesukwi, sunyugi, yowo

in Yoruba: ite aparo, iteaparo, motisan, kereiyale, kase, esin, ketuketu igbo

P. abludens Roem. & Schult. (*Digitaria abludens* (Roem. & Schult.) Veldkamp; *Digitaria granularis* (Trin. Ex Spreng.) Henrard; *Paspalum granulare* Trin. ex Spreng.)

India. See *Systema Vegetabilium* 2: 457. 1817, *Neue Entdeckungen im ganzen Umfang der Pflanzenkunde* 2: 47. 1821 and *Monograph of the Genus Digitaria* 302, f. 891. 1950, *Blumea* 21(1): 53-55, f. 11d, 12. 1973.

P. abscissum Swallen (*Panicum rigidulum* subsp. *abscissum* (Swallen) Freckmann & Lelong)

U.S., Florida, Everglades National Park. Vulnerable species, occurs in freshwater habitats, wet prairie, depression marshes, wet flatwoods, pine flatwoods, pinelands and wetlands, sandy soils and dry white sand, swales and seasonal ponds, see *Flora Brasiliensis seu Enumeratio Plantarum* 2: 163. 1829 and *Journal of the Washington Academy of Sciences* 30(5): 215, f. 4. 1940, *Sida* 20(1): 172. 2002.

in English: cut-throat grass

P. acariferum Trin. (*Melica latifolia* Roxb. ex Hornem.; *Neyraudia acarifera* (Trin.) Conert; *Thysanolaena acarifera* (Trin.) Arn. & Nees; *Thysanolaena latifolia* (Roxb. ex Hornem.) Honda; *Thysanolaena maxima* (Roxb.) Kuntze)

Asia, India. See *Hortus Regius Botanicus Hafniensis Suppl.*: 117. 1819, *Flora Indica; or Descriptions ...* 1: 319-320. 1820, *Species Graminum* 1: t. 87. 1827, *Gramineae* 49-50. 1841, *Nova Acta Phys.-Med. Acad. Caes. Leop.-Carol. Nat. Cur.* 19(Suppl. 1): 181-182. 1843, *Revisio Generum Plantarum* 2: 794. 1891 and *Journal of the Faculty of Science: University of Tokyo, Botany* 3(1): 312-313. 1930, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 78(2): 240-244. 1959.

P. acicularifolium Renvoize & Zuloaga

Brazil. See *Kew Bulletin* 50(1): 163. 1995.

P. aculeatum Hitchc. & Chase (*Dichantherium scabriusculum* (Elliott) Gould & C.A. Clark; *Panicum scabriusculum* Elliott)

U.S. Growing in large clumps, see *A Sketch of the Botany of South-Carolina and Georgia* 1: 121. 1816 and *Rhodora* 8(95): 209-210. 1906, *Annals of the Missouri Botanical Garden* 65(4): 1110. 1978 [1979], *Annals of the Missouri Botanical Garden* 75(4): 1637-1657. 1988.

P. acuminatifolium Robyns (*Brachiaria sadinii* Vanderyst; *Panicum sadinii* (Vanderyst) Renvoize)

Africa. Perennial, ascending, decumbent and rooting, forest shade, shady locations, see *Bull. Agric. Congo. Belge* 10: 244. 1919, *Bulletin Agricole du Congo Belge* 16: 665. 1925, *Mémoires de l'Institut Royal Colonial Belge; Section des Sciences Naturelles et Médicales* 1(6): 27, t. 2A-F. 1932, *Kew Bulletin* 22: 485. 1968.

in Sierra Leone: esulerobat, genyenyi, joiki, joki, kalekame, kosulu kosin, pogina, soiwu, sunyugi, sut

P. acuminatum Swartz (*Dichantheium acuminatum* (Sw.) Gould & C.A. Clark; *Dichantheium acuminatum* (Sw.) Gould & C.A. Clark; *Dichantheium acuminatum* var. *acuminatum*; *Dichantheium lanuginosum* (Elliott) Gould; *Panicum acuminatum* Salzm. ex Döll, nom. illeg., non *Panicum acuminatum* Sw.; *Panicum acuminatum* var. *acuminatum*; *Panicum comophyllum* Nash; *Panicum dichotomum* var. *acuminatum* (Sw.) Griseb.; *Panicum dichotomum* var. *lanuginosum* (Elliott) Alph. Wood; *Panicum huachucae* Ashe; *Panicum lanuginosum* Elliott; *Panicum lanuginosum* J. Presl, nom. illeg., non *Panicum lanuginosum* Elliott; *Panicum lanuginosum* var. *huachucae* (Ashe) Hitchc.; *Panicum lanuginosum* var. *tennesseense* (Ashe) Gleason; *Panicum lindheimeri* var. *tennesseense* (Ashe) Farw.; *Panicum olivaceum* Hitchc. & Chase; *Panicum ornatum* Desv. ex Ham.; *Panicum pacificum* Hitchc. & Chase)

Cuba, Puerto Rico, Mexico, U.S., Missouri, California, Arkansas, Colombia, Venezuela. Perennial, erect, branched, hairy, low, decumbent, caespitose, shortly rhizomatous, ligules tufts of white hairs, leaves elongated, hairy spikelets, usually occurs in wetlands and along streams, moist open areas, wet meadows, rich soils, open fields, wet prairies, moist places in woods, along roadsides, see *Species Plantarum* 1: 58. 1753, *Nova Genera et Species Plantarum seu Prodrumus* 23. 1788, *A Sketch of the Botany of South-Carolina and Georgia* 1: 123. 1816, *Prodromus Plantarum Indiae Occidentalis* 11. 1825, *Reliquiae Haenkeanae* 1(4-5): 306. 1830, *A Class-book of Botany* 786. 1861, *Flora of the British West Indian Islands* 553. 1864, *Flora Brasiliensis* 2(2): 234. 1877, *Bulletin of the Torrey Botanical Club* 24: 41-42, 196-197. 1897, *Journal of the Elisha Mitchell Scientific Society* 15: 51-52. 1898 and *Bulletin of the Torrey Botanical Club* 30(7): 380. 1903, *Rhodora* 8(95): 208. 1906, *Contributions from the United States National Herbarium* 15: 225, 229, f. 234, 241. 1910, *American Midland Naturalist* 11(2): 45. 1928, *Phytologia* 4(1): 21. 1952, *Brittonia* 26(1): 60. 1974, *Annals of the Missouri Botanical Garden* 65(4): 1121. 1978 [1979], *Phytologia* 48(2): 192-193. 1981, *Phytologia* 49(1): 40. 1981, *Brittonia* 36(3): 269-271. 1984, *Phytologia* 67(6): 451-452, 472. 1989, *Phytologia* 77(6): 458. 1994 [1995].

in English: Western panic grass, Pacific panic grass, Western witch grass, Western panicum, panic grass

P. acuminatum Sw. var. *acuminatum* (*Dichantheium acuminatum* (Sw.) Gould & C. Clark; *Dichantheium*

acuminatum var. *thurowii* (Scribn. & J.G. Sm.) Gould & C.A. Clark; *Dichantheium lanuginosum* (Elliott) Gould; *Panicum auburne* Ashe; *Panicum ciliosum* Nash; *Panicum comophyllum* Nash; *Panicum lanuginosum* Elliott; *Panicum lanuginosum* J. Presl, nom. illeg., non *Panicum lanuginosum* Elliott; *Panicum lindheimeri* var. *tennesseense* (Ashe) Farw.; *Panicum olivaceum* Hitchc. & Chase; *Panicum orangense* Ashe; *Panicum tennesseense* Ashe; *Panicum thurowii* Scribn. & J.G. Sm.)

Cuba, Puerto Rico, U.S., California, Missouri, Colombia, Venezuela. Annual or perennial, on dry sand or beaches, rich soils, usually occurs in wetlands, subalpine forests, old fields and thickets, under moist conditions in riparian habitats, chaparral, see *Nova Genera et Species Plantarum seu Prodrumus* 23. 1788, *A Sketch of the Botany of South-Carolina and Georgia* 1: 123. 1816, *Reliquiae Haenkeanae* 1(4-5): 306. 1830, *Bulletin of the Torrey Botanical Club* 24(4): 196-197. 1897, *Journal of the Elisha Mitchell Scientific Society* 15: 52, 113. 1898 and 1899, *Circular, Division of Agrostology, United States Department of Agriculture* 16: 5. 1899, *Bulletin of the Torrey Botanical Club* 26(11): 568. 1899 and *North Carolina Agricultural Research Service: Bulletin* 175: 115. 1900, *Bulletin of the Torrey Botanical Club* 30(7): 380. 1903, *Contributions from the United States National Herbarium* 15: 220, 225, f. 234. 1910, *American Midland Naturalist* 11(2): 45. 1928, *Brittonia* 26(1): 60. 1974, *Annals of the Missouri Botanical Garden* 65(4): 1121, 1125. 1978 [1979].

in English: Pacific panic grass, woolly panic grass, panic grass, Western panicum, thermal witchgrass, acuminate panic grass

P. acuminatum Sw. var. *fasciculatum* (Torrey) Beetle (*Panicum acuminatum* var. *fasciculatum* (Torr.) Lelong, nom. illeg., non *Panicum acuminatum* var. *fasciculatum* (Torr.) Beetle; *Panicum huachucae* Ashe; *Panicum huachucae* Ashe var. *fasciculatum* (Torrey) F.T. Hubbard; *Panicum implicatum* Scribner; *Panicum lanuginosum* Elliott var. *fasciculatum* (Torrey) Fernald; *Panicum lanuginosum* var. *implicatum* (Scribner) Fernald; *Panicum lanuginosum* var. *tennesseense* (Ashe) Gleason; *Panicum subvillosum* Ashe; *Panicum tennesseense* Ashe)

Northern America. Found in dry woodlands, dry or moist sterile soil in the open, see *Nova Genera et Species Plantarum seu Prodrumus* 23. 1788 and *Phytologia* 49(1): 40. 1981, *Brittonia* 36(3): 269. 1984.

P. acuminatum Sw. var. *lindheimeri* (Nash) A.A. Beetle (*Dichantheium acuminatum* subsp. *lindheimeri* (Nash) Freckmann & Lelong; *Dichantheium acuminatum* var. *lindheimeri* (Nash) Gould & C.A. Clark; *Dichantheium lanuginosum* var. *lindheimeri* (Nash) Freckmann, nom. illeg., non *Dichantheium lanuginosum* var. *lindheimeri* (Nash) Harvill; *Dichantheium lindheimeri* (Nash) Gould; *Panicum acuminatum* var. *lindheimeri* (Nash) C.F. Reed,

nom. illeg., non *Panicum acuminatum* var. *lindheimeri* (Nash) Beetle; *Panicum acuminatum* var. *lindheimeri* (Nash) Lelong, nom. illeg., non *Panicum acuminatum* var. *lindheimeri* (Nash) Beetle; *Panicum funstonii* Scribn. & Merr.; *Panicum lanuginosum* Elliott var. *lindheimeri* (Nash) Fernald; *Panicum lanuginosum* var. *septentrionale* Fernald; *Panicum lindheimeri* Nash)

Northern America, U.S., California. Perennial, caespitose, found in dry woodlands, moist conditions, dry or moist sterile soil in the open, usually occurs in wetlands, riverbank, see *Nova Genera et Species Plantarum seu Prodrumus* 23. 1788, *A Sketch of the Botany of South-Carolina and Georgia* 1: 123. 1816, *Bulletin of the Torrey Botanical Club* 24(4): 196-197. 1897 and *Circular, Division of Agrostology, United States Department of Agriculture* 35: 4. 1901, *Rhodora* 36(423): 77. 1934, *Brittonia* 26(1): 60. 1974, *Phytologia* 39(4): 270. 1978, *Annals of the Missouri Botanical Garden* 65(4): 1121, 1127. 1978 [1979], *Phytologia* 48(2): 193. 1981, *Brittonia* 36(3): 270. 1984, *Phytologia* 67(6): 452. 1989, *Sida* 20(1): 168. 2002.

in English: Lindheimer panic grass, Pacific panic grass

P. aegyptiacum Gouan (*Digitaria aegyptiaca* Willd.; *Panicum aegyptiacum* hort. ex Roemer & Schultes, nom. illeg., non *Panicum aegyptiacum* Gouan; *Panicum aegyptiacum* Retz., nom. illeg., non *Panicum aegyptiacum* Gouan; *Panicum aegyptiacum* var. *blepharanthum* (Hack. ex T. Durand & Schinz) Chiov.)

Egypt. See *Hortus Regius Monspeliensis* 35. 1762, *Observationes Botanicae* 3: 8. 1783, *Enumeratio Plantarum Horti Botanici Berolinensis, ...* 9. 1809, *Systema Vegetabilium* 2: 493. 1817 and *Annuario del Reale Istituto Botanico di Roma* 8(3): 296. 1908.

Wien 1905)

Tropical Africa, Ethiopia, Kenya, Uganda, Tanzania, Sudan, South Africa, Zambia, Mozambique. Perennial bunchgrass or annual, variable, reddish to purplish, stout, slender or robust, branched or unbranched, pubescent, tufted, shortly rhizomatous, sometimes rooting at lower nodes, leaf sheath round and hairy, ligule membrane-like, leaves with scabrid margin, open ovate panicle with solitary branching, spikelets oblong obtuse, lower floret male, glumes separated by a short internode, lower glume ovate, palatable and nutritious pasture grass, high grazing value, grains edible, grains eaten by baboons, useful for erosion control, found in disturbed sites, open areas, under trees, bushland, moist soils, sandy and alluvial soils, coastal forests, shady places, in rock quarry, rocky hillsides, loam or sandy soils, on waste grounds, riverbanks, rocky soil in woods, black basaltic soil, see *Prodromus Plantarum Capensium*, ... 19. 1794, *Descriptio uberior Graminum* 119. 1817, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 3,1(2-3): 275. 1834, *Synopsis Plantarum Glumacearum* 1: 76. 1854,

Bulletin de l'Herbier Boissier 2: App. 2: 22. 1894, *Die Pflanzenwelt Ost-Afrikas* 5c: 102. 1895 and *Bulletin de l'Herbier Boissier, sér. 2, 1: 766*. 1901, *Annuario del Reale Istituto Botanico di Roma* 8: 306. 1903, *Repertorium Specierum Novarum Regni Vegetabilis* 40: 196 & Anhang 42. 1930.

in English: buffalo grass, reed panicum, broadleaf panicum, broad-leaved panicum

in South Africa: buffelsgras, rietbuffelsgras, breëblaarwintergras, breëblaarbuffelsgras

P. dewinteri J.G. Anderson (after the South African botanist Bernard De Winter (b. 1924), plant collector in the regions of Namibia, from 1973 to 1989 Director of the Botanical Research Institute, served as President of the South African Association for the Advancement of Science, as well as the South African Association of Botanists and as Chairman of the Advisory Committee for Botanical Research in Agriculture, his writings include “A morphological, anatomical and cytological study of *Potamophila prehensilis* (Nees) Benth.” *Bothalia*. 6. 1951, “Plant life of the Namib Desert.” *S. Afr. Biol. Soc.* 3: 19-20. 1962 and “South African trees.” *S. Afr. For. J.* 88: 6-8. 1974, with M. De Winter and Donald Joseph Boomer Killick wrote *Sixty-Six Transvaal Trees*. Pretoria 1966 and *Know Your Trees: A Selection of Indigenous South African Trees*. Cape Town 1973, with J. Vahrmeijer wrote *The National List of Trees*. Pretoria 1972; see Mary Gunn and Leslie E. Codd, *Botanical Exploration of Southern Africa*. 130. Cape Town 1981)

South Africa. Perennial, shrubby, hard, tufted, erect, wiry, branched, sometimes rooting at lower nodes, inflorescence with solitary and sparsely branching, lower glume narrowly ovate, lower floret sterile, palea reduced, common in rocky sites and wooded rocky slopes, crevices, forest margins, see *Bothalia* 9: 341. 1967.

P. diagonale Nees (*Digitaria diagonalis* (Nees) Stapf; *Digitaria uniglumis* var. *major* Stapf)

North America. Short-lived perennial or annual, many stemmed, flattened, clump forming, diffusely branched, tufted, often geniculate at base, almost prostrate and rooting at lower nodes, ascending or more or less erect, rhizomatous, youngest leaf rolled, leaf blade rough, leaf sheaths flattened and hispid, ligule a membranous densely ciliate rim, linear leaves, auricles absent, spikelets acute, lower floret sterile, upper floret bisexual, glumes very unequal, lower glume ovate 0- to 1-nerved acute or obtuse, upper glume lanceolate 7- to 9-nerved, upper lemma lanceolate acute, leaves might cause photosensitization, weed in rice fields, weed of crops, potential seed contaminant, grows in poorly drained soil and wetlands, in shallow water, in full sun, in fallow land, around lagunas in wet or damp ground, on dry bare mud, disturbed places and habitats, in low fields and waste ground, on good cultivated soils, in moist open areas and alluvial soils, damp or swampy places, gravel bars, open mudflat, sandy riverbanks, dry sandy and gravelly beach, roadside ditches and railroads, orchards, bottomland and mesic upland fields, naturalized elsewhere, related to *Panicum repens*, see *Flora Caroliniana, secundum ...* 72. 1788, *Tableau Encyclopédique et Méthodique ... Botanique* 4: 747. 1798, *Flora Boreali-Americana* 1: 48. 1803, *Catalogus Plantarum Americae Septentrionalis* 9. 1813, *Encyclopédie Méthodique. Botanique ... in English: West Indian panic grass, spreading panicum

P. dinklagei Mez (for the German merchant and plant collector Max Julius Dinklage, 1864-1935, in West Africa (Liberia, from 1894 to 1922 ten visits), author of *Liberia in seiner Bedeutung für Deutschlands Handel und zukünftige Versorgung*. Hamburg 1918; see (obituary in) *Notizbl. Bot. Gart. Berl.* 12: 413-415. 1935; F.N. Hepper and Fiona Neate, *Plant Collectors in West Africa*. 25. Utrecht 1971; F.N. Hepper, "Botanical collectors in West Africa, except French territories, since 1860." in *Comptes Rendus de l'Association pour l'étude taxonomique de la flore*

d'Afrique, (A.E.T.F.A.T.). 69-75. Lisbon 1962; Anthonius Josephus Maria Leeuwenberg, "Isotypes of which holotypes were destroyed in Berlin." *Webbia*. 19: 861-863. 1965; René Letouzey, "Les botanistes au Cameroun." in *Flore du Cameroun*. 7: 1-110. Paris 1968; J.H. Barnhart, *Biographical notes upon botanists*. 1965)

Tropical Africa. Perennial, robust, canelike, scrambling. in Liberia: pini ti

in Sierra Leone: akolsaba, folimbe, fure fumfuri, furefumfuri, keyapa, muli, niekbeve, niekbewe, njekbewe, nyina foni, sukule voni, wete, yeno

P. discrepans Döll (*Panicum laxum* Sw.)

Brazil, French Guiana. Perennial, decumbent to prostrate, tufted, ligule membranous, open areas, savannah, near streams and along riverbanks, forest, see *Nova Genera et Species Plantarum seu Prodrum* 23. 1788, *Flora Brasiliensis* 2(2): 252. 1877.

P. doellii Mez (*Panicum hylaeicum* Mez)

South America. Perennial, see *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 7: 75. 1917, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 56(Beibl. 125): 6. 1921, *Flora Fanerogámica Argentina* 19(1): 11-6. 1995.

P. dorsense S.M, Phillips

Ethiopia. Annual, delicate, decumbent, slender, much-branched, rooting at the nodes, leaf blades lanceolate and cordate at base, panicle compact, spikelets elliptic on fine ascending branches, lower floret male, well-developed palea, forming mats, dry open banks, resembles *Panicum pusillum*, see *Kew Bulletin* 46(3): 535. 1991.

P. dregeanum Nees (*Panicum amethystinum* Franch.; *Panicum chilanthum* Stapf; *Panicum poecilanthum* Stapf)

Tropical Africa. Perennial, densely tufted, dense tussocky habit, bright green, erect, leaves mostly basal, basal sheaths downy to silky pubescent, ligule membranous, open or slightly contracted panicle, spikelets often purplish, lower lemma 5-nerved, attractive and ornamental, pasture, high grazing value, good forage, grazed when young, grows on red clay soil, marshes, grassland, moist soils, wet places, vleis, alluvial and sandy soils, hillsides, lowlands, savannah, seasonally damp soil.

in English: plum panicum

in South Africa: persbuffelsgras

P. ecklonii Nees (*Axonopus ecklonii* (Nees) Stapf ex Chiov.; *Panicum catangense* Chiov.)

West Africa, Zaire, South Africa, Tanzania. Perennial, bright green, tufted or densely caespitose, shortly rhizomatous, bulbous base, leaf blade flattened, sheaths silky, ligule an inconspicuous fringe of short hairs, soft leaves mostly basal and hairy, inflorescence an open panicle, purplish or reddish spikelets, lower floret sterile, palea absent, probably palatable, grazing value unknown, ornamental and attractive, found in mountainous regions, sandy soils, sandy rocky soil, in moist areas, grassland, along the edge of shallow pans, see *Florae Africae Australioris Illustrationes Monographicae* 43. 1841 and *Annali di Botanica* 13: 44, 47. 1914, *Kew Bulletin* 22: 482. 1968.

in Cameroon: bagiho, bajiho

P. effusum R. Br. (*Panicum convallium* F. Muell.; *Panicum viale* Chase) (Latin *effusus, a, um* “scattered, poored out, loosely spreading, loosened, straggling”)

Papua New Guinea, South Australia, Western Australia, Queensland, New South Wales, Victoria, Northern Territory. Perennial, densely hairy, tufted, forming tussocks, culms bent at the lower nodes, sheaths usually glabrous to villous, ligule a row of cilia, dark green densely hairy leaves, inflorescence open and stiff, panicle breaking off at maturity and wind-dispersed, green to purplish glabrous spikelets, palea of lower floret present, lower glume acute, lower lemma sterile and acuminate, fertile lemma smooth and shining, seeds shiny and dark brown, profusely seeding and rapidly growing, blocks irrigation channels and constitutes a fire hazard, good fodder for stock, leaves palatable, nonaquatic grass susceptible to close grazing, seeds a food source for seed-eating birds and small rodents, grassland and woodland, disturbed sites, may cause photosensitization in sheep, see *Prodromus Florae Novae Hollandiae* 1: 191. 1810, *Transactions and Proceedings of the Victorian Institute for the Advancement of Science* 1854/1855: 46. 1855 and *Journal of the Arnold Arboretum* 20: 310. 1939, *Blumea* 41: 181-216. 1996.

Asia. See *Systema Naturae ... editio decima tertia, aucta, reformata* 1: 162. 1791.

P. fulgens Stapf (*Isachne nervata* Franch.; *Panicum nervatum* (Franch.) Stapf)

Guinea, Africa. See *Bulletin de la Société d'Histoire Naturelle d'Autun* 8: 340. 1895 and *Flora of Tropical Africa* 9: 668-669. 1920, *Mémoires de l'Institut Royal Colonial Belge; Section des Sciences Naturelles et Médicales* 1: 41. 1932, *Flora of Tropical East Africa* 451-898. 1982.

P. fulgidum (R. Br.) Hughes (*Panicum bicolor* R. Br., nom. illeg., non *Panicum bicolor* Moench; *Panicum fulgidum* Hughes)

Warm regions. See *Methodus Plantas Horti Botanici* ... 206. 1794, *Prodromus Florae Novae Hollandiae* 191. 1810 and *Bibliotheca Botanica* 85: 322. 1915, *Bulletin of Miscellaneous Information Kew* 1923(9): 323. 1923, *Austrobaileya* 2(1): 21-24. 1984.

P. furvum Swallen (from the Latin *furvus, a, um* "dark, dusky, gloomy, swarthy, black," ... *furvum nigrum vel atrum* ...)

Guatemala. See *Contr. U.S. Natl. Herb.* 29(9): 416. 1950.

P. gabunense Hack. (*Acroceras gabunense* (Hack.) Clayton; *Commelinidium gabunense* (Hack.) Stapf; *Commelinidium mayumbense* (Franchet) Stapf)

Tropical Africa, Gabon. Dry riverbeds, see *Verhandlungen des Botanischen Vereins für die Provinz Brandenburg und die angrenzenden Länder* 31: 70. 1889 and *Flora of Tropical Africa* 9: 627-628. 1920, *Kew Bulletin* 34(3): 557. 1979 [1980].

P. gardneri Thwaites (*Isachne gardneri* (Thwaites) Benth.)

Southern India, Sri Lanka. Perennial, erect to ascending, creeping, scrambling, decumbent, rooting at the nodes, branched, nodes glabrous, sheaths slightly keeled, auricle ciliate, ligule a ciliolate membrane, leaf blades lanceolate, panicle branches ascending or spreading, lower floret staminate or sterile, purple stigmas, see *Enumeratio Plantarum Zeylaniae* 359. 1864, *Genera Plantarum* 3: 1100. 1883 and *Handb. Fl. Ceylon* 5: 130. 1900, *Grasses of Ceylon* 118. 1956, *Grasses of Burma* 326. 1960.

P. gattingeri Nash (*Panicum capillare* L. var. *campestre* Gattinger; *Panicum capillare* var. *gattingeri* Nash; *Panicum capillare* var. *geniculatum* Scribn.; *Panicum philadelphicum* Bernh. ex Trin.; *Panicum philadelphicum* subsp. *gattingeri* (Nash) Freckmann & Lelong)

Canada, U.S. Annual, upright, stout, branched, usually rooting at the nodes, leaves elongated, sheaths with swollen-based hairs, terminal and axillary panicles, spikelets 1-flowered and glabrous, acute to lanceolate first glume, grains straw-colored and pointed at the tip, fibrous roots, leaves might cause photosensitization, potential seed contaminant, economic plant, grows in sandy areas and roadsides, shorelines, fields and wood borders, on open ground and waste places, alluvial valley soils and in dry rocky ground, gravel bars and borders of sloughs, see *Species Plantarum* 1: 58. 1753, *De Graminibus Paniceis* 216. 1826, *The Tennessee Flora; With Special Reference to the Flora of Nashville* 94. 1887, *Bulletin of the Torrey Botanical Club* 20: 477. 1893, *An Illustrated Flora of the Northern United States* 1: 123. 1896 and *Flora of the Southeastern United States* ... 92, 1327. 1903, *Contr. U.S. Natl. Herb.* 15: 57. 1910, *Sida* 20(1): 172. 2002.

in English: Gattinger's panic grass, panic grass

in Mexico: zacate sedoso

P. genuflexum Stapf (*Panicum vagiflorum* Stapf)

East Africa, Zaire, Mozambique. Perennial, slender, tufted to loosely tufted, basal leaf sheaths glabrous, spikelets purplish, lower floret male, palea present, rare in South Africa, found in grassy clearings, on dry soils, sandy soils, marshy areas, see *Flora of Tropical Africa* 9: 683, 689. 1920.

P. ghiesbreghtii E. Fourn. (*Panicum ghiesbreghtii* E. Fourn. ex Hemsl.; *Panicum ghiesbreghtii* var. *ghiesbreghtii*; *Panicum guatemalense* Swallen; *Panicum hirtivaginum* Hitchc.) (for the Belgian zoologist Auguste (August) Boniface Ghiesbreght (1810-1893) (in Stafleu: 1808-1888), a patron of botany, 1835-1837 with Jean Jules Linden (1817-1898) and Nicolas Funck (1816-1896) to Brazil; see Irving William Knobloch, compil., "A preliminary verified list of plant collectors in Mexico." *Phytologia Memoirs*. VI. 1983; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. University of Pennsylvania Press, Philadelphia 1964)

Mexico, Colombia, Jamaica, Venezuela, Ecuador. Perennial, caespitose, erect, clumped, nodes and internodes villous, solitary spikelets green to red-purplish to dull purple, fodder, found in low semideciduous forest, along clearings, see *Biologia Centrali-Americana; ... Botany ...* 3: 489. 1885, *Mexicanas Plantas* 2: 29. 1886 and *Contributions from the United States National Herbarium* 12(6): 223. 1909, *Contr. U.S. Natl. Herb.* 15: 76. 1910, *Journal of the Washington Academy of Sciences* 23(10): 460. 1933.

Brazil, North America, U.S., Florida. Perennial, aquatic or subaquatic, vigorous, robust, narrow and hard stems, extensive creeping rhizomes, culms often produce roots at lower submersed nodes, sheaths loose, lower leaf sheaths overlapping, leaf blades flat or folded, spike-like inflorescence erect and narrow, spikelets nearly sessile, fertile stems with hairy sheaths, green flowers, lemmas nerved, grain smooth, sometimes a weed very aggressive, valuable prairie fodder, forage, provides food and protection for wildlife, good grazing for livestock, tough and less palatable at maturity, can form large stands in the water or even on dry banks, important as a soil binder, used for shoreline and stream bank erosion control, occurs on moist soil along rivers and ditches, in wettest seasonal ponds, drainage canals and wet disturbed sites, in coastal regions, open marshes and freshwater marshes, often in the water, on wet shores, swamps, borders of lakes and ponds, in moist soil along river and lake banks, see *Species Plantarum* 1: 57. 1753, *Supplementum Plantarum* 114. 1781, *Flora Caroliniana, secundum ...* 72. 1788, *A Sketch of the Botany of South-Carolina and Georgia* 1: 115. 1816, *Descriptio uberior Graminum* 108. 1817, *Mantissa* 2: 227. 1824, *Systema Vegetabilium, editio decima sexta* 1: 310. 1825, *Révision des Graminées* 1: 45. 1829, *Voyage autour du Monde* 2(2): 127. 1829[1832], *Boston J. in English: panic grass, gaping panicum

P. hillebrandianum Hitchc. (*Dichantheium hillebrandianum* (Hitchc.) C.A. Clark & Gould) (named in honor of the German physician Wilhelm B. Hillebrand, 1821-1886, botanist, traveler, from 1851 to 1871 lived in the Hawaiian islands, wrote a *Flora of the Hawaiian Islands*. Annotated and published after the author's death by William Francis Hillebrand [1853-1925]. London, New York & Heidelberg 1888, "The relation of forestry to agriculture." in *Hawaiian Pl. Rec.* 22: 174-200. 1920 and "Die Vegetationsformationen der Sandwich-Inseln." *Bot. Jahrb. Syst.* 9: 305-314. 1888. See W.T. Pope, "Dr. William Hillebrand, M.D. (1821-1886)." *Hawaiian Annual*. 1919: 53-60; J.H. Barnhart, *Biographical notes upon botanists.* 2: 177. 1965; J. Ewan, editor, *A Short History of Botany in the United States*. New York and London 19695; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection.* 175. 1972; S. Lenley et al., *Catalog of the manuscript and archival collections and index to the correspondence of John Torrey.* Library of the New York Botanical Garden. 1973; S. Lenley et al., *Catalog of the manuscript and archival collections and index to the correspondence of John Torrey.* Library of the New York Botanical Garden. 223. Boston, Mass. 1973; Ethelyn Maria Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University.* Cambridge, Mass. 1917-1933)

U.S. See *Memoirs of the Bernice Pauahi Bishop Museum...* 8(3): 197, f. 87. 1922, *Brittonia* 30(1): 57. 1978.

P. hillebrandianum Hitchc. var. ***gracilis*** Skotts. (*Panicum gracilius* (Skotts.) H. St. John)

U.S., Hawaii. Wet places, boggy sites, see *Acta Horti Gothoburgensis* 15: 296, f. 118-124. 1944, *Phytologia* 36(5): 465. 1977.

P. hillmanii Chase (*Panicum capillare* subsp. *hillmanii* (Chase) Freckmann & Lelong)

U.S., New Mexico, Texas. Annual, usually occurs in non-wetlands, see *Species Plantarum* 1: 58. 1753 and *Journal of the Washington Academy of Sciences* 14(14): 345, f. 1. 1934, *Sida* 20(1): 161-174. 2002.

in English: Hillman's panic grass, Hillman panicum, witch grass

P. hippothrix K. Schum. ex Engl. (*Isachne obscurans* Woodrow; *Panicum obscurans* (Woodrow) Stapf ex Woodrow)

East Africa, Tanzania, Kenya. Annual, coarse, robust, stout, leaves linear, panicle ovate to oblong and often exserted from the uppermost sheath, spikelets ovate and acuminate, spikelets nongaping distributed on spreading or ascending branches, lower glume ovate and acuminate, upper lemma

glossy, grains cooked like rice, open habitats, thickets, see *Die Pflanzenwelt Ost-Afrikas* 5c: 103. 1895, *Gardener's chronicle, ser. 3* 23: 161. 1898 and *Journal of the Bombay Natural History Society* 13: 434. 1901, *Fl. Trop. Afr.* 9: 699. 1920.

in India: jangli kutki, tansawa

P. hirstii Swallen (*Dichantheium hirstii* (Swallen) Kartesz) (named for an amateur botanist named Frank Hirst)

U.S., Delaware, Georgia, New Jersey, North Carolina. Perennial, erect, purplish green smooth stems, stem leaves stiffly erect and green tinged with purple, ligule a band of dense hairs, inflorescence narrow and wandlike, endangered species, found in seasonally wet ponds and small ephemeral ponds, cypress savannahs and depression meadows, depression ponds and freshwater habitats, seasonally flooded woodland pond, see J.R. Swallen, "A new species of *Panicum* from New Jersey." *Rhodora*. 63(752): 235-236. 1961.

in English: Hirst's panic grass, Hirst panic grass

P. hirsutissimum Steud. (*Panicum maximum* Jacq.; *Panicum maximum* var. *hirsutissimum* (Steud.) Oliv.; *Urochloa maxima* (Jacq.) R.D. Webster)

Africa. See *Icones Plantarum Rariorum* 1: 2, t. 13. 1781, *Collectanea* 1: 76. 1786, *Synopsis Plantarum Glumacearum* 1: 72. 1853, *Transactions of the Linnean Society of London* 29: 171. 1875 and *The Australian Paniceae (Poaceae)* 241. 1987.

P. hirsutulum Rendle (*Panicum griffonii* Franch.)

Africa. See *Bulletin de la Société d'Histoire Naturelle d'Autun* 8: 342. 1895, *Catalogue of the African Plants Collected by Dr. F. Welwitsch in 1853-61* 2(1): 176. 1899.

P. hirsutum Sw. (*Panicum chacoense* Parodi; *Panicum elatum* Willd. ex Steud.; *Panicum hirsutum* (P. Beauv.) Raspail, nom. illeg., non *Panicum hirsutum* Sw.; *Panicum hirsutum* B. Heyne ex Wall., nom. illeg., non *Panicum hirsutum* Sw.; *Panicum hirsutum* J. König ex Roxb., nom. illeg., non *Panicum hirsutum* Sw.; *Panicum hirsutum* Lam., nom. illeg., non *Panicum hirsutum* Sw.; *Panicum hirsutum* Moon, nom. illeg., non *Panicum hirsutum* Sw.; *Panicum hirsutum* Vahl ex Griseb., nom. illeg., non *Panicum hirsutum* Sw.; *Panicum hirsutum* Willd. ex Spreng., nom. illeg., non *Panicum hirsutum* Sw.)

Venezuela, Argentina, Brazil, Guatemala, Mexico, U.S., Texas. Herbaceous, loose inflorescence, forming large clumps, borders of cultivated land, open sites, riverbanks, gravelly places, see *Flora Indiae Occidentalis* 1: 173. 1797, *Encyclopédie Méthodique, Botanique* 4: 741. 1798, *Essai d'une Nouvelle Agrostographie* 50, t. 10, f. 11. 1812, *Hortus Bengalensis, or a catalogue ...* 7. 1814, *Flora Indica; or Descriptions ...* 1: 303. 1820, *Systema Vegetabilium, editio decima sexta* 1: 317. 1824, *A Catalogue of the Indigenous and Exotic Plants Growing in Ceylon* 8. 1824, *Annales des Sciences Naturelles (Paris)* I 5: 299. 1825, *Nomenclator*

Botanicus. Editio secunda 2: 256. 1841, *A Numerical List of Dried Specimens* no. 8734B. 1848 [1849], *Flora of the British West Indian Islands* 548. 1864 and *Darwiniana* 15: 102, f. 8. 1969.

in English: hairy panic grass, hairy panicum

in Spanish: cortadera

Hubb.; *Sacciolepis semienensis* Chiov.) (for J.D. Snowden) (Zaire, Kisantu)

East Africa, Ethiopia, South Africa, Uganda, Guinea. Annual or short-lived perennial, aquatic or semiaquatic, weak, scrambling, slender, often rooting at the lower nodes, leaf blades narrowly lanceolate, inflorescence sparsely branched, panicle oblong to pyramidal, short racemes, spikelets purplish and oblong to narrowly elliptic-oblong, upper glume lanceolate-oblong, lower glume 0-1-nerved ovate to narrowly ovate, lower floret sterile or male, palea usually present, grows in or near water, in disturbed wet ground, in shade or not, under shade of trees and shrubs, perennial swamps, river margins, moist rich soils, seasonally inundated areas, see *Florae Africae Australioris Illustrationes Monographicae* 46-47. 1841, *Bulletin de l'Herbier Boissier* 3(8): 377. 1895, *Bulletin de l'Herbier Boissier* 7(1): 24. 1899 and *Bulletin of Miscellaneous Information Kew* 1928(4): 132-133. 1928, *Plantae Novae vel Minus Notae e regione Aethiopica* 25. 1928 [1911-1951, also *Plantae Novae vel Minus Notae ex Aethiopia*, series published in different journals], *Mémoires de l'Institut Royal Colonial Belge; Section des Sciences Naturelles et Médicales* 1(6): 25, t. 1G-M. 1932, *Revue internationale de*

botanique appliquée et d'agriculture tropicale 14: 27. 1934, *Kew Bulletin* 22: 488. 1968.

P. ianthum Stapf (*Panicum brazzavillense* Franch.)

Tropical Africa. Perennial, tufted, cattle fodder, in damp places, seasonally wet soil, pastures, near water, swampy areas, see *Bulletin de la Société d'Histoire Naturelle d'Autun* 8: 341. 1895 [1893] and *Flora of Tropical Africa* 9: 663. 1920.

in Nigeria: ramafada, ramapada, ramaphada

P. ichunense Swallen

Venezuela, Bolívar, Salto Maria Espuma, Río Ichun, Sierra Ichun. See *Phytologia* 14(2): 77. 1966.

P. imbecille (R. Br.) Trin. (*Oplismenus hirtellus* f. *imbecillis* (R. Br.) Scholz; *Orthopogon imbecillis* R. Br.)

Australia. See *Prodrumus Florae Novae Hollandiae* 194. 1810, *Essai d'une Nouvelle Agrostographie* 54, 168, 170. 1812, *Species Graminum* 2: t. 191. 1829 and *Phanerogamarum Monographiae* 13: 1-213. 1981.

P. impeditum Launert

Namibia, South Africa. Annual, aquatic, tufted, erect to prostrate to geniculate, leaves densely papillate, spikelets appressed and crowded, lower floret sterile, palea absent or reduced, grows in or near water, around vleis, river margins, moist sandy soils, see *Mitteilungen der Botanischen Staatssammlung München* 8: 147-163. 1970.

P. inaequale F. Muell. (*Holcolemma dispar* Clayton; *Panicum inaequale* E. Fourn. ex Hemsl.; *Panicum inaequale* Pilg., nom. illeg., non *Panicum inaequale* F. Muell.; *Panicum inaequale* (Link) E. Fourn., nom. illeg., non *Panicum inaequale* F. Muell.; *Paspalidium inaequale* (F. Muell.) Hughes; *Setaria inaequalis* (F. Muell.) R.D. Webster)

Australia. See *Enumeratio Plantarum Horti Regii Berolinensis Altera* 1: 103. 1821, *Fragmenta Phytographiae Australiae* 8: 189. 1874, *Biologia Centrali-Americana; ... Botany* ... 3: 490. 1885, *Mexicanas Plantas* 2: 17. 1886 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 30(1): 133. 1901, *Bulletin of Miscellaneous Information Kew* 1923(9): 317. 1923, *Kew Bulletin* 42(2): 401-403. 1987, *Sida* 16: 443. 1995.

P. inaequilatum Stapf & C.E. Hubb. (*Acroceras attenuatum* Renvoize)

Tropical Africa, Mozambique, Zimbabwe. A 3-nerved lower glume, found in grassland, on hillsides, in shade of bush and undergrowth, wet soil, see *Bulletin of Miscellaneous Information Kew* 1927: 267. 1927, *Kew Bulletin* 34(3): 556. 1979 [1980].

P. incanum Schumach. (*Oplismenus hirtellus* (L.) P. Beauv.)

Guinea, Ghana. See *Systema Naturae, Editio Decima* 870. 1759, *Essai d'une Nouvelle Agrostographie* 54, 168, 170. 1812, *Beskrivelse af Guineiske planter* 60. 1827, *Kongel.*

Danske Vidensk. Selsk. Naturvidensk. Math. Afh. 3: 80. 1828.

P. incomptum Fig. & De Not. (*Panicum incomptum* Trin.)

Southeast Asia, Brunei Darussalam. Perennial, much-branched, straggling, leaves linear-lanceolate, open globular panicle, spikelets ovoid, common in old clearings and wasteland, coffee and tea plantations, see *De Graminibus Paniceis* 200. 1826, *Memorie della Reale Accademia delle Scienze di Torino* II 14: 344. 1854, *Plantae Junghuhnianae* 3: 375. 1854.

in English: scandent panic

P. incomtum Trin.

The Philippines, Indonesia. Good fodder grass, roots chewed with betel nuts, see *De Graminibus Paniceis* 200. 1826, *Plantae Junghuhnianae* 3: 375. 1854.

in Thailand: yaa khai hao, ya khai hao

P. incumbens Swallen

Guatemala. Erect, sprawling, creeping, forest, shade to partial shade, cloud forest, see *Species Plantarum* 1: 55, 58. 1753 and *Contr. U.S. Natl. Herb.* 15: 13-15. 1910, *Contr. U.S. Natl. Herb.* 29(9): 417. 1950.

P. infestum Andersson (*Panicum infestum* Andersson ex Peters; *Panicum infestum* Peters; *Panicum lasiocoleum* Schum. ex Engl.; *Panicum lasiocoleum* var. *calvescens* Peter; *Panicum pseudoinfestum* Chiov.; *Panicum sennii* Chiov.; *Urochloa maxima* subsp. *infesta* (Peters) H. Scholz) (after the Italian botanist Lorenzo Senni, 1879-1954, botanical explorer, traveler, forester, Console della milizia forestale; see A. White and B.L. Sloane, *The Stapelieae*. Pasadena 1937)

Tropical Africa, South Africa, Tanzania, Somalia. Perennial, hairy, densely tufted, erect, sometimes branched, shortly rhizomatous, tussock-forming, woody rootstock, leaf blades and leaf sheaths usually hirsute, leaves linear acuminate, panicle oblong, inflorescence secondary branches usually absent or very short, primary branches ascending, spikelets acute with a groove on the back, lower floret male, lower glume ovate, lower lemma with a longitudinal median groove, upper floret rugose, palea present, heavy seeder, forage grass, palatable and drought resistant, grains edible, grains eaten by baboons, often found on the edges of swamps, open bushland, grassland, rocky hillsides, clay or sandy soils, reddish brown soil site, seasonally damp areas, disturbed places, cultivated areas, see *Naturwissenschaftliche Reise nach Mossambique ...* 2: 546. 1865 [or 1864], *Abhandlungen der Königlichen Akademie der Wissenschaften in Berlin* 1894: 14, 35. 1894 and *Repertorium Specierum Novarum Regni Vegetabilis* 40: 192 & Anhang, 42. 1930, *Flora Somalia* 2: 446-447, f. 244. 1932, *Bulletin du Muséum National d'Histoire Naturelle, séries 4, Section B, Adansonia. Botanique Phytochimie* 11(4): 443. 1989[1990], S.A. Andanje and W.K. Ottichilo, "Population

status and feeding habits of the translocated sub-population of Hunter's antelope or hirola (*Beatragus hunteri*), in Tsavo East National Park, Kenya." *African Journal of Ecology* 37(1): 38-48. Edwards, "The impact of cattle ranching on large-scale vegetation patterns in a coastal savannah in Tanzania." *Journal of Applied Ecology* vol. 40, issue 3: 430-444. June 2003.

P. irregulare Swallen

Costa Rica. Riverbanks, stony places, see *J. Wash. Acad. Sci.* 30(5): 216. 1940.

P. jauanum Davidse

Venezuela, Bolívar, Meseta de Jaua, Cerro Jaua. Erect, see *Boletín de la Sociedad Venezolana de Ciencias Naturales* 32(132-133): 272. 1976.

P. kaalaense Hitchc.

Hawaii. See *Memoirs of the Bernice Pauahi Bishop Museum...* 8(3): 191, f. 80. 1922.

P. kalahareense Mez

Kalahari, Namibia, Zimbabwe, South Africa, Mozambique. Perennial, dense, hard, unbranched, stout, erect, robust, tufted to densely tufted, leaves mostly basal, shortly rhizomatous, ligule a ring of long hairs, leaf blades usually rolled or folded, leaf sheaths rounded and glabrous, basal sheaths hairy to villous, leaves hairy and stiff, inflorescence an open and interrupted panicle, lower glume ovate, lower floret male, palea present, seeds eaten, pasture, reasonably palatable when young, drought-resistant, growing in disturbed places, along roadsides, see *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 57: 187. 1921, National Research Council, Board on Science and Technology for International Development, *Lost Crops of Africa, Vol I: Grains*. National Academy Press, Washington, D.C. 1996.

in English: Kalahari buffal grass

in South Africa: Kalaharibuffelsgras, sandveld hirsegas

P. kegelii Steud. (*Panicum frondescens* G. Mey.; *Panicum stoloniferum* Poir.; *Panicum stoloniferum* var. *major* (Trin.) Kunth) (dedicated to the German gardener Hermann Aribert Heinrich Kegel, 1819-1856, from 1844 to 1846 plant collector in Suriname. See J.H. Barnhart, *Biographical notes upon botanists*. 2: 277. 1965; August Adriaan Pulle (1878-1955), *An Enumeration of the Vascular Plants Known from Surinam*. Leiden 1906)

Guatemala. See *Encyclopédie Méthodique. Botanique ... Supplément 4*: 274. 1816, *Primitiae Florae Essequiboensis ...* 56. 1818, *Species Graminum* 2: t. 171, f.
