P. serrafalcoides (T. Cooke & Stapf) Bor (*Andropogon cookei* Stapf ex Cooke; *Andropogon cookei* Stapf ex Woodrow; *Andropogon serrafalcoides* Cooke & Stapf; *Dichanthium serrafalcoides* (T. Cooke & Stapf) Blatt. & McCann; *Pseudodichanthium cookei* (Stapf ex Cooke) M.R. Almeida) (for the British botanist Theodore Cooke, 1836-1910, 1892 FLS, botanical collector in India, author of *The Flora of the Presidency of Bombay ...* London [1901-] 1903-1908. See Herbert Mills Birdwood (1837-1907), "A catalogue of the flora of Matheran and Mahabaleshwar [Mahabaleshwar or Mahabaleshwar]... with a note by T. Cooke." Revised edn. *Journ. Bomb. Nat. Hist. Soc.* x. Bombay 1897; H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 148. Oxford 1964; J.H. Barnhart, *Biographical notes upon botanists*. 1: 377. 1965; I.C. Hedge and J.M. Lamond, *Index of Collectors in the Edinburgh Herbarium*. 71. Edinburgh 1970; R. Desmond, *The European Discovery of the Indian Flora*. Oxford 1992; Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 166. London 1994)

India. Culm with nodal swelling at the base of the internode, inflorescence terminal and axillary, spikelets broadly winged, see *Journal of the Bombay Natural History Society* 13: 438. 1893 and *Bulletin of Miscellaneous Information Kew* 1908: 450. 1908, *Journal of the Bombay Natural History Society* 32: 426. 1928, *Indian Forester* 66: 272. 1940.

Pseudolasiacis (A. Camus) A. Camus =
Lasiacis (Griseb.) Hitchc.

Greek *pseudes* "false" plus *Lasiacis* (Griseb.) Hitchc.

Paniceae, *Panicum* subg. *Pseudolasiacis* A. Camus, usually in *Lasiacis*, see *Species Plantarum* 1: 55, 58. 1753, *Systema Naturae, Editio Decima* 2: 871. 1759, *Flora of the British*

West Indian Islands 551. 1864 and *Contributions from the United States National Herbarium* 15: 13-15, 16. 1910, *Contr. U.S. Natl. Herb.* 22: 13. 1920, *Bulletin de la Société Botanique de France* 73: 974. 1927, *Bulletin Mensuel de la Société Linnéenne de Lyon* 14: 72. 1945, *Notulae Systematicae. Herbarium du Muséum de Paris* 12: 86-87. 1945, *Fieldiana, Botany* 24(2): 38-331. 1955, *Annals of the Missouri Botanical Garden* 65(4): 1133-1254. 1978[1979], *Flora Mesoamericana* 6: 318-321. 1994, *Flora Fanerogámica Argentina* 19(1): 11-16. 1995, *Memoirs of the New York Botanical Garden* 78: 509-540. 1996, *Adansonia, Sér.* 3 21(2): 231-237. 1999.

Species

P. bathiei (A. Camus) A. Camus (*Panicum bathiei* A. Camus)

Africa. See *Bulletin de la Société Botanique de France* 73: 977. 1926, *Bulletin Mensuel de la Société Linnéenne de Lyon* 14: 72. 1945.

P. leptolomoides (A. Camus) A. Camus (*Panicum alleizettei* A. Camus; *Panicum bathiei* A. Camus; *Panicum frappieri* A. Camus; *Panicum lemeeanum* A. Camus; *Panicum leptolomoides* A. Camus; *Panicum leptolomoides* var. *ambrensis* A. Camus; *Pseudolasiacis lemeena* (A. Camus) A. Camus)

Madagascar. Climbing, leaning, see *Bulletin du Muséum National d'Histoire Naturelle* 30: 514. 1924, *Bulletin Mensuel de la Société Linnéenne de Lyon* 14: 72. 1945, *Notulae Systematicae. Herbarium du Muséum de Paris* 12: 86-87. 1945, *Bulletin de la Société Botanique de France* 99: 143. 1952, *Bulletin de la Société Botanique de France* 106: 215. 1959.

P. leptolomoides (A. Camus) A. Camus var. *coursii* (A. Camus) Bosser (*Panicum coursii* A. Camus)

Madagascar. See *Bulletin de la Société Botanique de France* 107: 215. 1959, *Adansonia, Sér.* 3 21(2): 233. 1999.

P. neoperrieri (A. Camus) A. Camus (*Panicum ihosyense* A. Camus; *Panicum neoperrieri* A. Camus)

Madagascar. See *Bulletin de la Société Botanique de France* 73: 976. 1926, *Bulletin de la Société Botanique de France* 81: 54. 1934, *Bulletin Mensuel de la Société Linnéenne de Lyon* 14: 72. 1945, *Adansonia, Sér.* 3 21(2): 235, f. 2(map). 1999.

Pseudopentameris Conert

From the Greek *pseudes* "false" with *Pentameris* P. Beauv.

About 2-4 species, South Africa. Arundinoideae, Dantho-
nieae, perennial, herbaceous, unarmed, erect, tufted, forming clumps, branched or simple, auricles present, ligule a fringe of hairs, leaf blades linear, leaves rigid or soft, plants bisexual, inflorescence paniculate sometimes racemose, panicle contracted, spikelets solitary and pedicelled, 2 florets bisexual, central awn geniculate and twisted in lower

part, glumes more or less equal 3- to 7-nerved, lemmas bilobed coriaceous 9-nerved, geniculate central awn, palea present, 2 free and fleshy lodicules glabrous or ciliate, 3 stamens, ovary glabrous with apical pseudostigmata, dark stigmas, open habitats, mountain, sometimes referred to and included in *Danthonia* sensu lato, type *Pseudopentameris macrantha* (Schrad.) Conert, see *Flore Française. Troisième Édition* 3: 32. 1805, *Essai d'une Nouvelle Agrostographie* 92, t. 18, f. 8. 1812 and *Mitteilungen der Botanischen Staatssammlung München* 10: 299-308. 1971, *Zoologica Africana* 13(2): 329-350. 1978.

Species

P. brachyphylla (Stapf) Conert (*Danthonia brachyphylla* Stapf)

South Africa. Perennial, tufted, leaves basal, old leaves curled, lemmas pubescent, central awn geniculate, found in rocky soils, sandy slopes, see *Flora Capensis* 7: 520-521. 1899 and *Mitteilungen der Botanischen Staatssammlung München* 10: 304. 1971.

P. macrantha (Schrad.) Conert (*Danthonia macrantha* Schrad.; *Pentameris macrantha* (Schrad.) Nees)

South Africa. Perennial, tufted, erect, forming large clumps, lemmas glabrous and pubescent, central awn geniculate, grains eaten by baboons, found in rocky soils, sandy or stony slopes, see *Mantissa* 2: 385. 1824, *Linnaea* 7(3): 312. 1832 and *Mitteilungen der Botanischen Staatssammlung München* 10: 304. 1971.

Pseudophacelurus A. Camus = Phacelurus Griseb.

Greek *pseudes* "false" plus the genus *Phacelurus* Griseb.

Panicoideae, Andropogonodae, Andropogoneae, Rottboelliinae, type *Pseudophacelurus speciosus* (Steud.) A. Camus, see *Supplementum Plantarum* 13, 114. 1781 [1782], *Spicilegium florum rumelicarum et bithynicarum ...* 2: 423-424. 1844 [1846], *Flora* 29: 21. 1846, *Synopsis Plantarum Glumacearum* 1: 375. 1854, *Die Natürlichen Pflanzenfamilien* 2(2): 25. 1887 and *Bulletin du Muséum d'Histoire Naturelle* 27(5): 370-371. 1921.

Pseudophleum Dogan = Phleum L.

Greek *pseudes* "false" plus *Phleum* L.

One species, Europe, Turkey. Pooideae, Poodae, Aveneae, or Pooideae, Poaceae, Alopecurinae, annual, herbaceous, unbranched, auricles absent, narrow leaf blades, ligule membranous, plants bisexual, inflorescence paniculate, spikelets more or less pedicellate or sessile, 2 glumes unequal, palea 2-keeled 2-nerved, 2 free and membranous lodicules, 3 stamens, ovary glabrous, 2 stigmas, open areas,

sometimes referred to *Phleum*, type *Pseudophleum gibbum* (Boiss.) Dogan, see *Species Plantarum* 1: 59. 1753 and *Notes from the Royal Botanic Garden, Edinburgh* 40(1): 75. 1982, *Contributions from the United States National Herbarium* 48: 491-494. 2003.

Species

P. gibbum (Boiss.) Dogan (*Phleum gibbum* Boiss.)

Turkey. Glumes 3-nerved, sandy soils, see *Notes from the Royal Botanic Garden, Edinburgh* 40(1): 77. 1982.

Pseudopogonatherum A. Camus = Eulalia Kunth, *Puliculum* Stapf ex Haines

About 2 species, tropical Asia. Panicoideae, Andropogonodae, Andropogoneae, Andropogoninae, perennial or rarely annual, tufted or forming tussocks, leaves mainly basal, auricles absent, narrow leaves, ligule a fringed membrane, inflorescence of digitate or subdigitate racemes, tough rachis, spikelets paired, two glumes more or less equal, lower glume 2-nerved, upper glume 1-nerved, palea nerveless, 2 free and fleshy lodicules, 3 stamens, ovary glabrous, 2 stigmas, sometimes included in and referred to *Eulalia*, type *Pseudopogonatherum irritans* (R. Br.) A. Camus, see K.S. Kunth, *Révision des Graminées*. 1: 160. Paris 1829, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 4,2(1): 90. 1836, *Die Natürlichen Pflanzenfamilien*. 2(2): 24. (July) 1887, *Monographiae Phanerogamarum* 6: 189, t. 1, f. 13. 1889, *Revisio Generum Plantarum* 2: 788. 1891 and *Annales de la Société Linnéenne de Lyon, sér. 2* 68: 203-205. 1921, *Fl. Indo-Chine* 7: 254. 1922, *The Botany of Bihar and Orissa* 5: 1018. 1924, *Bulletin of the Tokyo Science Museum* 18: 2. 1947, *Index Grass Sp.* 3: 203. 1962, Alan N. Andersen, Francisco M. Azcarate and Ian D. Cowie, "Seed selection by an exceptionally rich community of harvester ants in the Australian seasonal tropics." *Journal of Animal Ecology* 69(6): 975-984. Dec 2000, Natalie A. Rositter, Samantha A. Setterfield, Michael M. Douglas and Lindsay B. Hutley, "Testing the grass-fire cycle: alien grass invasion in the tropical savannahs of northern Australia." *Diversity & Distributions* 9(3): 169-176. May 2003.

Species

P. contortum (Brongn.) A. Camus (*Andropogon asthenostachys* Steud.; *Andropogon koretrostachys* Trin.; *Erianthus articulatus* (Trin.) F. Muell.; *Eulalia concinna* Nees ex Steud.; *Eulalia contorta* (Brongn.) Kuntze; *Eulalia contorta* (Brongn.) Pilg.; *Eulalia koretrostachys* (Trin.) Pseudoraphis Griff.

Greek *pseudes* "false" and *rhaphis*, *rhaphidos* "a needle," referring to the solitary stiff bristle, to the needle-like bristles.

About 6-7 species, India, Japan, Australia, Eastern Asia. Panicoideae, Panicodae, Paniceae, subtribe Cenchrinae, perennial, aquatic or semiaquatic, decumbent, herbaceous, branched, rooting at the lower nodes, stoloniferous, creeping or forming large floating masses, nodes usually glabrous, internodes hollow, auricles lanceolate or variable, flattened leaf sheaths, leaf blades acuminate and narrow, ligule membranous often pointed, plants bisexual, inflorescence a solitary raceme or panicle of spiciform racemes ending in a long persistent bristle, spikelets solitary and shortly pedicellate, spikelets acute and falling with the glumes, 2 florets, lower floret male or neuter, upper floret usually female or rarely hermaphrodite, solitary and erect stiff bristle below the uppermost spikelet, 2 glumes very unequal and dissimilar, lower glume minute, upper glume coriaceous, lower lemma acute to acuminate or shortly awned, upper lemma translucent and nerveless, palea present, 2 lodicules more or less joined and fleshy, palea present, 2 fleshy lodicules, 0-3 stamens, ovary glabrous, small fruit dorsally compressed, fodder and cover plants, weeds of irrigation, found in marshes and riverbanks, swamps, ponds and lakes, wetlands, open habitats, type *Pseudoraphis brunoniana* (Wall. & Griff.) Griff., see *Species Plantarum* 1: 55. 1753, *Species Plantarum* 2: 1047. 1753, *Der Naturforscher* 23(1): 209. 1788, *Prodromus Florae Novae Hollandiae* 193. 1810, William Griffith (1810-1845), *Notulae ad Plantas Asiaticas* 3: 29, t. 139, f. 217. Calcutta 1851 and *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 10: 210. 1928, J.W. Vickery, "*Pseudoraphis spinescens* (R. Br.) n. comb." *Proc. Roy. Soc. Dec 2004.

Species

P. abortiva (R. Br.) Pilger (*Panicum abortivum* R. Br.; *Pseudoraphis spinescens* (R. Br.) Vickery)

Australia. See *Prodromus Florae Novae Hollandiae* 193. 1810 and *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 10: 210. 1928, *Proceedings of the Royal Society of Queensland* 62(7): 69. 1952.

P. balansae Henrard (*Pseudoraphis longipaleacea* Chia)

Vietnam, Southeast Asia, Thailand, China. Perennial, slender, floating, rhizomatous, leaf sheaths keeled, leaf blades linear, ligule membranous and truncate, erect racemes, usually a single acute spikelet, terminal bristle, 3 stamens in lower floret, see *Blumea* Suppl. 1: 230, t. 17. 1937, *Flora Hainanica* 4: 442, 540, f. 1232. 1977, *Novon* 13: 469. 2003.

in China: chang fu wei zhen mao

P. brunoniana (Wall. & Griff.) Griff. (*Chamaeraphis brunoniana* (Wall. & Griff.) A. Camus; *Chamaeraphis brunoniana* (Griffith) A. Camus; *Chamaeraphis spinescens* var. *brunoniana* (Wall. & Griff.) Hook.f.; *Chamaeraphis spinescens* var. *brunoniana* (Griff.) Hook.f.; *Holcus natans* Roxb. ex Hook.f.; *Panicum brunonianum* Wall. & Griff.; *Panicum intermedium* Griff., nom. illeg., non *Panicum intermedium* Vahl ex Hornem.)

Southeast Asia, China, India, Myanmar. Perennial, aquatic, usually floating, rooting in water, emergent, stoloniferous, leaf blades linear-lanceolate, ligule membranous, inflorescence open, stiff racemes spreading, bristles or scales subtending the spikelets, upper floret pistillate, upper glume lanceolate, closely related to and often confused with *Pseudoraphis spinescens* (R. Brown) Vickery, see *Encyclopédie Méthodique, Botanique*, Suppl. 2: 189. 1811, *Journal of the Asiatic Society of Bengal* 5: 574. 1836, *Notulae ad Plantas Asiaticas* 3: 29, t. 139, f. 217. 1851, *The Flora of British India* 7: 62. 1897 [1896] and *Flore Générale de l'Indo-Chine* 7: 479. 1922, *Grasses of Burma ...* 353. 1960.

in China: wei zhen mao

in Thailand: krok khao, krok khao

P. minuta (Mez) Pilg. (*Chamaeraphis gracilis* Hack. ex Hook.f., nom. illeg., non *Chamaeraphis gracilis* Hack.; *Chamaeraphis minuta* Mez)

Southeast Asia, Vietnam, India. Swamps, see *The Flora of British India* 7: 62. 1897 [1896] and *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 7: 48. 1917,

Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem 10: 210. 1928.

P. paradoxa (R. Br.) Pilger (*Panicum paradoxum* R. Br.)

Australia, New South Wales, Queensland, Victoria. Perennial, stoloniferous, glabrous nodes, ligule truncate, inflorescence a raceme, spikelets on very short branches, lower glume truncate, lower lemma male, upper lemma female and elliptic, fodder, cover plants, weeds of irrigation, seasonal or permanent pools and riverbanks, coastal districts. in English: slender mudgrass, thorny mudgrass

P. sordida (Thwaites) S.L. Chen & S. M. Phillips (*Chamaeraphis depauperata* Nees ex Steud.; *Chamaeraphis spinescens* var. *depauperata* Nees ex Hook.f.; *Chamaeraphis squarrosa* var. *depauperata* (Nees ex Hook.f.) Masam.; *Panicum sordidum* Thwaites; *Pseudoraphis depauperata* (Nees ex Steud.) Keng; *Pseudoraphis depauperata* (Nees ex Hook.f.) Hara)

Indonesia to Australia, India and Sri Lanka, Thailand, Malaysia, Papua New Guinea. Perennial with trailing

flexible stems, aquatic or semiaquatic, emergent, decumbent, prostrate, stoloniferous, low creeping, nodes pubescent, leaf sheaths laterally compressed and keeled, ligule fringed, open panicle with numerous spikelets on long slender branches, erect seed head, stiff bristle, solitary and secund spikelets narrow and acuminate, lower glume abaxial and nerveless, upper glume pointed and nerved, lower lemma male, upper lemma female, palatable, extensively used as fodder, highly palatable to water buffalo, good for grazing, heavily grazed by deer and wallabies, ground cover, forms dense and almost pure stands on floodplains that are seasonally dry, sometimes floating mats in the water, sensitive to flood timing, requires a long period of flooding to produce flowers and set seed, provides habitat for waterbirds and amphibians, used for nesting, intolerant of very long periods of submergence, found in frequently flooded areas, on seasonal intermittent freshwater ponds and marshes, swamp wet-dry edges, lagoons, pools and riverbanks, riverine floodplains, in damp or muddy areas, freshwater swamps and lowland freshwater swamps, on deep waterholes and shallow streams, see *Supplementum Plantarum* 433. 1781 [1782], *Der Naturforscher* 23(1): 209. 1788, *Tableau Encyclopédique et Méthodique ... Pseudoroegneria (Nevski) Á. Löve = *Elymus* L.

From the Greek *pseudes* "false" plus *Roegneria* K. Koch.

About 15-16 species, Central Asia, China, North America, Middle East. Pooideae, Triticoideae, Triticeae, or Pooideae, Triticeae, Hordeinae, *Elytrigia* sect. *Pseudoroegneria* Nevski, perennial, tufted or densely tufted, herbaceous, erect, unbranched, auricles present, leaf blades linear, ligule membranous, plants bisexual, inflorescence a single spike, spikelet solitary at each node, two glumes lanceolate, palea present, 2 free and membranous lodicules, 3 stamens, ovary hairy, 2 stigmas, sometimes included in *Elytrigia* Desv., sometimes referred to *Elymus* and *Elytrigia*, open areas, open hillsides, drought-tolerant, type *Pseudoroegneria strigosa* (M. Bieb.) Á. Löve, see *Species Plantarum* 1: 83, 85. 1753, *Nouveau Bulletin des Sciences, publié par la Société Philomatique de Paris* 2: 190. 1810, *Flora Taurico-Caucasica* 3: 81. 1819, *Flora Altaica* 1: 117. 1829, *Verzeichniss der Pflanzen...* 25. 1831, *Linnaea* 21(4): 413. 1848, *Bulletin de la Société Botanique de France* 4: 307. 1857, *Bulletin, Division of Agrostology United States Department of Agriculture* 4: 27-28. 1897 and *Allgemeine Botanische Zeitschrift für Systematik, Floristik, Pflanzengeographie* 10: 21. 1904, *Flora URSS* 2: 636, 638, 640. 1934, *Trudy Sredne-Aziatskogo Gosudarstvennogo Universiteta. Oka, "Ecology of wild rice planted in Taiwan. IV. Interactions between perennial and annual types of wild rice and *Leersia hexandra* in mixed planting." in *J. Agric. & Forestry* 43(3): 55-56, Publ. by Nail. Chung Hsing Univ. Taichung. Taiwan. ROC 1994, *Annals of the Missouri Botanical Garden* 81(4): 768-774. 1994, *Contributions from the United States National Herbarium* 39: 35, 64-67. 2000.

Pseudosasa Makino ex Nakai = *Pseudosasa* Makino, *Yadakeya* Mak.

Greek *pseudes* "false" with *Sasa* Makino & Shib., referring to the number of the stamens.

About 8-36 species, Japan and Taiwan, eastern Asia. Bambusoideae, Bambusodae, Bambuseae, or Bambusoideae, Bambuseae, Arundinariinae, dense shrubby perennial, erect, spreading, woody and persistent, sympodial, unarmed, forming thickets, creeping rhizomes hypogeous, leaf blades coriaceous, leaves long-lanceolate, flowering culms leafy, upper culm nodes often with 1-3 branches, branched above, branches usually absent from the lower nodes, culm sheaths persistent or shedding late, sheath blade often erect, leaf sheath without auricles, culm internodes hollow, rhizomes pachymorph and leptomorph, plants bisexual, inflorescence a racemose panicle, spikelets linear or lanceolate several-flowered, two glumes unequal to subequal, lemmas ovate, palea present, 3 lodicules, stamens 3-4, ovary glabrous, feathery stigmas 2-3, woodland, along roadsides, closely related to *Sasa*, sometimes referred to *Arundinaria*, type

Pseudosasa japonica (Siebold & Zucc. ex Steud.) Makino ex Nakai, see *Genera Plantarum* 1: 236. 1789, *Flora Boreali-Americana* 1: 73. 1803 and *Botanical Magazine* 15(168): 18. 1901, *J. Jap. Bot.* 2(4): 15. 1920, *Journal of the Arnold Arboretum* 6(3): 148, 150. 1925, *Journal of Japanese Botany* 6(7): 16. 1929, *Taxon* 6(7): 207. 1957, *Agriculture Handbook* 193: i-iii, 1-74. 1961, *Bulletin of Botanical Research* 11(4): 44-46. 1991, *Taxon* 45: 543-544. 1996, *Ecological Research* 13(1): 41-53. Mar 1998, *Taxon* 48: 359-360. 1999, *European Journal of Soil Science* 50(2): 217-226. July 1999, *Contributions from the United States National Herbarium* 39: 106-107, 116. 2000, *Ecological Research* 19(5): 485-493. Sep 2004.

Species

P. acutivagina Wen & S.C. Chen (*Acidosasa nanunica* (McClure) C.S. Chao & G.Y. Yang; *Indocalamus nanunicus* McClure)

China, Zhejiang. Pruinose, white pubescent, coriaceous sheath persistent or shedding late and longer than internode, no sheath auricles and no cilia, sheath blade erect, 3 branches on each node, 2-3 leaves on each twig, leaves broad-lanceolate to ovate lanceolate and densely pubescent beneath, used as hedge, living green fence, cultivated, see *Journal of the Arnold Arboretum* 6(3): 148. 1925, *Lingnan University Science Bulletin* 9: 25. 1940, *Journal of Bamboo Research* 1(2): 31. 1982, *Journal of Bamboo Research* 3(2): 31, f. 7. 1984, *Acta Phytotaxonomica Sinica* 39(1): 39. 2001.

P. aerea Wen

China, Zhejiang. Sheath auricles present, sheath ligule truncate, sheath blade lanceolate erect, 3-5 leaves on each twig, leaves lanceolate glabrous, used for making farm implements, umbrella stalks, handicrafts, see *Bulletin of Botanical Research* 3(1): 94-95, pl. 3. 1983.

P. altiligulata Wen (*Acidosasa nanunica* (McClure) C.S. Chao & G.Y. Yang; *Indocalamus nanunicus* McClure)

China. See *Journal of the Arnold Arboretum* 6(3): 148. 1925, *Lingnan University Science Bulletin* 9: 25. 1940, *Journal of Bamboo Research* 1(2): 31. 1982, *Journal of Bamboo Research* 3(2): 31, f. 7. 1984, *Journal of Bamboo Research* 8(1): 18-20, f. 3. 1989, *Acta Phytotaxonomica Sinica* 39(1): 39. 2001.

P. amabilis (McClure) Keng f. (*Arundinaria amabilis* McClure; *Pseudosasa amabilis* var. *amabilis*)

China. Clumps pluricaespitose and diffuse, straight, rhizomes monopodial, internodes cylindrical, long and straight internodes, no sheath auricles, branching nodes slightly swollen, branches in mid-culms in threes, culm leaves tardily deciduous, leaves thick and hard, leaf blades narrow long lanceolate, cultivated, ornamental, culms material for fishing rods, vaulting poles and furniture construction etc., see *Lingnan Science Journal* 10(1): 6, t. 1-8. 1931, *Lingnan*

Science Journal 13: 503. 1934, *Claves Generum et Specierum Graminearum Primarum Sinicarum Appendice Nomenclatione Systematica* 154. 1957, *Flora Illustralis Plantarum Primarum Sinicarum: Gramineae* 31. 1959, *Forest Research (China)* 1: 109-111. 1988, *Acta Phytotaxonomica Sinica* 29(5): 452-455. 1991, *Journal of Zhejiang Forestry College* 8(1): 127-130. 1991.

P. flexuosa Yi & X.M. Zhou

China. See *Journal of Bamboo Research* 15(3): 1-4, f. 1. 1996.

P. gracilis S.L. Chen & G.Y. Sheng

China, Hunan. Slender, sheath shedding late, sheath auricles inconspicuous, sheath ligule very short, sheath blade broadly ovate lanceolate, 2-3 branches per node, 2-3 leaves on each branch, leaves lanceolate, similar to *Arundinaria amabilis* McClure, see *Acta Phytotaxonomica Sinica* 21(4): 405, pl. 1. 1983.

P. guanxianensis Yi

China, Guanxian, Sichuan. Sheath purplish greenish persistent, sheath auricles elliptic, sheath ligule arcuate brownish, sheath blade linear-lanceolate, 4 leaves on each twig, leaves lanceolate, see *Bulletin of Botanical Research* 2(4): 103-104, pl. 3. 1982.

P. hainanensis G.A. Fu

China. See *Journal of Bamboo Research* 13(3): 1-3, f. 1. 1994.

P. hamadae Hatusima

Japan. Branched, three branches per node, culm sheaths glabrous, internodes velutinous and glabrescent, nodes horizontal and not prominent, leaf sheaths glabrous, leaves oblong-lanceolate and glabrous, see *Journal of Geobotany, Hokuriku* 15(4): 86, f. 1 [87]. 1967.

in Japan: oba-yadake

P. hirta S.L. Chen & G.Y. Sheng

China. See *Bulletin of Botanical Research* 11(4): 43-44. 1991.

P. japonica (Siebold & Zucc. ex Steud.) Makino ex Nakai (*Arundinaria japonica* Sieb. & Zucc. ex Steud.; *Pseudosasa japonica* (Siebold & Zucc.) Makino; *Sasa japonica* (Siebold & Zucc. ex Steud.) Makino; *Yadakeya japonica* (Siebold & Zucc. ex Steud.) Makino)

Asia temperate, Japan, South Korea. Tufted, nodes prominent, forming dense thickets, creeping rhizomes running extensively, culm banded white just below the nodes, culm sheath green or dark, sheath persistent shorter than internode, no sheath auricles, ligule broad and truncate, branches one per node, sometimes 2-3 branches at upper nodes, leaf sheath glabrous, 4-7 leaves on each twig, leaves lanceolate and coriaceous, inflorescence purplish, 5-10 flowered, spikelets flattened with distichous florets, 2 glumes acuminate, lemmas acute shortly awned, paleas keeled and ciliate, 3-4 stamens, ovary glabrous, 3 stigmas elongate, ornamental, cultivated and escaped from cultivation, naturalized

elsewhere, used for making arrows, found along riverbanks, roadsides, gardens, abandoned fields, waste places, see *Synopsis Plantarum Glumacearum* 1: 334. 1854 and *Botanical Magazine* (Tokyo) 26(300): 13, f. 2. 1912, *Les Bambusées* 19. 1913, *Icones plantarum formosandarum nec non et contributiones ad floram formosanam*. 6: 138-139, f. 49. 1916, *Journal of Japanese Botany* 2(4): 15. 1920, *Journal of the Arnold Arboretum* 6(3): 150. 1925, *Journal of Japanese Botany* 3: 44. 1926, *Journal of Japanese Botany* 6(7): 16. 1929, *Science Education [Rika Kyô-iku]* 15(6): 71. 1932, *Flora Sylvatica Koreana* 20: 20. 1933, *New Keys of Japanese Trees*, Revised Edn. 470. P. vittata B.M. Yang

China. See *Bamboo Research in Asia* 1989(2): 2. 1989.

P. wuyiensis S.L. Chen & G.Y. Sheng

China. Pruinose, sheath coriaceous, sheath ligule arcuate, no sheath auricles and cilia, sheath blade linear-lanceolate, 3 branches on each node, 3-4 leaves on each branches, leaves narrow-lanceolate, see *Bulletin of Botanical Research* 11(4): 46, pl. 1, f. 6-8. 1991.

P. yuelushanensis B.M. Yang

China, Hunan. Thin striae, node convex, pruinose and white pubescence, culm sheath shedding late, sheath auricle weak, sheath ligule truncate, sheath blade narrow lanceolate, 1-3 branches on each node, leaf lanceolate or ovate, see *Natural Science Journal of Hunan Normal University* 9(3): 90. 1986.

Pseudosecale (Godr.) Degen = *Dasypyrum*
(Coss. & Durieu) T. Durand

From the Greek *pseudes* “false” and *Secale* L.

Pooideae, Triticeae, Triticinae, *Triticum* sect. *Pseudosecale* Godr., see *Species Plantarum* 1: 84. 1753, Michel Charles Durieu de Maisonneuve (1796-1878), *Exploration scientifique de l'Algérie: sciences naturelles. Botanique*. Michel Charles Durieu et al. *Flore d'Algérie. Cryptogamie*. Première Partie. Par Durieu de Maisonneuve. Avec le concours de MM. Montagne, Bory de Saint-Vincent, L.R. Tulasne, C. Tulasne, Lèveillé.—2. *Flore d'Algérie. Phanérogamie*. Groupe des Glumacées. Par E. Cosson et Durieu de Maisonneuve.—3. Atlas de La Flore d'Algérie ou illustrations d'un grand nombre de plantes nouvelles ou rares de ce pays... Paris, Imprimerie Impériale [1846-1869], *Flore de France ... Prospectus* 3: 599. 1856, *Index Generum Phanerogamorum* 504. 1888 and *Archives de Biologie Végétale Pure et Appliquée* 1: 35, 62. 1901, *Flora Velebitica* 1: 574-575. 1936, *Fl. Afrique Nord* 3: 333. 1955, *Hereditas; genetiskt arkiv*. 114: 237-244. 1991, *Acta Phytotaxonomica Sinica* 37(2): 125-130. 1999, *Taxon* 49(2): 257. 2000, *Contributions from the United States National Herbarium* 48: 245, 590. 2003.

Pseudosorghum A. Camus

From the Greek *pseudes* “false” plus *Sorghum* Moench.

Two species, tropical Asia, Indomalaysia. Panicoideae, Andropogonodae, Andropogoneae, Andropogoninae, annual, erect, decumbent, herbaceous, more or less branched or unbranched, culm internodes solid, leaves flat and linear, auricles absent, plants bisexual, terminal inflorescence densely paniculate, small dense panicle with very short branches, racemes bearing numerous pairs of sessile and pedicellate spikelets, bisexual spikelets, sessile spikelet awned, pedicellate spikelet unawned, floret single and male, basal spikelets barren, 2 glumes subequal, lower glume cartilaginous glabrous, upper lemma bilobed awned, palea present or absent, 2 free and fleshy lodicules, 3 stamens, ovary glabrous, 2 stigmas, shade, damp places, open areas, type *Pseudosorghum fasciculare* (Roxb.) A. Camus, see *Species Plantarum* 2: 1045. 1753, *Methodus Plantas Horti Botanici ...* 207. 1794, *Synopsis Plantarum Glumacearum* 1: 369. 1854, *Flora* 68(8): 141. 1885 and *Bulletin du Muséum d'Histoire Naturelle* 26: 662-663. 1920 [or 1921], *Sinensia* 10: 317, 338. 1939.

Species

P. fasciculare (Roxb.) A. Camus (*Andropogon fascicularis* Roxb.; *Andropogon gangeticus* Hack.; *Andropogon nitidulus* Hook.f.; *Andropogon tonkinensis* Balansa; *Sorghum fasciculare* (Roxb.) Haines; *Sorghum gangeticum* (Hackel) Stapf ex Haines; *Sorghum gangeticum* (Hack.) Kuntze; *Sorghum gangeticum* (Hack.) Stapf ex Haines, nom. illeg., non *Sorghum gangeticum* (Hack.) Kuntze)

India. Annual, erect from a decumbent and branching base, leafy, simple or branched, often nodding, sheaths glabrous

or hairy, ligule often ciliate, hispid leaves, inflorescence paniculate with jointed racemes, at each joint a sessile awned spikelet and a pedicelled not awned spikelet, see *Flora Indica; or Descriptions ...* 1: 269. 1820, *Fodder Grasses N. India* 34. 1888, *Monographiae Phanerogamarum* 6: 539. 1889, *Journal de Botanique, rédigé par une société de botanistes* 4: 112. 1890, *Revisio Generum Plantarum* 2: 791. 1891, *The Flora of British India* 7: 199. 1897 [1896] and *Bulletin du Muséum d'Histoire Naturelle* 26: 662. 1920, Henry Haselfoot Haines (1867-1945), *The Botany of Bihar and Orissa: an account of all the known indigenous plants of the Province and of the most important or most commonly cultivated exotic ones ...* in 6 parts. 5: 1034. London, Govt. of Bihar & Orissa 1921-1925.

in India: kachi gadi, kasi gadi, khar jhara, konda jeri, kora gadi, mular, sonahi

Pseudostachyum Munro = *Dinochloa* Büse,
Melocalamus Benth., *Schizostachyum* Nees

Greek *pseudes* “false” and *stachys* “a spike.”

About 1-2 species, tropical and subtropical, eastern Himalaya, India, Assam, Upper Myanmar. Bambusoideae, Bambusodae, Bambuseae, sympodial, pluricaespitose, perennial, woody and persistent, flexible and durable, pendulous or scandent above or not scandent, culm wall thin, internodes short, more than 10 branches at each node, branched near their tops, most of branches fascicled, rhizomes pachymorph, flowering culms leafy, culm sheaths truncate-triangular and caducous, sheath blade erect, culm internodes hollow, pruinose ring below joint, rhizomes culms arising singly from long creeping rhizome, plants unarmed and bisexual, flowering itercauctant, inflorescence spicate and bracteate, spikelets with basal buds, 1 glume per spikelet, palea present, 3-5 lodicules, 6 stamens, ovary glabrous, 2 stigmas, culm stalk hard and tough, used for fish screens and fish fences, shade species, moist and shady places, sometimes referred to *Schizostachyum*, type *Pseudostachyum polymorphum* Munro, see *Flora Brasiliensis seu Enumeratio Plantarum* 2: 535. 1829, *Plantae Jung-huhnianae* 3: 387. 1854, *Transactions of the Linnean Society of London* 26(1): 141-142, t. 4. 1868, *Journal of the Asiatic Society of Bengal. Part 2. Natural History* 42(2): 252-253. 1873, *Genera Plantarum* 3: 1095, 1212. 1883 and *Kew Bulletin* 1936: 253. 1936, *Contributions from the United States National Herbarium* 39: 56, 112. 2000.

Species

P. polymorphum Munro (*Schizostachyum leviculme* McClure; *Schizostachyum polymorphum* (Gamble) R.B. Majumdar)

India, Darjeeling, Sikkim, Bhutan. Bending or drooping, no conspicuous main branch, culm stalk long and slender

forming a running false-rhizome, culm wall very thin, young culm light green, smooth internodes lightly waxy, culm sheaths broad, leaf sheaths pruinose, sheath auricles and cilia weak, sheath blade triangular and erect, leaves elliptically lanceolate, cultivated, culms easy to split, processed culm stalk waterproof, hammered flat stems used as binding material or for fence weaving, for baskets and mats, see *Sunyatsenia* 6(1): 43-46, t. 10. 1941, *Florae Indicae Enumeratio: Monocotyledonae, Bambusoideae* Botanical Survey of India, Flora of India, Series 4, 282. Calcutta 1989, *Edinburgh Journal Bot.* 51: 30. 1994.

Common names: philim, dai

In India: bajal, basal, nal, paphok, parphok, pheling, purphiok, tolli

P. wakha Brandis ex Camus

Myanmar. See *Les Bambusées* 162. 1913.

Pseudostreptogyne A. Camus = *Lycchloa*
Samuelsson, *Streblochaete* Hochst. ex Pilg.

Greek *pseudes* plus *Streptogyna* P. Beauv., Greek *streptos* “twisted” and *gyne* “female, ovary,” referring to the nature of the ovary.

Pooideae, Poodae, Meliceae, see *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 37: (Beibl. 85) 61. 1906, *Bulletin de la Société Botanique de France* 77: 476. 1930, *Arkiv för Botanik utgivet av K. Svenska Vetenskapsakademien* 25(8): 4. 1933.

Pseudovossia A. Camus = *Phacelurus*
Griseb.

Greek *pseudes* “false” and the genus *Vossia* Wallich & Griffith, after the German poet Johann Heinrich Voss, 1751-1826.

One species, Asia, Indochina. Panicoideae, Andropogonodae, Andropogoneae, Rottboelliinae, herbaceous, branched or unbranched, plants bisexual, inflorescence digitate, spikelets in pairs, two glumes unequal and dissimilar, lower glume 2-keeled, palea awnless, 3 stamens, ovary glabrous, 2 stigmas, type *Pseudovossia cambogiensis* (Balansa) A. Camus, see *Supplementum Plantarum* 13, 114. 1781 [1782], *Journal of the Asiatic Society of Bengal* 5: 572. 1836, *Spicilegium florae rumelicae et bithynicae ...* 2: 423-424. 1844 [1846], *Die Natürlichen Pflanzenfamilien* 2(2): 25. 1887 and *Bulletin du Muséum d'Histoire Naturelle* 26: 665. 1921 [1920].

Species

P. cambogiensis (Balansa) A. Camus (*Phacelurus cambogiensis* (Balansa) Clayton; *Vossia cambogiensis* Balansa)

Indochina. See *Journal de Botanique (Morot)* 4: 109. 1890 and *Bulletin du Muséum d'Histoire Naturelle* 26: 665. 1920, *Kew Bulletin* 33(2): 177. 1978.

Pseudoxytenanthera Soderstr. & R.P. Ellis = *Schizostachyum* Nees

Greek *pseudes* "false" and the genus *Oxytenanthera* Munro.

About 1 or 10-12 species, Southern India and Sri Lanka. Bambusoideae, Bambusodae, Bambuseae, Bambusinae, or Bambusoideae, Bambusodae, Bambuseae, Melocanninae, perennial, woody, branched, vinelike, unarmed, pluricaespitose, sympodial rhizomes, forming loose clumps, culm sheaths deciduous, plants bisexual, inflorescence indeterminate or itercaucant, spikelets sessile, clusters of pseudospikelets, two glumes unequal 10- to 11-nerved, empty glumes, bracts beneath the glumes, 6 stamens, ovary glabrous, 2-3 stigmas, type *Pseudoxytenanthera monadelphica* (Thwaites) Soderstr. & R.P. Ellis, see *Linnaea* 9(4): 476. 1835, *Enum. Pl. Zeyl.* 376. 1864, *Transactions of the Linnean Society of London* 26(1): 123, 126, 129. 1868 and *Smithsonian Contributions to Botany* 72: 1-75. 1988, *Fl. Ind. Enumerat.-Monocot.* 280. 1989, *Journal of the Bombay Natural History Society* 87(3): 440. 1990 [1991], *Plant Resources of South-East Asia (PROSEA)* (Pl Res SEAs) vol. 7: 130-145, 153-154. 1995 [Bamboos], *Contributions from the United States National Herbarium* 39: 112. 2000.

Williams, in *D.S.B.* 6: 589-597. 1981; John Macgillivray (1822-1867), *Narrative of the Voyage of H.M.S. Rattlesnake, Commanded by the late Captain Owen Stanley during ... 1846-1850.* London 1852; Thomas Henry Huxley, *Collected Essays.* 9 volumes. London 1894-1908; *The Life and Letters of T.H. Huxley,* edited by Leonard Huxley. Appleton & Co., New York 1901; Robert Wight, *Icones Plantarum Indiae Orientalis, or Figures of Indian Plants.* Pl. 1295. Madras 1840-1853)

India, Karnataka, Andhra Pradesh, Kerala, Goa, Vietnam. Glabrous, when young covered with dense white or gray deciduous tomentum, few branches at the node, culm sheaths striate, leaves linear-lanceolate attenuate at the base into a petiole, leaf sheaths striate and glabrous, ligule dentate, spikelets mucronate, stamens exserted, ovary hairy, 1 stigma plumose, strong culms used for construction purposes and basketry, making umbrellas, found along the banks of streams, well-drained deep loamy soil, see *Transactions of the Linnean Society of London* 26(1): 130. 1868 and *Fl. Ind. Enumerat.-Monocot.* 280. 1989, *Bot. Zhurn. (Moscow & Leningrad)* 75(2): 224. 1990, *Journal of the Bombay Natural History Society* 87(3): 440. 1990[1991], *Bot. Zhurn. (Moscow & Leningrad)* 76(7): 993. 1991.

in India: chivari, konda, mes, oor-shema, pannangi

P. tenuispiculata (Camus) Nguyen (*Gigantochloa tenuispiculata* (A. Camus) T.Q. Nguyen; *Oxytenanthera tenuispiculata* A. Camus)

Vietnam. See *Bot. Zhurn. (Moscow & Leningrad)* 75(2): 225. 1990, *Bot. Zhurn. (Moscow & Leningrad)* 76(7): 993. 1991.

Pseudozoysia Chiov.

Greek *pseudēs* “false” plus the genus *Zoysia* Willd., after the Austrian botanist Karl von Zoys, 1756-1800, plant collector.

One species, Somalia. Chloridoideae, Cynodonteae, perennial, herbaceous, inflated sheath, plants bisexual, false spike or cylindrical false racemes sessile, spikelets paired, 2 glumes hard and longer than the florets, lower glume ovate, upper glume globose and enclosing the floret, lemma obtuse, palea present, on coastal dunes, open areas, sand dunes, type *Pseudozoysia sessilis* Chiov., see *Plantae Novae vel Minus Notae e regione Aethiopica* 20-21. 1928 [1911-1951, also *Plantae Novae vel Minus Notae ex Aethiopia*, series published in different journals].

Species

P. sessilis Chiov.

Somalia. Perennial, short-lived, tufted, glumes tuberculate, upper glume saccate, open habitats, coastal sand dunes.

Psilantha (K. Koch) Tzvelev = *Eragrostis* Wolf

Greek *psilos* “bare, naked” and *anthos* “flower.”

Chloridoideae, Cynodonteae, or Chloridoideae, Eragrostideae, Eragrostidinae, see *Species Plantarum* 1: 63-64, 67, 73. 1753, *Genera Plantarum* 23. 1776, *Methodus Plantas Horti Botanici* ... 186. 1794, *Utkast til en Svensk Flora, Andra Uplagan* 47. 1798, *Icones et Descriptiones Graminum Austriacorum* 4: 15. 1809, *Hortus Regius Botanicus Berolinensis* 1: 176. 1827, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 1(4): 413. 1830, *Mémoires de la Société d'Agriculture, Sciences et Arts d'Angers* 1: 204. 1831, *Linnaea* 21(4): 405. 1848, *Flora Orientalis* 5: 599. 1883 and *Flora URSS* 2: 319, t. 24, f. 10, a, b. 1934, *Delectus Seminum Hortus Botanicus Reg. Kujbyshev* 13. 1938, *Acta Bot. Neerl.* 15: 157. 1966, *Bot. Zhurn. (Moscow & Leningrad)* 53: 311. 1968, *Taxon* 49(2): 244. 2000, *Contributions from the United States National Herbarium* 41: 81-115, 191. 2001.

Psilathera Link = *Sesleria* Scop.

From the Greek *psilos* “bare, naked” and *ather* “an awn.”

One species, Europe, Mediterranean. Pooideae, Poodae, Seslerieae, perennial, herbaceous, auricles absent, ligule an unfringed membrane, plants bisexual, inflorescence paniculate, sterile spikelets reduced to a bract or vestigial, 2 glumes subequal, palea 2-nerved 2-keeled, 2 free and membranous lodicules, 3 stamens, ovary hairy, 2 stigmas, sometimes referred to *Sesleria*, type *Psilathera tenella* (Host) Link, see *Species Plantarum* 1: 72. 1753, Petri Arduini ... *Animadversionum botanicarum specimen*. Patavii 1759, *Flora Carniolica* 189. 1760, Petri Harduini veronensis horti publici patavini custodis *animadversionum botanicarum specimen alterum*. Venetia 1764, *Hortus Regius Botanicus Berolinensis* 1: 121. 1827 and *Opera Botanica Cechica* 3: 223. 1946, *Ind. Nom. Genericorum* 3: 1607. 1979.

Species

P. ovata (Hoppe) Deyl (*Cynosurus ovatus* Hoppe)

Central Europe. Glumes 1-nerved.

Psilochloa Launert = *Panicum* L.

Greek *psilos* and *chloe*, *chloa* “grass.”

Africa, Namibia, Panicoideae, Paniceae, Paspalinae, or Panicoideae, Panicodae, Paniceae, Panicinae, type *Psilochloa pilgeriana* (Schweick.) Launert (*Acroceras pilgerianum* Schweick.; *Acroceras pilgerianum* Schweick.; *Panicum pilgerianum* (Schweick.) Clayton), see *Species Plantarum* 1: 55, 58. 1753 and *Flora of Tropical Africa* 9: 621. 1920, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 11(104): 242. 1931, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 14(122): 199-200. 1938, *Die Natürlichen Pflanzenfamilien* edition 2, 14e: 20. 1940, *Mitteilungen der Botanischen Staatssammlung München* 8: 147-163. 1970, *Kew Bulletin* 34(3): 559. 1979 [1980], *Taxon* 33: 126-134. 1984, *Kew Bulletin* 42: 402. 1987, *Blumea* 41: 181-216, 416. 1996, *Taxon* 45: 319-320. 1996, *Taxon* 47: 869. 1998, *Taxon* 48: 376. 1999, *Contributions from the United States National Herbarium* 46: 306-441, 537. 2003.

Psilolemma S.M. Phillips

Greek *psilos* “bare, naked” and *lemma* “rind, sheath,” referring to the glabrous lemmas.

One species, East Africa, Ethiopia. Chloridoideae, Eragrostideae, perennial, wiry, herbaceous, stoloniferous, tuberous, leaf blades stiff and linear, ligule fringed, leaf blades distichous and pungent, auricles absent, plants bisexual, inflorescence spicate, spikelets breaking up at maturity, two unequal glumes 1-nerved, smooth glabrous lemmas, palea

2-nerved 2-keeled, 2 stigmas, open areas, a segregate from *Eragrostis*, type *Psilolemma jaegeri* (Pilg.) S.M. Phillips, see *Kew Bulletin* 29(2): 267. 1974, *Flora of Tropical East Africa* 2: 181. Apr. 1974, *Genera Graminum* 223. 1986.

Species

P. jaegeri (Pilg.) S.M. Phillips (*Diplachne jaegeri* Pilg.; *Odysea jaegeri* (Pilg.) Robyns & Tournay)

Africa, Tanzania. Ligule a line of hairs, leaf blades stiff, inflorescence of short racemes bearing 1-5 spikelets, glumes 1-nerved, lemmas rounded obtuse, see *Essai d'une Nouvelle Agrostographie* 80. 1812 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 43(1): 94. 1909, *Hooker's Icones Plantarum* 31: t. 3100. 1922, *Flore des Spermatophytes du Parc National Albert* 3: 166. 1955.

Psilopogon Hochst. ex A. Rich. = *Arthraxon* P. Beauv., *Microstegium* Nees, *Psilopogon* Hochst., *Psilopogon* Phil. (Asteraceae, alt. Compositae)

From the Greek *psilos* and *pogon* “a beard.”

Panicoideae, Andropogoneae, Andropogoninae, type *Psilopogon capensis* Hochst., see A.M.F.J. Palisot de Beauvois, *Essai d'une nouvelle Agrostographie*. 111, t. 11, f. 6. (Dec.) 1812, *A Natural System of Botany* 447. 1836, *Flora* 29: 117. 1846, *Tentamen Florae Abyssinicae* ... 2: 447. 1850, *Ind. Sem. Hort. Genuens.* (1852): 25. 1852, *Flora* 39: 189. 1856, *Linnaea* 33: 126. 1864, Georg August Schweinfurth (1836-1925), *Beitrag zur Flora Aethiopiens* ... 310. Berlin 1867 and *Annales de la Société Linnéenne de Lyon, sér. 2*, 68: 201. 1921 [1922], *Contributions from the United States National Herbarium* 46: 104-110, 292, 543. 2003.

Psilostachys Steud. = *Dimeria* R. Br., *Psilostachys* Turcz. (Euphorbiaceae), *Psilostachys* Hochstetter (Amaranthaceae)

From the Greek *psilos* “bare, naked” and *stachys* “a spike.”

Andropogoneae, type *Psilostachys hohenackeri* Steud., see *Prodromus Florae Novae Hollandiae* 204. 1810, *Bijdragen tot de flora van Nederlandsch Indië* 612-613. 1826, *Bulletin de la Société Impériale des Naturalistes de Moscou* 16: 58. 1843, *Flora* 27. Beil. 1: 6. 1844, *Synopsis Plantarum Glumacearum* 1: 413. 1854, N.A. Dalzell (1817-1878), *The Bombay Flora*: or, Short descriptions of all the indigenous plants hitherto discovered in or near the Bombay presidency: together with a supplement of introduced and naturalized species / by Nicholas A. Dalzell and Alexander Gibson. 305. Bombay: Education Society's Press 1861.

Psilurus Trinius = *Asprella* Host, *Asprella* Schreb.

Slender spikes, from the Greek *psilos* “naked, slender” and *oura* “tail.”

A monotypic genus, Mediterranean, Pakistan, naturalized elsewhere. Pooideae, Poodae, Poae, annual, herbaceous, glabrous, slender, caespitose or solitary, leafy, smooth, unbranched, auricles absent, unfringed ligule membranous and minute, leaves flat and filiform to linear, plants bisexual, inflorescence a slender articulated and wiry spike or a slender raceme, solitary spikelets sessile and distichous, spikelets distant, glumes 1 per spikelet and shorter than the very small and membranous lemmas, lower glume absent and the upper very small, terminal spikelet with 2 glumes, lemmas keeled and awned, palea narrowly oblong to narrowly ovate, 2 lodicules, stamen 1, ovary glabrous, 2 stigmas, dry places, open areas, gravelly, related to *Vulpia* Gmel., see *Species Plantarum* 1: 53. 1753, *Genera Plantarum* 45. 1789, *Icones et descriptiones graminum austriacorum*... 4: 17. Vindobonae [Wien] 1801-1809, Carl Bernhard von Trinius, *Fundamenta Agrostographiae*. 93. Viennae (Jan.) 1820 and H. Schinz and Albert Thellung (1881-1928), in *Vierteljahrsschrift der Naturforschenden Gesellschaft in Zürich*. 58: 40, adnot. (Sep.) 1913.

Species

P. incurvus (Gouan) Schinz & Thell. (*Nardus aristata* L.; *Nardus incurva* Gouan; *Psilurus aristatus* (L.) Duval-Jouve; *Psilurus aristatus* (L.) Lange; *Psilurus nardoides* Trinius, *Psilurus rottboellioides* Griff.)

Europe. Annual, tufted, small, delicate, slender, glabrous, filiform, leafy, ligule truncate, blade involute, a green to purple slender curved spike, spikelets distichous, chasmogamous spikelets, lower glume absent, solitary glume minute and ovate, lemma coriaceous linear-lanceolate 3-nerved, palea nerved, fruit keeled and compressed, weed species, grows in sandy and stony soils, sensitive to climatic changes and especially to changes in temperature and soil moisture, see Johannes Scheuchzer (1684-1738), *Agrostographia sive graminum, juncorum, cyperorum, cyperoidum, iisque affinium historia*... Tiguri [Zürich] 1719, *Hortus Regius Monspelienensis* 33. 1762, *Species Plantarum, Editio Secunda* 78. 1762, *Fundamenta Agrostographiae* 93. 1820, *Notulae ad Plantas Asiaticas* 3: 95. pl. 154. f.1. 1851, *Bulletin de la Société Botanique de France* 13: 132. 1866 and *Vierteljahrsschrift der Naturforschenden Gesellschaft in Zürich* 58: 40. 1913, *Flora Republicii Socialiste Romania* 12: 567. 1972, *Bot. J. Linn. Soc.* 91: 441. 1985, *Boletim da Sociedade Broteriana, ser. 2* 63: 153-205. 1990.

in English: bristle-tail grass

Pterium Desv. = *Lamarckia* Moench

From *pterion*, the diminutive of the Greek *pteron* “feather.”

Pooideae, Poaeae, Dactylidinae, type *Pterium elegans* Desv., see *Methodus Plantas Horti Botanici ...* 201. 1794, Georg Ludwig Koeler (1765-1807), *Descriptio graminum* in Gallia et Germania tam sponte nascentium quam humana industria copiosus provenientium, Francofurti ad Moenum 1802, *Journal de Botanique, Appliquée à l'Agriculture, à la Pharmacie, à la Médecine et aux Arts* 1: 75-76. 1813 and *Contributions from the United States National Herbarium* 48: 420-421, 590. 2003.

Pterochlaena Chiov. = *Alloteropsis* Presl

From the Greek *pteron* “wing” and *chlaena* “a cloak, blanket.”

Africa, Zaire, Panicoideae, Panicodae, Paniceae, Setariinae, or Panicoideae, Paniceae, Paspalinae, type *Pterochlaena catangensis* Chiov. (*Alloteropsis semialata* (R. Br.) Hitchc.), see *Prodromus Florae Novae Hollandiae* 192. 1810, *Reliquiae Haenkeanae* 1(4-5): 343-344, t. 47. 1830 and *Contributions from the United States National Herbarium* 12(6): 210. 1909, *Annali di Botanica* 13: 47. 1914, *Annals of the Missouri Botanical Garden* 75: 866-873. 1988, *Botanical Journal of the Linnean Society* 97: 255-259. 1988, *ASBS Symposium 1990: Indo-Pacific Biogeography*, 14. 1990, *Contributions from the United States National Herbarium* 46: 16. 2003.

Pterochloris (A. Camus) A. Camus = *Chloris* Swartz

From the Greek *pteron* plus *Chloris* Swartz.

One species, Madagascar. Chloridoideae, *Chloris* subg. *Pterochloris* A. Camus, perennial, erect, herbaceous, decumbent, unbranched, stoloniferous, solid internodes, leaf blades pseudopetiolate, auricles absent, ligule fringed, linear leaves, plants bisexual, inflorescence spicate, spikelets solitary and imbricate, two subequal glumes 1-nerved, palea present, lodicules wanting, 3 stamens, ovary glabrous, 2 stigmas, sometimes referred to *Chloris*, see *Nova Genera et Species Plantarum seu Prodromus* 25. 1788 and *Bulletin de la Société Botanique de France* 97: 227. 1950, *Bulletin du Muséum d'Histoire Naturelle* (Paris) sér. 2, 29: 349. 1957, *Brigham Young University Science Bulletin: Biological Series* 19(2): 1-133. 1974, *Contributions from the United States National Herbarium* 41: 39-52. 2001.

Species

P. humbertiana (A. Camus) A. Camus (*Chloris humbertiana* A. Camus)

Madagascar. See *Bulletin de la Société Botanique de France* 91: 63. 1944, *Bulletin du Muséum d'Histoire Naturelle* (Paris) sér. 2, 29: 350. 1957.

Pteropodium Steud. = *Calamagrostis* Adans., *Pteropodium* A. DC. ex Meisn. (Bignoniaceae)

Greek *pteron* “wing” and *podion* “a little foot, stalk.”

Pooideae, Poaeae, Agrostidinae, see *Familles des Plantes* 2: 31, 530. 1763, *Tentamen Florae Germanicae* 1: 34. 1788, *Plantarum vascularium genera, secundum ordines naturales digesta ...* 1: 300, Commentarium 209. Lipsiae 1836-1843, *Nomenclator Botanicus. Editio secunda* 2: 414. 1841, *Prodromus Systematis Naturalis Regni Vegetabilis* 9: 239. 1845 and *Fl. Neotrop.* 25(2): 52. 1992, *Contributions from the United States National Herbarium* 48: 191-227, 590. 2003.

Pterygostachyum Nees ex Steud. = *Dimeria* R. Br., *Pterygostachyum* Steud.

Greek *pteryx*, *pterygos* “wing, small wing” and *stachys* “a spike.”

Andropogoneae, type *Pterygostachyum lehmannii* Nees ex Steud., see *Prodromus Florae Novae Hollandiae* 204. 1810, *Synopsis Plantarum Glumacearum* 1: 413. 1854[1855], *Monographiae Phanerogamarum* 6: 82. 1889 and *Grasses of Burma ...* 139. 1960.

Ptilagrostis Griseb. = *Stipa* L.

Greek *ptilon* “a wing, feather” and *agrostis*, *agrostidos* “grass, couch grass,” referring to the pilose awns.

About 8 species, Asia, Siberia, Himalayas, Northern America. Stipoideae, Stipeae, or Pooideae, Stipeae, Stipinae, perennial, caespitose, herbaceous, branched or unbranched, strictly intravaginal branching, auricles absent, ligule an unfringed membrane, plants bisexual, inflorescence paniculate, spikelets pedicellate, 2 glumes more or less equal, lower glume 0- to 5-nerved, upper glume 0- to 3-nerved, lemmas hairy, awns long-plumose, 3 lodicules present, 3 stamens, ovary glabrous, 2 stigmas, cleistogamous or chasmogamous, native pasture species, alpine to subalpine, open habitats, sometimes referred to and included in *Stipa* L., type *Ptilagrostis mongholica* (Turcz. ex Trin.) Griseb., see *Species Plantarum* 1: 78. 1753, *Flora Rossica* 4(13): 447. 1852 and *Contr. U.S. Natl. Herb.* 24(7): 216. 1925, N.N. Tzvelev, *Grasses of the Soviet Union*. Vols. I and II. (Nanka: Leningrad). English translation 1983. Oxonion Press: New Delhi 1976, *Systematic Botany* 8: 395-419. 1983, H. Freitag, “The genus *Stipa* (Gramineae) in Southwest and South

Asia." *Notes, Royal Bot. Gard. Edinburgh* 42(3): 355-489. 1985, M.E. Barkworth and J. Everett, *Evolution in the Stipeae: Identification and Relationships of Its Monophyletic Taxa*. In 'Grass Systematics and Evolution', pp. 251-264. Eds T.R. Soderstrom, K.W. Hilu, C.S. Campbell and M.E. Barkworth. Smithsonian Inst.: Washington 1987, M.E. Barkworth, "North American Stipeae (Gramineae): taxonomic changes and other comments." *Phytologia* 74, 1-25. 1993, *Am. J. Bot.* 86: 1735-1741. 1999, *Am. J. Bot.* 87: 96-107. 2000, *Contributions from the United States National Herbarium* 48: 590-591. 2003, *Journal of Biogeography* 30(5): 649-685. May 2003 [The Middle Asian Element in the Southern Rocky Mountain Flora of the western United States: a critical biogeographical review.], *Am. J. Bot.* 92: 411-421. 2005.

Species

P. alpina (F. Schmidt) Sipliv. (*Lasiagrostis alpina* F. Schmidt; *Stipa alpina* (F. Schmidt) Petrov, nom. illeg., non *Stipa alpina* (F. Schmidt) Roshev. ex B. Fedtsch.; *Stipa alpina* (F. Schmidt) Roshev. ex B. Fedtsch.)

Russia. See *Reisen im Amur-Lande* 73. 1868 and *Flora Iakutiae* 1: 138. 1930.

P. concinna Hooker (*Stipa concinna* Hooker f.)

India, Sikkim, Pamir. See *The Flora of British India* 7: 230. 1897 [1896] and *Flora URSS* 2: 75. 1934.

P. dichotoma Keng ex Tzvelev (*Ptilagrostis dichotoma* Keng)

Asia, China. Subalpine meadow, silt loam, see *Claves Generum et Specierum Graminearum Primarum Sinicarum Appendice Nomenclatione Systematica* 213. 1957, *Pl. Asiae Centr.* 4: 43. 1968.

P. kingii (Bolander) Barkworth (*Oryzopsis kingii* (Bol.) Beal; *Stipa kingii* Bol.)

U.S. See *Flora Boreali-Americana* 1: 51. 1803, *Proceedings of the California Academy of Sciences* 4: 170. 1872, *Grasses of North America for Farmers and Students* 2: 229. 1896 and *Systematic Botany* 8(4): 417. 1983, *The Jepson Manual: Higher Plants of California* 1993.

in English: King's ricegrass

P. mongholica (Turcz. ex Trin.) Griseb. (*Achnatherum mongholicum* (Turcz. ex Trin.) Ohwi; *Achnatherum sibiricum* (L.) Keng ex Tzvelev, nom. illeg., non *Achnatherum sibiricum* (L.) Keng; *Avena sibirica* L.; *Ptilagrostis czekanowskii* (Petrov) Sipliv.; *Stipa czekanowskii* Petrov; *Stipa mongholica* Turcz. ex Trin.)

China, Mongolia, Nepal, Russia, Siberia. Perennial, common in subalpine mountain meadows, on dark loam, mountain brown soil, shallow dark brown soil, open mountain meadow, see *Species Plantarum* 1: 78-79. 1753, *Essai d'une Nouvelle Agrostographie* 19, 146, pl. 6, f. 7. 1812, *Bull.*

Sci. Acad. Imp. Sci. Saint-Petersbourg 1: 67. 1836, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. P. mongholica (Turcz. ex Trin.) Griseb. subsp. ***mongholica***

Asia, Mongolia, Siberia. Perennial, see *Flora Rossica* 4: 447. 1852.

P. mongholica (Turcz. ex Trin.) Griseb. subsp. ***porteri*** (Rydb.) Barkworth (*Ptilagrostis porteri* (Rydb.) W.A. Weber; *Stipa porteri* Rydb.)

U.S. Perennial, see *Flora Rossica* 4(13): 447. 1852 and *Bulletin of the Torrey Botanical Club* 32(11): 599. 1905, *University of Colorado Studies: Series in Biology* 23: 2. 1966, *Systematic Botany* 8(4): 417. 1983.

in English: Porter's false needlegrass

P. minutiflora (V.S. Titov ex Roshev.) Czer. (*Ptilagrostis mongholica* subsp. *minutiflora* (V.S. Titov ex Roshev.) Tzvelev; *Ptilagrostis mongholica* var. *minutiflora* (Titov ex Roshevitz) Roshev.; *Stipa mongholica* var. *minutiflora* V.S. Titov ex Roshev.)

Asia, Eurasia, Russia. See *Flora Aziatskoj Rossii* 1(12): 131. 1916, *Novosti Sist. Vyss. Rast.* 11: 7. 1974.

P. porteri (Rydb.) W.A. Weber (*Ptilagrostis mongholica* subsp. *porteri* (Rydb.) Barkworth; *Stipa porteri* Rydb.)

North America. Perennial, see *Flora Rossica* 4(13): 447. 1852 and *Bulletin of the Torrey Botanical Club* 32(11): 599. 1905, *University of Colorado Studies: Series in Biology* 23: 2. 1966, *Systematic Botany* 8(4): 417. 1983.

in English: Porter's false needlegrass

P. schischkinii (Tzvelev) Czer. (*Ptilagrostis concinna* auct.; *Ptilagrostis concinna* subsp. *schischkinii* Tzvelev)

Russia. See *Novosti Sist. Vyss. Rast.* 11: 8. 1974, *Sosudistye Rasteniia SSSR* 379. 1981.

Ptiloneilema Steudel = *Melanocenchris* Nees

From the Greek *ptilon* "feather" and *eilema* "a veil, covering, involucre."

Cynodontae, type *Ptiloneilema plumosum* Steud., see *Proceedings of the Linnean Society of London* 1: 94. 1841, *Synopsis Plantarum Glumacearum* 1: 201. 1854 [1855], *Flora* 38: 273. 1855.

Ptilonema Hook.f. = *Melanocenchris* Nees

An orthographic variant of *Ptiloneilema* Steudel, see *Proceedings of the Linnean Society of London* 1: 94. 1841, *Synopsis Plantarum Glumacearum* 1: 201. 12-13 Apr 1854 [1855], *The Flora of British India* 7: 284. 1897.

x Pucciphippsia Tzvelev = *Maltea* B. Boivin

Phippsia x *Puccinellia*.

See *Le Naturaliste Canadien* 94: 526. 1967, *Novosti Sist. Vyssh. Rast.* 8: 76. 1971, *Genera Graminum* 375. 1986, *Contributions from the United States National Herbarium* 48: 601. 2003.

Puccinellia Parlatores = *Atropis* (Trin.) Rupr. ex Griseb., *Atropis* Rupr., *Heleochloa* Fr., *Heleochloa* (Fr.) Drejer

After the Italian botanist Benedetto Luigi Puccinelli, 1808-1850, professor of botany, from 1830 to 1850 Director of the Botanical Garden of Lucca, his works include *Synopsis plantarum in Agro Lucensi sponte nascentium*. Lucca [Lucca] 1841 [-1848] and *Osservazioni sui funghi dell'Agro Lucchese*. Lucca 1841. See Filippo Parlatores (1816-1877), *Flora Italiana*. 1: 366. 1848[-1850]; J.H. Barnhart, *Biographical notes upon botanists*. 3: 114. 1965; Paolo Emilio Tomei, "Benedetto Puccinelli botanico." *Riv. Arch. St. Econ. Cost.* 3(4): 28-30. 1975; P.E. Tomei, "L'opera micologica di Benedetto Puccinelli, lucchese." *Micologia Italiana*. 5(2): 33-35. 1976; P.E. Tomei and M.E. Seghieri, "I cultori di botanica in Lucchesia dal XVI al XIX secolo." *Atti Ist. Bot. Lab. Critt. Univ. Pavia*. 14(6): 249-271. 1981; P.E. Tomei and S. Lucchesi, *Le indagini micologiche in Lucchesia*. Lucca 1980; G. Murray, *History of the collections contained in the Natural History Departments of the British Museum*. 1: 175. 1904; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 319. 1972; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. 1917-1933; F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 157. Berlin & Hamburg 1989.

About 25-80 species, temperate regions throughout the world, mostly in Asia. Pooideae, Poodae, Poeae, or Pooideae, Poeae, Puccinelliinae, perennial or annual or biennial, herbaceous, rhizomatous or stoloniferous, more or less caespitose, creeping, prostrate, decumbent, rooting at the lower nodes or not, leaves mostly basal, auricles absent, leaf sheath loose and open, ligule an unfringed membrane, setaceous leaves flat and linear or folded or involute, plants bisexual, chasmogamous or cleistogamous, inflorescence a narrow panicle open or contracted, 2-several-flowered,

solitary spikelets subterete and very densely clustered or loosely arranged, spikelets pedicellate, glumes usually unequal, upper glume 3-nerved, lower glume 1-nerved, membranous lemmas rounded awnless 5-nerved, upper lemmas sterile, palea emarginate and 2-keeled, 2 lodicules free and glabrous, 3 stamens, ovary glabrous without apical appendage, grain brown, cultivated fodder, rather palatable as forage, native pasture species, alkali grass, usually halophytic, saline or alkaline habitats, coastal salt marshes, mountain grasslands, allied to *Poa* L., difficult to distinguish from *Festuca* L. or *Glyceria*, a number of species formerly contained in *Glyceria* R. Br. have been moved into *Torreyochloa* G.L. Church and *Puccinellia*, hybrids with *Phippsia* (Trin.) R. Br., type *Puccinellia distans* (Jacq.) Parl., see *Species Plantarum* 1: 67. 1753, *Prodromus Florae Novae Hollandiae* 179. 1810, *Chloris Melvilliana* 27. 1823, *Floram Scanicam* 202. 1835, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Species

P. acroxantha C.A. Sm. & C.E. Hubb.

South Africa. Perennial, rare, tufted to loosely tufted, culms 2-noded, inflorescence linear with slender branches, in moist places, ditches, depressions, see *Bulletin of Miscellaneous Information Kew* 1929(3): 86, 83. 1929, *Bothalia* 27: 75-82. 1997.

P. agrostidea T.J. Sørensen (*Phippsia agrostidea* (T.J. Sørensen) Á. Löve & D. Löve; *Puccinellia arctica* (Hook.) Fernald & Weath.)

North America Arctic, Canada, U.S. Perennial, caespitose, halophytic, purplish, glabrous, sheaths glabrous, ligule lacinate, leaf blades appressed to the stem, inflorescence densely paniculate, lemma lanceolate and hairy, palea scabrous, rare species, growing in dry flats, tundra, slopes, seashore, in areas periodically flooded or salt sprayed, see *Flora Boreali-Americana* 2: 248, t. 229. 1840 and *Rhodora* 18: 4. 1916, *Bulletin of the National Museum of Canada* 135: 78. 1955, *Botaniska Notiser* 128(4): 498. 1975 [1976].

in English: tundra alkali grass, bent alkaligrass, boreal alkali grass

P. americana Sørensen (*Poa maritima* Huds.; *Puccinellia maritima* auct. non (Huds.) Parl.; *Puccinellia maritima* (Huds.) Parl.)

North America, Canada. See *Flora Anglica* 35. 1762, *Flora italiana, ossia descrizione delle piante ...* 1: 370. 1848 and *Meddelelser om Grønland* 136(3): 67. 1953.

in English: American alkali grass

P. andersonii Swallen (*Phippsia andersonii* (Swallen) Á. Löve & D. Löve; *Puccinellia glabra* Swallen; *Puccinellia triflora* Swallen) (named for the American botanist Jacob Peter Anderson, 1874-1953, plant collector in Alaska since 1914, author of *Flora of Alaska and Adjacent Parts of*

Canada; An Illustrated Descriptive Text of All Vascular Plants Known to Occur within the Region Covered. Integrated and indexed at the Anderson Herbarium by Richard W. Pohl. Ames, Iowa State University Press 1959; see Joseph Ewan, *Rocky Mountain Naturalists*. 150. The University of Denver Press 1950; *Anderson's Flora of Alaska and Adjacent Parts of Canada*. [By] Stanley Larson Welsh. Provo, Utah, Brigham Young University Press 1974)

Northern America, Canada, U.S., Alaska, Greenland. Perennial, halophytic, littoral, caespitose, decumbent, glabrous, leaves mostly basal, sheaths glabrous, ligule membranous, auricles absent, inflorescence paniculate with stiffly spreading panicle branches, lemma ovate and more or less glabrous, found in very wet soils, seashore, sand, silt, drained moist areas, on coastal flats, clays, see *Journal of the Washington Academy of Sciences* 34(1): 21. 1944, *Check-list of the Vascular Plants of Greenland* 1-40. 1968, *Botaniska Notiser* 128(4): 498. 1975 [1976].

in English: Anderson's alkali grass

P. angusta (Nees) C.A. Sm. & C.E. Hubb. (*Atropis angusta* (Nees) Stapf; *Festuca angusta* (Nees) Asch. & Graebn., nom. illeg., non *Festuca angustata* Griseb.; *Sclerochloa angusta* Nees)

South Africa. Perennial, tufted to densely, culms 1-noded, leaf sheaths shiny and overlapping, panicle linear, pasture, growing in disturbed areas, saline soils, desert, grassland, see *Florae Africae Australioris Illustrationes Monographicae* 381. 1841, *Flora Danica* 15: 3, t. 2583. 1858 and *Flora Capensis* 7: 717. 1900, *Synopsis der mitteleuropäischen Flora* 2: 460. 1900, *Rhodora* 18: 14. 1916, *Meddelelser om Grønland* 58: 44. 1920, *Bulletin of Miscellaneous Information Kew* 1929(3): 85, 83-86, t. 4. 1929, *Flora of the U.S.S.R.* 2: 477, 760. 1934, *Novosti Sist. P. bruggemannii Sørensen (*Phippsia bruggemannii* (T.J. Sørensen) Å. Löve and D. Löve) (for P.F. Bruggeman)

North America, Canada. Caespitose, halophyte, densely tufted, erect or prostrate, glabrous, leaves without auricles,

sheaths glabrous, ligule membranous, inflorescence paniculate, spikelets pedicellate, lemma elliptic, palea with hairy veins, vulnerable species, recorded in ridges, slopes, in moist depressions of dune swales, in clay or silt environments, tundra, damp sand, cliffs, seashore, riverbank sand, in more or less well-drained areas and moderately well drained, disturbed places, see *Bulletin of the National Museum of Canada* 135: 80. 1955, *Botaniska Notiser* 128(4): 199. 1975 [1976], *The Flora of Canada* 2: 93-545. 1978 [1979], *Nordic Journal of Botany* 13(3): 247-252. 1993.

P. bulbosa (Grossh.) Grossh. (*Atropis bulbosa* Grossh.; *Puccinellia gigantea* subsp. *bulbosa* (Grossh.) Tzvelev)

Asia, Iran. See *Monit. Jard. Bot. Tiflis* 46/47: 36, t. 2. 1919, *Flora Kavkaza* 1: 114. 1928, *Zlaki SSSR* 502. 1976.

P. bulbosa (Grossh.) Grossh. subsp. ***bulbosa*** (*Atropis bulbosa* Grossh.)

Asia, Turkey. Found in seasonally wet marshes, saline clay loam soils.

P. bulbosa (Grossh.) Grossh. subsp. ***caesarea*** Kit Tan

Asia, Turkey. See *Flora of Turkey and the East Aegean Islands* 9: 624, 506. 1985.

P. byrrangensis Tzvelev (*Phippsia vahliana* subsp. *byrrangensis* (Tzvelev) Á. Löve & D. Löve)

Russia. Rare species, see *Novosti Sist. Vyss. Rast.* 8: 80. 1971, *Botaniska Notiser* 128(4): 501. 1975[1976].

P. ciliata Bor

Turkey. Perennial, tufted, unbranched, nonauriculate, leaf sheaths chartaceous, ligule acuminate to acute, stiff leaves long and thin, an erect panicle green to purple to yellowish, palea narrowly elliptic and membranous, anthers yellow, ovary glabrous, small fruit ventrally compressed, excellent feed quality, useful as pasture, weeds, colonizing grass, forage plant and seed crop, sensitive to heavy grazing, halophytic, tolerant of the saline and waterlogged conditions, suitable for the reclamation of salty land, may be grown on salt-affected soils, for saline and waterlogged land, saline soil, salty ground, near the sea, see *Notes from the Royal Botanic Garden, Edinburgh* 28: 299. 1968.

P. deschampsoides T.J. Sørensen (*Phippsia deschampsoides* (T.J. Sørensen) Á. Löve & D. Löve; *Puccinellia nuttalliana* (Schult.) Hitchc.) (resembling the genus *Deschampsia* P. Beauv., Gramineae)

Northern America, Canada, Keewatin, Manitoba, Quebec, Yukon Territory. Rare species, coastal, see *Mantissa* 2: 303. 1824 and *A Flora of California* 1: 162. 1912, *Meddelelser om Grønland* 136: 31. 1953, *Check-list of the Vascular Plants of Greenland* 1-40. 1968, *Botaniska Notiser* 128(4): 499. 1975 [1976], *The Flora of Canada* 2: 93-545. 1978 [1979].

in English: polar alkali grass

Sørensen ex Hultén; *Puccinellia neglecta* (Tzvelev) Bubnova)

Northern America, Canada, U.S., Greenland. Perennial bunchgrass, halophyte, tufted, erect, sheaths open to partially closed, large and open flower head widely branched, spikelets purplish or green with four to seven flowers, glumes more or less keeled and sparsely hairy, lemmas pointed, useful for erosion control, very palatable in its early growth stages, palatability declines with maturity, provide forage for small mammals and large herbivores, occurs in saline meadows along the coast, in relatively moist alkaline meadows, shores, stream banks, scattered tufts at edges of ponds or lakes and on saline wet flats, seepage areas, ditches, moist alkaline soils, depressed areas, see *The Genera of North American Plants* 1: 68. 1818, *Mantissa* 2: 303. 1824, *Révision des Graminées* 1: 129. 1829, *Novitiae Florae Suecicae* 3: Add. 176. 1843, *Proceedings of the Academy of Natural Sciences of Philadelphia* 14: 96. 1862, *A Manual of the Botany of the Northern United States* (edition

(for the Danish botanist Jens Laurentius (Lorenz) Moestue Vahl (1796-1854), plant collector, traveler, librarian, son of the Norwegian-born Danish botanist Martin Vahl (1749-1804); see Paul Gaimard, *Voyages de la Commission Scientifique du Nord, en Scandinavie, en Laponie, au Spitzberg et aux Féroë, pendant les années 1838, 1839 et 1840, sur la Corvette La Recherche*, commandée par M. Fabvre ... Géographie physique, Géographie botanique, Botanique et Physiologie, etc. Paris [1842-1848]; J.H. Barnhart, *Biographical notes upon botanists*. 3: 419. 1965; Stafleu and Cowan, *Taxonomic literature*. 6: 628-631. Utrecht 1986; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 1993; C.F.A. Christensen, *Den danske Botaniks Historie med tilhørende Bibliografi*. Copenhagen 1924-1926; A. Lasègue, *Musée botanique de Benjamin Delessert*. Paris 1845; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 412. Boston, Mass. 1972; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933)

Greenland, Northern America. Caespitose, erect, glabrous, curly roots, auricles absent, inflorescence paniculate, spikelets pedicellate and laterally compressed, second glume ovate, palea hairy, growing in seasonally wet meadows, on flood plain, ephemeral lakes, on seepage slopes, imperfectly drained moist areas, along streams, marshes, lakeshores, snow patches, on snow-beds, tundra, see *Flora Danica* t. 2401. 1845, *Öfversigt af Förhandlingar: Kongl. Svenska Vetenskaps-Akademien* 26: 140. 1869, *Plantae Europaeae* 1: 92. 1890 and *Contributions from the United States National Herbarium* 13: 78. 1910, *Trudy Bot. Muz. Rossiisk. Akad. Nauk* 24: 283. 1932, *Flora URSS* 2: 436. 1934, *Arkticheskaia Flora SSSR* 2: 1-274. 1964, *Botaniska Notiser* 128(4): 501. 1975 [1976].

in English: Vahl's alkali grass

P. walkeri (Kirk) Allan (*Atropis novae-zealandiae* (Petrie) Hack.; *Atropis walkeri* (Kirk) Cockayne; *Atropis walkeri* (Kirk) Cheeseman, nom. illeg., non *Atropis walkeri* (Kirk) Cockayne; *Glyceria novae-zealandiae* Petrie; *Poa walkeri*

Kirk; *Puccinellia novae-zealandiae* (Petrie) Allan & Jansen)

New Zealand. Erect, dense, compact, stiff, tufted, leafy, culms usually hidden by sheaths, leaf sheath glabrous and membranous, ligule entire, leaf blades scabrid and folded, panicle compact and erect with stiff branches, glumes unequal, coastal, in salt marshes, see *Transactions and Proceedings of the Royal Society of New Zealand* 17: 224. 1885 and *Transactions and Proceedings of the Royal Society of New Zealand* 33: 329. 1901, *Manual of the New Zealand Flora* 915. 1906, *Rep. Bot. Surv. Stewart Island* 50. 1909, *Manual of the New Zealand Flora* 2: 203. 1925, *Department of Scientific and Industrial Research Bulletin* 49: 40, 157. 1936, *Transactions and Proceedings of the Royal Society of New Zealand* 66: 266. 1939, *New Zealand J. Bot.* 34: 25. 1996.

P. walkeri (Kirk) Allan subsp. *antipoda* (Petrie) Edgar (*Atropis antipoda* Petrie; *Puccinellia antipoda* (Petrie) Allan & Jansen)

New Zealand, Antipodes Islands. Lemma apex ciliate, palea keels scabrid and excurrent, coastal, see *The Subantarctic Islands of New Zealand* 2: 480. 1909, *Department of Scientific and Industrial Research Bulletin* 49: 40, 157. 1936, *Transactions and Proceedings of the Royal Society of New Zealand* 69: 266. 1939, *New Zealand Journal of Botany* 34: 26-27. 1996.

P. walkeri (Kirk) Allan subsp. *chathamica* (Cheeseman) Edgar (*Atropis chathamica* Cheeseman; *Puccinellia chathamica* (Cheeseman) Allan & Jansen)

New Zealand, Chatham Islands. Panicle branches smooth, lemma apex ciliate, palea keels scabrid, coastal, in salt marshes, slopes, shores, near the sea, see *Transactions and Proceedings of the New Zealand Institute* 53: 423. 1921, *Manual of the New Zealand Flora* 2: 203. 1925, *Transactions and Proceedings of the Royal Society of New Zealand* 69: 266. 1939, *New Zealand Journal of Botany* 34: 26-27. 1996.

P. walkeri (Kirk) Allan subsp. *walkeri*

New Zealand. Panicle branches scabrid, lemma apex ciliate, on saline soils, sandy and stony ground, see *Department of Scientific and Industrial Research Bulletin* 49: 40, 157. 1936.

P. wrightii (Scribn. & Merr.) Tzvelev (*Colpodium wrightii* Scribn. & Merr.; *Colpodium wrightii* var. *flavum* Scribn. & Merr.; *Colpodium wrightii* var. *wrightii*; *Phippsia wrightii* (Scribn. & Merr.) Á. & D. Löve; *Poa wrightii* (Scribn. & Merr.) Hitchc.) (for the American botanist Charles (Carlos) Wright, 1811-1885, botanical explorer, botanical collector for Asa Gray in the Mexican Boundary Region, explorer and traveler, from 1853 to 1855 under Capt. Cadwalader Ringgold (1802-1867) and Comm. John Rodgers (1812-1882) on the five-ship North Pacific Exploring Expedition, plant collector in Cuba 1856-1857. See Asa Gray (1810-

1888), *Plantae Wrightianae Texano-Neo-Mexicanae*. 1852-1853; A.H. Dupree, *Asa Gray - American Botanist, Friend of Darwin*. J. Hopkins 1988; August Heinrich Rudolf Grisebach (1814-1879), *Plantae wrightianae, e Cuba orientali*. Cantabrigiae, Nov. Angl. 1860-1862 and *Catalogus Plantarum Cubensium*. Alaska, Russia. Vulnerable species, tundra, see *Contributions from the United States National Herbarium* 13: 74-75. 1910, *American Journal of Botany* 2: 309. 1915, *Flora Arctica URSS* 2: 193-194. 1964, *Novosti Sist. Vyss. Rast.* 10: 86. 1973, *Botaniska Notiser* 128(4): 501. 1975 [1976].

in English: Wright's alkali grass

Puelia Franchet = *Atractocarpa* Franch.

After the French botanist Timothée Puel, 1812-1890, physician, wrote *Catalogue des plantes vasculaires qui croissent dans le département Lot*. Cahors 1845-1853; see J.H. Barnhart, *Biographical notes upon botanists*. 3: 114. 1965; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. 1917-1933; J.T. Timothée Puel, *Essai sur les causes locales de la différence de taille qu'on observe chez les habitants des deux cantons de Latronquière et de Livernon*. in *Collection des thèses soutenues à la Faculté de Médecine de Paris*. an 1839-1878. Paris 1839-1878.

About 5 or 6 species, Cameroon, Zaire, Gabon, Sierra Leone, Angola. Bambusoideae, Bambusodae, Puelieae, perennial, simple, herbaceous, sympodial, unbranched, unarmed, rhizomatous with rhizomes pachymorph, leafless or leafy, auricles absent, ligule a fringed membrane, external ligules, plants bisexual without hermaphrodite florets, inflorescence a narrow panicle, dimorphic florets, one fertile floret, lower florets male or proximal incomplete florets male, uppermost floret female, 2-7 glumes very unequal, lower glume 4- to 5-nerved, upper glume 7-nerved, palea present, lemmas convolute, lodicules present, 6 stamens, ovary glabrous, 2 or 3 stigmas, some species sometimes with root tubers, in forest shade, patches, forest floor, rain-forest, evergreen forest, type *Puelia ciliata* Franchet, see *Bulletin Mensuel de la Société Linnéenne de Paris* 1: 674-675, 676. 1887 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 30(1): 124-125. 1901, *Hooker's Icones Plantarum* 37: t. 3642. 1967, *Fl. Trop. E. Afr. Gramin.* 1: 15. 1970, T.R. Soderstrom, "Some evolutionary trends in the Bambusoideae (Poaceae)." *Annals of the Missouri Botanical Garden* 68: 15-47. 1981, *Grass Systematics and Evolution* 225-238. 1987 [The position of the bamboo genera and allies in a system of grass classification.], GPWG (Grass Phylogeny Working Group), "Proposal for a subfamilial reclassification of the Poaceae," in *Monocots II, Abstracts*, 15. Royal Botanic Gardens Sydney, Australia 1998, Sarah Mathews, Rocky C. Tsai and Elizabeth A. Kellogg, "Phylogenetic structure in the grass family (Poaceae): evidence from the nuclear gene phytochrome B." *Am. J. Bot.* 87: 96-107. 2000.

Species

P. ciliata Franch. (*Guaduella oblonga* Hutchinson ex W.D. Clayton; *Puelia acuminata* Pilg.; *Puelia ciliata* Chev.; *Puelia subsessilis* Pilg.)

Africa, Gabon. Panicle branches subtended by little bracts, see *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 30(1): 124-125. 1901, *Exploration botanique de l'Afrique occidentale française* ... Paris 1920, *Kew Bulletin* 16: 247. 1962.

P. coriacea W.D. Clayton

Zaire. See *Kew Bulletin* 20: 271, f. 6. 1966.

P. dewevrei DeWildeman & T. Durand (also spelled *dewerrei*) (for the Belgian botanist Alfred Dewèvre, 1866-1897, died Léopoldville, Belgian Congo, wrote *Les Caoutchoucs africains*; étude monographique des lianes du genre *Landolphia*. Bruxelles 1895, *Les Caoutchoucs africains*. 1. Monographie du Caoutchouc. 2. Les Caoutchoucs africains. 3. Les Caoutchoucs du Congo. Bruxelles, Louvain 1895, *Les plantes utiles du Congo*. Edition 2. Bruxelles 1894 and *La récolte des produits végétaux au Congo*, etc. Bruxelles 1895. See Emile August(e) Joseph De Wildeman (1866-1947), *Reliquiae Dewevreanae* ou Énumération des Plantes récoltées par Alfr. Dewèvre en 1895-96 dans l'État

Indépendant du Congo. Fasc 1-2. Bruxelles 1901; J.H. Barnhart, *Biographical notes upon botanists*. 1: 450. 1965; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. 1: 201. 1917-1933; Ignatz Urban, *Geschichte des Königlichen Botanischen Museums zu Berlin-Dahlem (1815-1913). Nebst Aufzählung seiner Sammlungen*. 1916)

Zaire, Gabon.

P. olyrififormis (Franch.) W.D. Clayton (*Atractocarpa olyrififormis* Franch.)

Tropical Africa. Perennial, herbaceous, stout, suffruticose or subwoody, shortly rhizomatous, sometimes tuberous, forest floor, evergreen forest, see *Bulletin Mensuel de la Société Linnéenne de Paris* 1: 675. 1887 and *Kew Bulletin* 20: 273. 1966.

P. schumanniana Pilger

Gabon, Cameroon. Herbaceous, shortly rhizomatous, see *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 30(1): 126. 1901.

Puliculum Stapf ex Haines = *Eulalia* Kunth, *Pseudopogonatherum* A. Camus, *Puliculum* Haines

Latin *pulex*, *pulicis* "a flea," *pulico* "to produce fleas."

Panicoideae, Andropogonodae, Andropogoneae, Andropogoninae, type *Puliculum articulatum* (Trin.) Haines, see K.S. Kunth, *Révision des Graminées*. 1: 160. Paris 1829, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 4,2(1): 90. 1836, *Die Natürlichen Pflanzenfamilien*. 2(2): 24. (July) 1887, *Monographiae Phanerogamarum* 6: 189, t. 1, f. 13. 1889, *Revisio Generum Plantarum* 2: 788. 1891 and *Annales de la Société Linnéenne de Lyon, sér. 2* 68: 203-205. 1921, *Fl. Indo-Chine* 7: 254. 1922, *The Botany of Bihar and Orissa* 5: 1018. 1924, *Bulletin of the Tokyo Science Museum* 18: 2. 1947, *Index Grass Sp.* 3: 203. 1962.

Pyrrhanthera Zotov

From the Greek *pyrros* "flame-colored, red" and *anthera* "anther."

Monotypic, New Zealand. Arundinoideae, Danthoneae, Danthoniinae, or Arundineae, perennial, slender, erect, filiform, short, low-growing, caespitose, long-rhizomatous with creeping woody rhizomes, mat-forming, leaves mostly basal, auricles absent, leaf sheath appressed, leaf blades filiform, plants bisexual, inflorescence racemose or paniculate, a reduced panicle of 1-3 spikelets 3-flowered, third floret sometimes rudimentary, 2 glumes more or less equal 7- to 9-nerved, lemmas lobed or 3-toothed, palea present,

2 ciliate lodicules free and fleshy and more or less truncate, 3 stamens, ovary glabrous, 2 stigmas, fruit an achene, open habitats, grassland, sandy ground, sometimes referred to *Rytidosperma* and *Danthonia* sensu lato, type *Pyrrhanthera exigua* (Kirk) Zotov, see *Flore Française. Troisième Édition* 3: 32. 1805, *Prodromus Florae Novae Hollandiae* 182. 1810, *Synopsis Plantarum Glumacearum* 1: 425. 1854, *T.N.Z.I.* 14: 378. 1882, *Gard. Chron.* 1: 260. 1882, *Revisio Generum Plantarum* 2: 789. 1891 and *T.R.S.N.Z.* 73: 234.

1943, *New Zealand Journal of Botany* 1: 125-126. 1963, *Telopea* 6(4): 614. 1996.

Species

P. exigua (Kirk) Zotov (*Danthonia exigua* (Kirk) Zotov; *Rytidosperma exiguum* (Kirk) H.P. Linder; *Sieglingia exigua* (Kirk) Kuntze; *Triodia exigua* Kirk)

New Zealand. Glumes awnless, lemmas coriaceous 9-nerved.

Q

Qiongzhusua C.J. Hsueh [J.R. Xue] & T.P. Yi

= *Chimonobambusa* Makino, *Oreocalamus*

Keng, *Qiongzhusua* (T.H. Wen & D.

Ohrnberger) J.R. Xue & T.P. Yi, *Qiongzhusua*

Hsueh & Yi, *Qiongzhusua* J.R. Xue & T.P. Yi,

Qiongzhusua Hsueh & Yi

About 3-8 species, China, Guizhou, western Hubei, Sichuan, Yunnan. Bambuseae, amphipodial, erect, diffuse, shrub-like to arborescent, sometimes clustering, thick-walled, cylindrical or sometimes four-edged, usually three subequal branches on each node, slender twigs, internodes cylindrical, node swollen, underground stems, rhizomes leptomorph, sheath annulus more or less convex, culm sheaths caducous and thick papyraceous to coriaceous, auricles absent, blades lanceolate to narrowly lanceolate, sheath blade narrow, ligules minute or absent, pseudoinflorescence, inflorescence iterant and paniculate, spikelets 3- to 8-flowered, pseudospikelet racemes grouped in loose fascicles subtended by bracts, lemmas papery, 3 lodicules membranous, 3 stamens, 3 membranous lodicules, 2 stigmas plumose, often placed in *Chimonobambusa* Makino, type *Qiongzhusua tumidinoda* Hsueh & Yi, see *Botanical Magazine* 28(329): 153. 1914, *Taxon* 6(7): 201-202. 1957, *Acta Botanica Yunnanica* 2(1): 91-99. 1980, *Acta Phytotaxonomica Sinica* 29(5): 452-455. 1991, *Taxon* 45: 218. 1996, *Bamboos of the World* 177-178, 180, 182-183, 186-188. 1999, Anwaruddin Choudhury, "An overview of the status and conservation of the red panda *Ailurus fulgens* in India, with reference to its global status." *Oryx* 35(3): 250-259. July 2001.

Species

Q. communis C.J. Hsueh & T.P. Yi (*Chimonobambusa communis* (J.R. Xue & T.P. Yi) K.M. Lan; *Chimonobambusa communis* (J.R. Xue & T.P. Yi) Wen & D. Ohrnberger; *Oreocalamus communis* (J.R. Xue & T.P. Yi) Keng f.)

China, Sichuan, Hubei, Guizhou. Basal internodes cylindrical or square, three branches per node, culm sheath caducous more or less tough or papery, sheath blade triangular, no sheath auricles, sheath ligule arcuate and glabrous, leaves lanceolate with pubescence beneath, edible shoot, soft culm suitable for weaving, matting, papermaking, see *Sunyatsenia* 4: 146. 1940, *Acta Botanica Yunnanica* 2(1): 96-98, pl. 3. 1980, *Journal Nanjing University. Natural*

Sciences Edition 22(3): 416. 1986, *Flora Guizhouensis* 5: 308. 1988.

Q. intermedia C.J. Hsueh & T.P. Yi (*Chimonobambusa macrophylla* f. *intermedia* (J.R. Xue & D.Z. Li) T.H. Wen & D. Ohrnberger)

China, Sichuan. Young culms pruinose, basal culm almost solid, three or more branches per node, culm sheath caducous, sheath blade erect, sheath ligule pubescent, see *Acta Botanica Yunnanica* 10(1): 53, f. 2. 1988.

Q. luzhiensis C.J. Hsueh & T.P. Yi (*Chimonobambusa luzhiensis* (J.R. Xue & T.P. Yi) K.M. Lan; *Chimonobambusa luzhiensis* (J.R. Xue & T.P. Yi) T. H. Wen & D. Ohrnberger; *Oreocalamus luzhiensis* (J.R. Xue & T.P. Yi) Keng f.)

China, Guangdong. Cylindrical, culm annulus flat, sheath annulus convex, sheath coriaceous and persistent, sheath blade erect linear-lanceolate, no sheath auricles, sheath ligule truncate shortly pubescent, leaves coriaceous and glabrous, leaf blades lanceolate, see *Acta Botanica Yunnanica* 5(1): 45-46, pl. 4. 1983, *Journal Nanjing University. Natural Sciences Edition* 22(3): 416. 1986, *Flora Guizhouensis* 5: 309. 1988.

Q. macrophylla C.J. Hsueh & T.P. Yi (*Chimonobambusa macrophylla* (J.R. Xue & T.P. Yi) T.H. Wen & D. Ohrnberger)

China, Sichuan. Culm slender, shoot greenish purple, no cilia on sheath mouth, leaves oblong-lanceolate, edible shoot, ornamental, see *Acta Phytotaxonomica Sinica* 23(5): 398-399, pl. 1. 1985.

Q. macrophylla C.J. Hsueh & T.P. Yi f. ***leiboensis*** Hsueh & T.P. Yi (*Chimonobambusa macrophylla* f. *leiboensis* (J.R. Xue & T.P. Yi) T.H. Wen & D. Ohrnberger; *Qiongzhusua macrophylla* f. *leiboensis* J.R. Xue & D.Z. Li)

China, Sichuan, Leibo. Young culm slightly pruinose, see *Acta Botanica Yunnanica* 10(1): 51, f. 1. 1988.

Q. opienensis C.J. Hsueh & T.P. Yi (*Chimonobambusa opienensis* (J.R. Xue & T.P. Yi) T.H. Wen & D. Ohrnberger; *Oreocalamus opienensis* (J.R. Xue & T.P. Yi) Keng f.)

China, Sichuan. Cylindrical, basal internodes sometimes square, 1-5 branches on each node, sheath dark purplish caducous, sheath blade triangular, no sheath auricles, sheath ligule entire, 1-2 leaves on each twig, leaves lanceolate, see *Acta Botanica Yunnanica* 2(1): 98-99, pl. 4. 1980, *Journal*

Nanjing University. *Natural Sciences Edition* 22(3): 416. 1986.

Q. puberula C.J. Hsueh & T.P. Yi (*Chimonobambusa puberula* (J.R. Xue & T.P. Yi) K.M. Lan; *Chimonobambusa puberula* (J.R. Xue & T.P. Yi) T.H. Wen & D. Ohrnberger; *Oreocalamus puberulus* (J.R. Xue & T.P. Yi) Keng f.)

China, Guizhou. Young culm pubescent not pruinose, sheath annulus convex, sheath coriaceous, sheath blade erect and triangular, no sheath auricles, cilia on sheath mouth, sheath ligule truncate, 2-4 leaves on each twig, tough leaves lanceolate, edible shoot, culm used for papermaking and for weaving, see *Acta Botanica Yunnanica* 5(1): 42-44, f. 3. 1983, *Journal Nanjing University. Natural Sciences Edition* 22(3): 416. 1986, *Flora Guizhouensis* 5: 308. 1988.

Q. rigidula C.J. Hsueh & T.P. Yi (*Chimonobambusa rigidula* (J.R. Xue & T.P. Yi) T. H. Wen & D. Ohrnberger; *Oreocalamus rigidulus* (J.R. Xue & T.P. Yi) Keng f.)

China, Sichuan. Culms square or cylindrical, glabrous, sheath caducous and more or less glabrous, sheath blade triangular, sheath auricles absent, sheath ligule truncate and glabrous, 1-2 leaves on twig, leaves lanceolate, edible shoots, culm used for papermaking, strips used for weaving, see *Acta Phytotaxonomica Sinica* 21(1): 96-99, pl. 2. 1983, *Journal Nanjing University. Natural Sciences Edition* 22(3): 416. 1896.

Q. tumidinoda C.J. Hsueh & T.P. Yi (*Chimonobambusa tumidinoda* (J.R. Xue & T.P. Yi) T.H. Wen; *Chimonobambusa tumidissinoda* J.R. Xue & T.P. Yi ex D. Ohrnb.)

Guizhou, Sichuan, Yunnan, Type species, three branches per node, basal internodes solid, sheath annulus convex, sheath purplish red, sheath blade erect, rhizomes amphipodial, culms sheaths early deciduous, no sheath auricles, sheath ligule densely pubescent, leaves narrowly lanceolate, edible shoots, ornamental, used for walking sticks and for making handicrafts, see *Acta Botanica Yunnanica* 2(1): 93, pl. 1-2. 1980, *Journal of Bamboo Research* 10(1): 17. 1991.

R

Rabdochloa P. Beauv. = Leptochloa P. Beauv.

From the Greek *rhabdos* “a rod, stick, a magic wand” and *chloe, chloa* “grass.”

Chloridoideae, Cynodonteae, or Eragrostideae, type *Rabdochloa domingensis* (Jacq.) P. Beauv., see *Systema Naturae, Editio Decima* 2: 873. 1759, *Nicolai Josephi Jacquin Miscellanea austriaca ...* 2: 363. 1781, *Flora Indiae Occidentalis* 1: 203. 1797, *Flora Boreali-Americana* 1: 59. 1803, Ambroise Palisot de Beauvois, *Essai d'une nouvelle Agrostographie, ou nouveaux genres des Graminées*. 71, 84, 158, 161, 176, t. 17, f. 3. Paris (Dec) 1812, *Nova Genera et Species Plantarum* 1: 169. 1815 [1816], *Flora Brasiliensis seu Enumeratio Plantarum* 2: 471. 1829, *Geological Survey of California, Botany* 2: 293. 1880, *Revisio Generum Plantarum* 2: 788. 1891 and *Anales del Museo Nacional de Buenos Aires* 11: 121. 1904, *Contr. U.S. Natl. Herb.* 24(6): 180, 187. 1925, *Contributions from the United States National Herbarium* 41: 130-137, 191. 2001.

Racemobambos Holttum = Microcalamus Gamble, *Microcalamus* Franch., *Neomicrocalamus* Keng f.

Referring to the arrangement of the spikelets, from the Latin *racemus, i* “the stalk of a cluster, a bunch, cluster” plus *Bambos*.

About 16-20 species, Peninsular Malaysia, Assam and southern China, Sabah, Borneo, Indonesia, Sulawesi, Papua New Guinea, Solomon Islands. Bambusoideae, Bambusoideae, Bambuseae, Bambusinae, or Racemobambosinae, perennial, diffuse, sympodial, very long culms erect to suberect, very slender, scandent, scrambling, clambering, leaning, somewhat climbing, loosely tufted, straight, branched, solid, thin-walled, several branches at each node, single branch bud enclosed by a prophyll, culm sheaths thin and papery and persistent, rhizomes with long neck, plants bisexual, at the end of a leafy branch inflorescence semeluctant or determinate, a panicle or a raceme, each spikelet usually subtended by a tiny bract, 3-8 perfect florets and one rudimentary vestigial terminal floret, spikelets with 2-3 empty glumes, glume absent or in terminal spikelets, palea 2-keeled, 3 or 0 lodicules, 6 stamens, ovary usually hairy,

3 long plumose stigmas, ornamental, culms used for making blow pipes, arrow heads, mountain forests, secondary forests, in forest margins, type *Racemobambos gibbsiae* (Stapf) Holttum, see *Flora Boreali-Americana* 1: 73. 1803, *Transactions of the Linnean Society of London* 26(1): 33, 138, 157. 1868, *Journal de Botanique (Morot)* 3(17): 282, f. B. 1889, *Journal of the Asiatic Society of Bengal. Part 2. Natural History* 59(2): 207, pl. 7. 1890 and *Gard. Bull. Singapore* 15: 267-273. 1956, *Phytomorphology* 1: 88. 1956, *Kew Bulletin* 21(2): 263-292. 1967, *Journal of Bamboo Research* 2(2): 10. 1983, *Kew Bulletin* 37(4): 661-679. 1983, *J. Bamboo Res.* 5(2): 11. 1986, *Kew Bulletin* 44(2): 349-367. 1989, S. Dransfield, *The Bamboos of Sabah*. Sabah Forest Records, no. 14: 44-55. Malaysia 1992, *Plant Resources of South-East Asia (PROSEA) (Pl Res SEAs)* vol. 7: 152. 1995, K.K. Seethalakshmi, *Bamboos of India: a compendium* / K.K. Seethalakshmi, M.S. Muktesh Kumar; assisted by K. Sankara Pillai, N. Sarojam. Peechi: Bamboo Information Centre-India, Kerala Forest Research Institute; Beijing: International Network for Bamboo and Rattan, 1998.

Species

R. celebica S. Dransf.

Sulawesi, Indonesia. Slopes, see *Kew Bulletin* 47(4): 707, f. 1. 1992.

R. ceramica S. Dransf.

Indonesia. Forest, see *Reinwardtia* 9(4): 386, f. 1. 1980.

R. clarkei (Gamble ex Brandis) Muktesh Kumar (*Arundinaria clarkei* Gamble ex Brandis; *Neomicrocalamus clarkei* (Gamble ex Brandis) Majumdar)

India, Sikkim. Shrubby, solid, spikelets with 2 empty glumes and 1-2 fertile florets, 6 stamens, 3 plumose stigmas, see *Indian Trees* 666. 1906, *Journal of Bamboo Research* 2(2): 10. 1983, *Fl. Ind. Enumerat.-Monocot.* 279. 1989.

in India: lading va

R. congesta (Pilger) Holttum (*Arundinaria congesta* Pilger)

Papua New Guinea, Goodenough Island. Culms used for bow strings and arrow heads, dense thickets forming, found in montane forest, see *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 52: 173. 1914, *Kew Bulletin* 21: 282. 1967.

R. gibbsiae (Stapf) Holttum (*Bambusa gibbsiae* Stapf) (for the English (b. London) botanist from the British Museum Lilian Suzette Gibbs, 1870-1925 (d. Santa Cruz, Tenerife), 1905 fellow of the Linnean Society, traveler, plant collector in southern Rhodesia and Mount Kinabalu, collector of botanical specimens, orchid collector (*Eulophia squalida*, *Paphiopedilum dayanum* and *Trichoglottis kinabaluensis*), February 1910 Mt. Kinabalu (about 1,000 plants in all were collected) with D.R. Maxwell (Assistant District Officer, Kota Belud), she was the first woman to reach the summit of Mt. Kinabalu (North Borneo), wrote *A Contribution to the Phytogeography and Flora of the Arfak Mountains*. London 1917 and "A contribution to the flora and plant formations of Mount Kinabalu and the Highlands of British North Borneo." in *Journal of the Linnean Society. Botany*. 42: 1-240. 1914; see J.H. Barnhart, *Biographical notes upon botanists*. 2: 44. 1965; D.R. Maxwell, "Ascent of Mount Kinabalu." *British North Borneo Herald*. 65-67. Apr, 1st 1910; Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 276. London 1994; *Bol. Soc. Brot.* ser. 2, 3: pl. 5. 1925)

Mt. Kinabalu. Slender, erect, leaning and scrambling, inflorescence shortly racemose, spikelets hairy, 3 glumes, lemma hairy, palea hairy, dense thickets forming, found in montane forest, see *Journal of the Linnean Society, Botany* 42: 189. 1914, *Gardens' Bulletin, Straits Settlements* 15: 272. 1956.

R. glabra Holttum

Brunei, Sabah, Sarawak. Erect or spreading, thin-walled, inflorescence racemose, 3 glumes, lemma and palea glabrous, see *Gard. Bull. Sing.* 15: 270. 1956, *Sandakania* 1: 7-9. 1992.

R. hepburnii S. Dransf. (after A. John Hepburn, a forester)

Mt. Kinabalu, Sabah. Scrambling, leaning, leaves narrow, spikelets glabrous, lemma and palea glabrous, see *Kew Bulletin* 37(4): 670, f. 1 B-D, 5. 1983.

R. hirsuta Holttum

Sabah. Open tufted, scrambling, hairy spikelets, 2 glumes, lemma and palea hairy, found in the lowlands, see *Gardens' Bulletin, Straits Settlements* 15: 272. 1956.

R. hirta Holttum

Papua New Guinea. Straggling, see *Kew Bulletin* 21: 283, f. 3. 1967.

R. holttumii S. Dransf.

Papua New Guinea. See *Kew Bulletin* 37(4): 670, f. 4. 1983.

R. kutaiensis S. Dransf.

Indonesia, Borneo. Forest, see *Kew Bulletin* 37(4): 674, f. 6. 1983.

R. mannii (Gamble) Muktesh Kumar (*Arundinaria mannii* Gamble; *Cephalostachyum mannii* (Gamble) Stapleton & D.Z. Li; *Neomicrocalamus mannii* (Gamble) Majumdar; *Racemobambos mannii* (Gamble) Campbell)

India. Slender, tufted, climbing, wiry, graceful, solid, much-branched, internodes smooth, nodes swollen, culm sheath slender and persistent, thin leaves lanceolate and papery, leaf sheaths glabrous and striate, culms split and used as binding material for building huts, see *Annals of the Royal Botanic Garden. Calcutta*. 7(26): t. 26. 1896, *Fl. Brit. Ind.* 7: 38. 1896 and *Notes on Sino-Himalayan Bamboo Species* 23. 1988, *Florae Indicae Enumeratio: Monocotyledonae, Bambusoideae* Botanical Survey of India, Flora of India, Series 4, 279. Calcutta 1989, *Indian Forester* 120(3): 268-271. 1994, *Kew Bulletin* 52(3): 700. 1997.

in India: beneng, kabeneng

R. multiramosa Holttum

Papua New Guinea. See *Kew Bulletin* 21: 282. 1967.

R. novohibernica S. Dransf.

Papua New Guinea. Mountain forest, see *Kew Bulletin* 37(4): 676. 1983.

R. pairinii K.M. Wong (dedicated to Datuk Sri Joseph Pairin Kitingan, Sabah's Prime Minister)

Sabah. Open tufted, erect, scrambling, pendulous tips, spikelets with 2 glumes, lemma mucronate and pubescent, palea hairy, see *Sandakania* 1: 1-6. 1992.

R. prainii (Gamble) Keng F. & T.H. Wen (*Arundinaria prainii* Gamble; *Arundinaria prainii* (Gamble) Gamble; *Microcalamus prainii* Gamble; *Neomicrocalamus microphyllus* C.J. Hsueh & T.P. Yi; *Neomicrocalamus prainii* (Gamble) Keng f.; *Racemobambos prainii* (Gamble) Campbell; *Thamnocalamus prainii* (Gamble) Camus)

India. Climbing, wiry, shrubby, scrambling, solid, slender, smooth, glabrous, thick-walled, nodes prominent, culm sheaths dotted, leaf blades lanceolate, ligule inconspicuous, leaf sheaths pubescent, 3- to 6-flowered, palea obtuse, 3 lodicules, 6 stamens, ovary oblong and pubescent, 3 long plumose stigmas, culms used for basket making and in the construction of huts, on riverbanks, mountain forests, rocky places, see *Journal of the Asiatic Society of Bengal. Part 2. Natural History* 59(2): 207, pl. 7. 1890 and *Les Bambusées* 54. 1913, *Journal of Bamboo Research* 2(1-2): 10, 35, 38, t. 5. 1983, *Journal of Bamboo Research* 5(2): 13. 1986.

in India: kevva, sampit, uppit, usepeit

R. raynalii Holttum

Indonesia, Irian Jaya. See *Adansonia*, sér. 2, 15: 95. 1975, Kade Sidiyasa, *Tree flora of Indonesia*: check list for Irian Jaya compiled by K. Sidiyasa, U. Sutisna, Marfuah-Sutiyono, Titi Kalima-Sutrasno & T.C. Whitmore/edited by T.C. Whitmore, I.G.M. Tantra & U. Sutisna. Bogor, Indonesia: Ministry of Forestry, Forest Research and Development Agency, 1997, Mark James Elgar Coode, *Checklist of the Flowering Plants of N. E. Kepala Burung* (Vogelkop), Irian Jaya, Indonesia: A report to the John D. and Catherine T. MacArthur Foundation: Aug 1997/M.J.E. Coode, S.C.

Hinchcliffe & J. Marsden. Kew: Royal Botanic Gardens, Kew 1997.

R. rigidifolia Holtt.

Sabah, Mt. Kinabalu. Scrambling bamboo, stiff leaf blades, spikelets glabrous, 2 glumes, lemma and palea glabrous, see *Gardens' Bulletin, Straits Settlements* 15: 273. 1956.

R. rupicola Widjaja

Indonesia. See *Reinwardtia* 11(2): 126-128. 1997.

R. schultzei (Pilger) Holttum (*Arundinaria schultzei* Pilg.) (for Leonhard Sigismund Schultze-Jena, 1872-1955, botanical collector in Southwest Africa, New Guinea and Guatemala, orchidologist, zoologist, ornithologist, author of *Aus Namaland und Kalahari*. Bericht an die Kgl. preuss. akademie der wissenschaften zu Berlin über eine forschungsreise im westlichen und zentralen Südafrika, ausgeführt in den jahren 1903-1905 ... Mit 25 tafeln in heliogravüre und lichtdruck, 1 karte und 286 abbildungen im text. Jena 1907)

Indonesia, Papua New Guinea. See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 52: 172. 1914, *Kew Bulletin* 21: 283. 1967.

R. sessilis Widjaja

Indonesia. See *Reinwardtia* 11(2): 128-130. 1997.

R. setifera Holtt.

Peninsular Malaysia. Culms well-spaced, flexuous, very loosely clustered, very slender, long-necked slender rhizomes, linear leaves, spikelets shortly stalked, 2 empty glumes, 3 lodicules, 6 stamens, ovary shortly hairy, forests, along riverbanks, see *Gard. Bull. Sing.* 15: 268, 271. 1956 and 16: 134. 1958.

Raddia Bertoloni = *Hellera* Döll, *Olyra* L., *Raddia* DC. (Hippocrateaceae), *Raddia* Mazziari, *Strepthium* Schrad. ex Nees, *Strepthium* Nees

After the Italian botanist Giuseppe Raddi (Josephus Raddius), 1770-1829, cryptogamist, traveler, explorer, plant collector (Brazil, Madeira and Egypt), mycologist, wrote *Synopsis filicum brasiliensium*. Bononiae [Bologna] 1819. See J.H. Barnhart, *Biographical notes upon botanists*. 3: 122. 1965; T.W. Bossert, compil., *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 322. 1972; Ethelyn Maria Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. University of Pennsylvania Press, Philadelphia 1964; Johannes Proskauer, in *D.S.B.* 10: 13. 1981; Mariella Azzarello Di Misa, a cura di, *Il Fondo Antico della Biblioteca dell'Orto Botanico di Palermo*. 223. Regione Siciliana, Palermo 1988; R. Zander, F. Encke, G. Buchheim &

S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993.

About 5-12 species, Brazil and French Guiana, Central and South America. Bambusoideae, Oryzodae, Olyreae, or Bambusoideae, Olyreae, Olyrinae, perennial, erect or decumbent, unarmed, fernlike, tufted, rhizomatous, herbaceous, leaf blades pseudopetiolate ovate-oblong or lanceolate-oblong, ligule inconspicuous, plants monoecious with inflorescences unisexual, inflorescence indeterminate, sexes in separate inflorescences, male panicle usually terminal, axillary female racemes, male florets 2- or 3-staminate, 2 glumes membranous and subequal, lemma coriaceous, female spikelets disarticulating above glumes, palea present, stamens absent, often highly variable, forest, shade, forest floor, sandy soils, lowland, type *Raddia brasiliensis* Bertoloni, see *Systema Naturae, Editio Decima* 1253, 1261, 1379. 1759, *Opuscoli Scientifci* 3: 410. 1819, *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 570. 1824, *Agrostologia Brasiliensis* 298-299. 1829 (or *Flora Brasiliensis seu Enumeratio Plantarum in Brasilia...* Stuttgartiae et Tubingae 1829-1833), *Ionios Anthologia* 2: 448. 1834, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 3,1(2-3): 114. 1834, *Flora Brasiliensis* 2, 2: 314. 1877, *Botanical Magazine* 122: t. 7469. 1896 and *Proceedings of the Biological Society of Washington* 21: 185. 1908, *Arkiv för Botanik utgivet av K. Svenska Vetenskapsakademien* 10(17): 21, t. 2, f. 3, t. 6, f. 9. 1911, *Contributions from the United States National Herbarium* 18(7): 358. 1917, *Contributions from the United States National Herbarium* 22(6): 505. 1922, *Proceedings of the Biological Society of Washington* 40: 87. 1927, *Contributions from the United States National Herbarium* 24(8): 491. 1927, *Brittonia* 23(3): 293-324. 1971, *Brittonia* 37(1): 22-35. 1985, *American Bamboos* 306-309. 1999, *Contributions from the United States National Herbarium* 39: 62, 82-88, 107-108, 113. 2000.

Species

R. angustifolia Soderstr. & Zuloaga

Brazil. See *Brittonia* 37(1): 32, f. 6. 1985.

R. brasiliensis Bertol. (*Olyra brasiliensis* (Bertol.) Spreng.; *Olyra floribunda* Raddi; *Olyra floribunda* var. *floribunda*)

Brazil. Wiry, erect or decumbent, knotty base, shortly rhizomatous, leaf blades ovate-oblong, female raceme scarcely exerted from the leaf sheaths, spikelets pubescent, male panicle ovate exerted from the uppermost leaf sheath, spikelets pilose acuminate, see *Agrostografia Brasiliensis* 20. 1823, *Systema Vegetabilium* 4: Cur. Post. 29. 1827.

R. distichophylla (Schrad. ex Nees) Chase (*Olyra polypodioides* Trin.; *Raddia polypodioides* (Trin.) Chase; *Strepthium distichophyllum* Schrad. ex Nees)

Brazil. Tufted, wiry, erect, knotty base, shortly rhizomatous, nodes bearded, leaf blades asymmetrically obtuse glabrous apiculate, female racemes not fully exerted, female spikelets acute or acuminate, on the upper part of the culm male panicles many-flowered not fully exerted, male spikelets glabrous acuminate, sleep movements of the leaf blades, forest shade, see *Flora Brasiliensis seu Enumeratio Plantarum* 2: 298. 1829 [alternative title: *Agrostologia Brasiliensis*], *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 3,1(2-3): 117. 1834 and *Proceedings of the Biological Society of Washington* 21: 184-185. 1908.

R. esenbeckii (Steud.) C.E. Calderón & Soderstr. (*Olyra nana* Döll; *Panicum esenbeckii* Steud.; *Raddia nana* (Döll) Chase; *Raddiella esenbeckii* (Steud.) C.E. Calderón & Soderstr.; *Raddiella nana* (Döll) Swallen)

South America. See *Synopsis Plantarum Glumacearum* 1: 90. 1854, *Flora Brasiliensis* 2(2): 329. 1877 and *Proceedings of the Biological Society of Washington* 21: 185. 1908, *Bulletin of the Torrey Botanical Club* 75(1): 89. 1948, *Smithsonian Contributions to Botany* 44: 21. 1980, *Ann. Missouri Bot. Gard.* 78: 933. 1991.

R. guianensis (Brongn.) Hitchc. (*Olyra floribunda* var. *microphylla* Döll; *Olyra urbaniana* Mez; *Raddia urbaniana* Hitchc. & Chase; *Strephium guianense* Brongn.)

French Guiana, the Caribbean, Brazil, Venezuela. Perennial, caespitose, erect, often decumbent, rooting at the nodes, fernlike foliage, leaf blades linear to narrowly oblong-lanceolate, contracted panicles of male spikelets borne from the upper nodes, racemose panicles of female spikelets borne from the middle nodes, cultivated, ornamental, forest floor, mountains, see *Agrostografia Brasiliensis* 20. 1823, *Bulletin de la Société Botanique de France* 7: 470. 1860, *Flora Brasiliensis* 2, 2: 329. 1877 and *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 7(63): 47. 1917, *Contributions from the U.S. National Herbarium* 18(7): 359. 1917, *Manual of the Grasses of the West Indies* 373. 1936.

R. portoi Kuhl. (for the Brazilian botanist Paulo Campos Porto, b. 1889, wrote "Uma *Octomeria* nova." *Arch. Jard. Bot. Rio de J.* 3: 285-288. 1922 and "Um Caso de hibridação natural [*Cattleya itatiayae*]." *Arch. Jard. Bot. Rio de J.* 2: 65-66. 1918 See Pancrace Bessa (1772-1835), *Catalogue: four hundred floral watercolor paintings* by the master Pancrace Bessa: the world renowned collection of Sr. Paulo de Campos-Porto ... dispersal by public auction ... Gallery of Lewis S. Hart ... Beverly Hills, California [Nov 17-18 1947] Beverly Hills 1947)

Brazil. Erect, wiry, nodes not bearded, knotty base, shortly rhizomatous, leaf blades lanceolate-oblong glabrous, female raceme scarcely exerted from the leaf sheaths, male panicle may be ovate exerted, spikelets glabrous acuminate, forest

shade, see *Archivos do Jardim Botânico do Rio de Janeiro* 4: 350. 1925.

R. soderstromii L.G. Clark & Judz.

Brazil. Rhizomatous, spreading.

Raddia Mazziari = *Crypsis* Aiton

After the Italian botanist Giuseppe Raddi, 1770-1829.

Chloridoideae, Zoysieae, Sporobolinae, type *Raddia aculeata* Mazziari, see *Contributions from the United States National Herbarium* 41: 56-57, 191. 2001.

Raddiella Swallen

The diminutive of *Raddia*.

About 7-8 species, tropical America, Panama to Brazil, West Indies. Bambusoideae, Olyreae, Olyrinae, or Bambusoideae, Oryzodae, Olyreae, perennial or annual, weak, herbaceous, delicate, unarmed, trailing, caespitose, low, erect, decumbent, often forming mats, ligule membranous, narrow leaves pseudopetiolate, rhizomes pachymorph, plants monoecious, inflorescence determinate or indeterminate, sexes in separate inflorescences, male usually terminal, axillary female, raceme-like panicle, female spikelets falling entire swollen callus at spikelets base, 2 glumes herbaceous, lower glume 3-nerved, upper glume 3- to 5-nerved, male florets 3-staminate, palea present, stamens absent, 2 stigmas, damp soils, depressions, dry savannah, woodlands, secondary forests, wet places, near streams, on rocks, sandy soils, type *Raddiella nana* (Döll) Swallen (nom. superfl. illeg. for *Raddiella esenbeckii* (Steud.) C.E. Calderón & Soderstr.), see *Species Plantarum* 1: 44. 1753, *Genera Plantarum* 26. 1789 and *Bulletin of the Torrey Botanical Club* 75(1): 89. 1948, B. Maguire et al., "The Botany of the Guayana Highland. VI." *Memoirs of the New York Botanical Garden* 12(3): 1-7. 1965, *Smithsonian Contributions to Botany* 44: 1-27. 1980, *Brittonia* 37: 22-35. 1985, *Smithsonian Contributions to Botany* 69: 64. 1989, *Annals of the Missouri Botanical Garden* 78: 928-941. 1991, *Flora of the Guianas. Bot.* 69: 66. 1989.

R. kaieteurana Soderstr.

Guyana, Venezuela, Suriname, Brazil. Perennial or annual, weak, decumbent, trailing, creeping, stoloniferous, ligules membranous, leaf blades elliptic acute and apiculate,

inflorescences terminal and axillary from the upper nodes, each axillary nodes bearing female inflorescences, moist areas, related to *Raddiella malmeana*, see *Memoirs of the New York Botanical Garden* 12(3): 6. 1965.

R. lunata Zuloaga & Judz.

Brazil. See *Annals of the Missouri Botanical Garden* 78(4): 936, f. 9, 10, 14. 1991.

R. malmeana (Ekman) Swallen (*Olyra malmeana* Ekman; *Raddia malmeana* (Ekman) Hitchc.) (for the Swedish botanist Gustaf Oskar Andersson Malme (né Andersson), 1864-1937, lichenologist, at the Stockholm Riksmuseum, traveled in South America (1901-1903, Argentina, Paraguay), his writings include *Ex herbario Regnelliano*. Stockholm 1898-1901, "Über die Asclepiadaceen-Gattung *Tweedia* Hooker & Arnott." *Ark. Bot.* 2(7): 1-20. 1904, *Die Bauhinien von Matto Grosso*. [Stockholm 1905], "Asclepiadaceae Duseninanae in Paraná collectae." *Ark. Bot.* 21A(3): 1-48. 1927, "Die Compositen der zweiten Regnellschen Reise. III. Puente del Inca und Las Cuevas (Mendoza)." *Ark. Bot.* 24A(8): 58-66. 1932, "Asclepiadaceae austroamericanae praecipue andinae." *Ark. Bot.* 25A(7): 1-26. 1932, "Asclepiadaceae Brasilienses, novae vel minus bene cognitae." *Ark. Bot.* 28A(5): 1-28. 1936, "Über die Gattung *Grisebachiella* Lorentz." *Ark. Bot.* 28B(2): 1-4. 1936, "Beiträge zur Kenntniss der chilenischen Asclepiadaceen." *Ark. Bot.* 28B(6): 1-6. 1936 and "Die in Rio Grande do Sul vorkommenden Spezies der Gattung *Lathyrus*." *Revista Sudamer. Bot.* 3(1-2): 8-13. 1936, with A.F.M. Glaziou (1828-1906) wrote *Xyridaceae brasilienses*. Stockholm 1898. See J.H. Barnhart, *Biographical notes upon botanists*. 2: 440. 1965; I.C. Hedge & J.M. Lamond, *Index of Collectors in the Edinburgh Herbarium*. Edinburgh 1970; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 250. 1972; Frederico Carlos Hoehne, M. Kuhlmann & Oswaldo Handro, *O jardim botânico de São Paulo*. 128. 1941; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. Philadelphia 1964)

Brazil. Stony places, see *Arkiv för Botanik utgivet av K. Svenska Vetenskapsakademien* 10(17): 21, t. 2, f. 3, t. 6, f. 9. 1911, *Contributions from the U.S. National Herbarium* 22(6): 505. 1922, *Bulletin of the Torrey Botanical Club* 75(1): 89. 1948.

R. minima Judz. & Zuloaga

Brazil. See *Annals of the Missouri Botanical Garden* 78(4): 939. 1991.

R. molliculma (Swallen) C.E. Calderón & Soderstr. (*Panicum molliculmum* Swallen)

Colombia. See *Botanical Museum Leaflets* 16(4): 57. 1953, *Smithsonian Contributions to Botany* 44: 22. 1980.

R. potaroensis Soderstr. (*Raddiella maipuriensis* Soderstr., from Maipuri Falls)

Venezuela, Guyana. Sometimes annual, delicate, matted, weak, glabrous, decumbent, stoloniferous, inflorescences all axillary, savannah, wet rocks, see *Memoirs of the New York Botanical Garden* 12(3): 6-7. 1965.

Raimundochloa A.M. Molina = *Koeleria* Pers., *Parodiochloa* C.E. Hubb., *Parodiochloa* A.M. Molina, *Rostraria* Trin.

South America, after the Argentine botanist Lorenzo Raimundo Parodi, 1895-1966.

Pooideae, Poaceae, Aveninae, see *Species Plantarum* 1: 67. 1753, *Syn. Pl.* 1: 97. 1805, *Fundamenta Agrostographiae* 149, t. 13. 1820, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 1(1): 65. 1830, *Florula Atacamensis seu enumeratio plantarum ...* 55. Halis Saxonum [Halle] 1860 and *Zlaki SSSR* 267. 1976, *Bulletin of the British Museum (Natural History), Botany* 8: 395-396. 1981, *Parodiana* 4(1): 110-112, f. 1-2. 1986, *Parodiana* 4(2): 402. 1986, *Contributions from the United States National Herbarium* 48: 477, 579, 604. 2003.

Ramosia Merr. = *Centotheca* Desv.

Bambusoideae, Oryzodae, Centothecoideae, Centothecoaceae, see *Nouveau Bulletin des Sciences, publié par la Société Philomatique de Paris* 2: 189. 1810 and *Philippine Journal of Science* 11: 2. 1916, *Blumea* 19(1): 60. 1971.

Raram Adans. = *Cenchrus* L.

Latin *rarus, rara, rarum* "thin, rare, scanty, scattered, few, sparsely."

Panicoideae, Paniceae, Cenchrinae, type *Cenchrus echinatus* L., see *Species Plantarum* 2: 1049-1050. 1753, *Familles des Plantes* 2: 35, 597. 1763 and *Contributions from the United States National Herbarium* 46: 144-150. 2003.

Raspailia Presl = *Nowodworskya* J. Presl, *Polyogon* Desf.

For the French (b. Carpentras) scientist François Vincent Raspail, 1794-1878 (d. Arcueil, near Paris), botanist, politician, chemist, naturalist, one of the founders of cytochemistry and cellular pathology, determined the agent of scabies (*Sarcoptes scabiei*), self-educated in science, among his numerous publications are *Manuel annuaire de la Santé pour 1847, ou médecine et pharmacie domestiques*. Paris 1847, *Mémoires sur la famille des Graminées*. Paris 1825

[-1826], *De la Pologne sur les bords de la Vistule et dans l'émigration*. Paris 1839, *L'Ami du Peuple en 1848*. [1848], *Le Choléra en 1865*. Paris 1865 and *Nouveau Système de Physiologie Végétale et de Botanique*. Paris 1837. See Marc Klein, in *D.S.B.* 11: 300-302. [b. 1794] 1981; J.H. Barnhart, *Biographical notes upon botanists*. 3: 129. Boston 1965; [François Vincent Raspail], *Procès et défense de F.V. Raspail, poursuivi ... en exercice illégal de la médecine ... sur la dénonciation formelle des sieurs Fouquier ... et Orfila ... agissant comme vice-président et président d'une association anonyme de médecins*. Paris 1846; R. Zander, F. Encke, G. Buchheim & S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993; Stafleu & Cowan, *Taxonomic literature*. 4: 582-583. [born 29 Jan 1791] Utrecht 1983; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 325. 1972; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. 612-613. University of Pennsylvania Press, Philadelphia 1964.

Pooideae, Poaceae, Agrostidinae, type *Raspailia agrostoides* J. Presl (nom. inval., provis. for *Nowodworskya agrostoides* J. Presl), see *Flora Atlantica* 1: 66-67. 1798 [1800], *Memoria di Matematica e di Fisica della Società Italiana di Scienze Residente in Modena, Parte contenente le Memorie di Fisica* 8: 479. 1799, *Révision des Graminées* 1: 72. 1829, *Reliquiae Haenkeanae* 1(4-5): 238-239, 351, t. 40, 80. 1830, *Syn. Mitteleur. Fl.* 2(1): 160, 163. 1899 and *Flora URSS* 2: 297. 1934, *Symbolae Botanicae Upsaliensis* 17(1): 1-112. 1960, *Flora Mesoamericana* 6: 241-242. 1994, *Las Gramíneas de México* 5: 1-466. 1999, *Contr. U.S. Natl. Herb.* 48: 468, 583-588. 2003.

Ratraya J.B. Phipps = *Danthoniopsis* Stapf

After James Mcfarlane Rattray, 1907-1974, botanist, with the South African botanist Sydney Margaret Stent (1875-1942) wrote "The grasses of Southern Rhodesia." *Proc. Rhod. Sci. Ass.* 32: 1-64. 1933. See Stafleu & Cowan, *Taxonomic literature*. 4: 586. 1983; Mary Gunn & Leslie E. Codd, *Botanical Exploration of Southern Africa*. 290 [for George Rattray, 1872-1941], 334 [for Sydney Margaret Stent]. Cape Town 1981; J.H. Barnhart, *Biographical notes upon botanists*. 3: 324. 1965; F.N. Hepper & Fiona Neate, *Plant Collectors in West Africa*. 67. [genus named for the Scottish diatomist John Rattray, 1858-1900] 1971; Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 573. London 1994; A. White & B.L. Sloane, *The Stapelieae*. Pasadena 1937.

Arundinelleae, type *Ratraya petiolata* J.B. Phipps, see *Bulletin of Miscellaneous Information Kew* 1897: 298. 1897 and *Hooker's Icones Plantarum* 31: t. 3075. 1916, *Bulletin of Miscellaneous Information Kew* 1936(5): 320, 321, 324. 1936, *Kew Bulletin* 1949: 353. 1949, *Botanische*

Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie 75: 357. 1951, *Kirkia* 4: 100-101, t. 10, f. 1. 1964, *Kirkia* 5: 235-258. 1966, *Kew Bulletin* 21(1): 119-124. 1967, *Boletim da Sociedade Broteriana, ser. 2* 46: 421. 1972 [1973], *Taxon* 27(2-3): 301. 1978.

Ratzeburgia Kunth = *Aikinia* R. Br.
(Gesneriaceae), *Aikinia* Wall., *Mnesithea*
Kunth

For the German botanist Julius Theodor Christian Ratzeburg, 1801-1871, entomologist, physician, forester, zoologist, M.D. Berlin 1825, professor of natural sciences, his publications include *Die Forst-Insecten*. Berlin 1837-1844, *Die Waldverderbniss*, etc. Berlin 1866-1868, *Forstnaturwissenschaftliche Reisen durch verschiedene Gegenden Deutschlands ...* Im Anhage, Gebirgsboden-Analysen vom Professor Dr. F. Schulze zu Eldena, etc. Berlin 1842, *Forstwissenschaftliches Schriftsteller-Lexikon*. Berlin 1872. See Stafleu & Cowan, *Taxonomic literature*. 4: 586-587. Utrecht 1983; G.W. von Viebahn, *Statistik des zollvereinten und nördlichen Deutschlands*. In Verbindung mit ... Ratzeburg ... herausgegeben von G. von Viebahn. 1858; J.H. Barnhart, *Biographical notes upon botanists*. 3: 130. 1965; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933.

One species, Southeast Asia, Burma. Panicoideae, Andropogonodae, Andropogoneae, Rottboelliinae, perennial, leafy, rather slender, herbaceous, caespitose, stoloniferous, auricles absent, ligule an unfringed membrane, leaves linear, plants bisexual, inflorescence terminal and axillary of single cylindrical raceme, spikelets in triplets of 2 sessile spikelets appressed back to back, edges of the spikelets protected by the modified internode and pedicel, pedicellate spikelet vestigial and sterile, 2 glumes more or less equal, lower floret barren, palea short or very reduced, lodicules present, 3 stamens, ovary glabrous, 2 stigmas, used for fodder or for thatching, damp grassland, marshy places, type *Ratzeburgia pulcherrima* Kunth, see *Supplementum Plantarum* 13, 114. 1781 [1782], *Supplementum Carpologicae* 1(1): 3, pl. 181, f. 3. 1805, *Nouveau Bulletin des Sciences, publié par la Société Philomatique de Paris* 2: 188. 1810, *Révision des Graminées* 1: 153-154. 1829, *Rel. Haenk.* 1: 329. 1830, *Voyage autour du Monde* 2: 64, f. 14. 1829 [1831], *Mémoires de la Société d'Agriculture, Sciences et Arts d'Angers* 1: 180, t. 9, f. 3. 1831, *Révision des Graminées* 2: 487, t. 158. 1831, *Plantae Asiaticae Rariores* 3: 46, 65, t. 273. 1832, *A Natural System of Botany* edition 2: 379. 1836, *Nomenclator Botanicus. Editio secunda* 2: 439. 1841, *Die Natürlichen Pflanzenfamilien* 2(2): 25. 1887, *Revisio Generum Plantarum* 2: 776. 1891 and *United States Department of Agriculture: Bulletin* 772: 278. 1920,

Hooker's Icones Plantarum 36: t. 3548. 1956, *Blumea* 31(2): 281-307. 1986, *Austrobaileya* 3(1): 79-99. 1989, T.J. Killeen, "The grasses of Chiquitania, Santa Cruz, Bolivia." *Annals of the Missouri Botanical Garden* 77(1): 147, 160. 1990, *Flora Mesoamericana* 6: 396-397. 1994.

Species

R. pulcherrima Kunth (*Aikinia elegans* Wall.; *Mnesithea pulcherrima* (Kunth) de Koning & Sosef; *Ophiuros auriculatus* Trin.; *Rottboellia elegans* (Wall.) Roberty; *Rottboellia pulcherrima* Wall. ex Kunth)

Myanmar. Perennial, inflorescence terminal, a single flattened raceme, modified pedicel and internode frame-like, lower glume crustaceous, short grassland, see *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 2(1): 246. 1832, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 468. 1833 and *Boissiera. Mémoires du Conservatoire de Botanique et de l'Institut de Botanique Systématique de l'Université de Genève* 85. 1960.

Reana Brign. = *Euchlaena* Schrader, *Zea* L.

Named for the Italian botanist Filippo Re, 1763-1817, economic botanist, phytopathologist, 1814-1817 Director of the Botanical Garden at Modena, wrote *Del cotone e delle avvertenze per ben coltivarlo*. 2a edizione Milano 1811, *Saggio sulla coltivazione e su gli usi del pomo di terra*. Milano, 1817 and *Saggio teorico-pratico sulle malattie delle piante*. 2a edizione. Milano 1817. See J.H. Barnhart, *Biographical notes upon botanists*. 3: 133. 1965; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 326. 1972; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. 1: 584-585. 1917-1933; Giorgio Montecchi, *Aziende tipografiche, stampatori e librai a Modena dal Quattrocento al Settecento*. Mucchi, Modena 1988. Possibly after the Italian botanist Giovanni Francesco Re, 1773-1833, physician, professor of botany.

Panicoideae, Andropogoneae, Tripsacinae, type *Reana giovanninii* Brign. (subfamily, Chloridoideae), see *Species Plantarum* 2: 971-972. 1753, Heinrich Adolph Schrader (1767-1836), *Index seminum horti academici goettingensis*. 3. 1832, *Annales des Sciences Naturelles; Botanique, sér.* 3 12: 365. 1849, *Bulletin de la Société Nationale d'Acclimatation de France* 19: 581. 1872, *Bulletin de la Société Botanique de France* 15(3): 468. 1876 and *Lexikon Generum Phanerogamarum* 600. 1904, *Contributions from the United States National Herbarium* 46: 240-241, 543, 635-639. 2003.

Rebentischia Opiz = *Trisetum* Pers.

Possibly named for the German botanist Johann Friedrich Rebentisch, 1772-1810, author of *Prodromus florum neomarchicae* secundum systema proprium conscriptus atque figuris XX coloratis adornatus. Auctore Joanne Frid. Rebentisch. Cum praefatione C.L. Willdenow, in qua de vegetabilium cryptogamicorum dispositione tractatur. Berolini, Impensis F. Schüppel, 1804. See J.H. Barnhart, *Biographical notes upon botanists*. 3: 134. 1965; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. 1: 585. 1917-1933.

Pooideae, Poaceae, Aveninae, see *Syn. Pl.* 1: 97. 1805, *Essai d'une Nouvelle Agrostographie* 88, 153, t. 18, f. 1. 1812, *Lotos* 4: 104. 1854 and *U.S.D.A. Bull.* 772: 107-109. 1920, *Taxon* 36: 75. 1987, *Contributions from the United States National Herbarium* 48: 601-602, 659-676. 2003.

Reboulea Kunth = *Colobanthus* (Trin.)

Spach, *Reboullia* Raddi, *Reboullia* Raddi, *Sphenopholis* Scribn.

For the French botanist Eugène de Reboul, 1781-1851; see J.H. Barnhart, *Biographical notes upon botanists*. 3: 134. 1965; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. 1917-1933; Helmut Genast, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 529. [genus *Reboullia* dedicated the French naturalist to Henri-Paul-Irénée Reboul, 1763-1839] Basel 1996.

Pooideae, Poodae, Aveneae, or Pooideae, Poaceae, Aveninae, type *Reboulea gracilis* Kunth (*Sphenopholis obtusata* (Michx.) Scribn.), see *Révision des Graminées* 2: 341, t. 84. 1830, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 1(1): 66. 1830, *Der Deutsche Botaniker Herbarienbuch* 1(2): 149. 1841, *Histoire Naturelle des Végétaux* 13: 163. 1841 and *Rhodora* 8(92): 142, 144. 1906, *Index Kewensis* 13: 33. 1966, *Flora of Alaska and Neighboring Territories; A Manual of the Vascular Plants* i-xxi, 1-1008. 1968, *Anderson's Flora of Alaska and Adjacent Parts of Canada* i-xvi, 1-724. 1974, *Flora of the Yukon Territory* i-xvii, 1-669. 1996, *Contributions from the United States National Herbarium* 48: 237, 601, 614-617. 2003.

Redfieldia Vasey = *Grapphephorum* Desv., *Styppeiochloa* De Winter

For the American botanist John Howard Redfield, 1815-1895, zoologist, conchologist, plant collector, palaeontologist, a curator of the Herbarium of the Philadelphia Academy of Natural Sciences, author of *Recollections of John*

Howard Redfield [privately printed] 1900, with the American botanist Edward Lothrop Rand (1859-1924) wrote *Flora of Mount Desert Island*. Cambridge 1894, he was the son of the American meteorologist and palaeontologist William C. Redfield (1789-1857); see Harold L. Burstyn, in *D.S.B.* 11: 340-341. 1981; J.H. Barnhart, *Biographical notes upon botanists*. 3: 127, 135. 1965; J.W. Harshberger, *The Botanists of Philadelphia and Their Work*. 1899; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 327. 1972; S. Lenley et al., *Catalog of the manuscript and archival collections and index to the correspondence of John Torrey*. Library of the New York Botanical Garden. 1973; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. 1917-1933; Joseph Ewan, *Rocky Mountain Naturalists*. The University of Denver Press 1950.

One species, North America, central U.S. Chloridoideae, Eragrostideae, or Chloridoideae, Cynodonteae, Muhlenbergiinae, perennial, erect, caespitose, rhizomatous, auricles absent, ligule a line of hairs, leaf blades involute with filiform tip, inflorescence a slender delicate panicle exerted, 2- to 6-flowered spikelets, callus bearded with long silky hairs, spikelets solitary, 2 glumes acuminate very unequal or subequal, second glume awnless, chartaceous lemmas 3-nerved often mucronate, palea glabrous, lodicules rounded, ovary glabrous, open areas, hills, related to *Tridens* and *Eragrostis*, type *Redfieldia flexuosa* (Thurb. ex A. Gray) Vasey, see *Bulletin Torrey Botanical Club* 14: 133-134. 1887 and *Bull. Soc. Botanique de France* 73: 1023-1024. 1926, *Manual of the Grasses of the United States*, in *United States Department of Agriculture Miscellaneous Publication*. 1935, *Manual of the Grasses of the United States*, in *United States Department of Agriculture Miscellaneous Publication* second edition, revised by A. Chase. 1951, *Botanisches Jahrb.* 76: 281-384. 1954, *Nat. Pflanz.*, second edition, 14: 1-168. 1956, *American Journal of Botany* 44: 756-768. 1957, *Recent Advances in Botany* 1: 133-145. 1961, *American Journal of Botany* 51: 453-463. 1964, *Bothalia* 9: 134-137. 1966, *Brittonia* 23: 105-117. 1971, *Michigan Academician* 5: 373-383. 1973, *The Grasses of Texas* 1975, *Madroño* 23(8): 434-438. 1976, *Kew Bulletin* 37: 133-162. 1982, *American Journal of Botany* 81: 622-629. 1994, *Contributions from the United States National Herbarium* 41: 123-124, 192. 2001, *Flora of North America North of Mexico* 25: 1-783. 2003, *Kew Bulletin* 58(3): 741. 2003.

Species

R. flexuosa (Thurb. ex A. Gray) Vasey (*Grapphephorum flexuosum* Thurb. ex A. Gray; *Redfieldia flexuosa* (A. Gray) Vasey)

Central U.S. Chloridoideae, Cynodonteae, perennial, herbaceous, rhizomatous, florets bearded from callus, lemmas keeled acute to acuminate, plants bisexual, sandy areas,

sand hills, see *Nouveau Bulletin des Sciences, publié par la Société Philomatique de Paris* 2: 189. 1810, *Proceedings of the Academy of Natural Sciences of Philadelphia* 1863: 78. 1864, *Bulletin of the Torrey Botanical Club* 14: 133. 1887.

Reederochloa Soderstrom & H.F. Decker

Named after the North American agrostologist, J.R. Reeder.

One species, North America, Mexico. Chloridoideae, Cynodonteae, Monanthochloinae, perennial, herbaceous, unbranched, erect, dimorphic, tufted, stoloniferous, leaves mainly basal, ligule membranous, sheaths ciliate to pilose, leaves mostly basal, auricles absent, plants dioecious, inflorescence of 2-4 clustered spikelets, loose panicles, male florets 3-staminate, fertile spikelets sessile hidden among upper leaf sheaths, 2 glumes unequal 2- to 8-nerved, second glume awnless, lemma acute coriaceous 9- to 14-nerved, palea glabrous, fleshy lodicules, stamens absent, ovary glabrous, 2 stigmas, male spikelets glabrous, alkaline flats, open areas, closely related to *Monanthochloe* and *Distichlis*, type *Reederochloa eludens* Soderstr. H.F. Decker, see *Brittonia* 16(3): 334-339. 1964, *Contributions from the United States National Herbarium* 41: 192. 2001.

Species

R. eludens Sod. & Decker

Mexico. See *Brittonia* 16(3): 335, f. 1-10. 1964, *Taxon* 33: 126-134. 1984.

Rehia Fijten = *Bulbulus* Swallen

After the British botanist Richard Eric Holttum, 1895-1990, traveler and botanical explorer (Malay Peninsula, British North Borneo, Sumatra). See Peter John Edwards, *R.E. Holttum Publications, 1919-1996: A Bibliography*, Peter J. Edwards, Sylvia M.D. Fitzgerald, Robert J. Johns, Lothian Lynas, Margaret R. Newman, Michael G. Price & Patricia J. Wortley, Kew: Royal Botanic Gardens, Kew 1997; J.H. Barnhart, *Biographical notes upon botanists*. 2: 197. 1965; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 180. 1972; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. Philadelphia 1964; R. Zander, F. Encke, G. Buchheim & S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993; Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 351. London 1994.

One species, Brazil and the Guianas, Amazon. Bambusoideae, Oryzodae, Olyreae, or Bambusoideae, Olyreae, Olyrinae, perennial, tufted, slender, herbaceous, unbranched, unarmed, basal culm internode swollen and thickened, ligule membranous, plants monoecious, sexes

mixed in the same inflorescence, inflorescence raceme-like, 2-5 female spikelets with 1-2 male spikelets, 2 glumes acute and papery, lemma pubescent, palea present, stamens absent, forest shade, wet forest, sandy forest, lowland, rain-forest, related to *Olyra* L., type *Rehia nervata* (Swallen) Fijten, see *Phytologia* 11(3): 154. 1964, *Blumea* 22(3): 416. 1975, *Brittonia* 34: 25-29. 1982, *Flora of the Guianas. Series A, Phanerogams* 545-547. 1990, *American Bamboos* 312-314. 1999, *Contributions from the United States National Herbarium* 39: 35, 109. 2000, *J. Amer. Bamboo Soc.* 18(1): 7-18. 2004.

Species

R. nervata (Swallen) Fijten (*Bulbulus nervatus* Swallen; *Rehia nervata* Fijten)

French Guiana, Guyana, Brazil, Suriname. Perennial, erect to decumbent, wiry, cormose, clump forming, leaf sheaths overlapping, synflorescence terminal and contracted, inflorescences partially hidden by the leaves, female spikelet lanceolate, spikelets one-flowered, see *Phytologia* 11(3): 154. 1964, *Fl. Suriname*, Add. & Corr. 1(2): 354. 1968, *Blumea* 22(3): 416. 1975.

Reimaria Humb. & Bonpl. ex Fluegge = *Paspalum* L., *Reimaria* Fluegge

Dedicated to Johann Albert H. Reimarus (1729-1814), philosopher, natural theologian.

Panicoideae, Paniceae, Paspalinae, type *Reimaria candida* Humb. & Bonpl. ex Fluegge, see *Systema Naturae, Editio Decima* 846, 855, 1359. 1759, Johann Flüggé (Johannes Flueggé or Fluegge), 1775-1816, *Graminum monographiae ... Pars I. Paspalum. Reimaria*. 213-214. Hamburgi 1810 and *Contr. U.S. Natl. Herb.* 12: 116. 1908, *U.S. Dept. Agric. Bull.* 772: 227. 20 Mar 1920, *Contributions from the United States National Herbarium* 46: 443-527, 543. 2003.

Reimarochloa A. Hitchc.

Dedicated to J.A.H. Reimarus (1729-1814).

About 4 species, southern U.S. to Argentina. Panicoideae, Panicodae, Paniceae, or Panicoideae, Paniceae, Paspalinae, perennial, herbaceous, tufted, erect, straggling, procumbent, prostrate, sprawling, stoloniferous, auricles absent, plants bisexual, inflorescence of subdigitate or digitate stiff racemes, cleistogamous spikelets, borne singly 2-flowered spikelets acute to acuminate, lower floret sterile, both glumes absent or 1 glume present, upper lemma membranous to coriaceous with narrow margins, lower lemma membranous 3-nerved and palea absent, 2 free and fleshy lodicules, 3 stamens, ovary glabrous, 2 stigmas, semi-aquatic, wetlands, seasonally inundated fields, muddy places, below shrubs and trees, on sand beaches and along

sandy riverbanks, flats, along rivers and streams, ponds and pond margins, resembling *Digitaria*, related to *Paspalum*, type *Reimarochloa acuta* (Fluegge) Hitchc., see *Species Plantarum* 1: 55, 61. 1753, *Enumeratio Methodica Plantarum* 207. 1759, *Historia Stirpium Indigenarum Helvetiae Inchoata* 2: 244. 1768, *Graminum monographiae ... Pars I. Paspalum. Reimaria*. 213-214, 217. 1810 and *Contributions from the United States National Herbarium* 12(6): 198-199. 1909, *Revista de Biología Tropical* 22(2): 247-251. 1975, *Dominguezia* 4: 41. 1982, *Flora of the Guianas. Series A, Phanerogams* 548-551. 1990, *Flora Mesoamericana* 6: 353. 1994, *Flora Fanerogámica Argentina* 19(1): 11-16. 1995, *Gramíneas de Bolivia* 506-508. 1998, *Contributions from the United States National Herbarium* 46: 543-544. 2003.

Species

R. aberrans (Döll) Chase (*Reimaria aberrans* Döll; *Reimarochloa aberrans* (Döll) Kuhlm., nom. illeg., non *Reimarochloa aberrans* (Döll) Chase)

Bolivia, Brazil. Stoloniferous, prostrate, nodes usually bearded, leaf blades linear acute or acuminate, inflorescence exserted, spikelets lanceolate glabrous acute or acuminate, moist ground sandy soils, see *Flora Brasiliensis* 2(2): 38, pl. 13. 1877 and *Proceedings of the Biological Society of Washington* 24: 137. 1911, *Comissão de Linhas Telegraficas Estratégicas de Matto-Grosso ao Amazonas, Botanica* 67(Bot. 11): 91. 1922.

R. acuta (Fluegge) Hitchc. (*Agrostis brasiliensis* Spreng.; *Panicum acutum* (Fluegge) Raspail; *Panicum oxyanthum* Steud.; *Reimaria acuta* Fluegge; *Reimaria acuta* var. *glabrata* Döll; *Reimaria acuta* var. *villosa* Döll; *Reimaria brasiliensis* (Spreng.) Schltr.; *Reimarochloa acuta* (Fluegge) Kuhlm., nom. illeg., non *Reimarochloa acuta* (Fluegge) Hitchc.; *Reimarochloa brasiliensis* (Spreng.) Hitchc.)

Venezuela. Stoloniferous, prostrate, erect, nodes pubescent, leaf blades linear acute glabrous or pilose, leaf sheaths inflated, inflorescence exserted, racemes erect or deflexed, spikelets cleistogamous lanceolate acuminate glabrous or pilose, upper glume absent, along sandy riverbanks, flats, along rivers and streams, ponds and pond margins, see *Novi Proventus Hortorum Academicorum Halensis et Berolinensis* . 45. 1818, *Annales des Sciences Naturelles (Paris)* 5: 299. 1825, *Botanische Zeitung. Berlin* 10: 17. 1852, *Synopsis Plantarum Glumacearum* 1: 41. 1853, *Flora Brasiliensis* 2(2): 38. 1877 and *Contributions from the United States National Herbarium* 12(6): 198. 1909, *Comissão de Linhas Telegraficas, Botanica* 67(Bot. 11): 91. 1922.

R. brasiliensis (Spreng.) Hitchc. (*Agrostis brasiliensis* Spreng.; *Panicum oxyanthum* Steud.; *Reimaria brasiliensis* (Spreng.) Schltr.)

Brazil. See *Novi Proventus Hortorum Academicorum Halensis et Berolinensis* . 45. 1818, *Botanische Zeitung.*

Berlin 10: 17. 1852, *Synopsis Plantarum Glumacearum* 1: 41. 1853 and *Contributions from the United States National Herbarium* 12(6): 198. 1909.

R. oligostachya (Munro ex Benth.) Hitchc. (*Reimaria oligostachya* Munro ex Benth.)

U.S., Florida; the Caribbean. See *Journal of the Linnean Society, Botany* 19: 34. 1881 and *Contributions from the United States National Herbarium* 12(6): 199. 1909.

Reimbolea Debeaux

See *Revue de Botanique, Bulletin Mensuel* 8: 266. 1890 and *Genera Graminum* 376. 1986.

Reitzia Swallen

Named for the Brazilian botanist Padre Raulino Reitz, 1919-1990, Jesuit, author and editor of *Flora Ilustrada Catarinense*. Conselho Nacional de Pesquisas. Instituto Brasileiro de Desenvolvimento Florestal. Herbário "Barbosa Rodrigues." Itajaí, Brazil 1965-1988. See *Candollea* 46: 418. 1991; *Taxon* 42: 930. 1993; *Darwiniana* 37(1-2): 157. 1999; *Harvard Pap. Bot.* 4(1): 275. 1999.

One species, Brazil. Bambusoideae, Oryzodae, Olyreae, or Bambusoideae, Olyreae, Olyrinae, perennial, herbaceous, unarmed, unbranched, densely tufted, leafy, small, clump-forming, rhizomes pachymorph, plants monoecious, sexes mixed in the same inflorescence, inflorescence raceme-like, 2-5 female spikelets with 1-2 male spikelets, all the fertile spikelets unisexual, 2 glumes coriaceous, lemma of male spikelets 3- to 5-nerved, palea present, stamens absent, male florets 3-staminate, 2 plumose stigmas, in forest, shade, similar to *Olyra* L., type *Reitzia smithii* Swallen, see *Sellowia* 7: 7-8. 1956, *American Bamboos* 314-316. 1999, *Contributions from the United States National Herbarium* 39: 109. 2000, *J. Amer. Bamboo Soc.* 18(1): 7-18. 2004.

Species

R. smithii Swallen (for L.B. Smith)

Brazil. Female spikelet lanceolate, glumes acuminate, lemma cartilaginous, see *Flora Ilustrada Catarinense* 1(Gram.): 1-435. 1981.

in Brazil: capim-zebra

Relchela Steud. = *Lechlera* Griseb. (Iridaceae), *Lechlera* Steud.

An anagram of *Lechlera* Steud.

Dedicated to the German botanist Wilibald (Willibaldus) Lechler, 1814-1856, naturalist, pharmacist, explorer, 1850-1855 Chile, author of *Berberides Americae australis*.

[Edited by G. Zeller.] Stuttgartiae 1857, see J.H. Barnhart, *Biographical notes upon botanists*. 2: 357. 1965.

One species, Chile, Argentina. Pooideae, Poeae, Aveninae, or Pooideae, Poodae, Aveneae, perennial, herbaceous, unbranched, rhizomatous, stoloniferous, auricles absent, ligule an unfringed membrane, plants bisexual, contracted inflorescence paniculate, spikelets pedicellate and imbricate, 2 glumes subequal or unequal, lemmas rounded awnless, palea coriaceous, 2 free and membranous lodicules, 3 stamens, ovary hairy on top, 2 stigmas, cleistogamous and chasmogamous, forest, shade, woodland margins, linked with *Helictotrichon*, confused with *Calamagrostis* or *Stipa*, type *Relchela panicoides* Steud., see *Species Plantarum* 1: 55, 61. 1753, *Synopsis Plantarum Glumacearum* 1: 101. 1855 [1854] and *Journal of the Arnold Arboretum* 22: 209-218, pl. 1. 1941, E.G. Nicora & Z.E. Rúgolo de Agrasar, *Los generos de Gramineas de America Austral*. Editorial Hemisferio sur S.A. Buenos Aires 1987, *Contributions from the United States National Herbarium* 48: 421, 602. 2003.

Species

R. panicoides Steud. (*Agrostis asperula* Phil.; *Agrostis coralensis* Phil.; *Agrostis limonias* Phil.; *Panicum oligostachyum* Steud.)

Chile. Panicle contracted, spikelets 1- to 2-flowered, glumes membranous, margins of lemma covering the palea, see *Synopsis Plantarum Glumacearum* 1: 97, 101. 1854, *Linnaea* 29(1): 87. 1857-1858, *Linnaea* 33(3-4): 286. 1864 and *Gayana, Botánica* 54(2): 91-156. 1997.

Rendlia Chioyenda = *Microchloa* R. Br.

After the British (b. London) botanist Alfred Barton Rendle, 1865-1938 (d. Surrey), traveler, plant collector, in 1888 a fellow of the Linnean Society, keeper of the Botany Dept. of the British Museum (Natural History), 1923-1927 president of the Linnean Society, 1909 fellow of the Royal Society, editor of the *Journal of Botany*. See Alfred Barton Rendle and al., "Catalogue of the Plants collected by Mr. and Mrs. P.A. Talbot in the Oban District of South Nigeria." *British Museum Trustees, Natural History*. [For the English botanist Spencer Le Marchant Moore, 1850-1931, was co-author.] London 1913; J.H. Barnhart, *Biographical notes upon botanists*. 3: 144. 1965; T.W. Bossert, compilation, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 329. Boston, Mass. 1972; S. Lenley et al., *Catalog of the manuscript and archival collections and index to the correspondence of John Torrey*. Library of the New York Botanical Garden. 342. 1973; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. 1917-1933; Elmer Drew Merrill, *Contr. U.S. Natl. Herb.* 30(1): 253-254. 1947 and *Bernice P. Bishop Mus. Bull.* 144: 157. 1937; Fawcett et Rendle, *Flora of Jamaica*. 1910-1936; William Philip Hiern (1839-1925), *Catalogue of the African Plants Collected by*

F. Welwitsch in 1853-61. London 1896-1901; R. Zander, F. Encke, G. Buchheim & S. Seybold, *Handwörterbuch der Pflanzennamen*. 14 Aufl. Stuttgart 1993; M. Hadfield et al., *British Gardeners: A Biographical Dictionary*. London 1980; Gilbert Westacott Reynolds, *The Aloes of South Africa*. Rotterdam 1982.

One species, eastern tropical and southern Africa. Chloridoideae, Cynodonteae, Chloridinae, perennial, herbaceous, short, unbranched, unarmed, densely tufted, cushion-like, leaves mostly basal, auricles absent, ligule a fringed membrane, old leaf sheaths fibrous, leaf blade folded and wiry, plants bisexual, inflorescence a single spike, spikelets solitary, incomplete florets distal to the female fertile florets, lower floret bisexual, upper floret male or sterile, 2 glumes more or less equal, glumes longer than florets, upper glume 1-nerved, palea present or absent, 2 free and fleshy lodicules or sometimes absent, 3 stamens, ovary glabrous, ovary suppressed in the upper floret, 2 dark stigmas, open areas, shallow soils, savannah, grasslands, well-drained sandy soils, type *Rendlia obtusifolia* Chiov., see *Prodromus Florae Novae Hollandiae* 208. 1810, *Révision des Graminées* 1: 92. 1829, *Bulletin de l'Herbier Boissier* 7(1): 25. 1899 and *Annali di Botanica* 13: 53-55. 1914, *Bulletin de la Société Botanique de Belgique* 96: 128. 1963, *Kew Bulletin* 37: 419. 1982, *Kew Bulletin* 40(4): 90-91. 1985, Watson and Dallwitz, *The Grass Genera of the World*. 817-818. 1994, *Bothalia* 24(1): 92-96. 1994, *Contributions from the United States National Herbarium* 41: 137, 141. 2001.

Species

R. altera (Rendle) Chiov. (*Harpechloa altera* Rendle; *Microchloa altera* var. *nelsonii* Stapf; *Rendlia nelsonii* (Stapf) Chiov.)

Tropical Africa. Perennial, tufted, wiry, leaf sheaths persistent and woolly when old, ligule a fringed membrane, spikelets with 2 florets, relatively unpalatable, grazed, see *Flora Capensis* 7: 637. 1900, *Annali di Botanica* 13: 54. 1914.

in English: Mahem's crest (*mahem* is a name for the crowned crane), toothbrush grass

in South Africa: kleinrolblaar

Rettbergia Raddi = *Chusquea* Kunth

Bambusoideae, Bambuseae, Chusqueinae, type *Rettbergia bambusoides* Raddi, see *Journal de Physique, de Chimie, d'Histoire Naturelle et des Arts* 95: 151. 1822, *Synopsis Plantarum* 1: 254. 1822, *Agrostografia Brasiliensis* 17-18, t. 1, f. 1. Lucca 1823, *Linnaea* 9(4): 467, 489. 1834, *Flora Brasiliensis* 2(3): 196. 1880 and *Ergebnisse der Botanischen Expedition nach Südbrasilien* 1: 20. 1906, *Denkschr. Kaiserl. Akad. Wiss., Math.-Naturwiss. Kl.* 79: 81. 1908, *Brittonia* 48(2): 250. 1996, *The Bamboos* 3: 33-44. 1997, *Contributions from the United States National Herbarium* 39: 36-52, 109. 2000.

Reynaudia Kunth

Named for A.A. Reynaud, b. 1804, botanical collector in Burma, Cape. See 1829 Collection Blossville/Reynaud, *Expédition de la Gabarre La Chevette*, Indian Ocean, 1827-1828.

One species, West Indies, the Caribbean, Cuba. Panicoideae, Panicodae, Paniceae (Arthropogoneae), or Panicoideae, Paniceae, Arthropogoninae, perennial, herbaceous, unbranched, tufted, leaves basal, auricles absent, plants bisexual, contracted inflorescence paniculate, spikelets pedicellate and flattened, 2 florets, lower floret present, 2 membranous glumes nerved and awned, lower lemma mucronate, palea absent, 2 stamens, type *Reynaudia filiformis* (Spreng. ex Schult.) Kunth, savannah, prairies, open areas, slopes, see *Flora Atlantica* 1: 66. 1798 [1800], *Révision des Graminées* 1: 72, 195. 1829-1830 and *Ann. Missouri Bot. Gard.* 88: 351-372. 2001, *Contributions from the United States National Herbarium* 46: 542, 544. 2003.

Species

R. filiformis (Spreng. ex Schult.) Kunth (*Polypogon cubensis* A. Rich.; *Polypogon filiformis* Spreng. ex Schult.)

West Indies, the Caribbean. Densely tufted, lower glume narrowly oblong and bilobed, see *Mantissa* 2: 182. 1824, *Révision des Graminées* 1: 195. 1830, *Historia Fisica Politica y Natural de la Isla de Cuba*, *Botanica* 11: 313. 1850 and *Genera Graminum* 300-301. 1986.

Rhabdochloa Kunth

Orthographic variant of *Rabdochloa* P. Beauv.

See *Mémoires du Muséum d'Histoire Naturelle* 2: 73. 1815.

Rhachidospermum Vasey = Jouvea E. Fourn.

From the Greek *rhachis* "rachis, axis" and *sperma* "a seed."

Chloridoideae, Eragrostideae, type *Rhachidospermum mexicanum* Vasey, see *Bulletin de la Société Botanique de Belgique* 15(3): 475-476. 1876, *Botanical Gazette* 15: 106, 110, t. 12. 1890, *Bulletin of the Torrey Botanical Club* 23: 143. 1896 and *Bulletin Torrey Botanical Club* 66: 315-325. 1939, *Die natürlichen Pflanzenfamilien, Zweite Auflage* 14d: 168. 1956, *Brittonia* 23(3): 293-324. 1971, *Ceiba* 19(1): 1-118. 1975, *Fieldiana: Botany, New Series* 4: 1-608. 1980, *Flora Novo-Galiciana* 14: 1-436. 1983, *Memoir San Diego Society of Natural History* 16: 1-66. 1989, *Flora Mesoamericana* 6: 258-259. 1994, *Contributions from the United States National Herbarium* 41: 129, 192. 2001, *Flora of Ecuador* 68: 13-14. 2001.

Rhampholepis Stapf = Sacciolepis Nash

Greek *rhamphos* "a beak" and *lepis* "a scale."

Paniceae, type *Sacciolepis curvata* (L.) Chase, see *Manual of the Flora of the Northern States and Canada* 89. 1901, *Proceedings of the Biological Society of Washington* 21: 8. 1908, *Flora of Tropical Africa* 9: 15. 1917.

Rhaphis Lour. = Chrysopogon Trin., Rhaphis Walp. (Arecaceae)

From the Greek *rhaphis* "a needle."

Panicoideae, Andropogoneae, Sorghinae, type *Rhaphis trivialis* Lour., see *Species Plantarum* 2: 1045. 1753, *Flora Cochinchinensis* 538, 552-553. 1790, *Fundamenta Agrostographiae* 187-188. 1820, *Annales Botanicae Systematicae* 3: 471. 1852, *Die Natürlichen Pflanzenfamilien* 2(2): 28. 1887 and *Boissiera*. 9: 282, 289. 1960, *Contributions from the United States National Herbarium* 46: 159-161, 544-545. 2003.

Rheochloa Filg., P.M. Peterson & Y. Herrera

Alluding to the flightless bird, common *Rhea*, also called *nandu*, after which the type locality of the genus is named.

One species, Brazil. Chloridoideae, Cynodonteae, perennial, leaf blades lanceolate, ligule a fringed membrane, plants bisexual, 2 glumes, 3 stamens, ovary glabrous, 2 stigmas, type *Rheochloa scabriflora* Filg., P.M. Peterson & Y. Herrera, see *Syst. Bot.* 24(2): 123-127, f. 1-3. 1999, *Contributions from the United States National Herbarium* 41: 192. 2001.

Species

R. scabriflora Filg., P.M. Peterson & Y. Herrera

Central Brazil. Herbaceous, decumbent, weak, internodes hollow, grassland, savannah, scrub forest, chaparral.

Rhiniachne Steud. = Thelepogon Roth ex Roemer & Schult.

Greek *rhine* "a file, rasp" or *rhis*, *rhinos* "snout, nose" and *achne* "chaff, glume." Andropogoneae, in syn. sub *Jardinea abyssinica*, see *Flora Aegyptiaco-Arabica* 178. 1775, *Systema Vegetabilium* 2: 46, 788. 1817, *Novae Plantarum Species* 62. 1821, *Gramineae* 67-68. 1841, *Nova Acta Phys. Med. Acad. Caes. Leop. Carol. Nat. Cur.* 19(Suppl. 1): 199-200. 1843, *Tentamen Florae Abyssinicae ...* 2: 470. 1850, *Synopsis Plantarum Glumacearum* 1: 360. 1854 and *Petite Flore de l'Ouest-Africain* 410. 1954.

Rhipidocladum McClure

From the Greek *rhipis*, *rhipidos* “a bellows, a lady’s fan, a fan” and *klados* “branch.”

About 10/17-20 species, Mexico to Brazil, Bolivia, Argentina. Bambusoideae, Bambuseae, Arthrotyliidiinae, or Bambusoideae, Bambusodae, Bambuseae, perennial, sympodial, woody, shrubby, tree or scrambler, hollow, branched, fan-shaped branch clusters, unarmed, caespitose, slender, erect, more or less scandent, climbing, arching, viny, drooping, blade of culm-sheath not constricted at base, midculm nodes with subsidiary branchlets, stiff and erect blades, plants bisexual, inflorescence determinate, raceme loose and unilateral, spikelets single more or less crowded, awned or unawned, 2-3 unequal glumes, palea 2-keeled, 0-3 lodicules, 3 stamens, ovary glabrous, 2 stigmas, savannah, forest, lowland forest, stream banks, moist forests, jungle, secondary vegetation, montane, páramos, montane evergreen forest, along roadsides, wet slopes, semideciduous broadleaf forest, related to *Merostachys*, type *Rhipidocladum armonicum* (Parodi) McClure, see *Flora Boreali-Americana* 1: 73. 1803, *Bambuseae* 27. 1839 and *Journal of the Washington Academy of Sciences* 32(6): 167, f. 1. 1942, *Smithsonian Contributions to Botany* 9: 1-148. 1973, *Ceiba* 19(1): 1-118. 1975, *Phytologia* 37(4): 317-407. 1977, *Fieldiana, Botany, New Series* 4: 1-608. 1980, *Flora Novogaliciana* 14: 1-436. 1983, *Annals of the Missouri Botanical Garden* 72(2): 272-276. 1985, *Annals of the Missouri Botanical Garden* 77(1): 125-201. 1990, *Flora of the Guianas. Series A, Phanerogams* 551-556. 1990, *Novon* 1(2): 76-87. 1991, *American Journal of Botany* 78(9): 1260-1279. 1991, *Cuscatlania* 1(6): 1-29. 1991, *Novon* 2(2): 81-110. 1992, *Ruizia* 13: 1-480. 1993, *Systematic Botany* 18(1): 80-99. 1993, *Flora Mesoamericana* 6: 199-201. 1994, *American Bamboos* 190-194. 1999, William T. Pockman & John S. Sperry, “Vulnerability to xylem cavitation and the distribution of Sonoran Desert vegetation.” *Am. J. Bot.* 87: 1287-1299. 2000, *Contributions from the United States National Herbarium* 39: 109-111. 2000, Laura L. Jaquish & Frank W. Ewers, “Seasonal conductivity and embolism in the roots and stems of two clonal ring-porous trees, *Sassafras albidum* (Lauraceae) and *Rhus typhina* (Anacardiaceae).” *Am. J. Bot.* 88: 206-212. 2001, *Botanical Journal of the Linnean Society* 138(1): 45-55. Jan 2002 [Cauline anatomy of native woody bamboos in Argentina and neighbouring areas: epidermis].

Species

R. abregoense Londoño & L.G. Clark (*Rhipidocladum abregoensis* Londoño & L.G. Clark)

Colombia. See *Novon* 8(4): 419, f. 5. 1998.

R. ampliflorum (McClure) McClure (*Arthrotylidium ampliflorum* McClure)

Venezuela. See *Journal of the Washington Academy of Sciences* 32(6): 167, f. 1. 1942, *Smithsonian Contributions to Botany* 9: 105. 1973.

R. angustiflorum (Stapf) McClure (*Arthrotylidium angustiflorum* Stapf)

Tropical America. See *Bulletin of Miscellaneous Information Kew* 1913: 268. 1913, *Smithsonian Contributions to Botany* 9: 105. 1973.

R. bartlettii (McClure) McClure (*Arthrotylidium bartlettii* McClure) (after the American botanist Harley Harris Bartlett, 1886-1960, professor of botany, biologist, traveler and botanical explorer (Southeast Asia, Mexico, Central America and Argentina), plant collector, author of “The Concept of the genus.” *Bull. Torrey Bot. Club.* 67: 349-389. 1940, “Sumatran plants collected in Asahan and Karoland, with notes on their vernacular names.” *Pap. Mich. Acad. Sci.* 6: 1-66. 1926, “The Batak lands of North Sumatra, from the standpoint of recent American botanical collections.” *Nat. Appl. Sci. Bull.* 4: 211-323. 1935. See *Asa Gray Bull.* n.s. 3: 291-561. 1961; J.H. Barnhart, *Biographical notes upon botanists.* 1: 131. 1965; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection.* 27. 1972; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico.* 115. Philadelphia 1964; S. Lenley et al., *Catalog of the manuscript and archival collections and index to the correspondence of John Torrey.* Library of the New York Botanical Garden. 24. 1973; Ethelyn Maria Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University.* Cambridge, Mass. 1917-1933; J. Ewan, editor, *A Short History of Botany in the United States.* New York and London 1969; R. Zander, F. Encke, G. Buchheim & S. Seybold, *Handwörterbuch der Pflanzennamen.* 14. Aufl. Stuttgart 1993; Irving William Knobloch, compilation, “A preliminary verified list of plant collectors in Mexico.” *Phytologia Memoirs.* VI. Plainfield, N.J. 1983)

Mexico, Guatemala, Belize. Erect, climbing, arching, slender, scandent, sprawling, shrubby, clumped, forest, riverbanks, deciduous forest, see *Phytologia* 5(1): 81. 1954, *Smithsonian Contributions to Botany* 9: 105. 1973.

R. clarkiae R.W. Pohl (named for L.G. Clark)

Costa Rica. Erect, climbing, arching, drooping, slender, scandent, clambering, sprawling, shrubby, densely clumped, internodes hollow, wet forest, see *Annals of the Missouri Botanical Garden* 72(2): 272, f. 1a-e. 1985.

R. geminatum (McClure) McClure (*Arthrotylidium geminatum* McClure)

Venezuela, Colombia. Erect, arching at tip, hanging over, stiff, densely clumped, heavy, woody, tough, twin nodes, internodes hollow, paired spikelets, culms filled with water,

1 elongated internode followed by a very short internode, fascicles of branches from the nodes, páramos, montane forest, pastures, see *Journal of the Washington Academy of Sciences* 32(6): 169, f. 2. 1942, *Smithsonian Contributions to Botany* 9: 105. 1973, *American Journal of Botany* 78(9): 1271. 1991.

in Colombia: popo

in Venezuela: tunda

R. harmonicum (Parodi) McClure (*Arthrostylidium harmonicum* Parodi)

Colombia, Bolivia, Mexico, Ecuador. Unarmed, arching, leaf blades linear or linear-ovate acuminate, bilateral raceme, each raceme with 4-8 spikelets, rachis zigzag, 2-3 glumes acute, 1-2 lemmas obtuse sterile, moist wood, see *Physis. Revista de la Sociedad Argentina de Ciencias Naturales* 19: 479, f. 1. 1944, *Smithsonian Contributions to Botany* 9: 101, 105, f. 42. 1973.

R. longispiculatum Londoño & L.G. Clark

Colombia. Woody, forming large colonies, forest, slopes, see Volkmar Vareschi (1906-1991), *Flora de Los Páramos de Venezuela*. Universidad de Los Andes. Merida - Venezuela 1970, *American Journal of Botany* 78(9): 1272. 1991, Karl Weidmann, *Páramos venezolanos*. Caracas 1991.

R. martinezii Davidse & R.W. Pohl (named for the Mexican botanist Esteban Martínez Soto, botanical collector. See *Listados florísticos de Mexico*. 22, Region de Calakmul, Campeche / Esteban Martínez, Mario Sousa S., Clara Hilda Ramos Alvarez. Mexico City: Universidad Nacional Autónoma de México, Instituto de Biología, 2001; *Fl. Neotrop. Monogr.* 52: 154. 1990; *Acta Bot. Mex.* 18: 25. 1992; *Novon* 4: 123. 1994; *Sida* 18: 227. 1998; *Harvard Pap. Bot.* 5(2): 408. 2001; *Acta Bot. Hung.* 45(1-2): 2. 2003)

Mexico. Erect, montane forest, see *Novon* 2(2): 90, f. 4. 1992.

R. maxonii (Hitchc.) McClure (*Arthrostylidium maxonii* Hitchc.; *Rhipidocladum* aff. *maxonii* (Hitchc.) McClure) (after the American botanist William Ralph Maxon, 1877-1948, pteridologist, botanical collector in Costa Rica, Cuba, Guatemala, Jamaica, Nicaragua, Panama, United States of America, his writings include *A Study of Certain Mexican and Guatemalan Species of Polypodium*. 1903, *Studies of Tropical American Ferns*. 1908, "Studies of tropical American ferns. No. 4." *Contr. U.S. Natl. Herb.* 17: 133-179. 1913, "Report upon a collection of ferns from western South America." *Smithsonian Misc. Collect.* 65(8): 1-12. 1915, "Studies of tropical American ferns. No. 6." *Contr. U.S. Natl. Herb.* 17: 541-608. 1916, "The lip-ferns of the southwestern United States related to *Cheilanthes myriophylla*." *Proc. Biol. Soc. Wash.* 31: 139-152. 1918, *New Selaginellas from the Western United States*. City of Washington 1920 and *Pteridophyta of Porto Rico and the Virgin Islands*. [New York] 1926, with Charles Alfred Weatherby

(1875-1949) wrote "Some species of *Notholaena*, new and old. I. The group of *Notholaena nivea*." *Contr. Gray Herb.* 127: 3-15. 1939. See *Phytologia* 52: 230. 1982; J.H. Barnhart, *Biographical notes upon botanists*. 2: 466. 1965; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. University of Pennsylvania Press, Philadelphia 1964; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 258. 1972; S. Lenley et al., *Catalog of the manuscript and archival collections and index to the correspondence of John Torrey*. Library of the New York Botanical Garden. 283-284. 1973; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. 1917-1933; J. Ewan, editor, *A Short History of Botany in the United States*. 100. New York and London 1969; Thomas Henry Kearney (1874-1956), *Leaflet. Western Bot.* 8: 277-278. 1958; R. Zander, F. Encke, G. Buchheim & S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993)

Guyana, Costa Rica. Erect, arching, woody, vining, weak, hollow, delicate, loosely tufted, rhizomes pachymorph sympodial, forming large colonies or tangled masses, forest, forest floor, see *Proceedings of the Biological Society of Washington* 40: 80. 1927, *Smithsonian Contributions to Botany* 9: 105. 1973.

R. neumannii Sulekic, Rúgolo & L.G. Clark (*Rhipidocladum neumannii* Sulekic, Rúgolo & L.G. Clark)

Argentina, Bolivia. Perennial, rhizomatous, erect, arching, scandent, scrambling, shrubby, slender, tapering, densely clumped, hollow stems, used for making whistles and flutes, forest, slopes, see *Bull. Brit. Mus. (Nat. Hist.), Bot.* 20: 24. 1990, *Darwiniana* 35: 155. 1998, *Darwiniana* 37(3-4): 317, 341, f. 1-2. 1999.

R. pacuarensis R.W. Pohl

Nicaragua, Costa Rica. Erect, climbing, forming colonies, see *Annals of the Missouri Botanical Garden* 72(2): 273, f. 1 f-i. 1985.

R. panamense R.W. Pohl

Panama. Erect, clambering, see *Annals of the Missouri Botanical Garden* 72(2): 275, f. 1 j-l. 1985.

R. parviflorum (Trin.) McClure (*Arthrostylidium trinii* Rupr.; *Arundinaria parviflora* Trin.; *Arundinaria trinii* Rupr. ex Döll)

Venezuela, Peru, Colombia, Brazil. Erect, weak, delicate, upper nodes more branched, lower nodes with 1-sided branching, see *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 3,1(6): 619. 1835, *Bambuseae* 29, t. 4. 1839, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles*

3(1): 119. 1839, *Fl. Bras.* 2(3): 174. 1880 and *Smithsonian Contributions to Botany* 9: 105. 1973.

R. pittieri (Hack.) McClure (*Arthrostylidium excelsum* Griseb.; *Arthrostylidium pittieri* Hack.; *Arundinaria excelsa* (Griseb.) Hack.; *Arundinaria pittieri* (Hack.) E.G. Camus)

Nicaragua, Mexico, Guatemala, Honduras. Erect, tufted, shrubby, crowded, densely clumped, arching, clambering, scrambling, hollow, drooping, slender to very slender, forming large colonies, forest, along roadsides, on slopes, used to make baskets and buildings, see *Flora of the British West Indian Islands* 529. 1864 and *Österreichische Botanische Zeitschrift* 53: 69, 75, 516. 1903, *Les Bambusées* 40. 1913, *Smithsonian Contributions to Botany* 9: 105. 1973.

in El Salvador: jumilile

in Mexico: jimba

R. prestoei (Munro) McClure (*Arthrostylidium prestoei* Munro; *Arundinaria prestoei* (Munro) Hack.) (after the British botanist Henry Prestoe, 1842-1923 (Sussex), gardener, traveler, plant collector, 1864-1886 Government Botanist Trinidad, author of *Report on the Coffee Cultivation in Dominica*. Trinidad 1875, *List of Duplicate Plants in the Government Botanic Gardens, November 1874*. Port of Spain: G.P.O. 1874, *Catalogue of Plants Cultivated in the Royal Botanical Gardens, Trinidad, from 1865 to 1870*. Port of Spain 1870. See J.H. Barnhart, *Biographical notes upon botanists*. 3: 108. 1965; Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 563. London 1994; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. 1917-1933; A. Henderson & G. Galeano, "Euterpe, Prestoea, and Neonicholsonia (Palmae: Euterpeinae)." *Flora Neotropica*. vol. 72. The New York Botanical Garden, New York 1996; Ignatz Urban (1848-1931), editor, *Symbolae Antillanae*. Berlin 1902)

The Caribbean. See *Bulletin of Miscellaneous Information Kew* 1895: 186. 1895 and *Österreichische Botanische Zeitschrift* 53: 516. 1903, *Smithsonian Contributions to Botany* 9: 106. 1973.

R. racemiflorum (Steud.) McClure (*Arthrostylidium racemiflorum* Steud.; *Arundinaria racemiflora* (Steud.) Hack.; *Merostachys racemiflora* (Steud.) E. Fourn.; *Rhipidoctadum parviflorum* (Trin.) McClure)

Central Panama, Venezuela, Bolivia, Suriname, the Caribbean, Mexico, Guatemala. Erect, woody, caespitose, arching, clambering, scrambling, trailing, drooping, vinelike bamboo, hollow, smooth, 60-80 branches per node, forming large colonies, sympodial rhizomes, leaf blades lanceolate, inflorescence shortly racemose with 10 spikelets per raceme, spikelets crowded and unawned, sterile lemma solitary, ornamental, handicrafts, fences, forest, savannah, sandy or stony soils, forest floor, see *Systema Vegetabilium, editio decima sexta* 1: 132, 249. 1824, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg*.

Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles 3,1(6): 619. 1835, *Synopsis Plantarum Glumacearum* 1: 336. 1854, *Mexic. Pl.* 2: 131. 1886 and *Österreichische Botanische Zeitschrift* 53: 516. 1903, *Smithsonian Contributions to Botany* 9: 105-106. 1973, *American Journal of Botany* 78(9): 1275. 1991, H. Cochard, F.W. Ewers & M.T. Tyree, "Water relations of a tropical vinelike bamboo (*Rhipidoctadum racemiflorum*): root pressures, vulnerability to cavitation and seasonal changes in embolism." *Journal of Experimental Botany* 45(277): 1085-1089. 1994, *Darwiniana* 37(3-4): 317, 341, f. 1-2. 1999.

in Bolivia: tacuarilla

in Mexico: canutillo, chiquilla, chiquión, chiquita, gui-yaa, otate, otatillo

R. sibilans Davidse, Judz. & L.G. Clark

Venezuela. Woody, smooth, hollow, caespitose, clumped, narrow foliage leaf blades, spikelets terminal and awned, used for making whistles, see *Novon* 1(2): 84, f. 5, 6. 1991.

Rhizocephalus Boiss.

From the Greek *rhiza* "root" and *kephale* "head," referring to the shortly pedicellate spikelets.

Two species, Asia central and southwest, eastern Mediterranean. Pooideae, Poeae, Aveneae, annual, herbaceous, short to dwarf, leaves basal, auricles absent, ligule an unfringed membrane, plants bisexual, contracted inflorescence sessile, panicle capitate, 2 glumes subequal or equal, lemma coriaceous 5-nerved mucronate, palea well developed, lodicules absent, 2 stamens, ovary glabrous, 2 stigmas, caryopsis rostrate, open areas, dry and arid regions, similar to *Crypsis* and related to *Phleum*, type *Rhizocephalus orientalis* Boiss., see *Collectanea* 233. 1809, *Diagnoses plantarum orientalium novarum* 1(5): 68. 1844 and *Flora of Syria, Palestine, and Sinai* 2: 717. 1933, *Flora URSS* 2: 127, 743. 1934.

Species

R. orientalis Boiss. (*Heleochloa orientalis* (Boiss.) Dinsm.; *Heleochloa turkestanica* Litw.; *Rhizocephalus turkestanicus* (Litw.) Roshev.)

Asia.

R. turkestanicus (Litw.) Roshev. (*Heleochloa turkestanica* Litw.; *Rhizocephalus orientalis* Boiss.)

Eurasia. Glumes acute, lemma keeled.

Rhombolytrum E. Desv. = *Rhombolytrum* Link

Orth. var., see *Flora Chilena* 6: 387. 1854.

Rhombolythrum Airy Shaw

See *Rhombolythrum* Link.

Rhombolythrum Link = *Gymnachne* Parodi,
Rhomboelythrum E. Desv.

Greek *rhombos* and *elytron* "sheath, scale, husk," lemmas broadly lanceolate or rhomboid.

About 2-3 species, South America, Uruguay, southern Brazil, Chile. Pooideae, Poeae, Brizinae, or Pooideae, Poodae, Poeae, perennial, herbaceous, unbranched, tufted, rhizomatous, auricles absent, ligule an unfringed membrane, plants bisexual, panicle loosely contracted, spikelets pedicellate and imbricate, several flowered, short rachilla, 2 glumes subequal, lemmas keeled and dorsally compressed, palea present, 2 free and membranous lodicules, 1 stamen, ovary glabrous, 2 stigmas, cleistogamous or chasmogamous, stony places, slopes, open areas, sometimes treated as a synonym of *Poidium*, type *Rhombolythrum rhomboideum* Link, see *Species Plantarum* 1: 67, 70. 1753, *Prodromus Florae Novae Hollandiae* 182. 1810, *Hortus Regius Botanicus Berolinensis* 2: 296. 1833, *Flora Chilena* 6: 387, t. 81, f. 1. 1854, *Linnaea* 33(3-4): 293. 1864, *Die Natürlichen Pflanzenfamilien* 2(2): 68. 1887, *U.S. Department of Agriculture. Division of Botany. Bulletin* 12(2): t. 33. 1891 and *Manual of the Flora of the Northern States and Canada* 129. 1901, *Notas del Museo de la Plata, Botánica* 3: 29, 30, f. 4. 1938, *Darwiniana* 23: 298-302. 1981, *Contributions from the United States National Herbarium* 48: 381, 602-603. 2003.

Species

R. monandrum (Hack.) Nicora & Rúgolo (*Briza bidentata* Roseng., B.R. Arrill. & Izag.; *Briza monandra* (Hack.) Pilg.; *Eragrostis monandra* Hack.)

Brazil. See *Repertorium Specierum Novarum Regni Vegetabilis* 7: 320. 1909, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 10(97): 725. 1929, *Boletín de la Facultad de Agronomía de Universidad de la República, Montevideo* 105: 24. 1968, *Darwiniana* 23: 302. 1981.

R. rhomboideum Link (*Poa tumidula* Steud.; *Rhombolythrum quinquevenium* Phil.)

Chile. See *Hortus Regius Botanicus Berolinensis* 2: 296. 1833, *Synopsis Plantarum Glumacearum* 1: 258. 1854, *Linnaea* 33(3-4): 293. 1864.

Rhynchelythrum Nees = *Melinis* P. Beauv.

See *Rhynchelythrum* Nees.

Rhynchelythrum Nees = *Melinis* P. Beauv.,
Monachyron Parl., *Monachyron* Parl. ex Hook.

From the Greek *rhynchos* "horn, beak, snout" and *elytron* "sheath, cover, scale, husk," referring to the upper glume and lower lemmas.

About 14-37 species, tropical Africa, Madagascar, Arabia, Southeast Asia, Indochina. Panicoideae, Panicodae, Paniceae, Melinideae, rarely annual or mostly perennial, herbaceous, rhizomatous or stoloniferous, clumped, erect or ascending, often geniculate and often rooting at the lower nodes, branched or unbranched, ligule fringed, leaf blades narrow filiform linear, auricles present or absent, plants bisexual, inflorescence racemose or paniculate, finely branched panicle, spikelets short-stipitate and keeled, lower floret staminate or neuter, upper floret perfect, 2 glumes very unequal, reduced lower glume, second glume laterally swollen and beaked, upper glume 5-nerved awned or awnless, upper lemma laterally flattened, lower lemma tapering to a narrow beak, awned or awnless, palea present, 2 free and fleshy lodicules, 3 stamens, ovary glabrous, 2 stigmas, ornamental flowering panicle, weed species, often in open habitats, disturbed places, rainforest, open stony hillsides, savannah, grassland, a genus of closely related species, a difficult genus, sometimes referred to *Melinis* and *Tricholaena*, sometimes synonymized with *Melinis*, type *Rhynchelythrum dregeanum* Nees, see *Species Plantarum* 1: 54-55. 1753, *Essai d'une Nouvelle Agrostographie* 54, t. 11, f. 4. 1812, *Mantissa* 2: 8, 163. 1824, John Lindley, *A Natural System of Botany*. second edition. 378, 446. Tropical Africa. Variable, annual or sometimes perennial, short-lived, tufted or densely tufted, upright or ascending, open, usually much branched, erect or often geniculate and forming roots at the lower nodes, flimsy, frequently hairy on the lowermost internodes, leaf blade expanded or folded, leaf sheath loose and covered with bulbous hairs, ligule

stiffly hairy, softly hairy leaves long-acute and flat, inflorescence an open fluffy panicle cylindrical to ovoid, densely villous or densely silky pubescent spikelets, lower glume small with short hairs, upper glume densely covered with hairs, upper glume and lemma extend to form awns, bristly palea hyaline and keeled, weed species growing and spreading rapidly, hardy, ornamental and attractive when in flower, grown for fodder, young plants palatable and tender, mature plants woody and tough, commonly found in disturbed places, along roadsides, cliffs, stony soils, open scrubland, rocky areas, open rocky ground, on soil of low fertility, on shallow rocky soil, poor grasslands, field borders, cultivated areas, see *Species Plantarum. Editio quarta* 1: 322. 1797, *Essai d'une Nouvelle Agrostographie* 14, 54, 162, 177. 1812, *Systema Vegetabilium, editio decima sexta* 1: 315. 1825, *Flora Brasiliensis seu Enumeratio Plantarum* 2(1): 143. 1829, *Linnaea* 11(Litt.-Ber.): 129. 1837, *Flora* 24: 275. 1841, *Niger Flora* 191, 559. 1849, *Flora italiana, ossia descrizione delle piante ...* 1: 131. 1850, *Tentamen Florae Abyssinicae ...* 2: 445. 1850, *Annales Botanicae Systematicae* 3: 792-793. 1852, *Synopsis Plantarum Glumacearum* 1: 92-93, 120. 1854, *Queensland Grasses* 22. 1888, *Conspectus Florae Africae* 5: 769, 771. 1894, *Bulletin de l'Herbier Boissier* 2: App. 2: 96. 1894, *Hooker's Icones Plantarum* 24: t. 2374. 1895, *Revisio Generum Plantarum* 3(3): 363. 1898, *Catalogue of the African Plants Collected by Dr. F. Rhynchoryza Baillon

From the Greek *rhynchos* "horn, beak, snout" and *oryza* "rice," referring to the beaked lemma.

One species, Paraguay, Argentina. Ehrhartoideae, Oryzaceae, Oryzinae, or Bambusoideae, Oryzodae, Oryzaceae, perennial, herbaceous, narrow linear leaf blades, ligule an unfringed membrane, plants bisexual, inflorescence paniculate, spikelets pedicellate, glumes lacking or very reduced, fertile lemma herbaceous with a long beak, sterile lemmas

cuspidate broadly ovate, palea present, 2 membranous lodicules, usually 6 stamens, 2 stigmas plumose, found in swamps, damp areas, similar to *Oryza*, type *Rhynchoryza subulata* (Nees) Baill., see *Species Plantarum* 1: 333. 1753, Henri Ernest Baillon, 1827-1895, *Histoire des plantes*. 12: 291. Paris, London, Leipzig 1866-1895, *Bulletin Mensuel de la Société Linnéenne de Paris* 2: 1063. 1894 and *Die natürlichen Pflanzenfamilien, Zweite Auflage* 14d: 151. 1956, *Bol. Soc. Arg. J. Bot.* 89: 1967-1972. 2002.

Species

R. subulata (Nees) Baillon (*Oryza subulata* Nees)

Suriname, Uruguay, Paraguay, Brazil, Argentina. Caespitose, floating, see *Flora Brasiliensis seu Enumeratio Plantarum* 2: 518. 1829, *Bulletin Mensuel de la Société Linnéenne de Paris* 2: 1063. 1894 & D.A. Vaughan, *The Wild Relatives of Rice: A Genetic Resources Handbook*. International Rice Research Institute, Manila, Philippines 1994.

Rhytachne Desv. = *Lepturoopsis* Steud.

From the Greek *rhytis* "a wrinkle" and *achne* "chaff, glume."

About 10-12 species, tropical South America, tropical and southern Africa, Madagascar. Panicoideae, Andropogonodae, Andropogoneae, Rottboelliinae, rarely annual or perennial, variable, herbaceous, unbranched, tufted, auricles present or absent, leaf blades narrow or filiform, leaf sheaths glabrous and somewhat inflated, ligule an unfringed membrane, plants bisexual, inflorescence a single terminal raceme bearing paired spikelets, lower floret male or rarely sterile, upper floret bisexual, 2 glumes more or less equal, lower glume convex wingless, upper glume sometimes awned, palea present, 2 free and fleshy lodicules, 3 stamens, ovary glabrous, 2 dark stigmas, pedicellate spikelets often reduced or suppressed, forming thickets, open habitats, roadsides, moist places, temporarily waterlogged sites, in seasonally wet savannah, sandy beach, pans, riversides, grassland, riverbanks, streams, related to *Phacelurus*, type *Rhytachne rottboellioides* Desv. ex Ham., see *Mantissa Plantarum* 2: 164. 1767, *Mantissa Plantarum* 2: 301. 1771, *Supplementum Plantarum* 13, 114. 1781 [1782], *Methodus Plantas Horti Botanici ...* 207. 1794, *Prodromus Plantarum Indiae Occidentalis* xiv, 11-12. 1825, *Révision des Graminées* 1: 153. 1829, *Voyage autour du Monde* 2: 64, f. 14. 1829 [1831], *Synopsis Plantarum Glumacearum* 1: 357-358, 360. 1854, *Journal of the Linnean Society, Botany* 22: 533. 1887, *Die Natürlichen Pflanzenfamilien* 2(2): 25.

Species

R. furtiva Clayton

Upper Volta. Inflorescence axillary, lower glume winged, see *Kew Bulletin* 20: 258, f. 1. 1966.

R. glabra (Gledhill) Clayton (*Lepargochloa glabra* Gledhill)

Sierra Leone. See *Boletim da Sociedade Broteriana, ser. 2* 40: 65, f. 1, t. 1. 1966, *Kew Bulletin* 23: 295. 1969.

R. gonzalezii Davidse (*Manisuris loricata* (Trin.) Kuntze; *Rottboellia loricata* Trin.; *Sorghum bicolor* (L.) Moench)

Venezuela. Annual, tufted, erect, branched, sessile spikelet upper glume awned, marshy areas in savannah, see *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 2(3): 250. 1832, *Revisio Generum Plantarum* 2: 780. 1891 and *Brittonia* 36(4): 402-405, f. 1. 1984.

R. gracilis Stapf (*Rhytachne minor* Pilg.)

Tropical Africa. Annual, slender, lower floret barren, grazed by cattle when young, on sandy soil, shallow soils, see *Journal de Botanique (Morot)* 19: 98. 1905, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 54: 280. 1917.

R. guianensis (Hitcch.) Clayton (*Manisuris guianensis* Hitcch.)

South America. Perennial, tufted, erect, slender, glabrous, solid, branched, sessile spikelet upper glume awnless, lowland savannahs, wet soil, sandy places, see *Contributions from the United States National Herbarium* 22(6): 510, f. 86. 1922, *Kew Bulletin* 20: 262. 1966.

R. latifolia Clayton

South Africa, Tanzania. Perennial, rare, tufted, pedicel flattened, lower glume nerved winged, pedicellate spikelets reduced to a minute scale, shady places, streamsides, woodland pans, see *Kew Bulletin* 32(4): 770. 1978.

R. megastachya Jacq.-Fél.

French Guiana. See *Revue internationale de botanique appliquée et d'agriculture tropicale* 32: 552. 1952, *Kew Bulletin* 20: 262. 1966.

R. perfecta Jacq.-Fél.

French Guinea. The longer spikelets bisexual, lower glume winged, see *Journal d'Agriculture Traditionnelle et de Botanique Appliquée* 1(1-4): 41, t. 4. 1954.

R. robusta Stapf (*Rottboellia robusta* (Stapf) Keng)

Southern tropical Africa, Namibia. Perennial, rare, tufted, see *Flora of Tropical Africa* 9: 82. 1917, *Sinensia* 10: 306, 338. 1939.

R. rottboellioides Desv. ex Ham. (*Coelorachis loricata* (Trin.) Nash; *Manisuris loricata* (Trin.) Kuntze; *Mnesithea subgibbosa* (Winkl. ex Hack.) de Koning & Sosef; *Rhytachne benguellensis* Rendle; *Rhytachne caespitosa* (Baker) Bosser; *Rhytachne geminatosubulata* Duvign.; *Rhytachne mannii* Stapf; *Rhytachne rottboellioides* Desv.; *Rhytachne rottboellioides* var. *guineensis* Camus & Schnell; *Rhytachne subgibbosa* (Winkl. ex Hack.) Clayton; *Rottboellia caespitosa* Baker; *Rottboellia filifolia* C. Wright; *Rottboellia loricata* Trin.; *Rottboellia loricata* subsp. *subgibbosa* Winkl. ex Hack.; *Rottboellia rhytachne* Hack.; *Rottboellia setifolia* K. Schum.)

Tropical America and Africa. Perennial, rare, slender, densely tufted, leaf blades linear acuminate, terminal racemes, simple spikelet narrowly ovate oblong, florets sunken in rachis, rugose or smooth lower glume acuminate or bidenticulate, lower glume very variable, upper glume occasionally awned, pedicellate spikelets reduced, grazed by cattle when young, low grazing value, usually in swamps, seasonally wet grasslands, vleis, marshy grounds, swampy areas, grasslands, shallow soil, see *Prodromus Plantarum Indiae Occidentalis* 12. 1825, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 2(3): 250. 1832, *Anales de la Academia de Ciencias Medicas ...* 8: 209. Habana 1871, *Flora Brasiliensis* 2(3): 311, t. 71, f. 2. 1883, *Boletim da Sociedade Broteriana* 3: 136. 1885, *Journal of the Linnean Society, Botany* 22: 533. 1887, *Revisio Generum Plantarum* 2: 780. 1891, *Die*

Pflanzenwelt Ost-Afrikas C: 96. 1895, *Catalogue of the African Plants Collected by Dr. F. Welwitsch in 1853-61* 2(1): 138. 1899 and *North American Flora* 17(1): 85. 1909, *Flora of Tropical Africa* 9: 85. 1917, *Revue Générale de Botanique* 57: 591. 1950, *Bulletin de la Société Botanique de Belgique* 90: 187. 1958, *Kew Bulletin* 20: 261. 1966, *Adansonia: recueil périodique d'observations botanique, n.s.* 8: 516. 1968, *Blumea* 31(2): 292. 1986.

in Ghana: lipomale

in Guinea: sodorko

in Nigeria: iwa

in Sierra Leone: akek

R. subgibbosa (Winkl. ex Hack.) W.D. Clayton (*Mnesithea subgibbosa* (Winkl. ex Hack.) de Koning & Sosef; *Rhytachne rottboellioides* Desv. ex Ham.; *Rottboellia loricata* subsp. *glaberrima* Hack.; *Rottboellia loricata* Trin. subsp. *subgibbosa* Winkl. ex Hack.)

Brazil, Paraguay. Perennial, tufted or tussock, filiform leaf blades glabrous, inflorescence a single cylindrical raceme, sessile spikelet narrowly ovate glabrous awnless, lower glume smooth, pedicelled spikelet glabrous awnless, damp places, among rocks, campo rupestre, similar to *Rhytachne rottboellioides*, see *Prodromus Plantarum Indiae Occidentalis* 12. 1825, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 2(3): 250. 1832, *Flora Brasiliensis* 2(3): 311, t. 71, f. 2, 3. 1883 and *Kew Bulletin* 20: 261. 1966, *Blumea* 31(2): 292. 1986.

R. triaristata (Steud.) Stapf (*Lepturopsis triaristata* Steud.; *Rhytachne trisetata* Hack.; *Rottboellia triaristata* (Steud.) Roberty)

Tropical Africa. Annual, slender, a weed of arable fields and cultivated lands, palatable grazing, on disturbed sites, stream sides, see *Prodromus Plantarum Indiae Occidentalis* 11-12. 1825, *Synopsis Plantarum Glumacearum* 1: 357-358. 1854, *Monographiae Phanerogamarum* 6: 275. 1889 and *Flora of Tropical Africa* 9: 85. 1917, *Bulletin de l'Institut Française d'Afrique Noire* 22: 108. 1960, *Boissiera*. 9: 71. 1960, *Kew Bulletin* 32(4): 767-771. 1978.

in Nigeria: iwa

in Sierra Leone: foni yambei

Rhytidachne K. Schumann = *Rhytachne* Desv.

From the Greek *rhytis*, *rhytidós* "a wrinkle" and *achne* "chaff, glume."

Panicoideae, Andropogonodae, Andropogoneae, Rottboelliinae, see *Pflanzenw. Ost.-Afr.* 5(C): 96. 1895.

Richardsiella Elffers & Kennedy-O'Byrne

The genus dedicated to the amateur botanist Mary Alice Eleanor Richards (née Stokes), 1885-1977, collected African plants for Kew, author of *Checklist of the Flora of Mbala (Abercorn) and District*. Mbala 1969, see P.M. Benoit, *A Contribution to a Flora of Merioneth* [list of species] by Peter Benoit & Mary Richards. 2nd edition, revised Haverfordwest, West Wales Naturalists' Trust 1963. First published in *Nature in Wales* 7, 44-66, 92-111 and 146-166. 1961. See Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 581. 1994; Stafleu & Cowan, *Taxonomic literature*. 4: 769. Utrecht 1983.

One species, Sudan, Angola, tropical Africa. Chloridoideae, annual, wiry, unarmed, slender, filiform, tufted, ligule fringed, plants bisexual, inflorescence spicate and contracted, raceme rhachis terminating in a bristle, spikelets sessile imbricate, 2 unequal glumes deciduous and shortly awned, upper glume awned, lemmas 1-nerved, palea ciliate, lodicules present or absent, 2 stamens, ovary glabrous, 2 stigmas, dry regions, sandy places, open areas, a segregate from *Eragrostis*, type *Richardsiella eruciformis* Elffers & Kenn. O'Byrne, see *Kew Bulletin* 11: 455. 1957.

Species

R. eruciformis Elffers & Kenn.-O'Byrne

Zambia. Upper glume tubercled, lemmas margins ciliate, in seasonally damp depressions.

Riedelia Kunth = *Arundinella* Raddi,
Goldbachia Trin., *Riedelia* Cham.
(Verbenaceae), *Riedelia* Meisn. (Ericaceae),
Riedelia Oliv. (Zingiberaceae)

Panicoideae, Arundinelleae, in syn. sub *Goldbachia*, see *Neue Entdeckungen im ganzen Umfang der Pflanzenkunde* 2: 81. 1820, *Agrostografia Brasiliensis* 36-37, t. 1, f. 3. 1823, *Hortus Regius Botanicus Berolinensis* 1: 230. 1827, *Linnaea* 7: 240 (or 224). 1832, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 515. 1833, *Flora Brasiliensis* 7: 171-172. 1863, *Hooker's Icones Plantarum* 15: 15. 1883 and *Contributions from the United States National Herbarium* 46: 111-113, 242, 545-546. 2003.

Ripidium Trin. = *Erianthus* Michx.,
Ripidium Bernh. (Schizaeaceae), *Saccharum* L.

Rhipidion, the diminutive the Greek *rhipis*, *rhipidos* "a fan."

Panicoideae, Andropogoneae, Saccharinae, type *Ripidium ravennae* (L.) Trin., see *Species Plantarum* 1: 54. 1753, *Species Plantarum, Editio Secunda* 2: 1481. 1763, *Journal für die Botanik* 1800(2): 127. 1801, *Icones et Descriptiones*

Graminum Austriacorum 2: 2, t. 2. 1802, André Michaux, *Flora Boreali-Americana*. 1: 54-55. Paris 1803, *Fundamenta Agrostographiae* 169. 1820, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 2(3): 333. 1832 and *N. Amer. Fl.* 17: 90. 30 June 1909, *Lloydia* 21(3): 157-188. 1958, *Darwiniana* 23: 559-585. 1981, *Flora Mesoamericana* 6: 378-379. 1994, H.M. Longhi-Wagner, V. Bittich, M. das G. Lapa Wanderley & G.J. Shepherd, *Flora Fanerogamica do Estado de São Paulo* 1: 1-292. 2001, *Contributions from the United States National Herbarium* 46: 230-233, 546, 550-557. 2003.

Robynsiochloa Jacq.-Fél. = *Rottboellia* L.f.

After the Belgian botanist Frans Hubert Édouard Arthur Walter Robyns, 1901-1986, traveler and plant collector (Ivory Coast), from 1954 to 1964 president of the International Association for Plant Taxonomy, among his writings are *Flore agrostologique du Congo belge et du Ruanda-Urundi* ... Bruxelles 1929-1934, *Tentamen monographiae Vangueriae generumque affinium*. [in *Bull. Jard. Bot. Brux.* 11: 1-359. 1928] Bruxelles 1928 and "Essai de révision des espèces africaines du genre *Annona* L." *Bull. Soc. Bot. Belg.* 67: 7-50. 1934, co-author of *Flore générale de Belgique*. Bruxelles 1950, etc.; see J.H. Barnhart, *Biographical notes upon botanists*. 3: 166. 1965; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 334. 1972; S. Lenley et al., *Catalog of the manuscript and archival collections and index to the correspondence of John Torrey*. Library of the New York Botanical Garden. 351. 1973; F.N. Hepper & Fiona Neate, *Plant Collectors in West Africa*. 69. 1971.

One species, Tropical Africa. Panicoideae, Andropogonodae, Andropogoneae, Rottboelliinae, stoloniferous, erect or ascending, caespitose, herbaceous, branched, leaves flat, auricles absent, sheaths hispid to bristly, ligule an unfringed membrane, plants bisexual, the lower part of raceme bearing pairs of sessile and pedicellate spikelets, spikelets paired and compressed dorsiventrally, bisexual spikelets, upper floret bisexual, lower floret male or sterile, pedicellate spikelets reduced, male florets 3-staminate, 2 glumes more or less equal, lower glume 2-keeled, palea present, 2 lodicules free and fleshy, 3 stamens, ovary glabrous, 2 stigmas, shade species, fodder, itch grass, a serious and noxious weed of cultivated ground, found in swamps, dry soils, woodlands, rainforests, on tropical coastlines, in disturbed grounds, type *Robynsiochloa purpurascens* (Robyns) Jacq.-Fél., see *Supplementum Plantarum* 13, 114. 1781 [1782], *Fl. Coch.* 51. 1790 and *Contr. U.S. Natl. Herb.* 24: 201. 1925, *Flore Agrostologique du Congo Belge* 1: 66. 1929, *Blumea, Supplement* 3: 15, 17. 1946, *Journal d'Agriculture Tropicale* 7: 406. Paris 1960, H. Runemark, "A revision of *Parapholis* and *Monerma* (Gramineae) in the Mediterranean." in *Bot. Not.*

115: 1-17. 1962, *Feddes Repert.* 106: 169-171. 1995, *Harvard Pap. Bot.* 8: 63-65. 1996, *Contributions from the United States National Herbarium* 46: 546-548. 2003.

Species

R. goalparensis (Bor) Clayton (*Rottboellia goalparensis* Bor)

Africa. See *Indian Forest Records: Botany* 1(3): 100. 1939, *Kew Bulletin* 35(4): 817. 1981.

Roegneria Koch = *Elymus* L.

Pooideae, Triticeae, Hordeinae, type *Roegneria caucasica* K. Koch, see *Species Plantarum* 1: 83. 1753, *Linnaea* 21(4): 413. 1848 and *Claves Generum et Specierum Graminearum Primarum Sinicarum Appendice Nomenclatione Systematica* 183-184, 186-188. 1957, *Flora Illustralis Plantarum Primarum Sinicarum: Gramineae* 301, 352, 357, 366, 371, 373, 391, 398-399, 404-406, 408. 1959, *Journal of Nanjing Agricultural University* 1: 19, 22-23, 31, 43, 45, 64, 68, 72, 75-76, 79, 82. 1963, *Canad. J. Bot.* 42: 554. 1964, *Acta Botanica Yunnanica* 10: 139-146, 261-270. 1988, *Acta Botanica Yunnanica* 12: 57-66, 161-171. 1990, *Taxon* 41: 562-563. 1992, *Guihaia* 12(3): 222-228. 1992, *Acta Botanica Yunnanica* 14: 164-168. 1992, *Acta Phytotaxonomica Sinica* 30(4): 342-345. 1992, *Cytologia* 58: 187-193. 1993, *Acta Phytotaxonomica Sinica* 31: 393-398. 1993, *Taxon* 44: 611-612. 1995, *Guihaia* 18(1): 35-40. 1998, *Acta Pratacult. Sin.* 8(4): 23-28. 1999, *Plant Systematics and Evolution* 217: 215-220. 1999, *Acta Botanica Yunnanica* 22(2): 155-160. 2000, *Novon* 12(3): 424-429. 2002 [Nomenclatural novelties in Chinese *Elymus* (Poaceae, Triticeae)], *Contributions from the United States National Herbarium* 48: 279-307, 603-604. 2003.

Roemeria Zea ex Roem. & Schultes =

Diarrhena P. Beauv., *Roemeria* Medik.

(Papaveraceae), *Roemeria* Moench

(Amaranthaceae), *Roemeria* Thunb.

(Anacardiaceae)

For the Swiss botanist Johann Jakob Roemer (Römer), 1763-1819, physician and naturalist, studied at the Universities of Zürich and Göttingen, from 1797 to 1819 director of the Botanical Garden of the Naturforschende Gesellschaft Zürich, coeditor with Paul Usteri (1768-1831) of *Magazin für die Botanik*. Zürich 1787-1791, among his many works are *Scriptores de plantis hispanicis, lusitanicis, brasiliensibus*. Norimbergae [Nürnberg] 1796 and *Catalogus horti botanici societatis physicae turicensis*. Zürich 1802; see Paul Usteri (1768-1831), in *Annalen der Botanick.* 1(3): 15.

(July) 1792; J.H. Barnhart, *Biographical notes upon botanists.* 3: 169. 1965; Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch.* 769. 1852; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection.* 335. 1972; R. Zander, F. Encke, G. Buchheim & S. Seybold, *Handwörterbuch der Pflanzennamen.* 14 Aufl. 770f. 1993; E. Bretschneider, *History of European Botanical Discoveries in China.* Leipzig 1981; H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford.* 233-234. 1964; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University.* 1917-1933; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico.* 638. 1964; Jonas C. Dryander, *Catalogus bibliothecae historico-naturalis Josephi Banks.* London 1800; G. Murray, *History of the collections contained in the Natural History Departments of the British Museum.* 1: 177. 1904; Rodolfo E.G. Pichi Sermolli, "The publication of Roth's genera *Athyrium* and *Polystichum*." *Webbia.* 8(2): 437-442. 1952.

Pooideae, Diarrheneae, type *Roemeria zea* Roem. & Schult., see *Annalen der Botanick. ed. Usteri* 1(3): 15. 1792, *Methodus Plantas Horti Botanici ...* 191. 1794, *Nova Genera Plantarum* 130-131. 1798, *Flora Boreali-Americana* 1: 67, t. 10. 1803, *Essai d'une Nouvelle Agrostographie* 142, 160, 162, t. 25, f. 2. 1812, *Systema Vegetabilium* 1: 61, 287. 1817 and *Bulletin of the Torrey Botanical Club* 118: 128-136. 1991, *Contributions from the United States National Herbarium* 48: 269, 604. 2003.

Roshevitzia Tzvelev = *Diandrochloa* De Winter, *Eragrostis* Wolf

For the Russian botanist Roman (Romain) Julievich Roshevitz, 1882-1949, agrostologist; see J.H. Barnhart, *Biographical notes upon botanists.* 3: 180. 1965; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection.* 338. 1972.

Chloridoideae, Cynodonteae, or Chloridoideae, Eragrostideae, Eragrostidinae, type *Roshevitzia diarrhena* (Schult. & Schult. f.) Tzvelev, see *Genera Plantarum* 23. 1776, *Flora Japonica, ...* 51. 1784, *Flora Caroliniana, secundum ...* 80. 1788, *Icones et Descriptiones Graminum Austriaeorum* 4: 15. 1809, *Prodromus Florae Novae Hollandiae* 180. 1810, *Flora Indica; or Descriptions ...* 1: 337. 1820, *Synopsis Plantarum Glumacearum* 1: 268. 1854 and *Bothalia* 7(2): 387-389. 1960, *Acta Bot. Neerl.* 15: 157. 1966, *Bot. Zhurn. (Moscow & Leningrad)* 53: 311. 1968, *Novosti Sist. Vyss. Rast.* 7: 50. 1970[1971], *Contributions from the United States National Herbarium* 41: 66, 81-115, 192. 2001.

Rostraria Trinius = *Aegialina* Schult. & Schult.f., *Aegialitis* Trin., *Ktenosachne* Steud., *Lophochloa* Rchb., *Parodiochloa* A.M. Molina, *Poarion* Rchb., *Raimundochloa* A.M. Molina, *Wilhelmsia* K. Koch

Latin *rostrum*, *i* “the beak of a bird.”

About 5-10 species, temperate, Europe, Mediterranean, Middle East, Northwest India. Pooideae, Poaceae Aveninae (Koeleriinae), annual, caespitose, erect or creeping at the base, glabrous to hirsute, sheaths terete and pubescent, auricles absent, ligules membranous, leaves mostly basal, internodes hollow, plants bisexual, panicles contracted, spikelets solitary 1- to several-flowered, unequal glumes keeled, lemmas membranous keeled 5-nerved with a straight subapical awnlet, paleas mucronate or short awned, 3 stamens, 2 stigmas, weedy places, dry areas, disturbed sites, derived from *Koeleria* Pers., very close to *Trisetaria*, sometimes included in *Koeleria* Pers. and *Lophochloa* Rchb., see *Species Plantarum* 1: 63, 76. 1753, *Systema Naturae*, edition 12 94. 1757, *Flora Aegyptiaco-Arabica* lx, 27. 1775, *Synopsis Plantarum* 1: 97. 1805, *Fundamenta Agrostographiae* 127, 149, t. 9, 13. 1820, *Mantissa* 2: 13, 222. 1824, *Conspicuum Regni Vegetabilis* 51. 1828, *Flora Germanica Excursoria* 42. 1830, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Some 4 species, Old World tropics. Panicoideae, Andropogonodae, Andropogoneae, Rottboelliinae, annual, robust, erect or ascending, caespitose, herbaceous, branched, leaf blades linear flat, auricles absent, lower sheaths sharply hispid to bristly and irritating, ligule a short ciliate membrane, plants bisexual, inflorescence of single racemes axillary or terminal, pedunculated and solitary raceme flattened or cylindrical subtended by a spathe, the lower part of raceme bearing pairs of sessile and pedicellate spikelets always smooth, spikelets paired and awnless, sessile spikelet not globose, 2 florets, upper floret bisexual, lower floret of sessile spikelet male, pedicellate spikelets reduced, glumes more or less equal, lower glume papery or coriaceous, lemmas hyaline, upper lemma entire and awnless, palea present and hyaline, 2 lodicules free and fleshy, 3 stamens, ovary glabrous, 2 stigmas, compressed fruit, shade species, fodder, itch grass, a serious and noxious weed of cultivated ground, habitat variable, found in swamps, dry soils, woodlands, rainforests, on tropical coastlines, in disturbed grounds, some authorities place the genus within *Hemarthria* R. Br., type *Rottboellia exaltata* L.f., see *Mantissa Plantarum* 2: 164. 1767, *Introductio ad Historiam Naturalem* 233. 1777, *Supplementum Plantarum* 13, 114. 1781 [1782], *Flora Cochinchinensis* 1: 34, 51. 1790, *Supplementum Carpologicae* 1(1): 3, t. 181, f. 3. 1805, *Prodromus Florae Novae Hollandiae* 207. 1810, *Nouveau*

Throughout Old World tropics. Annual or perennial, fast growing, herbaceous to canelike, tufted, erect, robust, leafy, coarse, solid, simple or branched, stilt roots from the lower nodes, stems prickly, leaf sheaths hispid with sharp bristles, ligule membranous, leaves oblong with scabrous margins, inflorescence stiff and erect, spikes or racemes solitary and terminal, sessile spikelets oblong-elliptic, fertile florets sunk within the rhachis, pedicellate spikelets reduced and shorter than the sessile spikelets, grain ovate, grains eaten by local people, manure, used as hay and silage, fodder grass, relished by cattle, occasionally used as forage for horses and sheep, spikes eaten by baboons, unpalatable when tall as its stiff hairs cause irritation, potential seed contaminant, considered one of the most noxious and serious weeds in crops such as upland rice, sorghum, sugar cane, common beans and maize, soybean, used to make matting, widespread in shady wet places on disturbed soils, gardens, abandoned farmland, savannah, cultivated grounds, deep soils at low to middle elevations, heavy soils, loamy sand to clay, rice fields, grazed land, woodland, mouth of streams, irrigated lands, wastelands, in open areas, in high rainfall areas, in seasonally flooded meadows, forest edges, clearings, along rivers, on sandy riverbanks, gravelly soils, see *Mantissa Plantarum* 575. 1771, *Nova Graminum Genera* 40, t. 1. 1779, *Supplementum Plantarum* 114. 1781 [1782], *Flora Cochinchinensis* 51. 1790, *Tentamen Florae Abyssinicae* ... 2: 444. 1850, *Boletim da Sociedade Brotteriana* 5: 215. 1887, *Revisio Generum Plantarum* 2: 779. 1891 and *North American Flora* 17(1): 84. 1909, *Kew Bulletin* 35(4): 817. 1981, *Journal of Cytology and Genetics* 20: 205-206. 1985, *Cytologia* 51: 43-50. 1986, *Cytologia* 54: 335-342. 1989, *Journal of Cytology and Genetics* 25: 140-143. 1990, *Journal of the Indian Botanical Society* 73: 289-293. 1994, M.C. Orthographic variant, see *Genera Plantarum* 31. 1789.

Rouxia Husnot = [x *Elyhordeum* Mansf. ex Tsitsin & K.A. Petrova, *Elymus* x *Hordeum*]

After the French botanist Nisius Roux, 1854-1923, see Maurice A.F. Breistroffer, "Note sur N. Roux et la flore drômoise." *Bull. Soc. Linn. Lyon* 7: 100-104. 1942, J.H. Barnhart, *Biographical notes upon botanists*. 3: 185. 1965.

Pooideae, Triticeae, Hordeinae, see *Graminées. Descriptions ... France, Belgique, Isles Britanniques, Suisse* 76. 1899 and *Botaniska Notiser* 1953(3): 357. 1953, *Lejeunia* 75: 297. 1975, *Genera Graminum* 375. 1986, *Contributions from the United States National Herbarium* 48: 277-278. 2003.

Roylea Nees ex Steud. = *Melanocenchris* Nees, *Roylea* Steud., *Roylea* Wall. ex Benth. (Lamiaceae, alt. Labiatae)

Named for the British botanist John Forbes Royle (1798-1858), surgeon with the East India Company in Bengal, 1833 F.L.S., 1837 F.R.S., traveler and plant collector, among his writings are *Illustrations of the Botany and other branches of the Natural History of the Himalayan Mountains and the Flora of Cashmere*. London 1839-1840, *An Essay on the Antiquity of Hindoo Medicine*. London 1837 and *A Manual of Materia Medica and Therapeutics*. London 1847; see M. Archer, *Natural History Drawings in the India Office Library*. London 1962; R. Desmond, *The European Discovery of the Indian Flora*. Oxford 1992; J.H. Barnhart, *Biographical notes upon botanists*. 3: 187. 1965; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. 1917-1933; Mea Allan, *The Hookers of Kew*. London 1967; Isaac Henry Burkill, *Chapters on the History of Botany in India*. Delhi 1965; A. Lasègue, *Musée botanique de Benjamin Delessert*. Paris 1845; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. 654. Philadelphia 1964; D.G. Crawford, *A History of the Indian Medical Service, 1600-1913*. London 1914; H.R. Fletcher, *Story of the Royal Horticultural Society, 1804-1968*. Oxford 1969; Mariella Azzarello Di Misa, a cura di, *Il Fondo Antico della Biblioteca dell'Orto Botanico di Palermo*. 237. Regione Siciliana, Palermo 1988; Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 598. 1994.

Cynodonteae, see *Plantae Asiaticae Rariores* 1: 57, t. 74. 1830, *Nomenclator Botanicus. Editio secunda* 2: 475. 1841, *Proceedings of the Linnean Society of London* 1: 94. 1841.

Runcina Allamand

Runcina was a rural goddess presiding over weeding, Latin *runcino*, are "to plane off," *runco*, are "to weed out, root up, to pluck, to mow," Latin *runcina*, ae and Greek *rhykane* for a plane, see *Nova Acta Phys. Med. Acad. Caes. Leop. Carol. Nat. Cur.* 4: 94. 1770 and *Genera Graminum* 376. 1986.

Rupestrina Prov. = *Trisetum* Pers.

Latin *rupes*, is "a rock."

Pooideae, Poaceae, Aveninae, type *Rupestrina pubescens* Prov., see *Species Plantarum* 1: 64. 1753, *Syn. Pl.* 1: 97. 1805, *Essai d'une Nouvelle Agrostographie* 88, 153, t. 18, f. 1. 1812, *The Flora of Canada* 689. 1862, *Plantae Europaeae* 1: 59. 1890 and *U.S.D.A. Bull.* 772: 107-109. 1920, *Systematic Botany* 11: 567-578. 1986, *Taxon* 35: 195. 1986, *Taxon* 36: 75. 1987, *New Zealand J. Bot.* 36: 556-557. 1998, *Newslett. Int. Organ. Pl. Biosyst. (Oslo)* 30: 10-15. 1999, *Contributions from the United States National Herbarium* 48: 605, 659-676. 2003.

Rytidosperma Steudel = *Deschampsia* P. Beauv., *Erythranthera* Zotov, *Monostachya* Merr., *Notodanthonia* Zotov, *Thonandia* H.P. Linder

From the Greek *rhytis*, *rhytidós* "a wrinkle" and *sperma* "a seed."

About 35-90 species, South America, Australasian region. Arundinoideae, or Danthonioideae, Danthonieae, Danthoniinae, perennial, herbaceous, caespitose, unbranched, glabrous or hairy, auricles absent, leaf sheath hairy, ligule a rim of hairs, leaf blade persistent or disarticulating, plants bisexual, open to contracted inflorescence racemose or paniculate, florets hermaphrodite, chasmogamous and cleistogamous, hidden cleistogenes in the leaf sheaths, 2 glumes more or less equal and membranous, lemma hairy over whole surface or hairs in tufts, lemma with scabrid lobes and awned, 1-3 awns straight, central awn usually geniculate with a more or less twisted column, palea membranous 2 cuneate lodicules hairy or glabrous and fleshy or membranous, 3 stamens, ovary glabrous, 2 stigmas, open habitats, dry sites, lawns, depressions, open grasslands, woodlands, playing fields, uplands, mountain grassland, taxonomic confusion, a difficult genus, close to *Notodanthonia* and *Austrodanthonia*, type *Rytidosperma lechleri* Steud., see *Species Plantarum* 1: 63. 1753, *Flore Française. Troisième Édition* 3: 32. 1805, *Prodromus Florae Novae Hollandiae* 182. 1810, *Essai d'une Nouvelle Agrostographie* 91, 149, 160. 1812, *Systema Vegetabilium* 2: 690. 1817, *A Manual of the Botany of the Northern United States* 605. 1848, Ernst Gottlieb von Steudel (1783-1856), *Synopsis Plantarum Glumacearum* 1: 425. 1854 and *Philippine Journal of Science* 5: 330-331. 1910, *Man. N.Z. Fl.* 171-179. 1925, *Contrib. N.S.W. National Herbarium* 2: 249-325. 1956, *New Zealand Journal of Botany* 1: 78-136. 1963, S.T. Blake, "Plinthanthesis and *Danthonia* and a review of the Australian species of *Leptochloa* (Gramineae)." *Contributions from the Queensland Herbarium* 14: 3. 1972, *Darwiniana* 18: 80-106. 1973, *N.Z. J. Bot.* 91: 254-261. 2004, *Flora of Australia* 44 B: 64-70. 2005.

Species

R. auriculatum (J.M. Black) Connor & Edgar (*Austrodanthonia auriculata* (J.M. Black) H.P. Linder; *Danthonia auriculata* J.M. Black; *Notodanthonia auriculata* (J.M. Black) Zotov)

Australia. Rhizomatous, tufted, base swollen, sheaths hairy, leaf blades densely and stiffly hairy, compact and erect panicle, awns exerted from glumes, more or less equal glumes, see *Transactions and Proceedings of the Royal Society of South Australia* 53: 261. 1929, *Contr. New South Wales National Herb.* 2: 309. 1956, *New Zealand Journal of Botany* 1: 113. 1963, *New Zealand Journal of Botany* 17(3): 322. 1979, *Telopea* 7(3): 270. 1997.

R. australe (Petrie) Connor & Edgar (*Danthonia petriei* (Petrie) Zotov; *Danthonia petriei* var. *mucronulata* (Hack. ex Cheeseman) Zotov; *Erythranthera australis* (Petrie) Zotov; *Rytidosperma australe* (Petrie) Clayton & Renvoize ex Connor & Edgar; *Rytidosperma australe* (Petrie) H.P. Linder; *Triodia australis* Petrie; *Triodia australis* var. *mucronulata* Hack. ex Cheeseman)

New Zealand, Tasmania, New South Wales. Rhizomatous, low, wiry, erect or spreading, tufted, innovation buds intravaginal, leaf sheath glabrous or hairy, leaf blades flat to folded, glumes notched or acute, lemma glabrous, montane

to alpine, swamps, grasslands, damp places, see *Transactions and Proceedings of the New Zealand Institute* 22: 442. 1890 and *Man. N.Z. Fl.* 897. 1906, *T.R.S.N.Z.* 73: 234. 1943, *New Zealand Journal of Botany* 1: 125. 1963, *New Zealand Journal of Botany* 25(1): 166. 1987, *Telopea* 6(4): 613. 1996.

R. biannulare (Zotov) Connor & Edgar (*Austrodanthonia biannularis* (Zotov) H.P. Linder; *Notodanthonia biannularis* Zotov)

New Zealand. Tussocky, leaf sheaths glabrous, leaf blades often rolled, narrow leaves, panicle dense, spikelets on slender pedicels, glumes lanceolate more or less equal, lemma hairy, along roadsides, see *New Zealand Journal of Botany* 1: 116. 1963, *New Zealand Journal of Botany* 17(3): 324. 1979, *Telopea* 7(3): 270. 1997.

R. buchananii (Hook.f.) Connor & Edgar (*Danthonia buchananii* Hook.f.; *Danthonia semiannularis* (Labill.) R. Br. var. *brevisetata* Hook.f.; *Notodanthonia buchananii* (Hook.f.) Zotov)

New Zealand. Tussocky, montane and subalpine, leaf sheath glabrous or rarely hairy, leaf blade folded or rolled, leaves more or less pungent, panicle erect more or less compact, awn divergent, glumes lanceolate more or less equal, in grasslands, see *Prodromus Florae Novae Hollandiae* 177. 1810, *Flora Novae-Zelandiae* 1: 304. 1853, *Handbook of the New Zealand Flora* 333. 1864 and *New Zealand Journal of Botany* 1: 110. 1963, *New Zealand Journal of Botany* 17(3): 320. 1979.

R. caespitosum (Gaudich.) Connor & Edgar (*Austrodanthonia caespitosa* (Gaudich.) H.P. Linder; *Danthonia caespitosa* Gaudich.; *Notodanthonia caespitosa* (Gaudich.) Zotov)

Australia. Tufted, dense, crowded, erect, sometimes shortly rhizomatous, leaf sheath glabrous or rarely hairy, leaves more or less pungent, erect and compact inflorescence paniculate, awns exerted from the glumes, lower lemma hairy, palea narrow-lanceolate, in dry places, grassland, waste ground, see Charles Gaudichaud-Beaupré (1789-1854), *Voyage autour du Monde, entrepris par Ordre du Roi, ... exécuté sur les Corvettes de S. M. l'Uranie et la Physicienne ... Botanique* 4: 408. Paris 1826 [-1830] and *New Zealand Journal of Botany* 1: 117. 1963, *New Zealand Journal of Botany* 17(3): 325. 1979, *Telopea* 7(3): 271. 1997.

R. clavatum (Zotov) Connor & Edgar (*Amphibromus nervosus* (Hook.f.) Baill.; *Austrodanthonia clavata* (Zotov) H.P. Linder; *Danthonia nervosa* Hook.f.; *Danthonia nervosa* Colenso, nom. illeg., non *Danthonia nervosa* Hook.f.; *Danthonia pilosa* R. Br.; *Danthonia pilosa* var. *stricta* Buchanan; *Notodanthonia clavata* Zotov; *Notodanthonia stricta* (Buchanan) Zotov)

New Zealand. Scabrous or glabrous, variable, slender or stout, shortly rhizomatous, tufted, spreading, leaf blade flat or folded, contracted panicle or raceme, glumes subequal,

awn column flat, dry hills, dry areas, see *Prodromus Florae Novae Hollandiae* 177. 1810, *Flora Tasmaniae* 2: 121, t. 163A. 1858, *Indigenous Grasses of New Zealand* t. 33 (2A). 1879, *Histoire des Plantes* 12: 203. 1893, *T.N.Z.I.* 28: 612. 1896 and *New Zealand Journal of Botany* 1: 119, 121. 1963, *New Zealand Journal of Botany* 17(3): 326. 1979, *New Zealand Journal of Botany* 29: 117-129. 1991, *Telopea* 7(3): 271. 1997.

R. corinum Connor & Edgar

New Zealand. Tussocky, montane and subalpine, compact, small, leaves pungent, small compact erect panicle racemose, glumes acute or subacute, rocky places, see *New Zealand Journal of Botany* 17(3): 317. 1979.

R. dimidiatum (Vickery) Connor & Edgar (*Danthonia dimidiata* Vickery; *Notodanthonia dimidiata* (Vickery) Veldkamp)

Tasmania, Victoria. Caespitose, innovation buds intravaginal, similar to *Rytidosperma fortunae-hibernae* and *Rytidosperma pauciflorum*, see *New Zealand Journal of Botany* 17(3): 332. 1979, *Taxon* 29: 296. 1980.

R. erianthum (Lindl.) Connor & Edgar (*Austrodanthonia eriantha* (Lindl.) H.P. Linder; *Danthonia eriantha* Lindl.; *Notodanthonia eriantha* (Lindl.) Veldkamp)

Australia. Tufted, hairy, leaf sheaths glabrous and long-haired, leaf blade densely hairy, short panicle, glumes more or less equal, awns exerted from the glumes, palea broadly obovate, see Sir Thomas Livingstone Mitchell, 1792-1855, *Three Expeditions into the Interior of Eastern Australia* 2: 304. London 1838 and *New Zealand Journal of Botany* 17(3): 323. 1979, *Taxon* 29: 296. 1980, *Telopea* 7(3): 271. 1997.

R. fortunae-hibernae (Renvoize) Connor & Edgar (*Danthonia fortunae-hibernae* Renvoize)

Tasmania. Caespitose, innovation buds intravaginal, similar to *Rytidosperma dimidiatum* and *Rytidosperma pauciflorum*, see *Kew Bull.* 30: 596. 1976, *New Zealand Journal of Botany* 17(3): 332. 1979.

R. geniculatum (J.M. Black) Connor & Edgar (*Austrodanthonia geniculata* (J.M. Black) H.P. Linder; *Danthonia geniculata* J.M. Black; *Notodanthonia geniculata* (J.M. Black) Zotov)

Australia. Tussocky, small, compact, leaf blade inrolled, leaves almost pungent, short and broad panicle, glumes more or less equal, awns included by glumes, dry areas, see *Transactions and Proceedings of the Royal Society of South Australia* 53: 261. 1929, *Contr. New South Wales Natl. Herb.* 2: 279. 1956, *New Zealand Journal of Botany* 1: 114. 1963, *New Zealand Journal of Botany* 17(3): 323. 1979, *Telopea* 7(3): 271. 1997.

R. gracile (Hook.f.) Connor & Edgar (*Danthonia gracilis* Hook.f.; *Danthonia semiannularis* var. *gracilis* (Hook.f.)

Hook.f.; *Notodanthonia gracilis* (Hook.f.) Zotov; *Thonandia gracilis* (Hook.f.) H.P. Linder)

New Zealand, Tasmania. Tufted, leafy, prostrate, stoloniferous, rooting at the nodes, leaf blade flat with inrolled margins, panicle erect to lax and drooping, awns exerted from the glumes, see *Prodromus Florae Novae Hollandiae* 177. 1810, *Flora Novae-Zelandiae* 1: 303, t. 69B. 1853, *Handbook of the New Zealand Flora* 333. 1864 and *New Zealand Journal of Botany* 1: 123. 1963, *New Zealand Journal of Botany* 17(3): 330. 1979, *Telopea* 6(4): 612. 1996.

R. laeve (Vickery) Connor & Edgar (*Austrodanthonia laevis* (Vickery) H.P. Linder; *Danthonia laevis* Vickery; *Notodanthonia laevis* (Vickery) Zotov)

Australia. Shortly rhizomatous, wiry, slender, see *Contributions from the New South Wales National Herbarium* 1(5): 299. 1950, *New Zealand Journal of Botany* 1: 117. 1963, *New Zealand Journal of Botany* 17(3): 325. 1979, *Telopea* 7(3): 272. 1997.

R. lechleri Steud. (*Danthonia glabra* Phil.; *Notodanthonia lechleri* (Steud.) Veldkamp; *Rytidosperma glabrum* (Phil.) Nicora)

Chile. See *Synopsis Plantarum Glumacearum* 1: 425. 1854, *Anales de la Universidad de Chile* 94: 30. 1896 and *Darwiniana* 18: 87, f. 2A-F. 1973, *Taxon* 29: 297. 1980.

R. maculatum (Zotov) Connor & Edgar (*Notodanthonia maculata* Zotov)

New Zealand. Erect, low growing, shortly rhizomatous, leaf sheath hairy, leaf blade inrolled, erect inflorescence of racemose panicle, awns exerted from the glumes, short stiff hairy pedicels, glumes more or less equal, see *New Zealand Journal of Botany* 1: 108. 1963, *New Zealand Journal of Botany* 17(3): 320. 1979.

R. merum Connor & Edgar (*Austrodanthonia mera* (Connor & Edgar) H.P. Linder; *Notodanthonia mera* (Connor & Edgar) H.P. Linder)

New Zealand. Densely tufted, very slender, shortly rhizomatous, drooping or trailing, leaf sheath glabrous, inflorescence a raceme, spikelets almost sessile, awns exerted from the glumes, short stout callus, glumes more or less equal, see *New Zealand Journal of Botany* 17(3): 328, f. 3. 1979, *Telopea* 7(3): 272. 1997.

R. nigricans (Petrie) Connor & Edgar (*Danthonia gracilis* var. *nigricans* (Petrie) Zotov; *Danthonia nigricans* (Petrie) Calder; *Danthonia semiannularis* var. *nigricans* Petrie; *Notodanthonia nigricans* (Petrie) Zotov; *Thonandia nigricans* (Petrie) H.P. Linder)

New Zealand. Stiffly erect, montane and alpine, open, tufted, leaf sheath glabrous or hairy, leaf blades usually folded, panicle usually erect, awns exerted from the glumes, boggy sites, wet ground, see *Flora Novae-Zelandiae* 1: 303, t. 69B. 1853 and *Transactions and Proceedings*

of the New Zealand Institute 46: 37. 1914, *Journal of the Linnean Society, Botany* 51: 8. 1937, *T.R.S.N.Z.* 73: 234. 1943, *New Zealand Journal of Botany* 1: 123. 1963, *New Zealand Journal of Botany* 17(3): 331. 1979, *Telopea* 6: 612. 1996.

R. nitens (D.I. Morris) H.P. Linder (*Danthonia nitens* D.I. Morris)

Tasmania. Rare, caespitose, innovation buds intravaginal, similar to *Rytidosperma niviculum*, see *Telopea* 6: 614. 1996.

R. niviculum (Vickery) Connor & Edgar (*Danthonia nivicola* Vickery; *Danthonia pulvinorum* D.I. Morris; *Notodanthonia nivicola* (Vickery) Veldkamp; *Rytidosperma pulvinorum* (D.I. Morris) Connor & Edgar)

Tasmania, New South Wales. Cushion-forming, innovation buds intravaginal, alpine areas, wet grasslands, similar to *Rytidosperma nitens* and *Rytidosperma nudiflorum*, see *New Zealand Journal of Botany* 17(3): 332. 1979, *Taxon* 29: 296. 1980.

R. nudiflorum (P. Morris) Connor & Edgar (*Danthonia nudiflora* P. Morris; *Notodanthonia nudiflora* (P. Morris) Veldkamp)

Southeastern Australia. Caespitose, innovation buds intravaginal, similar to *Rytidosperma niviculum*, see *New Zealand Journal of Botany* 17(3): 332. 1979, *Taxon* 29: 296. 1980.

R. nudum (Hook.f.) Connor & Edgar (*Danthonia nuda* Hook.f.; *Notodanthonia nuda* (Hook.f.) Zotov)

New Zealand. Tufted, alpine, small, open, leafy, rooting at the nodes, leaf blade folded, leaves acute, leaf sheaths glabrous, small and erect inflorescence paniculate, glumes more or less equal, awns exerted from the glumes, boggy sites, wet grounds, see *Flora Novae-Zelandiae* 2: 337. 1855 and *New Zealand Journal of Botany* 1: 112. 1963, *New Zealand Journal of Botany* 17(3): 322. 1979.

R. paschale (Pilg.) C. Baeza (*Danthonia paschalis* Pilg.)

Easter Island, Chile. See *The Natural History of Juan Fernandez and Easter Island* 2: 67, f. 1d-h. 1922, *Gayana, Botánica* 47(3-4): 84. 1990 [1991], *Sendtnera* 3: 67. 1996, *Gayana, Botánica* 53(2): 329-333. 1996.

R. pauciflorum (R. Br.) Connor & Edgar (*Danthonia pauciflora* R. Br.; *Notodanthonia pauciflora* (R. Br.) Veldkamp)

Tasmania. Caespitose, innovation buds intravaginal, similar to *Rytidosperma dimidiatum* and *Rytidosperma fortunaehibernae*, see *New Zealand Journal of Botany* 17(3): 332. 1979, *Taxon* 29: 297. 1980.

R. penicillatum (Labill.) Connor & Edgar (*Arundo penicillata* Labill.; *Austrodanthonia penicillata* (Labill.) H.P. Linder; *Danthonia penicillata* (Labill.) R. Br. ex P. Beauvais; *Danthonia penicillata* (Labill.) F. Muell., nom. illeg., non *Danthonia penicillata* (Labill.) R. Br. ex P. Beauvais;

Danthonia racemosa var. *penicillata* (Labill.) Benth.; *Notodanthonia penicillata* (Labill.) Zotov)

Australia. Loosely tufted, slender, dense, hairy to scabrid, shortly rhizomatous, leaf blade usually folded and inrolled, slender elongate panicle, rachis and pedicels stiffly hairy, glumes more or less equal, awns exerted from the glumes, awn column twisted and divergent, in grassland, see *Novae Hollandiae Plantarum Specimen* 1: 26, t. 34. 1804, *Essai d'une Nouvelle Agrostographie* 92, 153, 160. 1812, *Fragmenta Phytographiae Australiae* 8: 135. 1873, *Flora Australiensis: A Description ...* 7: 594. 1878 and *New Zealand Journal of Botany* 1: 122. 1963, *New Zealand Journal of Botany* 17(3): 327. 1979, *New Zealand Journal of Botany* 29: 117-129. 1991, *Telopea* 7(3): 272. 1997.

R. petrosum Connor & Edgar

New Zealand. Tufted, coastal, tussocky, wiry, small, stiff, rooting at the nodes, leaves pungent or semipungent, stiff leaf blade glabrous and inrolled, inflorescence racemose or paniculate, rachis and pedicels glabrous, glumes more or less equal, awns exerted from the glumes, upper lemma sparsely hairy, rocky places, see *New Zealand Journal of Botany* 17(3): 317, f. 1. 1979.

R. pictum (Nees & Meyen) Nicora (*Danthonia picta* Nees & Meyen; *Notodanthonia picta* (Nees & Meyen) Veldkamp)

South America, Chile. See *Gramineae* 25-26. 1841, *Nova Acta Phys. Med. Acad. Caes. Leop. Carol. Nat. Cur.* 19(Suppl. 1): 157-158 (1843 and *Darwiniana* 18: 91, f. 3 A-D. 1973, *Taxon* 29: 297. 1980.

R. pictum (Nees & Meyen) Nicora var. *bimucronatum* Nicora (*Notodanthonia picta* var. *bimucronata* (Nicora) Veldkamp)

South America, Argentina. See *Darwiniana* 18: 91, f. 3 E. 1973, *Taxon* 29: 297. 1980.

R. pictum (Nees & Meyen) Nicora var. *pictum*

South America. See *Darwiniana* 18: 91, f. 3 A-D. 1973.

R. pilosum (R. Br.) Connor & Edgar (*Danthonia penicillata* var. *pilosa* (R. Br.) F. Muell. ex Maiden & Betche; *Danthonia pilosa* R. Br.; *Notodanthonia pilosa* (R. Br.) Zotov)

Australia. Densely tufted, coarse, harsh, stout, stiff, shortly rhizomatous, leaf sheath glabrous or sparsely hairy, leaf blade flat to inrolled, panicle more or less compact, glumes subacute more or less equal, awns exerted from the glumes, see *Prodromus Florae Novae Hollandiae* 177. 1810 and *A Census of New South Wales Plants* 22. 1916, *Contributions from the New South Wales National Herbarium* 2: 313. 1956, *New Zealand Journal of Botany* 1: 118. 1963, *New Zealand Journal of Botany* 17: 326, 332. 1979.

R. pilosum (R. Br.) Connor & Edgar var. *paleaceum* (Vickery) Connor & Edgar (*Danthonia pilosa* var. *paleacea* Vickery; *Notodanthonia pilosa* var. *paleacea* (Vickery) Veldkamp)

Australia, New Zealand. See *Prodromus Florae Novae Hollandiae* 177. 1810 and *Contributions from the New South Wales National Herbarium* 2: 313. 1956, *New Zealand Journal of Botany* 1: 118. 1963, *New Zealand Journal of Botany* 17(3): 326, 332. 1979, *Taxon* 29: 297. 1980.

R. pulchrum (Zotov) Connor & Edgar (*Notodanthonia pulchra* Zotov)

New Zealand. Densely tufted, alpine and subalpine, small, open, rooting at the nodes, leaf blade glabrous, leaves acute, leaf sheath glabrous, small inflorescence paniculate, glumes ovate more or less equal, awns exerted from the glumes, in boggy sites, see *New Zealand Journal of Botany* 1: 111. 1963, *New Zealand Journal of Botany* 17(3): 321. 1979.

R. pumilum (Kirk) Clayton & Renvoize ex Connor & Edgar (*Atropis pumila* Kirk; *Danthonia kirkii* Zotov; *Erythranthera pumila* (Kirk) Zotov; *Rytidosperma pumilum* (Kirk) H.P. Linder, nom. illeg., non *Rytidosperma pumilum* (Kirk) Clayton & Renvoize ex Connor & Edgar; *Triodia pumila* (Kirk) Hack. ex Cheeseman)

New Zealand, Australia. Tufted, vulnerable, montane to alpine, low growing, small, slender, stiff, cushion-forming, leaf sheath glabrous, leaf blades setaceous, lemma more or less hairy, inflorescence paniculate and racemose, narrow spikelets, florets enclosed by glumes, glumes lanceolate more or less equal, in grassland, see *Transactions and Proceedings of the New Zealand Institute* 14: 379. 1882 and *Manual of the New Zealand Flora* 896. 1906, *T.R.S.N.Z.* 73: 234. 1943, *New Zealand Journal of Botany* 1: 124-125. 1963, *New Zealand Journal of Botany* 25(1): 166. 1987, *Telopea* 6(4): 615. 1996.

R. quirihuense C. Baeza

Chile. See *Novon* 12(1): 31-34, f. 1. 2002.

R. racemosum (R. Br.) Connor & Edgar (*Austrodanthonia racemosa* (R. Br.) H.P. Linder; *Danthonia penicillata* var. *racemosa* (R. Br.) F. Muell. ex Maiden & Betche; *Danthonia pilosa* var. *racemosa* Buchanan; *Danthonia racemosa* R. Br.; *Notodanthonia racemosa* (R. Br.) Zotov)

Australia. Variable, shortly rhizomatous, leaf sheath glabrous or stiffly hairy, leaf blade flat, erect racemose panicle, glumes ovate more or less equal, awns exerted from the glumes, see *Prodromus Florae Novae Hollandiae* 177. 1810, *Flora Australiensis: A Description ...* 7: 594. 1878, *Indigenous Grasses of New Zealand* t. 33 (2) B. 1879 and *A Census of New South Wales Plants* 22. 1916, *New Zealand Journal of Botany* 1: 121. 1963, *New Zealand Journal of Botany* 17(3): 327, 332. 1979, *Telopea* 7(3): 273. 1997.

R. racemosum (R. Br.) Connor & Edgar var. *obtusatum* (F. Muell. ex Benth.) Connor & Edgar (*Austrodanthonia racemosa* var. *obtusata* (F. Muell. ex Benth.) H.P. Linder; *Danthonia racemosa* var. *obtusata* F. Muell. ex Benth.; *Notodanthonia racemosa* var. *obtusata* (F. Muell. ex Benth.) Veldkamp)

Australia. See *Prodromus Florae Novae Hollandiae* 177. 1810, *Flora Australiensis: A Description ...* 7: 594. 1878 and *New Zealand Journal of Botany* 17(3): 332. 1979, *Taxon* 29: 297. 1980, *Telopea* 7(3): 273. 1997.

R. setifolium (Hook.f.) Connor & Edgar (*Danthonia semiannularis* Buchanan; *Danthonia semiannularis* var. *setifolia* Hook.f.; *Danthonia setifolia* (Hook.f.) Calder; *Danthonia setifolia* (Hook.f.) Cockayne; *Notodanthonia setifolia* (Hook.f.) Zotov)

New Zealand. Tussocky, montane to alpine, stiff, rooting at the nodes, leaf sheath glabrous, leaf blade inrolled, panicle more or less erect, glumes ovate more or less equal, awns exerted from the glumes, rocky areas, grassland, see *Prodromus Florae Novae Hollandiae* 177. 1810, *Flora Novae-Zelandiae* 1: 304. 1853, *Manual of the Indigenous Grasses of New Zealand* t. 34 (2) A. 1879 and *New Zealand Journal of Agriculture* 23: 146. 1921, *Journal of the Linnean Society, Botany* 51: 88. 1937, *New Zealand Journal of Botany* 1: 108. 1963, *New Zealand Journal of Botany* 17(3): 316. 1979.

R. sorianoi Nicora (*Notodanthonia sorianoi* (Nicora) Veldkamp)

Argentina. See *Darwiniana* 18: 89, f. 2G-L. 1973, *Taxon* 29: 297. 1980.

R. subulatum (A. Rich.) T. Cope (*Danthonia albida* Hochst. ex Steud.; *Danthonia candida* Hochst. ex Steud.; *Danthonia subulata* A. Rich.; *Danthonia subulata* Hook.f., nom. illeg., non *Danthonia subulata* A. Rich.)

Ethiopia, Yemen. Perennial, densely tufted, ligule a ciliate rim, spine-tipped leaves, rigid and spinescent leaves erect and inrolled, linear spike-like panicle, glumes more or less equal, lemmas bifid and sparsely pilose, awn with a twisted column, see *Tentamen Florae Abyssinicae ...* 2: 420. 1850, *Synopsis Plantarum Glumacearum* 1: 244. 1854, *Flora Tasmaniae* 2: 121, t. 161. 1860 and *Kew Bulletin* 39(4): 835. 1984.

R. tenue (Petrie) Connor & Edgar (*Danthonia buchananii* Hook.f.; *Danthonia buchananii* var. *tenuis* Petrie; *Notodanthonia tenuis* (Petrie) Zotov)

New Zealand. Tufted, slender, rooting at the nodes, leaf blade inrolled, leaf sheath hairy or glabrous, inflorescence erect and contracted, glumes subacute more or less equal, awns more or less included by glumes, see *Handbook of the New Zealand Flora* 333. 1864 and *Transactions and Proceedings of the New Zealand Institute* 46: 37. 1914, *New Zealand Journal of Botany* 1: 111. 1963, *New Zealand Journal of Botany* 17(3): 321. 1979, *New Zealand Journal of Botany* 26: 163-167. 1988.

R. tenuius (Steud.) O.E. Erikss., A. Hansen & Sunding (*Austrodanthonia tenuior* (Steud.) H.P. Linder; *Danthonia tenuior* (Steud.) Conert; *Notodanthonia tenuior* (Steud.) S.T. Blake; *Plinthanthesis tenuior* Steud.; *Rytidosperma*

tenuius (Steud.) Connor & Edgar; *Rytidosperma tenuius* (Steud.) A. Hansen & Sunding)

Australia. Erect, tussock, coarse, stout, shortly rhizomatous, leaf blade flat, inflorescence paniculate, glumes subacute more or less equal, awns more or less included by or exerted from glumes, see *Synopsis Plantarum Glumacearum* 1: 14. 1855 [1853] and *Contributions from the New South Wales National Herbarium* 1(5): 301. 1950, *New Zealand Journal of Botany* 1: 114. 1963, *Contributions from the Queensland Herbarium* 14: 3. 1972, *Senckenbergiana Biologica* 56: 163. 1975, *Flora of Macaronesia: Checklist of Vascular Plants (2nd revised edition)* 1: 93. 1979, *New Zealand Journal of Botany* 17(3): 324. 1979, *Telopea* 7(3): 269, 273. 1997.

R. thomsonii (Buchanan) Connor & Edgar (*Danthonia thomsonii* Buchanan; *Notodanthonia thomsonii* (Buchanan) Zotov; *Triodia thomsonii* (Buchanan) Petrie)

New Zealand. Variable, tussock, tufted, shortly rhizomatous, leaf blade stiff and inrolled, leaves semipungent, glumes subacute more or less equal, see *Indigenous Grasses of New Zealand* t. 36 (2). 1879 and *Transactions and Proceedings of the New Zealand Institute* 44: 188. 1912, *New Zealand Journal of Botany* 1: 112. 1963, *New Zealand Journal of Botany* 17(3): 322. 1979.

R. unarede (Raoul) Connor & Edgar (*Danthonia cingula* Steud.; *Danthonia semiannularis* var. *unarede* (Raoul) Hook.f.; *Danthonia unarede* Raoul; *Notodanthonia unarede* (Raoul) Zotov; *Thonandia unarede* (Raoul) H.P. Linder)

New Zealand. Tufted, montane, open, shortly rhizomatous, glabrous, leaf blade flat or inrolled, long-branched panicle, glumes acute more or less equal, awns exerted from the glumes, see *Prodromus Florae Novae Hollandiae* 177. 1810, *Annales des Sciences Naturelles; Botanique, sér. 3* 2: 116. 1844, *Flora Novae-Zelandiae* 1: 304. 1853, *Synopsis Plantarum Glumacearum* 1: 246. 1854 [1853] and *New Zealand Journal of Botany* 1: 122. 1963, *New Zealand Journal of Botany* 17(3): 328. 1979, *Telopea* 6(4): 613. 1996.

R. vickeryae M. Gray & H.P. Linder

New South Wales. Loose, mat-forming, innovation buds intravaginal, spreading rhizomes, along stream banks, see *Austral. Syst. Bot.* 12: 744. 1999.

R. violaceum (E. Desv.) Nicora (*Danthonia violacea* E. Desv.; *Notodanthonia violacea* (E. Desv.) Veldkamp)

Chile. See *Flora Chilena* 6: 365, t. 80, f. 1. 1854 and *Darwiniana* 18: 91, f. 3 F-K. 1973, *Taxon* 29: 297. 1980, *Gayana, Botánica* 53(2): 329-333. 1996.

R. virescens (E. Desv.) Nicora (*Danthonia andina* Phil.; *Danthonia picta* var. *patagonica* Speg.; *Danthonia virescens* E. Desv.; *Danthonia werdermannii* Pilg.; *Notodanthonia virescens* (E. Desv.) Veldkamp; *Notodanthonia virescens* var. *patagonica* (Speg.) Veldkamp; *Rytidosperma*

virescens var. *patagonicum* (Speg.) Nicora) (for the German (b. Berlin) botanist Erich Werdermann, 1892-1959 (Bremen), plant geographer, traveler (South Africa, Namibia, Chile, Bolivia, Brazil, Mexico), explorer, plant collector, anatomist, professor of botany, plant physiologist, author of "Friedrich Boedeker." *Kakteenkunde* Hft 5, 1937, *Brasilien und seine Säulenkakteen*. Neudamm, J. Neumann [ca. 1933] and "Excursión botánica a la alta Cordillera de Atacama (Chile)." Trad. del alemán por G. Looser. *Rev. Universit.* [Univ. Catol. Chile] xiv. [Santiago] 1929. See J.H. Barnhart, *Biographical notes upon botanists*. 3: 477. 1965; Gualterio Looser (1898-1982), "El Botanico Dr. Erich Werdermann." (*An. Acad. Chil. Cienc. Nat.* no. 23) in *Revista Universitaria Santiago* 44-45: 232-234. 1960)

Chile. Stony places, dry areas, see *Gramineae* 25-26. 1841, *Flora Chilena* 6: 363. 1854, *Anales de la Universidad de Chile* 94: 33. 1896 and *Anales del Museo Nacional de Buenos Aires* 7: 193. 1902, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 10(97): 758. 1929, *Darwiniana* 18: 93, f. 4A-E. 1973, *Taxon* 29: 297. 1980.

R. virescens (E. Desv.) Nicora var. **parvispiculum** Nicora (*Notodanthonia virescens* var. *parvispicula* (Nicora) Veldkamp)

Argentina. See *Darwiniana* 18: 95, f. 4F. 1973, *Taxon* 29: 297. 1980.

R. virescens (E. Desv.) Nicora var. **virescens**

Argentina, Chile. See *Darwiniana* 18: 18: 93, f. 4 A-E. 1973, *Gayana, Botánica* 53(2): 329-333. 1996.

R. viride (Zotov) Connor & Edgar (*Notodanthonia viridis* Zotov)

New Zealand. Tussocky, montane and subalpine, stiff, leaf blade inrolled, leaf sheath usually glabrous, leaves pungent, panicle erect, glumes linear-lanceolate, awns exerted from the glumes, rocky places, see *New Zealand Journal of Botany* 1: 108. 1963, *New Zealand Journal of Botany* 17(3): 316. 1979.

Rytilix Raf. ex Hitchc. = *Hackelochloa* Kuntze, *Mnesithea* Kunth

Panicoideae, Andropogoneae, Rottboelliinae, see *Mantissa Plantarum* 2: 575. 1771, *Révision des Graminées* 1: 153-154. 1829, C.S. Rafinesque, *Seringe Bull. Bot.* 1: 219. 1830, *Revisio Generum Plantarum* 2: 776. 1891 and *U.S. Department of Agriculture Bureau of Plant Industry Bulletin* 282: 20. 1913, *United States Department of Agriculture: Bulletin* 772: 278. 1920, E.D. Merrill, *Index rafinesquianus*. The plant names published by C.S. Rafinesque, etc. 76. Jamaica Plain, Massachusetts 1949, *Contributions from the United States National Herbarium* 46: 246, 295-296, 550. 2003.

S

Sabsab Adans. = *Paspalum* L.

Panicoideae, Paniceae, Paspalinae, see *Systema Naturae*, *Editio Decima* 846, 855, 1359. 1759, *Familles des Plantes* 2: 31, 599. 1763 and *Contr. U.S. Natl. Herb.* 12: 116. 1908, *Contributions from the United States National Herbarium* 46: 443-527, 550. 2003.

Saccharifera Stokes = *Saccharum* L.

From *Saccharum* L. and *fero, fers, tuli, latum, ferre* “to bear, carry.”

Panicoideae, Andropogonodae, Andropogoneae, Andropogoninae, or Panicoideae, Andropogoneae, Saccharinae, see *Species Plantarum* 1: 54. 1753, *A Botanical Materia Medica* 1: 131-132. 1812 and *Contributions from the United States National Herbarium* 46: 550-557. 2003.

Saccharum L. = *Erianthus* Michx., *Lasiorrhachis* (Hack.) Stapf, *Narenga* Bor, *Ripidium* Bernh. (Schizaeaceae), *Ripidium* Trin., *Saccharifera* Stokes

From the Greek *sakcharon* “sugar”; Indian *sarkara* “the juice prepared from sugarcane,” *uch, uchari* “sugar”; Malay *singkara*; Sanskrit *hascha* “pleasure,” *ha, hu* “good,” *ikshu, ikshuka, ikshuraka* “sugarcane,” *ikshurasa* “juice of sugarcane”; see Carl Linnaeus, *Species Plantarum*. 54. 1753 and *Genera Plantarum*. edition 5. 28. 1754.

About 5-6 *sensu stricto* (3 wild, 2 cultigens) or 35-40 species, tropics and subtropics, warm temperate. Panicoideae, Andropogonodae, Andropogoneae, Andropogoninae, or Panicoideae, Andropogoneae, Saccharinae, perennial, cane-like, erect, tall, vigorous and robust, coarse, clumped or rhizomatous, caespitose, stout to massive and hard to solid, persistent, herbaceous or woody, culm nodes glabrous, solid culm internodes, ligule membranous and fringed, leaf sheaths rounded, leaves linear-lanceolate to linear, plants bisexual, inflorescence a large terminal and silky plumose, much branched panicle broad or narrow, spikelets borne in pairs and enveloped in long white hairs, 1 spikelet sessile and 1 pedicellate, 2 florets, lower floret sterile or reduced, upper floret bisexual, fluffy callus hairs, 2 glumes more or less equal, lower lemma sterile and papery, lemma of upper

floret absent or lanceolate and shortly awned or awnless, palea narrow, lodicules present, 2-3 stamens, ovary glabrous, 2 plumose stigmas, pedicelled spikelet similar to the sessile, ornamental, naturalized, may become invasive, cultivated fodder, a source of sugar, used in construction work, used for weaving house walls, all species may be used as hosts for the ornamental parasite *Aeginetia indica* L. (Orobanchaceae, alt. Scrophulariaceae), shade species, riversides, pampas, valley bottoms, open hillsides, hybridization with genera *Erianthus* Michaux, *Imperata* Cirillo, *Miscanthidium* Stapf, *Miscanthus* Andersson, *Narenga* Bor, *Sclerostachya* (Hackel) Camus and *Sorghum* Moench, awned species were formerly placed in *Erianthus*, type *Saccharum officinarum* L., see Sir Hans Sloane (1660-1753), *A Voyage to the Islands Madera, Barbados, Nieves, S. Christophers and Jamaica* 1: t. 66. London 1707-1725, *Species Plantarum* 1: 54. 1753, *Species Plantarum* 2: 1045. 1753, *Genera Plantarum*. edition 5. 28. 1754, *Familles des Plantes* 2: 31, 530. 1763, *Genera Plantarum* 2: 787. 1791, *Journal für die Botanik* 1800(2): 127. 1801, *Flora Boreali-Americana* 1: 54-55. 1803, *Syn. Pl.* 1: 103. 1805, *Bot. Mat. Med.* 1: 131. 1812, *Essai d'une Nouvelle Agrostographie* 8. 1812, *Fundamenta Agrostographiae* 169. 1820, *Flora Indica; or Descriptions ...* 1: 241. 1820, *Flora Brasiliensis seu Enumeratio Plantarum* 2(1): 315-316. 1829, *Synopsis Plantarum Glumacearum* 1: 123, 407. 1854, *Öfversigt af Förhandlingar: Kongl. Species

S. alopecuroides (L.) Nutt. (*Andropogon alopecuroides* L.; *Andropogon divaricatus* L., also spelled *divaricatum*; *Erianthus alopecuroides* (L.) Elliott; *Erianthus alopecuroides* var. *hirsutus* Nash, also spelled *hirsutis*; *Erianthus divaricatus* (L.) A.S. Hitchc.; *Erianthus giganteus* Muhl.; *Erianthus tracyi* Nash; *Pappophorum pappiferum* (Lam.) Kuntze; *Saccharum alopecuroides* subvar. *divaricatum* (L.) Roberty; *Saccharum pappiferum* Lam.) (named for S.M. Tracy)

U.S., northern America. Found in gravel soils, along railroad tracks and along roadsides, see *Species Plantarum* 2: 1045. 1753, *Tableau Encyclopédique et Méthodique ... Botanique* 1: 155. 1791, *A Sketch of the Botany of South-Carolina and Georgia* 1(1): 38. 1816, *The Genera of North American Plants* 1: 60. 1818, *Bulletin of the Torrey Botanical Club* 24: 37. 1897, *Revisio Generum Plantarum* 3(3): 365. 1898 and *Flora of the Southeastern United States ...* 55. 1903, *Contributions from the United States National Herbarium* 12(3): 125. 1908, *Boissiera. Mémoires du Conservatoire de Botanique et de l'Institut de Botanique Systématique de l'Université de Genève* 9: 357. 1960.

in English: silver plume grass

S. angustifolium (Nees) Trin. (*Andropogon erianthus* Link; *Andropogon saccharoides* Sw.; *Erianthus angustifolius* Nees, also spelled *angustifolium*; *Erianthus angustifolius* var. *angustifolius*; *Erianthus biaristatus* (Hack.) Swallen; *Erianthus divaricatus* var. *angustifolius* (Nees) Hack.; *Erianthus fischerianus* Rupr. ex Döll; *Erianthus saccharoides* Michx.; *Erianthus saccharoides* subsp. *angustifolius* (Nees) Hack.; *Erianthus saccharoides* subsp. *biaristatus* (Hack.) Hack.; *Erianthus saccharoides* var. *angustifolius* (Nees) Kuntze; *Erianthus saccharoides* var. *biaristatus* Hack.; *Erianthus saccharoides* var. *neesii* Hack.; *Saccharum alopecuroides* subvar. *angustifolium* (Nees) Roberty; *Saccharum angustifolium* Reinw. ex de Vriese)

Argentina, Venezuela, Brazil. Caespitose, slender, robust, leaf blades linear acuminate glabrous, terminal panicle oblong villous, panicles fully exerted from the uppermost leaf sheath, spikelets lanceolate acuminate, lower glume pilose, lower lemma muticous, upper lemma bidentate, 2 stamens, common in damp places, see *Nova Genera et*

Species Plantarum seu Prodrumus 26. 1788, *Flora Boreali-Americana* 1: 55. 1803, *Hortus Regius Botanicus Berolinensis* 1: 243. 1827, *Flora Brasiliensis seu Enumeratio Plantarum* 2(1): 316-317. 1829, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Pantropical. Perennial, large, tall, tufted, clumped, smooth, bamboo-like, upright or ascending, culms decumbent in the lower half, waxy below each node, rooting above the nodes, secondary shoots, ligule short and hairy, leaf sheath loose and hairy, rough leaves linear-lanceolate spiny at margins, brittle inflorescence pyramidal, large panicle plume-like, peduncle silky, spikelets white pubescent and lanceolate, lower floret sterile, upper floret bisexual, glumes glabrous, upper lemma absent, food plant, sometimes escapes as a weed, stalks quite palatable because of the sugar content, cultivated extensively, medicinal, fodder, not usually

grazed, suitable for hay and silage, the sugar cane of commerce, fairly drought resistant, susceptible to frost, will tolerate short floods, used to hold soil and act as a wind-break, fibrous canes manufactured into thatching and lining materials, ash from the leaves applied to burns, a large number of cultivars are bred for sugar production, found in open areas, wet sites, tropical rainforests, dry stony places, see *Species Plantarum* 1: 54. 1753, *Acta Literaria Universitatis Hafniensis* 285. 1778, *Syn. in India: chuktubang

S. sinense Roxb. (*Saccharum chinense* Osbeck; *Saccharum officinarum* subsp. *sinense* (Roxb.) Burkill; *Saccharum spontaneum* var. *sinense* (Roxb.) Andersson)

South Asia, India, China. Perennial, tall, vigorous, slender, side shoots, thin hard canes, 4 glumes, lodicules nonciliate, it is almost completely sterile, probably a hybrid between *Saccharum officinarum* L. and *Saccharum spontaneum* L., cultivated, high fiber content, suitable for hay and silage, fodder, cannot stand heavy frosts but will survive light frost, it will not tolerate prolonged flooding, adapted to poor soils and dry conditions, related to *Saccharum officinarum* L., Pehr Osbeck (1723-1805), *A Voyage to China and the East Indies*, by Peter Osbeck. Together with *A Voyage to Suratte*, by Olof Toreen (1723-1753) and an account of the Chinese husbandry, by Captain Charles Gustavus Ekeberg. Translated from the German by John Reinhold Forster (1729-1798), ... to which are added a fauna and flora sinensis.

London 1771, *Plants of the Coast of Coromandel* 3: t. 232. 1818, *Flora Indica; or Descriptions ...* 1: 244-248. 1820, *Öfversigt af Förhandlingar: Kongl. Svenska Vetenskaps-Akademien* 12: 157. 1855 and *A Dictionary of the Economic Products of the Malay Peninsula* 2: 1927. 1935.

Tropical Africa, Asia temperate and tropical, Europe. Perennial, vigorous, erect and coarse, very polymorphic, very variable, rhizomatous with extensive and stout rhizome system, slender, clumped to densely tufted, an enormous root system, ligule a membranous rim, sheaths glabrous, glaucous leaves narrow linear and acute with a prominent midrib, silvery panicles oblong and plume-like, paired spikelets lanceolate and overtopped by the long hairs from the callus, glumes persistent and lanceolate to pointed, upper lemma strap-shaped, grain as famine food, tender shoots eaten as a vegetable, provides poor fodder normally not relished by cattle, used to feed buffaloes in India, fodder only in time of scarcity, used for thatching and light construction work, hedging and as a windbreak, screening, pulp suitable for paper manufacture, noxious and invasive weed, soil stabilizer, a vigorous coloniser of bare ground, revegetator, potential in erosion control, medicinal, roots used as diuretic, a good degree of drought tolerance, will tolerate some flooding, can grow in poor soils, common on damp places and swamps, field borders, permanent streams, damp sandy places, damp depressions, river sand banks, along roadsides, disturbed lowlands in wetter areas, alluvial plains, shifting sand dunes, see *Mantissa Plantarum* 183. 1771, *Flora Aegyptiaco-Arabica* 16. 1775, *Observationes Botanicae* 5: 16. 1789, *Enumeratio Plantarum Horti Botanici Berolinensis*, ... 82. 1809, *Essai d'une Nouvelle Agrostographie* 8, 165. 1812, *Hortus Bengalensis, or a catalogue ...* 6. 1814, *Systema Vegetabilium* 2: 289. 1817, *Flora Indica; or Descriptions ...* 1: 241. 1820, *The Botany of Captain Beechey's Voyage* 241. 1821, *Mantissa* 2: 8, 163, 164. 1824, *Beskrivelse af Guineiske planter* 46. 1827, *Kongel. Central Nepal. Caespitose, inflorescence drooping and silky, see *Kew Bulletin* 12(3): 413. 1958, *Grasses of Burma, Ceylon, India and Pakistan* 214. 1960, *Kew Bulletin* 35(3): 703. 1980.

Sacciolepis Nash = Rhampholepis Stapf

From the Greek *sakkos* "sack" and *lepis* "a scale," referring to the saccate second glume; see Nathaniel Lord Britton (1859-1934), *Manual of the flora of the northern states and Canada*. New York 1901.

About 30-40 species, tropics and subtropics, Africa. Panicoideae, Panicoideae, Paniceae, or Panicoideae, Paniceae, Panicinae, annual or perennial of variable habit, hollow, caespitose or decumbent, herbaceous, aquatic, paludose, emergent, submerged, branched, leafy, rhizomatous or stoloniferous, often auricles present or absent, ligule a membrane fringed or unfringed, leaves oblong or linear to linear-lanceolate, plants bisexual, inflorescence a spiciform panicle open or contracted with gibbous ribbed spikelets often densely clustered, spikelets more or less turgid on short and filiform pedicels, sterile spikelets at the base of the inflorescence, 2 florets, lower floret sterile or male, upper floret bisexual, 2 glumes very unequal and ribbed, lower glume soft or rigid or sometimes reduced to a small scale, curved upper glume saccate or inflated at base, lower lemma narrow, upper lemma oblong and dorsally compressed, palea present and entire, 2 small and broad-cuneate lodicules free and fleshy, 3 stamens, ovary apex glabrous, 2 stigmas, small grain elliptic and dorsally compressed, native pasture species, rainforest, open habitats, alluvial swamps, bushland, swamps, pampas, wet places, marshes, in or near water, shallow water, type *Sacciolepis gibba* (Elliott) Nash, see *Essai d'une Nouvelle Agrostographie* 48. 1812 and *Manual of the Flora of the Northern States and Canada* 89. 1901, *Proceedings of the Biological Society of Washington* 21: 8. 1908, *Flora Tropical Africa* 9: 15. 1917, *Kew Bulletin* 27: 387-406. 1972, R.W. Pohl and N.R. Lersten, "Stem aerenchyma as a character separating *Hymenachne* and *Sacciolepis* (Gramineae: Panicoideae)." *Brittonia* 27(3): 223-227. 1975, *Flora of Tropical East Africa*

451-898. 1982, Judziewicz E. J., "A new South American species of *Sacciolepis* (Poaceae: Panicoideae: Paniceae), with a summary of the genus in the New World." *Systematic Botany* 15: 415-420. 1990, *Flora Mesoamericana* 6: 328. 1994, *Flora of Ethiopia* 7: 194-196. 1995, *Weed Research* 39(2): 159-169. Apr 1999, *Am. J. Bot.* 88: 1993-2012. 2001, *Weed Research* 42(2): 89-99. Apr 2002, *Contributions from the United States National Herbarium* 46: 557-558. 2003, *American Journal of Botany* 90: 796-821. 2003, *Diversity & Distributions* 9(1): 73-87. Jan 2003.

Species

S. sp.

in Nigeria: tappo

S. africana C.E. Hubb. & Snowden (*Sacciolepis mukuku* Vanderyst)

Tropical Africa, Madagascar. Perennial or annual, spongy, thick and swollen, weak, succulent, rhizomatous, erect, tufted, decumbent and rooting at the lower nodes, dense spicate inflorescence, spikelets compressed, lower glume 5- to 7-nerved, upper glume 9- to 11-nerved, useful grass, forming floating mats in shallow water, native pasture species, forage, good fodder, eaten during times of scarcity, a weed of rice paddy and corn fields, found in water, wet pastures, alluvial swamps, in shallow pool, seasonally flooded areas, along riverbanks, swamps, bushland, muddy waters, see *Bull. Agric. Congo Belge* 10: 249. 1919, *Bulletin agricole du Congo Belge* 16: 680. 1926, *Bulletin of Miscellaneous Information Kew* 1936(5): 294. 1936.

in Gambia: nyara fingo

in Guinea-Bissau: umpolpol

in Liberia: bu su

in Mali: niepoto

in Niger: bātata, burgu

in Nigeria: babaci, bubuci

in Sierra Leone: be, birikolonosefine, elinke, hombo, kintibo, koboro, kuli, tamedi sarana

in Upper Volta: kulugu savandé

S. angusta (Trin.) Stapf (*Panicum angustum* Trin.; *Panicum indicum* var. *angustum* (Trin.) Hook.f.; *Sacciolepis indica* var. *angusta* (Trin.) Keng)

Tropical Africa. See *The Gardeners Dictionary: ... eighth edition* no. 3. 1768, *Species Graminum* 3: t. 334. 1835, *The Flora of British India* 7(21): 42. 1897 [1896] and *Proceedings of the Biological Society of Washington* 21: 8. 1908, *Flora of Tropical Africa* 9: 763. 1920, *Claves Generum et Specierum Graminearum Primarum Sinicarum Appendice Nomenclatione Systematica* 220. 1957.

S. angustissima (Hochst. ex Steudel) Kuhlmann (*Panicum angustissimum* Hochstetter ex Steudel; *Panicum matogrossense* Kuntze; *Sacciolepis angustissima* (Steudel)

Kuhlmann; *Sacciolepis karsteniana* Mez; *Sacciolepis myuros* (Lam.) Chase; *Sacciolepis pungens* Swallen) (*Sacciolepis karsteniana* Mez, possibly dedicated to the German botanist Hermann Karsten, 1817-1908, traveler in South America 1844-1856, wrote *Plantae columbianae*. Fasciculus primus. Halis Saxonum [Halle] 1857 and *Florae Columbiae terrarumque adiacentium specimina selecta in peregrinatione ... Berolini* 1858 [1859]-1869; see J.H. Barnhart (1871-1949), *Biographical notes upon botanists*. 2: 272. Boston 1965; Ethelyn (Daliaette) Maria Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933; Ignatz Urban, *Geschichte des Königlichen Botanischen Museums zu Berlin-Dahlem (1815-1913). Nebst Aufzählung seiner Sammlungen*. 1916; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993; *Taxon* 12: 103-105. 1963)

Colombia, Venezuela, Brazil, Bolivia. Perennial or annual, wiry, terrestrial, tufted, erect, glabrous, usually branched, ligule membranous, leaf blades linear acute somewhat pungent, inflorescence terminal and densely spike-like, hairy spikelets ovate not gibbous, lower glume 3-nerved, upper glume 7-nerved, upper lemma shiny obtuse to acute, found along riverbanks, campos, seasonally inundated areas, ponds, wet places, swamps, lowland savannahs, see *Tableau Encyclopédique et Méthodique ... Botanique* 1: 172. 1791, *Synopsis Plantarum Glumacearum* 1: 66. 1853, *Fl. Bras.* 2(2): 236. 1877, *Revisio Generum Plantarum* 3: 362. 1898 and *Enum. Vasc. Pl. Suriname* 53. 1906, *Proceedings of the Biological Society of Washington* 21: 7. 1908, *Repertorium Specierum Novarum Regni Vegetabilis* 15: 123. 1918, *Comissão de Linhas Telegraficas Estratégicas de Matto-Grosso ao Amazonas, Botanica* 67, Anexo 5(Bot. 11): 57-58, 92, t. 4. 1922, *Fl. Suriname* 1(1): 403. 1943, *Phytologia* 14(2): 85. 1966.

S. auriculata Stapf (*Sacciolepis indica* (L.) Chase; *Sacciolepis pergracilis* Chiov.)

Uganda, Madagascar, Benin. Herbaceous, slender, thin, weak, tufted, fibrous root system, see *Proceedings of the Biological Society of Washington* 21: 8. 1908, *Flora of Tropical Africa* 9: 762. 1920, *Plantae Novae vel Minus Notae e regione Aethiopica* 24. 1928 [1911-1951], series published in different journals, also *Plantae Novae vel Minus Notae ex Aethiopia*.

S. barbigrandularis Mez (*Sacciolepis transbarbata* Stapf)

Tanzania. Along riverbanks, streams, see *Flora of Tropical Africa* 9: 761. 1920, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 57: 194. 1921.

S. campestris (Nees) Parodi ex Nicora (*Hymenachne campestris* Nees; *Panicum vilvoide* var. *campestre* (Nees) Döll; *Sacciolepis campestris* (Nees) Parodi ex Burkart, nom. illeg., non *Sacciolepis campestris* (Nees) Parodi ex Nicora; *Sacciolepis vilvoide* (Trin.) Chase)

Brazil. See *De Graminibus Paniceis* 171. 1826, *Flora Brasiliensis seu Enumeratio Plantarum* 2(1): 274-275. 1829, *Flora Brasiliensis* 2(2): 233. 1877 and *Proceedings of the Biological Society of Washington* 21: 7. 1908, *Darwiniana* 15(1-2): 75. 1969, *Flora Illustrada de Entre Ríos (Argentina)* 6(2): 275. 1969.

S. chevalieri Stapf (*Panicum incurvum* (Stapf) Peter, nom. illeg., non *Panicum incurvum* L. ex Munro; *Sacciolepis antsirabensis* A. Camus; *Sacciolepis brevifolia* Stapf; *Sacciolepis incurva* Stapf; *Sacciolepis palustris* Napper; *Sacciolepis strictula* Pilg.)

Tropical Africa, Madagascar, Tanzania. Perennial, herbaceous, tufted, shortly rhizomatous, shortly stoloniferous, filiform leaf blades, dense panicle spike-like, spikelets compressed, found in wet soils, swamps, marshes, vleis, along streams, see *Flora of Tropical Africa* 9: 754-755, 761. 1920, *Repertorium Specierum Novarum Regni Vegetabilis* 40: 202, 203. 1930, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 11: 651. 1932, *Bulletin de la Société Botanique de France* 104: 282. 1957, *Kirkia* 3: 128. 1963.

S. curvata (L.) Chase (*Panicum coryphorum* Kunth; *Panicum curvatum* L.; *Panicum petersi* Eichgr. ex Peter)

India, Sri Lanka, South Africa, Madagascar, Tanzania. Short-lived perennial or annual, trailing, slender, tufted, branched, prostrate at the base, spreading, rooting at the lower nodes, leaf sheaths rounded on the back, soft leaf blades, narrow panicles loosely contracted, spikelets pedicellate, upper glume longer than lower glume, a good fodder for horses, used for the treatment of malaria, found in wet soils, swamps, pastures, vleis, along streams and rivers, shady places, under trees, forest undergrowth, along roadsides, dry stream bed, see *Systema Naturae*, edition 12 2: 732. 1767, *Révision des Graminées* 2: 387, t. 107. 1831 and *Proceedings of the Biological Society of Washington* 21: 8. 1908, *Abhandlungen der Königlichen Gesellschaft der Wissenschaften, Göttingen. Mathematisch-Physikalische Klasse* 13(2): 110. 1928, *Grasses of Ceylon* 122. 1956, *Grasses of Burma* ... 357. 1960.

in English: forest hood grass

in East Africa: ukoka dume (Swahili)

in South Africa: kappiegras

S. cymbiandra (Pilg.) Stapf (*Sacciolepis cymbiandra* Stapf)

Africa, Benin. Perennial, erect, emergent, spongy culms, weed of deepwater rice, grazed by stock, growing in marshy places, in or near water.

in Sierra Leone: yoli

S. fenestrata Bor

Southeast Asia, Thailand. Indeterminate species, see *Dansk Botanisk Arkiv* 23: 154, f. 1. 1965.

S. geniculata B.K. Simon

Zambia. See *Kirkia* 8: 86. 1971.

S. gibba (Elliott) Nash (*Panicum gibbum* Elliott; *Sacciolepis striata* f. *gibba* (Elliott) Fernald)

Northern America, U.S., Guianas. Grows in damp and wet soils, see also *Sacciolepis striata* (L.) Nash, see *Species Plantarum* 2: 1048. 1753, *A Sketch of the Botany of South-Carolina and Georgia* 1(2): 116. 1816 and *Manual of the Flora of the Northern States and Canada* 89. 1901, *Bulletin of the Torrey Botanical Club* 30(7): 383. 1903.

S. huillensis (Rendle) Stapf (*Panicum huillense* Rendle; *Sacciolepis lebrunii* Robyns; *Sacciolepis micrococca* Mez; *Sacciolepis spiciformis* (A. Rich.) Stapf) (after the Belgian botanist Jean-Paul Antoine Lebrun, 1906-1985, his works include *Recherches morphologiques et systématiques sur les Caféiers du Congo*. Bruxelles 1941, *Aspects de végétation des parcs nationaux du Congo Belge. Série I. Parc National Albert. Volume I. Fascicules 3-4-5 ... La Végétation du Nyiracoongo*. Bruxelles 1941 *La Végétation de la plaine alluviale au Sud du lac Édouard*. [Exploration du Parc National Albert. Mission J. Lebrun. fasc. I.] Bruxelles 1947 and "La végétation psammophile du littoral congolais." *Brussel Kon. Acad. Overz. Wet. K l. Nat. Gen. Wet. N.R. XVIII - 1*, pl. 165. 1969, with W. Robyns wrote "Essai d'une monographie du genre *Tinnea*." *Bull. Jard. Bot. Bruxelles* 8: 161-183. 1930, with A. Taton and L. Toussaint wrote *Contribution à l'étude de la flore du Parc National de la Kagera*. [Exploration du Parc National de la Kagera. Mission J. Lebrun. fasc. I.] Bruxelles 1948, with G. Gilbert wrote "Une classification écologique des forêts du Congo." Sér. scient. no. 64, *INEAC*. Bruxelles 1954; see J.H. Barnhart, *Biographical notes upon botanists*. 2: 356. 1965)

Tropical Africa, South Africa. Short-lived perennial or annual, rare, montane, aquatic, loosely tufted, inflorescence spike-like, spikelets shortly pedicellate and laterally compressed, in sandy soil, damp pasture, sometimes submerged in water, see *Tentamen Florae Abyssinicae* ... 2: 359. 1850, *Catalogue of the African Plants Collected by Dr. F. Welwitsch in 1853-61* 2(1): 174. 1899 and *Feddes Repertorium Specierum Novarum Regni Vegetabilis* 15: 122. 1918, *Flora of Tropical Africa* 9: 755-756. 1920, *Bulletin du Jardin Botanique de l'État* 9(3): 185. 1932.

in English: annual swamp grass

S. incana Mez (*Sacciolepis transbarbata* Stapf)

Zambia. See *Flora of Tropical Africa* 9: 761. 1920, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 57: 194. 1921.

Old World tropics. Annual or short-lived perennial, tufted to loosely tufted, slender, solid, spreading, sprawling, more or less weakly rhizomatous, mostly glabrous, erect or decumbent at the base and rooting at the lower nodes, foliage mostly basal, leaf sheaths glabrous, ligule membranous more or less glabrous or ciliate with white hairs, linear leaf blades oblong and acuminate, erect spike-like panicle oblong to elongate, spikelets glabrous or hispid, densely crowded pedicellate spikelets, first floret sterile, second floret fertile, glumes membranous and very unequal, soft and clasping lower glume 5-nerved, 9-nerved upper glume curved and inflated at base, 7-nerved lower lemma more or less glabrous, upper lemma with margins involute, palea present as a small hyaline scale, seeds commonly dispersed by animals, weed species in maize fields and in rice padis, low forage value, good fodder but rarely used because of its small yield, grazed by swamp buffaloes in Vietnam, grows in moist places and wet areas, near running fresh water, lower montane forest, openings in wet forest and along trails, marshy places, in mud, freshwater swamps, beach along river, poor wet soils in open areas, disturbed and open areas in wet habitats, sandy soil, grasslands, crests of ridges, roadsides, periodically flooded habitats, seasonally inundated bushland, poorly drained open depressions where the soils remain waterlogged for extended periods, see *Species Plantarum* 1: 63-64. 1753, *Sp. Pl.* edition 2: 94. 1762, *Mantissa Plantarum* 2: 184. 1771, *Tableau Encyclopédique et Méthodique ... Botanique* 1: 170, 172. 1791, *Prodromus stirpium in horto ad Chapel Allerton vigentium*. 18. India, Southeast Asia, Vietnam, Indonesia. Perennial, stout, thick, trailing, coarse, spongy, succulent, inflated, aquatic, submerged or partially submerged, decumbent, creeping, rhizomatous, rooting at the lower nodes, leaf sheaths inflated, ligules truncate, inflorescence contracted, erect flowering branches, spikelets acuminate, grains eaten by local people, potential environmental weed, good fodder grass relished by elephants, eaten by the cattle when young and not covered by algae, in Vietnam a source of feed for cattle and heifers, suitable for mud-binding, common in fallow lands and paddy fields, in moist and marshy soils, in shallow water, lakes, clayey and sandy, natural freshwater habitats, swampy areas, alluvial swamps, see *Museum Naturalium Academiae Upsaliensis* 10: 148. Upsaliae [Uppsala] 23 Nov 1791, *Species Plantarum. Editio quarta* 1: 341. 1797, *Systema Vegetabilium* 2: 442. 1817, *Plant. Sp. Ind. S. micrococca Mez (*Panicum huillense* Rendle; *Panicum micrococcum* (Mez) Peter; *Sacciolepis huillensis* (Rendle) Stapf; *Sacciolepis nana* Stapf)

Senegal to Sudan, Benin. Annual, tufted, papillose upper leaf surface, glabrous spikelets, a weed of rice padis, found in damp and swampy places, see *Catalogue of the African Plants Collected by Dr. F. Welwitsch in 1853-61* 2(1): 174. 1899 and *Feddes Repertorium Specierum Novarum Regni Vegetabilis* 15: 122. 1918, *Flora of Tropical Africa* 9: 753,

755. 1920, *Repertorium Specierum Novarum Regni Vegetabilis* 40: 202 & Anhang, 52. 1930.

S. myosuroides (R. Br.) A. Camus (*Hymenachne myosuroides* (R. Br.) Balansa; *Panicum myosuroides* R. Br.; *Sacciolepis myosuroides* (R. Br.) Chase ex E.G. Camus; *Sacciolepis myosuroides* (R. Br.) Hughes, nom. illeg.)

Malaysia, Nepal, China, India, Sri Lanka, Australia. Perennial or annual, erect, creeping, slender, tufted, often geniculate, soft blades, ligule a ciliate membrane, spike-like inflorescence, panicles densely flowered, small spikelets glabrous, useful for erosion control, native pasture species, good fodder for cattle and buffaloes, found in lowlands influenced by the tides, marshes, moist or wet sites, floodplains, water courses, on sandy soils, in clay pockets, rice fields, see *Prodromus Florae Novae Hollandiae* 189. 1810, *Journal de Botanique (Morot)* 4(7): 143. 1890 and *Flore Générale de l'Indo-Chine* 7: 460. 1922, *Bulletin of Miscellaneous Information Kew* 1923(9): 330. 1923, *Grasses of Ceylon* 122. 1956, *Grasses of Burma ...* 358. 1960.

in India: dhidhina, didhina, kodela, kora lom, musa panchi, musapunchi, pokalia, saphetkar, supedkhar, suphetka

S. myosuroides (R. Br.) A. Camus var. *nana* S.L. Chen & T.D. Zhuang

China. See *Bulletin of Botanical Research* 4(2): 124-125. 1984.

S. myuros (Lam.) Chase (*Hymenachne myosurus* (Rich.) Nees; *Hymenachne myuros* (Lam.) P. Beauv.; *Hymenachne phleiforme* (J. Presl) E. Fourn.; *Panicum myosurus* Rich.; *Panicum myuros* Lam.; *Panicum phleiforme* J. Presl)

Mexico, Brazil, Bolivia, Colombia, Guatemala, West Indies, Costa Rica, Venezuela, Peru, Paraguay. Perennial or annual, tufted, aquatic, erect, slender, robust, soft, leaves glabrous, basal leaf sheaths usually inflated, leaf blades linear acute, dense inflorescence, slender panicle spiciform unbranched, spikelets ovate glabrous or rarely pubescent, lower glume 5-nerved, upper glume 9-nerved gibbous, upper glume and lower lemma veined, upper lemma shiny apiculate, lower lemma 7-nerved, forage, useful for erosion control, emollient, used for orchitis, common on very shallow ponds, in Vietnam a source of feed for heifers, growing in wet areas, margin of marshes, ponds, seasonally wet plains, campos, grassland, savannahs and marshy savannahs, resembles *Sacciolepis pungens*, see *Tableau Encyclopédique et Méthodique ... Botanique* 1: 172. 1791, *Actes de la Société d'Histoire Naturelle de Paris* 1: 106. 1792, *Essai d'une Nouvelle Agrostographie* 48, 49, 165. 1812, *Prim. Fl. Latin *sanguinarius*, *a*, *um* "blood, belonging to blood," *sanguis*, *inis* "blood." Panicoideae, Panicoideae, Paniceae, or Panicoideae, Paniceae, Digitariinae, type *Sanguinaria nevadensis* Bub., see *Species Plantarum* 1: 55, 505. 1753, *Enumeratio Methodica Plantarum* 207. 1759, *Systema Naturae, Editio Decima* 846, 855, 1359. 1759, *Fam. Pl.* 2: 495. 1763, *Das Neueste aus dem Reiche der Pflanzen ...* 2: 4. 1764, *Historia Stirpium Indigenarum Helvetiae Inchoata* 2: 244. 1768, *Flora Carniolica, Editio Secunda* 1: 52. 1771, *Observationes Botanicae* 4: 16. 1786, *Flora Caroliniana, secundum ...* 76. 1788, *Nova Genera et Species Plantarum seu Prodromus* 21. 1788, *Agrostografia Brasiliensis* 31, t. 1, f. 4. 1823, *De Graminibus Paniceis* 48, 76. 1826, *Flora Brasiliensis seu Enumeratio Plantarum* 2: 20, 85, 87. 1829, *Mémoires de la Société d'Agriculture, Sciences et Arts d'Angers* 1: 165, t. 7, f. 1. 1831, *A Manual of the Botany of the Northern United States* 611. 1848, *Synopsis Plantarum Glumacearum* 1: 37-38. 1855 [1853], *Linnaea* 26: 533. 1855, *Anales de la Universidad de Chile* 36: 207-208.

1870, *Flora Australiensis: A Description ...* 7: 464. 1878 and *Flora Pyrenaea ...* 4: 256-258. 1901, *Österreichische Botanische Zeitschrift* 51: 290. 1901, *Proceedings of the Biological Society of Washington* 19(34): 191-192. 1906, *Notulae Systematicae. Herbarium du Museum de Paris* 2: 216. 1912, *Flora of Tropical Africa* 9: 424. 1919, *Hooker's Icones Plantarum* 35: t. 3420. 1940, *Monograph of the Genus Digitaria* 573, 851, 866. 1950, *Bothalia* 7: 467. 1961, *Journal of the Arnold Arboretum* 47(3): 270-272. 1966, *Blumea* 21(1): 1-80. 1973, *Fieldiana: Botany, New Series* 4: 1-608. 1980, *Flora of Tropical East Africa* 451-898. 1982, *Brunonia* 6: 131-213. 1984, *Sida* 12(1): 209-222. 1987, *Flora Mesoamericana* 6: 365-371. 1994, *Flora Fanerogámica Argentina* 19(1): 11-16. 1995, *Memoirs of the New York Botanical Garden* 78: 509-540. 1996, *Genera Graminum* 298-300. 1999, *Contributions from the United States National Herbarium* 46: 193-213, 558. 2003.

Sanguinella Gleichen = *Digitaria* Haller

From the Latin *sanguis, inis* "blood."

Panicoideae, Panicoideae, Paniceae, or Panicoideae, Paniceae, Digitariinae, see *Das Neueste aus dem Reiche der Pflanzen ...* 2: 4. 1764 and *Bothalia* 7: 467. 1961, *Memoirs of the New York Botanical Garden* 78: 509-540. 1996, *Genera Graminum* 298-300. 1999, *Contributions from the United States National Herbarium* 46: 193-213. 2003.

Santia Savi = *Polypogon* Desf., *Santia* Wight & Arn. (Rubiaceae)

For the Italian botanist Giorgio Santi, 1746-1822, professor of botany and chemistry, 1782-1814 Director of the Botanical Garden of Pisa (succeeded Angelo Attilio Tilli, Director from 1740 to 1782), his writings include *Analisi chimica delle acque dei bagni Pisani, e dell'acqua acidula di Asciano*. Pisa 1789 and *Viaggio al Montamiata*. Pisa 1795. See L. Amadei, "Note sull'Herbarium Horti Pisani: l'origine delle collezioni." *Museol. Scient.* 4(1-2): 119-129. 1987; Fabio Garbari, L. Tomasi Tongiorgi and A. Tosi, *Giardino dei Semplici: L'Orto Botanico di Pisa dal XVI al XX secolo*. Pisa 1991; F.A. Staffeu, "Die Geschichte der Herbarien." *Bot. Jahrb. Syst.* 108(2/3): 155-166. 1987; J.H. Barnhart, *Biographical notes upon botanists*. 3: 210. 1965; Ethelyn Maria Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993.

Pooideae, Poaceae, Agrostidinae, see *Species Plantarum* 1: 61. 1753, *Memoria di Matematica e di Fisica della Società Italiana di Scienze Residente in Modena, Parte contenente le Memorie di Fisica* 8: 479. 1799, *Flora Atlantica* 1: 66-67. 1798 [1800], *Flora Palermitana* 1: 73. 1845 and

Contributions from the United States National Herbarium 48: 583-588, 605. 2003.

Sarga Ewart & White = *Sarga* Ewart, *Sorghum* Moench

Meaning not explained, possibly from the Greek *sargane* "a basket, a plait, a band" or derived from *sorghum*, or from Latin *sargus* "a kind of sea fish."

Panicoideae, Andropogoneae, Sorghinae, serious weeds and poisons, providing fodder and grain for stock, pollen for bees, formerly known as *Sorghum* and formerly making up the bulk of subgenera *Parasorghum* and *Stiposorghum*, type *Sarga stipoidea* Ewart & White, see *Methodus Plantas Horti Botanici ...* 207. 1794, *Prodromus Florae Novae Hollandiae* 200. 1810, *Révision des Graminées* 2: 367. 1830, *Tentamen Florae Abyssinicae ...* 2: 469. 1850, *Naturwissenschaftliche Reise nach Mossambique ...* 563. 1863, *Flora Australiensis: A Description ...* 7: 541. 1878, *Monographiae Phanerogamarum* 6: 524-525. 1889 and A.J. Yates, "Contemporary landscape burning patterns in the far North Kimberley region of north-west Australia: human influences and environmental determinants." *Journal of Biogeography* 31(8): 1317-1333. Aug 2004.

Species

S. angustum (S.T. Blake) Spangler (*Sorghum angustum* S.T. Blake)

Australia.

S. intrans (F. Muell. ex Benth.) Spangler (*Sorghum intrans* F. Muell. ex Benth.)

Australia.

S. leiocladum (Hack.) Spangler (*Andropogon australis* var. *leiocladus* Hack.)

Australia.

S. plumosum (R. Br.) Spangler (*Holcus plumosus* R. Br.)

Australia.

S. timorensis (Kunth) Spangler (*Andropogon tropicus* var. *timorensis* Kunth)

Australia, Asia.

Sarocalamus Stapleton

China, Himalaya. Bambusoideae, erect to drooping, tillering, unarmed, leptomorph rhizomes, inflorescence branches erect, 3 stamens, type *Sarocalamus racemosus* (Munro) Stapleton, see *Transactions of the Linnean Society of London* 26(1): 17. 1868, *Bulletin Mensuel de la Société Linnéenne de Paris* 2: 1067. 1893 and *Acta Phytotaxonomica Sinica* 6(4): 355-356. 1957, *Journal of Bamboo Research* 1(2): 171. 1982, *Journal of Bamboo Research* 2(1): 39. 1983, *Fl. Ind. Enumerat.-Monocot.* 283. 1989, *Kew Bulletin* 44: 352. 1989, Chris M.A. Stapleton et al., "Sarocalamus, a New Sino-Himalayan Bamboo Genus (Poaceae: Bambusoideae)." *Novon* 14: 345-349. 2004.

Species

S. faberi (Rendle) Stapleton (*Arundinaria faberi* Rendle; *Bashania faberi* (Rendle) T.P. Yi; *Sinarundinaria faberi* (Rendle) Keng f.)

Asia. See *Journal of the Linnean Society, Botany* 36(254): 435. 1904, *Journal of Japanese Botany* 11(1): 1. 1935, *Technical Bulletin of the National Forestry Research Bureau* 8: 13. 1948, *Journal of Bamboo Research* 12(2): 52-53. 1993, *Novon* 14(3): 348. 2004.

S. racemosus (Munro) Stapleton (*Arundinaria racemosa* Munro; *Fargesia racemosa* (Munro) Yi; *Yushania racemosa* (Munro) R.B. Majumdar)

Asia. See *Transactions of the Linnean Society of London* 26(1): 17. 1868, and *Journal of Bamboo Research* 2(1): 39. 1983, *Fl. Ind. Enumerat.-Monocot.* 283. 1989, *Cell and Chromosome Research* 15(3): 12. 1992, *Novon* 14(3): 347. 2004.

S. spanostachyus (T.P. Yi) Stapleton (*Bashania spanostachya* T.P. Yi)

China. See *Acta Botanica Yunnanica* 11(1): 35-37, f. 1. 1989, *Novon* 14(3): 348. 2004.

Sartidia De Winter

An anagram of *Aristida*, a related genus.

About 4 species, Southern Africa, Madagascar. Arundinoideae, Aristideae, perennial, herbaceous, unbranched, unarmed, densely tufted, rhizomatous, auricles absent, ligule densely fringed, plants bisexual, inflorescence paniculate, narrow and erect panicle, spikelets solitary and pedicellate, 1 floret bisexual, 2 glumes more or less equal, upper glume 3-nerved, lower glume 3- to 7-nerved, pungent floret callus, 3 glabrous spreading awns, palea present, 2 free and toothed lodicules, 3 stamens, ovary glabrous, 2 plumose or feathery stigmas, savannah, type *Sartidia angolensis* (C.E. Hubb.) De Winter, see *Species Plantarum* 1: 82. 1753 and *Kirkia* 3: 137. 1963, *Am. J. Bot.* 88: 1988-1992. 2001.

Species

S. angolensis (C.E. Hubb.) De Winter (*Aristida angolensis* C.E. Hubb.)

Zambia, Angola. Perennial, rare, erect, tufted, rhizomatous, callus acute, savannahs, desert, see *Kew Bulletin* 1949: 359. 1949, *Kirkia* 3: 137. 1963.

S. jucunda (Schweick.) De Winter (*Aristida jucunda* Schweick.)

South Africa, Transvaal. Perennial, rare, rhizomatous, densely tufted, callus obtuse, rocky places, see *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 76(2): 221-223. 1954.

S. perrieri (A. Camus) Bourreil (*Aristida perrieri* A. Camus)

Africa, Madagascar. See *Bulletin de la Société Botanique de France* 73: 434. 1926.

S. vanderystii (De Wild.) De Winter (*Aristida vanderystii* De Wild.)

Africa, Congo. See *Bulletin du Jardin Botanique de l'État* 6: 40, t. 35, f. 7-12. 1919.

Sasa Makino & Shibata = *Neosasamorpha* Tatewaki, *Nipponobambusa* Muroi, *Sasaella* Makino, *Sasamorpha* Nakai

After a Japanese name.

About 20-58 species, eastern Asia, mainly Japan, Korea. Bambusoideae, Bambusodae, Bambuseae, Arundinariinae, perennial, usually sympodial, rarely monopodial, shrubby, ascending, woody, diffuse, spreading, slender, unarmed, persistent, internodes without grooves, long creeping rhizomes, upper culm nodes with 1 branch, flowering culms leafy, culm sheaths usually persistent, internodes hollow, ligule an unfringed membrane, leaves chartaceous to coriaceous, plants bisexual, inflorescence paniculate or racemose, spikelets compressed and linear-lanceolate, 4-10 flowers, 2 glumes at the base of each spikelet, palea present, 3 lodicules ovate or narrowly ovate, 6 stamens, ovary glabrous without the apical appendage, 3 feathery stigmas, woodland, see *Genera Plantarum* 1: 236. 1789, *Flora Boreali-Americana* 1: 73. 1803, *Abhandlungen der Mathematisch-Physikalischen Classe der Königlich Bayerischen Akademie der Wissenschaften* 3(3): 745, pl. 5, f. 3. 1843, *Bulletin de l'Herbier Boissier* 7(9): 716. 1899 and *Botanical Magazine (Tokyo)* 15(168): 18, 25, 27. 1901, *Bulletin de la Société Dendrologique de France* 12: 73-87. 1909, *Journal of the Arnold Arboretum* 6(3): 145-150. 1925, *Journal of Japanese Botany* 6: 15-16. 1929, *Flora of Hokkaido and Saghalien*. in J. Fac. Agric. Hokkaido Univ., 26, 1930-1932, *Journal of the Faculty of Science, Hokkaido University. Series 5, Botany* 26: 180-181, 183, 189. 1931, *Research*

Bulletins of the College Experiment Forests, College of Agriculture, Hokkaido Imperial University vol. 7: 99-130, pl. 1-4. 1932, *Science Education [Rika Kyô-iku]* 15(5-6): 21-27, 66-67, 69-76. 1932, *Journal of Japanese Botany* 10: 564, 599. 1934, *Acta Phytotax. & Geobot. Species

S. admirabilis Koidz. (*Sasa elegantissima* Koidz.; *Sasa nana* var. *elegantissima* (Koidz.) S. Suzuki)

Japan. Leaf tips dangling, see *Botanical Magazine* 26: 11, f. 1. 1912, *Acta Phytotaxonomica et Geobotanica* 4: 86. 1935, *Acta Phytotaxonomica et Geobotanica* 8: 55. 1939, *Japanese Journal of Botany* 19(3): 453. 1967.

in Japan: katuragi-zasa, tanga-zasa

S. akiuensis (S. Suzuki) S. Suzuki (*Sasa suzukii* var. *akiuensis* S. Suzuki)

Japan, Akiu, Miyagi Prefecture, northern Honshu. Robust, culm sheaths and nodes densely pilose, internodes densely puberulous, leaves glabrous beneath, leaf sheaths glabrous, leaf blades chartaceous-coriaceous oblong-lanceolate, flowers not seen, species similar to *Sasa suzukii* Nakai, see *Japanese Journal of Botany* 18: 306. 1964, *Hikobia* 7(3-4): 95. 1975.

in Japan: akiu-nemagari

S. albosericea W.T. Lin et J.Y. Lin

China. See *Acta Phytotaxonomica Sinica* 26(3): 232-233, pl. 12. 1988.

S. amphitricha Koidz. (*Sasa chartacea* (Makino) Makino & Shibata; *Sasa kawanoyuensis* Koidz.; *Sasa kawanoyuensis* var. *pilosa* Koidz.; *Sasa kawanoyuensis* var. *puberula* Koidz.; *Sasa kozasa* Nakai; *Sasa kusirensis* Nakai; *Sasa nikkoensis* var. *ionochaeta* Nakai; *Sasa sendaica* (Makino))

Japan. See *Botanical Magazine* (Tokyo) 15: 27. 1901, *Journal of Japanese Botany* 5(2): 8. 1928, *Journal of Japanese*

Botany 6: 23. 1929, *Journal of the Faculty of Agriculture of the Hokkaido University* 26: 186. 1931, *Journal of Japanese Botany* 10(9): 553. 1934, *Acta Phytotaxonomica et Geobotanica* 4: 18. Kyoto 1935, *Botanical Magazine* (Tokyo) 46: 50. 1936, *Acta Phytotaxonomica et Geobotanica* 22: 9. 1948, *Journal of Japanese Botany* 22: 10. 1948, *Journal of Japanese Botany* 67: 31-34. 1992.

in Japan: ohkuma-zasa, sendai-zasa

S. argenteostriata (Regel) E.G. Camus (*Arundarbor argenteostriata* (Regel) Kuntze; *Arundinaria argenteostriata* (Regel) Ohwi; *Arundinaria argenteostriata* (Regel) Vilm.; *Bambusa argenteo-striata* Regel; *Bambusa argenteostriata* Regel; *Nipponocalamus argenteostriatus* (Regel) Nakai; *Pleioblastus argenteo-striatus* (Regel) Nakai; *Sasa argenteo-striata* (Regel) E.G. Camus; *Sasa argenteostriata* E.G. Camus)

Japan. Culm green, glabrous, sheath green shorter than internode, no sheath auricles, sheath ligule very tiny, leaves ovate lanceolate, ornamental, see *Gartenflora* 14: 363, pl. 490, f. 5. 1865, *Revisio Generum Plantarum* 2: 761. 1891 and *Les Bambusées* 23. 1913, *Journal of Japanese Botany* 9(4): 236. 1933, *Journal of Japanese Botany* 18: 350. 1942, *Fl. Japan* 80. 1953.

in Japan: okina-dake

S. asahinae Makino et Nakai (*Neosasamorpha asahinae* (Makino & Nakai ex Nakai) Tatew.; *Sasa asahinae* Makino & Nakai ex Nakai) (named for the Japanese lichenologist Yasuhiko Asahina (1881-1975), with the biochemist Keita Shibata (Shibata Keito), 1877-1949, wrote *Chemistry of lichen substances*. 1954; see T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 364. 1972)

Japan. Internode glabrous, branching on the upper part of the culm, leaves lanceolate or oblong-lanceolate, see *Journal of Japanese Botany* 10(9): 548. 1934.

in Japan: goteba-zasa

S. aureostriata (Regel) E.G. Camus (*Arundarbor aureostriata* (Regel) Kuntze; *Arundinaria aureo-striata* (Regel) Vilm.; *Arundinaria variabilis* var. *aureo-striata* (Regel) Makino ex Houz. de Leh.; *Bambusa aureostriata* Regel; *Phyllostachys kumasasa* var. *aureo-striata* (Regel) Makino; *Sasa aureo-striata* (Regel) E.G. Camus; *Shibataea chinensis* cv. *aureo-striata*; *Shibataea chinensis* f. *aureostriata* (Regel) C.H. Hu; *Shibataea kumasaca* (Zoll. ex Steud.) Makino f. *aureo-striata* (Regel) Suzuki; *Shibataea kumasaca* var. *aureo-striata* (Regel) Makino; *Shibataea kumasaca* var. *aureo-striata* (Regel) Nakai, nom. illeg., non *Shibataea kumasaca* var. *aureo-striata* (Regel) Makino)

Japan. See *Gartenflora* 14: 362. 1865, *Revisio Generum Plantarum* 2: 761. 1891, *Botanical Magazine* (Tokyo), Special Issue 156-160. 1897 and *Le Bambou* 1: 113. 1906, *Les Bambusées* 23. 1913, *Botanical Magazine* (Tokyo) 28(325):

Japan. Nodes densely pilose, see *Botanical Magazine* 15: 25. 1901, *Journal of Japanese Botany* 8: 43. 1932, *J. Jap. Bot.* 8: 43. 1933, *Journal of Japanese Botany* 10(9): 561-562. 1934, *Journal of Japanese Botany* 11(2): 82-83. 1935, *Acta Phytotaxonomica et Geobotanica* 6: 73, 77, 283. 1937,

Transactions of the Sapporo Natural History Society 13: 189. 1940, *Japanese Journal of Botany* 19(1): 123. 1965.

in Japan: oze-zasa

S. yahikoensis Makino var. *rotundissima* (Makino and Uchida) S. Suzuki (*Sasa iburiensis* Nakai; *Sasa rotundissima* Makino & Uchida)

Japan. Culm sheaths hairy, internodes and leaf sheaths glabrous, leaves ovate-oblong and softly pubescent beneath, see *Journal of Japanese Botany* 6: 22. 1929, *Journal of Japanese Botany* 16: 2. 1940, *Japanese Journal of Botany* 19(1): 125. 1965.

in Japan: iwate-zasa

Sasaella Makino = Sasa Makino & Shibata

The diminutive of *Sasa* Makino & Shibata.

About 10-13 species, Japan. Bambuseae, Arundinariinae, erect, spreading, sympodial, creeping rhizomes hypogeous, 1-3 branches per node, nodes swollen, internodes elongated, culm sheath persistent and coriaceous, leaves lanceolate to oblong-lanceolate and acuminate with a sharp point, leaf sheaths coriaceous, inflorescence paniculate, spikelets narrowly lanceolate 5- to 10-floreted, 2 glumes, lemmas ovate and acuminate, palea present, 3 ovate lodicules, 2-6 stamens, ovary ovoid, 3 feathery stigmas, possibly a natural hybrid between *Sasa* and *Pleioblastus*, type *Sasaella ramosa* (Makino) Makino, see *Flora Boreali-Americana* 1: 73. 1803 and *Botanical Magazine* (Tokyo) 15(168): 18, 25, 27. 1901, *Journal of Japanese Botany* 6: 15. 1929, *Bibliogr. Muroi, *Hyogo Prefecture Journal, Secondary Edition, Natural History* 6: 89. 1940, *Journal of Japanese Botany* 18(7): 350, 363. 1942, *Journal of Japanese Botany* 51(5): 151. 1976.

in Japan: sado-zasa

S. sasakiana Makino & Uchida (*Arundinaria sasakiana* (Makino & Uchida) Nakai; *Nipponocalamus sasakiana* (Makino & Uchida) Muroi ex Sugimoto)

Japan, origin unknown. Robust, glabrous, erect, branching in the upper part of the culm, 3 branches on 1 node, leaf blades lanceolate dark green, used as a windbreaker and for handicrafts, edible young shoots, see *Journal of Japanese Botany* 6(7): 15. 1929, *Journal of Japanese Botany* 10(9): 572-573. 1934, *New Keys Jap. Trees* 464. 1961.

in Japan: toge-dake, touge-dake, touge-zasa

S. sawadai (Makino) Makino ex Koidzumi (*Arundinaria sawadai* (Makino) Nakai; *Nipponobambusa sawadai* (Makino) Muroi; *Pleioblastus sawadai* Makino; *Sasaella marunoi* Hatus.; *Sasaella sawadai* (Makino) Koidz.)

Japan. Rare to very rare, 3 branches per node, internodes and nodes glabrous, leaf blades lanceolate, leaves glabrous upper and densely pubescent beneath, see *Journal of Japanese Botany* 4(1): 3. 1927, *Journal of Japanese Botany* 10(9): 573. 1934, *Hyogo Prefecture Journal, Secondary*

Edition, Natural History 6: 89. 1940, *Acta Phytotaxonomica et Geobotanica* 10: 297. 1941, *Journal of Geobotany* 20(2): 36. 1972.

in Japan: hakone-shino, hakone-medake

S. sawadai (Makino) Makino ex Koidzumi var. *aobayamana* S. Suzuki

Japan. Densely puberulous leaf sheaths, usually 3 branches per node, internodes minutely pubescent to puberulous, nodes prominent and glabrous, culm sheaths glabrous or sometimes minutely hairy to pilose, leaf blades lanceolate to linear-oblong, leaves densely softly pubescent beneath, see *Journal of Japanese Botany* 53(2): 29. 1978.

in Japan: aobayama-zasa

S. shiobarensis (Nakai) Nakai ex Koidzumi (*Arundinaria aikawensis* Nakai; *Arundinaria iwabuchii* Koidz.; *Arundinaria nikkomontana* Koidz.; *Arundinaria sadoensis* var. *infrapilosa* Koidz.; *Arundinaria sedenicola* Koidz.; *Arundinaria shiobarensis* Nakai; *Nipponobambusa sadoensis* var. *infrapilosa* (Koidz.) Muroi; *Sasaella aikawensis* (Nakai) Koidz.; *Sasaella iwabuchii* Makino ex Koidz.; *Sasaella nikkomontana* (Koidz.) Koidz.; *Sasaella sedenicola* (Koidz.) Koidz.; *Sasaella shiobarensis* (Nakai) Koidz.; *Sasaella shiobarensis* (Nakai) Nakai ex Koidz.)

Japan. Nodes and internodes glabrous, leaf sheaths more or less densely hairy to pilose, culm sheaths glabrous, leaf blades lanceolate, leaves more or less glabrous to hairy upper and densely pubescent beneath, see *Journal of Japanese Botany* 10(9): 579-580. 1934, *Acta Phytotaxonomica et Geobotanica* 4: 19. 1935, *Journal of Japanese Botany* 11(6): 369. 1935, *Acta Phytotaxonomica et Geobotanica* 6: 66. 1937, *Acta Phytotaxonomica et Geobotanica* 9: 77, 229. 1940, *Acta Phytotaxonomica et Geobotanica* 10: 296-297. 1941.

in Japan: shiobara-zasa

S. shiobarensis (Nakai) Nakai ex Koidzumi f. *mitinokuensis* (Koidzumi) S. Suzuki (*Arundinaria mitinokuensis* Koidz.; *Arundinaria sadoensis* f. *mitinokuensis* (Koidz.) Murata; *Sasaella mitinokuensis* (Koidz.) Koidz.)

Japan. See *Acta Phytotaxonomica et Geobotanica* 9: 76. 1940, *Acta Phytotaxonomica et Geobotanica* 10: 297. 1941, *Journal of Japanese Botany* 51(7): 221. 1976, *Acta Phytocologia et Geobotanica Sinica* 30(4-6): 141. 1979.

S. shiobarensis (Nakai) Nakai ex Koidzumi var. *yessaensis* (Koidzumi) S. Suzuki (*Arundinaria nambuensis* Koidz.; *Arundinaria yessaensis* Koidz.; *Sasa nambuensis* Makino & Uchida ex Uchida; *Sasaella nambuensis* Koidz.; *Sasaella yessaensis* (Koidz.) Koidz.)

Japan. Leaf sheaths densely pubescent to puberulous to minutely hairy, see *Science Education* 15(6): 75. 1932, *Journal of Japanese Botany* 10(9): 571-572, 580-581. 1934, *Acta Phytotaxonomica et Geobotanica* 6: 278. 1937, *Acta*

Phytotaxonomica et Geobotanica 10: 210, 298. 1941, *Journal of Japanese Botany* 51(5): 156. 1976.

Sasamorpha Nakai = *Sasa* Makino & Shibata, *Sasamorpha* (Nakai) C.H. Hu

From the genus *Sasa* and Greek *morphe* “a form, shape.”

Three or more species, eastern Asia, Japan, Korea. Bambusoideae, Bambuseae, Arundinariinae, erect, spreading, monopodial, creeping rhizomes hypogeous, 1 branch per node, nodes flat and not swollen, culm sheath persistent and coriaceous, leaves lanceolate and acuminate with a sharp point, leaf sheaths coriaceous, inflorescence paniculate, spikelets lanceolate 4- to 8-flowered, 2 glumes at the base of each spikelet, lemmas ovate, palea present, 3 ovate lodicules, 6 stamens, ovary ovoid, 3 feathery stigmas, type *Arundinaria purpurascens* Hack., see *Flora Boreali-Americana* 1: 73. 1803, *Bulletin de l'Herbier Boissier* 7(9): 716. 1899 and *Botanical Magazine* (Tokyo) 15(168): 18, 25, 27. 1901, *Journal of Japanese Botany* 6: 15. 1929, *Fl. Hokkaido & Saghalien* 2: 180. 1930, *Journal of the Faculty of Science, Hokkaido University. Series 5, Botany* 26: 180. 1931, *Botanical Magazine* (Tokyo) 46: 41. 1932, *Bibliogr. Cult. Trees* 635. 1949, *Taxon* 6(7): 208. 1957, *Taxon* 45: 543. 1996, *Taxon* 48: 377. 1999, *Taxon* 49: 235-238, 545-546. 2000, *Contributions from the United States National Herbarium* 39: 111-112. 2000.

Species

S. borealis (Hackel) Nakai (*Arundinaria borealis* Makino; *Arundinaria purpurascens* Hack.; *Bambusa borealis* Hack.; *Bambusa purpurascens* Makino; *Neosasamorpha tobaeana* (Makino & Uchida) Tatew.; *Pseudosasa purpurascens* (Hack.) Makino; *Pseudosasa spiculosa* (Schmid) Makino; *Sasa amabilis* Makino & Nakai; *Sasa purpurascens* (Hack.) E.G. Camus; *Sasa purpurascens* (Hack.) Ohwi; *Sasa spiculosa* (Schmid) Makino; *Sasa spiculosa* var. *subpubescens* Makino & Uchida; *Sasa tobaeana* Makino & Uchida; *Sasamorpha amabilis* Nakai; *Sasamorpha borealis* var. *purpurascens* (Hack.) Nakai; *Sasamorpha purpurascens* var. *hidakana* Tatew. & Yoshim.; *Sasamorpha purpurascens* var. *macrochaeta* (Nakai) Nakai; *Sasamorpha purpurascens* var. *psilostachys* Nakai; *Sasamorpha purpurascens* var. *typica* Nakai; *Sasamorpha tobaeana* (Makino & Uchida) Uchida & Koidz.)

Japan. See *Bulletin de l'Herbier Boissier* 7(9): 716, 720. 1899 and *Botanical Magazine* (Tokyo) 14: 20, 62. 1900,

Botanical Magazine (Tokyo) 15: 24. 1901, *Botanical Magazine* (Tokyo) 26: 12. 1912, *Journal of Japanese Botany* 2: 16. 1920, *Journal of Japanese Botany* 6: 24. 1929, *Journal of the Faculty of Agriculture of the Hokkaido University* 26: 181. Sapporo, Japan 1931, *Botanical Magazine* (Tokyo) 46: 37, 41. 1932, *Journal of Japanese Botany* 9: 160. 1933, *Journal of Japanese Botany* 11(1): 75-76. 1935, *Acta Phytotaxonomica et Geobotanica* 10: 317. 1941, *Journal of Japanese Botany* 28: 154. 1953, *Bulletin of the National Science Museum* 33: 66. 1953, *Journal of the Washington Academy of Sciences* 45: 216. 1955, *Journal of Japanese Botany* 67: 31-34. 1992.

in Japan: suzu-dake

S. borealis (Hackel) Nakai var. *angustior* (Makino) S. Suzuki (*Pseudosasa spiculosa* f. *angustior* (Makino) Makino; *Sasa spiculosa* f. *angustior* Makino; *Sasamorpha gracilis* Nakai; *Sasamorpha purpurascens* var. *angustior* (Makino) Nakai)

Japan. Rare, slender branches, culm sheaths hairy to sparsely pilose, leaf sheaths puberulous or sometimes glabrous, nodes densely hairy to pilose, internodes puberulous or sometimes glabrous, leaves lanceolate to narrowly lanceolate, small inflorescence paniculate of 3-4 spikelets lanceolate, 3-4 florets, 2 glumes, lemmas ciliate, palea present, see *Journal of Japanese Botany* 2: 16. 1920, *Journal of Japanese Botany* 5(2): 9. 1928, *Journal of Japanese Botany* 5(4): 16. 1928, *Journal of the Faculty of Agriculture of the Hokkaido University* 26: 181. 1931, *Botanical Magazine* (Tokyo) 46: 38, 42. 1932, *Journal of Japanese Botany* 50(5): 137. 1975.

in Japan: hosoba-suzu-dake

S. borealis (Hackel) Nakai var. *borealis*

Japan and Korea. Erect, branched, culm sheaths pilose, nodes densely pilose, internodes puberulous, leaf sheaths puberulous, leaf blades oblong-lanceolate and coriaceous, leaves glabrous or pubescent, spikelets lanceolate and flattened, 5-8 florets distichous, 2 glumes more or less broadly lanceolate, second glume usually subtending a bud, lemmas acuminate narrowly ovate, palea 2-keeled, 3 ovate lodicules, stamens exserted, ovary ovoid to narrowly ovoid, 3 plumose stigmas.

in Japan: suzu-dake

S. borealis (Hackel) Nakai var. *pilosa* (Uchida) S. Suzuki (*Sasa tobaeana* var. *pilosa* Uchida; *Sasamorpha tobaeana* var. *pilosa* (Uchida) Uchida)

Japan. Leaves shortly hairy, see *Bulletin of the Scientific Researches of the Alumni Association of the Morioka Imperial College of Agriculture and Forestry* 12: 83. 1936, *Acta Phytotaxonomica et Geobotanica* 10-11: 3, 317. 1941, *Journal of Japanese Botany* 50(5): 138. 1975.

S. borealis (Hackel) Nakai var. *viridescens* (Nakai) S. Suzuki (*Sasamorpha purpurascens* var. *viridescens* Nakai)

Japan. Branched at the upper portions of the culm, culm sheaths pilose, nodes more or less glabrous to pubescent or puberulous, leaves glabrous, see *Botanical Magazine* 46: 42. 1932, *Japanese Journal of Botany* 20(5): 139. 1975.

in Japan: hachijo-suzu-dake

S. mollis Nakai (*Sasamorpha sikokiana* Koidz.)

Japan. Branched upper portions, nodes densely villous to pilose, culm sheaths densely hairy to pilose, leaf sheaths minutely hairy or glabrous, internodes puberulous or glabrous or glabrescent, leaf blades oblong-lanceolate, see *Journal of the Faculty of Agriculture of the Hokkaido University* 26: 181. 1931, *Botanical Magazine* 46: 39. 1932, *Journal Japanese Botany* 9(3): 158. 1933, *Journal of Japanese Botany* 11(1): 75-76. 1935, *Acta Phytotaxonomica et Geobotanica* 6: 78. 1937, *Journal of Japanese Botany* 28: 154. 1953.

in Japan: ke-suzu

Saugetia A. Hitchcock & Chase = *Enteropogon* Nees

Named for the French-born Cuban botanist Joseph Sylvestre (José Silvestre) Sauget y Barbis (aka Frère Léon, Hermano León), 1871-1955, Havana 1905, author of *Las exploraciones botánicas de Cuba*. Habana 1918 and "Nouveaux Anastraphia de la flore cubaine." *Contr. Inst. Bot. Univ. Montreal*. 49: 77-86. 1944, with Hermano Alain (Dr. E.E. Lioger) wrote *Flora de Cuba*. Habana 1946-1963; see J.H. Barnhart, *Biographical notes upon botanists*. 3: 210. 1965; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 234. 1972; S. Lenley et al., *Catalog of the manuscript and archival collections and index to the correspondence of John Torrey*. Library of the New York Botanical Garden. 262. 1973.

Two species, the Caribbean. Chloridoideae, Cynodonteae, Chloridinae, perennial, unarmed, slender, herbaceous, wiry, tufted, branched, auricles absent, ligule a short fringed membrane, plants bisexual, inflorescence spicate or singly racemose, solitary spikelets, first floret stipitate, 2 glumes unequal to very unequal, lower glume 0- to 1-nerved, upper glume 1-nerved, palea present, 2 free and fleshy lodicules, ovary glabrous, 2 red stigmas, savannah, wood, sometimes included in *Enteropogon*, type *Saugetia fasciculata* Hitchc. & Chase, see *An Introduction to the Natural System of Botany* 381, 448, 485. 1836 and *Contributions from the United States National Herbarium* 18(7): 378. 1917, *Contributions from the United States National Herbarium* 41: 78-79, 193. 2001.

Species

S. fasciculata Hitchc. & Chase (*Enteropogon fasciculatus* Clayton & Renvoize)

Cuba. See *Contributions from the United States National Herbarium* 18(7): 378. 1917, *Kew Bulletin, Additional Series* 13: 239. 1986.

S. pleiostachya Hitchc. & Ekman

Cuba. See *Manual of the Grasses of the West Indies* 123. 1936.

Savastana Schrank = *Anthoxanthum* L.,
Hierochloe R. Br., *Savastana* Raf.
(Melastomataceae), *Savastania* Scop.
(Melastomataceae)

Pooideae, Poeae, Phalaridinae, type *Savastana hirta* Schrank, see *Species Plantarum* 1: 28. 1753, *Introductio ad Historiam Naturalem* 213. 1777, *Baiersche Flora* 1: 100, 337. 1789, *Prodromus Florae Novae Hollandiae* 208. 1810, *Essai d'une Nouvelle Agrostographie* 62, 164, t. 12, f. 5. 1812, *Sylva Telluriana* 100. 1838 and *Balaton Fl.* 315. 1900, *Bot. Not.* 124: 146. 1971, *Novosti Sist. Vyss. Rast.* 10: 81. 1973, *Blumea* 30(2): 348. 1985, *Berichte der Bayerischen Botanischen Gesellschaft zur Erforschung der Heimischen Flora* 60: 73-83. 1989, *Regnum Veg.* 127: 19. 1993, *Contributions from the United States National Herbarium* vol. 48: 111, 385-386, 605. 2003.

Schaffnera Benth = *Schaffnerella* Nash,
Schaffneria Fée (Aspleniaceae), *Schaffneria*
Fée ex T. Moore (Aspleniaceae)

After the German pharmacist Wilhelm Schaffner (J. Guillermo Schaffner), 1830-1882, plant collector, from 1856 in Mexico.

Chloridoideae, Cynodonteae, Muhlenbergiinae, type *Schaffnera gracilis* Benth., see *Mémoires sur les Familles des Fougères* 7: 56-57, pl. 17, f. 1. 1855, *Hooker's Icones Plantarum* 14: 59, t. 1378. 1882 and *Contributions from the United States National Herbarium* 41: 193. 2001.

Schaffnerella Nash = *Schaffnera* Benth,
Schaffneria Fée (Aspleniaceae)

For the German pharmacist Wilhelm Schaffner (J. Guillermo, J. Wilhelm), 1830-1882, from 1856 collected in Mexico. See Manuel Villada, "El Sr. Dr. Guillermo Schaffner." *Naturaleza*. 4: 32. [Sociedad Mexicana de Historia Natural] Mexico City 1878; Nicolas Jean Baptiste Gaston Guibourt (1790-1861), "Observations sur les productions du Mexique." *Jour. Pharm. et Chim.* 4: 95-108.

1866; J.H. Barnhart, *Biographical notes upon botanists*. 3: 224. 1965; Berthold Carl Seemann (1825-1871), “*Hanburia*, eine neue Cucurbitaceen gattung von Mexico.” *Bonplandia*. 6: 293. 1858, 7: 2-3. 1859, 10: 189-190. 1862; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 351. 1972; Irving William Knobloch, compil., “A preliminary verified list of plant collectors in Mexico.” *Phytologia Memoirs*. VI. 1983; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. Philadelphia 1964; Stafleu and Cowan, *Taxonomic literature*. 5: 113. 1985.

One species, Central America. Chloridoideae, Cynodonteae, Muhlenbergiinae, annual, herbaceous, tufted, leaves mainly basal, auricles absent, narrow leaves, ligule membranous, plants bisexual, inflorescence paniculate, single raceme bearing 1-3 appressed spikelets laterally flattened, each raceme subtended by a bract, 1 female fertile floret, 2 glumes unequal to very unequal, lower glume suppressed or minute or vestigial, upper glume 3- to 5-awned and 7- to 9-nerved, lemma keeled subapically awned, palea present, lodicules absent, 3 stamens, ovary glabrous, 2 stigmas, related to *Opizia*, type *Schaffnerella gracilis* (Benth.) Nash, see *Mémoires sur les Familles des Fougères* 7: 56-57, pl. 17, f. 1. 1855 and *North American Flora* 17(2): 141. 1912, *Aliso* 20(1): 45-50. 2001, *Contributions from the United States National Herbarium* 41: 193. 2001.

Species

S. gracilis (Benth.) Nash (*Schaffnera gracilis* Benth.)

Central America. Compound inflorescence, raceme very short, lemma membranous, palea wingless, grows on hill-sides, see *Hooker's Icones Plantarum* 14: 59, t. 1378. 1882.

Schedonnardus Steudel = *Spirochloe* Lunell

Greek *schedon* “near, nearby” and *Nardus*, another grass genus, *nardos* “spikenard.”

One species, America. Chloridoideae, Cynodonteae, Muhlenbergiinae, perennial, tufted, herbaceous, unbranched, auricles absent, ligule an unfringed membrane, plants bisexual, open spicate inflorescence, racemes scattered along a central axis, spikelets solitary sessile laterally compressed 1-flowered, 2 glumes very unequal, lower glume divergent pointed, lemmas keeled acuminate, palea present, lodicules present or absent, stamens 3, ovary glabrous, 2 stigmas, open habitats, dry plains, prairies, saline plains, related to *Gymnopogon*, type *Schedonnardus texanus* Steud., see *Genera Plantarum* 43. 1789, *Prodromus Florae Novae Hollandiae* 207. 1810, *Synopsis Plantarum Glumacearum* 1: 146. 1854 and *American Midland Naturalist* 4: 220. 1915, *Contributions from the United States National Herbarium* 41: 193, 200. 2001.

Species

S. paniculatus (Nutt.) Trel. (*Lepturus paniculatus* Nutt.; *Rottboellia paniculata* (Nutt.) Spreng.; *Schedonnardus texanus* Steud.; *Spartina dissitiflora* Steud.; *Spirochloe paniculata* (Nutt.) Lunell)

Northern America, U.S. Lemma membranous, weed species, found in dry open rocky soil, in gravel, see *Supplementum Plantarum* 13, 114. 1781 [1782], *The Genera of North American Plants* 1: 81. 1818, *Systema Vegetabilium, editio decima sexta* 1: 300. 1825, *Synopsis Plantarum Glumacearum* 1: 215. 1854, *Annual Report of the Geological Survey of Arkansas* 1888(4): 236. 1891.

in English: tumble grass (= referring to the tumbleweed dispersal mode)

Schedonorus P. Beauv. = *Bucetum* Parnell, *Drymonaetes* Fourr., *Festuca* L., *Schenodorus* P. Beauv., *Schoenodorus* Roem. & Schult.

Greek *schedo* “near, nearby” and *oros* “mountain,” possibly referring to the habitat.

About 3 species, South America. Pooideae, Poeae, Loliinae, auricles present, ovary glabrous, type *Schedonorus elatior* (L.) P. Beauv., genus sometimes or often in *Festuca*, confusions in taxonomy and nomenclature, see *Species Plantarum* 1: 73, 79, 83. 1753, Ambroise Marie François Joseph Palisot de Beauvois (1752-1820), *Essai d'une nouvelle Agrostographie*. 99, 162, 177, pl. 19, f. 2. Paris 1812, *Systema Vegetabilium* 698-710. 1817, *Synopsis Florae Germanicae et Helveticae* 813. 1837, *Florae Africae Australioris Illustrationes Monographicae* I. Gramineae. 444. 1841, *The Grasses of Scotland* 104. 1842, *Deutschl. Fl.* 643. 1849, *Commentario della Società Crittogamologica Italiana* 1: 231. 1863, *Annales de la société linnéenne de Lyon, sér. 2*, 17: 187. 1869, *The Grasses of Scotland* 104. 1872, *Nomencl. Bot.* 2: 1071. 1874 and *Contr. U.S. Natl. Herb.* 24(6): 193. 1925, *Zlaki SSSR* 2: 393. 1976, *Genera Graminum* 93-94. 1986, *Watsonia* 16: 300. 1987, *Novosti Sist. Vyss. Rast.* 23: 14. 1988, *Novon* 3(3): 239-243. 1993, *Phytologia* 83: 85-88. 1997 [1998], *Preslia* 70: 111-113. 1998, *Contributions from the United States National Herbarium* 48: 191, 274, 312-368, 605-607, 608. 2003.

Species

S. arundinaceus (Schreb.) Dumort. (*Aira arundinacea* Lilj. ex Roem. & Schult., nom. illeg., non *Aira arundinacea* L.; *Arundo festucacea* Willd.; *Avena secunda* Salisb.; *Bromus arundinaceus* (Schreb.) Roth; *Bromus elatior* (L.) Europe, west Asia. Perennial, loosely tufted, stout, smooth, unbranched, erect above a geniculate base, often with decumbent stem bases, noxious weed, invasive and widely naturalized elsewhere, cultivated fodder, forage, pasture grass, useful for erosion control and for stabilizing the soil, growing in abandoned pastures, steep slopes, meadows, roadsides, fields, disturbed areas, grasslands, moist shores,

on peat soils, on clay soils, see *Species Plantarum* 1: 73, 75-76, 83. 1753, *Flora Anglica* 37. 1762, *Historia Stirpium Indigenarum Helvetiae Inchoata* 2: 203. 1768, *Flora Anglica, Editio Altera* 47. 1778, *Flore des Environs de Paris* éd. 2. 1: 51. 1799, *Flora Boreali-Americana* 1: 67. 1803, *Syn. Schenckochloa Ortiz = *Gouinia* E. Fourn. ex Benth. & Hook.f.

After the German botanist Johann Heinrich Rudolf Schenck, 1860-1927, traveler, professor of botany, Director of the Botanical Garden of Darmstadt, plant collector in Brazil and Mexico, author of "Acaciae myrmecophilae novae." *Fedd. Rep.* 12: 360-363. 1913 and "Wilhelm Schimper: Nachruf." *Naturwiss. Rundschau* 17, 1902. See J.H. Barnhart, *Biographical notes upon botanists.* 3: 224. 1965; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection.* 352.

1972; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University.* 1917-1933; Stafleu and Cowan, *Taxonomic literature.* 5: 130-133. 1985; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico.* Philadelphia 1964; Irving William Knobloch, compilation, "A preliminary verified list of plant collectors in Mexico." *Phytologia Memoirs.* VI. 1983; Carl Chun, *Wissenschaftliche Ergebnisse der Deutschen Tiefsee-Expedition auf dem Dampfer "Valdivia" 1898-1899 ... Herausgegeben von C. Chun ... band ii.* Jena, G. Fischer, 1905-1908.

One species, Brazil. Chloridoideae, Cynodonteae, Gouiniinae, or Poaceae, Chloridoideae, Eragrostidae, perennial, unbranched, tufted, herbaceous, leaves basal, leaf sheaths overlapping culm nodes, auricles absent, ligule a fringed membrane, plants bisexual, inflorescence spicate, spikelets solitary shortly pedicellate, rachilla triangular, 2 subequal glumes 1-nerved, lemmas awned, palea present, 3 stamens, open areas, sandy habitat, dunes, coastal, type *Schenckochloa barbata* (Hack.) J.J. Ortiz, see *Essai d'une Nouvelle Agrostographie* 80. 1812, *Genera Plantarum* 3: 1178. 1883, *Mexicanas Plantas* 2: 103. 1886 and Jason Richard Swallen, "The grass genus *Gouinia*." *Amer. J. Bot.* 22: 31-41. 1935, *Bull. Chloridoideae. 68: 23-25. 2001.

Species

S. barbata (Hack.) J. Ortiz (*Diplachne barbata* Hack.; *Gouinia barbata* (Hack.) Swallen)

Brazil. See *Österreichische Botanische Zeitschrift* 52: 240. 1902, *American Journal of Botany* 22: 37. 1935.

Schenodorus P. Beauv. = *Schedonorus* P. Beauv.

Orthographic variant of *Schedonorus* P. Beauv., see *Essai d'une nouvelle Agrostographie.* 99, 162, 177, pl. 19, f. 2. Paris 1812, *Systema Vegetabilium* 2: 698-710. 1817 and *Contributions from the United States National Herbarium* 48: 605-607. 2003.

Schirostachyum Vriese

Referring to *Schizostachyum* Nees, see Willem Hendrik de Vriese (1806-1862), *Plantae Indiae Batavae Orientalis:*

quas, in itinere per insulas Archipelagi Indici Javam, Amboinam, Celebem, Ternatam, aliasque, annis 1815-1821 exploravit Casp. Georg. Carol. Reinwardt ... jussu augustissimi regis Guilielmi III / digessit et illustravit Guil. Henr. de Vriese. Lugduni-Batavorum 1856-1857.

Schismus P. Beauv. = *Electra* Panzer,
Hemisacris Steud.

Greek *schismos* "cleaving," referring to the lemma tip, the lemma is split.

About 5 species, northern and southern Africa, Middle East, Mediterranean to northwest India. Arundinoideae, Arundineae, or Danthonioideae, Danthoniae, annual or short-lived perennial, herbaceous, unbranched, xerophytic, caespitose or decumbent, culms ascending or mat-forming, no auricles, ligule a rim of hairs, leaves mostly basal, leaf blades linear to linear-lanceolate, plants bisexual and paniculate, panicles narrow or contracted, spikelets solitary several-flowered and pedicellate, 5-9 florets, reduced floret at apex, 2 glumes deciduous with spikelet, lower glume 5- to 7-nerved, upper glume 3- to 7-nerved, lemmas 7- to 9-nerved and rounded on the back, female fertile lemmas awnless or mucronate or with a short straight awn, lemma apex bifid to emarginate, paleas 2-veined and awnless, callus hairy, 2 joined or free lodicules fleshy and ciliate or glabrous, stamens 3, ovary glabrous, 2 stigmas, seeds dorsiventrally compressed, native pasture species, a preferred food for desert tortoises in the Mohave desert, invasive weed, open habitats, dry open places, arid regions and deserts, linked to *Rytidosperma*, type *Schismus marginatus* P. Beauv., see *Species Plantarum* 1: 73. 1753, *Syn. Pl.* 1: 97. 1805, *Essai d'une nouvelle Agrostographie* 73, 162, 177, t. 15, f. 4. Schistachne Figari & De Not. = *Aristida* L., *Stipagrostis* Nees

From the Greek *schistos* "cut, divided" and *achne* "chaff, glume."

Arundinoideae, Aristideae, or Aristidoideae, Aristideae, type *Schistachne ciliata* (Desf.) Fig. & De Not., see *Species Plantarum* 1: 82. 1753, *Neues Journal für die Botanik* 3: 255. 1809, *Linnaea* 7(3): 290-291. 1832, *Species Graminum Stipaceorum* 163. 1842, *Memorie della Reale Accademia delle Scienze di Torino, ser. 2* 12: 252. 1852, *Genera Plantarum* 3(2): 1141. 1883 and *Meded. Rijks.-Herb.* 54: 9. 1926, *Mededeelingen van's Rijks-Herbarium* 58: 34-36, 45-46. 1929, *Kurtziana* 1: 123-206. 1961, *Flora Mesoamericana* 6: 253-257. 1994, *Contributions from the United States National Herbarium* 46: 69-104. 2003.

Schizachne Hackel

Greek *schizo*, *schizein* "to split, divide" and *achne* "chaff, glume," referring to the lemmas.

One to 2 species, Asia, Eurasia, North America. Pooideae, Poodae, Meliceae, perennial, herbaceous, unbranched, tufted, shortly rhizomatous, auricles absent, ligule an unfringed membrane, plants bisexual, inflorescence paniculate, spikelets pedicellate several-flowered, sterile florets terminal, rachilla fragile, callus hairy to bearded, 2 membranous glumes unequal to very unequal, lower glume 3-nerved, upper glume 5-nerved, bifid lemmas 7-nerved, straight awn subterminal, palea keels ciliate, 2 fleshy lodicules, 3 stamens, ovary glabrous, 2 stigmas, growing in moist areas, woodlands, open habitats, related to *Trinichloa*, resembles *Melica*, type *Schizachne fauriei* Hack., see *Species Plantarum* 1: 66, 79. 1753 and *Repertorium Specierum Novarum Regni Vegetabilis* 7: 322-323. 1909, *Journal of the Washington Academy of Sciences* 18(8): 203-206. 1928, *Madroño* 7(5): 129-130. 1944, *Grasses: Systematics and Evolution* 61-74. 2000, *Contributions from the United States National Herbarium* 48: 607-608. 2003, William A. Weber, "The Middle Asian element in the Southern Rocky Mountain Flora of the western United States: a critical biogeographical review." *Journal of Biogeography* 30(5): 649-685. May 2003.

Species

S. purpurascens (Torr.) Swallen var. *purpurascens*

Northern America.

Schizachyrium Nees = *Pithecurus* Kunth, *Schizopogon* Spreng., *Schizopogon* Rchb. ex Spreng., *Ystia* Compère

From the Greek *schizo*, *schizein* "to split, divide" and *achyron* "chaff, husk," alluding to the glume or referring to the toothed lemma; see Nees von Esenbeck, *Agrostologia Brasiliensis*. 331. 1829 in C.F.P. von Martius *Flora Brasiliensis*.

About 60-100 species, tropics. Panicoideae, Andropogonodae, Andropogoneae, Andropogoninae, annual or perennial, branched, caespitose, stout or slender, delicate, woody or herbaceous, rhizomatous or stoloniferous, sometimes decumbent or leaning at base, leaves not aromatic, auricles absent, ligule a short fringed membrane, leaf blades flat and linear, plants bisexual, solitary slender racemes with oblique branches, racemes axillary and arranged in a compound panicle, spikelets paired, florets 2 per spikelet and the lower sterile, sessile spikelets awned and bisexual, upper floret bisexual, lower floret reduced to a lemma, lower glume convex or rarely concave, upper glume rarely awned, upper lemma 2-lobed with a slender glabrous awn between the lobes, stalked spikelets awned or unawned and more or less reduced, *Schizachyrium kwiluense* with bisexual pedicelled spikelet, palea present or absent, 2 lodicules tiny and fleshy, 2 or 3 stamens, ovary glabrous, 2 stigmas plumose above, handsome and ornamental weed species useful for erosion control, native pasture species, grazing, growing in sandy beaches or dunes, open habitats, poor sandy pastures, clearings, grasslands, along roadsides, hilltops, slopes, savannahs, scrub forests, rainforests, along riverbanks, hickory and oak woods, saturated soil in moist depression, moist meadows, moist pinelands, mangrove swamps, riverbank forest, disturbed sites, confusions in taxonomy and nomenclature, very closely related to *Andropogon*, type *Schizachyrium brevifolium* (Sw.) Nees ex Büse, see *Species Plantarum* 2: 1045, 1049. 1753, *Methodus Plantas Horti Botanici ...* 207. 1794, *Annalen der Botanick. ed. Usteri* 18:

Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 199. 1964; Jonathan Wantrup, *Australian Rare Books, 1788-1900*. 223-226. Hordern House, Sydney 1987)

Tropical and subtropical America. Annual or short-lived perennial, caespitose, erect, robust, glabrous, unbranched and branched, lower culm internodes stout, sheath keeled and glabrous, ligule a firm membrane, leaf blades linear acute, inflorescence variable, numerous solitary flexuous racemes subtended by spathes, spathes involute or flattened,

sessile spikelets narrowly ovate to lanceolate, pedicellate spikelet scarcely developed and sterile, lower glume smooth, weed, forage, along roadsides, mesic shrubland and grassland, suspected toxicity, the roots have been used as a diuretic and sudorific, decoction of roots is diuretic and emollient, the toxic fungus *Claviceps purpurea* (Fr.) Tulasne found on some species of *Andropogon*, grassy places, open fields, savannahs, along roadsides, see *Flore de France* 3: 633. 1778, *Flora Boreali-Americana* 1: 57. 1803, *Nova Genera et Species Plantarum* 1: 188. 1815 [1816], *Plantarum Minus Cognitarum Pugillus* 2: 13-14. 1815, *Fundamenta Agrostographiae* 192. 1820, *Systema Vegetabilium, editio decima sexta* 1: 286, 289. 1825, *Prodromus Plantarum Indiae Occidentalis* 8-9. 1825, *Révision des Graminées* 168. 1829, *Flora Brasiliensis seu Enumeratio Plantarum* 2(1): 333-334, 360. 1829, *Reliquiae Haenkeanae* 1: 338. 1830, *Mémoires de la Société d'Agriculture, Sciences et Arts d'Angers* 1: 174. 1831, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 494. 1833, *Synopsis Plantarum Glumacearum* 1: 382, 384. 1854, *Berberides Americae Australis* 56. 1857, *Flora of the British West Indian Islands* 560. 1864, *Genera Plantarum* 3(2): 1127. 1883, *Biologia Centrali-Americana; ... (species dedicated to the French botanist Pierre Jean Marie Delavay, 1834-1895, missionary and plant collector in China; see J.H. Barnhart, *Biographical notes upon botanists*. 1: 436. 1965; Emil Bretschneider, *History of European Botanical Discoveries in China*. Leipzig 1981; Alice Margaret Coats, *The Quest for Plants: A History of the Horticultural Explorers*. 236-239. London 1969; Adrien René Franchet (1834-1900), *Plantae delavayanae* plantes de Chine recueillies au Yun-nan par l'Abbé Delavay. [Collector the Abbé Pierre Jean Marie Delavay.] Paris 1889 [-1890])

Asia, Bhutan. Rhizomatous, perennial, wiry, erect, unbranched, growing in open areas, rocky places, see *Monographiae Phanerogamarum* 6: 404-405. 1889, *The Flora of British India* 7(21): 166-167. 1897 [1896] and *Annales de la Société Linnéenne de Lyon, sér. 2*, 68: 208. 1921 [1922], *Ann. Société Linnéenne de Lyon* 70: 90. 1923, *Indian Forest Records, Botany* 1: 95. 1939.

S. dolosum S.T. Blake

Australia. See *Contributions from the Queensland Herbarium* 17: 16-29, f. 1G, 5. 1974.

S. exile (Hochst.) Pilger (*Andropogon exilis* Hochst.; *Schizachyrium exile* (Hochst.) Stapf, nom. illeg., non *Schizachyrium exile* (Hochst.) Pilg.; *Schizachyrium inclusum* Stent)

Tropical Africa to Asia. Annual, tufted or loosely tufted, slender, erect, leaf blade expanded, ligule short and membranous, leaf sheaths rounded to slightly keeled, leaves with tapering tips, inflorescence paniculate, racemes reddish tinged, small single spikes enclosed at the base by a spathe, each spike with its own spathe, rachis internodes slender villous, a tuft of spreading hairs from each joint, pioneer grass, used for coarse matting and for thatching, chopped and mixed with clay used for building huts, low grazing value, grazed only while young, unpalatable in dry seasons, a common weed of cultivated fields, found in open places, sandy loam, roadsides, poor dry soils, disturbed gravelly sites, bush and woodland margins, low-lying areas, see *Flora* 27: 241. 1844 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 51(3-4): 412. 1914, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 54: 284. 1917, *Flora of Tropical Africa* 9(2): 191. 1917, *Bothalia* 1(3): 172-174, t. 2. 1922.

S. ruderale W.D. Clayton

Tropical Africa. Annual, loosely tufted, browsed by stock only when young, low grazing value, see *Kew Bulletin* 19: 451. 1965.

in Upper Volta: hutarda, uonga

S. rupestre (K. Schum.) Stapf

Tropical Africa. Perennial, tufted, inflorescence with many barren branches, racemes hairy, upper lemma bifid, browsed by stock only when young, low grazing value, usually in moist areas, stony slopes, wet meadows, bush coastal bush, sandy loam, see *Flora of Tropical Africa* 9: 204. 1919.

S. salzmännii (Trin. ex Steud.) Nash (*Andropogon aristatus* Poir.; *Andropogon glabratus* Trin. ex E. Fourn., nom. illeg., non *Andropogon glabratus* (Brongn.) Tropics. Perennial, very polymorphic, tufted, tussocky, robust, reddish, erect, creeping, sometimes shortly rhizomatous, branched from the upper nodes, leaf sheath smooth and glabrous, ligule a strongly curved membrane entire, leaf blades flat acute, narrow sparse compound inflorescence, rachis internodes and pedicels ciliate, racemes usually glabrous and straight at maturity, spikelets of two types and paired, sessile spikelet ciliate or glabrous, pedicelled spikelet male lanceolate acuminate or awned, fodder, a good pasture grass when young, used for thatching and matting, found in open grassland, cerrado, open bushland, sandy places, stony hillsides, near streams, among rocks, in bushveld, wet stream sides, dry or moist soils, riverbanks, see *Species Plantarum* 1: 82. 1753, *Species Plantarum* 2: 1046. 1753, *Observationes Botanicae* 3: 25. 1783, *A Sketch of the Botany of South-Carolina and Georgia* 1(2): 148. 1816, *Systema Vegetabilium* 2: 46, 788. 1817, *Mantissa* 2: 188. 1824, *Systema Vegetabilium, editio decima sexta* 1: 299. 1825 [1824], *Révision des Graminées* 1: 62. 1829, *Flora Brasiliensis seu Enumeratio Plantarum* 2(1): 333-336. 1829, *Reliquiae Haenkeanae* 1(4-5): 336-337, 339. 1830, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Northern America, U.S., Mexico. Perennial bunchgrass, handsome, ornamental, greenish bluish coloration at the base of the stems, clumped, drought-tolerant, strong, slender stems, erect and more or less densely branched above, short papery ligule, leaves green or glaucous and purplish, peduncle enclosed by sheaths, sessile spikelet long-awned, stalked spikelet short-awned, useful for erosion control, revegetation, grazing, forage, used by wildlife for food and cover, weed species, potential seed contaminant, not recommended for wet or heavy clay soils, excellent for dry sandy soils, dunes, disturbed areas, occurs on old fields, roadsides and open woods, clearings, see *Flora Boreali-Americana* 1: 57. 1803, *Species Plantarum. Editio quarta* 4: 913. 1806, *Encyclopédie Méthodique, Botanique Suppl.* 1: 583. 1810, *Plantarum Minus Cognitarum Pugillus* 2: 13. 1815, *A Class-book of Botany* edition 3 809. 1861, *The Tennessee Flora; With Special Reference to the Flora of Nashville* 97. 1887, *Monographiae Phanerogamarum* 6: 384. 1889, *Revisio Generum Plantarum* 2: 792. 1891, *Contributions from the United States National Herbarium* 2(3): 495. 1894, *Grasses of North America for Farmers and Students* 2: 46. 1896, *Bulletin of the Torrey Botanical Club* 25(2): 83. 1898 and *Bulletin, Division of Agrostology United States Department of Agriculture* 24: 40-41. 1901, *Flora of the Southeastern United States* ...59-60. 1903, *North American Flora* 17(2): 107. 1912, *Rhodora* 19(222): 103. 1917, *New York State Museum Bulletin* 254: 68. 1924, *Proceedings of the Biological Society of Washington* 41: 15. 1928, *Rhodora* 37: 143, 144, 145, pl. 339, f. 1-2. 1935, *Rhodora* 42(502): 413-415, pl. 626, f. 1-3. 1940, *Rhodora* 44(526): 383. 1942, *Rhodora* 45(538): 390. 1943, *Proceedings of the Biological Society of Washington* 56: 82. 1943, *Boissiera*. 9: 229. 1960, *Brittonia* 19(1): 73. 1967, *Sida* 6(2): 114-115. 1975, J.G. in English: slender false bluestem, slender bluestem

in Mexico: pasto

S. urceolatum (Hack.) Stapf (*Andropogon urceolatus* Hack.)

Tropical Africa, Sudan, Senegal, Sahel. Annual, erect, slender, tufted, wiry, leaf blades linear acute, sessile spikelet linear, lower glume keeled and winged, upper lemma bifid, pedicelled spikelet sterile, rhachis internodes stout glabrous, on shallow stony soil, see *Flora* 68(7): 115. 1885 and *Flora of Tropical Africa* 9: 190. 1917.

in Upper Volta: hudo nai, hudonai

S. ursulus Stapf (*Andropogon ursulus* (Stapf) Pilg.)

Southern tropical Africa. Perennial, tufted, leaf sheaths yellowish, inflorescence yellowish and hairy, found in open habitats, veld, sandy places, sour veld, see *Flora of Tropical Africa* 9: 197. 1919, *Die natürlichen Pflanzenfamilien, Zweite Auflage* 2. 14e: 166. 1940.

S. villosum (Poir.) Veldkamp (*Rottboellia villosa* Poir.)

America, West Indies. See *Encyclopédie Méthodique, Botanique* 6: 313. 1804 and *Blumea* 31(2): 306. 1986.

Schizopogon Rchb. ex Spreng. = *Schizachyrium* Nees

From the Greek *schizo* "to split, divide" and *pogon* "beard."

Panicoideae, Andropogoneae, Andropogoninae, see *Flora Brasiliensis seu Enumeratio Plantarum* 2(1): 331-332. 1829, *Genera plantarum* edition 9, 1: 55. 1830, *Plantae Junghuhnianae* 3: 359. 1854, *Flora Australiensis: A Description ...* 7: 535. 1878, *Genera Plantarum* 3(2): 1127. 1883 and *Contributions from the United States National Herbarium* 46: 560-569. 2003.

Schizostachyum Nees = *Cephalostachyum* Munro, *Dendrochloa* C.E. Parkinson, *Leptocanna* L.C. Chia & H.L. Fung, *Leptocanna* (N.H. Xia) L.C. Chia & H.L. Fung, *Neohouzeaua* A. Camus, *Pseudostachyum* Munro, *Teinostachyum* Munro

From the Greek *schizo*, *schizein* "to split, divide" and *stachys* "spike, ear of corn," alluding to spacing of spikelets.

About 30-60 species, temperate Southeast Asia, Thailand, Malesia, Madagascar, India. Bambusoideae, Bambusodae, Bambuseae, Melocanninae, sympodial, perennial, variable, slender, thin- or thick-walled, arborescent or shrubby, woody and persistent, unarmed, closely tufted, usually erect to suberect with drooping tips, scandent or not scandent, somewhat scrambling, bending, manifold branching, many short branches at each node, sheath shedding late, young shoots covered with pale hairs, rhizomes pachymorph, flowering culms leafy, internodes hairy, ligule a membrane fringed or unfringed, leaves auriculate, stalked leaf blades, plants bisexual, pseudospikelets short or long with several small empty bracts, spikelets slender cylindrical not flattened, 1-4 perfect flowers and 1-2 terminal vestigial flowers, glumes present or usually absent, lemmas acuminate to pungent, palea 2-keeled, uppermost palea convolute, lodicules present or absent, stamens usually 6 or 4-6 free or united, ovary glabrous with an apical appendage, 2-3 plumose stigmas white or reddish, found growing wild, sometimes cultivated, savannah, along roadsides, wastelands, lowlands, in forest and forest margins, type *Schizostachyum blumei* Nees, see *Neue Entdeckungen im ganzen Umfang der Pflanzenkunde* 2: 43. 1820 [1821], *Agrostologia Brasiliensis* 534-535. 1829 [or *Flora Brasiliensis seu Enumeratio Plantarum in Brasilia ... Stuttgartiae et Tubingae* 1829-1833], *Pl. Ind. Bat. Or.* 116: 1857, *Transactions of the Linnean Society of London* 26(1): 126, 138-139, 141-143, t. 3, 4. 1868 and *Bulletin du Muséum National d'Histoire Naturelle* 28(1): 100-101. 1922, *The Indian Forester* 59: 707. 1933, *J. Species

S. sp.

Asia.

in Indonesia: awi tamiyang, bambu suling, bambu tamiyang sonoh, buluh, buluh bamban, buluh kerbau, buluh mam-pouw, buluh mape, buluh mpe, buluh mumpo, buluh serik, buluh tangkal, kalae, kauayan, pring andeng, pring wuluh, pring wuluh andeng, tiying kedampal, tiying buluh

in Vietnam: mang, mang nua

S. aciculare Gamble

Southern Thailand, Peninsular Malaysia. Slender, small, erect or scrambling, pendulous tip, culm sheath blades erect to reflexed, pseudospikelets long and slender, food, used for making handicrafts, growing in forest, see *Ann. Roy. Bot. Gard. Calcutta* 7: 117, pl. 104. 1896 and *Gard. Bull. Sing.* 16: 39. 1958.

in Malaysia: buloh akar, buloh padi

in Thailand: kasian, lawk, lok, lot, mai plong yao

in Vietnam: mang, mang nua

S. aequiramosum Widjaja

Indonesia. See *Reinwardtia* 11(2): 131. 1997.

S. alopecurus (Stapf) Holttum (*Oxytenanthera alopecurus* Stapf)

Indonesia. See *Bulletin of Miscellaneous Information Kew* 1909: 266. 1909, *Kew Bulletin* 21: 280. 1967.

S. arunachalensis Naithani

India, Arunachal Pradesh. Semiscandent, erect at first and then pendulous, nodes swollen with thick ring of brown hairs, internodes smooth, leaf sheaths with reticulate auricles, leaves oblong-lanceolate, occurs in wet mountain slopes, see *Indian Forester* 118(3): 230. 1992.

in India: tuchur

S. atrocingulare Widjaja

Indonesia. See *Reinwardtia* 11(2): 132. 1997.

S. bamban Widjaja

Indonesia. See *Reinwardtia* 11(2): 134. 1997.

S. beddomei (Fischer) Majumdar (*Teinostachyum beddomei* Fischer; *Teinostachyum wightii* Beddome)

India, Kerala, Karnataka. Semiscandent, at first erect, leaning, pendulous branches, nodes with a ring, culm sheaths papery, large terminal drooping inflorescence, spikes bracteate, spikelets with 2-3 fertile florets and 1 terminal incomplete floret, glumes mucronate, lemmas mucronate, paleas 2-keeled, stamens exerted, ovary smooth, 2 short plumose stigmas, species flower at long intervals and die after flowering, culms used for making mats and for fencing, see *Flora of the Presidency of Madras* 10: 1860. 1934, *Kew Bull.* 1935: 148. 1935, *Fl. Ind. Enumerat.-Monocot.* 281. 1989.

in India: chittu, mai-eettari, nanyura

S. blumei Nees (also spelled *blumii*) (*Melocanna longispiculata* Kurz; *Melocanna zollingeri* Steud. var. *longispiculata* Kurz ex Munro; *Schizostachyum longispiculatum* (Kurz ex Munro) Kurz)

Borneo, Sumatra. Slender, long, erect or leaning over older culms, drooping or arching, with long pendulous tips, densely tufted, compactly clumped, bushy, sympodial, branching from midculm nodes upward, young shoots erect and slender, young culms rough to scabrous then smooth, nodes not swollen, white waxy rings below the nodes, culm sheath blade erect and narrowly lanceolate, sheath ligule very short and irregularly dentate, sheath auricles bristly, large leaf blades round at the base and long lanceolate to tapering, long pseudospikelets, slender spikelets, 1 perfect floret and a rachilla extension with 1 vestigial floret, lemma pointed, lodicules absent, cultivated, used for making fishing rods and for musical instruments, flutes, related to *Schizostachyum latifolium* Gamble, found in lowland forests, wastelands, forest margins, along roadsides, along streams and rivers, dipterocarp forest, see *Flora Brasiliensis seu Enumeratio Plantarum* 2: 535. 1829, *Catalogus plantarum quae in Horto botanico bogoriensi ...* 20. 1866, *Transactions of the Linnean Society of London* 26(1): 134. 1868, *Journal of the Asiatic Society of Bengal. Part 2. Natural History* 39: 89, t. 6, f. 1. 1870 and *Blumea* 2: 86-97. 1936, *Kew Bulletin* 38(2): 330-331. 1983.

in Brunei: buluh lacau

in Indonesia: awi tamiyang

in Malaysia: buloh anap, bongulungul, bongulungun, tom-botuon

in Thailand: hia, miang fai, miang phai, wa klo, waa klo

S. brachycladum (Kurz ex Munro) Kurz (*Melocanna brachyclada* Kurz; *Schizostachyum brachycladum* (Kurz) Kurz; *Schizostachyum brachycladum* (Munro) Kurz; *Schizostachyum brachycladum* Kurz)

Southeast Asia. Sympodial, densely tufted, stiffly erect, straight, thin-walled, smooth, closely growing, slender tips drooping, nodes not swollen, internodes smooth, short branches from the midculm nodes upward, culm sheaths rigid and persistent, blades of culm sheaths triangular with

acuminate apex, sheath ligule entire, sheath auricles small and bristly, 6-10 or more oblong-lanceolate leaves on each twig, leaves pubescent beneath and glabrous above, inflorescences terminating leafy branches, pseudospikelets borne in dense clusters at the distal nodes of a leafy shoots, 1-2 perfect florets and a rudimentary floret on a rachilla extension, palea with 2 short apical points, 3 lodicules, 6 stamens, 3 plumose stigmas, propagated by rhizome and culm cuttings, ornamental, often cultivated and naturalized, flowers continuously, useful for erosion control, young shoots bitter but edible, internodes used as cooking vessels for preparing a glutinous rice cake (the *lemang*), culms used for roofing and for making water containers, for weaving, growing wild or spontaneous, in disturbed or secondary forests, in wastelands, along roadsides, on well-drained sandy clays, hill slopes, on sandy loamy soil, disturbed areas, secondary forests, related to *Schizostachyum zollingeri* Steudel, see *Catalogus plantarum quae in Horto botanico bogoriensi ...* 20. 1866, *J. Asiat. Soc. Bengal. Part 2. Natural History* 39(2): 89, t. 6, f. 2, 29. 1870 and *Gardens' Bulletin Singapore* 16: 45-47. 1958, *Canopy International* 12(6): 5-7. 1986.

in Indonesia: buluh leman, buluh sero, buluh tolang, talang kuning (yellowish)

in Malaysia: buloh leman, buloh silau, buloh telang, buluh leman, buluh nipis, buluh padi, buluh pelang, buluh urat rusa

in the Philippine Islands: buho, kauayang, kauayang buho

in Sabah: buloh, buloh rugadding (yellowish), wuloh

in Thailand: kriap, mai pho, phai luaeng, phai po, phai por, po

S. brachycladum Kurz var. ***auriculatum*** Holttum

Indonesia, Singapore. Culm sheath auricles large, see *Gardens' Bulletin, Straits Settlements* 16: 47. 1958.

S. brachythyrus (K. Schumann) Holttum (*Oxytenanthera brachythyrus* K. Schum.)

Indonesia. See *Die Flora von Kaiser Wilhelms Land* 23. 1889 and *Kew Bulletin* 21: 281. 1967.

S. capitatum (Munro) Majumdar (*Bambusa capitata* Trin.; *Schizostachyum capitatum* (Trin.) Rupr.)

India, Arunachal Pradesh, Sikkim, Meghalaya; Bhutan. Shrubby, scandent or semiscandent, subarborescent, pendulous, leaning, nodes not prominent, culm sheaths papery, leaves with a twisted tip, leaf sheaths glabrous and fimbriate in the throat, short ligule, globular inflorescence, sterile spikelets hidden by scales, fertile spikelets with 1-3 sterile florets at the base, 2 glumes, paleas nerved, 3 lodicules ciliate at the tip, 6 exerted stamens, ovary glabrous, 2 hairy stigmas, see *Genera Plantarum* 1: 236. 1789, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 3(1):

S. dullooa (Gamble) Majumdar (*Neohouzeaua dullooa* (Gamble) Camus; *Teinostachyum dullooa* Gamble)

India, Assam, Meghalaya, Tripura, north Bengal. Tufted, more or less large, sometimes scandent, culms and culm sheaths variable, nodes prominent, thin walls, subulate blade, leaves oblong-lanceolate and acuminate, leaf sheaths ciliate on the edges, ligule long-fimbriate, slender spikelets 1-flowered, 2-4 empty glumes long mucronate, paleas 2-awned, 6 stamens, ovary glabrous, 3 short reddish stigmas, culms used for carrying water for making baskets and mats, umbrellas and small boxes, see *Annals of the Royal Botanic Garden. Calcutta.* 101. 1896 and *Bulletin du Muséum National d'Histoire Naturelle* 28(1): 101. 1922, *Fl. Ind. Enumerat.-Monocot.* 281. 1989.

in India: dullooa, püksalu, tokre bans, wadroo

S. dumetorum (Hance) Munro (*Bambusa dumetorum* Hance ex Walp.; *Bambusa dumetorum* Hance)

China. Semiscandent, top drooping or scandent, young culms greenish, pruinose ring below each joint, sheath green with purplish margins and top truncate, sheath ligule very low, sheath blade linear, leaves lanceolate with scabrous surface and glossy underside, rhizome with medicinal value, cultivated and ornamental, see Berthold Seemann (1825-1871), *The Botany of the Voyage of H.M.S. Herald* ... 424. London 1852-1857, *Annales Botanicæ Systematicæ* 3: 781. 1853, *Transactions of the Linnean Society of London* 26(1): 123, 136. 1868.

S. dumetorum (Hance) Munro var. *xinwuense* (Wen & J.Y. Chin) N.H. Xia (*Schizostachyum xinwuense* T.H. Wen & J.Y. Chin)

S. fenixii Gamble (*Cyrtochloa fenixii* (Gamble) S. Dransf.)

Southeast Asia, the Philippines. Scandent, see *Philippine Journal of Science* 6: 189. 1913, *Kew Bulletin* 53(4): 861, 864, f. 2, 3A-J. 1998.

in the Philippine Islands: bolo, paua, puser

S. flavescens (Kurz) Majumdar (*Cephalostachyum flavescens* Kurz)

India, Andaman Islands, Myanmar. Evergreen, tufted, more or less arborescent, smooth, dull green turning yellow, nodes not prominent, culm sheaths smooth or covered with appressed hairs, leaves linear contracted at the base into a very short petiole, leaf sheaths glabrous, narrow inconspicuous ligule, bracteate spikelets, empty bract-like glumes, paleas 2-keeled, lodicules ciliate, ovary stipitate and smooth, 3 stigmas, see *Forest Flora of British Burma* 2: 564. 1877 and *Fl. Ind. Enumerat.-Monocot.* 281. 1989.

S. flexuosum Widjaja

Indonesia. See *Reinwardtia* 11(2): 138-140. 1997.

S. fuchsianum (Gamble) Majumdar (*Cephalostachyum fuchsianum* Gamble; *Schizostachyum latifolium* (Gamble) Majumdar)

India, Arunachal Pradesh, Sikkim; Bhutan, China. Arborescent, woody, semiscandent, soft, thin-walled, nodes prominent, culm sheath thin, leaves ovate-lanceolate with a long petiole, leaf sheaths long ciliate on the edges, ligule ciliate, globular inflorescence, spikelets elongate, glumes ovate, lemmas tessellate, paleas 2-keeled and mucronate, lodicules minutely ciliate, stamens exerted, 2 short stigmas, culms used for basket making, seeds edible, see *Annals of the Royal Botanic Garden. Calcutta.* 7: 107, t. 94. 1896 and *Fl. Ind. Enumerat.-Monocot.* 281. 1989, *Edinburgh Journal Botany* 51: 29. 1994.

in India: palom

S. funghomii McClure

China. Straight or slightly bending, sheath hard but brittle, sheath auricles tiny, sheath blade retroflexed, leaves oblong-lanceolate its underside covered with pubescence, cultivated, used for weaving, papermaking, see *Lingnan Science Journal* 14(4): 585-588, f. 1, 3, t. 34, 39, f. 4-7. 1935.

S. glaucifolium (Rupr.) Munro (*Bambusa glaucifolia* Rupr.)

Pacific, Hawaii. Perennial, subshrub to shrub, sacred uses, used for construction of walls, canals to transport water, fencing, containers for liquids, see *Bambuseae* 57. 1839, *Transactions of the Linnean Society of London* 26(1): 123, 137. 1868.

in English: Polynesian 'ohe

in Hawaii: 'ohe

in the Pacific: 'ofe, 'ofe para, 'ofe tea, 'ofe 'ura, 'ohe

S. glaucocladum Widjaja

Indonesia. See *Reinwardtia* 11(2): 140-142. 1997.

S. gracile (Kurz ex Munro) Holttum (*Melocanna gracilis* Munro; *Melocanna gracilis* Kurz ex Munro; *Schizostachyum gracile* (Munro) Holttum; *Schizostachyum gracile* var. *erectum* Holttum; *Schizostachyum tenue* Gamble)

Peninsular Malaysia, Indonesia, eastern Sumatra. Bushy, untidy, loosely tufted, usually erect, strongly arched over culms, green to dull green, culm sheath densely pubescent, sheath blade broadly triangular and erect, sheath auricles bristly, clusters of pseudospikelets found at the distal nodes of a slender leafy shoot, several empty and prophyllate bud subtending bracts, 1 perfect flower, 3 lodicules, 6 stamens, 3 plumose stigmas, ornamental, found on the edges of forest, wastelands, along riverbanks and streams, ponds, swampy areas, along roadsides, see *Transactions of the Linnean Society of London* 26(1): 133. 1868, *Annals of the Royal Botanic Garden, Calcutta*. 7: 114, pl. 100. 1896 and *Kew Bull.* 2: 206. 1956, *Gard. Bull. Sing.* 16: 37-38. 1958.

in Indonesia: buluh alar, buluh giling

in Malaysia: buloh akar, buloh rapen, buluh akar, buluh rappen

S. gracile (Kurz ex Munro) Holttum var. ***erectum*** Holttum
Peninsular Malaysia. Usually erect, drooping, strongly arched over culms, see *Gardens' Bulletin, Straits Settlements* 16: 38. 1958.

S. grande Ridley

Peninsular Malaysia, northern Sumatra, southern Thailand. Tufted, gregarious, thin-walled, erect and strongly arched, drooping or leaning, open, sympodial, white ring below the nodes, branching from all nodes, erect culm sheaths rigid and deciduous, sheath ligule irregularly toothed, sheath auricles small and bristly, very broad leaves usually glabrous, inflorescence of groups of pseudospikelets, 3 hermaphrodite florets and 1 rudimentary terminal floret, long rachilla internode, 3 lodicules, aggressive weed species difficult to eradicate, leaves used as wrappers, young shoots edible, culms used as frames, for making baskets, handicrafts, internodes used as cooking vessels for preparing a glutinous rice cake (*lemang*), found in overlogged forests, open places, edges of forests, foothills, see *Journal of the Straits Branch of the Royal Asiatic Society* 82: 204. 1920, *Gard. Bull. Sing.* 16: 49-51. 1958, *Journal of the American Bamboo Society* 7(1-2): 1-15. 1989, *Nature Malaysiana* 16(4): 130-135. 1991, *Journal of Tropical Forest Science* 4(1): 87-93. 1991.

in Indonesia: buluh lemeng

in Malaysia: buloh semeliang, buloh seminyeh, buluh semeliang, buluh seminyeh

in Thailand: pai marieng, phai miang, phai ta kwang

S. griffithii (Munro) Majumdar (*Cephalostachyum griffithii* (Munro) Kurz, also spelled *griffithsii*; *Teinostachyum griffithii* Munro)

India, Assam, Arunachal Pradesh, Meghalaya, Thailand. Straggling or suberect, scandent, erect at first, drooping, arching, culm sheaths glabrous, leaves oblong-lanceolate rounded at the base into a wrinkled petiole, nodes with verticillate branches, leaf sheaths keeled, falcate auricles,

fringed ligule, spikelets narrow, 3-5 hermaphrodite florets, 1-2 glumes, lemmas pubescent, paleas 2-keeled, lodicules equal or subequal, stamens exerted, ovary stipitate and beaked, 2-3 stigmas white or purplish, culms used for making baskets and pipes, umbrella handles, see *Transactions of the Linnean Society of London* 26(1): 143, t. 3. 1868, *Forest Flora of British Burma* 2: 566. 1877 and *Fl. Ind. Enumerat.-Monocot.* 281. 1989.

in India: behti, beti

S. hainanense Merrill ex McClure

China. Growing upward, long slender top drooping or scandent, long slender branches, sheath blade very narrow and long, leaves long lanceolate, strip woven into rain hats, long internodes made into flutes, used in fencing, growing in tropic rain forests, see *Porterfield, Govt. Bur. Econ. Inf., Booklet Ser.* 2: 74. 1926, *Lingnan Science Journal* 14(4): 591, t. 36, 39, f. 1. 1935.

S. hantu S. Dransfield

Malaysia, Borneo. Tufted, open, diffuse, erect, leaning, drooping, thick-wall, young internodes white and hairy, nodes swollen, on a leafy branch groups of pseudospikelets, used to make baskets, see *Kew Bulletin* 38(2): 327-329, f. 4. 1983.

in Malaysia: buloh hantu

S. helferi (Munro) Majumdar (*Arundarbor helferi* (Munro) Kuntze; *Bambusa helferi* Munro; *Neohouzeaua helferi* (Munro) Gamble; *Pseudostachyum helferi* (Munro) Kurz; *Teinostachyum helferi* (Munro) Gamble)

India, Meghalaya. Evergreen, sometimes scandent, tufted, spreading, bushy, climbing, much arched, rooting when touch the ground, thin walls, forming large impenetrable thickets, nodes somewhat inflated or thickened, internodes velvety pubescent, culm sheaths thick and persistent, leaves oblong-lanceolate and variable in size, leaf sheaths smooth, long-fringed auricle, ligule narrow and fringed, usually 2 slender spikelets together, usually 2 glumes, lemmas hirsute and mucronate, 6 stamens monadelphous, ovary glabrous, 3 stigmas reddish, culms used for making baskets, see *Transactions of the Linnean Society of London* 26(1): 114. 1868, *Journal of the Asiatic Society of Bengal. Part 2. Natural History* 42(2): 253. 1873, *Revisio Generum Plantarum* 2: 761. 1891, *Annals of the Royal Botanic Garden, Calcutta*. 7: 102. 1896 and *Bulletin of Miscellaneous Information Kew* 1923: 91. 1923, *Florae Indicae Enumeratio: Monocotyledonae, Bambusoideae* Botanical Survey of India, Flora of India, Series 4, 281. Calcutta 1989.

in India: tumar, tumoh, walay, wali

in Thailand: tho ha kai, tho kheo, so khae ya, hia khrua

S. insulare Ridley

Thailand. See *Journal of the Straits Branch of the Royal Asiatic Society* 61: 64. 1912.

S. iraten Steud. (*Schizostachyum biflorum* McClure) (a Javanese plant name)

Java, Bali, Sumatra. Erect, slightly arched outwards, drooping tips, sympodial, densely tufted, branching from midculm upward, nodes swollen and with whitish ring below, culm sheaths narrowly lanceolate and persistent, sheath ligule serrate, sheath auricles short and bristly, leaves glabrous, leaf blades lanceolate or linear-lanceolate, clusters of pseudospikelets, slender and glabrous spikelets cylindrical, 1-2 perfect florets and a rudimentary floret on a rachilla extension, paleas glabrous and acuminate, cultivated, internodes used as cooking vessels for preparing a glutinous rice cake (*lemang*), culms used for fishing rods and to make blowpipes, internodes made into flutes, closely related to *Schizostachyum lima* (Blanco) Merrill and to *Schizostachyum jaculans* Holttum, found in disturbed forest, scrub vegetation, secondary hill forest, see *Synopsis Plantarum Glumacearum* 1: 332. 1854 and *Blumea* 2: 89. 1936, *Kew Bulletin* 38(2): 332. 1958.

Indonesia, Java. See Bystriakova, N., Kapos, V., Stapleton, C. & Lysenko, I. *Bamboo Biodiversity*. UNEP-WCMC/INBAR. 2003.

in Indonesia: bambu tamiyang

S. jaculans Holtt. (*Schizostachyum blumei* sensu Gamble, non Nees)

Peninsular Malaysia, origin not known. Densely tufted, clumped, sympodial, erect, slender, long pendulous or drooping tips, sometimes outarched to the ground, branching from midculm nodes upward, slender internodes, white waxy ring below the nodes, culm sheath yellow-green, sheath ligule fringed and bristly, sheath auricles lacking, leaf blades pubescent beneath and glabrous above, inflorescence of pseudospikelets in dense tufts at the node of leafless glabrous shoots, spikelets cylindrical, basal bracts empty, 1 perfect flower, no lodicules, 6 stamens, 3 plumose stigmas, wild and cultivated, used to make blowpipes, the status of this species should be resolved, useful for erosion control, see *Agrost. Bras.* 534-535. 1829, *Annals of the Royal Botanic Garden, Calcutta.* 1896 and *Blumea* 2: 86. 1936, *Kew Bulletin* 1953(4): 493-496. 1953, *Gard. Bull. Sing.* 16: 40-42. 1958, *Kew Bull.* 38(2): 330. 1983.

India, Andaman Islands. Woody, arborescent, evergreen, tufted, green, glossy, 1-4 branches from each node, nodes not thickened, wall of internodes thin, leaves lanceolate to linear-lanceolate, leaf sheaths hispid at first, spikelets bracteate, 2-3 fertile florets and a terminal imperfect one, 1-2 glumes ovate, lemmas rough, paleas ciliate on the keels, 0-3 lodicules, ovary hairy, 3 hairy stigmas, see *Transactions of the Linnean Society of London* 26(1): 134. 1868 and *Bulletin of the Botanical Survey of India* 22(1-4): 176. 1980, *Fl. Ind. Enumerat.-Monocot.* 281. 1989, *Bamboos of the World* 310. 1999.

S. latifolium Gamble (*Cephalostachyum fuchsiaenum* Gamble; *Cephalostachyum latifolium* Munro; *Melocanna zollingeri* var. *longispiculata* Kurz ex Munro; *Ochlandra ridleyi* Gamble; *Schizostachyum latifolium* (Munro) Majumdar, nom. illeg., non *Schizostachyum latifolium* Gamble; *Schizostachyum latifolium* (Gamble) Majumdar; *Schizostachyum longispiculatum* sensu Holttum, non Kurz; *Schizostachyum longispiculatum* (Kurz ex Munro) Kurz sensu Holttum; *Schizostachyum ridleyi* (Gamble) Holttum)

India, Peninsular Malaysia, Sabah, Indonesia, Borneo. Shrubby, sympodial, tufted, open, scrambling, erect or somewhat erect with long arching tips, slender drooping culm tips, nodes not swollen, manifold branching, culm sheath long persistent, sheath auricles bristly, blades of culm sheaths ovate-lanceolate and deflexed or spreading, leaves glabrous ovate or ovate-lanceolate and narrowed into a short petiole, leaf sheaths ciliate, long pseudospikelets in clusters at the distal nodes of basally leafy branches, slender spikelets 1-flowered with a rachilla extension bearing a vestigial floret, lemma hairy, palea 2-tipped, 3-10 lodicules or exceptionally only 1, 6 stamens, 2-3 plumose stigmas, cultivated and wild, culms used in basketry (*seraung*) and for making blowpipes, mats and woven objects, common in tropical lowlands, along roadsides, wastelands, along rivers, at forest edges and riversides, streams, secondary forest, disturbed situations, taxonomic difficulties in delimiting this species, often confused with *Schizostachyum blumei* Nees, see *Enumeratio Plantarum Zeylaniae* 376. 1864, *Transactions of the Linnean Society of London* 26(1): 134. 1868, *Journal of the Asiatic Society of Bengal. Part 2. Natural History* 39: 89, t. 6, f. 1. 1870, *Annals of the Royal Botanic Garden, Calcutta.* 7: 107, 117, 127, t. 94. 1896 and *Gardens' Bulletin, Straits Settlements* 11(4): 296. 1947, *Gard. Bull. Sing.* 16: 48-49. 1958 (as *longispiculatum*), *Kew Bulletin* 38(2): 331. 1983, *Fl. Ind. Enumerat.-Monocot.* 281. 1989.

Madagascar. See *Bulletin de la Société Botanique de France* 71: 780-781. 1924.

S. pilosum S. Dransfield

Sabah, Malaysia. Erect, leaning or drooping, densely tufted, thin-walled, white waxy when young, culm sheath waxy and hairy, sheath blade erect and broadly lanceolate, at the end of a leafy branch few groups of pseudospikelets at each node, spikelets 2-flowered with a rachilla extension bearing a vestigial floret, 3 lodicules, culms used for basketry and roofing, common in damp places, forest, wastelands, forest margins, along roadsides, related to *Schizostachyum grande* Ridley, see *Kew Bulletin* 38(2): 325-327, f. 3. 1983.

in Malaysia: buloh pus, pus

S. pleianthemum S. Dransfield

Indonesia. Secondary forest, see *Kew Bulletin* 38(2): 325, f. 2. 1983.

S. polymorphum (Munro) Majumdar (*Pseudostachyum polymorphum* Munro)

India, Assam, Meghalaya, Arunachal Pradesh, Sikkim, Myanmar. Shrubby, single culm, flexible, scandent, leaning, solitary, thick-walled, long creeping and jointed rhizome, culm sheaths smaller than the internodes, leaves oblong-lanceolate and rounded at the base into a short petiole, leaf sheaths white-pubescent, large inflorescence paniculate curved, spikelets 1-flowered, 1 glume, paleas 2-keeled and ciliate, 3-5 lodicules, 6 stamens, 2 hairy stigmas, the species flowers frequently, culms can be easily split and are flexible, used for basketry and mat making, toys, in Myanmar used by wizards and priests who roast the stem and then prophesy, occurs in moist areas, see *Transactions of the Linnean Society of London* 26(1): 142, t. 4. 1868 and *Fl. Ind. Enumerat.-Monocot.* 282. 1989, *Edin. J. Bot.* 51: 30. 1994.

in India: bajal, filing, nal, paphak, parphok, pheling, purphiok, serrah, silloh, tolli, wachal, wachall

in the Philippine Islands: bayto

S. pseudolima McClure

Temperate Asia, China, Vietnam. Culm top drooping or scandent, branches small and short, young culms dark green and scabrous, sheath shedding late or persistent and hard but brittle, sheath auricles degenerated, sheath blade linear-lanceolate, leaf blades oblong to lanceolate, leaves underside covered with deciduous pubescence, used as punt poles, in weaving and in pulping, making utensils for daily use, see *Lingnan Science Journal* 19(4): 537-538, t. 39-40. 1940.

S. rogersii Brandis

India, Andaman Island. Tufted, weak, arching, erect, leaning, overhanging, thin-walled, culm sheaths thin and much shorter than the internodes, spikelets 1-flowered, 2-4 glumes, paleas 2-dentate, 3 unequal lodicules, ovary glabrous, 3 stigmas, culms used for making arrows and blowpipes, see *Indian Trees* 679. 1906.

S. sanguineum W.P. Zhang

China. See *Bamboo Research in Asia* 1989(4): 12. 1989.

S. seshagirianum Majumdar

India, Arunachal Pradesh. Shrubby, scandent, tufted, blade inflated at base, see *Fl. Ind. Enumerat.-Monocot.* 282. 1989, N. Bystriakova, V. Kapos, C. Stapleton & I. Lysenko, *Bamboo Biodiversity*. UNEP-WCMC/INBAR. 2003.

S. silicatum Widjaja

Indonesia. See *Reinwardtia* 11(2): 145-147. 1997.

S. terminale Holttum

Sabah, Peninsular Malaysia, Brunei. Scrambling, clambering or climbing, open tufted, erect, leaning, slightly geniculate at the nodes, drooping tips, very slender branches, dominant middle branch, inflorescence of pseudospikelets, spikelets very long, 3-5 perfect flowers, lemma and palea glabrous and smooth, 3-5 lodicules, common along riverbanks, seasonally inundated areas, flooded places, swampy sites, see *Gardens' Bulletin, Straits Settlements* 15: 274. 1956 and 16: 51. 1958, *Gard. Bull. Sing.* 43: 39-42. 1991.

S. tessellatum A. Camus

Solomon Islands. See *Bulletin de la Société Botanique de France* 81: 785. 1935.

S. textorium (Blanco) Merrill (*Arundarbor textoria* (Blanco) Kuntze; *Bambus textoria* Blanco; *Bambusa textoria* Blanco)

The Philippines. See *Flora de Filipinas* 270. 1877, *Revisio Generum Plantarum* 2: 761. 1891 and *American Journal of Botany* 3: 64. 1916.

S. toppingii Gamble (*Cyrtochloa toppingii* (Gamble) S. Dransf.)

Asia, the Philippines. Erect, scandent, see *Philippine Journal of Science* 5: 276. 1910, *Kew Bulletin* 53(4): 861-862, f. 1, 3K-W. 1998.

in the Philippine Islands: usiu

S. undulatum S. Dransfield

Sumatra, Indonesia. See *Kew Bulletin* 38(2): 323, 325, f. 1. 1983.

S. warburgii Hackel (*Oxytenanthera warburgii* (Hack.) K. Schum. ex Volkens)

Papua New Guinea, Indonesia. See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 13: 263. 1890 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 31: 457. 1901.

S. whitei Holttum (for Cyril Tenison White, 1890-1950) Solomon Islands. See *Kew Bulletin* 21: 280. 1967.

S. xinwuense Wen & J.Y. Chin (*Schizostachyum dumentorum* var. *xinwuense* (T.H. Wen & J.Y. Chin) N.H. Xia)

China, Jiangxi. Climber, thin branches, sheath auricle absent, sheath ligule truncate and rough, sheath blade broadly linear to narrow lanceolate, leaf blades lanceolate to narrow lanceolate, see *Transactions of the Linnean Society of London* 26(1): 123, 136. 1868 and *Journal of Bamboo Research* 1(1): 28-29, f. 6. 1982, *Journal of Tropical and Subtropical Botany* 1(1): 7. 1993.

S. zollingeri Steudel (*Melocanna zollingeri* (Steud.) Kurz ex Munro; *Schizostachyum chilanthum* (Büse) Kurz; *Schizostachyum chilanthum* sensu Gamble p.p., non *Chloothamnus chilanthus* Büse) (named for the Swiss botanist Heinrich Zollinger, 1818-1859, school-teacher, studied with Alph. de Candolle, plant collector and botanical explorer in Java and Sumatra, among his writings are *Observationes phytographicae*. [Batavia 1844-1846], *Over de soorten van Rottlera*. Batavia 1856, *Observationes botanicae novae*. [Batavia 1857] and *Sur la végétation autour des cratères volcaniques de l'île de Java*. [Genève] 1858, see also in *Verhandelingen der Natuurkundige Vereen. in Nederlandsche Indië*. 1: 19. 1856 [Acta Soc. Regiae Sci. Indo-Neerl. 1(4): 19. post 1 Sep 1856]; see J.H. Barnhart, *Biographical notes upon botanists*. 3: 543. 1965; T.W. Bossert, compil., *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 450. Boston, Mass. 1972; Antoine Lasègue, *Musée botanique de M. Benjamin Delessert*. Paris, Leipzig 1845; Ethelyn Maria Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Schleropelta Buckley = *Hilaria* Kunth

Greek *skleros* "hard, dry" plus *peltis* "a shield."

Chloridoideae, Cynodonteae, Hilariinae, type *Schleropelta stolonifera* Buckley (*Hilaria belangeri* (Steud.) Nash), see *Nova Genera et Species Plantarum* 1: 116-118, pl. 37. 1815 [1816], *Synopsis Plantarum Glumacearum* 1: 111. 1854, *A Preliminary Report on the Geological and Agricultural Survey of Texas* App. 1. 1866 and *North American Flora* 17(2): 135. 1912, *Contributions from the United States National Herbarium* 41: 128-129, 193. 2001.

Schmidtia Steudel ex J.A. Schmidt = *Antoschmidtia* Boiss., *Schmidtia* Moench (Asteraceae, alt. Compositae), *Schmidtia* Tratt.

In honor of the German botanist Johann Anton Schmidt, 1823-1905, professor of botany, traveler, plant collector, 1851 Capo Verde Islands, author of *Beiträge zur Flora der Cap Verdischen Inseln*. Heidelberg 1852 and *Flora von Heidelberg*. Heidelberg 1857, and contributor to C.F.P. von Martius, *Flora Brasiliensis* (Labiatae, Scrophulariaceae, Phytolaccaceae, Nyctaginaceae, Plumbaginaceae, Plantaginaceae); see David Porter (1780-1843), *Journal of a Cruise Made to the Pacific Ocean ... in the United States Frigate Essex, in the Years 1812, 1813, and 1814*. Containing descriptions of the Cape Verd [*sic*] Islands, etc. Philadelphia 1815; J.H. Barnhart, *Biographical notes upon botanists*. 3: 232. 1965; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 353. 1972; Ethelyn Maria Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933.

Two species, tropical Africa, Pakistan. Chloridoideae, Pappophoreae, annual or perennial, viscid, aromatic, glandular,

unarmed, herbaceous, usually branched, tufted to decumbent, auricles absent, ligule a fringe of hairs, leaves linear to linear-lanceolate, plants bisexual, open or contracted panicle, spikelets solitary, 2 glumes very unequal and strongly 7- to 14-nerved, female fertile lemmas 6-lobed and 5-awned, uppermost 1 or 2 florets sterile and reduced, palea present, 2 lodicules fleshy and ciliate, 3 stamens, ovary glabrous, 2 stigmas white, species of open habitats, open bushlands, woods, dry to very dry areas, bushlands, open grasslands, dry sandy and stony places, red sandy soil, type *Schmidtia pappophoroides* Steud. ex J.A. Schmidt, see *Suppl. Meth.* 217. 1802, *Flora des Österreichischen Kaiserthumes* 1: 12. 1816, *Beiträge zur Flora der Cap Verdischen Inseln* 144-145. 1852, *Flora Orientalis* 5: 559. 1884.

Species

S. kalahariensis Stent (*Antoschmidtia kalahariensis* (Stent) Bremek. & Oberm.)

Sudan, Namibia, South Africa. Annual, tufted, erect or geniculate, prostrate, generally unbranched or occasionally much branched, coarse, hairy, slightly sticky and with an unpleasant sour smell, stoloniferous, cataphylls absent, fibrous roots, often rooting from the lower nodes, culms always terminating in an inflorescence, leaf sheaths mostly densely round and hairy, ligule an inconspicuous fringe of short hairs, leaf blades sharply tipped and usually expanded at the base, inflorescence a spike-like contracted panicle, lemmas 5-awned, hay and pasture, pioneer grass relatively palatable and nutritious, low grazing value, grazed before the flowering stage and when dry, found in dry to very dry areas, sandy places, sandy and loamy soils, open veld, poor sandy soil, disturbed locations, often confused with *Enneapogon cenchroides* (Licht. ex Roemer & Schultes) C.E. Hubb., see *Bothalia* 2: 421, 423. 1928, *Annals of the Transvaal Museum* 16: 405. 1935.

in English: sour grass, bushman grass

in South Africa: suurgras, eenjarige vyfnaaldgras, Kalaharisuurgras, Schmidts sauergras, fünfborstengras

S. pappophoroides Steud. ex J.A. Schmidt (*Antoschmidtia bulbosa* (Stapf) Peter; *Antoschmidtia pappophoroides* (Steud. ex J.A. Schmidt) Boiss.; *Schmidtia bulbosa* Stapf)

Eastern and central tropical Africa, South Africa, Angola. Perennial bunchgrass, erect or geniculately ascending, tufted, tussocky, leafy, shrubby, woody, many nodes, slightly swollen at the base, very variable in size and in hairiness, hairy cataphylls present, rhizomatous, often stoloniferous and rooting at the lower nodes, woody rootstock, creeping rhizome, leaf blades rolled and expanded, leaf sheaths usually round and hairy, ligule a fringe of short hairs, inflorescence a loosely contracted elliptic panicle, elliptic to obovate spikelets 4- to 10-flowered, sterile and inflorescence bearing-shoots both on the same plant, green glumes, upper lemmas 5-awned and 6-lobed, lower lemma

densely silky villous, palea villous, high to low grazing value, palatable to very palatable, drought-tolerant, useful for erosion control, common in sandy and dry stony soils, open bushlands, on limy, on stony clay soils, open grasslands, open woodlands, see *Beiträge zur Flora der Cap Verdischen Inseln* 145. 1852, *Flora Orientalis* 5: 559. 1884 and *Flora Capensis* 7: 658. 1900, *Repertorium Specierum Novarum Regni Vegetabilis*, Beihefte 40(1): 307. 1931.

in English: sand quick grass, Kalahari sandquick

in South Africa: blougras, suurgras, fünfborstengras, fünfborsten Kräuselgras, kopgras, lidjiesgras, vaalgras, vaalkrulgras, krulgras, blouplatsaadjie, Kalahari sandkweek, sandkweek, kalkweek, Schmidts Kräuselgras

Schmidtia Tratt. = Coleanthus J. Seidel

Named in honor of the German botanist Franz Wilibald Schmidt, 1764-1796, professor of botany, physician; see J.H. Barnhart, *Biographical notes upon botanists*. 3: 231. 1965; Jonas C. Dryander, *Catalogus bibliothecae historico-naturalis Josephi Banks*. London 1800; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993.

Pooideae, Poeae, Agrostidinae, type *Schmidtia subtilis* Tratt., see *Suppl. Meth.* 217. 1802, *Flora des Österreichischen Kaiserthumes* 1: 12. 1816, *Systema Vegetabilium* 2: 11, 276. 1817, *Beiträge zur Flora der Cap Verdischen Inseln* 144-145. 1852, *Flora Orientalis* 5: 559. 1884 and *Contributions from the United States National Herbarium* 48: 237, 608. 2003.

Schmidtia Raf. = Coleanthus J. Seidel

For the German botanist Franz Wilibald Schmidt, 1764-1796.

Pooideae, Poeae, Agrostidinae, see *Suppl. Meth.* 217. 1802, *Flora des Österreichischen Kaiserthumes* 1: 12. 1816, C.S. Rafinesque, *Autikon botanikon*. Icones plantarum select. nov. vel rariorum, etc. 187. Philadelphia 1840, *Beiträge zur Flora der Cap Verdischen Inseln* 144-145. 1852, *Flora Orientalis* 5: 559. 1884 and E.D. Merrill, *Index rafinesquianus*. 76. 1949, *Contributions from the United States National Herbarium* 48: 237, 608. 2003.

Schnizleinia Steudel = Boissiera Hochst. ex Steud., Boissiera Steud.

Bromeae, in syn. sub *Boissiera bromoides* Hochst. & Steudel, see *The Natural History of Aleppo* 2: 224. 1794, *Mémoires de l'Académie Impériale des Sciences de Saint*

Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles 1(1): 92. 1830, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 4,2(1): 54. 1836, *Flora* 21: 25. 1838, *Nomenclator Botanicus. Editio secunda* 1: 213. 1840, Sir Dietrich Brandis (1824-1907), Fridolin Carl Leopold Spenner (1798-1841), Alois (Aloys) Putterlick (1810-1845), Stephan Friedrich Ladislaus Endlicher (1804-1849), Carl Wilhelm Bischof, Johann Xaver Robert Caspary (1818-1887), Adalbert Carl Friedrich Hellwig Conrad Schnizlein (1814-1868) and Theodor Friedrich Ludwig Nees von Esenbeck (1787-1837), *Genera Plantarum Florae Germanicae* iconibus et descriptionibus illustrata ... Bonnae [1833-] 1835-1860, *Syn. Pl. Glum.* 1: 200. 1854, *Akademie der Wissenschaften in Wien, Mathematisch-Naturwissenschaftliche Klasse, Denkschriften* 50(2): 9. 1885 and *Journal of Botany, British and Foreign* 75: 189. 1937, *Feddes Repertorium* 79: 338. 1969, Stafleu and Cowan, *Taxonomic literature* 5: 279-284. 1985.

Schoenanthus Adans. = *Ischaemum* L.

Greek *schoinos* "a rush, reed, cord" and *anthos* "flower," *schoinanthe* "flower of *schoinos*."

Panicoideae, Andropogoneae, Ischaeminae, see *Species Plantarum* 2: 1049. 1753, *Familles des Plantes* 2: 38, 602. 1763 and *N. Amer. Fl.* 17: 94. 1909, *Contributions from the United States National Herbarium* 46: 275-276. 2003.

Schoenefeldia Kunth

For the German botanist Wladimir de Schoenefeld (Schoenefeld), 1816-1875, a student of Adr. de Jussieu, one of the founders of the Société Botanique de France, wrote "Rapport sur une excursion faite en août 1860 ... au Bourgd'Oisans." *Bull. Soc. Bot. France.* 7(8): 804-815. Paris 1863; see J.H. Barnhart, *Biographical notes upon botanists.* 3: 236. 1965; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University.* Cambridge, Mass. 1917-1933; Stafleu & Cowan, *Taxonomic literature.* 5: 286-287. 1985.

Two species, India, tropical Africa, Madagascar. Chloridoideae, Cynodonteae, annual or perennial, herbaceous, tufted, auricles absent, ligule a fringed membrane, plants bisexual, inflorescence digitate or subdigitate, racemes single or digitate, spikelets solitary and sessile, usually all florets female-fertile, 2 narrow glumes very unequal, acuminate to shortly awned glumes 1-nerved, lemma keeled and 2-toothed with a long flexuous sinuous awn, palea present, 2 free and fleshy lodicules, stamens 2 or 3, ovary glabrous, 2 stigmas, open habitats, dry grasslands on sandy soils, sandy fields, savannahs, clay soils, orange sand, seasonally

flooded areas, related to *Chloris* Sw., type *Schoenefeldia gracilis* Kunth, see *Révision des Graminées* 1: 86. 1829 and Qing Liu, Nan-Xian Zhao, Gang Hao, Xiao-Ying Hu and Yun-Xiao Liu, "Caryopsis morphology of the Chloridoideae (Gramineae) and its systematic implications." *Botanical Journal of the Linnean Society* 148(1): 57-72. May 2005.

Species

S. gracilis Kunth (*Chloris myosuroides* Hook.f.; *Chloris pallida* (Edgew.) Hook.f., nom. illeg., non *Chloris pallida* Willd.; *Schoenefeldia pallida* Edgew.)

Arabia, Yemen, Sahel-Sudanian region. Annual, tufted, glabrous, erect, slender, geniculately ascending, smooth, ligule a hairy rim, narrow flat leaf blades tough, inflorescence digitate of straight spikes solitary or 2 to 4 together, spikelets 1-flowered without a rachilla extension, glumes scabrid on the keel, lower glume acute and mucronate, fertile lemma ciliate on the nerves and with a scaberulous awn, sterile lemma with a short awn, forage, low grazing value, browsed whilst still young, good fodder for sheep and camels, used for thatching and cordage, on sandy areas, see *Nova Genera et Species Plantarum seu Prodromus* 1, 25. 1788, *Révision des Graminées* 1: 283, t. 53. 1829, *Journal of the Asiatic Society of Bengal* 21: 183. 1852, *The Flora of British India* 7(22): 289-290. 1897 [1896].

in Mali: burdi, furala, furale, guare lalale, lakio wanduho, sààna yà, sààna ya, ulukumissé, urga

in Niger: budù, fari'n tchawa, geenal, hudo rimo, ihaerdaen-allagh, ikaerdan, karagéhô, kébulu, kotokoli, n-allagh, sub kaarey, zubu kwarey

in Nigeria: kakuma, rumayza, rumaza, sawun kadafkaràà, shinaka, sinaka, tafa duwa, wutsiyaar beeràà, wutsiyar beeràà, wutsiyar birii, wutsiyar kadangare, wutsiyar kuusùù

in Senegal: alas ndiad, furaba, gen u gold, golombale, ndiad, pellen, rov, salombale, suarelalale, ulukumissé, urga

in Upper Volta: buruudi, celbi, lamyondon, nyomre, nyoobe, sarao, selbo, silazurè, tugu legan

in India: machhighas, tarwaria

S. transiens (Pilg.) Chiov. (*Chloris transiens* Pilg.)

Tropical East Africa. Perennial, densely tufted, erect or geniculately ascending, leaf blades glabrous or loosely pilose, inflorescence of 2-4 slender spikes, cleistogamous, spikelets 2-flowered flattened, upper floret reduced, lower glume, lemma ciliate, awns curved, grows in heavy soils, shrubland, in seasonally flooded plains, orange sands, see *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 51(3-4): 418. 1914, *Resultati Scientifici della Missione Stefanini-Paoli nella Somalia Italiana* 1: 186. 1916.

in Somalia: xalfo

Schoenodorus Roemer & Schultes =
Bellardiochloa Chiov., *Festuca* L., *Poa* L.,
Schedonorus P. Beauv.

Orth. var. of the genus *Schedonorus* P. Beauv., or from the Greek *schoinos* “rush, reed, cord” plus *doron* “a gift.”

Pooideae, Poeae, Loliinae, see *Species Plantarum* 1: 67. 1753, *Mémoires de l'Académie Royale des Sciences* 5: 214, t. 3. 1792, *Essai d'une Nouvelle Agrostographie* 99, 162, 177. 1812, *Systema Vegetabilium* 2: 42. 1817, *Hortus Regius Botanicus Berolinensis* 1: 171. 1827, *Hortus Regius Botanicus Berolinensis* 1: 171. 1829 and *Stud. Veg. Piemonte* 13. 1929, *Fragmenta Floristica et Geobotanica* 19: 265-270. 1973, *Denkschriften der Schweizerischen [Naturforschenden Gesellschaft] [Akademie der Naturwissenschaften]* 100: 1-130. 1987, *Fitologija* 39: 72-77. 1991, *Contributions from the United States National Herbarium* 48: 313-368, 505-580, 605-607, 608. 2003.

Schultesia Sprengel = *Chloris* Sw.,
Eustachys Desv., *Schultesia* Mart.
(Gentianaceae), *Schultesia* Roth
(Campanulaceae), *Schultesia* Schrad.
(Amaranthaceae)

For the Austrian botanist Josef August Schultes, 1773-1831, M.D. Wien 1796, naturalist, plant collector, among his writings are *Reise auf den Glockner*. Wien 1804, *Ratio medendi in schola clinica medica*. Lipsiae 1828, *Reisen durch Oberösterreich in den Jahren 1794-1808*. Tübingen 1809 and *Observationes botanicae*. Oeniponti [Innsbruck] 1809, with Johann Jakob Roemer (1763-1819) wrote *Systema vegetabilium*. 1807-1830; see J.H. Barnhart, *Biographical notes upon botanists*. 3: 244. 1965; H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 240. Oxford 1964; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Eine Bibliographie*. Leipzig 1942; Emil Bretschneider (1833-1901), *History of European Botanical Discoveries in China*. Leipzig 1981; G. Schmid, *Goethe und die Naturwissenschaften*. Halle 1940.

Chloridoideae, Cynodonteae, Chloridinae, see *Nova Genera et Species Plantarum seu Prodrum* 1, 25. 1788, *Nouveau Bulletin des Sciences, publié par la Société Philomatique de Paris* 2: 188-189. 1810, *Plantarum Minus Cognitarum Pugillus* 2: 17. 1815, *Göttingische gelehrte Anzeigen unter der Aufsicht der Königl.* 1821: 708. 1821, *Enumeratio Plantarum Phaenogamarum in Germania* 1: 690. 1827, *Nova Genera et Species Plantarum ...* 2(2): 103-104, t. 180. 1826 [1827], *Conspectus Regni Vegetabilis* 4.

1828 and *Contributions from the United States National Herbarium* 41: 39-52, 117-118, 193-194. 2001.

Sciadonardus Steud. = *Gymnopogon* P.
Beauv.

Greek *skias*, *skiados* “canopy, umbel of plants” and *nardos* “spikenard.”

Chloridoideae, Cynodonteae, see *Flora Boreali-Americana* 1: 58. 1803, *Essai d'une Nouvelle Agrostographie* 41, 164. 1812, *Flora* 33: 229. 1850, *Preliminary Catalogue of Anthophyta and Pteridophyta Reported as Growing Spontaneously within One Hundred Miles of New York* 69. 1888 and *Iowa State College Journal of Science* 45(3): 319-385. 1971, *Contributions from the United States National Herbarium* 41: 124-127, 194. 2001.

Scirpobambus Kuntze = *Oxytenanthera*
Munro

Latin *scirpus*, *i* “a rush, bulrush” plus *bambos*, *bambusa*.

Bambuseae, see *Transactions of the Linnean Society of London* 26(1): 126-127. 1868 and *Lexicon Generum Phanerogamarum ...* 509. 1903 [1904], *Taxon* 6(7): 206. 1957.

Sclerachne R. Br. = *Chionachne* R. Br.

Greek *skleros* “hard, dry” and *achne* “chaff, glume.”

One species, from India to Southeast Asia, Thailand. Panicoideae, Andropogonodae, Maydeae, or Andropogoneae, Chionachninae, annual, herbaceous, erect, prostrate, decumbent, auricles absent, plants monoecious, hermaphrodite florets absent, inflorescence paniculate with unequal branches, spike-like reduced racemes, a single raceme with 1-3 female segments and 1-2 male segments, spikelets solitary or paired, male spikelets with 2 glumes, male florets 3-staminate, palea present, lodicules absent, no stamens, in forest margins, type *Sclerachne punctata* R. Br., see *Transactions of the American Philosophical Society, new series*, 5: 142. 1835, John Joseph Bennett and Robert Brown, *Plantae Javanicae Rariores* 15, 18, t. 4. London 1838, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 6,4(3-4): 273. 1841, *Fragmenta Phytographiae Australiae* 8: 116. 1873, *Flora Australiensis* 7: 515. 1878, *Contributions from the United States National Herbarium* 2(3): 518. 1894 and *Meded. Rijks-Herb.* 67: 1-17. 1931, R.P. Celarier, “Cytotaxonomy of the Andropogoneae 2. Subtribes Ischaeminae, Rottboellinae, and the Maydeae.” *Cytologia* 22: 160-183. 1957, *Kew Bulletin* 35: 813. 1981, *Blumea* 47(3): 545-580.

2002 [Revision of Chionachninae (Gramineae: Andropogoneae), by T.A. Jannink & J.F. Veldkamp].

Species

S. punctata R. Br. (*Chionachne massiei* Balansa; *Chionachne punctata* (R. Br.) Jannink; *Polytoca massii* (Balansa) Schenck; *Polytoca punctata* (R. Br.) Stapf ex Hook.f.)

Java, Indonesia. Inflorescence axillary, sessile spikelet lower glume winged emarginate, pedicelled spikelet barren small or vestigial, male segment with short internodes and fused pedicels, see *Plantae Javanicae Rariores* 15, 20, t. 4. 1838, *Journal de Botanique (Morot)* 4: 78. 1890, *The Flora of British India* 7(21): 102. 1897 [1896] and *Mededeelingen van's Rijks-Herbarium* 67: 9. 1931, *Blumea* 47(3): 564, 566-567, f. 8. 2002.

Sclerachne Torr. ex Trin. = *Greenia* Nutt., *Greenia* S. Wallman (Liliaceae), *Limnas* Trin., *Limnodea* L.H. Dewey, *Sclerachne* Trin., *Thurberia* Benth.

Greek *skleros* “hard, dry” and *achne* “chaff, glume.”

Pooideae, Poaceae, Aveninae, see *De Fructibus et Seminibus Plantarum* 2: 188. Apr-May 1791, *Fundamenta Agrostographiae* 116, t. 6. 1820, *Transactions of the American Philosophical Society, new series*, 5: 142. 1835, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Special Report* 63: 16. 1883, *Contributions from the United States National Herbarium* 2(3): 518. 1894 and *Bulletin, Division of Agrostology United States Department of Agriculture* 7(edition 3): 139. 1900, *Sida* 19(1): 195-200. 2000, *Contributions from the United States National Herbarium* 48: 381, 425-426, 608, 654. 2003.

Sclerandrium Stapf & C.E. Hubb. = *Germainia* Balansa & Poitr.

Greek *skleros* “hard, dry” and *aner, andros* “male, man,” referring to the lower glume of the male spikelets.

Northern Australia, Arnhem's Land. Panicoideae, Andropogonodae, Andropogoneae, Andropogoninae, type *Sclerandrium truncatiglume* (F. Muell. ex Benth.) Stapf & C.E. Hubb., see *Bulletin de la Société d'Histoire Naturelle de Toulouse* 7: 344, f. 1-9. 1873, *Flora Australiensis: A Description ...* 7: 518-519. 1878, *Monogr. Phan.* 6: 255. 1889, *Journal de Botanique (Morot)* 4: 83. 1890 and *Lex-*

ikon Generum Phanerogamarum 247. 1903 [1904], *Bulletin du Muséum d'Histoire Naturelle* 25: 285. 1919, O. Stapf and Charles Edward Hubbard, *Hooker's Icones Plantarum. Ser. 5. 3, t. 3262*. 1935, *Die natürlichen Pflanzenfamilien, Zweite Auflage* 14e: 124. 1940, *Australian Journal of Botany* 2: 108. 1954, *Journal of the Royal Society of Western Australia* 44(3): 77-83. 1961, *Dansk Botanisk Arkiv* 23(4): 467-471. 1968, *Thai Forest Bulletin. Botany* 6: 29-59. 1972, *Blumea* 45: 443-475. 2000.

Sclerochloa P. Beauv. = *Amblychloa* Link, *Crassipes* Swallen, *Desmazeria* Dumort.

From the Greek *skleros* “hard, dry” and *chloe, chloa* “grass,” referring to the nature of grass, to the thick glumes, to leathery glumes and lemmas.

About 1-2 species, Eurasia, southern Europe to western Asia. Pooideae, Poodae, Poaceae, or Pooideae, Poaceae, Puccinelliinae, annual, tufted, erect, ascending to geniculate and branching at base, herbaceous, auricles absent, ligule membranous, leaves flat and linear, culm nodes glabrous, culm internodes solid, plants bisexual, paniculate inflorescence 1-sided and dense, bisexual and solitary spikelets compressed laterally with short stout or thick pedicels, glumes unequal and obtuse, upper glume 5-9-nerved, lower glume 3- to 5-nerved, awnless lemmas cartilaginous and rounded on the back, palea nerved, 2 lodicules free and membranous, ovary glabrous, small fruit triangular beaked, hairy callus absent, disturbance species, in dry areas, saline soils, open habitats, disturbed weedy places, type *Sclerochloa dura* (L.) P. Beauv., see Ambroise Marie François Joseph Palisot de Beauvois (1752-1820), *Essai d'une nouvelle Agrostographie* 97, 98, 174, 177, t. 19, f. 4. Paris (Dec) 1812, *Commentationes Botanicae* 26-27. 1822, *Botanicon Gallicum* 1: 522. Oerebroae 1855 and *Contr. U.S. Natl. Herb.* 10: 2. 1906, *American Journal of Botany* 18(8): 684-685, f. 1-4. 1931, *Journal of Cytology and Genetics* 21: 155. 1986, D.M. Brandenburg, J.R. Estes & J.W. Thieret, “Hard Grass (*Sclerochloa dura*, Poaceae) in the United States.” *Sida*. 14(3): 369-376. 1991, *Cytologia* 56: 437-452. 1991, *Flora Mediterranea* 8: 307-313. 1998, *Contributions from the United States National Herbarium* 48: 106-107, 239, 256, 608-609. 2003, *Weed Biology and Management* Volume 3, Issue 4: 197-203. Dec 2003.

Species

S. dura (L.) P. Beauv. (*Amblychloa dura* Link ex B.D. Jacks.; *Crassipes annuus* Swallen; *Cynosurus durus* L.;

Eleusine dura (L.) Lam.; *Festuca dura* (L.) Vill.; *Poa dura* (L.) Raspail, nom. illeg., non *Poa dura* (L.) Scop.; *Poa dura* (L.) Roth; *Poa dura* (L.) Scop., nom. illeg., non *Poa dura* (L.) Scop.; *Sesleria dura* (L.) Kunth

Europe and Asia. Annual, tufted, glabrous, small, stiff, tough, ascending to prostrate, short or prostrate tussocks, bright green, auricles absent, ligule membranous and acute, short unilateral spike-like green panicle, spikelets sessile, uppermost floret often reduced, lemmas truncate keeled 5- to 7-nerved, palea 2-keeled with keels wingless, anthers yellow, elliptical fruit laterally compressed and keeled, weed, grows in disturbed areas, waste grounds, campgrounds, playgrounds, athletic fields, disturbed gravel roadside, fairgrounds, roadsides, superficially similar to and often grows with *Poa annua* L., see *Plantae per Galliam, Hispaniam et Italiam observata* ... Opus posthumum, editum cura et studio Antonio de Jussieu, medici. 1213, t. 50. Paris 1714, *Species Plantarum* 1: 67, 72-73. 1753, *Flora Carniolica* 189. 1760, *Flora Carniolica, Editio Secunda* 1: 70. 1772, *Histoire des Plantes de Dauphiné* 2: 94. 1787, *Tentamen Florae Germanicae* 1: 43. 1788, *De Fructibus et Seminibus Plantarum* 1: 7. 1788, *Tableau Encyclopédique et Méthodique* ... *Botanique* 1: 203. 1791, *Essai d'une Nouvelle Agrostographie* 98, 174, 177. 1812, *Annales des Sciences Naturelles (Paris)* sér. I 5: 444, 458, t. 8, f. 4. 1825, *Révision des Graminées* 1: 110. 1829, *Index Kewensis* 1: 104. 1895 and *American Journal of Botany* 18(8): 685, f. 1-4. 1931, *Bot. J. Linn. Soc.* 91: 438. 1985.

in English: hard meadow-grass, hardgrass, common hard grass

Sclerodactylon Stapf = *Arthrochlaena* Boiv. ex Benth.

From the Greek *skleros* "hard, dry" and *daktylos* "a finger," referring to the inflorescence.

About 1-2 species, eastern Madagascar, southwestern China. Chloridoideae, Eragrostideae, perennial, unbranched, armed, tufted, stoloniferous, leaves mainly basal, auricles absent, leaf blades woody and terete, hard rigid leaves needle-like to sharply pointed, ligule a fringe of hairs, plants bisexual, inflorescence of paired or digitate racemes, solitary imbricate spikelets, 2 glumes very unequal to unequal, upper glume awned or awnless, lemma strongly keeled glabrous acute, palea winged, 2 free and membranous lodicules, 3 stamens, ovary glabrous, 2 stigmas, open areas, saline flats, swamps, mangrove swamps, seashores, related to *Dactyloctenium* and *Eragrostis*, type *Sclerodactylon juncifolium* Stapf, see *De Fructibus et Seminibus Plantarum* 1: 7. 1788, *Journal of the Linnean Society, Botany* 19: 107. 1881 and *Bulletin of Miscellaneous Information Kew* 1911: 318. 1911, *Acta Botanica Sinica* 9(1): 54-55, f. 2. 1960.

Species

S. macrostachyum (Benth.) A. Camus (*Eleusine macrostachya* Benth.)

Madagascar. See *Journal of the Linnean Society, Botany* 19: 107. 1881 and *Bulletin de la Société Botanique de France* 79: 38. 1932.

Sclerodeyeuxia (Stapf) Pilger = *Calamagrostis* Adans., *Sclerodeyeuxia* Pilger

From the Greek *skleros* "hard, dry" and the genus *Deyeuxia*, dedicated to the French professor of pharmacology Nicolas Deyeux, 1745-1837, among his publications are *Analyse des nouvelles eaux minérales de Passy*, communiquée à l'École de médecine de Paris. Paris 1808 and *Considérations chimiques et médicales sur le sang des ictériques*, présentées ... à l'École de médecine de Paris. Paris 1804.

Pooideae, Poodae, Aveneae, *Deyeuxia* sect. *Sclerodeyeuxia* Stapf, see *Familles des Plantes* 2: 31, 530. 1763, *Tentamen Florae Germanicae* 1: 34. 1788, A.M.F.J. Palisot de Beauvois, *Essai d'une nouvelle Agrostographie, ou nouveaux genres des Graminées*. 43, pl. IX. Paris 1812, *Hooker's Icones Plantarum* 27(1): t. 2605, 1-2. 1899 and *Brittonia* 2(2): 117. 1936, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 74: 19. 1947, *Darwiniana* 19(2-4): 404-412. 1975 [Z.E. Rúgolo de Agrasar, *Novedades en el género Deyeuxia Clarion (Gramineae)*], *Flora Mesoamericana* 6: 240-241. 1994, Xenia Villavicencio, *Revision der Gattung Deyeuxia in Bolivien: eine taxonomisch-anatomische studie*... 1-304. Berlin 1995, *Flora of Ethiopia and Eritrea* 7: 51-52. 1995, *New Zealand Journal of Botany* 33: 1-33. 1995, *Bot. Zhurn. (Moscow & Leningrad)* 81(5): 98-101. 1996, *Flora Mediterranea* 8: 251-262. 1998, *Opera Botanica* 137: 1-42. 1999, *New Zealand Journal of Botany* 37: 63-70. 1999, *Telopea* 9(3): 439-448. 2001, *Contributions from the United States National Herbarium* 48: 191-227. 2003.

Sclerolaena A. Camus = *Boivinella* A. Camus, *Cyphochlaena* Hack., *Sclerolaena* R. Br. (Chenopodiaceae)

Greek *skleros* and *chlaena* "a cloak, blanket."

Indian Ocean Islands, Madagascar. Panicoideae, Panicodae, Paniceae, see *Prodromus Florae Novae Hollandiae* 410. 1810 and *Österreichische Botanische Zeitschrift* 51: 465. 1901, *Bulletin de la Société Botanique de France* 72: 175, 622. 1925, *Bulletin du Muséum d'Histoire Naturelle* 31: 390. 1925, *Adansonia: recueil périodique d'observations botaniques, n.s.* 5: 411-413. 1965.

Sclerophyllum Griff. = *Oryza* L., *Porteresia* Tateoka, *Sclerophyllum* Gaudin (Compositae)

From the Greek *skleros* and *phyllon* “leaf.”

Oryzae, see *Species Plantarum* 1: 333. 1753, *Flora Helvetica* 5: 47. 1829, *Flora Indica*; or, *Descriptions of Indian Plants* 2: 206. 1832, *Notulae ad Plantas Asiaticas* 3: 8. Calcutta 1851 and *Botanical Magazine* 76(899): 165-173. 1963, *American Journal of Botany* 51: 539-543. 1964, *Bulletin of the National Science Museum* 8: 406. Tokyo 1965, *Bulletin of the Botanical Survey of India* 8: 42-44. 1966, *Bulletin of the Botanical Survey of India* 10: 274. 1969, *Bulletin of the Torrey Botanical Club* 101: 244. 1974.

Scleropoa Griseb. = *Catapodium* Link, *Cutandia* Willk., *Desmazeria* Dumort.

From the Greek *skleros* “hard, dry” and *poa* “grass, pasture grass.”

Pooideae, Poeae, Ammochloinae, type *Scleropoa rigida* (L.) Griseb., see *Commentationes Botanicae* 26-27. 1822, *Observations sur les Graminées de la Flore Belgique* 110, 113. 1823 [1824], *Hortus Regius Botanicus Berolinensis* 1: 44, 145, 280. 1827, *Spicilegium florum rumelicarum et bithynicarum* ... 2: 431. 1846, *Botanische Zeitung. Berlin* 18: 130. 1860, *Catalogue Raisonné des Plantes Vasculaires de la Tunisie* 483. Paris 1896 and *Flore de France* 14: 290-291. 1913, *Contributions from the United States National Herbarium* 48: 230, 241, 256. 2003.

Scleropogon Philippi = *Lesourdia* E. Fourn.

Greek *skleros* “hard, dry” and *pogon* “a beard,” referring to the awns.

One species, southern U.S., Mexico, Argentina, Chile. Chloridoideae, Cynodonteae, or Eragrostideae, perennial, highly variable, herbaceous, creeping, mat-forming, caespitose, erect, stoloniferous, leaves mostly basal, auricles absent, ligule a line of hairs, leaf blades pungent, plants usually dioecious or sometimes monoecious, plants staminate or pistillate, rarely bisexual, inflorescence a raceme or a panicle, spikelets solitary, extra spikelet scales, female inflorescence subtended by a scarious appendage or a glume-like bract, in pistillate spikelets upper florets reduced to awns, glumes 2 more or less equal, lemmas rolled with 3 long spreading awns, palea with 2 short awnlets, lodicules absent in pistillate spikelets, 3 stamens, 2 stigmas, male inflorescence without appendage, native pasture species, open areas, salty flats, along roadsides, grasslands, plains, dry fields, related to *Tridens*, type *Scleropogon brevifolius* Phil., see *Syn. Pl.* 2: 9. 1806 [1807], *Anales de la Universidad de Chile* 36: 205-206. 1870, *Bulletin de la Société Botanique de France* 27: 102, t. 3-4, f. 12. 1880, *Proceedings*

of the American Academy of Arts and Sciences 18: 181. 1883 and *Not. Bot. Gart. Berlin* 15: 15-22. 1940, *Die natürlichen Pflanzenfamilien, Zweite Auflage* 14d: 167, 49. 1956, *Phytologia* 49(1): 33-43. 1981, *Fl. Novo-Galiciana* 14: 354. 1983, *Genera Graminum* 207. 1986, *Phytologia* 62: 267-275. 1987, *American Journal of Botany* 81: 622-629. 1994, *BioLlania* 6: 473-490. 1997, *Plant Species Biology* 13: 35-50. 1998, *Contributions from the United States National Herbarium* 41: 138, 194. 2001.

Species

S. brevifolius Philippi (*Festuca macrostachya* Torr. & A. Gray; *Lesourdia karwinskyana* E. Fourn.; *Lesourdia multiflora* E. Fourn.; *Scleropogon karwinskyanus* (E. Fourn.) Benth. ex S. Watson; *Scleropogon longisetus* Beetle; *Tricuspis monstra* Munro ex Hemsl.)

North America, southwestern U.S. Perennial, stoloniferous, spikelets unisexual, awns much longer than body of lemma, low forage value, useful for erosion control, see *Pacif. Railr. Rep.* 2(4): 177. 1855, *Diagnoses Plantarum Novarum ... Mexicanarum* 3: 56. 1880.

in English: burro grass

in Mexico: zacate burro, zacate de burro

Sclerostachya (Andersson ex Hackel) A.

Camus = *Miscanthus* Andersson, *Saccharum* L., *Sclerostachya* (Hackel) A. Camus, *Sclerostachyum* Stapf ex Ridl.

From the Greek *skleros* and *stachys* “spike, an ear of grain, ear of corn.”

About 2-3 species, India, Malaysia. Panicoideae, Andropogonodae, Andropogoneae, Andropogoninae, *Andropogon* subgen. *Sclerostachya* Andersson ex Hack., perennial, herbaceous, coarse, stout, robust, often forming large clumps, rigid leaf blades linear lanceolate, ligule an unfringed membrane, plants bisexual, open inflorescence paniculate with whorled or fascicled branches, 2 glumes more or less equal, lower glume 2-keeled and 3-nerved, upper glume 3-nerved, palea keels lacking, 2 free and glabrous lodicules, 3 stamens, ovary glabrous, 2 stigmas, sometimes referred to *Saccharum* and *Miscanthus*, hybrids with *Narenga* and *Saccharum*, see *Species Plantarum* 1: 54. 1753, *Synopsis Plantarum Glumacearum* 1: 411. 1855 [1854], *Öfversigt af Förhandlingar: Kongl. Svenska Vetenskaps-Akademien* 12: 165-166. 1855, *Monographiae Phanerogamarum* 6: 119, 121. 1889 and *Contr. U.S. Natl. Herb.* 9: 400. 1905, *U.S. Dept. Agric. Bull.* 772: 254. 1920, *Flore Générale de l'Indo-Chine* 7: 243. 1922, *The Flora of the Malay Peninsula* 5: 194. 1925, *Proceedings of the 14th Congress of the International Society of Sugar Cane Technologists* 1972: 241. 1972, *Caryologia* 37: 351-357. 1984, *Flora Mesoamericana*

6: 378-379. 1994, *Sida* 16(2): 233-244. 1994, *Annals of the Missouri Botanical Garden* 81(4): 768-774. 1994, *Sida* 16(3): 551-580. 1995, *J. Fujian Acad. Agric. Sci.* 11(3): 19-22. 1996, *Journal of Plant Research* 115: 381-392. 2002, *Contributions from the United States National Herbarium* 46: 294-295, 550-557. 2003.

Species

S. fusca (Roxb.) A. Camus (*Eriochrysis attenuata* Nees ex Steud.; *Eriochrysis fusca* (Roxb.) Trin.; *Miscanthus fuscus* (Roxb.) Benth.; *Saccharum fuscum* Roxb.; *Sclerostachya milroyi* Bor; *Tricholaena fusca* (Roxb.) Schult.)

Asia tropical, India, Thailand. Perennial, coarse, tufted, silky, reedlike, ligule a ciliate membrane-like, rigid leaves linear-lanceolate with rough margins, inflorescence paniculate with branches whorled or solitary, spikelets in pairs, used for thatching and light fences, pens and screens, related to *Saccharum officinarum* L., common in moist habitats, in shallow depressions, see *Essai d'une Nouvelle Agrostographie* 8. 1812, *Flora Indica; or Descriptions ...* 1: 241. 1820, *Mantissa* 2: 8, 163-164. 1824, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 2(3): 315. 1832, *Synopsis Plantarum Glumacearum* 1: 411. 1855 [1854], *Journal of the Linnean Society, Botany* 19: 65. 1881 and *Indian Forest Records: Botany* 1: 85. 1939.

in India: kandu rellugaddi, khilut, khuree, kilat, pata-khuree, retwa, tillak, tilluk

in Thailand: khaem, khaem doi, kham, yaa phong, ya phong, ya rakam, yaa rakam, yaa saeng, ya saeng

S. ridleyi (Hack.) A. Camus (*Saccharum ridleyi* Hack.)

Asia tropical, Thailand. See *Österreichische Botanische Zeitschrift* 41: 6. 1891 and *Annales de la Société Linnéenne de Lyon, sér. 2*, 71: 104 [or 103]. 1925.

Scolochloa Link = *Fluminia* Fr., *Grapphephorum* Desv., *Scolochloa* Mert. & W.D.J. Koch

Greek *skolos* "thorn, prickle," *skolops* "anything pointed" and *chloe*, *chloa* "grass."

One or 2 species, north temperate regions. Pooideae, Poodae, Poeae, or Pooideae, Poeae, Scolochloinae, perennial, rhizomatous, auricles absent, ligule an unfringed membrane, rhizomes succulent, plants bisexual, inflorescence paniculate, panicle open, spikelets pedicellate, 2 glumes very unequal, upper glume 3- to 5-nerved membranous, lemmas smooth coriaceous, palea present, 2 lodicules, 3 stamens, ovary hairy on top, 2 stigmas, native pasture species, in shallow water, wet meadows, along streams, lakes, rivers, type *Scolochloa festucacea* (Willd.) Link, see *Species Plantarum* 1: 81. 1753, *Nouveau Bulletin des Sciences*,

publié par la Société Philomatique de Paris 2: 189. 1810, *Essai d'une Nouvelle Agrostographie* 99, 162, 177. 1812, *Deutschlands Flora* 1: 374, 528, 539. 1823, *Enumeratio Plantarum Horti Botanici Berolinensis* 1: 136-137. 1827, *Flora Helvetica* 1: 202. 1828, *Summa Vegetabilium Scandinaviae* 1: 76. 1845, *Summa Vegetabilium Scandinaviae* 1: 247. 1846, *Reisen im Amur-Lande, Bot.* 201, 244, t. 8, f. 15-21. 1868, *Genera Plantarum* 3(2): 1197. 1883 and *Acta Biologica Cracoviensia, Series Botanica* 27: 57-74. 1985, *Bot. Zhurn. (Moscow & Leningrad)* 76: 476-479. 1991, *Feddes Repertorium* 112(5-6): 333. 2001, *Contributions from the United States National Herbarium* 48: 368, 380-381, 609. 2003.

Species

S. festucacea (Willd.) Link (*Aira arundinacea* Lilj. ex Roem. & Schult., nom. illeg., non *Aira arundinacea* L.; *Arundo festucacea* Willd.; *Donax borealis* Trin.; *Donax festucaceus* (Willd.) P. Beauv.; *Festuca arundinacea* (L.) Lilj., nom. illeg., non *Festuca arundinacea* Schreb.; *Festuca borealis* (Trin.) Mert. & Koch ex Roehl.; *Festuca donacina* Wahlenb.; *Fluminia arundinacea* (Roem. & Schult.) Fr.; *Fluminia festucacea* (Willd.) Hitchc.; *Glyceria arundinacea* (Roem. & Schult.) Fr., nom. illeg., non *Glyceria arundinacea* Kunth; *Grapphephorum arundinaceum* (Roem. & Schult.) Asch.; *Grapphephorum festucaceum* (Willd.) A. Gray; *Schedonorus arundinaceus* Roem. & Schult.; *Schedonorus arundinaceus* Gaudin ex Roem. & Schult.; *Scolochloa arundinacea* (Roem. & Schult.) MacMill.; *Triodia festucacea* (Willd.) Roth)

Europe. Succulent rhizomes, spikelets several-flowered, floret callus bearded, lemmas 5- to 7-nerved, see *Species Plantarum* 1: 63-64, 81. 1753, *Flora Cochinchinensis* 1: 1, 11. 1790, *Utkast til en Svensk Flora* 49. 1792, *Svensk Flora* edition 2. 47. 1798, *Enumeratio Plantarum Horti Botanici Berolinensis, ...* 1: 126. 1809, *Essai d'une Nouvelle Agrostographie* 78, 152, 161. 1812, *Systema Vegetabilium* 2: 700. 1817, *Fundamenta Agrostographiae* 156. 1820, *J. Rohlings Deutschlands Flora* 1(2): 664. 1823, *Flora Suecica* 1: 64. 1824, *Enumeratio Plantarum Horti Botanici Berolinensis, ...* 1: 137. 1827, *Enumeratio Plantarum Phaenogamarum in Germania* 1(1): 382. 1827, *Summa Vegetabilium Scandinaviae* 247. 1846, *Proceedings of the American Academy of Arts and Sciences* 5: 191. 1861, *Flora der Provinz Brandenburg* 1: 852. 1864, *The Metaspermae of the Minnesota Valley* 79. 1892 and *United States Department of Agriculture: Bulletin* 772: 38, f. 11. 1920.

in English: sprangletop

Scolochloa Mert. & W.D.J. Koch = *Arundo* L., *Donax* P. Beauv.

From the Greek *skolos* "thorn, prickle," *skolops* "anything pointed" and *chloe*, *chloa* "grass."

Arundinoideae, Arundineae, type *Scolochloa arundinacea* (P. Beauv.) Mert. & Koch, see *Species Plantarum* 1: 81. 1753, *J. C. Rohlings Deutschlands Flora* 1: 374, 528, 530, 539. 1823 and *Fl. Bermuda* 29. 1918, *Contributions from the United States National Herbarium* 46: 113-115, 569. 2003.

Scribneria Hackel

For the American botanist Frank Lamson-Scribner (Franklin Pierce Lamson), 1851-1938, agrostologist, his writings include *Useful and Ornamental Grasses*. [see United States of America - Division of Agrostology. *Bulletin*, no. 3.] 1896, "Notes on the grasses in the Bernhardt Herbarium, collected by Thaddeus Haenke, and described by J.S. Presl." *Annual Rep. Missouri Bot. Gard.* 10: 35-59. 1899 and "New or little known grasses." *U.S.D.A. Circ.* 30: 1-8. 1901; see J.H. Barnhart, *Biographical notes upon botanists*. 2: 339. Boston 1965; J. Ewan, editor, *A Short History of Botany in the United States*. New York and London 1969; S. Lenley et al., *Catalog of the manuscript and archival collections and index to the correspondence of John Torrey*. Library of the New York Botanical Garden. 363-364. 1973; J.W. Harshberger, *The Botanists of Philadelphia and Their Work*. 358-360. 1899; Thomas Henry Kearney (1874-1956), in *Leaflet. Western Bot.* 8(12): 276. 1958; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. University of Pennsylvania Press, Philadelphia 1964; Joseph Ewan, *Rocky Mountain Naturalists*. The University of Denver Press 1950; Joseph William Blankinship (1862-1938), "A century of botanical exploration in Montana, 1805-1905: collectors, herbaria and bibliography." in *Montana Agric. Coll. Sci. Studies Bot.* 1: 1-31. 1904.

One species, western U.S. Pooideae, Poodae, Aveneae, or Pooideae, Poeae, Scribneriinae, annual, tufted, robust, herbaceous, unbranched, auricles absent, ligule an unfringed membrane, plants bisexual, inflorescence spicate or racemose, raceme rachis tough, spikelets solitary or paired, 2 glumes more or less equal, upper glume 4-nerved, lemma awned, palea present, 2 free membranous lodicules, 1 stamen, ovary glabrous, 2 stigmas, open ground, rocky places, type *Scribneria bolanderi* (Thurb.) Hack., see *Botanical Gazette* 11(5): 105-106, t. 5. 1886 and *Grasses: Systematics and Evolution* 61-74. 2000, *Contributions from the United States National Herbarium* 48: 609-610. 2003.

Species

S. bolanderi (Thurb.) Hack. (*Lepturus bolanderi* Thurb.)

U.S., California. Spikelets 1-flowered, lemma membranous 3-nerved, dry gravelly soil, see *Prodromus Florae Novae Hollandiae* 207. 1810, *Proceedings of the American Academy of Arts and Sciences* 7: 401. 1868, *Botanical Gazette* 11(5): 105-106, t. 5. 1886.

Scrotochloa Judz. = *Leptaspis* R. Br.

Possibly from the Latin *scrotum*, *i* "scrotum, a pouch" and Greek *chloe*, *chloa* "grass," see also *Leptaspis* R. Br., Greek *leptos* "slender" and *aspis* "a shield," the fruit is enclosed in the enlarged glume.

About 2 species, Sri Lanka, Southeast Asia, Pacific, southern India. Bambusoideae, Oryzodae, Phareae, perennial, erect, decumbent, herbaceous, unbranched, more or less hollow, rooting at the nodes, auricles absent, leaf blades pseudopetiolate, ligule a tiny unfringed membrane, plants monoecious, open inflorescence paniculate and nondigitate, all fertile spikelets unisexual, hermaphrodite florets absent, female spikelets with urn-shaped lemmas, staminate spikelets caducous, 2 glumes more or less equal, palea present, lodicules apparently lacking or absent, no stamens, 3 stigmas, male spikelets glumed, male florets 6-staminate, forest shade, rainforest, sometimes referred to *Leptaspis*, type *Scrotochloa urceolata* (Roxb.) Judz., see *Prodromus Florae Novae Hollandiae* 211. 1810 and *Phytologia* 56(4): 299-304. 1984, *Genera Graminum* 68. 1986, *Smithsonian Contr. Botany* 65: 1-27. 1987, Khidir W. Hilu and Lawrence A. Alice, "Evolutionary implications of *matK* indels in Poaceae." *Am. J. Bot.* 86: 1735-1741. 1999, Fabian A. Michelangeli, Jerrold I Davis and Dennis Wm. Stevenson, "Phylogenetic relationships among Poaceae and related families as inferred from morphology, inversions in the plastid genome, and sequence data from the mitochondrial and plastid genomes." *Am. J. Bot.* 90: 93-106. 2003.

Species

S. tararaensis (Jansen) Judz. (*Leptaspis tararaensis* Jansen)

Papua New Guinea. Perennial, bambusoid, see *Reinwardtia* 2(2): 304. 1953, *Phytologia* 56(4): 300. 1984.

S. urceolata (Roxb.) Judz. (*Leptaspis manillensis* Steud.; *Leptaspis urceolata* (Roxb.) R. Br.; *Pharus urceolatus* Roxb.)

Southern India, Sri Lanka. Perennial, bambusoid, leaf blades stalked, lemma pyriform with a terminal orifice, see *The Civil and Natural History of Jamaica in Three Parts* 344, pl. 38, f. 3. 1756, *Flora Indica; or, Descriptions of Indian Plants* 2: 611-612. 1832, *Plantae Javanicae Rariores* 1: 23, t. 6. 1838, *Synopsis Plantarum Glumacearum* 1: 8. 1855 [1853], *Enum. Pl. Zeyl.* 357. 1864 and *Handb. Fl. Ceylon* 5: 190-191. 1900, *Grasses of Ceylon* 21-22. 1956, *Grasses of Burma ...* 617, 619. 1960, *Phytologia* 56(4): 300. 1984.

Scutachne A. Hitchc. & Chase

Latin *scutum*, *i* "an oblong shield, a shield" and Greek *achne* "chaff, glume."

Two species, Cuba, the Caribbean. Panicoideae, Panicodae, Paniceae, or Panicoideae, Paniceae, Melinidinae, perennial, caespitose, herbaceous, auricles absent, leaves basal or mostly basal, leaf blades narrow, plants bisexual, inflorescence paniculate or spicate, spikelets pedicellate and compressed, shorter spikelets sterile, 2 glumes very unequal, lower glume 7- to 9-nerved, upper glume and lower lemma coriaceous, upper glume 7-nerved, upper lemma acuminate, palea present, 2 free and fleshy lodicules, 3 stamens, ovary glabrous, 2 stigmas, open habitats, rocky areas, rocky slopes, see *Scutachne dura* (Griseb.) Hitchc. & Chase, see *Species Plantarum* 1: 55. 1753, *Reliquiae Haenkeanae* 1(4-5): 343. 1830 and *Proceedings of the Biological Society of Washington* 24: 148-149. 1911, *Contributions from the United States National Herbarium* 46: 569. 2003.

Species

S. amphistemom (C. Wright) Hitchc. & Chase (*Alloteropsis amphistemom* (C. Wright) Hitchc.; *Panicum amphistemom* C. Wright)

The Caribbean. Densely tufted, primary branches simple, see *Anales de la Academia de Ciencias Medicas ...* 8: 207. 1871 and *Contributions from the United States National Herbarium* 12(6): 211. 1909, *Proceedings of the Biological Society of Washington* 24: 149. 1911.

S. dura (Griseb.) Hitchc. & Chase (*Alloteropsis dura* (Griseb.) Hitchc.; *Panicum durum* Griseb.)

The Caribbean. See *Memoirs of the American Academy of Arts and Science, new series* 8: 533. 1862 and *Contributions from the United States National Herbarium* 12(6): 211. 1909, *Proceedings of the Biological Society of Washington* 24: 149. 1911.

Secale L. = Gramen Ség.

The classical Latin name *secale* (*sicale*), *secalis* "a kind of grain, rye, black spelt," *seges*, *segetis* "a cornfield, a field, ground," Akkadian *se'u*, *sehu* "grain, corn"; see Carl Linnaeus, *Species Plantarum*. 84. 1753 and *Genera Plantarum*. edition 5. 36. 1754; S. Battaglia, *Grande dizionario della lingua italiana*. XVIII: 449-450. 1997; H. Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 573. 1996; M. Cortelazzo & P. Zolli, *Dizionario etimologico della lingua italiana*. 5: 1174-1175. 1988; N. Tommaseo & B. Bellini, *Dizionario della lingua italiana*. Torino 1865-1879; Giovanni Semerano, *Le origini della cultura europea*. *Dizionario della lingua Latina e di voci moderne*. 2(2): 559, 560. Firenze 1994.

About 3-5 species, Mediterranean region, Asia. Pooideae, Triticoideae, Triticeae, or Pooideae, Triticeae, Triticinae, annual, biennial or rarely perennial, herbaceous, tufted or solitary, erect, unbranched, auricles present, sheaths open, ligule an unfringed membrane, scabrous leaves linear and

flat or inrolled, plants bisexual, cleistogamous or chasmogamous, a single dense cylindrical spike or raceme finally drooping, spikelets solitary and sessile, spikelets distichous and erect, 2-3 fertile or bisexual florets, 2 linear glumes subequal to very unequal, glumes 1-nerved acuminate or awned, lemmas 1 or 2 in each spikelet and tapering to long straight awn, callus very short, palea narrow and awnless, 2 lodicules free and ciliate, 3 stamens, ovary hairy, ovary hairy, 2 stigmas, fruit longitudinally grooved, a weed of wheat and barley, stock fodder, used as a crop, stems for straw-matting and archery targets, binding sand, species of open habitats, sandy soils, dry hillsides, species of *Secale* L. are outcrossing, taxonomic placement not certain, there is considerable taxonomic confusion concerning this genus, intergeneric hybrids with *Triticum* L., *Agropyron* Gaertner, *Aegilops* L., *Hordeum* L. and *Elytrigia* Desv., type *Secale cereale* L., see *Species Plantarum* 1: 84. 1753, *Plantae Veronenses* 3: 145. 1754, *Genera Plantarum*. edition 5. 36. 1754 and *American Journal of Botany* 59(1): 59-70. 1972, *Biol. J. Linn. Soc.* 13: 299-313. 1980, *Feddes Repert.* 95: 425-521. 1984, *Am. J. Bot.* 85: 1581-1585. 1998, Jeremy D. Pickett-Heaps, Brian E.S. Gunning, Roy C. Brown, Betty E. Lemmon and Ann L. Cleary, "The cytoplasmic concept in dividing plant cells: cytoplasmic domains and the evolution of spatially organized cell division." *Am. J. Bot.* 86: 153-172. 1999, J. Spencer Johnston, Michael D. Bennett, A. Lane Rayburn, David W. Galbraith and H. James Price, "Reference standards for determination of DNA content of plant nuclei." *Am. J. Bot.* 86: 609-613. 1999, H. Lloyd Mogensen and Maxine Losoff Rusche, "Occurrence of plastids in rye (Poaceae) sperm cells." *American Journal of Botany* 87: 1189-1192. 2000, *Am. J. Bot.* 87: 1757-1764. 2000, *Am. J. Agricultural Production.” *Journal of Agronomy and Crop Science* 191(3): 172-184. June 2005, *Insect Molecular Biology* 14(3): 309-318. June 2005.

Species

S. afghanicum (Vavilov) Roshev. (*Secale ancestrale* var. *afghanicum* (Vavilov) Ivanov & G.V. Yakovlev; *Secale cereale* subsp. *afghanicum* (Vavilov) K. Hammer; *Secale cereale* var. *afghanicum* Vavilov; *Secale segetale* (Zhuk.) Roshev.; *Secale segetale* subsp. *afganicum* (Vavilov) Bondar ex O.N. Korovina; *Secale segetale* var. *afghanicum* (Vavilov) Tzvelev)

Afghanistan. Annual, see *Novosti Sist. Vyss. Rast.* 10: 46. 1973, *Kulturpflanze* 35: 146. 1987, *Acta Botanica Yunnanica* 12: 57-66. 1990, *Acta Biologica Cracoviensia, Series Botanica* 36: 23-30, pls. 2-3. 1994.

S. africanum Stapf (*Secale montanum* subsp. *africanum* (Stapf) Kobyl.; *Secale strictum* subsp. *africanum* (Stapf) K. Hammer)

South Africa, Cape Province. Vulnerable species, rare, perennial, loosely tufted, inflorescence very dense and linear, lemma keel hairy, growing on riverbanks, undisturbed places, see *Flora Sicula* (Presl) 1: xlvi. 1826, *Florae Siculae Prodrumus* 1: 145. 1827, *Hooker's Icones Plantarum* 27(1): t. 2601, 1-2. 1899 and *Kulturpflanze* 35: 142. 1987, *Hereditas (Beijing)* 10: 5-7. 1988, *Annals of Botany* 64: 315-324. 1989, *Chromosoma* 101: 206-213. 1991, *Bothalia* 29(2): 335-341. 1999.

S. anatolicum Boiss. (*Secale daralagesi* Thüm.; *Secale montanum* subsp. *anatolicum* (Boiss.) Tzvelev; *Secale montanum* Guss. var. *anatolicum* Boiss.; *Secale strictum* subsp. *africanum* (Boiss.) K. Hammer)

Anatolia. See *Sovetskaja Botanika* 6: 101. 1938, *Novosti Sist. Vyss. Rast.* 10: 46. 1973, *Kulturpflanze* 35: 140. 1987, *Genome* 29: 594-597. 1987.

S. cereale L. (*Secale montanum* Guss.; *Secale turkestanicum* Bensin; *Triticum cereale* (L.) Asch. & Graebn.; *Triticum cereale* (L.) Salisb.; *Triticum secale* Link)

Europe, Eurasia. Annual or biennial, tufted, erect, pubescent, auricles present, basal leaf sheaths not keeled, ligule membranous and truncate, flat and linear leaves, bearded and finally drooping distichous spike, cleistogamous and heteromorphic spikelets, rachis tardily disarticulating, hermaphrodite spikelets sessile, 2 bisexual florets, incomplete florets morphologically similar to hermaphrodite florets, glumes subulate or tapering to an awn, lemma long-awned, palea membranous and narrowly ovate, ovary pilose, grain crop species, used for making bread and for stock feed, sand-binder, used for erosion control and for soil stabilization, widely cultivated, found in waste places, along roadsides, in fallow lands or field margins, see *Species Plantarum* 1: 84-85. 1753, *Prodrumus stirpium in horto ad Chapel Allerton gentium*. 27. Londini [London] (Nov-

Dec) 1796 and *Bulletin of the Torrey Botanical Club* 60(3): 156-160, f. 1-2. 1933, *Canad. J. Bot.* 40: 1704. 1962, *Acta Botanica Academiae Scientiarum Hungaricae* 17(1-2): 120. 1971[1972], *Acta Biologica* 29: 23-32. 1984, *Flora of Turkey and the East Aegean Islands* 9: 259. 1985, *Acta Botanica Sinica* 27: 460-464. 1985, *Citol. Genet. (Kiev)* 19(6): 428-433. 1985, *Acta Botanica Sinica* 28: 595-598. 1986, *Chromosoma* 94: 249-252. 1986, *Korean Journal of Botany* 29: 77-84. 1986, *Cytologia* 51: 489-492. 1986, *Bjulleten' Glavnogo Botaniceskogo Sada* 140: 68-73. 1986, *Acta Genetica Sinica* 14: 344-348. 1987, *Kulturpflanze* 35: 146. 1987, *Stain Technology* 63: 271-275. 1988, *Journal of the Northwestern Teachers College, Natural Science* 1: 58-63. 1988, *Heredity: An International Journal of Genetics* 60: 47-54. 1988, *Genome* 30: 361-365. 1988, *Acta Botanica Boreali-Occidentalia Sinica* 9: 116-122. 1989, *Plant Chromosome Research* 187-193. 1989, *Proceedings of the Indian Science Congress Association* 76(3, vi): 180. 1989, *Japanese Journal of Breeding* 40: 147-152. 1990, *Genome* 33: 425-432. 1990, *Pakistan Journal of Botany* 22: 1-10. 1990, *Plant Systematics and Evolution* 189: 217-231. 1994, *Chromosoma* 103: 331-337. 1994, *Plant Systematics and Evolution* 193: 243-248. 1994, *Pakistan Journal of Botany* 26: 353-366. 1994, *Chromosoma* 104: 298-307. 1995, *Cytologia* 60: 243-247. 1995, *Journal of Plant Research* 108: 209-216. 1995, *Acta Botanica Sinica* 39(8): 697-700. 1997, *Journal of Shandong Agricultural University* 29(4): 435-442. 1998, *Acta Botanica Sinica* 40(2): 158-162. 1998, *Bothalia* 29(2): 335-341. 1999.

Eurasia. Annual, cultivated.

S. cereale L. var. *ancestrale* (Zhuk.) Kit Tan (*Secale cereale* L. subsp. *ancestrale* Zhuk.; *Secale ancestrale* (Zhuk.) Zhuk.)

Europe, Turkey. Rare species, annual, found in sandy places in vineyards, field edges, see *Flora of Turkey and the East Aegean Islands* 9: 259. 1985.

S. cereale L. var. *vavilovii* (Grossh.) Mayss. (*Secale vavilovii* Grossh.)

Eurasia, Armenia, Azerbaijan. Indeterminate species, annual, weed, found in dry gorges, irrigation ditches.

in Turkey: çavdar

S. ciliatoglume (Boiss.) Grossh. (*Secale strictum* (C. Presl) C. Presl subsp. *strictum* var. *ciliatoglume* (Boiss.) Fred & G. Petersen)

Europe.

S. kuprijanovii Grossh. (*Secale montanum* subsp. *kuprijanovii* (Grossh.) Tzvelev; *Secale strictum* subsp. *kuprijanovii* (Grossh.) K. Hammer)

Eurasia, North Caucasus, Georgia. Indeterminate species, see *Flora Kavkaza* 1: 136. 1928, *Acta Inst. Bot. Acad. Sc. URSS, Ser. 1, Fasc 2, 63.* 1936, *Novosti Sist. Vyss. Rast.* 10: 46. 1973, *Kulturpflanze* 35: 140. 1987.

S. montanum Guss.

Europe. See *Florae Siculae Prodrumus* 1: 145. 1827 and *Notes from the Royal Botanic Garden, Edinburgh* 44: 351-

356. 1987, *Japanese Journal of Breeding* 40: 147-152. 1990, *Genome* 33: 425-432. 1990, *Nucleus* 40(1,2): 31-32. 1997.

S. rhodopaeum Delip. (also spelled *rhodopaecum*)

Bulgaria. Rare species, see *Fitologija* 39: 72-77. 1991.

S. strictum C. Presl (*Secale strictum* (Presl) C. Presl; *Triticum strictum* C. Presl)

Europe, Israel, Turkey, Syria, Morocco. Perennial or annual, caespitose, rachis rapidly disarticulating at maturity, glumes acuminate or awned, found in dry stony or rocky mountain sides, see *Flora Sicula* (Presl) 1: xlvi. 1826 and *Nordic Journal of Botany* 13: 481-493. 1993.

S. strictum (C. Presl) C. Presl subsp. *africanum* (Stapf) K. Hammer (*Secale africanum* Stapf)

South Africa. Annual, cereal, see *Flora Sicula* (Presl) 1: xlvi. 1826, *Florae Siculae Prodrumus* 1: 145. 1827, *Hooker's Icones Plantarum* 27(1): t. 2601, 1-2. 1899 and *Kulturpflanze* 35: 142. 1987, *Hereditas (Beijing)* 10: 5-7. 1988, *Annals of Botany* 64: 315-324. 1989, *Chromosoma* 101: 206-213. 1991, *Bothalia* 29(2): 335-341. 1999.

in English: wild rye

S. strictum (C. Presl) C. Presl subsp. *anatolicum* (Boiss.) K. Hammer (*Secale anatolicum* Boiss.; *Secale montanum* subsp. *anatolicum* (Boiss.) Tzvelev)

Asia, Iran, Turkey. Perennial, see *Sovetskaja Botanika* 6: 101. 1938, *Novosti Sist. Vyss. Rast.* 10: 46. 1973, *Kulturpflanze* 35: 140. 1987, *Genome* 29: 594-597. 1987.

S. strictum (C. Presl) C. Presl subsp. *ciliatoglume* (Boiss.) K. Hammer (*Secale ciliatoglume* (Boiss.) Grossh.; *Secale montanum* var. *ciliatoglume* Boiss.)

Asia, Iran, Turkey. Annual.

S. strictum (C. Presl) C. Presl subsp. *kuprijanovii* (Grossh.) K. Hammer (*Secale kuprijanovii* Grossh.; *Secale montanum* subsp. *kuprijanovii* (Grossh.) Tzvelev)

Asia, Georgia, Armenia. Perennial or annual, occurs in mountain meadows, see *Flora Kavkaza* 1: 136. 1928, *Acta Inst. Bot. Acad. Sc. URSS, Ser. 1, Fasc 2, 63.* 1936, *Novosti Sist. Vyss. Rast.* 10: 46. 1973, *Kulturpflanze* 35: 140. 1987.

S. strictum (C. Presl) C. Presl subsp. *strictum* (*Secale dal-maticum* Vis.; *Secale montanum* Guss.)

Europe, Israel, Turkey, Syria, Morocco. Annual or short-lived perennial, semiarid conditions.

in English: mountain rye, mountain brome

S. sylvestre Host (*Secale fragile* M. Bieb.)

Eurasia, Europe. Perennial, reported to be self-compatible, found in sandy soils, see *Bot. Zhurn.* 71: 1426-1427. 1986.

S. vavilovii Grossh. (*Secale cereale* subsp. *vavilovii* (Grossh.) Kobyl.; *Secale transcaucasicum* Grossh.)

Eurasia, Armenia. Indeterminate species, see *Japanese Journal of Breeding* 35: 275-284. 1985, *Chromosoma* 94: 249-252. 1986.

S. x derzhavinii Tzvelev (*Secale strictum* (C. Presl) C. Presl x *Secale cereale* L.)

Russia. Cultivated,

Secalidium Schur = *Dasypyrum* (Coss. & Durieu) T. Durand

Referring to *Secale* L.

Pooideae, Triticaceae, Triticinae, see *Exploration Scientifique de l'Algerie, Botanique II, Phanérogamie* 202. Triticosecale.

See *Rev. Int. Bot. Appl. Agric. Trop.* 16: 251. 1936.

Sehima Forssk. = *Hologamium* Nees

From the Arabic *saehim* or *sehim*, vernacular names for *Sehima ischaemoides* Forssk. collected in Yemen, Al Hadiyah ["Yemen in montibus ad Hadfe"], 1763; see P. Forsskål (1732-1763), *Flora aegyptiaco-arabica*. 178. Copenhagen 1775.

About 5 species, Old World tropics. Panicoideae, Andropogonodae, Andropogoneae, Andropogoninae, or Panicoideae, Andropogoneae, Ischaeminae, perennial or annual, variable, caespitose, herbaceous, auricles absent, ligule ciliate and membranous or a line of hairs, leaf blades narrow and linear, plants bisexual, inflorescence a single terminal raceme exerted from the uppermost sheath, spikelets paired, sessile spikelet slightly laterally or dorsally compressed, pedicellate spikelet male or sterile and strongly dorsally compressed, pedicels more or less flat, 2 glumes, glumes of the sessile spikelets more or less equal, lower glume concave or convex, lower glume of sessile spikelet nerved, upper glume awned, lower lemma male, upper lemma bisexual with a bent awn, upper lemma awn glabrous or pubescent, palea 2-nerved, 2 lodicules free and fleshy, stamens 3, ovary glabrous, 2 stigmas, grain compressed, fodder grasses, dry regions, in open patches, dry soils, dry

bushlands, savannahs, heavy clay, open habitats, a segregate from *Ischaemum*, type *Sehima ischaemoides* Forssk., see *Species Plantarum* 2: 1045, 1049. 1753, *Flora Aegyptiaco-Arabica* 178. 1775, *Edinburgh New Philosophical Journal* 18: 185. 1835 and *Flora of Ethiopia and Eritrea* 7: 316-317. 1995, *Contributions from the United States National Herbarium* 46: 569. 2003, *Journal of Phytopathology* Volume 153, Issue 1: 1-4. Jan 2005.

Species

S. galpinii Stent

Southern tropical Africa. Perennial, robust, densely tufted, unbranched, basal leaf sheath hairy, leaves flattened and scabrid, ligule a ring of hairs, spike-like raceme, spikelets paired, sessile spikelets with flattish or convex lower glume, used as thatching grass, grows on black peat soils, in open patches, see *Bothalia* 1(4): 239. 1924.

in English: deck grass, yellow turfgrass

in South Africa: dekgras (Afrikaans), geelturfgras

S. ischaemoides Forssk. (*Andropogon insculptus* (Hochst. ex A. Rich.) Andersson, also spelled *insculptus*; *Andropogon insculptus* (Hochst.) Andersson; *Andropogon insculptus* Hochst. ex A. Rich.; *Andropogon lineatus* Steud.; *Andropogon rynchophorus* Stapf; *Andropogon schangulensis* Rupr. ex Steud.; *Andropogon sehima* Steud.; *Ischaemum insculptum* (Hochst.) Hochst. ex A. Rich.; *Ischaemum laxum* var. *insculptum* (Hochst. ex A. Rich.) Hack.; *Sehima insculptum* Hochst.; *Sehima kotschyi* Hochst.)

Tropical Africa, Asia, Pakistan. Annual, erect, glaucous, tufted, montane to submontane, villous racemes, sessile spikelets with grooved and 2-toothed lower glume, useful for erosion control and for soil conservation, good fodder, palatable to cattle, browsed at all stages, common in dry soils, subdesert sandy areas, savannah, subdesert grasslands, deciduous bushlands, on saline soils, see *Prodromus Florae Novae Hollandiae* 205. 1810, *Flora* 1844: 247. 1844, *Tentamen Florae Abyssinicae* ... 2: 458, 472. 1850, *Synopsis Plantarum Glumacearum* 1: 369. 1854, *Beitrag zur Flora Aethiopiens* ... 130. 1867, *Monographiae Phanerogamarum* 6: 245. 1889 and *Mémoires de la Société Botanique de France* 8b: 101. 1908, *Bol. Inst. Bioci.* 57: 38. 1998.

in Arabic: saehim, sehîm

in Mali: allomoze

in Niger: alfêlia, fari'n tchawa, ikêrdan-alagh, karagého, kotokoli, sub kaarey, subu kwaré

S. nervosa (Rottler ex Roem. & Schult.) Stapf (also spelled *nervosum*) (*Andropogon macrostachyus* (Hochst. ex A. Rich.) Andersson; *Andropogon nervosus* Rottler; *Andropogon nervosus* Rottler ex Roem. & Schult.; *Andropogon robertianus* (R. Br.) Steud.; *Andropogon striatus* Klein ex Willd.; *Andropogon tacazensis* Steud.; *Hologamium*

nervosum Nees; *Hologamium nervosum* (Rottler) Nees; *Hologamium nervosum* (Rottler ex Roem. & Schult.) Nees; *Ischaemum laxum* R. Br.; *Ischaemum macrostachyum* Hochst. ex A. Rich.; *Ischaemum nervosum* (Rottler) Thwaites; *Ischaemum nervosum* (Rottler ex Roem. & Schult.) Thwaites; *Ischaemum striatum* (Klein ex Willd.) Domin; *Pollinia striata* (Klein ex Willd.) Spreng.; *Sehima macrostachyum* Hochst. ex Hack.; *Sehima nervosa* (Rottler) Stapf; *Sehima nervosum* Stapf; *Sehima nervosum* (Rottl.) Stapf

Eastern tropical Africa, Southeast Asia, Australia, Arabia, Paleotropics. Perennial or annual, wiry, tufted or densely tufted, erect, harsh fragile leaves, leaves glaucous ending in a fine point, simple and solitary erect or somewhat curved racemes, spikelets pale green and purplish, slender awn twisted at the base, pedicels with white hairs or ciliate, sessile spikelets acuminate, pedicelled spikelets lanceolate, lower glume stiff and grooved, lower glume of sessile spikelet with a membranous tip, lower lemma sterile, pedicellate spikelets narrow and acuminate, excellent pasture grass, low quality forage, fodder grass, palatable to low palatability to cattle, relished by sheep, resistant to canopy closure, important grass for hay in India, used for grazing and cut forage, useful for erosion control, a decreaser species, common on rocky hills, in areas of good rainfall, *Acacia* bushland, black laterite, open bush in partial shade, riverine scrub, desert grassland, red earths, dry subhumid zone, tropical savannah, see *Der Gesellschaft naturforschender Freunde zu Berlin, neue Schriften* 4: 218. 1803, *Species Plantarum. Editio quarta* 4: 903. 1806, *Prodromus Florae Novae Hollandiae* 205. 1810, *Plantarum Minus Cognitarum Pugillus* 2: 12. 1815, *Systema Vegetabilium* 2: 812. 1817, *Edinburgh New Philosophical Journal* 18: 185. 1835, *Tentamen Florae Abyssinicae ...* 2: 472. 1850, *Synopsis Plantarum Glumacearum* 1: 369. 1854, *Enumeratio Plantarum Zeylaniae* 365. 1864, *Beitrag zur Flora Aethiopiens ...* 310. 1867, *Genera Plantarum* 3(2): 1127. 1883, *Monographiae Phanerogamarum* 6: 245. 1889 and *Handb. Fl. Ceylon* 5: 219. 1900, *Bibliotheca Botanica* 85(2): 260. 1915, *Flora of Tropical Africa* 9: 36. 1917, *Handb. Fl. Ceylon* 6: 330. 1931, *Grasses of Ceylon* 173. 1956, *Grasses of Burma ...* 218. 1960, *Journal of Cytology and Genetics* 25: 140-143. 1990.

in English: rat's-tail grass, rattail grass, white grass, sain grass

in India: bara paonia, chikka saadi hullu, chikka sali hullu, gandhi, gundra, hirn, kari kode hullu, karikooda hullu, kura eetti, kuraitti, nalai hullu, nendra gaddi, nendra pul, paunat, pavna, sagen, sain, saina, sainad, sainar, saindor, sairan, sairi, sarun, sedwa, sena, send, seran, shahala, shara, sheda, sira, telagadi

S. notatum (Hack.) A. Camus (*Ischaemum notatum* Hack.)

Asia, India. Used for paper pulp, see *Monographiae Phanerogamarum* 6: 246. 1889 and *Bulletin du Muséum d'Histoire Naturelle* 27: 373. 1921 [or 5: 373. 1921]

S. sulcatum (Hack.) A. Camus (also spelled *sulcata*) (*Ischaemum sulcatum* Hack.)

India. Annual, weak, quick growing, slender, much-branched, narrow leaves with pointed tips, racemes long awned, drought resistant, valued green fodder, excellent fodder grass, excellent hay, very nutritious at the flowering stage, can be turned into silage, found in areas of low rainfall, black soil, see *Monographiae Phanerogamarum* 6: 248. 1889 and *Bulletin du Muséum d'Histoire Naturelle* 27: 373. 1921.

in India: chota paonia, paonia, paonia, paunat, pavanya, pavna, pawana, pohna, ponai, sada, sainar, sheda

Sellulocalamus W.T. Lin = *Dendrocalamus* Nees

Bambusoideae, Bambusodae, Bambuseae, or Bambusoideae, Bambuseae, Bambusinae, see *Linnaea* 9(4): 476-477. 1835 and *Indian Forester* 58: 7. 1932, *Lingnan University Science Bulletin* 9: 66-67. 1940, *Acta Phytotaxonomica Sinica* 18: 211-216. 1980, *Journal of Bamboo Research* 2: 12, 31, 148, f. 3. 1983, *Kew Bulletin, Additional Series* 13: 54. 1986, *Journal of Bamboo Research* 6(2): 16-19, f. 4. 1987, *Journal of Bamboo Research* 7(4): 9, 13. 1988, *Journal of South China Agricultural University* 10(2): 40-47. 1989, Z.-L. Li, The *Flora of China* Bambusoideae project, problems and current understanding of bamboo taxonomy in China. *The Bamboos* 5: 61-81. 1997, *Contributions from the United States National Herbarium* 39: 54-55, 112. 2000.

Semeiostachys Drobow = *Elymus* L.

Greek *semeion* and *stachys* "spike, an ear of grain, ear of corn."

Pooideae, Triticeae, Hordeinae, see *Species Plantarum* 1: 83. 1753 and *Flora Uzbekistanica* 1: 281, 539. 1941, *Canad. J. Bot.* 42: 554. 1964, *Taxon* 41: 562-563. 1992, *Taxon* 44: 611-612. 1995, *Contributions from the United States National Herbarium* 48: 279-307, 610. 2003.

Semiarundinaria Makino ex Nakai = ***Brachystachyum* Keng, *Semiarundinaria*** **Makino, *Semiarundinaria* Nakai**

Latin *semi* and the genus *Arundinaria*, an intermediate type.

About 5-13 species, eastern Asia, eastern China, Japan, Vietnam. Bambusoideae, Bambusodae, Bambuseae, or Bambusoideae, Bambuseae, Shibataeinae, shrubby perennial or small tree, monopodial branching, woody and persistent, cylindrical, dense, pluricaespitose, unarmed, rhizomes leptomorph, culm internodes hollow, nodes not swollen, culm sheaths deciduous in their entirety or not

completely deciduous, sheath leathery and densely pubescent, sheath blade linear-lanceolate, flowering culms leafy, leaf blades lanceolate and glabrous, branched above, short branches, usually 3 branches per node when young and 6-8 twigs, plants bisexual, inflorescence compound racemose or paniculate, spikelets subtended by a spatheole, spikelet 2- to 7-flowered, 0-3 glumes, lemmas acuminate, palea present, 3 lodicules free and membranous, 3 stamens filaments free long-exserted, ovary glabrous with an apical appendage, 3 feathery stigmas, in woodland, type *Semiarundinaria fastuosa* (Lat.-Marl. ex Mitford) Makino, see *Flora Boreali-Americana* 1: 73. 1803, *Abhandlungen der Mathematisch-Physikalischen Classe der Königlich Bayerischen Akademie der Wissenschaften* 3(3): 745, pl. 5, f. 3. 1843 and *Journal of the Arnold Arboretum* 6(3): 150-152. 1925, *Sunyatsenia* 4(3-4): 151, 153. 1940, *Taxon* 6(7): 208. 1957, *Agriculture Handbook* 193: i-iii, 1-74. 1961, *Flora Reipublicae Popularis Sinicae* 9(1): i-xxvi, 1-761. 1996, *Contributions from the United States National Herbarium* 39: 112. 2000.

Species

S. densiflora (Rendle) T.H. Wen (*Arundinaria densiflora* Rendle; *Brachystachyum densiflorum* (Rendle) Keng; *Brachystachyum densiflorum* var. *densiflorum*; *Fargesia densiflora* (Rendle) Nakai)

China, Guangdong, Hubei. Perennial, green, sparsely hairy first, becoming glabrous, pith chambered, internodes glaucous below nodes, culm sheaths papery sparsely hispid completely deciduous, leaves 2-5 per twig, sheath margin ciliolate, ligules truncate, leaf blades lanceolate or oblong-lanceolate sharply pointed, 2-8 pseudospikelets on flowering branches, 5- to 7-flowered, 1-3 glumes, lemmas ovate-lanceolate, culms slides used for weaving, see *Bulletin Mensuel de la Société Linnéenne de Paris* 2: 1067. 1893 and *Journal of the Linnean Society, Botany* 36(254): 434-435. 1904, *Journal of the Arnold Arboretum* 6(3): 152. 1925, *Sunyatsenia* 4(3-4): 151, 153. 1940, *Acta Phytotaxonomica Sinica* 21(4): 404. 1983, *Journal of Bamboo Research* 8(1): 24. 1989.

S. farinosa McClure (*Sinobambusa farinosa* (McClure) T.H. Wen)

East Asia, China. See *Lingnan University Science Bulletin* 9: 45. 1940, *Journal of Bamboo Research* 1(1): 35. 1982.

S. fastuosa (Lat.-Marl. ex Mitford) Makino (*Arundinaria fastuosa* (Lat.-Marl. ex Mitford) Houz.; *Arundinaria fastuosa* (Lat.-Marl. ex Mitford) J. Houz.; *Arundinaria fastuosa* (Lat.-Marl. ex Mitford) Makino; *Arundinaria fastuosa* Makino; *Arundinaria narihira* (Bean) Makino; *Bambusa fastuosa* Lat.-Marl. ex Mitford; *Bambusa fastuosa* Mitford; *Bambusa narihira* Bean; *Phyllostachys fastuosa* (Lat.-Marl. ex Mitford) J. Houz.; *Semiarundinaria fastuosa* (Lat.-Marl. ex Mitford) Makino ex Nakai, nom. illeg., non *Semiarundinaria fastuosa* (Lat.-Marl. ex Mitford) Makino; *Semiarundinaria*

fastuosa (Mitford) Makino; *Semiarundinaria fastuosa* (Mitford) Nakai)

Temperate Asia, Japan, Taiwan. Erect, semifastigiate, young culm green and later purplish red, 3-8 branches at each node, culm sheath glabrous partially deciduous, sheath blade linear-lanceolate, usually sheath auricles absent or very tiny, short ligule, on 1 branch 4-6 leaves papery, leaf blades linear-lanceolate or broadly lanceolate, inflorescence lanceolate or broadly lanceolate, 1 spikelet 3- to 6-flowered, 1 glume 1- to 2-spikeleted, lodicule ciliate, cultivated, ornamental, thicket-forming, rhizomes shortly creeping, useful for erosion control, used for a windbreak or screen, see *The Bamboo Garden* 46: 547. 1894, *The Bamboo Garden* 105. 1896, *Botanical Magazine* (Tokyo) 11: 159. 1897 and *Botanical Magazine* (Tokyo) 26: 19. 1912, *Journal of Japanese Botany* 2(2): 8. 1918, *Journal of the Arnold Arboretum* 6(3): 151. 1925.

in English: narihira bamboo

in Japan: narihira-dake

S. fastuosa (Lat.-Marl. ex Mitford) Makino var. *fastuosa*

Japan, Honshu. Nodes slightly prominent, 3-8 branches per node, culm-sheaths glabrous, on 1 branch 4-6 leaves papery, leaf blades linear-lanceolate to broadly lanceolate, inflorescence lanceolate to broadly lanceolate, spikelets narrowly lanceolate 3- to 6-flowered, the uppermost 1-3 flowers male, glumes usually none or rarely 1, lemmas acuminate, palea present, 3 obovoid lodicules, exserted stamens, ovary cylindrical, 3 feathery stigmas, cultivated.

in Japan: narihira-dake

S. fastuosa (Lat.-Marl. ex Mitford) Makino var. *viridis* (Makino) (*Semiarundinaria fastuosa* var. *viridis* (Makino) Murata; *Semiarundinaria viridis* (Makino) Makino)

Japan, Honshu. See *Journal of Japanese Botany* 2: 8. 1918, *Journal of Japanese Botany* 5(2): 3. 1928.

S. fortis Koidzumi

Japan. Nodes densely pubescent, 3-7 branches per node, internodes densely pubescent to puberulous, culm sheath pubescent, leaves lanceolate to broadly lanceolate and chartaceous, leaf sheaths densely covered with minute hairs, auricles absent, ligule truncated, leaves lanceolate, spikelets narrow lanceolate 2- to 3-flowered, 2 glumes ovate membranaceous, lemmas ovate to broadly lanceolate, palea present, 3 broadly lanceolate lodicules, stamens exserted, ovary cylindrical, 3 feathery stigmas, see *Acta Phytotaxonomica et Geobotanica* 10: 63. 1941.

in Japan: kuma-narihira, madara-narihira (culm with dark to black dots), asakogidake

S. kagamiana Makino

Origin unknown, Japan. Surface sparsely hairy, green and purplish, node somewhat swollen, 3-7 short branches per node, culm sheath glabrous, auricles absent, leaf sheath

pubescent, leaves lanceolate or narrowly lanceolate and chartaceous, spikelets narrowly lanceolate, 4-5 florets, 1 glume broadly lanceolate, lemmas ovate-lanceolate, palea present, 3 lanceolate lodicules, exerted stamens, ovary cylindrical, 3 feathery stigmas, cultivated, used as a wind-breaker and screen, see *Journal of Japanese Botany* 5(2): 2-3. 1928.

in Japan: rikuchu-dake

S. okuboii Makino (*Sinobambusa tootsik* var. *tootsik*)

Origin unknown, Japan. Nodes prominent, 3-7 branches to a node, culm-sheaths glabrous, ligule fimbriate, leaf blades broadly lanceolate, leaves terminal on the branches, spikelets lanceolate, 4-5 florets, 1 glume ovate, lemmas ovate with sharp point, palea present, 3 ovate lodicules, stamens exerted, ovary cylindrical, 3 feathery stigmas, cultivated, see *Journal of Japanese Botany* 2: 8. 1918, *Journal of Japanese Botany* 8(9-10): 45. 1933.

in Japan: bizen-narihira

S. shapoensis McClure

China. See *Lingnan University Science Bulletin* 9: 54. 1940.

S. sinica Wen

China. See *Journal of Bamboo Research* 8(1): 13-15, f. 1. 1989.

S. tranquillans Koidz. (*Hibanobambusa tranquillans* (Koidz.) Maruyama & H. Okamura)

Asia, China. See *Acta Phytotaxonomica et Geobotanica* 10: 314. 1941, *Acta Phytotaxonomica et Geobotanica* 11(1): 1. 1942, *Report Fuji Bamboo Garden* 16: 30. 1971.

S. venusta McClure (*Acidosasa venusta* (McClure) Z.P. Wang & G.H. Ye ex C.S. Chao & C.D. Chu; *Acidosasa venusta* (McClure) Z.P. Wang & G.H. Ye)

East Asia, China. See *Lingnan University Science Bulletin* 9: 55. 1940, *Journal Nanjing University. Natural Sciences Edition* 1981: 99. 1981, *Journal of Bamboo Research* 1(2): 31. 1982, *Acta Phytotaxonomica Sinica* 29(6): 524, f. 6. 1991.

S. viridis (Makino) Makino (*Semiarundinaria fastuosa* var. *viridis* Makino; *Semiarundinaria viridis* Makino)

Natural habitat unknown, Japan. Green culms and branches, 3-8 branches per node, long internodes, culm sheath with short hairs at the base or glabrous, papery leaves narrowly lanceolate, ligule truncated, used for making flutes, see *Journal of Japanese Botany* 2: 8. 1918, *Journal of Japanese Botany* 5(2): 3. 1928.

in Japan: ao-narihira, aihara-dake

S. yashadake (Makino ex Shiros.) Makino (*Arundinaria narihira* f. *yashadake* Makino ex Shiras.; *Semiarundinaria yashadake* (Makino) Makino; *Semiarundinaria yashadake* (Makino) (Pond Yasha, Gifu Prefecture)

Natural habitat unknown, Japan. Hollow bud canal, culms round, culm sheaths densely pilose at the base, 3-8 branches per nodes, long internodes, broad leaves oblong-lanceolate to broadly lanceolate, inflorescence spicate lanceolate to broadly lanceolate, spikelets narrowly lanceolate, 3-4 florets all perfect, glumes lacking, lemmas lanceolate and acuminate, palea present, 3 ovate lodicules, exerted stamens, ovary cylindrical, 3 feathery stigmas, widely cultivated, see *Botanical Magazine* (Tokyo) 11: 159. 1897 and *Icones of the Bamboos Japan* 38, t. 15. 1912, *Journal of Japanese Botany* 2: 8. 1918, *Journal of Japanese Botany* 5(2): 3. 1928.

in Japan: yasha-dake

S. yashadake Makino f. *kimmei* Muroi & Kashiwagi

Japan. Cultivated, rare.

Senisetum Honda = *Agrostis* L., *Heptaseta* Koidz.

Pooideae, Poeae, Agrostidinae, type *Senisetum hideoi* (Ohwi) Honda, see *Species Plantarum* 1: 61-63. 1753 and *Botanical Magazine* 44: 568. 1930, *Botanical Magazine* (Tokyo) 46: 371. 1932, *Botanical Magazine* (Tokyo) 47: 146. 1933, *Fl. Fenn.* 5: 29. 1971, *Taxon* 41: 556. 1992, *Taxon* 44: 611-612. 1995, *Contributions from the United States National Herbarium* 48: 42-89, 383, 610. 2003.

Senites Adans. = *Zeugites* P. Browne

Centothechoideae, Centotheceae, or Panicoideae, Centotheceae, see *The Civil and Natural History of Jamaica in Three Parts* 341. 1756, *Systema Naturae, Editio Decima* 2: 1306. 1759, *Familles des Plantes* 2: 39, 604. 1763, *Species Plantarum. Editio quarta* 4: 204. 1805, *Révision des Graminées* 2: 485, t. 157. 1831, *Bulletin de la Société Botanique de Belgique* 15(3): 464. 1876, *Mexicanas Plantas* 2: 121. 1886, *Botanical Gazette* 21: 134, t. 12. 1896, *Bulletin, Division of Agrostology United States Department of Agriculture* 11: 50, t. 6. 1898 and *Österreichische Botanische Zeitschrift* 52(10): 373. 1902, *Contributions from the United States National Herbarium* 12(3): 127. 1908, *Symbolae Antillarum* 6: 3. 1909, *Contributions from the United States National Herbarium* 17(3): 368-370. 1913, *Contributions from the United States National Herbarium* 18(7): 392. 1917, *Torreya* 19: 48. 1919, *Flora Mesoamericana* 6: 248-249. 1994, *Contributions from the United States National Herbarium* 46: 569, 639-641. 2003.

Sennenia Sennen = *Trisetaria* Forssk.

Dedicated to the French botanist Étienne Marcelin Grenier-Blanc Sennen, 1861-1937, clergyman, see *Bulletin de l'Académie Internationale de Géographie, Botanique* 18:

468. 1908; J.H. Barnhart (1871-1949), *Biographical notes upon botanists*. 1: 197. Boston 1965; T.W. Bossert, compil., *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. Boston, Mass. 1972; Herminia Newman Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 241. Oxford 1964; Stafleu and Cowan, *Taxonomic literature*. 5: 509-512. 1985.

Aveneae, see *Flora Aegyptiaco-Arabica* 60. 1775, *Varietades de Ciencias, Literatura y Artes* 4(22): 212. 1805 and *Bulletin de l'Académie Internationale de Géographie, Botanique* 18: 468. 1908.

Sericrostis Raf. = *Muhlenbergia* Schreb.

Greek *serikos* “silky” and *Agrostis*.

Chloridoideae, Cynodonteae, Muhlenbergiinae, type *Stipa sericea* Michx., see *Genera Plantarum* 44. 1789, *Systema Naturae ...editio decima tertia, aucta, reformata* 2: 171. 1791, *Flora Boreali-Americana* 1: 54. 1803, C.S. Rafinesque, *Neogenyton, or Indication of Sixty-Six New Genera of Plants of North America*. 4. 1825, *Nom. Bot.* 2: 1142. 1874 and *Contributions from the United States National Herbarium* 41: 143-173, 194. 2001.

Sericura Hassk. = *Pennisetum* Rich.

From the Greek *serikos* “silky” and *oura* “a tail.”

Panicoideae, Panicodae, Paniceae, or Panicoideae, Paniceae, Cenchrinae, type *Sericura elegans* Hassk., see *Syn. Pl.* 1: 72. 1805, *Essai d'une Nouvelle Agrostographie* 59. 1812, *Flora* 25(Beibl. 2): 2. 1842, *Flora* 29: 20. 1846, *Plantae Junghuhnianae* 3: 368. 1854, *Synopsis Plantarum Glumacearum* 1: 197. 1855 [1854] and *Contr. U.S. Natl. Herb.* 22: 210. 1921, *Contributions from the United States National Herbarium* 46: 527-536, 569. 2003.

Serigrostis Steud. = *Muhlenbergia* Schreb.

From the Greek *serikos* “silky” plus *agrostis*, *agrostidos* “grass, weed, couch grass.”

Chloridoideae, Cynodonteae, Muhlenbergiinae, see *Contributions from the United States National Herbarium* 41: 143-173. 2001.

Serrafalcus Parl. = *Bromus* L.

Latin *serra*, *ae* “saw” and *falx*, *falcis* “a sickle, scythe,” referring to the awns of *Serrafalcus alopecuros* (Poiret) C. Gardner.

Pooideae, Bromeae, type *Serrafalcus racemosus* (L.) Parl., see *Species Plantarum* 1: 76. 1753, Filippo Parlatore (1816-1877), *Rariorum plantarum et haud cognitarum in Sicilia sponte provenientium*. 2: 14. Panormi [Palermo] 1838-1840 and *U.S.D.A. Div. Agrostol. Bull.* 23: 1-66. 1900, *U.S. Dept. Agric. Bull.* 772: 24. 1920, *Brittonia* 7: 421. 1952, *Notes Roy. Bot. Gard. Edinburgh* 30: 366. 1970, *Bot. Jahrb. Syst.* 102: 359-379, 447. 1981, *Taxon* 41: 559. 1992, *Taxon* 44: 611-612. 1995, *Contributions from the United States National Herbarium* 48: 154-191, 610-611. 2003.

Sesleria Scopoli = *Diptychum* Dulac, *Psilathera* Link, *Sesleriella* Deyl

For the Italian (Venetian) naturalist Leonardo (Lionardo) Sesler, d. 1785, physician, owner of a private botanical garden, author of *Lettera intorno ad un nuovo genere di Piante terrestri*, in Vitaliano Donati (1713-1763), *Della storia naturale marina dell'Adriatico*. [edited by G. Rubbi-Carli.] Venezia 1750; see Giovanni Antonio Scopoli, *Flora Carniolica*. 189. Viennae 1760; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 780. 1993; F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 169. 1989; J.H. Barnhart, *Biographical notes upon botanists*. 3: 261. Boston 1965; T.W. Bossert, compil., *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 361. 1972; Jonas C. Dryander, *Catalogus bibliothecae historico-naturalis Josephi Banks*. London 1800.

About 25-27 species, Balkans, Eurasia, Europe and western Asia. Pooideae, Poodae, Seslerieae, perennial, tufted, herbaceous, auricles absent, leaf blades linear, ligule an unfringed membrane, plants bisexual, inflorescence paniculate and contracted, 2- to 5-flowered, sterile spikelets reduced or vestigial, bract-like scales at the base of the inflorescence, 2 glumes more or less equal, lemmas membranous 2- to 5-toothed, palea muticous or 2-awned, 2 free and membranous lodicules, 3 stamens, ovary hairy, 2 pubescent stigmas, open habitats, mountains, rocky places, a difficult genus, species closely related and intergrading, type *Sesleria caerulea* (L.) Ard., see *Species Plantarum* 1: 59, 63, 72-73. 1753, Petri Arduini ... *Animadversionum botanicarum specimen*. Patavii 1759, *Flora Carniolica* 189. 1760, Petri Harduini veronensis horti publici patavini custodis *animadversionum botanicarum specimen alterum*. Venetia 1764, *Hortus Regius Botanicus Berolinensis* 1: 121. 1827, *Flore de Département des Hautes-Pyrénées* 81. 1867 and *Opera Botanica Cech.* 3: 104, 176, 230. 1946, *Ind. Nom. Genericorum* 3: 1607. 1979, *Fitologija* 39: 72-77. 1991, *Caryologia* 51: 123-132. 1998, *Functional Ecology* Volume 12, Issue 5: 834-842. Hungary. See *Index Horti Botanici Universitatis Budapestinensis* 4: 73. 1940.

S. taygetea Hayek

Greece. Rare.

S. tenerrima (Fritsch) Hayek

Europe.

S. tenuifolia Schrader

Europe.

S. tenuifolia Schrader subsp. *kalnikensis* (Jav.) Deyl (*Sesleria kalnikensis* Javorka)

Europe. See *Magyar Botanikai Lapok* 10: 311. 1911, *Botanical Journal of the Linnean Society* 76(4): 364. 1978.

Sesleriella Deyl = *Sesleria* Scop.

The diminutive of *Sesleria* Scop.

About 2 species, Eurasia, central and southern Europe. Pooideae, Poodae, Seslerieae, perennial, caespitose, herbaceous, auricles absent, ligule an unfringed membrane, plants bisexual, sterile spikelets reduced or vestigial, bract-like scales at the base of the inflorescence, 2 glumes more or less equal, lemmas membranous, palea present, 2 free and membranous lodicules, 3 stamens, ovary hairy, 2 stigmas, open habitats, sometimes referred to *Sesleria*, type *Sesleriella sphaerocephala* (Ard.) Deyl, see *Flora Carniolica* 189. 1760, *Animadversionum Botanicarum Specimen Alterum* 18. 1764 and *Opera Botanica Cech.* 3: 230. 1946, *Ind. Nom. Genericorum* 3: 1607. 1979.

Species

S. leucocephala (Lam. ex DC.) Deyl (*Sesleria leucocephala* DC.; *Sesleria leucocephala* Lam. ex DC.)

Europe. See *Opera Botanica Cechica* 3: 230, 234. 1946.

S. sphaerocephala (Ard.) Deyl

Europe. Glumes 1-nerved.

Sessleria Sprengel

Orthographic variant of *Sesleria* Scop., see *Plantarum Minus Cognitarum Pugillus* 2: 21. 1815.

Setaria P. Beauv. = *Acrochaete* Peter, *Camusiella* Bosser, *Camussiella* Bosser, *Chaetochloa* Scribn., *Cymbosetaria* Schweick., *Ixophorus* Nash, *Miliastrum* Fabr., *Paspalidium* Stapf, *Setaria* Ach. ex Michx. (Lichen), *Tansaniochloa* Rauschert

From the Latin *saeta* (*seta*), *ae* “a bristle, hair,” the spikelets are bristly, in reference to the sterile bristles beneath the spikelet; see A.M.F.J. Palisot de Beauvois, *Essai d'une nouvelle Agrostographie*. 51, 178. Paris (Dec) 1812.

About (100-)110/(140-)150 species, tropics and subtropics. Panicoideae, Panicoideae, Paniceae, or Panicoideae, Paniceae, Setariinae, annual or perennial, herbaceous, clumped, heterogeneous, rhizomatous or stoloniferous, tufted, decumbent at base, erect, sometimes branched from the base, auricles absent, ligule a ciliate rim, leaf blades oblong to elliptic to ovate, leaf sheaths open or closed at the base, leaves often scabrid, panicle open or contracted or spiciform, plants bisexual with large arching spikes, spikelets solitary and short-stipitate with involucre of rough bristles continuous with the rachis, panicle branches tips modified into bristles subtending the spikelets, 1 or 2 florets, lower floret usually sterile or male, upper floret perfect, disarticulation of the spikelets above the bristle attachments, 2 glumes unequal and papery, 2 lemmas, lower lemma sulcate and sterile, upper fertile and rugose, lower palea tiny or absent, 2 fleshy and glabrous lodicules, 3 stamens, ovary glabrous, 2 reddish or white stigmas, small fruit more or less sculptured, bristles on the seed heads, noxious wide-spread weed species, hay, cultivated fodder, native pasture species, grain crop species, major or minor cereal, birdseed, young shoots eaten, cultivated as a vegetable, ornamental, shade species, some species hosts for maize and sugarcane mosaic viruses, the barbed awns can cause ulcers in horses' mouths, setarias contain oxalates that can poison cattle, commonly occurs along drainage ditches and on irrigated land, in rainforest, woodland, grassland, pampas, weedy places, open habitats, habitat variable, much taxonomic confusion, large number of intermediate species, closely

related to *Pennisetum*, type *Setaria viridis* (L.) P. Beauv., see *Species Plantarum* 1: 55. 1753, *Enumeratio Methodica Plantarum* 206. 1759, *Flora Boreali-Americana* 2: 331. 1803, *Essai d'une Nouvelle Agrostographie* 51, 178. 1812, *Nova Genera et Species Plantarum* 1: 111-112. 1815 [1816], *Flora Brasiliensis seu Enumeratio Plantarum* 2(1): 237. 1829, *Historia Fisica Politica y Natural de la Isla de Cuba, Botanica* 11: 302. 1850, *Index Seminum [Berlin]* 18. 1855, *Synopsis Plantarum Glumacearum* 1: 49. 1855 [1853], *Linnaea* 31(4): 420. 1861, *Flora Brasiliensis* 2(2): 156. 1877, *Flora of the Hawaiian Islands* 503. 1888, *An Illustrated Flora of the Northern United States* 1: 125. 1896, *Bulletin, Division of Agrostology United States Department of Agriculture* 4: 38-39. 1897, *Flora Capensis* 7: 420. 1899 and *Contributions from the United States National Herbarium* 15: 22. 1910, *Beiträge zur Biologie der Pflanzen* 10(1): 42. 1910, *Bulletin of Miscellaneous Information Kew* 4: 126. 1920, *Contr. Species

S. sp.

in Mexico: pega-pega

in Nigeria: lesleddeho

in Mongolia: osun honug

S. acromelaena (Hochst.) T. Durand & Schinz (*Panicum acromelaenum* Hochst.; *Setaria abyssinica* var. *annua* Chiov.)

Sudan, Ethiopia, Tanzania, Kenya, Uganda. Annual, tufted, slender to robust, much-branched, pubescent nodes, leaf blades broadly linear, contracted cylindrical panicle spike-like, spikelets round or gibbously ovate, upper glume 5- to 7-nerved, lower lemma sterile 5-nerved, rugole upper lemma strongly convex, weed of cultivated ground, grassland, seasonally flooded areas, black clays, see *Flora* 38: 198. 1855, *Conspectus Florae Africae* 5: 772. 1894 and *Österreichische Botanische Zeitschrift* 51: 460. 1901, *Annali di Botanica* 8(3): 311. 1908, *Sida* 15(3): 447-489. 1993.

S. adhaerens (Forssk.) Chiov. (*Chaetochloa brevispica* Scribn. & Merr.; *Chaetochloa brevispica* Scribn., nom. illeg., non *Chaetochloa brevispica* Scribn. & Merr.; *Panicum adhaerens* Forssk.; *Panicum aparine* Steud.; *Panicum respiciens* (Hochst. ex A. Rich.) Hochst. ex Steud.; *Panicum rottleri* (Spreng.) Nees, nom. illeg., non *Panicum rottleri* Kunth; *Panicum verticillatum* var. *aparine* (Steud.) Asch. & Schweinf.; *Panicum verticillatum* var. *parviflorum* Döll; *Pennisetum respiciens* A. Rich.; *Setaria aparine* (Steud.) Chiov.; *Setaria brevispica* (Scribn. & Merr.) K. Schum.; *Setaria depauperata* Phil.; *Setaria respiciens* (Hochst. ex A. Rich.) Walp.; *Setaria rottleri* Spreng.; *Setaria verticillata* subsp. *aparine* (Steud.) T. in English: Trans-pecos bristle grass, southern foxtail, bur bristlegrass

in Mexico: zacate peludo

S. alonsoi Pensiero & Anton (*Setaria onurus* f. *grandiflora* Hack.)

Argentina. See *Flora of the British West Indian Islands* 555. 1864 and *Anales del Museo Nacional de Buenos Aires* 21: 50. 1911, *Novon* 4(3): 287, f. 1. 1994.

S. apiculata (Scribn. & Merr.) K. Schum. (*Chaetochloa apiculata* Scribn. & Merr.; *Setaria queenslandica* Domin)

Australia. See *Bulletin, Division of Agrostology United States Department of Agriculture* 21: 9. 1900, *Just's botanischer Jahresbericht*. 28(1): 417. 1900[1902], *Bibliotheca Botanica* 20(85): 330, t. 18, f. 9, t. 15, f. 1-2. 1915.

S. appendiculata (Hack.) Stapf (*Chaetochloa australiensis* Scribn. & Merr.; *Panicum appendiculatum* Hack.; *Setaria arizonica* Rominger; *Setaria atrata* Hack.; *Setaria australiensis* (Scribner & Merr.) Vickery; *Setaria basifissa* Peter; *Setaria blepharoechaeta* Chiov.; *Setaria haarei* Stapf & C.E. Hubb.; *Setaria hereroensis* Herrm.; *Setaria pennata* Mez ex Peter)

Tropical Africa, Namibia. Perennial, erect or geniculate, tufted or densely tufted, much-branched, robust, often thickened at the base, rhizomatous, sometimes stoloniferous, culm nodes hairy, leaf blades initially folded and later expanded, ligule a fringe of short hairs, leaf sheath rounded, leaves tapering to a long needle-like point with 2 sagittate projections at the base, open inflorescence paniculate, compact panicle narrowly oblong, spikelets elliptic not gibbous, solitary bristles inconspicuous, upper glume 7- to 13-nerved, lower glume 5-nerved, lower lemma male, upper lemma rugose cuspidate, pasture grass, palatable, high nutritive value, often in shady places, dry riverbeds, stony slopes, savannahs and dwarf shrub savannahs, among bushes, see *Abhandlungen der Königlichen Akademie der Wissenschaften in Berlin* 2: 122. 1891, *Bulletin de l'Herbier*

Boissier 4 (appendix 3): 13. 1896, *Flora Capensis* 7: 422. 1899 and *Bulletin, Division of Agrostology United States Department of Agriculture* 21: 29. 1900, *Beiträge zur Biologie der Pflanzen* 10(1): 43. 1910, *Annali di Botanica* 10(3): 408. 1912, *Repertorium Specierum Novarum Regni Vegetabilis, Beihefte* 40(1): 63, 235, f. 32.1. 1930 [1931], *Flora of Tropical Africa* 9: 834. 1930, *Contributions from the New South Wales National Herbarium* 1(6): 335. 1951, *Illinois Biological Monographs* 29: 66. 1962.

in South Africa: berggras, fels borstenhirse

S. arenaria Kitag.

China. Sandy places, see *Report of the Institute of Scientific Research, Manchoukuo* 4: 77, t. 1, f. 1. 1940.

S. arizonica Rominger (*Setaria appendiculata* (Hack.) Stapf)

U.S., Arizona. Annual, slopes, see *Bulletin de l'Herbier Boissier* 4(appendix 3): 13. 1896, *Flora Capensis* 7: 422. 1899 and *Illinois Biological Monographs* 29: 66. 1962.

in English: Arizona bristle grass

S. atrata Hack. (*Setaria appendiculata* (Hack.) Stapf; *Setaria blepharoechaeta* Chiov.; *Setaria pennata* Mez ex Peter)

East Africa, southern Sudan, Ethiopia, Malawi. Perennial, erect, forming dense tussocks, leaf blades tough, panicle linear, bristles ciliate, spikelets lanceolate-elliptic, lower lemma 5-nerved, swamps, see *Abhandlungen der Königlichen Akademie der Wissenschaften in Berlin* 2: 122. 1891, *Bulletin de l'Herbier Boissier* 4(Append. 3): 13. 1896, *Flora Capensis* 7: 422. 1899 and *Repertorium Specierum Novarum Regni Vegetabilis, Beihefte* 40(1): 235. 1931.

S. australiensis (Scribner & Merr.) Vickery (*Chaetochloa australiensis* Scribn. & Merr.; *Setaria appendiculata* (Hack.) Stapf)

Australia, New South Wales, Queensland. Perennial, canelike, forming large tufts, sheath glabrous and smooth, ligule densely bearded, leaf blade flat and scabrous, panicle long exserted and contracted with spreading branches, bristles more or less straight to flexuous, lower glume apiculate, lower lemma sterile and acute, upper lemma bisexual and acute, grows on riverbanks, shady forests, see *Bulletin de l'Herbier Boissier* 4(appendix 3): 13. 1896, *Flora Capensis* 7: 422. 1899 and *Bulletin, Division of Agrostology United States Department of Agriculture* 21: 29. 1900, *Contributions from the New South Wales National Herbarium* 1(6): 335. 1951.

in English: scrub pigeon grass

in English: coastal bristle grass, bristle grass, coastal foxtail

S. dielsii Herrm. (*Setaria macrostachya* sensu J. Black, non Kunth) (the species in honor of the German botanist Friedrich Ludwig Emil Diels, 1874-1945, Director of Berlin-Dahlem Botanic Garden and Museum, friend and companion of Ernst Georg Pritzel (1875-1946), contributed to H.G.A. Engler & K.A.E. Prantl *Die Natürlichen Pflanzenfamilien* edition 1 and edition 2, to Engler *Das Pflanzenreich*)

South Australia, Northern Territory, Queensland, Western Australia. Annual, glabrous, rigid, geniculate near the base, panicle spike-like with conspicuous bristles with erect teeth, spikelets glabrous and ovate-acute, bristle usually at the base of the pedicel of each spikelet, first glume ovate, weed and fodder, see *Beiträge zur Biologie der Pflanzen* 10(1): 52-53. 1910.

in English: Diels pigeon grass

S. distans (Trin.) Veldkamp (*Panicum commixtum* Steud.; *Panicum distans* Trin.; *Panicum radiatius* H. St. John; *Paspalidium disjunctum* S.T. Blake; *Paspalidium distans* (Trin.) Hughes; *Paspalidium flavidum* var. *distans* (Trin.) Hook.f.; *Paspalidium radiatum* Vickery)

Asia tropical, Papua New Guinea, Queensland, New South Wales, Northern Territory. Tufted perennial grass, not branched, ascending to erect, sheath glabrous or villous, ligule densely ciliate, leaves linear and green, panicles very

narrow, spikelets green to purplish and acute, lower glume obtuse to acute, upper glume obtuse, lemmas acute and elliptic, lower lemma sterile, upper lemma rugulose, scrubs and woodlands, poor soils and moist, see *Species Graminum* 2: t. 172. 1829, *Synopsis Plantarum Glumacearum* 1: 59. 1854, *The Flora of British India* 7: 29. 1896 and *Bulletin of Miscellaneous Information Kew* 1923(9): 317. 1923, *Contributions from the New South Wales National Herbarium* 1(6): 332-334. 1950 [1951], *Proceedings of the Royal Society of Queensland* 84(5): 65-66, t. 7, f. 5. 1973, *Blumea* 39(1-2): 376. 1994, *Sida* 16(3): 439-446. 1995.

S. distantiflora (A. Rich.) Pilg. (*Panicum distantiflorum* A. Rich.; *Panicum tenerum* Beyr. ex Trin.; *Paspalidium distantiflorum* (A. Rich.) Davidse & R.W. Pohl)

The Caribbean, Cuba. See *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 3,1(2-3): 341. 1834, *Historia Fisica Política y Natural de la Isla de Cuba, Botanica* 11: 302. 1850 and *Die natürlichen Pflanzenfamilien, Zweite Auflage* 14e: 72. 1940, *Novon* 2(2): 106. 1992.

S. faberi R.A.W. Herrmann (also ***faberii***) (*Setaria autumnalis* Ohwi; *Setaria macrocarpa* Luchnik)

Southeast Asia, China, Japan, Taiwan. Annual, more or less erect to bent then ascending, coarse, caespitose, loosely tufted, clump forming, branching from near base, nodes smooth or slightly hairy, fibrous root system, more or less ciliate sheaths, ligule a fringe of hairs, leaves rolled in the bud and hairy on the upper surface, no auricles, seed head a cylindrical bristly panicle drooping at maturity, 1 flower per spikelet, grains usually enclosed by scales, reproducing by seed, invasive and extremely troublesome, noxious weed species of many agronomic crops, in corn and soybean fields, turf, landscapes and nurseries, found on roadsides and generally any disturbed habitat, railroads, lawns and gardens, waste places and fields, see *Beiträge zur Biologie der Pflanzen* 10(1): 51. 1910, *Acta Phytotaxonomica et Geobotanica* 7(3): 129. 1938, *Canad. J. Bot.* 65: 1396-1402. 1987, *Newslett. Int. Organ. Pl. Biosyst. (Oslo)* 26/27: 25-26. 1997, Jack Dekker and Mark Hargrove, "Weedy adaptation in *Setaria* spp. V. Effects of gaseous environment on giant foxtail (*Setaria faberii*) (Poaceae) seed germination." *Am. J. Bot.* 89: 410-416. 2002.

in English: giant foxtail, nodding foxtail, nodding foxtail grass, Japanese bristle grass

in Japan: akinoenokorogusa

S. febrigii R.A.W. Herrmann (*Panicum globuliferum* Steud.; *Setaria globulifera* (Steud.) Griseb.; *Setaria onurus* (Willd. ex Trin.) Griseb.; *Setaria onurus* f. *ramulosa* Hack.) (named for Karl Fiebrig, botanical collector in Bolivia and Paraguay)

Brazil, Uruguay, Bolivia, Paraguay. Perennial, leaf blades linear acuminate more or less scabrous, dense spiciform

panicle, spikelets globose with 1 basal bristle, upper lemma rugulose, savannahs, sandy soils, see *Synopsis Plantarum Glumacearum* 1: 51. 1853, *Flora of the British West Indian Islands* 555. 1864, *Symbolae ad Floram Argentinam. Zweite* 307. 1879 and *Beiträge zur Biologie der Pflanzen* 10(1): 51. 1910, *Anales del Museo Nacional de Buenos Aires* 21: 50. 1911, *Revista Brasileira de Genética* 7(3): 535-548. 1984.

S. finita Launert

Namibia. Annual, tufted or loosely tufted, slender, erect or geniculate, rooting at the nodes, leaf sheaths rounded or keeled, leaf blade linear, thin ligule membranous, open lax panicle, mucronate spikelets, bristles solitary, lemmas rugose, palatable, little value as grazing, found along streams, rivers, shady places, see *Prodromus einer Flora von Südwestafrika* 34: 160. 1970.

S. firmula (A.S. Hitchc. & Chase) Pilger (*Panicum firmulum* A.S. Hitchc. & Chase; *Setaria reverchonii* subsp. *firmula* (Hitchc. & Chase) W.E. Fox)

North America. See *Contributions from the United States National Herbarium* 15: 27-28, f. 9. 1910, *Die natürlichen Pflanzenfamilien, Zweite Auflage* 14e: 72. 1940, *Sida* 18(4): 1041. 1999, *Flora of North America North of Mexico* 25: i-xxv, 1-783. 2003.

in English: knot grass, knotgrass

S. flabellata Stapf (*Setaria sphacelata* (Schumach.) M.B. Moss ex Stapf & C.E. Hubb.)

South Africa. See *Beskrivelse af Guineiske planter* 58-59. 1827, *Flora Capensis* 7: 425-426. 1899 and *Flora of Tropical Africa* 9(5): 795-798. 1930, *Bulletin du Jardin Botanique de Buitenzorg, ser. 3*, 17: 38. 1941, *Cytologia* 19: 97-103. 1954.

S. flabellata Stapf forma ***hirsutior*** de Wit

South Africa. See *Flora Capensis* 7: 425. 1899 and *Bulletin du Jardin Botanique de Buitenzorg, ser. 3*, 17: 38. 1941.

Tropical and South Africa, Australia. Perennial, polymorphic, largely tufted, densely clumped, blue-green to reddish, culms geniculate and ascending, hairy nodes, spreading by short rhizomes, ligule a narrow and densely ciliate rim, leaf-sheaths striate and glabrous, leaves linear with coarse margins, panicle spike-like interrupted at the base or contracted, bristles purple, lower floret male, upper floret perfect, glumes membranous, upper glume 5- to 7-nerved, lower lemma 5-nerved, upper lemma strongly convex, smooth seeds green to yellow, a prolific seeder, weed, native pasture species, grains eaten by baboons, palatable and well accepted by cattle and sheep, very valuable fodder, because of the hyperparathyroidism (“big head”) avoid grazing horses on pastures dominated by purple pigeon grass, drought-tolerant and tolerant of temporary waterlogging, used for thatching and hut-building, easy to establish on heavy black soils, savannah, on heavier clay and medium textured soils, common on cracking black earths, rocky hillsides, on seasonally waterlogged black clay, stony hillsides, on cracking clay soils and in wet sites, vleis and marshes, forest edges, on riverbanks, stony slopes, in open bush steppes, margins of evergreen forests, closely related to *Setaria sphacelata*, see *Flora* 38: 197. 1855, *Abhandlungen der Königlichen Akademie der Wissenschaften in Berlin* 2: 122. 1891, *Conspectus Florae Africae* 5: 774. 1894, *Annuario del Reale Istituto Botanico di Roma* 7: 159, t. 5. 1896 (sometimes vol. 6), *Flora Capensis* 7: 424. 1899, *Bulletin de l'Herbier Boissier* 7(1): 24. 1899 and *Österreichische Botanische Zeitschrift* 51: 460. 1901, *Annali di Botanica* 8(3): 311. 1908, *Beiträge zur Biologie der Pflanzen* 10(1): 44-46. 1910, *Annali di Botanica* 13: 46. 1910 [or 1914], *Flora of Tropical Africa* 9: 779, 781-782, 784-789, 791, 807-809, 831. 1930, *Repertorium Specierum*

East Africa, China, India, Indonesia, Thailand, Sri Lanka. Annual, weak, tufted, slender, branched, erect or geniculate ascending, often decumbent and rooting at the nodes, leaf sheaths keeled, leaves long and narrow, lower leaf blades not petiolate, inflorescence pyramidal or cylindrical, panicle contracted narrowly lanceolate, spikelets broadly elliptic, 1-2 barbed bristles below each spikelet, lower floret sterile, lower glume obtuse or acute, upper lemma rugose, low viability of the grains, valued for grazing when young, good fodder for cattle and horses, common along the edges of cultivated fields, cultivated dry soil, under the shade of trees, dry pasture ground, grassland, resembling *Setaria verticillata*, see *Hortus Regius Botanicus Hafniensis* 1: 82. 1813, *Systema Vegetabilium* 2: 447, 489. 1817, *Flora Indica; or Descriptions ...* 1: 303. 1820, *Novae Plantarum Species* 47. 1821, *Révision des Graminées* 1: 47. 1829, *Notulae ad Plantas Asiaticas* 3: 29, t. 139, f. 217. 1851, *Synopsis Plantarum Glumacearum* 1: 51. 1853 and *Handb. Origin unknown. Annual, stout, leafy, fast growing, erect, tufted, sometimes geniculate at the base, branching from base, ligule ciliate, leaf sheaths fringed with hairs and slightly keeled, leaves linear to narrow-lanceolate, compact inflorescence erect to pendent to nodding, broad-elliptic to globose spikelets bristled with erect teeth, lower floret male or sterile, upper floret bisexual and deciduous, in upper florets lemma yellow, lower glume acute or subacute, lower lemma sterile more or less epaleate, fertile lemma dark smooth or wrinkled and falling as a false fruit, 2 lodicules, 3 stamens, 2 plumose stigmas, wild taxa and cultivated widely cultivated, grown as a crop, extremely resistant to drought, used for brewing, source of valuable human food and vegetable, roasted and ground as flour, the grain used for feeding cage-birds and poultry, cultivated for the grain and forage for cattle, straw a good fodder and used for thatching, staple hay crop, medicinal, diuretic and astringent, used externally in rheumatism, plant used as a sedative

to the gravid uterus, a noxious invasive weed, potential seed contaminant, grains used externally in rheumatism, considered to be derived from *Setaria viridis* (L.) P. Beauv., requires sandy loams to clay loams, see *Species Plantarum* 1: 56. 1753, *Systema Naturae, Editio Decima* 2: 870. 1759, *Methodus Plantas Horti Botanici ...* 207. 1794, *Prodromus stirpium in horto ad Chapel Allerton vigentium*. 18. S. leucopila (Scribner & Merr.) K. Schum. (*Chaetochloa composita* (Kunth) Scribn.; *Chaetochloa leucopila* Scribn. & Merr.; *Setaria commutata* Hack.; *Setaria composita* Kunth; *Setaria macrostachya* Kunth)

Mexico, U.S., Arizona, Texas. Perennial bunchgrass, caespitose, pale to bright green and orange-brown, stems often bending abruptly at the nodes, flat or folded leaves somewhat rough and hairy, basal leaves highly palatable, narrow cylindrical spikes, a bristle below each spikelet, good forage value, good range grass and seed producer for dove and quail, fair grazing for wildlife, not very resistant to grazing, grows in open dry ground and under the protection of brush in overgrazed areas, common on rocky slopes and along washes and canyons, often in partial shade of shrubs and trees, often in the open shade of low trees or clumps of brush, abundant on dry plains, in sandy to sandy loam soils and on extremely dry sites, open disturbed soil, along roadsides, useful for erosion control and in revegetation of eroded range sites, abandoned cropland and highway construction sites, see *Nova Genera et Species Plantarum* 1: 110-111. 1815 [1816], *Bulletin, Division of Agrostology United States Department of Agriculture* 4: 39. 1897 and *Bulletin, Division of Agrostology United States Department of Agriculture* 21: 26, f. 14. 1900, *Botanischer Jahresbericht* 28(1): 417. 1902, *Anales del Museo Nacional de Buenos Aires* 13: 439. 1906.

in English: Plains bristle grass, Plains bristlegrass, bristlegrass, stream bed bristle grass, white-haired bristlegrass
in Mexico: tempranero, tempranero prieto, zacate tempranero, zacate temprano

in Argentina: cola de zorro

Wittstein, *Etymologisch-botanisches Handwörterbuch*. 527. 1852; Stafleu and Cowan, *Taxonomic literature*. 3: 46-47. Utrecht 1981)

Tropical Africa, South Africa, Tanzania, Zaire, Zimbabwe. Perennial, erect, tufted, slender to robust, forming dense tussocks, usually branched, shortly rhizomatous, ligule a ring of hairs, leaf blades linear and scabrid, leaf sheaths compressed and keeled, linear leaves finely plicate, old leaf sheaths fibrous, inflorescence open or contracted, narrow panicle loosely contracted, spikelets lanceolate acute and flushed with purplish, solitary bristles, upper glume 7-nerved, lower lemma 7-nerved male, fertile lemma rugose, good hay, palatable, edible grains, resistant to drought, common on loamy to gravelly soil, in rock crevices, in partial shade, rocky or stony slopes, open woodlands, woody thickets, grasslands, under trees, in ravines, at edges of rocks, in

wooded places near streams, in open bushveld, forests, riverbanks, may be confused with *Setaria longiseta* and *Setaria megaphylla*, see *Systema Vegetabilium, editio decima sexta* 1: 305. 1825, *Florae Africae Australioris Illustrationes Monographicae* 47-48. 1841, *Flora Capensis* 7: 422. 1899, *Catalogue of the African Plants Collected by Dr. F. Welwitsch in 1853-61* 2(1): 188. 1899 and U.S. Department of Agriculture. Mexico, U.S., Texas, New Mexico, Arizona, Colorado, Cuba. Perennial bunchgrass, caespitose, stiffly erect, light green tender leaves rough on the back, stems often bend

abruptly at the nodes, densely flowered flower heads, flowering spikelets greenish to yellow, panicle slim and bristly, narrow spike like seed heads, hard seed coat, rough seeds, desert grass, scattered, grass for rangeland restoration and wildlife use, used for birdseed and habitat, a favorite on reclamation sights to stabilize the soil, moderate to high quality forage for deer, the tender basal leaves moderately to highly palatable to all livestock, drought and heat resistant, grows on deep or shallow sandy to clay soils, loams, common on rocky slopes and along washes, open grassy areas, found on open dry ground and in dry woods and on well-drained soils along gullies, stream courses, under protection of brush in overgrazed areas, in areas with adequate moisture, related to *Setaria vulpiseta* (Lam.) Roem. & Schult., see *Encyclopédie Méthodique, Botanique* 4: 735 (or 745). 1798, *Essai d'une Nouvelle Agrostographie* 51, 170, 178. 1812, *Nova Genera et Species Plantarum* 1: 110. 1815 [1816], *Systema Vegetabilium* 2: 495. 1817, *Flora Brasiliensis seu Enumeratio Plantarum* 2: 245, 251. 1829, *Flore Générale de Belgique* 1: 586. 1853, *Synopsis Plantarum Glumacearum* 1: 53. 1854, *Flora Brasiliensis* 2(2): 166-167. 1877, *Revisio Generum Plantarum* 2: 768-769. 1891 and *Bulletin, Division of Agrostology United States Department of Agriculture* 21: 24, 29-30, f. 14, 16. 1900, *Botanischer Jahresbericht* 28(1): 417. 1902, *Anales del Museo Nacional de Buenos Aires* 11: 76. 1904, *Anales del Museo Nacional de Buenos Aires* 13: 439. 1906, *Beiträge zur Biologie der Pflanzen* 10(1): 56. 1910, *Comissão de Linhas Telegraphicas ...*, *Botanica* 67(Bot. 11): 88. 1922, *Contributions to Western Botany* 16: 13. 1930, *Blumea* 3(3): 415. 1940, *Darwiniana* 37: 74. 1999, *Novon* 10(4): 415-418, f. 1-2. 2000.

S. magna Griseb. (*Chaetochloa magna* (Griseb.) Scribn.; *Chamaeraphis magna* (Griseb.) Beal)

Mexico, U.S., Florida, Louisiana, Alabama, Argentina, Bolivia, Costa Rica. Annual, very large, robust, erect or geniculate, hollow, rooting at the lower nodes, leaves long and tapering usually rough to the touch, dense cylindrical panicles, large bushy spikes sometimes drooping and densely hairy, spikelets elliptic or obovate, 1-2 bristles per spikelets, lower glume 3- to 5-nerved, upper glume 7- to

9-nerved, lower lemma 7- to 9-nerved perfect, upper lemma shiny smooth, seeds valuable wildlife food, waterfowl food, found in moist soils with poor drainage, along lagoons, in deep ditches, wet parts of nontidal interdune ponds, wet prairies, brackish or freshwater marshes, swamps, low thickets, wetlands, wet disturbed areas, open dunes-thicket complex and coastal salt marshes, see *Flora of the British West Indian Islands* 554. 1864, *Grasses of North America for Farmers and Students* 2: 152. 1896, *Bulletin, Division of Agrostology United States Department of Agriculture* 4: 39. 1897.

in English: giant bristle grass, giant bristlegrass, foxtail, giant foxtail grass, giant foxtail, foxtail grass, salt marsh foxtail grass

Tropical Africa and tropical America. Perennial, tall, large, erect, slender to robust or stout, coarse, open, loosely clumped, occasionally rooting at the nodes, often shortly rhizomatous, leaf sheath usually hairy to densely pubescent, ligule a ring of hairs, pleated leaves linear to linear-lanceolate, bristled inflorescence elongate linear to cylindrical, open to dense contracted branched panicle, acute spikelets ovate to elliptic-oblong, green solitary bristles, glumes with scarious margins and rounded tip, lower glume 3- to 5-nerved, upper glume 5- to 7-nerved, lower floret male or barren, upper lemma smooth or weakly rugulose, shade-loving grass, large ornamental clumps, used in hut building and for thatching, attractively pleated foliage, forage and fodder grass for all stock, palatability decreases as the plants mature, ground cover, suitable for cultivation and for

rehabilitation, can be used for stream bank stabilization and channel plug development, from the ashes of the whole plant a vegetable salt is obtained, found in gray sandy loam, open areas, montane forests, open forests, in and around forests, light shade of forest margins, thickets, in moist soils, often in shade or in light shade, on stream banks and in channels, wet places and woodlands, low-lying areas along rivers, water courses, disturbed areas, very similar to *Setaria sulcata* and *Setaria poiretiana*, see *Histoire des plantes de la Guiane Française* 1: 50. 1775, *Opuscoli Scientifici* 4: 230. 1820, *Mémoires de la Société d'Agriculture, Sciences et Arts d'Angers* 1: 184. 1831, *Synopsis Plantarum Glumacearum* 1: 52-53. 1853 [or 1854 or 1855], *Naturwissenschaftliche Reise nach Mossambique ...* 2: 550. 1854, *Flora* 38: 198. 1855, *Abhandlungen der Königl. Papua New Guinea, Southeast Asia, China, Japan, Taiwan, the Philippines, Sri Lanka, Indonesia, Malaysia, India, Nepal, Thailand. Perennial, tufted, large, coarse, very stout and robust, stemmy, straggling or scrambling, usually unbranched, loosely or densely clumped, leafy, stems and leaves covered with sticky hairs, culms erect or decumbent at base and rooting from lower nodes, woody rhizomatous, creeping rhizome, solid internodes, ligule membranous with ciliate margins, wide palmlike or pleated or strongly plicate leaf blades, acuminate leaves narrow-elliptic to linear-elliptic, leaf sheaths smooth with fringed margins near the leaf blade, inflorescence a long nodding panicle, loose panicle cylindrical to pyramidal with flexuous or straight branches, bristles solitary and inconspicuous, spikelets ovate to elliptic to lanceolate and sharply pointed, lower floret male or sterile, upper floret bisexual, glumes nerved, lower lemma acuminate, upper lemma smooth or rugulose, grain pale brown, very viable seeds borne in large numbers on terminal shoots, edible grass, ornamental and useful grass cultivated as a vegetable, young shoots eaten with rice, food for granivorous birds and for butterflies, a potential troublesome weed in cultivated areas, a noxious weed in tea areas, can become invasive and disruptive, shade species, prefers

well-drained organically rich soils, very adaptable to many soils and considerably drought-tolerant once established, usually growing in shade near the edge of woods, lowlands, in the partial shade of palm trees, damp shady areas, thickets, wet areas and rainforests, sometimes in disturbed areas, old clearings, gardens, waste grounds, see *Histoire des plantes de la Guiane Française* 1: 50. 1775, *Der Naturforscher* 23: 208. 1788, *Tableau Encyclopédique et Méthodique ... S. paspalidioides Vickery

Australia, Queensland, New South Wales. Perennial, tufted, sheath ribbed and scabrous, ligule densely ciliate, panicle narrow and scabrous with branches erect, bristles unequal and very flexuous, spikelets mostly subtended by a bristle, lower glume acute to obtuse, lower lemma sterile and apiculate, upper lemma bisexual and rugulose, grows in dry woodland, see *Telopea* 1(1): 42. 1975.

S. paucifolia (Morong) Lindm. (*Chamaeraphis paucifolia* Morong; *Setaria glaziovii* Hack.)

South America, Paraguay. Swampy places, along roadsides, see *Annals of the New York Academy of Sciences* 7: 265. 1893 and *Kongliga Svenska Vetenskaps Akademiens Handlingar* 34(6): 10. 1900, *Österreichische Botanische Zeitschrift* 51: 460. 1901, *Repertorium Specierum Novarum Regni Vegetabilis* 6(21-26): 342. 1909.

S. pembertonensis Mez

Australia. See *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 7: 57. 1917.

S. persica hort. ex Rchb. (*Setaria italica* (L.) P. Beauv.)

Europe, Eurasia. Purple-brown spike-like flower heads, close to and confused with *Setaria glauca* (L.) P. Beauv., see *Species Plantarum* 1: 56. 1753, *Essai d'une Nouvelle Agrostographie* 51, 170, 178. 1812, *Flora Germanica Excursoria* 29. 1830.

S. petiolata Stapf & Hubbard (*Setaria interpilosa* Stapf & Hubbard)

Malawi, Lake Malawi. Annual, loosely tufted, weak, nodes glabrous, leaf blades broadly linear flaccid, leaves petiolate, panicle loosely spiciform to lanceolate and then shortly branched below, rachis loosely hirsute, bristles in clusters of 2-5, spikelets broadly elliptic, upper glume 7-nerved, lower lemma 5-nerved male or sterile, upper lemma rugose, related to *Setaria intermedia*, in wooded grassland and among rocks in shade, deciduous bushland, see *F.T.A.* 9:

813, 829. 1930, *Annot. Check List Nyasal. Grass.*: 58. 1958, F.T.E.A., *Gramineae*: 531. 1982.

S. pflanzii Pensiero

Bolivia, Argentina, Paraguay. Perennial, caespitose, nodes glabrous, leaf blades linear-lanceolate glabrous acute flat, panicle dense, spikelets ovate or globose with a solitary basal bristle, upper lemma softly rugulose, savannah, dry woodland, see *Hickenia* 2(27): 123, f. 1. 1995.

S. phanerococca Stapf (*Setaria incrassata* (Hochst.) Hack.)

Mozambique. See *Flora* 38: 197. 1855, *Abhandlungen der Königlichen Akademie der Wissenschaften in Berlin* 2: 122. 1891 and *Flora of Tropical Africa* 9: 784. 1930.

S. phragmitoides Stapf (*Setaria incrassata* (Hochst.) Hack.)

Tropical Africa. See *Flora* 38: 197. 1855, *Abhandlungen der Königlichen Akademie der Wissenschaften in Berlin* 2: 122. 1891 and *Flora of Tropical Africa* 9: 782. 1930.

S. planifolia Stapf (*Setaria anceps* var. *sericea* R.E. Massey ex Stapf; *Setaria sphacelata* var. *sericea* (R.E. Massey ex Stapf) Clayton)

Tropical Africa, Mozambique. Found in open places, often confused with *Setaria plicata* (Lam.) T. Cooke, see *Flora of Tropical Africa* 9(5): 794-798. 1930, *Kew Bulletin* 33(3): 506. 1979.

S. plicata (Lam.) T. Cooke (*Panicum excurrens* Trin.; *Panicum plicatum* Lam.; *Setaria excurrens* (Trin.) Miq.; *Setaria palmifolia* (J. König) Stapf)

China, Japan, Taiwan. Tender species, upper lemma transversely wrinkled, emollient and diuretic, tender shoots eaten as vegetable, leaves used in irregular menstruations, close to and confused with *Setaria plicatilis* (Hochst.) Hack., used for erosion control, grows on moist hills, see *Der Naturforscher* 23: 208. 1788, *Tableau Encyclopédique et Méthodique ... Botanique* 1: 171. 1791, *Species Graminum* 1: t. 89. 1828 [1827], *Annales Museum Botanicum Lugduno-Batavi* 2: 275. 1867 and *The Flora of the Presidency of Bombay* 2: 919. 1908, *Journal of the Linnean Society, Botany* 42(285): 186. 1914, *Claves Generum et Specierum Graminearum Primarum Sinicarum Appendice Nomenclatione Systematica* 126, 227. 1957, *Bulletin of Botanical Research* 4(1): 64-65. 1984.

in Japan: ko-sasa-kibi, ko-sasakibi

Malayan name: akar pimpan

in Thailand: khong kai, kong kai, ya kong kai, yaa khong kaai, yaa kong khaai

S. plicatilis (Hochst.) Hack. ex Engl. (*Panicum oligochaete* (Schum.) Kneuck.; *Panicum plicatile* Hochst.; *Panicum plicatile* var. *glabrescens* Chiov.; *Panicum plicatile* var. *pilosum* Chiov.; *Setaria megaphylla* (Steud.) T. Durand & Schinz; *Setaria oligochaete* Schum.; *Setaria orthosticha* R.A.W. Herrm.; *Setaria plicatilis* (Hochst.) Pilg.)

Tropical Africa, Yemen, Sudan, Ethiopia. Perennial, tufted, erect or ascending, shortly rhizomatous, leaf blades plicate, panicle open and narrow, solitary bristles, upper lemma smooth, growing in forests, irrigation ditches, streamsides, semishade, forest margins, coastal and inland areas, woodlands, grasslands and tall grasslands, damp mountain gullies, see *Synopsis Plantarum Glumacearum* 1: 53. 1853, *Flora* 38: 198. 1855, *Abhandlungen der Königlichen Akademie der Wissenschaften in Berlin* 2: 121. 1891, *Conspectus Florae Africae* 5: 773. 1894, *Die Pflanzenwelt Ost-Afrikas* 105. 1895 and *Annali di Botanica* 8: 31. 1903 [*Annuario del Reale Istituto Botanico di Roma* 8(1): 31. 1903], *Beiträge zur Biologie der Pflanzen* 10: 49. 1910, *Allgemeine Botanische Zeitschrift für Systematik, Floristik, Pflanzengeographie* 21: 28. 1915, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 10(93): 270. 1928.

in English: folded leaf tussock grass

in South Africa: breeblaarpolgras

S. poiretiana (Schult.) Kunth (*Agrostis flabellata* Salzm. ex Steud.; *Chaetochloa crus-ardeae* (Willd. ex Nees) Kuhlmann; *Chaetochloa poiretiana* (Schult.) Hitchc.; *Chaetochloa speciosa* (A. Miq.; *Setaria ustilata* de Wit) (Latin *pumilus*, a, um "dwarf")

Origin unknown. Annual, highly variable, very polymorphic, pale green to bright green, loosely or densely tufted or short-lived perennial with short rhizomes, culms erect to geniculate at the base and sometimes rooting from lower nodes, ascending, weak, fibrous roots, ligule truncate and ciliate, smooth flattened sheaths, linear to oblong leaves,

inflorescence in spike-like panicles cylindrical or oblong, spikelets ovoid with golden to reddish purple bristles with erect teeth, lower floret male or sterile, upper floret bisexual, unequal glumes, lower glume acute, upper glume obtuse, upper lemma wrinkled to rugose, grains eaten in time of scarcity, useful grass suitable for cultivation, used as hay, a good cattle fodder when young, grains eaten by baboons and used in birdseed, cattle that eat this grass can develop stomatitis, a common and noxious weed of cultivation and of arable land, weed of rice, drought-resistant, thatching grass, found in dry sandy soil, open stony hillsides, pathsides in high rainfall areas, weedy places, footpaths, gardens, along streams, seasonally inundated bushlands, in heavily grazed turf, lawns, grassland, fallow lands, along roadsides, fields and lowlands, pastures and most disturbed areas, cultivated land and waste places, sometimes confused with *Setaria gracilis* Kunth, see *Species Plantarum* 1: 56. 1753, *Observationes Botanicae* 20. 1772, *Essai d'une Nouvelle Agrostographie* 51, 169, 178. 1812, *Encyclopédie Méthodique. Origin paleotropics. Annual, green, weak, tender, sticky habit, scabrid, loosely or narrowly tufted, culms erect or usually decumbent at the base, roots fibrous, sometimes developing roots from the lower nodes, leaf blade expanded, sheath compressed or keeled, ligule densely ciliate or a fringe of short hairs, leaves linear and usually sparsely pilose, inflorescence a cylindrical spike-like panicle with spikelets densely clustered on short branches, panicle often drooping, 1 bristle at the base of each spikelet, bristles recurved and barbed, lower glume obtuse, lower lemma sterile, upper fertile lemma smooth or finely rugose, nitrogen-loving pioneer, useful grass highly variable and reproducing by seeds, medicinal, leaves and inflorescences used for diarrhoea, one of the weeds of coffee plantations and many crops, palatable, low grazing value, grazed by cattle when young, suitable for hay-making, seeds eaten by small birds, grain used for an alcoholic drink, a source of food and vegetable salt, inflorescence sticking, seed can attach itself to clothing and to animals, usually found in places seasonally wet or irrigated, in gardens and greenhouses, grasslands, shrublands, irrigation canals, in open dry areas, orchards, moist shaded ground, along stream banks, arable land and waste places, as well as in disturbed and cultivated areas, on road- and trailsides, on nitrogen-rich disturbed soils, irrigation ditches, wadi beds, close to and confused with *Setaria viridis* (L.) P. Beauv. and *Setaria adhaerens* (Forssk.) Chiov., see *Species Plantarum, Editio Secunda* 1: 82. 1762, *Flora Aegyptiaco-Arabica* 20. 1775, *Flore Française* 3: 577. 1778, *Der Naturforscher* 23(1): 209. 1788, *Prodromus Florae Novae Hollandiae* 1: 195. 1810, *Essai d'une Nouvelle Agrostographie* 51, 171, 178. 1812,

Setiactic S.L. Chen & Y.X. Jin = *Panicum* L.

Latin *saeta* (*seta*), *ae* "a bristle, hair" and Greek *ake*, *akis*, *akidos* "tip, thorn, a sharp point," the apex of upper lemma with a tuft of short setae.

Monotypic, China, Hainan. Paniceae, perennial, herbaceous, decumbent at base and usually rooting at the nodes, leaf blades glabrous and linear-lanceolate, leaf sheath compressed and keeled, inflorescence a terminal panicle with slender branchlets, spikelets dorsally compressed solitary or paired close to the base, 2 florets, lower floret with an oblong membranous palea, lower glume 5- to 7-veined/nerved, lower lemma 11-nerved, apex of upper lemma with a tuft of short setae, wet places, forest, closely related to *Acroceras* and *Lasiacis*, type *Setiactic diffusa* (L.C. Chia) S.L. Chen & Y.X. Jin, see *Flora of Tropical*

Africa 9: 621. 1920, *Acta Phytotaxonomica Sinica* 26(3): 217, 219, f. 1. 1988.

Species

S. diffusa (Chia) S.L. Chen & Y.X. Jin (*Acroceras diffusum* L.C. Chia)

China. Perennial, leaf sheaths smooth, lax panicle, spikelets oblong, glumes herbaceous, lower glume ovate-lanceolate, upper glume and lower lemma similar, upper lemma glabrous shining, see *Fl. Hain.* 4: 414, 538. 1977.

in China: ci mao tou shu shu, ci mao tou shu

Setosa Ewart = *Chamaeraphis* R. Br.

Full of bristles, bristly, from the Latin *s(a)etosus*, *a*, *um* (*saeta*).

Panicoideae, Paniceae, Paniceae, type *Setosa erecta* Ewart & Cookson, see *Prodromus Florae Novae Hollandiae* 193-194. 1810 and Alfred James Ewart (1872-1937) & Olive Blanche Davies (fl. 1917), *The Flora of the Northern Territory* 33, pl. 2. Melbourne 1917.

Shibataea Makino ex Nakai

For the Japanese botanist Keita Shibata (Shibata Keito), 1877-1949, biochemist, from 1910 to 1911 studied with the German plant physiologist and bryologist Wilhelm Friedrich Philipp Pfeffer (1845-1920) at Leipzig, founder and first editor of *Acta phytochimica*, from 1912 to 1938 professor of botany at Tokyo University, in 1917 worked in Buitenzorg, from 1938 to 1949 Director of the Iwata Institute for Plant Biochemistry, author of *Cytologische Studien über die endotrophen Mykorrhizen*. Leipzig 1902, with the Japanese lichenologist Yasuhiko Asahina (1881-1975) wrote *Chemistry of lichen substances*. 1954; see J.H. Barnhart, *Biographical notes upon botanists*. 3: 270. 1965; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 364. 1972; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933; Stafleu and Cowan, *Taxonomic literature*. 5: 563. Utrecht 1985; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 780. Stuttgart 1993.

About 3-9/10 species, temperate Asia, China and Japan. Bambusoideae, Bambusodae, Bambuseae, Shibataeinae, perennial, thin, monopodial branching or amphipodial, small, pluricaespitose or scattered, shrubby, unarmed, dwarf, prominent nodes swollen, each twig with 2 internodes, culm sheath thin and deciduous, leaf sheath thick, branches and twigs thick and short, flat shoots, culm strongly flattened on one side, rhizomatous with long rhizomes, rhizomes leptomorph, the flowering culms leafy,

woody and persistent, not scandent, branched above, 2-6 very short branches at a node, plants bisexual, inflorescence compound, sessile pseudospikelets, spikelets 2-flowered, glumes 2-3 or absent or several, paleas 2-keeled, 3 free and ciliate lodicules, 3 stamens, ovary glabrous with apical appendage, 3 feathery stigmas, in woodland, type *Shibataea kumasaca* (Zoll. ex Steud.) Nakai, see *Act. III Congr. Int. Bot. Brux.* 2: 220. 1912, *Bot. Mag. Tokyo* 26: 236. 1912, *Journal of Japanese Botany* 9(2): 77-78, 83, f. 8. 1933, Alfred Rehder, 1863-1949, *Bibliography of Cultivated Trees and Shrubs Hardy in the Cooler Temperate Regions of the Northern Hemisphere*. 641. Jamaica Plain, Massachusetts 1949, *Agriculture Handbook* 193: i-iii, 1-74. 1961, *Index Jap. Bamb.* 52. 1978, *Fl. Taiwan* 5: 737. 1978, *Grass Systematics and Evolution* 225-238. 1987, *Acta Phytotax. Sin.* 26(2): 130-138. 1988, *Compend. China Bamb.* 154-157. 1994, *Flora Reipublicae Popularis Sinicae* 9(1): i-xxvi, 1-761. 1996, *Contributions from the United States National Herbarium* 39: 112. 2000.

Species

S. chiangshanensis Wen

China, Zhejiang. Perennial, culm almost semicircular, reddish brown, 3 branches at each node, sheath pubescent, sheath blade purplish red and ovate, no sheath auricles, sheath ligule short truncate, 1 leaf per twig, leaf blade serrate and ovate, rare, cultivated, ornamental, see *Bulletin of Botanical Research* 3(1): 95-96, f. 4. 1983.

S. chinensis Nakai (*Bambusa aureostriata* Regel; *Shibataea chinensis* f. *aureostriata* C.H. Hu; *Shibataea chinensis* f. *aureostriata* (Regel) C.H. Hu)

China. Perennial, glabrous, 3-6 branches at each node, internodes of lower part cylindrical, internodes of upper portion triangular, culm annulus swollen, sheath caducous and membranous, 1 leaf at the end of branch, leaves glabrous and acuminate, leaf blade ovate lanceolate or broadly lanceolate, ornamental, used as low hedges, see *Gartenflora* 14: 362, pl. 490, f. 3-4. 1865 and *Journal of Japanese Botany* 9: 81, 85, pl. 9. 1933, *Acta Phytotaxonomica Sinica* 26(2): 136-137. 1988, *Compend. China Bamb.* 154-157. 1994, *Acta Phytotaxonomica Sinica* 37(6): 541-544. 1999.

in China: emaozhu, wozhu

in Japan: to-okame-zasa

S. chinensis Nakai var. *gracilis* C.H. Hu

China. Perennial, base of sheath minutely tomentose, ornamental, low hedges, see *Journal Nanjing University. Natural Sciences Edition* no. 3: 733, f. 1. 1982.

S. fujianica Z.D. Zhu & H.Y. Zou (*Shibataea fujianennica* C.H. Hu; *Shibataea lancifolia* var. *fujianica* C.H. Hu; *Shibataea nanpingensis* var. *fujianica* (Z.D. Zhu & H.Y. Zou) C.H. Hu)

China. Ornamental, see *Acta Phytotaxonomica Sinica* 26(2): 134-136, pl. 1, 2, f. 1-5. 1988, *Bot. Res.* 7(2): 158, 160. 1989, *Flora Reipublicae Popularis Sinicae* 9(1): 321. 1996.

S. hispida McClure

China. Glabrous, 3-4 branches on each node, culm annulus convex, sheath shedding late, sheath auricle and ligule absent, sheath blades tiny, leaves ovate lanceolate scabrous, ornamental, ground cover, useful for erosion control, see *Lingnan University Science Bulletin* 9: 57. 1940, *Sunyatsenia* 6(1): 46. 1941.

in China: luhuzhu

S. kumasaca (Zoll. ex Steudel) Makino (also spelled *kumasasa*) (*Arundinaria kumasasa* Kurz ex Teijsman & Binn.; *Bambusa kumasaca* Zoll. ex Steud.; *Bambusa kumasaca* Steud.; *Bambusa kumasasa* Zoll., nom. illeg., non *Bambusa kumasaca* Zoll. ex Steud.; *Bambusa ruscifolia* Siebold ex Munro; *Bambusa viminalis* hort. ex Bean; *Phyllostachys kumasaca* (Zoll. ex Steud.) Munro; *Phyllostachys kumasaca* (Steud.) Lawson; *Shibataea kumasaca* (Steudel) Makino; *Shibataea kumasaca* Makino & Shibata; *Shibataea kumasaca* (Steudel) Makino ex Nakai; *Shibataea kumasaca* (Zoll. ex Steudel) Nakai, nom. illeg., non *Shibataea kumasaca* (Zoll. ex Steud.) Makino; *Shibataea kumasaca* (Steudel) Nakai; *Shibataea kumasasa* (Steudel) Makino; *Shibataea kumasasa* (Steudel) Nakai; *Shibataea kumasasa* (Zoll.) Nakai; *Shibataea kumasasa* (Zoll.) Makino; *Shibataea ruscifolia* Makino; *Shibataea ruscifolia* (Siebold ex Munro) Makino)

Southern Japan. Monopodial, perennial, small to dwarf, branched, internodes semicylindrical or triangular, culm annulus convex, nodes prominent, 2 to 5-6 very short branches at each node, culm sheaths thinly chartaceous or papyraceous, sheath reddish, usually 1-5 leaves at each node, leaves minutely hairy on the back, leaf blades broadly lanceolate to oblong-lanceolate, spikelets linear to narrowly lanceolate with 1-2 perfect florets, 2-3 glumes lanceolate acute, lemmas broadly lanceolate acuminate, palea present, 3 lodicules broadly lanceolate acuminate or obtuse, 3 stamens exerted, ovary ovoid, 3 feathery stigmas, widely cultivated, ornamental, propagation by rhizome cutting, used for living fences and ground covering, hedge, culms dyed and used for weaving material, useful for erosion control, see *Genera Plantarum* 1: 236. 1789, *Abhandlungen der Mathematisch-Physikalischen Classe der Königlich Bayerischen Akademie der Wissenschaften* 3(3): 745, pl. 5, f. 3. 1843, *Synopsis Plantarum Glumacearum* 1: 331. 1854 [1855], *Systematisches Verzeichniss der im Indischen Archipel* 1: 57. 1854, *Catal. Pl. Horto Bot. Bogor.* 19. 1866,

Transactions of the Linnean Society of London 26(1): 39, 123, 157. 1868, *Gard. Chron.* ser. 3, 15: 369. 1894, *Garden* 47: 3. 1895, *Cultiv. Bamb. Jap.* 70. 1899 and *Botanical Magazine* (Tokyo) 26: 236. 1912, *Botanical Magazine* (Tokyo) 28(325): 22, 155. 1914, *Journal of Japanese Botany* 9(2): 78, 80-81, 83, f. 8. 1933, *Bamb. Gard. in English: ruscus-leaves bamboo, fiveleaf bamboo

in China: wu-ye-sa

in Japan: okame-zasa, gomai-zasa, bungo-zasa, fukuzasa (= fortune-inviting sasa), shirofuokame-zasa, fuirokame-zasa (with white stripes on the leaf)

S. lancifolia C.H. Hu (*Shibataea lanceifolia* C.H. Hu)

China, Zhejiang. Perennial, erect, solid smooth, glabrous, 3-5 branches at each node, sheath papyraceous and caducous, no sheath auricles and cilia, 1-2 leaves at each twig, leaf blades long lanceolate, ornamental, see *Journal Nanjing University. Natural Sciences Edition* 1981 (n. 2): 257, f. 1. 1981, *Acta Phytotaxonomica Sinica* 26(2): 134, pl. 11, f. 6-7. 1988, *Acta Phytotaxonomica Sinica* 29(5): 452-455. 1991.

S. nanpingensis Q.F. Zheng & K.F. Huang (*Shibataea nanpingensis* Q.F. Zheng & K.F. Huang; *Shibataea pygmaea* F. Maekawa)

China, Nanping. Perennial, culm grooved on one side, 3 branches at each node, sheath green and shorter than internode, no auricles and no cilia on sheath mouth, sheath ligule convex, 1 leaf on each branch, leaves elliptic lanceolate with acuminate tip, ornamental, see *J. Jap. Bot.* 19(5): 150. 1943, *Wuyi Sci. J.* 2: 17, fig. 1. 1982, *Acta Phytotaxonomica Sinica* 26(2): 135, 137, f. 2. 1988, *Acta Phytotaxonomica Sinica* 29(5): 452-455. 1991.

S. nanpingensis Q.F. Zheng & K.F. Huang var. ***fujianica*** (C.D. Chu & H.Y. Zhou) C.H. Hu (*Shibataea fujianennica* C.H. Hu; *Shibataea fujianica* Z.D. Zhu & H.Y. Zou; *Shibataea lancifolia* var. *fujianica* C.H. Hu)

China, Nanping. Young culm densely pruinose, culm annulus convex, 3 branches at each node, sheath green purplish and shorter than internodes, sheath blade bandlike, no sheath auricles and cilia, 1-2 leaves on each twig, leaves oblong-lanceolate shortly pubescent beneath, ornamental, see *Acta Phytotaxonomica Sinica* 26(2): 134-136, pl. 1, f. 1-5. 1988, *Bot. Res.* 7(2): 158, 160. 1989, *Flora Reipublicae Popularis Sinicae* 9(1): 321. 1996.

S. strigosa T.H. Wen (*Shibataea striata* Wen ex C.H. Hu, Q.F. Zheng & K.F. Huang)

China. Perennial, green, glabrous, culm annulus swollen with a round ridge, 3 branches at each node, sheath blade tiny and erect, no sheath auricles and cilia, sheath ligule arcuate or truncate with ciliate margin, 1 leaf on each twig,

leaves glabrous, ornamental, see *Bulletin of Botanical Research* 3(1): 96-97. 1983, *Acta Phytotax. Sin.* 26(2): 132. 1988.

S. tumidinoda Wen (*Shibataea chinensis* C.H. Hu)

China. Perennial, see *J. Bamb. Res.* 7(1): 23-25, f. 1. 1988.

Sibertia Steud. = *Bromus* L.

Pooideae, Bromeae, see *Genera Graminum* 144-145. 1986, *Contributions from the United States National Herbarium* 48: 154-191, 425. 2003.

Sieglingia Bernh. = *Danthonia* DC., *Triodia* R. Br.

For a botanical collector and botanist named Siegling; see Helmut Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 584. Basel 1996.

Monotypic, Europe, Algeria, Asia Minor. Arundinoideae, Danthonieae, perennial, stiff, herbaceous, densely tufted, erect or spreading, cataphylls, leaf sheath rounded to keeled and strongly ribbed, leaf sheaths fibrous when old, ligule a ring of hairs, plants bisexual, open or compact inflorescence paniculate or sometimes racemose, flowers hermaphrodite, cleistogamous and chasmogamous, cleistogenes developed in basal leaf sheaths, incomplete florets distal to the female fertile florets, 2 glumes equal to more or less equal and persistent, lemma awnless and mucronate, palea coriaceous, 2 fleshy lodicules truncate and nerved, lodicules absent in cleistogamous florets, stamens 3, ovary glabrous, stigmas 2, fruit a caryopsis, pasture, along roadsides, waste grounds, sometimes or often referred to *Danthonia*, hybrids with *Danthonia*, type *Sieglingia decumbens* (L.) Bernh., see *Systematisches Verzeichnis* 20, 44. Erfurt 1800, *Flore Française ...Troisième édition* 3: 32-33. 1805, *Prodromus Florae Novae Hollandiae* 182. 1810, *Nouveau Bulletin des Sciences, publié par la Société Philomatique de Paris* 2: 189. 1810, *Systema Vegetabilium* 2: 690. 1817, *Bulletin Botanique Genève* 1: 221. 1830, *Pflanzen und Gebirgsarten von Marienbad* 38. in English: heath grass

Silentvalleya Nair, Sreekumar, Vajravelu & Bhargavan

Referring to the Silent Valley Reserved Forest, Silent Valley National Park, 40 km from Mannarkkad, Kerala, India. The Silent Valley ecosystem comprises of 8,952 hectares of forestland on the Nilgiris plateau closed on all sides by mountains of the Western Ghats, one of the world's richest biodiversity hotspots. The local name for the park is *Sairandhrivanam* (the forest in the valley).

One species, India. Chloridoideae, perennial, herbaceous, unbranched, tufted, auricles absent, ligule membranous, plants bisexual, inflorescence spicate and not digitate, solitary spikelets, upper glume 3-nerved, lower glume nerveless, lemma 3-nerved glabrous awned, palea and lodicules present, 3 stamens, ovary glabrous, 2 stigmas, see V.C. Nair, E. Vajravelu, P. Bhargavan, Preliminary report on the botany

of Silent Valley (Palghat district, Kerala). Botanical Survey of India, Coimbatore 1980, *Journal of the Bombay Natural History Society* 79(3): 654-656. 1982[1983], J.S. Singh, S.P. Singh, A.K. Saxena and Y.S. Rawat, "The forest vegetation of Silent Valley, India." in: A.C. Chadwick and S.L. Sutton, (editors), *Tropical Rain-Forest. The Leeds Symposium*. Leeds Philosophical and Literary Society, Leeds pp. 25-52. 1984, K.S. Manilal, *Flora of Silent Valley Tropical Rain-forests of India*. The Mathrubhumi (MM) Press, Calicut 1988.

Species

S. nairii V.J. Nair & Sreek., Vajr. & Bhargavan

India, Kerala. Perennial, caespitose, 2 glumes, lemma entire with bearded callus, palea 2-nerved 2-keeled.

Simplicia Kirk

Two species, New Zealand, Antarctic. Pooideae, Poodae, Poeae, or Aveneae, perennial, herbaceous, tufted, often decumbent to erect, auricles absent, ligule an unfringed membrane, leaf sheath membranous and ribbed, plants bisexual, chasmogamous, panicle open or contracted, spikelet with rachilla extension, only 1 flower in each spikelet, 2 minute glumes unequal much shorter than floret, upper glume membranous acute, 3-nerved lemma acute awnless or awned, palea keeled 1-2-nerved, 2 free and membranous lodicules, 2-3 stamens, ovary glabrous, 2 stigmas plumose, open habitats, stony ground, open places, grassland, bluffs, resembles *Poa*, type *Simplicia laxa* Kirk, see *New Zealand Journal of Botany* 9(3): 539-544. 1971, *Transactions and Proceedings of the New Zealand Institute* 29: 497, t. 44. 1897.

Species

S. buchananii (Zotov) Zotov (*Poa uniflora* Buchanan, nom. illeg., non *Poa uniflora* Muhl.; *Simplicia laxa* var. *buchananii* Zotov)

New Zealand. Perennial, montane to subalpine, tufted, slender, ligule erose, panicle linear with erect branches, single-flowered spikelets, glumes glabrous, lemma scabrid, see *Indigenous Grasses of New Zealand* t. 49B. 1880 and *Transactions of the Royal Society of New Zealand* 73: 236. 1943, *New Zealand Journal of Botany* 9(3): 542. 1971.

S. laxa Kirk

New Zealand, South Island. Endangered, perennial, rare, flaccid, weak, decumbent, montane, soft, internodes elongate, ligule erose, leaf blades flat and narrow, open inflorescence, panicle pyramidal and sparingly branched, branches spreading, spikelets sharply pointed, 1-flowered, slightly keeled lemma pubescent to shortly pubescent, caryopsis laterally compressed, see *Transactions and Proceedings of the New Zealand Institute* 29: 497, t. 44. 1897 and

Transactions of the Royal Society of New Zealand 73: 236. 1943, *New Zealand Journal of Botany* 9(3): 541. 1971.

Sinarundinaria Nakai = *Ampelocalamus* Chen, Wen and Sheng, *Borinda* Stapleton, *Burmabambus* Keng f., *Burmabambusa* Keng f., *Butania* Keng f., *Chimonocalamus* J.R. Xue [alt. Hsueh] and Yi, *Drepanostachyum* Keng f., *Monospatha* W.T. Lin, *Otatea* (McClure & E.W. Sm.) Calderón & Soderstr., *Yushania* Keng f.

From China and the genus *Arundinaria*.

About 50 species, Asia and Madagascar, tropical Africa, Central America. Bambusoideae, Bambusodae, Bambuseae, Arundinariinae or Shibateinae, perennial, shrub or small tree, rhizomatous with sympodial rhizomes, the flowering culms leafy, culms woody and persistent, branched above, 1 ridged culm nodes, culm sheaths persistent, culm internodes solid or hollow, rhizomes pachymorph, plants conspicuously armed or unarmed, adventitious roots at the nodes, plants bisexual, inflorescence simple and exserted, a panicle or a raceme, spikelets stalked, 2 glumes, palea present, 3 free lodicules, stamens 3, stigmas 2, shade species, in woodlands, open habitats, high mountains, taxonomic confusion concerning this genus, sometimes referred to and included in *Fargesia* Franchet, type *Sinarundinaria nitida* (Mitford ex Stapf) Nakai, see *Flora Boreali-Americana* 1: 73. 1803, *Transactions of the Linnean Society of London* 26(1): 33, 157. 1868, *J. Linn. Soc. Bot.* 19: 31. 1881, *Bulletin Mensuel de la Société Linnéenne de Paris* 2: 1067. 1893 and *Botanical Magazine* 28(329): 153. 1914, *Journal of the Arnold Arboretum* 6(3): 145, 148. 1925, *Journal of Japanese Botany* 11(1): 1. 1935, *Lingnan University Science Bulletin* 9: 66. 1940, *Acta Phytotaxonomica Sinica* 6(4): 355-357. 1957, *Primates* 10: 103-148. 1969, *Smithsonian Contributions to Botany* 9: 116, 119. 1973, *Acta Botanica Yunnanica* 1(2): 75-76. 1979, *Smithsonian Contributions to Botany* 44: 21. 1980, *Acta Phytotaxonomica Sinica* 19(3): 332-334, pl. 1. 1981, *J. Species

S. anceps (Mitf.) Chao & Renvoize (*Arundinaria anceps* Mitford; *Arundinaria jaunsarensis* Gamble; *Chimonobambusa jaunsarensis* (Gamble) Bahadur and Naithani; *Yushania anceps* (Mitford) W.C. Lin; *Yushania jaunsarensis* (Gamble) Yi)

Northwest and the central Himalayas, hills of Uttar Pradesh. Single stem, graceful, nontufted, nonclump-forming, reed-like, rhizome long and creeping, leaves linear-lanceolate, culm sheath papery, narrow auricles falcate, inflorescence racemose, 2 glumes ciliate on margins, 2-3 lodicules fimbriate, 3 stamens, ovary glabrous, long plumose to ciliate stigma, material for pulp and paper, for mats and baskets, split culms employed for cottages, occurs in mountain slopes and ridges, in forests, see *The Bamboo Garden* 181. 1896, *Annals of the Royal Botanic Garden. Calcutta.* 7: 23, t. 22. 1896 and *Bulletin of the Taiwan Forest Research Institute* 248: 9. 1974, *Indian Journal of Forestry* 1: 41. 1978, *Journal of Bamboo Research* 2(1): 39. 1983, *Kew Bulletin* 44(2): 359. 1989.

in India: g-yons ringal, gyons, jumra, jumra-ringal, ningal, ringal, sarura, sarura ringal, sarurha

S. arunachalensis Naithani (*Chimonocalamus longispiculatus* Majumdar; *Chimonocalamus longispiculatus* (C.S. Chao & Renvoize) D.Z. Li)

India. Unarmed, see *Kew Bulletin* 43(3): 411. 1988, *Fl. Ind. Enumerat.-Monocot.* 276. 1989, *Indian Forester* 117(1): 78. 1991, *Acta Botanica Yunnanica* 16(1): 41. 1994.

S. densifolia (Munro) Chao & Renvoize (*Arundinaria densifolia* Munro; *Chimonobambusa densifolia* (Munro) Nakai; *Yushania densifolia* (Munro) R.B. Majumdar)

South India. Shrubby, smooth, thick-walled, with thick rhizome with imbricating scales, 3 stamens, ovary glabrous, 1 plumose stigma, see *Transactions of the Linnean Society of London* 26(1): 32. 1868 and *Journal of the Arnold Arboretum* 6: 151. 1925, *Smithsonian Contr. Bot.* 72: 12. 1988, *Fl. Ind. Enumerat.-Monocot.* 282. 1989, *Kew Bulletin* 44(2): 354. 1989.

S. elegans (Kurz) Chao & Renvoize (*Arundinaria elegans* Kurz; *Burmabambus elegans* (Kurz) Keng f.; *Sinobambusa elegans* (Kurz) Nakai; *Yushania elegans* (Kurz) R.B. Majumdar)

India, Arunachal Pradesh, Nagaland. Shrubby, evergreen, slender, tufted, flattened on one side, nodes prominent, internodes smooth, culm sheath deciduous covered with stiff hairs on the outer surface, leaves linear-lanceolate attenuate at the base into a short petiole, leaf sheaths glabrous, short auricles with long bristles, inflorescence terminal, spikelets compressed, 2 glumes ciliate, paleas ciliate

on the keels, 3 stamens, ovary glabrous, 2 plumose stigmas, young shoots used for making pickles, shoots used as vegetable and food, culms used in house construction and for making walls of huts, see *Journal of the Asiatic Society of Bengal. Part 2. Natural History* 42: 249. 1873 and *Journal of the Arnold Arboretum* 6: 152. 1925, *Journal of Bamboo Research* 1(2): 40. 1982, *Fl. Ind. Enumerat.-Monocot.* 282. 1989, *Kew Bull.* 44(2): 357, 359. 1989.

in India: jilli

S. falcata (Nees) Chao & Renvoize (*Arundinaria falcata* Nees; *Arundinaria falcata* var. *glomerata* Gamble; *Arundinaria interrupta* Trin.; *Arundinaria utilis* Cleghorn; *Arundinaria utilis* Lafosse; *Chimonobambusa falcata* (Nees) Nakai; *Drepanostachyum falcatum* (Nees) Keng f.; *Drepanostachyum khasianum* (Munro) Keng f.; *Drepanostachyum khasianum* (Munro) Majumdar, nom. illeg., non *Drepanostachyum khasianum* (Munro) Keng f.; *Fargesia falcata* (Nees) T.P. Yi; *Ludolfia falcata* Nees ex Munro; *Pleiolobatus falcatus* (Nees) T.Q. Nguyen)

India. Shrubby, cylindrical, green, smooth, nodes swollen, 3 stamens, ovary glabrous, 1 plumose stigma, gregarious and sporadic flowering, culms used for making baskets and fishing rods, see *Linnaea* 9(4): 478. 1834, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 3,1(6): 620. 1835, *J. Agric. Soc. India* 13: 388. 1865, *Bull. Nat. Soc. Acclim. France* 4: 682. 1867 and *Journal of the Arnold Arboretum* 6(3): 151. 1925, *Journal of Bamboo Research* 2(1): 16, 18. 1983, *Flora Xizangica* 5: 33. 1987, *Kew Bull.* 44(2): 357-358. 1989, *Fl. Ind. S. floribunda (Thwaites) Chao & Renvoize (*Arundinaria floribunda* Thwaites; *Indocalamus floribundus* (Thwaites) Nakai)

India, Sri Lanka. Erect, shrubby, nodes swollen, 3 stamens, ovary glabrous, 2 stigmas, culms used for making roofs and fencing, see *Enumeratio Plantarum Zeylanicae* 375. 1864 and *Journal of the Arnold Arboretum* 6: 148. 1925, *Kew Bull.* 44(2): 356. 1989.

S. griffithiana (Munro) Chao & Renvoize (*Arundinaria griffithiana* Munro; *Chimonobambusa griffithiana* (Munro) Nakai; *Chimonocalamus griffithianus* (Munro) J.R. Xue & T.P. Yi)

India. Erect, shrubby, gregarious, internodes furrowed, prominent nodes woolly and shortly spiny, culm sheath papery, terminal panicle surrounded by sheathing bracts, spikelets with 2 empty glumes, lemmas mucronate, 3 lodicules ciliate, 3 stamens, ovary glabrous, 2 plumose stigmas, thatching grass, see *Transactions of the Linnean Society of London* 26(1): 20. 1868 and *Journal of the Arnold Arboretum* 6(3): 151. 1925, *Acta Botanica Yunnanica* 1(2): 83-84. 1979, *Kew Bull.* 44(2): 353. 1989.

in India: hango maling, khanap, khnap, knap, ukhnep, usknep, uspar

S. hirsuta (Munro) Chao & Renvoize (*Arundinaria hirsuta* Munro; *Yushania hirsuta* (Munro) R.B. Majumdar)

India. Erect, tufted, shrubby, single stems from the rhizomes, internodes hirsute, culm sheath papery, 3 stamens, ovary glabrous, 3 plumose stigmas, young shoots edible, thatching grass, culms used for fencing, roofing, doors, nursery sheds, young leaves fodder for cattle, common in lowlands, low hills, see *Transactions of the Linnean Society of London* 26(1): 30. 1868 and *Kew Bull.* 44(2): 355. 1989, *Fl. Ind. Enumerat.-Monocot.* 282. 1989.

in India: daitsisal, uskong, ustoh

S. hookeriana (Munro) Chao & Renvoize (*Arundinaria hookeriana* Munro; *Chimonobambusa hookeriana* (Munro) Nakai; *Drepanostachyum hookerianum* (Munro) Keng f.; *Himalayacalamus hookerianus* (Munro) Stapleton)

India, Sikkim. Caespitose, slender, striate, nodes ringed, inflorescence at the nodes of leafless culms, 2 glumes membranaceous, 3 stamens, ovary glabrous, 2 plumose stigmas, seeds cooked like rice, cultivated, thatching grass, culms used for fencing and water pipes, leaves used as fodder, young shoots edible, grows on hill sides, see *Transactions of the Linnean Society of London* 26(1): 29. 1868 and *Journal of the Arnold Arboretum* 6(3): 151. 1925, *Journal of Bamboo Research* 2(1): 17. 1983, *Kew Bull.* 44(2): 358-359. 1989, *Bamboo Society Newsletter* 17: 21. 1993, *Edinburgh Journal of Botany* 51: 318. 1995.

in India: pagjiok-pao, pareng, praing, praong, prem, preng, prong, singhane, singhani, suighani

S. intermedia (Munro) Chao & Renvoize (*Arundinaria intermedia* Munro; *Arundinaria suberecta* Munro; *Chimonobambusa intermedia* (Munro) Nakai; *Drepanostachyum intermedium* (Munro) Keng f.; *Drepanostachyum suberecta* (Munro) R.B. Majumdar)

Northeast India, Sikkim. Shrubby, thin, caespitose, smooth, nodes swollen and ringed, 3 stamens, ovary oblong, plumose stigma, hedge plant, young shoots edible, culms used for making arrows, leaves used for thatching and roofing, see *Transactions of the Linnean Society of London* 26(1): 28, 32. 1868 and *Journal of the Arnold Arboretum* 6: 151. 1925, *Bulletin of the Botanical Survey of India* 25(1-4): 236. 1983, *Journal of Bamboo Research* 2(1): 18. 1983, *Kew Bull.* 44(2): 357. 1989, *Edinb. S. jainiana (C.R. Das & D.C. Pal) H.B. Naithani (*Ampelocalamus patellaris* (Gamble) Stapleton; *Chimonobambusa*

jainiana C.R. Das & D.C. Pal; *Dendrocalamus patellaris* Gamble; *Drepanostachyum jainianum* (C.R. Das & D.C. Pal) R.B. Majumdar; *Drepanostachyum patellaris* (Gamble) J.R. Xue & D.Z. Li; *Patellocalamus patellaris* (Gamble) W.T. Lin; *Sinocalamus patellaris* (Gamble) T.Q. Nguyen)

India, Sikkim, West Bengal. Caespitose, flexible, long internodes striate and hairy, many fasciculate branches, leaves oblong-lanceolate attenuate at the base into a short petiole, loose drooping panicle, lemmas tip acute, paleas 2-keeled, 3 lodicules, 3 stamens, ovary glabrous, stigma plumose, culms used for weaving, leaves used as fodder, prefers humid and cool habitats, see *Annals of the Royal Botanic Garden, Calcutta*. 7: 86-87, t. 75. 1896 and *Journal of Economic and Taxonomic Botany, Additional Series* 4(3): 1023. 1983, *Bulletin of the Botanical Survey of India* 25(1-4): 235. 1983 [1985], *Journal of South China Agricultural University* 10(2): 45-46. 1989, *Indian Forester* 116(12): 990. 1990, *Bot. Zhurn. (Moscow & Leningrad)* 74(11): 1662. 1989, *Edinburgh Journal of Botany* 51(3): 321-323, f. 7. 1994, *Kew Bulletin* 51(4): 811. 1996.

S. kurzii (Gamble) Muktesh Kumar (*Arundinaria kurzii* Gamble; *Drepanostachyum kurzii* Majumdar; *Drepanostachyum kurzii* (Gamble) Pandey ex D.N. Tewari)

India. Rare, bushy, shrubby, thin, smooth, nodes prominent, see *Annals of the Royal Botanic Garden, Calcutta*. 7: 25, t. 25. 1896 and *A Monograph on Bamboo* 90. Dehra Dun 1993.

S. longispiculata Chao & Renvoize (*Arundinaria longispiculata* Bor; *Chimonocalamus longispiculatus* (C.S. Chao & Renvoize) D.Z. Li; *Sinarundinaria longispiculata* (Bor) C.S. Chao & Renvoize)

India, Lushai Hills, Mizoram. Erect, reedlike, internodes glabrous, nodes yellowish velvety and thorny, leaves lanceolate tapering at the tip and cuneate at the base, leaf sheaths glabrous with small auricles, ligules conspicuous, on a leafy branch inflorescence terminal, several spikelets, glumes scabrous near the apex, paleas 2-keeled, 3 lodicules, 3 stamens, see *Kew Bulletin* 43(3): 411. 1988, *Flora Indica Enumeratio: Monocotyledonae, Bambusoideae* Botanical Survey of India, Flora of India, Series 4, 276. Calcutta 1989, *Acta Botanica Yunnanica* 16(1): 41. 1994.

S. microphylla (Munro) Chao & Renvoize (*Arundinaria microphylla* Munro; *Yushania microphylla* (Munro) R.B. Majumdar)

India, Bhutan. Small, shrubby, caespitose, gregarious, nodes prominent, with long and hollow rhizome neck, leaves can be used as a fodder, can be planted in water logged areas, found in large patches in wet places, see *Transactions of the Linnean Society of London* 26(1): 32. 1868 and *Kew Bull.* 44(2): 354. 1989, *Fl. Ind. Enumerat.-Monocot.* 283. 1989.

S. nagalandiana Naithani

India, Nagaland. Thorny, erect, caespitose, dark branches, nodes prominent with a circle of conical stout short spines, culm sheath without ligule, see *Indian Forester* 120(12): 1120. 1994.

S. nitida (Mitford ex Stapf) Nakai (*Arundinaria nitida* Mitford; *Arundinaria nitida* Mitford ex Stapf; *Fargesia nitida* (Mitford) Keng f. ex T.P. Yi; *Fargesia nitida* (Mitford ex Stapf) Keng f. ex T.P. Yi; *Sinarundinaria nitida* Nakai; *Sinarundinaria nitida* (Mitf.) Nakai; *Thamnocalamus nitidus* (Mitford ex Stapf) Demoly)

Asia, China. Arching when old, sympodial, numerous branches at each node, sheaths spotless, culms used to weave baskets, see *Transactions of the Linnean Society of London* 26(1): 28. 1868, *Gard. Chron.* 3rd ser. 15: 301. 1894, *Gardener's Chronicle & Agricultural Gazette* ser. III 18: 186, f. 33. 1895, *Bull. Misc. Inform. Kew* 109: 20. 1896 and *Journal of Japanese Botany* 11(1): 1. 1935, *Bamb. Res. Asia* 58. 1980, *Journal of Bamboo Research* 6(4): 14. 1987, *Bambou* 9: 13. 1991, *Edinb. J. Bot.* 51: 308. 1994.

in English: fountain bamboo, hardy blue bamboo

in China: Huaxi jianzhu

in Japan: sen-chiku

S. pantlingii (Gamble) Chao & Renvoize (*Arundinaria pantlingii* Gamble; *Butania pantlingii* (Gamble) Keng f.; *Semiarundinaria pantlingii* (Gamble) Nakai; *Sinarundinaria pantlingii* (Munro) C.S. Chao & Renvoize; *Yushania pantlingii* (Gamble) R.B. Majumdar) (for the British botanist Robert Pantling, 1856/1857-1910 (Egypt), Kew gardener, Curator Royal Botanic Gardens Calcutta and Deputy Superintendent of the Government Cinchona Plantation in Bengal, illustrated Sir George King's (1840-1909) "The Orchids of the Sikkim-Himalaya." in *Annals of the Royal Botanic Garden, Calcutta*. 8(1-4). 1898; see J.H. Barnhart, *Biographical notes upon botanists*. 3: 47. 1965; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. 1917-1933)

India, Arunachal Pradesh, Sikkim, Nepal, Tibet. Erect, shrubby, caespitose, smooth, thin-walled, node prominent with a softly hairy ring, culm sheaths coriaceous and stiffly hairy, 2 glumes slightly ciliate, paleas 2-keeled, 3 lodicules, 3 stamens, ovary glabrous, 3 plumose stigmas, flowering rare, grows in mountain slopes, subalpine zones, rocky areas, undergrowth in forests, often forming almost pure stands, see *Annals of the Royal Botanic Garden, Calcutta*. 7: 129, t. 118. 1896 and *Journal of the Arnold Arboretum* 6: 151. 1925, *Journal of Bamboo Research* 1(2): 42. 1982, *Fl. Ind. Enumerat.-Monocot.* 283. 1989, *Kew Bulletin* 44(2): 359. 1989.

in India: bami, ha, hima, kalo-malingo, kalo-nigala, kalo-nigalo, maling, nigala

S. polystachya (Kurz ex Gamble) Chao & Renvoize (*Arundinaria polystachya* Kurz ex Gamble; *Chimonobambusa polystachya* (Kurz ex Gamble) Nakai; *Drepanostachyum polystachyum* (Kurz ex Gamble) Majumdar; *Sinarundinaria polystachya* (Gamble) C.S. Chao & Renvoize)

India. Shrubby, 3 stamens, ovary glabrous, 2 plumose stigmas, found in warm temperate to subtropical zone, on dry hills, rocky slopes, ridges, near the streams, see *Annals of the Royal Botanic Garden. Calcutta*. 7: 7, t. 5. 1896 and *Journal of the Arnold Arboretum* 6: 151. 1925, *Fl. Ind. Enumerat.-Monocot*. 277. 1989, *Kew Bulletin* 44(2): 359. 1989.

S. rolloana (Gamble) Chao & Renvoize (*Arundinaria rolloana* Gamble; *Yushania rolloana* (Gamble) T.P. Yi) (named for James Rollo)

India, Naga Hills. Rare, shrubby, stoloniferous, culms spaced, flattened on one side, thin-walled, nodes somewhat swollen with 1-3 branchlets, creeping rhizome with imbricate scale, very broad leaves, culms used for making whistles, see *Annals of the Royal Botanic Garden. Calcutta*. 7: 24, t. 23. 1896 and *Journal of Bamboo Research* 2(1): 39. 1983, *Kew Bull.* 44(2): 355. 1989.

in India: jipvo

Majumdar & Karth.)

South India, Sri Lanka. Erect, slender, gregarious, internodes very rough and flattened on one side, nodes swollen, shortly rhizomatous, 2 glumes, lemmas mucronate, paleas ciliate on the keels, 3 lodicules unequal, 3 stamens, ovary glabrous, 2-3 plumose stigmas, used for making baskets and fencing, flowering annually, in moist areas, fertile loam, on slopes, high hills, as an undergrowth, see *Linnaea* 9(4): 482. 1834, *Synopsis Plantarum Glumacearum* 1: 335. 1854, *Annals of the Royal Botanic Garden. Calcutta*. 7: 5. 1896 and *Journal of the Arnold Arboretum* 6: 149. 1925, *Fl. Ind. Enumerat.-Monocot*. 283. 1989, *Kew Bulletin* 44(2): 356. 1989.

in English: Nilgiri bamboo

in India: chewari

Sinoarundinaria Ohwi = *Phyllostachys* Sieb. & Zucc.

From the Greek *sinai* "the Chinese" and the genus *Arundinaria* Michx.

Bambusoideae, Bambuseae, Shibataeinae, type *Phyllostachys bambusoides* Siebold & Zucc., see *Abhandlungen der Mathematisch-Physikalischen Classe der Königlich Bayerischen Akademie der Wissenschaften* 3(3): 746, pl. 5, f. 3. 1843 and Kanjiro Mayebar, *Florula austro-higoensis sive enumeratio plantarum in provincia Higo australe sponte nascentium ...* Japan 1931, *Contributions from the United States National Herbarium* 39: 100-104, 113. 2000.

Sinobambusa Makino ex Nakai = *Menstrucalamus* T.P. Yi, *Neobambos* Keng f., *Neobambus* Keng f., *Neobambus* Keng ex Keng f., *Sinobambusa* Nakai, *Sinobambusa* Makino

A Chinese bamboo, from the Greek *sinai* "the Chinese" and *Bambusa*.

About 16-24 species, eastern Asia, China and Vietnam, Japan. Bambusoideae, Bambusodae, Bambuseae, Shibataeinae, perennial, monopodial branching or amphipodial, shrub or small tree, woody, unarmed, persistent, long internode, 3-5 spreading branches at each node, rhizomatous, culm sheath thin, sheath deciduous, leaves lanceolate and hairy, plants bisexual, inflorescence with slender pseudospikelets, glumes very unequal, palea present, 3 free and membranous lodicules, 2-4 stamens, ovary glabrous without the apical appendage, 2-3 feathery stigmas, in forests, similar to *Indosasa* McClure, type *Sinobambusa tootsik* (Makino) Makino, see *Journal of the Arnold Arboretum* 6(3): 150, 152. 1925, *Technical Bulletin of the National Forestry Research Bureau* (China) 8: 15. 1948, *Taxon* 6(7): 209. 1957, *Journal of Bamboo Res.* 1: 140-164. 1982, *Journal of Bamboo Research* 2(1): 57. 1983, *Kew Bulletin* 44(2): 349-367. 1989, *Acta Phytotaxonomica Sinica* 29(5): 452-455. 1991, *Journal of Bamboo Research* 11(1): 38, 40. 1992, *Acta Phytotaxonomica Sinica* 37(6): 541-544. 1999.

Species

S. acutiligulata W.T. Lin

China. See *Journal of Bamboo Research* 12(2): 39, f. 4. 1993.

S. anaurita Wen

China. See *Journal of Bamboo Res.* 2(1): 62-63, f. 15. 1983.

S. baccanensis T.Q. Nguyen

Vietnam, Bac thai. Montane, forest, see *Bot. Zhurn. (Moscow & Leningrad)* 76(6): 879. 1991.

S. dushanensis (C.D. Chu & J.Q. Zhang) Wen (*Arundinaria dushanensis* C.D. Chu & J.Q. Zhang)

China, Guizhou. Sheath deciduous and coriaceous, sheath blade lanceolate, sheath auricle densely hairy to ciliate, sheath ligule arcuate or truncate, leaves long lanceolate, see *Journal of Bamboo Res.* 1(1): 1, f. 1. 1982 [or *Bamboo Research in Asia* 1982(1): 1, t. 1. 1982], *Journal of Bamboo Res.* 6(3): 33. 1987.

S. exaurita W.T. Lin

China. See *Acta Phytotaxonomica Sinica* 26(3): 228-229, pl. 7. 1988.

S. farinosa (McClure) T.H. Wen (*Semiarundinaria farinosa* McClure; *Sinobambusa farinosa* (McClure) Wen ex Wen)

China, Guangdong, Jiangxi. Young culm densely pruinose, 3 branches at each node, sheath caducous densely pruinose, sheath auricle sickle-shaped, sheath ligule finely ciliate, 3-6 leaves per twig, leaves lanceolate, hardy, montane, see *Lingnan Univ. Sci. Bull.* no. 9: 45. 1940, *Journal of Bamboo Res.* 1(1): 35, 153. 1982.

S. fimbriata Wen (*Phyllostachys aurita* J.L. Lu)

China. See *J. Henan Agr.* 1981(2): 70, f. 1. 1981, *Journal of Bamboo Res.* 7(1): 25-27, f. 2. 1988.

S. henryi (McClure) C.D. Chu & C.S. Chao (*Semiarundinaria henryi* McClure)

China, Guangdong, Guangxi. Young culm minutely hairy, densely pruinose below joint, sheath coriaceous and caducous, sheath blade erect and lanceolate, sheath auricles scabrous, sheath ligule very short, usually and normally 3-5 leaves on each twig, leaf blades lanceolate or long lanceolate, leaves finely densely pubescent beneath, see *Lingnan Univ. Sci. Bull.* no. 9: 48. 1940, *Acta Phytotax. Sin.* 18(1): 32. 1980.

S. humilis McClure (*Indocalamus humilis* (McClure) Wen; *Sinobambusa humila* McClure)

China. Clump forming, see *Lingnan Univ. Sci. Bull.* no. 9: 59. 1940, *Journal of Bamboo Res.* 1(1): 35. 1982, *Journal of Nanjing University, Natural Sciences* vol. 26(2): 282-290. 1987.

S. incana Wen

China, Guangdong. Erect, arched, curved, yellowish greenish, sheath blade erect and smooth, sheath auricles weak with dark tomentum, sheath ligule shortly ciliate, 2-4 leaves on each twig, leaves glabrous, leaf blades lanceolate or narrow lanceolate, see *Journal of Bamboo Res.* 1(2): 13, 143, 147, f. 4. 1982.

S. intermedia McClure (*Arundinaria longifimbriata* (S.Y. Chen) Wen; *Arundinaria nanningensis* Q.H. Dai; *Pleioblastus longifimbriatus* S.Y. Chen)

China, Guangdong, Guangxi, Sichuan. Young culm white pubescent, pruinose ring below joint, sheath blade narrow lanceolate and erect, sheath auricles falciform and ciliate, sheath ligule ciliate, 2-4 leaves on each twig, leaves ovate-lanceolate, hardy, see *Lingnan Univ. Sci. Bull.* no. 9: 61. 1940, *Journal of Bamboo Res.* 1(2): 149, f. 5. 1982, *Acta Phytotax. Sin.* 21(4): 411, f. 7. 1983, *Journal of Bamboo Res.* 6(3): 34. 1987.

S. nandanensis Wen

China. See *Journal of Bamboo Res.* 6(3): 29, f. 1. 1987.

S. nephroaurita C.D. Chu & C.S. Chao

China, Guangdong, Guangxi, Sichuan. Young culm slightly pruinose, 3 or more branches at each node, sheath caducous and coriaceous, sheath blade triangular or narrow lanceolate, sheath auricles kidney- or sickle-shaped, sheath ligule pubescent or glabrous, 4-5 leaves at each twig, both surfaces of the leaves glabrous, leaf blades broadly lanceolate or narrowly lanceolate, see *Acta Phytotaxonomica Sinica* 18(1): 32-33, pl. 6. 1980.

S. parvifolia Wen & S.Y. Chen (*Arundinaria sulcata* (Z.P. Wang & G.H. Ye) C.S. Chao & G.Y. Yang; *Oligostachyum sulcatum* Z.P. Wang & G.H. Ye)

China. See *Journal Nanjing University. Natural Sciences Edition* 1982(1): 95, 96, f. 1. 1982, *Journal of Bamboo Res.* 6(3): 31, f. 2. 1987, *Journal of Zhejiang Forestry College*

8(1): 127-130. 1991, *Acta Phytotaxonomica Sinica* 29(5): 452-455. 1991, *Journal of Bamboo Research* 13(1): 10. 1994, *Acta Phytotaxonomica Sinica* 37(6): 541-544. 1999.

S. rubroligula McClure (*Sinobambusa rubroligulata* McClure)

China, Guangdong. Solid, tough, grayish green to glaucous, branching at the lower portion of the culm, pruinose ring below the joint, nodes swollen, culm sheath auricles absent, sheath ligule hairy and purple, 5-7 leaves on each twig, leaf blades lanceolate or elliptic-lanceolate, see *Lingnan Univ. Sci. Bull.* no. 9: 65. 1940, *Journal of Bamboo Res.* 1(2): 154, f. 8. 1982.

S. sat (Balansa) C.S. Chao & Renvoize (*Arundinaria sat* Balansa; *Arundinaria sat* var. *laxa* Camus; *Indosasa sat* (Balansa) Nguyen; *Semiarundinaria sat* (Balansa) Nakai; *Sinobambusa sat* (Bal.) T.Q. Nguyen)

Vietnam. Mountains, see *J. Bot. Paris* 4: 28. 1890 and *Bamb.* 46. 1913, *Journal Arnold Arboretum* 6: 151. 1925, *Kew Bulletin* 44(2): 366. 1989, *Bot. Zhurn.* 75(2): 225. 1990, *Bot. Zhurn. (Moscow & Leningrad)* 76(6): 879. 1991.

S. scabrada T.H. Wen

China, Guangxi. Young culm pruinose, sheath coriaceous and triangular, sheath auricles oblong and hairy to ciliate, sheath ligule shortly ciliate, 3-4 leaves on each twig, leaf blades lanceolate to narrow lanceolate, leaves glabrous both sides, see *Journal of Bamboo Res.* 2(1): 61, f. 13. 1983.

S. seminuda Wen

China, Yunnan, Fujian. Erect, curved, more or less flat to cylindrical, 3 branches at each node, young culm pruinose below joint, sheath blade narrow triangular, sheath auricles purplish and falciform, sheath ligule ciliate, 5-6 leaves at each twig, leaves lanceolate to broadly lanceolate, used for weaving, see *Journal of Bamboo Res.* 1(2): 18, 144, 152, f. 7. 1982.

S. solearis (McClure) Nguyen (*Indosasa solearis* McClure)

Vietnam. Mountains, forming thickets, see *Journal Arnold Arboretum* 23(1): 94-95. 1942, *Bot. Zhurn. (Moscow & Leningrad)* 76(6): 879. 1991.

S. striata Wen

China, Jiangxi. Young culm pruinose below joint, sheath coriaceous and triangular, sheath auricles elliptic and ciliate, 2 leaves on each twig, leaves lanceolate and sparsely hairy beneath, used for weaving, timber bamboo, see *Journal of Bamboo Res.* 2(1): 63, f. 16. 1983.

S. sulcata W.T. Lin & Z.M. Wu

China. See *Journal of Bamboo Res.* 11(1): 33, f. 5. 1992.

S. tootsik (Makino) Makino (*Arundinaria dolichantha* Keng; *Arundinaria tootsik* Sieb. ex Makino; *Arundinaria tootsik* (Sieb.) Makino; *Bambos tootsik* Siebold; *Bambusa tootsik* Zoll.; *Neobambus dolichanthus* (Keng) Keng ex P.C. Keng; *Pleioblastus dolichanthus* (Keng) P.C. Keng;

Semiarundinaria tootsik (Sieb. ex Makino) Muroi; *Semiarundinaria tootsik* (Sieb.) Muroi; *Sinobambusa tootsik* Makino; *Sinobambusa tootsik* (Siebold ex Makino) Makino ex Nakai; *Sinobambusa tootsik* (Siebold ex Makino) Makino; *Sinobambusa tootsik* (Siebold) Makino) (the species named from *too* or *tô* "China, Chinese" and *tsik* or *chiku* meaning bamboo)

China, Guangdong, Sichuan, Fujian. Cylindrical culms, young culm dark green and pruinose, usually 3 branches per node, nodes strongly prominent and densely pilose, a pruinose ring below joint, internodes elongated, sheath caducous, coriaceous culm sheaths broadly lanceolate, sheath auricles ovate to falciform and ciliate, sheath ligule arched, leaf blades lanceolate and broadly cuneate at the base, 3-9 leaves terminal toward the top of branches, spikelets thin and very long, many florets, 1 glume ovate and acuminate, lemmas ovate, palea present, 3 ovate lodicules, 3 stamens exerted, ovary cylindrical, 3 feathery stigmas, ornamental, cultivated, hedge plant, flowers gregariously, see P.F. [Balthasar] von Siebold (1796-1866), *Verhandelingen van het Bataviaasch Genootschap van Kunsten en Wetenschappen* 12: 5. 1830 [orig. publ.: *Synopsis Plantarum Oeconomicarum Universi Regni Japonici ... Batavia*], *Syst. Verz. Ind. Archip.* 1. 1854 and *Botanical Magazine* (Tokyo) 14: 62. 1900, *Bot. Magaz. Tokyo* 19: 63. 1905, *J. Jap. Bot.* 2: 8. 1918, *Journal Arnold Arboretum* 6: 152. 1925, *Sinensia* 7: 418. 1936, *Amatores Herbarii* 10: 210. 1942, *Techn. Bull. Nation. For. Res. Bur. China* no. 8: 15. 1948, *Claves Gen. Spec. Gramin. Sinic.* 154. 1957, *Journal of Bamboo Res.* 1(2): 145, f. 3. 1982, *Journal of Japanese Botany* 70(4): 238. 1995.

in English: China bamboo, Chinese temple bamboo

in Japan: *tô-chiku*, *tou-chiku*, *Suzuko-narihira*, *suzukonarihira* (with numerous yellowish white stripes on the leaves), *shima-daimyo*, *shima-daimyou*, *shima-tochiku*, *shima-touchiku*

in Okinawa: *kanso-daki*

S. tootsik (Makino) Makino var. ***dentata*** Wen

China, Fujian. Sheath ligule serrate or dentate, leaves back glabrous, see *Journal of Bamboo Res.* 1(2): 13, 143, 147. 1982.

S. tootsik (Makino) Makino var. ***laeta*** (McClure) Wen (*Semiarundinaria tootsik* var. *laeta* (McClure) Wen; *Sinobambusa laeta* McClure)

China. Culm sheaths ligule truncate, see *Lingnan Univ. Sci. Bull.* no. 9: 63. 1940, *Journal of Bamboo Res.* 1(2): 13, 143, 147. 1982.

S. tootsik (Makino) Makino var. ***maeshimana*** Muroi (*Semiarundinaria tenuifolia* Koidzumi; *Sinobambusa tootsik* f. *maeshimana* (Muroi) Hatusima; *Sinobambusa tootsik* var. *maeshimana* Muroi ex Sugimoto; *Sinobambusa tootsik* var.

maesimae Muroi; *Sinobambusa tootsik* var. *tenuifolia* (Koidzumi) S. Suzuki)

China. See *Acta Phytotax. Geobot.* 11: 314. 1942, *New Keys of Japanese Trees*, revised edition. 475. Osaka 1961, *Guide Book Fuji Bamb. Gard.* 53. 1963, *Woody Pl. Jap.* 712. 1976, *Index Jap. Bamb.* 96, 339. 1978.

in Japan: hosobo-narihira-dake

S. tootsik (Makino) Makino var. *tenuifolia* (Koidzumi) S. Suzuki (*Semiarundinaria tenuifolia* Koidzumi; *Sinobambusa tootsik* var. *maeshimana* Muroi; *Sinobambusa tootsik* var. *maeshimana* Muroi ex Sugimoto)

China, Guangxi, Wuzhou. Leaves surfaces glabrous, apex of sheath ligule entire, see *Acta Phytotaxonomica et Geobotanica* 11(4): 314. 1942, *New Keys Japan. Trees* 475. 1961, *Guide Book Fuji Bamb. Gard.* 53. 1963, *Woody Pl. Jap.* 712. 1976, *Index Jap. Bamb.* 96, 339. 1978.

S. urens Wen

China, Fujian. Pruinose, initially hirsute, 3 branches at each node, sheath coriaceous, sheath auricles oblong to sickle-shaped, sheath ligule margin ciliate, 4-5 leaves at each twig, leaves lanceolate to broadly lanceolate, see *Journal of Bamboo Res.* 2(1): 59, f. 12. 1983.

S. yixingensis C.S. Chao & K.S. Xiao

China. Young culm tomentose, 3 branches at each node, small sheath blade lanceolate, leaves oblong-lanceolate shortly pubescent beneath, cultivated, see *J. Nanjing Inst. For.* no. 26: 20, f. 3. 1985 [also *Journal of Nanjing Agricultural College* 1985(4): 20. 1985].

Sinocalamus McClure = *Dendrocalamopsis*

(L.C. Chia & H.L. Fung) Keng f.,

Dendrocalamus Nees

Greek *sinai* “the Chinese” and *kalamos* “reed.”

Bambusoideae, Bambuseae, Bambusinae, type *Sinocalamus latiflorus* (Munro) McClure, this genus often in *Dendrocalamus*, see *Linnaea* 9(4): 476-477. 1835 and *Indian Forester* 58: 7. 1932, *Lingnan University Science Bulletin* 9: 66-67. 1940, *Acta Phytotaxonomica Sinica* 18(2): 211-216. 1980, *Journal of Bamboo Research* 2: 11-12, 148. 1983, *Kew Bulletin, Additional Series* 13: 54. 1986, [*Genera Graminum*], *Journal of Bamboo Research* 7(4): 9, 13. 1988, *Journal of South China Agricultural University* 10(2): 43, 45-46. 1989, *Bamboo Research in Asia* 1990(1): 3, 5. 1990, Z.-L. Li, The *Flora of China* Bambusoideae project, problems and current understanding of bamboo taxonomy in China. *The Bamboos* 5: 61-81. 1997, *Contributions from the United States National Herbarium* 39: 54-55, 113. 2000.

Sinochasea Keng = *Pseudodanthonia* Bor & C.E. Hubb.

Greek *sinai* “the Chinese” and *Chasea* Nieuwl., dedicated to the American botanist Mary Agnes Chase (née Merrill), 1869-1963, agrostologist, plant collector, traveler.

Monotypic, China, Qinghai, Xixang. Pooideae, Poodae, Aveneae, perennial, herbaceous, caespitose, auricles absent, sheaths glabrous, leaves not pseudopetiolate, ligule an unfringed membrane, plants bisexual, contracted inflorescence paniculate, spikelets pedicellate and disarticulating above the glumes, 2 glumes subequal, palea present, 2 free and membranous lodicules, 3 stamens, ovary glabrous, 3 stigmas, type *Sinochasea trigyna* Keng, see *Claves Gen. Sp. Gram. Prim. Sinic.* 204. 1957, *Kew Bulletin* 12: 425. 1958, Yi Li Keng (1897-1975), *Journal of the Washington Academy of Sciences* 48(4): 115-118, f. 1. 1958.

Species

S. trigyna Keng (*Pseudodanthonia trigyna* (Keng) Clayton)

China. See *Claves Generum et Specierum Graminearum Primarum Sinicarum Appendice Nomenclatione Systematica* 204. 1957, *Journal of the Washington Academy of Sciences* 48(4): 115-117, f. 1. 1958, *Kew Bulletin* 40(4): 729. 1985.

Sirochloa S. Dransfield = *Nastus* Juss.

One species, Madagascar. Bambusoideae, Bambuseae, Nastineae, clambering, scrambling, woody bamboos, determinate inflorescences, 1 floret in the spikelet, type *Sirochloa parvifolia* (Munro) S. Dransf., see *Genera Plantarum* 34. 1789, *Systema Naturae ... editio decima tertia, aucta, reformata* 2: 580. 1791 and *Kew Bulletin* 57(4): 963-970. 2002.

Species

S. parvifolia (Munro) S. Dransf. (*Schizostachyum bosseri* A. Camus; *Schizostachyum parvifolium* Munro)

Madagascar. See *Flora Brasiliensis seu Enumeratio Plantarum* 2: 535. 1829, *Transactions of the Linnean Society of London* 26(1): 136. 1868 and *Bulletin de la Société Botanique de France* 104: 281. 1957.

Sitanion Raf. = *Elymus* L.

Greek *sitos* “grain,” *setaneios*, *setanios*, *satanios* “of this year, spring-wheat,” *sitanias pyros* “a branching cereal” (Theophrastus, *HP.* 8.2.3), Latin *sitanium*, *a*, *um* “of this year, of summer wheat.”

About 0-7 species, Northern America. Pooideae, Triticoideae, Triticeae, or Pooideae, Triticeae, Hordeinae, perennial, very variable and intergrading, tufted, herbaceous, erect, spreading, hollow internodes, auricles present, ligule an unfringed

membrane, plants bisexual, inflorescence spicate short-exserted or partly included, raceme linear to oblong, bristly spikelets in groups of 2-3, central spikelet fertile and the laterals sterile, upper floret reduced, 2 glumes very narrow more or less equal, acicular glumes and bractiform involucres, awned lemmas, spikelets falling with the glumes, palea present, 2 free and membranous lodicules, 3 stamens, ovary hairy, 2 stigmas, dry hills, plains, open woods and rocky slopes, often included in *Elymus*, type *Sitanion elymoides* Raf., hybrids with *Agropyron*, *Elymus*, *Hordeum* and *Lophopyrum*, see *Species Plantarum* 1: 83-84. 1753, C.S. Rafinesque, *Journal de Physique, de Chimie, d'Histoire Naturelle et des Arts* 89: 103. 1819, *Annals of Natural History* 1: 284. 1838, *Genera Plantarum* 3(2): 1207. 1883, *Bulletin, Division of Agrostology United States Department of Agriculture* 18: 10, 12-13, 15, 17, 19-20, t. 3. 1899 and E.D. Merrill, *Index rafinesquianus* 76. 1949, *Canad. J. Bot.* 42: 554. 1964, D.R. Dewey, "A worldwide survey of the genus *Elymus*—its phylogeny, taxonomy, and breeding potential." *Proc. Western Grass Breeders Conf.* 22: 13-20. 1973 (Conference Proceedings), D.R. Dewey, "Cytogenetics of *Agropyron ferganense* and its hybrids with 6 species of *Agropyron*, *Elymus*, and *Sitanion*." *American Journal of Botany* 68(2): 216-225. 1981, D.R. Dewey, "Historical and current taxonomic perspectives of *Agropyron*, *Elymus* and related genera." *Crop Sci.* (Madison) 23: 639. 1983, M.E. Barkworth and D.R. Dewey, "Genomically based genera in the perennial Triticeae of North America: identification and membership." *American Journal of Botany* 72(5): 767-776. 1985, *Genera Graminum* 152. 1986, *Taxon* 41: 562-563. 1992, *Taxon* 44: 611-612. 1995, David S. Dobkin, Adam C. Rich and William H. Pyle, "Habitat and Avifaunal Recovery from Livestock Grazing in a Riparian Meadow System of the Northwestern Great Basin." *Conservation Biology* 12(1): 209-221. Feb 1998, *Restoration Ecology* 7(2): 172-182. June 1999, Jason P. Kaye, Stephen C. Hart, Richard C. Cobb and Joseph E. Stone, "Water and Nutrient Outflow Following the Ecological Restoration of a Ponderosa Pine-Bunchgrass Ecosystem." *Restoration Ecology* 7(3): 252-261. Sep 1999, *Restoration Ecology* 9(4): 421-431. Dec 2001, *Contributions from the United States National Herbarium* 48: 279-307, 612-614. 2003, *Journal of Ecology* 91(1): 36-48. Feb 2003, Steven R. Larson, Thomas A. Jones and Kevin B. Jensen, "Population structure in *Pseudoroegneria spicata* (Poaceae: Triticeae) modeled by Bayesian clustering of AFLP genotypes." *Am. J. Bot.* 91: 1789-1801. 2004.

Species

S. brevifolium J.G. Sm.

North America. Perennial, see *Bulletin, Division of Agrostology United States Department of Agriculture* 18: 17, t. 3. 1899.

S. californicum J.G. Sm.

North America. See *Bulletin, Division of Agrostology United States Department of Agriculture* 18: 13. 1899.

S. elymoides Raf. (*Elymus elymoides* (Raf.) Swezey)

North America. See *Journal de Physique, de Chimie, d'Histoire Naturelle et des Arts* 89: 103. 1819, *Doane College Natural History Studies* 1: 155. 1891.

S. hystrix (Nutt.) J.G. Smith (*Aegilops hystrix* Nutt.; *Elymus elymoides* subsp. *elymoides* (Raf.) Swezey)

U.S. Perennial, erect, spreading, ligule membranous, spike cylindrical, 2 spikelets at each node of the articulate rachis, 2- to 6-floreted, cultivated, good forage, medicinal, culinary uses, see *The Genera of North American Plants* 1: 86. 1818, *Bulletin, Division of Agrostology United States Department of Agriculture* 18: 15, t. 2. 1899 and *Bull. Torrey Bot. Club* 89: 217-228. 1962, *Bull. Torrey Bot. Club* 91: 396-405. 1965, *Bot. Gaz.* 128: 11-16. 1967, *Bull. Torrey Bot. Club* 94: 395-404. 1967, *Bot. Gaz.* 129: 309-315, 316-322. 1968, *Am. J. Bot.* 56: 664-670. 1969, *Bot. Gaz.* 130: 203-213. 1969, *Bot. Gaz.* 131: 210-216. 1970, *Am. J. Bot.* 58: 902-908. 1971, *Am. J. Bot.* 68: 216-225. 1981.

in English: squirrel tail

in French: queue d'écureuil

in Mexico: triguillo, triguillo desértico

S. hystrix (Nutt.) J.G. Smith var. *brevifolium* (J.G. Sm.) C.L. Hitchc. (*Elymus elymoides* (Raf.) Swezey subsp. *brevifolius* (J.G. Sm.) Barkworth)

U.S. Perennial, tufted, erect to spreading, see *Vascular Plants of the Pacific Northwest* 1: 701. 1969.

in English: bottlebrush squirreltail

S. jubatum J.G. Sm.

North America. See *Bulletin, Division of Agrostology United States Department of Agriculture* 18: 10. 1899.

S. longifolium J.G. Sm. (*Elymus longifolius* (J.G. Sm.) Gould)

North America. Forage, see *Bulletin, Division of Agrostology United States Department of Agriculture* 18: 18. 1899 and *Brittonia* 26(1): 60. 1974.

in Mexico: cola de ardilla

S. multisetum J.G. Sm. (*Elymus multisetus* (J.G. Sm.) Burtt Davy; *Elymus multisetus* M.E. Jones, nom. illeg., non *Elymus multisetus* (J.G. Sm.) Burtt Davy)

North America. See *Bulletin, Division of Agrostology United States Department of Agriculture* 18: 11. 1899 and *University of California Publications in Botany* 1: 57. 1902, *Contributions to Western Botany* 14: 20. 1912, *Hereditas; genetiskt arkiv.* 114: 35-39. 1991.

Sitopsis (Jaub. & Spach) Á. Löve =
Aegilops L.

From the Greek *sitos* “grain” and *opsis* “like, resemblance.”

Pooideae, Triticeae, Triticinae, see *Species Plantarum* 1: 85. 1753, *Species Plantarum* 2: 1050-1051. 1753, *Flora Aegyptiaco-Arabica* 26. 1775, *Flora* 39: 109. 1837, *Illustrationes Plantarum Orientalium* 4: 21. 1851, *Flore de France* 3: 601. 1856 and *A Manual Flora of Egypt* by Dr. Reno Muschler ... 1: 156. 1912, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 10: 489. 1928, *Israel Journal of Botany* 26(4): 191. 1978, *Feddes Repert.* 91: 225-228. 1980, *Biologisches Zentralblatt* 101(2): 206. 1982, *Feddes Repertorium* 95(7-8): 491-492. 1984, *Taxon* 41: 555-556. 1992, *Taxon* 44: 611-612. 1995, *Contributions from the United States National Herbarium* 48: 20-23, 614. 2003.

x Sitordeum Bowden

Hordeum x *Sitanion*, see *Canadian Journal of Botany* 45: 722. 1967, *Genera Graminum* 375. 1986.

Sitospelos Adans. = Elymus L.

Greek *sitos* “grain” and *pelos* “black.”

Pooideae, Triticeae, Hordeinae, see *Species Plantarum* 1: 83. 1753, *Familles des Plantes* 2: 36, 606. 1763 and *Canad. J. Bot.* 42: 554. 1964, *Taxon* 41: 562-563. 1992, *Taxon* 44: 611-612. 1995, *Contributions from the United States National Herbarium* 48: 279-307, 614. 2003.

Smidetia Raf. = Coleanthus J. Seidel

For the German botanist Franz Wilibald Schmidt (born in Bohemia), 1764-1796, professor of botany, physician; see J.H. Barnhart, *Biographical notes upon botanists*. 3: 231. 1965; Jonas C. Dryander, *Catalogus bibliothecae historico-naturalis Josephi Banks*. London 1800; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993.

Pooideae, Poeae, Agrostidinae, see C.S. Rafinesque, *Autikon botanikon*. Icones plantarum select. nov. vel rariorum, etc. 187. Philadelphia 1840 and E.D. Merrill, *Index rafinesquianus* 76. 1949, *Contributions from the United States National Herbarium* 48: 237, 614. 2003.

Snowdenia C.E. Hubbard = Beckera
Fresen., *Paratheria* Griseb.

After the British (b. Silverdale, Staffs) botanist Joseph Davenport Snowden, 1886-1973, Kew gardener, economic botanist, traveler and plant collector (Uganda), wrote *The Cultivated Races of Sorghum*. London 1936; see T.W. Bosser, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 375. 1972; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. University of Pennsylvania Press, Philadelphia 1964; Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 641-642. London 1994; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993.

About 4 species, northeast tropical Africa, Ethiopia, Yemen and Sudan. Panicoideae, Panicodae, Paniceae, Arthropogoneae, annual or perennial, herbaceous, auricles absent, leaf sheaths loose and scabrid or smooth, ligule membranous, leaves flat, plants bisexual, inflorescence cylindrical raceme-like on slender peduncles in the axils of the upper leaves, spikelets pedicellate lanceolate 2-flowered, involucre bristle suppressed, 2 glumes very short reduced to small scales, lower lemma 5- to 7-nerved and usually awned, upper lemma 3-nerved membranous, palea present, 2 free and fleshy lodicules, 3 stamens, ovary glabrous, 2 stigmas, native pasture species, in forest margins, field borders, areas of high rainfall, rocky slopes, partial shade, roadsides, ditches, waste grounds, similar to a subset of *Pennisetum*, type *Snowdenia microcarpha* C.E. Hubb., see *Museum Senckenbergianum* 2: 132. 1837, *Flora* 38: 199. 1855, *Catalogus plantarum cubensium* ...236. 1866 and *Bulletin of Miscellaneous Information Kew* 1929(1): 30-31. 1929, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 14: 103. 1938, *Flora of Tropical East Africa* 451-898. 1982, *Flora of Ethiopia and Eritrea* 7: 257-258. 1995.

Species

S. microcarpha C.E. Hubb.

Uganda. See *Bull. Misc. Inform. Kew* 1929(1): 31. 1929.

S. mutica (Hochst.) Pilg. (*Beckera gracilis* Hochst.; *Beckera mutica* Hochst.)

Ethiopia. Perennial, slender, smooth, rambling, branching, rooting at the lower nodes, knotty rootstock with basal buds, leaf blades linear finely acuminate, leaf sheaths smooth, ligule glabrous, loose and slender racemes, 1-2 peduncles per leaf axil, spikelets narrowly lanceolate often awnless, glumes rounded or lobed, lower lemma acuminate, upper lemma acute shortly mucronate, damp shady places, very close to *Snowdenia petitiana*, see *Flora* 27: 514. 1844, *Flora* 38: 199. 1855.

S. petitiانا (A. Rich.) C.E. Hubbard (*Beckera petitiانا* A. Rich.; *Beckera scabra* Pilg.; *Snowdenia scabra* (Pilg.) Pilg.) East Africa, Arabia, Yemen. Annual, weak, wiry, delicate, slender, rambling, straggling, scandent, ascending, rooting at the lower nodes, leaf blades narrowly lanceolate, leaf sheaths slightly scabrous, 1-4 peduncles per leaf axil, spikelets acuminate lanceolate, glumes truncate to ovate, lower lemma acuminate and shortly awned, upper lemma acute and shortly mucronate, in light shade, damp places, see *Tentamen Florae Abyssinicae* ... 2: 358. 1850 and *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 11: 653. 1932, *Hooker's Icones Plantarum* 37: t. 3647. 1967.

S. polystachya (Fresen.) Pilg. (*Beckera polystachya* Fresen.; *Beckera polystachya* var. *schimper* (Hochst.) Dur. & Schinz.; *Beckera schimper* Hochst.; *Beckera valida* Gay ex Fresen.)

Ethiopia, Arabia. Annual, densely to loosely tufted, decumbent and erect, slender to robust, much-branched, rooting at the lower nodes, leaf blades broadly linear, 1-6 peduncles per leaf axil, spikelets truncate to acute, glumes truncate, lower lemma shortly awned, upper lemma obtuse, famine food, fodder grass, weed, along roadsides, fallow land, gardens, light shade, see *Flora* 27: 513. 1844, *Botanische Zeitung. Berlin* 2: 354. 1844, *Conspectus Florae Africae* 5: 736. 1894.

in Ethiopia: muja

Soderstromia C. Morton = *Bouteloua* Lag., *Fourniera* Scribn., *Fourniera* J. Bommer ex E. Fourn. (Cyattheaceae)

Named for the American botanist Thomas Robert Soderstrom, 1936-1987, agrostologist, traveler, explorer and bamboo expert, New York Botanical Garden Exploration of the Wilhelmina Gebergte, Suriname, editor of *Grass Systematics and Evolution*. Proceedings of the International Symposium on Grass Systematics and Evolution, Washington, D.C., 27-31 July 1986. Smithsonian Institution Press, Washington, D.C. 1987; see *Phytologia* 24: 210, 445. 1972, *Atlas Soc. Biol. Rio Janeiro* 17: 63-67. 1974, *Bull. Torrey Bot. Club* 106: 309. 1979, *Ann. Missouri Bot. Gard.* 68: 3015-47 1981, *Brittonia* 37: 4, 15. 1985, *J. Bromel. Soc.* 37: 79-81. 1987, *Revista Brasil. Biol.* 48: 956. 1988, *Smithsonian Contributions to Botany* 72: 1-75. 1988, *Bull. Natl. Sci. Mus.* sér. B. 27(1): 4. 2001.

One species, Mexico, Mesoamerica. Chloridoideae, Cynodonteae, Boutelouinae, annual or perennial, herbaceous, branched, slender, stoloniferous, auricles absent, ligule a densely fringed membrane, plants monoecious or dioecious, all the fertile spikelets unisexual, inflorescence a false spike, clustered spikelets, male flowers 3-staminate, male spikelets with 2 fertile florets, glume-like basal bracts, palea 2-nerved

2-keeled, 2 free and membranous lodicules, no stamens, open areas, gravelly soil, grasslands, type *Fourniera mexicana* Scribn., see *Varietades de Ciencias, Literatura y Artes* 2(4,21): 134, 141. 1805, *Gen. Sp. Nov.* 5. 1816, *Annales des Sciences Naturelles; Botanique, sér.* 5, 18: 347. 1873, *Bulletin, Division of Agrostology United States Department of Agriculture* 4: 7-9. 1897 and *Leaflets of Western Botany* 10(16): 327. 1966, *Genera Graminum* 251. 1986, *Cuscutania* 1(6): 1-29. 1991, *Flora Mesoamericana* 6: 297. 1994, *Contributions from the United States National Herbarium* 41: 20-33, 121, 195. 2001.

Species

S. mexicana (Scribn.) C.V. Morton (*Bouteloua mexicana* (Scribn.) Columbus; *Fourniera mexicana* Scribn.)

Mexico, Honduras. Annual or perennial, spikelets axes reduced, glumes absent, growing in loose gravelly soil, see *Aliso* 18(1): 63. 1999.

Soejatmia K.M. Wong

Dedicated to the plant taxonomist Soejatmi Dransfield, tropical bamboo specialist, author of *The Bamboos of Sabah*. Sabah Forest Records, no. 14. Forestry Department, Sabah, Malaysia 1992.

Monotypic genus, Peninsular Malaysia, tropical Asia. Bambusinae, wrinkled thickened culm-sheath base, wild, lowland, hill, forest, type *Soejatmia ridleyi* (Gamble) K.M. Wong, see *Kew Bulletin* 48(3): 517-532. 1993, *Plant Resources of South-East Asia* (PROSEA) (PI Res SEAs) 7: 17, 18, 34. 1995.

Species

S. ridleyi (Gamble) K.M. Wong (*Bambusa ridleyi* Gamble) (for the British botanist Henry Nicholas Ridley, 1855-1956 (Kew, Surrey), plant collector, botanical explorer, traveler, author of *The Flora of the Malay Peninsula*. London 1922-1925; see J.H. Barnhart, *Biographical notes upon botanists*. 3: 155. 1965; E.D. Merrill, *An Enumeration of Philippine Flowering Plants*. 4: 221-222. Manila 1925-1926)

Peninsular Malaysia. Slender, erect to suberect, vigorous, narrow and long culms, drooping, clambering, culms entangled, wrinkled and thickened culm internode bases, inflorescence of pseudospikelets, each pseudospikelet rachilla with rather long internodes, nodes from the pseudospikelet base upward are 3-4 empty bracts, 1-2 vestigial terminal flowers, bifid palea, 3 lodicules, 6 stamens, ovary apex shortly hairy, 3 stigmas, found in lowland forest, see *Genera Plantarum* 1: 236. 1789, *Annals of the Royal Botanic Garden. Calcutta*. 7: 34, t. 32. 1896, *Fl. Brit. Ind.* 7: 388. 1896 and *Kew Bulletin* 48(3): 532, f. 7. 1993.

in Malay: buluh akar

Sohnsia Airy Shaw = *Calamochloa* E. Fourn., *Calamochloe* Rchb., *Eufournia* Reeder

Named for the American botanist Ernest Reeves Sohns, 1917-2001, botanical collector in Mexico 1951-1956, 1949 Ph.D. taxonomy and morphology of the Gramineae.

One species, North America, Mexico. Chloridoideae, Cynodonteae, or Eragrostideae, perennial, erect, caespitose, glaucous, rhizomatous, herbaceous, unbranched, forming clumps, lower sheaths persistent, leaves mostly basal, auricles absent or rarely present, ligule fringed or a line of hairs, leaf blades linear flexuous, plants dioecious, contracted spike inflorescence exserted, spikelets solitary and pedicellate, male spikelets 3-5 flowered, 2 glumes more or less equal, second glume awnless, lemma cleft and awned, lemma nerves extended into 3 subulate awns, palea keels winged, 2 free and fleshy lodicules, 3 stamens, ovary glabrous, 2 stigmas, open areas, dry places, slopes, hillsides, calcareous soils, type *Sohnsia filifolia* (E. Fourn.) Airy Shaw, see *Conspectus Regnum Vegetabilis ... Pars I*. 1828, *Bulletin de la Société Botanique de France* 24: 177-178. 1877 and *The Families of Flowering Plants* 2: 199-229. 1934, *Journal of the Washington Academy of Sciences* 46: 109-112. 1956, *American Journal of Botany* 51: 453-463. 1964, *Kew Bulletin* 18(2): 272. 1965, *Brittonia* 19: 244. 1967, *Bulletin of the Torrey Botanical Club* 94: 1-17. 1967, *Contributions from the United States National Herbarium* 41: 117, 195. 2001, P. Dávila-Aranda, R. Lira-Saade and J. Valdés-Reyna, "Endemic species of grasses in Mexico: a phytogeographic approach." *Biodiversity and Conservation* 13(6): 1101-1121. June 2004.

Species

S. filifolia (E. Fourn.) Airy Shaw (*Calamochloa filifolia* E. Fourn.; *Eufournia filifolia* (E. Fourn.) Reeder)

Mexico. See *Bulletin de la Société Botanique de France* 24: 178. 1877 and *Kew Bulletin* 18(2): 272. 1965.

Solenachne Steudel = *Spartina* Schreb.

Greek *solen* "a tube, pipe" and *achne* "chaff, glume."

Chloridoideae, Cynodonteae, or Chloridoideae, Zoysieae, Sporobolinae, type *Solenachne phalaroides* Steud., see *Genera Plantarum* 43. 1789, *Catalecta Botanica* 3: 10. 1806, *Voyage autour du Monde* 2(2): 15, t. 2. 1829, *Synopsis Plantarum Glumacearum* 1: 12. 1855 [1853] and *Revista Sudamericana de Botánica* 6(5-6): 147. 1940, *Iowa State College Journal of Science* 30(4): 471-574. 1956, *Contributions from the United States National Herbarium* 41: 195-200. 2001.

Solenophyllum Baillon = *Monanthochloe* Engelm.

From the Greek *solen* "a tube, pipe" and *phyllon* "leaf."

Chloridoideae, Cynodonteae, Monanthochloinae, see *Transactions of the Academy of Science of St. Louis* 1: 436-437, pl. 13-14. 1859, *Histoire des Plantes* 12: 235. 1893, *Contributions from the United States National Herbarium* 41: 142, 195. 2001, *Flora Fanerogámica Argentina* 86: 1-68. 2003.

Sorghastrum Nash = *Dipogon* Steud., *Poranthera* Raf., *Poranthera* Rudge (Euphorbiaceae)

From the genus *Sorghum* Moench and *astrum*, a Latin substantial suffix indicating inferiority or incomplete resemblance.

About 16-20 species, tropics and subtropics, Africa and America. Panicoideae, Andropogonodae, Andropogoneae, Andropogoninae, or Panicoideae, Andropogoneae, Sorghinae, annual or perennial, herbaceous, tufted, culm bases starchy, auricles present or absent, ligule a membrane unfringed or fringed, plants bisexual, inflorescence cylindrically paniculate, sessile spikelet callus obtuse or pungent, spikelets solitary with barren to empty pedicel, rachis disarticulating, lower floret reduced to an empty lemma, 2 glumes more or less equal, upper glume 5-nerved broadly convex, lower glume coriaceous, upper lemma 2-dentate awned, palea present or absent, 2 lodicules free and fleshy, stamens 3, ovary glabrous, 2 stigmas, pedicelled spikelet absent, native pasture species, shade or open areas, natural grasslands, dry sandy soils, moist fields, open rocky slopes, hills, wet places, savannah, pampas, woodland margins, related to *Sorghum*, type *Sorghastrum avenaceum* (Michx.) Nash, see *Species Plantarum* 1: 78, 82. 1753, *Species Plantarum* 2: 1045, 1047. 1753, *Methodus Plantas Horti Botanici ...* 207. 1794, *Transactions of the Linnean Society of London* 10: 302. 1811, *Fundamenta Agrostographiae* 187. 1820, *Flora Brasiliensis seu Enumeratio Plantarum* 341. 1829, C.S. Rafinesque, *Seringe Bull. Bot.* 1: 221. 1830 [also *Bulletin Botanique, Genève*], *Nomenclator Botanicus. Editio secunda* 1: 518. 1840 and Nathaniel Lord Britton (1859-1934), *Manual of the Flora of the Northern States and Canada*. 71. New York 1901, *Flora of Tropical Africa* 9: 111. 1917, E.D. Merrill, *Index rafinesquianus*. 76. 1949, *University of California Publications in Botany* 23(6): 324. 1950, *Flora Illustrada de Entre Ríos (Argentina)* 6(2): 447-508. 1969, *Journal of Heredity* 75: 196-202. 1984, *Taxon* 35: 195-196. 1986, *Iheringia, Série Botânica* 36: 3-13. 1987, *Annals of the Missouri Botanical Garden* 74: 432-433. 1987, Patricia Dolores Davila Aranda, "Systematic revision of the genus *Sorghastrum* (Poaceae):

Andropogoneae)." 175, 185. Species

S. balansae (Hack.) Dávila (*Andropogon balansae* (Hack.) Hack.; *Sorghum balansae* Hack.; *Sorghum nutans* subvar. *balansae* (Hack.) Roberthy)

South America, Brazil, Paraguay. See *A Manual of the Botany of the Northern United States* 617. 1848, *Flora Brasiliensis* 2(4): 277. 1883, *Monographiae Phanerogamarum* 6: 534. 1889 and *Boissiera. Mémoires du Conservatoire de Botanique et de l'Institut de Botanique Systématique de l'Université de Genève* 9: 310. 1960, *Annals of the Missouri Botanical Garden* 76(4): 1171. 1989.

S. bipennatum (Hack.) Pilger (*Andropogon bipennatus* Hack.; *Cleistachne sorghoides* Benth.; *Sorghastrum incompletum* (J. Presl) Nash; *Sorghastrum incompletum* var. *bipennatum* (Hack.) Dávila; *Sorghum bipennatum* (Hack.) Kuntze; *Sorghum bipennatum* (Hack.) Stapf, nom. illeg., non *Sorghum bipennatum* (Hack.) Kuntze)

Tropical Africa, Madagascar. Annual bunchgrass, weak, loosely tufted, decumbent and rooting at the lower nodes, panicle narrowly lanceolate, spikelets narrowly ovate, terminal sessile spikelets with 2 barren pedicels, lower glume dark, upper lemma awn bigeniculate, grazed only while young before anthesis, low grazing value, on damp soil, disturbed sites, wooded grasslands, see *Hooker's Icones Plantarum* 14: t. 1379. 1882 [or 4: 60, pl. 1379], *Flora* 68(8): 142. 1885, *Revisio Generum Plantarum* 2: 791. 1891 and *North American Flora* 17(2): 130. 1912, *Flora of Tropical Africa* 9: 144. 1917, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 14(121): 96. 1938, *Annals of the Missouri Botanical Garden* 76(4): 1171. 1989.

in Sierra Leone: ninki bafoen

S. brunneum Swallen

Guatemala, Mexico. Good forage, see *Contributions from the United States National Herbarium* 29(9): 428. 1950.

in Guatemala: pasto manso

S. chaseae Swallen (also spelled *chasae*) (for Agnes Chase)

Brazil. See *Phytologia* 14(2): 96. 1966.

S. contractum (Hack.) Kuhlmann & Kuhn (*Andropogon nutans* var. *contractus* (Hack.) Hack.; *Sorghastrum amplum* Swallen; *Sorghum nutans* subsp. *contractum* Hack.)

Brazil. See *Flora Brasiliensis* 2(4): 276. 1883, *Monographiae Phanerogamarum* 6: 533. 1889 and M. Kuhlmann e Eduardo Kuhn, *A flora do Distrito de Ibiti: ex-Monte Alegre, Município de Amparo* 1947: 29. 1947, *Phytologia* 14(2): 95. 1966, *Bradea* 4: 166. 1985.

S. elliotii (C. Mohr) Nash (*Chrysopogon elliotii* C. Mohr; *Sorghastrum apalachicolense* D.W. Hall)

U.S., Texas. Good forage, see *Bulletin of the Torrey Botanical Club* 24: 21. 1897 and *North American Flora* 17(2): 130. 1912, *Sida* 9(4): 303-304, f. 4. 1982.

in English: long-bristle Indian grass, slender Indian grass, long-bristled indiagrass

S. friesii (Pilg.) Pilg. (*Andropogon friesii* Pilg.; *Sorghum friesii* (Pilg.) C.E. Hubb.)

South Africa. Perennial, tufted, spikelets with empty pedicel, awns bent or straight, wet places, see *Wissenschaftliche Ergebnisse der Schwedischen Rhodesia-Kongo-Expedition, 1911-1912, unter Leitung von Eric Graf von Rosen* 1: 195. 1915, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 14: 96. 1938.

S. incompletum (J. Presl) Nash (*Andropogon bipennatus* Hack.; *Andropogon galeottii* E. Fourn.; *Andropogon incompletus* J. Presl; *Andropogon nutans* var. *incompletus* (J. Presl) Hack.; *Andropogon stipoides* Rupr.; *Chrysopogon minor* Vasey; *Sorghastrum bipennatum* (Hack.) Pilg.; *Sorghastrum canescens* (Hack.) Pilg.; *Sorghastrum galeottii* (E. Fourn.) Conz., also spelled *galeotii*; *Sorghastrum incompletum* var. *bipennatum* (Hack.) Dávila; *Sorghastrum liebmannianum* Hitchc.; *Sorghastrum nutans* subvar. *canescens* (Hack.) Roberty; *Sorghum bipennatum* (Hack.) Kuntze; *Sorghum bipennatum* (Hack.) Stapf, nom. illeg., non *Sorghum bipennatum* (Hack.) Kuntze; *Sorghum canescens* Hack.; *Sorghum incompletum* (J. Presl) Stapf; *Sorghum nutans* subvar. *canescens* (Hack.) Roberty)

North America, Africa tropical, Mexico to Costa Rica. Annual, erect, nodes pubescent, leaf blades linear acuminate, inflorescence a terminal panicle oblong, spikelets lanceolate hairy, awns twisted and geniculate, glumes coriaceous, lower glume hairy, upper glume glabrous, forage, see *Reliquiae Haenkeanae* 1(4-5): 342. 1830, *Bulletin de l'Académie Royale des Sciences et Belles-lettres de Bruxelles* 9: 8. 1842, *Flora Brasiliensis* 2(4): 277. 1883, *Flora* 68(8): 142. 1885, *Mexicanas Plantas* 2: 56. 1886, *Proceedings of the American Academy of Arts and Sciences* 22: 460. 1887, *Monographiae Phanerogamarum* 6: 531. 1889, *Revisio Generum Plantarum* 2: 791. 1891 and *North American Flora* 17(2): 130. 1912, *Contributions from the United States National Herbarium* 17(3): 211. 1913, *Flora of Tropical Africa* 9: 144, 145. 1917, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 14(121): 96. 1938, *Die natürlichen Pflanzenfamilien, Zweite Auflage* 14e: 142. 1940, *Flora Taxonomica Mexicana* 1: 170. 1946, *Boissiera*. 9: 310. 1960, *Annals of the Missouri Botanical Garden* 76(4): 1171. 1989.

S. incompletum (J. Presl) Nash var. *incompletum* (*Andropogon incompletus* J. Presl; *Andropogon nutans* var. *incompletus* (J. Presl) Hack.; *Sorghum incompletum* (J. Presl) Stapf)

South America. Annual, see *Reliquiae Haenkeanae* 1(4-5): 342. 1830, *Monographiae Phanerogamarum* 6: 531. 1889 and *Flora of Tropical Africa* 9: 144, 145. 1917.

S. viride Swallen (*Sorghastrum nutans* (L.) Nash)

South America, Brazil. Densely clumped, see *Flora of the Southeastern United States* ... 66. 1903, *Phytologia* 14(2): 98. 1966.

Sorghum Moench = *Blumenbachia* Koeler,
Sarga Ewart, *Sarga* Ewart & White, *Sorgum*
Adans.

The Italian *sorgo*, *soricum*, *surgus*, *suricum* (12th century), *surico* (10th century), from the spoken Latin *suricum granum* "grain from Syria," from Suria, a variation of Syria; see Conrad Moench (1744-1805), *Methodus plantas horti botanici et agri Marburgensis a staminum situ describendi*. 207. Marburgi Cattorum [Marburg] 1794-1802; S. Battaglia, *Grande dizionario della lingua italiana*. XIX: 492-493. 1997.

About 20(-24)/30(-60) species, Old World tropics and subtropics, Mexico. Panicoideae, Andropogonodae, Andropogoneae, Andropogoninae, or Panicoideae, Andropogoneae, Sorghinae, annual or perennial, herbaceous, simple, sometimes rhizomatous or stoloniferous, stems clumped and robust, sometimes decumbent, lush foliage, auricles absent, ligule membranous more or less fringed or ciliate, leaves linear to lanceolate or oblong, plants bisexual, inflorescence paniculate of jointed racemes, bisexual spikelets, terminal spikelets in triplets, racemes bearing pairs of sessile and pedicellate spikelets, sessile spikelets fertile with 2 florets, the lower floret male or sterile and reduced to an empty lemma, the upper floret bisexual in sessile spikelet, sessile spikelet callus obtuse or pungent, pedicellate spikelet with upper fertile floret sometimes male, lower glume of sessile spikelet dorsally flattened, upper lemma awnless or 2-dentate and awned, pedicelled spikelet developed or reduced to a glume, palea present or absent, 2 ciliate lodicules free and more or less fleshy, 3 stamens, ovary glabrous or hairy, 2 stigmas, weed species, stock feed, suitable for cultivation, important cereal, grain crop species, a staple, forage, cultivated and naturalized fodder, ornamental, decorative flowering panicles, a source of paper, brushes and brooms manufacture, sweet juice, nonsaccharine sorghum, saccharine sorghum, stock poisoning, cyanogenic, the young and wilted leaves are particularly poisonous, *Sorghum* contains hydrocyanic acid and

the alkaloid hordenine, some species may accumulate toxic amounts of nitrate, varieties differ considerably in HCN poisonings, shade species or species of open habitats, forest margins, savannahs, ruderal habitats, moist sandy soils, along roadsides, disturbed areas, rainforest, pampas, alluvial plains, the whole *Sorghum* taxonomy status still under discussion, taxonomy of the cultivated species is extremely complicated, hybrids with *Saccharum* L., type *Sorghum bicolor* (L.) Moench, see *Species Plantarum* 2: 1045, 1047. 1753, *Familles des Plantes* 2: 38, 606. 1763, *Methodus plantas horti botanici et agri Marburgensis a staminum situ describendi*. 207. 1794-1802, *Descriptio Graminum in Gallia et Germania* 28-29. 1802, *Flora Brasiliensis* 2(4): 271, 274. 1883, *Die Natürlichen Pflanzenfamilien* 2(2): 28. 1887 and *Manual of the Flora of the Northern States and Canada* 71. 1901, *Proceedings of the Royal Society of Victoria*, ser. 2, 23: 296. 1911, *Flora of Tropical Africa* 9: 105, 111. 1917, *Bulletin of Miscellaneous Information Kew* 1935(5): 222. 1935, *Hook. - Species**
S. spp.
- in English: grain sorghum, millet
 in Brazil: trigo
 in Mexico: sorgo negro
 in Laos: khauz f'angx, liay
 in the Philippines: batad, bukakau
 in Thailand: ya khao fang
 in East Africa: ogolo (Luo)
 in Niger: dawa, hâmo
 in South Africa: Amaquaskoorn, graansorghum, ternataanse koring, rooikafferkoring, witkafferkoring
 in Yoruba: baba, oka baba, oka isi, oka, bomo, boromo, sosoki
- S. abyssinicum*** (R. Br. ex Fresen.) Kuntze (*Andropogon abyssinicus* R. Br. ex Fresen.; *Andropogon sorghum* subsp. *abyssinicus* Piper; *Andropogon sorghum* var. *abyssinicus* Hack.; *Sorghum abyssinicum* (Hack.) Chiov., nom. illeg., non *Sorghum abyssinicum* (R. Br. ex Fresen.) Kuntze; *Sorghum abyssinicum* (Piper) Stapf, nom. illeg., non *Sorghum abyssinicum* (R. Br. ex Fresen.) Kuntze)
- Abyssinia. See *Museum Senckenbergianum* 2: 146. 1837, *Monographiae Phanerogamarum* 6: 518. 1889, *Revisio Generum Plantarum* 2: 791. 1891 and *La Collezione dei cereali della Colonia Eritrea* 20. Roma 1912, *Proceedings of the Biological Society of Washington* 28: 39. 1915, *Flora of Tropical Africa* 9: 118. 1917.

Africa, tropical Africa and South Africa. Annual or short-lived perennial or biennial, very variable, rhizomes absent, slender, leaf sheaths densely hairy at the nodes, lamina narrowly linear, inflorescence often drooping, fragile racemes, sessile spikelets ovate to elliptic finely awned, pedicelled spikelet male or sterile linear to lanceolate, lower glume often pubescent, upper lemma awned or awnless, grain eaten in time of scarcity, naturalized, forage plant, medium grazing value, a weed of sugarcane, stock poisoning, grains eaten by baboons, probably the wild progenitor of *Sorghum bicolor* (L.) Moench, found in wet places, swampy sites, stream banks, damp soils, disturbed places, alluvial soils, plains, old farmland, desert situations, old cultivated fields, irrigated grounds, canal banks, fields, see *Species Plantarum* 2: 1047-1048. 1753, *Flora Carniolica, Editio Secunda* 274. 1772, *Flora Lusitanica* 1: 88-89. 1804, *Syn. Pl.* 1: 101. 1805, *Species Plantarum* 4: 906. 1806, *Nova*

Old World, Africa and South Africa. Robust tufted annual or weak short-lived perennial, fast growing and invasive, erect, short rhizome, culms stout to flimsy, culm nodes villous or pubescent or glabrous, membranous ligule ciliate, leaf sheath with overlapping margins, leaves flat and lanceolate with margins sometimes wavy, inflorescence a compactly branched and terminal panicle, spikelets borne in pairs, terminal spikelets in three's, mature sessile spikelets ovoid to subglobose and persistent, upper spikelet pedicellate, 2 florets, lower floret sterile reduced to a lemma, upper floret hermaphrodite, glumes colored when mature, lemma awned or not, 2 lodicules, 3 stamens, feathery stigmas, seeds white to reddish brown, an extremely variable crop-weed complex, many cultivars and much variability in growth characteristics, noxious weed species, potential seed contaminant, cultivated, very susceptible to frost and intolerant of sustained flooding, grain crop species, very palatable, cultivated as forage or silage, grains used as food for cattle and poultry, a source of human food with over 300 million people dependent on it, flowering panicles used as brushes brooms, stems used for weaving fences and mats, stems contain sweet juice, sap made into a very sweet syrup, inflorescence astringent and haemostatic, decoction of the seed demulcent and diuretic, immature plants may accumulate toxic amounts of nitrate, found in disturbed areas, lowlands, along roadsides, sandy soils, open areas, abandoned fields, see *Species Plantarum* 2: 1047. 1753, *Mantissa Plantarum* 2: 301. 1771, *Flora Aegyptiaco-Arabica* 174. 1775, *Observationes Botanicae* 2: 7. 1781, *Saggi scientifici e letterari dell' accademia di Padova* 1: 128, t. 3, f. 1, 2. 1786,

in English: sorghum, cultivated sorghum, grain sorghum, forage sorghum, sweet sorghum, broom millet, broomcorn, broom corn, millet, millet grass, great millet, giant millet, Indian millet, Kafir corn, Kaffir corn, Kafirs, negro Guinea grass, Guinea corn, white Guinea corn, red Guinea corn, Sierra Leone guinea corn, horse corn, Rhodesian Sudan grass, Sudan grass, milo, dwarf milo, shattercane

in French: mil, gros mil, sorgho, guernotte, le petit roseau, maïs blanc

in Arabic: bechna, berbere, dachn, dhurah, dhurah hamra, dochn, dorra, durra, gharib, mereya, sambul, taam, táam

in Angola: massambala, massa-mbala, milho miúdo, omaha, ovasa, sorgo

in Benin: agbokounvovo, kpokpo

in Cameroon: akuthinda, nzam

in Dahomey: abokun, obo, vo

in East Africa: bel

in Gambia: bambara basso, basse bakinto, bassi, bassi wulengo, bassiba, bassiba kinto, basso, bassoba, ditinge,

ferdu basso, gajabo, kingi koyo, kingi wulengo, kinti, kinto, koos, kous, manio, manjo, nyaro kinto, nyo, samba jabbo, sou fenio, sucar kalo, tinge

in Ghana: akoko, akokò, apargu, atoko, atokok, awi, bam-matica, chi, coco, demonii, fo, ide, kadaaga, kapielle, katapielle, kaziaa, koko, kokote, kulia, kumpesi, kutuwè, kutuwè peper, kyi, menpe, miaa, miin, miipulima, norun, nyunso, sho, so, tschi, worsuli, yara, za

in Guinea: banyelesyeten, banyewa, defax, defax iwarax, deli fesyax, deli warax, dexaf, ediamb, enaga, endefax, endierà, epalanga, kemank kesoor, kende missé, kende niulé, kendi bilé, kombo vatefary, lomba, mengi, mengi béli, mengi firé, nionnifing, nionnigelé, tayim, tayula, ulimp, vya ntimp, vyantimp, vyenteli vendyax, vyenteli vyempalax

in Guinea-Bissau: baieri, basse bassi, nname quinto, quin-terim

in Ivory Coast: bemberi gué, bessekre, bessekré, nyoo

in Liberia: ding, kende

in Malawi: mapemba, amapemba, mapila, namuve, gonkho, cidomba, cipira

in Mali: abora, abura, amadi bubu, bechna, bemberi, bemberi ba, de, djibi, emè, gauri, hame, isey, kende, keniki, ndza, ngu, nguyu, nion, nion ni fing, nion ni gelé, saba, sanko, sie, suku, tafsut, tchye se, yo, yu

in Morocco: sorgho, mil, tanalâ, el-qsiyba, taganimt, drâ, dra hamra, dra bida, drâ el-bîda, drâ er-rqîqa, tafsût, âfsû, 'ababû, l-besnâ, besna, beshna, âsengar, duhn, dorra, durra, gedî, le petit roseau, maïs blanc, illan

in Niger: hamà, kaana

in Nigeria: a chi duka, aakunku, abantako, adookhò, agwi, ajagama, ajagamari, ajonggo, akpakpa, akpe, akpoi, aku, akunkwashili, angaabà, angaabin, ansam dkara, asniya, ayango, ayangwa, aza, baakin raakumii, babà, badal, badankama, bade, bafillatana, bafuri, bagobara, baho, bakin rakumi, balwa cololari, balwa colorari, bange, bangtankir, banjanga, basharamba, basaramba, bazamfara, bekpui, berbere, binini, bomò, boromo, buniya, bununi, cakalari, caw, cen, chammaje, che, chi da dawa, chi da gero, chingirri, cibal, cibal ngesa, cibe, cife, cife takandari, dà, daa, daawaa, dakwuhi, dalimi, damana, danduwa, dawn, doran zabo, doru, dorra, dungogiya, durra, ebwafele, eegezee, egu, eke, ekpan, ekpoi deunderim, emiigwu, ereere, ewi, ewi dakwuhi, ewung, eyikpan, fafa, fara fara, farafara, farfara, gabara, gabeli, gabjin, gagara biri, ganda, garangatsa, gamera, gaura, gaw, gawà, gaweje, gawerka, gawri, gawri jigaari, gawri mbayeeri, gawri njolomri, gawri yolobri, gawrije, gbenge, gboron, gegebo baba, gewà, gewenggè, ghera, girar burtuu, gu, gudi, gweo, gwoyo, gyamro, gyauro, hakorin karuwa, hambana, himeirun, hwerma, ida, idar, idawn, iga, igù, igwianya, igwu, igwu abakpa, ihnmi, iimoo, iishina, ji, ikha, ikpu, ikulatang, ikulè, ikwelatam, ikwù, imoghioi, inari, inyari, iyi, iza, janare, janhauya, jarmari,

Tropical Africa, Australia. Short-lived perennial or annual, weak, erect, without rhizomes, leaf sheath round and glabrous, ligule membrane-like with hairy margin, open to slightly contracted panicle with lax branches arranged in whorls, spikelets in pairs, 1 spikelet sessile and awned, 1 spikelet pedicellate and awnless, racemes disarticulating readily at maturity, palatable fodder grass, suitable for hay-making, seeds used as an astringent, usually in wet areas, disturbed areas, riverbanks, water courses, vleis, old cultivations, along roadsides, on clay, sugarcane fields, on moist sandy soils, tropical fruit orchards, rubber plantations, see *Species Plantarum* 4: 906. 1806, *Mémoires de la Société d'Agriculture, Sciences et Arts d'Angers* 1: 173. 1831, *Synopsis Plantarum Glumacearum* 1: 393. 1854, *Monographiae Phanerogamarum* 6: 504. 1889 and *Proceedings of the Biological Society of Washington* 28: 34. 1915, *Flora of Tropical Africa* 9: 111-112, 114, 116, 119-120. 1917, *Bulletin of Miscellaneous Information Kew* 1936(5): 316. 1936, *The Cultivated Races of Sorghum* 237. 1936, *Journal of the Linnean Society, Botany* 55(358): 221, 238-247. 1955, *Origins of African Plant Domestication* 455. 1976, *Amer. Mediterranean area. Perennial, vigorous, robust, simple, halophytic, stout, erect, strongly rhizomatous with extensively and well-developed long-creeping fleshy rhizomes, sometimes decumbent at the base with numerous adventitious roots, culm nodes downy or glabrous, internodes with scale-like bracts, narrow leaf blades, leaf sheaths chartaceous, short ligule membranous, leaves linear and white, terminal panicle compact or spreading and often reddish purple to purplish brown, spikelets paired, terminal spikelets in three's, lower spikelet sessile, upper spikelet pedicellate, spikelets cream to yellow fertile and elliptic, 2 florets, lower glume coriaceous and 2-keeled, lemma of upper floret usually awned, awn twisted and geniculate, stamens 3, grain eaten in time of scarcity, crop plant, good fodder, valuable forage and hay grass for livestock, eaten by cattle when young, very palatable in the early growing stage, rodents eat the seeds, alcoholic beverages, noxious aggressive weed and a serious pest, cultivated and naturalized, difficult to eradicate, good drought tolerance to very strongly drought resistant, susceptible to heavy frosts, sometimes causing poisoning of stock, often cyanogenic, may accumulate toxic amounts of nitrate, pollen may induce hay fever, hybridizes with cultivated sorghums, reported to be depurative and tonic, a folk remedy for blood and urinary disorders, seed demulcent and diuretic, highly adaptable, used to rehabilitate overgrazed ranges, prefers semiarid to subhumid areas, invades wet places usually swampy, along edge of sedge marsh, moist places, irrigation ditches, wet

sandy soils, waste areas, edge of roads, waste places, old pastures, open places, roadsides and other disturbed places in temperate climates, see *Species Plantarum* 2: 1047-1048. 1753, *Flora Carniolica, Editio Secunda* 274. 1772, *Methodus Plantas Horti Botanici ...* 207. 1794, *Descriptio Graminum in Gallia et Germania* 29. 1802, *Descripción de las Plantas ...* 306. 1802, *Flora Lusitanica* 1: 88-89. 1804, *Syn. S. versicolor Andersson (*Sarga versicolor* (Andersson) Spangler; *Sorghum purpureosericeum* var. *trinervatum* Chiov.)

Tropical Africa, Ethiopia, Kenya, South Africa. Annual or short-lived perennial, tufted, pale green to yellowish, nodes with a ring of white hairs or bearded, rhizomes absent, leaf sheath purplish, ligule a short membrane, inflorescence brown, lax drooping oblong panicle with branches usually in whorls, spikelets paired, 1 spikelet sessile and dark and with a twisted awn, the other spikelet pedicellate and green and awnless, sessile spikelet elliptic, pedicelled spikelet linear to lanceolate, lower glume coriaceous and bearded, upper lemma awned, palatable, grains eaten by baboons, usually in coastal bushland, disturbed areas, small depressions, bogs, woodlands, black turf, along roadsides and cultivated lands, along muddy pools, see *Naturwissenschaftliche Reise nach Mossambique* ... 563. 1863 and *J. Heredity* 75: 196-202. 1984, *Current Science* 58: 385-386. 1989, *Annals of Botany* 64: 675-681. 1989.

in English: black-seed wild sorghum

in South Africa: swartsaadwildesorghum

S. x alnum Parodi [= apparently a natural hybrid derivative of *Sorghum bicolor* (L.) Moench x *Sorghum halepense* (L.) Pers.] (*Holcus halepensis* L.; *Sorghum alnum* Parodi; *Sorghum alnum* var. *alnum*; *Sorghum alnum* var. *parvispiculum* Parodi; *Sorghum halepense* (L.) Pers.)

Southern America, Argentina, Africa. Short-lived perennial, robust, blue-green, densely tufted, spreading by short stout rhizomes ascending and terminal, large waxy leaves, inflorescence an open panicle with lowermost branches in whorls of 4-9, short racemes, spikelets paired, grown for fodder, fast growing noxious weed, potential seed contaminant, prussic acid poisoning in livestock, invasive, useful on eroded hillsides, sensitive to trampling, best used for grazing by cattle, very palatable and nutritive when young, cultivated for silage and hay, drought and salt resistant, susceptible to frost, it will not tolerate prolonged flooding, it does not grow well in the shade grows in fields and waste places, roadsides and creeks, similar to *Sorghum halepense* (L.) Pers., see *Species Plantarum* 2: 1047-1048. 1753, *Syn. Pl.* 1: 101. 1805 and *Revista Argentina de Agronomía* 10(4): 361, f. 1-3, t. 31-34. 1943, *Revista Argentina de Agronomía* 6(2): 468. 1969.

in English: alnum grass, alnum sorghum, Columbus grass, five-year sorghum

in Spanish: sorgo negro, pasto colon

in the Philippines: batag, gau

Hitchc.; *Sorghum vulgare* var. *drummondii* (Nees ex Steud.) Hack. ex Chiov.; *Sorghum vulgare* var. *sudanense* (Piper) Hitchc.)

Africa, Australia. Annual, tufted, stout, erect, thin, leaf blade lanceolate, panicle variable usually rather compact contracted or open pyramidal, inflorescences not disarticulating readily at maturity, racemes more or less crowded, spikelets paired, sessile spikelet pointed and elliptical, pedicelled spikelet male or neuter, seeds pale yellow when ripe, grains eaten by local people, cultivated for forage and hay, palatable, grazed, planted for pasture and green chop, a seed crop, excellent seed producer, ash from the plant used as cooking salt, escapes from planted areas, potential seed contaminant, pollen can cause hay fevers, may accumulate toxic to lethal concentrations of nitrate, intolerant of waterlogging, not adapted to the humid tropics, see *Species Plantarum* 2: 1047. 1753, *Synopsis Plantarum* 1: 101. 1805, *Synopsis Plantarum Glumacearum* 1: 393. 1854, *Monographiae Phanerogamarum* 6: 507. 1889 and *Publications of the Field Columbian Museum, Botanical Series* 3: 21. 1903, *Proceedings of the Biological Society of Washington* 29(27): 128. 1916, *Resultati scientifici della Missione Stefanini-Paoli nella Somalia italiana. in English: cord grass

Spartochloa C.E. Hubbard

Greek *sparton* "a cord" and *chloe*, *chloa* "grass," referring to the habit of the plant.

One species, Australia. Arundinoideae, Spartochloaeae, or Centothecoideae, perennial, herbaceous, unarmed, unbranched, tufted, rushlike, terete culms, internodes solid, basal leaves, auricles absent, leaf blades tiny to reduced or absent, ligule a fringe of hairs, plants bisexual, inflorescence paniculate, slender panicle contracted, 2 glumes subequal and awnless, lemmas coriaceous 5- to 9-nerved, palea

present, 2 free and fleshy lodicules, 3 stamens, ovary glabrous, 2 stigmas, open places, arid and semidesert areas, photosynthetic function on the sheaths and culms, resembling *Triodia*, see C.E. Hubbard, in *Kew Bulletin* 3: 307-308. (Oct) 1952, C. Hsiao, S.W.L. Jacobs, N.P. Barker and N.J. Chatterton, "A Molecular Phylogeny of the Subfamily Arundinoideae (Poaceae) Based on Sequences of rDNA." *Australian Systematic Botany* 11(1): 41-52. 1998, C. Hsiao, S.W.L. Jacobs, N.J. Chatterton and K.H. Asay, "A Molecular Phylogeny of the Grass Family (Poaceae) Based on the Sequences of Nuclear Ribosomal DNA (ITS)." *Australian Systematic Botany* 11(5-6): 667-688. 1998, *Flora of Australia* 43: 27, 28, 76, 97, 104, 106, 183, 194, 198, 268. 2002, G.H. Rua, "Centothecoid grasses and the evolution of panicoid spikelets." *Plant Systematics and Evolution* 240(1-4): 83-89. 2003.

Species

S. scirpoidea (Steud.) C.E. Hubb. (*Brizopyrum scirpoideum* Steud.; *Festuca scirpoidea* (Steud.) F. Muell.; *Poa scirpoidea* (Steud.) F. Muell.; *Schedonorus scirpoideus* (Steud.) Benth.)

Southwest and central Australia. Solid culms, Juncus-like readily disarticulating leaf blades, persistent leaf sheaths, glumes 1- to 3-nerved, lemmas glabrous entire, see *Species Plantarum* 1: 67, 73. 1753, *Essai d'une Nouvelle Agrostographie* 99, 162, 177. 1812, *Synopsis Plantarum Glumacearum* 1: 282. 1854, *Fragmenta Phytographiae Australiae* 8: 129. 1873, *Flora Australiensis: A Description ...* 7: 655. 1878, *Fragmenta Phytographiae Australiae* 11: 130. 1881 and *Kew Bulletin* 1952: 308. 1952.

Spartum P. Beauv. = *Lygeum* L., *Lygeum* Loeffl. ex L.

From the Latin *spartum* or *sparton*, Greek *sparton*, Spanish broom, a plant originally growing in Spain, of which ropes and mats were made (Plinius).

Lygeae, type *Lygeum spartum* L., see *Genera Plantarum edition 5* 27, [522]. 1754, *Essai d'une Nouvelle Agrostographie* 178. 1812 and W.D. Clayton & S.A. Renvoize, *Kew Bulletin, Additional Series* 13: 82. 1986.

Spathia Ewart

Greek *spathe* "a spathe, a blade."

One species, Australia. Panicoideae, Andropogonodae, Andropogoneae, Andropogoninae, annual, tufted, herbaceous, branched, internodes solid, auricles absent, leaf sheaths inflated, ligule a fringed membrane, plants bisexual, cleistogamous, inflorescence digitate terminal and axillary, racemes enclosed by a large membranous spathe, spikelets paired, fertile spikelets more or less compressed, pedicellate

spikelets awnless, 2 glumes subequal, lower glume coriaceous acute, upper lemma entire awned, lower part of awn as wide as the lemma from which it arises, palea absent, 2 fleshy lodicules, 3 stamens, ovary glabrous, 3 reddish stigmas, open areas, plains, grasslands, related to *Dichanthium*, type *Spathia neurosa* Ewart & Archer, see Alfred James Ewart and Olive Blanche Davies, *The Flora of the Northern Territory* 26, pl. 1. Melbourne 1917.

Species

S. neurosa Ewart & Archer

Northern Australia. Lower glume distinctly 2-keeled.

Spelta Wolf = *Triticum* L.

Latin *spelta*, *ae* "grains of spelt."

Pooideae, Triticeae, Triticinae, type *Triticum spelta* L., see *Species Plantarum* 1: 85-87. 1753, *Genera Plantarum* 22. 1776 and *Acta Bot. Neerl.* 15: 160. Apr 1966, *Contributions from the United States National Herbarium* 48: 614, 676-684. 2003.

Spermachiton Llanos = *Sporobolus* R. Br.

From the Greek *sperma* "a seed" and *chiton* "a tunic, covering."

Chloridoideae, Eragrostideae, or Chloridoideae, Cynodonteae, Sporobolinae, type *Spermachiton involutum* Llanos, see *Observationes Botanicae* 5: 19. 1789 [1788], *Prodromus Florae Novae Hollandiae* 169-170. 1810, *Essai d'une Nouvelle Agrostographie* 26, 147, 178. 1812, *Systema Vegetabilium* 2: 368. 1817, *De Graminibus unifloris et sesquifloris* 154. Petropoli 1824, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 6,4(1-2): 86. 1840, *Nomenclator Botanicus. Editio secunda* 1: 40. 1840, *Fragmentos de Algunas Plantas Filipinas* 25. 1851, *Plantae Junghuhnianae* 3: 343. 1854, *Nom. Bot.* 2: 1274. 1874 and *A Handbook to the Flora of Ceylon* 5: 261. 1900, *Grasses Ceylon* 96. 1956, *Taxon* 22: 163. 1973, *Proceedings of the Indian Science Congress Association* 74(3, vi): 185-186. 1987, *Cytologia* 53: 53-57. 1988, *Blumea* 35(2): 393-458. 1991, *Annals of the Missouri Botanical Garden* 81(4): 784-791. 1994, *Australian Systematic Botany* 12(3): 375-448. 1999, *Contributions from the United States National Herbarium* 41: 200-219. 2001.

Spermatochiton Pilg. = *Sporobolus* R. Br.

Greek *sperma*, *spermatos* "a seed" and *chiton* "a tunic, covering."

Chloridoideae, Eragrostideae, or Chloridoideae, Cynodonteae, Sporobolinae, see *Prodromus Florae Novae Hollandiae* 169-170. 1810, *Fragmentos de Algunas Plantas Filipinas* 25. 1851, *Nom. Bot.* 2: 1274. 1874 and *Flora of the Guianas, Series A: Phanerogams* 606-615. 1990, *Blumea* 35(2): 393-458. 1991, *American Journal of Botany* 81: 622-629. 1994, *Flora Mesoamericana* 6: 273-276. 1994, *Sida* 16: 529-544. 1995, *Memoirs of the New York Botanical Garden* 78: 509-540. 1996, *Australian Systematic Botany* 12(3): 375-448. 1999, *Contributions from the United States National Herbarium* 41: 200-219. 2001.

Sphaerella Bubani = *Airopsis* Desv.

Greek *sphaira* "a globe, ball, sphere," the diminutive.

Aveneae, see *Journal de Botanique* (Desvaux) 1: 200. 1809, *A Manual of the Botany of the Northern United States. Second Edition* 573. 1856, *Synopsis der mitteleuropäischen Flora* 2(1): 298. 1899 and *Flora Pyrenaea ...* 4: 320. 1901.

Sphaerium Kuntze = *Coix* L.

Greek *sphaira* "a globe," *sphairion* "a little ball, a pill."

Panicoideae, Andropogoneae, Coicinae, see *Species Plantarum* 2: 972. 1753, *Systema Naturae, Editio Decima*, 1261. May-June 1759, *Revisio Generum Plantarum* 2: 793. 1891 and *Fl. Trop. E. Afr. Gramineae* (3): 857. 1982, *Contributions from the United States National Herbarium* 46: 162-163, 606. 2003.

Sphaerobambos S. Dransfield

Bamboo with globose fruit, from the Greek *sphaira* "a globe" plus *bambos*, *bambusa*.

About 3 species, Asia, the Philippines, Sabah and Indonesia, Malaysia. Bambusoideae, Bambusodae, Bambuseae, Bambusinae, perennial, woody, erect or scandent, branched, unarmed, persistent, usually straight, slightly zig-zag, sympodial, internodes hollow, thin-walled, rough and hairy when young, primary branch dominant, culm sheaths deciduous, rhizomes pachymorph, plants bisexual, inflorescence itercaucant or indeterminate, inflorescence at each node of the flowering branches, spikelets 3-5 flowered, 2-3 glumes unequal, palea 2-keeled and keels winged, 6 stamens, ovary hairy, 3 stigmas, fruit globose to subglobose, forest margins, lowland forest, type *Sphaerobambos hirsuta* S. Dransf., see *Kew Bulletin* 44(3): 425-434. 1989, S. Dransfield, "The bamboos of Sabah." *Sabah Forest Record* 14: 70-71. 1992, *Plants Resources of South-East Asia* 7: 17, 18, 30, 34. 1995.

Species

S. hirsuta S. Dransfield

Sabah, Mount Kinabalu. Erect, leaning, scrambling, drooping, tufted to open tufted, thin walls, young shoot and culm sheaths hairy, spikelets with 3 glumes pubescent and 5 florets, the uppermost floret reduced, upper glume 9-nerved, lower glume 7-nerved, lemma glabrescent, paleas with winged keels, lodicules absent, see *Kew Bulletin* 44(3): 428, f. 1-3. 1989.

S. philippinensis (Gamble) S. Dransf. (*Bambusa philippinensis* (Gamble) McClure; *Guadua philippinensis* Gamble) Asia. See *Genera Plantarum* 1: 236. 1789, *Journal de Physique, de Chimie, d'Histoire Naturelle et des Arts* 95: 150. 1822 and *Philippine Journal of Science* 8(4): 203. 1913, *Smithsonian Contributions to Botany* 9: 68. 1973, *Kew Bull.* 44(3): 432. 1989, *Contributions from the United States National Herbarium* 39: 58-62. 2000.

S. subtilis S. Dransf.

Sulawesi. See *Kew Bulletin* 44(3): 432, f. 5. 1989.

Sphaerocaryum Nees ex Hook.f. = *Graya* Arn. ex Steud., *Graya* Endl. (Chenopodiaceae), *Sphaerocaryum* Nees ex Hook.f., *Stuedelella* Honda

From the Greek *sphaira* "a globe" and *karyon* "nut," referring to the globular grains.

One species, tropical Asia, India, China, Taiwan, Indonesia. Panicoideae, Panicodae, Isachneae, annual, herbaceous, slender to robust, delicate, erect to decumbent, ascending, prostrate and rooting base, trailing, internodes hollow, stoloniferous, short leaf blades ovate, auricles absent, ligule a fringed hairs, plants bisexual, inflorescence an open pyramidal panicle, minute spikelets 1-flowered and globose, glumes often deciduous, lemma obtuse 1-nerved pubescent, palea present, tiny lodicules, 3 stamens, ovary glabrous, 2 stigmas, found along borders of lakes and marshes, forest margins, on moist stream banks, shady sites, swampy regions, wet zones, confused with *Sporobolus*, type *Sphaerocaryum elegans* Nees ex Steud. (*Sphaerocaryum elegans* (Arn. ex Steud.) Nees ex Hook.f.), see *Species Plantarum* 1: 55. 1753, *Prodromus Florae Novae Hollandiae* 196. 1810, *Nomenclator Botanicus. Editio secunda* 2: 256, 620. 1841, *Genera Plantarum* 1376. 1841, *Syn. Pl. Glum.* 1: 119. 2-3 Mar 1854 [1855], *The Flora of British India* 7(22): 246. 1896 and *Journal of the Faculty of Science: University of Tokyo, Botany* 3: 258-259. 1930, *Grasses of Ceylon* 59. 1956.

Species

S. malaccense (Trin.) Pilg. (*Graya elegans* Steud.; *Graya elegans* Arn. ex Steud.; *Isachne pulchella* Roth ex Roem. & Schult.; *Isachne pulchella* Roth, nom. illeg., non *Isachne pulchella* Roth ex Roem. & Schult.; *Panicum elegans* Arn. ex Steud.; *Panicum elegans* Wight & Arn. ex Steud.;

Panicum malaccense Trin.; *Sphaerocaryum elegans* Nees ex Steud.; *Sphaerocaryum pulchellum* (Roth ex Roem. & Schult.) Merr.; *Sphaerocaryum pulchellum* A. Camus, nom. illeg., non *Sphaerocaryum pulchellum* (Roth ex Roem. & Schult.) Merr.; *Studelella pulchella* (Roth ex Roem. & Schult.) Honda)

Southern China, Myanmar, India and Sri Lanka. Annual, slender, erect from decumbent base, leaf sheaths very short, ligule fringed, panicles pyramidal with spreading branches, spikelets elliptic or ovoid, thin glumes membranous and obtuse, upper lemma membranous, great variation in vegetative characters, damp or swampy places, see *Systema Vegetabilium* 2: 476. 1817, *Mant.* 2: 265. 1824, *De Graminibus Paniceis* 204. 1826, *Catalogue of Indian Plants* no. 2033. London 1833-1837, *Nomenclator Botanicus. Editio secunda* 2: 620. 1841, *Synopsis Plantarum Glumacearum* 1: 119. 1854, *Verhandlungen der kaiserlich-königlichen zoologisch-botanischen Gesellschaft in Wien* 1858: 223. 1858 and *Handb. Fl. Ceylon* 5: 258. 1900, *Philippine Journal of Science* 11: 52. 1916, *Flore Générale de l'Indo-Chine* 7: 514. 1923, *Journal of the Faculty of Science: University of Tokyo, Botany* 3(2): 259. 1930, *Kansas University Science Bulletin* 33: 342, t. 28, f. 2a-c, 4. 1932, *Repertorium Specierum Novarum Regni Vegetabilis* 45(1131-1137): 2. 1938, *Geological Society Special Publications* 41: 102, t. 16, f. 1-2. 1942, *Grasses of Ceylon* 59. 1956, *Grasses of Burma ...* 583. 1960.

Spheneria Kuhlms.

From the Greek *sphen* "wedge."

One species, tropical South America. Panicoideae, Panicoideae, Paniceae, or Panicoideae, Paniceae, Paspalinae, perennial, small, fragile, delicate, unbranched, tufted, foliage mainly basal, auricles absent, ligule fringed, plants bisexual, inflorescence spicate, loosely flowered racemes, spikelets solitary and pedicellate, 2-flowered spikelets, glumes 1 per spikelet, lower glume lacking, upper glume not spurred, lemmas beaked, palea 2-nerved 2-keeled, 2 lodicules free and fleshy, stamens 3, ovary glabrous, 2 stigmas, along riverbanks, sandy savannah, similar to *Centrorchloa* and *Paspalum*, type *Spheneria setifolia* (Döll) Kuhlms., see *Comissão de Linhas Telegráficas Estratégicas de Matto-Grosso ao Amazonas, Botanica* 67(Bot. 11): 57-58, t. 4. 1922, *Journal of the Washington Academy of Sciences* 25: 190-193. 1935, *Flora of the Guianas. Series A, Phanerogams* 8: 604-606. 1990, *Contributions from the United States National Herbarium* 46: 606. 2003.

Species

S. kegelii (Müll. Hal.) Pilg. (*Paspalum kegelii* Müll. Hal.; *Paspalum setifolium* Döll; *Spheneria setifolia* (Döll) Kuhlms.) (dedicated to the German gardener Hermann Aribert Heinrich Kegel, 1819-1856, from 1844 to 1846 plant

collector in Suriname; see J.H. Barnhart, *Biographical notes upon botanists*. 2: 277. 1965; August Adriaan Pulle (1878-1955), *An Enumeration of the Vascular Plants Known from Surinam*. Leiden 1906)

Brazil. Small, densely tufted, ligule membranous and ciliate, spikelets turbinate, long pungent spikelet callus, upper glume 5-nerved, growing in open white sand, see *Systema Naturae, Editio Decima* 846, 855, 1359. 1759, *Botanische Zeitung, Berlin* 19(44): 324. 1861, *Flora Brasiliensis* 2(2): 61. 1877 and *Repertorium Specierum Novarum Regni Vegetabilis* 26(15): 228. 1929.

Sphenopholis Scribner = Colobanthium (Rchb.) Taylor, *Colobanthus* (Trinius) Spach, *Colobanthus* Bartl. (Caryophyllaceae), *Reboulea* Kunth, *Reboulia* Raddi

Greek *sphen* and *pholis*, *pholidos* "scale, horny scale," referring to the shape of the upper glume.

About 5-8 species, North America and West Indies, Canada to Mexico. Pooideae, Poodae, Aveneae, or Pooideae, Poaeae, Aveninae, perennial or annual, tufted, herbaceous, internodes hollow, leaf blades not pseudopetiolate, auricles absent, ligule an unfringed membrane, plants bisexual, inflorescence paniculate open or spiciform, spikelets pedicellate, 2- to 3-flowered, 2 glumes very unequal or subequal, lower glume 1- to 3-nerved, upper glume 3- to 5-nerved, lemmas membranous and keeled, if awned a geniculate or reflexed dorsal awn, palea gaping, lodicules free and membranous, 3 stamens, ovary glabrous, 2 stigmas, spikelets falling entire at maturity, open habitats or shade, prairies, woodlands, marshes, linked to *Trisetum*, type *Sphenopholis obtusata* (Michx.) Scribn., see *Syn. Pl.* 1: 97. 1805, *Révision des Graminées* 2: 341, t. 84. 1830, *Ordines Naturales Plantarum* 305. 1830, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 1(1): 66. 1830, *Reliquiae Haenkeanae* 2(1): 13, t. 49, f. 2. 1831, *Der Deutsche Botaniker Herbarienbuch* 1(2): 149. 1841, *Histoire Naturelle des Végétaux* 13: 163. 1841 and *Rhodora* 8(92): 142, 144. 1906, *Iowa State College Journal of Science* 39(3): 259-336. 1965, *Bulletin of the Torrey Botanical Club* 92(3): 169-182. 1965, *Index Kewensis* 13: 33. 1966, *Flora of Alaska and Neighboring Territories; A Manual of the Vascular Plants* 1-1008. 1968, *Anderson's Flora of Alaska and Adjacent Parts of Canada* 1-724. 1974, *Agrociencia* 71: 71-102. 1988, *Flora of the Yukon Territory* 1-669. 1996, *Contributions from the United States National Herbarium* 48: 237, 602, 614-617. 2003.

Species

S. filiformis (Chapm.) Scribn. (*Aira pallens* Biehler; *Eatonia aristata* Scribn. & Merr.; *Eatonia pensylvanica* var.

filiformis Chapm.; *Sphenopholis aristata* (Scribn. & Merr.) A. Heller; *Sphenopholis x pallens* (Biehler) Scribn.; *Trisetum aristatum* (Scribn. & Merr.) Nash

Sphenopus Trinius = Libyella Pamp.

Greek *sphen* "wedge" and *pous* "foot," referring to the thickened pedicels; see Carl Bernhard von Trinius (1778-1844), *Fundamenta Agrostographiae*. 1820.

About 2 species, Mediterranean, western Asia. Pooideae, Poodae, Poae, annual, caespitose, herbaceous, culm internodes hollow, auricles absent, ligule an unfringed membrane, leaves linear and narrow, plants bisexual, inflorescence a loose panicle with divaricate branchlets, several-flowered, bisexual and very small spikelets compressed laterally and long pedicellate, obtuse glumes minute and much shorter than the spikelets, lower glume 0- to 1-nerved, lemmas obtuse and awnless, hairy callus absent, palea present, 2 free lodicules membranous, 3 stamens, ovary glabrous, 2 stigmas white, callus short and blunt, halophytes, common in salty marshes, coastal areas, maritime sand, open habitats, along rivers, type *Sphenopus gouanii* Trin., see *Fundamenta Agrostographiae* 135. 1820, Svante Samuel Murbeck (1859-1946), *Contributions à la connaissance de la flore du nord-ouest de l'Afrique et plus spécialement de la Tunisie* ... Lund 1897-1905, *Mitteilungen der Thüringischen Botanischen Vereins* 13-14: 57. 1899 and *Flore analytique & synoptique de l'Algérie & de la Tunisie* 377. 1902 [1904], E. Durand (1872-1910) et J.F.G. Species

S. divaricatus (Gouan) Rchb. (*Poa divaricata* Gouan; *Poa expansa* J.F. Gmel., also spelled *expensa*; *Sphenopus gouanii* Trinius, named for the French botanist Antoine Gouan

(Gouin) (Dupuy des Esquiles, pseud.), 1733-1821, professor of botany at Montpellier, correspondent of Linnaeus, see J.H. Barnhart, *Biographical notes upon botanists*. 2: 69. 1965)

Mediterranean. Annual, delicate, unbranched, slender, solitary or caespitose, geniculate and spreading, ligule membranous, auricles absent, leaves filiform, erect inflorescence, open panicle loose and divaricate, spikelets pedicellate, glumes unequal, lower glume reduced, upper glume 1-nerved membranous, hermaphrodite florets 3-5 per spikelet, lemmas without winged keels, 3 stamens, ovary glabrous, open habitats, saline ground, swamps, salt marshes, sandy soils, see *Species Plantarum* 1: 67-70. 1753, *Illustrationes et Observationes Botanicae* 3: 4, t. 2, f. 1. 1773, *Systema Naturae ...editio decima tertia, aucta, reformata* 181. 1791, *Fundamenta Agrostographiae* 135. 1820, *Flora Germanica Excursoria* 45. 1830.

in French: sphenopus divariqué

S. divaricatus (Gouan) Rchb. subsp. *permicranthus* (Hausskn.) H. Scholz (*Festuca expansa* var. *permicrantha* (Hausskn.) Asch. & Graebn.; *Sphenopus divaricatus* f. *permicranthus* (Hausskn.) Europe. See *Révision des Graminées* 1: 129. 1829, *Mitteilungen der Thüringischen Botanischen Vereins* 13-14: 57. 1899 and *Synopsis der mitteleuropäischen Flora* 2(1): 563. 1901, *Allgemeine Botanische Zeitschrift für Systematik, Floristik, Pflanzengeographie* 14: 94. 1908, *Bulletin of the Faculty of Science Egyptian University* 17: 175. 1941, *Willdenowia* 19: 410. 1990.

Spinifex L. = Ixalum Forst.f.

From the Latin *spina*, *ae* "a thorn, spine," referring to the pointed and woody leaves or to the inflorescences, to the female spikelet clusters, large and deciduous head of bristle-tipped racemes.

About 4-5 species, Southeast Asia, India to China, Australia. Panicoideae, Panicodae, Paniceae, perennial, stout, herbaceous, vigorous, coarse, tough, much branched, bushy, decumbent, rhizomatous and caespitose, usually with creeping stems or stolons rooting at the nodes, auricles absent, leaf blades concave or convolute, ligule a fringe of hairs, hard leaves somewhat thickened and more or less pointed to spine-tipped, leaf sheath short and broad, plants dioecious or partially androdioecious, compound inflorescence terminal, with or without hermaphrodite florets, male and female inflorescences dimorphic, male inflorescence hemispherical, dorsally compressed spikelets, female inflorescence globular, clusters of spikes subtended by large bract-like spatheoles, male spikelets on separate plants, bisexual or female spikelets 1-flowered with spiny bracts in heads,

2 glumes more or less equal, membranous to crustaceous upper lemma with flat margins, palea present, 2 lodicules membranous and not toothed, 3 or 0 stamens or 3 staminodes, ovary glabrous, 2 stigmas, fruit medium sized and dorsiventrally compressed, pioneer, stabilizers of coastal sand dunes and beaches, seeds will not germinate in the presence of light, halophytic, excellent tolerance to salinity, species of open habitats and harsh environments, in sandy habitats along coastal beaches, open beach sites, sea shores, on sandy surfaces, on coastal dunes, binding coastal sand dunes, sometimes confused with the species of the genera *Triodia* R. Br. or *Plectrachne* Henrard, type *Spinifex squarrosus* L., see C. Linnaeus, *Mantissa Plantarum*. 2: 163, 300. 1771, *T.N.Z.I.* 12: 355. 1880 and *Grasses of Burma* ... 366. 1960, *Nuytsia* 5: 67-74. 1984, *New Zealand Journal of Botany* 22: 569-574. 1984, *Genera Graminum* 308. 1986, *Newslett. Cheplick and Harry Demetri, "Impact of saltwater spray and sand deposition on the coastal annual *Triplaxis purpurea* (Poaceae)." *American Journal of Botany* 86: 703-710. 1999, *Taxon* 49(2): 257. 2000, Jean-Michel Gagné and Gilles Houle, "Factors responsible for *Honckenya peploides* (Caryophyllaceae) and *Leymus mollis* (Poaceae) spatial segregation on subarctic coastal dunes." *American Journal of Botany* 89: 479-485. 2002, *Flora of Australia* Volume 43, Poaceae 1: 122-123. 2002, Megan E. Griffiths and Colin M. Orians, "Responses of common and successional heathland species to manipulated salt spray and water availability." *American Journal of Botany* 90: 1720-1728. 2003.

Species

S. sp.

in China: lie chi shu, lie ci shu

S. hirsutus Labill.

Australia. Perennial, gray, stout, robust, dioecious, much-branched, leaf blades flat ribbed, hairy, vigorous and strong stoloniferous habit, creeping stolons rooting at the nodes, male and female flowers are borne on different plants, male inflorescence a terminal cluster of stalked racemes, female inflorescence a large globose spiny head of numerous sessile racemes, single spikelet enclosed by a large and silky-hairy bract, excellent tolerance to salinity, low water-logging tolerance, useful for erosion control and sand dune restoration, excellent for the stabilization of active dune sands on the seashore, high drought and salt wind tolerance, unpalatable to stock, grows on dune sands and sands of the seashores, exposed dunes, see *Novae Hollandiae Plantarum Specimen* 2: 81, t. 230-231. 1806-1807 and *Nuytsia* 5(1): 67-74. 1984, Ian Abbott, Neville Marchant and Ray Cranfield, "Long-term change in the floristic composition and vegetation structure of Carnac Island, Western Australia." *Journal of Biogeography* 27(2): 333-346. Mar 2000,

M. Horrocks, Y. Deng, J. Ogden and D.G. Sutton, "A reconstruction of the history of a Holocene sand dune on Great Barrier Island, northern New Zealand, using pollen and phytolith analyses." *Journal of Biogeography* 27(6): 1269-1277. Nov 2000.

in English: rolling spinifex, spinifex, spiny rolling-grass, spring rolling grass, roly-poly, hairy spinifex, coastal spinifex, beach spinifex, dune spinifex, sand spinifex grass, sand spinifex, spinifex dune grass, silver grass

S. inermis Banks & Sol. ex Hook.f.

New Zealand. See *Flora New Zealand* 1: 292. 1855.

S. littoreus (Burm.f.) Merr. (*Spinifex squarrosus* L.; *Stipa littorea* Burm.f.; *Stipa spinifex* L.)

Southeast Asia, India, Malaysia. Erect, hard, trailing, stout, creeping, many noded, stoloniferous, rooting and branching at the nodes, leaf sheaths ciliate and imbricate, leaf blades distichous, leaves thick and very pungent, ligule densely ciliate, usually dioecious, flowering shoots ascending, male spikelets lanceolate, female spikelets lanceolate-oblong, female inflorescence globose, male inflorescence 2-5 clustered turbinate heads, dried grass used as a fuel, excellent sand-binder, low value fodder, coastal sand dunes, on sandy beaches, dunes of seashore, see *Mant. Pl.* 34. 1767, *Systema Naturae, Editio Decima* 2: 98. 1767, *Flora Indica* ... *non Prodromus Florae Capensis* 29. 1768, *Mantissa Plantarum* 300. 1771 and *Handb. Fl. S. longifolius R. Br. (*Spinifex littoreus* var. *longifolius* (R. Br.) Backer)

Australia. Stout perennial grass, forming tussocks, stems creeping at the base, leaf blades are narrow rigid thick acicular, male and female flowers are borne on different plants, male inflorescences have spikelets alternately arranged on clustered spikes, female inflorescences spherical in outline and the seeds are clustered at the center, female inflorescences straw-colored when mature, frost sensitive, on the sand dunes along the beaches, exposed dunes, the fast-growing hybrid *Spinifex alterniflorus* has characteristics intermediate to *Spinifex hirsutus* and *Spinifex longifolius*, see *Prodromus Florae Novae Hollandiae* 198. 1810 and *De Nuttige Planten van Nederlandsch- Indië* 1: 188. 1928, J.C.Z. Woinarski, A. Fisher, K. Brennan, I. Morris and R. Chatto, "Patterns of bird species richness and composition on islands off Arnhem Land, Northern Territory, Australia." *Austral. Ecology* 26(1): 1-13. Feb 2001, Graham G. Thompson, Philip C. Withers, Eric R. Pianka and Scott A. Thompson, "Assessing biodiversity with species accumulation curves; inventories of small reptiles by pit-trapping in Western Australia." *Austral. Ecology* 28(4): 361-383. Aug 2003.

in English: long-leaved spinifex, spinifex, coastal spinifex, sand spinifex, beach spinifex, true spinifex, sea-coast grass, sandstay, porcupine grass

S. sericeus R. Br. (*Spinifex hirsutus* sensu Jessop, non Labill.)

Australia, Victoria, Queensland, Tasmania, New South Wales, New Zealand, Pacific Islands. Perennial, vigorous, leafy, dioecious, stout creeping, stoloniferous, trailing runners, leaf sheaths coriaceous, ligule a tiny ciliate rim, leaves densely silvery-silky and clustered at the nodes, bracts at the base of each male and bisexual spike, hairy or silky male spikelets rigid and acute with 2 male florets, bisexual spikelet solitary on the scabrous rachis of the spikes, lower floret neuter or sterile, upper floret female, low waterlogging tolerance, common on coastal sand dunes, pioneer grass forming colonies, effective sand stabilizer and sand-binding, high drought and salt wind tolerance, see *Prodromus Florae Novae Hollandiae* 198. 1810, *T.N.Z.I.* 12: 355. 1880 and *Nuytsia* 5: 67-74. 1984, K.M. Maze and R.D.B. Whalley, "Effects of salt spray and sand burial on *Spinifex sericeus* R. Br." *Australian Journal of Ecology* 17: 9-19. 1992, Cameron E. Webb, Ian Oliver and Anthony J. Pik, "Does Coastal Fore-dune Stabilization with *Ammophila arenaria* Restore Plant and Arthropod Communities in Southeastern Australia?" *Restoration Ecology* Volume 8, Issue 3: 283-288. Sep 2000.

in English: rolling spinifex, spinifex, sand spinifex grass, beach spinifex, spiny rolling-grass, roly-poly, hairy spinifex, coastal spinifex, silver grass, silvery sand grass

in New Zealand: kowhangatara

Spirochloe Lunell = *Lepturus* R. Br., *Schedonnardus* Steud., *Sporichloe* Pilger

From the Greek *speira* "a spiral, coil" and *chloe*, *chloa* "grass."

Chloridoideae, Cynodonteae, see *Supplementum Plantarum* 13, 114. 1781 [1782], *Prodromus Florae Novae Hollandiae* 207. 1810, *The Genera of North American Plants* 1: 81. 1818, *Systema Vegetabilium, editio decima sexta* 1: 300. 1825, *Synopsis Plantarum Glumacearum* 1: 146. 1854 [1855], *Annual Report of the Geological Survey of Arkansas* 1888(4): 236. 1891 and *American Midland Naturalist* 4: 220. 1915, *Contributions from the United States National Herbarium* 41: 138, 193, 200. 2001.

Spirotheros Raf. = *Heteropogon* Pers.

Possibly from the Greek *speiro*, *sperro* "sow seed" and *thereios*, *theros* "summer, in summer, summer-time."

Panicoideae, Andropogoneae, Anthistiriinae, see *Species Plantarum* 2: 1045. 1753, *Syn. Pl.* 2: 533. 1807, *Bulletin Botanique [Genève]* 1: 221. 1830, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 2(3): 254. 1832, *Die Natürlichen Pflanzenfamilien* 2(2): 29. 1887, *Index Kewensis* 2: 967. 1895 and *N. Amer. Fl.* 17: 127. 1912, E.D. Merrill, *Index rafinesquianus*. 76. 1949, *Kew Bulletin* 1954: 74. 1954, *Contributions from the United States National Herbarium* 46: 248-249, 607. 2003.

Spodiopogon Trinius = *Eccoilopus* Steud.

Greek *spodos*, *spodia* "ashes, ash gray" and *pogon* "a beard," referring to the hairy inflorescences; see Carl Bernhard von Trinius, *Fundamenta Agrostographiae*. 192. 1820.

About 9-10 species, temperate and subtropical Asia, Middle East. Panicoideae, Andropogonodae, Andropogoneae, Andropogoninae, or Panicoideae, Andropogoneae, Saccharinae, perennial or rarely annual, stems slender to stout, internodes solid, more or less leafy, leaves linear to lanceolate, sometimes with falsely petiolate leaf blades, plants bisexual, inflorescence paniculate densely hairy, open or contracted panicle, racemes with 1 sessile spikelet between 2 pedicellate, spikelets paired, 2-flowered, upper flower hermaphrodite, lower flowers male, 2 glumes awned or awnless, lower glume 5- to 9-nerved papery and convex, upper glume 3- to 9-nerved, upper lemma bifid and awned, ornamental, grasslands, open hillsides, related to *Saccharum*, type *Spodiopogon sibiricus* Trin., see *Fundamenta Agrostographiae* 192, t. 17. 1820, *Synopsis Plantarum Glumacearum* 1: 123. 1854 and *Grasses of Burma ...* 246-247. 1960, *Journal of Ecology* 87(4): 583-597. Aug 1999, *Contributions from the United States National Herbarium* 46:

Sporichloe Pilger = *Schedonnardus* Steud., *Spirochloe* Lunell

Greek *spora*, *sporos* "seed, spore" and *chloe*, *chloa* "grass," see *Synopsis Plantarum Glumacearum* 1: 146. 1854 [1855] and *American Midland Naturalist* 4: 220. 1915.

Sporobolus R. Br. = *Agrosticula* Raddi, *Bauchea* E. Fourn., *Bennetia* Raf., *Cryptostachys* Steud., *Diachyrium* Griseb., *Spermachiton* Llanos, *Spermatochiton* Pilger, *Triachyrum* Hochst., *Triachyrum* Hochst. ex A. Br., *Triachyrum* A. Braun

From the Greek *spora*, *sporos* "seed, spore" and *ballo*, *bolis*, *bolos* "casting," *boleo*, *bollein* "to throw," in reference to the dropping and the dispersion of the seeds; see Robert Brown (1773-1858), *Prodromus florae Novae Hollandiae et Insulae van-Diemen*. 169. London 1810.

About 100-160 species, tropical and warm temperate, subtropical. Chloridoideae, Eragrostideae, or Chloridoideae, Cynodonteae, Sporobolinae, or Chloridoideae, Zoysieae, Sporobolinae, perennial or annual, habitat variable, herbaceous, usually erect or decumbent, tufted or creeping, rhizomatous or stoloniferous, culm nodes glabrous, usually glandular or not, no auricles, ligule a short rim of hairs, sheaths ciliate or not, leaves linear and narrow and more or less setaceous, plants bisexual, inflorescence a panicle or a false spike, inflorescence branches whorled or not, open or contracted panicle exerted or partially included in the uppermost sheath, small spikelets stalked and disarticulating above the very unequal glumes, 1 floret bisexual, 2 glumes narrow and acuminate, glumes deciduous or persistent, 1-nerved lemmas awnless and membranous, palea often splitting as the grain develops, lodicules present or

absent, stamens 1-3, ovary glabrous without the apical appendage, 2 stigmas plumose, small fruit more or less compressed, loose pericarp mucilaginous and sticky, cleistogamous spikelets absent or present and axillary, sometimes halophytic, weed species, cultivated as ornamentals, smutgrass plants generally unpalatable to cattle, furnish forage for livestock and wildlife, useful pasture species, rush grass, edible grains, seeds an important food source for birds, some species used in revegetation, growing in pampas, marginal habitats, open places in savannah, dry savannah, rainforest, grasslands, arid places, prairies, roadsides, coastal sand dunes, coastal salt flats, dry or stony soils, mangrove swamps, seasonally flooded heavy clays, saline soils, continuous morphological variation, taxonomically a difficult genus, species intergrading and often hard to separate, genus sometimes confused with *Eragrostis* Wolf, see also *Thellungia* Stapf, type *Sporobolus indicus* (L.) R. Br., see *Flora Boreali-Americana* 1: 52. 1803, *Prodromus Florae Novae Hollandiae* 169-170. 1810, *Essai d'une Nouvelle Agrostographie* 16, 148, 182, t. 5, f. 8. 1812, *Agrostografia brasiliensis* 33, t. 1, f. 2. 1823, *Bulletin Botanique [Genève]* 1: 220. 1830, *Révision des Graminées* 2: 421, t. 124. 1831, *Flora* 24: 712. 1841, *Flora* 33: 229. 1850, *Fragmentos de Algunas Plantas Filipinas* 25. 1851, *Synopsis Plantarum Glumacearum* 1: 181. 1854, *Bull. Species

S. sp.

South America, Peru. See Louis Wittmack, "Plants and Fruits." in Wilhelm Reiss and Alphons Stübel, *Necropolis of Ancón in Peru*, vol. 3, pt. 13. New York, London and Berlin 1880-1887.

S. acinifolius Stapf

South Africa, Kalahari. Perennial, rhizomatous with much-branched rhizomes, leaves pointed, spikelets solitary and terminal, see *Flora Capensis* 7: 581. 1900.

in English: limestone dropseed

in South Africa: kalkgras

S. actinocladius (F. Muell.) F. Muell. (*Sporobolus australasicus* sensu Jessop, non Domin; *Vilfa actinoclada* F. Muell.) (from the Greek *aktis*, *aktin* "a ray" and *klados* "a branch")

South Australia, New South Wales, Queensland, Northern Territory. Perennial, annual or biennial, caespitose, slender, erect, leaves spiny-ciliate with margins hirsute, leaf blades flat and linear-lanceolate, inflorescence spicate with branches finally spreading, spikelets borne in small false spikes, spikelets clustered toward the apices of branches, glumes unequal, lower glume acute and hyaline, upper glume acute and shorter than the spikelet, lemma acuminate, palea shorter than lemma, palatable and nutritious, indicator of poor rangeland condition, grows on floodplains, alkaline soils, sandy soils, inland rivers and creeks, black soils, see *Fragmenta Phytographiae Australiae* 6: 84. 1867, *Fragmenta Phytographiae Australiae* 8: 140. 1873.

in English: ray grass, Katoora grass, Katoora

S. acuminatus (Trin.) Hack. (*Sporobolus acuminatus* (Trin.) Kuhl., nom. illeg., non *Sporobolus acuminatus* (Trin.) Hack.; *Vilfa acuminata* Trin.)

South America, Brazil, Argentina, Paraguay. See *Species Graminum* 3: t. 348. 1835-1836 and *Repertorium Specierum Novarum Regni Vegetabilis* 7: 373. 1909, *Comissão de Linhas Telegraficas Estratégicas de Matto-Grosso ao Amazonas, Botanica* 67(Bot. 11): 92. 1922.

S. adustus (Trin.) Roseng., B.R. Arrill. & Izag. (*Sporobolus aeneus* (Trin.) Kunth; *Sporobolus aeneus* var. *subbulbosus*

(Arechav.) Parodi; *Sporobolus subbulbosus* Arechav.; *Vilfa adusta* Trin.)

South America, Brazil, Argentina, Uruguay, Paraguay. Linear or filiform leaf blades glabrous or pilose, leaves flat or involute, panicle narrowly pyramidal with branches naked at the base, smooth spikelets, similar to *Sporobolus aeneus*, see *De Graminibus Paniceis* 23. 1826, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 213. 1833, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 6,4(1-2): 80. 1840, *Anales del Museo Nacional de Montevideo* 1: 343, t. 35. 1896 and *Revista de la Facultad de Agronomía y Veterinaria* 6(2): 161, f. 16. 1928, *Gramíneas Uruguayas* 270, f. 112. 1970.

S. aeneus (Trin.) Kunth (*Agrostis sporobolus* Spreng.; *Sporobolus adustus* (Trin.) Roseng., B.R. Arrill. & Izag.; *Sporobolus aeneus* f. *parviflora* Parodi; *Sporobolus aeneus* var. *barbicollis* Hack.; *Sporobolus aeneus* var. *subbulbosus* (Arechav.) Parodi; *Sporobolus aeneus* var. *typica* Parodi; *Sporobolus camporum* Swallen; *Sporobolus eximius* (Nees ex Trin.) Ekman; *Sporobolus eximius* (Nees ex Trin.) Kuhlmann, nom. illeg., non *Sporobolus eximius* (Nees ex Trin.) Ekman; *Sporobolus sporobolus* (Spreng.) Kuntze; *Sporobolus sprengelii* Kunth; *Sporobolus subbulbosus* Arechav.; *Vilfa adusta* Trin.; *Vilfa aenea* Trin.; *Vilfa aenea* var. *angustifolia* Döll; *Vilfa aenea* var. *latifolia* Döll; *Vilfa eximia* Nees ex Trin.)

Bolivia, central and southern Brazil, Paraguay. Perennial, caespitose, shortly rhizomatous, leaves mainly basal, leaf blades linear glabrous pungent with ciliate margins, panicles narrowly oblong with ascending branches in dense whorls, spikelets smooth, lower glume acute or acuminate, in rocky places, cerrado, on sandy soil, campos, intergrades with *Sporobolus sprengelii*, see *Novi Proventus Hortorum Academicorum Halensis et Berolinensis* 46. 1819, *De Graminibus Paniceis* 23. 1826, *Révision des Graminées* 1: 68. 1829, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 213. 1833, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 6,4(1-2): 77, 80. 1840, *Flora Brasiliensis* 2(3): 34. 1878, *Anales del Museo Nacional de Montevideo* 1: 343, t. 35. 1896, *Revisio Generum Plantarum* 3(3): 369. 1898 and *Bulletin de l'Herbier Boissier, sér. 2, 4*(3): 278. 1904, *Arkiv för Botanik utgivet av K. S. africanus (Poir.) Robyns & Tournay (*Agrostis africana* Poir.; *Agrostis capensis* Willd., nom. illeg., non *Agrostis*

capensis (L.) Lam.; *Agrostis spicata* Thunb., nom. illeg., non *Agrostis spicata* Vahl; *Sporobolus capensis* Kunth; *Sporobolus capensis* (Willd.) Kunth; *Sporobolus indicus* (L.) R. Br.; *Sporobolus indicus* var. *africanus* (Poir.) Jovet & Guédès; *Sporobolus indicus* var. *capensis* Engl.; *Vilfa africana* (Poir.) P. Beauv.; *Vilfa capensis* P. Beauv.)

Tropical East Africa, Ethiopia, South Africa. Perennial or biennial, coarse, stiff, tussocky, densely tufted, erect or oblique, wiry, rhizomatous, scented roots, very persistent, tough leaves and stems, bulbous glossy green base, leaf blades inrolled or flat, leaf sheath glabrous, basal leaf sheaths papery or almost coriaceous and lacking woolly hairs at the collar, leaves dark green and shiny, no ligule or inconspicuous, inflorescence not whorled, flowering heads usually covered with a black smut, narrow and contracted spike-like panicle with rigid branches more or less appressed uniformly, spikelets narrowly lanceolate very dense, glumes unequal, lower glume obtuse broadly oblong, upper glume acute and 1-nerved, lemma ovate acute, 3 stamens, seeds reddish brown and ellipsoid, spikelets eaten by local people, the seed head resembles a rat's tail, reproduces from seed, noxious vigorous weed, a strong aluminium accumulator, used for thatching and for making baskets and hats, drought resistant, tolerant of heavy grazing, fodder, green leaves high in crude protein, generally unpalatable to stock or relatively palatable, young plants sometimes eaten by cattle, mature plants relatively unpalatable, low nutritional value, can provide valuable grazing, young inflorescences eaten by baboons, used in traditional medicine for wounds and snake bite, found on coastal soils, tracks, in disturbed areas, low lying areas, near ponds, overgrazed and disturbed veld, compacted soils, degraded pastures, overgrazed veld, near streams or rivers, in moister areas, roadsides and waste places, in wet swampy areas, in hill and coastal pastures, on the alluvial soils, irrigated pastures, grassland, montane grassland, clearings, in forest and grassland edge, similar to *Sporobolus fertilis* (Steudel) Clayton and *Sporobolus indicus*, see *Prodromus Plantarum Capensium, ...* 19. 1794, *Species Plantarum* 1: 372. 1797, *Encyclopédie Méthodique. Botanique ... Supplément* 1: 254. 1810, *Prodromus Florae Novae Hollandiae* 170. 1810, *Essai d'une Nouvelle Agrostographie* 16, 146-147, 181. 1812, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 212. 1833 and *Bulletin du Jardin Botanique de l'État Bruxelles* 25: 242. 1955, *Grasses of Burma ...* 627. 1960, *Kew Bulletin* 19(2): 291. 1965, *Taxon* 22: 163. 1973, *Bothalia* 17: 135-136. 1987, *Bothalia* 18: 114-119. 1988, *Bothalia* 21(2): 163-170. 1991, *Blumea* 35: 393-458. 1991, *Opera Botanica* 121: 159-172. 1993, *Aust. in English: dropseed, rat's tail, rat-tail dropseed, rat's tail dropseed, Indian rat's tail grass, rat's tailgrass, rattail grass,

rattail, South African rat-tail grass, rush grass, giant Parramatta grass, tough dropseed, smutgrass, tussock grass, African dropseed, African dropseed grass, Parramatta grass

in Nigeria: goor, pagame

in South Africa: rotstert fynsaadgras, saadgras, taai-pol, taai-polfynsaadgras, vleigras, matshiki

in Pacific: mosie hikutaha

S. agrostoides Chiov. (*Sporobolus filipes* Stapf ex Napper)

East Africa, Somalia, Zaire. Perennial, slender, ascending, loosely tufted, knotty rootstock, short oblique rhizome, basal sheaths papery and keeled, soft leaves, large panicle lanceolate to ovate and diffuse, lower glume narrowly lanceolate acute, upper glume ovate or lanceolate-oblong, lemma narrowly ovate, weed species, alluvial soils, woodlands, along roadsides, cultivation, shade, see *Annuario del Reale Istituto Botanico di Roma* 7: 67, t. 5. 1897 and *Kirkia* 4: 173. 1964.

S. airiformis Chiov.

Ethiopia, Arabia. Perennial, slender, erect, cushion forming, densely tufted, leaves mainly basal, leaf blades flat or convolute, indurated basal sheaths densely tomentose to woolly, panicle ovate and open to diffuse, lower glume ovate to oblong, upper glume narrowly ovate, lemma obtuse narrowly ovate, on rocky slopes, sandstones, limestones, open *Acacia* woodlands, a segregate from *Sporobolus stapfianus*, similar to *Sporobolus myrianthus*, see *Missione Biologica nel Paese dei Borana*, 4. *Raccolte Botaniche* 277. 1939.

S. airoides (Torrey) Torrey (*Agrostis airoides* Torr.; *Sporobolus airoides* var. *wrightii* (Munro ex Scribn.) Gould; *Sporobolus altissimus* Vasey; *Sporobolus diffusissimus* Buckley; *Sporobolus tharpitii* Hitchc.; *Sporobolus wrightii* Munro ex Scribn.; *Vilfa airoides* (Torr.) Trin. ex Steud.)

North America, U.S., New Mexico, Texas. Perennial bunchgrass, long-lived, leafy, densely tufted, no rhizomes, dense root system, erect, coarse, tough, solid, pale green, growing in large and dense clumps, fibrous roots, long slender blades, leaves fibrous, panicle pyramid-shape with widely spreading branches, seed heads loose and open, 1-flowered spikelets, seeds free from the lemma, reproduces from seeds and tillers, a famine food, native pasture species, tolerant of both drought and inundation by water, forage, fodder, fair to low quality hay, unpalatable and tough when mature and dry, palatable while succulent, relished by jackrabbits, ground cover, useful for erosion control, revegetation of saline and alkaline sites, range reseeding and revegetation of disturbed areas, used by Native Americans in California for basketry and weaving, found in saline and nonsaline soils, on harsh sites, from sand to clay, on alkaline flats, bottom lands and flats, low alluvial floodplains, in meadows and valleys, on sandy washes, moist sites, on marsh borders, on rocky soils and open plains, in arid and semiarid regions, see *Annals of the Lyceum of Natural History of New York*

in English: dropseed, rough dropseed, tall dropseed, tall dropseed grass, longleaf dropseed

in French: sporobole rude

S. atrovirens (Kunth) Kunth (*Agrostis atrovirens* (Kunth) Roem. & Schult.; *Vilfa atrovirens* Kunth)

Mexico. Perennial, caespitose, erect, simple, glabrous, leaves basal, fodder, see *Nova Genera et Species Plantarum* 1: 138. 1815 [1816], *Systema Vegetabilium* 2: 361. 1817, *Révision des Graminées* 1: 68. 1829.

in Mexico: zacate

S. auriculatus Vasey (*Muhlenbergia arenacea* (Buckley) Hitchc.)

U.S. See *Proceedings of the Academy of Natural Sciences of Philadelphia* 14: 89. 1862, *Contributions from the United States National Herbarium* 3(1): 64. 1892 and *Proceedings of the Biological Society of Washington* 41: 161. 1928.

S. australasicus Domin

Australia. Annual, slender, caespitose, ligule a fringe of hairs, open inflorescence paniculate, spikelets uniformly distributed in inflorescence, lower glume 1-nerved, an increaser species, low palatability, readily eaten even when dry and after seed fall, a coloniser of scalded ground, useful for erosion control, grows on loam flats, on denuded areas, see *Repertorium Specierum Novarum Regni Vegetabilis* 9: 553. 1911, *Blumea* 35: 451. 1991, *Australian Systematic Botany* 12(3): 375-448. 1999.

in English: Australasian dropseed, Australian dropseed

S. bahamensis Hack.

Bahamas. See *Österreichische Botanische Zeitschrift* 52(2): 56. 1902.

S. bechuanicus Gooss.

South Africa, Botswana. Perennial, rare, tufted, panicle spike-like, glumes and lemmas cartilaginous, see *Bulletin of Miscellaneous Information Kew* 1934: 197 f. 2. 1934.

S. bianouensis De Wild.

Africa. See *Annales de la Société Scientifique de Bruxelles* 39: 137. 1920.

S. blakei De Nardi ex B.K. Simon

Central Australia. Perennial, erect, caespitose, leaf blades usually flattened, leaf sheaths distinctly fibrous at base of plant, inflorescences of spicate main branches contracted and spiciform, spikelets contracted along primary inflorescences branches, lower glume ovate without nerves, upper glume elliptic, lemma lanceolate carinate 1-nerved, palea entire, a resurrection grass, drought-tolerant, arid regions, moisture depressions, water courses, similar to *Sporobolus elongatus*, see *Austrobaileya* 4: 57. 1993.

S. bogdanii Napper

Africa. See *Kirkia* 3: 119. 1963.

S. bogotensis Swallen & García-Barr. (*Sporobolus lasiophyllus* Pilg.)

Colombia, Ecuador. Perennial, caespitose, erect, straight, leaves basal, leaf sheaths tightly imbricate and keeled, ligule a line of short hairs, leaf blades linear and coriaceous, panicle pyramidal and open with branches verticillate, spikelets shortly pedicellate to sessile, glumes unequal, first glume lanceolate and acute, second glume ovate and acute, lemma ovate acute, 2 rounded lodicules, 3 stamens, grazed pastures, close to *Sporobolus lasiophyllus* Pilger and *Sporobolus purpurascens* (Sw.) Ham., see *Caldasia* 2(8): 301. 1943.

S. brasiliensis (Raddi) Hack. (*Aira brasiliensis* Raddi; *Eragrostis airoides* Nees)

Brazil. Perennial, erect, leaning, along forest edges, grasslands, along roadsides, open areas, see *Agrostografia Brasileira* 36. 1823, *Flora Brasiliensis seu Enumeratio Plantarum* 2: 509-510. 1829 and *Bulletin de l'Herbier Boissier, sér. 2*, 4(3): 278. 1904, *Fontqueria* 46: [i-ii], 1-259. 1997.

S. brockmanii Stapf (*Sporobolus capensis* var. *altissimus* Chiov.; *Sporobolus indicus* (L.) R. Br. var. *microspiculus* Chiov.) (named for the British naturalist Ralph Evelyn Drake-Brockman, b. 1875, plant collector, from 1904 to 1915 Army medical officer in Abyssinia and Somaliland, author of *British Somaliland*. London 1912 and *The Mammals of Somaliland*. London 1910; see Alain Campbell White and Boyd Lincoln Sloane, *The Stapelieae*. Pasadena 1937; Alexander Bryson, *Report on the Climate and Principal Diseases of the African Station*. London 1847)

Somalia. Perennial, tufted, short oblique rhizome, leaves mostly basal, ligule pubescent, basal sheaths papery, inflorescence linear, narrow spikes, lower glume lanceolate, lemma ovate, low to moderate palatability, open areas, mountains, plains grasslands, slopes, coastal plains, dunes, sand dunes, stabilized dunes, open sandy areas, see *Species Plantarum* 63. 1753, *Prodromus Florae Novae Hollandiae* 170. 1810, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 212. 1833, *Annuario del Reale Istituto Botanico di Roma* 6: 168, t. 11. 1896 and *Bulletin of Miscellaneous Information Kew* 6: 220. 1907, *Taxon* 22: 163. 1973.

S. buckleyi Vasey (for the American naturalist Samuel Botsford Buckley, 1809-1884, traveler, geologist, explorer, plant collector in Mexico and U.S., worked with Torrey and Gray; see J.H. Barnhart, *Biographical notes upon botanists*. 1: 276. 1965; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. 168. 1964; S. Lenley et al., *Catalog of the manuscript and archival collections and index to the correspondence of John Torrey*. 449. Library of the New York Botanical Garden. 1973; Samuel Wood Geiser, *Naturalists of the Frontier*. 77, 211, 213, 263, 271. Dallas 1948; E.L. Core, "The botanical exploration of the Southern Appalachians, 2. Flora." *Virginia Polytechnic Institute and State University, Research Division Monogr.* 2: 42, 44. 1970; H.N. Clokie, *Account of*

the Herbaria of the Department of Botany in the University of Oxford. 140. Oxford 1964; Ignatz Urban, *Geschichte des Königlichen Botanischen Museums zu Berlin-Dahlem (1815-1913). Nebst Aufzählung seiner Sammlungen*. 1916; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993; Irving William Knobloch, compiled by, "A preliminary verified list of plant collectors in Mexico." *Phytologia Memoirs*. VI. Plainfield, N.J. 1983)

Mexico, U.S., Texas, Belize. Perennial, densely caespitose, erect, simple, glabrous, internodes solid, leaves basal, inflorescence drooping, panicle branches spreading, glumes acute, fodder, good forage, disturbed scrub, along clearings, see *Bulletin of the Torrey Botanical Club* 10: 128. 1883.

in English: Buckley's dropseed, Buckley dropseed

in Mexico: zacatón pulguero

S. caespitosus Kunth (*Sporobolus caespitosus* Kunth; *Vilfa caespitosa* (Kunth) Trin.)

Ascension Island. Endangered or extinct species, see *Révision des Graminées* 2: 423 t. 125. 1831, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 6,4(1-2): 72. 1840.

S. camporum Swallen (*Sporobolus aeneus* (Trin.) Kunth; *Sporobolus aeneus* var. *angustifolius* sensu Ekm., non Döll; *Vilfa aenea* Trin.)

Southern Brazil and Uruguay. Panicle pyramidal, see *De Graminibus Paniceis* 23. 1826, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 213. 1833 and *Sellowia* 7: 10. 1956, *Flora Illustrata Catarinense* 1(Gram.): 1-345. 1981.

S. carmichaeli Kunth (*Agrostis ramulosa* Carmich.; *Vilfa ramulosa* Kunth)

Atlantic. Nom. illeg., non *Agrostis ramulosa* Carmich., see *Species Plantarum* 1: 61-63. 1753, *Nova Genera et Species Plantarum* 1: 137. 1815 [1816], *Systema Vegetabilium* 2: 361. 1817, *Transactions of the Linnean Society of London* 12: 504. 1819, *Révision des Graminées* 1: 68. 1829.

S. caroli Mez (*Sporobolus lindleyi* sensu Benth., non (Stuedel) Benth.; *Sporobolus subtilis* F. Muell., nom. illeg., non *Sporobolus subtilis* Kunth)

South Australia, New South Wales, Victoria, Queensland, Northern Territory. Perennial or annual, caespitose, slender, leaf blade flat and ribbed, leaves linear-lanceolate and scabrous, loose inflorescence a pyramidal and compound panicle very open and much branched, lowest inflorescence branches whorled, small delicate spikelets pedicellate, floret 1 or rarely 2, pedicels spreading and longer than the spikelets, glumes unequal and acute, lower glume hyaline, palea splitting very early, heavy seeding, a coloniser of scalded ground, high quality forage, grows on floodplains, moist

soil, inland rivers and creeks, see *Fragmenta Phytographiae Australiae* 8: 140. 1873 and *Repertorium Specierum Novarum Regni Vegetabilis* 17(19-30): 299. 1921, *Austral. Syst. Bot.* 12: 388. 1999, G.D. Cook, "Effects of frequent fires and grazing on stable nitrogen isotope ratios of vegetation in northern Australia." *Austral. Ecology* 26(6): 630-636. Dec 2001, E.N. Bui and B.L. Henderson, "Vegetation indicators of salinity in northern Queensland." *Austral. Ecology* Volume 28, Issue 5: 539-552. Oct 2003.

in Australia: Yakka grass, fairy grass

S. centrifugus (Trin.) Nees (*Sporobolus schlechteri* Schweick.)

Tropical Africa, South Africa. Perennial, herbaceous, tufted, rhizomatous, filiform, ligule inconspicuous, leaf blade thread-like, basal sheaths hard and brittle, old leaf bases persistent, narrow and slender panicle, small spikelets, grazing value unknown, probably grazed by goats and sheep, found in moist well-drained soils, slopes, see *Flora Africae Australioris Illustrationes Monographicae* 158-159. 1841 and *Bothalia* 2: 260, 262, 272-273, t. 5, 7. 1927, *Bulletin of Miscellaneous Information Kew* 1935: 208. 1935, *Transactions of the Royal Society of South Africa* 26: 183, f. 4. 1938.

in English: olive dropseed

in South Africa: mabele a dinonyana

S. ciliatus J. Presl (*Agrostis villosa* Rchb. ex Spreng., nom. illeg., non *Agrostis villosa* Vill.; *Sporobolus rupestris* Kunth; *Sporobolus villosus* (Rchb. ex Spreng.) Kunth; *Vilfa ciliata* (J. Presl) Trin., nom. illeg., non *Vilfa ciliata* (Thunb.) P. Beauv.; *Vilfa preslii* Steud.; *Vilfa rupestris* (Kunth) Trin., nom. illeg., non *Vilfa rupestris* Trin.; *Vilfa villifera* Hochst. ex Steud.; *Vilfa villosa* Rchb. ex Trin.)

South America. Annual, tufted, foliage basal, leaf sheaths keeled, ligule ciliate, inflorescence spicate, spikelets clustered, savannah, closely related to *Sporobolus piliferus* (Trin.) Kunth, see *Histoire des Plantes de Dauphiné* 1: 378. 1786, *Essai d'une Nouvelle Agrostographie* 16, 181. 1812, *Gram. Unifl. Sesquifl.* 157. 1824, *Systema Vegetabilium, editio decima sexta* 5(Suppl.): 5. 1828, *Révision des Graminées* 1: 68. 1829, *Species Graminum* 3: t. 252. 1829-30, *Reliquiae Haenkeanae* 1(4-5): 242. 1830, *Révision des Graminées* 1: 267, t. 45. 1830, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 211. 1833, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Tropical East Africa, Ethiopia, Yemen. Perennial, weak, lax, slender, spreading, erect or geniculate and loosely ascending, long rhizomatous with slender creeping rhizomes, basal leaf sheaths papery to herbaceous, leaves flat, panicle narrowly ovate, slender primary branches flexuous and ascending, spikelets clustered at the tips of the branchlets, obtuse lower glume lanceolate to oblong, acute upper glume ovate, lemma narrowly ovate to oblong, growing on field borders, open weedy places, grassland, open stony slopes, see *Tentamen Florae Abyssinicae* ... 2: 396. 1850, *Synopsis Plantarum Glumacearum* 1: 160. 1855 [1854], *Flora* 38: 201. 1855 and *Annuario del Reale Istituto Botanico di Roma* 8: 341. 1908.

S. congoensis Franch. (*Sporobolus eylesii* Stent & Rattray) (named for the British botanist Frederick Eyles, 1864-1937 (d. Salisbury, Rhodesia), plant collector in Rhodesia, his writings include "A record of Plants collected in Southern Rhodesia. Arranged on Engler's System." *Trans. R. Soc. S. Afr.* 5: 273-564. 1916, "A preliminary list of the plants of Southern Rhodesia." *S. Afr. J. Sci.* 8: 277-321. 1912 and "Constituents of the flora of Southern Rhodesia." *S. Afr. J. Sci.* 17: 181-184. 1921; see Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 238. 1994)

Tropical East Africa. Perennial, robust, rhizomatous, softly hairy leaves, pyramidal or whorled inflorescence paniculate, small and dark spikelets, growing in stony ground, shallow soil, rocky places, sandstones, see *Bulletin de la Société d'Histoire Naturelle d'Autun* 8: 369. 1895 and *Proceedings of the Rhodesia Scientific Association* 32: 52. 1933.

S. conrathii (Conrath & Hack.) Chiov. (*Sporobolus micranthus* Conrath & Hack., nom. illeg., non *Sporobolus micranthus* (Steud.) T. Durand & Schinz) (named for the Bohemian botanist Paul Conrath, 1861-1931, naturalist, collector in South Africa; see Mary Gunn and Leslie E. Codd, *Botanical Exploration of Southern Africa*. 122. Cape Town 1981; Frans A. Stafleu and Erik A. Mennega, *Taxonomic literature. Supplement IV: Ce-Cz*. 306. Königstein 1997)

South Africa, Transvaal. Perennial, tufted, fibrous at the base, found in shallow soils, rocky places, see *Österreichische Botanische Zeitschrift* 53(5): 198. 1903, *Annali di Botanica* 13: 49. 1914.

S. consimilis Fresen. (*Sporobolus nogalensis* Chiov.; *Sporobolus robustus* sensu Chippind., non Kunth; *Sporobolus robustus* auct., sensu Altmann & Altmann, non Kunth; *Sporobolus robustus* auct., sensu Dunbar & Dunbar, non Kunth; *Sporobolus robustus* Kunth; *Vilfa consimilis* (Fresen.) Steud.; *Vilfa robusta* (Kunth) Trin.)

Tropical Africa, Ethiopia, South Africa, Namibia, Somalia. Perennial, reedlike, robust, erect, stout, harsh, tussocky,

caespitose, spreading, branching, shortly rhizomatous, sometimes stoloniferous, leaves scabrid and rather rigid, narrow panicle linear with not whorled branches, primary branches simple and ascending, spikelets appressed to the rachis, glumes acute more or less equal keeled and scabrid, both glumes as long as the spikelets, upper glume ovate, 3 anthers, leaves and grains eaten by baboons, usually on sandy soils, swamps, alkaline or saline soils, salt flats, wet places, damp places with a high salt levels, riverbeds, seasonally flooded areas, sand banks, saline swamps, saline grasslands, moist depressions, similar to *Sporobolus latzii*, see *Révision des Graminées* 2: 425. 1832, *Museum Senckenbergianum* 2: 140. 1837, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 6,4(1-2): 54. 1840, *Nomenclator Botanicus. Editio secunda* 2: 767. 1841 and Augustino Osoro Onkware, "Effect of soil salinity on plant distribution and production at Loburu delta, Lake Bogoria National Reserve, Kenya." *Austral. Ecology* 25(2): 140-149. Apr 2000.

in English: whorled dropseed, dropseed, small dropseed

in India: elikathunga gaddi, nari baalada hullu, yellika tungoo gadi

S. creber De Nardi (*Sporobolus indicus* (L.) R. Br. var. *creber* (De Nardi) Veldkamp)

New South Wales, Queensland, Victoria. Perennial, caespitose, erect, sheath enclosing culm, linear leaf blades folded or rolled, ligule a ciliate membrane, inflorescence spicate with branches stiff and appressed, lowermost inflorescence branches shorter than adjacent internodes, 1 floret, spikelets shortly pedicellate, lower glume hyaline acute or obtuse, upper glume acute and hyaline, lemma lanceolate acute 1-nerved, grows in woodland, native grassland, resembling *Sporobolus elongatus*, see *Prodromus Florae Novae Hollandiae* 170. 1810 and *Contributions from the New South Wales National Herbarium* 4(7): 406, pl. 1, 1A. 1973, *Blumea* 35(2): 432. 1991.

in English: slender rat's tail grass, rat's tail grass

S. cruceensis Renvoize

Bolivia, Santa Cruz. Annual, tufted, erect, delicate, leaf blades lanceolate, slender oblong panicles with filiform branches ascending, elliptic spikelets, glumes unequal and membranous, lemma and palea hyaline, stamens 3, see *Gramíneas de Bolivia* 334. 1998.

S. cryptandrus (Torr.) A. Gray (*Agrostis cryptandra* Torr.; *Sporobolus cryptandrus* subsp. *fuscicolus* (Hook.) E.K. Jones & Fassett; *Sporobolus cryptandrus* (Torr.) Gray var. *fuscicola* (Hook.) Pohl; *Sporobolus cryptandrus* var. *involutus* Farw.; *Sporobolus cryptandrus* (Torr.) Gray var. *occidentalis* E.K. Jones & Fassett; *Sporobolus cryptandrus* var. *typicus* (Torr.) E.K. Trin.; *Vilfa tenacissima* var. *fuscicola* Hook.; *Vilfa triniana* Steud.)

North America, Canada, U.S., Mexico, Argentina. Perennial bunchgrass, tufted or solitary culms, solid, bluish green, erect to spreading, leafy, small clumps, persistent green base, shallow rooted, sheaths densely villous with an apical tuft of long hairs, ligules a fringe of hairs, inrolled or flat leaf blades, a distinctive flag leaf located at a right angle to the stem, panicles enclosed in the sheaths for varying lengths, lax terminal inflorescence with spreading branches, very small reddish seeds, prolific seed producer, grains consumed by native Americans, weed species, polymorphic, drought resistant, low palatability when dry, palatability declines with maturity, eaten readily by livestock while green, native pasture species, forage, pioneer plant in disturbed areas, an invader of over grazed sandy soils, a colonizer of drought disturbed and previously cultivated lands, used for revegetation and for reseeding depleted range land, abundant in sand prairie and sand savannah, usually found on sandy soil, well-drained and permeable soils, open and disturbed areas with permeable sandy soils, in disturbed sandy areas, sandy loam, dry sandy ridges and plains, dry prairies, sandy alluvial soils and gravelly soils, areas subjected to seasonal flooding, silty clay loam, clay soil, along railroads, near sea shores, sand hills and dunes, in dry sandy flats along rivers and lakes, see *Annals of the Lyceum of Natural History of New York* 1(1): 151. 1824, *Flora Boreali-Americana* 2: 239. 1839, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. May 2005.

in English: tussock dropseed, tussocky sporobolus

in India: bena joni, chireya ka dana, chiriya-ka-dana, dodda kaare hullu, dodda kari kandakada hullu, doob, galphula, navilu dendi hullu, navilu dondi hullu, nonak, pedda nakka toka, sanna hanchi hullu, tandlen

S. dinklagei Mez

Tropical Africa, Sierra Leone to Ivory Coast. Perennial, caespitose, growing in sandy soils, along roadsides.

in Sierra Leone: koligbiti, saia, tai, taia

S. discosporus Nees (*Sporobolus blephariphyllus* A. Rich.; *Triachyrum adoense* Hochst. ex A. Braun; *Triachyrum discosporum* (Nees) Steud.)

East Africa, Ethiopia. Perennial or annual, tufted, shortly rhizomatous, ciliate leaf blades, basal rosette of leaves, whorled inflorescence, panicle branches 4-6 spiculate, drooping spikelets when old, round disc-like grains strongly flattened, grows in wet areas, open disturbed ground, moist places, overgrazed areas, see *Florae Africae Australioris Illustrationes Monographicae* 158. 1841, *Flora* 24(1841): 1, Intell. 19. 1841, *Tentamen Florae Abyssinicae ...* 2: 398.

1850, *Synopsis Plantarum Glumacearum* 1: 176. 1855 [1854].

in English: disc dropseed

in South Africa: oortjiesgras

in Tanzania: mahwa kinyaturu

S. disjunctus R. Mills ex B.K. Simon

Australia, Queensland. Perennial, erect, caespitose, ligule a ciliate membrane, linear leaf blades flat or involute, inflorescence a single spike or of spicate main branches, inflorescence branches grouped in clusters on the rachis, spikelets shortly pedicellate, lower glume lanceolate 1-nerved, lemma lanceolate carinate 1-nerved, see *Austrobaileya* 4(1): 59, f. 2. 1993.

S. distichivaginitus R.W. Pohl

Guatemala. Annual, caespitose, erect, simple, glabrous, internodes solid, leaves mostly basal, open panicles, see *Novon* 2(4): 325, f. 2. 1992.

S. domingensis (Trin.) Kunth (*Agrostis domingensis* (Trin.) Schult. & Schult.f.; *Sporobolus inordinatus* Mez; *Sporobolus pyramidatus* (Lam.) Hitchc.; *Sporobolus pyramidatus* subsp. *domingensis* (Trin.) Cat. Guerra; *Vilfa domingensis* Trin.)

U.S., Florida. Perennial, caespitose, erect, simple, glabrous, leaves basal, spikelets gray-green, good forage, beach sand, see *Tableau Encyclopédique et Méthodique ... Botanique* 1: 161. 1791, *Neue Entdeckungen im ganzen Umfang der Pflanzenkunde* 2: 59. 1821, *Mantissa* 3(add. 1): 570. 1827, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 214. 1833 and *Repertorium Specierum Novarum Regni Vegetabilis* 17(19-30): 294. 1921, *Manual of the Grasses of the West Indies* 84. 1936, *Fontqueria* 44: 143. 1996, L. Catusus Guerra, "Las gramíneas (Poaceae) de Cuba, I." *Fontqueria* 46: [i-ii], 1-259. 1997.

in English: coral dropseed

S. durus Brongn.

Ascension Island. Endangered or extinct species, see *Voyage autour du Monde* 2(2): 18, t. 4. 1829.

S. effusus Desv. (*Sporobolus effusus* Franch.)

Brazil, Africa. See *Mémoires de la Société d'Agriculture, Sciences et Arts d'Angers* 1: 164. 1831, *Bulletin de la Société d'Histoire Naturelle d'Autun* 8: 370. 1895.

S. elatior Bosser

Africa. See *Adansonia* 9: 339. 1969.

S. elongatus R. Br. (*Sporobolus indicus* (L.) R. Br. var. *elongatus* sensu Veldkamp; *Sporobolus indicus* var. *elongatus* (R. Br.) F.M. Bailey; *Vilfa elongata* (R. Br.) Trin., nom. illeg., non *Vilfa elongata* P. Beauv.)

South Australia, Queensland, New South Wales. Perennial, tufted, clumped, slender, erect, glabrous, leaf sheaths glabrous subcoriaceous to papery, leaf blades folded or rolled,

inflorescence often lax, dense and spike-like panicle narrow with branches erect-spreading or ascending, inflorescence branches longer than adjacent internodes, dark green-gray spikelets densely crowded, 1 floret, glumes subequal or unequal, second glume shorter than the lemma, lemma acute, 2 stamens, seed reddish, native pasture species, weed species difficult to eradicate, common in the tropics, grows in woodland, in plantations and cultivated fields, on open hillsides, along riverbanks, pasture, high rainfall areas, along roadsides and in waste places, similar to *Sporobolus creber*, see *Prodromus Florae Novae Hollandiae* 1: 170. 1810, *Nova Graminum Genera* 154, 305. 1824, *A Synopsis of the Queensland Flora* 651. 1883 and *Botanical Magazine* 55: 394. 1941, *New Zealand Journal of Botany* 29: 117-129. 1991, *Blumea* 35: 451. 1991.

in English: wiregrass, slender rat's tail grass, rat-tail dropseed, rat-tail grass, rat's tail grass, elongate dropseed, hairy grass, yakka grass

in India: ratua

Jovet & Guédès; *Sporobolus indicus* var. *major* (Büse) Baaijens; *Sporobolus indicus* var. *purpureo-suffusus* (Ohwi) T. Koyama)

Asia, India, Himalayas, Nepal. Perennial, tufted, stout, smooth, simple, forming dense clumps, geniculate or erect, culms arising from a fan-shaped aggregation of leaf-bases, leaf sheaths loose and keeled, ligule a shallow rim or a ciliate membrane, auricles pubescent or glabrous, leaves linear and very acute, inflorescence a narrow compressed panicle of tight racemes, branches of inflorescence usually less appressed at base of the inflorescence, spikelets 1-flowered, hyaline lower glume, upper glume pointed, lemma lanceolate and olive gray, palea and lemma equal or subequal, palea with longitudinal grooves, 3 stamens, cultivated, used as a food and fiber plant, ruderal, noxious weed species often found on waste grounds and rubbish tips, disturbed places, tea plantations, at edge of tracks, wet zones, lawns, along roadsides, similar to *Sporobolus africanus*, closely related to *Sporobolus diandrus* (Retzius) P. Beauv., see *Prodromus Florae Novae Hollandiae* 170. 1810, *Essai d'une Nouvelle Agrostographie* 26, 147, 178. 1812, *Plantae Junghuhnianae* 3: 343. 1854, *Synopsis Plantarum Glumacearum* 1: 170. 1854 and *Botanical Magazine* 55: 394. 1941, *Journal of Japanese Botany* 37(8): 235-236, 240, t. 3e. 1962, *Kew Bulletin* 19: 291. 1965, *Taxon* 22: 163. 1973, *Acta Botanica Boreali-Occidentalis Sinica* 5(2): 161. May 2005.

in English: rat's tail, giant Parramatta grass, Bloomsbury grass

S. festivus Hochst. ex A. Rich. (*Sporobolus festivus* var. *dilloniana* Schweinf.; *Sporobolus festivus* var. *fibrosus* Stapf; *Vilfa festiva* (Hochst. ex A. Rich.) Steud.)

Tropical East Africa, Benin, Namibia, Somalia, Mauritania. Perennial or annual, tufted to densely tufted, fibrous at the base, basal leaf sheaths fibrous when old, leaves usually convolute, open panicle delicate and narrowly ovate, primary branches spreading but not whorled, spikelets flushed with purple to red-purple, glumes acute, leaves revive after desiccation, distinctive arrangement of seeds, grains eaten in time of scarcity, pasture, good fodder grass, used for thatching, roots chewed for stomach trouble, growing in sandy soils, deciduous bushlands, open places, open woodlands, vleis, savannahs, shallow gravelly soil, rock crevices, mopane woodlands, stony hillsides, volcanic soils, well-drained areas, see *Tentamen Florae Abyssinicae* ... 2: 398. 1850, *Synopsis Plantarum Glumacearum* 1: 158. 1854, *Bulletin de l'Herbier Boissier, sér. 2, App 2*: 97. 1894 and *Sudania* 142, 155. 1911.

in English: red dropseed, bird's broom, hare's grass

S. filipes Stapf (*Sporobolus agrostoides* Chiov.; *Sporobolus filipes* Stapf ex C.E. Hubb.; *Sporobolus filipes* Stapf ex Napper)

Africa, Uganda. Perennial, tufted, often with ascending stems, leaves smooth and shining, panicle loose, lowermost branches of the panicle single or paired, glumes unequal, see *Annuario del Reale Istituto Botanico di Roma* 7: 67, t. 5. 1897 and *Bulletin of Miscellaneous Information Kew* 1933: 105. 1933, *Kirkia* 4: 173. 1964.

in East Africa: ayweywe

S. fimbriatus (Trin.) Nees (*Sporobolus fimbriatus* var. *latifolius* Stent; *Vilfa fimbriata* Trin.)

South Africa, Botswana, Kenya, Uganda, Sudan and Somalia, Tanzania, Namibia. Perennial bunchgrass, more or less erect, vigorous, unbranched or branched from the lower nodes, tufted, short oblique rhizome, leaves mostly basal, leaf blade expanded and sometimes rolled, basal sheaths papery, leaf sheath compressed and herbaceous, ligule a ring of short hairs, open to slightly contracted panicle with branches arranged irregularly or in whorls, flowers single, spikelets on branchlets usually appressed, lower glume oblong to lanceolate, upper glume ovate, lemma narrowly ovate, famine food, tillers, planted pasture, very high grazing value, palatable good fodder, grains and seed head eaten by baboons, grains pounded and eaten as porridge, useful for erosion control, xerophytic, drought-tolerant, growing in shallow rocky red clay, open deciduous bushland or grassland, heavy soils, well-drained soils, sandy well-drained loam, in shady spots, near water, near rivers or along river courses, moist conditions, semiarid grassvelds, along highways and roadsides, ungrazed sites, under trees, disturbed sites, may be confused with *Sporobolus pyramidalis* or *Sporobolus natalensis*, related to *Sporobolus macranthellus* and *Sporobolus agrostoides*, see *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 6,4(1-2): 69. 1840, *Florae Africae Australioris Illustrationes Monographicae* 156. 1841.

in English: common dropseed, dropseed grass, bushveld dropseed, fringed dropseed, dropseed

in South Africa: blousaadgras, blousygras, fynsaadgras, bosveldfynsaadgras, gewone fynsaadgras, grootsoetgras, grootvleigras, soetvleigras, großes rispengras; matolo-amaholo (Sotho)

S. flagelliferus Peter (*Sporobolus modestus* (Peter) Peter)

Africa, Mauritania. Perennial, usually stoloniferous, swollen culm bases, see *Repertorium Specierum Novarum Regni Vegetabilis, Beihefte* 1(Anh.): 82. 1930, *Feddes Repertorium, Beiheft* 41(1): 288. 1931.

S. flexuosus (Thurb. ex Vasey) Rydb. (*Sporobolus cryptandrus* var. *flexuosus* (Thurb. ex Vasey) Thurb.; *Vilfa cryptandra* var. *flexuosa* Thurb. ex Vasey)

North America, Mexico, U.S. Perennial bunchgrass, short-lived, coarse roots, the very small seeds have a hard seed coat, a famine food, fodder, low to medium palatability, unpalatable and low in nutrition at maturity, useful for erosion control, can tolerate drought, native Americans used mesa dropseed seeds as food, occurs in dry areas, along highway, deep sandy soil, deserts and desert grasslands, on well-drained sand, loamy sands and gravelly soils, see *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 6,4(1-2): 69. 1840, *A Manual of the Botany of the Northern United States* 576. 1848, *Report Upon United States Geographical Surveys West of the One Hundredth Meridian, in Charge of First Lieut. Geo. M. Wheeler ... vol. vi—Botany* 6: 282. 1878, *Geological Survey of California, Botany* 2: 269. 1880 and *Bulletin of the Torrey Botanical Club* 32(11): 601. 1905.

in English: mesa dropseed, dropseed

in Mexico: zacatón, zacatón de los médanos, zacatón flexible

S. floridanus Chapman

North America, U.S., Florida. Wet savannah, see *Flora of the Southern United States* 550. 1860, *A Descriptive Catalogue of the Grasses of the United States* 44. 1885, *Bulletin, Division of Agrostology United States Department of Agriculture* 1: 24. 1895, *Grasses of North America for Farmers and Students* 2: 290. 1896 and Weakley, A.S. and P.M. Peterson, "Taxonomy of the *Sporobolus floridanus* complex (Poaceae: Sporobolinae)." *Sida*. 18: 247-270. 1998.

in English: Florida dropseed

S. fourcadii Stent (named for the French botanist Georges Henri Fourcade, 1866-1948, plant collector in South Africa, see Mary Gunn and Leslie Edward Wostall Codd, *Botanical Exploration of Southern Africa*. 157-159. A.A. Balkema, Cape Town 1981)

South Africa. Perennial, rhizomatous, tufted, panicle not whorled, found in floodplains, on forest margins.

S. funckii (Steud.) F.M. Knuth (*Vilfa funckii* Steud.) (possibly named for the Luxemburg artist and naturalist Nicolas Funck, 1816-1896, plant collector in Colombia and Venezuela, in Middle and South America 1835-1847, collaborated with with Jean Jules Linden (1817-1898); or dedicated to the German apothecary Heinrich Christian Funck (Funcke), 1771-1839, cryptogamist, his works include *Deutschlands Moose*. Baireuth 1820 and *Kryptogamische Gewächse (besonders) des Fichtelgebirg's*. Leipzig 1801-1838; see J.H. Barnhart, *Biographical notes upon botanists*. 2: 19. 1965; Carl (Karl) Ludwig Willdenow (1765-1812), in *Der Gesellschaft naturforschender Freunde zu Berlin Magazin für die neuesten Entdeckungen in der gesammten Naturkunde*. 2: 19. Berlin 1808)

S. harmandii Henrard (*Sporobolus sumatranus* Ohwi)

Asia, Indochina, Vietnam. See *Repertorium Specierum Novarum Regni Vegetabilis* 21(588-600): 235. 1925, *Bulletin of the Tokyo Science Museum* 18: 12. 1947.

S. helvolicus (Trin.) T. Durand & Schinz (*Sporobolus glaucifolius* (Hochst. ex Steud.) Hochst. ex T. Durand & Schinz; *Sporobolus podotrichus* Chiov.; *Sporobolus senegalensis* (Pers.) Chiov.; *Sporobolus senegalensis* (Pers.) Chiov. var. *glaucifolius* (Hochst. ex Steud.) Chiov.; *Sporobolus senegalensis* var. *microstachyus* Chiov., also spelled

microstachys; *Sporobolus senegalensis* var. *podotrichus* (Chiov.) Chiov.; *Sporobolus trichophorus* Gand.; *Vilfa glaucifolia* Hochst. ex Steud.; *Vilfa helvola* Trin.)

Tropical Africa, India, Pakistan, Mali, Nigeria, Uganda, Sudan, Tanzania. Perennial desert grass, hard, thin, wiry, tufted, ascending, forming small tufts, stoloniferous with slender stolons, swollen culm bases, stolons vertical at first and then rooting at the nodes, basal leaf sheaths papery or not leaves flat, narrow panicle linear to lanceolate with erect branches, glumes acuminate lanceolate 1-nerved, lemma ovate and acute, field weed, excellent tolerance to salinity, forage, good fodder grass, good hay, valuable grazing grass, very palatable, fodder for camels, useful for erosion control, excellent drought tolerance, used for thatching, grows in arid and semiarid areas, open deciduous bushlands, open sandy situations, open scrub on alluvial plain, low shrublands, on saline rangelands, limestone, sandy or silty soils, seasonally flooded areas and depressions, seasonally waterlogged black soils, moist patches, on alluvial silts and black clay soils, in volcanic ash, gypsum, similar to *Sporobolus ruspolianus*, see *Synopsis Plantarum* 1: 76. 1805, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 6,4(1-2): 52. 1840, *Synopsis Plantarum Glumacearum* 1: 154. 1854, *Conspectus Florae Africae* 5: 820. 1894, *Bulletin de la Société Botanique de France* 69: 321. 1896, *Annuario del Reale Istituto Botanico di Roma* 6: 168. 1896 and *Plantae Novae vel Minus Notae e regione Aethiopica* 26, 28. 1928 [1911-1951, series published in different journals, also *Plantae Novae vel Minus Notae ex Aethiopia*], S.A. Andanje and W.K. Ottichilo, "Population status and feeding habits of the translocated subpopulation of Hunter's antelope or hirola (*Beatragus hunteri*, in Tsavo East National Park, Kenya." *African Journal of Ecology* 37(1): 38-48. in Somalia: jarbo, jarfo, domar, ag agar, aggagar

S. heterolepis (A. Gray) A. Gray (*Agrostis heterolepis* (A. Gray) Alph. Wood; *Vilfa heterolepis* A. Gray)

North America, Canada, U.S., Texas. Perennial, bright green to russet orange, slow growing, forming dense clumps, erect wiry culms, densely tufted or densely caespitose, involute leaves, arching foliage, open and airy panicles on slender stems, pinkish spikelets, aromatic flowers, seeds a valuable food for ground-feeding birds, highly

nutritious seeds, fodder, hay and pasture grass, ornamental and showy when in flower, tall ground cover, used for roadside revegetation and prairie rehabilitation projects, butterfly garden, low to medium palatability, drought tolerance medium to good once established, Plains Indians ground the seed to make a tasty and nutritious flour, found on wild areas or slopes, on dry sand, loam, gravel, meadows, limestone bluffs, barrens, heavy clays, dry to mesic, hot and dry areas, along railroads, common in undisturbed dry to mesic prairies, glades, open grounds, forest openings, dry rocky soils, savannahs, see *Annals of the Lyceum of Natural History of New York* 3: 233. 1835, *A Class-book of Botany* 598. 1847, *A Manual of the Botany of the Northern United States* 576. 1848 and B.C. Ebberts, R.C. Anderson and A.E. Liberta, "Aspects of the mycorrhizal ecology of prairie dropseed, *Sporobolus heterolepis* (Poaceae)." *American Journal of Botany* 74: 564-573. 1987, *Restoration Ecology* 10(4): 677-684. Dec 2002.

in English: prairie dropseed, prairie dropseed grass, northern dropseed

in French: sporobole à glumes inégales

Steud.)

South Africa, Swaziland, Zimbabwe, Mali, Sudan, Uganda, Tanzania, Namibia, Ethiopia. Perennial or annual, rather variable, tussocky, caespitose, harsh, often mat-forming, often creeping, tufted, dense, ascending, somewhat geniculate at the basal nodes, branched or unbranched, shortly rhizomatous, sometimes or often stoloniferous and rooting at the lower nodes, leaves flat often pungent, leaf blades expanded and then rolled, ligule a ring of short hairs, leaf sheath keeled, basal leaf sheaths chartaceous and persistent, open ovate panicle with branches arranged in whorls, spikelets shiny and 1-flowered, lower glume obtuse, upper lemma acute, seeds very fine, forage, grazed by stock and game, natural pasture, palatable pioneer grass highly resistant to drought, grains and seed head eaten by baboons, from the ashes of the plant obtained a salt, culms used to make

brooms, found in arid and semiarid regions, open *Acacia* woodlands and grasslands, open grasslands, riverbeds, poor soils, dry alluvial basins, black turf, in low areas subject to inundation, heavy alluvial plains, hard pans, areas of high salinity, salt pans, seasonally moist places, low shrublands, mixed bushvelds, disturbed areas, poorly drained sites, brackish soils, gray sandy clay soils, dry clay soil, on termite mounds, along roadsides, see *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. S. macranthelus Chiov.

Eastern and southern tropical Africa, Somalia, Sudan. Perennial, robust, tussock-forming, rhizomatous, basal sheaths papery and not fibrous when old, stiff narrow leaves, linear inflorescence, open panicle much branched and not whorled, spikelets appressed or spreading, upper glume narrowly ovate, lower glume lanceolate, lemma ovate, in grassland, bushland, floodplains, loam, see *Flora Somala* 2: 452. 1932.

S. macrospermus Scribner ex Beal

Mexico. Annual, caespitose, erect, branched from the lower nodes, glabrous, internodes solid, leaves basal, open cylindrical panicles, on rocky hills, see *Grasses of North America for Farmers and Students* 2: 302. 1896.

S. maderaspatanus Bor (*Agrostis orientalis* Nees; *Sporobolus humifusus* Thw. ex Trimen, non *Sporobolus humifusus* (Kunth) Kunth; *Sporobolus orientalis* Kunth; *Sporobolus orientalis* (Nees) Kunth; *Sporobolus orientalis* sensu Hook.f.) (from Madras, India)

Sri Lanka, India. Perennial, caespitose, sparsely branched, erect, ascending, smooth, stoloniferous, auricles aciliate, leaves acuminate and pointed, ligule a densely ciliate membrane, compact spicate inflorescence, panicle branches not whorled, 2-3 stamens, good fodder for horses and cattle, makes good hay, found on seashores and beaches, saline plains, lowlands, dry and arid zones, coastal roads, see *Nova Genera et Species Plantarum* 1: 137. 1815 [1816], *Révision des Graminées* 1: 67. 1829, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 211. 1833, *Fl. Tropical East Africa. Perennial, rarely annual, very variable, tufted, stoloniferous, low growing, basal leaf sheaths glabrous and shining, spikelets pale or grayish green, strong and thick roots, adapted to very dry conditions, an indicator of saline soils, excellent drought tolerance and excellent tolerance to salinity, leafy, good fodder, grazing of excellent quality, low palatability, found on rocky shallow sandy soils, dry grasslands, alluvial silts, loose sandy loams, on alkaline soils, sometimes on pure salt crusts, see *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 6,4(2): 62, 65. 1840, *Tentamen Florae Abyssinicae* ...2: 397. 1850, *Florae Africae Australioris Illustrationes Monographicae* 161. 1841, *Diagnoses plantarum orientalium novarum, ser. 1*, 13: 14. 1853, *Synopsis Plantarum Glumacearum* 1: 421. 1854, *Flora Orientalis* 5: 512. 1884 and *Annuario del Reale Istituto Botanico di Roma* 8(1): 51. 1903, *Annuario del Reale Istituto Botanico di Roma* 8(3): 339. 1908.

S. mauritanus (Steud.) Durand & Schinz (*Sporobolus artus* Stent; *Sporobolus rigidifolius* (Trin.) Mez ex Veldkamp; *Vilfa mauritiana* Steud.; *Vilfa rigidifolia* Trin.)

Tropical Africa, Mauritius, Madagascar. Perennial, rhizomatous, tufted, erect, old basal sheaths expanded and papery, leaf blades involute, panicle ovate or sometimes contracted, primary branches whorled, spikelets acute, lower glume lanceolate acuminate, upper glume lanceolate, found in marshy areas, in gray sand, wooded grasslands, poorly drained soil, sourveld, in dry sandy soil, coastal sandflats, black clay soil, related to *Sporobolus sanguineus* and *Sporobolus centrifugus*, see *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 6,4(1-2): 80. 1840, *Synopsis Plantarum Glumacearum* 1: 157. 1854, *Conspectus Florae Africae* 5: 822. 1894 and *Bothalia* 2: 260, 272, t. 4. 1927, *Kew Bulletin* 45(3): 582. 1990.

Durand & Schinz; *Sporobolus psammophilus* Stent & Rattray; *Sporobolus regularis* Mez; *Triachyrum micranthum* Steud.)

Africa, Zambia, Ethiopia. Annual, delicate, erect, solitary or tufted, unbranched, flat leaf blades broadly linear with glandular margins, panicle lanceolate, primary branches whorled in tiers, spikelets narrowly elliptic, lower glume long lanceolate acuminate, dry open places, among rocks, related and similar to *Sporobolus paniculatus* and *Sporobolus stolzii*, see *Synopsis Plantarum Glumacearum* 1: 176. 1855 [1854] and *Österreichische Botanische Zeitschrift* 53(5): 198. 1903, *Annali di Botanica* 13: 49. 1914, *Repertorium Specierum Novarum Regni Vegetabilis* 17(19-30): 299. 1921, *Proceedings of the Rhodesia Scientific Association* 32: 51. 1933, *Bulletin de la Société Botanique de France* 107: 205. 1960.

S. microprotus Stapf (probably from the Greek *mikros* "small" and *protos* "first, foremost")

Tropical Africa, Sahel. Annual, loosely tufted, erect or ascending, spreading, sometimes prostrate, often shortly stoloniferous, broadly linear leaf blades with pectinate margins, rooting and branching at the nodes, panicle of small spikelets on whorled branches, scabrid spikelets elliptic-oblong, lower glume a tiny ovate scale, upper glume and lemma elliptic-oblong, 2 stamens, good pasture, a weed of cultivation, useful for erosion control and in fixing sand dunes, found along roadsides, waste places.

in Nigeria: babatu

in Upper Volta: liudi sagha, lussa

S. myrianthus Benth. (*Eragrostis heteromera* Stapf)

Tropical Africa, Nigeria, Tanzania. Perennial, loosely tufted, slender, basal sheaths indurated and fibrous, upper glume frequently mucronate, medicinal, montane, grazed by stock, pasture, used for making brushes, growing in open weedy places, wooded savannah, see *Genera Plantarum* 23. 1776, *Niger Flora* 565. 1849 and *Flora Capensis* 7: 610. 1900.

in Tanzania: ntinde

S. natalensis (Steud.) T. Durand & Schinz (*Sporobolus capensis* Kunth; *Sporobolus capensis* var. *laxus* Nees; *Sporobolus indicus* (L.) R. Br.; *Sporobolus indicus* f. *laxus* (Nees) Peter; *Sporobolus indicus* var. *laxus* (Nees) Stapf; *Vilfa natalensis* Steud.)

Tropical East Africa, South Africa, Ethiopia. Perennial, erect, caespitose, robust, tussocky, ligule a ciliate membrane, old basal sheaths papery, leaf blades narrowly linear tapering to a long filiform tip, dense panicle much branched and not whorled, open to loosely contracted panicle with ascending or spreading primary branches, spikelets lanceolate, lower glume oblong obtuse, upper glume ovate narrowing uniformly to an acute tip, pasture weed, culms used for making baskets, found in sandy soils, grassy slopes, along roadsides, open grassland, well-drained soil, in woodlands, near water, cliffs, sandstone cliffs, in disturbed places, resembles *Sporobolus africanus* and *Sporobolus*

pyramidalis, see *Prodromus Florae Novae Hollandiae* 170. 1810, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 212. 1833, *Flora Australiensis: A Description ...* 1: 155. 1841, *Synopsis Plantarum Glumacearum* 1: 154. 1854, *Conspectus Florae Africae* 5: 822. 1894 and *Flora Capensis* 586. 1900, *Repertorium Specierum Novarum Regni Vegetabilis, Beihefte* 40: 280. 1931, *Blumea* 35: 452. 1991.

in English: giant ratstail grass

S. nealleyi Vasey (for the American botanist Greenleaf Cillely Nealley, 1846-1896, collected grass for USDA, see J.H. Barnhart, *Biographical notes upon botanists*. 2: 541. Boston 1965; T.W. Bossert, compil., *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 283. Boston, Mass. 1972; Stafleu and Cowan, *Taxonomic literature*. 3: 701. 1981)

Northern America, U.S. Large caespitose grass, found in gypsum desert scrub, gypsum dune barrens, gypsum clay flat, see *Bulletin of the Torrey Botanical Club* 15: 49. 1888, *Contributions from the United States National Herbarium* 1(2): 57. 1890.

in English: Nealley's dropseed, Nealley dropseed, gypgrass, gyp dropseed

S. nebulosus Hack.

Africa, Namibia. Perennial, tufted, rhizomatous, leaves rigid and linear to filiform, old leaf sheaths persistent, spikelets solitary and terminal, grows in sand, deep sand, moist depressions, wet areas, see *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 11: 402. 1889.

in German: nebelgras

S. niamensis Mez

Arabia. See *Repertorium Specierum Novarum Regni Vegetabilis* 17(19-30): 299. 1921.

S. nitens Stent

South Africa, Transvaal. Perennial bunchgrass, rhizomatous and stoloniferous, leaves margins wavy, upper glume keeled, growing on poorly drained site subject to inundation, harsh climate, on sandy soils, gardens, open grassland, overgrazed velds, coastal grasslands and saline flooded grasslands, disturbed places, see *Bothalia* 1(4): 281-282, t. 8. 1924.

S. nudiramus Boechat & Longhi-Wagner

Brazil, South America. See *Iheringia, Série Botânica* 44: 36, f. 3-6. 1994.

S. olivaceus Napper

Africa. Perennial, densely tufted, erect, slender, hard and shiny basal sheaths fibrous when old, leaf blades convolute, panicle spiciform, primary branches crowded erect appressed, spikelets narrowly lanceolate-oblong, obtuse or acute lower glume elliptic, acute upper glume ovate, lemma acute, upland grassland, bushland, see *Kirkia* 3: 117. 1963.

S. orientalis (Nees) Kunth (*Sporobolus maderaspatanus* Bor; *Sporobolus orientalis* Kunth)

Warm regions. Perennial, creeping and rooting at the nodes, leaves mostly basal, leaf blades rather narrow and tapering to a fine point, lowwiry flowering stems, panicle loose pyramidal, many minute spikelets, fodder, saline soils, this is the true *usar* grass, see *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 211. 1833 and *Kew Bulletin* 1957: 234. 1957.

in English: usar grass

in India: kalusra, kar usara ghas, kheo, usar ki ghas, tandua

S. pallidus Lindl. (*Sporobolus lindleyi* (Steud.) Benth.; *Vilfa lindleyi* Steud.)

Australia. Perennial, forage, used as tanning agent, can tolerate maritime exposure, can tolerate drought, can grow in saline soil, found by coasts and around salt marshes, on sandy ground.

in English: Australian dropseed

in India: budhan, budhar, karno, palengi, palinji

S. palmeri Scribner

North America, Mexico. Bunchgrass, see *Bulletin, Division of Agrostology United States Department of Agriculture* 11: 48, t. 5. 1898.

S. pamelae B.K. Simon

Australia, Queensland. Perennial, erect, caespitose, ligule a fringe of hairs, very open and much-branched panicles, inflorescence branches not whorled, glumes oblong, lower glume acute nerveless, 3-nerved lemma linear to lanceolate, 3 anthers, see *Austrobaileya* 4(1): 61, f. 3. 1993.

S. panicoides A. Rich. (*Triachyrum longifolium* Hochst. ex Steud.)

Tropical East and South Africa, Zimbabwe, Ethiopia, Arabia. Annual, soft, erect or geniculate at the base, slender, sparse, tufted to loosely tufted, leaf sheath rounded, leaf blade smooth and expanded, ligule a fringe of short hairs, leaves narrow lancet-shaped and pointed, inflorescence whorled, open panicle elliptic to narrowly elliptic, primary branches ascending and simple, panicle-branches 1- to 4-spiculate, sparse large spikelets, spikelets of lowermost whorl often abortive or absent, glumes ovate and subequal,

lower glume lanceolate, acute upper glume elliptic-oblong, spheroid seeds orange to bright red-brown, famine food, grazed by all stock, little value as forage, grains used as food for human consumption, low mass yield, pioneer grass, found in mopane woodlands, seasonally wet places, deciduous bushlands, in areas of high rainfall, stony banks, field borders, stony hillsides, sandy soils, dry sandy soils, rocky areas, gravel fringes, disturbed places, light shade, where the soil is very shallow, see *Tentamen Florae Abyssinicae* ... 2: 399. 1850, *Synopsis Plantarum Glumacearum* 1: 176. 1855 [1854].

in English: famine grass

in Somalia: agar

in South Africa: grootsaad sporobolus, hirse nebelgras

S. paniculatus (Trinius) Dur. & Schinz (*Sporobolus myxosperma* Stapf ex Hutch. & Dalziel; *Sporobolus patulus* Hack.; *Sporobolus regularis* Mez; *Vilfa paniculata* Trin.)

Tropical Africa, Mexico, Madagascar. Annual, erect or ascending, single-stemmed or loosely tufted, often eglandular leaf blades margins, found along roadsides, open bushland, rocky sites, sandy soils, waste places, wooded grasslands, savannahs, see *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 6,4(1-2): 67. 1840, *Conspectus Florae Africae* 5: 823. 1895 and *Österreichische Botanische Zeitschrift* 52(2): 58. 1902, *Repertorium Specierum Novarum Regni Vegetabilis* 17(19-30): 299. 1921, *Flora of West Tropical Africa* 527. 1936.

in Nigeria: finde, hudo mbujo, lallen biri, wichiyyar zoomoo

S. partimpatens R. Mills ex B.K. Simon

Australia, Queensland. Perennial, rare, erect, caespitose, leaf blades linear, ligule a ciliate membrane, irregular inflorescence paniculate, primary inflorescence branches appressed toward apex, lowest inflorescence node whorled, lower glume nerveless, upper glume as long as spikelet, lemma lanceolate acute 1-nerved, 3 anthers, see *Austrobaileya* 4(1): 64, f. 5. 1993.

S. paucifolius Boechat & Longhi-Wagner

South America, Brazil. See *Iheringia, Série Botânica* 44: 37, f. 7-9. 1994.

S. pectinatus Hack.

South Africa. Perennial, tufted, usually unbranched, rhizomatous with long creeping rhizomes, old basal sheaths papery, leaf blades ciliate, open panicle whorled, spikelets clustered at the tip of the branches, palatable or unpalatable, common on shallow rocky soil, stony slopes, in open sour grasslands, see *Österreichische Botanische Zeitschrift* 53(5): 198. 1903, *Bothalia* 17: 135-136. 1987.

in English: fringed dropseed

in South Africa: kammetjiesgras

S. pectinellus Mez

Tropical Africa, Central African Republic. Annual, tufted, delicate, slender, diffuse panicle ovate-oblong, lower glume broadly oblong, upper glume ovate-oblong, lemma narrowly ovate, growing in stony places, moist areas, meadows, among rocks, often confused with *Sporobolus festivus*, closely related to *Sporobolus infirmus*, similar to *Sporobolus tenuissimus*, see *Repertorium Specierum Novarum Regni Vegetabilis* 17(19-30): 295. 1921.

in Ivory Coast: kubegnin

S. pellucidus Hochst. (*Sporobolus indicus* var. *pellucidus* (Hochst.) Chiov.; *Vilfa pellucida* (Hochst.) Schweinf.)

Tropical East Africa, Arabia. Perennial, densely tufted, slender, rhizomatous, basal leaf sheaths fibrous when old forming a thick basal clump of fibers, leaf blades filiform and convolute, linear to lanceolate panicle open or contracted, primary branches ascending and not whorled, upper glume ovate and acute, lemma acute, heavily grazed by stock, dry grassland, on sandy soils, deciduous bushlands, degraded open woodlands, scrub, open places, red sand, on sandy riverbanks and on sandy dry riverbanks, similar to *Sporobolus pyramidalis*, see *Prodromus Florae Novae Hollandiae* 170. 1810, *Flora* 38: 201. 1855 and *Missione Biologica nel Paese dei Borana, 4. Raccolte Botaniche* 277. 1939.

in Somalia: garogaro, ramass

S. phleoides Hack.

Argentina. See *Anales del Museo Nacional de Buenos Aires* 13: 468. 1906.

Tropical Africa. Perennial, densely tufted, tall, tough, coarse, robust, vigorous, unbranched, rhizomatous, leaf sheath rounded and smooth, basal leaf sheaths more or less papery, ligule inconspicuous, linear leaf blades folded or rolled, mature leaf blades tough, contracted panicle not spike-like, branches erect and usually spreading at maturity and not whorled, spikelets pointed, seed head resembles a rats tail, glumes subequal, first glume a minute scale, upper glume obtuse or erose, lemma lanceolate acute and scabrous, 2 lodicules, 3 stamens, pinkish to purplish anthers, grain truncate, a fetish plant, ornamental, famine food, grain edible collected in time of scarcity, good brooms from a collection of the inflorescences, vegetable salt from the ashes, desiccation-sensitive grass, a nonresurrection plant, aggressive noxious weed of pasture, invasive, low palatability to unpalatable to very unpalatable, low grazing value because of its toughness, native pasture species, usually not consumed by the cattle, grains and seed head eaten by baboons, well adapted to the subtropical climate, useful for erosion control in disturbed areas, weedy species indicator of overgrazed and disturbed areas, common on poor soils, campos, along the forest edges, field borders, stream banks, in relatively fertile disturbed areas, disturbed grassy places, in overgrazed pastures, trampled veld, vleis, sandy silty soil, ruderals, in coastal and subcoastal regions, water courses, uncultivated lands, in lower rainfall areas or in areas of good rainfall, savannah, along roadsides, moist cold montane grasslands, sour grasslands, highveld grasslands, grassy slopes, heavy clay, near dams, shallow rocky soil, amongst rocks, periodically flooded areas, seasonally damp places, similar to *Sporobolus natalensis* and close to *Sporobolus indicus*, see *Tableau Encyclopédique et Méthodique ... Botanique* 1: 161. 1791, *Prodromus Florae Novae Hollandiae* 170. 1810, *Flore d'Oware* 2: 36, t. 80. 1816, *Mantissa* 199. 1824, *Flora Brasiliensis seu Enumeratio Plantarum* 2: 395. 1829, *Révision des Graminées* 2: 427, pl. 127. 1831, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 215. 1833, *Museum Senckenbergianum* 2: 139. 1837, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Africa, Nigeria, Abyssinia. See *Flore d'Oware* 2: 36, t. 80. 1816, *Museum Senckenbergianum* 2: 139. 1837, *Nomenclator Botanicus. Editio secunda* 2: 768. 1841.

S. ruspolianus Chiov.

Somalia, Ethiopia. Perennial, thin, loosely tufted, wiry, knotty base, shrubby or subshrubby, hard, woody, slender, branched from the lower nodes, leaf sheaths not imbricate, lower sheaths persistent, slender leaves flat and narrow, whitish cataphylls, stoloniferous, long creeping stolons, open or contracted ovate panicle, spikelets densely clustered, scabrid glumes acute or obtuse, lower glume narrowly lanceolate, upper glume oblong, lemma ovate lanceolate, useful for erosion control, grazed, seasonally flooded areas, calcareous soil, gypsum, open deciduous bushland, similar to *Sporobolus helvolus*, see *Flora of Ethiopia and Eritrea* 7: 155. 1995.

in Somalia: sifar

S. salsus Mez

Namibia. Perennial, rhizomatous, large spikelets, found in seasonally flooded areas, along or near rivers, see *Repertorium Specierum Novarum Regni Vegetabilis* 17(19-30): 296. 1921, *Proceedings of the Rhodesia Scientific Association* 32: 50. 1933.

S. sanguineus Rendle (*Sporobolus rhodesiensis* Stent & Rattray)

Tropical Africa, Swaziland. Perennial, tufted, rhizomatous, leaves margins ciliate, panicle linear and whorled, forage for stock, grows in stony areas, hillsides, rocky outcrops, slopes, see *Catalogue of the African Plants Collected by Dr. F. Welwitsch in 1853-61* 2(1): 209. 1899.

in English: crucifer grass

S. scabridus S.T. Blake

Queensland, Australia. Perennial, erect, densely caespitose, leaf blades flat linear, ligule a ciliate membrane, inflorescence axis and branches distinctly scabrous, spikelets more or less clustered, nerveless acute or obtuse lower glume linear or elliptic, upper glume lanceolate, obtuse lemma 1-nerved, 3 anthers, common in brigalow vegetation, similar to *Sporobolus contiguus*, *Sporobolus actinocladus* and *Sporobolus partimpatens*, see *Papers from the Department of Botany, University of Queensland* 1(18): 5. 1941.

S. seineri Mez

S. smutsii Stent (dedicated to the South African amateur botanist Jan Christiaan Smuts, 1870-1950 (d. near Irene, Transvaal), philosopher, plant collector, with the British (b. Wark-on-Tyne, Northumberland) botanist John Hutchinson, 1884-1972 (d. Kew, Surrey), wrote "The vegetation of Schoemanskloof, eastern Transvaal." *Kew Bulletin* 417-427.

1933; see Mary Gunn and Leslie E. Codd, *Botanical Exploration of Southern Africa*. 326-327. 1981; Gilbert Westacott Reynolds, *The Aloes of South Africa*. Balkema, Rotterdam 1982)

South Africa, Transvaal, Namibia. See *Bothalia* 1(4): 281, t. 7. 1924.

S. somalensis Chiov. (*Sporobolus variegatus* Stapf)

Tropical Africa, Somalia, Ethiopia. Perennial, creeping, compact, cushions forming, leaf sheaths imbricate, flat leaf blades stiff and pungent, stoloniferous, flowering culms slender, stout scaly stolons, panicle ovate and open to loose, lower glume narrowly oblong, upper glume obtuse and oblong, 3-nerved lemmas ovate-oblong and erose at the tip, grasslands, alluvial soils, shrublands, limestones, open *Acacia* woodland, see *Annuario del Reale Istituto Botanico di Roma* 6: 169. 1896 and *Kew Bulletin* 1907: 218. 1907.

in Somalia: dihi

S. spicatus (Vahl) Kunth (*Agrostis spicata* Vahl; *Agrostis virginica* Forssk., nom. illeg., non *Agrostis virginica* L.; *Vilfa spicata* P. Beauv.)

Tropical East Africa, Kenya, Namibia, Botswana. Perennial, tufted, rhizomatous and long stoloniferous, spiky, wiry, tough, halophytic, decumbent creeping habit, creeping and ascending, mat-forming, basal leaf sheaths papery, rigid and pointed leaves flat or convolute, spicate inflorescence cylindrical and narrow, slender panicle spike-like not whorled, spikelets clustered and central axis not visible, glumes ovate to lanceolate, lemma oblong-elliptic, pollen purplish, grain eaten in time of scarcity, foliage with a salty taste, high palatability, low to medium grazing value, grazed by donkeys, salt tolerant, coloniser, sand dune stabilizer, occurs in alkaline sandy soils, hard clay, pans, on saline lakeshores, salt lands, places moist with salty water, salt swamps and salt plains, hot springs, coastal dunes, sandy littoral, brackish sandy soil, subkhah, muddy shorelines, floodplains, alluvial plain, sandy deserts, sand bars, seasonally flooded grasslands, on open grasslands, riverbeds, coastal grasslands, alkaline grasslands, dry grassland, see *Species Plantarum* 1: 61-63. 1753, *Flora Aegyptiaco-Arabica* 20: 1775. 1775, *Symbolae Botanicae, ...* 1: 9. 1790, *Essai d'une Nouvelle Agrostographie* 16, 182. 1812, *Révision des Graminées* 1: 67. 1829, A. Deflers, *Voyage au Yemen* 219. Paris 1889 and *Contr. U.S. Natl. Herb.* 12: 119. 1908, *F.T.E.A. Gramin.* 369. 1974, *Austral. Ecology* 25(2): 140-149. Apr 2000, Jude M. Mathooko and Samuel T. Kariuki, "Disturbances and species distribution of the riparian vegetation of a Rift Valley stream." *African Journal of Ecology* 38(2): 123-129. June 2000, *African Journal of Ecology* 40(1): 10-17. Mar 2002, Godfrey A. Olukoye, Wellington N. Wamicha and Jenesio I. Kinyamario, "Assessment of the performance of exotic and indigenous tree and shrub species for rehabilitating saline soils of Northern Kenya." *African Journal of Ecology* 41(2): 164-170. June 2003, *Journal of*

Biogeography 31(1): 5-18. Jan 2004, G.M. Ashley et al. "Sedimentation and recent history of a freshwater wetland in a semiarid environment: Lobo Swamp, Kenya, East Africa." *Sedimentology* 51(6): 1301-1321. Dec 2004, *African Journal of Ecology* 43(1): 29-34. Mar 2005.

S. spiciformis Swallen

North America, Mexico. See *Proceedings of the Biological Society of Washington* 56: 78. 1943.

S. splendens Swallen

Mexico. Perennial, densely caespitose, forming large tussocks, internodes solid, open panicle, spikelets purplish, forage, in saline soils, see *Boletín de la Sociedad Botánica de México* 23: 35-37, f. 6. 1958 [1959].

S. sporobolus (Spreng.) Kuntze (*Agrostis sporobolus* Spreng.; *Sporobolus aeneus* (Trin.) Kunth; *Sporobolus sprengelii* Kunth; *Vilfa sporobolus* (Spreng.) Trin.)

South America, Brazil. See *Novi Proventus Hortorum Academicorum Halensis et Berolinensis* 46. 1819, *De Graminibus unifloris et sesquifloris* 160. Petropoli 1824, *De Graminibus Paniceis* 23. 1826, *Révision des Graminées* 1: 68. 1829, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 213. 1833, *Revisio Generum Plantarum* 3(3): 369. 1898.

S. sprengelii Kunth (*Agrostis sporobolus* Spreng.; *Sporobolus aeneus* (Trin.) Kunth)

South America. Flat leaf blades, panicle with long flexuous branches naked at the base, smooth or sparsely scaberulous spikelets, lower glume obtuse or acute, see *Novi Proventus Hortorum Academicorum Halensis et Berolinensis* 46. 1819, *De Graminibus unifloris et sesquifloris* 160. Petropoli 1824, *De Graminibus Paniceis* 23. 1826, *Révision des Graminées* 1: 68. 1829, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 213. 1833, *Revisio Generum Plantarum* 3(3): 369. 1898 and *Annals of the Missouri Botanical Garden* 77(1): 125-201. 1990.

S. stachydanthus A. Rich. (*Sporobolus piliferus* (Trin.) Kunth; *Triachyrum stachydanthum* (A. Rich.) Asch.; *Vilfa pilifera* Trin.; *Vilfa stachydantha* (A. Rich.) Steud.)

Abyssinia. See *De Graminibus unifloris et sesquifloris* 157. 1824, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 211. 1833, *Tentamen Florae Abyssinicae ... 2*: 394. 1850, *Synopsis Plantarum Glumacearum* 1: 156. 1854,

Beitrag zur Flora Aethiopiens ... 302, 311. 1867 and Blumea 35: 393-458. 1991.

S. stapfianus Gand. (*Sporobolus festivus* Hochst. ex A. Rich.)

Tropical East Africa, South Africa. Perennial, caespitose or densely caespitose, slender, ligule a ring of hairs, basal sheaths herbaceous, woolly hairs between the fibers of the basal sheaths, oval open panicle with dichotomous branching, shiny spikelets, lower glume narrowly oblong, elliptic upper glume acute, lemma acute, livestock forage grass, palatable, low grazing value, leaves revive after desiccation, a resurrection grass able to survive total desiccation or almost total dehydration, extended and severe drought stress tolerant, common in sandy open areas, shallow soils, rocky habitats, well-drained soils, wooded grassland, near streams, on sandy roadsides, deciduous bushland, often confused with *Sporobolus festivus*, see *Tentamen Florae Abyssinicae ... 2*: 398. 1850, *Synopsis Plantarum Glumacearum* 1: 158. 1854 and *Bulletin de la Société Botanique de France* 66(7): 302. 1919 [1920].

in English: fibrous dropseed

in South Africa: veselfynsaadgras, fynblousaadgras

S. stelliger Duvign. & Kiwak

Africa. See *Bulletin de la Société Botanique de Belgique* 96: 127. 1963.

S. stenostachys Peter

Africa. See *Repertorium Specierum Novarum Regni Vegetabilis, Beihefte* 1(Anh.): 86. 1930.

S. stocksii Bor (*Sporobolus iocladoides* Chiov. ex Chiarugi; *Sporobolus nervosus* Hochst.)

Asia, Africa, India. See *Flora* 38: 202. 1855, *Beitrag zur Flora Aethiopiens ... 303. 1867 and Kew Bulletin* 1948: 45. 1948, *Webbia* 8: 96. 1951, *Grasses of Burma, Ceylon, India and Pakistan (excluding Bambuseae)* 633-688. 1960.

S. stolzii Mez

Tropical Africa, Malawi, Senegal. Annual, sometimes very short-lived, erect, tufted, leaf margins ciliate, inflorescence whorled, viscid, lower glume linear-lanceolate, globose grain, browsed, good pasture taken by all stock, abundant under trees, along trails and roadsides, sandy soil, waste places, see *Repertorium Specierum Novarum Regni Vegetabilis* 17(19-30): 297. 1921.

in Senegal: ndiisis, nduyuy

S. subbulbosus Arechav. (*Sporobolus adustus* (Trin.) Roseng., B.R. Arrill. & Izag.; *Sporobolus aeneus* var. *subbulbosus* (Arechav.) Parodi)

Uruguay. See *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 213. 1833, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 6,4(1-2): 80. 1840, *Anales del*

Museo Nacional de Montevideo 1: 343, t. 35. 1896 and *Revista de la Facultad de Agronomía y Veterinaria* 6(2): 161, f. 16. 1928, *Gramíneas Uruguayas* 270, f. 112. 1970.

S. subtilis Kunth (*Sporobolus subtilis* F. Muell., nom. illeg., non *Sporobolus subtilis* Kunth; *Vilfa subtilis* (Kunth) Trin.)

Tropical Africa, Madagascar, Sierra Leone, Zambia. Perennial, wiry, base not fibrous, rhizomatous or stoloniferous, creeping slender rhizomes, more or less tufted, panicle with dichotomous branching, present rachilla extension, found in shallow soil, sandy places, moist areas, see *Révision des Graminées* 2: 421, t. 124. 1831, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 6,4(1-2): 88. 1840, *Fragmenta Phytographiae Australiae* 8: 140. 1873.

in English: misty dropseed.

S. temomaiemensis Judziewicz & P.M. Peterson

Northern South America, Suriname. Annual, densely tufted, delicate, ligule a aciliate membrane, leaf blades ascending and arching, inflorescence an open pyramidal panicle, vulnerable species, related to *Sporobolus monandrus* Roseng., B.R. Arrill. & Izag., see *Systematic Botany* 14(4): 525-528, f. 1. 1989, *Flora of the Guianas. Series A, Phanerogams* 8: 612-613. 1990.

S. tenacissimus (L.f.) P. Beauv. (*Agrostis tenacissima* L.f.; *Sporobolus tenacissimus* (L.f.) J. Presl)

South America, Peru. Hitchc. & Chase; *Sporobolus tenuissimus* (Mart. ex Schrank) Hack., nom. illeg., non *Sporobolus tenuissimus* (Mart. ex Schrank) Kuntze; *Vilfa mangalorica* (Hochst. ex Miq.) Hochst. ex Steud.; *Vilfa mangalorica* Hochst. ex Steud.; *Vilfa minutiflora* Trin.)

Pantropical. Annual, weak, shining, compressed, caespitose, delicate, erect, slender, glabrous, striate, branched, leaf sheaths compressed and keeled, ligule ciliolate, leaf blades flat and long-acuminate, leaves basal and all along the culm, inflorescence delicate and diffuse, open cylindrical narrow oblong panicle much branched with branches very slender and ascending, spikelets minute and long pedicellate, glumes unequal, lower glume oblong, upper glume ovate-oblong and acute to subacute, lemma and palea broadly ovate, very small lodicules, 3 stamens, grain truncate, weed species, cultivated as an ornamental, ruderal, disturbed places, along roadsides, wet prairies, coastal regions, meadows, clearings, gardens, cultivated fields, waste places, see *Denkschriften der Königlich-Baierischen Botanischen Gesellschaft in Regensburg* 2: 26. 1822, *Agrostografia Brasiliensis* 33t. 1, f. 2. 1823, *De Graminibus unifloris et sesquifloris* 158. 1824, *Sylloge Plantarum Novarum* 1: 192. 1824, *Systema Vegetabilium, editio decima sexta* 1: 276. 1825, *Hortus Regius Botanicus Berolinensis* 1: 88. 1827, *Analecta botanica indica ...* 2: 36. 1851, *Synopsis Plantarum Glumacearum* 1: 159. 1854, *Revisio Generum Plantarum* 3(2): 369. 1898 and *Bulletin de l'Herbier Boissier, sér. 2, 4(3): 278. 1904, Contributions from the United States National Herbarium* 18(7): 368. 1917, *Flora of the Lesser Antilles, Leeward and Windward Islands* 3: 25-220. 1979, *Acta Botanica Cubana* 4: 1-11. 1980.

in English: tropical dropseed

in India: thoma garica, thoma garika

S. teretifolius Harper

U.S., South and North Carolina, Georgia. Endangered or threatened species, found in wet savannahs and moist pine-lands, pinelands, pine savannahs, mesic savannahs, longleaf pine-wiregrass savannahs, in grasslands, bogs, pitcherplant bogs, riparian habitats, see *Bulletin of the Torrey Botanical Club* 33: 229-231. 1906.

in English: wire-leaved dropseed, wire-leaf dropseed, wire-leaf dropseed

S. testudinum Renvoize

Africa. A good fodder, see *Kew Bulletin* 15(3): 417. 1971.

S. tetragonus Bor

Asia. See *Kew Bulletin* 1949: 251. 1949.

S. texanus Vasey

U.S., Texas. Perennial, halophyte, useful for erosion control and for revegetation on reclamation projects, found in saline wetlands, marshes, see *Contributions from the United States National Herbarium* 1(2): 57. 1890.

in English: Texas dropseed

S. tharpii A.S. Hitchc. (*Agrostis airoides* Torr.; *Sporobolus airoides* (Torr.) Torr.) (dedicated to the American botanist Benjamin Carroll Tharp, 1885-1964, plant physiologist, professor of biology and botany, his works include "Texas parasitic fungi." *Mycologia*. 9(2): 105-124. 1917 and *The Vegetation of Texas*. Houston 1939, with Fred A. Barkley wrote "The genus *Ruellia* in Texas." *Amer. Midl. Nat.* 42: 1-86. 1949; see Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. 733. Philadelphia 1964; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933; Irving William Knobloch, compilation, "A preliminary verified list of plant collectors in Mexico." *Phytologia Memoirs*. VI. 1983)

U.S., Texas. Rare species, see *Annals of the Lyceum of Natural History of New York* 1(1): 151-152. 1824, *Explorations and Surveys for a Railroad Route 7*: 21. 1856 and *Proceedings of the Biological Society of Washington* 41: 161-162. 1928.

in English: Tharp dropseed, Tharp's dropseed, Padre island dropseed

S. thurberi Scribn. (*Muhlenbergia thurberi* (Scribn.) Rydb.)

U.S. See *Bulletin, Division of Agrostology United States Department of Agriculture* 11: 48, f. 5. 1898 and *Bulletin of the Torrey Botanical Club* 32(11): 601. 1905.

S. torreyanus (Schult.) Nash (*Agrostis torreyana* Schult.; *Muhlenbergia torreyana* (Schult.) Hitchc.) (after the North American (b. New York) botanist John Torrey, 1796-1873 (d. New York), physician, chemist, professor of chemistry 1824-1827 (West Point) and 1827-1855 (New York), his writings include *Botany of New York*. Albany 1853 and *Plantae Frémontianae*. Washington and New York 1853, co-author with Asa Gray (1810-1888) of *A Flora of North America*. New York, London, Paris 1838-1843; see A. Hunter Dupree, in *D.S.B.* 13: 432-433. 1981; J.H. Barnhart, *Biographical notes upon botanists*. 3: 392. 1965)

U.S. See *Mantissa* 2: 203. 1824 and *A Manual of the Botany of the Northern United States* 107. 1901, *American Journal of Botany* 21(3): 136. 1934.

S. tourneuxii Coss. (for the French botanist Aristide-Horace Letourneux, 1820-1890, magistrate, malacologist,

1851-1876 and 1881-1890 in Algeria, 1876-1881 Alexandria, among his writings are *Étude botanique sur la Kabylie du Jurjura*. Paris 1871 and *Catalogue des Mollusques terrestres et fluviatiles recueillis dans le Département de la Vendée*. Paris 1869, with Jules René Bourguignat wrote *Prodrome de la malacologie terrestre et fluviatile de la Tunisie*. [France - Ministère de l'Instruction Publique, etc. Exploration scientifique de la Tunisie, etc.] 1887; see J.H. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 236. 1972; H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 199. Oxford 1964; Ethelyn Maria Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933; Ernest Saint-Charles Cosson (1819-1889), *Compendium florae atlanticae*. Paris 1881-1887 and *Répertoire alphabétique des principales localités mentionnées dans le Compendium et le Conspectus florae atlanticae* ... Par E. Cosson ... avec le concours de MM. L. Kralik, A. Letourneux, etc. 1882; Michel Charles Durieu de Maisonneuve (1796-1878), *Exploration scientifique de l'Algérie pendant les années 1840, 1841, 1842* publiée par ordre du gouvernement et avec le concours d'une commission académique. Sciences physiques. Botanique par MM. Bory de St.-Vincent et Durieu de Maisonneuve membres de la Commission scientifique d'Algérie. Paris 1846-1855[-1869]. The genus *Tournexia* Cosson, Asteraceae, is also dedicated to Henri René Letourneux de la Perraudière, 1831-1861)

North Africa, Algeria, Arabia, northwestern India. Perennial, shrubby, tough, woody or subwoody, much-branched, densely tufted, forming dense mats or glaucous cushions, hard basal leaf sheaths persistent, pungent leaves, leaf blades distichous with closely imbricate sheaths, inflorescence primary branches short and stiff, open or contracted ovate cylindrical panicle, scabrid spikelets, glumes subequal to more or less equal, lower glume ovate to lanceolate, upper glume ovate to elliptic, lemma oblong to elliptic, good grazing grass, found in saline soils, open bushlands, gypsum, stony and sandy plains, shallow soils, limestone and limestone hills, similar to *Sporobolus ruspolianus*, see *Bulletin de la Société Botanique de France* 36: 250. 1889.

in Somalia: guban gub, gorof

S. transvaalensis Gooss.

South Africa. See *Transactions of the Royal Society of South Africa* 26: 215, f. 26. 1938.

S. tremulus (Willd.) Kunth (*Agrostis tenacissima* Roxb.; *Agrostis tremula* Willd.; *Sporobolus geniculatus* Nees ex Aitch.; *Sporobolus orientalis* Thw. ex Trimen, non (Nees) Kunth; *Sporobolus virginicus* (L.) Kunth; *Vilfa geniculata* Nees ex Steud.; *Vilfa tremula* Trin.)

India, Sri Lanka, Thailand. Perennial, creeping, erect, smooth, branched to strongly branched, stoloniferous, rhizomatous, forming dense mats, ligule a ciliate membrane, leaves rigid and pointed, inflorescence spicate, panicle branches solitary, glumes membranous, palea entire, 3 stamens, grassland, wet places, lowlands, dry and arid zones, shrubland, swamps, saline waters, sandy soils, allied to *Sporobolus virginicus* (L.) Kunth, see *Species Plantarum* 1: 63. 1753, *Species Plantarum. Editio quarta* 1: 372. 1797, *Flora Indica; or Descriptions ...* 1: 318. 1820, *De Graminibus unifloris et sesquifloris* 155. 1824, *Révision des Graminées* 1: 67. 1829, *Synopsis Plantarum Glumacearum* 1: 156. 1853, James Edward Tierney Aitchison (1836-1898), *A Catalogue of the Plants of the Punjab and Sindh*. To which are added some others that, from their present geographical proximity, may be found hereafter to occur in the Punjab. 165. London 1869 and *Handb. Fl. Ceylon* 5: 263. 1900, *Grasses of Ceylon* 96. 1956, *Ceylon J. Sci., Biol. Sci.* 2(2): 125. 1959, *Grasses of Burma ...* 633. 1960.

S. trichodes Hitchc. (*Sporobolus capillaris* Vasey, nom. illeg., non *Sporobolus capillaris* Miq.)

Northern America, U.S. Forage, see *Contributions from the United States National Herbarium* 1(8): 283. 1893 and *Contributions from the United States National Herbarium* 17(3): 311. 1913.

in Mexico: zacate

S. trimenii (Hook.f.) Senaratna (*Sporobolus diandrus* var. *nanus* Hook.f.; *Sporobolus indicus* var. *flaccidus* (Roth) Veldkamp) (after the British (b. London) botanist Henry Trimen, 1843-1896 (d. Peradeniya), 1866 Fellow of the Linnean Society, from 1879 to 1896 Director of the Peradeniya Botanic Gardens in Sri Lanka, 1888 Fellow of the Royal Society, plant collector, among his many works are *Hortus zeylanicus*. Colombo 1888 and *A Handbook to the Flora of Ceylon*. London 1893-1931, editor of the *Journal of Botany*, with Robert Bentley (1821-1893) wrote *Medicinal Plants*. London [1875]-1880, he was brother of the British (b. London) entomologist Roland Trimen (1840-1916, d. Epsom, Surrey); see J.H. Barnhart, *Biographical notes upon botanists*. 3: 401. 1965; R. North America, U.S., Mexico. Perennial bunchgrass, coarse, robust, large, pale green to bright green, growing in dense clumps, flat leaves, golden feathery seedheads, reproduces by seed, grows rapidly, ornamental, valuable forage species, unpalatable old growth, leaves and stems coarse and tough when mature, useful for erosion control and for revegetation on reclamation projects, provides cover for wildlife, usually found on floodplains, along washes, on sandy loam, rocky slopes, basins, mesas, dry sandy open grounds, in lowland habitats, upper floodplain terraces, saline soils, in arid and semiarid regions, on alluvial flats and bottomlands subject to flooding, arroyos, desert marshes, in semidesert grasslands, on creek flats, silty clay loam, see *Reliquiae Haenkeanae* 1(4-5): 242. 1830, *Nomenclator Botanicus. Editio secunda* 2: 767. 1841, *Explorations and Surveys for a Railroad Route* 7: 21. 1856, *Bulletin of the Torrey Botanical Club* 9: 103. 1882, *Biol. Centr. Amer. June 2005.

in English: sacaton, big sacaton, giant sacaton, Wright's dropseed, Wright's sacaton

in Mexico: zacatón

Stapfia Burt Davy = *Neostapfia* Burt Davy,
Stapfia Chodat (Algae)

After the Austrian botanist Otto Stapf, 1857-1933 (d. Innsbruck), traveler, Wien 1882-1889 assistant with Anton Joseph Kerner von Marilaun (1831-1898), 1900-1922 Keeper of the Herbarium of the Royal Botanic Gardens, Kew, 1908-1916 botanical secretary of the Linnean Society, 1922-1933 editor of the *Botanical Magazine*, contributor to Daniel Oliver (1830-1916), *Flora of Tropical Africa* (Apocynaceae, Verbenaceae, Myristicaceae, Gramineae, etc.), contributor to Harvey and Sonder, *Flora Capensis* (Apocynaceae, Laurineae, Proteaceae, etc.), contributed to Hooker's *Icones Plantarum*, among his numerous and valuable publications are *On the Flora of Mount Kinabalu in*

North Borneo. London 1894 and *The Aconites of India*. Calcutta 1905. See J.H. Barnhart, *Biographical notes upon botanists*. 3: 317. 1965; Mia C. Karsten, *The Old Company's Garden at the Cape and Its Superintendents: Involving an Historical Account of Early Cape Botany*. Cape Town 1951; James Edgar Dandy (1903-1976), in *The Journal of Botany*. 69: 54. (Feb) 1931; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. Philadelphia 1964; S. Lenley et al., *Catalog of the manuscript and archival collections and index to the correspondence of John Torrey*. Library of the New York Botanical Garden. 382. 1973; T.W. Bossert, compil., *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 380. 1972; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. 1917-1933; Mea Allan, *The Hookers of Kew*. London 1967; Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 650. 1994; Leonard Huxley, *Life and Letters of Sir Joseph Dalton Hooker*. London 1918; Stafleu and Cowan, *Taxonomic literature*. 5: 839-843. 1985; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 1993; Emil Bretschneider (1833-1901), *History of European Botanical Discoveries in China*. [Reprint of the original edition, St. Petersburg 1898] Leipzig 1981.

Chloridoideae, Orcuttiae, or Chloridoideae, Cynodonteae, Orcuttiinae, see Franz J.F. Meyen (1804-1840), *Reise um die Erde* 2: 14. 1834, *Bulletin de l'Herbier Boissier* 5: 947. 1897, *Erythea* 6(11): 109-110, pl. 3. 1898, *Österreichische Botanische Zeitschrift* 49: 134. May 1899, *Bulletin, Division of Agrostology United States Department of Agriculture* 17: 221, f. 517. 1899, *Erythea* 7: 43. 1899 and *Contributions from the United States National Herbarium* 41: 175, 219. 2001.

Stapfiola Kuntze = *Desmostachya* (Stapf)
Stapf, *Desmostachya* (Hook.f.) Stapf

After the Austrian botanist Otto Stapf, 1857-1933.

Chloridoideae, Eragrostideae, see *Flora Palaestina* 12. 1756, *The Flora of British India* 7: 324. 1897, *Flora Capensis* 7: 316. 1898 and *Lexikon Generum Phanerogamarum* 532. 1903.

Stegosia Lour. = *Rottboellia* L.f.

Greek *stega*, *stegos* "roof, shelter, cover."

Panicoideae, Andropogoneae, Rottboelliinae, type *Stegosia cochinchinensis* Lour., see *Supplementum Plantarum* 13, 114. 1781 [1782], *Flora Cochinchinensis* 1: 34, 51. 1790 and *North American Flora* 17(1): 84. 1909, *Kew Bulletin*

35(4): 817. 1981, *Contributions from the United States National Herbarium* 46: 546-548, 607. 2003.

Steinchisma Raf. = *Cliffordiochloa* B.K. Simon, *Fasciculochloa* B.K. Simon & C.M. Weiller

About 4-7 species, U.S. to Argentina. Panicoideae, Panicoideae, Paniceae, or Panicoideae, Paniceae Paspalinae, perennial, herbaceous, membranous ligules short ciliate at the apex, leaf blades lanceolate to filiform, short to long-rhizomatous, plants bisexual, lax inflorescence paniculate more or less contracted, inflorescence branches naked at the base, spikelets flattened elliptic glabrous, spikelets solitary on short or long pedicels, 2 glumes unequal, upper glume as long as spikelet, coriaceous lower lemma 3-nerved, indurate upper antherium, expanded and large lower palea as long as the upper antherium, lower flower present with 3 stamens or absent, ovary glabrous, 2 stigmas, in disturbed areas, damp places, grasslands, in open areas or near borders of rivers and streams, has been considered either a subgenus of *Panicum* or as a distinct genus, type *Steinchisma hians* (Elliott) Nash, see *Species Plantarum* 1: 55, 58. 1753, Constantine S. Rafinesque, *Seringe Bull. Bot.* 1: 220. 1830 [also *Bulletin Botanique [Genève]* 1: 220. 1830] and *Flora of the Southeastern United States* ...105. 1903, *Contr. U.S. Natl. Herb.* 15: 13-15. 1910, E.D. Merrill, *Index rafinesquianus* 76. 1949, *Grass Systematics and Evolution* 300. 1987, *Syst. Bot.* 13: 598. 1988, *Austrobaileya* 3(4): 674, 676, f. 3. 1992, *Flora Mesoamericana* 6: 302-318. 1994, *Austrobaileya* 4(3): 369-379. 1995, Zuloaga F.O., O. Morrone, A.S. Vega & L.M. Giussani, "Revisión y análisis cladístico de *Steinchisma* (Poaceae: Panicoideae: Paniceae)." *Annals of the Missouri Botanical Garden* 85(4): 631-656. 1998 [Revision and cladistic analysis of *Steinchisma* (Poaceae: Panicoideae: Paniceae).], *Las Gramíneas de México* 5: 1-466. 1999, Melvin R. Duvall, Jeffrey D. Noll and Alexandra H. Minn, "Phylogenetics of Paniceae (Poaceae)." *Am. J. Bot.* 88: 1988-1992, 1993-2012. 2001, *Am. J. Bot.* 88: 1993-2012. 2001, *Contributions from the United States National Herbarium* 46: 242, 607-608. 2003, *Austrobaileya* 6(3): 561-562. 2003, Sandra S. Aliscioni, Liliana M. Giussani, Fernando O. Zuloaga and Elizabeth A. Kellogg, "A molecular phylogeny of *Panicum* (Poaceae: Paniceae): tests of monophyly and phylogenetic placement within the Panicoideae." *Am. J. Bot.* 90: 796-821. 2003, *New Phytologist* 161(2): 341-370. Feb 2004.

Species

S. cuprea (Hitc. & Chase) W.V. Br. (*Panicum cupreum* Hitc. & Chase; *Panicum hians* var. *purpurascens* Scribn.; *Panicum purpurascens* Raddi)

America, Mexico. See *A Sketch of the Botany of South-Carolina and Georgia* 1(2): 118. 1816, *Agrostografia*

Brasiliensis 47. 1823, *Proceedings of the Academy of Natural Sciences of Philadelphia* 43(2): 296, t. 13, f. 3, 3a-3d. 1891 and *Contributions from the United States National Herbarium* 15: 120, f. 113. 1910, *Memoirs of the Torrey Botanical Club* 23(3): 20. 1977.

S. decipiens (Nees ex Trin.) W.V. Brown (*Panicum decipiens* Nees ex Trin.; *Panicum decipiens* Nees, nom. illeg., non *Panicum decipiens* Nees ex Trin.; *Panicum decipiens* (F.W. Schultz) Krause, nom. illeg., non *Panicum decipiens* Nees ex Trin.; *Panicum decipiens* var. *parviflorum* Döll; *Setaria decipiens* F.W. Schultz; *Steinchisma decipiens* (Nees) W.V. Br.)

Brazil to northern Argentina. Perennial, caespitose, erect, panicle spike-like shortly branched with congested branches, damp field, see *De Graminibus Paniceis* 227. 1826, *Flora Brasiliensis seu Enumeratio Plantarum* 193. 1829, *Flora Brasiliensis* 2(2): 237. 1877 and *Beihefte zum Botanischen Centralblatt* 29: 140. 1912, *Memoirs of the Torrey Botanical Club* 23(3): 20. 1977, *Ann. Missouri Bot. Gard.* 85: 644-646. 1998.

S. exiguiflora (Griseb.) W.V. Br. (*Digitaria minutiflora* Stapf; *Melinis minutiflora* P. Beauv.; *Panicum exiguiflorum* Griseb.; *Panicum laxum* var. *variegatum* Griseb.; *Panicum minutiflorum* (P. Beauv.) Raspail; *Panicum minutiflorum* A. Rich., nom. illeg., non *Panicum minutiflorum* (P. Beauv.) Raspail; *Panicum tricolor* Hack.)

America, Cuba, West Indies. See *Historia Stirpium Indigenarum Helvetiae Inchoata* 2: 244. 1768, *Nova Genera et Species Plantarum seu Prodrum* 23. 1788, *Essai d'une Nouvelle Agrostographie* 54, t. 11, f. 4. 1812, *Annales des Sciences Naturelles (Paris)* 5: 299. 1825, *Historia Fisica Política y Natural de la Isla de Cuba, Botanica* 11: 305. 1850, *Catalogus plantarum cubensium* ... 233-234. 1866 and *Österreichische Botanische Zeitschrift* 51: 370. 1901, *Flora of Tropical Africa* 9: 476. 1919, *Memoirs of the Torrey Botanical Club* 23(3): 20. 1977.

S. hians (Elliott) Nash (*Aira incompleta* Bosc ex Steud.; *Fasciculochloa sparshottiorum* B.K. Simon & C.M. Weiller; *Panicum hians* Elliott; *Panicum hians* var. *palle-scens* Döll; *Panicum jejunum* Trin.; *Panicum megapota-micum* Spreng.; *Panicum milioides* Nees, nom. illeg., non *Panicum milioides* Nees ex Trin.; *Panicum milioides* Nees ex Trin.; *Panicum milioides* var. *filifolium* R.A. Palacios; *Panicum oblongiflorum* Desv.; *Steinchisma hians* (Elliott) Nash ex Small)

U.S. to Argentina. Perennial, delicate, erect or ascending, caespitose, clumped, forming colonies, sometimes stoloniferous, leaf blades linear attenuate or acuminate, lax panicle ovate with long spreading branches, glabrous terminal spikelets elliptic to oblong, upper glume 3-nerved, lower lemma 3-nerved, lower palea ciliolate coriaceous, upper lemma pale scabrid, weed species, disturbed places, moist ground, rocky or stony places, marshy meadows, depressions, open areas,

related to *Panicum laxum*, see *A Sketch of the Botany of South-Carolina and Georgia* 1(2): 118. 1816, *De Graminibus Paniceis* 225. 1826, *Systema Vegetabilium, editio decima sexta* 4(2): 34. 1827, *Flora Brasiliensis seu Enumeratio Plantarum* 175. 1829, *Bulletin Botanique [Genève]* 1: 220. 1830, *Mémoires de la Société d'Agriculture, Sciences et Arts d'Angers* 1: 193. 1831, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. of Botany 90(5): 817. 2003, *Austrobaileya* 6(3): 561-562. 2003.

S. spathellosa (Döll) Renvoize (*Panicum milioides* var. *macrostachyum* Nees ex Döll; *Panicum schenkii* Hack.; *Panicum spathellosum* Döll; *Panicum turfosum* Mez)

Southern Brazil to northern Argentina. Caespitose, panicle ovate with long spreading branches, lower palea scaberulous, along riverbanks and streams, see *Flora Brasiliensis* 2(2): 241. 1877 and *North Carolina Agricultural Experiment Station Bulletin* 175: 116. 1900, *Österreichische Botanische Zeitschrift* 51: 426. 1901, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 56(Beibl. 125): 1. 1921, *Flora de la Provincia de Buenos Aires* 4(2): 1-624. 1970, *Kew Bulletin* 42(4): 921. 1987, *Ann. Missouri Bot. Gard.* 85: 649-651. 1998.

S. stenophylla (Hack.) Zuloaga & Morrone (*Panicum goyazense* Mez; *Panicum stenophyllum* Hack.)

South America, Brazil. See *Österreichische Botanische Zeitschrift* 51: 371. 1901, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 56(Beibl. 125): 4. 1921, *Darwiniana* 3(1-4): 53-60. 1995, *Annals of the Missouri Botanical Garden* 84(4): 651. 1998.

Steirachne Ekman

From the Greek *steiros* "barren, sterile" and *achne* "chaff, glume."

Two species, Brazil, Venezuela, Guyana. Chloridoideae, Cynodonteae, or Chloridoideae, Eragrostideae, Eragrostidineae, perennial, erect, herbaceous, caespitose, unbranched, knotty base or slightly cormose, auricles absent, sheaths not ciliate, ligule a very short ciliate membrane or a line of hairs, leaf blades glabrous linear subulate, rhizomatous, inflorescence an open panicle exerted, loose spikelets, loosely imbricate florets, hidden cleistogenes, 2 glumes persistent more or less equal, second glume awnless, setulose lemmas 3-nerved, palea keels winged ciliolate, lodicules truncate, stamens 2, ovary glabrous, 2 plumose stigmas, in damp places, along streams, depressions and sandy depressions, savannah, similar to *Eragrostis* and *Ectrosiopsis*, type *Steirachne diandra* Ekman, see *Species Plantarum* 1: 73-76. 1753, *Genera Plantarum* 23. 1776 and *Arkiv för Botanik utgivet av K. Svenska Vetenskapsakademien* 10(17): 35-36, t. 5, f. 1, t. 6, f. 17, text f. 1-2. 1911, *American Journal of Botany* 51: 453-463. 1964, *Flora of the Guianas, Series A: Phanerogams* 615-618. 1990, *Contributions from the United States National Herbarium* 41: 219. 2001.

Species

S. barbata (Trin.) Renvoize (*Bromus caldasii* Kunth; *Eragrostis barbata* Trin.; *Eragrostis quitensis* Trin.; *Festuca caldasii* Kunth; *Festuca caldasii* (Kunth) Kunth; *Festuca quitensis* Spreng.; *Festuca quitensis* Willd. ex Kunth, nom.

illeg., non *Festuca quitensis* Spreng.; *Festuca quitensis* Willd. ex Nees, nom. illeg., non *Festuca quitensis* Spreng.; *Festuca quitensis* Willd.; *Steirachne diandra* sensu Swallen, non Ekman)

South America. Perennial, tufted, glabrous, erect, slender, ligule ciliate, leaf blades ascending, open panicle sparsely branched, oblong spikelets laterally compressed, 6-10 florets, glumes ovate acuminate 1-nerved, narrowly ovate lemmas acuminate to subulate, cleistogamous spikelets in upper leaf axils, along riverbanks, open places, in damp grounds, see *Nova Genera et Species Plantarum (quarto ed.)* 1: 151. 1815 [1816], *Systema Vegetabilium, editio decima sexta* 1: 356. 1825, *Agrost. Bras.* 473. 1829 [*Flora Brasiliensis seu Enumeratio Plantarum* 473. 1829], *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 407. 1833, *Révision des Graminées* 1: 132. 1835, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 4,2(1): 76. 1836 and *Bull. Torrey Bot. Club* 75: 81. 1948, *Kew Bulletin* 39(1): 184. 1984, *Sida* 20(3): 1015-1022. 2003.

S. diandra Ekman (*Festuca pilosa* Nees, nom. illeg., non *Festuca pilosa* Hall.f.; *Festuca quitensis* Spreng.; *Festuca quitensis* Willd. ex Kunth, nom. illeg., non *Festuca quitensis* Spreng.; *Festuca quitensis* Willd. ex Nees, nom. illeg., non *Festuca quitensis* Spreng.; *Festuca quitensis* Willd.; *Steirachne pilosa* Ekman)

South America. Bulbous culm bases enclosing cleistogamous spikelets, savannah, see *Flora Brasiliensis seu Enumeratio Plantarum* 473. 1829 and *Arkiv för Botanik utgivet av K. Svenska Vetenskapsakademien* 10(17): 36, 38, t. 5, f. 1, t. 6, f. 17, text f. 1-2. 1911.

in Brazil: capim

Stelephuros Adans. = *Phleum* L.

From the Latin name *stelephuros*, used by Plinius for a plant, perhaps Ravenna sugarcane, a species of *Saccharum*; Greek *stelephouros*, ancient name applied by Theophrastus (*HP.* 7.11.2) to the haresfoot plantain, a species of *Plantago*.

Pooideae, Poeae, Alopecurinae, see *Species Plantarum* 1: 59-60. 1753, *Familles des Plantes* 2: 31, 607. 1763 and *American Midland Naturalist* 4: 216. 1915, *Contributions from the United States National Herbarium* 48: 491-494, 617. 2003.

Stemmatospermum P. Beauv. = *Nastus* Juss.

From the Greek *stemma*, *stemma* “garland, chaplet, crown” and *sperma* “a seed,” referring to the seeds.

Bambuseae, type *Stemmatospermum verticillatum* P. Beauv., see *Genera Plantarum* 34. 1789, *Systema Naturae*

... *editio decima tertia, aucta, reformata* 2: 580. 1791, *Essai d'une Nouvelle Agrostographie* 144-145, t. 25, f. 5. 1812.

Stenochloa Nutt. = *Dissanthelium* Trin.

From the Greek *stenos* “narrow” and *chloe*, *chloa* “grass.”

Pooideae, Poeae, Poinae, type *Stenochloa californica* Nutt., see *Linnaea* 10(3): 305. 1836, *Proceedings of the Academy of Natural Sciences of Philadelphia* 4: 25. 1848, *J. Acad. Nat. Sci. Philadelphia, ser. 2*, 1: 189. 1848, *Hooker's Icones Plantarum* 4: 56, t. 1375. 1881 and *Contributions from the United States National Herbarium* 48: 271-273, 617. 2003.

Stenofestuca (Honda) Nakai = *Bromus* L.

From the Greek *stenos* “narrow, close” with *Festuca*.

Pooideae, Bromaeae, *Festuca* subg. *Stenofestuca* Honda, see *Species Plantarum* 1: 73-78. 1753, *Fl. Japon* 52. 1784, *Systema Vegetabilium. Editio decima quarta* 119. 1784 and *U.S.D.A. Div. Agrostol. Bull.* 23: 1-66. 1900, *Journal of the Faculty of Science: University of Tokyo, Botany* 3(1): 44, 54. 1930, *Journal of Japanese Botany* 25(1-2): 6-7. 1950, *Brittonia* 7: 421. 1952, *Notes Roy. Bot. Gard. Edinburgh* 30: 366. 1970, *Bot. Jahrb. Syst.* 102: 447. 1981, *Taxon* 41: 559. 1992, *Taxon* 44: 611-612. 1995, *Contributions from the United States National Herbarium* 48: 154-191, 617. 2003.

Stenostachys Turcz. = *Cockaynea* Zotov, *Elymus* L., *Hystrix* Moench

From the Greek *stenos* “narrow” and *stachys* “a spike.”

About 3 species, New Zealand. Pooideae, Triticeae, Hordeinae, slender, hairy, stoloniferous, drooping or nodding inflorescences, narrow slender spikes of 10-30 spikelets with 1-3 awned to mucronate florets, spikelets solitary and sessile at nodes, glumes absent or reduced and awnlike, lodicules ciliate, ovary hairy to hispid, forests, shrublands, in grasslands, intergeneric hybrids with *Elymus* L., type *Stenostachys narduroides* Turcz., see *Species Plantarum* 1: 83-84. 1753, *Methodus Plantas Horti Botanici ...* 294-295. 1794, *Bulletin de la Société Impériale des Naturalistes de Moscou* 35(2): 311, 330. 1862 and *T.R.S.N.Z.* 73: 233-234. 1943 [also *Transactions of the Royal Society of New Zealand, Biological Sciences*], *N.Z. J. Sci. Tech.* 38A: 742-751. 1957, *Canad. J. Bot.* 42: 554. 1964, *New Zealand Journal of Botany* 20: 169-186. 1982, *Taxon* 41: 562-563. 1992, *New Zealand Journal of Botany* 32: 125-154. 1994, *Taxon* 44: 611-612. 1995, *Molecular Ecology* 8(3): 505-511. Species

S. deceptorix Connor

New Zealand. Perennial, robust, stout, tall, stoloniferous, tussocky, flat leaf blades, leaf sheaths keeled, narrow inflorescence slender and nodding, 1-3 florets, glumes equal, lemma long-awned, palea apex often retuse, chasmogamous or cleistogamous, grasslands, riverbanks, see *New Zealand Journal of Botany* 32: 144, f. 10. 1994.

S. gracilis (Hook.f.) Connor (*Asperella gracilis* (Hook.f.) Kirk; *Asperella gracilis* (Hook.f.) Kirk; *Cockaynea gracilis* (Hook.f.) Zotov; *Gymnostichum gracile* Hook.f.; *Hystrix gracilis* (Hook.f.) Kuntze)

New Zealand. Perennial, stoloniferous, stout, slender, leaf sheath hairy, flat leaf blades, slender inflorescences narrow and nodding, 1-3 florets, glumes usually absent or tiny, lemma prickly toothed, palea sometimes retuse, chasmogamous and cleistogamous, shrubland, grassland, see *Flora of New Zealand* 1: 312, t. 70. 1853, *Bulletin de la Société Impériale des Naturalistes de Moscou* 35(2): 331. 1862, *Revisio Generum Plantarum* 2: 778. 1891, *Transactions and Proceedings of the New Zealand Institute* 27: 352-353. 1895 and *Archives de biologie végétale pure et appliquée* 1: 64. 1901, *Man. N.Z. Fl.* 924. 1906, *Transactions and Proceedings of the Royal Society of New Zealand* 73: 234. 1943, *New Zealand Journal of Botany* 20: 184. 1982, *New Zealand Journal of Botany* 32: 146. 1994.

S. laevis (Petrie) Connor (*Asperella laevis* Petrie; *Cockaynea laevis* (Petrie) Zotov; *Elymus laevis* (Petrie) Á. Löve & Connor, nom. illeg., non *Elymus laevis* (Scribn. & J.G. Sm.) Hoover; *Hystrix laevis* (Petrie) Allan)

New Zealand. Perennial, long slender culms, stoloniferous, long stolons, rooting at the nodes, auricles absent or tiny, slender inflorescence very narrow and nodding, glumes 2 more or less equal, lemma mucronate or shortly awned, palea apex bifid, lodicules entire or lobed, chasmogamous and cleistogamous, see *Transactions and Proceedings of the New Zealand Institute* 27: 406. 1895 and *Department of Scientific and Industrial Research Bulletin* 49: 88. 1936, *Transactions and Proceedings of the Royal Society of New Zealand* 73: 234. 1943, *New Zealand Journal of Botany* 20(2): 184. 1982, *New Zealand Journal of Botany* 32: 146-147. 1994.

Stenotaphrum Trin. = *Diastemanthe* Steud.,
Diastemenanthe Desv., *Ophiurinella* Desv.

From the Greek *stenos* "narrow" and *taphros* "a trench, ditch," referring to the depressions or cavities in raceme axis, to the hollows of the flattened corky rachis of the raceme.

Some 7 species, tropics and subtropics. Panicoideae, Paniceae, Setariinae, or Panicoideae, Panicoideae, Paniceae, annual or perennial, herbaceous, branched, tufted, creeping or prostrate, ascending, long rhizomatous, stoloniferous with aggressive stolons, rooting at nodes, ligule a minute fringed membrane, leaf sheaths flattened or strongly compressed, short and flat leaves linear to lanceolate and basally sheathing, plants bisexual, short terminal and axillary spike-like racemes or spike-like panicle, central axis thick and swollen with 1 surface deeply hollowed, spikelets partially embedded in branch and closely spaced on one side of inflorescence axis, solitary or paired spikelets subsessile, lower floret male indurated, upper floret perfect, 2 glumes membranous and very unequal, first glume nerveless and small or minute, lower lemma leathery, upper lemma chartaceous, palea of upper florets present, 2 fleshy lodicules, 3 stamens, ovary glabrous, 2 stigmas, weed species mat-forming, native pasture species, some fodders, used for binding sand and erosion control, useful lawn grass, playing fields and golf courses, tolerant of short dry periods, withstand salt spray, mainly on sandy soils, warm coastal regions, in humid areas along the coasts, sandy soils near the coast, on steep sandy soils, seaside, open areas, grassland, type *Stenotaphrum glabrum* Trin., see Carl Bernhard von Trinius (1778-1844), *Fundamenta Agrostographiae*. 175-176. Viennae (Jan) 1820, *Mémoires de la Société d'Agriculture, Sciences et Arts d'Angers* 1: 179, t. 8, f. 4. 1831, *Synopsis Plantarum Glumacearum* 1: 360. 1854 [or 1855] and Jonathan Deininger Sauer, "Revision of *Stenotaphrum* (Gramineae: Paniceae) with attention to its historical geography." *Brittonia* 24(2): 202-222. 1972, *Flora of Tropical East Africa* 451-898. 1982, *Crop Science (Florida)* 22: 469-473. 1982 [Classification of St. Augustinegrass], *Genera Graminum* 293-294. 1986, *Flora Mesoamericana* 6: 364. 1994, K.B. Species

S. dimidiatum (L.) Brongn. (*Panicum dimidiatum* L.; *Panicum dimidiatum* Walter, nom. illeg., non *Panicum dimidiatum* L.; *Rottboellia complanata* Sw.; *Rottboellia dimidiata* (L.) L.f.; *Stenotaphrum complanatum* (Sw.) Schrank; *Stenotaphrum dimidiatum* (Thunb.) Wood; *Stenotaphrum glabrum* Trin.; *Stenotaphrum glabrum* var. *multiflorum* Döll;

Stenotaphrum koenigii Schrank; *Stenotaphrum madagascariense* Kunth; *Stenotaphrum secundatum* (Walter) Kuntze; *Stenotaphrum secundatum* sensu Alston, non (Walter) Kuntze)

Tropics, cosmopolitan. Perennial, coarsely matted, robust, stoloniferous, dense sward-forming, creeping, rooting at the nodes, vigorous, leaf sheaths strongly flattened, spike-like raceme compact and compressed, central axis thick and swollen with 1 surface deeply hollowed, spikelets partially embedded in branch, flat growing, ornamental, ground cover, lawn grass, weed species naturalized elsewhere in paleotropics, medicinal use, decoction of rhizomes diuretic and sudorific, native pasture species, good fodder, grazed by deer, can cause cuts and itchiness in humans, pioneer, well adapted to heavy shade conditions, found in forests and thickets, sandy foreshores, coastal regions, beaches and marshes, open areas, saline and freshwater, river floodplains, sandy soils, see *Species Plantarum* 1: 57. 1753, *Supplementum Plantarum* 114. 1781, *Flora Caroliniana, secundum* ... 72, 249. 1788, *Der Gesellschaft Naturforschender Freunde zu Berlin Magazin für die neuesten Entdeckungen in der Gesammten Naturkunde* 4: 89, t. 5. 1810, *Plantae rariores horti academici monacensis* 2(10): t. 98. 1819 [1821 or 1822], *Fundamenta Agrostographiae* 176. 1820, *Flora* 7(2), 1: 26, 28. 1824, *Voyage autour du Monde* 2(2): 127. 1829 [also Duperr., *Bot. in English: pemba grass, buffalo grass

in Mexico: pasto chato

in Rodrigues Island: chiendent bourrique, gros chiendent

in Mauritius: herbe bourik, bourik, bouriq, herbe bourrique

in La Réunion: chiendent boeuf, trainasse

in Thailand: yaa paak khwaai, ya pak khwai

S. helferi Munro ex Hook.f.

Asia, Thailand, Burma. See *The Flora of British India* 7(21): 91. 1897 [1896] and *Brittonia* 24: 205. 1972.

in Thailand: yaa lin krah bueh, ya lin krabue

S. micranthum (Desv.) C.E. Hubb. (*Ophiurinella micrantha* Desv.; *Stenotaphrum diplotaphrum* Pilg.; *Stenotaphrum lepturoides* Hensl.; *Stenotaphrum subulatum* Trin.)

Africa, Mauritius. Perennial, creeping, low, erect to ascending, prostrate and spreading, rooting at the nodes, ligule

short with a dense fringe of hairs, leaf blades lanceolate to nearly elliptic, fertile stems ascending, flowers in slender spikes narrow-cylindrical, spikelets not secund, rachis of the spikelets is not flattened, spikelets sunk in cavities of rachis, grows on sandy shores, coastal cliffs, above high tide line, in open littoral forest, ravines, tracks, often in partial shade, see *Mémoires de la Société d'Agriculture, Sciences et Arts d'Angers* 1: 179, t. 8, f. 4. 1831, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 3,1(2-3): 190. 1834, *Annals of Natural History* 1: 346. 1838 and *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 12: 702. 1935, *The Grasses of Mauritius and Rodriguez* 73. 1940.

S. secundatum (Walter) Kuntze (*Diastemanthe platystachys* Steud.; *Ischaemum secundatum* Walter; *Panicum dimidiatum* L.; *Panicum dimidiatum* Walter, nom. illeg., non *Panicum dimidiatum* L.; *Rottboellia dimidiata* Thunb.; *Rottboellia dimidiata* (L.) L.f.; *Rottboellia stolonifera* Poir.; *Rottboellia tripsacoides* Lam.; *Stenotaphrum americanum* Schrank; *Stenotaphrum compressum* Druce; *Stenotaphrum dimidiatum* (L.) Brongn.; *Stenotaphrum dimidiatum* var. *americanum* (Schrank) Hack.; *Stenotaphrum dimidiatum* var. *secundatum* (Walter) Domin; *Stenotaphrum glabrum* Trin.; *Stenotaphrum glabrum* var. *americanum* (Schrank) Döll; *Stenotaphrum glabrum* var. *glabrum*; *Stenotaphrum glabrum* var. *multiflorum* Döll; *Stenotaphrum sarmentosum* Nees; *Stenotaphrum secundatum* var. *secundatum*; *Stenotaphrum secundatum* var. *variegatum* Hitchc.; *Stenotaphrum swartzianum* Nees)

Native range unknown, tropics and subtropics. Perennial sodgrass, prostrate, strongly stoloniferous, glabrous, creeping, vigorous and robust, rather coarse, rooting at the nodes, branching and ascending, spreading, stems compressed, dense sward-forming, stolons with short to relatively long internodes, ligule a fringe of short hairs or a densely ciliate rim, leaf sheaths strongly flattened and keeled, leaf blades linear-oblong and glabrous, inflorescence ascending and stout, acute sessile erect rigid spikelets light green, glumes membranous and very unequal to dissimilar, first glume short and truncate, lower lemma sterile or male, upper lemma bisexual and smooth, seeds oblong, propagated vegetatively by runners and cuttings, weed species persistent under heavy grazing and trampling, grows on almost all types of soils and in shade, ornamental widely naturalized, medicinal use, useful for binding sand and for erosion control, suitable for soil conservation and rehabilitation, grazed, low quality pasture grass, high grazing value, young growth palatable, grown as a lawn grass, used as a cover crop in plantations, once established resists weed invasion, tolerates short-term flooding, poor drought tolerance, a coastal pioneer, withstands salt spray, occurs in sandy soils near the sea, on the sandy beaches, riverine edges and road verges,

freshwater sources, in humid areas on coastal sands, warm coastal regions, limestone shorelines of tropical regions, dry open and shaded areas, moist swampy soil near the seashores, in low dunes, salty and fresh water marshes, see *Species Plantarum* 1: 57. 1753, *Supplementum Plantarum* 114. 1781, *Flora Caroliniana, secundum ...* 72, 249. 1788, *Tableau Encyclopédique et Méthodique ... in Hawaii: 'aki'aki haole, manienie 'aki'aki, manienie 'aki'aki haole, manienie mahikihiki

in Vietnam: co'quai chèo

Stephanachne Keng = *Pappagrostis* Roshev.

Greek *stephein* "to crown," *stephanos* "a crown, garland, that which surrounds or encompasses" and *achne* "chaff, glume," Latin *stephanos* is the name of several plants (Plinius).

About 2 species, Asia, western China, Russia. Pooideae, Poodae, Aveneae, perennial, herbaceous, tufted, auricles absent, ligule an unfringed membrane, plants bisexual, inflorescence paniculate or spicate, spikelets pedicellate 1-flowered, 2 glumes subequal 1- to 5-nerved, 1-3 awns, hairy lemmas bifid, palea hairy, 2-3 free and membranous lodicules, 3 stamens, ovary glabrous, 2 plumose stigmas, slopes, closely related to *Trikeria*, type *Stephanachne nigrescens* Keng, see *Annuaire du Conservatoire et Jardin Botaniques de Genève* 7: 325. 1904, *Flora URSS* 2: 230, 749-750. 1934, *Contributions from the Biological Laboratory of the Chinese Association for the Advancement of Science* 9: 134, 136. Nanking 1934 [also *Contr. Biol. Lab. Chin. Assoc. Advancem. Sci., Sect. Bot.*, also *Contributions from the Biological Laboratory of the Science Society of China: Botanical Series*], Tsing Hai Province Biological Research Institute. Xi zang a li di qu dong wu kao cha bao gao = *Report on an Investigation of the Flora and Fauna of the Ah Li Region of Tibet*. [s.l.] Ke xue chu ban she, 1979, *Flora Reipublicae Popularis Sinicae* 9(3): 305, pl. 75, f. 13-19. 1987, *Bulletin of Botanical Research* 17: 380-388. 1997 [in Chinese].

Species

S. monandra (P.C. Kuo & S.L. Lu) P.C. Kuo & S.L. Lu

China.

S. nigrescens Keng

China. Glumes membranous to herbaceous, 3 lodicules, see *Contributions from the Biological Laboratory of the Chinese Association for the Advancement of Science* 9: 135, f. 4. 1934.

Stereochlaena Hackel = *Chloridion* Stapf

From the Greek *stereos* "solid, firm, tight" and *chlaena*, *chlaenion* "a cloak, covering."

About 5 species, tropical East Africa to South Africa. Panicoideae, Panicodae, Paniceae, Digitariinae, annual or perennial, herbaceous, tufted, branched or not, narrow leaf blades, auricles absent, ligule a fringed membrane, sometimes stoloniferous, forming mats, plants bisexual, inflorescence spicate, spike-like racemes digitate or subdigitate, 2

florets, spikelets paired and shortly pedicellate, lower floret sterile, upper floret bisexual acute to acuminate, awn straight, 1 or 2 minute glumes per spikelet, lower glume tiny or suppressed, upper glume tiny and sometimes awned, lower lemma scabrid and nerved, palea 2-nerved, lodicules absent, 3 stamens, ovary glabrous, 2 stigmas, open habitats, slopes, stony hills, woodlands, shallow soils, open areas, savannahs, grasslands, type *Stereochlaena jeffreysii* Hack., see *Hooker's Icones Plantarum* 28: t. 2640. 1900, *Proceedings of the Rhodesia Scientific Association* 7(2): 65-66. 1908, W.D. Clayton, "The genus *Stereochlaena* (Gramineae)." *Kew Bulletin* 33(2): 295-297. 1978, *Flora of Tropical East Africa* 451-898. 1982, *Kew Bulletin, Additional Series* 13: 298, 377. 1986.

Species

S. annua Clayton

Tanzania. See *Kew Bulletin* 33(2): 295. 1978.

S. caespitosa Clayton

Tanzania. See *Kew Bulletin* 33(2): 296. 1978.

S. cameronii (Stapf) Pilg. (*Chloridion cameronii* Stapf; *Stereochlaena jeffreysii* Hack.) (Verney Lovett Cameron, 1844-1894, plant collector, traveler, Gold Coast, Tanzania, with Sir Richard Francis Burton, 1821-1890; see F.N. Hepper and Fiona Neate, *Plant Collectors in West Africa* 16. Utrecht 1971)

East tropical Africa, Malawi, Zambia. Perennial, sometimes stoloniferous, tufted, procumbent, rooting at the nodes, basal sheaths hairy, awned digitate racemes, lower lemma awned, straight awn, forming small mats, gravelly surface, dry sandy grassland, bare ground, see *Hooker's Icones Plantarum* 28: t. 2640. 1900, *Die natürlichen Pflanzenfamilien, Zweite Auflage* 14e: 45. 1940.

S. foliacea Clayton (*Baptorhachis foliacea* (Clayton) Clayton)

Mozambique. See *Kew Bulletin* 33(2): 296. 1978, *Kew Bulletin* 42(2): 401. 1987.

S. tridentata Clayton

Tanzania. See *Kew Bulletin* 33(2): 296. 1978.

Steudelella Honda = *Sphaerocaryum* Nees ex Hook.f.

For the German botanist Ernst Gottlieb von Steudel, 1783-1856, physician, botanical collector, December 1825 with Christian Ferdinand Hochstetter (1787-1860) founded Der Botanische Reiseverein Esslingen; see J.H. Barnhart, *Biographical notes upon botanists*. 3: 326. 1965; H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 249, 280. Oxford 1964; A. Panicoideae, Panicodae, Isachneae, type *Steudelella pulchella* (Roth ex Roem. & Schult.) Honda, see *Systema Vegetabilium* 2: 476. 1817, *Prodromus Florae Novae Hollandiae* 196. 1810, *Nomenclator Botanicus. Editio secunda* 2: 620. 1841, *The Flora of British India* 7(22): 246. 1897 [1896] and *Philippine Journal of Science* 11: 52. 1916, *Journal of the Faculty of Science: University of Tokyo, Botany* 3(1): 258-259. 1930 [also *J. Fac. Sci. Univ. Tokyo, Sect. 3, Bot.*].

Steyermarkochloa Davidse & R.P. Ellis

Dedicated to the American botanist Julian Alfred Steyermark, 1909-1988, botanical explorer, from 1937 to 1958 with the Field Museum of Natural History, from 1959 to 1984 at the Instituto Botanico Caracas, specialist on Rubiaceae, among his writings are "New Species of Rubiaceae from Peru collected by John Wurdack." *Bol. Soc. Venez. Ci. Nat.* 25: 232-244. 1964, *Spring Flora of Missouri*. St. Louis and Chicago 1940, *Behind the Scenes*. St. Louis, Mo. 1984 and "Rubiaceae." in Bassett Maguire, J.J. Wurdack and collaborators, "The Botany of the Guayana Highland-part V, VI, VII, IX." in *Mem. New York Bot. Gard.* 10(5): 186-278. 1964, 12(3): 178-285. 1965, 17(1): 230-439. 1967 and 23: 227-832. 1972, with Otto Huber wrote *Flora del Avila*. Caracas 1978, with Paul C. Standley curator of the *Flora of Guatemala*. [Fieldiana, Botany. volume 24, etc.] Published by Chicago Natural History Museum; see J.A. Steyermark & collaborators, "Botanical Exploration in Venezuela." in *Fieldiana, Bot.* 1951-1952; T.W. Bossert, compil., *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 383. 1972; J.H. Barnhart, *Biographical notes upon botanists*. 3: 330. 1965; S. Lenley et al., *Catalog of the manuscript and archival collections and index to the correspondence of John Torrey*. Library of the New York Botanical Garden. 388. 1973; Laurence J. Dorr, "In Memoriam. John J. Wurdack, 1921-1998." in *Plant Science Bulletin*. 44(2): 41. Summer 1998; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993; Staffeu and Cowan, *Taxonomic literature*. 5: 925-926. Utrecht 1985.

Two species, tropical America, Colombia, Venezuela, Amazonas. Panicoideae (or Arundinoideae? or Bambusoideae?), Steyermarkochloaeae, perennial, stout, herbaceous, unarmed, tufted, unbranched, erect, dimorphic, densely clumped, forming colonies, vegetative and reproductive culms, auricles absent, leaf blades linear sometimes slightly twisted, ligule absent, plants bisexual, inflorescence a single raceme, spikelets shortly pedicellate and imbricate, male or bisexual spikelets at the base of the inflorescence, bisexual spikelets in the middle and female toward the tip, 2 male florets, 2 glumes subequal, awnless, palea present, lodicules absent, 2 stamens or absent, ovary glabrous, 2 stigmas, savannahs, forest, seasonally inundated places, type *Steyermarkochloa unifolia* Davidse & R.P. Ellis, see *Histoire des plantes de la Guiane Française* 2: 876, pl. 337. 1775 and *J. Linn. Soc. Bot.* 50: 337-362. 1936, *Annals of the Missouri Botanical Garden* 71(4): 995, f. 1-27. 1984 [1985], *Genera Graminum* 312-313. 1986, *Contributions from the United States National Herbarium* 46: 609. 2003.

Species

S. angustifolia (Spreng.) Judz. (*Pariana angustifolia* Spreng.; *Steyermarkochloa unifolia* Davidse & R.P. Ellis)

South America. See *Systema Vegetabilium, editio decima sexta* 2: 609. 1825 and *Annals of the Missouri Botanical Garden* 71(4): 995, f. 1-27. 1984 [1985], E.J. Judziewicz, "Steyermarkochloa angustifolia (Sprengel) Judziewicz, a new combination." *Ann. Missouri Bot. Gard.* 77: 204. 1990.

S. unifolia Davidse & R.P. Ellis (*Steyermarkochloa angustifolia* (Spreng.) Judz.)

South America. See G. Davidse & R.P. Ellis, "Steyermarkochloa unifolia Davidse & Ellis, a new genus from Venezuela and Colombia (Poaceae: Arundinoideae: Steyermarkochloaeae)." *Ann. Missouri Bot. Gard.* 71: 994-1012. 1984.

Stiburus Stapf = *Eragrostis* Wolf, *Triphlebia* Stapf, *Triphlebia* Baker (Aspleniaceae)

Possibly from the Latin *stibi, is* and *stibium, ii* "antimony, black antimony"; or from Greek *stibi* and *oura* "a tail," or *sibe* "stipa."

Two species, southern Africa. Chloridoideae, Eragrostideae, Eleusininae, or Chloridoideae, Eragrostideae, Eragrostidinae, annual, unbranched, unarmed, tufted, herbaceous, leaves mostly basal, auricles absent, glandular, ligule a very narrow fringed membrane, rhizomatous, plants bisexual, contracted inflorescence paniculate, spikelets solitary and pedicellate, 2-6 florets, lower florets bisexual, uppermost floret reduced, 2 glumes densely hairy and unequal or subequal, lemmas mucronate, palea present, 2 minute lodicules free and fleshy, stamens 3, ovary glabrous, stigmas plumose, in moist areas along streams, high

altitude sourveld, sometimes referred to *Eragrostis*, see *Genera Plantarum* 23. 1776, *Icones et Descriptiones Graminum Austriacorum* 4: 15. 1809, O. Beccari (1843-1920), *Malesia: raccolta di osservazioni botaniche intorno alle piante dell'arcipelago Indo-Malese e Papuano* pubblicata da Odoardo Beccari, destinata principalmente a descrivere ed illustrare le piante da esso raccolte in quelle regioni durante i viaggi eseguiti dall'anno 1865 all'anno 1878 ... Genova 1877-1890, *Flora Capensis* 7: 318. 1898, *Hooker's Icones Plantarum* 27: t. 2612. 1899 and *Flora Capensis* 7(4): 696-697. 1900, *Acta Bot. Neerl.* 15: 157. 1966, *Contributions from the United States National Herbarium* 41: 81-115, 219, 230. 2001.

Species

S. alopecuroides (Hack.) Stapf (*Eragrostis alopecuroides* Balansa; *Eragrostis tincta* S.M. Phillips; *Lasiochloa alopecuroides* Hack.; *Triphlebia alopecuroides* (Hack.) Stapf)

South Africa, Zimbabwe. Perennial, tufted, rhizomatous, leaf blade flattened and hairy, ligule a short inconspicuous fringed membrane, inflorescence a contracted cylindrical spike-like panicle, dark glumes and lemmas densely hairy, grazing value unknown, the South African traditional healers use it to wash away bad luck, common in veld, open velds, slopes, sourveld, wet areas, around seepages, see *Révision des Graminées* 2: 556. 1832, *Journal de Botanique (Morot)* 4(9): 168. 1890, *Bulletin de l'Herbier Boissier* 3(8): 393. 1895 and *Flora Capensis* 7: 697. 1900, *Kew Bulletin* 37(1): 159. 1982.

in English: Pongwa grass

in South Africa: koperdraadgras, morakela, morakapele

S. conrathii Hack. (*Eragrostis conrathii* (Hack.) S.M. Phillips)

South Africa, Transvaal. Perennial, rhizomatous, tufted, glumes and lemmas hairy, usually in damp areas, wet places, mountain sourveld, see *Österreichische Botanische Zeitschrift* 52(10): 374. 1902, *Kew Bulletin* 37(1): 159. 1982.

Stilpnophleum Nevski = *Calamagrostis* Adans.

Greek *stilpnos* "shining, glittering" and *Phleum*.

Monotypic, Russia. Pooideae, Poodae, Aveneae, or Pooideae, Poeae, Agrostidinae, perennial, herbaceous, tufted, auricles absent, ligule an unfringed membrane, plants bisexual, inflorescence paniculate, spikelets pedicellate, 2 acute glumes subequal 1-nerved, palea nerved, 2 free membranous lodicules, 3 stamens, ovary glabrous, 2 stigmas, sometimes referred to *Calamagrostis* and *Deyeuxia*, type *Stilpnophleum laguroides* (Regel) Nevski (also spelled *laguroides*), see *Familles des Plantes* 2: 31, 530. 1763,

Tentamen Florae Germanicae 1: 34. 1788, George Henderson (1836-1929), *Lahore to Yârkand*. Incidents of the route and natural history of the countries traversed by the Expedition of 1870, under T.D. Forsyth. By George Henderson and Allan O. Hume. London 1873, *Trudy Imp. Saint Pétersbourg. Bot. Sada* 7: 639. 1881 and *Trudy Bot. Inst. Akad. Nauk SSSR* 3: 143. 1936, *Feddes Rep. Spec. Nov. Reg. Veg.* 63(3): 246. 1960, *Contributions from the United States National Herbarium* 48: 191-227, 617. 2003.

Species

S. laguroides (Regel) Nevski (*Calamagrostis laguroides* Regel)

Russia.

Stipa L. = *Achnatherum* P. Beauv.,
Anemanthele Veldkamp, *Aristella* Bertol.,
Aristella (Trin.) Bertol., *Austrostipa* S.W.L.
Jacobs and J. Everett, *Hesperostipa* (Elias)
Barkworth, *Jarava* Ruiz & Pav., *Lasiagrostis*
Link, *Macrochloa* Kunth, *Ortachne* Nees ex
Steud., *Orthoraphium* Nees, *Patis* Ohwi,
Ptilagrostis Griseb., *Sparteum* P. Beauv.,
Timouria Roshev., *Trichosantha* Steud.,
Trikeriaia Bor

From the Greek *stýpe*, *stýppe* “tow,” in some Eurasian species the awns are feathery and plumose; Latin *stuppa*, *stipa* “tow, oakum, hards”; see Carl Linnaeus, *Species Plantarum*. 78. 1753 and *Genera Plantarum*. edition 5. 34. 1754; Helmut Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 611. Basel 1996.

Around 200-300/400 species for *Stipa* (s. lat.) L., and about 50 species for *Stipa* (s. str.) L., mostly in temperate and warm temperate regions. Stipoideae, Stipeae, Stipinae, or Pooideae, Stipeae, Stipinae, perennial bunchgrass, rarely annual, variable, occasionally rhizomatous, stems clumped or densely tufted, caespitose or spreading, erect or ascending, bristled, long slender stems, unbranched or branched, robust basal clump of foliage, ligule membranous, leaves narrow and rough, auricles present or absent, sheaths terete and open, plants bisexual, inflorescence narrowly-paniculate, panicle dense or sparse, elongate to fusiform floret with a well-developed pungent callus and hygroscopic awn, spikelets pedicellate and borne singly, 1 bisexual floret, reduced floret absent, pungent floret, a long or short bearded callus at the base of each floret, awn flexuous or falcate, 2 glumes very unequal to more or less equal, glumes larger than the single floret, lemma membranous to coriaceous, palea membranous and 0- to 2-nerved, 2 or 3 lodicules, 3 stamens, anthers yellow, ovary glabrous, 2 or 3 or 4 white stigmas, axillary cleistogenes common, ornamental, edible

grains, weed species, provides valuable forage, used for papermaking and cordage, the diaspores penetrate the skin, mouths and eyes of stock, the species with falcate awns a problem in Australia for the quality of sheep fleeces, some species can cause a drowsiness or stuporous condition in horses, native pasture species, rocky slopes, pampas, grasslands, punas, páramos, steppes, a polyphyletic genus, taxonomic problems, often referred to *Austrostipa* S.W.L. Jacobs and J. Everett, species treated frequently as *Jarava*, some species included by some authors in *Hesperostipa* and *Austrostipa*, hybrids with *Nassella* (Trin.) E. Desv., type *Stipa pennata* L., see *Species Plantarum* 1: 78-79. 1753, *Flora Peruviana, et Chilensis Prodrumus* 2. 1794, *Flora Peruviana* 1: 5, t. 6, f. b. 1798, *Essai d'une Nouvelle Agrostographie* 19-20, 146, 178, pl. 6, f. 7. 1812, *Fundamenta Agrostographiae* 110. 1820, *Enumeratio plantarum horti regii berlinensis altera* 1: 99. Berolini [Berlin] 1827, *Révision des Graminées* 1: 58. 1829, *Fl. Ital.* 1: 690. 1833, *Nomenclator Botanicus. Editio secunda* 2: 642, 702. 1841, *Proceedings of the Linnean Society of London* 1: 94. 1841, *Species Graminum Stipaceorum* 42. 1842, *Flora Rossica* 4(13): 447. 1852, *Synopsis Plantarum Glumacearum* 1: 121, 132. 1854, *Flora der Provinz Brandenburg* 1: 812. 1864 and *Anales del Museo Nacional de Montevideo* 4(22): IV, 98. 1901, *Fl. As. Ross.* 12: 173. 1916, *Special Papers of the Geological Society of America* 41. Washington, D.C. 1942, *Acta Phytotaxonomica et Geobotanica* 11: 181. 1942, *Botanical Gazette* 113: 438-444. 1952, *Publications of the Carnegie Institution of Washington* 599. 1953, *Kew Bulletin* 9(4): 555. 1955, *Gayana, Botánica* 13: 1-137. 1965, *Boletín de la Sociedad Argentina de Botánica* 11: 303-305. 1969, *Phytomorphology* 26: 297-301. Species

S. acrociliata Reader (*Austrostipa acrociliata* (Reader) S.W.L. Jacobs & J. Everett; *Stipa readeri* F. Muell. ex Reader)

Western Australia, South Australia, New South Wales, Victoria. Perennial, shortly rhizomatous or caespitose, wiry and often branched at nodes, ligule truncate and membranous, auricles thickened, blade ribbed, panicle sparse and spreading with few-flowered branches, spikelets gaping, glumes unequal, lemma dark brown, callus straight and sharp, awn with 1 or 2 bends, sandy areas, desert, see *Victoria Naturalist* 13: 167-168. 1897 and *Victoria Naturalist* 23: 25. 1906, *Telopea* 6(4): 584. 1996.

in English: graceful speargrass

S. aktauensis Roshev. (*Stipa deserti* Popov ex Kom.)

Russia, USSR (former), Turkestan, Aktau. Rare species, see *Izv. Bot. Sada Akad. Nauk SSSR* 30: 302. 1931 [or 1932], *Flora URSS* 2: 85. 1934.

S. aliena Keng

China. Subalpine meadows, sand dune area, sandy loam, see *Sunyatsenia* 6(1): 74-75. 1941.

S. angustifolia Hitchc. (*Piptochaetium angustifolium* (Hitchc.) Valencia & Costas)

Mexico. Forage, rocky places, see *Reliquiae Haenkeanae* 1: 222. 1830 and *Contributions from the United States National Herbarium* 24(7): 246, t. 52, f. 1, 2. 1925, *Boletín de la Sociedad Argentina de Botánica* 12: 177. 1968, *Annals of the Missouri Botanical Garden* 89(3): 305-336. 2002.

in Mexico: flechilla hoja angosta

S. anomala P.A. Smirn. (*Stipa anomala* P.A. Smirn. ex Roshev., nom. illeg., non *Stipa anomala* P.A. Smirn.; *Stipa pennata* var. *anomala* (P.A. Smirn.) Tzvelev)

Russia, Ukraine. Indeterminate species, see *Species Plantarum* 1: 78. 1753 and *Flora URSS* 2: 96, 740. 1934, *Novosti Sist. Vyss. Rast.* 11: 18. 1974.

S. apertifolia Martinovsky (*Stipa dasyvaginata* Martinovsky)

Europe, Spain. Rare species, see *Preslia* 39: 274. 1967, *Anales del Instituto Botánico A. J. Cavanilles* 27: 61. Madrid 1970.

S. apertifolia Martinovsky var. *apertifolia*

North Africa, Italy, Spain.

S. apertifolia Martinovsky var. *nevadensis* Francisco M. Vázquez & Devesa

North Africa, Italy, Spain.

S. aquarii Vickery, S.W.L. Jacobs & Everett (*Austrostipa aquarii* (Vickery, S.W.L. Jacobs & J. Everett) S.W.L. Jacobs & J. Everett; *Stipa aphylla* (Rodway) Townrow)

Australia, Northern Territory. Perennial, erect, see *Tasmanian Fl.* 262. 1903, *Papers and Proceedings of the Royal Society of Tasmania* 104: 85, 96. 1970, *Telopea* 3(1): 27. 1986, *Telopea* 6(4): 584. 1996.

S. arabica Trin. & Rupr. (*Stipa arabica* var. *meyeriana* Trin. & Rupr.; *Stipa arabica* var. *meyeriana* Tzvelev; *Stipa barbata* var. *arabica* (Trin. & Rupr.) Boiss. ex Kuntze; *Stipa barbata* var. *arabica* (Trin. & Rupr.) Bornm., nom. illeg., non *Stipa barbata* var. *arabica* (Trin. & Rupr.) Boiss. ex Kuntze; *Stipa meyerana* (Trin. & Rupr.) Grossh.; *Stipa meyeriana* (Trin. & Rupr.) Grossh.; *Stipa orientalis* Trin.; *Stipa szovitsiana* Trin. & Rupr.; *Stipa szovitsiana* var. *meyeriana* (Trin. & Rupr.) Roshev.)

Asia, Saudi Arabia, Syria, Iran. Perennial, open panicle, fine curved awn shortly pubescent and pigmented, useful for erosion control, heavily grazed, common on very dry rocky area, see *Flora Atlantica* 1: 97, t. 27. 1798, *Species Graminum Stipaceorum* 77-78. 1842, *Flora Rossica* 4(13): 450. 1852, *Acta Horti Petrop.* 10: 255. 1887 and *Bulletin de l'Herbier Boissier* 8: 737. 1908, *Zlaki SSSR* 583. 1976, *Botanical Journal of the Linnean Society* 144(4): 497-505. Apr 2004.

S. araxensis Grossh. (*Stipa lasiopoda* P.A. Smirn.; *Stipa pennata* var. *araxensis* (Grossh.) Freitag; *Stipa pulcherrima* subsp. *araxensis* (Grossh.) Tzvelev)

Russia. See *Linnaea* 21(4): 440. 1848 and *Beihefte zum Botanischen Centralblatt* Abt. II, 44: 200. 1927, *Novosti Sist. Vyss. Rast.* 11: 18. 1974, *Notes from the Royal Botanic Garden, Edinburgh* 42(3): 441. 1985.

S. arenicola F.A. Roig (*Jarava arenicola* (F.A. Roig) Peñailillo)

Argentina. See *Hickenia* 2: 257-260. 1998, *Contributions from the United States National Herbarium* 48: 403. 2003.

S. arida M.E. Jones (*Achnatherum aridum* (M.E. Jones) Barkworth; *Stipa mormonum* Mez)

Northern America, U.S., Utah. See *Proceedings of the California Academy of Sciences, Series 2*, 5: 725. 1895 and *Repertorium Specierum Novarum Regni Vegetabilis* 17: 209. 1921, *Phytologia* 74(1): 6. 1993.

S. aristiglumis F. Muell. (*Austrostipa aristiglumis* (F. Muell.) S.W.L. Jacobs & J. Everett)

Australia, New South Wales, Liverpool Plains, Queensland, Victoria. Perennial, caespitose, ligule ciliate, auricles present, blade flat or convolute, panicle usually spreading, spikelets gaping after floret disarticulation, glumes unequal and acuminate, lemma dark and silky, hairy callus short and broad, awn twice bent, heavy soils, on the heavy textured black earth soils, see *Transactions and Proceedings of the Victorian Institute for the Advancement of Science* 43. 1855 and *Victoria Naturalist* 17: 156. 1901, *Telopea* 6(4): 584. 1996.

in English: Plains grass

S. arundinacea (Hook.f.) Benth. (*Agrostis lessoniana* Steud.; *Anemanthele lessoniana* (Steud.) Veldkamp; *Apera arundinacea* Hook.f.; *Stipa arundinacea* Hook.f.)

East Australia, New Zealand. Perennial, clumped, upright or arching, short and creeping rhizomes, leaves coriaceous and dark green, inflorescence a pendent panicle, spikelets sparse, see *Nomenclator Botanicus. Editio secunda* 1: 41. 1840, *Flora Novae-Zelandiae* 295, t. 67. 1853, *Journal of the Linnean Society, Botany* 19: 81. 1881 and *Acta Botanica Neerlandica* 34: 108. 1985.

in English: New Zealand wind grass, pheasant's tail grass

S. austroaltaica Kotukhov

Europe. See *Bot. Zhurn. (Moscow & Leningrad)* 72(9): 1254. 1987.

S. austroitalica Martinovsky

Europe, Italy, Sicily. Endangered species, see *Webbia* 20: 723. 1965, *Webbia* 40(2): 254. 1986.

in English: Italian stipa

in Italian: lino delle fate

S. austroitalica Martinovsky subsp. *theresiae* Martinovsky & Moraldo

Europe, Italy. See *Preslia* 52(1): 18. 1980.

S. baicalensis Roshev. (*Stipa attenuata* P.A. Smirn.)

Eurasia, Mongolia. Mountain, steppe, dark brown meadow soil, see *Izv. Glavn. Bot. Sada SSSR* 28: 380. 1929.

S. barbata Desf. (*Stipa barbata* Michx., nom. illeg., non *Stipa barbata* Desf.; *Stipa barbata* var. *calatajeronensis* (Tineo ex Arcang.) Richt.; *Stipa barbata* var. *hispanica* Trinius & Ruprecht; *Stipa barbata* var. *longiaristata* Martinovsky; *Stipa calatajeronensis* Tineo; *Stipa calatajeronensis* Tineo ex Arcang.; *Stipa plumosa* Trin.; *Stipa plumosa* Pourret ex Willk.; *Stipa plumosa* Pourret ex Willk. & Lange) (*Stipa calatajeronensis* Tineo dedicated to Caltagirone, Sicily, Italy)

South Europe, Sicily, Algeria, Iran, Syria. Perennial bunchgrass, erect, robust, leaves sickle-shaped, inflorescence narrow and open, villous awns silvery to purple, long straight awns curved near the end, native pasture species, useful for erosion control, found on silty clay gravelly loam, see *Flora Atlantica* 1: 97, t. 27. 1798, *Flora Boreali-Americana* 1: 53. 1803, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 4,2(1): 37. 1836, *Species Graminum Stipaceorum* 77. 1842, *Prodromus Florae Hispanicae* 1: 60. 1861, *Compendio della Flora Italiana* 772. 1883, *Plantae Europaeae* 1: 32. 1890 and *Acta Botanica Malacitana* 21: 125-189. 1996, *Botanical Journal of the Linnean Society* 124: 201-209. 1997.

in Morocco: awerga, tawerga, zuwway

S. barbata Desf. subsp. *barbata*

South Europe, Turkey.

S. barbata Desf. subsp. *brevipila* (Cosson & Durieu) F.M. Vázquez & Devesa (*Stipa barbata* var. *brevipila* Coss. & Durieu)

Northwest Africa. See *Exploration Scientifique de l'Algérie* 2: 76. 1867 and *Botanical Journal of the Linnean Society* 124: 202. 1997.

S. bavarica Martinovsky & H. Scholz (*Stipa pulcherrima* subsp. *bavarica* (Martinovsky & Scholz) Conert)

Europe, Germany. Vulnerable species, see *Linnaea* 21(4): 440. 1848 and *Willdenowia* 4: 322. 1968, *Illustrierte Flora von Mittel-Europa*, edition 3, 1(3: Lief. 6): 425. 1992.

in English: Bavarian feathergrass

S. baviensis Speg. (*Nassella philippii* (Steud.) Barkworth; *Stipa philippii* Steud.)

South America, Uruguay, Argentina. See *Synopsis Plantarum Glumacearum* 1: 125. 1854 and *Anales del Museo Nacional de Montevideo* 4(2): 122-124, f. 83. 1901, *Revista Argentina de Botánica* 1: 40. 1925, *Flora de la Provincia de Buenos Aires* 4(2): 255-290. 1970, *Taxon* 39(4): 611. 1990.

S. bhutanica Noltie

Bhutan. See *Edinburgh Journal of Botany* 56(2): 289, f. 1L-P. 1999.

S. bigeniculata Hughes (*Austrostipa bigeniculata* (Hughes) S.W.L. Jacobs & J. Everett)

New South Wales, Victoria, Tasmania, New Zealand. Perennial, caespitose, ligule truncate, auricles present, blade rolled and ribbed, panicle exserted, spikelets gaping after floret disarticulation, glumes unequal, tuberculate lemma reddish brown at maturity, strong callus curved and silky, awn twice bent, see *Bulletin of Miscellaneous Information Kew* 1922: 20. 1922, *Telopea* 6(4): 584. 1996.

in English: kneed speargrass, speargrass, tall speargrass

S. blackii C.E. Hubbard (*Austrostipa blackii* (C.E. Hubb.) S.W.L. Jacobs & J. Everett; *Stipa aristiglumis* var. *cana* Reader; *Stipa clelandii* Summerh. & C.E. Hubb.; *Stipa pubescens* R. Br. var. *comosa* J. Black)

New South Wales, South Australia, Western Australia, Victoria. Perennial, caespitose, ligule truncate to lacinate, auricles present, blade ribbed, panicle sparse, spikelets gaping after floret disarticulation, glumes unequal and acuminate, reddish lemma gibbous and tuberculate, callus curved and sharp, awn strongly twice bent, heavily grazed, see *Prodromus Florae Novae Hollandiae* 174. 1810, *Transactions and Proceedings of the Victorian Institute for the Advancement of Science* 43. 1855 and *Victoria Naturalist* 17: 156. 1901, *Fl. S. Australia* 1: 66. 1922, *Bulletin of Miscellaneous Information Kew* 1925: 431. 1925, *Bulletin of Miscellaneous Information Kew* 1927: 362. 1927, *Telopea* 6(4): 584. 1996.

in English: crested speargrass

S. borysthenica Klokov ex Prokudin (*Stipa joannis* Celak. subsp. *sabulosa* (Pacz.) Lavrenko; *Stipa pennata* f. *sabulosa* Pacz.; *Stipa pennata* subsp. *sabulosa* (Pacz.) Tzvelev; *Stipa pennata* var. *anomala* (P.A. Smirn.) Tzvelev)

Europe. See *Österreichische Botanische Zeitschrift* 34: 318. 1884 and *Novosti Sist. Vyssh. Rast.* 10: 80. 1973, *Novosti Sist. Vyssh. Rast.* 11: 18. 1974.

S. borysthenica Klokov ex Prokudin subsp. ***germanica*** (Endtm.) Martinovsky & Rauschert (*Stipa germanica* (Endtm.) Klokov; *Stipa joannis* Celak. subsp. *germanica* Endtm.; *Stipa sabulosa* subsp. *germanica* (Endtm.) Martinovsky & Rauschert)

Europe. See *Novosti Sist. Vyssh. Nizsh. Rast. (Kiev)* 1975: 67. 1975[1976], *Preslia* 48(2): 187. 1976.

S. brandisii Mez (*Stipa sibirica* (L.) Lam.)

India, Punjab, China, Nepal. Clumped, leaves light green, flower heads green, slight purplish markings, see *Species Plantarum* 1: 79. 1753, *Tableau Encyclopédique et Méthodique ... Botanique* 1: 158. 1791 and *Repertorium Specierum Novarum Regni Vegetabilis* 17(13-18): 207. 1921, *Bot. Zhurn. (Moscow & Leningrad)* 79(2): 135-139. 1994.

S. breviflora Grisebach (*Stipa aliciae* Kanitz)

China, India, Nepal. See *Nachrichten von der Gesellschaft der Wissenschaften zu Göttingen. Mathematisch-physikalische Klasse* 82. 1868.

S. breviglumis J.M. Black (*Austrostipa breviglumis* (J.M. Black) S.W.L. Jacobs & J. Everett; *Stipa verticillata* sensu J. Black)

Australia, South Australia, Victoria. Rare species, often rhizomatous, stems often branched at the nodes, panicle sparse, callus slightly curved and blunt, awn with 1 or 2 bends, see *Transactions and Proceedings of the Royal Society of South Australia* 65: 333. 1941, *Telopea* 3: 35. 1986, *Telopea* 6(4): 584. 1996.

in English: bamboo speargrass, cane speargrass

S. brevipes E. Desv. (*Jarava brevipes* (E. Desv.) Peñailillo; *Stipa hirtiflora* Hack.)

South America, Chile, Argentina. See *Flora Chilena* 6: 282. 1854 and *Arkiv för Botanik utgivet av K. Svenska Vetenskapsakademien* 7: 5, t. 3, f. 7, t. 7, f. 4-5. 1908, *Gayana, Botánica* 59(1): 30. 2002.

S. breviseta Caro & Sánchez (*Jarava breviseta* (Caro & E.A. Sánchez) Peñailillo; *Ortachne breviseta* Hitchc.; *Stipa breviseta* (Hitchc.) Martic. & Quezada, nom. illeg., non *Stipa breviseta* Caro & E.A. Sánchez)

Argentina. See *Journal of the Washington Academy of Sciences* 17: 141. 1927, *Kurtziana* 7: 100, t. 7. 1973, *Gayana, Botánica* 42(1-2): 152. 1985, *Gayana, Botánica* 59(1): 30. 2002.

S. bungeana Trin. (dedicated to the Russian botanist of German extraction Alexander von Bunge, 1803-1890, botanical collector, explorer in Siberia, Mongolia and North China, traveler, 1831 on the Ecclesiastical Russian Mission to China, professor of botany and natural history at Dorpat (now Tartu, Estonia), companion of Carl (Karl) Friedrich von Ledebour (1785-1851) and C.A. Meyer on their travels in the Altai Mountains, author of *Enumeratio plantarum, quas in China boreali collegit Dr. Al. Bunge*. Anno 1831. [St. Petersburg 1833], he was the father of the physiologist Gustav von Bunge (1844-1920, d. Basel, Switzerland). See J.H. Barnhart, *Biographical notes upon botanists*. 1: 281. 1965; S. Lenley et al., *Catalog of the manuscript and archival collections and index to the correspondence of John Torrey*. Library of the New York Botanical Garden. 350, 435. 1973; H.N. in Morocco: stipe tortillée, l-behma, el-Behma, l-gmwidiya, legmwêdiya, lagmêdiya, âwerga, tawerga, zuwuwây

S. capillacea Keng

China. On open areas, grassland, subalpine meadow, see *Sunyatsenia* 6(2): 100-102, t. 15. 1941 [or 1942], *Acta Botanica Yunnanica* 16(3): 229. 1994.

S. capillata L. (*Stipa capillata* DC., nom. illeg., non *Stipa capillata* L.)

South and Central Europe, Siberia. Perennial bunchgrass, upright, clumped, light green, leaves thread-like, inflorescence loose, nonpennate awns, frequently kills sheep, eaten by cattle up to heading time, useful for erosion control, common along roadsides, old orchards, meadow, sandy gravelly soil, disturbed areas, see *Species Plantarum, Editio Secunda* 1: 116. 1762, *Flore Française. Troisième Édition* suppl. 5: 257. 1815 and *Acta Botanica Malacitana* 21: 125-189. 1996.

in English: needlegrass

S. caucasica Schmalh. (*Stipa bella* Drobow, nom. illeg., non *Stipa bella* Phil.; *Stipa orientalis* var. *grandiflora* Rupr.)

Asia, China, Russia, Armenia. See *Flora Altaica* 1: 83. 1829, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg* (Sér. 7) 14(4): 35. 1869, *Berichte der Deutschen Botanischen Gesellschaft* 10: 293. 1892 and *Repertorium Specierum Novarum Regni Vegetabilis* 21(581-587): 37. 1925.

S. caucasica Schmalh. subsp. *caucasica*

Armenia, Iran, Russia.

S. caucasica Schmalh. subsp. *desertorum* (Roshev.) Tzvelev (*Stipa caucasica* f. *desertorum* Roshev.; *Stipa desertorum* (Roshev.) Ikonn.)

China, Mongolia. Useful for erosion control, see *Novosti Sist. Vyss. Rast.* 11: 20. 1974.

S. caudata Trin. (*Achnatherum caudatum* (Trin.) S.W.L. Jacobs & J. Everett; *Jarava bertrandii* (Phil.) Peñailillo; *Jarava caudata* (Trin.) Peñailillo; *Stipa amphicarpa* Phil.; *Stipa bertrandii* Phil.; *Stipa litoralis* Phil.)

South America, Argentina, Chile. Perennial, tufted, cleistogenes present in lower sheaths, ligule membranous and truncate to obtuse, auricles present or absent, panicle exerted and contracted, spikelets gaping, callus straight and blunt, awn twice bent, weed, sandy places, see *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg*. Sixième Série. *Sciences Mathématiques, Physiques et Naturelles* 1(1): 75. 1830, *Linnaea* 33(3-4): 283. 1864, *Anales del Museo Nacional de Chile. Primera Sección — Zoolojía* 1892: 11, Lam. 3 f. 2. 1892, *Anales de la Universidad de Chile* 93: 717, 726. 1896 and S.W.L. Jacobs, J. Everett & M.E. Barkworth, "*Nassella* in Australia, the placement of *Stipa caudata* and *S. brachychaeta* and clarification of morphological terms used in the Stipeae (Gramineae)." *Taxon* 44: 33-41. 1995, *Telopea* 6(4): 582. 1996, *Gayana, Botánica* 59(1): 30-31. 2002, *Journal of Biogeography* 29(2): 221-229. Feb 2002.

in Spanish: paja vizcachera, espartillo

S. centralis Vickery, S.W.L. Jacobs & Everett (*Austrostipa centralis* (Vickery, S.W.L. Jacobs & J. Everett) S.W.L. Jacobs & J. Everett)

Australia, Northern Territory. Perennial, erect, see *Telopea* 3(1): 39. 1986, *Telopea* 6(4): 584. 1996.

S. ceresiensis Kuntze (*Nassella filiculmis* (Delile) Barkworth; *Stipa filiculmis* Delile)

Argentina, Santa Fé, Ceres. See *Annales des Sciences Naturelles; Botanique, sér. 3* 12: 367. 1849, *Ind. Sem. Hort. Monsp.* 7. 1849, *Revisio Generum Plantarum* 3(3): 369, 371. 1898 and *Taxon* 39(4): 610. 1990.

S. cernua Stebbins & Love (*Nassella cernua* (Stebbins & Love) Barkworth; *Stipa pulchra* var. *cernua* (Stebbins & Love) Beetle & Tofsrud)

U.S., California. Glumes unequal, in grassland, chaparral, see *American Journal of Botany* 2: 301. 1915, *Madroño* 6(4): 137-141, f. 1, pl. 13, f. 1, 3. 1941, *Leaflets of Western Botany* 5(2): 35. 1947, *Taxon* 39(4): 609. 1990, Robert L. Bugg, Cynthia S. Brown and John H. Anderson, "Restoring Native Perennial Grasses to Rural Roadsides in the Sacramento Valley of California: Establishment and Evaluation." *Restoration Ecology* 5(3): 214-228. Sep 1997.

in English: nooding needlegrass

S. chitralensis Bor (Chitral, in the Hindukush range of mountains)

India, Jammu and Kashmir, northwest Pakistan. See *Kew Bulletin* 1954: 500. 1954.

S. chrysophylla E. Desv. (*Jarava chrysophylla* (E. Desv.) Peñailillo; *Stipa chrysophylla* var. *minor* E. Desv.; *Stipa humilis* f. *chrysophylla* (E. Desv.) Kuntze; *Stipa kurtzii* Mez; *Stipa speciosa* subsp. *chrysophylla* (E. Desv.) Dusén; *Stipa speciosa* var. *andina* Hauman; *Stipa speciosa* var. *gymnostachya* Hauman)

Chile. See *Icones et Descriptiones Plantarum, quae aut sponte ...* 5: 41, t. 466, f. 1. 1799, *Species Graminum Stipaceorum* 45. 1842, *Flora Chilena* 6: 278, t. 76, f. 2. 1854, *Revisio Generum Plantarum* 3(3): 371. 1898 and *Reports of the Princeton University Expeditions to Patagonia 1896-1899, Botany, Volume viii, Supplement* 8(3): 30-31. 1914 [1915], *Anales de Sociedad Científica Argentina* 86: 240, f. 5. 1918, *Repertorium Specierum Novarum Regni Vegetabilis* 17(13-18): 204. 1921, *Gayana, Botánica* 59(1): 31. 2002.

S. chubutensis Speg. (*Jarava chubutensis* (Speg.) Peñailillo; *Stipa dasynemisis* Speg.)

South America, Uruguay, Argentina, Chubut. See *Anales del Museo Nacional de Montevideo* 4(2): 49-51, f. 7. 1901, *Revista Argentina de Botánica* 1: 21. 1925, *Boletín de la Sociedad Argentina de Botánica* 14(4): 316, f. 3. 1972,

Gayana, Botánica 59(1): 31. 2002, *Contributions from the United States National Herbarium* 48: 404. 2003.

S. clandestina Hack. (*Achnatherum clandestinum* (Hack.) Barkworth)

Mexico. Perennial bunchgrass, densely tufted, bent and twisted awn, lemmas hairy, pasture, forage, weed, found in disturbed places, see *Repertorium Specierum Novarum Regni Vegetabilis* 8: 516. 1910, *Contr. U.S. Natl. Herb.* 24(7): 238. 1925, *Phytologia* 74(1): 6. 1993.

in Mexico: zacate picoso

S. clarazii Ball (*Nassella clarazii* (Ball) Barkworth; *Stipa longiglumis* Phil.; *Stipa quadrifaria* Kuntze) (for Georges Claraz, 1832-1930, botanical collector in Argentina and Patagonia)

South America. See *Linnaea* 33(3-4): 286. 1864, *Journal of the Linnean Society, Botany* 21: 237. 1884, *Revisio Generum Plantarum* 3(3): 369, 372. 1898 and *Anales del Museo Nacional de Montevideo* 4(2): 72-73. 1901, *Taxon* 39(4): 609. 1990.

S. consanguinea Trin. & Rupr. (*Stipa koelzii* R.R. Stewart)

India, Punjab, Bhutan. Wet meadow, see *Species Graminum Stipaceorum* 78. 1842 and *Brittonia* 5: 441. 1945.

S. constricta Hitchc. (*Achnatherum constrictum* (Hitchc.) Valdés-Reyna & Barkworth)

Mexico. Clumped, fodder, rocky places, slopes, hills, see *Contributions from the United States National Herbarium* 24(7): 244, t. 51, f. 28-29. 1925, *Contributions from the United States National Herbarium* 48: 15. 2003.

in Mexico: zacate

in English: giant ricegrass

S. crassiculmis P.A. Smirnov (*Stipa pulcherrima* subsp. *crassiculmis* (P.A. Smirn.) Tzvelev)

Russia. See *Linnaea* 21(4): 440. 1848 and *Repertorium Specierum Novarum Regni Vegetabilis, Beihefte* 22: 375. 1926, *Novosti Sist. Vyss. Rast.* 11: 18. 1974, *Delpinoa* 16-17: 186. 1974-1975[1976].

S. crassiculmis P.A. Smirn. subsp. *heterotricha* Dihoru & Roman

Romania. Vulnerable grass, see *Revue Roumaine de Biologie, Série de Biologie Végétale* 22(1): 24. 1977.

Common name: colilie

S. cretacea P.A. Smirn.

Eurasia. Rare species, see *Bulletin de la Société Impériale des Naturalistes de Moscou* 49(1): 90. 1940.

S. curticoma Vick. (*Austrostipa curticoma* (Vickery) S.W.L. Jacobs & J. Everett; *Stipa bigeniculata* sensu J. Black)

Australia, Victoria, South Australia. Panicle sparse, floret cylindrical, callus curved and sharp, awn twice bent, see *Telopea* 2(1): 11. 1980, *Telopea* 6(4): 585. 1996.

S. curtiseta (A.S. Hitchc.) Barkworth (*Hesperostipa curtiseta* (Hitchc.) Barkworth; *Stipa spartea* subsp. *curtiseta* Hitchc.; *Stipa spartea* var. *curtiseta* Hitchc.)

British Columbia. Perennial, tufted, erect, leafy, sheaths open, ligule short and thickened, basal leaves, no auricles, blade usually flat to inrolled, narrow flower head with long slender awns, 1-flowered spikelets, narrow and almost equal glumes, lemmas hardened and more or less smooth to hairy, callus sharp-pointed and hairy, straight awns twisted many times from the tip of the lemma, occurs on dry open slopes, see *Contributions from the United States National Herbarium* 24(7): 230. 1925, *Canadian Journal of Botany* 56(6): 624. 1978, *Phytologia* 74(1): 15-16. 1993.

in English: short-awned porcupine grass

S. curvifolia Swallen (*Achnatherum curvifolium* (Swallen) M. Barkworth)

U.S., Mexico, New Mexico, Texas. Perennial, tufted, leaves clustered in the lower half, curling blades tightly involute and velvety-hairy, inflorescences spike-like, spikelets in dense clusters, glumes hyaline, lemma densely hairy with a sharp callus, awn bent once or twice, sometimes in well-developed soil, generally on steep slopes,

crevices of limestone cliffs and ridges, see *Journal of the Washington Academy of Sciences* 23(10): 456. 1933, *Phytologia* 74(1): 7. 1993.

in English: Guadalupe needlegrass, curl-leaf needlegrass

S. danubialis Dihoru & Roman

Romania. Vulnerable species, see *Revue Roumaine de Biologie, Série Botanique* 14: 26. 1969.

S. dasyphylla (Lindem.) Czern. ex Trautv. (*Stipa dasyphylla* Czern.; *Stipa dasyphylla* (Lindem.) Trautv.; *Stipa dasyphylla* Czern. ex Trautv.; *Stipa dasyphylla* (Lindem.) Czern. ex Roshev.; *Stipa pennata* var. *dasyphylla* Lindem.; *Stipa pennata* var. *stenophylla* Lindem.; *Stipa pulcherrima* var. *dasyphylla* Pacz. ex B. Fedtsch., nom. illeg., non *Stipa pulcherrima* var. *dasyphylla* Podp.; *Stipa stenophylla* Czern.; *Stipa stenophylla* (Lindem.) Czern. ex Trautv.)

Europe, Romania, Czech Republic, Germany, Hungary, Slovakia, Russian Federation. Rare species, see *Flora chersonensis*. Odessae 1881-1882 and *Flora URSS* 2: 100. 1934.

Common names: colilie, gyapjas arvalanyhaj

S. dregeana Steud. (*Oryzopsis keniensis* Pilg.; *Stipa keniensis* (Pilg.) Freitag) (for the German plant collector Jean François (Johann Franz) Drège, 1794-1881 (Altona), botanical explorer, traveler, arrived at the Cape in 1826, his writings include *Zwei pflanzengeografische Dokumente*. Leipzig [1843-1844], *Catalogus plantarum exsiccatarum Africae australioris, quas emturis offert*. 1837-1840 and also: *Linnaea*. 19: 583-680. 1847 and 20: 183-258. 1847, with the Prussian botanist Ernst Heinrich Friedrich Meyer (1791-1858) wrote *Commentariorum de plantis Africae australioris*. Leipzig and Königsberg 1835 [1836, 1838], he was the brother of Carl Friedrich Drège (1791-1867). See George Arnott Walker Arnott (1799-1868), "Notes on some South African plants." *Hook., J.Bot.* 3: 147-156. 1841; J.H. Barnhart, *Biographical notes upon botanists*. 1: 471. 1965; Peter MacOwan, "Personalia of botanical collectors at the Cape." *Trans. S. Afr. Philos. Soc.* 4(1): xlix-l. 1884-1886; J.H. California 1997; Mary Gunn and Leslie E. Codd, *Botanical Exploration of Southern Africa*. Cape Town 1981)

Ethiopia, South Africa, Kenya. Bunchgrass, vigorous, useful for erosion control, see *Synopsis Plantarum*

Glumacearum 1: 132. 1854 and *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 9(87): 509. 1926.

S. dregeana Steud. var. *dregeana*

South Africa. Perennial, tufted, erect, rhizomatous, narrow panicle with widely spreading and ascending branches, found in moist places.

S. dregeana Steud. var. *elongata* (Nees) Stapf (*Lasiagrostis elongata* Nees)

South Africa. Perennial, rare, tufted, erect, shortly rhizomatous, knotted rhizomes, leaf blade flattened, ligule a prominent membrane, open panicle with whorled drooping branches, twisted awn, a source of grazing, found in moist places, forests, often confused with *Festuca africana* (Hack.) Clayton, see *Florae Africae Australioris Illustrationes Monographicae* 168. 1841, *Flora Capensis* 7: 573. 1899.

in English: thread grass

in South Africa: garinggras

S. drummondii Steudel (*Austrostipa drummondii* (Steud.) S.W.L. Jacobs & J. Everett; *Stipa horrifolia* J.M. Black; *Stipa luehmanii* Reader; *Stipa scabra* var. *auriculata* J.M. Black; *Stipa scabra* var. *subtricha* Reader) (*Stipa luehmanii* Reader dedicated to J.H. Luehmann, Victorian Government Botanist, Australia) (*Stipa drummondii* Steudel named for to the British botanist James Drummond, 1784 (or ca. 1786)-1863 (Perth, Western Australia), from 1809 to 1829 Curator of Cork Botanic Garden, sent plants to Capt. Mangles and W.J. Hooker, plant collector in Western Australia for Messrs. Veitch, first Government Botanist, Western Australia, and his brother Thomas Drummond, 1780-1835, Scottish botanical and zoological collector, northern U.S. (1831-1835), succeeded G. Don in nursery at Forfar, from 1828 to 1831 Curator Belfast Botanic Garden, assistant-naturalist to 2nd Land Arctic Expedition under Franklin, wrote *Musci scotici*. Forfar 1824-1825 and *Musci americani*. Glasgow 1828; see J.H. Barnhart, *Biographical notes upon botanists*. 1: 472-473. 1965; J. Lanjouw and F.A. Stafleu, *Index Herbariorum*. Part II, *Collectors A-D*. *Regnum Vegetabile* vol. 2. 1954; W.H. Harvey, in *Hooker's Journal of Botany & Kew Garden Miscellany*. 7: 53. London 1855; A. Lasègue, *Musée botanique de Benjamin Delessert*. Paris 1845; Alice Margaret Coats, *The Quest for Plants: A History of the Horticultural Explorers*. London 1981; Roger N. Hilton, "The Drummond collection of Western Australian fungi at the Royal Botanic Gardens, Kew." *Nuytsia*. 4(3): 333-357. 1983; R.N. Hilton, "The Pre-iss collection of Western Australian fungi." *Nuytsia*. 6(3): 295-304. 1988)

South Australia, New South Wales, Victoria, Western Australia. Perennial, caespitose, ligule membranous, leaves

acute but not pungent, panicle expanded and dense, spikelets gaping, floret elliptic, glumes unequal and acute, lemma red to black-brown at maturity, silky callus straight and sharp, awn falcate, found growing on dune and coast above salt marsh, in sandy areas, dry regions, desert, swampy near-coastal areas, suitable for revegetation in salt marsh and tidal/freshwater wetlands, see *J. Trop. Australia* 31. 1848, *Synopsis Plantarum Glumacearum* 1: 128. 1854 and *Victoria Naturalist* 16: 158. 1900, *Victoria Naturalist* 17: 156. 1901, *Transactions and Proceedings of the Royal Society of South Australia* 44: 191. 1920, *Fl. South Australia* 1: 67. 1922, *Telopea* 3: 47. 1986, *Telopea* 6(4): 585. 1996.

in English: cottony speargrass

S. durifolia Parodi ex M.A. Torres (*Jarava durifolia* (Parodi ex Torres) Peñailillo; *Stipa durifolia* Torres)

Argentina. See *Comision de Investigaciones Cientificas* 13: 54, f. 1, B, b. 1997, *Contributions from the United States National Herbarium* 48: 404. 2003.

S. echinata Vickery, Jacobs & Everett (*Austrostipa echinata* (Vickery, S.W.L. Jacobs & J. Everett) S.W.L. Jacobs & J. Everett)

South Australia. Rare species, blades pungent and erect, panicle sparse and contracted, floret elliptic, lemma brown, callus straight and sharp, awn with 2 or 3 bends, see *Telopea* 3(1): 50. 1986, *Telopea* 6(4): 585. 1996.

S. editorum Fourn. (*Achnatherum editorum* (E. Fourn.) Valdés-Reyna ex Barkworth)

Mexico. Erect, herbaceous, fodder, see *Mexicanas Plantas* 2: 75. 1886 and *Contributions from the United States National Herbarium* 48: 16. 2003.

in Mexico: flechilla erecta, zacate

S. eremophila Reader (*Austrostipa eremophila* (Reader) S.W.L. Jacobs & J. Everett; *Stipa dura* J.M. Black; *Stipa fusca* C.E. Hubb.; *Stipa pubescens* var. *auricoma* Reader; *Stipa variegata* Summerh. & C.E. Hubb.) (from the Greek *eremos* "lonely, solitary, desert, lone," *eremia* "desert" and *philos* "loving, friend")

South Australia, Adelaide Plains, Victoria, Western Australia, New South Wales. Perennial, caespitose, nodes pubescent, ligule truncate and ciliate, auricles present, blade rolled and ribbed, panicle spreading at maturity, spikelets slightly gaping, glumes unequal and acuminate, scabrous lemma dark brown at maturity, silky callus straight or slightly curved, awn twice bent, grows in mallee or woodland, see *Prodromus Florae Novae Hollandiae* 174. 1810 and *Victoria Naturalist* 17: 154, 156. 1901, *Transactions and Proceedings of the Royal Society of South Australia* 46: 565. 1922, *Bulletin of Miscellaneous Information Kew* 1925: 432. 1925, *Bulletin of Miscellaneous Information Kew* 1927: 363. 1927, *Transactions and Proceedings of the Royal Society of South Australia* 65: 333. 1941, *Telopea* 6(4): 585. 1996.

in English: desert speargrass, rusty speargrass

S. exilis Vickery (*Austrostipa exilis* (Vickery) S.W.L. Jacobs & J. Everett)

South Australia, Victoria, Western Australia. Delicate, panicle spreading, floret cylindrical to elliptic, lemma black, callus straight and sharp, awn twice bent, see *Telopea* 2(1): 13. 1980, *Telopea* 6(4): 585. 1996.

S. feretacea Vickery, Jacobs & Everett (*Austrostipa feretacea* (Vickery, S.W.L. Jacobs & J. Everett) S.W.L. Jacobs & J. Everett)

Australia, Northern Territory. Perennial, spreading, see *Telopea* 3(1): 58. 1986, *Telopea* 6(4): 585. 1996.

S. filifolia Nees (*Aristida megapotamica* Spreng.; *Jarava filifolia* (Nees) Peñailillo; *Jarava megapotamica* (Spreng.) Peñailillo; *Stipa filiformis* Spreng.)

South America. See *Systema Vegetabilium, editio decima sexta* 4: 31. 1827, *Flora Brasiliensis seu Enumeratio Plantarum* 2: 379. 1829 and *Gayana, Botánica* 59(1): 31-32. 2002.

S. flavescens Labill. (*Austrostipa flavescens* (Labill.) S.W.L. Jacobs & J. Everett; *Stipa aphanoneura* Hughes; *Stipa compacta* Hughes; *Stipa elatior* (Benth.) Hughes; *Stipa flavescens* Hook.f., non Labill.; *Stipa hirsuta* Hughes; *Stipa laeviculmis* Nees; *Stipa laevis* Mez; *Stipa pubescens* R. Br. var. *maritima* J.M. Black; *Stipa scabra* Lindley var. *elatior* Benth.; *Stipa scabra* var. *striata* Benth.; *Stipa tenuiglumis* Hughes; *Stipa variabilis* var. *elatior* (Benth.) C.A. Gardner; *Stipa variabilis* var. *striata* (Benth.) C.A. Gardner)

South Australia, Victoria, Western Australia, New South Wales, Tasmania. Perennial, stout, shortly rhizomatous, caespitose, extravaginal shoots, ciliate ligule leathery and truncate, auricles present, ribbed blade rolled to expanded, panicle contracted, floret narrow-cylindrical to elliptic, spikelets gaping, glumes unequal and acuminate, lemma dark brown at maturity, silky callus straight and sharp, awn twice bent, sandy soils in coastal areas, in heaths, wetlands, see *Novae Hollandiae Plantarum Specimen* 1: 24, t. 30. 1804, *Plantae Preissianae* 2: 99. 1846, *Flora of Australia* 7: 571. 1878 and *Bulletin of Miscellaneous Information Kew* 1921: 15, 22, 24, 25, f. 29, 30, 31, 32, 29A, 30A, 31A, 32A. 1921, *Repertorium Specierum Novarum Regni Vegetabilis* 17: 210. 1921, *Transactions and Proceedings of the Royal Society of South Australia* 67: 36. 1943, *Flora of Western Australia* 1. pt. 1: 182. 1952, *Telopea* 3: 59. 1986, E. Chesterfield, A. Trumbull-Ward, P. Hopmans and J. Whelan, *Early Changes in Vegetation from a Grazing Trial on Yanakie Isthmus, Wilsons Promontory National Park*. Flora and Fauna Technical Report No. 139. Department of Conservation and Natural Resources, East Melbourne, Victoria 1995, *Telopea* 6(4): 585. 1996.

in English: coast speargrass, tall speargrass, speargrass

S. flexuosa Vasey (*Achnatherum eminens* (Cav.) Barkworth; *Stipa eminens* Cav.; *Stipa erecta* E. Fourn., nom. illeg., non *Stipa erecta* Trin.; *Stipa flexuosa* Vasey)

United States of America, Texas. See *Icones et Descriptiones Plantarum, quae aut sponte ...* 5: 42, t. 467, f. 1. 1799, *Mexicanas Plantas* 2: 75. 1886, *Bulletin of the Torrey Botanical Club* 15(2): 49. 1888 and *Taxon* 33: 126-134. 1984, *Phytologia* 74(1): 7. 1993.

S. fontanesii Parl. (*Stipa holosericea* subsp. *fontanesii* (Parl.) Tzvelev; *Stipa lagascae* Guss., nom. illeg., non *Stipa lagascae* Roem. & Schult.)

Europe. See *Systema Vegetabilium* 2: 333. 1817, *Plantae rariorum quas in itinere per oras Jonii ac Adriatici maris et per regionis Samnii ac Aprutii collegit Joanne Gussone*. Neapoli 1826, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 1(1): 81. 1830, *Flora italiana, ossia descrizione delle piante ...* 1: 167. 1850 and *Novosti Sist. Vyss. Rast.* 11: 15. 1974, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 107: 203-228. 1985.

S. gibbosa Vickery (*Austrostipa gibbosa* (Vickery) S.W.L. Jacobs & J. Everett; *Stipa aristiglumis* sensu J. Black)

South Australia, Victoria, New South Wales. Perennial, rigid, caespitose, clumped, ligule leathery and truncate, auricles present, blade flat or convolute, panicle contracted and exserted, glumes inflated, spikelets gaping at floret disarticulation, floret cylindrical and gibbous with the awn excentric, glumes unequal and acute, lemma dark to almost black at maturity, hairy and sturdy callus curved and blunt, awn twice bent, grows in open woodland or grassland, rare species in Victoria, see *Transactions and Proceedings of the Victorian Institute for the Advancement of Science* 43. 1855 and *Telopea* 2: 14. 1980, *Telopea* 6(4): 586. 1996.

in English: spurred speargrass

S. gigantea Link (*Lasiagrostis gigantea* (Link) Trin. & Rupr.; *Macrochloa arenaria* (Brot.) Kunth; *Macrochloa gigantea* (Link) Hack.; *Stipa arenaria* Brot.; *Stipa gigantea* Lag., nom. illeg., non *Stipa gigantea* Link; *Stipa pellita* (Trin. & Rupr.) Tzvelev)

Spain, Portugal, northwest Africa. Perennial, clumped, panicle open, spikelets yellow, useful for erosion control, see *Journal für die Botanik* 2: 313. Göttingen 1799, *Flora Lusitanica* 1: 86. 1804, *Elenchus Plantarum Horti Botanici* 3. 1816, *Révision des Graminées* 1: 59. 1829, *Species Graminum Stipaceorum* 96. 1842, *Catalogue Raisonné des Graminées du Portugal* 16. 1880 and *Boletim da Sociedade Broteriana, ser. 2* 64: 35-74. 1991, *Botanical Journal of the Linnean Society* Volume 144, Issue 4, Page 483-495. Apr 2004.

S. gilliesii Hitchc. (*Nassella paramillonesis* (Speg.) Torres; *Stipa paramilloensis* Speg.)

Argentina, Mendoza. See *Anales del Museo Nacional de Montevideo* 4(2): 139-141, f. 41. 1901, *Contributions from the United States National Herbarium* 24(7): 278. 1925, *Comision de Investigaciones Cientificas* 13: 31. 1997.

S. glareosa P.A. Smirn. (*Stipa caucasica* subsp. *glareosa* (P.A. Smirn.) Tzvelev)

Asia, China, Russia. In very rocky soils, see *Berichte der Deutschen Botanischen Gesellschaft* 10: 293. 1892 and *Bulletin de la Société Impériale des Naturalistes de Moscou* 38: 12. 1929, *Feddes Repert. Sp. Nov.* 26: 266. 1929, *Novosti Sist. Vyss. Rast.* 11: 20. 1974.

S. grandifolia Keng (*Achnatherum coreanum* (Honda ex Nakai) Ohwi; *Achnatherum coreanum* var. *kengii* (Keng) Ohwi; *Orthoraphium grandifolium* (Keng) Keng)

Asia. See *Sinensia* 4(11): 322-324, f. 2. 1934, *Journal of Japanese Botany* 17(7): 404. 1941, *Claves Generum et Specierum Graminearum Primarum Sinicarum Appendice Nomenclatione Systematica* 214. 1957, *Flora Tsinlingensis* 1(1): 150. China. Academia Sinicae. Institutum Botanicum. 1976.

S. grandis P.A. Smirn.

Asia, China, Russia, Mongolia, Siberia. See *Bulletin de la Société Impériale des Naturalistes de Moscou* n. sér. 38: 14. 1929, *Feddes Repert. Sp. Nov.* 26: 266-267. 1929.

S. gynerioides Phil. (*Jarava ichu* Ruiz & Pav.; *Stipa ichu* (Ruiz & Pav.) Kunth; *Stipa ichu* f. *interrupta* Hack.; *Stipa ichu* var. *gynerioides* (Phil.) Hack.)

S. meridionalis F.M. Vázquez & Devesa

Morocco. Perennial, erect, glabrous, ligule acute and scabrid, leaf blades convolute, glabrous sheaths, lax panicle lanceolate to ovoid, glumes unequal, lemmas with bigenulate awns and 3 rows of hairs, related to *Stipa offneri* Breistr., see *Botanical Journal of the Linnean Society* 124: 201-209. 1997.

S. metatoris J. Everett & S.W.L. Jacobs (*Austrostipa metatoris* (J. Everett & S.W.L. Jacobs) S.W.L. Jacobs & J. Everett)

New South Wales, Murray Valley, South Australia. Perennial, vulnerable species, caespitose, ligule leathery and lacinate, auricles present, blade inrolled and ribbed, panicle exserted, spikelets gaping, glumes unequal and acuminate, silky and brown lemma, callus straight and silky, awn twice bent, sandy areas, see *Telopea* 2(4): 399. 1983, *Telopea* 6(4): 587. 1996.

S. milleri Noltie

Bhutan; Sikkim, India. See *Edinburgh Journal of Botany* 56(2): 288-289, f. 1G-K. 1999.

S. mollis R. Br. (*Austrostipa mollis* (R. Br.) S.W.L. Jacobs & J. Everett; *Stipa plagiopogon* J.M. Black; *Stipa semibarbata* R. Br. var. *mollis* (R. Br.) Benth.)

Western Australia, South Australia, Adelaide Plains, Tasmania, Victoria, New South Wales. Perennial, rigid, caespitose, membranous ligule ciliate and truncate, auricles absent, blade rolled and ribbed, panicle contracted and dense, spikelets gaping, floret elliptic, glumes acuminate, lemma reddish and silky, densely silky callus straight and sharp or weakly bent, awn plumose and twice bent, on sandy soils, see *Prodromus Florae Novae Hollandiae* 174. 1810, *Flora of Australia* 7: 569. 1878 and *Transactions and Proceedings of the Royal Society of South Australia* 65: 334. 1941, *Telopea* 3: 74. 1986, *Telopea* 6(4): 587. 1996.

in English: speargrass, soft speargrass, supple speargrass

S. muelleri Tate (*Austrostipa muelleri* (Tate) S.W.L. Jacobs & J. Everett) (species dedicated to the famous German-born (Rostock) Australian scientist Baron Sir Ferdinand Jacob (Jakob) Heinrich von Mueller (Müller), 1825-1896 (d. Melbourne), botanist, pharmacist, botanical explorer, plant collector, see J.H. Barnhart, *Biographical notes upon botanists*. 2: 524. 1965)

South Australia, Victoria. Rhizomatous, stems wiry and decumbent, branched at nodes, floret elliptic, lemma brown, callus straight and sharp, awn twice bent, see *Transactions and Proceedings of the Royal Society of South Australia* 7: 70. 1885 and *Telopea* 6(4): 587. 1996.

in English: wiry speargrass

S. multispiculis J.M. Black (*Austrostipa multispiculis* (J.M. Black) S.W.L. Jacobs & J. Everett)

South Australia. Rare species, rhizomatous, rigid, panicle dense and contracted, floret cylindrical, lemma dark, callus curved and sharp, awn twice bent, see *Transactions and Proceedings of the Royal Society of South Australia* 65: 333. 1941, *Telopea* 3: 78. 1986, *Telopea* 6(4): 587. 1996.

S. mundula J.M. Black (*Austrostipa mundula* (J.M. Black) S.W.L. Jacobs & J. Everett) (from Latin *mundulus* "neat, trim," *mundule* "neatly, trimly")

South Australia, Victoria. Delicate, panicle sparse and contracted, floret turbinate to elliptic, lemma dark red, callus curved and sharp, awn twice bent, see *Transactions and Proceedings of the Royal Society of South Australia* 65: 333. 1941, *Telopea* 6(4): 587. 1996.

S. namaquensis Pilg. (*Arthratherum namaquense* Nees; *Stipagrostis anomala* De Winter; *Stipagrostis namaquensis* (Nees) De Winter)

Africa. See *Linnaea* 7(3): 290. 1832, *Florae Africae Australioris Illustrationes Monographicae* 1: 185. 1841 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 51(3-4): 412. 1914, *Kirkia* 3: 133, 135. 1963.

S. neaei Nees ex Steud. (*Jarava neaei* (Nees ex Steud.) Peñailillo; *Stipa bella* Phil.; *Stipa pulchella* Munro ex Ball)

South America, Chile, Falkland Islands. See *Synopsis Plantarum Glumacearum* 1: 126. 1854, *Anales de la Universidad*

de Chile 26: 203. 1870, *Journal of the Linnean Society, Botany* 21: 237. 1884 and *Gayana, Botánica* 59(1): 32. 2002.

U.S. Natl. Herb.* 24(7): 223. 1925, *Taxon* 39(4): 610-612. 1990.

S. nivicola J.H. Willis

New South Wales, Victoria. Perennial, caespitose, shortly rhizomatous, ligule truncate and ciliate, auricles absent, blade rolled and ribbed, sparse panicle exerted and contracted, spikelets gaping, glumes subequal and acuminate to acute, lemma silky and scabrous, densely silky callus weakly bent at the tip, awn twice bent and scabrous, grows in alpine and subalpine grassland, see *Victoria Naturalist* 73: 149. 1957.

S. nodosa S.T. Blake (*Austrostipa nodosa* (S.T. Blake) S.W.L. Jacobs & J. Everett; *Stipa effusa* Hughes, nom. illeg., non *Stipa effusa* Mez; *Stipa falcata* Hughes var. *minor* J.M. Black)

South Australia, Queensland, Victoria, Tasmania, New South Wales. Perennial, caespitose, ligule truncate, auricles present, panicle sparse and spreading, spikelets gaping after

floret disarticulating, floret elliptic, glumes subequal, lemma brown and silky, silky callus straight and sharp or weakly bent at the tip, awn falcate, wetlands, see *Bulletin of Miscellaneous Information Kew* 1921: 14. 1921, *Bulletin of Miscellaneous Information Kew* 1922: 20. 1922, *Transactions and Proceedings of the Royal Society of South Australia* 65: 334. 1941, *Proceedings of the Royal Society of Queensland* 62: 89. 1952, *Telopea* 3: 86. 1986, *Telopea* 6(4): 587. 1996.

in English: speargrass, knotty speargrass

S. novakii Martinovsky

Yugoslavia. Rare species, see *Feddes Repertorium* 73: 147. 1966.

S. nullanulla J. Everett & S.W.L. Jacobs (*Austrostipa nullanulla* (J. Everett & S.W.L. Jacobs) S.W.L. Jacobs & J. Everett)

South Australia, New South Wales, Nulla Nulla, Victoria. Perennial, caespitose, small, ligule membranous and lacinate, blade rolled and rigid, panicle sparse and delicate, spikelets gaping at maturity, floret cylindrical to narrow-elliptic, glumes subequal and acute to acuminate, lemma dark red and shining, silky callus straight and sharp, awn twice bent, vulnerable species, palatable to sheep and rabbits, see *Telopea* 2(4): 398. 1983, *Telopea* 6(4): 587. 1996.

S. offneri Breistr. (*Stipa juncea* Lam., nom. illeg., non *Stipa juncea* L.; *Stipa juncea* Michx., nom. illeg., non *Stipa juncea* L.)

North Africa. Ligule glabrous, lemma with 7 rows of hairs, useful for erosion control, see *Species Plantarum* 78. 1753, *Tableau Encyclopédique et Méthodique ... Botanique* 1: 157. 1791, *Flora Boreali-Americana* 1: 54. 1803 and *Contr. U.S. Natl. Herb.* 12: 150. 1908, *Procès-Verbaux de la Société Dauphinoise d'Études Biologiques, Bio-Club. Grenoble* 17: 2. 1950, *Bull. Soc. Bot. France* 119: 237. 1952, *Acta Botanica Malacitana* 21: 125-189. 1996.

S. oligostachya Hughes (*Austrostipa oligostachya* (Hughes) S.W.L. Jacobs & J. Everett)

South Australia, Victoria. Tussocky, rhizomatous, panicle sparse and spreading, floret cylindrical, lemma red-brown with translucent tubercles, callus straight and sharp, awn twice bent, see *Bulletin of Miscellaneous Information Kew* 1921: 12. 1921, *Telopea* 6(4): 587. 1996.

S. orientalis Trin. (*Stipa barbata* var. *orientalis* (Trin.) Kuntze)

Asia, China, Mongolia, Russia, Siberia. Erect, short, leaves mostly basal and narrow, purple to white pubescent awns, a good fodder, useful for erosion control, see *Flora Atlantica* 1: 97, t. 27. 1798, *Flora Altaica* 1: 83. 1829, *Acta Horti Petrop.* 10: 254. 1887 and A.L. Takhtadzhyan [A. Takhtajan], editor, *Numeri chromosomatum magnoliophytorum florum URSS. Akademiya nauk SSSR, Botanicheskii institut im V.L. Komarova.* 1990-1993.

S. pamirica Roshev. (*Stipa arabica* var. *pamirica* (Roshev.) Freitag; *Stipa badachschanica* subsp. *pamirica* (Roshev.) Tzvelev)

Tadjikistan. Rare and endangered species, see *Species Graminum Stipaceorum* 77. 1842 and *Novosti Sist. Vyss. Rast.* 11: 16. 1974, *Notes from the Royal Botanic Garden, Edinburgh* 42(3): 461. 1985.

Europe, Russia, Mongolia, Siberia, India. Mountain meadows, dark soil, rocky hillside, dry mountain steppe, very rocky and gravelly soil, heavily grazed areas, useful for erosion control, poisonous to horses and other domestic animals, young plants may be fatal to the grazing animals, suitable as a source of pulp for papermaking, see *Species Plantarum* 1: 79. 1753, *Tableau Encyclopédique et Méthodique ... Botanique* 1: 158. 1791, *Grasses of North America for Farmers and Students* 2: 226. 1896, *Bulletin de l'Herbier Boissier* 7(9): 647. 1899 and *Repertorium Specierum Novarum Regni Vegetabilis* 17(13-18): 207. 1921, *Journal of the Faculty of Science: University of Tokyo, Botany* 3: 212. 1930, *Journal of Japanese Botany* 15(7): 459. 1939, *Claves Generum et Specierum Graminearum Primarium Sinicarum Appendice Nomenclatione Systematica* 107, 212. 1957, *Flora Illustralis Plantarum Primarium Sinicarum: Gramineae* 9(3): 590, f. 525. 1959, *Fl. Tsinlingensis*. 1(1): 153. 1976, *Bot. Zhurn. (Moscow & Leningrad)* 75: 1783-1786. 1990, *Bot. Zhurn. (Moscow & Leningrad)* 79(2): 135-139. 1994, *Taxon* 49(2): 248. 2000.

in English: needlegrass, poisonous grass of Kashmir

in India: gobu, gogu, gumai, gurghas

S. sicula Moraldo, La Valva, Ricciardi & Caputo

Italy, Sicily. Vulnerable species, see *Delpinoa* 23-24: 139. 1981-1982 [1985].

S. spartea Trin. (*Hesperostipa curtisetata* (Hitchc.) Barkworth; *Hesperostipa spartea* (Trin.) Barkworth; *Stipa curtisetata* (Hitchc.) Barkworth; *Stipa robusta* Nutt. ex Trin.; *Stipa robusta* Nutt. ex Trin. & Rupr.; *Stipa spartea* var. *curtisetata* A.S. Hitchc.)

Northern America, U.S., Canada, British Columbia. Perennial bunchgrass, erect and leafy, basal leaves, sheaths are

open and there are no auricles, flat to inrolled leaf blades, thickened ligule, flower head somewhat narrowed, 1-flowered spikelets, glumes almost equal, lemmas hardened, sharp-pointed callus covered in stiff hairs, lemma surface smooth or covered in hairs, extremely long and twisted awns, slender awns twist many times from the tip of the lemma and bend once or more along their length, awn tip usually straight, reproduces sexually, dominant or subdominant, occurs as a pioneer species, difficult to establish by seed, forage of good palatability, sharp awns may injure grazing livestock and render the plant less palatable, Native Americans of the Missouri River Region used the stiff awns to make hair brushes, considered rare in Ontario, grows in open and grassy habitats of lower valley slopes, dry sandy soils, in plains grasslands, prairie, foothills prairie, mountain meadows, on small disturbed or denuded areas, included by some authors in *Hesperostipa* (Elias) Barkworth, see *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 1(1): 82. 1830, *Species Graminum Stipaceorum* 69. 1842 and *Contributions from the United States National Herbarium* 24(7): 230. 1925, Melvin Randolph Gilmore, *Uses of Plants by the Indians of the Missouri River Region*. 33rd Annual Report. Mar 2003, *Journal of Ecology* 91(6): 999-1007. Dec 2003, *Journal of Biogeography* 32(6): 1043-1062. June 2005.

in English: porcupine grass, big needle grass, western porcupine grass, short-awn porcupine grass

S. splendens Trinius (*Achnatherum splendens* (Trinius) Nevski; *Aristella longiflora* Regel; *Lasiagrostis splendens* (Trinius) Kunth; *Stipa altaica* Trinius; *Stipa kokonorica* Hao; *Stipa munroana* Bor; *Stipa schlagintweitii* Mez)

Pakistan, Afghanistan. A good fodder, see *Neue Entdeckungen im ganzen Umfang der Pflanzenkunde* 2: 54. 1821, *Flora Altaica* 1: 80. 1829, *Flora Italica* 1: 690. 1833[1835], *Trudy Glavn. Bot. Sada* 7: 645. 1881 and *Repertorium Specierum Novarum Regni Vegetabilis* 17(13-18): 208. 1921, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 68(5): 583. 1938, *J. Jap. Bot.* 17: 404. 1941, *Kew Bulletin* 1954: 500. 1954, *Grasses of Burma, Ceylon, India and Pakistan (excluding Bambuseae)* 647. 1960, *Journal of Cytology and Genetics* 21: 155. 1986.

S. staintonii Bor

Western and Central Nepal. Perennial, erect, caespitose, glabrous, leaf blades involute, leaf sheaths ciliate on the margin, ligule membranous, loose nodding panicle, spikelets long-awned, glumes subequal, lemma 2-lobed at the

apex, awn twice bent, on dry stony places, cliffs, see *Bulletin of the Botanical Survey of India* 7: 133. 1965.

S. stillmanii Bolander (*Achnatherum stillmanii* (Bol.) Barkworth; *Lasiagrostis tenacissima* (L.) Trin. & Rupr.; *Macrochloa tenacissima* (L.) Kunth; *Stipa tenacissima* L.)

U.S., California. Rare species, see *Centuria I. Plantarum* ... 6. 1755, *Amoen. Acad.* 4: 266. 1759, *Révision des Graminées* 1: 58. 1829, *Species Graminum Stipaceorum* 94. 1842, *Proceedings of the California Academy of Sciences* 4: 169. 1872 and *Annali di Botanica* 45: 75-102. 1987, *Phytologia* 74(1): 14. 1993.

in English: Stillman's stipa

S. stipoides (Hook.f.) Veldkamp (*Austrostipa stipoides* (Hook.f.) S.W.L. Jacobs & J. Everett; *Dichelachne stipoides* Hook.f.; *Stipa teretifolia* Steudel)

South Australia, Tasmania, Victoria, New South Wales. Perennial tussock forming, stiff, caespitose, nodes glabrous, sheath ribbed, ligule obtuse, blades pungent or with a needle-like point, panicle contracted or exerted, spikelets gaping, floret cylindrical, lemma brown and pilose, callus hairy and nearly straight, awn twice bent, coastal dunes, stream banks, pioneer, high wind and salt wind tolerance, see *Prodromus Florae Norfolkicae* 20. 1833, *Flora Novae-Zelandiae* 1: 294, t. 66. 1853, *Synopsis Plantarum Glumacearum* 1: 128. 1854 and *Blumea* 22(1): 11. 1974, *Pap. Proc. Roy. Soc. Tasmania* 112: 277-287. 1978, *Telopea* 6(4): 589. 1996.

in English: coast speargrass, prickly speargrass, needle tussock

S. stuposa Hughes (*Austrostipa stuposa* (Hughes) S.W.L. Jacobs & J. Everett)

South Australia, Tasmania, Victoria, New South Wales. Perennial, caespitose, sturdy, ligule truncate and membranous, blades hirsute and ribbed, auricles present, panicle sparse to dense, spikelets gaping, floret elliptic, glumes acuminate and unequal, lemma smooth and silky, densely silky callus straight and sharp, awn twice bent, grows in woodland or heath, see *Bulletin of Miscellaneous Information Kew* 1921: 20f, 24 & 24A. 1921, *Telopea* 6(4): 589. 1996.

in English: Tasmanian speargrass

S. styriaca Martinovsky

Austria. Vulnerable species, see *Österreichische Botanische Zeitschrift* 118: 179. 1970.

S. subaristata (Matthei) Caro & E.A. Sánchez (*Jarava subaristata* (Matthei) Matthei; *Stipa leptostachya* var. *subaristata* Matthei)

Chile, Argentina. See *Abhandlungen der Königlichen Gesellschaft der Wissenschaften zu Göttingen* 24: 299. 1879 and *Gayana, Botánica* 13: 120. 1965, *Kurtziana* 7: 96. 1973, *Gayana, Botánica* 54(2): 192. 1997 [1998], *Comision de Investigaciones Cientificas* 13: 46-47. 1997.

S. subsessiliflora (Ruprecht) Roshev. (*Lasiagrostis subsessiliflora* Ruprecht; *Stipa basiplumosa* Munro ex Hooker)

Central Asia, Pamir, India. See *Sertum Tianschanicum* 35. 1869, *The Flora of British India* 7(22): 229. 1897 [1896] and *Flora Reipublicae Popularis Sinicae* 9(3): 284, pl. 68, f. 1-5. 1987.

S. syreistschikowii P.A. Smirn. (*Stipa paradoxa* (Junge ex B. Fedtsch.) P.A. Smirn.)

Eurasia, Caucasus, Ukraine, Crimea. Indeterminate species, see *Flora Aziatskoj Rossii* 1(12): 156. 1916, *Not. Syst. Herb. Inst. Bot. Acad. Sci. URSS* 19: 647. 1959.

S. tenacissima L. (*Lasiagrostis tenacissima* (L.) Trin.; *Macrochloa tenacissima* (L.) Kunth; *Stipa gabesensis* Moraldo, Raffaelli & Ricceri; *Stipa kelibibae* Moraldo, Raffaelli, & Ricceri; *Stipa kralifii* Moraldo, Raffaelli, & Ricceri; *Stipa stillmanii* Bol.; *Stipa tenacissima* Loefl. ex L.; *Stipa tenacissima* Ucria, nom. illeg., non *Stipa tenacissima* L.)

Western Mediterranean, Portugal, Spain. Perennial, stems very stout, leaves convolute and glabrous, narrow and compact inflorescence, lemma tip bifid, leaf used in placentary retention and diarrhea, native pasture species, unpalatable, a source of fiber, used for papermaking, mats and cordage, ropes and basketry, see *Centuria I. Plantarum* ... 6. 1755, *Amoen. Acad.* 4: 266. 1759, *Hortus Regius Panhormitanus, aerae vulgaris anno MDCCLXXX noviter extractus septoque ex indigenis, exoticisque plurimas complectens plantas*. Accurante P.F. Bernardino ab Ucria. Armenia, Asia, Europe. On sandy soil, useful for erosion control, see *Bulletin de la Société Impériale des Naturalistes de Moscou* 30(2): 115. 1857, *Trudy Imp. Saint Pétersbourg. Bot. Sada* 9: 351. 1884, *Sitzungsberichte der Königlichen Böhmischen Gesellschaft der Wissenschaften, Mathematisch-Naturwissenschaftliche Classe* 1884: 58. 1884, *Berichte der Deutschen Botanischen Gesellschaft* 10: 293. 1892, *Anales de la Universidad de Chile* 93: 725. 1896 and *Allgemeine Botanische Zeitschrift für Systematik, Floristik, Pflanzengeographie* 8: 182. 1902, *Novosti Sist. Vyss. Rast.* 11: 20. 1974.

S. tirsa Steven subsp. ***albanica*** Martinovsky

Europe. See *Preslia* 44(1): 22. 1972.

S. tirsa Steven subsp. ***tirs***a

Armenia, Asia, Europe.

S. trichoides P.A. Smirnov (*Stipa turkestanica* subsp. *trichoides* (P.A. Smirn.) Tzvelev)

Russia, USSR (former). Rare species, see *Repertorium Specierum Novarum Regni Vegetabilis* 21(588-600): 233. 1925, *Novosti Sist. Vyss. Rast.* 11: 17. 1974.

S. trichophylla Benth. (*Austrostipa trichophylla* (Benth.) S.W.L. Jacobs & J. Everett)

South Australia, Western Australia, Northern Territory, New South Wales, Victoria. Perennial, caespitose, nodes glabrous, sheaths villous to glabrous, ligule membranous and obtuse to lacinate, auricles thickened, panicle sparse, spikelets gaping after floret disarticulation, floret elliptic, glumes acuminate, lemma brown to gold-brown at maturity, densely hairy callus straight and sharp, awn falcate, dry areas, arid and semiarid, on hillsides, see *Flora Australiensis: A Description ...* 7: 570. 1878 and *Telopea* 6(4): 589. 1996.

S. tuckeri F. Muell. (*Austrostipa tuckeri* (F. Muell.) S.W.L. Jacobs & J. Everett)

South Australia, Western Australia, New South Wales. Perennial, caespitose, rhizomatous or shortly rhizomatous, stems wiry and decumbent, branched at the nodes, sheath pubescent and ribbed, ligule obtuse and membranous, panicle pyramidal and expanded, spikelets gaping only at maturity, floret narrow-cylindrical, glumes inflated and unequal, lemma dark and tuberculate, callus almost straight and blunt, awn with 1 bend or straight, see *Fragmenta Phytographiae Australiae* 9: 129. 1881 and *Telopea* 6(4): 589. 1996.

in English: Tucker speargrass

S. tucumana Parodi (*Nassella tucumana* (Parodi) Torres)

Argentina. See *Revista Argentina de Agronomía* 15(1): 57, f. 2. 1948, *Comision de Investigaciones Cientificas* 13: 38, f. 1, G, g. 1997.

S. turkestanica Hack. (*Stipa trichoides* Smirn.; *Stipa trichoides* Smirn.)

Afghanistan, India, Pakistan. See *Repertorium Specierum Novarum Regni Vegetabilis* 21(588-600): 232-233. 1925 [also *Feddes Repertorium Specierum Novarum Regni Vegetabilis*], *Trudy Imp. Saint Pétersbourg. Bot. Sada* 26: 59. 1906, *Novosti Sist. Vyss. Rast.* 11: 17. 1974.

S. ucrainica P.A. Smirn. (*Stipa krascheninnikowii* Roshev.; *Stipa tirs*a sensu K.M. Zalessky, non Steven; *Stipa zalesskii* subsp. *ucrainica* (Smirnov) Tzvelev)

Europe, Russia, Siberia. Perennial bunchgrass, awned, useful for erosion control, see *Nomenclator Botanicus* 816. 1821 and *Repertorium Specierum Novarum Regni Vegetabilis* 22: 374. 1926, *Fl. URSS* 2: 98. 1934, *Novosti Sist. Vyss. Rast.* 11: 17. 1974.

S. ucranensis Lam.

Europe, Russia, Siberia. See *Tableau Encyclopédique et Méthodique ... Botanique* 1: 157. 1791, *Nomenclator Botanicus* 816. 1821 and *Repertorium Specierum Novarum Regni Vegetabilis* 22: 374. 1926, *Fl. URSS* 2: 98. 1934, *Novosti Sist. Vyss. Rast.* 11: 17. 1974.

S. variabilis Hughes (*Austrostipa variabilis* (Hughes) S.W.L. Jacobs & J. Everett; *Stipa pubescens* var. *effusa* Benth.)

South Australia, Western Australia. Perennial, delicate stems, tufted, nodes glabrous, auricles hirsute, sheaths pubescent to glabrous, glumes acuminate, panicle sparse and usually contracted, floret elliptic, lemma dark and hairy, callus straight and sharp, awn falcate, see *Prodromus Florae Novae Hollandiae* 174. 1810, *Flora of Australia* 7: 570-571. 1878 and *Bulletin of Miscellaneous Information Kew* 1921: 15. 1921, *Flora of Western Australia* 1. pt. 1: 182. 1952, *Telopea* 6(4): 589. 1996.

in English: variable speargrass

S. velutina Vickery, Jacobs & Everett (*Austrostipa velutina* (Vickery, S.W.L. Jacobs & J. Everett) S.W.L. Jacobs & J. Everett)

South Australia, Western Australia. Nodes velutinous, panicle sparse and contracted, floret narrow-elliptic, lemma brown, callus straight and sharp, awn twice bent, see *Telopea* 3(1): 126. 1986, *Telopea* 6(4): 589. 1996.

S. veneta Moraldo

Italy. Endangered species, see *Webbia* 40(2): 238. 1986.

S. ventanica Cabrera & Torres (*Nassella ventanica* (Cabrera & Torres) Barkworth)

Argentina. Rare species, see *Boletín de la Sociedad Argentina de Botánica* 12: 140. 1968, *Taxon* 39(4): 612. 1990.

S. verticillata Nees ex Spreng. (*Austrostipa verticillata* (Nees ex Spreng.) S.W.L. Jacobs & J. Everett; *Stipa micrantha* R. Br. ex Hughes, nom. illeg., non *Stipa micrantha* Cav.; *Streptachne verticillata* (Nees ex Spreng.) Trin. & Rupr.)

Australia, New South Wales, Queensland. Perennial, caespitose, shortly rhizomatous, branched at each node, sheath glabrous and ribbed, ligule erose to entire, panicle exerted, spikelets gaping, lemma black at maturity, callus bent and hairy, awn with 1 or 2 bends, see *Prodromus Florae Novae Hollandiae* 175. 1810, *Systema Vegetabilium, editio decima sexta* 4(Cur. Post.): 30. 1827, *Species Graminum Stipaceorum* 8-9. 1842 and *Telopea* 3: 127. 1986, *Telopea* 6(4): 589. 1996.

S. vickeryana Everett & Jacobs (*Austrostipa vickeryana* (J. Everett & S.W.L. Jacobs) S.W.L. Jacobs & J. Everett)

South Australia, Western Australia. Densely clumped, panicle sparse and slightly spreading, floret elliptic to turbinate, lemma dark and smooth, callus straight and sharp, awn twice bent to almost straight, see *Telopea* 2(4): 397. 1983, *Telopea* 6(4): 589. 1996.

S. zalesskii Wilensky (*Stipa glabrata* P.A. Smirn. ex Roshev.; *Stipa iljinii* Roshev.; *Stipa pennata* subsp. *zalesskii* (Wilensky) Freitag; *Stipa rubens* P.A. Smirn.; *Stipa ruben-tiformis* P.A. Smirn. ex Roshev.)

Czech Republic, Slovakia, Russian Federation. Rare species, see *Feddes Repertorium Specierum Novarum Regni Vegetabilis* 21: 231-232. 1925, *rudy Imp. Saint Pétersbourg. Bot. Sada* 40: 115. 1928, *Fl. USSR* 2: 102. 1936, *Notes from the Royal Botanic Garden, Edinburgh* 42(3): 443. 1985.

Stipagrostis Nees = *Arthratherum* auct., *Schistachne* Fig. & De Not.

From the Greek *stypē* "tow," like *Stipa*, and *Agrostis*, or *agrostis*, a fodder grass.

About 50 species, Africa, southwestern and central Asia, Pakistan, Middle East, China. Arundinoideae, Aristideae, or Aristidoideae, Aristideae, perennial or rarely annual, unarmed, densely tufted, herbaceous, branched or not, erect to geniculate, sometimes with knotty rhizomatous base or suffruticose, double bundle sheath, inner sheath thick-walled, outer sheath is the site of carbon reduction, ligule densely fringed, harsh narrow leaves sometimes pungent, plants bisexual, open or contracted panicle, spikelets solitary or in fascicles, 1-flowered, female fertile floret terminal, 2 glumes very unequal to more or less equal, lower glume usually 3-nerved, upper glume 3- to 11-nerved, awns 3-branched or unbranched, awns central branch plumose, terete enfolding lemmas, small palea half the length of the lemma, lodicules present or absent, 3 stamens, ovary glabrous, 2 stigmas, sandbinders, cultivated fodders, native pasture, species of open habitats, arid stony situations, dry plains, deserts and semideserts, dunes and shifting dunes, fixed dunes, desert sand, riverbanks, sometimes included in *Aristida* L., type *Stipagrostis capensis* Nees, see *Species Plantarum* 1: 82. 1753, *Neues Journal für die Botanik* 3: 255. 1809, *Linnaea* 7(3): 290-291. 1832, *Species Graminum Stipaceorum* 163. 1842, *Memorie della Reale Accademia delle Scienze di Torino, ser. 2* 12: 252. 1852, *Genera Plantarum* 3(2): 1141. 1883 and *Meded. Species

S. acutiflora (Trin. & Rupr.) De Winter (*Aristida acutiflora* Trin. & Rupr.)

Tropical Africa. Perennial, slender, found in dry waste places, see *Species Graminum Stipaceorum* 167. 1842 and *Kirkia* 3: 133. 1963, *Österreichische Botanische Zeitschrift* 117: 286. 1969.

in Mauritania: asserdun, sfar

S. amabilis (Schweick.) De Winter (*Aristida amabilis* Schweick.)

South Africa, Namibia, Kalahari. Perennial, suffrutescent or shrubby, tufted, small to dwarf, rhizomatous, erect or horizontal, always branched from the middle and lower nodes, forming dense bundles of shoots, creeping rhizomes, leaf blade rigid and sharply pointed, ligule a fringe of short hairs, leaf sheaths of the vegetative portions scale-like, pungent leaves, narrow inflorescence, interrupted and slightly contracted panicle, crowded and appressed spikelets, tripartite awns, central awn plumose, 2 lateral awns nonfeathery, awns without column, sand binder, little forage value, useful for erosion control, found in sand dune crests, closely related to *Stipagrostis namaquensis* (Nees) De Winter, see *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 76(2): 217-218. 1954, *Kirkia* 3: 133. 1963.

in English: Kalahari dune bushman grass, Kalahari coach
in South Africa: duinekweek, dünen federgras

S. anomala De Winter (*Arthratherum namaquense* Nees; *Stipa namaquensis* Pilg.; *Stipagrostis namaquensis* (Nees) De Winter)

South Africa. Annual or short-lived perennial, weak, tufted, erect or slightly geniculate at the base, leaves mostly basal, leaf blades needle-shaped and rolled, ligule a fringe of short hairs, leaf sheaths somewhat flattened, leaves curled and curved, narrow inflorescence, interrupted panicle, erect and crowded spikelets, single awn not plumose, glumes 3-nerved, lemma involute, relatively unpalatable, poorly grazed, found in sandy soil, shallow soil, gravelly plains, rocky sites, closely related to *Stipagrostis obtusa* (Delile) Nees, see *Florae Africae Australioris Illustrationes Monographicae* 1: 185. 1841 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 51(3-4): 412. 1914, *Kirkia* 3: 133, 135. 1963.

in South Africa: Torro-boesmangras, Torro federgras

S. arachnoidea (Litv.) De Winter (*Aristida arachnoidea* Litv.; *Arthratherum arachnoideum* (Litv.) Tzvelev)

Asia, Turkmenistan. See *Kirkia* 3: 133. 1963, *Novosti Sist. Vyss. Rast.* 8: 74. 1971.

S. brevifolia (Nees) De Winter (*Aristida brevifolia* (Nees) Steud.; *Arthratherum brevifolium* Nees)

South Africa, Cape. Perennial, suffrutescent, shrubby, glandular on the culms and leaf sheaths, rough, small to dwarf, robust, profusely branched, nodes woolly, short internodes, rhizomatous, leaf sheaths rounded, leaf blades expanded or rolled, ligule a fringe of short hairs, root system well developed, hard and much-branched rhizome, stiff leaves short and acute, narrow inflorescence, a contracted and interrupted panicle, spikelets with 3 awns, glumes glabrous, central awn plumose or bearded, flowering time depends on when it rains, pasture, palatable when young and green, drought resistant, growing in sandy soil, coarse and stony soils, hillsides, drainage areas, see *Species Plantarum* 1: 82. 1753, *Nomenclator Botanicus. Editio secunda* 1: 130. 1840, *Florae Africae Australioris Illustrationes Monographicae* 1: 183. 1841 and *Kirkia* 3: 133. 1963.

in English: Twabushman grass

in South Africa: kortblaarboesmangras, kurzblatt federgras, bloudak (after 3 or more dry seasons, when the grass becomes older it assumes the blue color), bloudakgras, boesmangras, bossiesgras, ghagras, grootboesmangras, langbeentoagras, langbeentwaagras, twaagras, twaboesmangras

S. ciliata (Desf.) De Winter (*Aristida ciliata* Desf.)

Algeria, Sudan, Namibia, Yemen, Pakistan. Perennial, densely tufted, erect or sometimes geniculate, unbranched, large, tussocky, conspicuous nodes densely villous, leaf sheaths somewhat woolly or densely covered with wavy hairs at the margins, basal leaf sheaths papery, leaf blades usually rolled and ending in a narrow point, ligule a fringe of short hairs, leaves convolute and wavy, inflorescence an open panicle with lateral branches well developed, spikelets with dark basal region, glumes glabrous, tripartite awn, central awn plumose, young growth more or less palatable, high nutritive value, useful for erosion control, a sandbinder, extremely drought-resistant, growing on open hillsides, dry areas, on steep stony slopes, red sandy soil, sandy soils with lime substratum, see *Neues Journal für die Botanik* 3: 255. 1809 and *Kirkia* 3: 133. 1963.

in English: tall bushman grass

in Morocco: senyal, ataf

in South Africa: langbeenboesmangras, langbeentwa, bewimpertes federgras

S. ciliata (Desf.) De Winter var. ***capensis*** (Trin. & Rupr.) De Winter (*Aristida ciliata* sensu Desf., non Steud. & Hochst. ex Steud.; *Aristida ciliata* Desf. var. ***capensis*** Trin.

& Rupr.; *Aristida ciliata* Desf. var. *pectinata* Henrard; *Aristida ciliata* Desf. var. *tricholaena* Hack.; *Aristida ciliata* Desf. var. *villosa* Hack.; *Arthratherum ciliatum* (Desf.) Nees; *Schistachne ciliata* (Desf.) Fig. & De Not.)

Namibia, South Africa. Perennial, densely or loosely tufted, erect or geniculate, nodes with a white ring of hairs, leaves mostly basal, leaf sheath hairy, ligule a ring of short hairs, hard and curled leaves, a sparse open or contracted panicle, spikelets 3-awned, central awn plumose, palatable and nutritious grass, high grazing value, valuable pasture, resistant to drought, suitable as a binder of sand, generally found in sandveld, riverbeds, dry riverbeds, gravel plains, on coarse sandy soil, see *Neues Journal für die Botanik* 3: 255. 1809, *Linnaea* 7(3): 289. 1832, *Species Graminum Stipaceorum* 164. 1842, *Memorie della Reale Accademia delle Scienze di Torino, ser. 2* 12: 252. 1852, *Bulletin de l'Herbier Boissier* 4 (Append. 3): 18. 1896 and *Meded. Rijks-Herb.* 54: 93, 95. 1926, *Bothalia* 4: 110. 1941, *Kirkia* 3: 133. 1963.

in English: large bushman grass, tall bushman grass

in South Africa: langbeenboesmangras

S. ciliata (Desf.) De Winter var. *ciliata*

Africa.

in English: tall bushman grass

in Morocco: senyal, ataf

in South Africa: langbeenboesmangras, bewimpertes federgras

S. damarensis (Mez) De Winter (*Aristida damarensis* Mez)

South Africa, Namibia. Perennial, robust, stout, loosely or laxly tufted, rhizomatous, narrow and compact inflorescence with appressed branches, erect spikelets, 3 awns plumose, generally found in drainage lines, riverbeds, dry riverbeds, see *Repertorium Specierum Novarum Regni Vegetabilis* 17(8-12): 152. 1921, *Kirkia* 3: 134. 1963.

S. dinteri (Hack.) De Winter (*Aristida dinteri* Hack.)

South Africa, Namibia, Angola. Perennial, slender, tufted, culms prickly, often glandular, narrow inflorescence, soft glumes, central awn plumose, generally found in sandy soils, riverbeds, hillsides, dry riverbeds, see *Bulletin de l'Herbier Boissier, sér. 2*, 1: 767. 1901, *Kirkia* 3: 134. 1963.

S. dregeana Nees (*Aristida dregeana* (Nees) Trin. & Rupr.)

South Africa, Cape. Erect to geniculate, loosely or densely tufted, branched, leaves mostly basal, open inflorescence, dark glumes, more or less all 3 awns plumose, generally found in shallow soils, depressions, riverbeds, along roadsides, dry riverbeds, rocky sites and between rocks, on coarse sandy soil, see *Florae Africae Australioris Illustrationes Monographicae* 1: 172. 1841, *Species Graminum Stipaceorum* 169. 1842.

in English: rock bushman grass

S. fastigiata (Hack.) De Winter (*Aristida fastigiata* Hack.)

South Africa, Namibia. Perennial, profusely branched, densely tufted, shrubby, suffrutescent, small or dwarf, nodes densely hairy, much-branched rhizomes, leaf sheaths rough and wavy, leaf blades expanded or rolled, ligule a fringe of short hairs, leaves rough or hairy, dense panicle, inflorescence exerted from the leaf sheaths, spikelets in fascicles, glumes hairy, smooth lemmas, central awn plumose, pasture, in sandy and on alkaline soils, see *Bulletin de l'Herbier Boissier, sér. 2*, 1: 768. 1901, *Kirkia* 3: 134. 1963.

in South Africa: kuifkopboesmangras, büschel federgras

S. foexiana (Maire & Wilczek) De Winter (*Aristida corradii* Chiov. ex Chiarugi; *Aristida foexiana* Maire & Wilczek)

North Africa, southwestern Africa, Saudi Arabia and Yemen. Perennial, densely tufted, slender, wiry, glabrous, leaf blades convolute, coriaceous sheaths, panicle loosely contracted, glumes 3-nerved, lower glume shorter than the upper, lemma smooth and shiny, column of awn glabrous, awn central branch glabrous and plumose, awn lateral branches glabrous, callus bearded, see *Bulletin de la Société d'Histoire Naturelle de l'Afrique du Nord* 25: 322. 1934, *Webbia* 8: 88. 1951, *Kirkia* 3: 134. 1963.

S. garubensis (Pilg.) De Winter (*Aristida garubensis* Pilg.)

South Africa, Namibia. Shrubby, suffrutescent, woody, small or dwarf, robust, stout, branched, slender, leaves flexuous and pungent, glumes dark, central awn plumose, rocky sites and between rocks, dry riverbeds, slopes, hillsides, see *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 43: 344. 1912, *Kirkia* 3: 134. 1963.

S. geminifolia Nees (*Aristida geminifolia* (Nees) Trin. & Rupr.; *Aristida geminifolia* (Nees) Steud., nom. illeg., non *Aristida geminifolia* (Nees) Trin. & Rupr.)

South Africa. Shrubby, dwarf, erect or geniculate, ovate to oblong inflorescence usually not exerted from the upper leaf sheath, spikelets fascicles densely clustered, glumes densely hairy, lemmas smooth, central awn plumose, pasture, open habitats, open places, coarse sandy soils, water courses, gravel plains, see *Florae Africae Australioris Illustrationes Monographicae* 1: 173. 1841, *Species Graminum Stipaceorum* 169. 1842, *Synopsis Plantarum Glumacearum* 1: 144. 1854.

S. giessii Kers (dedicated to the German botanist Johann Wilhelm Heinrich Giess, b. 1910, farmer, to South Africa from 1926, see Mary Gunn and Leslie E. Codd, *Botanical Exploration of Southern Africa*. 167. A.A. Balkema, Cape Town 1981)

South Africa. Perennial, variable, tufted, scabrous to scabrid, leaves mostly basal, narrow inflorescence shortly pedicellate, central awn plumose, open places, coarse sandy soils, water courses, sandy river beds, gravel plains, stony hills, see *Svensk Botanisk Tidskrift* 65(2): 199. 1971.

S. gonatostachys (Pilg.) De Winter (*Aristida gonatostachys* Pilg.)

South Africa, Namibia. Perennial, densely tufted, scabrous to scabrid, leaves mostly basal, narrow inflorescence spike-like, spikelets with rigid pedicels, glumes scabrous to hairy, lemma smooth, central awn plumose, found in coarse sandy soils, depressions, between rocks, slopes, mountain slopes, see *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 48: 343. 1912, *Kirkia* 3: 134. 1963.

in English: rough-leaved bushman grass

S. grandiglumis (Roshevitz) Tzvelev (*Aristida grandiglumis* Roshevitz)

Central Asia, China. Perennial, densely tufted, branched at base, leaf sheaths smooth or scabrous, leaf blades involute, lax panicle few-spikeleted, glumes narrowly lanceolate, upper glume acuminate, awn branches densely plumose, see *Bot. Mater. Gerb. Bot. Inst. Komarova Akad. Nauk SSSR* 11: 18. 1949, *Zlaki SSSR* 618. 1976.

S. hermannii (Mez) De Winter (*Aristida hermannii* Mez) (for Ernst Hermann, plant collector in southwest Africa, murdered in the Herero war of 1904, see Mary Gunn and Leslie E. Codd, *Botanical Exploration of Southern Africa*. 184. A.A. Balkema, Cape Town 1981)

South Africa, Namibia. Geniculate to prostrate, tufted, scabrous, dense narrow inflorescence, glumes glabrous, central awn plumose, in sandy soils, hillsides, see *Repertorium Specierum Novarum Regni Vegetabilis* 17(8-12): 153. 1921, *Kirkia* 3: 134. 1963.

S. hirtigluma (Steud. ex Trin. & Rupr.) De Winter (*Aristida ciliata* Steud. & Hochst. ex Steud.; *Aristida hirtigluma* Steud. ex Trin. & Rupr.; *Aristida hirtigluma* Trin. & Rupr.; *Arthratherum ciliatum* (Desf.) Nees)

Ethiopia, Angola, tropical and southern Africa, Namibia. Annual or short-lived perennial, rather variable, densely tufted, sheaths glabrous to scabrous, leaves convolute and scabrid, panicle contracted or open, spikelets on long filiform pedicels, unequal glumes narrowly lanceolate and shortly-softly pilose, central awn plumose, lateral awns glabrous, callus bearded with 2 sets of hairs, palatable fodder before flowering or seeding, camel grass, weed of plantations, escarpment foothills, semidesert grasslands, dry stony *Acacia-Commiphora* bushland, coarse sandy soils, poor dry sandy soil, water courses, sandy riverbeds, arid waste places, see *Linnaea* 7(3): 289. 1832, *Species Graminum Stipaceorum* 171-172. 1842 and *Meded. Rijks-Herb.* 54: 232. 1927, *Bulletin de la Société d'Histoire Naturelle de l'Afrique du Nord* 1929. 1929, *Kirkia* 3: 134. 1963, *Adansonia* 11(1): 129. 1971.

in Somalia: sarem, harfo

S. hirtigluma (Steud. ex Trin. & Rupr.) De Winter subsp. *hirtigluma* (*Aristida hirtigluma* Steud. ex Trin. & Rupr.)

North Africa, Angola, West Africa, Middle East, Namibia. Annual, erect, tufted, leaves mostly basal, nodes compressible, narrow inflorescence, contracted panicle, glumes hairy, central awn plumose, pioneer grass, open places, very dry areas, rocky sites, coarse sandy soils, water courses, sandy alluvium, sandy river beds, gravel plains, stony hills, see *Linnaea* 7(3): 289. 1832, *Species Graminum Stipaceorum* 171-172. 1842 and *Meded. Rijks-Herb.* 54: 232. 1927, *Kirkia* 3: 134. 1963.

S. hirtigluma (Steud. ex Trin. & Rupr.) De Winter subsp. *patula* (Hack.) De Winter (*Aristida gracilior* Pilg. var. *gracilior*; *Aristida hirtigluma* var. *patula* Hack.)

Tropical Africa, South Africa. Perennial, erect or geniculate, unbranched, basal leaves, densely tufted, smooth, leaf blades stiff and rolled, ligule a fringe of short hairs, leaf sheaths rough or smooth, open spreading inflorescence paniculate with well-developed lateral branches, dark to purplish hairy glumes, column present, central awn plumose, on floodplains, limy soil, rocky areas, sandy soils, around pans, usually does not occur in the very dry areas, see *Denkschriften der Kaiserlichen Akademie der Wissenschaften. Mathematisch-naturwissenschaftliche Klasse* 78: 401. 1905, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 40: 80. 1907, *Kirkia* 3: 134. 1963.

in South Africa: bloutwa, bläuliches federgras

S. hirtigluma (Steud. ex Trin. & Rupr.) De Winter subsp. *pearsonii* (Henrard) De Winter (*Aristida gracilior* var. *pearsonii* Henrard) (named for the English botanist Henry Harold Welch Pearson, 1870-1916 (d. Wynberg, Cape Town, South Africa), Cambridge Herbarium, professor of botany (South African College, Capetown), plant collector and botanical explorer, founder and Hon. Director of the National Botanic Gardens (Kirstenbosch, South Africa); see A.C. Seward, "H.H.W. Pearson, F.R.S., Sc.D. (Cambridge)." in *The Annals of the Bolus Herbarium*. Vol. II, Part III: 131-147. July 1917; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 304. 1972; Mary Gunn & Leslie Edward W. Codd, *Botanical Exploration of Southern Africa*. 275-276. A.A. Balkema, Cape Town 1981; Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 542. London 1994; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 1993).

South Africa, Angola, Namibia. Annual, erect to geniculate, densely tufted, smooth, nodes compressible, open spreading inflorescence, glumes hairy, pioneer grass, pasture, low palatability, growing on sandy soils, very dry areas, stony hills, see *Mededeelingen van's Rijks-Herbarium* 54(B): 695-696. 1928, *Kirkia* 3: 134. 1963.

S. hochstetteriana (Beck ex Hack.) De Winter (also spelled *hochstetterana*) (*Aristida hochstetteriana* Beck ex Hackel)

South Africa, Namibia. Perennial, tufted, erect or geniculate, unbranched, leaves basal, leaf sheaths flattened, leaf blades rolled, ligule a fringe of short hairs, inflorescence a dense and compact panicle, only the central awn hairy to feathery, palatable, semidesert areas, see *Verhandlungen des Botanischen Vereins für die Provinz Brandenburg und die angrenzenden Länder* 30: 144. 1888 and *Kirkia* 3: 134. 1963.

in English: spike bushman grass, gemsbuck tail grass

in South Africa: gemsbokstertgras, gemsbokschwanzgras

S. hochstetteriana (Beck ex Hack.) De Winter var. ***hochstetteriana*** (*Aristida hochstetteriana* Beck ex Hack.)

South Africa, Namibia. Perennial, erect, tufted to densely tufted, leaves basal, unbranched, inflorescence spicate and narrow, thick pedicels, lower glume linear and hairy, central awn plumose, found in disturbed areas, roadsides, streams, river courses, sandy to clay soils, see *Verhandlungen des Botanischen Vereins für die Provinz Brandenburg und die angrenzenden Länder* 30: 144. 1888 and *Mededeelingen van's Rijks-Herbarium* 54(A): 235. 1927.

in English: spike bushman grass

S. hochstetteriana (Beck ex Hack.) De Winter var. ***secalina*** (Henrard) De Winter (*Aristida secalina* Henrard)

South Africa, Angola, Namibia. Perennial, erect, densely tufted, leaves mostly basal, unbranched and narrow inflorescence spicate, thick pedicels, lower glume linear, central awn plumose, found in sandy soils, see *Mededeelingen van's Rijks-Herbarium* 54: 168. 1926, *Kirkia* 3: 134. 1963.

in English: rye bushman grass

S. karelinii (Trin. & Rupr.) Roshev. (*Aristida karelinii* (Trin. & Rupr.) Roshev., also *karelinii*; *Aristida pennata* var. *karelinii* Trin. & Rupr., also *karelinii*; *Arthratherum karelinii* (Trin. & Rupr.) Tzvelev; *Stipagrostis karelinii* (Trin. & Rupr.) Tzvelev)

Asia, Turkmenistan. See *Species Graminum Stipaceorum* 177-178. 1842 and *Flora URSS* 2: 67, 740, t. 5, f. 9. 1934, *Willdenowia* 6: 161. 1970, *Novosti Sist. Vyss. Rast.* 8: 74. 1971, *Novosti Sist. Vyss. Rast.* 11: 71. 1974.

S. lanata (Forssk.) De Winter (*Aristida lanata* Forssk.; *Aristida lanata* Poir., nom. illeg., non *Aristida lanata* Forssk.; *Aristida plumosa* var. *lanata* (Forssk.) Trin. & Rupr.; *Chaetaria gossypina* P. Beauv. ex Roem. & Schult.)

North Africa, Algeria, Egypt. See *Species Plantarum, Editio Secunda* 1666. 1763, *Flora Aegyptiaco-Arabica* 25. 1775, *Encyclopédie Méthodique. Botanique ... Supplément* 1: 453. 1810, *Systema Vegetabilium* 2: 391. 1817, *Species Graminum Stipaceorum* 166. 1842 and *Kirkia* 3: 135. 1963, *Fl. Palaest.* 4: 278, pl. 364. 1986, Frank Nigel Hepper and Ib Friis, *The Plants of Pehr Forsskal's "Flora Aegyptiaco-Arabica"* collected on the Royal Danish Expedition to Egypt and the Yemen 1761-1763. 279. Royal Botanic Gar-

dens, Kew [in association with the Botanical Museum, Copenhagen] 1994.

in Arabic: dhraeirae, dhraejrae, sjaefsjuf

S. lanipes (Mez) De Winter (*Aristida lanipes* Mez)

South Africa, Namibia. Perennial, rare and indeterminate, densely tufted, leaves basal, leaf sheaths densely woolly, contracted inflorescence much branched, central awn plumose, on sandy soils, see *Repertorium Specierum Novarum Regni Vegetabilis* 17(8-12): 153. 1921, *Kirkia* 3: 135. 1963.

in English: woolly bushman grass

S. lutescens (Nees) De Winter (*Aristida lutescens* (Nees) Trin. & Rupr.; *Aristida lutescens* (Nees) Steud., nom. illeg., non *Aristida lutescens* (Nees) Trin. & Rupr.; *Arthratherum lutescens* Nees)

South Africa. See *Florae Africae Australioris Illustrationes Monographicae* 1: 179. 1841, *Species Graminum Stipaceorum* 173-174. 1842, *Synopsis Plantarum Glumacearum* 1: 145. 1854 and *Kirkia* 3: 135. 1963.

S. lutescens (Nees) De Winter var. ***lutescens*** (*Aristida lutescens* (Nees) Steud.)

South Africa. Shrubby, dwarf, robust, stout, branched, rhizomatous with long and branched rhizomes, culm nodes glabrous, rigid and pungent leaves, open inflorescence, no hairs in the axils of the inflorescence branches, awns all plumose or only the central, growing in sandy soils.

S. lutescens (Nees) De Winter var. ***marlothii*** (Hack.) De Winter (*Aristida lutescens* var. *marlothii* (Hack.) Stapf; *Aristida marlothii* Hack.) (after the South African botanist Hermann Wilhelm Rudolf Marloth, 1855-1931, pharmacist, chemist, botanical explorer, plant collector, from 1833 in South Africa, he is best known for *The Flora of South Africa*. Capetown and London 1913-1932, *Dictionary of the Common Names of Plants with a List of Foreign Plants Cultivated in the Open*. Cape Town 1917, see J.H. Barnhart, *Biographical notes upon botanists*. 2: 449. 1965; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 254. 1972; H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 206. 1964; Hans Herre (1895-1979), *The Genera of the Mesembryanthemaceae*. 49-50. Cape Town 1971; I.C. Hedge and J.M. Lamond, *Index of Collectors in the Edinburgh Herbarium*. Edinburgh 1970; A. White and B.L. Sloane, *The Stapelieae*. Pasadena 1937; A. Engler et al., "Plantae Marlothianae." in *Bot. Jahrb.* 10: 1-50, 242-285. 1889; Mary Gunn and Leslie E. Codd, *Botanical Exploration of Southern Africa*. 244-245. Cape Town 1981)

South Africa, Namibia. Shrubby, dwarf, robust, stout, branched, rhizomatous, strong and branched rhizomes, rigid pungent leaves, culm nodes hairy, open inflorescence, hairs

in the axils of the inflorescence branches, awns all plumose or only the central, growing in sandy soils, see *Flora Capensis* 7: 567. 1899 and *Meded. Rijks-Herb.* 54: 336. 1927, *Kirkia* 3: 135. 1963.

S. namaquensis (Nees) De Winter (*Aristida namaquensis* (Nees) Trin. & Rupr.; *Arthratherum namaquense* Nees)

South Africa, Namibia. Perennial, dwarf, bushy, prickly, reedlike, sprawling to erect or geniculate, robust to slender, tufted, coarse, hard and tough, glabrous, internodes dark, smooth, semiupright, rhizomatous, tufted branching from the lower nodes, root system extensive and very well developed, long and strong rhizomes, roots covered with a woolly covering, leaf blade sharp and rolled, leaf sheaths woolly hairy, ligule short and membranous, leaf sheaths of lower leaves scale-like, pungent and rigid leaves, inflorescence elongate and narrow, interrupted and contracted panicle, clustered spikelets, all 3 awns plumose or hairy, easily established from seeds or runners, pasture, relatively well utilized by Karakul and Dorper sheep, xerophytic and very useful grass, particularly drought resistant, useful for erosion control and sand binding, silt catcher, found in dry riverbeds, floodplains of rivers, gravelly soils, sand dunes, low lying areas, red sand dunes, closely related to *Stipagrostis amabilis* (Schweick.) De Winter, see *Species Plantarum* 1: 82. 1753, *Flora Africae Australioris Illustrationes Monographicae* 1: 185. 1841, *Species Graminum Stipaceorum* 174-175. 1842 and *Meded. Rijks-Herb.* 54(A): 370. 1927, *Kirkia* 3: 135. 1963.

in English: river bushman grass

in South Africa: steekrietboesmangras, steekwiet, steekweek, bamboesweek, rivier federgras, ysterkweek

S. namibensis De Winter

Namibia. Annual, loosely tufted, sprawling, scabrous, leaves mostly basal, narrow and open inflorescence much branched, glumes glabrous, central awn plumose, found on sandy soils, gravel plains, in depressions where water collects, see *Bothalia* 8: 173. 1964.

S. obtusa (Delile) Nees (*Aristida obtusa* Delile; *Arthratherum obtusum* (Delile) Nees; *Stipagrostis bifida* (Karl) De Winter)

Kuwait, South Africa, Namibia, Egypt, Tunisia. Perennial, variable, tough, hard, densely tufted, small, compact, dense, glabrous dark nodes, erect or geniculate, cushiony, tussocky, dense basal leaf cover, basal sheaths persistent, leaf sheath usually glabrous or pilose, ligule a fringe of short hairs, rough or glabrous leaf blades, leaves convolute strongly curled and sometimes coiled, root system shallow and well developed, very narrow contracted panicle much branched, spikelets 3-awned, central awn plumose and bent at an angle, scaberulous to glabrous glumes narrowly lanceolate 3-nerved, lower glume slightly longer than the upper, awn column glabrous, awn central branch glabrous and plumose, awn lateral branches glabrous, callus bearded, very drought

resistant, pasture, palatable, very high grazing value, good sand binder, useful for erosion control, occurs in dry areas, semidesert, stony and sandy soils in dry areas, along roadsides, on loose sandy soil, in sand at base of outcrop, see *Description de l'Égypte, ... Histoire Naturelle, Tom. Second* 175, t. 13, f. 2. 1812, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 198. 1833, *Flora Africae Australioris Illustrationes Monographicae* I. Gramineae. 179. 1841 and *Bothalia* 21(2): 163-170. 1991, *Lagascalia* 20(2): 265-275. 1998.

in English: small bushman grass

in South Africa: kortbeenboesmangras, beesgras, kurzbein buschmanngras, feintoagras, fyntwa, kliptwa

in Sahara (Tassili): alammoz

S. paradisea (Edgew.) De Winter (*Aristida caloptila* (Jaub.) Boiss.; *Aristida paradisea* Edgew.; *Arthratherum caloptilum* Jaub.)

Egypt, Arabia, Yemen. Perennial, densely tufted, branched at the base, internodes glabrous, basal leaf sheaths somewhat horny, rigid leaves convolute and strongly curved, panicle contracted, glumes unequal and glabrous, smooth lemma, central awn plumose, lateral awns glabrous, hillsides, barren rocks, limestone, sandstone hills, see *Journal of the Asiatic Society of Bengal. Part 2. Natural History* 16: 1219. 1848, *Illustrationes Plantarum Orientalium* 4: 54, t. 336. 1850-1853, *Flora Orientalis* 5: 497. 1884 and *Kirkia* 3: 135. 1963.

S. pennata (Trin.) De Winter (*Aristida pennata* var. *minor* Litv.; *Arthratherum pennatum* (Trin.) Tzvelev; *Arthratherum pennatum* subsp. *minus* (Litv.) Tzvelev)

China, Afghanistan. Perennial, tussocky, much branched at base, slender rhizomes, leaf sheaths smooth or scabrous, leaf blades involute, panicle lax, panicle base usually included in uppermost leaf sheath, glumes subequal narrowly lanceolate, lower glume acuminate, awn branches densely plumose, good fodder when green, useful species for binding sand, see *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Avec l'Histoire de l'Académie* 6: 488, t. 10. 1818 and *Mededeelingen van's Rijks-Herbarium* 54(A): 437. 1927, *Kirkia* 3: 135. 1963, *Novosti Sist. Vyss. Rast.* 8: 74. 1971, *Willdenowia* 17(1-2): 108. 1988.

S. pennata (Trin.) De Winter subsp. *minor* (Litv.) Tzvelev (*Aristida pennata* var. *minor* Litv.)

Afghanistan, Turkmenistan. See *Novosti Sist. Vyss. Rast.* 11: 71. 1974.

S. pennata (Trin.) De Winter subsp. *pennata* (*Aristida pennata* Trin.)

China.

S. plumosa (L.) Munro ex T. Anderson (*Aristida lanata* sensu Christensen, non Forssk.; *Aristida plumosa* L.; *Aristida plumosa* subsp. *kyzylkumica* Tzvelev; *Aristida plumosa*

subsp. *szovitsiana* (Trin. & Rupr.) Tzvelev; *Aristida plumosa* var. *intermedia* Litv.; *Aristida plumosa* subsp. *szovitsiana* (Trin. & Rupr.) Tzvelev; *Aristida plumosa* var. *szovitsiana* Trin. & Rupr.; *Arthratherum plumosum* (L.) Nees; *Arthratherum plumosum* subsp. *kyzylkumicum* (Tzvelev) Tzvelev; *Arthratherum plumosum* subsp. *szovitsianum* (Trin. & Rupr.) Tzvelev; *Stipagrostis plumosa* subsp. *kyzylkumica* (Tzvelev) Tzvelev)

Algeria, North Africa, Israel, Pakistan, Egypt. Perennial or annual, densely tufted, basal leaf sheaths somewhat horny and woolly, nodes glabrous, leaf blade glabrous or hairy, rigid leaves convolute and strongly curved, panicle contracted, glumes unequal and glabrous, central awn plumose, edible grain, excellent forage for horses and camels, found on sandy plains, sand hills, very arid situations, see *Species Plantarum, Editio Secunda* 1666. 1763, *Florae Africae Australioris Illustrationes Monographicae* 1: 182. 1841, *Species Graminum Stipaceorum* 165. 1842, *Journal of the Linnean Society, Botany* 5(Suppl. 1): 40. 1860 and *Willdenowia* 6(3): 519-552. 1972, *Novosti Sist. Vyss. Rast.* 8: 75. 1971, *Novosti Sist. Vyss. Rast.* 11: 71. 1974, *Annals of the Missouri Botanical Garden* 81(4): 784-791. 1994.

Tackholm; *Stipagrostis plumosa* var. *alexandrina* (Trin. & Rupr.) Tackholm)

North Africa. See *Florae Africae Australioris Illustrationes Monographicae* 1: 182. 1841, *Species Graminum Stipaceorum* 166-167. 1842, *Exploration Scientifique de l'Algérie* 2: 82. 1855, *Conspectus Florae Africae* 5: 806. 1894, *Flore de l'Algérie Monocot.* 159. 1895 and *Bulletin de la Société d'Histoire Naturelle de l'Afrique du Nord* 29: 455. 1938, *Willdenowia* 6(2): 295. 1971, *Willdenowia* 6(3): 519-552. 1972, *Publications from the Cairo University Herbarium* 5: 58. 1972[1974].

S. proxima (Steud.) De Winter (*Aristida proxima* Steud.)

South Africa. Rare, shrubby, dwarf, hairy, rhizomatous, erect, tufted, long rhizomes, narrow inflorescence with densely hairy branches, glumes acute, all 3 awns plumose,

growing in sandy soils, disturbed areas, see *Synopsis Plantarum Glumacearum* 1: 145. 1855 [1854] and *Kirkia* 3: 135. 1963.

S. pungens (Desf.) De Winter (*Aristida pungens* Desf.; *Arthratherum pungens* (Desf.) P. Beauv.)

North Africa, Egypt to Morocco, Algeria, Sudan, Iran. Hollow, coarse, stiff, strong, leaves pungent, while young good forage for camels and stock, famine grain, often used to probe wounds and for rheumatic pains, culms used for weaving into mats and baskets, found on sand dunes, dry waste places, see *Flora Atlantica* 1: 109, t. 35. 1798, *Essai d'une Nouvelle Agrostographie* 33, 152, t. 8, f. 9. 1812 and *Mededeelingen van's Rijks-Herbarium* 54(B): 477. 1928, *Bulletin de la Société d'Histoire Naturelle de l'Afrique du Nord* 32: 218. 1941, *Kirkia* 3: 135. 1963, *Willdenowia* 6(1): 163. 1970, *Willdenowia* 6(2): 297. 1971, *Annali di Botanica* 45: 75-102. 1987.

in Mauritania: sbot, shot

in Morocco: drinn, sabat, sbet

in Niger: drinn, madiugu, madjiugu, mayugu, sbat, tilult, tulul, telant

in Sahara (Tassili): toulloult, tullult, tulul

in Sudan: shot

S. ramulosa De Winter

Namibia. Perennial, slender, delicate, tufted, leaves pungent and prickly, narrow inflorescence sparsely branched, all 3 awns plumose, pasture, grazed, sandy soils, riverbeds, sand dunes, near water, see *Bothalia* 8: 173. 1964.

S. sabulicola (Pilg.) De Winter (*Aristida sabulicola* Pilg.)

South Africa, Namibia. Shrub or shrubby, dwarf, reedlike, branched, loosely to densely tufted, rhizomatous with robust and branched rhizomes, leaves rigid and pungent, elongate inflorescence spicate, glumes brown, all 3 awns plumose, sandy soils, dunes, sand dunes, riverbeds, see *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 40: 81. 1907, *Kirkia* 3: 135. 1963.

in English: Namib dune bushman grass

S. schaeferi (Mez) De Winter (*Aristida schaeferi* Mez; *Aristida schaeferi* var. *biseriata* Henrard; *Aristida schaeferi* var. *schaeferi*)

Namibia. Perennial, densely tufted, glabrous, knotty rhizomes, leaves basal, culm nodes glabrous, narrow or open inflorescence with flexuous pedicels, central awn plumose, along dry riverbeds or water courses, see *Repertorium Specierum Novarum Regni Vegetabilis* 17(8-12): 152. 1921,

Mededeelingen van's Rijks-Herbarium 58: 41. 1929, *Meded. Rijks-Herb.* 54(C): 740. 1933, *Kirkia* 3: 136. 1963.

in English: woolly-leaved bushman grass

S. scoparia (Trin. & Rupr.) De Winter (*Aristida scoparia* Trin. & Rupr.)

Egypt, Niger, Israel. See *Species Graminum Stipaceorum* 176. 1842 and *Kirkia* 3: 136. 1963.

S. subacaulis (Nees) De Winter (*Aristida subacaulis* (Nees) Steud.; *Arthratherum subacaule* Nees)

South Africa. Annual, short, prostrate to spreading, tufted, compact, leaves mostly basal, inflorescence contracted and much branched, glumes glabrous, central awn plumose, in coarse sandy soil, hillsides, stony places, gravel flats, see *Nomenclator Botanicus* edition 2 1: 132. 1840, *Florae Africae Australioris Illustrationes Monographicae* 180. 1841 and *Kirkia* 3: 136. 1963.

in English: stemless bushman grass

S. uniplumis (Licht. ex Roem. & Schult.) De Winter (*Aristida papposa* Trin. & Rupr.; *Aristida uniplumis* Licht.; *Aristida uniplumis* Licht. ex Roem. & Schult.; *Arthratherum uniplume* (Licht. ex Roem. & Schult.) Nees; *Stipagrostis papposa* (Trin. & Rupr.) De Winter)

Tropical and South Africa, Arabia, India, Pakistan. Perennial, often short-lived, densely tufted, clumps forming, knotty rootstock, internodes glabrous, leaf blades finely acuminate, loosely contracted panicle, glumes unequal 3-nerved, finely tuberculate lemma, awn branching-point, central awn plumose, lateral awns glabrous, callus bearded, hairy seeds, grazed by cattle, useful for erosion control, growing on sandy soils, arid areas, *Acacia* bushland, open grasslands, riverbanks, semidesert scrub, see *Systema Vegetabilium* 2: 401. 1817, *Florae Africae Australioris Illustrationes Monographicae* 181. 1841, *Species Graminum Stipaceorum* 173. 1842 and *Meded. Rijks-Herb.* 54(A): 422. 1927, *Kirkia* 3: 135-136. 1963.

in Niger: awkaras, okaras, taerhaemut

S. uniplumis (Licht. ex Roem. & Schult.) De Winter var. *intermedia* (Schweick.) De Winter (*Aristida gracilior* Pilg. var. *intermedia* Schweick.; *Aristida uniplumis* Licht. ex Roem. & Schult.)

South Africa, southwest Africa, Namibia. Annual, tufted, leaves basal, inflorescence branches flexuous, glumes hairy, central awn plumose, sandy and gravel plains, depressions, seasonally flooded areas, see *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 40: 80. 1907, *Bothalia* 4: 124. 1941.

S. uniplumis (Licht. ex Roem. & Schult.) De Winter var. *neesii* (Trin. & Rupr.) De Winter (*Aristida uniplumis* Licht. ex Roem. & Schult.; *Aristida uniplumis* var. *neesii* Trin. & Rupr.)

South Africa. Perennial, erect, tufted, rhizomatous with branched rhizomes, leaves mostly basal, narrow inflorescence few-spikeleted, glumes glabrous, central awn plumose, pasture, useful for erosion control, gravel or sandy soils, rocky surfaces, see *Species Graminum Stipaceorum* 173. 1842.

S. uniplumis (Licht. ex Roem. & Schult.) De Winter var. *uniplumis* (*Aristida uniplumis* Licht. ex Roem. & Schult.; *Aristida uniplumis* var. *pearsonii* Henr.; *Aristida uniplumis* var. *uniplumis*)

South Africa, Angola, Kenya, Tanzania, Namibia, Uganda. Weak perennial or annual, erect to geniculate, tufted to densely tufted, culms simple or branching above, leaves mostly basal, sheath round, ligule a fringe of whitish hairs, leaf blade usually rolled, open to slightly contracted panicle, panicles open at maturity, spikelets 3-awned, central awn plumose, a tuft of stiff hairs at the base of the 3 awns, lateral awns inconspicuous, pasture grass, more or less palatable, palatability varies on different soils and in different seasons, common in sandy soils, disturbed and undisturbed areas, floodplains, along roadsides, see *Mededeelingen van's Rijks-Herbarium* 54(B): 647. 1928.

in English: bushman grass, silky bushman grass

in South Africa: beesgras, blinksaadgras, blinkblaarboesmangras, blink(h)aarboesmangras, einfederiges federgras

in southwest Africa: blinkhaar-federgras

S. vulnerans (Trin. & Rupr.) De Winter (*Aristida vulnerans* Trin. & Rupr.)

Africa. Leaf blades pungent, see *Species Graminum Stipaceorum* 175-176. 1842 and *Kirkia* 3: 136. 1963.

S. xylosa Cope

Somalia. Perennial, woody at the base, loosely tufted, branched, leaves mainly basal, internodes glabrous, panicle contracted, glumes unequal, lemma smooth, central awn plumose, lateral awns glabrous, on stony areas, plains, see *Kew Bulletin* 47(4): 655-664. 1992.

in Somalia: laah, hada', hadaf

S. zeyheri (Nees) De Winter (*Aristida capensis* var. *zeyheri* (Nees) Trin. & Rupr.; *Aristida capensis* var. *zeyheri* (Nees) Walp.; *Aristida zeyheri* (Nees) Steud.; *Arthratherum zeyheri* Nees) (for the German (b. Hesse) botanist and botanical collector Carl (Karl) Ludwig Philipp Zeyher, 1799-1858 (Cape Town, died of smallpox), traveler with Franz Wilhelm Sieber (1789-1844), with Christian Friedrich Ecklon (1795-1868) published *Enumeratio plantarum Africae Australis* 1835-1837, collected in South Africa with John Burke, from 1849 botanist at the Botanical Garden at the Cape; see William Jackson Hooker (1785-1865), *London J. Bot.* 2: 163-165. 1843, 5: 242. 1846; *Kew J. Bot.* 2: 61-62. 1850; Gordon Douglas Rowley, *A History of Succulent Plants*. 1997; *Catalogue of the Books, Manuscripts, Maps and Drawings in the British Museum (Natural History)*. 2: 504

and 5: 2389. Weinheim 1964; Mary Gunn and Leslie E. Codd, *Botanical Exploration of Southern Africa*. 383-387, 388-395. Cape Town 1981; J.H. Barnhart, *Biographical notes upon botanists*. 3: 540. 1965; C.F. Ecklon, "Nachricht über die von Ecklon und Zeyher unternommenen Reisen und deren Ausbeute in botanischer Hinsicht." *Linnaea*. 8: 390-400. 1833; Karl Boriwog Presl (1794-1852), *Botanische Bemerkungen*. Prague 1844; H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. Oxford 1964; Antoine Lasègue (1793-1873), *Musée botanique de M. Benjamin Delessert*. Paris, Leipzig 1845; Ethelyn (Daliaette) Maria Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993; Stafleu and Cowan, *Taxonomic literature*. 7: 534-535. Utrecht 1988)

South Africa. See *Prodromus Plantarum Capensium*, ... 19. 1794, *Nomenclator Botanicus* edition 2 1: 132. 1840, *Florae Africae Australioris Illustrationes Monographicae* 177. 1841, *Species Graminum Stipaceorum* 179. 1842, *Annales Botanicae Systematicae* 3: 751. 1853 and *Kirkia* 3: 136. 1963.

S. zeyheri (Nees) De Winter subsp. *barbata* (Stapf) De Winter (*Aristida capensis* var. *barbata* Stapf)

South Africa. Perennial, robust, stout, erect, tufted, rhizomatous with knotty rhizomes, leaves flaccid, inflorescence contracted and dense, glumes glabrous, all 3 awns plumose, growing on disturbed sites, along roadsides, coastal dunes, see *Flora Capensis* 7: 565-566. 1899 and *Kirkia* 3: 136. 1963.

in English: Cape bushman grass

S. zeyheri (Nees) De Winter subsp. *macropus* (Nees) De Winter (*Aristida capensis* Thunb.; *Aristida capensis* var. *genuina* Henrard; *Aristida capensis* var. *macropus* (Nees) Trin. & Rupr.; *Arthratherum capense* (Thunb.) Nees; *Arthratherum capense* var. *macropus* Nees)

South Africa. Perennial, robust, shortly rhizomatous, leaves basal, open inflorescence, spikelets terminal, dark glumes, all 3 awns plumose, found in sandy soils, abandoned lands, see *Prodromus Plantarum Capensium*, ... 19. 1794, *Linnaea* 7(3): 288. 1832, *Florae Africae Australioris Illustrationes Monographicae* 1: 176. 1841, *Species Graminum Stipaceorum* 179. 1842 and *Mededeelingen van's Rijks-Herbarium* 54: 77. 1926, *Kirkia* 3: 136. 1963.

in English: bushman grass

S. zeyheri (Nees) De Winter subsp. *sericans* (Hack.) De Winter (*Aristida capensis* var. *dieterleniana* Schweick.; *Aristida sericans* Hack.)

South Africa. Perennial, densely tufted, robust, erect, hard, leaf blade rolled, ligule a fringe of hairs, hard leaves, narrow contracted panicle few-spikeleted, 3 awns persistent shortly plumose, sharp grain can cause severe irritation in the animal's mouth, low or unknown grazing value, used for making soft brooms, usually on rocky and stony places, low lying areas, grassland, disturbed lands, uncultivated areas, old lands, savannah, in sandy soils of rocky areas, see *Bulletin de l'Herbier Boissier* 3(8): 381. 1895 and *Meded. Rijks-Herb.* 54(A): 556. 1927, *Bulletin of Miscellaneous Information Kew* 1939: 653. 1939, *Kirkia* 3: 136. 1963.

in English: Cape Bushman grass

in southern Africa: drieveerboesmangras, lefielo

S. zeyheri (Nees) De Winter subsp. *zeyheri* (*Aristida capensis* var. *canescens* Trin. & Rupr.; *Aristida zeyheri* (Nees) Steud.; *Arthratherum zeyheri* Nees)

South Africa. Perennial, robust, erect, tufted, rhizomatous, knotty rhizomes, leaves rigid, open inflorescence divaricate, glabrous glumes, all 3 awns plumose, usually on rocky and stony places, sandy slopes, disturbed lands, uncultivated areas, old lands, on sandy soils, see *Species Graminum Stipaceorum* 178-179. 1842.

in southern Africa: blinkaargras; bohlanya-ba-pere (Sotho)

Stipavena Vierh. = *Helictotrichon* Besser, *Helictotrichon* Besser ex Schult. & Schult.f., *Helictotrichon* Schult.

Greek *stipe* "tow," *Stipa* plus *Avena*.

Pooideae, Poodae, Aveneae, or Pooideae, Poeae, Aveninae, see *Verhandlungen der kaiserlich-königlichen zoologisch-botanischen Gesellschaft in Wien* 56: 369. 1906, *Feddes Repertorium* 45: 7. 1938, *Contributions from the United States National Herbarium* 48: 382-383, 650. 2003.

x Stiporyzopsis B.L. Johnson & Rogler

Oryzopsis x *Stipa*.

See *American Journal of Botany* 30: 55. 1943, *Genera Graminum* 375. 1986.

Streblochaete Hochst. ex Pilger = *Koordersiochloa* Merr., *Lycochloa* Samuelsson, *Pseudostreptogyne* A. Camus, *Streblochaete* Hochst.

From the Greek *streblos* "twisted, crooked" and *chaite* "a bristle."

A single species, tropical Africa, Southeast Asia, Java, Indonesia, the Philippines. Pooideae, Poodae, Meliceae,

perennial, herbaceous, unbranched, tufted, leaf blades broadly linear, auricles absent, sheaths margins joined, ligule a short unfringed membrane, plants bisexual, open and narrow inflorescence paniculate with filiform branches, panicle more or less 1-sided and drooping, narrow linear spikelets pedicellate 2-6-several-flowered, lower florets usually bisexual, uppermost floret male or greatly reduced, 2 membranous glumes very unequal to unequal, lower glume 1-5-nerved, upper glume 5-7-nerved, lemmas herbaceous 7-nerved, tangled awns, median awn geniculate and filiform, callus linear pungent, palea present, 2 minute lodicules free and membranous, 3 stamens, ovary glabrous, 2 stigmas, shade species, open places, forest floors, montane, type *Streblochaete nutans* Hochst. ex A. Rich., see *Species Plantarum* 1: 76-78. 1753, *Flore Française. Troisième Édition* 3: 32. 1805, *Syn. Pl.* 1: 97. 1805, *Tentamen Florae Abyssinicae* 1850 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 37: (Beibl. 85) 61. 1906, *Philipp. J. Sci., Bot.* 12: 67. 1917, *Bulletin de la Société Botanique de France* 77: 476. 1930, *Arkiv för Botanik utgivet av K. Svenska Vetenskapsakademien* 25(8): 4. 1933, *Bot. Mag. (Tokyo)* 78: 289-293. 1965, *Genera Graminum* 69, 115. 1986, C. Hsiao, N.J. Chatterton, K.H. Asay and K.B. Jensen, "Molecular phylogeny of the Pooideae (Poaceae) based on nuclear rDNA (*ITS*) sequences." *Theoretical and Applied Genetics* 90: 389-398. 1995, P. Catalán, E.A. Kellogg and R.G. Olmstead, "Phylogeny of Poaceae subfamily Pooideae based on chloroplast *ndhF* gene sequences." *Molecular Phylogenetics and Evolution* 8: 150-166. 1997, R.J. Soreng and J.I. Davis, "Phylogenetics and character evolution in the grass family (Poaceae): simultaneous analysis of morphological and chloroplast DNA restriction site characters." *Botanical Review* 64: 1-85. 1998.

Species

S. longiarista (A. Rich.) Pilg. (sometimes spelled ***longiaristatum***) (*Bromus trichopodus* A. Rich.; *Danthonia longearistata* Engl.; *Danthonia longiaristata* (A. Rich.) Engl.; *Danthonia streblochaeta* Steud.; *Streblochaete nutans* Pilg.; *Streblochaete nutans* Hochst. ex A. Rich.; *Trisetum longiaristatum* A. Rich.)

Eastern Cape, Tanzania, South Africa, Asia. Perennial, loosely tufted, slender, erect or ascending, leaf blades sharply acute, panicle nodding, bunches of disarticulated florets, glumes acute, lemma with as filiform awn coiling and entangled with its neighbours, floret callus pubescent to densely hispid, found in mountain forests, shade, uplands, see *Tentamen Florae Abyssinicae* ... 2: 417. 1850, *Synopsis Plantarum Glumacearum* 1: 245. 1854, *Abhandlungen der Preussischen Akademie der Wissenschaften. Physikalisch-mathematische Klasse* 2: 130. 1891 and *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 9: 516. 1926.

Strephium Schrader ex Nees = *Raddia* Bertol.

From the Greek *strepho*, *strephein* "to twist."

Bambusoideae, Olyreae, Olyrinae, type *Strephium distichophyllum* Schrad. ex Nees, see *Opuscoli Scientifici* 3: 410. 1819, *Flora Brasiliensis seu Enumeratio Plantarum in Brasilia* ... 2: 298-299. Stuttgartiae et Tubingae 1829-1833, *Bulletin de la Société Botanique de France* 7: 470. 1860, *Catalogus plantarum cubensium* ... 231. 1866, *Anales de la Academia de Ciencias Medicas* ... 8: 202. 1871, *Bulletin de la Société Botanique de Belgique* 15(3): 465. 1876 and *Manual of the Grasses of the West Indies* 373. 1936, *Contributions from the United States National Herbarium* 39: 107-108, 113. 2000.

Streptachne R. Br. = *Aristida* L., *Streptachne* Kunth

From the Greek *streptos* "twisted" and *achne* "chaff, glume."

Aristidoideae, Aristideae, type *Streptachne stipoides* R. Br., see *Species Plantarum* 1: 82. 1753, *Prodromus Florae Novae Hollandiae* 174. 1810, *Nova Genera et Species Plantarum* 1: 124, t. 40. 1815 [1816] and *Meded. Rijks.-Herb.* 54: 9. 1926, Valdés R., J. & K.W. Allred, "El género *Aristida* (Gramineae) en el nordeste de México." *Acta Botánica Mexicana* 63: 1-45. 2003, *Contributions from the United States National Herbarium* 46: 69-104, 609-610. 2003.

Streptia Döll = *Streptogyna* P. Beauv.

From the Greek *streptos* "twisted."

Ehrhartoideae, Streptogyneae, see *Essai d'une Nouvelle Agrostographie* 80, t. 16, f. 8. 1812, *Flora Brasiliensis* 2(3): 171. 1880 and *Contributions from the United States National Herbarium* 39: 113, 114. 2000.

Streptochoeta Schrader ex Nees = *Lepideilema* Trin., *Streptochoeta* Schrader

From the Greek *streptos* "twisted" and *chaite* "a bristle."

Three species, New World tropics, Mexico to Argentina, Brazil. Bambusoideae, Bambusodae, Streptochoeteae, or Anomochloideae, Streptochoeteae, perennial, sympodial, usually unbranched, woody or herbaceous, persistent, unarmed, rhizomatous, flowering culms leafy, veins of leaf blades completely parallel, auricles present and inconspicuous, ligule a fringe of hairs or absent, leaves spirally arranged, rhizomes pachymorph, plants bisexual, inflorescence terminal and spicate to spicate-racemose, pseudospikelets spirally arranged and 1-flowered, 11 or 12

glumes or bracts present, bracts 1-5 dentate spirally arranged, bract 6 a very long coiled awn, bracts 7-8 side by side lanceolate tough acuminate with reflexed hooked tips, bracts 9-11 whorled, lemma absent, palea and lodicules absent, 6 stamens monadelphous, ovary glabrous, 3 stigmas, seeds with hooklike bracts, shade species, lowlands, forest floor, forest shade, vegetatively resembling *Pharus*, type *Streptochaeta spicata* Schrad. ex Nees, see *Flora Brasiliensis seu Enumeratio Plantarum in Brasilia ... 2*: 536-537. 1829-1833, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 1(1): 93. 1830, *Linnaea* 9: 467. 1835, John Lindley, 1799-1865, *A Natural System of Botany* edition 2: 378. in grasses (Poaceae)." *Molecular Ecology Notes* 4(2): 262-264. June 2004.

Species

S. angustifolia Soderstr.

Brazil. See *Annals of the Missouri Botanical Garden* 68(1): 30, f. 5-6. 1981.

S. sodiroana Hack. (*Streptochaeta sodiroana* Hack. ex Sodiro) (after the Italian botanist Luigi [later Padre Aloisio, S.J.] Sodiro, 1836-1909, clergyman, 1870 to Ecuador, professor of botany, botanical explorer, author of *Cryptogamae Vasculares Quitenses*. Quito 1893 and *Gramineas ecuatorianas de la provincia de Quito*. [Anales Universidad Quito] 1889. See J.H. Barnhart, *Biographical notes upon botanists*. 3: 299. 1965; Staffeu and Cowan, *Taxonomic literature*. 5: 713-717. 1985; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 375. 1972; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933; S. Lenley et al., *Catalog of the manuscript and archival collections and index to the correspondence of John Torrey*. Library of the New York Botanical Garden. 379. 1973; H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 246. Oxford 1964; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993; Dan Henry Nicolson, *Publications on Araceae* by Luis later Padre Aloisio Sodiro, draft by D. Nicolson. 1976)

Ecuador, Guatemala, Mexico, Venezuela, Belize. Tufted, herbaceous, erect, shortly rhizomatous, spicate inflorescence slightly flexuous, anthers and styles exerted, growing in small clumps, found in forest, understory, shade, in understory of deep forest, in disturbed site along trail, on terrace along river and streams, along trail on ridge in forest, see *Österreichische Botanische Zeitschrift* 40: 113. 1890, *Anales de la Universidad Central del Ecuador* 3(25): 478. 1889 and *Brittonia* 23(3): 293-324. 1971.

in Costa Rica: pega-pega

S. spicata Schrad. ex Nees (*Lepideilema lancifolium* Trin.; *Streptochaeta spicata* subsp. *ecuatoriana* Judz. & Soderstr.; *Streptochaeta spicata* Schrad. ex Nees subsp. *spicata*)

Guatemala to Brazil, Ecuador, southern Mexico to northern Argentina, the Caribbean. Perennial, terrestrial, herbaceous, sparsely branched, glabrous leaf blades lanceolate to oblong-lanceolate, narrow elongate inflorescence villous, spikelets appressed 7- to 11-flowered, lowest bract may be ciliolate, lemma long-awned, awn spirally twisted at the tip, barbed fruit, common in understory on slopes in secondary woods, along riverbanks, rocky woods, rocky slopes, moist forests, forest shade, disturbed forest, similar to *Pharus latifolius* L., see *Flora Brasiliensis seu Enumeratio Plantarum* 2: 537. 1829, *Mémoires de l'Académie Impériale des*

Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles 1(1): 93. 1830 and *Smithsonian Contributions to Botany* 68: 39. 1989, *Systematic Botany* 18(1): 80-99. 1993.

S. spicata Schrad. ex Nees subsp. *ecuatoriana* Judz. & Soderstr. (*Streptochaeta spicata* Schrad. ex Nees)

Ecuador. See *Smithsonian Contributions to Botany* 68: 39. 1989.

S. spicata Schrad. ex Nees subsp. *spicata* (*Lepideilema lancifolium* Trin.; *Streptochaeta spicata* Schrad. ex Nees)

Belize, Colombia, Honduras, Venezuela. See *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 1(1): 93. 1830.

Streptogyna P. Beauv. = *Streptia* Döll

From the Greek *streptos* “twisted” and *gyne* “female, ovary,” referring to the nature of the ovary.

Two species, tropical Africa, southern India and Sri Lanka, Mexico to Brazil, Central and South America. Bambusoideae, Bambusodae, Streptogyneae, or Ehrhartoideae, Streptogyneae, perennial, herbaceous, solid, spreading, unarmed, unbranched, tufted to stoloniferous, rhizomes pachymorph, flowering culms leafy, leaf sheaths strongly ribbed, auricles absent or present, short external membranous ligule, leaf blades linear to lanceolate, plants bisexual, inflorescence a single erect 1-sided raceme or a terminal spike-like panicle, 4-7-many-flowered spikelets shortly pedicellate, lower florets hermaphrodite and the upper ones sterile, the rachilla segment at the base of each floret forms a little hook, bunches of disarticulated florets dangling, 2 persistent membranous glumes very unequal, upper glume 7- to 17-nerved, lemma coriaceous 7- to 13-nerved with a straight awn, awns strongly barbed to scabrid, palea present, 3 lodicules free and membranous, stamens 2, ovary glabrous or hairy, 2 or 3 coiled tangled stigmas, shade species, clearings, forest floor, forest shade, dry forests, wet tropical forests, tropical rain forest understory, very similar to *Streptochaeta*, type *Streptogyna crinita* P. Beauv., see *Essai d'une Nouvelle Agrostographie* 80, t. 16, f. 8. 1812, *Flora Brasiliensis* 2(3): 171. 1880 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 76: 311. 1954, *J. Jap. Bot.* 33: 364-366. 1958, *Nature* 182: 1619-1620. 1958, *Bulletin de la Société Botanique de France* 118: 657. 1973, *Smithsonian Contributions to Botany* 44: 18. 1980, *Fieldiana, Botany, New Series* 4: 1-608. 1980, *Genera Graminum* 69. 1986, *Annals of the Missouri Botanical Garden* 74(4): 871-888. 1987, *Smithsonian Contributions to Botany* 65: 1-27. 1987, *Flora of the Guianas. Series A, Phanerogams* 622-625. 1990, *Ruizia* 13: 1-480. 1993, *Flora Mesoamericana* 6: 220. 1994, *Am. J. Bot.* 87: 96-107. 2000, *American Bamboos* 6, 49, 122, 126,

131-132. 2000, *Contributions from the United States National Herbarium* 39: 113, 114. 2000.

Species

S. americana C.E. Hubb.

Mexico to Bolivia. Perennial, herbaceous, terrestrial, tufted, shortly rhizomatous, scaly rhizomes lacking, well-defined outer ligule, leaves mostly basal, auricles absent, sheaths glabrous and hispid, leaf blades linear flat glabrous acuminate, inflorescence softly arching, spikelets 4- to 6-flowered, lemmas forming a tangled mass at maturity, 3 scaberulous stigmas, forming small clumps, understory, moist forests, along trails, forest floor, under trees, rainforest, between ridges, in shade of secondary forest, see *Fl. Suriname* 1(1): 287. 1943, *Bull. Torrey Bot. Club* 75: 81. 1948, *Fl. Guy. Franç.* 1: 88. 1955, *Hooker's Icones Plantarum* 36(6): t. 3572. 1956.

S. crinita P. Beauv. (*Streptogyna gerontogaea* Hook.f.)

India, Sri Lanka, Kenya, Uganda, Zaire, Central African Republic. Perennial, erect, herbaceous, unbranched, spreading, scaly rhizomes, leaf blades narrowly elliptic acuminate, inflorescence racemiform stiffly erect with several overlapping spikelets 5- to 7-flowered, lemmas linear-oblong, strongly barbed awns, callus bearded, 2 stamens, ovary villous, 2 long-exserted spinulose stigmas coiled and tangled at maturity, medicinal use, noxious pest, infusion used as enema for women's stomach ache, found along roadsides and footpaths, moist lowland forests, clearings, swampy places, forest floors, forest undergrowth, cultivated fields, light shade, see *Essai d'une Nouvelle Agrostographie* 80, t. 16, f. 8. 1812, *Enum. Pl. Zeyl.* 374. 1864 and *A Handbook to the Flora of Ceylon* 5: 301. 1900, *Grasses of Burma* ... 649. 1960.

in Congo: mana mango, manamango

in Ghana: detshenga, etwà, kyeretwè, wondu wondu

in Ivory Coast: atierfos, dontré, kpa mussé, kwamossé, kwamurè, pamussè, yoè

in Liberia: giekia ku, giekiaaku, jekiaku

in Nigeria: ako ozo

in Senegal: damordegad, damor degad, emokok

in Sierra Leone: buragai, dilag boinyondo, esul, kaiyowo, kasarek, kayowo, kongengi, malomboenda, naganaga, naganage, nanaka, nanana, sibile, sibire, tuabiya, yoyavi

in Yoruba: apala odo

Streptolophus D.K. Hughes

From the Greek *streptos* “twisted” and *lophos* “a crest.”

One species, West tropical Africa. Panicoideae, Panicoideae, Paniceae, annual, erect to decumbent, herbaceous, branched, leaf blades pseudopetiolate, ligule a fringed

membrane, plants bisexual, inflorescence spicate, rhachis of primary branches not foliaceous, spikelets with involucres of spinescent bristles, 2 small glumes unequal or subequal, lower glume nerveless, upper glume 3-nerved, palea 2-nerved, 2 lodicules, 3 stamens, ovary glabrous, 2 stigmas, type *Streptolophus sagittifolius* Hughes, see *Bulletin of Miscellaneous Information Kew* 1923(5): 177-180. 1923.

Species

S. sagittifolius Hughes

Angola. Rambling, leaf blades sagittate, spikelets compressed dorsiventrally, in thicket, see *Bulletin of Miscellaneous Information Kew* 1923(5): 178. 1923.

Streptostachys Desv.

From the Greek *streptos* plus *stachys* "ear of corn, spike."

About 3-5 species, tropical America, Brazil to Paraguay, Venezuela. Panicoideae, Paniceae, Paspalinae, or Panicoideae, Panicoideae, Paniceae, perennial, tufted, herbaceous, hollow, decumbent, erect or geniculately ascending, shortly rhizomatous, auricles absent, ligule ciliate or absent, leaves more or less clasping the culm at the base, plants bisexual, hidden cleistogenes absent, large inflorescences with stiff branches ascending to divergent, panicle sparsely branched, spikelets narrowly oblong solitary or paired, lower floret usually sterile or male, upper floret hermaphrodite pubescent, 2 ovate awnless glumes unequal or subequal, lower glume 1- to 7-nerved, base of the lower glume thickened, upper glume 5-7-nerved, lower lemma coriaceous, palea absent or rudimentary, 2 fleshy lodicules, 3 stamens, ovary glabrous, savannahs, lowland savannahs, edges of savannahs, cerrados, under shrubs, a segregate from *Panicum*, type *Streptostachys asperifolia* Desv., see *Species Plantarum* 1: 55. 1753, *Nouveau Bulletin des Sciences, publié par la Société Philomatique de Paris*, sér. 2, 2: 190. 1810, *Prodromus Florae Novae Hollandiae* 196. 1810, *Essai d'une Nouvelle Agrostographie* 50, t. 10, f. 11. 1812 and G. Davidse & R.W. Pohl, "Chromosome numbers of tropical American grasses (Gramineae)." *Annals of the Missouri Botanical Garden* 65: 637. 1978, *Kew Bulletin* 39(1): 182. 1984, *Smithsonian Contributions to Botany* 59: 1-63. 1985, *Flora of the Guianas. Series A, Phanerogams* 625-628. 1990, O. Morrone and F.O. Zuloaga, "Revisión del género *Streptostachys* (Poaceae: Panicoideae: Paniceae), su posición sistemática dentro de la tribu Paniceae." *Annals of the Missouri Botanical Garden* 78(2): 359-376. 1991, Morrone O., J.H. Hunziker, F.O. Zuloaga and A. Escobar, "Números cromosómicos en Paniceae sudamericanas (Poaceae: Panicoideae)." *Darwiniana* 3(1-4): 53-60. 1995, Zuloaga F.O., O. Morrone and L.M. Giussani, "A cladistic analysis of the Paniceae: a preliminary approach." In S.W.L. Jacobs and J.E. Everett [editors], *Grasses: Systematics and Evolution*, 123-135. CSIRO Publishing, Collingwood,

Victoria, Australia 2000, *Am. J. Bot.* 88: 1993-2012. 2001, *Am. J. Bot.* 90: 796-821. 2003, *Contributions from the United States National Herbarium* 46: 610. 2003.

Species

S. asperifolia Desv. (*Isachne streptostachys* Nees ex Steud.; *Panicum asperifolium* (Desv.) Hitchc.; *Panicum balanites* Trin.; *Panicum hirsutum* (P. Beauv.) Raspail, nom. illeg., non *Panicum hirsutum* Sw.; *Panicum perfoliatum* Nees; *Panicum streptostachys* Spreng.; *Panicum streptostachys* f. *paleacea* Döll; *Panicum vaginaeflorum* Steud.; *Streptostachys hirsuta* P. Beauv.)

South America, Trinidad to Brazil. Perennial or annual, erect, decumbent, loosely tufted, clumped, sparsely branched, rooting at the nodes, ligules absent, leaf blades broadly lanceolate acute to acuminate, panicle obovate or oblong with spreading or ascending branches, spikelets paired, lower glume ovate-oblong 5-nerved clasping the base of the spikelet, upper glume ovate 5-nerved, upper lemma and palea shiny, in forest, forest shade, cerrado, forest edges, savannahs, woods, see *Essai d'une Nouvelle Agrostographie* 50, t. 10, f. 11. 1812, *Annales des Sciences Naturelles (Paris)* 1 5: 299. 1825, *Systema Vegetabilium, editio decima sexta* 2: 316. 1825, *Flora Brasiliensis seu Enumeratio Plantarum* 2(1): 142-143. 1829, *Linnaea* 10(3): 297. 1836, *Synopsis Plantarum Glumacearum* 1: 79-80. 1853[1854], *Flora Brasiliensis* 2(2): 231. 1877 and *Contributions from the United States National Herbarium* 22(6): 489. 1922, *Fl. Guy. Franç.* 1: 137. 1955, *Fl. Suriname, Add. & Corr.* 1(2): 367. 1968.

S. macrantha (Trin.) Zuloaga & Soderstr. (*Panicum macranthum* Trin.; *Panicum mirabile* Mez; *Panicum vaginatum* Nees)

Brazil. Small spikelets, see *De Graminibus Paniceis* 209. 1826, *Flora Brasiliensis seu Enumeratio Plantarum* 2(1): 156-157. 1829 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 56(Beibl. 125): 2. 1921, *Smithsonian Contributions to Botany* 59: 50. 1985.

S. ramosa Zuloaga & Soderstr. (*Panicum macranthum* Trin.)

Brazil. Perennial, rhizomatous, leaf blades linear and pungent, tough leaf blades linear pungent, stout densely pubescent rhizomes, panicle ovate-oblong, racemes long and flexuous, solitary oblong spikelets, pedicels short and swollen at the tip, lower glume broadly ovate 1-nerved, upper glume 5-nerved, lower lemma 5-nerved, upper lemma and palea coriaceous, growing in grasslands, cerrado, resembles *Streptostachys macrantha*, see *De Graminibus Paniceis* 209. 1826 and *Smithsonian Contributions to Botany* 59: 52-55, f. 21-22. 1985.

S. rigidifolia Filg., Morrone & Zuloaga

South America. See *Novon* 3(3): 252, f. 1-3. 1993.

S. robusta Renvoize

South America, Brazil. Perennial, dark nodes, leaf blades lanceolate flat acute, leaves cordate at the base, stiff ascending racemes, spikelets narrowly ovate arranged in pairs, lower glume absent, upper glume 5-nerved, lower lemma 7-nerved, forest shade, white sandy soils, see *Kew Bulletin* 39(1): 182. 1984.

Strombodurus Steud. = *Bouteloua* Lag.,
Pentarrhaphis Kunth

Greek *strombos* “a spinning-top, turban.”

Chloridoideae, Cynodonteae, Boutelouinae, see *Varietades de Ciencias, Literatura y Artes* 2(4,21): 134, 141. 1805, *Nova Genera et Species Plantarum* 1: 177-178, t. 60. 1815 [1816], *Nomenclator Botanicus. Editio secunda* 2: 299. 1841 and *Contributions from the United States National Herbarium* 41: 20-33, 181, 220. 2001.

Stupa Asch. = *Stipa* L.

Orth. var., Greek *stype*, *styppe* “tow,” Latin *stuppa*, *stupa* “tow, oakum, hards,” see *Flora der Provinz Brandenburg* 1: 812. 1864.

Sturmia Hoppe = *Mibora* Adans., *Sturmia*
C.F. Gaertn. (Rubiaceae), *Sturmia* Rchb.
(Orchidaceae)

Dedicated to the German engraver Jacob (Jakob) Sturm, 1771-1848, botanical artist, naturalist, among his works *Catalog der Kaefer-Sammlung von J.S. Nürnberg* 1843, *Catalog meiner Insecten-Sammlung*. Nürnberg 1826, *Deutschlands Fauna*. Nürnberg 1805 and *Icones Coleopterorum Germaniae*. Berlin 1877, he was the son of the Nürnberg engraver Johann Georg Sturm; see J.H. Barnhart, *Biographical notes upon botanists*. 3: 343. 1965; *Deutschlands Flora*. Nürnberg [1796-] 1798-1862; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 387. 1972; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933; Günther Schmid, *Chamisso als Naturforscher. Eine Bibliographie*. Leipzig 1942; Stafleu and Cowan, *Taxonomic literature*. 6: 65-72. Utrecht 1986.

Pooideae, Poeae, Miliinae, type *Sturmia minima* (L.) Hoppe, see *Species Plantarum* 63. 1753, *Familles des Plantes* 2: 495. 1763, *Primitiae Florae Werthemensis* 126. 1799, *Flora Britannica* 3: 1387. 1804, *Syn. Pl.* 1: 76. 1805, *De Fructibus et Seminibus Plantarum...* 3: t. 192, f. 3. 1805, *Essai d'une Nouvelle Agrostographie* 167, pl. 8, f. 4. 1812, *Observations sur les Plantes des Environs d'Angers* 45.

1818, *Fundamenta Agrostographiae* 114, t. 8, f. 4. 1820, *Species Graminum* 1: t. 17. 1824 and *Annuario da Academia Polytechnica do Porto* 14: 145. 1921, *Preslia* 46(2): 168. 1974, *Boletim da Sociedade Broteriana, ser. 2* 63: 153-205. 1990, *Contributions from the United States National Herbarium* 48: 450, 651. 2003.

Stylagrostis Mez = *Calamagrostis* Adans.

Greek *stylos* “a column” and *agrostis*, *agrostidos* “grass, weed, couch grass.”

Pooideae, Poeae, Agrostidinae, type *Stylagrostis ovata* (J. Presl) Mez, see *Familles des Plantes* 2: 31, 530. 1763, *Tentamen Florae Germanicae* 1: 34. 1788, *Essai d'une Nouvelle Agrostographie* 43. 1812, *Reliquiae Haenkeanae* 1(4-5): 246. 1830 and *Botanisches Archiv* 1(1): 20. 1922, *Revision der Gattung Deyeuxia in Bolivien*. 56. Berlin 1995, *Phytologia* 65(5): 337-347. 1988, *Contributions from the United States National Herbarium* 48: 191-227, 651-652. 2003.

Styppeiochloa De Winter = *Crinipes*
Hochst.

From the Greek *styppeion* “hemp, tow” and *chloe*, *chloa* “grass,” alluding to tough and fibrous basal sheaths.

Two species, south and southeastern tropical Africa, Madagascar. Arundinoideae, Danthonieae, perennial, herbaceous, unbranched, wiry, unarmed, densely tufted, mat-forming, fibrous basal sheaths, nodes hidden at the base, auricles absent, ligule a fringe of hairs, filiform leaf blades stiff pungent, plants bisexual, contracted inflorescence paniculate, spikelets pedicellate 2- to 5-flowered, uppermost floret underdeveloped or reduced, 2 glumes unequal, lower glume 1-nerved, upper glume 1- to 3-nerved, lemmas membranous bidentate shortly awned, central awn straight, palea nerved and keeled, 2 small glabrous lodicules, stamens 3, ovary glabrous, 2 stigmas, open habitats, mountains, related to *Zenkeria*, type *Styppeiochloa gynoglossa* (Gooss.) De Winter, see *Flora* 38: 279-280. 1855, *Bulletin of the Torrey Botanical Club* 14: 133. 1887 and *Bothalia* 9: 134. 1966, *Kew Bulletin* 58(3): 739-741. 2003.

Species

S. gynoglossa (Gooss.) De Winter (*Crinipes gynoglossa* Gooss.)

Tropical Africa, South Africa. Perennial, tufted, fibrous base, uppermost floret sterile or reduced, glumes unequal, lemmas pubescent, awn shorter than lemma, found in rocky places, high altitudes, seepage areas, see *Kew Bulletin* 1934: 200. 1934, *Bothalia* 9: 134. 1966.

S. hitchcockii (A. Camus) Cope (*Redfieldia hitchcockii* A. Camus)

South Africa, Angola. Spikelets 2-flowered, 3-nerved awned lemmas, open areas, see *Bulletin de la Société Botanique de France* 73: 1024. 1926, *Kew Bulletin* 58(3): 741. 2003.

Suardia Schrank = *Melinis* P. Beauv.

For Paulus Suardus [Paolo Suardi], author of *Thesaurus Aromatariorum*. Venetiis 1504 [1506? 1510?].

Panicoideae, Paniceae, Melinidinae, type *Suardia picta* Schrank, see *Essai d'une Nouvelle Agrostographie* 54, t. 11, f. 4. 1812, Franz von Paula von Schrank (1747-1835), *Plantae rariores horti academici monacensis*, descriptae et observationibus illustratae a Francisco de Paula de Schrank, Horti Directore, Academiae regiae Scientiarum membro ordinario. Monachii [Munich/München]: Venditur in Instituto lithographico Scholae festivalis, 1817-1819 [1817-1822] and *Kew Bulletin* 21: 113. 1967, *Biblioth. Bot.* 138: 97, 103. 1988, *Journal of Cytology and Genetics* 25: 140-143. 1990, *Contributions from the United States National Herbarium* 46: 287. 2003.

Sucrea Soderstrom

Named for the Panamanian-Brazilian botanist Benjamin Dimitri Sucre, fl. 1969-1970, horticulturist, botanical collector, author of "Flora do estado da Guanabara: Rubiaceae ii: tribo II - Cinchoneae." *Arquivos do Jardim Bot. do Rio de Janeiro* 17: 25-41. 1959-1961, "Rubiaceae da cidade do Rio de Janeiro I: tribo Spermaceae." *Rodriguésia* v. 21/22, no. 33/34: 241-280. 1959, "Ranunculaceae da cidade do Rio de Janeiro." *Rodriguésia* v. 21/22, no. 33/34: 281-284. 1959, "Nymphaeaceae da cidade do Rio de Janeiro." *Rodriguésia* v. 21/22, no. 33/34: 285-287. 1959, "Estudos das Rubiaceae brasileiras I." *Rodriguésia* v. 23/24, no. 35/36: 11-20. 1960-1961, "Estudo das Rubiaceae brasileiras III: cinco novas espécies da tribo Spermaceae." *Rodriguésia* v. 26, no. 38: 253-260. 1970; see *Rev. Brasil. Biol.* 31: 309-312. 1971, *Anais Soc. Bot. Brasil* 146-164. 1972, *Bradea* 1: 358. 1973, *Atas Soc. Biol. Rio de Janeiro* 16: 59-61. 1973, *Cienc. Cult.* 28: 357-359. 1974, *Rodriguésia* v. 27, no. 39: 225-295. 1974 [*Dorstenia* L. (Moraceae) dos Estados da Guanabara e do Rio de Janeiro.], *Bradea* pp. 473-476. 1975, *Phytologia* 46: 210. 1980, *Bradea* 4: 346. 1987, *Ann. Missouri Bot. Gard.* 75: 1107. 1988, *Darwiniana* 37(1-2): 157. 1999.

About 3 species, eastern Brazil. Bambusoideae, Oryzodae, Olyreae, or Bambusoideae, Olyreae, Olyrinae, perennial, unarmed, erect, herbaceous, unbranched, tufted, rhizomatous, auricles absent, sheaths persistent, ligule present or absent, broad and flat leaf blades pseudopetiolate, plants monoecious, open or spike-like terminal panicle, numerous 1-flowered unisexual spikelets, female spikelets above, male glumeless spikelets below, male florets 3-staminate,

female spikelets with 2 tough glumes subequal and cartilaginous along the margins, hard lemma, palea present, 3 free and fleshy lodicules, 0 stamens, ovary glabrous, 2 stigmas, moist forest, forest shade, secondary forest, slopes, this genus between *Olyra* and *Raddia*, type *Sucrea monophylla* Soderstr., see *Biotropica* 6: 141-153. 1974, *Natl. Geogr. Soc. Research Reports* 12: 647-654. 1980, *Brittonia* 33(2): 198-210. 1981, *American Bamboos* 316-319. 2000, *Contributions from the United States National Herbarium* 39: 114-115. 2000.

Species

S. maculata Soderstr.

Brazil. Forest grass, inflorescence bracts usually reddish, see *Brittonia* 33(2): 205, f. 4, 5. 1981.

S. monophylla Soderstr.

Brazil. Herbaceous, caespitose, sterile culms with a single large leaf, culms in small clumps or colonies, leaves green to glaucous, leaf blades ovate to ovate-oblong, panicle oblong or pyramidal and the lower branches in whorls, basal spikelets reddish, on thickened pedicels female spikelets elliptic to ovate, glumes membranous acuminate, lower glume 5-nerved, upper glume 3-nerved, found in shady places in forests, forest floor, under trees, see *Brittonia* 33(2): 200, f. 1-3. 1981.

S. sampaiana (Hitche.) Soderstr. (*Olyra sampaiana* Hitche.)

Brazil. Tuberos, see *Journal of the Washington Academy of Sciences* 17(9): 215, f. 1. 1927.

Suddia Renvoize

One species, Sudan. Bambusoideae, Oryzodae, Phareae, perennial, herbaceous, unbranched, spongy, rhizomatous, auricles absent, leaf blades sagittate with a false petiole, ligule an unfringed membrane, tough inflorescence paniculate, spikelets 1-flowered, 2 glumes pointed awnless, lower glume 5- to 7-nerved, upper glume 7- to 9-nerved, common in permanently moist and seasonally flooded sites, swamps, type *Suddia sagittifolia* Renvoize, see *Kew Bulletin* 39(3): 455-461. 1984, A.B. Katende, "The diversity of macrophytes in some Kyoga basin lakes and their importance as fish habitats." *African Journal of Ecology* 42(s1): 42-45. Aug 2004, M. Namaganda, S. Phillips and K.A. Lye, "The distribution of grass species in Uganda." *African Journal of Ecology* vol. 42, no. s1, 48-50(3). Aug 2004, M. Behangana, "The diversity and status of amphibians and reptiles in the Kyoga Lake Basin." *African Journal of Ecology* Volume 42, Issue s1: 51-56. Aug 2004.

Species

S. sagittifolia Renvoize

Southern Sudan. Perennial, tall, rhizomatous, in peaty soils, see *Kew Bulletin* 39(3): 455. 1984.

Swallenia Soderstr. & H.F. Decker =
Ectosperma Swallen, *Ectosperma* Vaucher
(Algae)

For the American botanist Jason Richard Swallen, 1903-1991, agrostologist, with USDA Bureau of Plant Industry, among his works are "The grass genus *Schizachne*." *Journal of the Washington Academy of Sciences* 18: 203-206. 1928, "The grass genus *Amphibromus*." *American Journal of Botany* 18: 411-415. 1931, "The grass genus *Gouinia*." *Amer. J. Bot.* 22: 31-41. 1935, "Three new grasses from Mexico and Chile." *J. Wash. Acad. Sci.* 26: 207-209. 1936 and "Gramineae." in *Flora of Panama. Ann. Missouri Bot. Gard.* 30: 104-280. 1943; see J.H. Barnhart, *Biographical notes upon botanists*. 3: 351. Boston 1965; Irving William Knobloch, compil., "A preliminary verified list of plant collectors in Mexico." *Phytologia Memoirs*. VI. 1983; T.W. Bossert, compilation, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 390. 1972; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University. 1917-1933*; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. University of Pennsylvania Press, Philadelphia 1964.

One species, North America, U.S., California. Chloridoideae, Cynodonteae, Monanthochloinae, perennial, erect, caespitose, branching, thick rhizomes, leaf blades pungent, auricles absent, sheaths ciliate to villous, ligule a line of hairs, leaves rigid, nodes more or less woolly, plants bisexual, inflorescence a panicle exerted or partially included in upper sheath, 2 glumes more or less equal and membranous, lower glume 5- to 7-nerved, upper glume 7- to 11-nerved, second glume awnless, lemmas 5- to 7-nerved and chartaceous, palea margins villous, lodicules truncate, 3 stamens, ovary glabrous, 2 stigmas, sand dunes, slopes, type *Swallenia alexandrae* (Swallen) Soderstr. & H.F. Decker, see Jean Pierre Étienne Vaucher, 1763-1841, *Histoire des conferves d'eau douce ...* Genève 1803, *Journal of the Washington Academy of Sciences* 40(1): 19-21. 1950, *Anatomy of the Monocotyledons, I: Gramineae*. 1960, *Recent Advances in Botany* 1: 133-145. 1961, *Madroño* 17(3): 88. 1963 [*Swallenia*, a new name for the California genus *Ectosperma* (Gramineae)], *Fremontia* 7(2): 3-6. 1979, *Inventory of Rare and Endangered Vascular Plants of California*, 3rd edition. 1984, *Oryx* 33(4): 285-293. Oct 1999, *Madroño* 48(3): 152-161. 2001, *Contributions from the United States National Herbarium* 41: 73, 220. 2001.

Species

S. alexandrae (Swallen) Soderstrom & Decker
(*Ectosperma alexandrae* Swallen)

Southeastern California, Mojave Desert. Endangered and rare, perennial, ascending to erect, scaly rhizomes,

clumped, sandbinder, open habitats, see *Journal of the Washington Academy of Sciences* 40(1): 19, f. 1. 1950.

in English: Eureka Valley dune grass

Swallenochloa F.A. McClure = *Chusquea*
Kunth

For the American botanist Jason Richard Swallen, 1903-1991.

About 5-7 species or referred to and included in *Chusquea*, South America, Bolivia, Brazil. Bambusoideae, Bambuseae, Chusqueinae, or Bambusoideae, Bambusodae, Bambuseae, perennial, persistent, woody, shrubby, unarmed, more or less scandent, leafy, hollow internodes, stiffly erect branches, usually 3-5 branches per node, densely clump-forming, rhizomes pachymorph, plants bisexual, inflorescence paniculate, spikelets pedicellate, 2 glumes unequal, palea present, 3 free lodicules, 3 stamens, ovary glabrous, 2 stigmas, dense inflorescences, páramos, high altitude, related to and often in *Chusquea*, type *Swallenochloa subessellata* (Hitchc.) McClure, see *Journal de Physique, de Chimie, d'Histoire Naturelle et des Arts* 95: 151. 1822, *Synopsis Plantarum* 1: 254. 1822, *Agrostografía Brasiliensis sive enumeratio plantarum ad familias naturales graminum et ciperoidarum spectantium, quas in Brasilia ...* 17. Lucca [1823], *Nom. Bot.* edition 2, 2: 168. 1841, *J. Linn. Soc. Bot.* 19: 31. 1881, *Kew Bulletin* 727. 1893 and *Contributions from the Gray Herbarium of Harvard University* 184: 1-223. 1958, *Smithsonian Contributions to Botany* 9: 74-77, 106, 113, f. 43-45. 1973, *Brittonia* 30: 154-164, 297-312. 1978, *Brittonia* 31: 433-445. 1979, *Journal of Bamb. Research* 1: 15-18. 1982, *Gayana, Bot.* 42: 1-157. 1985, *Annals of the Missouri Botanical Garden* 72(4): 864-873. 1985, *Iowa State Journal of Research* 61(1): 99-102. 1986, *Annals of the Missouri Botanical Garden* 74(2): 424-428. 1987, *Grass Systematics and Evolution* 225-238. 1987, *Systematic Botany Monographs* 27: 1-127. 1989 [also Lynn G. Clark, *Systematics of Chusquea section Swallenochloa*, section Verticillatae, section Serpentes, and section Longifoliae (Poaceae-Bambusoideae). Ann Arbor, Mich.: American Society of Plant Taxonomists, 1989], *National Geographic Research* 5: 459-476. 1989, *Systematic Botany* 15(4): 617-634. 1990, *Nordic Journal of Botany* 11: 323-331. 1991, *Annals of the Missouri Botanical Garden* 78(1): 164-171. 1991, *Cuscatlania* 1(6): 1-29. 1991, L.G. Clark, "Chusquea sect. *Swallenochloa* (Poaceae: Bambusoideae) and allies in Brazil." *Brittonia* 44(4): 387-422. 1992, *Novon* 3(3): 228-238. 1993, *Ruizia* 13: 1-480. 1993, *Flora Mesoamericana* 6: 202-210. 1994, *Brittonia* 48(2): 250-262. 1996, *Systematic Botany* 22(2): 219-228. 1997, *The Bamboos* 42-43. 1997, *American Bamboos* 199-223. 2000, *Contributions from the United States National Herbarium* 39: 36-52, 115. 2000, *Am. J. Bot.* 91: 274-284. 2004.

Syllepis Fourn. = *Imperata* Cirillo

Greek *syllepsis* “taking together, conjunction,” or from *syn* “with, together” and *lepis* “scale.”

Panicoideae, Andropogoneae, Saccharinae, type *Syllepis ruprechtii* E. Fourn., see *Nova Genera et Species Plantarum seu Prodromus* 21. 1788, *Plantarum Rariorum Regni Neapolitani* 2: 26-27, t. 11. 1792, *Flora Boreali-Americana* 1: 54. 1803, *Flora Brasiliensis seu Enumeratio Plantarum* 2(1): 315-316. 1829, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 2(3): 331. 1832, *Bulletin de l'Académie Royale des Sciences et Belles-lettres de Bruxelles* 9(2): 245. 1842, *Flora Brasiliensis* 2(3): 251. 1883, *Mexicanas Plantas* 2: 52. 1886 and *Contr. U.S. Natl. Herb.* 28(1): 9. 1929, *Contributions from the United States National Herbarium* 46: 270-273, 610-611. 2003.

Symbasiandra Steud. = *Hilaria* Kunth

Greek *symbasis* “junction” and *aner, andros* “man, stamen.”

Chloridoideae, Cynodonteae, Hilarinae, in syn. sub *Hilaria cenchroides* Kunth, see *Nova Genera et Species Plantarum* 1: 116-118, pl. 37. 1815 [1816], *Reliquiae Haenkeanae* 1(4-5): 326, t. 14. 1830, *Nomenclator Botanicus. Editio secunda* 1: 767. 1840, *Proceedings of the American Academy of Arts and Sciences* 24: 80. 1889, *Contributions from the United States National Herbarium* 1(2): 53. 1890 and *Contributions from the United States National Herbarium* 41: 128-129, 220. 2001.

Symplectrodia Lazarides

Relationships with *Plectrachne* Henr. and *Triodia* R. Br. Greek *syn* “with, together” with *plektron* “a spur, cock’s spur” and *odous, odontos* “tooth.”

Two species, Australia. Chloridoideae, Triodieae, perennial, strongly xeromorphic habit, tufted, branched or simple, erect, rhizomatous, slender, robust, stout, solid internodes, ligule ciliate, woody leaf blades thickened and pungent, basal foliage more or less woolly, auricles absent, hard and woody leaves, plants bisexual, inflorescence a loose racemose panicle, spikelets with 1 fertile floret and a bunch of awns, solitary spikelets pedicelled, spikelets 3-6-flowered, basal floret bisexual, glumes subequal and persistent, lower glume 1-5-nerved, upper glume 3-7-nerved, sterile lemma 3-lobed and 3-awned, basal lemma 3-nerved entire acuminate, palea and lodicules present, 3 stamens, ovary glabrous, 2 stigmas, open areas, sandy soil, type *Symplectrodia lanosa* Lazarides, see M. Lazarides, “New taxa of tropical Australian grasses (Poaceae).” in *Nuytsia*. 5(2): 273-276. 1984, Arthur D. Chapman, editor, *Australian Plant Name Index*. 2795. Canberra 1991.

Species***S. gracilis*** Lazarides

Australia, Northern Territory. Perennial, slender, branched, tussocky, not rhizomatous, leaves glabrous to hirsute, glumes shortly awned, 5 or 6 florets, basal lemma usually glabrous, tussock forming, see *Nuytsia* 5(2): 276. 1984[1985].

S. lanosa Lazarides

Australia, Northern Territory. Perennial, robust, tussocky, forming clumps, rhizomatous, ligule a line of hairs, basal sheaths often densely woolly, 3-6 florets, 1 fertile floret and 5-awned sterile lemmas, hirsute lemma of the fertile florets, glumes 7-nerved, basal lemma hairy to hirsute, see *Nuytsia* 5(2): 275. 1984[1985].

Synaphe Dulac = *Catapodium* Link,
Synaphea R. Br. (Proteaceae)

Greek *synaphe* “union, connexion,” *syn* with *apto, aptein* “to fasten.”

Pooideae, Poeae, Ammochloinae, type *Synaphe rigida* (L.) Dulac, see *Flora Anglica* 10. 1754, *Trans. Linn. Soc. London* 10: 155. 1810, *Hortus Regius Botanicus Berlinensis* 1: 44, 145, 280. 1827, *Flore de Département des Hautes-Pyrénées* 90. 1867 and *Bothalia* 27: 75-82. 1997, *Bothalia* 29(2): 335-341. 1999, *Contributions from the United States National Herbarium* 48: 230, 652. 2003.

Syntherisma Walter = *Digitaria* Haller,
Digitaria Heist. ex Fabr.

Greek *syn* and *therizo* “to mow, to cut the hair,” *syntherizo* “reap together.”

Panicoideae, Paniceae, Digitariinae, type *Syntherisma praecox* Walter, see *Enumeratio Methodica Plantarum* 207. 1759, *Historia Stirpium Indigenarum Helvetiae Inchoata* 2: 244. 1768, *Flora Carniolica, Editio Secunda* 1: 52. 1771, Thomas Walter (ca. 1740-1789), *Flora Caroliniana*. 76. 1788, *Bulletin of the Torrey Botanical Club* 22(10): 420. 1895, *Bulletin of the Torrey Botanical Club* 25: 303. 1898 and *Contributions from the United States National Herbarium* 12(6): 183-258. 1909, *N. Amer. Fl.* 17: 149. 1912, *Botanical Magazine* 38: 123. 1924, *Journal of the Faculty of Science: University of Tokyo, Botany* 3(1): 290, 299-301. 1930, *Blumea* 21(1): 16. 1973, Andrea S. Vega & Zulma Rúgolo de Agrasar, “Morphological interpretation of the spikelet in *Digitaria atra* (Poaceae: Panicoideae: Paniceae) and emended generic description.” *Am. J. Bot.* 88: 1670-1674. 2001, *Contributions from the United States National Herbarium* 46: 193-213, 611-612. 2003.

T

Taeniatherum Nevski

From the Greek *tainia* “a band, ribbon” and *ather* “an awn,” the awn of the lemma is flat, alluding to the ribboned awn, to flat-based lemma awns.

About 1-2 species, Mediterranean, Spain, Pakistan, north-west India, central Asia. Pooideae, Triticoideae, Triticeae, or Pooideae, Triticeae, Triticinae, annual or perennial, herbaceous, internodes hollow, auricles present, ligule an unfringed membrane, leaves linear, plants bisexual, inflorescence a spike or a false spike, raceme rachis tough, bisexual sessile spikelets 2-flowered, spikelets in pairs at each rachis node, 2 glumes unequal or subequal 1- or 3-nerved, lemma rounded on the back and keeled toward the apex, lemma entire with long recurved awn, callus long and pointed, palea present, 2 free and ciliate lodicules, 3 stamens, ovary hairy, 2 stigmas, native pasture species, sometimes referred to *Elymus*, hybrids with *Triticum aestivum* L., *Hordeum* L. and *Aegilops* L., type *Taeniatherum crinitum* (Schreb.) Nevski, see *Species Plantarum* 1: 83-85. 1753, *Beschreibung der Gräser* 2: 15, t. 24, f. 1. Leipzig 1769-1810, *Landwirthschaftliche Samenkunde* 2: 1147. 1885 and *Fl. URSS* 2: 719, tab. 50, f. 4. 1934, *Bot. Zhurn. SSSR* 69(4): 511-517. 1984, *Notes from the Royal Botanic Garden, Edinburgh* 42(1): 81. 1984, *Bot. Zhurn.* 71: 1426-1427. 1986, *Canadian Journal of Botany* 64: 2343-2347. 1986, *Nordic Journal of Botany* 6(4): 389-397. 1986, *Flora* 179: 171-177. 1987, *Hereditas; genetiskt arkiv.* 110: 283-288. 1989, *Boletim da Sociedade Broteriana, ser. 2* 63: 153-205. 1990, *Nordic Journal of Botany* 13: 481-493. 1993, *Flora Mediterranea* 5: 340-345. 1995, *Global Ecology and Biogeography* 7(4): 259-272. May 1998, *Contributions from the United States National Herbarium* 48: 652. 2003, *Journal of Ecology* 91(1): 36-48. Feb 2003, *Conservation Biology* 17(3): 837-845. June 2003, *Restoration Ecology* 11(2): 185-197. June 2003, *Restoration Ecology* 11(3): 370-377. Sep 2003, *Plant Pathology* 52(6): 811-817. Dec 2003, *Am. J. Bot.* 91: 1709-1725. 2004, R.J. Mason-Gamer, “Reticulate evolution, introgression, and intertribal gene capture in an allohexaploid grass.” *Systematic Biology* 53(1): 25-37. 2004, *Conservation Biology* 18(4): 947-956. Aug 2004, *Diversity & Distributions* 10(5-6): 367-369. Sep 2004, *Restoration Ecology* 12(4): 546-551. Dec 2004, *Oikos* 109(1): 154-166. Apr 2005.

Species

T. asperum (Simonk.) Nevski (*Cuviera caput-medusae* var. *aspera* Simonk.)

Europe, Caucasus. Native pasture species, see *Fl. URSS* 2: 719, tab. 50, f. 4. 1934, *Bot. Zhurn. SSSR* 69(4): 511-517. 1984.

T. caput-medusae (L.) Nevski (*Elymus caput-medusae* L.; *Hordelymus caput-medusae* (L.) Pignatti; *Hordeum caput-medusae* (L.) Cosson & Durand; *Leptothrix caput-medusae* (L.) Dumort.)

Europe. Annual, culms erect and several, leaf sheaths inflated, spike bristly, glumes subulate awnlike, lemmas lanceolate and scabrous, flat awns, weed, see *Species Plantarum* 1: 84. 1753, *Exploration Scientifique de l'Algérie* 2: 198. 1855, *Bulletin de la Société Botanique de Belgique* 7: 66. 1868 and *Giornale Botanico Italiano* 111(1-2): 58. 1977, *Sida* 13(1): 120. 1988, M. Siegwart, M.C. Bon, T.L. Widmer, N. Crespy and R. Sforza, “First report of *Fusarium arthrosporioides* on medusahead (*Taeniatherum caput-medusae*) and preliminary tests for host-specificity.” *Plant Pathology* 52(3): 416-416. June 2003.

in English: Medusa's head

T. caput-medusae (L.) Nevski var. *caput-medusae* (*Taeniatherum caput-medusae* subsp. *caput-medusae*; *Taeniatherum crinitum* var. *caput-medusae* (L.) Wipff)

Europe. See *Sida* 13(1): 120. 1988.

T. caput-medusae (L.) Nevski var. *crinitum* (Schreb.) Humphries (*Elymus caput-medusae* subsp. *crinitus* (Schreb.) Maire; *Elymus caput-medusae* var. *crinitus* (Schreb.) Ball; *Elymus caput-medusae* var. *crinitus* (Schreb.) Fiori; *Elymus crinitus* Schreb.; *Hordelymus caput-medusae* subsp. *crinitus* (Schreb.) Pignatti; *Hordeum crinitum* (Schreb.) Desf.; *Leptothrix crinita* (Schreb.) Dumort.; *Taeniatherum caput-medusae* subsp. *crinitum* (Schreb.) Melderis; *Taeniatherum crinitum* (Schreb.) Nevski)

Europe. See *Flora Atlantica* 1: 113. 1798, *Bulletin de la Société Botanique de Belgique* 7: 66. 1868, *Journal of the Linnean Society, Botany* 16: 732. 1878 and *Nuova Flora Analitica d'Italia* 1: 163. 1923, *Flore de l'Afrique du Nord*: 3: 393. 1955, *Giornale Botanico Italiano* 111(1-2): 58-59. 1977, *Botanical Journal of the Linnean Society* 76(4): 343. 1978, *Notes from the Royal Botanic Garden, Edinburgh* 42(1): 81. 1984.

Taeniorhachis T.A. Cope

From the Greek *tainia* “a band, ribbon” and *rhachis*, *rachis* “rachis, axis, midrib of a leaf.”

One species, Africa, Somalia, Ethiopia. Panicoideae, Panicoideae, Paniceae, perennial, herbaceous, rhizomatous, stoloniferous, auricles absent, ligule shortly membranous, leaves folded or flat and densely pubescent, plants bisexual, spicate inflorescence digitate, rachides winged, spikelets elliptic and flattened, lower floret sterile or male, lower glume tiny, upper glume 3-nerved hairy to villous, lemmas acuminate, palea present or absent, open habitats, white sand, dune sand, coastal, type *Taeniorhachis repens* Cope, see *Kew Bulletin* 48(2): 403, f. 1. 1993, *The Grass Genera of the World* 926-927. 1994.

Species

T. repens Cope

Somalia. Perennial, creeping, rhizomes and stolons present, leaves rigid and distichous, lower glume a scale, upper glume villous, found along roadsides, coastal, dunes, sand dunes, white sand, see *Kew Bulletin* 48(2): 403, f. 1. 1993.

Talassium Spreng. = *Panicum* L.

Presumably from the Greek *talasios*, *talaseios* “of wool-spinning,” *talasia* “wool-spinning.”

Panicoideae, Paniceae, Panicinae, type *Talassium montevidense* Spreng., see *Species Plantarum* 1: 55, 58. 1753, *Essai d'une Nouvelle Agrostographie* 168, t. 10, f. 10. 1812, *Systema Vegetabilium, editio decima sexta* 1: 313. 1825 [1824], *Systema Vegetabilium, editio decima sexta* 4(2): 22, 30. 1827 and *Contr. U.S. Natl. Herb.* 15: 13-15. 1910, *Boletim do Museu Paraense Emílio Goeldi, Série Botânica* 17(2): 297-314. 2001, *Contributions from the United States National Herbarium* 46: 306-441, 612-613. 2003.

Tansaniochloa Rauschert = *Acrochaete* A.

Peter, *Setaria* P. Beauv.

A grass from Tanzania.

Panicoideae, Paniceae, Setariinae, see *Essai d'une Nouvelle Agrostographie* 51, 178. 1812 and *Contr. U.S. Natl. Herb.* 22(3): 156. 1920, *Repertorium Specierum Novarum Regni Vegetabilis, Beihefte* 40(1): 203, Anh. 54, t. 28, f. 2. 1930, *Taxon* 31(3): 561. 1982, *Contributions from the United States National Herbarium* 46: 569-593. 2003.

Tarigidia Stent

An anagram of *Digitaria*.

One species, southern Africa. Panicoideae, Panicoideae, Paniceae, Digitariinae, perennial, glaucous, herbaceous, unarmed, tufted, leaves mainly basal, auricles present or absent, ligule an unfringed membrane, leaf blades long-linear, plants bisexual, contracted cylindrical inflorescence spiciform, numerous appressed deciduous oblong racemes, spikelets shortly pedicelled paired on lower branches or clustered, basal spikelets sometimes vestigial, 2 florets, lower floret reduced to a lemma with long spreading hairs, upper floret acute bisexual, 2 glumes more or less equal and awnless, palea present, 2 free and fleshy minute lodicules, 3 stamens, ovary glabrous, 2 plumose stigmas, species of open habitats, dry grassland, open veld, sometimes confused with *Anthephora* and *Digitaria*, type *Tarigidia aequiglumis* (Gooss.) Stent, see *Beschreibung der Gräser* 2: 105. Leipzig 1769-1810 and *Bulletin of Miscellaneous Information Kew* 1932(3): 151-152. 1932, *Transactions of the Royal Society of South Africa* 20: 195, f. 3. 1932, *Bothalia* 11: 285-286. 1974.

Species

T. aequiglumis (Gooss.) Stent (*Anthephora aequiglumis* Gooss.)

South Africa. Perennial, rare, tufted, spike-like branched inflorescence, woolly spikelets, linear lower glume 1-nerved, upper glume lanceolate 3-nerved, among rocks, stony places.

Tatianyx Zuloaga and Soderstrom

One species, Brazil. Panicoideae, Panicoideae, Paniceae, or Panicoideae, Paniceae, Paspalinae, perennial, herbaceous, unbranched, tufted, villous cataphylls, auricles absent, ligule a fringe of hairs, plants bisexual, open inflorescence paniculate with capillary branchlets, spikelets pedicellate with flexuous pedicels, pedicel tip oblique, 2 unequal glumes, lower glume 3- to 5-nerved, upper glume 5- to 7-nerved, lemmas awnless, palea keel-less, 2 free and fleshy lodicules, 3 stamens, ovary glabrous 2 stigmas, open habitats, savannah, related to *Panicum*, type *Tatianyx arnatices* (Trin.) Zuloaga & Soderstr., see *Species Graminum* 3: t. 317. 1829-1830 and *Smithsonian Contributions to Botany* 59: 1-63. 1985, T. Sendulsky, T. Filgueiras and A. Burman, “Fruits, embryos, and seedlings,” in T. Soderstrom, K. Hilu, C. Campbell and M. Barkworth [editors], *Grass Systematics and Evolution* 31-36. Smithsonian Institution Press, Washington, D.C., U.S. 1987, *Darwiniana* 3(1-4): 53-60. 1995, *Am. J. Bot.* 88: 1988-1992, 1993-2012. 2001, *Contributions from the United States National Herbarium* 46: 613. 2003, *Am. J. Bot.* 90: 796-821. 2003.

Species

T. arnacites (Trin.) Zuloaga & Soderstr. (*Panicum arnacites* Trin.)

Central Brazil. Upper glume and lower lemma villous, sandy soils, see *Smithsonian Contributions to Botany* 59: 56-60, f. 23-25. 1985.

Teinostachyum Munro = *Schizostachyum* Nees

Greek *tainia* “fillet, a ribbon” or *teino* “stretch, stretched” and *stachys* “spike,” referring to the long spikes.

About 2-3 species, India, subtropical forests. Bambusoideae, Bambusodae, Bambuseae, or Melocanninae, subtropical, perennial, shrubby or arborescent, woody and persistent, caespitose, flexible culms, pendulous or not scandent, branched, clumps dense, long internodes, ligule an unfringed membrane, rhizomes pachymorph, flowering culms leafy, plants bisexual, inflorescence spicate or paniculate, flowering iterant, spikelets with basal buds, 1-2 glumes, palea present, 3 free and membranous lodicules, 6 stamens, ovary glabrous, 2-3 stigmas, useful for weaving into mats, found in high rainfall forests, often or sometimes referred to *Schizostachyum*, type *Teinostachyum griffithii* Munro, see *Flora Brasiliensis seu Enumeratio Plantarum* 2: 535. 1829, *Enumeratio Plantarum Zeylaniae* 5: 375. 1864, *Transactions of the Linnean Society of London* 26(1): 114, 138, 142, 143, t. 3. 1868, Richard Henry Beddome (1830-1911), *The Flora Sylvatica for Southern India*: containing quarto plates of all the principal timber trees in southern India and Ceylon, accompanied by a botanical manual, with descriptions of every known tree and shrub, and analysis of every genus not figured in the plates. Madras [1869-74], *Journal of Botany, British and Foreign* 23: 273. 1885, *Annals of the Royal Botanic Garden. Calcutta.* 7: 102. 1896 and *Bulletin du Muséum National d'Histoire Naturelle* 28(1): 100. 1922, *Taxon* 6(7): 209. 1957, *Kew Bulletin* 38(2): 321-331. 1983, *Grass Systematics and Evolution* 225-238. 1987, *Florae Indicae Enumeratio: Monocotyledonae, Bambusoideae* Botanical Survey of India, Flora of India, Series 4, 272-283. Calcutta 1989, *Plant Resources of South-East Asia (PROSEA)* (PI Res SEAs) vol. 7: 130-145, 153-154. 1995 [Bamboos], *Contributions from the United States National Herbarium* 39: 112. 2000.

Species

T. beddomei C.E.C. Fischer (*Schizostachyum beddomei* (C.E.C. Fisch.) R.B. Majumdar)

India. Erect, scandent, pendulous, drooping, culms used for matting, fencing and basketry, see *Flora of the Presidency of Madras* 10: 1860. 1934, *Kew Bulletin* 1935: 148. 1935,

Florae Indicae Enumeratio: Monocotyledonae, Bambusoideae Botanical Survey of India, Flora of India, Series 4, 272-283. Calcutta 1989.

in English: elephant reed

in India: cherumola, chitthu, chittu, cittn, cittu, huda, mai ita, maiyirtal, mei eeta, nannura, nanyura, oole nulle, oote madike, oote nulike, otenulike, wontenuigi

T. dullooa Gamble (*Neohouzeaua dullooa* (Gamble) Camus; *Schizostachyum dullooa* (Gamble) R.B. Majumdar)

India, Bhutan. Smooth internodes, ridged culm sheaths, leaf blades rolled, very narrow spikelets, see *Annals of the Royal Botanic Garden. Calcutta.* 7: 101. 1896 and *Bulletin du Muséum National d'Histoire Naturelle* 28(1): 101. 1922.

Local names: paksalu, tokhre bans

T. griffithii Munro (*Cephalostachyum griffithsii* (Munro) Kurz)

India, Bangladesh. See *Transactions of the Linnean Society of London* 26(1): 143, t. 3. 1868, *Forest Flora of British Burma* 2: 566. 1877.

in Thailand: fai bong luhei, phai bong lueai, phai bong luei

Tema Adans. = *Echinochloa* P. Beauv.

Panicoideae, Panicodae, Paniceae, or Panicoideae, Paniceae, Panicinae, see *Familles des Plantes* 2: 496. 1763, *Essai d'une Nouvelle Agrostographie* 1: 53, 161, 169, t. 11, f. 2. 1812 and *Contributions from the United States National Herbarium* 46: 215-224, 613. 2003.

Temburongia S. Dransfield & K.M. Wong

From the Temburong district of Brunei.

Monotypic. Unclear placement or Bambuseae, Hickeliinae, subtribe Shibataeinae, type *Temburongia simplex* S. Dransfield & K.M. Wong, restricted to streamside forest, near running fresh water, see Dransfield, S. & K.M. Wong, “*Temburongia*, a new genus of bamboo (Gramineae-Bambusoideae) from Brunei.” *Sandakania* 7: 49-58. 1996.

Species

T. simplex S. Dransfield & K.M. Wong

Brunei. Rare, erect, scrambling, clambering, leaning, foliage leaf sheaths with small hornlike auricles, culm-sheath blade erect, auricles small rounded lobes, inflorescence of true spikelets, in groups of 1-3 along the main flowering axis, see *Sandakania* 7: 55, f. 1-5. 1996.

Temochloa S. Dransfield

One species, southern Thailand. Bambusoideae, low, delicate, scrambling, scandent, inflorescence borne on terminating leafy branches bearing 1 to 4 spikelets each

containing 1 fertile floret, see S. Dransfield, "Temochloa, a new bamboo genus (Poaceae-Bambusoideae) from Thailand." *Thai Forest Bull. (Botany)* 28: 179-182. 2000.

Species

T. liliana S. Dransf.

Thailand. Inflorescence determinate, growing on limestone hills.

in Thailand: phai khun tem

Terrellia Lunell = *Elymus* L.

Pooideae, Triticeae, Hordeinae, see *Species Plantarum* 1: 83-84. 1753 and *American Midland Naturalist* 4: 227. 1915, *Canad. J. Bot.* 42: 554. 1964, *Feddes Repertorium* 95(7-8): 425-521. 1984, *Taxon* 41: 562-563. 1992, *Taxon* 44: 611-612. 1995, *Contributions from the United States National Herbarium* 48: 279-307, 652-653. 2003.

x *Terrellymus* B.R. Baum

Elymus x *Terrellia*.

See *Canadian Journal of Botany* 57(8): 947. 1979, *Genera Graminum* 375. 1986.

Tetrachaete Chiov.

From the Greek *tetra* "four" and *chaite* "a bristle," the spikelets subtended by an involucre of 4 glumes.

One species, Arabia, Ethiopia to Tanzania. Chloridoideae, Cynodonteae, annual, wiry, herbaceous, loosely tufted, auricles absent, inflated leaf sheaths, ligule fringed, plants bisexual, inflorescence a false spike or a spiciform false raceme, spikelets paired subtended by an involucre of 4 glumes, 2 feathery glumes bristle-like and much longer than the floret, coriaceous lemmas saccate or strongly keeled, palea present, lodicules absent, 3 stamens, ovary glabrous, open habitats, dry areas, stony places, alluvium, dry stony slopes, dry open bushland, limestone, similar to *Melanocenchris*, type *Tetrachaete elionuroides* Chiov., see *Annuario del Reale Istituto Botanico di Roma* 8(1): 28-29, f. 1. 1903, *Botanical Journal of the Linnean Society* 148(1): 57-72. May 2005.

Species

T. elionuroides Chiov.

Southern Arabia, Yemen, Kenya, Tanzania. Annual, delicate, tufted, spreading or weakly ascending, leaves flat, ligule a ring of hairs, plumose inflorescence embraced by inflated uppermost leaf sheath, spikelets silky-hairy, straight rigid glumes bristle-like plumose at the base, lemmas 3-nerved ovate, on stony soils, heavy clay.

Tetrachne Nees

From the Greek *tetra* "four" and *achne* "chaff, glume."

One species, mostly South Africa, Pakistan. Chloridoideae, Eragrostideae, or Chloridoideae, Cynodonteae, Uniolineae, or Chloridoideae, Eragrostideae, Uniolineae, perennial, erect, densely tufted, herbaceous, green, shortly rhizomatous, woody base, leaves mainly basal or cauline, auricles absent, ligule a dense fringe of hairs, sheaths not ciliate, plants bisexual, inflorescence a panicle exerted, primary branches 1-sided and racemose along a central axis, spikelets solitary and very shortly pedicellate, 5-6 florets, 2 rows of spikelets laterally compressed, 2 lowest florets sterile reduced to lemmas, uppermost floret reduced, 2 glumes more or less equal and keeled, second glume awnless, lemma entire strongly keeled and awnless, palea present, 2 free and fleshy lodicules, 3 stamens, ovary glabrous, 2 stigmas plumose, pasture, forage grass, palatable, in alluvial soils, open habitats, mountains, tropical grasslands, similar to *Uniola*, type *Tetrachne dregei* Nees, see *Florae Africae Australioris Illustrationes Monographicae* 375-376. 1841, *Journal of Botany, British and Foreign* 29: 72. 1891, *Flora Capensis* 7: 318. 1898 and *Flora Capensis* 7: 711. 1900, *Memoirs of the Botanical Survey of South Africa* 58: 1-437. 1990, *Contributions from the United States National Herbarium* 41: 220. 2001.

Species

T. dregei Nees

Africa, Lesotho, South Africa. Perennial bunchgrass, branched, tufted, oblique rhizome, semiprostrate, unarmed, robust, leaf sheaths hairy on the margin, curly leaves, inflorescence of dense spikes arranged irregularly on the primary axis, few short racemes, spikelets flattened and awnless, glumes 1-nerved, very palatable, pasture grass, very high grazing value, useful for erosion control, occurs on riverbanks, high altitude grassland, mountain slopes and rocky outcrops, sandy soils, see *Florae Africae Australioris Illustrationes Monographicae* 376. 1841.

in English: Robies cocksfoot

in South Africa: kropaargras

Tetragonocalamus Nakai = *Bambusa* Schreb., *Chimonobambusa* Makino

Bamboo with 4-angle culms, from the Greek *tetras* "four," *gonia* "an angle" and *kalamos* "a reed, cane."

One species, southern China, Taiwan. Bambusoideae, Bambusoideae, Bambuseae, or Bambusoideae, Bambuseae, Bambusinae, culms obtuse-quadragonal, monopodial branching, deciduous sheaths, culm sheath glabrous, lower nodes rooting, nodes prominent, many aerial roots from the basal portion of the culms, internodes rough, creeping rhizomes,

leaves narrowly lanceolate, inflorescence a leafless panicle, spikelets densely clustered at each node, 5-6 florets hermaphrodite, lemmas acute, palea present, 3 lodicules ovate, 6 stamens, ovary hairy at the tip, 3 stigmas, cultivated, ornamental, shoots eaten, type *Tetragonocalamus angulatus* (Munro) Nakai, see *Genera Plantarum* 1: 236. 1789, *Species Plantarum. Editio quarta* 2: 245. 1799, *Transactions of the Linnean Society of London* 26(1): 94. 1868 and *United States Department of Agriculture. Inventory* 105: 48. 1932, *Journal of Japanese Botany* 9(2): 86, 88-89, 90, pl. 10. 1933, *J. Bamboo Research* 11(1): 25. 1992, *Contributions from the United States National Herbarium* 39: 29-35, 54-55. 2000.

Species

T. quadrangularis (Franceschi) Nakai (*Bambusa quadrangularis* Franceschi; *Chimonobambusa quadrangularis* (Franceschi) Makino; *Tetragonocalamus quadrangularis* Nakai)

South China. Branch nodes swollen, lowest nodes with spiny rootlets, leaves lanceolate or narrowly lanceolate, branches spreading and overhanging, culm surface rough, cultivated, naturalized, ornamental, potted plant, see *Arboretum Amazonicum* 5: 401. 1880, *Botanical Magazine* (Tokyo) 9: 71. 1895 and *Journal of the Linnean Society, Botany* 36(254): 443. 1904, *Botanical Magazine* (Tokyo) 28(329): 153-154. 1914, *Journal of Japanese Botany* 9(2): 90. 1933, *Report Fuji Bamboo Garden* 17: 10. 1972, *Cuscutania* 1(6): 1-29. 1991, *Acta Phytotaxonomica Sinica* 29(5): 452-455. 1991, *Journal of Bamboo Research* 10(1): 17-18. 1991, *Contributions from the United States National Herbarium* 39: 36. 2000.

in English: square bamboo, square-stem bamboo, square-stemmed bamboo

in Japan: shiho-chiku, shi-hou-chiku, shihou-chiku zoku, shikaku dake, kimmei-hou-chiku (with green oblong stripes on the bud canal), tatejima-hou-chiku, suow-shikaku dake

Tetrapogon Desf. = *Codonachne* Steud.,
Cryptochloris Benth., *Lepidopironia* A. Rich.

From the Greek *tetras*, *tetra* "four" and *pogon* "beard," referring to the tufts of hairs.

About 5-6 species, Mediterranean, Middle East, India to tropical and South Africa. Chloridoideae, Cynodonteae, short-lived perennial or annual, herbaceous, tufted or stoloniferous, auricles absent, leaf sheaths keeled often flabellate, ligule a narrow short membrane with a ciliate margin, leaf blades linear, plants bisexual, cleistogamous, spicate inflorescence more or less digitate, terminal solitary 1-sided spike, tough unilateral racemes exerted or partially enclosed in the uppermost sheath, spikelets laterally compressed in pairs or solitary with 2-5 fertile florets, lower

florets fertile, upper florets sterile and reduced to clavate lemmas, 2 large to inconspicuous glumes subequal papery 1-nerved, rounded or keeled fertile lemmas awned coriaceous 3-nerved, subapical awn, palea present, 2 free and fleshy lodicules, 3 stamens, ovary glabrous, 2 plumose stigmas, shady places, open habitats, savannah, dry places, poor soils, closely related to *Chloris*, type *Tetrapogon villosus* Desf., see *Nova Genera et Species Plantarum seu Prodrum* 1, 25. 1788, *Flora Atlantica* 2: 388-389, t. 255. 1799, *Nomenclator Botanicus. Editio secunda* 1: 393. 1840, *Tentamen Florae Abyssinicae ...* 2: 442 & Atlas t. 101. 1850, *Hooker's Icones Plantarum* 14: t. 1376. 1882 and *Flora of Ethiopia and Eritrea* 7: 159-163. 1995, S.A. Andanje & W.K. Ottichilo, "Population status and feeding habits of the translocated subpopulation of Hunter's antelope or hirola (*Beatragus hunteri*), in Tsavo East National Park, Kenya." *African Journal of Ecology* 37(1): 38-48. Mar 1999.

Species

T. bidentatus Pilg.

East Africa, Kenya, Tanzania. Perennial, 2-3 spikes, hairy spikelets, acuminate upper glume, see *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 34(1): 129. 1904.

T. cenchriformis (A. Rich.) W.D. Clayton (*Chloris cenchriformis* (A. Rich.) Baill. ex Schweinf. & Asch.; *Chloris cenchriformis* (A. Rich.) Baill.; *Chloris geminata* Hochst.; *Chloris spathacea* Hochst. ex Steud.; *Cryptochloris spathacea* (Hochst. ex Steud.) Benth.; *Lepidopironia cenchriformis* A. Rich.; *Tetrapogon cenchriformis* (A. Rich.) Pilg.; *Tetrapogon geminatus* (Hochst.) Chiov.; *Tetrapogon macranthus* (Desv.) Benth.; *Tetrapogon macranthus* f. *geminatus* (Hochst.) Chiov.; *Tetrapogon macranthus* f. *monostachyus* Chiov.; *Tetrapogon macranthus* f. *spathaceus* (Hochst. ex Steud.) Chiov.; *Tetrapogon macranthus* var. *geminatus* (Hochst.) Chiov.; *Tetrapogon macranthus* var. *monostachyus* Chiov.; *Tetrapogon macranthus* var. *spathaceus* (Hochst. ex Steud.) Chiov.; *Tetrapogon spathaceus* (Hochst. ex Steud.) Hackel ex Dur. & Schinz; *Tetrapogon spathaceus* (Hochst. ex Steud.) Macloskie, nom. illeg., non *Tetrapogon spathaceus* (Hochst. ex Steud.) Hack. ex T. Durand & Schinz).

Tropical Africa, Arabia. Annual or short-lived perennial, erect, loosely to densely tufted, basal leafy shoots flattened, basal leaf sheaths keeled, leaf blades acute or obtuse, racemes solitary partially enclosed in the inflated uppermost leaf sheath, spikelets 5- to 8-flowered, reddish purple awn, glumes well-developed lanceolate, lowest lemma winged ciliate, provides grazing for cattle especially while it is young, low to medium grazing value, growing on red sand, plains, in open *Acacia* scrub, hillsides, sand dunes, limestone, roadsides, on well-drained stony ground, rocky places, see *Mémoires de la Société d'Agriculture, Sciences et Arts d'Angers* 1: 177. 1831, *Tentamen Florae Abyssinicae*

... 2: 422, t. 101. 1850, *Synopsis Plantarum Glumacearum* 1: 204. 1854, *Flora* 38: 205. 1855, Georg August Schweinfurth (1836-1925), *Beitrag zur Flora Aethiopiens ...* 310. in Arabic: bené ekoissé, bu areiba

in Mali: tadjemait

in Niger: bené ekoissé, bu areiba, tadjemait, tawajaght

T. ferrugineus (Renvoize) S.M. Phillips (*Chloris ferruginea* Renvoize)

Somalia, Kenya. Perennial, densely tufted, erect, shortly rhizomatous, tough leaf blades, basal sheaths keeled, 5-8 flexuous racemes subdigitate exerted from the uppermost sheath, spikelets 3-flowered occasionally 1-flowered, lowest lemma ovate coriaceous with reddish hairs, second lemma fertile or male, 3rd lemma empty, hillsides, limestone, see *Kew Bulletin* 28(2): 195, f. 1. 1973, *Kew Bulletin* 42(2): 477-478. 1987.

T. spathaceus (Hochst. ex Steud.) Hack. ex T. Durand & Schinz (*Chloris spathacea* Hochst. ex Steud.; *Lepidopironia cenchriformis* A. Rich.; *Tetrapogon cenchriformis* (A. Rich.) Clayton; *Tetrapogon spathaceus* (Hochst.) T. Durand & Schinz; *Tetrapogon spathaceus* (Hochst. ex Steud.) Macloskie, nom. illeg., non *Tetrapogon spathaceus* (Hochst. ex Steud.) Hack. ex T. Durand & Schinz)

Africa. See *Tentamen Florae Abyssinicae ...* 2: 422, t. 101. 1850, *Synopsis Plantarum Glumacearum* 1: 204. 1854, *Conspectus Florae Africae* 5: 864. 1895 and *Reports of the Princeton University Expeditions to Patagonia, 1896-1899, Volume viii, 1 [2], Botany* 8(1,5,1): 211. 1904, *Kew Bulletin* 16: 250. 1962.

T. tenellus (J. König ex Roxb.) Chiov. (*Chloris tenella* J. König ex Roxb.; *Chloris triangulata* Hochst. ex A. Rich.; *Ctenium indicum* Spreng.; *Lepidopironia triangulata* (Hochst. ex A. Rich.) Schweinf.; *Tetrapogon triangularis* var. *agowensis* Chiov.; *Tetrapogon triangularis* var. *sericatus* Chiov.)

India, eastern Africa, Tanzania, Ethiopia, Arabia. Short-lived perennial or annual, weak, slender, erect or ascending, loosely tufted, basal leaf sheaths keeled, scabrid leaf blades flat acuminate, spikes solitary or paired, solitary racemes exerted or partially enclosed in the uppermost sheath, spikelets 4- to 7-flowered and 3- to 4-awned, lower 3 to 5

florets fertile, glumes persistent, upper glume ovate sharply acute, lowest lemma keeled coriaceous, sterile upper lemmas reduced, native pasture species, weed, growing in moist loamy sand, bushveld, in red sand, fertile soils, along roadsides, in dry places, in open *Acacia* scrub, in burned and cleared areas, rocky soil, disturbed sites, gardens, open woodland, abandoned fields and cultivation, on well-drained stony ground, see *Ideen zu einer künftigen Revision der Gattungen der Gräser*. 38, 61. 1813, *Flora Indica; or Descriptions ...* 1: 330. 1820, *Systema Vegetabilium, editio decima sexta* 1: 274. 1825, *Tentamen Florae Abyssinicae ...* 2: 409. 1850, *Bulletin de l'Herbier Boissier* 2: App. 2: 97. 1894, *Fl. Saudi Arabia* 302. 1989, *Annals of the Missouri Botanical Garden* 81(4): 784-791. 1994.

in Somalia: halfo, jeebin, hol

T. villosus Desf. (*Chloris tetrapogon* P. Beauv.; *Chloris villosa* (Desf.) Pers.; *Tetrapogon villosum* Desf.)

North and northeast Africa, Arabia, India. Perennial, densely tufted, slender, glaucous, erect, leaves mostly basal, basal leafy shoots strongly flattened, basal sheaths keeled, leaf blades tough glabrous narrowly linear, racemes paired exerted or partially enclosed, spikelets 4- to 6-flowered, all florets awned, lower 1-2 florets fertile, upper glume mucronate from a rounded apex, lower glume acute narrowly lanceolate-oblong, lowest lemma coriaceous ciliate with membranous wings, a good fodder, useful for erosion control, found on dry rocky hills, sterile land, plains, dry limestone and sandstone, saline *usar* tracts, similar to *Tetrapogon bidentatus*, see *Flora Atlantica* 2: 389, t. 255. 1799, *Syn. Pl.* 1: 87. 1805, *Essai d'une Nouvelle Agrostographie* 158. 1812 and *Annals of the Missouri Botanical Garden* 81(4): 784-791. 1994.

in India: kalia, khera madhana, kokuna, phulni, phundra jadi, sager

in Somalia: hamkhari

Tetrarrhena R. Br. = Ehrharta Thunb.

From the Greek *tetra* "four" and *arrhen* "male," the species have 4 stamens.

About 6 species, Australia. Bambusoideae, Oryzodae, Ehrharteae, or Ehrhartoideae, Ehrharteae, perennial, wiry, often long and scrambling, scandent or not, much-branched, woody or herbaceous, contracted or loose rhizomes, stoloniferous and decumbent, nodes glabrous, internodes hollow, leaf blades flat or rolled, auricles absent, ligule usually membranous, plants bisexual, inflorescence few spikeleted, unbranched or scarcely branched single raceme or spike-like panicle, spikelets sessile or shortly pedicellate, spikelets 3-flowered, rachilla terminated by a fertile floret, the

lower 2 florets sterile and reduced to empty lemmas, 2 glumes very unequal, lower glume 1-nerved, upper glume 5-nerved, laterally compressed lemmas, sterile lemmas hardened and not awned, palea present, 2 lodicules hyaline, 4 or 2 stamens, ovary glabrous, shade species, often referred to *Ehrharta* Thunb., type *Tetrarrhena distichophylla* (Labill.) R. Br., see *Kongl. Vetenskaps Academiens Handlingar* 40: 217, pl. 8. 1779, *Prodromus Florae Novae Hollandiae* 209-210. 1810, *Systema Vegetabilium, editio decima sexta* 2: 114-115. 1825, *Synopsis Plantarum Glumacearum* 1: 7. 1855 [1853] and *Telopea* 1: 40-43. 1975, *Record of the Queen Victoria Museum, new series* 55: 4. 1977, *Blumea* 28(1): 181-194. 1982, *Restoration Ecology* 5(3): 191-203. Sep 1997, *Contributions from the United States National Herbarium* 39: 56. 2000, T.R. Read, S.M. Bellairs, D.R. Mulligan and D. Lamb, "Smoke and heat effects on soil seed bank germination for the re-establishment of a native forest community in New South Wales." *Austral. Ecology* 25(1): 48-57. Feb 2000, *Austral. Ecology* 27(1): 32-54. Feb 2002.

Species

T. acuminata R. Br. (*Ehrharta acuminata* (R. Br.) Spreng.)

Australia. See *Systema Vegetabilium, editio decima sexta* 2: 114. 1825.

T. distichophylla (Labill.) R. Br. (*Ehrharta distichophylla* Labill.)

Tasmania, South Australia. Perennial, stems pubescent and decumbent, sometimes mat-forming, raceme erect, spikelets pubescent, 2 sterile florets below a single fertile floret, sterile lemmas obtuse or truncate, see *Novae Hollandiae Plantarum Specimen* 1: 90, t. 117. 1804, *Prodromus Florae Novae Hollandiae* 210. 1810.

in English: hairy rice grass

T. juncea R. Br. (*Ehrharta juncea* (R. Br.) Spreng.)

Australia, New South Wales, Queensland, Tasmania. Perennial, tufted, wiry, culms and leaves more or less rough, much branched and often long and scrambling or climbing, ligule very short and membranous, blade flat, a narrow spike-like raceme few-spikeleted, spikelets pedicellate and solitary, glumes unequal and keeled, all lemmas awnless, the 2 lower lemmas empty, palea acute and keeled, on sandstone, food plant of the indigenous Australian butterflies *Oreixenica kershawi kanuda*, Striped Xenica, and *Oreixenica kershawi kershawi*, Kershaw's brown, *Paralucia pyrodiscus lucida*, Eltham Copper, *Pasma tasmanicus*, Tasmania Skipper, *Signeta flammeata*, Bright Chilled Skipper, *Toxidid andersoni*, Anderson's Skipper, see *Systema Vegetabilium, editio decima sexta* 2: 114. 1825, *Flora Australiensis: A Description ...* 7: 554. 1878.

in English: wiry rice grass, forest wire grass

T. laevis R. Br. (*Ehrharta drummondiana* (Nees) Steud.; *Ehrharta laevis* (R. Br.) Spreng.; *Tetrarrhena drummondiana* Nees)

Australia. See *Systema Vegetabilium, editio decima sexta* 2: 115. 1825, *Synopsis Plantarum Glumacearum* 1: 7. 1855 [1853].

T. oreophila D.I. Morris (*Ehrharta oreophila* (D.I. Morris) L.P.M. Willemse)

Australia. Two stamens, see *Record of the Queen Victoria Museum, new series* 55: 4. 1977, *Blumea* 28(1): 193. 1982.

T. oreophila D.I. Morris var. *minor* D.I. Morris (*Ehrharta oreophila* var. *minor* (D.I. Morris) L.P.M. Willemse)

Australia.

T. oreophila D.I. Morris var. *oreophila*

Australia.

T. turfosa N. Walsh (Latin *turfosus* "peaty")

Australia, New South Wales, Victoria, Tasmania. Perennial, rhizomatous, forming compact tufts, culms and leaves smooth, glabrous sheath encircling the culm, ligule a ciliate rim, blade involute, inflorescence an erect spike-like raceme, spikelets sessile and purplish, glumes subequal, sterile lemmas oblong and blunt, fertile lemma keeled and nerved, palea membranous, in swamps and water courses, see *Muelleria* 7(1): 95. 1989.

Thalysia Kuntze = Zea L.

Greek *thalysia* "offerings of the first-fruits, made to Artemis," *thalos*, *thallos* "scion, child."

Panicoideae, Andropogoneae, Tripsacinae, see *Species Plantarum* 2: 971-972. 1753, *Revisio Generum Plantarum* 2: 794. 1891 and *Contributions from the United States National Herbarium* 46: 613, 635-639. 2003.

Thamnocalamus Munro = Fargesia Franch., Himalayacalamus Keng f.

Greek *thamnos* "shrub, bush" and *kalamos* "reed," referring to the nature of the plant.

About 4-7 species, temperate, China, Himalaya, South Africa, Madagascar. Bambusoideae, Bambusodae, Bambuseae, or Bambusoideae, Bambuseae, Arundinariinae, perennial, persistent, unarmed, woody, shrubby or small tree, leafy, hollow, sympodial, unicaspitose or culms in single caespitose clumps, culms drooping to pendulous, nodes marked by a ring, manifold branching, main branch indistinct, culm sheaths deciduous, auricles small or absent, ligule a fringed membrane, leaf blades linear-lanceolate and pseudopetiolate, leaves clustered in groups of 2-4 at the end of short joined branchlets, rhizome pachymorph without elongated neck, plants bisexual, flowering semelactant,

contracted inflorescence racemose or paniculate, spikelets solitary and pedicellate, 1-several florets bisexual, lowermost spikelet sessile, each of 3-5 spikelets subtended by a bract, bracts of the inflorescences large and sheathing, 2 glumes more or less equal, upper glume pointed, lemma often awned, palea present, 3 free lodicules membranous and ciliate, 3 stamens, ovary glabrous without apical appendage, usually 2-3 stigmas plumose, forest, often referred to *Fargesia* and *Himalayacalamus*, type *Thamnocalamus spathiflorus* (Trin.) Munro, see *Flora Boreali-Americana* 1: 73. 1803, *Transactions of the Linnean Society of London* 26(1): 33-34, 157. 1868, *Gen. Pl.* 3(2): 1208. 1883, *Die natürlichen Pflanzenfamilien, Zweite Auflage* 2: 93. 1887, *Bulletin Mensuel de la Société Linnéenne de Paris* 2: 1067. 1893 and *J. Bamboo Research* 2(1): 15, 23-24. 1983, T.R. Soderstrom & R.P. Ellis, "The position of bamboo genera and allies in a system of grass classification." in *Grass Systematics and Evolution*, 225-238. (Eds T.R. Soderstrom, K.W. Hilu, C.S. Campbell and M.E. Barkworth) Smithsonian Inst., Washington 1987, *Kew Bulletin* 44(2): 349-367. 1989, *Flora Reipublicae Popularis Sinicae* 9(1): 1-761. 1996, *Contributions from the United States National Herbarium* 39: 57, 62-63, 115-116. 2000, *Oryx* 35(3): 250-259. July 2001.

Species

T. aristatus (Gamble) E.G. Camus (*Arundinaria aristata* Gamble; *Thamnocalamus spathiflorus* subsp. *aristatus* (Gamble) McClint.)

India, Tibet, Yadong. Erect, shrubby, caespitose, thick-walled, vertical streaks, internode pubescent, culm sheath coriaceous, sheath blade hastate, sheath ligule with short pubescence, leaves elliptic-lanceolate on the top of the branch, leaf sheath loose and keeled, ligule acute, 3 stamens, ovary glabrous, usually flowers gregariously, young shoots edible, leaves used as a fodder eaten by elephants, strong culms used for making *hookah*-pipes, grows in moist mountain slopes, ravines, see *Transactions of the Linnean Society of London* 26(1): 34. 1868, *Annals of the Royal Botanic Garden, Calcutta* 7: 18-20, t. 17. 1896 and *Kew Bull.* 3: 315. 1912, *Bambusées* 54, t. 37, f. E. 1913, *Moorea* 4: 20. 1985, *Kew Bulletin* 44(2): 349-367. 1989, *Cell and Chromosome Research* 15(3): 12. 1992.

in India: babain, babam, bhebham, nigala, nigalo, pat-hioo, rato, rato-nigala, ratonigalo

T. falconeri Hook.f. ex Munro (*Arundinaria falconeri* (Hook.f. ex Munro) Benth. & Hook. ex Gamble; *Arundinaria falconeri* (Hook.f. ex Munro) Benth. & Hook.f. ex Duthie; *Arundinaria falconeri* (Hook.f. ex Munro) Benth. & Hook.f.; *Arundinaria falconeri* (Hook.f. ex Munro) Duthie; *Arundinaria nobilis* Mitf.; *Drepanostachyum falconeri* (Hook.f. ex Munro) J.J.N. Campb. ex D.C. McClint.; *Fargesia collaris* T.P. Yi; *Fargesia gyirongensis* Yi; *Himalayacalamus falconeri* (Munro) Keng f.; *Himalayacalamus*

falconeri (Hook.f. ex Munro) Keng f.; *Thamnocalamus falconeri* Munro) (named for the Scottish (d. Forres, Morayshire) botanist Hugh Falconer, 1808-1865 (London), physician, M.D. Edinburgh 1829, assistant surgeon with the East India Company in Bengal, geologist, palaeobiologist, plant collector, a friend of Captain Proby Thomas Cautley, in India from 1830 to 1855, in 1832 appointed Superintendent of the Serampore [Saharanpur] Botanical Garden, in 1844 a Fellow of the Linnean Society, in 1845 Fellow of the Royal Society, in 1848 Superintendent of the Calcutta Botanic Gardens, collected for the Herbarium of the late East India Company, professor of botany at the Calcutta Medical College, vice-president of the Royal Society, foreign secretary of the Geological Society, among his writings *Descriptive Catalogue of the Fossil Remains of Vertebrata from the Sewalik Hills, the Nerbudda, Perim Island*, etc. in the Museum of the Asiatic Society of Bengal. Calcutta 1859. See Charles Murchison, *Palaeontological Memoirs and Notes of the Late Hugh Falconer, A.M., M.D.* London 1868; J.H. Barnhart, *Biographical notes upon botanists.* 1: 525. 1965; John Challinor, in *D.S.B.* 4: 518-519. 1981; Isaac Henry Burkill, *Chapters on the History of Botany in India.* Delhi 1965; J.D. Hooker & Thomas Thomson (1817-1878), *Flora Indica.* 67-68. 1855; D.G. Crawford, *A History of the Indian Medical Service, 1600-1913.* 2: 147-148. Wood, *An Introduction to the Literature of Vertebrate Zoology.* Based chiefly on titles in the Blacker Library of Zoology ... and other libraries of McGill University, Montreal. London 1931; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection.* 121. 1972)

India, Sikkim. Erect and arching, clump-forming, shrubby, slender, glaucous and greenish, thornless, thick-walled, many branches at each node, rhizomes not running, internodes red and smooth, culm sheaths glabrous, leaf sheaths glabrous, large and loose panicle, inflorescence often purplish, long racemes and short spathes, lodicules ciliate, 3 stamens, ovary glabrous, stigmas plumose, new culms with white wax, flowers gregariously, ornamental, edible shoots, culms for weaving and *hookah*-pipes, fishing rods and basketry, animal fodder, found in limestone rocky areas, moist temperate forests, on steep slopes, see *Transactions of the Linnean Society of London* 26(1): 34. 1868, *Grasses N. W. India* 46. 1883, *Genera Plantarum* 3: 1208. 1883, *The Fodder Grasses of Northern India* 46. 1883, *The Bamboo*

in English: umbrella bamboo

in China: shennong jianzhu

T. spathiflorus (Trin.) Munro (*Arundinaria spathiflora* Trin.)

Asia, Nepal. Densely tufted, erect, shrubby, gregarious, elegant, culms fistular, smooth, nodes much raised marked by a ring formed by the scars of the fallen sheath, internode striate, culm sheaths caducous densely pubescent and coriaceous, branchlets mainly from the upper nodes, leaves clustered at the ends of short branchlets, leaf sheaths glabrous, inflorescence a large panicle, spikelets loose bearing 2 empty glumes and 4-8 florets, 2 glumes unequal, 3 stamens, ovary glabrous, 3 plumose stigmas recurved, ornamental, usually flowers gregariously, strong culms used for

making hookah-pipes and fishing rods, for matting and basketry, common undergrowth, evergreen forests, mountain conifer forest, in moist shady areas, slopes, ridges, see *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 3,1(6): 617. 1835, *Transactions of the Linnean Society of London* 26(1): 34. 1868 and *Kew Bulletin* 44: 363. 1989.

in India: deo-ringal, deoningal, garu, myoosay, nigal, parikh, purmick, ringal, tham, tham ringal

T. spathiflorus (Trinius) Munro subsp. *nepalensis* Stapleton Nepal, China. See *Edinburgh Journal of Botany* 51(2): 283. 1994.

India, Himachal Pradesh, Nepal, Bhutan, Sikkim, the Himalayas. Forming thickets, clumps more or less loose, internodes red or yellow, culm sheaths symmetrical and tough, branchlets pendulous, stems used for pipes and baskets, see *Annals of the Royal Botanic Garden, Calcutta* 7: 20. 1896 and *Moorea* 4: 20. 1985.

T. spathiflorus (Trinius) Munro var. *bhutanensis* Stapleton Bhutan. Waxy, see *Edinburgh Journal of Botany* 51(2): 283. 1994.

Local name: hum

T. spathiflorus (Trinius) Munro var. *crassinodus* (Yi) Stapleton (also *crassinoda*) (*Fargesia crassinoda* T.P. Yi)

China, Nepal. Culm sheath caducous, leaf blades triangular or linear-lanceolate and erect, leaf sheath glabrous, leaf auricle absent, mountain conifer forest, see *Journal of Bamboo Research* 2(2): 24, f. 3. 1983, *Edinburgh Journal of Botany* 51(2): 284. 1994.

T. tessellatus (Nees) Soderstrom & Ellis (*Arundinaria ibityensis* A. Camus; *Arundinaria tessellata* (Nees) Munro; *Nastus tessellatus* Nees; *Thamnocalamus ibityensis* (A. Camus) Ohrnberger; *Thamnocalamus tessellatus* Munro) (Latin *tessellatus*, *a*, *um* "checkered, tessellated, of small square stones," referring to the leaf surface)

Africa, Madagascar. Perennial, branched or much-branched, growing in dense leafy clumps, rhizomatous with woody and stout rhizomes, ligule a fringed membrane, leaf blade cross-veined, leaves margins harsh and minutely spiny, inflorescence racemose or paniculate, a spatheate single raceme or a contracted panicle, flowers bisexual, 3 stamens, ovary hairy or glabrous, grains ovate to oblong,

flowering seems to be sporadic, flowering followed by death, canes used for Zulu shields, grazing value unknown, common in wet places, near water, among rocks on mountain tops, along streams, see *Florae Africae Australioris Illustrationes Monographicae* 463. 1841, *Transactions of the Linnean Society of London* 26(1): 31. 1868 and *Bulletin de la Société Botanique de France* 107: 211. 1960, *Bothalia* 14(1): 54. 1982, *Bamboos of the World* 10. 1996.

in English: berg bamboo, miniature bamboo, Cape bamboo, Drakensberg bamboo

in South Africa: bergbamboes, Drakensberg bamboes, leqala, maqala

Thaumastochloa C.E. Hubb.

From the Greek *thauma* “a wonder, marvel,” *thaumastos* “wonderful, marvellous, strange” and *chloe*, *chloa* “grass,” referring to the nature of the plant.

Some 7-8 species, Australia to New Guinea. Panicoideae, Andropogonodae, Andropogoneae, Rottboelliinae, annual or perennial, herbaceous, solid internodes, auricles absent, ligule a membrane or a ciliate rim, plants bisexual, inflorescence a spike, peduncle deciduous curved and pointed, pedicelled spikelets reduced to a glume, lower floret barren, 2 glumes more or less equal, lower glume oblong 2-keeled and 5- to 9-nerved, upper glume 3- to 5-nerved, proximal lemmas 2-nerved awnless, palea present, 2 fleshy lodicules, 3 stamens, ovary glabrous, woodland, related to or derived from *Heteropholis*, type *Thaumastochloa pubescens* (Benth.) C.E. Hubb., see *Supplementum Plantarum* 13, 114. 1781 [1782], *De Fructibus et Seminibus Plantarum*... 3: t. 181, f. 3B. 1805, *Supplementum Carpologicae* 1(1): 3, t. 181, f. 3. 1805, *Révision des Graminées* 1: 153-154. 1829 and *Hooker's Icones Plantarum* ser. 5, 4(1): t. 3313, 3314. 1936, *Journal of the Royal Society of Western Australia* 44(3): 77-83. 1961, *Taiwania* 16(2): 216-218. 1971, R. de Koning, M.S.M. Thelepogon Roth ex Roemer & Schultes = Rhiniachne Steud.

Greek *thele* “nipple” and *pogon* “beard,” possibly referring to the stamens.

One species, tropical Africa, Asia, Indonesia. Panicoideae, Andropogonodae, Andropogoneae, Andropogoninae, or Ischaeminae, annual, stout, coarse, herbaceous, erect or decumbent, caespitose, distinctly bitter, often prop-rooted, auricles absent, sheaths hairy, ligule membranous, papery leaves acuminate and cordate, plants bisexual, inflorescence terminal with many digitate or subdigitate racemes, spikelets in pairs, 2 florets, sessile spikelets acute rugose and dorsally compressed, barren pedicel, pedicellate spikelet reduced to a naked linear pedicel, upper floret bisexual, proximal incomplete florets male, 2 glumes rugose wingless subequal, lower glume entire 7- to 9-nerved, upper glume 1- to 3-nerved, palea 2-nerved, 2 free and fleshy lodicules, 3 stamens, ovary glabrous, 2 stigmas, eaten by cattle when young, open habitats, wet soils, seasonally moist areas, heavy soils, disturbed places, similar to *Ischaemum*, type

Thelepogon elegans Roth, see *Observationes Botanicae* 3: 25. 1783, *Systema Vegetabilium* 2: 46, 788. 1817, *Novae Plantarum Species* 62. 1821, *Systema Vegetabilium, editio decima sexta* 1: 299. 1825 [1824], *Synopsis Plantarum Glumacearum* 1: 360. 1854 and *Austrobaileya* 4(1): 105, f. 1. 1993.

Species

T. elegans Roth (*Andropogon princeps* A. Rich.; *Jardinea abyssinica* Steud.; *Meoschium elegans* (Roth) Arn. & Nees; *Rhiniachne princeps* (A. Rich.) Hochst. ex Steud.; *Rhytachne principis* (A. Rich.) T. Durand & Schinz; *Sehima elegans* (Roth) Roberty; *Thelepogon elegans* Roth ex Roem. & Schult.; *Thelepogon elegans* Roem. & Schult.)

Tropical Africa, Namibia, Indonesia, Southeast Asia. Annual, coarse, stout, tufted, stilt-rooted, branching from the base, leaf blades lanceolate with clasping base, inflorescence a cluster of very fragile racemes, sessile spikelet awned, pedicelled spikelet absent or minutely vestigial, lower glume of sessile spikelet narrowly ovate, upper glume ridged, good pasturage, fodder, fed to horses as a bitter tonic, common in wet ground, disturbed sites, on black soil, light soil, weedy places, see *Flora Aegyptiaco-Arabica* 178. 1775, *Gramineae* 67-68. 1841, *Nova Acta Phys.-Med. Acad. Caes. Leop.-Carol. Nat. Cur.* 19(Suppl. 1): 199-200. 1843, *Tentamen Florae Abyssinicae ...* 2: 470. 1850 and *Petite Flore de l'Ouest-Africain* 410. 1954.

Thellungia Stapf = *Eragrostis* Wolf

After the Swiss botanist Albert Thellung, 1881-1928, at the Botanical Museum of the University of Zürich, among his numerous publications are "*Lepidium-Studien.*" *Bull. Herb. Boissier.* sér. 2. 4(7): [695]-716. 1904, *Die Gattung Lepidium* (L.) R. Br. Zürich 1906 and *La Flore adventice de Montpellier.* Cherbourg 1912; see J.H. Barnhart, *Biographical notes upon botanists.* 3: 371. 1965; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection.* 398. 1972; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University.* Cambridge, Mass. 1917-1933; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering*

Plants of Mexico. 733-734. Philadelphia 1964; Stafleu & Cowan, *Taxonomic literature.* 6: 242-245. Utrecht 1986.

One species, Australia. Chloridoideae, Cynodonteae, or Chloridoideae, Eragrostideae, Eragrostidinae, perennial, caespitose, compact, erect, robust, tough, wiry, herbaceous, glabrous nodes, auricles absent, ligule a fringe of short hairs, leaf blade flat and rough, plants bisexual, cleistogamous, narrow inflorescence paniculate, spikelets more or less sessile, bisexual florets usually 3, 2 glumes very unequal and pointed or acute, lemmas and glumes awnless, lemma with long-acuminate apex, palea 2-nerved and 2-keeled, 3 stamens, ovary glabrous, 2 stigmas, small fruit compressed, in grassland, brigalow scrub, in swamps, alluvial flats, disturbed areas, often referred to *Eragrostis* and *Sporobolus*, type *Thellungia advena* Stapf, see *Genera Plantarum* 23. 1776, *Icones et Descriptiones Graminum Austriacorum* 4: 15. 1809 and *Bulletin of Miscellaneous Information Kew* 1920(3): 97-98, f. 1-11. 1920, *Acta Bot. Neerl.* 15: 157. 1966, *Revista Brasileira de Botânica* 23(2): 177-194. 2000, *Contributions from the United States National Herbarium* 41: 81-115, 220. 2001, *Flora of Australia* vol. 44B, Poaceae 3: 341, 384, 392-393. 2005.

Species

T. advena Stapf (*Eragrostis advena* (Stapf) S.M. Phillips)

Queensland, New South Wales, Northern Territory. Perennial, compactly tufted, robust, leaf blades flat and folded, inflorescence contracted and cylindrical, cleistogamy, spikelets subsessile, persistent or tardily deciduous membranous glumes, lemma acute, pales acute, grows in semi-arid areas, on heavy clay soils, on black soils, see *Kew Bulletin* 37(1): 159. 1982.

in English: coolibah grass

Themeda Forssk. = *Androscepia* Brongn., *Anthistiria* L.f., *Aristaria* Jungh., *Heterelytron* Jungh., *Perobachne* J. Presl

From *thaemed*, an Arabic name for a grass or for a ditch with water; see Pehr (Peter) Forsskål (1732-1763), *Flora Aegyptiaco-Arabica.* 178. Copenhagen 1775; Frank Nigel Hepper & Ib Friis, *The Plants of Pehr Forsskal's "Flora Aegyptiaco-Arabica"* collected on the Royal Danish Expedition to Egypt and the Yemen 1761-1763. Royal Botanic Gardens, Kew [in association with the Botanical Museum, Copenhagen] 1994.

About (10-)18/19 species, Old World tropics, mainly in Southeast Asia and Australia. Panicoideae, Andropogonodae, Andropogoneae, Andropogoninae, or Panicoideae, Andropogoneae, Anthistiriinae, annual or perennial, coarse, herbaceous, caespitose, leafy, rarely stoloniferous, auricles absent, ligule a very short membrane more or less fringed,

leaf sheaths variable, leaves linear and narrow, plants bisexual, inflorescence a loose and leafy panicle, racemes modified and often compacted into dense clusters, solitary racemes composed of 2 homogamous pairs of spikelets and 2-4 sessile spikelets, each raceme embraced by sheathing spatheoles, flexuous pedicels, sessile spikelet 2-flowered, fertile spikelets within an involucre of male or barren spikelets, fertile spikelets falling separately from involucre, sessile spikelets terete and awned, homogamous spikelets persistent and sterile, pedicellate spikelets similar to involucre spikelets and awnless, 2 glumes more or less equal, lower floret reduced to a lemma, upper floret perfect, hairy pungent callus, palea present or absent, 2 lodicules free and fleshy, 3 stamens, ovary apex glabrous, 2 stigmas, fruit grooved and compressed, native pasture species, forage species, ornamental, weed species, paper-making, open habitats, rocky places, along roadsides, semiarid open woodlands understoreys, derived grasslands, savannah, grassland, rainforest, closely related to *Heteropogon*, type *Themeda triandra* Forssk., see *Flora Aegyptiaco-Arabica* 178. 1775, *Nova Graminum Genera* 35. 1780 [1779], *Supplementum Plantarum* 113. 1781, *Reliquiae Haenkeanae* 1(4-5): 348, t. 48. [Collector Thaddäus Peregrinus Xaverius Haenke, 1761-1816 or 1817] Pragae [Praha] 1825-1835, *Voyage autour du Monde* 77-78. 1829 [1831], *Reliquiae Haenkeanae* 1(4-5): 348, t. 48. 1830, *Tijdschrift voor Natuurlijke Geschiedenis en Physiologie* 7: 294-297. 1840 and *Pakistan Journal of Botany* 19: 193-200. 1987, *Folia Primatologica* 48: 78-120. 1987, *Bulletin of Botanical Laboratory, North-Eastern Forestry Institute* 9(2): 55. 1989, Connie L. Species

T. anathera (Nees ex Steud.) Hack. (*Androscepia anathera* (Nees ex Steud.) Andersson; *Androscepia anathera* var. *glabrescens* Andersson; *Androscepia anathera* var. *hirsuta* Andersson; *Anthistiria anathera* Nees ex Steud.; *Themeda anathera* var. *glabrescens* (Andersson) Hack.; *Themeda anathera* var. *hirsuta* (Andersson) Hack.)

Nepal, India, lower hills of Himachal Pradesh, Punjab, Uttar Pradesh, montane tract of West Bengal, Pakistan. Perennial, erect or geniculately ascending, tufted, very slender, leafy, culms long and curving, usually decumbent at the base, ligule membranous, leaves mostly basal and very narrow, very narrow lax elongate panicle with paired or solitary branches, involucre spikelets surrounding a sessile spikelet or spikelets, the whole raceme deciduous with the sessile spikelets attached, narrowly oblong pedicel-like callus, tolerant to grazing and transplanting, useful for erosion control, cut for fodder, hay, forage, cyanogenetic, may cause poisoning in green state, subtropical and temperate hill grasslands, sheltered shady slopes, resembling *Iseilema*, see *Synopsis Plantarum Glumacearum* 1: 402. 1854, *Nova Acta Regiae Societatis Scientiarum Upsaliensis* ser. 3 2: 249. 1856, *Monographiae Phanerogamarum* 6: 669-670. 1889 and *Bulletin du Muséum d'Histoire Naturelle* 26: 425. 1920.

in India: ghatira, jyotishmati (roots said to be luminous), kohdi

T. arguens (L.) Hack. (*Anthistiria arguens* (L.) Willd.; *Anthistiria ciliata* var. *major* Thw.; *Anthistiria frondosa* R. Br.; *Anthistiria pilifera* Steud.; *Stipa arguens* L.; *Themeda frondosa* (R. Br.) Merr.)

Australia, Southeast Asia, India, Indonesia, Thailand, Malaysia. Bunchgrass, awns in mature spikelets can cause abscesses in the mouth, weed species, naturalized elsewhere, readily grazed when young, in Indonesia used for lumbago and rheumatism, found on erosional flood clay plains, see *Species Plantarum, Editio Secunda* 117. 1762, *Species Plantarum* 4: 901. 1806, *Prodromus Florae Novae Hollandiae* 1: 200. 1810, *Synopsis Plantarum Glumacearum* 1: 400. 1854, *Enum. Pl. Zeyl.* 366. 1864, *Monographiae Phanerogamarum* 6: 657. 1889 and *Dept. Agric. Nat. Res. Bur. Sci. Manila Publ.* 9: 89. 1917, *Bulletin du Muséum d'Histoire Naturelle* 25: 671. 1919, *Acta Botanica Neerlandica* 1(3): 479. 1952.

in English: Christmas grass

in Thailand: yaa chao chuu, ya chao chu

T. arundinacea (Roxb.) Ridley (*Andropogon arundinaceus* (Roxb.) Voigt, nom. illeg., non *Andropogon arundinaceus* Bergius; *Anthistiria arundinacea* Roxb.; *Anthistiria gigantea* Cavanilles subsp. *arundinacea* (Roxb.) Hook.f.; *Anthistiria gigantea* subsp. *arundinacea* (Roxb.) Hack.; *Anthistiria gigantea* var. *arundinacea* (Roxb.) Hack. ex Ridl.; *Cymbopogon arundinacea* (Roxb.) Schult.; *Themeda arundinacea* (Roxb.) A. Camus, nom. illeg., non *Themeda*

arundinacea (Roxb.) Ridl.; *Themeda gigantea* subsp. *arundinacea* (Roxb.) Hack.; *Themeda gigantea* var. *arundinacea* (Roxb.) Hack.)

Asia, China, India, Uttar Pradesh, central and southern Assam, Bangladesh. Perennial, smooth, leaves acuminate, sheaths compressed or strongly keeled, ligule a membranous ring, inflorescence a panicle with racemes on peduncles, each racemes with 4 involucre spikelets surrounding sessile hermaphrodite spikelets, a febrifuge, eaten only when very young, hay, culms used in the construction of huts, used by cottage industries in India, leaf and stem fibers used for making ropes and cordage, found in large clumps in wet pasture land, grassland, low-lying well-drained soils, see *Icones Plantarum Rariorum* 5: 36, t. 458. 1799, *Flora Indica; or Descriptions ...* 1: 256-257. 1820, J.O. Voigt, *Hortus Suburbanus Calcuttensis* 706. Calcutta 1845, *Synopsis Plantarum Glumacearum* 1: 401. 1854, *The Fodder Grasses of Northern India* 43. 1888, *Monographiae Phanerogamarum* 6: 674. 1889, *Transactions of the Linnean Society of London, Botany* 3: 401. 1893 and *Materials for a Flora of the Malayan Peninsula* 3: 169. 1907, *Flore Générale de l'Indo-Chine* 7: 363. 1922, *Journal of Cytology and Genetics* 25: 140-143. 1990.

in English: tiger grass, ulla grass

in India: azkhun, bharna, bharua, bota kher, dhala, kangua, kapur ghas, kher, sarkhara, son, ula, ulla

in English: kangaroo grass

in Thailand: yaa phung chuu, ya phung chu

T. avenacea (F. Muell.) Maiden & Betche (*Anthistiria avenacea* F. Muell.; *Themeda avenacea* (F. Muell.) C. Gardner; *Themeda avenacea* (F. Muell.) Durand & Jackson; *Themeda gigantea* subsp. *avenacea* (F. Muell.) Hack.; *Themeda gigantea* var. *avenacea* (F. Muell.) Hack.)

Australia. Perennial, tufted, robust, densely woolly or silky base, racemes solitary, involucre spikelets male, some involucre spikelets shortly pedicellate, fertile spikelets densely reddish brown pubescent, callus villous, pedicellate spikelets usually sterile and similar to the involucre spikelets, very palatable grass, feed value not high, similar to *Themeda triandra* Forssk., common in wetter sites, floodplains and floodways, red soils, grassland on alluvial plains, may occur on all soil types except very deep sands, see *Fragmenta Phytographiae Australiae* 5: 206. 1866, *Monographiae Phanerogamarum* 6: 667. 1889 and *Index Kewensis* Suppl. 1, 1: 424. 1906, *A Census of New South Wales Plants* 15. 1916, *Flora of Western Australia* 1: 344. 1952, *Ecological Management and Restoration* 2(1): 17-27. Apr 2001.

in English: tall oat-grass, native oat-grass

T. caudata (Nees) A. Camus (*Androscepia gigantea* var. *armata* Andersson; *Anthistiria caudata* Nees; *Anthistiria gigantea* Cavanilles subsp. *caudata* (Nees) Hook.f.; *Themeda caudata* (Nees) Dur. & Jack.; *Themeda caudata* (Nees) Honda; *Themeda gigantea* subsp. *caudata* (Nees) Hack.; *Themeda gigantea* var. *caudata* (Nees) Keng)

India, Sikkim, Bhutan, Darjeeling, Meghalaya. Perennial, caespitose, tall, large, elegant, stout, solid, flattened, erect from a woody rootstock, leaf sheath smooth, leaf blade rough, membranous ligule fringed with short hairs, leaves with a long sharp tip, inflorescence a large compound leafy pendulous panicle, racemes with only 1 spikelet pair, the lowermost pairs male, the upper pairs bisexual, lower glume leathery with soft brown hairs, long twisted awn, palea hyaline, growing in clumps on open ground, hill grassland, see *The Botany of Captain Beechey's Voyage* 245. 1838, *Nova Acta Regiae Societatis Scientiarum Upsaliensis* 2: 248. 1856, *Monographiae Phanerogamarum* 6: 676. 1889 and *Index Kewensis* Suppl. 1: 424. 1906, *Flore Générale de l'Indo-Chine* 7: 364. 1922, *Botanical Magazine* (Tokyo) 40: 108. 1926, *Claves Generum et Specierum Graminearum Primarium Sinicarum Appendice Nomenclatione Systematica* 247. 1957.

in India: ulla

T. cymbaria Hack. (*Themeda serratifolia* (Hack.) Roberty) Southern India, Sri Lanka. Perennial, large, tufted, raceme with 1-2 fertile spikelets, lower glume of sessile spikelet more or less glabrous, good fodder, hay, used for straw boards and pressed boards, pulp suitable for writing and printing papers, see *Monographiae Phanerogamarum* 6: 668. 1889 and *Handb. Fl. Ceylon* 5: 249. 1900, *Handb. Fl. Ceylon* 6: 336. 1931, *Grasses of Ceylon* 197. 1956, *Boissiera. Mémoires du Conservatoire de Botanique et de l'Institut de Botanique Systématique de l'Université de Genève* 92. 1960, *Grasses of Burma ...* 251. 1960.

in Sri Lanka: kara wata mana

T. gigantea (Cav.) Hackel (*Androscepia gigantea* (Cav.) Brongn.; *Anthistiria gigantea* Cav.)

Tropical Asia, Southeast Asia, India. Tall, leafy, fodder grass growing in large clumps, the whole raceme deciduous with the sessile spikelets attached, awnless, callus narrowly oblong, useful for paper-making, in India used for bronchitis and cough, found on open areas, along streams and roadsides, grassland, tall grasslands, steep slopes, resembling *Iseilema*, see *Icones Plantarum Rariorum* 5: 36, t. 458. 1799, *Encyclopédie Méthodique, Botanique* Suppl. 1: 396. 1810, *Flora Indica; or Descriptions ...* 1: 256-257. 1820, *Tijdschrift voor Natuurlijke Geschiedenis en Physiologie* 10: 117. 1843, *Plantae Junghuhnianae* 3: 364. 1854, *Synopsis Plantarum Glumacearum* 1: 401. 1854, *Fragmenta Phytographiae Australiae* 5: 206. 1866, *The Fodder Grasses of Northern India* 43. 1888, *Monographiae Phanerogamarum* 6: 667, 672-676. 1889 and *Bibliotheca Botanica* 85: 277. 1915, *Bulletin du Muséum d'Histoire Naturelle* (Paris) 26: 427. 1920, *Journal of the Arnold Arboretum* 29: 374. 1948, *Acta Botanica Neerlandica* 1(3): 483. 1952, *Claves Generum et Specierum Graminearum Primarum Sinicarum Appendice Nomenclatione Systematica* 247. 1957, *Diversity & Distributions* 9(1): 73-87. Jan 2003.

in Thailand: faek, faek nam, khaem luang, phaek, phaek nam, samong daeng, yaa chao chuu, yaa fae thung, yaa faek, yaa khamong

in India: ulla

T. gigantea (Cav.) Hackel var. **vulpina** (Andersson) Hack. (*Anthistiria vulpina* Andersson)

The Philippines, Asia. Clumped, found on open areas, along streams and roadsides, grassland, tall grasslands, steep slopes, see *Nova Acta Regiae Societatis Scientiarum Upsaliensis* ser. 3 2: 245. 1856, *Monographiae Phanerogamarum* 6: 673. 1889 and *Acta Botanica Neerlandica* 1(3): 481. 1952.

T. hookeri (Griseb.) A. Camus (*Anthistiria hookeri* Griseb.) India, Sikkim, China, Yunnan. Perennial, awned sessile spikelets, callus narrowly oblong, see *Nachrichten von der*

Gesellschaft der Wissenschaften zu Göttingen. Mathematisch-physikalische Klasse 1868: 91. 1868.

T. intermedia T. Durand & B.D. Jacks. (*Anthistiria gigantea* Cavanilles subsp. *intermedia* (Hackel) Hook.f.; *Themeda gigantea* subsp. *intermedia* Hack.; *Themeda gigantea* var. *intermedia* Hack.; *Themeda intermedia* (Hack.) Bor; *Themeda x intermedia* Bor; *Themeda x intermedia* (Hack.) Bor, *Themeda arundinacea* (Roxb.) Ridley x *Themeda villosa* (Poir.) A. Camus)

Asia, Borneo. Upper lemma lanceolate and awnless, see *The Fodder Grasses of Northern India* 43. 1888, *Monographiae Phanerogamarum* 6: 675. 1889 and *Index Kewensis* Suppl. 1: 424. 1901-1906, *Indian Forest Records: Botany* 1: 3, 96. 1938, *Acta Botanica Neerlandica* 1(3): 481. 1952.

T. quadrivalvis (L.) Kuntze (*Andropogon nutans* L.; *Andropogon quadrivalvis* L.; *Anthistiria ciliata* L.f.; *Anthistiria scandens* Roxb.; *Themeda ciliata* (L.f.) Hack.; *Themeda ciliata* (L.f.) Hack. ex Duthie; *Themeda ciliata* Hack.)

India, Sikkim, Nepal, Southeast Asia. Annual or perennial, very slender, suberect or geniculately ascending, scandent, base sometimes prostrate and rooting from the lower joints, glabrous, simple or branched, tall thickets forming, ligule membranous, sheath glabrous or hairy, blade folded in bud, leaves with an acute tip, inflorescence paniculate with spathe subtending the inflorescence, involucrel spikelets male or sterile, pedicellate spikelets sterile, awn hairy twisted and slightly bent, aggressive and invasive noxious weed species naturalized elsewhere, invades crops such as sugarcane, a contaminant of pasture grass seed, fires and overstocking increase infestations, sometimes an excellent grass for stock, a valuable fodder grass when young and green, commonly made into hay, sometimes not grazed very much, a source of paper pulp, in India used for thatching, can stand very dry conditions, grows vigorously in disturbed habitats and roadsides, see *Systema Vegetabilium. Editio decima tertia* 758. 1774, *Supplementum Plantarum* 113. 1781, *Flora Indica; or Descriptions ...* 1: 253. 1820, *Fodder Grasses N. Old World tropics and subtropics. Perennial bunchgrass, polymorphic and very variable in size and habit, tufted, bushy, tough, erect or geniculate, ascending, slender, often much branched, tussock or clumps forming, more or less leafy, glabrous, robust, cyanogenetic, rhizomatous, leaf blades initially folded but later expanded, basal leaf sheaths compressed and fibrous, ligule a short ciliate membrane, hairy or glabrous leaves sharply pointed, inflorescence a conspicuous interrupted panicle, several pendulous sessile racemes, spikelets enclosed at the base by a boat-shaped spathe, raceme containing 1 fertile spikelet, sessile spikelet solitary with a brown to reddish lower glume, awned with dark brown and twisted awns, pungent and bearded callus, a decreaser species, native pasture, wilted plants may cause poisoning in livestock, high grazing value, forage, very palatable and well grazed when young and before flowering, moderately palatable to unpalatable when mature, poor nutritive value, mature plants normally neglected, seed collected as human food in time of famine, cut for hay, thatching grass, habitat for native animals, stems and leaves used for pig bedding, seeds ground and baked into cakes, plants eaten by baboons, some tolerance to drought, does not tolerate flooding, susceptible to heavy stocking, useful in erosion control and rehabilitation, an indicator of excellent range condition, medicinally used in China, fiber used for making paper, grows on clay soils, open stony hillsides, hot and dry areas, savannah, pastures, in seasonally inundated areas, loose sandy soils, field borders, dambo grassland, grassy slopes, hard dry soil, open habitats, open deciduous bushland, along streams, open woodlands on clay, common

on low hills and near creeks, open grassland, waste grounds, undisturbed veld, *Themeda australe* R. Br. is a root parasite of kangaroo grass, see *Flora Aegyptiaco-Arabica* 178. 1775, *Observationes Botanicae* 3: 11. 1783, *Symbolae Botanicae*, ... 2: 24. 1791, *Syst. Southeast Asia, Sumatra, Nepal, China, Yunnan, India, Thailand. Perennial, cylindrical, large, tall, leafy, tufted, very stout and solid, reedlike, ligule membranous more or less ciliate, leaves very narrow tapering to a filiform tip, sheaths smooth and glabrous, basal sheaths strongly compressed, inflorescence a very large compound and leafy panicle, inflorescences branched and drooping, raceme containing 2-4 fertile spikelets, each raceme embraced below by a spatheole, many spathes and boat-shaped spatheoles, dark brown hairy bisexual spikelets, lowest homogamous spikelet sterile, upper lemma awnless or minutely awned, ornamental, poor fodder, grazed by stock when very young, noxious weed species, invasive, potential seed contaminant, fiber used for making paper, culms used for bars of the cages of birds, young shoots sweet eaten as a salad, weed in rubber plantations, grows in grassland, open spaces, on riverbanks, in rough damp grassland, see *Encyclopédie Méthodique, Botanique* Suppl. 1: 396. 1810, *Tijdschrift voor Natuurlijke Geschiedenis en Physiologie* 7: 295. 1840, *Tijdschrift voor Natuurlijke Geschiedenis en Physiologie* 10: 117. 1843, *Synopsis Plantarum Glumacearum* 1: 401. 1854, *Monographiae Phanerogamarum* 6: 675-676. 1889, *The Flora of British India* 7: 217. 1896 and *Index Kewensis* Suppl. 1: 424. 1906, *Flore Générale de l'Indo-Chine* 7: 364. 1922, *Handb. in English: Lyon's grass, silky kangaroo grass

in India: ulla

in Thailand: faek nam, faek thuean, yaa yuung, ya yung

Thinopyrum Á. Löve = *Elymus* L.,
Lophopyrum Á. Löve, *Psammopyrum* Á. Löve,
Trichopyrum Á. Löve

Greek *thinoo* "to fill, choke with sand," *this*, *thin* "a heap, the sand-heaps on the beach, sand-banks" and *pyros* "grain, wheat," a salt-tolerant cereal.

- About 5-20 species, coasts of Europe, southern Africa. Pooideae, Triticoideae, Triticeae, or Pooideae, Triticeae, Hordeinae, perennial, erect, rigid, creeping, tufted, glaucous, herbaceous, unbranched, aromatic, halophytic, rooting at nodes, auricles absent, ligule an unfringed membrane, stiff leaves narrow and linear, rhizomatous, stoloniferous, plants bisexual, inflorescence a single spike with more or less sessile spikelets, spikelets solitary and distichous, rachis fragile and stout, rachis internodes nearly flat, several florets hermaphrodite, uppermost floret reduced, 2 subequal persistent glumes 4- to 12-nerved, awnless glumes acute or truncate, lemma unawned or shortly mucronate, palea 2-keeled, 2 ciliate lodicules free and membranous, 3 stamens, ovary hairy, 2 stigmas white, fruit compressed and grooved, coastal grasses salt tolerant, suitable for revegetation of saline areas, growing in coastal sands, open habitats, taxonomic confusion concerning this genus, synonym of *Elytrigia* Desv., often referred to and included in *Elymus* and *Elytrigia*, hybrids with *Elytrigia* and *Leymus*, type *Thinopyrum junceum* (L.) Á. Löve, see *Species Plantarum* 1: 83. 1753, *Familles des Plantes* 2: 36, 606. 1763, *Novi Commentarii Academiae Scientiarum Imperialis Petropolitanae* 14(1): 539. 1770, *Botanisches Magazin (Römer & Usteri)* 7: 5. 1790, *Methodus Plantas Horti Botanici ...* 294-295. 1794, *Enumeratio Plantarum Horti Botanici Berolinensis, ...* 1: 132. 1809, *Nouveau Bulletin des Sciences, publié par la Société Philomatique de Paris* 2: 190. 1810, *Journal de Physique, de Chimie, d'Histoire Naturelle et des Arts* 89: 103. 1819, *Observations sur les Graminées de la Flore Belgique* 95. 1823 [1824], *Annals of Natural History* 1: 284. 1838, *Flore de Lorraine* 3: 191. 1844, *Nomenclator Botanicus Hortensis* 2: 174. 1846, *A Manual of the Botany of the Northern United States* 604. 1848, *Linnaea* 21(4): 413. 1848, *Flora Rossica* 4(13): 330. 1852, *Synopsis Plantarum Glumacearum* 1: 237, 354. 1854, *Bulletin de la Société Impériale des Naturalistes de Moscou* 35(2): 311, 330. 1862, *Die Natürlichen Pflanzenfamilien* 2(2): 88. 1887, *Index Kewensis* 1: 836. 1893, *Graminées. Thonandia H.P. Linder = *Notodanthonia*
Zotov, *Rytidosperma* Steud.

An anagram of *Danthonia* DC.

Danthonioidae, Danthonieae, type *Thonandia longifolium* (R. Br.) H.P. Linder, see *Novae Hollandiae Plantarum Specimen* 1: 26, t. 33. 1804, *Flore Française. Troisième Édition* 3: 32. 1805, *Prodromus Florae Novae Hollandiae* 176. 1810, *Annales des Sciences Naturelles; Botanique, sér. 3* 2: 116. 1844, *Flora Novae-Zelandiae* 1: 303, t. 69B. 1853 and *Transactions and Proceedings of the New Zealand Institute* 46: 37. 1914, *New Zealand J. Bot.* 1: 123. 1963, S.T. Blake, "Plinthanthesis and *Danthonia* and a review of the Australian species of *Leptochloa* (Gramineae)." in *Contributions from the Queensland Herbarium* 14: 3. 1972, H.P. Linder & G.A. Verboom, "Generic limits in the *Rytidosperma* (Danthonieae, Poaceae) complex." in *Telopea* 6(4): 597-627. 1996, *Sendtnera* 3: 11-93. 1996, H.P. Linder, "Nomenclatural corrections in the *Rytidosperma* complex (Danthonieae, Poaceae)." in *Telopea* 7(3): 269-275. 1997, *Australian Systematic Botany* 11(1) 41-52. 1998, *Flora of Australia* vol. 44B, Poaceae 3: 41-45. 2005.

Thorea Rouy = *Arrhenatherum* P. Beauv.,
Pseudarrhenatherum Rouy, *Thorea* J. Briquet
(Apiaceae, alt. Umbelliferae), *Thoreauea* J.K.
Williams (Apocynaceae)

After the French naturalist Jean Thore, 1762-1823, physician; see J.H. Barnhart, *Biographical notes upon botanists.*

3: 380. 1965; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993.

Pooideae, Poodae, Aveneae, or Pooideae, Poeae, Aveninae, type *Thorea longifolia* (Thore) Rouy, see *Species Plantarum* 1: 79-81, 264. 1753, *Essai d'une Nouvelle Agrostographie* 55, 152, 153. 1812, *Mantissa* Addit. I. ad Mant. Cl. III: 526 [326]. 1827, *An Introduction to the Natural System of Botany* 21. July 1836, *Voyage botanique dans le midi de l'Espagne* 2: 657. 1844, Ludwig Georg Karl Pfeiffer (1805-1877), *Nomenclator botanicus*. Nominum ad finem anni 1858 publici juris factorum, classes, ordines, tribus, familias, divisiones, genera, subgenera vel sectiones designantium enumeratio alphabetica. Adjectis auctoribus, temporibus, locis systematicis, apud varios, notis literariis atque etymologicis et synonymis. Conscriptus Ludovicus Pfeiffer. Cassellis, sumptibus T. Fisheri, [1871-] 1873-1874 and *Archives des Sciences Physiques et Naturelles* sér. 4. 13: 614. 1902, *Flore de France* vol. 14. 1913, *Verhandlungen der Gesellschaft Deutscher Naturforscher und Ärzte* 85(2): 671. 1914, *Bulletin de la Société Botanique de France* 68: 401-402. 1921 [1922], *Lundellia* 5: 47-57, f. 1-2. 2002, *Contributions from the United States National Herbarium* 48: 119-121. 2003.

Thoreochloa J. Holub = *Arrhenatherum* P.
Beauv., *Pseudarrhenatherum* Rouy

After the French naturalist Jean Thore, 1762-1823, physician; see J.H. Barnhart, *Biographical notes upon botanists.* 3: 380. 1965; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993.

Pooideae, Poodae, Aveneae, or Pooideae, Poeae, Aveninae, see *Journal für die Botanik* 2: 314. 1799, Jean Thore, *Promenade sur les côtes du golfe de Gascogne*, etc. 92. Bordeaux 1810, *Essai d'une Nouvelle Agrostographie* 55, 152, 153. 1812, *Voyage botanique dans le midi de l'Espagne* 2: 657. 1839-1845, *Flore de Département des Hautes-Pyrénées* 78. 1867, *Nomenclator botanicus* 1: 274. 1872 and *Bulletin de la Société Botanique de France* 68: 401-402. 1921, *Boletim da Sociedade Broteriana, ser. 2* 7: 119. 1931, *Acta Universitatis Carolinae: Biologica* 1962: 154. 1962 [1963], *Contributions from the United States National Herbarium* 48: 119-121. 2003.

Thouarsia Kuntze = *Thuarea* Pers.

Named after the French botanist Louis-Marie Aubert Aubert du Petit-Thouars, 1758-1831, traveler and plant collector, among his publications are *Mélanges de botanique et de voyages ...* Paris 1811, *Plantes des îles de l'Afrique australe ...* Paris [1804], *Genera nova madagascariensia*. [Paris

1806], *Histoire particulière des plantes orchidées ...* Paris 1822 and *Histoire des végétaux recueillis dans les isles australes d'Afrique ...* Paris 1806 [-1808]; see Mariella Azzarello Di Misa, a cura di, *Il Fondo Antico della Biblioteca dell'Orto Botanico di Palermo*. 98. Palermo 1988; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 109. 1972; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. Philadelphia 1964; Stafleu & Cowan, *Taxonomic literature*. 1: 704-706. 1976.

Panicaceae, see *Syn. Pl.* 1: 110. 1805, *Genera nova madagascariensis* 3. [Paris 1806], *J. Bot.* 13: 332. 1875 and *Lexikon Generum Phanerogamarum* 558. 1903.

Thrasya Kunth = Tylothrasya Döll

From the Greek *thrasys* "bold."

About 20-22-25 species, Central and South America. Panicoideae, Panicodae, Paniceae, or Panicoideae, Paniceae, Paspalinae, perennial or rarely annual, small, caespitose, herbaceous, slender, robust, unbranched, ligule an unfringed membrane, leaves narrow and mostly basal, plants bisexual, inflorescence from the uppermost nodes, single raceme, spikelets solitary or paired arranged in unilateral branches, longer spikelets hermaphrodite, spikelets 2-flowered, lower floret male or sterile, upper floret bisexual, 2 glumes very unequal, upper glume acuminate and many-veined to reticulate in the upper portion, lower glume small or absent, upper glume 3- to 7-nerved, lower lemma coriaceous and splitting into 2 halves, lower palea present, upper lemma coriaceous with inrolled flat margins, 2 lodicules free and fleshy, 2-3 stamens, ovary glabrous, 2 stigmas pilose, sometimes spikelets with a slightly fleshy basal callus, fruit compressed, open habitats, savannahs, wet sands, wet rocks, moist cliffs, lowland savannahs, wet places along stream and rivers, some species of *Thrasya* within *Paspalum*, type *Thrasya paspaloides* Kunth, see *Species Plantarum* 1: 55. 1753, *Systema Naturae, Editio Decima* 846, 855, 1359. 1759, *Nova Genera et Species Plantarum* 1: 120-121, t. 39. 1815 [1816], *Species Graminum* 3: t. 280. 1829-1830, *Flora Brasiliensis* 2(2): 295-296, pl. 37. 1877, *Genera Plantarum* 3(2): 1101. 1883, *Die Natürlichen Pflanzenfamilien* 2(2): 35. 1887 and *Österreichische Botanische Zeitschrift* 51: 367. 1901, *Proceedings of the Biological Society of Washington* 24: 115. 1911, *Annals of the Missouri Botanical Garden* 30(2): 175-176. 1943, *Fieldiana: Botany, New Series* 4: 1-608. 1980, *Brittonia* 32(2): 217-221. 1980, *Acta Botanica Venezuelica* 14(4): 7-93. 1985 [1987], *Genera Graminum* 288-289. 1986, *Ann. Missouri Bot. Gard.* 74: 434-436. 1987, *Bol. Mus. Para. Emilio Goeldi, Sér. Bot.* 4(2): 235-241. 1988, *Flora of the Guianas. Morrone, "A systematic revision and phylogeny of *Paspalum* subgenus *Ceresia* (Poaceae: Panicoideae: Paniceae)." *Annals of the Missouri Botanical Garden* 89(3): 337-399. 2002, G.H. Rúa & S. Aliscioni, "A morphology-based cladistic analysis of *Paspalum* sect. *Pectinata*." *Systematic Botany* 27(3): 489-501. 2002, *Contributions from the United States National Herbarium* 46: 443-527, 613-616. 2003, *Am. J. Bot.* 90: 796-821. 2003.

Species

T. achlyosphila Soderstr. (from the Greek *achlys* "obscurity, a mist, darkness, trouble" and *philos* "loving"; Achlys, the goddess of obscurity, the goddess of hidden places)

Guyana. Perennial, tufted, mat-forming, branched, leaf sheaths keeled, ligule membranous, inflorescence terminal and lateral, racemes lanceolate, related to *Thrasya granitica* A.G. Burm., see *Memoirs of the New York Botanical Garden* 12(3): 2, 4. 1965.

T. auricoma A.G. Burm.

Brazil. See *Brittonia* 34: 461. 1982.

T. axillaris (Swallen) A.G. Burm. ex Judz. (*Paspalum axillare* Swallen; *Paspalum delicatum* Swallen; *Paspalum rami-anum* Camacho, Rodr.-Rodr. & L. Guevara)

Suriname, Venezuela. Annual, straggling, inflorescence terminal and axillary, solitary raceme, glumes usually absent, lower floret sterile, upper floret pitted, 2 stamens, open forest, see *Bulletin of the Torrey Botanical Club* 75: 84. 1948, *Contributions from the United States National Herbarium* 29(6): 268-269. 1948 [1949], *Fl. Suriname, Add. & Corr.* 1(2): 364. 1968, *Fl. Guianas, ser. A, Phanerog.* 8(187): 630-631. 1990.

T. campylostachya (Hack.) Chase (*Panicum campylostachyum* Hack.; *Thrasya ciliatifolia* Swallen; *Thrasya gracilis* Swallen)

South America, Mexico. Slender, tufted, geniculate and ascending, nodes pubescent, leaf blades linear flat acute glabrous or pubescent, solitary racemes terminal or axillary, spikelets elliptic glabrous, upper glume oblong 5-nerved obtuse or acute, lower lemma flat or grooved, upper lemma acute, prairie, savannah, forest, forest margins, see *Nova Genera et Species Plantarum* 1: 120-121, t. 39. 1815 [1816] and *Österreichische Botanische Zeitschrift* 51: 367. 1901, *Proceedings of the Biological Society of Washington* 24: 115. 1911, *Annals of the Missouri Botanical Garden* 30(2): 175-176. 1943.

T. cinerascens (Döll) Chase ex Judz. (*Panicum cinerascens* Döll; *Paspalum cinerascens* (Döll) A.G. Burm. & C.N. Bastos; *Thrasya cinerascens* (Döll) Judz.)

Guianas. Perennial, caespitose, coarse, inflorescence erect, paired spikelets in 2 rows, lower floret mal, upper glume reticulate in the upper portion, see *Flora Brasiliensis* 2(2): 189. 1877 and *Boletim do Museu Paraense Emílio Goeldi, Série Botânica* 4(2): 241. 1988, *Flora of the Guianas. Series A, Phanerogams* 8(187): 631-632. 1990.

T. crucensis Killeen

Bolivia, Santa Cruz. Perennial, caespitose, simple, erect, rhizomatous, forming dense clumps, leaf blades linear, rachis with ciliate margins, spikelets elliptic pubescent or pilose, glumes lanceolate, upper lemma elliptic acute, wooded savannah, sandy soil, see *Annals of the Missouri Botanical Garden* 77(1): 190, f. 7. 1990.

T. cultrata (Trinius) Nees (*Panicum cultratum* Trin.; *Paspalum cultratum* (Trin.) A.G. Burm.)

Brazil. Inflorescence with 1-3 solitary racemes, glabrous spikelets, sulcate lower lemma, see *De Graminibus Paniceis* 126. 1826, *Flora Brasiliensis seu Enumeratio Plantarum* 2: 95. 1829 and *Proc. Biol. Soc. Wash.* 24: 115. 1911, *Acta Botanica Venezuelica* 14(4): 90. 1985[1987].

T. glaziovii A.G. Burm.

Brazil. See *Brittonia* 34: 458-462. 1982, *Edinburgh Journal of Botany* 48: 73-80. 1991.

T. granitica A.G. Burm. (*Thrasya campylostachya* sensu Amshoff & Henrard, non (Hack.) Chase)

Suriname. Perennial, tufted, terminal raceme, spikelets elliptical, raceme rachis pilose to ciliate, lower floret male, lower glume absent or minute, upper glume veined, related to *Thrasya campylostachya* (Hack.) Chase, see *Fl. Suriname* 1(1): 333. 1943, *Brittonia* 32(2): 219-220, f. 3. 1980.

T. hitchcockii Chase

Panama. Decumbent, spreading, pubescent leaves, forming dense clumps, damp places, along rivers and streams, see *Journal of the Washington Academy of Sciences* 17: 142. 1927.

T. longiligulata Bastos & A.G. Burm.

Brazil. See *Boletim do Museu Paraense Emílio Goeldi, Série Botânica* 4(2): 236, f. 1-2. 1988.

T. mosquiensis Davidse & A.G. Burm.

Nicaragua. See *Ann. Missouri Bot. Gard.* 74(2): 434, f. 1. 1987.

T. oreophila A.G. Burm.

Brazil. Along roadsides, see *Brittonia* 34: 458. 1982.

T. parvula A.G. Burm.

Brazil. Annual, minute spikelets, upper glume absent or greatly reduced, upper florets finely pitted, 2 stamens, see *Brittonia* 32(2): 217-218, f. 1. 1980.

T. paspaloides Kunth (*Ceresia aristata* Willd. ex Steud.; *Panicum thrasya* Trin.; *Thrasya setosa* Swallen; *Thrasya trinitensis* Mez)

South America. See *Nova Genera et Species Plantarum* 1: 121, t. 39. 1815 [1816], *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 3,1(2-3): 228. 1834, *Nomenclator Botanicus. Editio secunda* 1: 333. 1840 and *Repertorium Specierum Novarum Regni Vegetabilis* 15: 125. 1918, *Fieldiana, Botany* 28(1): 17. 1951, *Bot. J. Linn. Soc.* 82: 331-342. 1981.

T. petrosa (Trinius) Chase (*Panicum petrosum* Trin.; *Panicum petrosum* var. *mollis* Pilg.; *Thrasya petrosa* (Trin.) Kuhlman, nom. illeg., non *Thrasya petrosa* (Trin.) Chase; *Tylothrasya petrosa* (Trin.) Döll)

Mexico, Bolivia, Brazil. Perennial, erect, tufted, robust, simple or branched, nodes bearded, internodes glabrous or hairy, rhizomatous, sheaths compressed and keeled, leaf blades linear attenuate or acuminate, solitary racemes exerted terminal or axillary, pilose spikelets elliptic-lanceolate gaping at maturity, small lower glume flexuous, upper glume oblong 5-nerved obtuse or acuminate, lower floret male, lower lemma grooved on the back and splitting into 2 halves, anthers purple to orange, mild laxative, diuretic, applied as emollient for swollen liver, in pasture, grassland, stony places, woodland, sandy soil, campos, savannah and dry savannah, damp ground, in shade, resembles *Thrasya thrasyooides*, see *Species Graminum* 3: t. 280. [1829-1830], *Flora Brasiliensis* 2(2): 296, pl. 37. 1877 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 30(1): 134. 1901, *Proceedings of the Biological Society of Washington* 24: 115. 1911, *Comissão de Linhas Telegráficas Estratégicas de Matto-Grosso ao Amazonas, Botanica* 67 (Bot. 11): 93. 1922, *Fl. Suriname* 1(1): 332. 1943, *Annals of the Missouri Botanical Garden* 81(4): 768-774. 1994.

in Brazil: barba de bode

T. petrosa (Trinius) Chase var. ***ciliata*** A.G. Burm.

Brazil. See *Proceedings of the Biological Society of Washington* 24: 115. 1911, *Brittonia* 32(2): 220, f. 4. 1980.

T. reticulata Swallen (*Paspalum multinervium* A.G. Burm.; *Paspalum reticulatum* Hack.)

Brazil. Perennial, densely tufted, nodes bearded to densely pubescent, ligule membranous and ciliate, inflorescence terminal, spikelet pedicel dimorphic, upper glume reticulate, lower floret male, sulcate lower lemma, anthers purple, closely related to *Thrasya cinerascens* (Döll) Chase ex Judz., see *Österreichische Botanische Zeitschrift* 51: 199. 1901, *Contributions from the United States National Herbarium* 29(6): 267-268. 1948 [1949], *Acta Botanica Venezuelica* 14(4): 90. 1985[1987].

T. robusta Hitchc. & Chase

West Indies, Venezuela. Perennial, caespitose, erect, nodes bearded to densely pubescent, solitary racemes, upper glume and lower lemma densely hairy, lower floret male or sterile, upper floret slightly beaked, in savannah, grassland, pasture, along roadsides, forest margin, related to *Thrasya cultrata* (Trin.) Nees, see *Contributions from the United States National Herbarium* 18(7): 297. 1917.

T. scandens (Tutin) Soderstr. & A.G. Burm. (*Paspalum scandens* Tutin; *Thrasya guianensis* Swallen)

British Guiana, French Guiana. Caespitose, scrambling, lower glume flat, upper glume finely veined, lower floret male, savannah, see *Journal of Botany, British and Foreign* 72(864): 338. 1934, *Bull. Torrey Bot. Club* 75: 85. 1948, *Memoirs of the New York Botanical Garden* 9(3): 250. 1957, *Brittonia* 32: 220. 1980.

T. schumannii (Pilg.) Pilg. (*Panicum schumannii* Pilg.)

Brazil. See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 30(1): 134. 1901, *Das Pflanzenreich*, edition 2, 14e: 69, f. 39 A-O. 1940.

T. seminuda A.G. Burm.

Brazil. See *Brittonia* 32(2): 218-219, f. 2. 1980.

T. setosa Swallen (*Thrasya paspaloides* Kunth)

Venezuela. Densely pubescent, along riverbanks, forming dense clumps, see *Nova Genera et Species Plantarum* 1: 121, t. 39. 1815 [1816] and *Fieldiana, Bot.* 28(1): 17. 1951, *Bot. J. Linn. Soc.* 82: 339-341. 1981.

T. stricta A.G. Burm.

Venezuela. Forming dense colonies, see *Acta Bot. Venez.* 14(4): 75-77, f. 16. 1985 [1987].

T. thrasyooides (Trin.) Chase (*Panicum thrasyooides* Trin.; *Paspalum pilosum* Spreng. ex Steud., nom. illeg., non *Paspalum pilosum* Lam.; *Thrasya hirsuta* Nees)

Brazil, Bolivia. Erect, caespitose, slender, leaf blades linear acuminate, leaves mostly basal, ligules membranous, terminal solitary racemes, rachis with ciliate margins, spikelets elliptic-oblong pubescent, lower glume small, upper glume elliptic 3- to 5-nerved, lower lemma coriaceous acute, upper lemma acute, related to *Thrasya trinitensis*, see *De Graminibus Paniceis* 126. 1826, *Flora Brasiliensis seu Enumeratio Plantarum* 2: 94. 1829, *Nomenclator Botanicus. Editio secunda* 2: 272. 1841 and *Proceedings of the Biological Society of Washington* 24: 114. 1911.

T. trinitensis Mez (*Thrasya paspaloides* Kunth)

Trinidad. Perennial, caespitose, compact, clumped, softly hairy, leaves mainly basal, leaf blade strongly keeled, inflorescence terminal, lower floret male, lower glume absent, upper glume veined, in savannah, dry rocky places, open savannah, marshy areas, closely related to *Thrasya paspaloides* Kunth, see *Nova Genera et Species Plantarum* 1: 121, t. 39. 1815 [1816] and *Repertorium Specierum*

Novarum Regni Vegetabilis 15: 125. 1918, *Bot. J. Linn. Soc.* 82: 339-341. 1981.

Thrasypopsis Parodi

Resembling *Thrasya*.

Two species, Brazil. Panicoideae, Panicodae, Paniceae, or Panicoideae, Paniceae, Paspalinae, perennial, caespitose, herbaceous, unbranched, leaves mainly basal, auricles absent, ligule an unfringed membrane, plants bisexual, inflorescence of 1-2 racemes, spikelets solitary paired, incomplete florets proximal to the female-fertile florets, 2 glumes more or less equal, small lower glume 6- to 7-nerved, coriaceous upper glume 11-17-nerved, lower lemma coriaceous 7- to 9-nerved, palea present, 2 free and fleshy lodicules, 3 stamens, ovary glabrous, 2 stigmas, savannahs, linked to *Thrasya*, type *Thrasypopsis rawitscheri* Parodi, see *Boletín de la Sociedad Argentina de Botánica* 1(4): 293-297. 1946, *Brittonia* 32(2): 217-221. 1980, *Phyton. Annales Rei Botanicae* 23: 101-116. 1983, *Contributions from the United States National Herbarium* 46: 616. 2003.

Species

T. juergensii (Hack.) Soderstrom & A.G. Burm. (also *juergensii*) (*Panicum juergensii* Hack.; *Panicum jurgensenii* Hack., nom. illeg., non *Panicum jurgensenii* (E. Fourn.) Scribn. & Merr.; *Thrasypopsis juergensii* (Hack.) Soderstr. ex Burman; *Thrasypopsis rawitscheri* Parodi)

Southern Brazil. Solitary or packed spike-like panicles, lower glume present, lower lemma flat on the back, see *Verhandlungen der kaiserlich-königlichen zoologisch-botanischen Gesellschaft in Wien* 65(1-2): 70-71. 1915, *Boletín de la Sociedad Argentina de Botánica* 1(4): 294, f. 1. 1946, *Brittonia* 32(2): 221. 1980.

T. repanda (Nees ex Trin.) Parodi (also *repandum*) (*Panicum repandum* Nees, nom. illeg., non *Panicum repandum* Nees ex Trin.; *Panicum repandum* Nees ex Trin.; *Thrasypopsis repanda* (Nees) Parodi)

Brazil. Solitary spike-like panicles, lower glume absent, lower lemma grooved on the back, see *Species Graminum* 2: t. 150. 1829, *Flora Brasiliensis seu Enumeratio Plantarum* 2: 98. 1829 and *Boletín de la Sociedad Argentina de Botánica* 1(4): 297. 1946.

Thrixgyne Keng = *Duthiea* Hack.

From the Greek *thrix*, *trichos* "hair" and *gyne* "female, woman."

Aveneae, type *Thrixgyne dura* Keng, see *Verhandlungen der kaiserlich-königlichen zoologisch-botanischen Gesellschaft in Wien* 45: 200. 1896 and *Archives de Biologie Végétale*

Pure et Appliquée 1: 64-65. 1901, *Sunyatsenia* 6: 80, 82-85, t. 13. 1941, *Claves Generum et Specierum Graminearum Primarum Sinicarum Appendice Nomenclatione Systematica* 201. 1957, *Acta Phytotaxonomica Sinica* 10(2): 182. 1965.

Thuarea Persoon = *Microthuareia* Thouars, *Ornithocephalochloa* Kurz, *Thouarsia* Kuntze

Named after the French botanist Louis-Marie Aubert Aubert du Petit-Thouars, 1758-1831, traveler and plant collector, among his publications are *Mélanges de botanique et de voyages* ... Paris 1811, *Plantes des îles de l'Afrique australe* ... Paris [1804], *Genera nova madagascariensia*. [Paris 1806], *Histoire particulière des plantes orchidées* ... Paris 1822 and *Histoire des végétaux recueillis dans les îles australes d'Afrique* ... Paris 1806 [-1808]; see Mariella Azzarello Di Misa, a cura di, *Il Fondo Antico della Biblioteca dell'Orto Botanico di Palermo*. 98. Palermo 1988; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 109. 1972; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. Philadelphia 1964.

Two species, Madagascar, Asia, Polynesia. Panicoideae, Panicoideae, Paniceae, perennial, herbaceous, unarmed, branched or unbranched, slender, decumbent, creeping, rooting at nodes, stoloniferous, mat-forming, auricles absent, ligule a fringe of hairs to a ciliate membrane-like, plants bisexual, hermaphrodite florets present or absent, inflorescence a single spiciform deciduous raceme on a very short culm, short unilateral spike enclosed in a spathiform sheath, foliaceous rhachis, 1-2 persistent bisexual spikelets below with 1 staminate or neuter floret and 1 perfect or pistillate floret, male deciduous spikelets above with 2 florets staminate, 1 to 2 glumes per spikelets, upper glume 5-nerved, lower glume small or suppressed, upper lemma with flat margins, palea present, 2 free and fleshy lodicules, 3 stamens, ovary glabrous, 2 stigmas, beach grass, open habitats, on sandy beaches, seashore sands, related to *Brachiaria* (Trin.) Griseb., type *Thuarea sarmentosa* Pers., see *Syn. Pl.* 1: 110. 1805, *Genera nova madagascariensia* 3. [Paris 1806], *Prodromus Florae Novae Hollandiae* 197. 1810, *Journal of Botany, British and Foreign* 18: 332, t. 171, f. 1-18. 1875 and *Lexikon Generum Phanerogamarum* 558. 1903.

Species

T. involuta (G. Forst.) R. Br. ex Sm. (*Ischaemum involutum* G. Forst.; *Ornithocephalochloa arenicola* Kurz; *Panicum sarmentosum* (Pers.) Raspail, nom. illeg., non *Panicum sarmentosum* Roxb.; *Thuarea involuta* (G. Forst.) R. Br. ex Roem. & Schult., nom. illeg., non *Thuarea involuta* (G. Forst.) R. Br. ex Sm.; *Thuarea involuta* (G. Forst.) Roem. & Schult.; *Thuarea sarmentosa* Pers.)

Southeast Asia, Malaysia, Sri Lanka, eastern Polynesia. Perennial, prostrate, long creeping, diffusely branching, rooting at nodes, forming a dense mat, flowering branches erect and short, ligule short and fringed with hairs, leaves in 2 rows, leaf blades lanceolate to linear-lanceolate, inflorescence a simple raceme, spikes 1-sided and terminal enclosed by a folded sheath, spikelets sessile, second glume and lower lemma membranous, caryopsis beaked, weed, native pasture species, a good fodder and a good soil-binder, grows near the shore, coastal sand dunes, on sandy beaches, coral rubble, see *Species Plantarum* 2: 1049. 1753, *Florulae Insularum Australium Prodromus* 73. 1786, *Syn. Pl.* 1: 110. 1805, *Systema Vegetabilium* 2: 208. 1817, *Annales des Sciences Naturelles* 1. 5: 299. 1825, *Journal of Botany, British and Foreign* 18: 332, t. 171, f. 1-18. 1875 and *Grasses of Ceylon* 157. 1956, *Grasses of Burma* ... 369. 1960.

in English: beach grass

in Tonga: kefukefu

in Guam: lasaga

in Japan: Kuroiwa-zasa (Hisashi Kuroiwa was a plant collector in the Ryukyus, author of "A list of phanerogams collected in the southern part of Isl. Okinawa, one of the Loochoo chain." *Botanical Magazine* (Tokyo) 14: 109-112, 122-126, 139-143. 1900)

T. perrieri A. Camus

Madagascar. See *Bulletin de la Société Botanique de France* 75: 912. 1929.

Thurberia Bentham = *Greenia* Nutt., *Greenia* S. Wallman (Liliaceae), *Limnodea* L.H. Dewey, *Sclerachne* Torr. ex Trin., *Thurberia* A. Gray (Malvaceae)

After the American botanist George Thurber, 1821-1890, naturalist, 1850-1853 Mexican-U.S. Boundary Survey, chemist, professor of botany and horticulture at Michigan Agricultural College 1859-63 and editor of the *American Agriculturist* 1863-1885; see Joseph Ewan, *Rocky Mountain Naturalists*. 64, 321. The University of Denver Press 1950; J.H. Barnhart, *Biographical notes upon botanists*. 3: 382. Boston 1965; Ignatz Urban, *Geschichte des Königlichen Botanischen Museums zu Berlin-Dahlem (1815-1913). Nebst Aufzählung seiner Sammlungen*. 1916; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 400. 1972; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933; J. Ewan, editor, *A Short History of Botany in the United States*. 45. New York and London 1969; S. Lenley et al., *Catalog of the manuscript and archival collections and index to the correspondence of John Torrey*. literature. 6: 334-335. 1986; Irving William Knobloch, compiled by, "A preliminary verified list of plant collectors in Mexico." *Phytologia Memoirs*. VI. Plainfield, N.J. 1983.

Pooideae, Poaeae, Aveninae, see *De Fructibus et Seminibus Plantarum* 2: 188. Apr-Mai 1791, *Transactions of the American Philosophical Society, new series*, 5: 142. 1835, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 6,4(3-4): 273. 1841, *Memoirs of the American Academy of Arts and Science, new series* 5: 308. 1854, *Journal of the Linnean Society, Botany* 19: 58. 1881, *Contributions from the United States National Herbarium* 2(3): 518. 1894 and D.M. Brandenburg & J.W. Thieret, "Cinna and Limnodea (Poaceae): not congeneric." *Sida* 19(1): 195-200. 2000, *Contributions from the United States National Herbarium* 48: 381, 426, 608, 654. 2003.

Thyridachne C.E. Hubb. = Tisserantiella Mimeur

From the Greek *thyridos* "a window, small door" and *achne* "chaff, glume," referring to the lower lemma.

One species, tropical Africa. Panicoideae, Panicodae, Paniceae, annual, herbaceous, ligule membranous, plants bisexual, contracted inflorescence racemose or paniculate, very slender spiciform panicle, spikelets falcate dorsally compressed, 2 glumes unequal to very unequal, lower glume nerveless, upper glume and lower lemma coriaceous, upper lemma cartilaginous, palea 2-nerved, lodicules absent, 3 stamens, ovary glabrous, 2 stigmas, related or allied to *Sacciolepis*, type *Thyridachne tisserantii* C.E. Hubb., see *Kew Bulletin* 4: 363-364. 1949, *Revue internationale de botanique appliquée et d'agriculture tropicale* 29: 593. 1949.

Species

T. tisserantii C.E. Hubb. (for the French botanist Charles Tisserant, 1886-1962, traveler, explorer and plant collector)

Africa. Upper glume gibbous.

Thyridolepis S.T. Blake

From the Greek *thyridos* "a window, small door," *thyra* "a door, entrance" and *lepis* "scale," referring to a hyaline depression in the lower glume, the scales are transparent.

About 3 species, Australia. Panicoideae, Panicodae, Neurachneae, perennial, more or less woody and persistent, scaly woolly bases, ligule fringed, blade rolled in bud, leaf blades linear to ovate and narrow, solid internodes, culms branched, plants bisexual, inflorescence a single and bristly or hairy spike-like raceme, spikelets bearded at the base

with distinct bristles from confluent tubercles, florets 2, lower floret male or sterile, upper floret bisexual, hairy callus present, 2 glumes obtuse very dissimilar, lower glume with a rectangular window surmounted by bristles, upper glume coriaceous and ribbed, lower lemma membranous barren clasping upper floret, palea entire, lodicules present or absent, 3 stamens, ovary glabrous, 2 stigmas, fruit compressed, drought-tolerant, native pasture species, fodder grasses, palatable, arid lands, dry grassland, scrub, open habitats, type *Thyridolepis mitchelliana* (Nees) S.T. Blake, see *Prodromus Florae Novae Hollandiae* 196. 1810 and Stanley Thatcher Blake (1910-1973), in *Contributions from the Queensland Herbarium*. 13: 25. 1972, *Australian Journal of Botany* 33: 317-336. 1985, Tein McDonald, "Extending that little bit further. An interview with Martin Driver and Ian Davidson." *Ecological Management and Restoration* vol. 1, issue 1: 3-9. Apr 2000, *Ecological Management and Restoration* 3(2): 81-89, 117-126, 179-188. 2002.

Species

T. mitchelliana (Nees) S.T. Blake (*Neurachne mitchelliana* Nees) (species named for the British (b. Stirlingshire) Lieutenant-Colonel Sir Thomas Livingstone Mitchell, 1792-1855 (d. Darling Point, N.S.W., Australia), plant collector, translator, in 1827 Deputy Surveyor-General of New South Wales, 1839 Fellow of the Royal Society, author of *Three Expeditions into the Interior of Eastern Australia*. London 1838, *The Australian Geography, with the Shores of the Pacific and Those of the Indian Ocean*. Sydney 1851, *The Lusiad of Luis de Camoens*, closely translated. London 1854 and *Journal of Expedition into Interior of Tropical Australia*. 1848; see Dean Boyce, *Clarke of the Kindur. Convict, Bushranger, Explorer*. Melbourne 1970. 1st edition; I.H. Vegter, *Index Herbariorum*. Part II (4), *Collectors M. Regnum Vegetabile* vol. 93. 1976; Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 492. London 1994; Jonathan Wantrup, *Australian Rare Books, 1788-1900*. Hordern House, Sydney 1987; N. Hall, *Botanists of the Eucalypts*. Melbourne 1978 and Supplement 1980)

South Australia, Western Australia, Northern Territory, Queensland, New South Wales. Perennial, tufted, erect, leafy, rhizomatous, base woolly and bulbous, culm nodes more or less pubescent, leaves stiff and lanceolate, sheath pubescent, ligule hairy, stems or peduncles silky-pubescent beneath the inflorescence, racemes narrowly cylindrical and hairy, spikelets usually rostrate, spikelets cleistogamous and hairy, lower glumes with a window surmounted by bristles, lower lemma sterile, drought-tolerant, native pasture species, very useful for grazing, very palatable when young, susceptible to prolonged heavy grazing, often in sandy or stony soils, sandy plains, semiarid grassland, mulga communities, red earth soils, stony ridges, dominant on hilly

areas, see *Contributions from the Queensland Herbarium* 13: 25. 1972.

in Australia: window mulga grass, mulga grass, mulga Mitchell grass, mulga Mitchell

T. multiculmis (Pilger) S.T. Blake (*Neurachne multiculmis* Pilger)

South Australia, Western Australia, Northern Territory. Tufted, base woolly, lower culm nodes more or less silky-pubescent, racemes linear, stems silky beneath the inflorescence, spikelets acuminate and bearded at the base, first glume with a hyaline cavity, second glume with ciliate margins, first lemma male or sterile, fertile lemma scarious and long-beaked, an indicator of good range condition, susceptible to prolonged heavy grazing, see *Contributions from the Queensland Herbarium* 13: 32. 1972.

T. xerophila (Domin) S.T. Blake (*Neurachne xerophila* Domin) (Greek *xeros* “dry” and *philos* “lover, loving”)

South Australia, Western Australia, Northern Territory, Queensland, New South Wales. Perennial, tufted, erect, leafy, base woolly and bulbous, lower culm nodes pubescent, leaves stiff and lanceolate, sheath more or less hairy, ligule hairy, racemes narrowly oblong and bristly, stems or peduncles glabrous or slightly pubescent beneath the inflorescence, spikelets bearded at the base, spikelets cleistogamous or chasmogamous, first glume with a hyaline cavity, second glume scaberulous, lower lemma male or sterile and rough to pubescent, fertile lemma scarious, grows in sandy or stony soils, see *Contributions from the Queensland Herbarium* 13: 33. 1972.

Thyridostachyum Nees = *Mnesithea* Kunth

From the Greek *thyridos* “a window, small door” and *stachys* “spike.”

Panicoideae, Andropogoneae, Rottboelliinae, see *Observationes Botanicae* 3: 11. 1783, *Révision des Graminées* 1: 153-154. 1829, *A Natural System of Botany* (edition 2) 379. 1836 and *Cytologia* 51: 43-50. 1986, *New Botanist* 21: 105-114. 1994, *Contributions from the United States National Herbarium* 46: 295-296, 616. 2003.

Thyrsia Stapf = *Phacelurus* Griseb.

From the Greek *thyrsos* “a panicle, a thyrses.”

About 3-4 species, tropical Africa, Asia. Panicoideae, Andropogonodae, Andropogoneae, Rottboelliinae, annual, herbaceous, robust, tough, stout, reedlike, ligule an unfringed membrane, plants bisexual, inflorescence spicate, terminal racemes or panicles, spikelets paired sessile and pedicellate, 2 glumes subequal, lower glume 2-keeled, pedicellate spikelets usually sterile or male, palea present, 2 free and fleshy lodicules, 3 stamens, ovary glabrous, often in

Phacelurus, type *Thyrsia inflata* Stapf, see *Supplementum Plantarum* 13, 114. 1781 [1782], *Spicilegium florum rumelicarum et bithynicarum* ... 2: 423-424. 1844 [1846], *Synopsis Plantarum Glumacearum* 1: 375. 1854, *Die Natürlichen Pflanzenfamilien* 2(2): 25. 1887, *Journal of the Linnean Society, Botany* 25(165-169): 86-87, pl. 35. 1889, *Catalogue of the African Plants Collected by Dr. F. Welwitsch in 1853-61* 2(1): 140. 1899 and *Annali di Botanica* 13: 36. 1914, *Flora of Tropical Africa* 9: 48-49. 1917, *Bulletin du Muséum National d'Histoire Naturelle* 27(5): 369. 1921, *Bulletin of Miscellaneous Information Kew* 1928: 35. 1928, *Flore Agrostologique du Congo Belge* 1: 53. 1929, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 11: 649. 1932, *Acta Phytotaxonomica et Geobotanica* 17: 15. 1957, *Grasses of Burma* ... 255. 1960, *Kew Bulletin* 33(2): 175-179. 1978, *Annals of the Missouri Botanical Garden* 81(4): 775-783. 1994.

Species

T. zea (C.B. Clarke) Stapf (*Phacelurus zea* (C.B. Clarke) Clayton; *Rottboellia thyrsoides* Hack.; *Rottboellia zea* C.B. Clarke; *Thyrsia thyrsoides* (C.B. Clarke) A. Camus)

Asia, China, Africa. See *J. Linn. Soc., Bot.* 25(165-169): 86-87, pl. 35. 1889, *Monographiae Phanerogamarum* 6: 283. 1889 and *Bull. Mus. Natl. Hist. Nat.* 27(5): 369. 1921, *Hooker's Icon. Pl.* 31(4): t. 3078, 3093, 3100. 1922, *Kew Bulletin* 33(2): 177. 1978.

Thyrsostachys Gamble

From the Greek *thyrsos* “a panicle, a thyrses” with *stachys* “spike,” probably referring to the form and to the disposition of the inflorescence.

A genus of 2-3 species, China, Thailand to Vietnam, Myanmar. Bambusoideae, Bambusodae, Bambuseae, perennial, sympodial, woody, arborescent, solid, unicaspitose, forming clumps very dense, erect to rigidly erect at the lower part and slightly outarched at the upper part, straight, manifold branching at high part of culm, many branches at each node, main branch indistinct, rhizomes pachymorph, flowering culms leafy, a white pubescent ring both above and below each joint, culm sheaths persistent shorter than internode, sheath blade long, no sheath auricles, ligule an unfringed membrane, auricles very small, leaf blades small and narrow, plants bisexual, inflorescence iterant terminal on short leafy or leafless branches, pseudopanicles, pseudospikelets on nodes subtended by a short sheath persistent, cluster of 1-3 fertile pseudospikelets and 1-2 sterile ones, glumes 2-4 very unequal, lemmas papery, lowest palea bifid, 0-3 very thin lodicules rarely none, 6 stamens, ovary glabrous or sparsely pubescent on top, 1-3 feathery or sparsely hairy stigmas, ornamental, found growing wild and also cultivated, rainforest, mixed forest, dry lowlands, moist hill

forest, type *Thyrsostachys siamensis* Gamble, see *Supplementum Plantarum* 13, 114. 1781 [1782], *Genera Plantarum* 1: 236. 1789, *Die Natürlichen Pflanzenfamilien* 2(2): 25. 1887, *Indian Forester* 20: 1. 1894, *Annals of the Royal Botanic Garden, Calcutta* 7: 58-60, 125, t. 51. 1896 and *Gard. Bull. Sing.* 16: 1-135. 1958, *Flora of Taiwan* 5: 768-770, 1978, *Taxon* 47: 739. 1998, *Taxon* 49(2): 273. 2000.

Species

T. oliveri Gamble

Myanmar. Tufted to densely tufted, large, sympodial, straight, erect, several branches, most of branches fascicled at the nodes, young culm green covered with white pubescence, prominent nodes thickened, wall thin or rather thick, culm sheath persistent or shedding late, culm sheaths fibrous, sheath auricles weak, sheath ligule flat, sheath blade long cordate or long triangular and erect, leaves linear-lanceolate acuminate and the base rounded into a short petiole, inflorescence terminal on short leafless branches, 2-3 fertile florets, 1-2 empty glumes, 2-3 lodicules, 6 dropping stamens, 3 stigmas, ornamental and decorative, edible seeds, young shoots eaten, culms used for construction purposes and basketry, poles and handicrafts, broom handles, building material, found in moist forests, open areas, lower hill forest, see *Indian Forester* 20: 1. 1894.

in Myanmar: mai-tong, thana-wa, thanawa

in Thailand: pao, phai raakdam, phai-ruak-dam, sa lon, waa bo suu, wa bo su

T. regia (Thomson ex Munro) Bennet (*Bambusa regia* Munro; *Bambusa regia* Thomson ex Munro; *Thyrsostachys regia* (Munro) Bennet; *Thyrsostachys siamensis* Gamble)

Thailand, Myanmar. Tufted, straight, thick-walled, several branches, persistent culm sheaths usually covering the base, nodes thickened, internodes green, culm sheaths pubescent on the back, leaves linear, 1-3 fertile florets, 2-3 glumes, 1-3 stigmas, beautiful and ornamental, young tender shoots eaten, occurs in dry and poor soils, see *Transactions of the Linnean Society of London* 26(1): 116. 1868 and *Indian Forester* 114(10): 711. 1988, *Taxon* 49(2): 273. 2000.

in English: monastery bamboo

T. siamensis Gamble (*Arundarbor regia* (Thomson ex Munro) Kuntze; *Arundarbor siamensis* Kurz ex Teijsmann & Binnendijk; *Bambusa regia* Thomson; *Bambusa regia* Thomson ex Munro; *Bambusa siamensis* Kurz ex Munro; *Thyrsostachys regia* (Thomson ex Munro) Bennet; *Thyrsostachys regia* (Munro) Bennet)

Thailand, Myanmar. Sympodial, smooth, grayish green, erect, arching, curved outwards at the tips, solid at the base, densely tufted, closely growing, very thick-walled almost solid, nodes not swollen, a white ring below the nodes, slender branches arising from midculm upward, most of the

branches fascicled, culm sheaths persistent or rotten closely covering the culm, sheath auricles absent and no cilia on sheath mouth, sheath ligule low and very short, sheath blade erect and narrow triangular or narrowly lanceolate, small leaves narrow lanceolate or linear, inflorescence terminal on leafy or leafless branches, bracteate clusters of few pseudospikelets, usually 2 perfect florets and a rachilla extension bearing a rudimentary floret, 1-2 empty glumes, 2-3 lodicules, 6 stamens, ovary apex glabrous, 1-3 stigmas, can be propagated by seed and rhizome cuttings, flowering sporadic and gregarious, flowering cycle not known, after flowering culms usually die, plants deciduous in the dry season, graceful and ornamental, elegant and decorative, delicious edible shoots pickled or steamed, wild or cultivated elsewhere, used as a wind break, fishing rod, parasol handle, basketry, for rural house building, materials for papermaking, occurs in mixed deciduous forest, dry or semievergreen forest, teak forest, hill forest, poor soil, not waterlogged areas, see *Transactions of the Linnean Society of London* 28: 116. 1868, *Revisio Generum Plantarum* 2: 761. 1891, *Annals of the Royal Botanic Garden, Calcutta* 7: 59-60, pl. 51. 1896 and *Gard. Bull. Sing.* 16: 80-81. 1958, *The Indian Forester* 114(10): 711-713. 1988, *Taxon* 47: 739. 1998.

in English: monastery bamboo, umbrella-handle bamboo, umbrella-handled bamboo, Thailand bamboo

in Indonesia: bambu jepang, bambu siam

in Myanmar: kyaung-wa, tiyova, tiyowa

in the Philippines: Thailand bamboo

in Thailand: huak, mai ruak, mai ti yo, phai ruak, ruak, sa lom, ti yo, waa bo bo, wa bo bo, wae bang, wae baang, wae pang

Local names: mai tiyo, mai hoak

Thysanachne C. Presl = *Arundinella* Raddi

Greek *thysanos* "a fringe, tassel" and *achne* "chaff, glume."

Panicoideae, Arundinelleae, type *Thysanachne scoparia* J. Presl, see *Species Plantarum* 2: 1049. 1753, *Species Plantarum. Editio quarta* 4: 908. 1806, *Agrostografia Brasiliensis* 36-37, t. 1, f. 3. 1823, *De Graminibus Paniceis* 62. 1826, *Thysanachne, Novum Plantarum Genus* 11-12, t. 6. 1829, *Reliquiae Haenkeanae* 1(4-5): 253. 1830, *Symb. Bot.* 1: 11-12. 1830, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 515. 1833, *Synopsis Plantarum Glumacearum* 1: 115. 1854, *Mexicanas Plantas* 2: 55. 1886, *Revisio Generum Plantarum* 2: 761. 1891 and *Contr. U.S. Natl. Herb.* 18(7): 290. 1917, *Annals of the Missouri Botanical Garden* 81(4): 768-774. 1994, *Contributions from the United States National Herbarium* 46: 111-113, 616-617. 2003.

Thysanolaena Nees = *Myriachaeta* Moritzi,
Thysanochlaena Gand.

Greek *thysanos* “a fringe, tassel” and *chlaena*, *chlaenion* “a cloak,” referring to the inflorescence, to the fringed upper lemma, to the pubescent fringe on the fertile lemmas.

One species, Tropical Asia. Centothecoideae, or Arundinoideae, Arundineae, or Panicoideae, Thysanolaeneae, perennial, tall, rhizomatous, tufted, stout, stems clumped, erect and reedlike, woody and persistent, usually unbranched, culm internodes solid, auricles present or absent, ligule an unfringed or fringed membrane, sheaths glabrous, leaf blades lanceolate to oblong-lanceolate and glabrous, plants bisexual, inflorescence a large ovoid contracted dense panicle, spikelets lanceolate and small to minute, bisexual spikelets with dimorphic florets disarticulating below the pedicel, lower floret sterile, upper floret perfect, 2 very unequal to subequal glumes 0- to 1-nerved and shorter than spikelet, 2 free and fleshy lodicules, 2-3 stamens, ovary glabrous, 2 stigmas plumose, screening plant, native pasture species, warm humid, open habitats, on mountains, banks of water courses, type *Thysanolaena agrostis* Nees, see *Observationes Botanicae* 4: 19. 1786, *Edinburgh New Philosophical Journal* 18: 180. 1835, *Systematisches Verzeichniss der von H. Zollinger in den Jahren 1842-1844* 101. 1846, *The Flora of British India* 7(22): 305. 1897 [1896] and *Bulletin de la Société Botanique de France* 66(7): 303. 1919 [1920], *Repertorium Specierum Novarum Regni Vegetabilis* 17(477-480): 86. 1921, *Botanisches Archiv* 1(1): 27. 1922, *J. Species

T. latifolia (Roxb. ex Hornem.) Honda (*Agrostis latifolia* Heyne ex Bor; *Agrostis maxima* Roxb.; *Agrostis scoparia* J. König ex Bor; *Melica latifolia* Roxb. ex Hornem.; *Melica latifolia* Roxb., nom. illeg., non *Melica latifolia* Roxb. ex Hornem.; *Myriachaeta arundinacea* Zoll. & Moritzi; *Myriachaeta glauca* Moritzi ex Steud.; *Neyraudia acarifera* (Trin.) Conert; *Panicum acariferum* Trin.; *Sporobolus gigas* (Steud.) Miq.; *Sporobolus scoparius* J. Presl; *Thysanolaena acarifera* Arn. & Nees; *Thysanolaena agrostis* Nees;

Thysanolaena assamensis Gand.; *Thysanolaena birmanica* Gand.; *Thysanolaena latifolia* (Roxb.) Honda; *Thysanolaena malaccensis* Gand.; *Thysanolaena maxima* (Roxb.) Kuntze; *Thysanolaena maxima* f. *maxima*; *Thysanolaena sikkimensis* Gand.; *Vilfa gigas* Steud.; *Vilfa scoparia* (J. Presl) Steud.)

Tropical regions. Perennial, stout, very robust, solid culms solitary or clustered, strongly tufted, erect or slightly spreading, often arching, bamboo-like, leaf sheath tightly wrapped around the stem, leaf blade lanceolate and tapering to a fine point, ligule membranous and stiffly hairy, large cordate leaves, huge inflorescence paniculate, large drooping and terminal panicle, 2 flowers, tiny spikelet in pairs on a common axis, spikelets awnless and short pedicellate, upper floret hermaphrodite, lower glume transparent, margins of upper lemma with long hairs or ciliate, palea linear, screening plant, stems used for making reed-pens for writing, dried panicles and leaves used as soft brooms, tender leaves and stem tips used as fodder for cattle and buffaloes, roots used medicinally, decoction of roots used as mouth-wash in fever, native pasture species, grows in high tufts on hillsides at the forest margins, near water, riverbanks, lightly shaded slopes, rocky slopes, shrubby hillsides, ravines, in shady and moist places, gravelly soils, see *Hortus Regius Botanicus Hafniensis* Suppl.: 117. 1819, *Flora Indica; or Descriptions ...* 1: 319-320, 330. 1820, *Species Graminum* 1: t. 87. 1827, *Reliquiae Haenkeanae* 1(4-5): 243. 1830, *Edinburgh New Philosophical Journal* 18: 180. 1835, *Gramineae* 49-50. 1841, *Nomenclator Botanicus. Tiarrhena (Maxim.) Nakai = *Miscanthus* Andersson

Orthographic variant of *Triarrhena* (Maxim.) Nakai, or from the Greek *tiara* “a small crown” and *arrhen* “male.”

Panicoideae, Andropogonodae, Andropogoneae, Andropogoninae, see *Öfversigt af Förhandlingar: Kongl. Svenska Vetenskaps-Akademien* 12: 165. 1855, *Primitiae Florae Amurensis* 331. 1859, *Mémoires Présentés à l'Académie Impériale des Sciences de Saint Pétersbourg par Divers Savans et lus dans ses Assemblées* 9: 331. 1859, *Journal of the Linnean Society, Botany* 19: 65. 1881, *Die Natürlichen Pflanzenfamilien* 2: 23. 1887, *Monographia Andropogonearum* 102. 1889 and *Botanical Magazine* 23: 107. 1909, *Journal of the Faculty of Science: University of Tokyo, Botany* 3(1): 391. 1930, *Journal of Japanese Botany* 25(1-2): 7. 1950, *Bull. Fac. Agric. Mie University* 17: 57, 59. 1958, *Pl. Taxonomic Soc. Korea, Seoul* 1972: 18, 17. 1972, *Journal of Huazhong Agricultural University (Suppl.)*: 56-60. 1989, *Flora Mesoamericana* 6: 378-379. 1994, *Sida* 16(2): 233-244. 1994, *Annals of the Missouri Botanical Garden* 81(4): 768-774. 1994, *Sida* 16(3): 551-580. 1995, *J. Fujian Acad. Agric. Sci.* 11(3): 19-22. 1996, *Journal of Plant Research* 115: 381-392. 2002, *Contributions from the United States National Herbarium* 46: 550-557, 617. 2003.

Timouria Roshev. = *Achnatherum* P. Beauv., *Stipa* L.

Pooideae, Stipeae, Stipinae, type *Timouria saposhnikovii* Roshev., see *Species Plantarum* 1: 78-79. 1753, *Essai d'une Nouvelle Agrostographie* 19-20, 146, pl. 6, f. 7. 1812, *Species Graminum* 3: t. 352. 1836 and *Flora Aziatskoj Rossii* 2(12): 173. 1916, *Contr. U.S. Natl. Herb.* 24(6): 181 and 24(7): 216. 1925, *Journal of the Washington Academy of Sciences* 17: 140. 1927, *Journal of the Washington Academy of Sciences* 18: 502. 1928, *Journal of the Washington Academy of Sciences* 23: 134. 1933, *Zlaki SSSR* 240. 1937, *Contributions from the United States National Herbarium* 48: 15-18, 717-650. 2003.

Tinaea Garzia = *Lamarckia* Moench, *Tinaea* Boiss. (Orchidaceae), *Tinea* Sprengel (Flacourtiaceae), *Tinea* Biv. (Orchidaceae)

Possibly from the Latin *tinea*, ae “a gnawing worm, moth,” or dedicated to Tineo, Sicilian botanist.

Pooideae, Poeae, Dactylidinae, see *Methodus Plantas Horti Botanici ...* 201. 1794, *Neue Entdeckungen im ganzen Umfang der Pflanzenkunde* 2: 165. 1820 [1821], *Giornale di Scienze, Letteratura ed Arti per la Sicilia* 1833: 149. 1833, *Relazione Accademica dell'Accademia degli Zelanti di Aci-Reale di Scienze, Lettere ed Arti* 3-4: 24. 1838, *Flora Orientalis* 5: 58. 1882 and *Contributions from the United States National Herbarium* 48: 420-421, 654. 2003.

Tisserantiella Mimeur = *Thyridachne* C.E. Hubb.

For the French botanist Charles Tisserant, 1886-1962, traveler, explorer and plant collector (Angola, Equatorial Africa, Central African Republic, Mozambique), author of *Catalogue de la flore de l'Oubangui-Chari* Toulouse 1950; see I.H. Vegter, *Index Herbariorum*. Part II (7), *Collectors T-Z. Regnum Vegetabile* vol. 117.

Panicoideae, Panicodae, Paniceae, type *Tisserantiella oubanguiensis* Mimeur, see *Kew Bulletin* 4: 363-364. 1949, *Revue internationale de botanique appliquée et d'agriculture tropicale* 29: 593. 1949, Roger Sillans, *Les savanes de l'Afrique centrale ...* Avant-propos du révérend père Charles Tisserant. Paris 1958.

Toresia Pers.

Orthographic variant of *Torresia* Ruiz & Pav., see *Flora Peruviana, et Chilensis Prodromus* 125. 1794, *Syn. Pl.* 2: 534. 1807 and *Contributions from the United States National Herbarium* 48: 654-655. 2003.

Torgesia Bornm. = *Crypsis* Aiton

After the German botanist Karl Emil Wilhelm Torges, 1831-1917, military physician, agrostologist, author of “Eine Neue *Calamagrostis* Persiens.” *Mitt. Thüring. Bot. Ver.*, n.f., Hft 10: 45-47, 87-88. 1897. See J.H. Barnhart, *Biographical notes upon botanists*. 3: 391. 1965; Stafleu & Cowan, *Taxonomic literature*. 6: 395-396. 1986; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 403. 1972.

Chloridoideae, Cynodonteae, Sporobolinae, or Chloridoideae, Zoysieae, Sporobolinae, type *Torgesia minuartioides* Bornm., see *Hortus Kewensis; or, a catalogue ...* 1: 48. 1789, *Collectanea ad omnem rem botanicam spectantia partim e propriis, partim ex amicorum schedis manuscriptis concinnavit et edidit J.J. Roemer*. Turici [Zürich], apud H. Gessnerum, [1806-]1809 and *Mittheilungen der Thüringischen Botanischen Vereins*, ser. 2, 30: 83. 1913, *Repertorium Specierum Novarum Regni Vegetabilis* 17(19-30): 293. 1921, *Die natürlichen Pflanzenfamilien, Zweite Auflage*

14d: 62. 1956, *Contributions from the United States National Herbarium* 41: 56-57, 220. 2001.

Torresia Ruíz & Pav. = *Anthoxanthum* L.,
Hierochloa R. Br.

Pooideae, Poaceae, Phalaridinae, type *Torresia utriculata* Ruiz & Pav., see *Species Plantarum* 1: 28. 1753, *Flora Peruviana, et Chilensis Prodrum* 125. 1794, *Systema Vegetabilium Florae Peruviana et Chilensis* 1: 251. 1798, *Prodrum Florae Novae Hollandiae* 208. 1810, *Essai d'une Nouvelle Agrostographie* 62, 164, t. 12, f. 5. 1812 and *Darwiniana* 19(2-4): 422-457. 1975, *Flora Patagónica* 3: 276-285. 1978, *Gayana, Botánica* 42: 1-157. 1985, *Regnum Veg.* 127: 19. 1993, *Contributions from the United States National Herbarium* 48: 111-115, 384-386, 654-655. 2003.

Torreyochloa G.L. Church

After the North American (b. New York) botanist John Torrey, 1796-1873 (d. New York), physician, chemist, professor of chemistry 1824-1827 (West Point) and 1827-1855 (New York), his writings include *Botany of New York*. Albany 1853 and *Plantae Frémontianae*. Washington and New York 1853, co-author with Asa Gray (1810-1888) of *A Flora of North America*. New York, London, Paris 1838-1843; see A. Hunter Dupree, in *D.S.B.* 13: 432-433. 1981; J.H. Barnhart, *Biographical notes upon botanists*. 3: 392. 1965; United States. *Pacific Railroad Survey*. [Includes *Descriptions of the General Botanical Collections* by J. Torrey] Washington 1856; Joseph Ewan, *Rocky Mountain Naturalists*. The University of Denver Press 1950; Jeannette Elizabeth Graustein, *Thomas Nuttall, Naturalist. Explorations in America, 1808-1841*. Cambridge, Harvard University Press 1967; J. Ewan, editor, *A Short History of Botany in the United States*. New York and London 1969; T.W. Bosser, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 404. 1972; H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 255. Oxford 1964; William Jay Youmans, editor, *Pioneers of Science in America*. 327-335. Library of the New York Botanical Garden. 1973; Stafleu and Cowan, *Taxonomic literature*. 6: 401-408. Utrecht 1986; Mariella Azzarello Di Misa, editor, *Il Fondo Antico della Biblioteca dell'Orto Botanico di Palermo*. 272.

Palermo 1988; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 790. Stuttgart 1993; Howard Atwood Kelly and Walter Lincoln Burrage, *Dictionary of American Medical Biography*. New York 1928; Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 885. Ansbach 1852; Irving William Knobloch, compiled by, "A preliminary verified list of plant collectors in Mexico." *Phytologia Memoirs*. VI. Plainfield, N.J. 1983; William Darlington, *Reliquiae Baldwinianae*. Philadelphia 1843; J.D. Milner, *Catalogue of Portraits of Botanists Exhibited in the Museums of the Royal Botanic Gardens*. Royal Botanic Gardens, Kew, London 1906; Ernest Nelmes & William Cuthbertson, *Curtis's Botanical Magazine Dedications, 1827-1927*. 91-92. [1931]; D.B. Tyler, *The Wilkes Expedition: The First United States Exploring Expedition (1838-1842)*. Philadelphia 1968.

About 4-5 species, North America and northeast Asia, northern hemisphere. Pooideae, Poodae, Poaceae, or Pooideae, Poaceae Torreyochloinae, perennial, herbaceous, hollow, tufted, decumbent to erect, lower branches usually reflexed to erect, leaves basal, auricles absent, ligule an unfringed membrane, stoloniferous, sometimes rhizomatous, sometimes rooting at the nodes, open to partially open leaf sheaths, plants bisexual, inflorescence paniculate, spikelets pedicellate, 2 unequal to very unequal glumes 1- to 3-nerved, lemmas awnless and 5- to 7-nerved, palea present, 2 free and membranous lodicules, 3 stamens, ovary more or less hairy or glabrous, 2 stigmas, in wet meadows, wet habitats, freshwater, sometimes confused with *Glyceria*, type *Torreyochloa pauciflora* (J. Presl) G.L. Church, see *Prodrum Florae Novae Hollandiae* 179, 182. 1810, *The Genera of North American Plants* 1: 62. 1818, *Herbarium Pedemontanum* 6: 235. 1836, *Flora italiana, ossia descrizione delle piante ...* 1: 366. 1848 and *American Journal of Botany* 36: 163. 1949, *Rhodora* 54: 42-45, 197-200. 1952, *Phytologia* 70(5): 361-365. 1991, *Grasses: Systematics and Evolution* 61-74. 2000, *Contributions from the United States National Herbarium* 48: 655-656. 2003.

Species

T. californica (Beetle) Church (*Glyceria californica* Beetle; *Glyceria erecta* Hitchc.; *Puccinellia californica* (Beetle) Munz; *Torreyochloa pallida* var. *pauciflora* (J. Presl) J.I. Davis)

Northern America, U.S., California. Perennial, herbaceous, rhizomatous, rare grass, see *Reliquiae Haenkeanae* 1(4-5): 257. 1830 and *A Flora of California* 1: 161. 1912, *Madroño* 8(5): 161. 1946, *American Journal of Botany* 36: 163-164. 1949, *Aliso* 4(1): 87. 1958, *Phytologia* 70(5): 364. 1991.

in English: Sierran false manna grass, Sierra false manna-grass, Sierra Nevada alkali grass

T. erecta (A.S. Hitchc.) Church (*Glyceria erecta* A.S. Hitchc.; *Panicularia erecta* (Hitchc.) Hitchc.; *Puccinellia erecta* (A.S. Hitchc.) Munz)

Northern America, U.S. Perennial, lower branches erect, 4-6 florets, wetland, lake margins, streams, see *A Flora of California* 1: 161. 1912, *American Journal of Botany* 2: 309. 1915, *American Journal of Botany* 36: 163. 1949, *Aliso* 4(1): 87. 1958.

in English: spiked false manna grass, spiked mannagrass, upright mannagrass

T. pallida (Torrey) G.L. Church (*Glyceria pallida* (Torr.) Trin.; *Panicularia pallida* (Torr.) Kuntze; *Poa dentata* Torr.; *Poa pallida* Lag.; *Puccinellia pallida* (Torrey) R.T. Clausen; *Puccinellia pallida* (Torr.) T. Koyama, nom. illeg., non *Puccinellia pallida* (Torr.) R.T. Clausen; *Torreyochloa pallida* var. *pallida*; *Triodia pallida* (Torr.) Spreng.; *Uralespis pallida* (Torr.) Kunth; *Windsoria pallida* Torr.)

Northern America, U.S., Canada, British Columbia. Perennial, rhizomatous, pale green, slender, leaf sheath open, upper glume 3-nerved, lemma 5-nerved, shallow water, pools, springs, wetlands and wet places, pond margins, in swamps, marshes and ditches, see *Elenchus plantarum, quae in Horto Regio Botanico Matritensi colebantur anno mdccxv. Cum novarum, aut minus cognitarum stirpium diagnosi, nonnullarumque descriptionibus contractis.* Madrid. Jardín Botánico. 1816, *A Catalogue of Plants, Growing Spontaneously within Thirty Miles of the City of New York* [John Torrey, C.W. Eddy and D'Jurco V. Knevels]. New York: Lyceum of Natural History of New York (Albany: printed by Websters and Skinners). 1819, *Neue Entdeckungen im ganzen Umfang der Pflanzenkunde* 1: 246. 1820, *A Flora of the Northern and Middle Sections of the United States* 1: 107. 1823, *Révision des Graminées* 1: 108. 1829, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 4,2(1): 57. 1836, *Revisio Generum Plantarum* 2: 783. 1891 and *American Journal of Botany* 36: 164. 1949, *Rhodora* 54(638): 44. 1952, *Phytologia* 43(1): 106. 1979, *Grasses of Japan and its Neighboring Regions* 526. 1987.

in English: pale false manna grass, pale manna grass, pale meadowgrass, Torrey's manna grass

in Japan: hosobadojotsunagi

T. pallida (Torrey) Church var. *fernaldii* (A.S. Hitchc.) Dore ex T. Koyama & Kawano (*Glyceria fernaldii* (A.S. Hitchc.) St. John; *Glyceria pallida* (Torr.) Trin. var. *fernaldii* A.S. Hitchc.; *Panicularia fernaldii* (Hitchc.) House; *Puccinellia fernaldii* (A.S. Hitchc.) E.G. Voss; *Torreyochloa fernaldii* (A.S. Hitchc.) Church)

Northern America, U.S., Canada. Perennial, herbaceous, growing in lake and stream edges, wetland, shallow water, wet places, see *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences*

Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles 4,2(1): 57. 1836 and *Rhodora* 8(95): 211. 1906, *Rhodora* 19(220): 76. 1917, *New York State Museum Bulletin* 233-234: 11. 1921, *American Journal of Botany* 36: 164. 1949, *Canadian Journal of Botany* 42: 874. 1964, *Rhodora* 68: 445. 1966, *Michigan Flora* i-xv, 1-488. 1972.

in English: Fernald's false manna grass, pale meadowgrass

T. pallida (Torrey) Church var. *pallida* (*Glyceria flava* Scribn. ex Farw.; *Glyceria pallida* (Torr.) Trin.; *Glyceria pallida* var. *pallida*; *Panicularia pallida* (Torr.) Kuntze; *Panicularia pallida* var. *flava* Farwell; *Puccinellia pallida* (Torr.) R.T. Clausen; *Puccinellia pallida* subsp. *pallida*)

Northern America, U.S. Perennial, pools, pond margins, see *Revisio Generum Plantarum* 2: 783. 1891 and *Report of the Michigan Academy of Science, Arts and Letters* 6: 203. 1904, *Rhodora* 54(638): 44. 1952.

in English: pale false manna grass, pale meadowgrass

T. pallida (Torrey) Church var. *pauciflora* (J. Presl) J.I. Davis (*Glyceria californica* Beetle; *Glyceria microtheca* Buckley; *Glyceria otisii* A.S. Hitchc.; *Glyceria pauciflora* J. Presl; *Glyceria spectabilis* var. *flaccida* Trin. & Bong. ex A. Gray; *Panicularia flaccida* Elmer; *Panicularia holmii* Beal; *Panicularia multifolia* Elmer; *Panicularia pauciflora* (J. Hitchc.; *Puccinellia pauciflora* var. *microtheca* (Buckley) C.L. Hitchc.; *Puccinellia pauciflora* var. *pauciflora*; *Torreyochloa californica* (Beetle) G.L. Church; *Torreyochloa otisii* (Hitchc.) G.L. Church; *Torreyochloa pauciflora* (J. Presl) G.L. Church; *Torreyochloa pauciflora* var. *holmii* (Beal) Taylor & MacBryde; *Torreyochloa pauciflora* var. *holmii* (Beal) B. Boivin, nom. illeg., non *Torreyochloa pauciflora* var. *holmii* (Beal) Roy L. Taylor & MacBryde; *Torreyochloa pauciflora* var. *microtheca* (Buckley) Roy L. Taylor & MacBryde; *Torreyochloa pauciflora* var. *microtheca* (Buckley) B. Boivin, nom. illeg., non *Torreyochloa pauciflora* var. *microtheca* (Buckley) Roy L. Taylor & MacBryde)

Northern America, U.S., Canada. Perennial, in swampy places, shallow water, see *Deutschlands Flora* 1: 586. 1823, *Reliquiae Haenkeanae* 1(4-5): 257. 1830, *Proceedings of the Academy of Natural Sciences of Philadelphia* 14: 96, 336. 1862, *Revisio Generum Plantarum* 2: 783. 1891 and *Torrea* 1(4): 43. 1901, *Botanical Gazette* 36: 54-55. 1903, *A Flora of California* 1: 161. 1912, *American Journal of Botany* 21(3): 128. 1934, *Madroño* 8(5): 161. 1946, *American Journal of Botany* 36: 163-164. 1949, *Aliso* 4(1): 87. 1958, *Vascular Plants of the Pacific Northwest* 1: 689. 1969, *Canadian Journal of Botany* 56(2): 193. 1978, *Provanche-ria* 12: 73. 1981, *Phytologia* 70(5): 364. 1991.

in English: weak manna grass, pale false manna grass

T. pauciflora (J. Presl) Church (*Glyceria pauciflora* J. Presl; *Torreyochloa pallida* var. *pauciflora* (J. Presl) J.I. Davis)

Northern America, British Columbia. Perennial, 2-3 branches per node, often bent at the base, often rooting at the lower nodes, rhizomes well developed, auricles absent, leaf sheaths open to partly closed, leaves rather rough, broad inflorescence open and rather loose, 3- to 7-flowered spikelets, 2 glumes unequal, growing in shallow water, marshes, swamps, wet meadows, see *Reliquiae Haenkeanae* 1(4-5): 257. 1830 and *American Journal of Botany* 36: 163. 1949.

in English: weak false manna, weak alkaligrass

Tosagris P. Beauv. = *Muhlenbergia* Schreb.

Greek *tosos* "so many" and *agrios* "living in the fields, wild, savage," *agros* "field," Latin *ager, agri* "a field, country, a measure of length."

Chloridoideae, Cynodonteae, Muhlenbergiinae, type *Tosagris agrostidea* P. Beauv., see *Genera Plantarum* 44. 1789, *Systema Naturae ... editio decima tertia, aucta, reformata* 2: 171. 1791, *Essai d'une Nouvelle Agrostographie* 29, 176, 179, t. 8, f. 2, 3. 1812 and *Contributions from the United States National Herbarium* 41: 143-173, 220. 2001.

Tovarochloa T.D. Macfarl. & But

Named for the Peruvian agrostologist Oscar Tovar Serpa, b. 1923 in Conaica, Huancavelica, Professor at the Universidad Nacional Mayor de San Marcos, Faculty of Biological Sciences, author of *Las Especies Peruanas del Género Chuquiraga (Compositae)*. Publicaciones Museo de Historia Natural "Javier Prado" Ser. B, 5: 1-29. 1952, *Las Especies Peruanas del Género Flotovia (Compositae)*. Publ. Museo de Historia Natural "Javier Prado" Ser. B, 7: 1-27. 1953, *Las Gramíneas de Huancavelica*. I Parte. Memorias Mus. Hist. Nat. "Javier Prado" 6: 1-110. 1957, *Revisión de las Especies Peruanas del Género Calamagrostis (Gramineae)*. Memorias del Mus. Hist. Nat. "Javier Prado" 11: 1-91. 1960, *Revisión de las especies Peruanas del Género Poa (Gramineae)*. Memorias del Mus. Hist. Nat. "Javier Prado" 15: 1-67. 1965, *Comunidades Vegetales de la Reserva Nacional de Vicuñas de Pampa Galeras (Dpto. Ayacucho)*. Publ. Museo de Hist. Nat. "Javier Prado" Ser. B, 27: 1-32. 1973, *Nombres Vulgares de las Plantas de la Cuenca del Mantaro (Perú Central)*. BIOTA 10 (82): 261-308. 1975, *Nuevos registros de Gramíneas para el Perú*. Peruano (Gramineae). Proyecto Alpacas. COTESU-IC.: 1-114. 1990, *Las Gramíneas Acuáticas de la Amazonía Peruana*. In: F. Kahn et al. *Las Plantas Vasculares en aguas Continentales del Perú*. Instituto Francés de Estudios Andinos 75: 249-285. 1993, *Las Gramíneas (Poaceae) del Perú*. *Ruizia*, tomo 13. Monografía del Real Jardín Botánico: 1-482. 1993, *Las Gramíneas (Poáceas) del Perú y su distribución en los diversos Pisos Bioclimáticos*. Actas Academia Nacional de Ciencia y Tecnología: 71-79. Madrid 1994.

One species Peru. Pooideae, Poodae, Aveneae, or Pooideae, Poeae, Poinae, annual, tiny, very minute, herbaceous, auricles absent, leaf sheaths inflated, ligules absent or an unfringed membrane, plants bisexual, contracted inflorescence paniculate capitate, spikelets 1-flowered, 2 glumes subequal, lemma awnless, palea present, 2 free membranous lodicules, 2 or 3 stamens, ovary glabrous, 2 stigmas, grasslands, open habitats, type *Tovarochloa peruviana* T.D. Macfarl. & But, see *Species Plantarum* 1: 54-55. 1753 and *Phytologia* 11(6): 361-376. 1965, *Feddes Repert.* 91 (4): 205-208. 1980, *Phytologia* 47 (6): 445-446. 1981, *Brittonia* 34(4): 478-481, f. 1. 1982, *Collectanea Botánica* 14: 515-521. 1983, *Contributions from the United States National Herbarium* 48: 656. 2003.

Species

T. peruviana T.D. Macfarlane & But (*Phalaris minor* Retz.)

Peru, High Andes. Rare, glumes 1-nerved, lemma keeled, see *Observationes Botanicae* 3: 8. 1783 and *Brittonia* 34(4): 478-481, f. 1. 1982, *Journal of Cytology and Genetics* 21: 152-154. 1986, *Annali di Botanica* 45: 75-102. 1987, *Journal of Cytology and Genetics* 23: 38-52. 1988, *Bothalia* 18: 114-119. 1988, *Journal of Cytology and Genetics* 25: 140-143. 1990, *Boletim da Sociedade Broteriana, ser. 2* 63: 153-205. 1990, *Bot. Zhurn. (Moscow & Leningrad)* 76: 1174-1178. 1991, *Bocconeae, Monographiae Herbarii Mediterraneae Panormitani* 3: 229-250. 1992, *Caryologia* 46: 47-52. 1993, *Annals of the Missouri Botanical Garden* 81(4): 784-791. 1994, *Webbia* 49(2): 279-280, 299. 1995, *Bothalia* 26(1): 63-67. 1996, *Lagascalia* 21(1): 149-154. 1999.

Toxeumia Nutt. ex Scribn. & Merr. = *Calamovilfa gigantea* (Nutt.) Scribner & Merrill

Chloridoideae, see *Circular, Division of Agrostology, United States Department of Agriculture* 35: 2. 1901.

Tozzettia Savi = *Alopecurus* L., *Tozzettia* Parl. (Liliaceae)

For the Italian botanist Ottaviano Targioni Tozzetti, 1755-1829, physician, professor of botany, 1801-1829 Director of

the Botanical Garden of Florence, he was father of the Italian botanist Antonio Targioni Tozzetti (1785-1856, 1829-1856 Director of the Botanical Garden of Florence) and son of the Italian naturalist and physician Giovanni Targioni Tozzetti (b. Florence 1712-d. Florence 1783, 1737-1746 Director of the Botanical Garden of Florence); see Francesco Rodolico, in *D.S.B.* 13: 257-258. 1981; O. Mattiolo, *Cenni cronologici sugli Orti Botanici di Firenze*. Firenze 1899; J.H. Barnhart, *Biographical notes upon botanists*. 3: 360. 1965; Stafleu & Cowan, *Taxonomic literature*. 6: 167-171. 1986; T.W. Bossert, compil., *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 394. Boston, Mass. 1972; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993; Mariella Azzarello Di Misa, editor, *Il Fondo Antico della Biblioteca dell'Orto Botanico di Palermo*. 264-265. Palermo 1988.

Pooideae, Poeae, Alopecurinae, type *Tozzettia pratensis* (L.) Savi, see *Species Plantarum* 1: 60-61. 1753, *Species Plantarum*, *Editio Secunda* 89. 1762, *Memorie di Matematica e di Fisica della Società Italiana delle Scienze* 8(2): 477. 1799, *Annalen der Botanik ... Herausgegeben von Dr. Paulus Usteri ... Zürich 1791-1800*, *English Botany* 21: t. 1467. 1805, *Observations sur les Graminées de la Flore Belgique* 132. 1823 [1824], *Nuovi Generi e Nuove Specie di Piante Monocotiledoni* 11. 1854 and *Flora Pyrenaea ...* 4: 274-275. 1901, *American Midland Naturalist* 4: 216. 1915, *Revista de la Facultad de Agronomía y Veterinaria* 7(2): 345-369. 1931, *Novosti Sist. Vyss. Rast.* 8: 12-22. 1971, *Regnum Veg.* 127: 17. 1993, *Flora Mesoamericana* 6: 242. 1994, *Turkish Journal of Botany* 23(4): 245-262. 1999, *Contributions from the United States National Herbarium* 48: 97-106, 656. 2003.

Trachynia Link = *Brachypodium* P. Beauv.

From the Greek *trachys* “rough.”

Pooideae, Brachypodieae, type *Trachynia distachya* (L.) Link, see *Essai d'une Nouvelle Agrostographie* 100-101, 155-156, 180. 1812, Johann Heinrich Friedrich Link (1767-1851), *Enumeratio plantarum horti regii berolinensis altera*. 1: 42-43. Berolini [Berlin] 1827, *Exploration Scientifique de l'Algérie* 2: 192. 1855 and *Contr. U.S. Natl. Herb.* 24: 196. 1925, *Novosti Sist. Vyss. Rast.* 12: 81. 1975, *Boissiera. Mémoires du Conservatoire de Botanique et de l'Institut de Botanique Systématique de l'Université de Genève* 45: 1-250. 1991, *Flora Mesoamericana* 6: 246. 1994, *Botanical Journal of the Linnean Society* 117: 263-280. 1995, *Willdenowia* 28: 173. 1998, *Contributions from the United States National Herbarium* 48: 143-145, 656. 2003.

Trachynotia Michx. = *Spartina* Schreb.

From the Greek *trachys* “rough” and *notos* “back.”

Chloridoideae, Cynodonteae, or Chloridoideae, Zoysieae, Sporobolinae, see *Species Plantarum* 1: 71. 1753, *Genera Plantarum* 43. 1789, *Flora Boreali-Americana* 1: 63-64. 1803, *Syn. Pl.* 1: 72. 1805, *Catalecta Botanica* 3: 10. 1806, *Flora Gallica* 719. 1807, *Enumeratio Plantarum Horti Botanici Berolinensis, ...* 81. 1809, *Essai d'une Nouvelle Agrostographie* 25, 178, 179. 1812, *Flore Française. Troisième Édition* 5: 279. 1815, *Descriptio uberior Graminum* 55. 1817, *Nomenclator Botanicus. Editio secunda* 2: 695. 1841, *Grasses of North America for Farmers and Students* 2: 398. 1896 and *Rhodora* 8(95): 210. 1906, *Iowa State College Journal of Science* 30(4): 471-574. 1956, *Flora Mesoamericana* 6: 292. 1994, *Contributions from the United States National Herbarium* 41: 195-200, 220. 2001.

Trachyozus Rehb. = *Trachys* Pers.

From the Greek *trachys* “rough” and *ozos* “branch, knot.”

Panicaceae, see *Mantissa Plantarum* 302. 1771, *Syn. Pl.* 1: 85. 1805, (Heinrich Gottlieb) Ludwig Reichenbach (1793-1879), *Conspectus regni vegetabilis per gradus naturales evoluti. Tentamen ... pars prima. Inest clavis herbariorum hortorumque seu dispositio regni vegetabilis secundum classes, ordines, formationes, familias, tribus, genera et subgenera, adiecto indice locupletissimo generum, subgenerum, synonymorum et nominum francogallicorum ... Lipsiae 1828 [1829], Synopsis Plantarum Glumacearum* 1: 112. 1854.

Trachypoa Bubani = *Dactylis* L.

From the Greek *trachys* and *poa* “grass, pasture grass.”

Pooideae, Poodae, Poeae, or Pooideae, Poeae, Dactylidinae, see *Species Plantarum* 1: 71. 1753 and *Flora Pyrenaea ...* 4: 359. 1901, *University of California Publications in Botany* 31(1): 1-40. 1959 [Cytogenetic and evolutionary studies in the genus *Dactylis*. I: Morphology, distribution, and interrelationships of the diploid subspecies.], *Contributions from the United States National Herbarium* 48: 242-244, 656. 2003.

Trachypogon Nees = *Homopogon* Stapf

From the Greek *trachys* “rough” and *pogon* “a beard,” the female-fertile spikelet has plumose awns.

About 3-13 species, tropical America and Africa, Madagascar. Panicoideae, Andropogonodae, Andropogoneae, Andropogoninae, or Panicoideae, Andropogoneae, Germainiinae, perennial or annual, bunchgrass, herbaceous,

slender, unbranched, densely tufted, nodes hairy to bearded, leaf blades linear to convolute, auricles absent, ligule membranous, sometimes with shortly creeping rhizomes, plants bisexual, inflorescence terminal, tough solitary or several digitate racemes, pairs of narrowly oblong spikelets, pedicelled spikelet awned and fertile, sessile spikelet unawned usually male or sterile, lower spikelet shortly pedicellate, florets 2, lower floret sterile and reduced to lemma, upper floret bisexual, upper floret of the subsessile spikelet is male, 2 glumes subequal, lower glume coriaceous 2-keeled 7- to 11-nerved, upper glume 3-nerved, lemmas hairy, palea present or absent or very reduced, 2 small lodicules free and fleshy, 3 stamens, ovary glabrous, 2 stigmas plumose, base of the perfect spikelet sharp-pointed and hairy, mountain savannah, chaparral, tropical savannahs, llanos, open habitats, well-drained soils, see *Trachypogon montufarii* (Kunth) Nees, see *Species Plantarum* 2: 1045. 1753, *Flora Brasiliensis seu Enumeratio Plantarum* 2(1): 341-343. 1829, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 2(4): 257. 1832 and *Mémoires de la Société Botanique de France* 8(b): 103. 1908, *Cytologia* 19: 97-103. 1954, J. Blydenstein, "La sabana de *Trachypogon* del Alto Llano." *Boletín de la Sociedad Venezolana de Ciencias Naturales* 102: 139-139. 1962, *Flora of Tropical East Africa* 451-898. 1982, J.J. San José & M.R. Fariñas, "Changes in tree density and species composition in a protected *Trachypogon* savannah, Venezuela." *Ecology* 64: 447. 1983, J.J. San José & M. R. Fariñas, "Temporal changes in the structure of a *Trachypogon* savannah protected for 25 years." *Acta Ecológica* 12: 237. 1991, *Flora Mesoamericana* 6: 380-381. 1994, *Restoration Ecology* 5(2): 147-155. June 1997, *Global Ecology and Biogeography* 7(6): 441-455. Nov 1998, *Journal of Biogeography* 26(6): 1307-1321. Nov 1999, *African Journal of Ecology* 38(3): 188-201. Tropical America, tropical and South Africa. Perennial bunchgrass, very variable, glabrous to villous, wiry, solid, rhizomatous, densely tufted, erect, slender to stout, a ring of hairs below the culm nodes, leaf sheath round, ligule an unfringed membrane 3-lobed, leaf blades usually linear tapering to a hair point, inflorescences terminal and axillary, a single terminal raceme or spike-like racemes dense and hairy, spikelets hairy, sessile spikelet male, velvety and geniculate awn, foliage used as a tea substitute, thatching grass, low to medium palatability in its young stages, low

grazing value, a weed of cultivation and plantations, traditional healers from South Africa use this grass as a contraceptive, found in coastal sand dunes, cerrado, open grassland, sour grassland, rocky grassland, open highveld grassland, woody grassland, deep sand, in bushveld, sourveld, vlei, in drier areas near edge of pan, seasonal swamps, among rocks, undisturbed sites, dry woodland, sandy soils, campo rupestre, confused with *Trachypogon montufari*, see *Species Plantarum* 1: 78-79. 1753, *Species Plantarum* 2: 1045. 1753, *Supplementum Plantarum* 111. 1781 [1782], *Flora Caroliniana, secundum* ... 78. 1788, *Prodromus Plantarum Capensium*, ... 20. 1794, *Species Plantarum. in English: giant spear grass, gray tussock grass, gray beard grass, arrow grass, spiked crinkleawn

in India: gandhi

in Nigeria: celbiho, juda, yandaya

in southern Africa: bokbaardgras, reuse pylgras, steekgras, danga, oro, horo, ledutla; isitube (Zulu); selokana (Sotho)

T. vestitus Andersson (*Stipa spicata* L.f.; *Stipa spicata* Thunb., nom. illeg., non *Stipa spicata* L.f.; *Stipa spicata* Walter, nom. illeg., non *Stipa spicata* L.f.; *Trachypogon polymorphus* var. *vestitus* (Andersson) Hack.; *Trachypogon spicatus* (L.f.) Kuntze)

South America, Brazil. See *Supplementum Plantarum* 111. 1781 [1782], *Öfversigt af Förhandlingar: Kongl. Svenska Vetenskaps-Akademien* 14: 52. 1857, *Flora Brasiliensis* 2(4): 263, 266. 1883, *Revisio Generum Plantarum* 2: 794. 1891.

Trachys Pers. = *Trachyozus* Reichenb.,
Trachystachys Dietr.

From the Greek *trachys* “rough.”

One species, India, Sri Lanka, Myanmar. Panicoideae, Panicoideae, Paniceae, annual, herbaceous, decumbent, erect, stoloniferous, auricles absent, leaf sheaths inflated, ligule a fringe of hairs, plants bisexual, inflorescence a pair of 1-sided racemes, rachis fragile, spikelets with bractiform involucre, fertile spikelets with 2 glumes unequal to very unequal, lower glume nerveless, upper glume 3 nerved, palea present, 2 free and fleshy lodicules, 3 stamens, ovary glabrous, 2 stigmas, coastal, open areas, dunes, arid coastal, sandy places, type *Trachys mucronata* Pers., see *Mantissa Plantarum Altera* 302. 1771, *Syn. Pl.* 1: 85. 1805, *Conspicuum regni vegetabilis per gradus naturales evoluti*. Tentamen ... pars prima. 1828 [1829], *Species Plantarum. Ceylon* 5: 186. 1900, *Grasses of Ceylon* 157. 1956, *Grasses of Burma* ... 369. 1960, *Genera Graminum* 306-307. 1986, *Taxon* 49(2): 248-249. 2000.

Species

T. muricata (L.) Trin. (*Cenchrus muricatus* L.; *Panicum squarrosus* Retz.; *Trachyozus muricata* (L.) Steud.; *Trachys mucronata* Pers.; *Trachys muricata* (L.) Pers. ex Trin.)

Southern India, Sri Lanka, Myanmar. Annual, erect, creeping, stoloniferous, ligule shortly membranous, spikelets in subsessile clusters with 2-3 fertile spikelets below and 1-several reduced barren above, 2 florets, lower floret barren, upper floret perfect, see *Mantissa Plantarum* 302. 1771, *Observationes Botanicae* 4: 15. 5: t. 1. 1786, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 3,1(2-3): 189. 1834, *Synopsis Plantarum Glumacearum* 1: 112. 1854.

in India: mara akkabu hullu, vennai thiraththi pul

Trachystachys A. Dietr. = *Trachys* Pers.

From the Greek *trachys* “rough” and *stachys* “spike.”

Panicoideae, Panicoideae, Paniceae, see *Syn. Pl.* 1: 85. 1805, *Species Plantarum. Editio sexta* 2: 16, 743. 1833.

Tragus Haller = *Echinanthus* Cerv., *Lappago* Schreb., *Nazia* Adans., *Tragus* Panz.

For the German botanist Hieronymus Bock (called *Tragus*, *bock* being German for goat), 1498-1554, physician, teacher, author of *New Kreütter Buch*. Strassburg 1537, *Teütsche Speiszkammer*. [Small 4to, 2nd edn.] Strasbourg 1555 and *De stirpium, maxime earum, quae in Germania nostra nascuntur*. [Strassburg 1552], with Brunfels & Fuchs one of the German fathers of botany; see Otto Brunfels (1488-1534), *Herbarum vivae eicones ad naturae imitationem summa cum diligentia et artificio effigatae*. Argentorati 1530-1540; Garrison & Morton, *Medical Bibliography*. 1806 and 1803. 1961; Edward Lee Greene, *Landmarks of Botanical History*. Edited by Frank N. Egerton. Stanford, California 1983; J.H. Barnhart, *Biographical notes upon botanists*. 1: 206. 1965; Mariella Azzarello Di Misa, a cura di, *Il Fondo Antico della Biblioteca dell'Orto Botanico di Palermo*. 44. Regione Siciliana, Palermo 1988; Jerry Stannard, in *D.S.B.* 2: 218-220. 1981.

About 6-7 species, pantropical. Chloridoideae, Cynodonteae, Zoysiinae, or Chloridoideae, Cynodonteae, Traginae, annual or perennial, herbaceous, ascending or decumbent and creeping, often mat-forming, sheaths terete, ligule a very narrow fringed membrane, leaf blades flat, auricles absent, rigid hairs on the leaf margins, often stoloniferous, plants bisexual, inflorescence a cylindrical false raceme or a slender spike-like panicle, small subsessile deciduous clusters of 2 to few spikelets burrlike with hooked spines, spikelets sessile or very shortly pedicellate and usually paired, floret 1 perfect, fertile spikelets small and 1-flowered, bristles on the spikelets, glumes 1 per spikelet or 2, glumes very unequal and very dissimilar, lower glume tiny or absent, upper glume prickly or densely spiny with 5 rows of hooked spines on the back, lemma and palea membranous, lemma acute, 2 fleshy and toothed lodicules, 3 stamens, ovary glabrous, 2 stigmas plumose, fruit small and more or less dorsally compressed, mature spikelets can cause trouble, burrs a nuisance in wool, mature seed burrs can be troublesome especially to sheep, palatable, little nutritional value, grazed by cattle, poor livestock forage, weed species of open habitats, pampas, disturbed dry areas, weedy places, type *Tragus racemosus* (L.) All., see *Fam. Pl.* 2: 31, 581. 1763, *Historia Stirpium Indigenarum Helvetiae Inchoata* 2: 203. 1768, *Flora Pedemontana* 2: 241. 1785, *Gen. May 2005.

Species

T. spp.

in Niger: âbuggur'nâkli, êmurudu, harkia, lasagâr, shigizal, takâna

T. australianus S.T. Blake (*Tragus racemosus* sensu Benth., non (L.) All.)

Australia, all mainland States. Annual, very small, tufted, erect or ascending, decumbent or geniculate at the nodes, basal sheaths glabrous, ligule a rim of short hairs, leaves flat and ciliate or pectinate, a spike-like bristly panicle, 2 spikelets lanceolate on each peduncle, 1 bisexual floret, bristled glumes, lower glume minute or absent, upper glume lanceolate with hooked spines, lemma oblong acute or mucronate, palea 2-keeled, early colonizer, an increaser species, fodder and cover grass, resistant to heavy grazing, leaves palatable, mature spikelets adhere to animals, grows on sandy soils, clay pans, bare and disturbed areas, on red sandy soil, see *University of Queensland Papers: Department of Botany* 1(18): 12. 1941.

in English: burrgrass, small burrgrass, Australian burr grass, tickgrass

T. berteronianus J.A. Schultes (*Lappago aliena* Spreng.; *Lappago berteroniana* Schult. ex Steud.; *Lappago occidentalis* Nees ex Hook.; *Lappago phleoides* Fig. & De Not.; *Lappago racemosa* var. *erecta* Kunth; *Nazia aliena* (Spreng.) Hack.; *Tragus racemosus* var. *brevispicula* Döll; *Tragus tscheliensis* Debeaux)

Tropical Africa, China, Egypt, America, southwestern Asia, South Africa. Annual, small, ruderal, tufted to loosely tufted, short culms, erect, decumbent or ascending, spreading, sprawling, mat-forming, usually rooting at the lower nodes, branching from base, often shortly stoloniferous, leaf sheath rounded and inflated, ligule a ring of hairs, leaves lanceolate and flattened, leaf margins fringed and hairy, long dense spike-like inflorescence narrowly cylindrical and

usually partially enclosed by the sheath of the uppermost leaf, spikelets paired and covered with hooked spines or bristles, first spikelet fertile, second spikelet rudimental or reduced to an empty glume, glumes hairs hooked, upper glume 5-nerved with prickles hooked at the tip, 3 stamens, sharp prickly seeds, heavy seeder, pioneer grass, useful for erosion control, grazed by all stock, very low grazing value, troublesome weed species more or less undesirable for cattle and sheep, low vegetative yield, found in arid and semiarid lands, stony fields, grassland, denuded grasslands, dry grassland, on poor soils and poor sandy soil, natural veld, on muddy pans, along roadsides, compacted soils, open shrubland, bushland, cultivated and uncultivated ground, trampled sites, overgrazed areas, disturbed places, silty clay, sandy soils, open areas, see *Flora Pedemontana* 2: 241. 1785, *Synopsis Plantarum Germaniae* 1: 440. 1792, *Neue Entdeckungen im ganzen Umfang der Pflanzenkunde* 3: 15. 1822, *Mantissa* 2: 205. 1824, *Flora Brasiliensis seu Enumeratio Plantarum* 2(1): 286-287. 1829, *Révision des Graminées* 2: 413. 1831, *Annales des Sciences Naturelles; Botanique, sér. 3* 19: 373. 1853, *Synopsis Plantarum Glumacearum* 1: 112. 1854, *Flora Brasiliensis* 2(2): 123. 1877, *Actes de la Société Linnéenne de Bordeaux* 33: 71. 1879, *Revisio Generum Plantarum* 2: 780. 1891, *Zoë* 4(4): 386. 1894, *The Flora of British India* 7(21): 97. 1897 [1896], *Bulletin, Division of Agrostology United States Department of Agriculture* 4: 12. 1897 and *Österreichische Botanische Zeitschrift* 51(6): 195. 1901, *Anales del Museo Nacional de Buenos Aires* 11: 58. 1904, *Acta Phytotaxonomica et Geobotanica* 10(4): 268. 1941, *Annals of the Missouri Botanical Garden* 81(4): 784-791. 1994, *Bothalia* 24(1): 92-96. 1994, *Austral. T. pedunculatus Pilg.

South Africa. Annual, branched, decumbent, inflorescence branched, glumes hairs straight, on sandy soils, see *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 45: 208. 1910.

T. racemosus (L.) All. (*Cenchrus racemosus* L.; *Lappago biflora* Roxb.; *Lappago decipiens* Fig. & De Not.; *Lappago racemosa* (L.) Honck.; *Nazia racemosa* (L.) Kuntze; *Phalaris muricata* Forssk.; *Tragus arenarius* Bremek. & Oberm.; *Tragus biflorus* Schult.; *Tragus decipiens* (Fig. & De Not.) Boiss.; *Tragus echinatus* (L.) Cav.; *Tragus halleri* Döll; *Tragus muricatus* Moench; *Tragus paucispina* Hack., also spelled *paucispinus*; *Tragus racemosus* Hook.f., nom. illeg., non *Tragus racemosus* (L.) All.; *Tragus racemosus* f. *divaricatus* Döll; *Tragus racemosus* var. *decipiens* (Fig. & De Not.) T. Durand & Schinz; *Tragus racemosus* var. *longispicula* Döll; *Tragus racemosus* var. *paucispina* (Hack.) Maire)

Northern tropical Africa, southwestern Asia, Mediterranean. Annual, loose, psammophilous, ruderal, tufted, prostrate or decumbent and finally ascending, spreading, branched, often rooting at the lower nodes, more or less leafy, leaf sheath terete, upper leaf sheath swollen, ligule

membranous and crowned by a ring of hairs, leaf blade flat and stiffly hairy on margins, auricles absent, spicate open inflorescence broadly cylindrical and often partially enclosed by the uppermost leaf sheath, bristly spikelets clustered, upper glume 7-nerved, glumes with hooked spiny hairs, fruits oblong, weed species naturalized elsewhere, palatable, after flowering unpalatable because of the harsh flower spikes, good fodder for all stock while young, poor to very low grazing value, found in waste areas, dry sandy wastelands, irrigated land, desert, moist places, on sandy soils, roadsides, stony fields, overgrazed veld, disturbed lands, cultivated fields, dry soils, drainage channels, see *Species Plantarum* 1: 54-55. 1753, *Species Plantarum* 2: 1049. 1753, *Flora Aegyptiaco-Arabica* 202. 1775, *Flora Pedemontana* 2: 241. 1785, *Synopsis Plantarum Germaniae* 1: 440. 1792, *Methodus Plantas Horti Botanici ...* 53. 1794, *Elenchus Plantarum Horti Botanici* 38. 1803, *Flora Indica; or Descriptions ...* 1: 284. 1820, *Mantissa* 2: 205. 1824, *Agrostographiae Aegyptiacae Fragmenta* 2: 73, f. 37. 1853, *Mem. Reale Accademia Scienze Torino* 387. 1854, *Flora Brasiliensis* 2(2): 122. 1877, *Revisio Generum Plantarum* 2: 780. 1891, *Conspectus Florae Africae* 5: 733. 1895, *The Flora of British India* 7(21): 97. 1897 [1896] and *Österreichische Botanische Zeitschrift* 51(6): 193. 1901, *Annals of the Transvaal Museum* 16(3): 403. 1935, *Feddes Repert.* 49: 53. 1940, *Bulletin de la Société d'Histoire Naturelle de l'Afrique du Nord* 32: 217. 1941, *Mitteilungen der Botanischen Staatssammlung München* 1: 343. 1953, *Bot. Zhurn. SSSR* 69(4): 511-517. 1984, *Fl. Libya* 145: 336. 1988, *Berichte des Geobotanischen Instituts der Eidg. Techn. Hochschule Stiftung Rübel* 57: 182-192. 1991, *Journal of Applied Ecology* 37(3): 491-507. June 2000, *African Journal of Ecology* 40(2): 103-109. June 2002.

in English: carrot-seed grass, sweetheart grass, carrot grass, stalked carrot-seed grass, large carrot-seed grass, spike bur grass, stalked bur grass, stalked burgrass, stalked burr grass, stalked bristle grass

in French: tragus à grappes, bardanette à grappes, bardanette racémeuse, bardanette rameuse

in India: barchinte, barchinte choti, dhaman

in Italian: lappola

in Arabic: tinismirt

in Mali: abugur nekli, tafado fodo

in Mauritania: tinismirt

in Somalia: nafir, harfo

in southern Africa: grootwortelsaadgras, losaarwortelsaadgras, wortelsaadgras, klitsgras, kousgras, luisgras, lysgras; bore-ba-ntjia, borebantja (Sotho)

in Upper Volta: kebbe baali, kebbel baal

T. roxburghii Panigrahi (*Lappago biflora* Roxb.; *Tragus biflorus* Schult.; *Tragus racemosus* auct.)

East Africa, Sri Lanka, India, Thailand, Malay Peninsula. Annual or short-lived perennial, erect, glabrous, small growth, many nodes, often rooting from the lower nodes, leaf blades rigid and acuminate, ligule ciliate, leaves margins rather spiny, harsh prickly inflorescence, spiciform racemes, spikelets paired, nutritious grass, grazed, see *Flora Indica; or Descriptions ...* 1: 284. 1820, *Mantissa* 2: 205. 1824, *The Flora of British India* 7(21): 97. 1897 [1896] and *Handb. Fl. Ceylon* 5: 187. 1900, *Grasses of Ceylon* 102. 1956, *Kew Bulletin* 29(3): 496. 1974, *Annals of the Missouri Botanical Garden* 81(4): 784-791. 1994, *Journal of Economic and Taxonomic Botany* 22(2): 491-494. 1998.

in English: goat grass

in India: anthirinta gaddi, antu purale hullu, antupurale-hallu, charchada, mullagaddi, sitaghass, vandariughas

in Thailand: yaa kra chee, ya krachi, ya soi nok khao, yaa soi nok khao

Tragus Panz. = *Brachypodium* P. Beauv.

Pooideae, Brachypodieae, see *Essai d'une Nouvelle Agrostographie* 100-101, 155, pl. 19, f. 35. 1812, Georg Wolfgang Franz Panzer (1755-1829), "Ideen zu einer künftigen Revision der Gattungen der Gräser." *Denkschr. Akad. Wiss., Wien* 4: 253-312. 1813 and *Contr. U.S. Natl. Herb.* 24: 196. 1925, *Contributions from the United States National Herbarium* 48: 143-145, 656. 2003.

Tremularia Heist. ex Fabr. = *Briza* L.,
Tremularia Fabr.

From the Latin *tremulus*, *a*, *um* "shaking, trembling."

Pooideae, Poeae, Brizinae, see *Species Plantarum* 1: 70-71. 1753, *Enumeratio Methodica Plantarum* 207. 1759 and *Contributions from the United States National Herbarium* 48: 146-151, 656. 2003.

Triachyrum Hochst. = *Sporobolus* R. Br.

From the Greek *treis*, *tria* "three" and *achyron* "chaff, husk."

Chloridoideae, Cynodonteae, Sporobolinae, type *Triachyrum adoense* Hochst. ex A. Braun, see *Prodromus Florae Novae Hollandiae* 169-170. 1810, *Flora* 24: 712. 1841, *Flora Africae Australioris Illustrationes Monographicae* 158. 1841, *Tentamen Florae Abyssinicae ...* 2: 394. 1850, *Synopsis Plantarum Glumacearum* 1: 176. 1855 [1854], *Beitrag zur Flora Aethiopiens ...* 302, 311. 1867, *Nomenclator Botanicus* 2: 1274. 1874, *Bulletin de la Société Botanique de France* 36: 253. 1889 and *Contributions from the United States National Herbarium* 41: 200-219, 221. 2001.

Triaena Kunth = *Bouteloua* Lag.

Greek *triaina* "trident," referring to the flowers.

Chloridoideae, Cynodonteae, Boutelouinae, type *Triaena racemosa* Kunth, see *Varietades de Ciencias, Literatura y Artes* 2(4,21): 134, 141. 1805, *Nouveau Bulletin des Sciences, publié par la Société Philomatique de Paris* 2: 188. 1810, *Essai d'une Nouvelle Agrostographie* 40, t. 8, f. 4. 1812, *Nova Genera et Species Plantarum* 1: 178-179, t. 61. 1815 [1816], *Systema Vegetabilium, editio decima sexta* 1: 293. 1825, *Mémoires de la Société d'Agriculture, Sciences et Arts d'Angers* 1: 176. 1831, *Proceedings of the Academy of Natural Sciences of Philadelphia* 43(2): 307-308, f. 2. 1891 and *Contributions from the United States National Herbarium* 14(3): 343-428. 1912, *Aliso* 17(2): 99-130. 1998, *Contributions from the United States National Herbarium* 41: 20-33, 221. 2001.

Trianthium Desv. = *Chrysopogon* Trin.,
Rhaphis Lour.

From the Greek *treis*, *tria* and *anthos* "flower," referring to the flowers.

Panicoideae, Andropogoneae, Sorghinae, see *Fundamenta Agrostographiae* 187-188. 1820, *Mémoires de la Société d'Agriculture, Sciences et Arts d'Angers* 1: 173. 1831 and *Contributions from the United States National Herbarium* 46: 159-161, 544-545. 2003.

Triarrhena (Maxim.) Nakai = *Miscanthus*
Andersson, *Tiarrhena* (Maxim.) Nakai

From the Greek *treis*, *tria* "three" and *arrhen* "male."

Panicoideae, Andropogonodae, Andropogoneae, Andropogoninae, or Panicoideae, Andropogoneae, Saccharinae, see *Öfversigt af Förhandlingar: Kongl. Svenska Vetenskaps-Akademien* 12: 165. 1855, *Primitiae Florae Amurensis* 331. 1859, *Mémoires Présentés à l'Académie Impériale des Sciences de Saint Pétersbourg par Divers Savans et lus dans ses Assemblées* 9: 331. 1859, *Journal of the Linnean Society, Botany* 19: 65. 1881, *Die Natürlichen Pflanzenfamilien* 2: 23. 1887, *Monographia Andropogonearum* 102. 1889 and *Botanical Magazine* 23: 107. 1909, *Journal of the Faculty of Science: University of Tokyo, Botany* 3(1): 391. 1930, *Journal of Japanese Botany* 25(1-2): 7. 1950, *Bull. Fac. Agric. Mie University* 17: 57, 59. 1958, *Pl. Taxonomic Soc. Korea, Seoul* 1972: 18, 17. 1972, *Journal of Huazhong Agricultural University (Suppl.)*: 56-60. 1989, *Flora Mesoamericana* 6: 378-379. 1994, *Sida* 16(2): 233-244. 1994, *Annals of the Missouri Botanical Garden* 81(4): 768-774. 1994, *Sida* 16(3): 551-580. 1995, *J. Fujian Acad. Agric. Sci.* 11(3): 19-22. 1996, *Journal of Plant Research*

115: 381-392. 2002, *Contributions from the United States National Herbarium* 46: 294-295, 550-557, 617, 622. 2003.

Triathera Desv. = *Bouteloua* Lag., *Bouteloua* Hornem. ex P. Beauv.

From the Greek *treis*, *tria* “three” and *ather* “stalk, barb.”

Chloridoideae, Cynodonteae, Boutelouinae, type *Triathera americana* (L.) Desv., see *Systema Naturae, Editio Decima* 879. 1759, *Varietates de Ciencias, Literatura y Artes* 2(4,21): 134, 141. 1805, *Nouveau Bulletin des Sciences, publié par la Société Philomatique de Paris* 2: 188. 1810, *Essai d'une Nouvelle Agrostographie* 40, t. 8, f. 4. 1812, *Nova Genera et Species Plantarum* 1: 171-172. 1815 [1816], *Systema Vegetabilium* 2: 600. 1817, *Mémoires de la Société d'Agriculture, Sciences et Arts d'Angers* 1: 176. 1831, *Bulletin de la Société Botanique de France*, sér. 2, 296. 1880, *Genera Plantarum* 3(2): 1169. 1883, *Mexicanas Plantas* 2: 141. 1886 and *Flora of the Southeastern United States ...* 137. 1903, *Contributions from the United States National Herbarium* 17(3): 343. 1913, *Aliso* 17(2): 99-130. 1998, *Contributions from the United States National Herbarium* 41: 20-33, 221-222. 2001.

Triatherus Raf. = *Ctenium* Panz., *Monocera* Elliott, *Triathera* Desv.

Greek *treis*, *tria* and *ather* “stalk, barb.”

Chloridoideae, Cynodonteae, see *Flora Caroliniana, secundum ...* 249. 1788, *Ideen zu einer künftigen Revision der Gattungen der Gräser*. 38, 61. 1813, *Denkschriften der Bayer[ischen]. Botanischen Gesellschaft in Regensburg* 4: 311, t. 13, f. 1-2. 1813 [1814], *A Sketch of the Botany of South-Carolina and Georgia* 1(2): 176. 1816, C.S. Rafinesque, in *Am. Monthly Mag. Crit. Rev.* 3: 99. 1818, *A Class-book of Botany* 806. 1861 and *North American Flora* 17(8): 579-638. 1939, E.D. Merrill, *Index rafinesquianus*. 76. 1949, *Contributions from the United States National Herbarium* 41: 57-58, 142, 222. 2001.

Triavenopsis Candargy = *Duthiea* Hack.

Greek *treis*, *tria* and *Avena*-like.

Aveneae, type *Triavenopsis brachypodium* P. Candargy, see *Verhandlungen der kaiserlich-königlichen zoologisch-botanischen Gesellschaft in Wien* 45: 200. 1896 and *Archives de Biologie Végétale Pure et Appliquée* 1: 64-65. 1901, *Acta Phytotaxonomica Sinica* 10(2): 182. 1965.

Tribolium Desv. = *Allagostachyum* Steud., *Brizopyrum* Link, *Brizopyrum* Stapf, *Hystringium* Steud., *Lasiochloa* Kunth, *Plagiocloa* Adamson & Sprague, *Urochlaena* Nees

From the Greek *tribolos*, a name of various prickly plants; Latin *tribulus*, *tribolos*, *i* “a caltrop”; Greek *tribolos*, *treis*, *tria* “three” and *bolos* “a point”; possibly in reference to the bristly glumes surrounding the 3 florets.

About 10 species, South Africa. Arundinoideae, Danthonieae, or Arundinoideae, Arundineae, or Danthonioideae, Danthonieae, annual or perennial, herbaceous, unarmed, tufted, decumbent, mat-forming, rhizomatous or stoloniferous, auricles absent, sheath often broadly winged and clasping the inflorescence, ligule more or less membranous and fringed, plants bisexual, inflorescence spicate or racemose or paniculate, spikelets hairy solitary densely imbricate, 2-10-many fertile florets, uppermost floret sometimes reduced, 2 glumes 3- to 7-nerved more or less equal to subequal, lemmas entire coriaceous 5- to 9-nerved, lemma margins glabrate hairy below, palea notched, 2 free and fleshy glabrous lodicules, 3 stamens, ovary glabrous, 2 stigmas, open habitats, dry areas, bushland, similar to *Schismus*, *Uniola* and *Coelachyrum*, type *Tribolium hispidum* (Thunb.) Desv., see *Species Plantarum* 1: 67-70, 71. 1753, *Commentationes Botanicae* 26. 1822, *Hortus Regius Botanicus Berolinensis* 1: 159. 1827, *Mémoires de la Société d'Agriculture, Sciences et Arts d'Angers* 1: 168, t. 7, f. 2. 1831, *Révision des Graminées* 2: 556-557, t. 193. 1832, *Nomenclator Botanicus. Editio secunda* 1: 50. 1840, *Florae Africae Australioris Illustrationes Monographicae* 437-438. 1841, *Nomenclator Botanicus. Editio secunda* 2: 11. 1841, *Flora Capensis* 7: 318. 1898 and *Journal of South African Botany* 7(2): 89-90. 1941, *Nord. J. Bot.* 1: 20. 1981, *Kew Bulletin* 40(4): 797-798. 1985, *American Journal of Botany* 79: 689-700. 1992, *South African Journal of Botany* 60(1): 22-26. 1994, H.P. Linder & G. Davidse, “The systematics of *Tribolium* Desv. (Danthonieae: Poaceae).” *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 119(4): 445-507. 1997, *Contributions from the United States National Herbarium* 46: 143, 283, 539, 622, 629. 2003.

Species

T. acutiflorum (Nees) Renvoize (*Brizopyrum acutiflorum* Nees; *Brizopyrum acutiflorum* var. *capillaris* Nees; *Desmazeria acutiflora* (Nees) T. Durand & Schinz; *Plagiocloa acutiflora* (Nees) Adamson & Sprague)

South Africa. Perennial, weak, erect, slender, tufted, decumbent, elongated and prostrate, leaves glabrous or villous, sometimes stoloniferous, contracted inflorescences terminal and axillary, single axillary panicles below terminal panicle, spikelets 5- to 9-flowered, glumes glabrous acute, lemmas

acuminate with club-shaped hairs, palea obovate, weed, disturbed areas, along roadsides and bare roadside embankments, sandy soils, low-lying areas, seasonally wet depressions, similar to *Tribolium obliterum*, see *Florae Africae Australioris Illustrationes Monographicae* 371. 1841, *Conspectus Florae Africae* 5: 900. 1895 and *Journal of South African Botany* 7(2): 90. 1941, *Kew Bulletin* 40(4): 798. 1985, *South African Journal of Botany* 60: 285-292. 1994.

T. alternans (Nees) Renvoize (*Brizopyrum alternans* Nees; *Cynosurus uniolae* L.f.; *Desmazeria alternans* (Nees) T. Durand & Schinz; *Plagiochloa alternans* (Nees) Adamson & Sprague; *Poa alternans* (Nees) Steud.; *Tribolium uniolae* (L.f.) Renvoize)

South Africa. Perennial, tufted, inflorescence loosely spicate, spikelets distichous, glumes pubescent, on sandy soils, see *Supplementum Plantarum* 110. 1781 [1782], *Florae Africae Australioris Illustrationes Monographicae* 1: 369. 1841, *Nomenclator Botanicus. Editio secunda* 2: 358. 1841, *Conspectus Florae Africae* 5: 900. 1895 and *Journal of South African Botany* 7(2): 91. 1941, *Kew Bulletin* 40(4): 797-798. 1985, *South African Journal of Botany* 60(5): 279-284. 1994.

T. amplexum Renvoize (*Tribolium uniolae* (L.f.) Renvoize)

South Africa. Perennial, tufted, spicate panicle, axillary inflorescence, glumes glabrous, disturbed areas, sandy soil, see *Kew Bulletin* 40(4): 797. 1985.

T. brachystachyum (Nees) Renvoize (*Brizopyrum brachystachyum* (Nees) Stapf; *Brizopyrum capense* var. *brachystachyum* Nees; *Plagiochloa brachystachya* (Nees) Adamson & Sprague)

South Africa. Perennial, weak, lax, erect to decumbent, prostrate to tufted, compacted spikes exerted from the uppermost leaf, spikelets distichous, glumes pubescent, along roadsides, disturbed areas, sandy soil, mountains, see *Florae Africae Australioris Illustrationes Monographicae* 1: 373. 1841 and *Flora Capensis* 7(4): 707. 1900, *Journal of South African Botany* 7(2): 91. 1941, *Kew Bulletin* 40(4): 798. 1985.

T. ciliare (Stapf) Renvoize (*Brizopyrum ciliare* Stapf; *Dactylis ciliaris* L.; *Dactylis ciliaris* Thunb., nom. illeg., non *Dactylis ciliaris* L.; *Lasiochloa ciliaris* Kunth; *Plagiochloa ciliaris* (Stapf) Adamson & Sprague)

South Africa. Annual, weak, tufted, spikelets not distichous, glumes pubescent, in sand, limestone, in shallow soil, in sandy loam, in moist soil, see *Mantissa Plantarum* 185. 1767, *Prodromus Plantarum Capensium*, ... 22. 1794, *Révision des Graminées* 2: 555, t. 192. 1832, *Hooker's Icones Plantarum* 27(1): t. 2602. 1899 and *Journal of South African Botany* 7(2): 91. 1941, *Kew Bulletin* 40(4): 799. 1985.

T. echinatum (Thunb.) Renvoize (*Alopecurus echinatus* Thunb.; *Dactylis ascendens* Schrad.; *Lasiochloa ciliaris* Kunth; *Lasiochloa echinata* (Thunb.) Henrard; *Lasiochloa*

echinata (Thunb.) Adamson, nom. illeg., non *Lasiochloa echinata* (Thunb.) Henrard)

South Africa. Annual, vigorous, prostrate to erect, small, leaves villous, contracted terminal inflorescence partly enclosed in uppermost leaf, spikelets not distichous, 2-3 florets, glumes pubescent long acuminate, lemma awnless long acuminate, weed, useful for erosion control, along roadsides, in dry river bed, in disturbed clay soil, on loose roadside soil, in roadside depression, sandy soils, see *Prodromus Plantarum Capensium*, ... 19. 1794, *Mantissa* 2: 351. 1824, *Révision des Graminées* 2: 555, t. 192. 1832 and *Blumea* 4(3): 502. 1941, *Journal of South African Botany* 8(4): 272. 1942, *Kew Bulletin* 40(4): 798. 1985.

T. hispidum (Thunb.) Desv. (*Dactylis hirta* Schrad.; *Dactylis hispida* Thunb.; *Dactylis longifolia* Schrad.; *Lasiochloa hirta* (Schrad.) Kunth; *Lasiochloa hirta* var. *glaucescens* Nees; *Lasiochloa hirta* var. *infracta* Nees; *Lasiochloa hispida* (Thunb.) Kunth; *Lasiochloa hispida* (Thunb.) Nees, nom. illeg., non *Lasiochloa hispida* (Thunb.) Kunth; *Lasiochloa hispida* var. *brevifolia* Nees; *Lasiochloa hispida* var. *incurva* Nees; *Lasiochloa hispida* var. *longifolia* (Schrad.) Nees; *Lasiochloa hispida* var. *longiglumis* Nees; *Lasiochloa longifolia* (Schrad.) Kunth; *Lasiochloa longifolia* var. *hirta* (Schrad.) Adamson; *Lasiochloa longifolia* var. *hispida* (Thunb.) Stapf; *Lasiochloa longifolia* var. *pallens* Stapf)

South Africa. Perennial, densely tufted, prostrate to erect, wiry, spikelets not distichous, glumes densely pubescent, useful for erosion control, sandy soils, see *Prodromus Plantarum Capensium*, ... 22. 1794, *Mantissa* 2: 350-351. 1824, *Mémoires de la Société d'Agriculture, Sciences et Arts d'Angers* 1: 168, t. 7, f. 2. 1831, *Révision des Graminées* 2: 557, 559, t. 193, 194. 1832, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 388. 1833, *Florae Africae Australioris Illustrationes Monographicae* 1: 432-435. 1841 and *Flora Capensis* 7: 699. 1900, *Journal of South African Botany* 8(4): 272. 1942.

T. obliterum (Hemsl.) Renvoize (*Brizopyrum glomeratum* Stapf; *Brizopyrum obliterum* (Hemsl.) Stapf; *Brizopyrum obliterum* var. *erectum* Stapf; *Brizopyrum obliterum* var. *obliterum*; *Desmazeria oblitera* Hemsl.; *Plagiochloa glomerata* (Stapf) Adamson & Sprague; *Plagiochloa oblitera* (Hemsl.) Adamson & Sprague; *Poa glomerata* Walter; *Poa glomerata* Thunb., nom. illeg., non *Poa glomerata* Walter)

South Africa. Perennial, vigorous to weak, erect, sometimes with decumbent culm bases, often stoloniferous, often without stolons, roots fibrous, leaves glabrous, leaf blades linear and narrow, inflorescences terminal contracted cylindrical, spikelets not distichous, 5-10 florets, glumes acute glabrous, lemma back hairy on margins, small flattened fruits, weed, invasive, may compete with native bunchgrasses, found in disturbed areas, light shade in woodland, on gravelly and well-drained soils, along roadsides, cultivated fields, low

lying areas, sandy sites, on scraped roadsides, ditch, drainage channels, roadside ditch, similar to *Tribolium acutiflorum*, see *Flora Caroliniana, secundum ...* 80. 1788, *Prodromus Plantarum Capensium, ...* 22. 1794, *Report on the Scientific Results of the Voyage of H.M.S. Challenger ...* [during the years 1873-76: under the command of Captain George S. Nares... Botany-vol. I. Botany-vol. II. Published by order of Her Majesty's Government Great Britain. Challenger Office. London 1885-1886] 1(2): 90, t. 51, f. 1-8. 1885, *Hooker's Icones Plantarum* 27(1): t. 2603. June 1899 and *Flora Capensis* 7: 703-704. 1900, *Journal of South African Botany* 7(2): 91. 1941, *Kew Bulletin* 40(4): 798. 1985.

T. obtusifolium (Nees) Renvoize (*Brizopyrum glomeratum* Stapf; *Dactylis ciliaris* L.; *Dactylis obtusifolia* (Nees) Steud.; *Desmazeria compositae* Hack.; *Lasiochloa obtusifolia* Nees; *Lasiochloa ovata* Nees; *Plagiochloa glomerata* (Stapf) Adamson & Sprague; *Poa glomerata* Thunb., nom. illeg., non *Poa glomerata* Walter; *Tribolium glomeratum* Davidse, Spies & H. du Plessis)

South Africa. Perennial, caespitose, strongly stoloniferous, brittle stolons readily and easily breaking, spikelets not distichous, glumes pubescent, sandy areas, dunes, low lying areas, on scraped roadsides, in roadside depression, on bare road shoulder, see *Mantissa Plantarum* 185. 1767, *Prodromus Plantarum Capensium, ...* 22. 1794, *Florae Africae Australioris Illustrationes Monographicae* 1: 430-431. 1841, *Synopsis Plantarum Glumacearum* 1: 298. 1854, *Bulletin de l'Herbier Boissier* 7(1): 27. 1899, *Hooker's Icones Plantarum* 27(1): t. 2603. T. utriculosum (Nees) Renvoize (*Lasiochloa utriculosa* Nees)

South Africa. Annual, tufted, spikelets not distichous, glumes pubescent, weed, disturbed areas, along roadside scraped areas, sandy soils, in dried-up roadside gully, in small dry depressions, sandy alluvial soils, in shade of shrubs and small trees, see *Florae Africae Australioris Illustrationes Monographicae* 1: 436. 1841 and *Kew Bulletin* 40(4): 798. 1985.

Trichachne Nees = Acicarpa Raddi, Acicarpha Juss. (Calyceraceae), Digitaria Haller

From the Greek *thrix*, *trichos* "hair" and *achne* "chaff, glume."

Panicoideae, Paniceae, Digitariinae, type *Trichachne sacchariflora* Nees, see *Species Plantarum* 1: 55. 1753, *Historia Stirpium Indigenarum Helvetiae Inchoata* 2: 244. 1768, *Flora Carniolica, Editio Secunda* 1: 52. 1771, *Annales du muséum national d'histoire naturelle* 2: 347, t. 58. 1803, *Agrostografia Brasiliensis* 31, t. 1, f. 4. 1823, *Flora Brasiliensis seu Enumeratio Plantarum* 2: 85, 87. 1829, *Synopsis Plantarum Glumacearum* 1: 38. 1855 [1853], *Flora*

Australiensis: A Description ... 7: 464. 1878, *Flora Capensis* 7: 373. 1898 and *Monograph of the Genus Digitaria* 573, 851, 866. 1950, *Darwiniana* 19: 65-166. 1974, *Contributions from the United States National Herbarium* 46: 13, 193-213, 622-623. 2003.

Trichaeta P. Beauv. = *Trisetaria* Forssk.

From the Greek *treis*, *tria* “three” and *chaite* “a bristle,” referring to the glume. Aveneae, type *Trichaeta ovata* (Pers.) P. Beauv., see *Flora Aegyptiaco-Arabica* 60. 1775, *Essai d'une Nouvelle Agrostographie* 86, 179. 1812.

Trichloris E. Fourn. ex Benth. = *Chloridopsis* Hack., *Chloropsis* Hack. ex Kuntze, *Leptochloris* Kuntze, *Trichloris* Scherff. & Pascher (Algae)

From the Greek tri- “three” plus *Chloris* Swartz, referring to the awns.

Two species, North America to Argentina, from southern U.S. to Argentina, Ecuador. Chloridoideae, Cynodonteae, Chloridinae, perennial, tussocks, leaves linear, ligule a line of short hairs, inflorescence digitate or with several verticillate racemes on a common axis, spikelets in 2 dense rows, several fertile and 1-2 rudimental florets, short glumes, lemma tip 3-awned, dry areas, plains, hillsides, closely related to *Chloris* and *Enteropogon*, type *Trichloris pluriflora* E. Fourn., see *Nova Genera et Species Plantarum seu Prodrum* 1, 25. 1788, *Journal of the Linnean Society, Botany* 19: 102. 1881, *Mexicanas Plantas* 2: 142. 1886, *Die Natürlichen Pflanzenfamilien* 2(2): 59. 1887, *Revisio Generum Plantarum* 2: 771. 1891 and U.S. Dept. Agric. Bull. 772: 190. 1920, Adolf Pascher (1881-1945), *Die Süßwasser-Flora Deutschlands, Österreichs und der Schweiz* 4: 88, 103. 1927, *Brigham Young University Science Bulletin: Biological Series* 19(2): 1-133. 1974, *Flora Mesoamericana* 6: 287-289. 1994, *Functional Ecology* 12(4): 640-645. Aug 1998, *Journal of Ecology* 88(6): 940-949. Dec 2000, *Flora of Ecuador* 68: 105-106. 2001, *Contributions from the United States National Herbarium* 41: 39-52, 222-223. 2001, *Austral. in English: false Rhodes grass, multiflowered chloris, false rhodesgrass

in Mexico: papalote, triverdin de tres

T. pluriflora E. Fourn. (*Chloris pluriflora* (E. Fourn.) W.D. Clayton; *Chloris pluriflora* (E. Fourn.) Kuntze; *Chloropsis pluriflora* (E. Fourn.) Kuntze; *Trichloris latifolia* Vasey; *Trichloris lilloi* Parodi; *Trichloris pluriflora* E. Fourn. ex Hemsl.)

North and South America, Argentina, Paraguay, U.S. Perennial, densely caespitose, erect, tough, sometimes branching from lower nodes, leaf blades linear attenuate acuminate, inflorescence racemose, narrow spikelets awned, 2-3 fertile

florets and 1-2 rudimental, glumes unequal and lanceolate, lower lemma margins ciliolate and keels scabrous, 2 lodicules, 2 stamens, good forage, steppes, dry scrubland, campos secos, see *Department of Agriculture. Special Report* 63: 32. 1883, *Biologia Centrali-Americana; ... Botany ...* 3: 560. 1885, *Mexicanas Plantas* 2: 142. 1886, *Revisio Generum Plantarum* 2: 771. 1891 and *Contr. U.S. Natl. Herb.* 17: 335. 1917, *Physis. Revista de la Sociedad Argentina de Ciencias Naturales* 9: 256, f. A-E. 1928, *Kew Bulletin* 21: 102. 1967.

in English: multi-flower windmill grass, multiflower false Rhodes grass, multiflowered false rhodesgrass

in Mexico: triverdin de cuatro, triverdin de quatro

T. pluriflora E. Fourn. f. *macra* Hack.

America. See *Anales del Museo Nacional de Buenos Aires* 11: 116. 1904.

T. pluriflora E. Fourn. f. *pluriflora*

America.

Trichochlaena Kuntze = *Melinis* P. Beauv., *Tricholaena* Schrader, *Tricholaena* Schrad. ex Schult. & Schult.f.

From the Greek *thrix*, *trichos* plus *chlaena*, *chlaenion* “a cloak”; see also *Tricholaena* Schrad.

Panicoideae, Paniceae, Melinidineae, see *Contributions from the United States National Herbarium* 46: 287, 623. 2003.

Trichochloa P. Beauv. = *Muhlenbergia* Schreb., *Trichochloa* DC.

From the Greek *thrix*, *trichos* “hair” and *chloe*, *chloa* “grass.”

Chloridoideae, Cynodonteae, Muhlenbergiinae, type *Trichochloa purpurea* P. Beauv., see *Genera Plantarum* 44. 1789, *Systema Naturae ... editio decima tertia, aucta, reformata* 2: 171. 1791, *Essai d'une Nouvelle Agrostographie* 29, t. 8, f. 2. 1812, *Catalogus plantarum horti botanici monspeliensis* 151. 1813, *Fundamenta Agrostographiae* 117. 1820 and *American Midland Naturalist* 6: 20. 1919, *Contributions from the United States National Herbarium* 41: 143-173, 223-224. 2001, *Contributions from the United States National Herbarium* 46: 623. 2003.

Trichodioida Cerv. = *Dasyochloa* Willd. ex Rydb., *Erioneuron* Nash, *Tridens* Roem. & Schult.

From the Greek *thrix*, *trichos* “hair” and *diklis*, *diklidos* “double-folding, double-folding door.”

Chloridoideae, see *Nova Genera et Species Plantarum* 1: 155-156, t. 47. 1815 [1816], *Systema Vegetabilium* 2: 34, 599. 1817, *Naturaleza [Sociedad mexicana de historia natural]* 1: 346. 1870 and *Flora of the Southeastern United States ...* 143, 1327. 1903, *Agricultural Experiment Station of the Agricultural College of Colorado. Bulletin* 100: 18, 37. 1906, *A Flora of California* 1: 141. 1912, *American Journal of Botany* 48(7): 572. 1961, *Sida* 17(4): 645-666. 1997, *Contributions from the United States National Herbarium* 41: 65-66, 115-116, 224. 2001.

Trichodium Michx. = *Agrostis* L.

Pooideae, Poeae, Agrostidinae, type *Trichodium laxiflorum* Michx., see *Species Plantarum* 1: 61-63. 1753, *Familles des Plantes* 2: 31, 530. 1763, *Flora Boreali-Americana* 1: 41-42, t. 8. 1803, *Observations sur les Graminées de la Flore Belgique* 127, 129. 1823 [1824], *Systema Vegetabilium, editio decima sexta* 1: 259. 1825, *A Manual of the Botany of the Northern United States* 577. 1848 and *U.S. Dept. Agric. Bull.* 772: 127. 1920, *Fl. Fenn.* 5: 29. 1971, *Taxon* 41: 556. 1992, *Taxon* 44: 611-612. 1995, *Contributions from the United States National Herbarium* 48: 42-89, 657. 2003.

Trichodon Benth. = *Phragmites* Adans.

From the Greek *thrix*, *trichos* “hair” and *odous*, *odontos* “tooth.”

Arundinoideae, Arundineae, see *Species Plantarum* 1: 81. 1753, *Familles des Plantes* 2: 34, 559. 1763 and *Flora Mesoamericana* 6: 252. 1994, *Contributions from the United States National Herbarium* 46: 537-539. 2003.

Tricholaena Schrader ex Schult. & Schult.f.

= *Eremochlamys* A. Peter, *Melinis* P. Beauv., *Tricholaena* Schrad., *Tricholaena* Schult., *Xylochlaena* Dalla Torre & Harms (Sarcolaenaceae), *Xylochlaena* Stapf, *Xyochlaena* Stapf

From the Greek *thrix*, *trichos* “hair” and *chlaena*, *chlaenion* “mantle, a cloak,” alluding to the silky spikelets.

About 4-12 species, Africa to India, Madagascar, Mediterranean. Panicoideae, Panicodae, Paniceae, or Panicoideae, Paniceae, Melinideae, rarely annual or perennial, unbranched or branched from the lower nodes, glaucous, tufted, herbaceous, erect to ascending, decumbent or often geniculate, ligule a fringed membrane or a fringe of hairs, leaf blades linear rigid, plants bisexual, inflorescence an open or contracted panicle, spikelets pedicellate, 2 florets, lower floret male, upper floret bisexual, glumes 1 per spikelet or

2, upper glume 5-nerved membranous and awnless to mucronate, lower glume small or absent, proximal lemmas awnless, upper lemma dorsally compressed with clasping margins, palea present, 2 lodicules free and glabrous, 3 stamens, ovary glabrous, stigmas plumose, native pasture species, species of open habitats, sandy and stony places, dry areas, sometimes ruderal, uncultivated lands, along roadsides, often confused with *Panicum* L., type *Tricholaena micrantha* Schrad. ex Schult., see *Species Plantarum* 1: 55, 63-66. 1753, *Essai d'une Nouvelle Agrostographie* 54, t. 11, f. 4. 1812, *Mantissa* 2: 8, 163. 1824, *Niger Flora* 190. 1849, *Synopsis Plantarum Glumacearum* 1: 37. 1855 [1853], *Gen. S. Afr. Pl.* edition 2: 428. 1869 and *Genera Siphonogamarum* 304. 1901, *Flora of Tropical Africa* 9: 16. 1917, *Icones Plantarum* t. 3098. 1922, *Feddes Repert. Spec. Nov. Regni Veg.* Beih. 40, 1: 164, Anh. 19. 1930, *Cytologia* 19: 97-103. 1954, *Willdenowia* 6: 285-289. 1971, *Bibliotheca Botanica* 138: 1-149. 1988, *Bothalia* 18: 119-122. 1988, *Flora of Ethiopia and Eritrea* 189-191. 1995, *Contributions from the United States National Herbarium* 46: 287, 623. 2003.

Anders.; *Xyochlaena monachne* (Trin.) Stapf; *Xyochlaena monachne* var. *minus* Hack. ex Garab.)

Tropical Africa, South Africa. Perennial short-lived or annual, wiry, glabrous, weak, erect or geniculate, decumbent, ascending, tufted or loosely tufted, highly branched, sometimes rooting from the lower nodes, creeping, leaf blade narrowly pointed at the tip, leaf sheath rounded and papery, ligule a fringe of short hairs, leaves sometimes hairy, inflorescence an open panicle, branches of the panicle arranged in pairs each with its own spikelet, spikelets with long pedicels, lower glume poorly developed, ornamental, useful for erosion control, drought resistant, provides grazing, low forage value, low mass-yield, a weed of old cultivations, growing in disturbed areas, sea shore, veld, dry areas, salt spray zone, uncultivated lands, along roadsides, open grassland, sandy soils, foreshore, see *Neue Entdeckungen im ganzen Umfang der Pflanzenkunde* 2: 86. 1821, *Systema Vegetabilium, editio decima sexta* 1: 317. 1825,

Beskrivelse af Guineiske planter 65-66. 1827, *Kongel. Danske Vidensk. Selsk. Naturvidensk. Math. Afh.* 3: 85-86. 1828, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 11: 400. 1889, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 24(3): 331. 1897, *Catalogue of the African Plants Collected by Dr. F. Trichoneura Andersson = *Crossotropis* Stapf

From the Greek *thrix*, *trichos* "hair" and *neuron* "nerve," referring to the ciliate lemma nerves.

About 7-8 species, U.S., tropical Africa, Arabian Peninsula. Chloridoideae, Eragrostideae, Eleusininae, or Chloridoideae, Cynodonteae, annual or perennial, herbaceous, erect, tufted, often branched, leaves cauline, auricles absent, ligule an unfringed membrane, linear pointed leaf blades, plants bisexual, inflorescence open or contracted, spreading or appressed racemes along a central axis, spikelets with 3-many florets, lower floret bisexual, upper floret reduced, spikelets solitary and cuneate, 2 narrow glumes usually mucronate or awned, emarginate lemmas with 3 prominent hairy nerves, mucronate or shortly awned lemmas rounded on the back or lightly keeled, palea keels glabrous, 2 free and fleshy lodicules, 3 stamens, ovary glabrous, 2 stigmas plumose, open habitats, dry areas, in sandy or stony soil, open floodplains, bushveld, disturbed sites, coastal, serious taxonomic problems, genus closely allied to *Leptochloa* and *Gouinia*, type *Trichoneura hookeri* Andersson, see *Prodrum Flora Novae Hollandiae* 182. 1810, *Essai d'une Nouvelle Agrostographie* 80. 1812, *Kongliga Svenska Vetenskapsakademiens Handlingar* 1853: 148. 1855, *Flora Capensis* 7: 317. 1898, *Catalogue of the African Plants Collected by Dr. F. May 2005.

Species

T. ciliata (Peter) S.M. Phillips (*Leptochloa ciliata* Peter; *Trichoneura hirtella* Napper)

Kenya, Tanzania. Perennial, compact, densely tufted, inflorescence linear-elliptic, slender racemes, spikelets usually imbricate 5- to 8-flowered, glumes lanceolate mucronate, lower glume narrowly lanceolate-oblong, upper glume narrowly elliptic-oblong, lemmas narrowly oblong membranous, in open areas, red sandy soil, woodland, *Acacia-Commiphora* woodland, see *Repertorium Specierum Novarum Regni Vegetabilis, Beihefte* 40(1): 263. 1930 [1931], *Kirkia* 3: 116. 1963, *Flora of Tropical East Africa* 2: 297. Apr 1974, *Kew Bulletin* 29(2): 270. Sept. 1974.

T. elegans Swallen

U.S., Texas. See *American Journal of Botany* 19(5): 439, f. 4. 1932.

T. eleusinoides (Rendle) Ekman (*Crossotropis eleusinoides* Rendle)

South Africa, Namibia. Annual, tufted, decumbent or ascending, inflorescence contracted, rocky areas, see *Arkiv för Botanik utgivet av K. Svenska Vetenskapsakademien* 11(9): 13. 1912.

T. grandiglumis (Nees) Ekman (*Crossotropis grandiglumis* (Nees) Rendle; *Diplachne grandiglumis* (Nees) Hack.; *Leptochloa grandiglumis* Nees; *Trichoneura grandiglumis* var. *grandiglumis*)

Tanzania to South Africa. Perennial, tufted, slender, erect or ascending, tussocky, leaf sheath rounded, ligule a white membrane, open pyramidal inflorescence, stiff straight racemes, spikelets 4- to 9-flowered, lower glume linear-lanceolate, upper glume linear-oblong, lemmas narrowly elliptic-oblong membranous, when mature the entire inflorescence breaks off, unpalatable, low grazing value, ruderal, on sandy soils, *Acacia* bushland, open habitats, rocky places, hillsides, open grassland, open floodplains, bushveld, disturbed areas, overgrazed sandy soils, see *Flora Africae Australioris Illustrationes Monographicae* 252. 1841, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 11: 404. 1889 and *Arkiv för Botanik utgivet av K. Svenska Vetenskapsakademien* 11(9): 15. 1912.

in English: rolling grass, tumbleweed, small rolling grass in southern Africa: rolgras, klein rolgras, waaigras, warrelgras; joang-ba-tsela (Sotho)

T. lindleyana (Kunth) Ekman (*Leptochloa albemarlensis* B.L. Rob. & Greenm.; *Leptochloa lindleyana* Kunth)

America, Ecuador. See *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 525. 1833, *American Journal of Science*, ser. 3, 50: 145. 1895 and *Arkiv för Botanik utgivet av K. Svenska Vetenskapsakademien* 11(9): 9. 1912.

T. lindleyana (Kunth) Ekman var. *albemarlensis* (B.L. Rob. & Greenm.) Reeder & Reeder (*Leptochloa albemarlensis* B.L. Rob. & Greenm.)

North America. See *American Journal of Science*, ser. 3, 50: 145. 1895 and *Madroño* 20: 253. 1970.

T. lindleyana (Kunth) Ekman var. *lindleyana* (*Calamagrostis pumila* Hook.f.; *Calamagrostis pumila* Nutt. ex A. Gray, nom. illeg., non *Calamagrostis pumila* Hook.f.; *Leptochloa hookeri* (Andersson) Andersson; *Leptochloa lindleyana* Kunth; *Trichoneura hookeri* Andersson)

Ecuador, Galápagos, North America. See *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 525. 1833, *Transactions of the Linnean Society of London* 20: 176. 1847, *Kongl. Ekman, *Triodia mollis* (Kunth) T. Durand & Schinz; *Uralepis arenaria* Steud.; *Uralepis ciliata* Steud.)

Saudi Arabia, Oman, Mauritania, Senegal. Annual, slender, tufted, compact inflorescence narrowly elliptic-oblong, ascending racemes, spikelets 5- to 9-flowered imbricate, linear glumes caudate at the tip, lower glume linear-lanceolate, upper glume linear-oblong, lemmas oblong membranous, grazed by all stock, on sandy soil, on dry bushland, *Acacia-Commiphora* woodland, see *Révision des Graminées* 2: 443, t. 135. 1831, *Nomenclator Botanicus*. *Editio secunda* 2: 29. 1841, *Synopsis Plantarum Glumacearum* 1: 247-248. 1854, *Conspectus Florae Africae* 5: 877. 1895, *Hooker's Icones Plantarum* 27: t. 2609. 1899 and *Arkiv för Botanik utgivet av K. Svenska Vetenskapsakademien* 11(9): 10-11. 1912, *Proceedings of the Biological Society of Washington* 43: 91. 1930.

in Niger: akasof, akôsof, berkaar bii, brugéll, gishiri'n zomo, tchirki n'zomo, tobéhu kiri

in Nigeria: garajin fadama

T. weberbaueri Pilger

America, Peru. See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 50(Beibl. 111): 1. 1913.

Trichoon Roth = *Phragmites* Adans.

From the Greek *thrix*, *trichos* "hair" and *oon* "egg."

Arundinoideae, Arundineae, see *Species Plantarum* 1: 81. 1753, *Familles des Plantes* 2: 34, 559. 1763, *Archiv für die Botanik* (Leipzig) 1(3): 37. 1798 and *Flora Mesoamericana* 6: 252. 1994, *Contributions from the United States National Herbarium* 46: 537-539, 623. 2003.

Trichopteria Nees ex Lindl. = *Trichopteryx* Nees

Greek *thrix*, *trichos* "hair" and *pteron* "wing," referring to the fruits.

Panicoideae, Panicodae, Arundinelleae, see *An Introduction to the Natural System of Botany* 449. 1836.

Trichopteryx Nees

From the Greek *thrix*, *trichos* "hair" and *pteron* "wing," possibly referring to the fruits.

About 5 species, southern and tropical Africa, Madagascar. Panicoideae, Panicodae, Arundinelleae, annual or perennial, caespitose, herbaceous, unarmed, often wiry, slender, decumbent, erect or trailing, auricles absent, ligule a fringe of hairs, leaf blades linear-lanceolate to lanceolate, plants bisexual, open or contracted panicle with filiform branches, spikelets solitary or paired, 2 florets, lower floret male or sterile, upper floret bisexual, 1 or 3 awns, the lateral awns when present shorter than the central, 2 glumes unequal, upper glume 3-nerved, lobes of upper lemma awned and hairy, lower lemma 3-nerved, palea keels wingless, 2 lodicules free and fleshy, 2 stamens, ovary glabrous, 2 plumose stigmas, callus of upper floret very short, forest margins, shade or open habitats, along roadsides, grasslands, stream banks, rocky riverbank, possibly related to *Loudetia*, type *Trichopteryx dregeana* Nees ex Lindl., see *Flore Française*. *Troisième Édition* 3: 32. 1805, *Agrostografia Brasiliensis* 36. 1823, *Flora Brasiliensis seu Enumeratio Plantarum* 2: 458. 1829, *An Introduction to the Natural System of Botany* 449. 1836, *Synopsis Plantarum Glumacearum* 1: 238. 1854, *Bulletin of Miscellaneous Information Kew* 1897: 297. 1897 and *Bulletin of Miscellaneous Information Kew* 1920(3): 112. 1920, *Bulletin of Miscellaneous Information Kew* 1934: 429. 1934, *Kirkia* 5: 235-258. 1966, *Kew Bulletin* 21(1): 119-124. 1967, *Kew Bulletin* 26(1): 111-123. 1971, *African Study Monographs* 20(1): 1-72. June 1999, *Contributions from the United States National Herbarium* 46: 623. 2003.

Species

T. dregeana Nees ex Lindl. (*Arundinella funaensis* Vanderyst; *Arundinella intricata* Hughes; *Danthonia*

lasiantha Baker; *Danthonia trichopteryx* (Nees ex Lindl.) Steud.; *Trichopteryx brevifolia* Hack.; *Trichopteryx dregeana* Nees; *Trichopteryx mukuluensis* De Wild.; *Trichopteryx parviflora* Hack.; *Tristachya dregeana* (Nees ex Lindl.) K. Schum.)

Southern tropical Africa. Perennial, light green, trailing, tufted, with a creeping rhizome, ligule a ring of hairs, leaf blade sometimes downward, open or contracted drooping panicle with filiform branches, the lateral awns shorter than the central, excellent soil binder useful for erosion control, leaves used for thatching, a ring of leaves (*ngatta ya nyuki*) placed on head and used to carry pots, usually found in wet areas, vleis, open habitats, among rocks, shade, open grassland, on steep slopes, hillsides, see *Synopsis Plantarum Glumacearum* 1: 244. 1854, *Journal of the Linnean Society, Botany* 25: 349. 1890, *Die Pflanzenwelt Ost-Afrikas* C: 109. 1895 and *Österreichische Botanische Zeitschrift* 52(5): 190-191. 1902, *Annales de la Société Scientifique de Bruxelles* 39: 159. 1920, *Bulletin agricole du Congo Belge* 11: 111. 1920.

in English: carpet grass

in South Africa: matgras, vleigras

Local name: kadodokela

T. elegantula (Hook.f.) Stapf (*Arundinella elegantula* Hook.f.; *Trichopteryx elegantula* Pilg. ex Peter, nom. illeg., non *Trichopteryx elegantula* Pilg. ex Peter)

Tanzania. Grassland, rocky places, see *Journal of the Proceedings of the Linnean Society* 7: 233. 1864, *Hooker's Icones Plantarum* 24: t. 2394. 1895 and *Repertorium Specierum Novarum Regni Vegetabilis, Beihefte* 40(1): 93. 1930, *Blumea, Supplement* 3: 29, f. 3. 1946.

T. fruticulosa Chiov. (*Trichopteryx catangensis* Chiov.; *Trichopteryx dregeana* var. *congoensis* Franch.; *Trichopteryx katangensis* De Wild.; *Trichopteryx sandaensis* Vanderyst)

French Congo. Perennial, erect, see *Bulletin de la Société d'Histoire Naturelle d'Autun* 8: 372. 1895 and *Annali di Botanica* 13: 50. 1914, *Nuovo Giornale Botanico Italiano*, n.s. 26: 68. 1919, *Bulletin agricole du Congo Belge* 11: 111. 1920, *Annales de la Société Scientifique de Bruxelles* 39: 157. 1920.

T. fruticulosa Chiov. var. ***perlaxa*** (Pilg.) C.E. Hubb. (*Trichopteryx perlaxa* Pilg.)

Gabon, Tanzania. See *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 7: 383. 1935, *Flora of Tropical Africa* 10(1): 7. 1937.

T. marungensis Chiov. (*Arundinella marungensis* (Chiov.) Chiov.)

Tanzania, Gabon. Erect, scandent, see *Nuovo Giornale Botanico Italiano*, n.s. 26: 67. 1919, *Nuovo Giornale Botanico Italiano* 24: 113. 1923.

T. stolziana Henrard (*Trichopteryx elegantula* subsp. *stolziana* (Henrard) J.B. Phipps) (after the German missionary Adolf Ferdinand Stolz, 1871-1917, plant and orchid collector (Nyassaland, Africa), merchant; see A.J.M. Leeuwenberg, "Isotypes of which holotypes were destroyed in Berlin." *Webbia*. 19(2): 863. 1965)

Burundi, Zambia. Annual, see *Repertorium Specierum Novarum Regni Vegetabilis* 18: 242. 1922, *Feddes Repertorium Specierum Novarum Regni Vegetabilis* 4: 120. 1964.

Trichopyrum Á. Löve = *Elymus* L., *Elytrigia* Desv., *Thinopyrum* Á. Löve

From the Greek *thrix*, *trichos* and *pyros* "grain, wheat."

Pooideae, Triticeae, Hordeinae, type *Trichopyrum intermedium* (Host) Á. Löve, see *Species Plantarum* 1: 83-84. 1753, *Nouveau Bulletin des Sciences, publié par la Société Philomatique de Paris* 2: 190. 1810 and *Ann. Sci. Nat. Bot., sér. 10*, 14: 234. 1932, *Novosti Sist. Vyss. Rast.* 10: 32. 1973, *Botanical Journal of the Linnean Society* 76(4): 382. 1978, *Taxon* 29(2-3): 351. 1980, *Veröffentlichungen des Geobotanischen Institutes Rübel in Zürich* 87: 49. 1986, *Contributions from the United States National Herbarium* 48: 279-310, 653-654. 2003.

Trichosantha Steud. = *Stipa* L.

From the Greek *thrix*, *trichos* plus *anthos* "a flower."

Pooideae, Stipeae, Stipinae, see *Species Plantarum* 1: 78-79. 1753, *Nomenclator Botanicus. Editio secunda* 2: 702. 1841 and *Contr. U.S. Natl. Herb.* 24(7): 216. 1925, *Contributions from the United States National Herbarium* 48: 617-650, 657-658. 2003.

Tricuspis P. Beauv. = *Tricuspis* Pers.

(Elaeocarpaceae), *Tridens* Roemer & Schultes, *Triodia* R. Br.

Latin *tricuspis* "having three points, three-pointed, three-tined."

Chloridoideae, Cynodonteae, see *Syn. Pl.* 2: 9. Nov 1806 [1807], *Prodromus Florae Novae Hollandiae* 182. 1810, *Essai d'une Nouvelle Agrostographie* 77, 81, f. 15. 1812, *Systema Vegetabilium* 2: 34, 599. 1817, *A Manual of the Botany of the Northern United States* 589. 1848, *Abhandlungen der Königlichen Gesellschaft der Wissenschaften zu Göttingen* 19: 259-260. 1874, *Genera Plantarum* 3(2): 1176. 1883 and *Amer. J. Bot.* 22: 39. 1935, *Contributions from the United States National Herbarium* 41: 224-230. 2001.

Tridens Roemer & Schultes = *Antonella*
Caro, *Gossweilerochloa* Renvoize, *Tricuspis* P.
Beauv., *Triodia* R. Br., *Windsoria* Nutt.

Latin *tridens*, *tridentis* “a trident, three-pronged,” referring to the lemma tip.

About 17-18 species, eastern U.S. to Argentina, Africa, Angola. Chloridoideae, Cynodonteae, perennial, caespitose, erect, rhizomatous or not, leaves cauline, auricles absent, ligule a line of hairs or a ciliate membrane, leaf blades linear, inflorescence terminal, exposed cleistogamous, open contracted panicle exerted, spikelets slightly laterally compressed, 4-several florets per spikelet, 2 glumes subequal or very unequal, lower glume 1-nerved, upper glume 1- to 7-nerved, lemmas emarginate to bidentate and usually mucronate or shortly awned, palea keels ciliate or ciliolate, 2 lodicules rounded, 3 stamens, ovary glabrous, 2 stigmas, found in meadows, prairies, old fields, edge of ponds, dry soil, mountains, woods clearings, open woodlands, open fields, moist ditches, wetlands, similar to some species of *Eragrostis*, may be confused with *Coelachyrum*, see *Species Plantarum* 1: 68, 73-76. 1753, *Genera Plantarum* 23. 1776, *Flora Boreali-Americana* 1: 68-69. 1803, *Syn. Pl.* 1: 85. 1805, *Syn. Pl.* 2: 9. Nov 1806 [1807], *Prodromus Florae Novae Hollandiae* 182. 1810, *Essai d'une Nouvelle Agrostographie* 77, 81, f. 15. 1812, *A Sketch of the Botany of South-Carolina and Georgia* 1: 165. 1816, *Systema Vegetabilium* 2: 34, 599. 1817, *The Genera of North American Plants* 1: 62, 70. 1818, *A Catalogue of Plants, ... Triglossum F.E.L. Fischer ex Roemer & Schultes = *Arundinaria* Michx., *Triglossum* Roemer & Schultes

From the Greek *treis* "three" and *glossa* "a tongue."

Bambusoideae, Bambuseae, Arundinariinae, type *Triglossum bambusinum* Fisch., see *Flora Boreali-Americana* 1: 73-74. 1803, Friedrich Ernst Ludwig von Fischer (Fedor

Bogdanovic Fischer), 1782-1854, *Catalogue du jardin des plantes, de S.E. Monsieur le Comte Aléxis de Razoumoffsky ... à Gorenki près de Moscou. [Moskva] 1812, Cat. Pl. Amer. Sept.* 14. 1813, *Systema Vegetabilium* 2: 55, 846. 1817, *Fundamenta Agrostographiae* 97. 1820 and *Contributions from the United States National Herbarium* 39: 18-24, 116. 2000.

Trikeriaia Bor

Greek *treis*, *tria*, *tri*- "three" and *keras* "horn," referring to the nature of the spikelets.

About 1-2 species, Pakistan, Tibet, India, Sikkim, Bhutan, Himalayas. Stipoideae, Stipeae, perennial, caespitose or densely tufted, herbaceous, leaf sheaths glabrous, auricles absent, leaf blades narrow, ligule a membrane-like, leaves flat or convolute or involute, plants bisexual, inflorescence paniculate, spikelets pedicels pubescent, floret lanceolate, callus obtuse, 2 glumes subequal to unequal, upper glume 3-nerved, lemma membranous, apex of lemma deeply lobed, central awn curved and persistent, palea 2-nerved acute, 3 lodicules, 3 stamens, ovary glabrous, 2 stigmas, open habitats, mountains, closely related to and sometimes included in *Stipa*, type *Trikeriaia hookeri* (Stapf) Bor, see *Sunyatsenia* 6(1): 71-72. 1941, *Kew Bulletin* 9(4): 555-557. 1955, *Taxon* 29: 645-666. 1980, *Notes, Royal Bot. Gard. Edinburgh* 42(3): 355-489. 1985, *Flora Reipublicae Popularis Sinicae* 9(3): 317, pl. 79, f. 8-12. 1987, *Kew Bulletin* 42(2): 350. 1987, *Annals of the Missouri Botanical Garden* 5: 261. 1987, *Flora Sichuanica* 5(2): 197. 1988, Lu, X.-F., S.-L. Lu and G.-C. Chen, "A new species of *Trikeriaia* Bor (Gramineae) from Tianshan Mts. in Xianjiang of China." *Acta Phytotaxonomica Sinica* 39(3): 275-277. 2001, F.M. Vázquez & Mary E. Barkworth, "Resurrection and emendation of *Macrochloa* (Gramineae: Stipeae)." *Botanical Journal of the Linnean Society* 144(4): 483-495. Apr 2004.

Species

T. hookeri (Stapf) Bor (*Achnatherum hookeri* (Stapf) Keng; *Stipa hookeri* Stapf; *Timouria aurita* Hitchc.)

Asia. Lower glume 3-nerved, see *Essai d'une Nouvelle Agrostographie* 19, 146, pl. 6, f. 7. 1812 and *Journal of the Washington Academy of Sciences* 23: 134. 1933, *Kew Bulletin* 5(3): 319. 1950, *Kew Bulletin* 9(4): 555-556. 1955, *Claves Generum et Specierum Graminearum Primarum Sinicarum Appendice Nomenclatione Systematica* 106, 213. 1957.

T. oreophila Cope

Sikkim, Bhutan. Lower glume 5-nerved, see *Kew Bulletin* 42(2): 350. 1987.

Trilobachne Schenck ex Henrard =
Polytoca R. Br.

Greek *treis*, *tria* “three,” *lobos* “pod, lobe” and *achne* “chaff, glume,” referring to the lobed glumes.

One species, India. Panicoideae, Andropogonodae, Maydeae, or Andropogoneae, Chionachninae, annual, herbaceous, unarmed, plants monoecious, inflorescence fascicled, 2 glumes subequal and dissimilar, male florets 3-staminate and with 2 lodicules, male spikelets with 2 male florets, small palea, no stamens, ovary glabrous, 2 stigmas, type *Trilobachne cookei* (Stapf) M. Schenck ex Henrard, see *Plantae Javanicae Rariores* 20. 1838 and *Mededeelingen van's Rijks-Herbarium* 67: 4, 7. 1931, *Genera Graminum* 371-372. 1986, Sarah Mathews et al., “Phylogeny of Andropogoneae inferred from phytochrome B, GBSSI, and *ndhF*.” *International Journal of Plant Sciences* vol. 163: 441. 2002, T.A. Jannink & J.F. Veldkamp, “A revision of *Chionachninae* (Gramineae: Andropogoneae).” *Blumea* 47(3): 545-580. 2002.

Species

T. cookei (Stapf) M. Schenck ex Henrard (*Polytoca cookei* Stapf)

India. See *Hooker's Icones Plantarum*, t. 2333. 1894.

Triniochloa Hitchc.

For the German botanist Carl (Karl) Bernhard Freiherr von Trinius, 1778-1844, physician, traveler, agrostologist, wrote *Fundamenta Agrostographiae*. Viennae 1820; see Stafleu & Cowan, *Taxonomic literature*. 6: 493-497. 1986; J.H. Barnhart, *Biographical notes upon botanists*. 3: 401. 1965; T.W. Bossert, compil., *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 406. Boston, Mass. 1972; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. Philadelphia 1964; Antoine Lasègue, *Musée botanique de M. Benjamin Delessert*. 1845; S. Lenley et al., *Catalog of the manuscript and archival collections and index to the correspondence of John Torrey*. Library of the New York Botanical Garden. 1973; G. Schmid, *Goethe und die Naturwissenschaften*. Halle 1940; Mariella Azzarello Di Misa, editor, *Il Fondo Antico della Biblioteca dell'Orto Botanico di Palermo*. 274-277. Palermo 1988; Günther Schmid, *Chamisso als Naturforscher*. Eine Bibliographie. Leipzig 1942; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 791. Stuttgart 1993; F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 181. Berlin & Hamburg 1989; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933; G.C. Wittstein, *Etymologisch-botanisches Handwörterbuch*. 899. Ansbach 1852;

Helmut Genaust, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 657. [d. 1841] Basel 1996.

About 4-6 species, Mexico to Bolivia, Peru, Ecuador, Venezuela. Pooideae, Poodae, Meliceae, perennial, tufted, herbaceous, erect, sometimes forming clumps, leaf blades linear, auricles absent, ligule an unfringed membrane, plants bisexual, open inflorescence paniculate, spikelets 1-flowered dorsally compressed, 2 membranous persistent glumes unequal to very unequal, lemma 5-nerved bearing a geniculate awn, floret callus bearded, palea keeled, 2 fleshy lodicules, 3 stamens, ovary glabrous, 2 stigmas, ravines, rocky places, moist ground, similar to *Stipa*, related to *Schizachne*, type *Triniochloa stipoides* (Kunth) Hitchc., see *Nova Genera et Species Plantarum* 1: 131. 1815 [1816] and *Contributions from the United States National Herbarium* 17(3): 303. 1913, *Boletín técnico. Ministerio de agricultura y cria*. 1: 31. 1937, *Flora Mesoamericana* 6: 232. 1994, *Novon* 5(1): 36-39. 1995, *Novon* 8(2): 144-146. 1998, *Caldasia* 23(2): 405-412. 2001, *Contributions from the United States National Herbarium* 48: 658. 2003.

Species

T. andina Luces

Colombia, Venezuela. See *Boletín de la Sociedad Venezolana de Ciencias Naturales* 15(80): 15-16, f. 10. 1953.

T. gracilis Gómez-Sánchez & González-Ledesma

Mexico. See *Novon* 8(2): 144, f. 1. 1998.

T. laxa Hitchc.

Mexico. See *Contributions from the United States National Herbarium* 17(3): 304. 1913.

T. micrantha (Scribn.) Hitchc. (*Avena micrantha* Scribn.)

Mexico. See *Circular, Division of Agrostology, United States Department of Agriculture* 19: 3-4, f. 1. 1900, *Contributions from the United States National Herbarium* 17(3): 304. 1913.

T. stipoides (Kunth) Hitchc. (*Agrostis aspera* Willd. ex Steud., nom. illeg., non *Agrostis aspera* Michx.; *Agrostis stipoides* (Kunth) Spreng.; *Avena stipoides* Scribn.; *Muhlenbergia alpestris* (Kunth) Trin.; *Muhlenbergia alpestris* (Kunth) Kunth; *Muhlenbergia liebmannii* E. T. talpensis González-Ledesma & Gómez-Sánchez

Mexico. See *Novon* 5(1): 36, f. 1. 1995.

Triniusa Steudel = Bromus L.

For the German botanist Carl Bernhard Trinius, 1778-1844.

Pooideae, Bromeae, type *Triniusa danthoniae* (Trin.) Steud., see *Species Plantarum* 1: 76-78. 1753, C.A. von Meyer (1795-1855), *Verzeichniss der von dem Herrn Dr. Kolenati in dem mittlern Theile des Caucasus ... gesammelten Pflanzen* 1849 [the Bohemian botanist and zoologist Friedrich August Rudolph Kolenati, 1812-1864, traveled in Russia], *Synopsis Plantarum Glumacearum* 1: 328. 1854 and *U.S.D.A. Div. Agrostol. Bull.* 23: 1-66. 1900, *Brittonia* 7: 421. 1952, *Notes Roy. Bot. Gard. Edinburgh* 30: 366. 1970, *Bot. Jahrb. Syst.* 102: 447. 1981, *Taxon* 41: 559. 1992, *Annals of the Missouri Botanical Garden* 81(4): 784-791. 1994, *Flora Mediterranea* 8: 307-313. 1998, *Willdenowia* 28: 144. 1998, *Contributions from the United States National Herbarium* 48: 154-191, 658-659. 2003.

Triodia R. Br. = Tridens Roem. & Schult.,

Triodon Baumg.

From the Greek *treis*, *tria* "three" and *odous*, *odontos* "tooth," referring to the divided lemmas, 3-toothed or 3-lobed; see Robert Brown, *Prodromus florae Novae Hollandiae et Insulae van-Diemen*. 182. London 1810; M. Lazarides, "New taxa of tropical Australian grasses (Poaceae)." in *Nuytsia*. 5(2): 273-303. 1984.

About 64-65 species, Australia. Chloridoideae, Triodieae, perennial, caespitose, often stoloniferous, rarely rhizomatous, strongly xeromorphic habit, prickly to spiny, coarse, stiff, dense tussock or hummock-forming, shoots aromatic to resinous or not, culms branched and leafy, dead leaves inside the hummock, leaf blades rigid and pungent or sharp-pointed, ligule short and hairy, sheath glabrous or hairy, leaves linear and narrow, auricles present or absent, culm nodes glabrous, plants bisexual, inflorescence spicate or

paniculate, panicles narrow and rather loose, spikelets solitary with closely or loosely overlapping florets, fertile florets usually 3-many, upper floret sometimes sterile, 2 subequal glumes stiff and acute, lemmas 3- to 9-nerved, palea 2-keeled, callus short and bearded, 2 lodicules free and fleshy or membranous, 3 stamens, ovary glabrous, 2 stigmas, small fruit ellipsoid, many species extremely resinous, foliage highly flammable, low palatability, low nutritive value, valuable as drought reserve, a fuel source, found on arid and semiarid zones of Australia, on rocky outcrops along the coasts, sandy or stony soils, open habitats, on the slopes of low rocky hills, on low-nutrient soils of sand plains and rocky low mountain ranges in the arid inland, on the flat rocky hill tops, some species formerly classified in *Plectrachne*, type *Triodia pungens* R. Br., see Johann Jakob Bernhardt (1774-1850), *Systematisches Verzeichniss* 20, 44. 1800, *Flora Boreali-Americana* 1: 68-69. 1803, *Prodromus Florae Novae Hollandiae* 182. 1810, *Essai d'une Nouvelle Agrostographie* 77, 81, f. 15. 1812, *Enumeratio Stirpium Transsylvanicae* 3: 238. 1816, *A Sketch of the Botany of South-Carolina and Georgia* 1: 165. 1816, *Systema Vegetabilium* 2: 34, 599. 1817, *The Genera of North American Plants* 1: 70. 1818, *A Catalogue of Plants, ... City of New York* 91. 1819, *Manual of Botany for North America. Fifth edition* 447. 1829, *Hortus Regius Botanicus Berolinensis* 2: 296. 1833, *Transactions of the American Philosophical Society, new series*, 5: 147. 1835, *Genera Plantarum* 3(2): 1176. 1883, *Die Natürlichen Pflanzenfamilien* 2(2): 68. 1887 and *Flora of the Southeastern United States* 143-144. 1903, *Contributions from the United States National Herbarium* 17: 181-189. 1913, *Botanical Magazine (Tokyo)* 41: 12. 1927, *Vierteljahrsschrift der Naturforschenden Gesellschaft in Zürich* 74: 132. 1929, *Blumea, Supplement* 3: 83-89. 1946, *Transactions of the Royal Society of South Australia* 70: 221-233. 1946, *Australian Journal of Botany* 1: 121-184. 1953, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 76: 281-384. 1954, *Aust. J. Bot.* 8: 381-395. 1960, *American Journal of Botany* 48: 565-573. 1961, *Proc. Linn. Soc. N.S.W.* 96(3): 175-185. 1971, *Kew Bulletin* 33: 525. 1979, *Dominguezia* 2: 18. 1981, S.W.L. Jacobs, "Relationships, distribution and evolution of *Triodia* and *Plectrachne* (Gramineae)." In: *Evolution of the Flora and Fauna of Arid Australia*. (Eds: W.R. Barker, P.J.M. Greenslade) Peacock Publications, Frewville, 287-290. 1982, *Nuytsia* 8(2): 219-223, 241-243. 1992, S.W.L. Jacobs, "*Spinifex* (*Triodia*, *Plectrachne*, *Symplectrodia* and *Monodia*: Poaceae) in Australia." in: *Desertified Grasslands: Their Biology and Management*. (Ed: G.P. Chapman) Academic Press, London, 47-62. 1992, *American Journal of Botany* 81: 622-629. 1994, M. Lazarides, "A revision of *Triodia* including *Plectrachne* (Poaceae, Eragrostideae, Triodiinae)." *Australian Systematic Botany* 10(3): 381-489. 1997, *Austral. Ecology* 24(5): 563-572. Oct 1999 [Regeneration after fire in *Triodia* R. Br.], J.G. Mant et al., "A phylogeny of the Triodieae..."

Grasses: Systematics and Evolution 213-217. 2000, *Contributions from the United States National Herbarium* 41: 16, 121-122, 224-230, 239. 2001, *Ecological Management and Restoration* 4(s1): S60-S68. Feb 2005 [The responses of small mammals to patches regenerating after fire and rainfall in the Simpson Desert, central Australia], Qing Liu, Nan-Xian Zhao, Gang Hao, Xiao-Ying Hu and Yun-Xiao Liu, "Caryopsis morphology of the Chloridoideae (Gramineae) and its systematic implications." *Botanical Journal of the Linnean Society* 148(1): 57-72. May 2005, D.A. Driscoll & C.M. Hardy, "Dispersal and phylogeography of the agamid lizard *Amphibolurus nobbi* in fragmented and continuous habitat." *Molecular Ecology* 14(6): 1613-1629. May 2005.

Species

T. acutispicula Lazarides (*Festuca caroliniana* Steud.; *Plectrachne caroliniana* S.W.L. Jacobs; *Triodia caroliniana* (Steud.) Chase)

Western Australia. Forming hummocks, more or less resinous, leaf blades often curved and pungent, spikelets lanceolate 3- to 7-flowered, long pungent callus bearded, in sandy soils, see *Species Plantarum* 1: 73-76. 1753, *Synopsis Plantarum Glumacearum* 1: 312. 1854 and *American Journal of Botany* 24(1): 34. 1937, *Nuytsia* 8(2): 221. 1992, *Australian Systematic Botany* 10(3): 400. 1997.

T. aerea Lazarides

Western Australia. Not resinous, much-branched, compact fastigiate habit, culms and stolons with aerial roots, narrow sparse spiciform panicles, spikelets lanceolate 3- to 4-flowered, see *Australian Systematic Botany* 10(3): 401. 1997.

T. angusta N.T. Burb.

Western Australia. Loose or compact hummocks, glaucous, biseriate secund spikelets, unequal mucronate glumes, 3-nerved lemmas, scabrous paleas, similar to *Triodia secunda*, see *Journal of the Royal Society of Western Australia* 30: 27. 1946.

T. aristiglumis (Lazarides) Lazarides (*Plectrachne aristiglumis* Lazarides)

Northern Territory, Kakadu National Park. Forming hummocks, not resinous, leaves auriculate, leaf sheaths hirsute or pilose, leaf blades flexuous pseudopetiolate, open sparse loose panicles, spikelets closely 7- to 8-flowered, unequally 3-awned glumes and lemmas, see *Nuytsia* 5(2): 278. 1984 [1985], *Australian Systematic Botany* 10(3): 405. 1997.

T. aurita Lazarides

Northern Territory. Not resinous, forming hummocks, open sparse panicle, spikelets broadly lanceolate 7- to 9-flowered, long-bearded callus, on sandstone, similar to *Triodia plectrachnoides*, see *Australian Systematic Botany* 10(3): 405. 1997.

T. basedowii E. Pritzel (*Triodia pungens* sensu J.M. Black) (after the anthropologist Herbert Basedow, 1881-1933, geologist and botanical collector in Central Australia, explorer, author of *Anthropological Notes Made on the South Australian Government North-West Prospecting Expedition, 1903*. [Extracted from the *Transactions and Proceedings of the Royal Society of South Australia*, vol. 28, pages 12-52 plus 19 plates including 1 folding and 10 in color, Adelaide, 1904])

New South Wales, Queensland, Northern Territory. Perennial, hummock-forming, variable, compact or straggling, tough, prickly, woolly, spiky, thin leaves sharply pointed and rigid, leaf sheaths not resinous, stoloniferous, panicle linear usually short and dense, spikelets ovate or oblong 3- to 13-flowered, uppermost floret sometimes reduced, glumes many-nerved and keeled, lemmas villous near the base with 3-nerved lobes, lobes of the lemmas recurved, drought resistant, provides cover for small wildlife species, refuge and shelter for small animals, grains eaten, little grazing value, useful for erosion control, soil stabilizer in sandy arid regions, well adapted to arid environments, grows in sandy regions, between dunes, arid areas, on sand dunes crests and bases of sand dunes, on sandy red soils, in red sand dunes, see *Repertorium Specierum Novarum Regni Vegetabilis* 15: 356. 1918, *Grasses Central Australia* 208, pl. 59, 209, pl. 60a. 1970.

in English: lobed spinifex, hard spinifex, spinifex

T. biflora Lazarides

Western Australia. Forming large hummocks, leaves highly resinous, leaf sheaths glabrous, loose panicles, spikelets broadly elliptic 3-flowered, lower 2 florets bisexual, upper floret sterile globular vestigial, lemmas 3-nerved, callus short and thickened, see *Australian Studies in Biological Sciences Series* 10(3): 412. 1997 [also *Australian Systematic Botany*].

T. bitextura Lazarides (*Plectrachne pungens* (R. Br.) C.E. Hubb.; *Plectrachne pungens* var. *callosum* C.E. Hubb.; *Sessleria pungens* (R. Br.) Sprengel; *Triodia pungens* R. Br.; *Triraphis pungens* R. Br.)

Queensland, Burke District, Gulf of Carpentaria. Hummock grass, loose, often stoloniferous, usually resinous, aromatic, leaves viscid, leaf blades flexuous, panicles lanceolate, spikelets 5- to 9-flowered, fertile florets 2-6, glumes usually 3- to 5-nerved, lemma with appressed pubescence and unequal awns, palea with short keels, pasture, grows on deep sandy soil, near water courses, floodplains, similar to *Triodia schinzii*, see *Prodromus Florae Novae Hollandiae* 1: 182, 185. 1810 and *Australian Systematic Botany*. 10(3): 412. 1997.

in English: curly spinifex, spinifex

T. brizoides N.T. Burb. (*Triodia burkensis* N.T. Burb.; *Triodia clelandii* N.T. Burb.) (Normanton, Burke district) (after the Australian naturalist Sir John Burton Cleland, 1878-1971, botanist, ethnologist, explorer and plant collector. See J.H. Barnhart, *Biographical notes upon botanists*. 1: 356. 1965; John McConnell Black (1855-1951), in *Transactions and Proceedings of the Royal Society of South Australia*. 56: 46, t. II, f. 3. 1932; Dennis John Carr & S.G.M. Carr (1912-1988), editors, *People and Plants in Australia*. London 1981; Garrison & Morton, *Medical Bibliography*. 4648, 5474. 1961)

Western Australia, Northern Territory, Queensland. Compact, forming hummocks, not resinous, leaf sheaths indurated, inflorescence a raceme or a panicle few-branched, spikelets lanceolate 4- to 18-flowered, rocky or stony soils, on sandy plains, shrubland, open habitats, sometimes confused with *Triodia wiseana*, see *Journal of the Royal Society of Western Australia* 30: 24. 1946, *Australian Journal of Botany* 1(1): 161, f. 12b. 1953, *Australian Journal of Botany* 8: 385. 1960.

in English: weeping spinifex

T. bromoides (F. Muell.) Lazarides (*Plectrachne bromoides* (F. Muell.) C.E. Hubb.; *Triraphis bromoides* F. Muell.)

Western Australia. Hummock grass, prickly, not resinous, scaberulous and pubescent, loose panicles lanceolate or oblong, spikelets cuneate 2- to 7-flowered, unequal glumes long-acuminate shortly awned 1- to 5-nerved, endangered or extinct species, growing on sand plains, dunes, see *Fragmenta Phytographiae Australiae* 8: 108. 1873 and *Hooker's Icones Plantarum* t. 3385. 1939, *Australian Systematic Botany*. 10(3): 417. 1997.

T. bunglensis (S.W.L. Jacobs) Lazarides (*Plectrachne bunglensis* S.W.L. Jacobs) (Western Australia, Northern Province, Bungle Bungle Range)

Western Australia. Hummock-forming, resinous, panicles spiciform linear, spikelets solitary or paired, florets 3-5 per spikelet, fertile the lowest 1 or 2 florets, on sandstone, similar to *Triodia bynoei*, see *Nuytsia* 8(2): 222-223. 1992, *Australian Systematic Botany* 10(3): 418. 1997.

T. bunicola (S.W.L. Jacobs) Lazarides (*Triodia irritans* N.T. Burb. forma B; *Triodia irritans* var. *laxispicata* forma B; *Triodia scariosa* subsp. *bunicola* S.W.L. Jacobs)

South Australia. Hummock grass, not resinous, leaves pseudopetiolate, inflorescence a narrow usually dense panicle, on lateral branches of the panicle spikelets 5- to 8-flowered flattened, palea keels not winged, see *Australian Journal of Botany* 1(1): 172-173, f. 16d. 1953, *Telopea* 4(4): 654. 1992, *Australian Systematic Botany* 10(3): 419-420. 1997.

T. burbridgeana S.W.L. Jacobs (*Triodia procera* auct. non R. Br.) (after Nancy Tyson Burbidge, born in Yorkshire, England, 1912-1977, Curator of the Herbarium, CSIRO Division of Plant Industry, Canberra, an active conservationist, published the *Dictionary of Australian Plant Genera*, 1961 awarded the degree of Doctor of Science by the University of Western Australia, 1976 a member of the Order of Australia)

Western Australia, Northern Territory. Perennial, resinous, aromatic, forming loose hummocks, inflorescence paniculate, loose panicle, spikelets 4- to 8-flowered, smooth cartilaginous glumes, lemmas ovate-orbicular, monsoonal areas, coarse sand, among outcrops, near streams, confused with *Triodia procera*, related to *Triodia pungens* R. Br., see *Nuytsia* 8(2): 219-220. 1992, *Fl. Kimberley Region* 1234. 1992.

T. bynoei (C.E. Hubb.) Lazarides (*Plectrachne bynoei* C.E. Hubb.) (Western Australia, Northern Province, Northwest coast, Bynoe; Benjamin Bynoe, about 1803-1865, surgeon on the voyage of the Beagle (1837-1843), plant collector in Western Australia, Northern Territory and in New South Wales)

Western Australia, Queensland. Forming hummocks, resinous, aromatic, panicles contracted, spikelets 4- to 6-flowered, lemma of the lowest floret singly-awned, in sandy shallow soil, in seasonally wet sites, mainland and coastal, similar to *Triodia bunglensis*, see *Bulletin of Miscellaneous Information Kew* 1941: 30. 1941, *Australian Systematic Botany* 10(3): 422-423. 1997.

T. claytonii Lazarides (*Leptochloa mollis* Kunth; *Plectrachne mollis* Lazarides; *Trichoneura mollis* (Kunth) Ekman; *Triodia mollis* (Lazarides) Lazarides, nom. illeg., non *Triodia mollis* (Kunth) T. Durand & Schinz)

Western Australia, Queensland. Forming hummocks, few-noded, stoloniferous, nonresinous slender foliage, spikelets with only 1 fertile floret, see *Révision des Graminées* 2: 443, t. 135. 1831, *Conspectus Florae Africae* 5: 877. 1895 and *Arkiv för Botanik utgivet av K. Svenska Vetenskapsakademien* 11(9): 10. 1912, *Nuytsia* 5(2): 279. 1984[1985], *Australian Systematic Botany* 10(3): 456. 1997, *Flora of Australia* 43: 375. 2002.

T. compacta (N.T. Burb.) S.W.L. Jacobs (*Triodia irritans* var. *compacta* N.T. Burb.)

South Australia. Forming hummocks, not resinous, strongly branched, leaf sheaths glabrous, leaves with long-pungent blades, small panicles subtended by a flag leaf with reduced blade, closely 6-13-flowered spikelets, on sand dunes, coastal, seashores, saline and wet flats, see *Australian Journal of Botany* 1(1): 169, f. 15a. 1953, *Telopea* 4(4): 653. 1992, *Aust. Syst. Bot.* 10(3): 424. 1997.

in English: spinifex

T. concinna N.T. Burb.

Western Australia. Forming hummocks, stoloniferous, not resinous, not aromatic, leaf blades with very short pseudopetioles, small exerted panicles, solitary or paired spikelets 5- to 12-flowered, palea keels with irregular wings, see *Australian Journal of Botany* 8: 387. 1960.

T. contorta (Lazarides) Lazarides (*Plectrachne contorta* Lazarides)

Northern Territory. Forming clumps, not resinous, loose panicles, spikelets 6- to 7-flowered, exerted florets, 1-awned glumes and lemmas, short palea, twisted lemma awns, similar to *Triodia uniaristata*, see *Nuytsia* 5(2): 278. 1984[1985], *Australian Systematic Botany* 20(3): 426. 1997.

T. cunninghamii Benth. (*Sieglingia cunninghamii* (Benth.) Kuntze)

Western Australia. Forming hummocks, leaves highly resinous, long leaf blades flat or loosely folded, sometimes stoloniferous, long narrow panicles rather dense, few-flowered spikelets, hirsute lemmas 9-nerved and 3-lobed, similar to *Triodia stenostachya*, see *Flora Australiensis: A Description ...* 7: 606-607. 1878, *Revis. Gen. Pl.* 2: 789. 1891 and *Aust. Syst. Bot.* 10(3): 426. 1997.

T. danthonioides (F. Muell.) Lazarides (*Plectrachne danthonioides* (F. Muell.) C.E. Hubb.; *Triraphis danthonioides* F. Muell.)

Western Australia, Swan River. Forming hummocks, not resinous, robust, leaf blades pseudopetiolate, leaf sheaths woolly, spikelets 5-9-flowered, lemma deeply 3-lobed 3-awned, coastal, similar to *Triodia dielsii*, see *Fragmenta Phytographiae Australiae* 8: 125. 1873 and *Hooker's Icones Plantarum* t. 3385. 1939, *Australian Systematic Botany* 10(3): 427-428. 1997.

T. desertorum (C.E. Hubb.) Lazarides (*Plectrachne desertorum* C.E. Hubb.) Western Australia, Eremaean Province, Victoria Desert. Tussocky, compact, not resinous, branched, many-noded, rigid leaf blades pseudopetiolate, loose panicles, spikelets 9-12-flowered, florets exerted, palea keels ciliate, similar to *Triodia rigidissima*, see *Bulletin of Miscellaneous Information Kew* 1941: 28. 1941, *Australian Systematic Botany* 10(3): 429. 1997.

T. dielsii (C.E. Hubb.) Lazarides (*Plectrachne dielsii* C.E. Hubb.)

Western Australia. Robust, forming hummocks, not resinous, dense panicle twice-branched, loosely 4-flowered spikelets, shortly awned lemmas, hairy paleas, on sand plains, similar to *Triodia danthonioides* and *Triodia longipalea*, see *Bulletin of Miscellaneous Information Kew* 1941(1): 27-28. 1941, *Australian Systematic Botany* 10(3): 431. 1997.

T. epactia S.W.L. Jacobs (from the Greek *epaktios* "coastal")

Western Australia, Northern Territory. Perennial, resinous, tufts or hummocks, prop roots, sometimes stoloniferous, narrow inflorescence, narrow and dense panicles, spikelets shortly pedicellate closely flowered, usually 3-17 florets, broadly winged lemmas, beaked paleas with winged keels, coastal, beach, sand dunes, deep sandy soils, coastal dunes, related to *Triodia pungens* R. Br., see *Nuytsia* 8(2): 220-221. 1992.

T. fissura R.L. Barrett, G.B. Wells & K.W. Dixon

Western Australia. Compact, stoloniferous, not resinous, not aromatic, rigid leaf blades, very short ligule entire, inflorescence a spike, spikelets biseriate 8- to 16-flowered, palea keels wingless, growing in narrow rock fissures, similar to *Triodia aerea*, closely related to *Triodia spicata*, see *Flora of Australia* 44B: 207, 458-459. 2005.

T. fitzgeraldii N.T. Burb. (for William Vincent Fitzgerald, 1867-1929, botanical collector in Tasmania and Western Australia, died on the Daru River, New Guinea)

Western Australia. Forming hummocks, stoloniferous, not resinous, leaves not auriculate, hairy leaf sheaths with long-ciliate margins, leaf blades pseudopetiolate, inflorescence a spiciform panicle with filiform and flexuous branches, few-flowered ovate spikelets, 4-6 florets, glumes more or less equal, scarious lemmas 3-lobed, on sandstone hills, see *Journal of the Royal Society of Western Australia* 30: 25. 1946, *Fl. Kimberley Region* 1232, f. 348B. 1992.

T. helmsii (C.E. Hubbard) Lazarides (*Plectrachne helmsii* C.E. Hubb.) (dedicated to Richard Helms, 1842-1919, naturalist and biologist, collected in Australia and New Zealand, 1891 Elder Exploring Expedition)

South and Western Australia, Northern Territory. Forming hummocks, resinous, slender, glabrous, rather dense panicles narrow-oblong, loosely flowered spikelets with 3-4 fertile florets, on sand dunes, sandy loams, plains, red sands, rocky hill slopes, resembles *Triodia schinzii*, see *Bulletin of Miscellaneous Information Kew* 1941(1): 29-30. 1941, *Flora S. Australia* 4: 1867, f. 850C. 1986, *Australian Systematic Botany* 10(3): 434. 1997.

T. hubbardii N.T. Burb. (for the British botanist Charles Edward Hubbard, 1900-1980, gardener, authority and specialist on grasses, from 1920 Kew Gardens, 1935 Fellow of the Linnean Society, see J.H. Barnhart, *Biographical notes upon botanists*. 2: 213. 1965)

Central Australia, Northern Territory. Forming hummocks, stoloniferous, resinous, aromatic, spreading panicles, linear spikelets with distant florets, 5-12 florets, mucronate short glumes unequal, 9-nerved lemmas with 3 flat hairy lobes, callus ribbed and blunt, on rocky hills, sandstone, see *Australian Journal of Botany* 8: 381, 389, f. 2b. 1960.

in English: Hubbard's spinifex

T. inaequiloba N.T. Burb.

Western Australia. Coarse, forming hummocks, stoloniferous, not resinous, rigid and pungent leaf blades, leaves pseudopetiolate, dense panicle, oblong or ovate spikelets with 4-8 overlapping florets, broad mucronate glumes, hirsute lemma, glabrous palea, see *Australian Journal of Botany* 8: 391. 1960.

T. integra Lazarides

Southern Northern Territory. Not resinous, leaf blades hairy, basal leaves densely ciliate, dense contracted linear panicle, spikelets lanceolate acuminate tapered to the apex, 11-18 florets, shiny lemma mucronate, mountains, see *Australian Systematic Botany* 10(3): 436-437. 1997.

T. intermedia Cheel

Western Australia, Northern Territory. Hummock grass, stoloniferous, not resinous, inflorescence a contracted panicle, closely flowered spikelets solitary or paired, 5-12 florets, broadly ovate lemmas 9-nerved, palea keels winged, caryopsis trigonous and curved, arid and semiarid inland, see *Kongliga Svenska Vetenskapsakademiens Handlingar* 52(10): 4-5. 1916, *Austral. J. Bot.* 1: 158, f. 10b. 1953.

T. inutilis N.T. Burb.

Western Australia, Northern Territory. Forming hummocks, stoloniferous, not resinous, leaf sheaths reddish woolly, dense panicles, spikelets paired closely 7- to 15-flowered, glabrous smooth paleas keeled winged, mature spikelets lateral lemma lobes divergent or recurved, slopes, limestone, hills, sandstone, ridges, stony soils, see *Australian Journal of Botany* 1(1): 162-163, f. 12c. 1953.

T. irritans R. Br. (*Festuca irritans* (R. Br.) F. Muell.; *Sieglingia irritans* (R. Br.) Kuntze; *Triodia aristata* J. Black)

Northern Territory, South Australia, New South Wales. Perennial, not resinous, compact, prickly, stiff, gray-green, large and dense tussocks, compact rounded hummocks, leaf blades glabrous, sheaths glabrous or hairy, narrow inflorescence paniculate, partly exerted panicles, spikelets oblong-lanceolate or ovate, glumes stiff and shining, lemmas nerved, groundcover, stabilizer of sand dunes and plains, growing in dry inland areas, heathland and mallee communities, slopes of the dunes, grassland, provides shelter, food and protection for several reptile species and for small native mammals, confused with *Triodia scariosa*, see *Prodromus Florae Novae Hollandiae* 182. 1810, *The Vegetation of Chatham-Islands*, ... 59. Melbourne 1864, *Revis. Gen. Pl.* 2: 789. 1891 and *Trans. & Proc. Royal Soc. S. Australia*

39: 825. 1915, *Australian Journal of Botany* 1(1): 168-169, f. 14a, 15a. 1953, *Grasses Central Australia* 211, pl. 61b. 1970, *Flora S. Australia* 4: 1871, f. 852B. 1986, *Aust. Syst. Bot.* 10(3): 424. 1997, *Austral. Ecology* 24(5): 563-572. Oct 1999, D.G. Bos, S.M. Carthew and M.F. Lorimer, "Habitat selection by the small dasyurid *Ningauy yvonneae* (Marsupialia: Dasyuridae) in South Australia." *Austral. Ecology* 27(1): 103-109. Feb 2002, Darren G. Bos & Susan M. Carthew, "The influence of behaviour and season on habitat selection by a small mammal." *Ecography* 26(6): 810-820. Dec 2003.

in English: spinifex grass, spinifex, porcupine grass, porcupine spinifex

T. irritans R. Br. var. ***irritans*** (*Triodia aristata* J. Black)

South Australia, Western Australia, Northern Territory. Leaf sheaths glabrous.

T. irritans R. Br. var. ***laxispicata*** N.T. Burbidge

South Australia, New South Wales, Queensland. Leaf sheaths minutely pubescent, inland, see *Australian Journal of Botany* 1(1): 171. 1953.

T. lanata J.M. Black

South Australia. Rare species, not resinous, hemispherical pincushion tussocks, leaf blades glabrous, sheaths woolly-tomentose and then glabrous, inflorescence narrow, open panicle sparse, solitary or paired spikelets ovate to lanceolate on slender pedicels, 4-9 florets, 3-nerved glumes silky or more or less pubescent, lemmas silky to hirsute, paleas usually glabrous with scabrous keels, on slopes, sandy soils, along roadsides, sandy plains, dunes, see *Transactions and Proceedings of the Royal Society of South Australia* 40: 57. 1916, *Australian Journal of Botany* 1(1): 168, f. 14b. 1953, *Flora S. Australia* 4: 1871, f. 852E. 1986.

T. lanigera Domin

South Australia, Western Australia. Tussocks hemispherical or pyramidal, leaf blades woolly or pubescent, sheaths woolly-tomentose and then glabrous at maturity, inflorescence a spiciform panicle dense, ovate or oblong spikelets 4- to 10-flowered, many-nerved glumes, lemma lobes dissimilar, lateral lobes of the lemmas acuminate and softly pubescent, glossy palea with curved keels, arid or seasonally arid sites, see *Journal of the Linnean Society, Botany* 41: 278. 1913, *J. Roy. Soc. W. Australia* 30: 20, pl. 1, 29, f. 2. 1946, *Australian Journal of Botany* 1(1): 154, f. 9b. 1953.

T. latzii Lazarides (for the Australian botanist and agrostologist Peter Kenneth Latz, b. 1941, author of *Bushfires and Bush Tucker: Aboriginal Plant Use in Central Australia*, illustrated by Jenny Green. Alice Springs: IAD Press 1995, and "Notes on the relict palm *Livistona mariae* F. Muell. in Central Australia." *Trans. Roy Soc. S. Austral.* 99: 189-196. 1975)

Northern Territory. Resinous, forming mats, prop roots, dense long panicles with numerous branches erect, overlapping spikelets with 9 florets, lemma lobes equal, bearded callus, on rocky hills, in sand, similar to *Triodia microstachya*, see *Australian Systematic Botany* 10(3): 444. 1997.

T. longiceps J.M. Black (*Triodia longiceps* var. *minor* J.M. Black)

Western and Central Australia, South Australia, Queensland, Northern Territory. Perennial, tussocks, robust, coarse, dense, gray-green, usually not resinous, leaf blades glabrous pungent, sheaths glabrous, sometimes stoloniferous, inflorescence a contracted slender panicle, linear narrow spikelets racemose with 6-21 florets, glumes lanceolate to ovate and keeled, minutely lobed lemmas lanceolate and indurate, stout blunt callus, grows on the slopes of low rocky hills, in swamps, along seasonally flooded water courses, rocky slopes, flats, ridges, see *Transactions and Proceedings of the Royal Society of South Australia* 54: 59. 1930, *Trans. and Proc. of the Royal S. of S. Australia* 59: 255. 1935, *Grasses Central Australia* 215, pl. 62, 217, pl. 63a. 1970.

in English: black spinifex, spinifex, gray spinifex, bull spinifex, buck spinifex, giant gray spinifex

in Australia: pujuwaja (Warlpiri people, Tanami Desert, Northern Territory)

T. longiloba Lazarides

Northern Territory, Western Australia. Forming hummocks, resinous, aromatic, leaf blades prickly on margins, linear loose panicles, deeply lobed lemmas, in sandy soils, see *Australian Systematic Botany* 10(3): 446, 448. 1997.

T. longipalea Lazarides (*Plectrachne drummondii* C.E. Hubb.; *Tridens drummondii* (Scribn. & Kearney) Nash ex Small; *Triodia drummondii* Scribn. & Kearney) (dedicated to the British botanist James Drummond, 1784 (or ca. 1786)-1863 (Perth, Western Australia), from 1809 to 1829 Curator of Cork Botanic Garden, sent plants to Capt. Mangles & W.J. Hooker, 1829 accompanied Capt. Stirling on *Parmelia*, botanical collector in Western Australia for Messrs. Veitch, first Government Botanist, Western Australia; see J.H. Barnhart, *Biographical notes upon botanists*. 1: 472-473. 1965; J. Lanjouw & F.A. Stafleu, *Index Herbariorum*. Part II, *Collectors A-D*. Regnum Vegetabile vol. 2. 1954; W.H. Harvey, in *Hooker's Journal of Botany & Kew Garden Miscellany*. 7: 53. London 1855; A. Lasègue, *Musée botanique de Benjamin Delessert*. Paris 1845; Alice Margaret Coats, *The Quest for Plants: A History of the Horticultural Explorers*. London 1969; Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 217-218. London 1994; Dennis John Carr & S.G.M. Carr, editors, *People and Plants in Australia*. London 1981; Roger N. Hilton, "The Drummond collection of Western Australian fungi at the Royal Botanic Gardens, Kew." *Nuytsia*.

4(3): 333-357. 1983; R.N. Hilton, "The Preiss collection of Western Australian fungi." *Nuytsia*. 6(3): 295-304. 1988)

Southwest Western Australia. Forming hummocks, tall, loose, robust, not resinous, persistent overlapping leaf sheaths, dense inflorescence, long narrow panicles linear-oblong, spikelets cuneate, florets 6-10 loosely overlapping, scarious glumes lanceolate, concavo-convex caryopsis, on sand plains, salt flats, similar to *Triodia dielsii*, see *Bulletin, Division of Agrostology United States Department of Agriculture* 4: 37. 1897 and *Flora of the Southeastern United States ...* 143. 1903, *Bulletin of Miscellaneous Information Kew* 1941: 26. 1941, *Australian Systematic Botany* 10(3): 448-449. 1997.

T. marginata N.T. Burb.

Queensland, New South Wales. Forming hummocks, resinous, stoloniferous, prop roots, lower sheaths overlapping, open or dense panicles ovate to lanceolate, spikelets inflated 4- to 11-flowered, woolly lemmas with prominent lobes, on disturbed sites, plains, dunes, sandy soils, resembles *Triodia mitchellii*, see *Australian Journal of Botany* 1(1): 150-151, f. 8c. 1953, *Fl. SE Queensland* 3: 179, f. 27G. 1989.

T. melvillei (C.E. Hubb.) Lazarides (*Plectrachne melvillei* C.E. Hubb.) (after a scientist in western Australia, George Frederick Melville, b. 1914)

Northern Territory, south and Western Australia, Eremaean Province. Hummock, resinous, sheaths overlapping, contracted panicles linear-oblong, spikelets lanceolate or cuneate, 3-11 florets, grassland, sandy and stony soils, see *Bulletin of Miscellaneous Information Kew* 1941(1): 28. 1941, *Australian Systematic Botany* 10(3): 451. 1997, *Flora of Australia* 44B: 241, 244, 459. 2005.

T. microstachya R. Br. (*Festuca microstachya* (R. Br.) F. Muell.; *Festuca microstachys* (R. Br.) F. Muell., nom. illeg., non *Festuca microstachys* Nutt.; *Sieglingia microstachya* (R. Br.) Kuntze)

Northern Territory, Queensland, Western Australia. Robust, forming hummocks, resinous, aromatic, stoloniferous, with prop roots, leaf sheaths fan-shaped, small spikelets oblong or obovate, 1-7 florets glabrous, the terminal floret much reduced, glumes unequal, lobed 3-nerved lemma, mat-forming, useful for nesting, sandy habitat, grassland, similar to *Triodia latzii*, see *Prodromus Florae Novae Hollandiae* 182. 1810, *Revis. Gen. Pl.* 2: 789. 1891 and *Australian Journal of Botany* 1(1): 138, f. 5b. 1953.

in English: spinifex

T. mitchellii Benth. (*Sieglingia mitchelli* (Benth.) Kuntze; *Triodia hostilis* Domin; *Triodia mitchellii* var. *breviloba* N.T. Burb.; *Triodia mitchellii* var. *pubivagina* N.T. Burb.) (species named for the British (Sir Thomas Livingstone Mitchell, 1792-1855 (d. N.S.W., Australia), plant collector, 1839 Fellow of the Royal Society, author of *Three Expeditions into the Interior of Eastern Australia*. London 1838

and *Journal of an Expedition into the Interior of Tropical Australia*. London 1848. See I.H. Vegter, *Index Herbariorum*. Part II (4), *Collectors M*. Regnum Vegetabile vol. 93. 1976; Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 492. London 1994; N. Hall, *Botanists of the Eucalypts*. Melbourne 1978 and Supplement 1980)

Queensland, New South Wales, Northern Territory. Perennial, resinous, dense, sprawling, tussock and hummock-forming, sometimes stoloniferous, with prop roots, leaf blades folded and sharply pointed, inflorescence open or compact, panicles narrowly oblong or lanceolate, spikelets solitary or paired, 4-10 loose exerted florets, uppermost floret often reduced, 3-nerved cartilaginous glumes acute to truncate, lemmas 3-lobed and silky, basal lemma lanceolate to elliptic, callus silky, palea 2-keeled with keels ciliate, stony soils, shallow soil, deep sandy soil, similar to *Triodia marginata*, see *Flora Australiensis: A Description ...* 7: 606. 1878, *Revis. Gen. Pl.* 2: 789. 1891 and *Biblioth. Bot.* 20(85): 387. 1915, *Australian Journal of Botany* 1(1): 143, 147, 149-151, f. 6c, 7, 8a & b. 1953, *Australian Journal of Botany* 10: 454. 1997.

in English: buck spinifex

T. mitchellii Benth. var. *breviloba* N.T. Burb.

Queensland, New South Wales. Leaf sheaths glabrous or hairy, inflorescence compact and linear, lemma silky, grows on sandy plains, see *Australian Journal of Botany* 1(1): 149, f. 8a. 1953.

in English: buck spinifex

T. mitchellii Benth. var. *mitchellii*

Queensland.

T. mitchellii Benth. var. *pubivagina* N.T. Burb.

Queensland, New South Wales. Leaf sheaths silky or hairy, inflorescence paniculate open and lanceolate, lemma silky, grows on sandy plains, see *Australian Journal of Botany* 1(1): 151, f. 8b. 1953.

T. molesta N.T. Burb.

Queensland, Northern Territory. Dense, tall, grayish or olive-green, forming hummocks, not resinous, with prop roots, leaf blades rigid, leaf sheaths densely woolly, dense narrow panicles spiciform, spikelets lanceolate or oblong, 7-12 florets, glumes ovate or oblong, hirsute lemmas with subequal lobes, palea keels winged, see *Australian Journal of Botany* 1(1): 164-165, f. 13a. 1953.

T. pascoeana B.K. Simon (named for David Pascoe, d. 1989, Director of Operations, Kimberley Research Project 1988)

Western Australia, western Kimberley. Perennial, robust, dense, usually nonresinous, forming hummocks, stoloniferous, leaves not auriculate, leaf blades pseudopetiolate, leaf sheaths persistent and not fan-shaped, slender inflorescence, dense panicles linear, small spikelets narrowly

oblong 3- to 11-flowered, unequal glumes 1-nerved, glabrous lobed lemmas 3-nerved, similar to *Triodia microstachya*, see *Nuytsia* 8(2): 241-243, f. 1. 1992.

T. plectrachnoides N.T. Burb.

Northern Territory. Tussocky, forming dense hummocks, not resinous, leaf auricles rounded or acute, open panicles, long-pedicelled spikelets 3- to 9-flowered, glumes indurated, lemma 3-lobed, similar to *Triodia aurita*, see *Australian Journal of Botany* 1(1): 155, 160, f. 11b. 1953, *Flora of Australia* 44B: 254. 2005.

T. plurinervata N.T. Burb.

Western Australia. Forming dense hummocks, dense, stoloniferous, leaf sheaths strongly nerved, long-pungent stiff slender leaf blades with short pseudopetioles, inflorescence a raceme, spikelets linear-oblong with short and compressed pedicels, 4-12 florets, many-nerved cartilaginous glumes, lemma 11-13-nerved and 3-toothed, palea keels winged, lodicules ciliate, coastal, on red sandy soils, steppes, hummock grassland, salt lakes, red sand dunes, see *Australian Journal of Botany* 8: 390, 392, f. 3b. 1960.

T. procera R. Br. (*Sieglingia procera* (R. Br.) Kuntze)

Northern Territory, Queensland. Robust, forming hummocks, stoloniferous, resinous, aromatic, leaf sheaths often fan-shaped, loose panicles, ovate or lanceolate spikelets 4- to 8-flowered, terminal floret reduced, truncate callus, palea keels winged, coastal and mainland, deep sandy soils, on coastal dunes, often confused with *Triodia burbidgeana*, similar to *Triodia radonensis* and *Triodia microstachya*, see *Prodromus Florae Novae Hollandiae* 182. 1810, *Revis. Gen. Pl.* 2: 789. 1891 and *Fl. Kimberley Region* 1234. 1992, *Australian Syst. Bot.* 10(3): 462. 1997.

T. prona Lazarides

Western Australia. Procumbent, forming hummocks, not resinous, leaf blades flexuous with thick pseudopetioles, loose panicles linear, spikelets cuneate with 5-7 florets overlapping, resembles *Triodia salina*, see *Australian Systematic Botany* 10(3): 463. 1997.

T. pungens R. Br. (*Festuca viscida* (Roem. & Schult.) F. Muell.; *Sieglingia pungens* (R. Br.) Kuntze; *Triodia cunninghamii* Benth.; *Triodia pungens* f. *microstachya* Domin; *Triodia pungens* var. *linearis* N.T. Burb.; *Triodia pungens* var. *parvidentata* N.T. Burb.; *Triodia viscida* Roem. & Schult.; *Triodia vulnerans* Domin)

Northwest South Australia, Western Australia, Queensland, Northern Territory. Perennial, irregular and glutinous tussock grass, straggling, spreading, green to bright green, resinous on foliage, glabrous leaf blades rigid sharp-pointed, leaf sheaths glabrous sometimes woolly, narrow linear inflorescence paniculate, contracted usually dense panicles with erect branches, on slender pedicels closely flowered spikelets linear-oblong to ovate, 3-13 florets, glumes glabrous, flowering glume purplish and silky-villous toward the base,

hairy lemmas, palea keels narrowly winged, an invader of disturbed sites, a resin obtained from the burning material used to glue handles on stone axes, not very palatable, eaten in the absence of other forage by cattle and sheep, the young regrowth after burning is grazed, occurs in sand dunes and sand plains, on plains and rocky hills, granitic plains, on dry tropical plains, coastal sand dunes, arid regions, red earths of coarse or medium texture, on the slopes of low rocky hills, on rocky slopes, laterized desert sandstone ranges, shallow soils, deep clayey sands, see *Prodromus Florae Novae Hollandiae* 182. 1810, *Systema Vegetabilium* 2: 599. 1817, *Veg. Chatham-Isl.* 59. 1864, *Flora Australiensis: A Description ...* 7: 606-607. 1878, *Revis. Gen. Pl.* 2: 789. 1891 and *Bibliotheca Botanica* 85: 385. 1915, *Australian Journal of Botany* 1(1): 145, f. 6d. 1953, *Australian Journal of Botany* 8: 383-384, f. 1b. 1960, *Australian Systematic Botany* 10(3): 426. 1997.

in English: gummy spinifex, soft spinifex

T. pungens R. Br. var. *pungens*

South Australia, Western Australia, Queensland, Northern Territory.

T. racemigera C.A. Gardner

Western Australia, Northern Territory. Forming hummocks, stoloniferous, not resinous, reddish hairy leaf sheaths, long slender leaf blades flexuous or curved, spikelets in 2 rows with 4-8 overlapping florets, lemmas hirsute, palea glabrous with winged keels, see *Flora of Western Australia* 1(1): 77-78. 1952, *Australian Journal of Botany* 1(1): 178, f. 17b. 1953, Fl. Kimberley Region 1234, f. 349A. 1992.

T. radonensis S.W.L. Jacobs (Radon Creek, Brockman Range)

Northern Territory. Trailing, loosely clumped, foliage viscid, leaves coriaceous, broad loose leaf sheaths, open panicles, oblong spikelets, 5-7 divergent florets, terminal floret much reduced, 2-lobed 3-ribbed glumes, indurated smooth inflated lemmas, lowest lemma 3-lobed, palea keels winged, similar to *Triodia procera*, see *Telopea* 4(4): 658, f. 3. 1992.

T. rigidissima (Pilger) Lazarides (*Plectrachne rigidissima* (Pilg.) C.E. Hubb.; *Triraphis rigidissima* Pilg.)

Western Australia. Forming hummocks, dense, rhizomatous, not resinous, many-noded, overlapping sheaths, loose panicles, spikelets cuneate with 4-6 florets, entire glumes, palea keels ciliate, in deep sand, hill slopes, sand plains, resembles *Triodia desertorum*, see *Bot. Jahrb. Syst.* 35: 72. 1904, *Hooker's Icones Plantarum* 34: t. 3385. 1939, *Australian Systematic Botany* 10(3): 468. 1997.

T. roscida N.T. Burb.

Western Australia, Northern Territory. Forming hummocks, stoloniferous, glaucous, not resinous, not sticky, panicles spiciform with erect branches, shortly pedicellate spikelets elliptic or cuneate 3- to 5-flowered, subequal mucronate glumes with 3 prominent nerves, palea keels narrowly

winged, on stony soils, hillslopes, mesas, see *Australian Journal of Botany* 1(1): 161, 176, f. 11a. 1953.

T. salina Lazarides

Northern Territory, Western Australia, Great Sandy Desert. Forming hummocks, loose, resinous foliage, stoloniferous, aromatic, leaf blades straight, leaf sheath glabrous, long narrow contracted panicles, spikelets narrow-cuneate 6- to 10-flowered, thick lemmas hairy, palea keels winged, in deep red soils, depressions, swales, resembles *Triodia prona*, see *Australian Systematic Botany* 10(3): 471. 1997.

T. scariosa N.T. Burb. (*Triodia irritans* var. *laxispicata* N.T. Burb.; *Triodia irritans* var. *laxispicata* f. A of N.T. Burb.; *Triodia scariosa* subsp. *yelarbonensis* S.W.L. Jacobs; *Triodia truncata* S.W.L. Jacobs)

South Australia, New South Wales, Victoria, Western Australia, Queensland. Perennial, not resinous, tussock and hummock-forming, hemispherical or flat-topped tussocks, leaf blade glabrous and folded, sheaths glabrous, leaves sharply pointed, inflorescence open or compact, long narrow panicles fully exerted, spikelets linear or lanceolate, glumes scarious and 3- to 5-nerved, lemmas villous-hirsute at the base, palea silky-hirsute 2-keeled, polymorphic species, on poor sandy soils, mallee scrubs, coastal, similar to *Triodia vella*, confused with *Triodia irritans*, see *J. Roy. Soc. W. Australia* 30: 25. 1946, *Australian Journal of Botany* 1(1): 170-174, f. 15b, 16b-d. 1953, *Telopea* 4(4): 654, 656. 1992.

in English: porcupine grass, common porcupine grass, spinifex

T. scariosa N.T. Burb. subsp. *yelarbonensis* S.W.L. Jacobs (*Triodia irritans* R. Br. var. *laxispicata* N.T. Burb. forma C) (subspecies dedicated to the Australian town of Yelarbon, Western border of the Inglewood Region, Region of Queensland)

Queensland. Mature spikelets with divergent lemmas, grows on poor alluvial soils, see *Telopea* 4(4): 654. 1992.

in English: spinifex

T. scariosa N.T. Burb. subsp. *scariosa* (*Triodia irritans* R. Br. var. *laxispicata* N.T. Burb. forma A)

South Australia, New South Wales, Victoria, Western Australia, Queensland. Mature spikelets with divergent lemmas, grows in semiarid areas, on poor soils.

in English: spinifex

T. schinzii (Henrard) Lazarides (*Plectrachne schinzii* Henrard)

Northern Territory, Western Australia. Erect, forming hummocks, sometimes resinous, leaf blades without pseudopetioles, usually dense panicles linear to oblong, spikelets linear-lanceolate 4- to 14-flowered, upper 2 or 3 florets usually sterile, long glumes many-nerved, lemma pubescent, callus slender and pungent, palea keels winged, an

indicator of good range condition, the young regrowth after burning is grazed, on dunes, plains, *Acacia* shrubland, sand hills, deep red sandy soils, resembles *Triodia bitextura*, *Triodia acutispicula* and *Triodia helmsii*, see *Vierteljahrschrift der Naturforschenden Gesellschaft in Zürich* 74: 134. 1929, *Grasses Central Australia* 197, 206, pl. 56b, 58. 1970, *Australian Systematic Botany* 10: 474. 1997.

T. secunda N.T. Burb.

Western Australia. Forming hummocks, loose, erect or prostrate, spreading, not resinous, stoloniferous, fringed auricles, leaf blades pseudopetiolate, linear panicles, hairy spikelets 3- to 8-flowered, scarious glumes mucronate, hirsute lemmas, hirsute palea with wingless keels, similar to *Triodia angusta*, see *Journal of the Royal Society of Western Australia* 30: 26-27, 33, pl. III, f. 10a-f, 11c-d. 1946, *Australian Journal of Botany* 1(1): 181, f. 18c. 1953.

T. spicata N.T. Burb.

Western Australia, Northern Territory. Compact, forming hummocks, ciliate ligule, inflorescence a spike exerted, biseriate spikelets more or less sessile, 6-20 florets, palea keels winged, on stony soils, sandstone, on sandy flats, see *Australian Journal of Botany* 1(1): 182. 1953, *Grasses Central Australia* 217, 219, pl. 63b, 65. 1970.

in English: spike-flowered spinifex, spike-flower spinifex

T. stenostachya Domin

Western Australia, Queensland, Northern Territory. Forming dense hummocks, stoloniferous, highly resinous, not aromatic, old leaf blades flexuous or curled, basal leaf sheaths loose and overlapping, large dense panicles, paired spikelet usually with 3 florets, glumes mucronate, lemmas with 3 dissimilar lobes, lowest lemma with median lobe bristle-like, palea keels wingless, in shallow soils, rocky slopes, deep littoral sands, sandy creek banks, similar to *Triodia microstachya* and *Triodia cunninghamii*, see *Bibliotheca Botanica* 20(85): 387. 1915, *Australian Journal of Botany* 1(1): 138, f. 5c. 1953.

T. tomentosa S.W.L. Jacobs

Western Australia. Not resinous, forming hummocks, leaves pseudopetiolate, leaf sheaths woolly, panicles fully exerted, spikelets lanceolate 3- to 7-flowered, glumes scarious lanceolate, minutely lobed lemmas hirsute, hairy callus, palea keels rounded, red sandy soils, gravelly, similar to *Triodia lanata*, see *Telopea* 4(4): 655-656, f. 2. 1992.

T. triaristata Lazarides

Northern Territory, western Queensland. Forming hummocks, loose, leaves resinous, long narrow lanceolate spikelets 7- to 17-flowered, fertile florets at the base, hirsute lemma with erect stiff lobes and awns, palea keels narrowly winged, not aromatic, on sandstone, see *Australian Systematic Botany* 10(3): 480. 1997.

T. triticoides C.A. Gardner (*Poa flava* L.; *Tridens flavus* (L.) Hitchc.)

Western Australia. Forming hummocks, not resinous, stoloniferous or not, leaf sheaths hirsute, spiciform and continuous panicles, spikelets solitary overlapping 7- to 10-flowered, 2-lobed lower glume, palea keels broadly winged, see *Species Plantarum* 68. 1753 and *Rhodora* 8(95): 210. 1906, *Flora of Western Australia* 1: 78. 1952, *Fl. Kimberley Region* 1235, f. 349B. 1992.

T. uniaristata (Lazarides) Lazarides (*Plectrachne uniaristata* Lazarides)

Northern Territory. Forming hummocks, branched near base, not resinous, contracted panicles, narrow spikelets with 4 florets, lemmas with 2 lateral lobes and a long twisted awn, palea glabrous, similar to *Triodia contorta*, see *Nuytsia* 5(2): 280. 1984 [1985], *Australian Systematic Botany* 10(3): 482. 1997.

T. vella Lazarides

Queensland. Forming compact tussocks, not resinous, foliage glabrous and smooth, linear and exerted panicles, spikelets narrowly oblong 3- to 6-flowered, glumes 3-nerved, lemmas and paleas woolly, similar to *Triodia scariosa*, see *Australian Systematic Botany* 10(3): 483. 1997.

T. wiseana C.A. Gardner (*Triodia wiseana* var. *brevifolia* N.T. Burb.) (dedicated to Frank Joseph Scott Wise, 1897-1986, premier of Western Australia 1945-1947)

Western Australia, Northern Territory. Hummock, not resinous, leaf sheaths pilose, leaf blades pseudopetiolate, sometimes stoloniferous, panicles dense or loose, spikelets linear to ovate 4- to 16-flowered, grassland, in shallow rocky soils, often confused with *Triodia brizoides*, see *Journal of the Royal Society of Western Australia* 27: 166. 1942, *Journal of the Royal Society of Western Australia* 30: 24, 31, pl. II, f. 4. 1946, *Australian Journal of Botany* 1(1): 158. 1953.

in English: hard spinifex

Triodon Baumg. = *Triodia* R. Br., *Triodon* DC. (Rubiaceae), *Triodon* Rich. (Cyperaceae)

From Greek *treis*, *tria* “three” and *odous*, *odontos* “tooth.”

Chloridoideae, Triodieae, see *Syn. Pl.* 1: 60. 1805, *Prodrumus Florae Novae Hollandiae* 182. 1810, *Enumeratio Stirpium Transsilvaniae* 3: 238. 1816, *Prodrumus Systematis Naturalis Regni Vegetabilis* 4: 566. 1830.

Triphlebia Stapf = *Eragrostis* Wolf, *Stiburus* Stapf, *Triphlebia* Baker (Aspleniaceae)

From the Greek *treis*, *tria* “three” and *phleps*, *phlebos* “vein.”

Chloridoideae, Cynodonteae, type *Triphlebia alopecuroides* (Hack.) Stapf, see *Genera Plantarum* 23. 1776, *Icones et Descriptiones Graminum Austriacorum* 4: 15. 1809, O.

Beccari, *Malesia: raccolta di osservazioni botaniche intorno alle piante dell'arcipelago Indo-Malese e Papuano* ... durante i viaggi eseguiti dall'anno 1865 all'anno 1878 ... Genova 1877-1890, *Bulletin de l'Herbier Boissier* 3(8): 393. 1895, *Flora Capensis* 7: 318. 1898, *Hooker's Icones Plantarum* 27: t. 2612. 1899 and *Flora Capensis* 7(4): 696-697. 1900, *Acta Bot. Neerl.* 15: 157. 1966, *Contributions from the United States National Herbarium* 41: 81-115. 2001.

Triplachne Link

From the Greek *triploos* "triple, threefold" and *achne* "chaff, glume."

One species, Mediterranean. Pooideae, Poodae, Aveneae, annual, herbaceous, auricles absent, ligule an unfringed membrane, plants bisexual, contracted inflorescence paniculate or spicate, spikelets pedicellate, uppermost female-fertile floret, 2 glumes subequal and membranous, lemmas gibbous and hairy with 2 lateral awns and a geniculate awn, palea present, lodicules absent, 3 stamens, ovary glabrous, 2 stigmas, open places, sandy dunes, coastal, rocky places, related to *Agrostis*, sometimes confused with *Gastridium ventricosum*, see Giovanni Gussone (1787-1866), *Flora siculae prodromus*, etc. 1: 59. Neapoli 1827-1828, *Hortus Regius Botanicus Berolinensis* 2: 241. 1833 and *Lagascalia* 15: 119-124. 1988, *Willdenowia* 31: 403-408. 2001.

Species

T. nitens (Guss.) Link (*Agrostis nitens* Guss.)

Europe, Italy. Annual, glumes 1-nerved, lemma 3-awned, see *Bull. Mus. Hist. Nat.*, Paris, 2e sér., 3: 161-162. 1931.

in Italian: codino lucido

Triplasis P. Beauv. = *Diplocea* Raf.,
Merisachne Steud., *Uralepis* Nutt.

Latin *triplasius* and Greek *triplasios* "threefold, thrice as many, triple," referring to the arrangement of the flowers.

Two species, North America and Central America, eastern U.S. to Costa Rica. Chloridoideae, Cynodonteae, annual or perennial, erect, tufted, rhizomatous, nodes pubescent, leaves cauline, auricles absent, ligule a line of hairs, lower leaf sheaths sometimes inflated, leaf blades flat or involute, inflorescence a sparse panicle exerted or partially included in upper sheath, spikelets linear with 2-4 florets per spikelets, cleistogamous spikelets present in upper sheaths and at base of the lower sheaths, callus hairy, glumes unequal, second glume awnless, lemmas lobed with a short pubescent awn, palea keels ciliate, lodicules truncate, 3 stamens but none in cleistogenes, 2 stigmas, pioneer coastal plants, on dry sandy soils, along stream banks, margins of forest,

type *Triplasis americana* P. Beauv., see *Syn. Pl.* 2: 9. Nov 1806 [1807], *Prodromus Florae Novae Hollandiae* 182. 1810, *Essai d'une Nouvelle Agrostographie* 81, pl. 16. 1812, *The Genera of North American Plants* 1: 62. 1818, *American Journal of Science* 1: 252. 1818, *A Manual of the Botany of the Northern United States* 589. 1848, *Synopsis Plantarum Glumacearum* 1: 117. 1854, *Die Natürlichen Pflanzenfamilien* 2(2): 68. 1887 and *U.S.D.A. Bull.* 772: 76. 1920, *Iowa State J. Res.* 47: 71-78. 1972, *Kew Bulletin* 37: 133-162. 1982, *Flora Mesoamericana* 6: 259-260. 1994, *Contributions from the United States National Herbarium* 41: 70, 141, 230-231, 234. 2001, Megan E. Griffiths & Colin M. Orians, "Responses of common and successional heathland species to manipulated salt spray and water availability." *Am. J. Bot.* 90: 1720-1728. 2003, *New Phytologist* 164(3): 543-553. Dec 2004, Marjorie R. Lundgren & Sonia E. Sultan, "Seedling expression of cross-generational plasticity depends on reproductive architecture." *Am. J. Bot.* 92: 377-381. 2005.

Species

T. americana P. Beauv. (*Sieglingia americana* (P. Beauv.) Beal; *Tricuspis cornuta* (Elliott) A. Gray; *Triplasis cornuta* Benth. ex W.D. Jacks.; *Uralepis cornuta* Elliott)

North America, U.S. Annual, lemma short-awned, see *Essai d'une Nouvelle Agrostographie* 81, pl. 16, f. 10. 1812, *A Sketch of the Botany of South-Carolina and Georgia* 1: 580. 1821, *A Manual of the Botany of the Northern United States* 590. 1848, *Index Kewensis* 2: 1121. 1895, *Grasses of North America for Farmers and Students* 2: 466. 1896.

T. purpurea (Walt.) Chapm. (*Aira purpurea* Walter; *Diplocea barbata* Raf.; *Festuca brevifolia* Muhl.; *Festuca purpurea* (Walter) F. Muell.; *Festuca purpurea* Schreb. ex Steud.; *Glyceria brevifolia* (Muhl.) Schult.; *Merisachne drummondii* Steud.; *Panicularia brevifolia* (Muhl.) Porter; *Sieglingia purpurea* (Walter) Kuntze; *Tricuspis purpurea* (Walter) A. Gray; *Triodia purpurea* (Walter) Smyth; *Triplasis caribensis* (R.W. Pohl) Beetle; *Triplasis floridana* Gand.; *Triplasis glabra* Gand.; *Triplasis intermedia* Nash; *Triplasis purpurea* var. *caribensis* R.W. Pohl; *Triplasis sparsiflora* Chapm.; *Uralepis aristulata* Nutt.; *Uralepis purpurea* (Walter) Nutt.; *Uralepis purpurea* Nutt.)

North America. Dunegrass, highly cleistogamous, lemma with long awn, forage, highly disturbed areas, sandy beaches, see *Flora Caroliniana, secundum* ... 78. 1788, *Prodromus Florae Novae Hollandiae* 179. 1810, *Descriptio uberius Graminum* 167. 1817, *The Genera of North American Plants* 1: 62-63. 1818, *American Journal of Science* 1: 252. 1818, *Mantissa* 2: 387. 1824, *Herbarium Pedemontanum* 6: 235. 1836, *Nomenclator Botanicus. North America. Erect, ascending, forming large clumps, see *Flora Caroliniana, secundum ...* 78. 1788, *The Genera of North American Plants* 1: 62. 1818, *A Manual of the Botany of the Northern United States* 589. 1848, *Flora of the Southern United States* 560. 1860, *Select plants: ...* 1876, *Revisio Generum Plantarum* 2: 789. 1891 and *Transactions of the Kansas Academy of Science* 25: 95. 1913, *Iowa State Journal of Research* 47(1): 76, f. 3. 1972.

T. purpurea (Walt.) Chapm. var. ***purpurea***

North America.

Triplathera (Endl.) Lindley = *Bouteloua* Lag.

From the Greek *triploos* "triple, threefold" and *ather* "stalk, barb."

Chloridoideae, Cynodonteae, Boutelouinae, see *Varietades de Ciencias, Literatura y Artes* 2(4,21): 134, 141. 1805, *Gen. Sp. Nov.* 5. 1816, *Genera Plantarum* 94. 1836, *The*

Vegetable Kingdom 116. 1846 and *Contributions from the United States National Herbarium* 41: 20-33, 231. 2001.

Triplopogon Bor

From the Greek *triploos* "triple, threefold" plus *pogon* "beard," referring to the glumes.

One species, India. Panicoideae, Andropogonodae, Andropogoneae, Andropogoninae, annual, herbaceous, erect, auricles absent, leaf blades pseudopetiolate, ligule an unfringed membrane, stilt-rooted at the lower nodes, plants bisexual, inflorescence a false panicle, single raceme subtended by spatheoles, sessile spikelet laterally compressed, hermaphrodite florets lacking, 1 glume per spikelet, lower glume coriaceous and strongly convex, upper glume awnless, palea present, 2 free and fleshy lodicules, stamens absent, ovary glabrous, 2 stigmas, related to *Kerriochloa*, type *Triplopogon spathiflorus* (Hook.f.) Bor, see *Species Plantarum* 2: 1049. 1753, *Flora Aegyptiaco-Arabica* 178. 1775, *Monographiae Phanerogamarum* 6: 249. 1889, *Fl. Brit. India* 7: 138. 1896 [1897] and *Kew Bulletin* 1954: 51-56. 1954.

Species

T. ramosissimus (Hack.) Bor (*Ischaemum ramosissimum* Hack.; *Ischaemum spathiflorum* Hook.f.; *Sehima spathiflorum* (Hook.f.) Blatt. & McCann; *Triplopogon spathiflorus* (Hook.f.) Bor)

India. Lower glume of sessile spikelet grooved, see *Journal of the Bombay Natural History Society* 32: 23. 1927.

Tripogon Roemer & Schultes = *Arcangelina* Kuntze, *Archangelina* Kuntze, *Kralikia* Coss. & Durieu, *Kralikiella* Batt. & Trab., *Plagiolytrum* Nees

From the Greek *treis* "three" and *pogon* "beard," indicating the lemma and the 3 nerves, the hairs at the base of the lemma nerves.

About 21-31 species, Old World tropics. Chloridoideae, Eragrostideae, Eleusinae, or Chloridoideae, Cynodonteae, annual or perennial, small, densely tufted, erect, herbaceous, simple and slender, delicate, forming dense tussocks, rhizomatous, nodes glabrous, internodes hollow, auricles absent, sheaths terete, ligule a membranous ciliate rim or sometimes absent, leaves mostly basal, leaf blades filiform or linear and involute, plants bisexual, inflorescence a single terminal raceme long-exserted, single spike erect or curved, spikelets solitary and sessile, rachilla prominent, spikelets alternating in 2 rows, several florets, all florets bisexual or the uppermost male to reduced, glumes subequal and persistent, second glume awnless, lemma apices emarginate and lateral nerves glabrous, lemmas slightly rounded on the

back 3-veined and shortly 2-lobed or bidentate, awn straight or rarely flexuous, hairy to glabrous callus, palea 2-toothed and 2-nerved, 2 free and fleshy lodicules, 1-3 stamens, ovary glabrous, stigmas plumose, variable species, common in grassland, rocky or gravelly soils, crevice of rocks, rain-forest, pampas, wet flushes, open habitats, upland regions, savannah, related to *Leptochloa* P. Beauv., type *Tripogon bromoides* Roth ex Roem. & Schult., see *De Fructibus et Seminibus Plantarum*... 1: 7. 1788, *Fragmenta Botanica* 77, 98, t. 121, f. 1. 1809, *Systema Vegetabilium* 2: 34, 600. 1817, *Hortus Regius Botanicus Berolinensis* 1: 44, 280. 1827, *Analyse des Familles de Plantes* 63. 1829, *Proceedings of the Linnean Society of London* 1: 95. 1841, *Ann. Species

T. anantaswamianus Sreek., V.J. Nair & N.C. Nair (sometimes spelled *anataswamianus* or *ananthaswamianus*)

India, Kerala. Leaves glabrous, ligules membranous, lemmas cleft at apex into 6 lobes, keels of the paleas ciliate, see *Bulletin of the Botanical Survey of India* 25(1-4): 185. 1983 [1985].

T. bromoides Roth ex Roem. & Schult. (*Avena mysorensis* (Heyne) Spreng.; *Plagiolytrum calycinum* Nees; *Triathera bromoides* Roth ex Roem. & Schult.; *Tripogon bromoides* var. *yunnanensis* (Keng ex J.L. Yang) S.L. Chen & X.L. Yang; *Tripogon festucoides* Jaub. & Spach; *Tripogon lanatus* Hochst. ex Steud.; *Tripogon zeylanicus* Thwaites)

India, Sri Lanka. Perennial, tufted, compact, erect, glabrous, smooth, unbranched, leaves hairy and finely pointed, ligule an inconspicuous ciliolate membrane, loosely imbricate flo-

rets, glumes unequal, keels of the paleas scabrid, good fodder, useful for erosion control and as a soil binder, see *Species Plantarum* 1: 79-81. 1753, *Systema Vegetabilium* 2: 600. 1817, *Systema Vegetabilium, editio decima sexta* 1: 337. 1825, *Proceedings of the Linnean Society of London* 1: 95. 1841, *Illustrationes Plantarum Orientalium* 4: 49, f. 333. 1851, *Synopsis Plantarum Glumacearum* 1: 301. 1854, *Enum. Pl. Zeyl.* 374. 1864 and *Handb. Fl. Ceylon* 5: 273. 1900, *Grasses of Ceylon* 86. 1956, *Ceylon J. Sci., Biol. Sci.* 2(2): 125. 1959, *Grasses of Burma* ... 521. 1960, *Acta Botanica Yunnanica* 5(1): 51-53, pl. 5. 1981, *Flora Reipublicae Popularis Sinicae* 10(1): 59. 1990.

T. capillatus Jaub. & Spach

Asia, India. Central awn of the lemma flexuous, see *Illustrationes Plantarum Orientalium* 4: 47, pl. 332. 1850-1853 and *Grasses of Burma* ... 521. 1960.

T. chinensis (Franch.) Hack. (*Nardurus filiformis* var. *chinensis* Franch.; *Tripogon chinensis* subsp. *coreensis* (Hack.) T. Koyama; *Tripogon chinensis* var. *coreensis* Hack.; *Tripogon chinensis* var. *genuinus* Hack.; *Tripogon chinensis* var. *longiaristatus* (Honda) I.C. Chung; *Tripogon chinensis* var. *longiaristatus* (Hack. ex Honda) I.C. Chung; *Tripogon chinensis* var. *longiaristatus* Hack. ex Honda; *Tripogon coreensis* (Hack.) Ohwi)

Asia, China, Taiwan. Found in abandoned cropland, see *Nouvelles Archives du Muséum d'Histoire Naturelle sér. 2*, 7: 149. 1884, A.R. Franchet (1834-1900), *Plantae davidianae ex Sinarum imperio*. Paris 1884-1888 and *Botanical Magazine* (Tokyo) 41: 12. 1927, *Botanical Magazine* 55: 310. 1941, *Anales del Jardín Botánico de Madrid* 6(11): 14. 1946, *Journal of the Washington Academy of Sciences* 45(7): 215. 1955, *Grasses of Japan and its Neighboring Regions* 532. 1987, *Bot. Zhurn. (Moscow & Leningrad)* 75: 1783-1786. 1990, *Kew Bull.* 57: 915. 2002.

T. ekmanii Nicora & Rúgolo

South America, Paraguay, northeastern Argentina. See E.G. Nicora & Z.E. Rúgolo de Agrasar, "Una nueva especie de *Tripogon* Roem. & Schult. (Poaceae-Eragrosteae), *Tripogon ekmanii* Nicora & Rúgolo." *Candollea* 46(2): 533-535. 1991.

T. filiformis Nees ex Steud. (*Catapodium filiforme* Nees ex Duthie; *Plagiolytrum filiforme* Nees; *Plagiolytrum unidentatum* Nees; *Tripogon filiformis* var. *tenuispicus* Hook.f.; *Tripogon nanus* Keng ex Keng f. & L. Liou; *Tripogon semitruncatus* Nees ex Steud.; *Tripogon unidentatus* Nees ex Steud.)

China, India. Erect, slender, variable, spikelets awned, a useful fodder, see *Proceedings of the Linnean Society of London* 1: 95. 1841, *Synopsis Plantarum Glumacearum* 1: 301. 1854, *A List of the Grasses of N.W. India, Indigenous and Cultivated* 33. 1883, *The Flora of British India* 7(22): 288. 1897 [1896] and *Acta Botanica Sinica* 9(1): 71. 1960.

in India: lobaygyam

T. jacquemontii Stapf

India. Tufted, leaves and culms glaucous, wiry roots, lower glume lobed on 1 side, see *Grasses of Burma ...* 522. 1960, *Taxon* 34: 159-164. 1985.

T. larsenii Bor (dedicated to the Danish botanist Kai Larsen, b. 1926, professor of botany, among his writings are "New species of *Veratrum* and *Orchidantha* from Thailand and Laos." *Saertryk af Botanisk Tidsskrift*. 56: 345-350. 1961, "Studies in the Zingiberaceae. I. The genus *Geostachys* in Thailand." *Saertryk af Botanisk Tidsskrift*. 58: 43-49. 1962, "Studies in the Zingiberaceae. II. Notes on 2 Malayan species of *Scaphochlamys*." *Saertryk af Botanisk Tidsskrift*. 58: 191-197. 1962, "Studies in the Zingiberaceae. III. On a new species of *Kaempferia* from Thailand and its relatives." *Saertryk af Botanisk Tidsskrift*. 58: 198-203. 1962, "Preliminary report on the Thai-Danish Botanical Expedition to the Kanchanaburi Province 1961-1962." *Nat. Hist. Bull. Siam Soc.* 20(2): 109-119, 9 figs., 1 map. 1962 and "Report on the Third Thai-Danish Botanical Expedition, June-July 1963." *Nat. Hist. Bull. Siam Soc.* 20(4): 215-226. 1964, editor of "Studies in the Flora of Thailand." in *Dansk Bot. Ark.* 1961 etc., editor *Flora of Thailand*)

Thailand. Indeterminate species, see *Dansk Botanisk Arkiv* 23: 470. 1968, *Nord. J. Bot.* 20(3): 287. 2000.

T. leptophyllus (Nees ex Steud.) Cufod. (*Danthonia leptophylla* A. Rich.; *Leptochloa setacea* Hochst.; *Tripogon abyssinicus* Nees ex Steud.; *Tripogon abyssinicus* Nees ex A. Rich.; *Tripogon leptophyllus* (A. Rich.) Cuf.)

Ethiopia, Yemen, Sudan. Perennial, densely tufted, delicate, basal leaf sheaths persistent and fibrous, leaves sparsely pilose, leaf blades filiform, inflorescence rather lax, slender flexuous spikes, spikelets narrowly elliptic 4- to 10-flowered, upper glume acuminate, lemmas bidentate with a single awn, palea keels narrowly winged, moist ground, on steep and seasonally wet slopes, among rocks, grassy places, sometimes confused with *Tripogon montanus*, see *Flora* 24(1), *Intell.* 1: 20. 1841, *Tentamen Florae Abyssinicae ...* 2: 421. 1850, *Synopsis Plantarum Glumacearum* 1: 301. 1854 and *Bulletin du Jardin Botanique National de Belgique* 38(Suppl.): 1269. 1968, *Flora of Ethiopia and Eritrea* 7: 97-98. 1995.

T. lisboae Stapf

India. Flat leaf-blades, resembles *Eragrostiella*, see *Kew Bulletin* 1892: 84. 1892 and *Grasses of Burma ...* 522. 1960.

T. loliiformis (F. Muell.) C.E. Hubb. (*Diplachne loliiformis* (F. Muell.) F. Muell. ex Benth.; *Diplachne loliiformis* (F. Muell.) Benth.; *Diplachne loliiformis* var. *longiaristata* Domin; *Diplachne loliiformis* var. *plumosa* Domin; *Festuca loliiformis* F. Muell.)

Australia. Annual or short-lived perennial, very variable, caespitose, small, erect, ligule a ciliate rim, leaf blade flat or rolled, leaves hairy, inflorescence straight or curved, short dense inflorescences with overlapping spikelets, spike simple and terminal, spikelets erect and linear or narrowly oblong with 6-20 florets, the uppermost floret male, glumes obtuse and membranous, basal lemma 1-awned and 3-nerved, lemma with a short bearded callus at the base, palatable and nutritious, eaten by stock, a resurrection plant, leaves revive after desiccation, colonises scalded areas, an increaser or decreaser species, common on stony tablelands, open woodland, alluvial areas, rocky slopes, river floodplains, sandy red earths and shallow soils, see *Fragmenta Phytographiae Australiae* 8: 128. 1873, *Flora Australiensis: A Description ...* 7: 618. 1878 and *Bulletin of Miscellaneous Information Kew* 1934: 448. 1934, *Austral. Grasses* 1: 121, pl. 46. 1966.

in English: five-minute grass, rye beetlegrass, eight-day grass

T. longiaristatus Hack. ex Honda (*Tripogon chinensis* var. *longiaristatus* Hack. ex Honda; *Tripogon coreensis* var. *longiaristatus* (Nakai) Hack. ex T. Mori; *Tripogon japonicus* (Honda) Ohwi; *Tripogon longearistatus* Honda; *Tripogon longearistatus* Nakai; *Tripogon longiaristatus* subsp. *japonicus* (Honda) T. Koyama; *Tripogon longiaristatus* var. *japonicus* Honda; *Tripogon panxianensis* H. Peng)

Korea. See T. Nakai, Saishu-to narabini Kwan-to shokubutsu hokoku-sho / *Flora of Saishu and Kwan Islands* (Quelpaert). 1914, *An Enumeration of Plants Hitherto Known From Corea* 56. 1922, *Botanical Magazine* (Tokyo) 41(481): 6, 11, 12, 16. 1927, *Acta Phytotaxonomica et Geobotanica* 4: 83. 1935, *Grasses of Japan and its Neighboring Regions* 532. 1987, *Acta Botanica Yunnanica* 13(2): 147-148, pl. 1. 1991.

T. longiaristatus Hack. ex Honda var. ***japonicus*** Honda (*Tripogon japonicus* (Honda) Ohwi; *Tripogon longiaristatus* Hack. ex Honda; *Tripogon longiaristatus* subsp. *japonicus* (Honda) T. Koyama)

Japan. Rare species, see *Botanical Magazine* (Tokyo) 41: 11, 12, 16. 1927, *Acta Phytotaxonomica et Geobotanica* 4: 83. 1935, *Grasses of Japan and its Neighboring Regions* 532. 1987.

T. major Hook.f. (*Tripogon jaegerianus* A. Camus; *Tripogon liebenbergii* C.E. Hubb.; *Tripogon major* subsp. *deflexa* Gledhill; *Tripogon major* subsp. *jaegeriana* Gledhill; *Tripogon snowdenii* C.E. Hubb.; *Tripogon unisetus* Pilg.)

Tropical Africa, Cameroon. Perennial, tussocky, erect, swollen at the base, culms enclosed by the persistent leaf sheaths, spikes erect, spikelets well spaced, 6-18 florets loosely imbricate, lower glume linear-lanceolate, upper glume narrowly lanceolate, palea-keels winged, floret callus with spreading hairs, see *Journal of the Proceedings of the*

Linnean Society 7: 230. 1864 and *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 11: 654. 1932, *Bulletin of Miscellaneous Information Kew* 1934: 118. 1934, *Journal d'Agriculture Tropicale et de Botanique Appliquée* 1: 212, t. 12, f. 7-10. 1954, *Boletim da Sociedade Broteriana, ser. 2* 41: 166, t. 1B, C. 1967.

in Yoruba: irungbon efon

T. minimus (A. Rich.) Hochst. ex Steudel (*Festuca minima* A. Rich.; *Tripogon abyssinicus* Nees ex A. Rich.; *Tripogon calcicolus* A. Camus, also spelled *calcicola*; *Tripogon humbertianus* A. Camus; *Tripogon mandarensis* A. Camus; *Tripogon minimus* (A. Rich.) Hochst.; *Tripogon minimus* (A. Rich.) Steud.)

Tropical East Africa, Swaziland, Benin, Madagascar. Perennial, tufted, densely matted, small, old leaf sheaths fibrous, slender and erect inflorescence, spikelets narrowly elliptic-oblong, 4-10 imbricate florets, lower glume lanceolate-oblong, upper glume narrowly oblong, lemmas narrowly ovate, palea keels narrowly winged, leaves revive after desiccation, provides grazing for cattle, desert grass, open places, alluvial areas, thin sandy loam, seasonally wet areas, woodland, waterlogged sand, bushland, shallow soil, see *Tentamen Florae Abyssinicae ... 2*: 436. 1850, *Synopsis Plantarum Glumacearum* 1: 301. 1854 and *Bulletin de la Société Botanique de France* 101: 396. 1954, *Bulletin de la Société Botanique de France* 106: 214. 1959.

in Niger: bahél, bubukuwa, bubukwa, buubuukuwaa, dakléa, kangêm, kangya keeri, kuru-kosu, niaraédjé, tamatan-kola

in Nigeria: bubbuukuwaa, bukai, buke, dakesa, daskara, diskara, sabko bubbuukuwaa

in Upper Volta: bahel, bahel maccudo, mangel mangurla

T. montanus Chiov.

Uganda, Ethiopia, Sudan, Yemen. Perennial, variable, densely tufted, compact, tussocky, wiry, basal leaf sheaths papery and not fibrous, leaf blades filiform, leaves sparsely pilose to villous, spikes slender extending above the leaves, few-flowered spikelets more or less distant and appressed to the rachis, 3-5 florets, glumes very unequal, upper glume acuminate, lemmas awned, long flexuous awns, central awn variable, callus pilose to bearded, palea keels not winged, usually found near streams, upland, open to exposed places, grassland, similar to *Tripogon leptophyllus*, see *Annuario del Reale Istituto Botanico di Roma* 8(3): 351. 1908.

T. multiflorus de Miré & Gillet (*Tripogon tibesticus* de Mire, Gillet & Quezel)

Central Sahara, Yemen, Kenya. Perennial bunchgrass, densely tufted, tussocky, basal leaf sheaths fibrous or not fibrous, leaf blades filiform, leaves flat and pilose or glabrous and convolute, elongate narrow spikelets clustered, many-flowered spikelets erect or loosely ascending, 8-19 florets, the upper spikelets longer than the lower, upper

glume obtuse, lemmas entire or bidentate with a central awn, callus pilose, drought resistant, found on well-drained rocky slopes, limestone cliffs, seasonally wet areas, see *Journal d'Agriculture Tropicale et de Botanique Appliquée* 3: 737. 1956, *Journal d'Agriculture Tropicale et de Botanique Appliquée* 4: 154. 1957.

T. oliganthos Cope

Yemen. See T.A. Cope, "Some new Arabian grasses II." *Kew Bulletin*. 47(4): 655-664. 1992.

T. pungens C.E.C. Fischer

India. Culms thickened, persistent leaf sheaths, leaves rigid and pungent, see *Bulletin of Miscellaneous Information Kew* 1934: 170. 1934, *Grasses of Burma ...* 522. 1960.

T. purpurascens Duthie (*Catapodium filiforme* Nees ex Duthie; *Festuca filiformis* Nees ex Steud.; *Tripogon hookerianus* Bor ex Sultan & R.R. Stewart; *Tripogon hookerianus* Bor; *Tripogon jacquemontii* var. *submuticus* Hook.f.)

Pakistan, Oman to Yemen, northwest India, Nepal. Perennial, densely tufted, basal leaf sheaths fibrous and purplish when old, leaves pilose, spikelets purplish erect and appressed to the rachis, upper glume acuminate, lemmas bidentate with a single awn, callus pilose, common in wet areas, desert areas, sandy coarse soils, sandy gravelly alluvial soils, see *Synopsis Plantarum Glumacearum* 1: 302. 1854, *A List of the Grasses of N.W. India, Indigenous and Cultivated* 33. 1883, *The Flora of British India* 7(22): 287. 1897 [1896] and *Annals of the Royal Botanic Garden, Calcutta*. 9(1): 74-75, t. 92. 1901, *Grass. W. Pakistan* 2: 254. 1959, *Grasses of Burma, Ceylon, India and Pakistan* 522. 1960, *Taxon* 34: 159-164. 1985.

T. ravianus C.N. Sunil & A.K. Pradeep (after the Indian botanist N. Ravi, a grass specialist)

India, Tamil Nadu. Perennial, tufted, leaf sheaths glabrous, ligule a fine membrane, racemes terminal with several spikelets linear, 6-14 florets, lower glume coriaceous and broadly ovate, upper glume lanceolate and awned, lemma coriaceous, central lobes of the lemmas lanceolate, 3 awns, palea keels ciliate, 2 lodicules, 3 stamens, ovary obovate, stigma feathery, grows on wet rocky hillsides, closely allied to *Tripogon anantaswamianus* Sreek., V.J. Nair & N.C. Nair, a species endemic to Kerala, see P.V. Sreekumar and V.J. Nair, *Flora of Kerala- Grasses*. Botanical Survey of India. Calcutta 1991, A.K. Pradeep and C.N. Sunil, "Two new species of *Tripogon* (Poaceae) from India." *Sida* 18: 809-814. 1999, *Sida* 19(4): 803-806. 2001.

T. roxburghianus (Steud.) Bhide (*Lepturus roxburghianus* Steud.; *Oropetium roxburghianus* (Steud.) S.M. Phillips; *Rottboellia biflora* Roxb.)

India. Spikelets 1- to 2-flowered, lower glume symmetrical, see *Supplementum Plantarum* 13, 114. 1781 [1782], *Prodromus Florae Novae Hollandiae* 207. 1810, *Flora Indica; or Descriptions ...* 1: 357. 1820, *Fundamenta Agrostographiae*

98, t. 3. 1820, *Synopsis Plantarum Glumacearum* 1: 357. 1854 and *Journal and Proceedings of the Asiatic Society of Bengal* 2(7): 515. 1912, *Grasses of Burma ...* 524. 1960, *Kew Bulletin* 30: 468. 1975.

T. sivarajanii Sunil (for V.V. Sivarajan, a botanist in Kerala) India, Kerala, Western Ghats. Perennial, tufted, nodes glabrous, leaves linear acuminate and villous on the upper surface, ligule a fine glabrous membrane, leaf sheaths smooth, fibrous roots, racemes with several spikelets, 5-8 florets, lower glume lanceolate and notched on one side, upper glume acute or acuminate, lemma awned, palea 2-lobed and 2-keeled, 3 stamens, ovary globose, feathery stigmas, forming turf, grows along grassy hill slopes, closely resembles *Tripogon trifidus*, see *Sida* 18(3): 809-814. 1999.

T. spicatus (Nees) Ekman (*Bromus spicatus* Nees; *Diplachne reverchonii* Vasey; *Diplachne simplex* Döll; *Diplachne spicata* (Nees) Döll; *Leptochloa spicata* (Nees) Scribn.; *Rabdochloa spicata* (Nees) Kuntze ex Stuck.; *Sieglingia schaffneri* (S. Watson) Kuntze; *Sieglingia spicata* (Nees) Kuntze ex Stuck.; *Tricuspis simplex* Griseb.; *Triodia schaffneri* S. Watson; *Triplasis setacea* Griseb.)

South America, southern U.S. to Argentina, Brazil, Paraguay. Perennial, simple, tufted, tussocky, slender, leaf sheaths furrowed, fibrous remains of old sheaths, ligule a rim of hairs, leaf blades densely hispid, inflorescence a slender unilateral raceme, spikelets 2-ranked, 4-10 florets, glumes acute lanceolate, lemma ovate and 2-lobed, palea 2-dentate, lodicules narrowly cuneate, 3 stamens, common in dry savannah, dry rocky slopes, degraded grassland, along roadsides, on gravelly slopes seasonally wet, similar to *Tripogon minimus*, see *Species Plantarum* 1: 76-78. 1753, *Essai d'une Nouvelle Agrostographie* 71, 80-81, 84, 176. 1812, *Flora Brasiliensis seu Enumeratio Plantarum* 2: 471. 1829, *Memoirs of the American Academy of Arts and Science, new series* 8: 532. 1862, *Flora Brasiliensis* 2(3): 97, 160. 1878, *Abhandlungen der Königlich-Gesellschaft der Wissenschaften zu Göttingen* 24: 304. 1879, *Proceedings of the American Academy of Arts and Sciences* 18: 181. 1883, *Bulletin of the Torrey Botanical Club* 13(7): 118. 1886, *Revisio Generum Plantarum* 2: 789. 1891, *Proceedings of the Academy of Natural Sciences of Philadelphia* 43(2): 304. 1891 and *Anales del Museo Nacional de Buenos Aires* 11: 121, 128. 1904, *Arkiv för Botanik utgivet av K. Svenska Vetenskapsakademien* 11(4): 36. 1912, *American Journal of Botany* 45: 757-767. 1958.

in English: American five-minute grass, American tripogon

T. subtilissimus Chiov.

Ethiopia, Yemen, Somalia. Perennial, variable, slender, tufted, basal sheaths persistent, leaf blades filiform, slender to dense inflorescence curved, spikelets linear-oblong 7- to 19-flowered, short acute lower glume, lemma toothed and awned, shortly bilobed lemma-tip, on sandy soils, rocky places, bushland, see *Annali di Botanica* 5: 66. 1906.

in Somalia: harfo

T. trifidus Munro ex Hook.f. (*Tripogon trifidus* Munro ex Stapf)

Eastern India, Bhutan. Ligules ciliate, 5-8 florets, lower glumes laterally lobed and notched, upper glume 2-dentate with a short apical awn, lemma bearded at base and awned, see *Bulletin of Miscellaneous Information Kew* 1892: 85. 1892, *The Flora of British India* 7(22): 286. 1897 [1896] and *Edinb. J. Bot.* 56(3): 394. 1999.

T. vellarianus Pradeep

India, Kerala, Western Ghats, Vellarimala. Perennial, tufted, not glaucous, strongly tussock-forming habit, erect, nodes glabrous, flat leaf blades broad and linear, leaf sheaths rigid and clasping, wiry roots, large spikelets dorsiventrally flattened, 8-10 florets, lower glumes lanceolate acuminate, upper glumes elliptic-lanceolate, lemmas ovate-lanceolate and awned, palea keeled and winged, 2 lodicules, 3 stamens, ovary obovate, feathery stigmas, see *Sida* 18(3): 809-814. 1999.

T. wardii Bor

Burma/Myanmar. Lowest lemma sterile and glume-like, see *Kew Bulletin* 12(3): 417. 1958, *Grasses of Burma ...* 524. 1960.

T. wightii Hook.f.

South India. Paleas broadly winged, see *The Flora of British India* 7(22): 286. 1897 [1896] and *Grasses of Burma ...* 524. 1960.

T. yunnanensis J.L. Yang ex S.M. Phillips & S.L. Chen (*Tripogon bromoides* var. *yunnanensis* (Keng ex J.L. Yang) S.L. Chen & X.L. Yang; *Tripogon yunnanensis* Keng ex J.L. Yang)

China. See *Acta Botanica Yunnanica* 5(1): 51-53, pl. 5. 1981, *Flora Reipublicae Popularis Sinicae* 10(1): 59. 1990, *Kew Bulletin* 57(4): 921-922. 2002.

Tripsacum L. = *Dactylodes* Kuntze, *Digitaria* Adans.

Origin obscure, probably from Greek *tripsis* "rubbing, friction, durability" or *treis* "three" and *psakas* "a grain, any small piece broken off."

About 13 or more species, America, southern and eastern U.S. to Paraguay. Panicoideae, Andropogonodae, Maydeae, or Panicoideae, Andropogoneae, Tripsacinae, perennial bunchgrass, stout, usually succulent, thick and solid culms, robust, rhizomes short and stout, auricles absent, ligule a short membrane fringed, plants monoecious with separate male and female flowers, the male above and the female below on the same inflorescence, upper portion with paired male spikelets, inflorescences in terminal and axillary clusters, solitary or whorled spikes, 1 to 6 racemes of unisexual

spikelets, solitary pistillate spikelets sunken in the rachis joints, all the fertile spikelets unisexual, 2 glumes, hermaphrodite florets wanting, male and female-fertile spikelets in different parts of the same inflorescence branch, male spikelets with 2 glumes, staminate spikelets with coriaceous outer glumes or with membranous outer glumes, palea present, lodicules absent, stamens absent, ovary glabrous, 2 stigmas, weedy species forming clumps, fodder, cultivated for forage, open areas, slopes, shade, moist places, forest margins, along roadsides, creeks, woodland, cliffs, a difficult genus, closely related to and hybrids with *Zea*, type *Tripsacum dactyloides* (L.) L., see C. Linnaeus, *Systema Naturae, Editio Decima* 1253, 1261, 1379. 1759, *Familles des Plantes* 2: 38, 550. 1763, *Revisio Generum Plantarum* 2: 772. 1891 and *Botanical Gazette* 41: 294. 1906, *Boletín de la Sociedad Botánica de México* 25: 1-21. 1941, *Rhodora* 66: 371-374. 1964, *Bot. Species

T. sp.

in Mexico: huaxcalotemilpilla, zacate

T. andersonii J.R. Gray (*Tripsacum guatemalense* Chitwood & Berger; *Tripsacum latifolium* Hitchc.; *Tripsacum laxum* non Nash, sensu Ostendorf) (named for E. Anderson, botanical collector in Central America)

Central America, northern South America, Mexico to Peru. Perennial, robust, vigorous, erect, ascending, caespitose,

glabrous, often decumbent when old, mat-forming, ligule a membranous ridge, leaf sheaths keeled above, leaf blades linear-lanceolate and acuminate at apex, lower leaf sheaths shortly pubescent, strongly stoloniferous, rhizomatous, inflorescences terminal and axillary, erect to curving racemes, each raceme with numerous staminate spikelets and several pistillate spikelets, staminate spikelets paired at each rachis node, pistillate spikelets sunken in cavities of the rachis, racemes basal portion female and apical male, cultivated for forage or an escape, growing in colonies, foliage used as cut fodder, soil cover, mulching, useful for erosion control, found in drained swamps, slopes, old fields, inundated and marshy conditions, tea plantations, cultivated areas, edge of forest, often confused with *Tripsacum latifolium* Hitchc., *Tripsacum laxum* Nash and *Tripsacum maizar* Hernandez-Xol. & Randolph, see *Botanical Gazette* 41(4): 294-295. 1906, *Nuttige Pflanzen in Sierplanten in Suriname* 231. 1962, *Phytologia* 33(3): 204, f. 1. 1976, *American Journal of Botany* vol. 70(5):706-711. 1983, C.L. Dewald and B.K. Kindiger, "Cytological and molecular evaluation of the reproductive behavior of *Tripsacum andersonii* and a female fertile derivative (Poaceae)." *American Journal of Botany* 85(9): 1237-1242. 1998.

in English: Guatemala grass

in Spanish: zacate de Guatemala

in Honduras: zacate de Guatemala, pasto guatemala

in Nicaragua: mamak, namak

in Malaysia: rumput jagung, rumput jelai

in Thailand: ya-kuatemala

T. australe H.C. Cutler & E.S. Anderson (*Tripsacum dactyloides* subsp. *hispidum* Hitchc.)

South America. Perennial, robust, vigorous, erect or decumbent, caespitose, glabrous, lower leaf sheaths shortly pubescent to woolly, axillary inflorescence with 1-5 racemes, terminal inflorescence with 2-10 racemes, erect to curving racemes, racemes basal portion female and apical male, savannah, lowlands, open areas, disturbed areas, campos, see *Botanical Gazette* (Crawfordsville) 41(4): 295-296. 1906, *Contr. U.S. Natl. Herb.* 22: 513. 1922, *Annals of the Missouri Botanical Garden* 28(4): 259, f. 2. 1941.

Hack.; *Tripsacum dactyloides* var. *occidentale* Cutler & Anderson; *Tripsacum monostachyon* Willd.)

Western hemisphere. Perennial, caespitose, densely clumped, glabrous, stout, solid, robust, tough, persistent, culms thick at base, rhizomatous with short and woody rhizomes, stilt rooting from lower nodes, culm sheath persistent, ligules membranous and ciliate, leaf sheaths overlapping at base, midrib of the leaves tough, leaf blades lanceolate with obtuse to subcordate base, stiff inflorescence terminal and axillary, erect to curving racemes, racemes basal portion female and apical male, hay plant and good fodder, seldom grazed, it does not tolerate standing water, useful as a soil conditioner, used for mulching, grows on moist fertile soils, shores, savannah, well-drained sites, salt marsh borders, near running fresh water, drained swamps, closely related to *Tripsacum australe*, see *Species Plantarum* 2: 972, 1045, 1049. 1753, *Systema Naturae, Editio Decima* 2: 1261. 1759, *The Gardeners Dictionary: ... eighth edition* Coix No. 2. 1768, *Flora Caroliniana, secundum ...* 249. 1788, *Hortus Berolinensis* 1, t. 1. 1803, *A Manual of Botany* 461. 1840, *Synopsis Plantarum Glumacearum* 1: 382. 1854, *Flora Brasiliensis* 2(4): 316. 1883, *Revisio Generum Plantarum* 2: 773. 1891, *Contributions from the United States National Herbarium* 3(1): 6. 1892, *Grasses of North America for Farmers and Students* 2: 19. 1896, *Catálogo de Plantas Mexicanas* 376. 1897, *Revisio Generum Plantarum* 3(2): 349. 1898 and *Botanical Gazette* 41(4): 295-296. 1906, *Contr. in Mexico: maicillo

T. zopilotense Hern.-Xol. & Randolph

Mexico. Perennial, caespitose, fodder, see *Folleto Técnico Oficina de Estudios Especiales, México, Secretaría de Agricultura y Ganadería* 4: 7. 1950, *Boletín de la Sociedad Botánica de México* 28: 11-18. 1963.

in Mexico: zacate

Triraphis R. Br.

From the Greek *treis* "three" and *rhaphis*, *rhaphidos* "a needle," referring to the three-awned lemmas, to the awns of the flowering glume; see Robert Brown, *Prodromus florae Novae Hollandiae et Insulae van-Diemen*. 185. London (Mar) 1810.

About 6-10 species, southern tropical Africa and South Africa, Australia. Chloridoideae, Eragrostideae, Eleusininae, or Chloridoideae, Cynodonteae, Eleusininae, annual or short-lived perennial, caespitose, erect to ascending, slender, herbaceous, glabrous nodes, solid internodes, ligule more or less membranous and fringed to ciliate, auricles absent, leaf blade bristle-like and involute, leaves narrow and mostly basal, plants bisexual, inflorescence an open or contracted panicle, pedicellate and solitary spikelets compressed laterally and disarticulating between the florets, pedicels without glands, 3-10 bisexual florets, the uppermost floret barren or reduced, 2 glumes subequal and shorter than the spikelets, upper glume 2-toothed and 1-nerved, lemmas 3-veined and 3-awned, hairy or bearded callus, membranous palea 2-keeled and 2-nerved, 2 small lodicules free and fleshy or membranous, 3 stamens, ovary glabrous, 2 plumose white stigmas, small trigonous fruit, open habitats, sandy or stony soils, savannah, close to *Neyraudia*, type *Triraphis pungens* R. Br., see *Prodromus Florae Novae Hollandiae* 185. 1810 and *Fl. Afrique Nord* 2: 191. 1953, *Grasses Central Australia* 245-246. 1970, *Annals of the Missouri Botanical Garden* 75: 866-873. 1988, *Contributions from the United States National Herbarium* 41: 231-232. 2001.

Species

T. andropogonoides (Steud.) Phill. (*Avena andropogonoides* Steud.)

South Africa. Perennial, tufted, brown to reddish base, rhizomatous with long creeping rhizomes, ligule a ring of hairs, leaf blade usually rolled, dense panicle open or contracted, central awn of the lemma shorter than the lemma, unpalatable, low grazing value, growing in open habitats, on well-drained soils, stony slopes, open grassland, deep sand, see *Species Plantarum* 1: 79-81. 1753 and *An Introduction to the Study of the South African Grasses ...* 219, t. 92. 1931, *Cytologia* 19: 97-103. 1954.

in English: broom needlegrass

in South Africa: besemgras

T. compacta Cope

Ethiopia. Perennial, slender, erect, tufted, leaf sheaths hispid, leaf blades linear, compact inflorescence paniculate, panicle linear, spikelets densely crowded, 6-8 florets, glumes mucronate, lower glume linear-lanceolate, upper glume linear-oblong, pilose lemmas linear-oblong, grassland, see *Kew Bulletin* 35(3): 566. 1980, *Flora of Ethiopia and Eritrea* vol. 7: 93-94. 1995.

T. devia Filg. & Zuloaga

America, Brazil. Erect, see *Novon* 9(1): 36, f. 1. 1999.

T. diantha F. Muell.

Australia. See *Fragmenta Phytographiae Australiae* 8: 125. 1873.

T. microdon Benth. (*Notochloe microdon* (Benth.) Domin; *Sieglingia microdon* (Benth.) Kuntze; *Triodia microdon* (Benth.) F. Muell.)

Australia, New South Wales. See *Flora Australiensis: A Description ...* 7: 605. 1878 and *Repertorium Specierum Novarum Regni Vegetabilis* 10: 117. 1911.

T. mollis R. Br. (*Sesleria mollis* (R. Br.) Sprengel; *Sessleria mollis* (R. Br.) Sprengel)

New South Wales, Northern Territory, Queensland, South Australia, Victoria, Western Australia. Biennial or short-lived perennial or annual, loosely tufted or tussocky, purplish, glabrous, erect stems and leaves, leaves filiform and more or less channelled, soft and compact panicle, lower glume mucronate, upper glume 2-toothed, lemma narrow, very short acute callus, seed heads purple or green, individual seeds thin, grazed, low palatability, low forage value, useful for erosion control, suspected of causing cyanide poisoning in animals, common on sandy soils and sand dunes, coastal plains, arid and semiarid areas, hind dunes, on creek banks and floodouts, sand plains, lower dune slopes, sand-mounded areas, also on red earths, see *Prodromus Florae Novae Hollandiae* 185. 1810, *Syst. Veg.* 1: 329. 1825[1824], *Flora Australiensis: A Description ...* 7: 604. 1878.

in English: purple heads, purple plume grass, purple needle grass, needle grass

T. mollis R. Br. f. *caespitosa* Domin

North Western Australia, see K. Domin, *Journal of the Linnean Society, Botany.* 41: 277. 1912.

T. mollis R. Br. f. *mollis*

Australia, see K. Domin, *Journal of the Linnean Society, Botany.* 41: 277. 1912.

T. mollis R. Br. var. *humilis* Benth.

Australia, see G. Bentham, *Flora Australiensis.* 7: 604. 1878.

T. mollis R. Br. var. *mollis*

Australia, see G. Bentham, *Flora Australiensis.* 7: 604. 1878.

T. pumilio R. Br.

Northern Africa, Mauritania. Annual, very rare, tufted, small, erect, much branched at the base, sheaths with long hairs, ligule a short ciliate membrane, leaves flat, dense panicle ovoid to oblong to elliptic, glumes unequal shortly mucronate, lemma 3-nerved densely ciliate, awns thread-like and straight, very low grazing value, limited browsing, found in sand, deserts or dry subdesert locations, moist depressions, river beds, sandy beds, see Dixon Denham (1786-1828), Hugh Clapperton (1788-1827) and Walter Oudney (1790-1824), *Narrative of Travels and Discoveries in Northern and Central Africa. 1822-1824.* [Botany by R. Brown] London 1826.

in Mali: akachakar

T. pungens R. Br. (*Pappophorum pungens* (R. Br.) Trin.; *Plectrachne pungens* (R. Br.) C.E. Hubb.)

Queensland. See *Genera Plantarum* 2: 787. 1791, *Prodrromus Florae Novae Hollandiae* 1: 185. 1810, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 1(1): 92. 1830 and *Vierteljahrsschrift der Naturforschenden Gesellschaft in Zürich* 74: 132. 1929, *Hooker's Icones Plantarum* 34: t. 3385. 1939.

T. purpurea Hack. (*Triraphis fleckii* Hack.) (the species was named after Dr. E. Fleck, geologist and plant collector in southwest Africa)

Southern Africa, Namibia. Annual, tufted or loosely tufted, erect or geniculate, densely hairy, leaf blade expanded to rolled, ligule a fringe of hairs, leaf sheaths rounded, open or dense panicle, lemma with long central awn and 2 shorter lateral awns, pioneer grass, low grazing value, growing in moist sites, veld, rocky soils, on sandy and loamy soils, red sand, see *Verhandlungen des Botanischen Vereins für die Provinz Brandenburg und die angrenzenden Länder* 30: 146. 1888, *Bulletin de l'Herbier Boissier* 4(app. 3): 23. 1896.

in English: red honey grass, annual needle grass

in South Africa: rooiheuninggras, straußenfedergras

T. ramosissima Hack. (*Triraphis elliotii* Rendle, also spelled *elliottii*)

Southern Africa, Namibia. Perennial, highly branched, shrubby or bushy, coarse, hard, woody, slender, wiry, yellowish, tufted, many nodes, rhizomatous, leaf sheaths rounded, ligule a fringe of short hairs, leaf blades expanded, open or dense panicle, spikelets with long hairs, central awn longer than the lemma, only young plants are eaten, grows in rocky sites, in dry river beds or water courses, in sand, floodplains, alkaline soils, see *Verhandlungen des Botanischen Vereins für die Provinz Brandenburg und die angrenzenden Länder* 30: 237. 1888, *Journal of Botany, British and Foreign* 29: 73. 1891.

in South Africa: berggras, perdegras, fels straußenfedergras

T. schinzii Hack. (*Triraphis schlechteri* Pilg. ex Stent)

South Africa, Mozambique, Tanzania, Namibia, Zimbabwe, Kalahari. Perennial, yellowish to green, tufted, robust, erect, mostly unbranched, shortly rhizomatous, ligule a fringe of short hairs, leaf blade usually expanded, leaf sheaths rounded, dark green leaves tapering to a thin point, open inflorescence, interrupted panicle with slender branches, spikelets densely hairy, 2 inconspicuous lateral awns, lemmas with a prominent central awn longer than the lemma, palatable, ornamental, growing in sandy soil, deep sand, riverbanks, dunes, bushveld, grassland, see *Verhandlungen des Botanischen Vereins für die Provinz Brandenburg und*

die angrenzenden Länder 30: 147. 1888 and *Bothalia* 1: 294. 1921.

in English: needle grass

in South Africa: sandveld straußenfedergras, sandveldbesemgras

Trirhaphis F. Muell.

Orthographic variant, *Triraphis* R. Br., see *Journal of the Royal Society of New South Wales* 15: 237. 1882.

Trirhaphis Spreng.

Orthographic variant, *Triraphis* R. Br., see *Genera plantarum* 73. 1830.

Triscenia Griseb.

Greek *triskenes* “three-legged.”

One species, Cuba. Panicoideae, Panicodae, Paniceae, or Panicoideae, Paniceae, Paspalinae, perennial, herbaceous, unbranched, caespitose, leaves mainly basal, leaf blades filiform, plants bisexual, inflorescence spicate and contracted, spikelets shortly pedicellate with slender pedicels, 2 glumes unequal to very unequal, upper glume 3-nerved, lemmas narrow and papery, upper lemma with flat margins, palea present, 2 free and fleshy lodicules, 3 stamens, ovary glabrous, 2 stigmas, type *Triscenia ovina* Griseb., see *Species Plantarum* 1: 55. 1753, *Memoirs of the American Academy of Arts and Science, new series* 8: 534. 1863 and A.S. Hitchcock, “Catalogue of the Grasses of Cuba,” *Contributions from the United States National Herbarium* 12(6): 183-258, vii-xi. 1909, *Contributions from the United States National Herbarium* 46: 627. 2003.

Species

T. ovina Griseb. (*Panicum nudiculme* Mez; *Panicum ovinum* Scribn. & J.G. Sm.)

Cuba. Open panicle, lower lemma awnless, upper lemma chartaceous, see *Memoirs of the American Academy of Arts and Science, new series* 8: 534. 1863, *Circular, Division of Agrostology, United States Department of Agriculture* 16: 3. 1899 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 56(Beibl. 125): 6. 1921.

Trisetaria Forssk. = *Avellinia* Parl., *Parvotrisetum* Chrtek, *Sennenia* Sennen, *Trichaeta* P. Beauv., *Trisetum* Pers.

From *tri-* “three” plus Latin *saeta* (*seta*), *ae* “a bristle, hair,” genus *Setaria* P. Beauv.

Some 15 species, very close to *Rostraria*, often in *Trisetum*. Aveneae, Mediterranean, Himalaya, type *Trisetaria linearis* Forssk., see *Flora Aegyptiaco-Arabica* 60. 1775, *Essai d'une Nouvelle Agrostographie* 86, 179. 1812, Filippo Parlatore (1816-1877), *Plantae Novae vel Minus Notae opusculis diversis olim descriptae generibus quibusdam speciebusque novis adjectis iterum recognitae...* 59. Parisii 1842 and *Bulletin de l'Académie Internationale de Géographie, Botanique* 18: 468. 1908, *Preslia* 37: 201. 1965, *Novosti Sist. Vyss. Rast.* 7: 45. 1970 [1971], *Genera Graminum* 127. 1986, *Willdenowia* 21: 185-187. 1991, *Willdenowia* 31: 403-408. 2001, *Contributions from the United States National Herbarium* 48: 604, 659-676. 2003.

Trisetarium Poir. = *Trisetum* Pers.

From *tri-* plus Latin *saeta* (*seta*), *ae* “a bristle, hair.”

Pooideae, Poeae, Aveninae, see *Syn. Pl.* 1: 97. 1805, *Essai d'une Nouvelle Agrostographie* 88, 153, t. 18, f. 1. 1812, *Nova Genera et Species Plantarum* 1: 147-148. 1815 [1816], *Encyclopédie Méthodique, Botanique Suppl.* 5: 365-366. 1817 and *U.S.D.A. Bull.* 772: 107-109. 1920, *Taxon* 36: 75. 1987, *Contributions from the United States National Herbarium* 48: 659-676. 2003.

Trisetobromus Nevski = *Bromus* L.

From *tri-* “three,” *saeta*, *ae* “a bristle, hair” plus *Bromus* L.

Pooideae, Bromaeae, type *Trisetobromus hirtus* (Trin.) Nevski, see *Species Plantarum* 1: 76-78. 1753, *Systema Vegetabilium* 2: 654. 1817, *Linnaea* 10(3): 300. 1836, *Memorie della Reale Accademia delle Scienze di Torino* 39: 25, t. 58. 1836, *Fl. Chile* 6: 441. 1854 and *U.S.D.A. Div. Agrostol. Bull.* (also *Bulletin, Division of Agrostology United States Department of Agriculture*) 23: 1-66. 1900, *Manual of the Grasses of the United States* 55. 1935, *Brittonia* 7: 421. 1952, *Notes Roy. Bot. Gard. Edinburgh* 30: 366. 1970, *Taxon* 41: 559. 1992, *Taxon* 44: 611-612. 1995, *Contributions from the United States National Herbarium* 48: 154-191, 659. 2003.

x Trisetokoeleria Tzvelev

Koeleria x *Trisetum*, see *Novosti Sist. Vyss. Rast.* 7: 73. 1971, *Genera Graminum* 375. 1986.

Trisetum (Besser ex Schult. & Schult. f.) Trin. = *Acrospelion* Schult., *Acrospelion* A. Besser ex Schult. & Schult.f.

See *Nom.* 1: 38. 1781, *Mém. Acad. Imp. Sci. Saint Pétersbourg, Sér. 6, Sci. Math.* 1(1): 59. 1830.

Trisetum Pers. = *Acrospelion* Schult., *Acrospelion* A. Besser ex Schult. & Schult.f., *Parvotrisetum* Chrtek, *Rebentischia* Opiz, *Rupestina* Prov., *Sennenia* Sennen, *Trisetaria* Forssk., *Trisetarium* Poir.

From *tri-* “three” and Latin *saeta* (*seta*), *ae* “a bristle, hair,” referring to the 3 awns of the lemmas.

About 70-85 species, temperate regions. Pooideae, Poodae, Aveneae, or Pooideae, Poeae, Aveninae, annual or perennial bunchgrass, all species very variable, tufted or loosely tufted or rhizomatous, erect, slender, herbaceous, conspicuous vestigial foliar structure subtending the inflorescence absent or present, hollow internodes, shoots not aromatic, ligule membranous, leaves nonauriculate, leaf blade linear and narrow, plants bisexual, inflorescence a drooping panicle loose to contracted, flowers bisexual, 2-several-flowered spikelets, chasmogamous or cleistogamous, 2 glumes unequal to subequal and keeled, glumes as long as lowest floret, lemmas 2-toothed and keeled, lemma awned from near the middle, awns usually present geniculate or reflexed to recurved, free silvery palea, 2 free and ciliate lodicules membranous, 3 stamens, ovary glabrous, 2 stigmas, cultivated fodder, native pasture species, fairly palatable grasses, found in meadows, rocky sites, open habitats, mountain slopes, along roadsides, upland grasslands, tussock grassland, weedy places, in montane and alpine areas, open forests, alpine herb fields, similar to *Helictotrichon* and *Festuca*, intergeneric hybrids with *Koeleria* and *Sphenopholis*, the taxonomic situation around *Koeleria* and *Trisetum* is unsatisfactory, extreme variations within the species, nomenclatural confusion, type *Trisetum flavescens* (L.) P. Beauv., see *Species Plantarum* 1: 79-82. 1753, *Florulae Insularum Australium Prodrum* 8. 1786, *Syn. Pl.* 1: 97. 1805, *Essai d'une Nouvelle Agrostographie* 43, 88, 153, t. 18, f. 1. 1812, *Systema Vegetabilium* 2: 676. 1817, *Encyclopédie Méthodique, Botanique Suppl.* 5: 365. 1817, *Syst. Veg. Mant.* 3: 526. 1827, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 1(1): 61. 1830, *Lotos* 4: 104. 1854, *Fl. (Joseph Whipple Congdon, 1834-1910) (Joseph Nelson Rose, 1862-1928)

America, Asia, Circumpolar. Perennial bunchgrass, subalpine to alpine, polymorphic and highly variable, erect, light green, in rather small dense tufts, stem and leaves are often densely hairy or rough or villous, leaf blades linear acute, basal leaf sheaths are hairy, leaves rather flat or folded or the edges inrolled on drying, ligule a fringed membrane, inflorescence spike-like rather dense and greenish purple in color, panicle compact or interrupted at base, upper glume is not much longer than the lower one, lemmas are rough and with a bent awn, native pasture species, good forage for grazing animals, forage for deer and goats, often an important constituent of high-mountain summer ranges, a high-altitude grass grazed by yaks and sheep, an early coloniser of disturbed sandy and silty ground, threatened in Wisconsin, grows in montane and alpine areas, campos, tundra meadows, on seepage slopes, ridges, cliffs, exposed or partly shaded sandstone ledges and crevices, on moist to dry sites, lakeshores, rocky places, wet ledges, most common in open meadows, stony slopes, see *Species Plantarum* 1: 63-64. 1753, *Systema Naturae, Editio Decima* 2: 873. 1759, *Descriptio uberior Graminum* 298. 1802, *Manuel d'Herborisation en Suisse et en Valais* 17. 1811, *Essai d'une*

North America, U.S., Colorado. Perennial, loosely tufted or rhizomatous, no auricles, ligules blunt, open sheaths rough, flat leaf blades, stem between the flowers sparsely hairy, flower head a narrow spike purplish before maturity, purplish spikelets, glumes equal, blunt lemmas, lemmas awnless or with very minute awns, callus sparsely hairy, found in open grasslands, wet meadows and edges of forests, in British Columbia grows in wet meadows and along streams in the subalpine zones, see *Essai d'une Nouvelle Agrostographie* 88, 149. 1812, *Monthly Report of the Department of Agriculture* 156. 1874, *Geological Survey of California, Botany* 2: 296. 1880, *Bulletin of the Torrey Botanical Club* 10: 64. 1883, *Manual of the Botany ... of the Rocky Mountain Region* . . 423. 1885, *Bulletin, Division of Agrostology United States Department of Agriculture* 11: 50, f. 10. 1898 and *Catalogue of North American Plants North of Mexico (edition 2)* 31. 1900, *Rhodora* 8(89): 88.

1906, *Flora of the Rocky Mountains* 61. 1917, *Rhodora* 30: 241. 1928 [1929].

in English: Wolf's trisetum, beardless false oat, beardless oatgrass

T. wrangelense (Petrovsky) Probat. (*Trisetum spicatum* subsp. *wrangelense* V.V. Petrovsky)

Russia, Eurasia. Rare species, see *Bot. Zhurn.* 63(9): 1263. 1978.

T. youngii Hook.f.

New Zealand. Tufted, open, erect, subalpine to alpine, ligule ciliate, narrow lanceolate inflorescence paniculate more or less spike-like, glumes subequal and membranous, awn more or less recurved, see *Handbook of the New Zealand Flora* 335. 1864 and *New Zealand J. Bot.* 36: 560-562. 1998.

Trisiola Raf. = *Uniola* L.

Referring to *Uniola*.

Chloridoideae, Cynodonteae, Uniolinae, or Chloridoideae, Eragrostideae, Uniolinae, see *Species Plantarum* 1: 71. 1753, *Florula Ludoviciana, or, a Flora of the State of ...* 144. New York 1817, *Am. Monthly Mag. Crit. Rev.* 2: 175. 1817, *Jour. Phys. Chim. Hist. Nat.* 89: 104. 1819, *Am. Monthly Mag. Crit. Rev.* 4: 188, 190. 1819, C.S. Rafinesque, *Neogenyton, or Indication of Sixty-Six New Genera of Plants of North America*. 4. 1825 and E.D. Merrill, *Index rafinesquianus*. 77. 1949, *Contributions from the United States National Herbarium* 41: 232-234. 2001.

Trisiola Raf. = *Distichlis* Raf.

Chloridoideae, Cynodonteae, Monanthochloinae, see *Journal de Physique, de Chimie, d'Histoire Naturelle et des Arts* 89: 104. 1819, C.S. Rafinesque, *Neogenyton, or Indication of Sixty-Six New Genera of Plants of North America*. 4. 1825 and E.D. Merrill, *Index rafinesquianus*. 77. 1949, *Contributions from the United States National Herbarium* 41: 70-73. 2001.

Tristachya Nees = *Apochaete* (C.E. Hubbard)

J.B. Phipps, *Dolichochoaete* (C.E. Hubbard)

J.B. Phipps, *Isalus* J.B. Phipps, *Loudetia* A. Br.,

Loudetia Hochst. ex A. Br., *Loudetia* Hochst.

ex Steud., *Monopogon* Presl, *Muantijamvella*

J.B. Phipps, *Veseyochloa* J.B. Phipps

From the Greek *treis* and *stachys* "spike."

About 20-22 species, tropical and southern Africa, Madagascar, tropical America. Panicoideae, Panicodae, Arundinelleae, annual or perennial, variable, herbaceous, tufted,

ligule a fringe of hairs, plants bisexual, open or contracted inflorescence paniculate or racemose, spikelets usually in triplets and pedicellate, pedicels connate, 2 florets, lower floret male, upper floret bisexual, 2 glumes more or less equal to unequal, upper and lower glumes 3-nerved or 5-nerved, awn geniculate and twisted, palea keels wingless, 2 lodicules free and fleshy, 3 stamens, ovary hairy or glabrous, 2 plumose stigmas, shade and open habitats, floodplains, thickets, slopes, near streams, grassland, campo cerrado, woodland, savannah, wet to dry soils, type *Tristachya leiostachya* Nees, see *Flora Brasiliensis seu Enumeratio Plantarum* 2: 458, 460. 1829, *Reliquiae Haenkeanae* 1(4-5): 324, t. 44. 1830, *Flora* 24(2): 713. 1841, *Index seminum regii horti botanici genuensis* 24. 1852, *Synopsis Plantarum Glumacearum* 1: 238. 1854, *Die Pflanzenwelt Ost-Afrikas* C: 109. 1895, *Bulletin de l'Herbier Boissier* 3(8): 384. 1895 and *Bulletin of Miscellaneous Information Kew* 1936(5): 320, 321, 322. 1936 [also *Kew Bulletin*], *N. Amer. Flora* 17(8): 578. 1939, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 77(2-3): 226-354. 1957, *Kirkia* 4: 105-107, 109-110, 113, t. 10. 1964, *Kirkia* 5(2): 232-233, 235-258. 1966, *Kew Bulletin* 21(1): 119-124. 1967, *Kew Bulletin* 26(1): 111-123. 1971, *Genera Graminum* 318. 1986, *Flora Mesoamericana* 6: 378. 1994, *Contributions from the United States National Herbarium* 46: 285, 297, 627-628. 2003.

Species

T. angustifolia Hitchc.

Mexico. See *Contributions from the United States National Herbarium* 17(3): 328. 1913.

T. avenacea (J. Presl) Scribn. & Merr. (*Monopogon avenaceus* J. Presl; *Tristachya leiostachya* Nees; *Tristachya mexicana* Kunth)

Mexico, Nicaragua. Perennial, lower lemma 3-nerved, forage, see *Flora Brasiliensis seu Enumeratio Plantarum* 2: 458. 1829, *Reliquiae Haenkeanae* 1(4-5): 324, t. 44. 1830, *Révision des Graminées* 1: 308. 1833 and *Bulletin, Division of Agrostology United States Department of Agriculture* 24: 23. 1901, *Bot. Jahrb. Syst.* 77: 302. 1957, *Phytologia* 37(4): 317-407. 1977.

T. bequaertii De Wild. (*Dolichochoaete bequaertii* (De Wild.) J.B. Phipps)

Africa. See *Bulletin du Jardin Botanique de l'État* 6: 45-46, t. 34. 1919, *Kirkia* 4: 112. 1964.

T. bicrinita (J.B. Phipps) Clayton (*Dolichochoaete bicrinita* J.B. Phipps)

Africa. See *Kirkia* 4: 112. 1964, *Kew Bulletin* 21(1): 124. 1967.

T. biseriata Stapf (*Dolichochoaete biseriata* (Stapf) J.B. Phipps)

South Africa. Perennial, tufted, leaves filiform, pedicels connate, glumes hairy, see *Bulletin of Miscellaneous Information Kew* 1897: 295. 1897 and *Kirkia* 4: 112. 1964.

T. contrerasii R. Guzmán

Mexico. See *Phytologia* 51(7): 463. 1982.

Africa. See *Nova Graminum Genera* 35. 1779, *Supplementum Plantarum* 111. 1781 [1782], *Flora Capensis* edition 2 1: 403. 1818, *Systema Vegetabilium, editio decima sexta* 1: 331. 1825, *Flora Brasiliensis seu Enumeratio Plantarum* 2: 460. 1829, *Flora* 29: 120. 1846, *Die Pflanzenwelt Ost-Afrikas* C: 109. 1895 and *Bulletin du Jardin Botanique de l'État* 3: 278. 1911, *Annali di Botanica* 13: 52. 1914, *Bulletin du Jardin Botanique de l'État* 6: 51-52. 1919, *Bulletin agricole du Congo Belge* 11: 113. 1920, *Bot. Jahrb. Syst.* 77: 308. 1957, *Kirkia* 4: 105. 1964.

T. huillensis Rendle (*Muantijamvella huillensis* (Rendle) J.B. Phipps)

Africa, Angola. Callus narrowly obtuse to acute, see *Catalogue of the African Plants Collected by Dr. F. Welwitsch in 1853-61* 2(1): 217. 1899 and *Kirkia* 4: 106. 1964.

T. laxa Scribn. & Merr.

Mexico. See *Bulletin, Division of Agrostology United States Department of Agriculture* 24: 24, f. 7. 1901.

T. leiostachya Nees (*Tristachya avenacea* (J. Presl) Scribn. & Merr.)

America, Brazil. Erect, tufted, clumped, mat-forming, see *Flora Brasiliensis seu Enumeratio Plantarum* 2: 458. 1829. in Brazil: capim-flecha

T. leucothrix Nees (*Apochaete hispida* (L.f.) J.B. Phipps; *Avena hispida* L.f.; *Tristachya hispida* (L.f.) K. Schum.; *Tristachya hispida* K. Schum.; *Tristachya leucothrix* Trin. ex Nees)

South Africa, Malawi, Zaire. Perennial, tufted to loosely tufted, erect, shortly rhizomatous, basal sheaths with golden brown hairs, ligule a ring of hairs, leaf blade hairy and curled, inflorescence paniculate, spikelets in hairy triplets, pedicels connate, long twisted awn, palatability and grazing value variable, common in sourveld, low lying areas, in wet meadows, sandy soils, on stony slopes, grasslands, in marshy areas, hillsides, see *Supplementum Plantarum* 111. 1781 [1782], *Flora Brasiliensis seu Enumeratio Plantarum* 2: 460. 1829, *Die Pflanzenwelt Ost-Afrikas* C: 109. 1895 and *Bulletin du Jardin Botanique de l'État* 3: 278. 1911,

Bulletin du Jardin Botanique de l'État 6: 51-52. 1919, *Bot. Jahrb. Syst.* 77: 308. 1957, *Kirkia* 4: 105. 1964.

in English: hairy trident grass, trident grass, tristachya

in South Africa: harige driebloomgras, harige driebloom-saadgras, rooisaadgras, motswalle, letswalle

T. lualabaensis (De Wild.) J.B. Phipps (*Loudetia hitchcockii* C.E. Hubb.; *Loudetia lualabaensis* (De Wild.) C.E. Hubb.; *Trichopteryx lualabaensis* De Wild.; *Tristachya hitchcockii* (C.E. Hubb.) Conert)

Tropical Africa. Perennial, tufted, swollen at the base, not bulbous, spikelets in triplets, common in alluvial soils, river floodplains, seasonally flooded areas, see *Annales de la Société Scientifique de Bruxelles* 39 (Mém. 153): 158. 1920, *Bulletin of Miscellaneous Information Kew* 1935(5): 309. 1935 [also *Kew Bulletin* 1935: 309. 1935], *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 77: (2-3): 301. 1957, *Kirkia* 4: 104. 1964.

T. nodiglumis K. Schum. (*Dolichochoaete nodiglumis* (K. Schum.) J.B. Phipps; *Tristachya bequaertii* var. *vanderystii* De Wild.; *Tristachya eylesii* Stent & Rattray)

Tropical Africa. Perennial, variable, clumping, robust, green, ligules yellowish, pedicels connate, common in sandy soils, river floodplains, grassland, see *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 24(3): 334-335. 1897 and *Bulletin du Jardin Botanique de l'État* 6: 45-46, t. 34. 1919, *Proceedings of the Rhodesia Scientific Association* 32: 41. 1933, *Kirkia* 4: 111. 1964.

T. papilosa R. Guzmán

Mexico. Perennial, see *Phytologia* 51(7): 465. 1982.

T. rehmannii Hack. (*Dolichochoaete rehmannii* (Hack.) J.B. Phipps)

Tropical Africa. Perennial, tufted, unbranched, usually 1 node per culm, leaf sheath round, ligule a ring of hairs, spikelets in groups of 3 and awned, pedicels connate, hard and unpalatable, usually in open bushveld, grassland, on moist soils, on shallow stony soils, stony slopes, undisturbed veld, near vleis, see *Bulletin de l'Herbier Boissier* 3(8): 384. 1895 and *Kirkia* 4: 110. 1964.

in English: broom trident grass (commonly used for broom-making)

in South Africa: besemdriebloomgras

T. rehmannii Hack. var. *helenae* (Buscal. & Muschl.) C.E. Hubb. (*Dolichochoaete rehmannii* var. *helenae* (Buscal. & Muschl.) J.B. Phipps; *Tristachya helenae* Buscal. & Muschl.) (named for the Duchess of Aosta)

Tropical Africa. See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 49: 457-515. 1913, *Bulletin of Miscellaneous Information Kew* 1934: 434. 1934, *Kirkia* 4: 111. 1964, *Biodiversity research in the Horn of Africa region*. Proceedings of the Third International

Symposium on the Flora of Ethiopia and Eritrea at the Carlsberg Academy, Copenhagen, Aug 25-27, 1999 / edited by Ib Friis and Olof Ryding. 2001, *Economic Botany* 56(3): 292-293. 2002.

T. *superba* (De Not.) Schweinf. & Asch. (*Loudetia superba* De Not.; *Trichopteryx gigantea* Stapf; *Trichopteryx gigantea* var. *gracilis* Rendle; *Trichopteryx gigantea* var. *phalagrotres* Peter; *Trichopteryx gigantea* var. *spiciformis* Pilg.; *Trichopteryx homblei* De Wild.; *Trichopteryx hookei* De Wild.; *Trichopteryx superba* (De Not.) Bagl. ex Chiov.; *Tristachya pedicellata* Stent)

Tropical Africa, Malawi, Mali, Zambia, Angola. Perennial, tufted, erect, robust, hard, hairy, stiff, bulbous base, spikelets in triads, pasture, roots used as an aphrodisiac, common in sandy soil, in low-lying areas, moist meadows, rocky sites, see *Index seminum regii horti botanici genuensis* 24. 1852, *Beitrag zur Flora Aethiopiens ...* 302. 1867, *Bulletin of Miscellaneous Information Kew* 1897: 295-296. 1897, *Catalogue of the African Plants Collected by Dr. F. Welwitsch in 1853-61* 2(1): 215. 1899 and *Wissenschaftliche Ergebnisse der Schwedischen Rhodesia-Kongo-Expedition, 1911-1912, unter Leitung von Eric Graf von Rosen* 2: 209. 1916, *Nuovo Giornale Botanico Italiano* n.s., 26: 79. 1919, *Annales de la Société Scientifique de Bruxelles* 39(3): 154. 1920, *Annales de la Société Scientifique de Bruxelles* 39(3): 155. 1920, *Repertorium Specierum Novarum Regni Vegetabilis, Beihefte* 40: 95. 1930.

in English: hairy trident grass, giant trident grass

in Tanzania: mahua kinyaturu, mahwa kinyaturu

T. *thollonii* Franch. (*Apochaete thollonii* (Franch.) J.B. Phipps; *Tristachya elymoides* Chiov.; *Tristachya homblei* De Wild.; *Tristachya spicata* Pilger ex Peter)

Tropical Africa. See *Bulletin de la Société d'Histoire Naturelle d'Autun* 8: 374. 1895 and *Annali di Botanica* 13: 51. 1915, *Bulletin du Jardin Botanique de l'État* 6: 49, t. 33, f. 12-13. 1919, *Repertorium Specierum Novarum Regni Vegetabilis, Beihefte* 40(1): 89. 1930, *Kirkia* 4: 105. 1964.

T. *viridearistata* (J.B. Phipps) Clayton (*Veseyochloa viridearistata* J.B. Phipps)

Tropical Africa. Fragile hooked peduncle, see *Kirkia* 4: 107, t. 10, f. 3 [f. 1]. 1964, *Kew Bulletin* 21(1): 124. 1967.

Tristania Poir. = *Spartina* Schreb., *Tristania* R. Br. (Myrtaceae)

Chloridoideae, Cynodonteae, or Chloridoideae, Zoysieae, Sporobolinae, see *Genera Plantarum* 43. 1789, *Catalecta Botanica* 3: 10. 1806, *Hortus Kewensis; or, a Catalogue ... Triticum L. = *Aegilops* L., *Bromus* Scop., *Crithodium* Link, *Deina* Alefeld, *Fruementum* Krause, *Gigachilon* Seidl, *Nivieria* Ser., *Spelta* Wolf, *Zeia* Lunell

From the Latin *triticum*, *i* for wheat, *tero*, *-is*, *trivi*, *tritum*, *terere* “to grind, to wear away, to waste,” Greek *teiro*, *teirein* “distress, weaken,” see Plinius, L. Junius Moderatus Columella, Plautus, Cicero; Carl Linnaeus, *Species Plantarum*. 85. 1753 and *Genera Plantarum*. Edition 5. 37. 1754; Giovanni Semerano, *Le origini della cultura europea*. Dizionario della lingua Latina e di voci moderne. 2(2): 588, 594. Firenze 1994.

About 4-8/-20-25 species, eastern Mediterranean to Iran, western Asia. Pooideae, Triticoideae, Triticeae, or Pooideae, Triticeae, Triticinae, annual, tufted, herbaceous, erect, rarely decumbent at base, culms more or less stout and robust, solid nodes, hollow internodes, leaves in 2 vertical rows at the nodes, auricles present, ligule a membranous rim, leaf blades and sheaths glabrous, leaves narrowly to broadly linear or lanceolate, uppermost leaf the flag leaf, plants bisexual, inflorescence a single dense narrow spike, distichous spikelets borne singly and sessile, florets perfect, bisexual and plano-convex spikelets, rachis fragile or tough, 2 glumes more or less equal, persistent and rigid glumes awned or unawned, coriaceous lemmas rounded on the back and mucronate or awned, lemma keel scabrid, palea keeled entire or splitting at maturity, 2 ciliate lodicules free and membranous, 3 stamens, ovary hairy to hispid, 2 plumose stigmas, fruit ellipsoid and longitudinally grooved, cereal, grain crop species, winter fodder crop, used for hay-making and for alcohol production, found in stony hillsides, roadsides, dry grassland, open habitats, weedy places, taxonomic placement not certain, taxonomic confusion concerning this genus, hybridization, intergeneric hybrids with *Aegilops*, *Agropyron*, *Elymus*, *Elytrigia*, *Hordeum*, *Lophopyrum*, *Secale* and *Taenitherum*, type *Triticum aestivum* L., see *Species Plantarum* 1: 85-87. 1753 and 2: 1050-1051. 1753, *Genera Plantarum* 22. 1776, *Introductio ad Historiam Naturalem* 74. 1777, *Varietades de Ciencias, Literatura y Artes* 4(22): 212. 1805, *Observations sur les Graminées de la Flore Belgique* 94. 1823 [1824], *Flora Altaica* 1: 112. 1829, *Linnaea* 9(1): 132, pl. 3, f. 1-5. 1834, *Oekonomisch-technische Flora Böhmens* 1: 425. 1836, *Annales des Sciences Physiques et Naturelles, d'Agriculture et de l'Industrie, Publiées par la Société Royale d'Agriculture, etc., de Lyon*. 5: 114. 1842, *Flora Rossica* 4(13): 343. 1852, *Flora Chilena* 6: 452. 1854, *Exploration scientifique de l'Algérie ... Spenn.; *Zeia vulgaris* var. *aestiva* (L.) Lunell)

Mediterranean. Annual, tufted, erect, robust, smooth, hollow, branching at the base, often in thick clumps, often strongly tillering, auricles present, leaf blade glabrous or pubescent, membrane-like ligule obtuse and truncate, smooth and open sheaths, leaves long linear and flat, 2-6 seminal roots and many secondary roots, flower head a single spike contracted and oblong, spikes linear-oblong and distichous, bearded or not bearded spikes, spikelets heteromorphic and cleistogamous, hermaphrodite spikelets sessile, upper 1 or 2 florets often sterile, nonshattering spikelets, oblong or convex glumes mucronate or with a long terminal awn, glumes and lemmas shining in fruit, palea narrowly ovate or ovate, ovary pilose, grain crop species, fodder, grains edible, cultivated, useful medicine, seeds cooling and tonic, seed oil used in dermatosis, used to stop spontaneous sweating due to deficiency of Qi, growing along roadsides in wheat-growing areas, in dry loamy clay, in roadside channel, in fallow fields, open fallow field, waste areas, weedy sites, edges of fields, escaped from

cultivation, see *Species Plantarum* 1: 85-86. 1753, *Systema Vegetabilium. Editio decima tertia* 108. 1774, *Flore Française. in Nigeria: alkama, alkamà, alkamàà, alkamari, gameh, el k'ameh, k'ameh, lamàà, laamà, legamma, shegar, segar

in South Africa: opslagkoring

in Togo: alfintar, algaragi, algaragis, alkaki, alkubus, bashi, dashishi, dawude, fancaso, fankaso, funksaso, gurasa, kirikirino, kuskus, luwaidu, rauno, tuwon baure

in Bhutan: ka, bong

in China: fu xiao mai, fu hsiao mai, xiao mai, hsiao mai, lai, yi tang, i tang, chiao i

in India: arupa, bahudugdha, dro, dundan, gahu, gahum, gahung, gam, gandham, gandum, gau, gawn, gehu, gehub, gehum, gehun, gendoom, gendum, ghavum, giun, godamba, godhi, godhuma, godhumulu, godi, godumai, godumay, godumbaiyarisi, godumbayarisi, godumulu, gohun, gom, goodhumalu, govu, govum, hintah, jonoria, kanak, kanik, khasil, khawid (cut for fodder), kotampum, kotanpam, kothumai, ksheeri, kunak, madhuli, mahgodhuma, menchhabhojana, niksuki, nis, nistusha, pivla lotaka, pivla pote, pivla potia, rasala, safet, saman, sumana, tokar, tomar, tro, yava, yavana, zud

in Indonesia: gandum

in Japan: ko-mugi

in Malaysia: gandum

in Okinawa: umamuji

in the Philippines: trigo

in Sri Lanka: tiringu

in Thailand: khaao saa lee, khao-sa-le, khao sali, sa-le, sali, saalee

in Tibetan: gro

T. aestivum L. subsp. **aestivum** (*Triticum aestivum* subsp. *aestivocompactum* E. Schiem.; *Triticum aestivum* var. *cinereum* (Dekapr.) Mansf.; *Triticum aestivum* var. *graecum* (Körn.) Hayek; *Triticum aestivum* var. *leucospermum* (Körn.) Farw.; *Triticum aestivum* var. *lutiflatum* (Flaksb.) Mansf.; *Triticum aestivum* var. *muticum* (Schübl.) Farw.; *Triticum aestivum* var. *nigraristatum* (Flaksb.) A.A. Filatenko; *Triticum aestivum* var. *pseudoturcicum* (Vavilov) Mansf.; *Triticum aestivum* var. *pyrothrix* (Alef.) Mansf.; *Triticum aestivum* var. *suberythrospermum* (Vavilov) Mansf.; *Triticum hybernum* L.; *Triticum muticum* Schübl.; *Triticum sativum* Lam.; *Triticum vulgare* Vill.; *Triticum vulgare* var. *leucospermum* Körn.; *Triticum vulgare* subvar. *lutinflatum* Flaksb.; *Triticum vulgare* var. *lutinflatum* (Flaksb.) Vavilov; *Triticum vulgare* var. *nigraristatum* Flaksb.; *Triticum vulgare* var. *pseudoturcicum* Vavilov; *Triticum vulgare* cv. *pyrothrix* Alef.; *Triticum vulgare* var. *suberythrospermum* Vavilov; *Triticum vulgare* var. *velutinum* Schur)

Cosmopolitan. Annual, cereal, fodder, widely cultivated.

in English: bread wheat, wheat

in French: froment

in Spanish: trigo, trigo blando

in Japan: ko-mugi

in Thailand: khaao saa lee, saalee

T. aestivum L. subsp. **compactum** (Host) Mackey (*Triticum compactum* Host; *Triticum compactum* var. *atrum* Körn.; *Triticum vulgare* var. *compactum* (Host) Alef.)

Southern Europe, Asia. Annual, cereal, cultivated, spikes awned and clavate, glumes glabrous, found in dry lands and irrigated areas, see *Gram. Austr.* 4: 4, t. 7. 1809, *Landwirtschaftliche Flora* 327. 1866 and *Svensk Botanisk Tidskrift* 48: 586. 1954, *Nat. Inst. Genetics* (Misimi, Japan) 55, 61. 1961.

in English: club wheat, cluster wheat, dwarf wheat

in French: blé compact, blé ramifié

T. aestivum L. subsp. **macha** (Dekapr. & A.M. Menabde) Mackey (*Triticum macha* Dekapr. & A.M. Menabde)

Georgia. Annual, cultivated, related to wheat.

in English: macha wheat

T. aestivum L. subsp. **spelta** (L.) Thell. (*Triticum aestivum* var. *spelta* (L.) Fiori; *Triticum aestivum* var. *spelta* (L.) Bailey; *Triticum spelta* L.; *Zeia spelta* (L.) Lunell)

Cosmopolitan. Annual, cereal, starch, cultivated, related to wheat, very hardy, see *Species Plantarum* 1: 86. 1753, *Flora Aegyptiaco-Arabica* 26. 1775 and *American Midland Naturalist* 4: 226. 1915, *Mitteilungen der Naturwissenschaftlichen Gesellschaft in Winterthur* 12: 147. 1918, *Gentes Herbarum; occasional papers on the kind of plants* 1: 133. 1923.

in English: dinkel wheat, hulled wheat, spelt, spelt wheat, spelta wheat

in Italian: farro

in Arabic: hunta, qamh, qamh m'ghaejir, qamh nac aeighe, qamh staejiri

in India: jod, khapli

in Colombia: espelta

T. aestivum L. subsp. **sphaerococcum** (Percival) Mackey (*Triticum sphaerococcum* Percival; *Triticum sphaerococcum* var. *globosum* Percival; *Triticum sphaerococcum* var. *rubiginosum* Percival)

Cosmopolitan. Annual, rarely cultivated, cereal, related to wheat.

in English: Indian dwarf wheat, shot wheat

in Spanish: trigo indio

T. aestivum L. subsp. **tibeticum** J.Z. Shao

China. Slender, see *Acta Genetica Sinica* 7(2): 155. 1980, *Plant Chromosome Research* 1987 417-420. 1989, *Japanese Journal of Genetics* 65: 353-365. 1990.

T. aestivum L. subsp. **yunnanense** King ex S.L. Chen (*Triticum aestivum* subsp. *yunnanense* King)

China. Slender, hard glumes, cultivated as a food, see *Sp. Coll. Res. Nanjing Agr. Coll.* 2: 21-22. 1959, *Novon* 7(3): 230. 1997.

T. aethiopicum Jakubz. (*Gigachilon aethiopicum* (Jakubz.) Á. Löve; *Triticum abyssinicum* Steud.; *Triticum diversiflorum*

Steud.; *Triticum durum* subsp. *abyssinicum* Vavilov; *Triticum recognitum* Steud.)

Ethiopia. Very variable, see *Synopsis Plantarum Glumacearum* 1: 342. 1854 and *Feddes Repertorium* 95(7-8): 497. 1984.

in English: Ethiopian wheat

T. araraticum Jakubz. (*Triticum armeniacum* (Jakubz.) Makush.; *Triticum chaldicum* Menabde; *Triticum dicoccoides* auct.; *Triticum dicoccoides* subsp. *armeniaceum* Jakubz.; *Triticum montanum* Makush.; *Triticum nikolai* Fed. & Takht. ex Zhuk.; *Triticum timopheevii* subsp. *araraticum* (Jakubz.) C. Yen; *Triticum turgidum* subsp. *armeniaceum* (Jakubz.) Á. Löve & D. Löve)

Armenia, Azerbaijan, Southwest Asia, northern Iraq. Indeterminate species, resistant to leaf rust and powdery mildew, a wild wheat species closely related to cultivated wheat, see *Berichte der Deutschen Botanischen Gesellschaft* 26a(4): 309. 1908, *Comptes-rendus de l'académie des sciences de l'URSS* 21: 345. 1938, *Acta Phytotaxonomica Sinica* 21(3): 294. 1983, *Plant Systematics and Evolution* 169: 13-24. 1990, *Plant Systematics and Evolution* 192: 117-145. 1994, *Journal of Jiangsu Agricultural College* 19(1): 7-10. 1998, *Journal of Nanjing University: Natural Sciences* 36(2): 247-252. 2000.

T. boeoticum Boiss. (*Crithodium aegilopoides* Link; *Triticum aegilopoides* (Link) Bal. ex Koern., nom. illeg., non *Triticum aegilopoides* Forssk.; *Triticum boeoticum* subsp. *aegilopoides* (Link) Grossh.; *Triticum boeoticum* subsp. *thaouidar* (Reut. ex Hausskn.) Grossh.; *Triticum jerevani* Thüm.; *Triticum monococcum* L. subsp. *boeoticum* (Boiss.) Hayek; *Triticum monococcum* subsp. *boeoticum* (Boiss.) Á. Löve & D. Löve; *Triticum monococcum* subsp. *thaouidar* (Reut. ex Hausskn.) Zhuk.; *Triticum spontaneum* Flaksb.; *Triticum spontaneum* subsp. *aegilopoides* (Link) Flaksb.; *Triticum spontaneum* subsp. *thaouidar* (Reut. ex Hausskn.) Flaksb.; *Triticum thaouidar* Reut. ex Hausskn.) (also spelled **baeoticum**)

Europe. See *Linnaea* 9(1): 132, pl. 3, f. 1-5. 1834, *Diagnoses plantarum orientalium novarum, ser. 1*, 2(13): 69. 1854, *Handbuch des Getreidebaus* 1: 109. Triunila Raf. = Uniola L.

Referring to *Uniola L.*

Chloridoideae, Cynodonteae, Uniolinae, or Chloridoideae, Eragrostideae, Uniolinae, see *Species Plantarum* 1: 71. 1753, C.S. Rafinesque, *Neogenyton, or Indication of Sixty-Six New Genera of Plants of North America*. 4. 1825 and E.D. Merrill, *Index rafinesquianus*. 77. 1949, *Contributions from the United States National Herbarium* 41: 232-234. 2001.

Trixostis Raf. = Aristida L.

Arundinoideae, Aristideae, or Aristidoideae, Aristideae, type *Aristida gracilis* Elliott, see *Species Plantarum* 1: 82. 1753, *Encyclopédie Méthodique. Botanique ... Supplément* 1: 452. 1810, *A Sketch of the Botany of South-Carolina and Georgia* 1(2): 142, pl. 8, f. 3. 1816, C.S. Rafinesque, *Seringe Bull. Bot.* 1: 221. 1830 and *Meded. Rijks.-Herb.* 54: 9. 1926, Elmer D. Merrill (1876-1956), *Index rafinesquianus*. 77. 1949, *Acta Botánica Mexicana* 63: 1-45. 2003, *Contributions from the United States National Herbarium* 46: 69-104, 629. 2003.

Trochera Rich. = Ehrharta Thunb.

From the Greek *trochos* "a wheel, a round ball, any thing round or circular," *trocheros* "running, tripping."

Ehrhartoideae, Ehrharteae, type *Trochera striata* Rich., see *Kongl. Vetenskaps Academiens Handlingar* 40: 216-217, pl. 8. 1779, *Observations et mémoires sur la Physique, sur l'histoire naturelle et sur les arts et métiers* 13: 225. Paris 1779, Sir James Edward Smith (1759-1828), *Plantarum Icones Hactenus Ineditae* 33. Londoni 1789-1791, *Prodr. Fl. Nov. Holl.* 209-210. 1810, *Essai d'une Nouvelle Agrostographie* 62, t. 12, f. 4. 1812, *Pl. Javan. Rar.* 11. 1838, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques,*

Physiques et Naturelles. Seconde Partie: Sciences Naturelles 5,3(3): 71. 1839, *Ann. Sci. Nat. Bot.* (sér. 3) 2: 116. 1844, *Revisio Generum Plantarum* 2: 795. 1891, *Histoire des Plantes* 12: 171, f. 313, f. 314. 1893 and *Lexicon* 364. 1903, *Transactions and Proceedings of the Royal Society of New Zealand* 73: 235. 1943, *Bot. Gaz.* 124: 264-270. 1963, *New Zealand Journal of Botany* 15: 531-534. 1977, *Blumea* 28: 181-194. 1982, *Contributions from the United States National Herbarium* 39: 56, 116. 2000.

Tschompskia Asch. & Graebn. = Arundinaria Michx.

Bambusoideae, Bambuseae, Arundinariinae, type *Arundinaria simonii* (Carrière) Rivière & C. Rivière, see *Bulletin de la Société Nationale d'Acclimatation de France*, sér. 3, 5: 774, f. 43-50. 1878 and *Synopsis der mitteleuropäischen Flora* 2(1): 772. 1902, *Contributions from the United States National Herbarium* 39: 18-24, 116. 2000.

Tuctoria Reeder

An anagram of *Orcuttia*.

Three species, Mexico, U.S., California, Baja California. Chloridoideae, Orcuttieae, or Chloridoideae, Cynodonteae, Orcuttiinae, annual, herbaceous, unbranched, aromatic, more or less hairy, erect, ascending or decumbent, ligules absent, auricles absent, plants bisexual, inflorescence partly enclosed by upper sheath or exserted, a dense many-sided raceme or a spike, imperfect florets above, 2 glumes entire or irregularly short-toothed, lemma mucronate and erose, palea keels glabrous, lodicules minute, 3 stamens, ovary glabrous, 2 stigmas, fruits wrinkled or smooth, grassland, in seasonally inundated areas, vernal pools, on moist plains, type *Tuctoria fragilis* (Swallen) Reeder, see *Bulletin of the Torrey Botanical Club* 13: 219. 1886, *Bulletin de l'Herbier Boissier* 5: 947. 1897, *Erythea, a Journal of Botany, West American and General*. 6(11): 109. Berkeley, California 1898 and 7: 43. 1899, *Österreichische Botanische Zeitschrift* 49: 134. 1899 and B. Crampton, "The grass genera *Orcuttia* and *Neostapfia*: a study in habitat and morphological specialization." *Madroño* 15(4): 97-110. 1959, J.R. Reeder, "The tribe Orcuttieae and the subtribes of Pappophoreae (Gramineae)." *Madroño* 18: 20-28. 1965, J.R. Reeder, "Systematics of the tribe Orcuttieae (Gramineae) and the description of a new segregate genus, *Tuctoria*." *American Journal of Botany* 69(7): 1082-1095. 1982, *Kew Bulletin* 40: 737-744. 1985, *Contributions from the United States National Herbarium* 41: 176-177, 232. 2001, O. Ueno, "Environmental regulation of photosynthetic metabolism in the amphibious sedge *Eleocharis baldwinii* and comparisons with related species." *Plant, Cell and Environment* 27(5): 627-639. May 2004.

Species

T. fragilis (Swallen) Reeder (*Orcuttia fragilis* Swallen)

Mexico. Good forage for cattle, see *Journal of the Washington Academy of Sciences* 34(9): 308. 1944, *Madroño* 30: 308. 1981, *American Journal of Botany* 69(7): 1090. 1982.

T. greenei (Vasey) Reeder (*Orcuttia greenei* (Vasey) Swallen)

U.S. Annual, erect and decumbent, inflorescence exserted, upper spikelets crowded, glumes subequal, fruit wrinkled, see *Botanical Gazette* 16(5): 146. 1891 and *American Journal of Botany* 69(7): 1091. 1982.

in English: Greene's tuctoria, awnless spiralgrass

T. mucronata (Crampton) Reeder (*Orcuttia mucronata* Crampton; *Tuctoria greenei* (Vasey) Reeder)

U.S. Annual, erect and decumbent, inflorescence partly enclosed by upper leaf, spikelets crowded, glumes subequal, see *Madroño* 15(4): 107-108, f. 2-3. 1959, *American Journal of Botany* 69(7): 1091. 1982.

in English: Crampton's tuctoria, prickly spiralgrass

Turraya Wall. = *Leersia* Sw., *Leersia* Sol. ex Sw.

Ehrhartoideae, Oryzeae, Oryzinae, type *Leersia hexandra* Sw., see *Nova Genera et Species Plantarum seu Prodrum* 1, 21. 1788, *A Numerical List of Dried Specimens* no. 8637d. 1848 and *Contributions from the United States National Herbarium* 39: 64-67, 116. 2000.

Tylothrasya Döll = *Thrasya* Kunth

From the Greek *tylos* "lump, knob" plus the genus *Thrasya* Kunth.

Panicoideae, Paniceae, Paspalinae, type *Tylothrasya petrosa* (Trin.) Döll, see *Nova Genera et Species Plantarum* 1: 120-121, t. 39. 1815 [1816], *Species Graminum* 3: t. 280. 1829-1830, *Flora Brasiliensis* 2(2): 295-296, pl. 37. 1877, *Genera Plantarum* 3(2): 1101. 1883 and *Proceedings of the Biological Society of Washington* 24: 115. 1911, *Comissão de Linhas Telegráficas Estratégicas de Matto-Grosso ao Amazonas, Botanica* 67 (Bot. 11): 93. 1922, *Acta Botanica Venezuelica* 14(4): 7-93. 1985[1987], *Annals of the Missouri Botanical Garden* 81(4): 768-774. 1994, *Contributions from the United States National Herbarium* 46: 613-616, 629. 2003.

Typhoides Moench = *Phalaris* L., *Phalaroides* Wolf

Greek *typhe*, *tiphe* and *eidos*, *oides* "resemblance." *Typhē*, *tiphe* applied by Theophrastus, Dioscorides and Aristoteles (*Historia animalium*) to a kind of grass or straw or other aquatic plants used for stuffing beds and bolsters, Aristophanes (*The Acharnians*) and Claudius Aelianus (*De natura animalium*) applied to a species of water bug or beetle; Latin *tiphe*, *es* for a kind of grain, Peter's corn, 1-grained wheat (Plinius); see M. Cortelazzo & P. Zolli, *Dizionario etimologico della lingua italiana*. 5: 1338. Bologna 1988; G. Semerano, *Le origini della cultura europea*. Dizionario Etimologici. Dizionario della lingua Greca. 2(1): 293. Leo S. Olschki Editore, Firenze 1994; H. Genast, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 666. 1996.

Pooideae, Poeae, Phalaridinae, see *Species Plantarum* 1: 54-55. 1753, *Genera Plantarum* 11. 1776, *Methodus Plantas Horti Botanici ...* 201-202. 1794 and *Iowa State College Journal of Science* 36(1): 1-96. 1961, *Fragmenta Floristica et Geobotanica* 27: 581-590. 1981, *Turun Yliopiston Julkaisuja: Sarja A II, Biologia-Geographica* 3: 1-12. 1982, *Cytologia* 50: 89-99. 1985, *Blyttia* 1985: 7-15. 1985, *Taxon* 41: 567. 1992, *Watsonia* 20: 63-66. 1994, *Webbia* 49(2): 265-329. 1995, *Taxon* 44: 611-612. 1995, *Contributions from the United States National Herbarium* 48: 479-488, 684. 2003.

Tzvelevia E.B. Alexeev = *Festuca* L., *Tsvelevia* E. Alexeev

Named for Nikolai Nikolaievich Tzvelev, b. 1925.

One species, Chatham Island, Antarctic, New Zealand. Pooideae, Poodae, Poeae, perennial, herbaceous, unbranched, densely tufted, auricles absent, ligule an unfringed membrane, plants bisexual, contracted inflorescence paniculate more or less ovate to ovoid, spikelets pedicellate, 2 glumes unequal, lemmas pointed and hairy, palea present, 2 free and membranous lodicules, 3 stamens, ovary glabrous, 2 stigmas, rocky places, type *Tzvelevia kerguelensis* (Hook.f.) E.B. Alexeev, see *The Vegetation of the Chatham-Islands ...* 60. 1864, *Philosophical Transactions of the Royal Society of London* 168: 22. 1879.

Species

T. kerguelensis (Hook.f.) E.B. Alexeev (*Festuca kerguelensis* (Hook.f.) F. Muell.; *Festuca kerguelensis* (Hook.f.) Hook.f.; *Poa kerguelensis* (Hook.f.) Steud.; *Triodia kerguelensis* Hook.f.)

Kerguelen Land. Rocky places, see *Flora Antarctica* 379. 1846, *Synopsis Plantarum Glumacearum* 1: 257. 1854.

U

Uniola L. = *Leptochloopsis* H.O. Yates,
Nevroctola Raf., *Trisiola* Raf., *Triunila* Raf.

From *uniola*, *ae* for a plant, otherwise unknown, diminutive of the Latin *unio*, *unionis* “unity, a single large pearl, a kind of single onion, oneness,” referring to the glumes; see Carl Linnaeus, *Species Plantarum*. 71. 1753 and *Genera Plantarum*. edition 5. 32. 1754; Helmut Genast, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 670. Basel 1996.

About 4-5 species, North America, southern U.S. to Ecuador, West Indies. Chloridoideae, Eragrostideae, Uniolineae, or Chloridoideae, Cynodonteae, Uniolineae, perennial, herbaceous, halophytic, erect, caespitose, rhizomatous or stoloniferous, long and thick rhizomes, auricles absent, ligule a fringe of short hairs, leaf blades long-attenuate, leaves harsh, plants bisexual, open or contracted inflorescence spicate or paniculate and exserted, many racemes crowded and overlapping, spikelets strongly laterally compressed, 6-20 florets per spikelet, lower florets barren or empty, 2 glumes acute and shorter than the spikelets, second glume awnless, many-nerved lemmas, strongly keeled lemmas coriaceous or papery, palea keels winged, 2 free and fleshy lodicules, 3 stamens, 2 stigmas, open habitats, slopes, dry grassy plains, sand dunes and flats, salty sites, arid places, salt flats, the Caribbean and Pacific coasts, related to *Desmostachya*, type *Uniola paniculata* L., see *Species Plantarum* 71. 1753, *Flora Boreali-Americana* 1: 71. 1803, *Florula Ludoviciana*... 144. New York 1817, *Am. Monthly Mag. Crit. Rev.* 2: 175. 1817 and 4: 188, 190. 1819, *Jour. Phys. Chim. Hist. Nat.* 89: 104. 1819, *Neogenyton, or Indication of Sixty-Six New Genera of Plants of North America*. 4. 1825, *Hortus Regius Botanicus Berolinensis* 1: 159. 1827, *Preliminary Catalogue of Anthophyta and Pteridophyta Reported as Growing Spontaneously within One Hundred Miles of New York* 69. 1888 and *The Southwestern Naturalist* 11(2-3): 145-189, 372-393, 415-455. 1966-1967, *Kew Bulletin* 37: 412. 1982, *Flora Mesoamericana* 6: 257-258. 1994, *Memoirs of the New York Botanical Garden* 78: 509-540. 1996, *Am. J. Bot.* 86: 17-31. 1999, *Restoration Ecology* 8(2): 144-150. June 2000, *Contributions from the United States National Herbarium* 41: 137, 175, 232-234. 2001, Anne Pringle & James D. Bever, “Divergent phenologies may facilitate the coexistence of arbuscular mycorrhizal fungi in a North Carolina grassland.” *Am. J. Bot.* 89:

1439-1446. 2002, *Systematic Entomology* 27(4): 469-517, Oct 2002, *Am. J. Bot.* 90: 116-122. 2003, *Annals of the Association of American Geographers* 93(1): 13-29. Mar 2003, *New Phytologist* 162(1): 25-44. Apr 2004, *Conservation Biology* 18(5): 1435-1439. Oct 2004, Qing Liu, Nan-Xian Zhao, Gang Hao, Xiao-Ying Hu & Yun-Xiao Liu, “Caryopsis morphology of the Chloridoideae (Gramineae) and its systematic implications.” *Botanical Journal of the Linnean Society* 148(1): 57-72. May 2005.

Species

U. condensata Hitchc. (*Leptochloopsis condensata* (Hitchc.) H.O. Yates; *Uniola condensata* Scribn.)

North America, Ecuador. Perennial, coarse, erect, rigid, glabrous, dense tussocks, leaves mostly basal, leaf sheaths glabrous, ligule inconspicuous or a rim of short hairs, erect leaf blades long-attenuate from a broad base, inflorescence a long and narrow panicle with branches erect and later diverging, ovate spikelets compressed, 3-5 florets and the basal 1-2 sterile, glumes lanceolate, second glume scabrid on back, fertile lemmas keeled, palea finely ciliate, 2 lodicules cuneate, 3 stamens, often a pioneer, on grassy slopes, disturbed places, road banks, see *Yearbook of Agriculture* 1894: 430. 1895 and *Contributions from the United States National Herbarium* 24(8): 345. 1927, *The Southwestern Naturalist* 11(3): 389. 1966.

U. paniculata L. (*Briza caroliniana* Lam.; *Briza caroliniana* Walter, nom. illeg., non *Briza caroliniana* Lam.; *Nevroctola maritima* Raf. ex B.D. Jacks.; *Nevroctola paniculata* Raf. ex B.D. Jacks.; *Trisiola paniculata* (L.) Raf.; *Uniola floridana* Gand.; *Uniola heterochroa* Gand.; *Uniola macrostachys* Gand.; *Uniola maritima* Michx.; *Uniola paniculata* Llanos)

Northern America, Mexico, U.S. Perennial, clumped, coarse, large spikelets, ornamental, sand binder, useful for erosion control, common on beach dunes, on sand dunes, see *Species Plantarum* 1: 71. 1753, *Encyclopédie Méthodique, Botanique* 1: 465. 1785, *Flora Caroliniana, secundum* ... 79. 1788, *Flora Boreali-Americana* 1: 71. 1803, *Florula Ludoviciana, or, a Flora of the State of* ... 144. 1817, *Fragmentos de algunas plantas de Filipinas* 32. 1851, *Index Kewensis* 2: 311. 1894 and *Contr. U.S. Natl. Herb.* 12: 121. 1908, *Bulletin de la Société Botanique de France* 66(7): 304. 1919 [1920], R.H. Wagner, “The ecology of *Uniola paniculata* L. in the dune-strand habitat of North Carolina.”

Ecological Monographs 34: 79-96. 1964, Deborah L. Miller, Lisa Yager, Mack Thetford & Mica Schneider, "Potential use of *Uniola paniculata* rhizome fragments for dune restoration." *Restoration Ecology* 11(3): 359-369. Sep 2003, Steven J. Franks, C.L. Richards, E. Gonzales, J.E. Cousins & J.L. Hamrick, "Multi-scale genetic analysis of *Uniola paniculata* (Poaceae): a coastal species with a linear, fragmented distribution." *Am. J. Bot.* 91: 1345-1351. 2004.

in English: seaoats, seaside oats, North American seaoats

U. peruviana Laegaard & Sánchez Vega

North Peru. Perennial, robust, see *Nordic Journal of Botany* 10(4): 439. 1990.

U. pittieri Hack.

Mesoamerica, South America. Perennial, coarse, stout, erect, scandent, arching, solid, stoloniferous, clumped, leaf sheaths glabrous, leaves distichous at base, ligule a dense rim of short hairs, leaf blades rolled inward and long-attenuate, narrow dense panicles, spikelets easily and readily detached, glumes unequal, first glume ovate, second glume triangular, palea lanceolate, 2 lodicules cuneate, 3 stamens, beach grass forming large colonies vital to dune stabilization, common on sand dunes, sandy sea shores, in very exposed places, in and over shrubs, in beach sand, behind the beach, among rocks, on margins of mangrove areas, close to *Uniola paniculata*, see *Österreichische Botanische Zeitschrift* 52: 309. 1902, *Brittonia* 23(3): 293-324. 1971.

U. virgata (Poir.) Griseb. (*Eleusine procera* Spreng. ex Steud.; *Leptochloopsis virgata* (Poir.) H.O. Yates; *Poa virgata* Poir.; *Uniola racemiflora* Trin.; *Uniola sparta* Trin.; *Uniola virgata* Bartram ex Pursh)

North America, West Indies. Perennial, see *Encyclopédie Méthodique, Botanique* 5: 78. 1804, *Flora Americae Septentrionalis; or, ...* 1: 82. 1814, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 4,2(1): 55. 1836, *Linnaea* 10(3): 307. 1836, *Nomenclator Botanicus. Editio secunda* 1: 549. 1840, *Flora of the British West Indian Islands* 531. 1864 and *The Southwestern Naturalist* 11(3): 384. 1966.

in English: limestone grass

Urachne Trin. = *Oryzopsis* Michx.,
Piptatherum P. Beauv.

Greek *oura* "tail" and *achne* "chaff, glume."

Pooideae, Stipeae, Stipinae, type *Urachne coerulescens* (Desf.) Trin., see *Flora Boreali-Americana* 1: 51, t. 9. 1803, *Essai d'une Nouvelle Agrostographie* 17, 18, 173. 1812, *The Genera of North American Plants* 1: 40. 1818, Carl Bernhard von Trinius (1778-1844), *Fundamenta Agrostographiae*. 109-110. Vienna 1820, *Reliquiae Haenkeanae* 1: 222. 1830, *Mémoires de l'Académie Impériale des*

Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles 3,1(2-3): 122, 123. 1834, *Species Graminum Stipaceorum* 9, 16, 19, 20, 22. 1842, *Flora Chilena* 6: 265. 1854, *Genera Plantarum* 3(2): 1142. 1883 and *U.S. Dept. Agric. Bull.* 772: 156, 158. 1920, *Darwiniana* 7: 14. 1947, *Gayana Bot.* 47: 15. 1990, *Taxon* 39: 608. 1990, *Contributions from the United States National Herbarium* 48: 469-473, 494-495, 684-687. 2003.

Uralespis Nutt. = *Triplasis* P. Beauv.

From the Greek *oura* "tail" and *lepis* "scale."

Chloridoideae, Cynodonteae, type *Uralespis purpurea* Nutt., see *Essai d'une Nouvelle Agrostographie* 81, pl. 16, f. 10. 1812, *The Genera of North American Plants* 1: 62. 1818 and *U.S. Dept. Agric. Bull.* 772: 76. 1920, E.D. Merrill, *Index rafinesquianus*. 77. 1949, Arthur D. Chapman, editor, *Australian Plant Name Index*. 2929. ["Comments: Spelling corrected by C.S. Rafinesque in *Amer. Monthly Mag. Crit. Rev.* 4: 190. 1819"] Canberra 1991, *Contributions from the United States National Herbarium* 41: 230-231, 234-235. 2001.

Uralespis Nutt. = *Triplasis* P. Beauv.

A typographical error see *The Genera of North American Plants* 1: 62. 1818, *Gramineae* 27. 1841, *Synopsis Plantarum Glumacearum* 1: 248. 1855, *Proceedings of the Academy of Natural Sciences of Philadelphia* 14: 93-95. 1862, *Mexicanas Plantas* 2: 110. 1886 and *U.S. Dept. Agric. Bull.* 772: 76. 1920, *Contributions from the United States National Herbarium* 41: 230-231, 234-235. 2001.

Uranthoecium Stapf

From the Greek *ouranos* "sky, roof, vaulted roof" and *thekion* a diminutive of *theke* "case, capsule, box," referring to the shape of the seed box, see James A. Baines, *Australian Plant Genera. An Etymological Dictionary of Australian Plant Genera*. 385-386. 1981; some suggested from *oura* "tail," *anthos* "flower" and *oikeo, ikeo* "to inhabit," or from *oura* and *anthos* "flower," *anthoecium* "spikelet," referring to the lower lemmas, attenuate.

One species, Australia. Panicoideae, Panicodae, Paniceae, annual or short-lived perennial, caespitose, herbaceous, hollow internodes, auricles absent, ligule a fringed membrane, leaves linear and narrow, culms branched from the lower nodes and flattened, plant bisexual, inflorescence a short spike, 2-4 spikelets clustered on both sides of axis, spikelets sessile with 1 sterile floret and one upper fertile, 2 glumes very unequal, first glume truncate and thin, upper glume

saccate, first lemma acuminate and longer than the glumes, palea present, two fleshy lodicules, 3 stamens, ovary glabrous, 2 stigmas plumose, grows in grassland on clay, heavy soils, open grasslands, open habitats, in gilgai, type *Uranthoecium truncatum* (Maiden & Betche) Stapf, see *Proceedings of the Linnean Society of New South Wales* 21: 741, t. 69. 1906, *Hooker's Icones Plantarum* 31: t. 3073. 1916.

Species

U. truncatum (Maiden & Betche) Stapf (*Rottboellia truncata* Maiden & Betche)

South Australia, Northern Territory, Queensland, New South Wales. Annual or short-lived perennial, erect, slender, tufted, leaves along the stems, panicles with a narrow wing along the margins of the rachis, spike axis with bract-like bristles, spikelets glabrous, lower glume truncate, second glume 2-keeled or notched, lower lemma sterile and keeled, upper lemma bisexual and firm, fodder.

in English: flat stem grass

Urelytrum Hackel

From the Greek *oura* “a tail” and *elytron* (*elyo* “to wind”) “a sheath, a cover.”

About 7 species, South and tropical Africa. Panicoideae, Andropogonodae, Andropogoneae, Rottboelliinae, perennial or sometimes annual, tufted, erect, unbranched, herbaceous, aromatic or not with a bitter, quinine-like taste, auricles present, ligule an unfringed membrane, plants bisexual, inflorescence spicate or racemose, thickened internodes, 1-2 terminal racemes solitary or subdigitate, spikelets in pairs, 2 florets, lower floret male, upper floret bisexual, pedicelled spikelets long-awned, 2 glumes more or less equal, lower glume of the pedicellate spikelet long-awned, male spikelets with glumes, lower glume 2-keeled, upper glume nerved, palea present, 2 lodicules free and fleshy, 3 stamens, ovary glabrous, 2 plumose stigmas, open habitats, on roadsides, savannah grassland, type *Urelytrum agropyroides* (Hack.) Hack., see *Die Natürlichen Pflanzenfamilien* 2(2): 22, 25. 1887, *Monographiae Phanerogamarum* 6: 272. 1889 and *Flora of Tropical Africa* 9: 47. 1917, *Flore Agrostologique du Congo Belge* 1: 51. 1929, *Kew Bulletin* 1949: 366, 368-370, 376. 1949, *Gen. S. African Fl. Pl.* edition 2. 81. 1951, *Bulletin de la Société Botanique de France* 105: 244. 1958, *Bulletin de la Société Botanique de Belgique* 90: 221. 1958, *Kew Bulletin* 20: 257. 1966, *Boletim da Sociedade Broteriana, ser. 2* 41: 58, t. 1. 1967, *Kew Bulletin* 32(4): 767-771. 1978, *Genera Graminum* 361-362. 1986.

Species

U. annuum Stapf

Benin. See *Bull. Soc. Bot. France, lv. Mém.* VIII. 99. 1908 [also *Mémoires de la Société Botanique de France* 8: 99. 1908].

U. agropyroides (Hackel) Hack. (*Elionurus agropyroides* (Hack.) Roberty; *Rottboellia agropyroides* Hack.; *Urelytrum squarrosus* Hack.)

Tropical Africa, Madagascar. Perennial, hard, coarse, aromatic, submontane, unbranched, tufted, tussock forming, leaf sheath round, ligule an elongated membrane, single flattened raceme, spikelets paired, 1 spikelet sessile and awnless, 1 spikelet pedicellate with a flattened awn, awns which bend outwards, medicinal use, unpalatable, very low grazing value, occurs in grasslands and open bushvelds, wooded grasslands, on stony slopes, hillsides, in sandy soils, see *Supplementum Plantarum* 13, 114. 1781 [1782], *Species Plantarum. Editio quarta* 4(2): 941. 1806, *Boletim da Sociedade Broteriana* 3: 135. 1885, *Monographiae Phanerogamarum* 6: 272. 1889 and *Fl. Ovest Afr.* 409. 1954.

in English: quinine grass, centipede grass

in Nigeria: ande

in South Africa: varkstertgras

U. digitatum K. Schum.

West tropical Africa, Central African Republic. Perennial, tussocky, culms used for matting, savannah, see *Die Pflanzenwelt Ost-Afrikas* C: 97. 1895.

U. giganteum Pilger (*Rhytachne gigantea* Stapf)

West tropical Africa, Sudan, Uganda. Perennial, robust, whorled racemes, fodder, culms used for matting, growing in riverbanks, marshes, swampy places, see W. Hamilton (1783-1856), *Prodromus Plantarum Indiae Occidentalis* London 1825, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 34(1): 125. 1904, *Mémoires de la Société Botanique de France* 8: 99. 1908.

in Nigeria: codorde, jeemàà, sodornde, sodornde mayo

U. henrardii Chippin.

Southern Africa. Similar to *Schizachyrium salzmannii*, see *Blumea, Supplement* 3: 25, f. 1. 1946.

U. muricatum C.E. Hubb.

West tropical Africa. Perennial, tufted, erect, tough, culms bitter-tasting, low grazing value, open areas, wooded savannah, see *Kew Bulletin* 1949: 367. 1949.

in Nigeria: rumaya, rumiya

Urochlaena Nees = *Tribolium* Desv.

From the Greek *oura* “a tail” and *chlaena*, *chlaenion* “cloak, blanket.”

One species, South Africa. Arundinoideae, Arundineae, or Danthonioideae, Danthonieae, annual, herbaceous, glabrous, branched, unarmed, caespitose, auricles absent, ligule a fringed membrane, uppermost sheath clasping the inflorescence, plants bisexual, deciduous inflorescence paniculate to spiciform, uppermost leaf sheath and inflorescence disarticulate and dispersed, panicle falling intact at maturity, 2 glumes more or less equal, lemma herbaceous awned, palea present, 2 minute and fleshy lodicules, 3 stamens, ovary glabrous, 2 stigmas, open habitats, dry slopes, sandy places, sometimes referred to *Tribolium* Desv., type *Urochlaena pusilla* Nees, see *Mémoires de la Société d'Agriculture, Sciences et Arts d'Angers* 1: 168, t. 7, f. 2. 1831, *Florae Africae Australioris Illustrationes Monographicae* 1: 437-438. 1841 and *Bothalia* 18: 111-114. 1988, *South African Journal of Botany* 60: 285-292. 1994, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 119(4): 445-507. 1997, *Contributions from the United States National Herbarium* 46: 622, 629. 2003.

Species

U. pusilla Nees (*Tribolium pusillum* (Nees) H.P. Linder & Davidse; *Urochlaena major* Rendle)

South Africa. Annual, tufted, soft leaves, dense spike-like panicle partially enclosed in modified leaf, glumes herbaceous 4- to 7-nerved with a recurved awn, lemmas hairy 7- to 9-nerved, along roadsides, dry sandy areas, disturbed places, dry bushlands, see *Florae Africae Australioris Illustrationes Monographicae* 1: 438. 1841, *Journal of Botany, British and Foreign* 37(441): 382. 1899 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 119(4): 495, f. 17. 1997.

Urochloa P. Beauv. = *Pseudobrachiaria* Launert

From the Greek *oura* "a tail" and *chloe*, *chloa* "grass," referring to the awns.

Some 12-120 species, tropics, mainly tropical Africa. Panicoideae, Panicoideae, Paniceae, Melinidinae, or Panicoideae, Paniceae, Setariinae, annual or perennial, morphologically variable, coarse, herbaceous, leafy, weedy, simple or branched, caespitose, erect, rhizomatous or stoloniferous, sometimes base decumbent and rooting from nodes, auricles absent, ligule a rim of short hairs or a membranous shortly ciliate rim, blade rolled in bud, leaves lanceolate, plants bisexual, a primary axis with racemes linear, spikelets single or paired, spikelets abaxial, spikelets shortly pedicellate and some with pedicel tips acting as elaiosomes, tubercle-based bristle, some spikelets reduced to disc-tipped pedicels, spikelets often constricted into a short stipe-like base, 2-3 florets, lower floret sterile or male, upper floret

bisexual, 2 glumes unequal or subequal, lower glume 3-nerved and shorter than the spikelet, upper glume acute, callus absent or short, lemmas dissimilar, upper lemma hardened and sometimes mucronate or short-awned, palea of upper florets present, 2 small lodicules free and fleshy, 3 stamens, ovary glabrous, 2 plumose reddish stigmas, grain crop species, fodder, weed species, native pasture species, minor cereal, shade species and species of open habitats, rainforest, grasslands, along irrigation ditches, pampas, prairies, loamy soils, very closely related to and most species formerly referred to *Brachiaria* (Trin.) Griseb. and vice versa, type *Urochloa panicoides* P. Beauv., see *Species Plantarum* 1: 55. 1753, *Systema Naturae, Editio Decima* 2: 870. 1759, *Icones Plantarum Rariorum* 1: 2, t. 13. 1781, *Essai d'une Nouvelle Agrostographie* 52, 53, t. 11, f. 1. 1812, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 3,1(2-3): 193, 208. 1834, *Flora Rossica* 4(14): 469. 1853, *Synopsis Plantarum Glumacearum* 1: 37. 1855 [1853] and *Contributions from the United States National Herbarium* 15: 20, 28, 35, 78. 1910, *North American Flora* 3(2): 200, 202-203. 1915, *Journal of the Faculty of Science: University of Tokyo, Botany* 3: 244. 1930, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 11(104): 242. 1931, *Manual of the Grasses of the United States* (edition 2, revised by A. Chase) 680. 1950 [1951], *Mitteilungen der Botanischen Staatssammlung München* 8: 158. 1970, *Folia Primatologica* 15: 1-35. 1971, *Journal of Human Evolution* 10: 565-583. 1981, *Genera Graminum* 284-285. 1986, *Folia Primatologica* 48: 78-120. 1987, *Grass Syst. Species

U. acuminata (Renvoize) Morrone & Zuloaga (*Brachiaria tatianae* Zuloaga & Soderstr.; *Panicum megastachyum* Nees, nom. illeg., non *Panicum megastachyum* Nees ex Trin.; *Streptostachys acuminata* Renvoize)

South America, Brazil. Perennial, erect, stout, terete, pubescent, see *Flora Brasiliensis seu Enumeratio Plantarum* 2: 154. 1829 and *Kew Bulletin* 39(1): 182. 1984, *Smithsonian Contributions to Botany* 59: 7-11, f. 3-4. 1985, *Annals of the Missouri Botanical Garden* 78(2): 372-374. 1991, *Darwiniana* 3(1-4): 53-60. 1995.

U. adspersa (Trin.) R.D. Webster (*Brachiaria adspersa* (Trin.) Parodi; *Brachiaria adspersa* (Trin.) S.T. Blake, nom. illeg., non *Brachiaria adspersa* (Trin.) Parodi; *Brachiaria echinulata* (Mez) Parodi; *Panicum adpersum* Trin.; *Panicum adpersum* var. *exile* Lindm.; *Panicum adpersum* var. *neesi* Lindm.; *Panicum echinulatum* Mez; *Panicum echinulatum* var. *boliviense* Henrard; *Panicum keyense* Mez; *Panicum thomasianum* Steud. ex Döll)

Southern America, Argentina, Bolivia, Brazil. Annual, herbaceous, erect, decumbent and rooting, leaning, weed in cultivated fields, growing on sandy soils, deciduous and semideciduous forests, near water, see *De Graminibus Panicis* 146. 1826, *Flora Brasiliensis* 2(2): 188. 1877 and *Kongliga Svenska Vetenskapsakademiens Handlingar* 34(6): 8, t. 3. 1900, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 7: 61-62. 1917, *Mededeelingen van's Rijks-Herbarium* 40: 50. 1921, *Darwiniana* 15: 94, 96. 1969, *Proceedings of the Royal Society of Queensland* 81: 4. 1969, *Systematic Botany* 13(4): 607. 1988.

U. advena (Vickery) R.D. Webster (*Brachiaria advena* Vickery) (Latin *advena*, *ae* "a foreigner, stranger, alien")

Perennial or annual, erect or decumbent, culms rooting at the nodes, leaf blades glabrous, inflorescence exerted at maturity, racemes pubescent, sessile and pubescent spikelets very densely arranged on the branches, upper glume and lower lemma more or less uniformly pubescent, lower glume glabrous, lower lemma without a palea, fertile

floret indurate, weed of cultivation and pastures, usually in damp sites, disturbed areas, see *Contributions from the New South Wales National Herbarium* 1(6): 329-330. 1950 [1951], *The Australian Paniceae (Poaceae)* 231. 1987.

in South Africa: phetola (Sotho)

U. albicoma (Swallen & García-Barr.) Morrone & Zuloaga (*Brachiaria albicoma* (Swallen & García-Barr.) Zuloaga & Soderstr.; *Panicum albicomum* Swallen & García-Barr.)

America, Colombia. See *Caldasia* 2: 303, f. C. 1943, *Smithsonian Contributions to Botany* 59: 11, f. 5. 1985, *Darwiniana* 31(1-4): 68. 1992.

U. arizonica (Scribn. & Merr.) Morrone & Zuloaga (*Brachiaria arizonica* (Scribn. & Merr.) S.T. Blake; *Brachiaria arizonica* var. *laeviglumis* (Scribn. & Merr.) Beetle; *Brachiaria arizonica* var. *major* (Vasey) Beetle; *Brachiaria arizonica* var. *tenuis* (Scribn. & Merr.) Beetle; *Panicum arizonicum* Scribn. & Merr.; *Panicum arizonicum* var. *arizonicum*; *Panicum arizonicum* var. *laeviglume* Scribn. & Merr.; *Panicum arizonicum* var. *major* (Vasey) Scribn. & Merr.; *Panicum arizonicum* var. *tenuis* Scribn. & Merr.; *Panicum dissitiflorum* Vasey; *Panicum fasciculatum* var. *dissitiflorum* Vasey ex Scribn. & Merr.; *Panicum fasciculatum* var. *majus* (Vasey) Beal; *Panicum fuscum* var. *major* Vasey)

Northern America, Mexico, U.S. Forage, canals and ditches, ravines, near water, see *Department of Agriculture. Botanical Division. Bulletin* 8: 26. 1889, *Proceedings of the American Academy of Arts and Sciences* 24: 80. 1889, *Grasses of North America for Farmers and Students* 2: 117. 1896 and *Circular, Division of Agrostology, United States Department of Agriculture* 32: 2-4. 1901, *Contr. U.S. Natl. Herb.* 15: 44. 1910, *Proceedings of the Royal Society of Queensland* 81: 4. 1969, *Phytologia* 52(1): 12-13. 1982, *Darwiniana* 32(1-4): 61. 1993.

in English: Arizona signal grass

U. arrecta (Hack. ex T. Durand & Schinz) Morrone & Zuloaga (*Brachiaria arrecta* (Hack. ex T. Durand & Schinz) Stent; *Brachiaria latifolia* Stapf; *Brachiaria radicans* Napper; *Panicum arrectum* Hack. ex T. Durand & Schinz)

Kenya, Uganda, South Africa. Perennial, stoloniferous or tufted, prostrate, geniculate culms, rooting at the lower nodes, flat ribbon-like rachis, lower glume nerved, does not tolerate drought, cultivated fodder, animal food, forage, pasture, economic plant, introduced and naturalized elsewhere in tropics, grows on swampy and seasonally flooded grasslands, on wet soils, vleis, in shallow water, river floodplains, see *Conspectus Florae Africae* 5: 741. 1894 and *Bothalia* 1: 263. 1924, *Kirkia* 3: 125. 1963, *Darwiniana* 31(1-4): 69. 1992.

in English: Tanner grass, Tanner

in Spanish: taner, gola

in southern Africa: phetola (Sotho)

in Brazil: capim marmelada

U. brachyura (Hackel) Stapf (*Eriochloa brachyura* (Hack. ex Schinz) Stapf; *Panicum brachyurum* Hack.; *Panicum brachyurum* Hack. ex Schinz; *Urochloa brachyura* (Hack. ex Schinz) Stapf; *Urochloa geniculata* C.E. Hubb.; *Urochloa novemnervia* C.E. Hubb.) (from the Greek *brachys* “short” and *oura* “a tail”)

Southern tropical and South Africa. Annual, tufted to loosely tufted, coarse, erect or ascending, geniculate or prostrate, leaf blades broadly linear, inflorescence of 2-10 ascending racemes, spikelets narrowly ovate, lower glume lanceolate 5-nerved, upper lemma shortly mucronate, palatable, readily eaten by livestock, used in rehabilitation projects, found in cultivated land, dry soil, riverbeds, roadsides, weedy places, often confused with *Urochloa panicoides* and *Urochloa trichopus*, see *Verhandlungen des Botanischen Vereins für die Provinz Brandenburg und die angrenzenden Länder* 30: 142. 1888 and *Flora of Tropical Africa* 9: 592. 1920, *Bulletin of Miscellaneous Information Kew* 1933: 499-500. 1933, *Cytologia* 19: 97-103. 1954.

in English: urochloa, signal grass

in South Africa: urochloa

U. brizantha (Hochst. ex A. Rich.) R.D. Webster (*Brachiaria brizantha* (Hochst. ex A. Rich.) Stapf; *Brachiaria brizantha* var. *angustifolia* Stent & Rattray; *Brachiaria decumbens* Stapf; *Panicum brizanthum* Hochst.; *Panicum brizanthum* Hochst. ex A. Rich.; *Panicum brizanthum* var. *lasiochloa* Chiov.; *Panicum brizanthum* var. *latifolium* Oliv.; *Panicum brizanthum* var. *pandanifolium* Peter; *Panicum brizanthum* var. *polystachyum* De Wild. & T. Durand; *Urochloa decumbens* (Stapf) R.D. Webster)

Tropical and southern Africa. Perennial, leafy, very variable in habit, rhizomatous or stoloniferous, densely or loosely tufted, sword-forming, many stems, stout erect culms or sometimes geniculately ascending, leaf sheath rounded and hairy, ligule a ring of short white hairs, narrow and linear leaves, racemes 1-rowed, overlapping and rounded spikelets with long purplish hairs, glumes separated by a short internode, lower glume clasping, upper lemma granulose, very palatable, valuable pasture grass, forage, native pasture species, cultivated fodder, utilized as cultivated pasture in many countries, good nutritional value, naturalized and introduced into most tropical countries, propagated by seed, economic and useful plant, withstands moderate drought, can endure heavy grazing, useful for erosion control, binds loose soils, will not tolerate flooding, toxic, severe photosensitization in sheep, the seed can be used for grain, in Zimbabwe seeds are sun-dried, winnowed, ground into flour and cooked into a thick porridge, grows in sandy soil, undisturbed veld, undisturbed areas, in grassland and open woodlands, on disturbed soils, along roadsides, next to streams and under trees, alluvial soil, see *Flora* 24(Intell. 1): 19. 1841, *Tentamen Florae Abyssinicae ...* 2: 363. 1850, *Transactions of the Linnean Society of London* 29: 170. 1875 and

U. brizantha (Hochst. ex A. Rich.) R.D. Webster var. *ciliata* (Basappa & Muniy.) Ashalatha & V.J. Nair (*Brachiaria brizantha* var. *ciliata* Basappa & Muniy.)

India. See *Proceedings of the Indian Academy of Sciences* 49(4): 379. 1983, *The Australian Paniceae (Poaceae)* 233. 1987, *Bulletin of the Botanical Survey of India* 35(1-4): 29. 1993 [1997].

U. ciliatissima (Buckley) R.D. Webster (*Brachiaria ciliatissima* (Buckl.) Chase; *Panicum ciliatissimum* Buckley)

U.S. Spreading, rhizomatous, found in open areas, see *A Preliminary Report on the Geological and Agricultural Survey of Texas* App. 4. 1866 and *United States Department of Agriculture: Bulletin* 772: 221. 1920, *Contr. U.S. Nat. Herb.* 22: 38. 1920, *Systematic Botany* 13(4): 606. 1988.

in English: fringed signal grass

U. decidua Morrone & Zuloaga

South America, Brazil. Sandy areas, see *Novon* 6(3): 315, f. 3-5A-C. 1996.

U. decumbens (Stapf) R.D. Webster (*Brachiaria decumbens* Stapf; *Urochloa brizantha* (Hochst. ex A. Rich.) R.D. Webster)

Uganda, Tanzania, Kenya. Perennial, herbaceous, trailing, strongly stoloniferous, ligule a row of cilia or hairs, sheath more or less glabrous, spikelets hairy to distinctly glabrous, lower glume asymmetric and glabrous, lower lemma male or sterile, palea sometimes absent, a weed, economic plant, animal food, highly palatable to stock, readily grazed, forage, withstands drought but not waterlogging, valuable grass for erosion control, withstands heavy grazing, naturalized elsewhere in tropics and subtropics, reported to cause scouring if eaten continually for a long time, fairly

high-yielding, suitable for humid areas, well drained sandy soils, on poor and rocky soils, savannahs, wet tropics, see *Tentamen Florae Abyssinicae* ... 2: 363. 1850 and *Flora of Tropical Africa* 9: 528. 1919, *Ciencia e Cultura (São Paulo)* 29: 1032-1034. 1977, *The Australian Paniceae (Poaceae)* 233-234. 1987, *Canad. Tropical and southern Africa, Arabia, India. Perennial to annual, weak, erect or geniculate, ascending, solitary or branched, loosely tufted, sometimes with roots at the lower nodes, leaf blade usually expanded and pointed, leaf sheaths rounded, basal sheaths often hairy, ligule a ring of short hairs, leaves linear lacking pseudopetioles, relatively straight inflorescence, panicle open and rigid, racemes often compound, spikelets shortly pedicellate glabrous to pubescent with a stipe, spikelets usually in pairs but sometimes solitary, upper lemma rugose, anthers yellow-orange, stigmas red, minor cereal, pioneer and palatable grass, human food, grain crop species, little value as forage, weedy, drought resistant, native pasture species, growing in moist places, in moist loamy sand, on red sand, shady places or open areas, open woodland, rocky outcrops, open places in forest, in open bushveld, on sandy to sandy loam soils, in gravel, in shady sites and black soils, in disturbed areas, along roadsides, burned and cleared areas, gardens, see *Species Plantarum* 1: 55. 1753, *Essai d'une Nouvelle Agrostographie* 52, 53, t. 11, f. 1. 1812, *De Graminibus Paniceis* 51, 125, 266. 1826, *Beskrivelse af Guineiske planter* 63-64. 1827, *Kongel. in English: birdseed grass, browntop millet, browntop panicum

in Mexico: ahan toom, k'an-chim, piojillo, piojillo granadilla, tactla-sacat

U. fasciculata (Sw.) R.D. Webster var. *reticulata* (Torrey) R.D. Webster (*Brachiaria fasciculata* (Sw.) Parodi var. *reticulata* (Torrey) Vickery; *Brachiaria fasciculata* var. *reticulata* (Torr.) Beetle; *Panicum reticulatum* Torr.)

Central America, subtropical areas, Mexico. Annual, tufted, decumbent, sheath hairy, leaves hairy, ligule densely ciliate, racemes numerous with spikelets crowded and glabrous, spikelets solitary or paired or in triplets, lower floret sterile, fertile floret abaxial and minutely apiculate, sometimes grown for its grain, a pasture weed, a weed of sorghum crops, see *Exploration of the Red River of Louisiana* 299. 1853 and *Contributions from the New South Wales National Herbarium* 4(5): 250. 1972, *Phytologia* 52(1): 13. 1982.

U. foliosa (R. Br.) R.D. Webster (*Brachiaria foliosa* (R. Br.) Hughes; *Panicum foliosum* R. Br.; *Paspalum foliosum* (R. Br.) K. Schum. & Hollrung)

Australia, Queensland. Perennial, not stoloniferous, decumbent, knotted rootstock, sheath hairy, ligule a row of cilia,

spikelets solitary or paired, spikelets pubescent and with a short stipitate base, lower floret sterile, lower glume adaxial, upper glume stipitate, lower lemma with a palea, fertile floret striate and not mucronate, good soil, woodland, see *Prodromus Florae Novae Hollandiae* 191. 1810, *Die Flora von Kaiser Wilhelms Land* 21. 1889 and *Bulletin of Miscellaneous Information Kew* 1923(9): 315. 1923, *The Australian Paniceae (Poaceae)* 236. 1987.

in English: leafy panic

Herbarium* 12: 138. 1908, *Journal of the Arnold Arboretum* 20: 309. 1939, *Darwiniana* 15: 96. 1969, *Proceedings of the Royal Society of Queensland* 81: 4. 1969, *Contributions from the New South Wales National Herbarium* 4(5): 250. 1972, *Phytologia* 52(1): 13. 1982, *The Australian Paniceae (Poaceae)* 235. 1987, *Novon* 11(3): 368. 2001.

in English: browntop signal grass, field grass, browntop urochloa

in Spanish: milha, miilha roxa, surbana

in Ecuador: opcagar

in Mexico: k'an-chim, tactla-sacat

U. gilesii Hughes (*Brachiaria gilesii* (Benth.) Chase; *Panicum gilesii* Benth.; *Urochloa gilesii* (Benth.) Hughes) (after the English-born (Bristol) Australian inland explorer William Ernest Powell Giles, 1835-1897 (d. Coolgardie, W. Australia), plant collector, botanist, knight of the Order of the Crown of Italy, honorary member of the Royal Italian Geographic Society, fellow of the Royal Geographical Society of London, in 1872 and 1873 to northern South Australia and Central Australia, in 1875 from Beltana via the Gawler Ranges to Ooldea and west across the Great Victoria Desert to Perth, among his writings are *Australia Twice Traversed ... from 1872 to 1876*. London 1889, *The Journal of a Forgotten Expedition*. Adelaide 1880 and *Geographic Travels in Central Australia from 1872 to 1874*. Melbourne 1875; *Gilesia biniflora* F. Muell. was collected by Christopher Giles (fl. 1870s), his brother. See R. Ericksen, *Ernest Giles, Explorer and Traveller. 1835-1897*. Melbourne 1978; J. Lanjouw & F.A. Stafleu, *Index Herbariorum*. Part II (2), *Collectors E-H*. Regnum Vegetabile vol. 9. 1957; F.J.H. von Mueller, *Fragmenta Phytographiae Australiae*. 9: 41. 1875; F. von Mueller, "Plants collected by Mr. Giles during his geographic exploration of central Australia in 1872, 1873 and 1874." in E. Giles, *Geographic Travels in Central Australia from 1872 to 1874*. 209-223. Melbourne 1875; F. von Mueller, "List of the plants obtained during Mr. C. Giles travels in Australia in 1875 and 1876." *J. Bot., Lond.* 15: 269-281, 300-306 and 344-349. 1877; Hugh R. Mill, *The Record of the Royal Geographical Society 1830-1930*. London 1930; Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 279. 1994)

Australia, New South Wales, Queensland, South Australia, Northern Territory. Annual, low growing, loosely tufted, stiff, broadly lanceolate and hairy leaves, nodes woolly, spikelets hairy, spikelets sessile in 2 rows on a trigonous rachis, lower glume partially concealed by a ring of hairs on the callus, upper glume pubescent to glabrous, upper lemma awned or mucronate, fertile floret aristate, useful

grass, on disturbed ground, suspected of poisoning, see *Flora Australiensis: A Description ...* 7: 477. 1878 and *Contributions from the United States National Herbarium* 22(1): 35. 1920, *Bulletin of Miscellaneous Information Kew* 1923(9): 319. 1923, *Hooker's Icones Plantarum* 4: pl. 3363, p. 1. 1938, *The Australian Paniceae (Poaceae)* 238. 1987.

in English: hairy-edged arm grass

U. glumaris (Trin.) Veldkamp (*Brachiaria ambigua* (Trin.) A. Camus; *Brachiaria paspaloides* (Presl) C.E. Hubb.; *Panicum ambiguum* Trin.; *Panicum glumare* Trin.; *Panicum paspaloides* Pers.; *Panicum urochloa* Steud.; *Urochloa ambigua* (Trin.) Pilg.; *Urochloa glabra* Brongn.; *Urochloa paspaloides* J. Presl)

Tropical Asia, the Philippines. Short-lived perennial, decumbent, slender, suberect, rooting at the lower nodes, leaves pubescent, sheath apex hairy, inflorescence rachis pubescent, spikelets apiculate and ovate, increases flow of milk, good fodder grass relished by cattle, hay, suitable for turfs, growing in waste ground, low coastal forest, disturbed places, see *Syn. Pl.* 1: 81. 1805, *De Graminibus Paniceis* 143. 1826, *Reliquiae Haenkeanae* 1(4-5): 318. 1830, *Voyage Autour du Monde* 121. 1832, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Editio secunda* 2: 264. 1841 and *Flore Générale de l'Indo-Chine* 7: 433. 1922, *Hooker's Icones Plantarum* 4: t. 3363. 1938, *Die natürlichen Pflanzenfamilien, Zweite Auflage* 14e: 35. 1940, *Blumea* 41(2): 420. 1996.

U. humidicola (Rendle) Morrone & Zuloaga (*Brachiaria dictyoneura* (Fig. & De Not.) Stapf; *Brachiaria dictyoneura* subsp. *humidicola* (Rendle) Cat. Guerra; *Brachiaria humidicola* (Rendle) Schweick.; *Brachiaria rautanenii* (Hack.) Stapf; *Panicum dictyoneurum* Fig. & De Not.; *Panicum humidicolum* Rendle; *Panicum rautanenii* Hack.; *Urochloa dictyoneura* (Fig. & De Not.) Veldkamp) (named for the Finnish Evangelical Lutheran missionary Rev. Martti Rautanen, 1845-1926, from 1880 in Namibia, Olukonda, Ovamboland, he translated the Bible in the Ndonga language; see Walther, K., "Afrikanische Pflanzen in Hamburg, Hamburger Botaniker in Afrika." *Mitt. Geogr. Ges. Hamburg* 56: 87-103. 1965)

Eastern and southeast Africa, Ethiopia, Kenya, Tanzania, South Africa, Namibia, Sudan. Perennial, procumbent, creeping, intensely and strongly stoloniferous, dense growth and slow spread, lanceolate leaf blades, racemes spaced, hairy spikelets light green, rachis narrow, lower glume purple or purple-brown, forage, produces good yields of herbage, palatable when young, withstands heavy grazing, economic plant, naturalized elsewhere in tropics, very effective for erosion control, ground cover, forms a dense mat layer, good drought and flooding tolerance, occurs in

relatively moist areas and situations, open areas, pasture, abandoned fields, woodlands, vlei edges, seasonally swampy grassland, sandy soils, along roadsides, riverbanks, see *Memorie della Reale Accademia delle Scienze di Torino, ser. 2* 14: 329, t. 8. 1854, *Catalogue of the African Plants Collected by Dr. F. Welwitsch in 1853-61* 2(1): 169. 1899 and *Bulletin de l'Herbier Boissier, sér. 2, 2*: 935. 1902, *Flora of Tropical Africa* 9: 512-513. 1919, *Bulletin of Miscellaneous Information Kew* 1936(5): 297. 1936, *Darwiniana* 30(1-4): 87-94. 1990, *Darwiniana* 31(1-4): 80. 1992, *Blumea* 41(2): 418. 1996, *Fontqueria* 55(4): 16. 2001.

in English: creeping signal grass, koronivia grass, Coronivia grass, creeping false paspalum

in southern Africa: kruipsinjaalgras, soetkruipgras; phetola (Sotho)

U. lata (Schumach.) C.E. Hubb. (*Brachiaria lata* (Schumach.) C.E. Hubb.; *Brachiaria lata* var. *lata* (Schumach.) C.E. Hubb.; *Panicum latum* Schumach.)

U. mosambicensis (Hackel) Dandy (*Brachiaria stolonifera* Gooss.; *Echinochloa notabilis* (Hook.f.) Rhind; *Panicum mosambicense* Hack.; *Panicum notabile* Hook.f.; *Urochloa pullulans* Stapf, nom. illeg.; *Urochloa pullulans* var.

mosambicensis (Hack.) Stapf; *Urochloa rhodesiensis* Stent; *Urochloa stolonifera* (Gooss.) Chippind.)

Tropical East Africa, South Africa. Perennial, often short-lived, variable, more or less erect, semidecumbent, very leafy, often branching, coarse, smooth, shortly stoloniferous, either densely tufted or creeping, vigorous, sometimes rooting at the lower nodes, sheath more or less hairy or glabrous, ligule membranous with ciliate margins, leaves with straight margins, nodes prominent densely silky, racemes simple and semidigitately arranged around the central axis, spikelets solitary or paired borne on the lower side of the rachis, lower glume with stiff hairs, lower lemma male and mucronate or shortly awned, fertile floret ridged, large seeds, economic plant, cultivated pasture, forage, weed and fodder, grazing of good nutritive value even when dry, palatable, grazed heavily by wild animals, grains and tillers eaten by baboons, seeds boiled and eaten in times of famine, grows quickly, heavy seed production, drought resistant, poor frost tolerance, it does not tolerate soils subject to flooding or badly drained sites, useful for erosion control and revegetation, naturalized in tropics, grows in disturbed places, along roadsides, wooded grassland, overgrazed trampled veld, sandy soil and red sandy soil, coarse sand, in open grassland, in sheltered disturbed places, red clay soil and disturbed red clay soils, deciduous bushland, hard red clay soil, brown clay loam, in fertile sand-loam soil and waste ground, stolons and broad leaves protect the soil effectively against rain, wind and sun, closely related to *Urochloa oligotricha* (Fig. & De Not.) Henrard and *Urochloa stolonifera* (Goossens) Chippend., see *Boletim da Sociedade Broteriana* 6: 140. 1888, *The Flora of British India* 7: 32. 1896 and *Flora of Tropical Africa* 9: 590, 592. 1920, *Journal of Botany, British and Foreign* 69(2): 54. 1931, *Proceedings and Transactions of the Rhodesia Scientific Association* 32: 26. 1933, *The Grasses of Burma* 50. Morrone & Zuloaga; *Urochloa mutica* (Forssk.) R.D. Webster ex Zon) (Latin *muticus, a, um* “blunt”)

Pantropical. Perennial and stoloniferous, straggling, scandent, emergent, semiaquatic or aquatic, coarse sprawling stems, robust, stout and very vigorous, simple or narrowly branched, ascending from prostrate or long decumbent base, rooting at the lower nodes, flowering culms erect, leaf nodes swollen and with dense shaggy hairs, sheaths loose and overlapping, hairy leaves and sheaths, ligule a fringed ciliate rim, several lateral racemes on a common axis, glabrous spikelets purplish green and elliptic, winged rachis, pedicels solitary or paired with discoid tips, lower florets usually male, fertile floret subacute, glumes dissimilar, upper lemma obtuse and mucronate, a poor seed producer, seeds rarely viable, economic plant introduced into most tropical countries and widely cultivated, usually nontoxic, one of the best of tropical grasses for pasture, forage grass, often used as green chopped forage, not suitable for silage, used as fodder grass and for water treatment, stems and leaves very palatable, troublesome weed in cultivation, it may become a pest, forms dense monotypic stands, floating layers of vegetation, a pest of irrigation ditches and ponds, troublesome weed of sugar cane crops, useful for erosion control, useful for stream bank and stream erosion control, it does not withstand heavy grazing, tolerant of drought and of brackish water, grows well only in poorly drained soils in high-rainfall areas or on seasonally wetland, along irrigation ditches and ponds, marshes, disturbed sites, abandoned orchards, wet areas and wet pastures, wet grasslands, wet fields and ditches, alluvial soils, in both running water and temporary waterholes, in standing and running water, in swamps and shallow streams, on deep loamy soils overlying saline clays, swampy places and stream banks, see

Tropical East Africa, Ethiopia, South Africa. Perennial, tufted to densely tufted, culms sometimes bulbous at the base or somewhat thickened or knotty, unbranched, shortly rhizomatous with creeping rhizomes, leaf blades expanded, basal sheaths silky tomentose to densely hairy and rounded or somewhat flattened, old leaf sheaths fibrous, ligule a fringe of short of hairs, inflorescence a composite raceme, racemes spreading and unilateral, spikelets lanceolate acuminate and crowded, lower glume 5-nerved, upper lemma mucronate, natural pasture, good for soil conservation, valuable and very palatable grazing grass, readily eaten by livestock, high drought tolerance, shade-tolerant, not persistent under grazing, grows in open grassland and in bush, loamy soils, in bushveld and in disturbed places, low-rainfall tropics, on rocky clay soils, sandveld, road reserves and old cultivated lands, alkaline soils, uncultivated lands, open woodland, along roadsides, red soils, in damp places, similar to *Urochloa panicoides* and *Urochloa trichopus*, see *Memorie della Reale Accademia delle Scienze di Torino, ser. 2* 14: 333. 1854, *Synopsis Plantarum Glumacearum* 1: 100. 1854, *Beitrag zur Flora Aethiopiens ...* 306. 1867, *Bulletin de l'Herbier Boissier* 2(App. 2): 17. 1894 and *Annuario del Reale Istituto Botanico di Roma* 8: 35. 1903, *Proceedings of the Rhodesia Scientific Association* 7(2): 69. 1908, *Flora of Tropical Africa* 9: 593. 1920, *Blumea* 3(3): 436. 1940, *Blumea* 4(3): 502. 1941, *Cytologia* 55: 431-435. 1990.

in English: dubi grass, perennial signal grass, gonya grass
in southern Africa: meerjarige beesgras, ausdauerndes fettweidegras

Pantropical. Annual or perennial, prostrate, sprawling, trailing, spreading, tufted, base long creeping, stoloniferous, usually decumbent and rooting at the nodes, ascending branches, leaves lanceolate, inflorescence pyramidal, racemes divergent to spreading, paired spikelets ovate to elliptic without a stipe, lower glume clasping and hyaline, upper lemma rugose, pantropical weed species, economic plant, a good fodder for stock animals, useful for erosion control, common in and along roadbed, along the edges of fields, open areas, gravel, damp soils, black soils, hard dry soils, cultivated and irrigated lands, on sandy flat, on sandy riverbanks, see *Systema Naturae, Editio Decima* 2: 870-871. 1759, *Observationes Botanicae* 4: 16. 1786, *Tableau Encyclopédique et Méthodique ... Botanique* 1: 155, 171. 1791, *Flora Indiae Occidentalis* 1: 146. 1797, *Syn. in English: creeping panic grass, running grass, creeping panic

in Spanish: San Juan de Castillo

in India: chaurila, choti semai, ewaikoo sawa, lahan lona, lapti, motha lona, nagrel, sarpur, shiput

in the Philippines Islands: babaka-nalabaka, marakuayan

U. rudis Stapf (*Panicum holtzii* Peter; *Urochloa gorinii* Chiov.) (named for Pompeo Gorini, see Emilio Chiovenda, 1871-1941, *Contributo alla conoscenza della Flora Somalia Transjubense*. Piante raccolte dal Dr. Pompeo Gorini nel 1925. Firenze, 1926; Frans A. Stafleu & E.A. Mennega, *Taxonomic literature. Supplement IV*. 104-110. 1997)

Tanzania, Kenya. Annual, creeping, rooting from the lower nodes, pubescent to tomentose leaves linear to lanceolate, single spikelets cuspidate and warty, lower glume truncate, upper glume spiny tuberculate, lower lemma tuberculate, palea of lower floret coriaceous, grasslands, limestones, stabilized dunes, fixed dunes, shrublands, see *Repertorium*

Specierum Novarum Regni Vegetabilis 40: 173. 1830 and *Flora of Tropical Africa* 9: 597. 1920, *Agricoltura Coloniale* 20: 107. 1926.

U. ruziziensis (R. Germ. & Evrard) Crins (*Brachiaria ruziziensis* R. Germ. & C.M. Evrard; *Urochloa ruziziensis* (R. Germ. & Evrard) Morrone & Zuloaga, nom. illeg., non *Urochloa ruziziensis* (R. Germ. & Evrard) Crins) (Ruzizi plains in Zaire)

Africa. Perennial, spreading, shortly rhizomatous, light-green broad hairy leaves and flowers, dense and spike-like green racemes, spikelets sessile and hairy, rachis of the racemes winged, lower glume distant from the rest of the spikelet, black grains, forage, very palatable, animal food, forms a dense mat under grazing, naturalized and widely distributed elsewhere in tropics, useful for erosion control, a pioneer species, spreads well from rhizomes, economic plant, good drought tolerance, does not tolerate flooding, withstands grazing well, cultivated in the humid tropics for pasture, needs good drainage and well-drained fertile soils, killed by heavy frosts, very common in swampy pastures, see *Bulletin du Jardin Botanique de l'État* 23: 373, f. 36, 37. 1953, *Journal of the Arnold Arboretum, Supplementary Series* 1: 269. 1991, *Darwiniana* 31(1-4): 101. 1992.

Ashalatha & V.J. Nair)

Southeast Asia, China, India, Japan, Sri Lanka, tropical and temperate Asia, Malaysia, Western Australia, Queensland, South Australia, New South Wales, Northern Territory. Annual or perennial, vigorous, glabrous, ascending, creeping, usually decumbent or semierect, slender, prostrate base, distally erect, sometimes rooting freely at the lower nodes, spreads well by stolons, mat-forming, flat leaves linear to lanceolate, ligule a row of short cilia, few racemes on a common axis, rachis of inflorescence glabrous, spikelets solitary on a winged axis, spikelets arranged in 2 rows, spikelets glabrous with a short stipe-like base, fertile floret very shortly stipitate, lower lemma without a membranous palea, animal food, quite good hay, economic plant, highly palatable, forage and good fodder plant, troublesome weed widely naturalized in tropics, often used as a lawn grass, aggressive stolon system, see also *Brachiaria distachya* (L.) Stapf, grows on sandy soils, cultivation, on disturbed soils and sites, roadsides, waste places, lawns, watering points, see *Mantissa Plantarum* 2: 183-184. 1771, *De Graminibus Paniceis* 145. 1826, *Reliquiae Haenkeanae* 1(4-5): 300. 1830, *Fragmentos de Algunas Plantas Filipinas* 43. 1851 and *Contributions from the United States National Herbarium* 22(1): 35. 1920, *Lingnan Science Journal* 7: 214. 1929

in English: green summer grass, Thurston grass, tropical signal grass, cori grass, two-finger grass, two-spiked panic, four-arm grass, brachiaria, alexandergrass

in Spanish: gramita

in Japan: niku-kibi (= fleshy *Panicum miliaceum*)

U. texana (Buckley) R.D. Webster (*Brachiaria texana* (Buckley) S.T. Blake; *Panicum texanum* Buckley; *Panicum texanum* Vasey, nom. illeg., non *Panicum texanum* Buckley)

Northern America, Texas, Florida, U.S., Mexico. Annual or perennial, erect or ascending, clump forming, youngest leaf rolled, leaves hairy or softly pubescent, leaf sheath hairy, ligule densely ciliate, auricle absent, racemes with spikelets crowded on the branches and pilose, spikelets contracted in a short stipe-like base, pedicel apices with a ring of hairs, upper glume apiculate, lower lemma male and apiculate, fertile floret shortly stipitate, noxious weed of cultivation, invasive, economic plant, used as game-bird feed and hay, native pasture species, naturalized, fodder, good forage, grows in fields and waste places, prairies, on deep moist soils, along streams, open lands, on plains and rivers, see *A Preliminary Report on the Geological and Agricultural Survey of Texas* Appendix 3. 1866 and *The Australian Paniceae (Poaceae)* 253. 1987.

in English: buffalo grass, Texas millet, Texas panicum, Texas signal grass, Colorado grass

in Mexico: panizo tejano, panizo texano

U. trichopus (Hochst.) Stapf (*Eriochloa trichopus* (Hochst.) Benth.; *Eriochloa trichopus* var. *glabrata* Schweinf.; *Helopus trichopus* (Hochst.) Steud.; *Panicum papillosum* Fenzl ex Steud.; *Panicum trichopodon* A. Rich.; *Panicum trichopus* Hochst.; *Panicum trichopus* var. *chiovendae* Mattei; *Urochloa brachyphylla* Gilli; *Urochloa engleri* Pilger)

Eastern tropical Africa, Zimbabwe, Tanzania, Kenya, Mozambique, Nigeria, Sudan, South Africa, Arabia. Annual, herbaceous, spreading, coarse, tufted, erect to ascending, stoloniferous sod grass, leaves hispid and linear, racemes solitary arranged along an axis, single ovate spikelets, 3-nerved lower glume oblong acute, lower lemma often fringed or villous, upper lemma mucronate and papillose, a weed of cultivation and irrigation, leaves and grains eaten by baboons, good fodder for stock, forage, grain considered good famine food, found in wooded grassland and open

deciduous woodland, along roadsides, bushland, fields, sub-desert regions, along lakeshore and riverbanks, alluvial plains, cultivated lands, sandy soil, floodplains, stabilized dunes, in gravel, silty clays, similar to *Urochloa mosambicensis*, see *Flora* 27: 254. 1844, *Tentamen Florae Abyssinicae ...* 2: 369. 1850, *Synopsis Plantarum Glumacearum* 1: 100. 1854, *Journal of the Linnean Society, Botany* 19: 39. 1881, *Bulletin de l'Herbier Boissier, sér. 2*, 2(Append. 2): 17. 1894 and *Bollettino r. Scholz)

Tropical Africa, South Africa. Perennial or annual, tufted, decumbent and branching at the lower nodes, leaves velvety, spikelets arranged in 2 rows, lower glume 3-nerved, grains eaten by humans, good fodder, grazed by game, young leaves and grains eaten by baboons, a weed of sorghum, useful for erosion control, often on red clay soils, near water, red sandy soils, sandy loam, in overgrazed and disturbed sites, farmed lands, among trees, waste places, see *Verhandlungen des Botanischen Vereins für die Provinz Brandenburg und die angrenzenden Länder* 30: 141. 1888 and *Flora of Tropical Africa* 9: 541. 1919, *Bulletin du Muséum National d'Histoire Naturelle, séries 4, Section B, Adansonia. Botanique Phytochimie* 11(4): 443. 1989 [1990].

in West Africa: jaje ba

Urochondra C.E. Hubb.

Greek *oura* "a tail" and *chondros* "wheat, grain of wheat, big, a grain," referring to the nature of the spikelets.

One species, northeast tropical Africa, Sudan, Somalia, Sind, northwestern India, coastal regions of Indian Ocean. Chloridoideae, Eragrostideae, perennial, herbaceous, rigid, unbranched, unarmed, tufted, tussocky, shortly rhizomatous, auricles absent, ligule a fringe of hairs, sheaths persistent, leaves rigid and pungent, plants bisexual, inflorescence contracted and spike-like, panicle cylindrical exerted from the uppermost sheath, 1 floret, spikelets strongly laterally compressed and keeled, 2 narrow glumes more or less equal and awnless, membranous lemma 1-nerved, glumes and lemmas keeled and ciliate on the keels, palea 2-nerved, lodicules absent, 3 stamens, ovary hairy, 2 stigmas, glossy grain thickened and beaked, open habitats, saline or alkaline soils, coastal sand, sandy plains, sandy seashores, closely related to *Crypsis*, type *Urochondra setulosa* (Trin.) C.E. Hubb., see *Familles des Plantes* 2: 495. 1763, *Hortus Kewensis; or, a Catalogue ...* 1: 48. 1789, *Collectanea* 233. 1809, *Prodromus Florae Novae Hollandiae* 169. 1810 and *Hooker's Icones Plantarum* 35: t. 3457. 1947, *Flora of Ethiopia and Eritrea*, vol. 7: 157. 1995.

Species

U. setulosa (Trin.) C.E. Hubb. (*Crypsis dura* Boiss.; *Crypsis setulosa* (Trin.) Mez; *Heleochloa dura* (Boiss.) Boiss.; *Heleochloa setulosa* (Trin.) Blatt. & McCann; *Sporobolus setulosus* (Trin.) A. Terracc.; *Vilfa setulosa* Trin.)

Northeastern Africa, India. Perennial, densely tufted, stiffly erect, shortly rhizomatous, lower sheaths coriaceous, ligule a line of hairs, pungent leaves inrolled to convolute, spikelets oblong and flattened, glumes linear scabrid acuminate, lemma shortly mucronate, beaked grain, open areas, salt marsh, coastal sand dunes, saline soils, see *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 6,4(1-2): 55. 1840, *Diagnoses plantarum orientalium novarum, ser. 2, 3(4)*: 125. 1859, *Flora Orientalis* 5: 477. 1884, *Annuario del Reale Istituto Botanico di Roma* 5: 95. 1893 and *Repertorium Specierum Novarum Regni Vegetabilis* 17(19-30): 292. 1921, *Scientific Monograph [Imperial Council of Agricultural Research]* 5: 205. 1935, M. in Somalia: afrus, agrugh, afrug, afrugh

V

Vacoparis Spangler

Andropogoneae, pedicellate spikelet reduced to linear glumes, weeds and poisons, pollen for bees, fodder and grain for stock, food for humans, formerly known as *Sorghum*, see *Methodus Plantas Horti Botanici ...* 207. 1794 and *Cytologia* 55: 141-151. 1990, M. Lazarides, J. Lenz & L. Watson, “*Clausospicula*, a new Australian genus of grasses (Poaceae, Andropogoneae).” *Australian Systematic Botany* 4(2): 391-405. 1991, *Australian Systematic Botany* 4: 591-635. 1991 [Taxonomy, cytology and ecology of indigenous Australian sorghums (*Sorghum* Moench: Andropogoneae: Poaceae)], Russell E. Spangler, “Taxonomy of *Sarga*, *Sorghum* and *Vacoparis* (Poaceae: Andropogoneae).” *Australian Systematic Botany* 16(3): 279-299. 2003, *Annals of Botany* 95: 219-227. 2005, *Flora of Australia* vol. 43, Poaceae 1: 170, 238, 239, 241, 248, 274. 2002.

Species

V. laxiflorum (F.M. Bailey) Spangler (*Sorghum laxiflorum* F.M. Bailey)

Australia. See *Rep. Exped. Bellenden* 70. 1889.

V. macrospermum (E.D. Garber) Spangler (*Sorghum macrospermum* E.D. Garber)

Australia. Annual, food plant for Aborigines, see *University of California Publications in Botany* 23(6): 323. 1950.

Vahlodea Fries = *Aira* L., *Deschampsia* P. Beauv., *Erioblastus* Honda ex Nakai

For the Danish botanist Jens Laurentius (Lorenz) Moestue Vahl (1796-1854), plant collector, traveler, librarian, son of Martin Vahl (1749-1804); see Paul Gaimard, *Voyages de la Commission Scientifique du Nord, en Scandinavie, en Laponie, au Spitzberg et aux Ferøe, pendant les années 1838, 1839 et 1840, sur la Corvette La Recherche*, commandée par M. Fabvre ... Géographie physique, Géographie botanique, Botanique et Physiologie, etc. Paris [1842-1848]; J.H. Barnhart, *Biographical notes upon botanists*. 3: 419. 1965; Stafleu and Cowan, *Taxonomic literature*. 6: 628. Utrecht 1986; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 1993; C.F.A. Christensen, *Den danske Botaniks Historie med tilhørende Bibliografi*. Copenhagen 1924-1926; A.

Lasègue, *Musée botanique de Benjamin Delessert*. Paris 1845.

About 3-4 species, northeast Asia. Pooideae, Poodae, Aveneae, or Pooideae, Poeae, Airinae, perennial, herbaceous, rhizomatous or caespitose, internodes hollow, auricles absent, flat leaf blades, ligule membranous and blunt, leaves linear, plants bisexual, open inflorescence paniculate, spikelets pedicellate, 2-3 florets, 2 glumes more or less equal, lemmas with jagged point, awn twisted and stout, palea present, 2 lodicules free and membranous, 3 stamens, ovary glabrous, 2 stigmas, grows in moist meadows, high altitudes, subalpine forests, closely related to *Deschampsia*, type *Vahlodea atropurpurea* (Wahlenb.) Fr. ex Hartm., see *Species Plantarum* 1: 63-66. 1753, *Essai d'une Nouvelle Agrostographie* 91, 149, 160. 1812, *Botaniska Notiser* 1842: 141, 178. 1842, *Handbok i Skandinavien Flora, Fjerde Upplagan* 30. 1843, *A Manual of the Botany of the Northern United States*. Valiha S. Dransfield

Valiha, a tube zither, is a traditional musical instrument also known as: Volo, Valeha, Valiha-volo, Baliha, Manibola, Betorky, Marovany.

Two species, Madagascar. Bambusoideae, woody bamboos, culms usually hollow, petiolate leaf blades, culms used for the construction of walls and roofs, also used for making a traditional musical instrument, found in primary forest, open hills, type *Valiha diffusa* S. Dransf., see S. Dransfield, "Valiha and *Cathariostachys*, two new bamboo genera (Gramineae-Bambusoideae) from Madagascar." *Kew Bulletin* 53(2): 375-397. 1998.

Species

V. diffusa S. Dransf.

Madagascar. Split on one side and flattened then woven into large panels, see *Kew Bulletin* 53(2): 381-388, f. 3-4. 1998.

V. perrieri (A. Camus) S. Dransf. (*Ochlandra perrieri* A. Camus)

Madagascar. See *Bulletin de la Société Botanique de France* 82: 310. 1935, *Kew Bulletin* 53(2): 388. 1998.

Valota Adans. = *Digitaria* Haller, *Valota* Dumort. (Amaryllidaceae), *Vallota* R.A. Salisbury ex Herbert (Amaryllidaceae)

Panicoideae, Paniceae, Digitariinae, type *Valota insularis* (L.) Chase, see *Familles des Plantes* 2: 495. 1763, *Historia Stirpium Indigenarum Helvetiae Inchoata* 2: 244. 1768, *Flora Carniolica, Editio Secunda* 1: 52. 1771, William Herbert (1778-1847), *An Appendix* 29. London 1821 ["An Appendix to the Botanical Magazine and the Botanical Register."], *Analyse des Familles de Plantes* 58. 1829 and *Contributions from the United States National Herbarium* 46: 193-213, 634. 2003.

Vaseya Thurber = *Muhlenbergia* Schreb.

For the American (b. England, Scarborough, Yorks) botanist George Vasey, 1822-1893 (d. Washington, U.S.), agrostologist, physician, in 1868 and 1869 explorer with J.W. Powell

in Colorado, curator of the United States National Herbarium, botanised in the Rockies, editor of *The American Entomologist and Botanist*, with J.W. Chickering, E. Foreman, Wm.H. Seaman and L.F. Ward wrote *Flora Columbiana*. Washington 1876, his works include *The Grasses of the United States*. Washington 1883, *Grasses of the South*. Washington 1887, *Grasses of the Southwest*. Washington 1890-1891 and *Grasses of the Pacific Slope*. Washington 1892-1893, father of George Richard Vasey; see J.H. Barnhart, *Biographical notes upon botanists*. 3: 427. 1965; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. Philadelphia 1964; S. Lenley et al., *Catalog of the manuscript and archival collections and index to the correspondence of John Torrey*. Library of the New York Botanical Garden. 1973; Ethelyn Maria Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Plainfield, N.J. 1983; Charles Edward Hubbard, 1900-1980, "Vasey-grass in Africa (*Paspalum larranagai* Arech.)" *Kew Bull.* 94-96. 1926.

Chloridoideae, Cynodonteae, Muhlenbergiinae, type *Vaseya comata* Thurb., see *Genera Plantarum* 44. 1789, *Systema Naturae ... editio decima tertia, aucta, reformata* 2: 171. 1791, *Proceedings of the Academy of Natural Sciences of Philadelphia* 15: 79. 1863, *Journal of the Linnean Society, Botany* 19: 83. 1881 and *Contributions from the United States National Herbarium* 41: 143-173, 235. 2001.

Vaseyochloa A.S. Hitchc.

After the American botanist George Vasey, 1822-1893, agrostologist, physician, author of *The Grasses of the United States*. Washington 1883, *Grasses of the South*. Washington 1887, *Grasses of the Southwest*. Washington 1890-1891, *Grasses of the Pacific Slope*. Washington 1892-1893 and *Monograph of the Grasses of the United States and British America*. Washington 1892; see Joseph Ewan,

Rocky Mountain Naturalists. The University of Denver Press 1950.

One species, North America, U.S., Texas. Chloridoideae, Cynodonteae, Gouiniinae, perennial, erect, caespitose, rhizomatous, creeping, leaves cauline, auricles absent, ligule a line of hairs or a ciliate membrane, plants bisexual, inflorescence a panicle exserted, open racemes, spikelets narrowly ovate, 6-11 florets per spikelet, florets with shortly bearded callus, hairy pronounced rachilla, two very unequal glumes 3- to 9- nerved, second glume awnless, lemma entire and chartaceous, palea keels narrowly winged, 2 free and fleshy lodicules, 3 stamens, ovary glabrous, 2 stigmas, persistent and prominent style bases hornlike, open habitats, along rivers and streams, riverbanks, sandy places, dunes, coastal sand dunes, related to *Coelachyrum*, type *Vaseyochloa multinervosa* (Vasey) Hitchc., see *Prodromus Florae Novae Hollandiae* 182. 1810, *Journal de Physique, de Chimie, d'Histoire Naturelle et des Arts* 89: 104. 1819, *The Botanical Gazette* 16(8): 235-236. 1891 and *Proceedings of the Biological Society of Washington* 41: 157-164. 1928, *Journal of the Washington Academy of Sciences* 23(10): 449-456. 1933, *The Grasses of Texas*. 1975, *Contributions from the United States National Herbarium* 41: 235. 2001.

Species

V. multinervosa (Vasey) Hitchc. (*Distichlis multinervosa* (Vasey) Piper; *Melica multinervosa* Vasey; *Triodia multinervosa* (Vasey) Hitchc.)

U.S. Perennial, lemma 7- to 9-nerved, see *Proceedings of the Biological Society of Washington* 18: 147. 1905, *Proceedings of the Biological Society of Washington* 41: 159. 1928.

in English: Texas grass

Ventenata G.L. Koeler = *Gaudinopsis* (Boiss.) Eig, *Heteranthus* Borkh., *Heterochaeta* Besser ex Schult. & Schult.f., *Malya* Opiz, *Pilgerochloa* Eig

For the French botanist Étienne Pierre Ventenat, 1757-1808, clergyman, librarian, brother of Louis Ventenat (1765-1794), his writings include *Monographie du genre Tilleul*. Paris 1802, *Choix de plantes*. Paris 1803 [-1808] and *Jardin de la Malmaison*. Paris 1803-1804 [-1805]; see G. Cuvier, *Éloge historique de M. Ventenat*. Paris 1809; Mariella Azzarello Di Misa, a cura di, *Il Fondo Antico della Biblioteca dell'Orto Botanico di Palermo*. 281. Regione Siciliana, Palermo 1988; Yves Laissus, in *D.S.B.* 3: 172-173. 1981; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. Philadelphia 1964; Antoine Lasègue, *Musée botanique de M. Benjamin Delessert*. 1845; J.H. Barnhart, *Biographical notes upon botanists*. 3: 430. 1965; Emil Bretschneider, *History of European Botanical*

Discoveries in China. Leipzig 1981; Jonas C. Dryander, *Catalogus bibliothecae historico-naturalis Josephi Banks*. London 1796-1800; Ethelyn Maria Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993.

About 5 species, southern Europe, western Asia, Iran. Pooideae, Poeae, Agrostidinae, or Pooideae, Poodae, Aveneae, annual, herbaceous, ascending to erect, auricles absent, ligule membranous, plants bisexual, open or dense inflorescence panicle-like, 2-7 florets, lowest floret persistent, spikelets compressed, 2 herbaceous glumes more or less equal to unequal, lemmas coriaceous rounded bisexual, lemma of uppermost florets awned from back, awn bent, palea present, 2 free lodicules, 3 stamens, ovary glabrous, 2 stigmas, open habitats, disturbed sites, dry places, related to *Trisetaria*, type *Ventenata avenacea* Koeler, nom. illeg. superfl. for *Avena dubia* Leers, see *Species Plantarum* 1: 79-81. 1753, *Descriptio Graminum in Gallia et Germania* 272. 1802, *Flora Orientalis* 5: 540. 1884 and *Repertorium Specierum Novarum Regni Vegetabilis* 26: 71, 74. 1929, *Notes from the Royal Botanic Garden, Edinburgh* 40(1): 81, 85. 1982, *Conspectus Florae Orientalis* 6: 93. 1991, *Contributions from the United States National Herbarium* 48: 384, 432, 688. 2003.

Species

V. blanchei Boiss. (*Pilgerochloa blanchei* (Boiss.) Eig)

Syria. Lemmas dorsally awned, see *Flora Orientalis* 5: 539. 1884.

V. dubia (Leers) Coss. (*Avena dubia* Leers; *Avena tenuis* Moench; *Gaudinia tenuis* (Moench) Trin.; *Ventenata avenacea* Koel.; *Ventenata dubia* (Leers) Coss. & Dur.; *Ventenata dubia* Coss. & Dur.)

Europe. Annual, erect, tufted, open inflorescence paniculate, branches of the panicle spreading to drooping, spikelets stalked, 2-3 florets, lowest florets generally staminate, lemmas with bent and twisted awns, upper florets bisexual, weed species, aggressive invader, spreads by seed dispersal, low palatability or unpalatable, pasture, disturbed areas, alongside roads, in fields, similar to *Bromus tectorum* L., see *Flora Herbornensis* 41. 1775, *Methodus Plantas Horti Botanici ...* 195. 1794, *Essai d'une Nouvelle Agrostographie* 95, 164. 1812, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 4,2(1): 21. 1836, *Exploration Scientifique de l'Algérie* 2: 104. 1855, *Annales des Sciences Naturelles; Botanique, série 4* 4: 252. 1856 and *Acta Botanica Academiae Scientiarum Hungaricae* 17(1-2): 120. 1971[1972].

in English: North Africa grass, hairgrass, soft-bearded oat grass, ventenata grass, wiregrass

V. eigiana (H. Scholz & Raus) M. Dogan

Turkey. Rare grass.

V. macra (M. Bieb.) Boiss. (*Avena macra* M. Bieb.; *Avena macra* Steven ex M. Bieb.; *Gaudiniopsis macra* (M. Bieb.) Eig; *Gaudinopsis macra* (Steven ex M. Bieb.) Eig)

Europe. See *Flora Taurico-Caucasica* 1: 77. 1808, *Flora Orientalis* 5: 540. 1884.

Verinea Merino = *Melica* L., *Verinea* Pomel
(Liliaceae)

Pooideae, Meliceae, type *Verinea pterostachys* Merino, see *Species Plantarum* 1: 66-67. 1753, *Observations sur les Graminées de la Flore Belgique* 109. 1823 [1824], A. Pomel, *Matériaux pour la flore atlantique*, Oran 1860, *Anales de la Sociedad Española de Historia Natural* 28(Mem.): 8-9. 1899 and *Bull. U.S.D.A.* 772: 69. 1920, *Lagascalia* 12: 286-290. 1984, *Candollea* 41: 431-439. 1986, *Berichte des Geobotanischen Instituts der Eidg. Techn. Hochschule Stiftung Rübel* 57: 182-192. 1991, *Taxon* 41: 566. 1992, *Flora Mediterranea* 1: 229-236. 1991, *Flora Mediterranea* 5: 340-345. 1995, *Taxon* 44: 611-612. 1995, *Taxon* 49(2): 252. 2000, *Contributions from the United States National Herbarium* 48: 432-450, 688. 2003.

Veseyochloa J.B. Phipps = *Tristachya* Nees

For the British entomologist Leslie Desmond Edward Foster Vesey-Fitzgerald, c. 1910-1974 (d. Nairobi, Kenya), ecologist, conservationist, plant collector, see "Central African Grasslands." *J. Ecol.* 243-274. 1963.

Panicoideae, Panicodae, Arundinelleae, type *Veseyochloa viridearistata* J.B. Phipps, see *Flora Brasiliensis seu Enumeratio Plantarum* 2: 458. 1829 and *N. Amer. Flora* 17(8): 578. 1939, *Kirkia* 4: 106-107, t. 10, f. 3 [f. 1]. 1964, *Kirkia* 5: 235-258. 1966, *Kew Bulletin* 21(2): 119-124. 1967, *Kew Bulletin* 26(1): 111-123. 1971, *Flora Mesoamericana* 6: 378. 1994, *Contributions from the United States National Herbarium* 46: 627-628. 2003.

Vetiveria Bory = *Anatherum* P. Beauv.,
Chrysopogon Trin., *Lenormandia* Steud.,
Mandelorna Steud.

From Malayalam and Tamil names of the plant *Vetiveria zizanioides* (L.) Nash, in Malayalam *veti* "cut" and *ver* "root," referring to the method of propagation or to the aromatic roots; see M.P. Nayar, *Meaning of Indian Flowering Plant Names*. 360. Dehra Dun 1985; Helmut Genaust, *Etymologisches Wörterbuch der botanischen Pflanzenna-*

men. 682. 1996; Arthur D. Chapman, editor, *Australian Plant Name Index*. 2958-2959. [Lemaire ex Cassini] Canberra 1991.

About 10 species, Old World tropics, Africa, Asia, Australia. Panicoideae, Andropogonodae, Andropogoneae, Andropogoninae or Panicoideae, Andropogoneae, Sorghinae, perennial, aromatic, herbaceous, unbranched, coarse, culms flimsy to robust, tufted, large clumps, stout and short rhizomes, foliage mostly basal, auricles absent, lower sheaths compressed, ligule a fringe of hairs, long narrow leaves, plants bisexual, inflorescence a narrow and branched panicle, racemes pedunculated and elongate, spikelets acute and 2-flowered, spikelets paired and each pair subsimilar but differing in sex, sessile spikelet with the lower floret sterile and upper floret bisexual, bisexual and spiny spikelets, 2 glumes subequal and dissimilar, lower glume spinulose or spiny, pedicellate spikelet dorsally compressed, palea present or absent, 2 lodicules free and fleshy, 3 stamens, ovary glabrous, 2 stigmas, erosion control, versatile uses, hedging, medicinal plant, essential oils from scented roots, the shoots more or less aromatic or not at all, common to rainforest, floodplains, on streams and riverbanks, sometimes in *Chrysopogon*, type *Vetiveria odoratissima* Bory, see *Species Plantarum* 2: 1045, 1047. 1753, *Flora Cochinchinensis* 538, 552. 1790, *Essai d'une Nouvelle Agrostographie* 128, 150, t. 22, f. 11. 1812, *Pl. Pugill.* 2: 10. 1815, *Fundamenta Agrostographiae* 187-188. 1820, *Bull. Sci. Soc. Philom. Paris* 1822: 43. 1822, *Flora* 33: 229. 1850, *Synopsis Plantarum Glumacearum* 1: 359. 1854 [1855], *Die Natürlichen Pflanzenfamilien* 2(2): 28. 1887 and *American Midland Naturalist* 4: 212. 1915, *Grasses of Burma ...* 258-259. 1960, *Bulletin de l'Institut Française d'Afrique Noire* 22: 106. 1960, *Boissiera. 2003, Elizabeth A. Kellogg and Jeffrey L. Bennetzen, "The evolution of nuclear genome structure in seed plants." *Am. J. Bot.* 91: 1709-1725. 2004, *Ecological Management and Restoration* 5(3): 191-198. Dec 2004.

Species

V. arguta (Steud.) C.E. Hubbard (*Andropogon argutus* Nees ex Steud.; *Chrysopogon argutus* (Nees ex Steud.) Trin. ex B.D. Jacks.; *Vetiveria arguta* (Nees ex Steud.) C.E. Hubb.)

Mauritius, Rodrigues. Perennial, rare species, vulnerable, caespitose, erect, glabrous, tussock forming, leaf blades linear and acute, leaf sheath glabrous, ligule a minute hairy rim, panicle oblong and contracted, sessile and pedicelled spikelets, awned, used for thatching and handicraft, useful for erosion control, savannah, open areas, rocky places, see *Synopsis Plantarum Glumacearum* 1: 391. 1854, *Index Kewensis* 1: 124, 530. 1893 and *Bulletin of Miscellaneous Information Kew* 1939: 654. 1940

in Rodrigues Island: vetiver

V. filipes (Benth.) C.E. Hubb. (*Andropogon elongatus* var. *filipes* Hack.; *Chrysopogon elongatus* var. *filipes* Benth.; *Chrysopogon filipes* (Benth.) Reeder)

Southeast Asia, Australia, Queensland, Northern Territory, New South Wales. Perennial, sheath keeled, racemes slender, spikelets paired, pedicellate spikelet sterile and purple, 1-7 spikelet groups, pungent and hairy callus, readily eaten by stock, floodplains, on streams and riverbanks, see *Flora Australiensis: A Description ...* 7: 539. 1878 and *Bulletin of Miscellaneous Information Kew* 1934: 444. 1934, *Journal of the Arnold Arboretum* 29(4): 360-361. 1948, *Acta Botanica Neerlandica* 2: 386. 1953.

in English: Australian vetiver

V. fulvibarbis (Trin.) Stapf (*Anatherum fulvibarbe* (Trin.) Keng; *Andropogon fulvibarbis* Trin.; *Chrysopogon fulvibarbis* (Trin.) Veldkamp; *Rhaphis zizanioides* subvar. *fulvibarbis* (Trin.) Roberty)

Tropical Africa, Senegal. Perennial, robust, aromatic roots, grazed by cattle when young, growing on floodplains, see *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 2(3): 287. 1832 and *Flora of Tropical Africa* 9: 159. 1917, *Sinensia* 10: 314, 338. 1939, *Petite Flore de l'Ouest-Africain* 403-404. 1954, *Austrobaileya* 5(3): 525. 1999.

in Mali: gongo dili

in Nigeria: cawkitiningel, isirko

in Senegal: kongo dili, kongo dlili

V. lawsonii (Hook.f.) Blatt. & McCann (*Andropogon lawsonii* Hook.f.; *Chrysopogon lawsonii* (Hook.f.) Roberty; *Chrysopogon lawsonii* (Hook.f.) Veldkamp)

Asia, India. Growing in moist ground, wet places, moist lawn, see *The Flora of British India* 7(21): 187. 1896 and

Journal of the Bombay Natural History Society 32: 409. 1928, *Boissiera*. 9: 260. 1960, *Austrobaileya* 5(3): 515. 1999.

in India: kaare hullu, mani hullu, thoddu kaare hullu

V. nigriflora (Benth.) Stapf (*Andropogon nigriflorus* Benth.; *Andropogon squarrosus* var. *chrysopogonoides* Hack.; *Andropogon squarrosus* var. *nigriflorus* (Benth.) Hack.; *Chrysopogon nigriflorus* (Benth.) Veldkamp; *Rhaphis zizanioides* (L.) Roberty; *Rhaphis zizanioides* var. *nigriflorus* (Benth.) Roberty; *Vetiveria zizanioides* var. *nigriflora* (Benth.) A. Camus)

Tropical Africa, Asia. Perennial, tufted, clumped, robust, fibrous roots, dark purple glumes, thatching roof, roots eaten by local people, roots into powder and used to heal wounds and reduce swelling, ornamental, in Mali and Senegal used as a water purifier and an antiseptic, used for matting, erosion control and sand binding, low to medium grazing value, grows in seasonally flooded plains, swampy floodplains, temporarily swampy areas, wet places, stream-sides, fresh water, see *Niger Flora* 573. 1849, *Monographiae Phanerogamarum* 6: 544. 1889 and *Flora of Tropical Africa* 9: 157. 1917, *Bulletin du Muséum National d'Histoire Naturelle* 25: 674. 1919, *Boissiera*. 9: 291. 1960, *Bulletin de l'Institut Française d'Afrique Noire* 22: 106. Jan 1960, *Austrobaileya* 5(3): 526. 1999.

in English: black vetivergrass

in Ghana: kulikarili, sansan

in Guinea: andenyi, andey

in Guinea-Bissau: cudoendo

in Mali: babin, davyi, dayi, dimipallol, diri, ghana, gongo dili, kamaré, khamaré, kieli, ngokoba, ngongon

in Niger: bawu, dhyéma, diirina, diri, djéma, dyri-nya, geema, gémaré, khayia

in Nigeria: aganya, codorde, darambuwa, jamali, jema, kambu, ngongonari, sekko, sodornde, somayo, zemako

in Senegal: bangasa, cepp, foutoula, gandenyi, kamaré, khamaré, ngokoba, saban, seban, sep, sin, sintché, sinti, sodhordé, tcham tarlé, tiep, tul

in Sierra Leone: anwona roban, anwonaroban, barewali, pindi

in Upper Volta: ciidi, ciidol, codorde, kulkaderé, nyen, rudum, sidiho, sidiire, sodorko, tchiidol

V. zizanioides (L.) Nash (*Agrostis verticillata* Lam., nom. illeg., non *Agrostis verticillata* Vill.; *Anatherum muricatum* (Retz.) P. Beauv.; *Anatherum squarrosus* (L.f.) P. Griseb.; *Vetiveria odorata* Virey; *Vetiveria odoratissima* Bory)

India, Thailand, Sri Lanka, Asia tropical. Perennial, stout, wiry, coarse, robust and upright, culms glabrous and unbranched, terete, solid, densely clumped, deep-rooted, foliage densely clustered at the base, very dense extensive fibrous root system, leaf sheaths laterally compressed, ligule a scarious rim, leaves linear and scentless, stout-branched spongy rhizomes, inflorescence lanceolate with whorled branches, well-exserted and terminal panicle, spikelets paired and 2-flowered, sessile spikelet with barren lower floret and perfect upper floret, margins of lower glume very minutely spiny beneath, 2 lodicules, 3 stamens, pistil with glabrous ovary and 2 plumose stigmas, pedicelled spikelet with both florets staminate, fast-growing, essential oils from the fragrant roots used in perfumery and soaps and as a food flavouring, cultivated, valuable for long-term erosion control and soil binder, effective in slowing erosion and retaining moisture, stabilizing earthworks, hedging and support, older leaves too harsh for fodder, leaves grazed while still young, roots used for weaving mats and baskets, *pamaypay* (in the Philippines), cooling screens (*tatties*, in India), leaf juice used as anthelmintic, root teas for flu and fever, drought-resistant, can survive fire and grazing, stands very heavy grazing, tolerant of very poor soil conditions and trampling, growing on poorly drained lands, wet places, fresh-water swamps, swampy areas, plains, floodplains, lower hills, on stream banks, sloping drains, steep slopes, road shoulders, terraces, along roadsides, heavy soils, heavy clays, moist heavy soils, open areas, margins of lakes and streams, see *Mantissa Plantarum* 2: 183. 1771, *Supplementum Plantarum* 433. 1781 [1782], *Observationes Botanicae* 3: 43 [31]. 1783, *Encyclopédie Méthodique, Botanique* 1: 59. 1783, *Tableau Encyclopédique et Méthodique ... in Vietnam: hurong bai

Vietnamocalamus Nguyen

A bamboo from Vietnam.

A monotypic genus. See *Bot. Zhurn. (Moscow & Leningrad)* 76(6): 874. 1991.

Species

V. catbaensis Nguyen

Vietnam.

Vietnamochloa Veldkamp & Nowack

A grass from Vietnam.

One species, Vietnam. Chloridoideae, annual, caespitose, herbaceous, unbranched, leaf blades linear, ligule a fringe of hairs, leaves mainly basal, plants bisexual, inflorescence paniculate and nondigitate, spikelets solitary compressed dorsiventrally, 2 glumes more or less equal, palea present, 3 stamens, 2 stigmas, type *Vietnamochloa aurea* Veldkamp & Nowack, see *Bulletin du Muséum National d'Histoire Naturelle, Miscellanea* 16(2-4): 214-215, f. 1-2. 1994 [1995].

Species

V. aurea Veldkamp & Nowack

Vietnam.

Vietnamosasa T.Q. Nguyen = *Aimeea* Rifat

From Vietnam plus *Sasa*.

About 3 species, Southeast Asia, Vietnam, Thailand, Cambodia, Laos. Bambusoideae, Bambusodae, Bambuseae, Racemobambosinae, perennial, sympodial, woody, unarmed, persistent, cylindrical, branched, rhizomatous, leafy, rhizomes leptomorph, auricles present, leaves linear-lanceolate, plants bisexual, narrow inflorescence, groups of spikelets in the axil of a glume-like bract, lowest florets bisexual, upper florets male, glumes present or absent and number of glumes variable, palea present, lodicules present, 6 stamens, 3 stigmas, dry grasslands, dry *Dipterocarpus* forests, lowland, hill forest, type *Vietnamosasa darlacensis* Nguyen, see *Bot. Zhurn. (Moscow & Leningrad)* 75(2): 221-225. 1990, *Kew Bulletin* 47(4): 707-711. 1992.

Species

V. ciliata (A. Camus) Nguyen (*Aimeea ciliata* (A. Camus) Rifat; *Arundinaria ciliata* A. Camus; *Neomicrocalamus ciliatus* (A. Camus) Demoly; *Oreiostachys ciliata* (A. Camus) Nakai; *Racemobambos ciliata* (A. Camus) C.S. Chao & Renvoize)

Thailand. In forest, see *Verhandelingen der Koninklijke Nederlandsche Akademie van Wetenschappen. Afdeling Natuurkunde; Tweede Sectie* 10: 685. 1908, *Bulletin du Muséum National d'Histoire Naturelle* 25(2): 672. 1919, *Journal of Arnold Arboretum* 6(3): 152. 1925, *The Gardens' Bulletin Singapore* 15: 268. 1956, *Kew Bulletin* 44(2): 365. 1989.

in Thailand: chot, chote, phai dioud, phai djoud, yaa hua khaeng

V. darlacensis Nguyen

Vietnam. Mountain forest.

V. pusilla (A. Chev. & A. Camus) Nguyen (*Aimeea pusilla* (A. Chev. & A. Camus) Rifat; *Arundinaria pusilla* A. Chev. & A. Camus; *Chimonobambusa pusilla* (A. Chev. & A. Camus) Nakai; *Neomicrocalamus pusillus* (A. Chev. & A. Camus) Demoly)

Thailand, Vietnam. Perennial, erect, strong, branching at the nodes, shortly rhizomatous, terminal floret sterile, glumes variable, 6 stamens, young shoots green, leaves palatable, grazed by cattle and buffaloes, in dry regions, intolerant of waterlogging and heavy grazing, see *Bull. Mus. Nat. Hist. Paris* 27: 450. 1921, *Journal Arnold Arboretum* 6: 151. 1925.

in English: bamboo grass, pek grass

in Cambodia: rüssèi préich

in Laos: ph'ek

in the Philippines: utod

in Thailand: pek, phek, phet, ya phek, ya phet

in Vietnam: le, truc th'ao

Local names: phai phek, phai phet, phek, phet, sat nho

Viguiereella A. Camus

For the French botanist René Viguiere, 1880-1931, bryologist and specialist of Araliaceae, traveler, explorer, botanical collector in Madagascar, from 1919 to 1931 professor of botany at the University and director of the Municipal Botanical Garden at Caen, author of *Recherches sur le genre Grewia*. 1917 and *Sur les Araliacées du groupe des Polyscias*. 1905; see J.H. Barnhart, *Biographical notes upon botanists*. 3: 436. 1965; Ethelyn Maria Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933; Elmer Drew Merrill, in *Contr. U.S. Natl. Herb.* 30(1): 307. 1947 and in *Bernice P. Bishop Mus. Bull.* 144: 186. 1937.

One species, Madagascar. Chloridoideae, Eragrostideae, annual, tufted, slender, herbaceous, branched, auricles absent, ligule a fringe of hairs, plants bisexual, inflorescence a spicate raceme, a minute bract at the base of each spikelet, pungent pedicel, uppermost female-fertile floret, 2 glumes subequal, lower glume 2-nerved, upper glume 3-nerved, lemmas long awned, palea present, free lodicules, ovary glabrous, 2 stigmas, open places, dry sites, see *Bulletin Bi-Mensuel de la Société Linnéenne de Lyon* 5: 11. 1926.

Species

V. madagascariensis A. Camus

Madagascar. Spikelets subtended by a scale, fertile lemma 3- to 5-nerved.

Vilfa Adans. = *Agrostis* L.

Pooideae, Poaeae, Agrostidinae, type *Vilfa stolonifera* (L.) P. Beauv., see *Species Plantarum* 1: 61-63. 1753, *Familles des Plantes* 2: 495. 1763, *Essai d'une Nouvelle Agrostographie* 16, 148, 182. 1812, *Systema Vegetabilium* 2(2): 343. 1817, *Fundamenta Agrostographiae* 119, t. 7. 1820, *Neue Entdeckungen im ganzen Umfang der Pflanzenkunde* 2: 37, 58. 1821, *Chloris Melvilliana* 27. 1823, *Observations sur les Graminées de la Flore Belgique* 127, 128. 1823 [1824], *De Graminibus unifloris et sesquifloris* 159. Petropoli 1824 and *Fl. Fenn.* 5: 29, 65. 1971, *Taxon* 41: 556. 1992, *Taxon* 44: 611-612. 1995, *Contributions from the United States National Herbarium* 48: 42-89, 688-690. 2003.

Vilfagrostis Döll = *Eragrostis* Wolf

The genera *Vilfa* and *Agrostis*, Greek *agrostis*, *agrostidos* "grass, weed, couch grass."

Chloridoideae, Cynodonteae, or Chloridoideae, Eragrostideae, Eragrostidinae, see *Species Plantarum* 1: 61. 1753, *Genera Plantarum* 23. 1776, *Icones et Descriptiones Graminum Austriacorum* 4: 15. 1809, *Flora Brasiliensis* 2(3): 137. 1878 and *Acta Bot. Neerl.* 15: 157. 1966, *Contributions from the United States National Herbarium* 41: 81-115, 239. 2001.

Vossia Wallich & Griffith = *Vossia* Adans. (Aizoaceae)

For the German poet Johann Heinrich Voss, 1751-1826, remembered chiefly for his translations of Homer, or the Dutch Gerhard Johann Voss (Vossius) (1577-1649), Dutch Humanist theologian, one of the foremost scholars of the Dutch Republic's "Golden Age" and father of the distinguished classical scholar Isaac Vossius (1618-1689); see Frans A. Stafleu and Richard S. Cowan, *Taxonomic literature*. 6: 784. [genus named for the German poet J.G. Voss] 1986; W.P.U. Jackson, *Origins and Meanings of Names of South African Plant Genera*. 37. [genus named for the Belgian botanist L. Voss, 17th cent.] Rondebosch 1990.

One species, India and tropical Africa. Panicoideae, Andropogonodae, Andropogoneae, Rottboelliinae, perennial, rhizomatous, herbaceous, aquatic, spongy, stout, submerged and often with floating culms, the upper part of the culm upright, roots and rootlets from the submerged nodes, auricles absent, leaf sheaths loose and papery, ligule a fringed or pilose membrane, plants bisexual, inflorescence spicate and digitate, racemes stout and erect, spikelets paired in long-short combinations, shorter spikelets bisexual, longer spikelets bisexual or male, 2 florets, upper floret bisexual, lower floret male, 2 glumes more or less equal and dissimilar, lower glume coriaceous, upper lemma entire and awnless, palea present, 2 lodicules free and fleshy, 3 stamens, ovary glabrous, 2 plumose stigmas, invasive grass, a troublesome weed of canals and rivers, forming floating mats, found in open habitats, in water, rivers, river margins, lakes, swampy areas, a segregate from *Phacelurus*, type *Vossia procera* Wall. & Griff. (*Ischaemum cuspidatum* Roxb.), see *Species Plantarum* 2: 1049. 1753, *Familles des Plantes* 2: 243. 1763, *Journal of the Asiatic Society of Bengal* 5: 572. 1836 and *African Studies Monographs* 3: 109-130. 1983, *Genera Graminum* 363. 1986, *African Journal of Ecology* 37(4): 457-470. Dec 1999, *Conservation Biology* 17(2): 500-511. Apr 2003, *Journal of Fish Biology* 63(1): 120-128. July 2003, *Journal of Biogeography* 31(1): 5-18. Jan 2004, *Ecology of Freshwater Fish* 13(1): 37-45. Mar 2004, *African Journal of Ecology* 42(s1): 6-13, 108-113. Aug 2004.

Species

V. cuspidata (Roxb.) Griffith (*Ischaemum cuspidatum* Roxb.; *Vossia procera* Wall. & Griff.)

Tropical Africa, India. Perennial, aquatic, herbaceous, robust, submerged or sometimes floating, stout, erect, rhizomatous, flowering culms leafy, spongy stems, rooting at submerged nodes, trailing, racemes solitary or not, lower glume of sessile spikelets long caudate, leaf sheaths sometimes with irritant hairs, noxious weed, used for matting and thatching, pasture, grazed by cattle and buffaloes, good fodder when young, food for elephants and hippopotamus, pith eaten by chimpanzees, common in rivers, streams, canals, floodplains, lakes and lakeshores, riverbanks, swamps, see *Hortus Bengalensis, or a Catalogue ...* 81. 1814, *Flora Indica; or Descriptions ...* 1: 325. 1820, William Griffith (1810-1845), *Notulae ad Plantas Asiaticas* 12. Calcutta 1851 and *Bulletin de la Société Botanique de France* 108: 5. 1961.

in English: hippo-grass, floating grass

in Mali: temboro

in Nigeria: barugu, burugu, damba, daura, falfoli, lambami, lingurehu, lonyo, milla, tattakya, tsamba

in Senegal: hay

in South Africa: um-soof reed

in Tanzania: luvoya

in Upper Volta: barugu, burgu, burugu

Vulpia C.C. Gmelin = *Chloammia* Raf.,
Ctenopsis De Not., *Dasiola* Raf.,
Distomomischus Dulac, *Festucaria* Link,
Loretia Duval-Jouve, *Mygalurus* Link,
Narduretia Villar, *Nardurus* (Bluff, Nees &
Schauer) Rchb., *Prospheysis* Dulac, *Zerna*
Panzer

According to Helmut Genaust (see *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 691. 1996) the genus was named after the German chemist Johann Samuel Vulpius, 1760-1840 (or 1846), pharmacist and amateur botanist of Baden, Germany; or from the Latin *vulpes*, is "a fox," indicating the appearance of the plants.

About 20-28 species, temperate and subtropical regions of northern hemisphere. Pooideae, Poodae, Poeae, or Pooideae, Poeae, Loliinae, annual or rarely perennial, very variable, short-lived, glabrous, unbranched, tufted or solitary, slender, herbaceous, erect or decumbent, auricles absent, smooth sheath terete or rounded, ligule an unfringed membrane, leaves short and flat, plants bisexual, usually cleistogamous sometimes chasmogamous, inflorescence a linear and 1-sided panicle, 2 or more florets, spikelets solitary and compressed laterally, florets perfect and stipitate, reduced floret at apex, vestigial foliar structure subtending the inflorescence absent or present, 2 glumes very unequal and acute, lemmas terminating in a slender straight awn,

palea notched and awnless, 2 lodicules free and membranous, 1-3 stamens, ovary glabrous or sometimes minutely hairy at apex, 2 stigmas, these species are not important as livestock forage, damage to livestock skins and pelts, highly invasive and aggressive pasture weed species, a weed among pastures and cereal crops across temperate Australia, produces extremely large numbers of small seeds, seeds are sensitive to light, commonly these species occur in mesic to xeric habitats, grows in dry places, dry open places, open habitats, sandy countries, coastal sand, rainforest, the weedy annual species once included in *Festuca* L., hybrids with *Festuca*, type *Vulpia myuros* (L.) C.C. Gmelin, see *Species Plantarum* 1: 73. 1753, *Species Plantarum. Editio quarta* 1(1): 419. 1797, *Flora Badensis Alsatica* 1: 8. 1805, *Enumeratio Plantarum Horti Regii Berolinensis Altera* 1: 92. 1821, *Neogenyton* 4. 1825, *Genera Plantarum* 101. 1836, *Compendium Florae Germaniae. in Ecuador: pajilla

V. ciliata Dumort. (*Festuca ciliata* Danthoine ex DC., non Gouan; *Festuca ciliata* Danthoine ex Lam. & DC., nom. illeg., non *Festuca ciliata* Gouan; *Festuca ciliata* Danthoine; *Festuca ciliata* Danthoine ex DC., non Gouan var. *ciliata*; *Festuca danthonii* Asch. & Graebn.; *Festuca exigua* Litw.; *Vulpia ciliata* Link)

Europe, Mediterranean. Annual or perennial, slender, densely or loosely tufted, purple-red, auricles absent, ligule membranous and truncate, leaves setaceous and filiform, green or purple raceme or panicle 1-sided, cleistogamous spikelets in the leaf sheath, spikelets with 1 or 2 female florets, lemma with a rounded callus and margins with cilia, male lemmas tapering to an awn, anthers yellow, fruit laterally compressed and furrowed, grows in disturbed montane areas, ballast, in open habitats, in dry and often sandy habitats, see *Icones et descriptiones graminum austriacorum...* 4: t. 65. Vindobonae [Wien] 1801-1809, *Observations sur les Graminées de la Flore Belgique* 100. 1824, *Hortus Regius Botanicus Berolinensis* 1: 147. 1827 and *Synopsis der mitteleuropäischen Flora* 2: 551. 1901, *Anales del Instituto Botánico A. J. Cavanilles* 22: 87. 1964, *Annali di Botanica* 45: 75-102. 1987, *Fl. Libya* 145: 31. 1988, *International Organization of Plant Biosystematists Newsletter* 13: 16. 1989, A.R. Watkinson, K.K. Newsham and L. Forrester, "*Vulpia ciliata* Dumort. ssp. *ambigua* (Le Gall)

Stace & Auquier (*Vulpia ambigua* (Le Gall) More, *Festuca ambigua* Le Gall)." *Journal of Ecology* 86(4): 690-705. Aug 1998, Andrew R. Watkinson, Robert P. Freckleton and Lisa Forrester, "Population dynamics of *Vulpia ciliata*: regional, patch and local dynamics." *Journal of Ecology* 88(6): 1012-1029. Dec 2000.

in English: feather vulpia, fringed fescue

V. ciliata Dumort. subsp. **ambigua** (Le Gall) Stace & Auquier (*Festuca ambigua* Le Gall; *Vulpia ambigua* (Le Gall) More)

Europe. See Nicolas Joseph Marie Le Gall de Kerlinou (1787-1860), *Flore du Morbihan* 731. Vannes 1852 and *Botanical Journal of the Linnean Society* 76(4): 384. 1978.

V. ciliata Dumort. subsp. **ciliata** (*Festuca barbata* Gaudin, nom. illeg., non *Festuca barbata* Loefl. ex L.; *Festuca ciliata* Danthoine ex DC., non Gouan var. *imberbis* Vis.; *Festuca danthonii* Asch. & Graebn.; *Festuca danthonii* var. *danthonii*; *Festuca danthonii* var. *imberbis* (Vis.) Asch. & Graebn.; *Vulpia aetnensis* Tineo; *Vulpia danthonii* (Asch. & Graebn.) Volkart)

Europe. See *Hortus Regius Monspeliensis* 48, 547. 1762, *Flore Française* 3: 55. 1805, *Flora Helvetica* 1: 274. 1828, *Flora Dalmatica* 1: 75. 1842 and *Synopsis der mitteleuropäischen Flora* 2: 551. 1901, *Flora der Schweiz* 57. 1905.

V. elliottea (Raf.) Fernald (*Dasiola elliottea* Raf.; *Festuca monandra* Elliot; *Festuca quadriflora* Walter, nom. illeg., non *Festuca quadriflora* Honck.; *Festuca sciurea* Nutt.; *Vulpia quadriflora* Trin. ex Steud.; *Vulpia sciurea* (Nutt.) Her-rard)

Northern America, U.S. Annual, see *Vollständiges Systematisches Verzeichniss Aller Gewächse Deutschlands* 271. 1782, *Flora Caroliniana, secundum ...* 81. 1788, *A Sketch of the Botany of South-Carolina and Georgia* 1: 170. 1816, *Neogenyton* 4. 1825, *Transactions of the American Philosophical Society, new series*, 5: 147. 1837, *Nomenclator Botanicus. Editio secunda* 2: 780. 1841 and *Blumea* 2: 323. 1937, *Rhodora* 47(556): 106. 1945.

in English: squirrel tail fescue

V. fasciculata (Forssk.) Fritsch (*Bromus hordeiformis* Lam.; *Festuca fasciculata* Forssk.; *Festuca uniglumis* Sol.; *Festuca uniglumis* Aiton; *Festuca uniglumis* Aiton var. *uniglumis*; *Vulpia fasciculata* (Forssk.) Samp.; *Vulpia membranacea* auct., non (L.) Dumort.; *Vulpia membranacea* subsp. *fasciculata* (Forssk.) O. Bolòs, Masalles & Vigo; *Vulpia uniglumis* (Sol.) Dumort.; *Vulpia uniglumis* (Aiton) Dumort.)

Mediterranean, Europe. Annual, vigorous, coarse, unbranched, solitary or loosely tufted, erect or geniculate or decumbent, auricles absent, ligule membranous and erose, leaves setaceous, plants bisexual, inflorescence racemose or paniculate, usually chasmogamous spikelets, distal florets sterile, long-awned upper glume, female lemmas

awned, callus pointed, anthers yellow, fruit laterally compressed and longitudinally furrowed, cultivated, weed, the small seeds can cause injury to animals, the mature seed heads are dangerous for the lambs, grows on coastal sand dunes, gardens, open habitats, coastal grasslands, in disturbed areas, in sandy soils, weedy disturbed places, sandy shores, dry areas, this species often confused with *Vulpia membranacea* (L.) Dumort., see *Flora Aegyptiaco-Arabica* 22. 1775, *Hortus Kewensis; or, a catalogue* 108. 1789, *Tableau Encyclopédique et Méthodique ... Botanique* 1: 195. 1791, *Agrost. Belg.* 100. 1824 and *Excursionsfl. Oesterreich* edition 2, 74. 1909, Gonçalo António da Silva Ferreira Sampaio (1865-1937), *Lista das espécies representadas no Herbário português* ... Porto [1913], *Excursion-sflora für Österreich*, edition 3, 674. 1922, *Bull. Jard. Bot. Belg.* 47: 131. 1977, *Watsonia* 15: 38-39. 1984, *Collect. Bot.* 17(1): 96. 1987[1988].

in English: dune fescue

V. fontquerana Melderis & Stace

Europe, Spain. Vulnerable species, floret callus pubescent and pungent, see *Collectanea botanica: a Barcinonensi Botanico Instituto edita* 7: 782. Barcelona 1968, *Genetica* 46(2): 235-255. 1976.

V. geniculata (L.) Link (*Brachypodium geniculatum* K. Koch; *Bromus geniculatus* L.; *Bromus geniculatus* (K. Koch) Steud., nom. illeg., non *Bromus geniculatus* L.; *Festuca geniculata* (L.) Willd.; *Festuca geniculata* (L.) Cav.; *Festuca geniculata* (L.) Lag. & Rodr.; *Loretia geniculata* (L.) Duval-Jouve; *Loretia incrassata* (Lam.) Duval-Jouve; *Vulpia stipoides* (L.) Dumort.)

Algeria, Morocco, Europe. Annual, erect or decumbent at base, useful for erosion control, see *Mant. pl.* 1: 33. 1767, *Systema Naturae*, edition 12 2: 97. 1767, *Mantissa Plantarum* 557. 1771, *Anales de Ciencias Naturales* 6(16): 150. 1803, *Hortus Regius Botanicus Berolinensis* 1: 148. 1827, *Linnaea* 21(4): 422. 1848, *Synopsis Plantarum Glumacearum* 1: 318. 1854, *Revue des Sciences Naturelles sér.* 2 2: 36, 42. 1880, *Flore d'Alger et catalogue des plantes d'Algérie* ... 91. 1884, *Conspectus Florae Africae* 5: 915. 1894 and *Genetica* 46(2): 235-255. 1976, *Bot. J. Linn. Soc.* 91: 443. 1985, *Travaux de l'Institut Scientifique, Université Mohammed V. Série Botanique* 35: 1-168. 1988.

in French: vulpia géniculée

in Morocco: bousibouss, dil-el-far

V. ligustica (All.) Link (*Bromus ligusticus* All.; *Festuca ligustica* (All.) Bertol.; *Loretia ligustica* (All.) Duval-Jouve)

Algeria, Morocco, Europe, Turkey. Useful for erosion control, see *Flora Pedemontana* 2: 249. 1785, Antonio Bertoloni (1775-1869), *Amoenitates Italicae* 8. Bononiae 1819, *Hortus Regius Botanicus Berolinensis* 1: 148. 1827 and *Genetica* 46(2): 235-255. 1976.

V. megalura (Nutt.) Rydb. (*Festuca commutata* Steud., nom. illeg., non *Festuca commutata* Scheele; *Festuca megalura* Nutt.; *Vulpia myuros* f. *megalura* (Nutt.) Stace & Cotton; *Vulpia myuros* var. *hirsuta* Hack.; *Vulpia myuros* var. *megalura* (Nutt.) Auquier)

Mediterranean region. Annual, slender, erect, low-growing, leaves setaceous, panicle not bristled, lemmas with cilia, variable arrangement of the cilia, useful for erosion control and revegetation of disturbed areas, forage, found in arid areas, see *Flora Badensis Alsatica* 1: 8. 1805, *Journal of the Academy of Natural Sciences of Philadelphia* 1: 188. 1848, *Synopsis Plantarum Glumacearum* 1: 304. 1854, *Catalogue Raisonné des Graminées du Portugal* 24. 1880 and *Bulletin of the Torrey Botanical Club* 36: 538. 1909, *Madroño* 22: 229. 1974, *Watsonia* 11(1): 72. 1976, *Bulletin du Jardin Botanique National de Belgique* 47(1-2): 123. 1977.

in English: fox- tail fescue

in Mexico: pasto, tupiku, uisaku

V. membranacea (L.) Dumort. (*Eriocoma membranacea* (Pursh) Beal; *Festuca longiseta* Brot.; *Festuca membranacea* (L.) Druce, nom. illeg., non *Festuca membranacea* Kit.; *Festuca uniglumis* Aiton var. *longiseta* (Brot.) Asch.; *Oryzopsis membranacea* (Pursh) Vasey; *Stipa membranacea* L.; *Stipa membranacea* Pursh, nom. illeg., non *Stipa membranacea* L.; *Vulpia longiseta* (Brot.) Hack.; *Vulpia membranacea* (L.) Link; *Vulpia membranacea* auct.; *Vulpia membranacea* var. *longiseta* (Brot.) Maire & Weiller)

Algeria, Morocco, Europe. Useful for erosion control, see *Species Plantarum* 560. 1753, *Flora Aegyptiaco-Arabica* 22. 1775, *Flora Lusitanica* 1: 116. 1804, *Flora Americae Septentrionalis; or, ...* 2: 728. 1814, *Agrost. Belg.* 100. 1824 [or *Observ. Gramin. belg.* 100. 1824], *Catalogue Raisonné des Graminées de Portugal* 24. 1880, *U.S. Department of Agriculture. Division of Botany. Bulletin* 12(2): 10, t. 10. 1891, *Grasses of North America for Farmers and Students* 2: 232. 1896 and *Annals of Scottish Natural History* 229. 1906, *Bull. Jard. Bot. Belg.* 47: 131. 1977, *Annali di Botanica* 45: 75-102. 1987, *Collect. Bot.* 17(1): 96. 1987 [1988], *Boletim da Sociedade Broteriana, ser.* 2 63: 153-205. 1990.

V. microstachys (Nutt.) Munro (*Festuca arida* Elmer; *Festuca microstachys* Nutt.; *Festuca microstachys* var. *microstachys*; *Festuca microstachys* var. *subappressa* Suksd.; *Vulpia arida* (Elmer) Henr.; *Vulpia microstachys* (Nutt.) Benth.)

Northern America, U.S., Canada. Annual, erect or geniculate, spikelets often purplish, glumes glabrous, weedy, little forage value, relatively unpalatable, occurs on dry to moderately moist disturbed sites, see *Plantae Hartwegianae* (Plantas Hartwegianas imprimis Mexicanas adjunctis nonnullis Grahamianis enumerat novasque describit). 342. London 1839-1857, *Journal of the Academy of Natural Sciences of Philadelphia* 1: 187. 1848 and *Botanical Gazette* 36: 52.

1903, *Werdenda* 1(2): 2. 1923, *Blumea* 2: 323. 1937, *Madroño* 22: 225. 1974.

in English: small fescue, fescue

V. microstachys (Nutt.) Munro var. **ciliata** (Beal) Lonard & Gould (*Festuca eastwoodae* Piper; *Festuca grayi* (Abrams) Piper; *Festuca microstachys* subsp. *grayi* Abrams; *Festuca microstachys* var. *ciliata* A. Gray ex Beal; *Festuca microstachys* var. *ciliata* A. Gray; *Festuca pacifica* var. *ciliata* (A. Gray) Hoover; *Vulpia eastwoodiae* (Piper) Henr.; *Vulpia eastwoodae* (Piper) Henrard; *Vulpia grayi* (Piper) Henr.; *Vulpia grayi* (Abrams) Henrard; *Vulpia microstachys* var. *ciliata* Munro; *Vulpia microstachys* var. *ciliata* (A. Gray) Lonard & Gould) (named for the western American botanist Alice Eastwood, 1859-1953, curator of the Herbarium of the California Academy of Sciences 1894-1949, his works include *A Popular Flora of Denver, Colorado*. 1893, Report on a *Collection of Plants from San Juan County in Southeastern Utah*. San Francisco 1897, *Studies in the Herbarium and the Field*. San Francisco 1897 and 1898, *A Handbook of the Trees of California*. Washington 1942; Ella Dales Cantelow & Herbert Clair Cantelow, "Biographical notes on persons in whose honor Alice Eastwood named native plants." *Leaf. West. Bot.* 8(5): 83-101. 1957; Irving William Knobloch, compil., "A preliminary verified list of plant collectors in Mexico." *Phytologia Memoirs*. VI. 1983)

Northern America, U.S., California. Annual, glabrous, open inflorescence, glumes and lemma hairy, found on loose sandy soil, disturbed areas, hillsides, open habitats, forest openings, dry soil, bare soil, see *Journal of the Academy of Natural Sciences of Philadelphia* 1: 187. 1848, *Plantae Hartwegianae* (Plantas Hartwegianas imprimis Mexicanas ...). 342. 1839-1857, *Proceedings of the American Academy of Arts and Sciences* 8: 410. 1872, *Grasses of North America for Farmers and Students* 2: 585. 1896 and *Flora of Los Angeles and Vicinity* 52. 1904, *Contributions from the United States National Herbarium* 10(1): 12-13, 14-16, pl. 3. 1906, *Man. Grass. U.S.* 857. 1935, *Blumea* 2: 323. 1937, *Madroño* 22(5): 225, 227. 1974.

in English: Eastwood fescue

V. microstachys (Nutt.) Munro var. **confusa** (Piper) Lonard & Gould (*Festuca confusa* Piper; *Festuca suksdorfii* Piper ex Suksd.; *Festuca tracyi* Hitchc.; *Vulpia confusa* (Piper) Henr.; *Vulpia tracyi* (A.S. Hitchc.) Henr.) (for the California botanist Joseph Prince Tracy, 1879-1953, plant collector; see J.H. Barnhart, *Biographical notes upon botanists*. 3: 396. 1965)

Northern America, U.S. Annual, glumes hairy, lemma glabrous, grassy plains, dry hillsides, coastal-sage scrub, see *Plantae Hartwegianae* (Plantas Hartwegianas imprimis Mexicanas ...). 342. 1839-1857 and *Contributions from the United States National Herbarium* 10(1): 13, pl. 1. 1906, *Werdenda* 1(2): 2. 1923, *Illustrated Flora of the Pacific States* 1: 220, f. 514. 1923, *Blumea* 2: 323. 1937, *Madroño* 22(5): 226. 1974.

in English: Tracy's fescue, confusing fescue

V. microstachys (Nutt.) Munro var. **microstachys** (*Festuca arida* Elmer; *Festuca microstachys* Nutt.; *Festuca microstachys* var. *microstachys*; *Festuca microstachys* var. *subappressa* Suksd.; *Vulpia arida* (Elmer) Henr.)

Northern America, U.S. Annual, glumes glabrous, lemma hairy, occurs commonly in loose soil on open slopes, sandy soils, dry hillsides, open woodlands, along ditches and roadways, see *Plantae Hartwegianae* (Plantas Hartwegianas imprimis Mexicanas ...). 342. 1839-1857, *Journal of the Academy of Natural Sciences of Philadelphia* 1: 187. 1848 and *Botanical Gazette* 36: 52. 1903, *Werdenda* 1(2): 2. 1923, *Madroño* 22(5): 225. 1974.

in English: desert fescue, small fescue

V. microstachys (Nutt.) Munro var. **pauciflora** (Scribn. ex Beal) Lonard and Gould (*Festuca dives* Suksd., nom. illeg., non *Festuca dives* F. Muell.; *Festuca microstachys* Nutt. var. *pauciflora* Scribn. ex Beal; *Festuca microstachys* Nutt. var. *simulans* (Hoover) Hoover; *Festuca pacifica* Piper; *Festuca pacifica* var. *pacifica*; *Festuca pacifica* Piper var. *simulans* Hoover; *Festuca reflexa* Buckley; *Festuca subbiflora* Suksd.; *Vulpia microstachys* var. *pauciflora* (Beal) Lonard and Gould; *Vulpia pacifica* (Piper) Rydb.; *Vulpia reflexa* (Buckl.) Rydb.)

Northern America, U.S. Annual, weakly tufted, ligules with a rough to fringed margin, sheaths open, no auricles, hair-like leaf blades, open flower head, spikelets with 2-6 loosely overlapping flowers, spikelet axis visible, glumes unequal to nearly equal, glumes glabrous or scabrous, lemmas awned, lemma glabrous or scabrous, occurs on dry meadows and disturbed sites, roadsides, on sandy disturbed ground, dry fields, see *Plantae Hartwegianae* (Plantas Hartwegianas imprimis Mexicanas ...). 342. 1839-1857, *Journal of the Academy of Natural Sciences of Philadelphia* 1: 187. 1848, *Proc. Acad. Nat. Sci. Philadelphia* 14: 98. 1862, *Grasses of North America for Farmers and Students* 2: 586. 1896 and *Contributions from the United States National Herbarium* 10(1): 12-13. 1906, *Bulletin of the Torrey Botanical Club* 36: 538. 1909, *Werdenda* 1(2): 2-3. 1923, *Leaflets of Western Botany* 10(16): 338. 1966, *Madroño* 22(5): 226, 228. 1974.

in English: small fescue, Pacific fescue, few-flowered fescue, fescue

V. muralis (Kunth) Nees (*Festuca dertonensis* subvar. *broteri* Litard.; *Festuca dertonensis* var. *broteri* Asch. & Graebn.; *Festuca hybrida* Brot.; *Festuca muralis* Kunth; *Festuca myuros* var. *muralis* Kunth ex Speg.; *Vulpia broteri* Boiss. & Reuter; *Vulpia hybrida* (Brot.) Pau; *Vulpia myuros* (L.) C.C. Gmel. subsp. *myuros* var. *broteri* (Boiss. & Reut.) Pérez Lara; *Vulpia myuros* (L.) C.C. Gmel. subsp. *myuros* var. *tenella* (Boiss.) Maire & Weiller) (named for the Portuguese botanist Felix de Avellar Brotero, 1744-1828, first studied medicine, professor of botany at Coimbra, director of the Royal Museum and Botanical Gardens at Coimbra, his writings include *Noções geraes das dormideiras, da sua cultura, e da extracção do verdadeiro opio*, que ellas conte'm. [Small 8 vol., first edition] Lisbon 1824 and *Flora lusitanica*. Lisboa 1804 [-1805]. See J.H. Barnhart, *Biographical notes upon botanists*. 1: 258. 1965; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 54. 1972; Miguel Colmeiro y Penido, *La Botánica y los Botánicos de la Peninsula Hispano-Lusitana*. Madrid 1858; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. 1964; Mariella Azzarello Di Misa, a cura di, *Il Fondo Antico della Biblioteca dell'Orto Botanico di Palermo*. 52. Regione Siciliana, Palermo 1988)

Europe. Annual, solitary or loosely tufted, slender, erect or geniculate, auricles absent, ligule membranous and truncate, leaves setaceous and filiform, inflorescence exerted from the uppermost leaf sheath, a raceme or a panicle erect and green to purple, cleistogamous spikelets in the leaf sheath, distal florets sterile, subtending foliar structure rarely present or usually absent, glumes awnless, upper glume acute, lemmas awned, palea hyaline, anthers yellow, fruit laterally compressed and furrowed, grows in disturbed habitats, in moist or dry areas, along roadsides, road verges, see *Flora Lusitanica* 1: 115. 1804, *Synopsis Plantarum* 1:

218. 1822, *Linnaea* 19(6): 694. 1847, *Pugillus Plantarum Novarum Africae Borealis Hispaniaeque Australis* 128. 1852, *Contribucion al estudio de la flora de la Sierra ...* 74. 1896 and *Synopsis der mitteleuropäischen Flora* 2: 559. 1901, *Memorias del Museo de Ciencias Naturales de Barcelona, Serie Botánica* 1: 72. 1922, *Candollea* 7: 233. 1937. in English: wall fescue, silver grass

V. myuros (L.) C.C. Gmelin (*Avena muralis* Salisb.; *Distomomischus myuros* (L.) Dulac; *Festuca myuros* L.; *Festuca myuros* Muhl.; *Festuca megalura* Nutt.; *Festuca megalura* Nutt. var. *hirsuta* (Hack.) Asch. & Graebn.; *Festuca monandra* Elliott; *Festuca muralis* Kunth; *Festuca myuros* Muhl., nom. illeg., non *Festuca myuros* L.; *Festuca myuros* var. *muralis* Kunth ex Speg.; *Festuca pseudomyuros* Soy.-Will.; *Vulpia megalura* (Nutt.) Rydb.; *Vulpia muralis* (Kunth) Nees; *Vulpia myuros* (L.) C.C. Gmel. subsp. *myuros* var. *pseudomyuros* (Soy.-Will.) Fiori; *Vulpia myuros* (L.) C.C. Gmel. subsp. *pseudomyuros* (Soy.-Will.) Maire & Weiller; *Vulpia myuros* (L.) C.C. Gmel. var. *hirsuta* Hack.; *Vulpia pseudomyuros* (Soy.-Will.) Rchb.; *Zerna myuros* Panz. ex B.D. Jacks.)

Europe, Mediterranean, Eurasia, Africa. Annual, low-growing, glabrous or scabrous, densely or loosely tufted or solitary, densely fascicled, slender culms erect or geniculate at the base, auricles absent, ligule membranous and smooth, sheaths glabrous, leaf blades setaceous and filiform, inflorescence partially enclosed in uppermost leaf sheath, raceme or a linear erect panicle curved or nodding at maturity, cleistogamous spikelets in the leaf sheath, spikelets with 3-7 female florets, glumes setaceous, lower glume scale-like, upper glume acute, lemmas glabrous and awned, palea hyaline to membranous, anthers yellow or purple, compressed fruit grooved or furrowed, naturalized elsewhere, has been found to act as a host for the nematode that causes annual ryegrass toxicity in livestock, shade species, useful for erosion control and revegetation of disturbed areas, open fields, weed of lawns and roadsides, roadside embankment, disturbed areas, waste places, dry fields, dry sand, moist sand, wet sand of stream, arid areas, fine sandy loam, in dry rocky or sandy habitats, damp bare soil, banks in sandy soil, along streams, moist gravel, see *Species Plantarum* 1: 74-75. 1753, *Prodromus stirpium in horto ad Chapel Allerton vigentium*. 22. Londini [London] (Nov.-Dec.) 1796, *Flora Badensis Alsatica* 1: 8. 1805, *A Sketch of the Botany of South-Carolina and Georgia* 1: 170. 1816, *Descriptio uberior Graminum* 160. 1817, *Synopsis Plantarum* 1: 218. 1822, *Linnaea* 19(6): 694. 1847, *Journal of the Academy of Natural Sciences of Philadelphia* 1: 188. 1848, *Index Kewensis* 2: 1249. 1865, *Flore du Département des Hautes-Pyrénées* 91. 1867, *Contribucion al estudio de la flora de la Sierra ...* 74. 1896 and *Bulletin of the Torrey Botanical Club* 36: 538. 1909, *Acta Horti Gothoburgensis* 9: 161. 1934, *Grasses of Burma ...* 564. 1960, *Acta Botanica Academiae Scientiarum Hungaricae* 17(1-2): 117.

1971[1972], *Madroño* 22: 217-230. 1974, *Watsonia* 11(1): 72-73. 1976, *Bulletin du Jardin Botanique National de Belgique* 47(1-2): 117-137. 1977, *Bot. J. Linn. Soc.* 91: 436. 1985, Cynthia S. Brown and Kevin J. Rice, "The mark of Zorro: effects of the exotic annual grass *Vulpia myuros* on California Native Perennial Grasses." *Restoration Ecology* 8(1): 10-17. Mar 2000.

in English: rat's tail fescue, rat-tail fescue, rattail fescue, vulpia hair grass, six weeks fescue, silver grass, annual fescue, foxtail fescue

in South Africa: langbaardswenkgras, wildegars

V. myuros (L.) C.C. Gmel. f. *megalura* (Nutt.) Stace & Cotton (*Festuca megalura* Nutt.; *Vulpia megalura* (Nutt.) Rydb.)

North America, Eurasia. Loosely tufted grass, erect, lower glume acute, distally ciliate lemma margin, see *Flora Badensis Alsatica* 1: 8. 1805, *Journal of the Academy of Natural Sciences of Philadelphia* 1: 188. 1848 and *Bulletin of the Torrey Botanical Club* 36: 538. 1909, *Madroño* 22: 229. 1974, *Watsonia* 11(1): 72. 1976.

in English: foxtail fescue

V. myuros (L.) C.C. Gmel. f. *myuros*

Europe, Mediterranean, Africa, Eurasia. Tussocky grass, lower glume obtuse, glabrous or smooth lemma margin, see *Flora Badensis Alsatica* 1: 8. 1805.

in English: rat's tail fescue

V. myuros (L.) C. Gmelin var. *hirsuta* Hackel (*Festuca megalura* Nutt.; *Festuca myuros* var. *hirsuta* (Hack.) Asch. & Graebn.; *Vulpia megalura* (Nutt.) Rydb.; *Vulpia myuros* f. *hirsuta* (Hack.) C.H. Blom; *Vulpia myuros* (L.) C.C. Gmel. f. *megalura* (Nutt.) Stace & Cotton; *Vulpia myuros* subsp. *megalura* (Nutt.) Soják; *Vulpia myuros* var. *megalura* (Nutt.) Auquier)

Europe. Annual, tufted, green, lemma margin pubescent to ciliate near tip, aggressive, useful for erosion control and revegetation of disturbed areas, in gravel and gravelly spots, sunny places, washes, hillsides, on dry red gravelly soil, open areas, see *Flora Badensis Alsatica* 1: 8. 1805, *Journal of the Academy of Natural Sciences of Philadelphia* 1: 188. 1848, *Catalogue Raisonné des Graminées du Portugal* 24. 1880 and *Synopsis der mitteleuropäischen Flora* 2: 558. 1901, *Bulletin of the Torrey Botanical Club* 36: 538. 1909, *Acta Horti Gothoburgensis* 9: 161. 1934, *Madroño* 22: 229. 1974, *Watsonia* 11(1): 72. 1976, *Bulletin du Jardin Botanique National de Belgique* 47(1-2): 123. 1977.

in English: foxtail fescue, fox-tail fescue, rat-tail fescue, hairy rattail fescue, Zorro fescue

V. myuros (L.) C. Gmelin var. *megalura* (Nutt.) Auquier (*Festuca commutata* Steud., nom. illeg., non *Festuca commutata* Scheele; *Festuca megalura* Nutt.; *Festuca myuros* f.

megalura (Nutt.) Stace & R. Cotton; *Vulpia megalura* (Nutt.) Rydb.; *Vulpia myuros* f. *megalura* (Nutt.) Stace & R. Cotton; *Vulpia myuros* subsp. *megalura* (Nutt.) Soják)

Southern and northern America, Argentina, Brazil, Canada, U.S. Annual, lemmas ciliate on margins above, wasteland, stony places, see *Flora Badensis Alsatica* 1: 8. 1805, *Journal of the Academy of Natural Sciences of Philadelphia* 1: 188. 1848, *Synopsis Plantarum Glumacearum* 1: 304. 1854 and *Bulletin of the Torrey Botanical Club* 36: 538. 1909, *Madroño* 22: 217-230. 1974, *Watsonia* 11(1): 72. 1976, *Bulletin du Jardin Botanique National de Belgique* 47(1-2): 117-137. 1977.

V. myuros (L.) C. Gmelin var. *myuros* (*Festuca myuros* L.; *Festuca myuros* var. *myuros*; *Vulpia myuros* (L.) C.C. Gmel. f. *myuros*)

Europe, Eurasia. Annual, lemma margin glabrous, occurs in open fields and banks in sandy soil, rough pasture, hillsides, chaparral, wasteland, see *Species Plantarum* 1: 74-75. 1753, *Flora Badensis Alsatica* 1: 8. 1805 and *Bot. J. Linn. Soc.* 91: 436. 1985.

in English: false foxtail fescue, fox-tail fescue, six weeks fescue, rat-tail fescue, rattail fescue, fescue

V. obtusa Trabut

North Africa, Algeria. Endangered species, see *Genetica* 46(2): 235-255. 1976, *Botaniska Notiser* 130: 173-187. 1977.

V. octoflora (Walter) Rydb. (*Diarrhena setacea* (Poir.) Roem. & Schult.; *Festuca octoflora* Walter; *Festuca octoflora* var. *aristulata* Torr. ex L.H. Dewey; *Festuca octoflora* var. *glauca* (Nutt.) Fernald; *Festuca octoflora* var. *octoflora*; *Festuca octoflora* var. *tenella* (Willd.) Fernald; *Festuca parviflora* Elliott; *Festuca setacea* Poir.; *Festuca tenella* Willd.; *Festuca tenella* var. *aristulata* Torr.; *Gnomonia octoflora* (Walter) Lunell; *Vulpia antofagastensis* Parodi; *Vulpia octoflora* var. *tenella* (Willd.) Fernald)

North America, U.S., Canada. Annual, herbaceous, glabrous or hairy, single or solitary, erect and often geniculate at the lower nodes, sheaths open, hairlike ligule, leaf blades narrow and involute, slender flower head with short branches that point upward, spikelets with 4-7 closely overlapping flowers, spikelet axis hidden, unequal or subequal glumes, lemmas with a short straight awn, weedy species, relatively unpalatable, provides little forage for most livestock and wildlife species, useful for erosion control, provides little cover for wildlife, commonly found growing in disturbed areas, dry slopes, open sites, dry hills, open forests, dry sterile soil, sandy or loamy to rocky soils, sandstone, along roadsides, disturbed areas, open roadsides, see *Flora Caroliniana, secundum* ... 81. 1788, *Species Plantarum. Editio quarta* 1: 419. 1797, *Encyclopédie Méthodique, Botanique* 2: 638. 1811, *A Sketch of the Botany of South-Carolina and*

Georgia 1: 170. 1816, *Systema Vegetabilium* 1: 289. 1817, *Transactions of the American Philosophical Society, new series*, 5: 147. 1835, *Pacif. Railr. Rep.* 4: 156. 1856, *Contributions from the United States National Herbarium* 2(3): 547. 1894 and *Bulletin of the Torrey Botanical Club* 36: 538. 1909, *American Midland Naturalist* 4: 224. 1915, *Rhodora* 34: 109, 209. 1932, *Rhodora* 47(556): 107. 1945, *Revista Argentina de Agronomía* 23: 86. 1956, *Madroño* 22: 221-222. 1974.

in English: six-weeks fescue, sixweeks fescue, eight-flowered fescue, six weeks grass, slender fescue

V. octoflora (Walter) Rydb. var. **glauca** (Nutt.) Fernald (*Brachypodium festucooides* Link, nom. illeg., non *Brachypodium festucooides* P. Beauv.; *Festuca gracilentia* Buckley; *Festuca octoflora* Walter var. *glauca* (Nutt.) Fernald; *Festuca octoflora* Walter var. *tenella* (Willd.) Fernald; *Festuca tenella* Willd.; *Festuca tenella* Willd. var. *glauca* Nutt.; *Schedonorus tenellus* (Willd.) P. Beauv.; *Vulpia octoflora* (Walter) Rydb. var. *tenella* (Willd.) Fernald; *Vulpia tenella* (Willd.) Heynh.)

North America, U.S. Found on cliff, sand barrens, sandy soils, dry ledges, see *Flora Caroliniana, secundum ...* 81. 1788, *Species Plantarum. Editio quarta* 1: 419. 1797, *Essai d'une Nouvelle Agrostographie* 177. 1812, *Enumeratio Plantarum Horti Botanici Berolinensis, ...* 1: 95. 1821, *Transactions of the American Philosophical Society, new series*, 5: 147. 1835, *Proceedings of the Academy of Natural Sciences of Philadelphia* 14: 97-98. 1862 and *Bulletin of the Torrey Botanical Club* 36: 538. 1909, *Rhodora* 34: 109, 209. 1932, *Man. Grass. U.S.* 860. 1935, *Rhodora* 47(556): 107. 1945.

in English: six-weeks fescue

V. octoflora (Walt.) Rydb. var. **hirtella** (Piper) Henrard (*Agrostis michauxii* var. *alpina* Rupr.; *Festuca octoflora* Walt. subsp. *hirtella* Piper; *Festuca octoflora* Walt. var. *hirtella* (Piper) Piper ex A.S. Hitchc.; *Festuca octoflora* var. *hirtella* (Piper) Hitchc.; *Festuca octoflora* var. *hirtella* Piper; *Festuca pusilla* Buckley)

Northern America, U.S. Annual, lemma back scabrous, sandy to rocky soils, open areas, disturbed places, see *Flora Caroliniana, secundum ...* 81. 1788, *Bulletin de l'Académie Royale des Sciences et Belles-lettres de Bruxelles* 52: 228. 1842, *Proceedings of the Academy of Natural Sciences of Philadelphia* 14: 98. 1862 and *Contributions from the United States National Herbarium* 10(1): 12. 1906, *Bulletin of the Torrey Botanical Club* 36: 538. 1909, *Manual of the Grasses of the United States* 60, 860. 1935, *Blumea* 2: 320. 1937.

in English: six-weeks fescue, hairy six-weeks fescue, six-weeks fescue

V. octoflora (Walter) Rydb. var. **octoflora** (*Festuca octoflora* Walter; *Festuca octoflora* Walter subsp. *octoflora*; *Festuca*

octoflora Walt. var. *aristulata* Torr. ex L.H. Dewey; *Festuca octoflora* Walter var. *octoflora*)

Northern America, U.S. Annual, lemma back scabrous or glabrous, on marsh borders, wetlands, hillsides, sandy waste ground, disturbed areas, washes, chaparral, deep shade, see *Flora Caroliniana, secundum ...* 81. 1788 and *Bulletin of the Torrey Botanical Club* 36: 538. 1909, *Madroño* 22: 221. 1974.

in English: six-weeks fescue, slender fescue, sixweeks fescue

V. persica (Boiss. & Buhse) V.I. Krecz. & Bobrov (*Nardurus persicus* Boiss. & Buhse)

Iran, Asia, Iraq. See *Flora URSS* 2: 535. 1934, *Genetica* 46(2): 235-255. 1976.

V. sicula (C. Presl) Link (*Vulpia geniculata* (L.) Link var. *attenuata* (Parl.) Fiori)

Europe, Italy. Perennial, see *Hortus Regius Botanicus Berolinensis* 2: 272. 1833 and *Genetica* 46(2): 235-255. 1976.

V. unilateralis (L.) Stace (*Brachypodium unilaterale* (L.) P. Beauv.; *Festuca maritima* L.; *Festuca tenuiflora* Schrad.; *Nardurus krausei* (Regel) V.I. Krecz. & Bobrov; *Nardurus maritimus* (L.) Murb.; *Nardurus montanus* Boiss. & Reut.; *Nardurus tenellus* Rchb. ex Godr.; *Nardurus tenuiflorus* (Schrad.) Boiss.; *Nardurus unilateralis* (L.) Boiss.; *Triticum unilaterale* L.)

Algeria, Russia, Europe. Annual, see *Systema Naturae*, edition 12 2: 102. 1767, *Essai d'une Nouvelle Agrostographie* 100, 155, pl. 19, f. 35. 1812, *Syst. Veg.* 2: 747. 1817, *Voyage botanique dans le midi de l'Espagne* 2: 677. 1844 and *Botanical Journal of the Linnean Society* 76(4): 350. 1978, *Bot. J. Linn. Soc.* 91: 442. 1985, *Lagascalia* 14(1): 165. 1986, *Anales de Biología, Facultad de Biología, Universidad de Murcia* 13: 29. 1987, *Acta Botanica Malacitana* 15: 100. 1990.

in French: nard maritime

in Morocco: dil-el-far, sbit-el-far

Vulpiella (J.A. Battandier & L.C. Trabut) P.-A. Buroillet = Vulpiella (L.C. Trabut) P.-A. Buroillet

The diminutive of the genus *Vulpia*.

One species, Mediterranean. Pooideae, Poodae, Poae, *Cutandia* subg. *Vulpiella* Batt. & Trab., annual, herbaceous, auricles absent, ligule a membrane-like, plants bisexual, inflorescence paniculate, 2 glumes very unequal and shortly awned, lemmas awned 3-nerved, palea nerved and keeled, 2 lodicules free and membranous, 3 stamens, ovary glabrous, 2 stigmas, open habitats, sandy places, dry areas, similar to *Cutandia*, type *Vulpiella incrassata* (Salzm. ex Lois.) Andr., see *Mantissa Plantarum* 557. 1771, *Flora*

Gallica 1: 85. 1828, *Annales des Sciences Naturelles; Botanique, sér. 2*, 15: 298-299. 1841, *Botanische Zeitung. Berlin* 18: 130. 1860, *Flore d'Alger* 237. 1895 and *Annales du Service Botanique (et Agronomique) de la Direction Générale de l'Agriculture Tunisie*. 4(2): 68. 1927, *Ind. Hort. Budapest* 1934: 95. 1935, *Verhandlungen des Botanischen Vereins für die Provinz Brandenburg und die angrenzenden Länder* 76: 31. 1936, *Bulletin de la Société d'Histoire Naturelle de l'Afrique du Nord* 33(4): 95. 1942, *Notulae Systematicae. Herbarium du Muséum de Paris* 11: 127. 1943, *Botaniska Notiser* 130: 173-187. 1977, *Bulletin de la Société Botanique de France* 124(5-6): 347. 1977, *Nordic J. Bot.* 1: 19. 1981, *Kew Bulletin, Additional Series* 13: 108. 1986.

Species

V. tenuis (Tineo) Kerguélen (*Bromus tenuis* Tineo; *Festuca incrassata* Salzm. ex Lois.; *Vulpiella incrassata* (Salzm. ex Lois.) Andr.)

Europe, France. Attractive seeds, see Vincenzo Tineo (1791-1856), *Plantarum rariorum Siciliae minus cognitarum. Pugillus primus* 1: 3. 1817, *Flora Gallica* 1: 85. 1828, *Annales des Sciences Naturelles; Botanique, sér. 2*, 15: 299. 1841 and *La flore adventice de Montpellier* 122. 1912, *Bulletin de la Société d'Histoire Naturelle de l'Afrique du Nord* 33(4): 95. 1942, *Willdenowia* 6(2): 296. 1971, *Willdenowia* 7(2): 420. 1974, *Bulletin de la Société Botanique de France* 124(5-6): 347. 1977.

W

Wangenheimia Moench = *Wangenheimia* F. Dietr. (Araliaceae)

For the German forester Friedrich Adam Julius von Wangenheim, 1749-1800, soldier; see J.H. Barnhart, *Biographical notes upon botanists*. 3: 457. 1965; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 425. Boston, Mass. 1972; William Darlington (1782-1863), *Reliquiae Baldwinianae*. Philadelphia 1843; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933; Jonas C. Dryander, *Catalogue bibliothecae historico-naturalis Josephi Banks*. London 1796-1800; D.H. Nicolson, "Derivation of Aroid Generic Names." *Aroidiana*. 10: 15-25. 1988.

Two species, Spain, North Africa, Mediterranean. Pooideae, Poodae, Poae, annual, herbaceous, stiff, auricles absent, ligule an unfringed membrane, plants bisexual, inflorescence racemose or a single oblong raceme spike-like, spikelets densely imbricate, 2 glumes equal to subequal, lower glume subulate 1-nerved, navicular or boat-shaped upper glume 2-3-nerved, lemma leathery 5-nerved, palea apex bifid, 2 lodicules free and membranous, stamens 3, ovary glabrous, 2 stigmas, open habitats, dry open places, related to *Vulpia*, type *Wangenheimia disticha* Moench, see *Methodus Plantas Horti Botanici ...* 200. 1794, *Vollständiges Lexicon der Gärtnerei und Botanik* 10: 536. 1810 and *Taxon* 33: 351-354. 1984, *Kew Bulletin, Additional Series* 13: 97. 1986.

Species

W. demnatensis (Murb.) Stace (*Catapodium demnatense* (Murb.) Maire & Weiller; *Festuca demnatensis* Murb.; *Nardurus demnatensis* (Murb.) Maire)

Europe, Morocco. See *Acta Universitatis Lundensis* 18(3): 14, f. 1, t. 2. 1922, Émile Jahandiez (1876-1938) and René Maire (1878-1949), *Catalogue des plantes du Maroc* (spermatophytes et ptéridophytes). Avec la collaboration de J.A. Battandier (1848-1922), L.O. Ducellier (1878-38), M.L. Emberger (1897-1969), [et] Pius Font-Quer (1888-1964). Alger 1931-1941, *Bulletin de la Société d'Histoire Naturelle de l'Afrique du Nord* 33(4): 96. 1942, *Botanical Journal of the Linnean Society* 76: 350. 1978.

W. lima (L.) Trin. (*Cynosurus lima* L.; *Wangenheimia disticha* Moench)

Europe. Annual, low to dwarf, feathery inflorescences, flower heads rather flat in shape, ornamental, hardy, suitable for containers, see *Species Plantarum* 72. 1753, *Fundamenta Agrostographiae* 132. 1820 and *Bulletin de la Société d'Histoire Naturelle de l'Afrique du Nord* 33(4): 94. 1942.

Wasatchia M.E. Jones = *Festuca* L., *Hesperochloa* (Piper) Rydb. *Leucopoa* Griseb.

U.S., Utah, Wahsatch Escarpment, Wasatch Mountains of northern Utah.

Pooideae, Poae, Loliinae, type *Wasatchia kingii* (S. Watson) M.E. Jones (*Festuca kingii* (S. Watson) Cassidy; *Hesperochloa kingii* (S. Watson) Rydb.; *Leucopoa kingii* (S. Watson) W.A. Weber; *Poa kingii* S. Watson), see *Species Plantarum* 1: 73-76. 1753, *Flora Rossica* 4(13): 383, 388. 1852, *United States Geological Expolration [sic] of the Fortieth Parallel. Botany* 387. 1871, *Bulletin Colorado State University Experiment Station* 12: 36. 1890 and *Feddes Repertorium* 2(18): 70-71. 1906, *Contributions from the United States National Herbarium* 10: 10. 1906, *Botanical Magazine* 24: 112. 1910, *Contributions to Western Botany* 14: 16. 1912, *Bulletin of the Torrey Botanical Club* 39(3): 106. 1912, *Ill. Fl. U.S. Canad.*, edition 2, 1: 269. 1913, *Acta Phytotaxonomica et Geobotanica* 1: 66-67. 1932, *Acta Phytotaxonomica et Geobotanica* 4: 33. 1935, *University of Colorado Studies: Series in Biology* 23: 2. 1966, *Bot. Zhurn.* 1253. 1971, *Watsonia* 16: 300. 1987, *Grasses of Japan and its Neighboring Regions* 508. 1987, *American Journal of Botany* 82(10): 1287-1299. 1995, *Contributions from the United States National Herbarium* 48: 383, 422, 694. 2003.

Weingaertneria Bernh. = *Corynephorus* P. Beauv.

Pooideae, Poae, Airinae, see *Species Plantarum* 65. 1753, *Systematisches Verzeichnis* 23, 51. 1800, *Essai d'une Nouvelle Agrostographie* 90, 159. 1812, *Verhandlungen der Zoologisch-botanischen Gesellschaft in Wien* 48: 645. 1898 and Antonio Xavier Pereira Coutinho (1851-1939), *A Flora de Portugal* 2: 91. Lisboa 1939, *Preslia* 34: 374-386. 1974,

Contributions from the United States National Herbarium 48: 239, 694. 2003.

Whalleya Wills & J. Bruhl

Dedicated to R.D.B. Whalley, Australian botanist.

A genus of 3 species, Australia. Paniceae, perennial, semi-aquatic, inflorescence branches stiff and spreading, palea apex notched with a central depression, food for Aborigines, suspected of photosensitisation, in the future the name of the genus could be *Walwhalleya*, type *Whalleya pungens* Wills & J. Bruhl, see *Transactions and Proceedings of the Victorian Institute for the Advancement of Science* 1854/1855: 46. 1855 and Karen E Wills, R.D.B. Whalley & Jeremy J. Bruhl, "Systematic studies in Paniceae (Poaceae): *Homopholis* and *Whalleya* gen. et sp. nov." *The Australian Paniceae (Poaceae)* 96. 1987, *Australian Systematic Botany* 13(3): 437-468. 2000, *Flora of Australia* 43: 223, 242, 248, 276, 357. 2002 [as *Walwhalleya*].

Species

W. proluta (F. Muell.) Wills & J. Bruhl (*Homopholis proluta* (F. Muell.) R.D. Webster; *Panicum prolutum* F. Muell.)

Australia. Drought-resistant, forage, see *Transactions and Proceedings of the Victorian Institute for the Advancement of Science* 1854/1855: 46. 1855 and *The Australian Paniceae (Poaceae)* 96. 1987, *Australian Systematic Botany* 13: 465, f. 2b. 2000.

W. pungens Wills & J. Bruhl

Australia. See *Australian Systematic Botany* 13: 463-465, f. 1, 2c. 2000.

W. subxerophila (Domin) Wills & J. Bruhl (*Panicum subxerophilum* Domin)

Australia. Perennial, fodder, see *Bibliotheca Botanica* 85: 316. 1915, *Australian Systematic Botany* 13: 465, f. 2d. 2000.

Whiteochloa C.E. Hubbard

For the Australian botanist Cyril Tenison White, 1890–1950, plant collector, from 1917 to 1950 Government Botanist of Queensland, (maternal) grandson of Frederick Manson Bailey (1827-1915), among his publications are *Contributions to the Queensland flora*. Brisbane 1921–1946, *A Contribution to Our Knowledge of the Flora of Papua* (British New Guinea). Brisbane 1922, "The Bailey family and its place in the botanical history of Australia." *J. Hist. Soc. Qld.* 3: 362-383. 1944, and "Ligneous plants collected in New Caledonia by C.T. White in 1923." *J. Arnold Arb.* 7: 74-103. 1926. John Frederick Bailey wrote "Introduction of economic plants into Queensland." *Proc. R. Soc. Queensland.* 22: 77-102. 1910; Frederick Manson

Bailey was the author of *Catalogue of the Indigenous and Naturalized Plants of Queensland*. Brisbane 1890, *The Queensland Flora*. Brisbane 1899-1905, and *Comprehensive Catalogue of Queensland Plants Both Indigenous and Naturalised*. Brisbane [1913]; see Charles Edward Hubbard (1900-1980), *Proceedings of the Royal Society of Queensland.* 62: 111. (Aug.) 1952; J.H. Barnhart, *Biographical notes upon botanists.* 3: 485 and 1: 104. 1965; Dennis John Carr (1915-) and S.G.M. Carr (1912-1988), eds., *People and Plants in Australia*. 1981; J. Lanjouw and F.A. Stafleu, *Index Herbariorum*. Part II, *Collectors A–D*. Regnum Vegetabile vol. 2. 1954; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933; S. Lenley et al., *Catalog of the manuscript and archival collections and index to the correspondence of John Torrey*. Library of the New York Botanical Garden. 432. 1973; N. Hall, *Botanists of the Eucalypts*. Melbourne 1978 and Supplement 1980.

About 6 species, Australia. Panicoideae, Panicodae, Paniceae, annual or short-lived perennial, variable, herbaceous, tufted or decumbent, auricles absent, ligule a fringed membrane, plants bisexual, open inflorescence paniculate or racemose, spikelets dorsally or slightly laterally compressed, pedicels and inflorescence branches without articulations, glumes 2 very unequal, upper glume 5-7-nerved, lemma mucronate with a curved apiculum, lower lemma membranous to coriaceous, palea present, 2 lodicules free and fleshy, 3 stamens, ovary glabrous, 2 stigmas, open habitats, savannah, sandy alluvial soils, similar to *Panicum*, type *Whiteochloa semitonsa* (F. Muell. ex Benth.) C.E. Hubb., see *Proceedings of the Royal Society of Queensland* 62(12): 111. 1952, *Brunonia* 1: 69–93. 1978, *Austrobaileya* 2(1): 21-24. 1984, *Austral. Paniceae (Poaceae)* 1-322. 1987, L. Tran-Nguyen, K.R. Blanche, B. Egan and K.S. Gibb, "Diversity of phytoplasmas in northern Australian sugarcane and other grasses." *Plant Pathology* 49(6): 666-679. Dec 2000, K.R. Blanche, L.T.T. Tran-Nguyen and K.S. Gibb, "Detection, identification and significance of phytoplasmas in grasses in northern Australia." *Plant Pathology* 52(4): 505-512. Aug 2003.

Species

W. airoides (R. Br.) Lazarides (*Panicum airoides* R. Br.; *Panicum airoides* Fluegge ex Nees, nom. illeg., non *Panicum airoides* R. Br.)

Australia. Upper glume glabrous, palatable when young, cover plant, coastal sand dunes, see *Prodromus Florae Novae Hollandiae* 190. 1810, *Flora Brasiliensis seu Enumeratio Plantarum* 2: 175. 1810 and *Brunonia* 1: 73. 1978.

W. biciliata Lazarides

Australia. Increaser species, little-grazed, see *Brunonia* 1: 85, f. 4. 1978.

W. capillipes (Benth.) Lazarides (*Panicum capillipes* Benth.)

Australia, Indonesia. Upper glume glabrous, see *Flora Australiensis* 7: 484. 1878 and *Brunonia* 1: 79, t. 3. 1978, *Blumea* 41: 209. 1996.

W. cymbiformis (Hughes) B.K. Simon (*Panicum cymbiforme* Hughes)

Australia. Palatable when young, see *Bulletin of Miscellaneous Information Kew* 1923(9): 323. 1923, *Austrobaileya* 2(1): 23. 1984.

W. multiciliata Lazarides

Australia. Annual, slender, erect or decumbent, purplish to reddish spikelets, see *Brunonia* 1: 88, f. 5. 1978.

W. semitonasa (F. Muell. ex Benth.) C.E. Hubb. (*Panicum semitonsum* F. Muell. ex Benth.; *Paspalidium semitonsum* (F. Muell. ex Benth.) Hughes)

Australia. Inflorescence racemose with paired spikelets, see *Flora Australiensis* 7: 483. 1878 and *Bulletin of Miscellaneous Information Kew* 1923(2): 317. 1923, *Proceedings of the Royal Society of Queensland* 62: 111. 1952.

Wiestia Boiss. = *Boissiera* Hochst ex Steud., *Wiestia* Sch. Bip. (Compositae, alt. Asteraceae)

Bromeae, see *Flora* 21: 25. 1838, *Nomenclator Botanicus. Editio secunda* 1: 213. 1840, *Flora Orientalis* 5: 559. 1884 and *Grasses of Burma, Ceylon, India and Pakistan* 451–452. 1960.

Wilhelmsia K. Koch = *Rostraria* Trin., *Wilhelmsia* Rchb. (Caryophyllaceae)

Pooideae, Poeae, Aveninae, type *Wilhelmsia caucasiana* K. Koch, see *Fundamenta Agrostographiae* 149, t. 13. 1820, *Linnaea* 1: 59–60. 1826, *Conspectus Regni Vegetabilis* 206. 1828, *Linnaea* 21(4): 400. 1848 and *Taxon* 9(4): 110. 1960, *Zlaci SSSR* 267. 1976, *Contributions from the United States National Herbarium* 48: 604, 694. 2003.

Wilibald-Schmidtia Conrad = *Danthonia* DC., *Sieglingia* Bernh.

For the German (born in Bohemia) botanist Franz Wilibald Schmidt, 1764–1796, professor of botany, physician; see C.S. Rafinesque, *Autikon botanikon. Icones plantarum select. nov. vel rariorum*, etc. 187. Philadelphia 1840; E.D. Merrill, *Index rafinesquianus*. 76. 1949; J.H. Barnhart, *Biographical notes upon botanists*. 3: 231. 1965; Jonas C. Dryander, *Catalogus bibliothecae historico-naturalis Josephi Banks*. London 1800; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917–1933; R. Zander, F. Encke, G.

Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993.

Danthonioideae, Danthonieae, see Johann Jacob Bernhardt (1774–1850), *Systematisches Verzeichnis der Pflanzen welche in der Gegend um Erfurt gefunden werden ...* 20, 44. Erfurt 1800, *Flore Française ... Troisième Édition* 3: 32. 1805, *Systema Vegetabilium* 2: 690. 1817, Friedrich August II, King of Saxony (1797–1854), *Pflanzen und Gebirgsarten von Marienbad*, gesammelt und beschrieben von dem Prinzen Friedrich ... und von J.W. von Goethe ...; ergänzt, und mit einem Anhang über die andern naturhistorischen Verhältnisse des Curortes herausgegeben von C.J. Heidler. 38. Prag 1837 [also *Naturhistorische Darstellung des Curortes Marienbad.*] and *Contributions from the United States National Herbarium* 46: 170–177, 594, 635. 2003.

Wilibalda Sternb. ex Roth = *Coleanthus* J. Seidel, *Wilibalda* Roth

For the German (born in Bohemia) botanist Franz Wilibald Schmidt, 1764–1796, professor of botany, physician; see J.H. Barnhart, *Biographical notes upon botanists*. 3: 231. 1965; Jonas C. Dryander, *Catalogus bibliothecae historico-naturalis Josephi Banks*. London 1800; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917–1933; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993.

Pooideae, Poeae, Agrostidinae, see *Flora des Österreichischen Kaiserthumes* 1: 12. 1816, *Systema Vegetabilium* 2: 11, 276. 1817, *Enumeratio Plantarum Phaenogamarum in Germania* 1(1): 92. 1827 and *Contributions from the United States National Herbarium* 48: 237, 694. 2003.

Willbleibia Herter = *Willkommia* Hack.

For the German botanist Heinrich Moriz Willkomm, 1821–1895, explorer, traveler, naturalist, 1874–1892 professor of botany and director of the Botanical Garden of the University of Prague; see J.H. Barnhart, *Biographical notes upon botanists*. 3: 501. 1965; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 1993; Stafleu and Cowan, *Taxonomic literature*. 7: 336–346. 1988; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917–1933; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 438. 1972.

Chloridoideae, Cynodonteae, Traginae, type *Willbleibia texana* (Hitchc.) Herter, see *Verhandlungen des Botanischen Vereins für die Provinz Brandenburg und die angrenzenden*

Länder 30: 145. 1888 and *Contributions from the United States National Herbarium* 41: 239. 2001.

Willkommia Hack. = *Willbleibia* Herter

For the German botanist Heinrich Moriz Willkomm, 1821-1895, explorer, traveler, naturalist, 1874-1892 professor of botany and director of the Botanical Garden of the University of Prague; see J.H. Barnhart, *Biographical notes upon botanists*. 3: 501. 1965; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 1993; Stafleu and Cowan, *Taxonomic literature*. 7: 336-346. 1988; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 438. 1972; H. Dolezal, *Portug. Acta Biol.* 6: 257-323. 1959 and 7: 324-551. 1961.

About 2-4 species, northern America, U.S., Texas, southern tropical Africa. Chloridoideae, Cynodonteae, Chloridinae, or Chloridoideae, Cynodonteae, Traginae, annual or perennial, herbaceous, unbranched, unarmed, tufted, stoloniferous, mat-forming, auricles absent, glandular, ligule a fringe of hairs, plants bisexual, inflorescence spicate nondigitate with several racemes, floret 1 bisexual with pungent callus, spikelets shortly pedicellate dorsally compressed, 2 glumes very unequal rounded membranous, upper glume deciduous, thinly membranous lemma acute to obtuse and shortly awned, awn minute and straight, palea glabrous or silky, 2 free and fleshy lodicules, 3 stamens, ovary glabrous, 2 stigmas, open habitats, savannah, sandy areas, taxonomic confusion, type *Willkommia sarmentosa* Hack., see *Verhandlungen des Botanischen Vereins für die Provinz Brandenburg und die angrenzenden Länder* 30: 145. 1888 and Hong Qian, "Floristic analysis of vascular plant genera of North America north of Mexico: characteristics of phytogeography." *Journal of Biogeography* 26(6): 1307-1321. Nov 1999, *Contributions from the United States National Herbarium* 41: 239. 2001.

Species

W. annua Hack. (*Willbleibia annua* (Hack.) Herter)

Africa. Annual, tufted, spikelets elliptic, upper glume scarid, growing in moist soils, sandy places, see *Verhandlungen des Botanischen Vereins für die Provinz Brandenburg und die angrenzenden Länder* 30: 146. 1888 and *Phyton* 7: 296. 1958.

W. newtonii Hack. (*Willbleibia newtonii* (Hack.) Herter)

Africa. Perennial, short-lived, tufted, stoloniferous, geniculate, spikelets elliptic, on sandy soils, see *Phyton* 7: 296. 1958.

W. sarmentosa Hack. (*Craspedorhachis sarmentosa* (Hack.) Pilg.; *Willbleibia sarmentosa* (Hack.) Herter)

Africa, Zambia, Zimbabwe. Perennial, stoloniferous, mat-forming, tufted, spikelets elliptic, upper glume prickly, found in moist sandy areas, marshes, pans, see *Verhandlungen des Botanischen Vereins für die Provinz Brandenburg und die angrenzenden Länder* 30: 145. 1888 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 74: 27. 1947, *Phyton* (Buenos Aires) 7: 296. 1958.

W. texana Hitchc. (*Craspedorhachis texana* (Hitchc.) Pilg.; *Willbleibia texana* (Hitchc.) Herter)

Northern America, U.S. Floret with callus acute, lemma mucronate, see *Botanical Gazette* 35: 283, f. 1-2. 1903, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 74: 27. 1947.

W. texana Hitchc. var. ***stolonifera*** Parodi (*Craspedorhachis texana* var. *stolonifera* (Parodi) Pilg.; *Willbleibia stolonifera* (Parodi) Herter)

Argentina, U.S. See *Physis. Revista de la Sociedad Argentina de Ciencias Naturales* 8: 78. 1925, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 74: 27. 1945, *Flora de la Provincia de Buenos Aires* 4(2): 1-624. 1970.

W. texana Hitchc. var. ***texana*** (*Craspedorhachis texana* var. *texana*)

Northern America, U.S.

Windsoria Nuttall = *Tridens* Roem. & Schult.

For the British (b. Yorks) botanist John Windsor, 1787-1868 (d. Manchester), surgeon, Fellow of the Linnean Society 1814, a friend of Nuttall; see J.H. Barnhart, *Biographical notes upon botanists*. 3: 506. 1965; Ethelyn Maria Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933; Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 749. 1994; H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 266. Oxford 1964; Jeannette Elizabeth Graustein, *Thomas Nuttall, Naturalist. Explorations in America, 1808-1841*. Cambridge, Harvard University Press 1967.

Chloridoideae, Cynodonteae, see *Flora Pedemontana* 2: 246. 1785, *Flora Boreali-Americana* 1: 68-69. 1803, *Syn. Pl.* 2: 9. 1806 [1807] *Essai d'une Nouvelle Agrostographie* 77, f. 15. 1812, *A Sketch of the Botany of South-Carolina and Georgia* 1(2): 165. 1816, *Systema Vegetabilium* 2: 34, 599. 1817, *The Genera of North American Plants* 1: 70. 1818, *A Catalogue of Plants, ... City of New York* 91. 1819, *Manual of Botany for North America. Fifth edition* 447. 1829, *Transactions of the American Philosophical Society, new series*, 5: 147. 1835 and *Contributions from the United States National Herbarium* 41: 16, 121-122, 224-230, 239. 2001.

Wirtgenia Döll = *Paspalum* L., *Wirtgenia* Sch. Bip. (Asteraceae), *Wirtgenia* H. Andres (Ericaceae)

Panicoideae, Paniceae, Paspalinae, see *Systema Naturae*, *Editio Decima* 846, 855, 1359. 1759, *Species Graminum* 1828-1836, *Flora* 25: 435. 1842, *Flora Brasiliensis* 2(2): 40. 1877 and *Contr. U.S. Natl. Herb.* 12: 116. 1908, *Verh. Bot. Vereins Prov. Brandenburg* 56: 61. 1914, *Contributions from the United States National Herbarium* 24(8): 435. 1927, *Contributions from the United States National Herbarium* 46: 443-527, 635. 2003.

Woodrowia Stapf = *Dimeria* R. Br.

To commemorate the Kew gardener George Marshall Woodrow, 1846-1911, director of Botanical Survey of Western India 1893-1899; see Isaac Henry Burkill, *Chapters on the History of Botany in India*. Delhi 1965; Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 755. 1994; M.P. Nayar, *Meaning of Indian Flowering Plant Names*. 365. Dehra Dun 1985.

Type *Woodrowia diandra* Stapf, see *Prodromus Florae Novae Hollandiae* 204. 1810, *Hooker's Icones Plantarum* 25: t. 2447. 1896 and *Journal and Proceedings of the Asiatic Society of Bengal* n.s. 7: 515. 1912.

X

Xanthanthos St.-Lag. = *Anthoxanthum* L.

Greek *xanthos* “yellow” and *anthos* “flower.”

Pooideae, Poeae, Phalaridinae, see *Species Plantarum* 1: 28. 1753, *Annales de la Société Botanique de Lyon* 7: 119. 1880 and *Regnum Veg.* 127: 19. 1993, *Contributions from the United States National Herbarium* 48: 111-115, 694. 2003.

Xanthonanthus St.-Lag. = *Anthoxanthum* L., *Xanthanthos* St.-Lag.

A word play, an anagram of the generic name *Anthoxanthum* L., Greek *xanthos* “yellow” and *anthos* “flower.”

Pooideae, Poeae, Phalaridinae, see *Species Plantarum* 1: 28. 1753, *Annales de la Société Botanique de Lyon* 7: 119. 1880 and *Regnum Veg.* 127: 19. 1993, *Contributions from the United States National Herbarium* 48: 111-115, 694. 2003.

Xenochloa Lichtenstein ex J.J. Roemer & J.A. Schultes = *Phragmites* Adans., *Xenochloa* Roemer & Schultes

Greek *xenos* “a host, foreigner, alien, stranger, guest” and *chloe*, *chloa* “grass.” Arundinoideae, Arundineae, see *Species Plantarum* 1: 81. 1753, *Familles des Plantes* 2: 34, 559. 1763, *Systema Vegetabilium* 2: 29, 501. 1817, *Fundamenta Agrostographiae* 134. 1820 [1822] *Flora Rossica* 4(13): 393. 1852 and *Die Systematik und Anatomie der Arundineae* 54-55. 1961, *Contributions from the United States National Herbarium* 46: 537-539, 635. 2003.

Xerochloa R. Br. = *Kerinozoma* Steud.

Greek *xeros* “dry” and *chloe*, *chloa* “grass,” referring to the habitat.

About 4 species, Asia, Australia. Panicoideae, Panicodae, Paniceae, or Spinificinae, annual or perennial, woody or herbaceous, tufted, persistent, erect, decumbent, auricles absent, ligules fringed, plants bisexual, inflorescence glo-

bose or paniculate, on upper culm node fascicle of several single racemes, spikelets in bunches subtended by bracts, 1-2 glumes membranous, lower lemma grooved, upper lemma fusiform and beaked, palea present, lodicules absent, ovary glabrous, 2 stigmas, 2-3 staminodes, foliage and grain grazed at all stages, salt-tolerant, pioneer and colonising plants on coastal salt flats and inland clay pans, open areas, floodplains, grassland, type *Xerochloa imberbis* R. Br., see *Species Plantarum* 2: 1045. 1753, Robert Brown, *Prodromus Florae Novae Hollandiae*. 196. 1810, *Synopsis Plantarum Glumacearum* 1: 358. 1854 [1855] and *Flora of Australia* 43: 122-123, 170, 217, 242, 275. 2002.

Species

X. barbata R. Br. (*Andropogon barbatus* (R. Br.) Raspail)

Australia. Perennial, subterete leaf blades, see *Annales des Sciences Naturelles (Paris)* 5: 307. 1825.

X. cheribon (Steud.) Ohwi (*Kerinozoma cheribon* Steud.)
Japan. See *Synopsis Plantarum Glumacearum* 1: 358. 1854 and *Bulletin of the Tokyo Science Museum* 18: 4. 1947.

X. imberbis R. Br.

Australia. Perennial, subterete leaf blades, an increaser species, salt-tolerant.

in English: rice grass

X. laniflora Benth.

Australia. Annual, flat leaf blades, salt-tolerant, found in seasonally flooded river beds, riverbanks, see *Flora Australiensis: A Description ...* 7: 502. 1878.

Xerodanthia J.B. Phipps = *Danthoniopsis* Stapf

Greek *xeros* “dry,” *anthos* “flower.”

Arundinelleae, type *Xerodanthia barbata* (Nees) J.B. Phipps, see *Florae Africae Australioris Illustrationes Monographicae* 269. 1841, *Flora Orientalis* 5: 552. 1884 and *Hooker's Icones Plantarum* 31: t. 3075. 1916, *Kirkia* 5(2): 230-231, 235-258. 1966, *Kew Bulletin* 21(1): 119-124. 1967.

Xiphagrostis Coville = *Miscanthus*
Andersson

From the Greek *xiphos* “a sword” plus *agrostis*, *agrostidos* “grass, weed, couch grass.”

Panicoideae, Andropogoneae, Saccharinae, see *Sertum Austro-Caledonicum* 13, t. 18. 1824, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 2(3): 333. 1832, *Öfversigt af Förhandlingar: Kongl. Svenska Vetenskaps-Akademiens* 12: 165-166. 1855, *Bulletin de l'Herbier Boissier* 7(9): 639. 1899 and *Contributions from the United States National Herbarium* 9: 399-400. 1905, *U.S. Department of Agriculture Bureau of Plant Industry Bulletin* 137: 17. 1909, *U.S. Dept. Agric. Bull.* 772: 254. 1920, *Contributions from the United States National Herbarium* 46: 294-295, 550-557, 635. 2003.

Xyochlaena Stapf = *Melinis* P. Beauv.,
Tricholaena Schrader, *Tricholaena* Schrad. ex
Schult. & Schult.f.

Greek *xyo* “to scrape, to make smooth, to carve wood” and *chlaena*, *chlaenion* “cloak, blanket.”

Panicoideae, Paniceae, Melinidinae, type *Xyochlaena monachne* (Trin.) Stapf, see *Systema Vegetabilium* 2: 457. 1817, *Neue Entdeckungen im ganzen Umfang der Pflanzenkunde* 2: 86. Leipzig 1821, *Mantissa* 2: 8, 163. 1824, *Synopsis Plantarum Glumacearum* 1: 37. 1855 [1853], *Proceedings Botanical Soc. Edinburgh* 12: 97. 1882 and *Flora of Tropical Africa* 9: 16. 1917, *Hooker's Icones Plantarum* 31: t. 3098. 1922, *Annals of the South African Museum* 16: 395. 1925, *Flora of Tropical Africa* 9: 332. 1930, *Flora of Tropical East Africa* 451-898. 1982, *Bibliotheca Botanica* 138: 1-149. 1988, *Contributions from the United States National Herbarium* 46: 287, 623. 2003.

Xystidium Trin. = *Perotis* Aiton

Perhaps from the Greek *xyston* “a spear, dart, pole” or from *xystis*, *idos* “a rich and soft robe, a garment.”

Cynodonteae, type *Xystidium maritimum* Trin., see *Hortus Kewensis* 1: 85. 1789, *Fundamenta Agrostographiae* 102, t. 2. 1820, *Reliquiae Haenkeanae* 1(4-5): 228. 1830.

Y

Yadakeya Makino = *Pseudosasa* Makino ex Nakai

Bambusoideae, Bambuseae, Arundinariinae, type *Yadakeya japonica* (Siebold & Zucc. ex Steud.) Makino, see *Synopsis Plantarum Glumacearum* 1: 334. 1854 and *Journal of Japanese Botany* 2(4): 15. 1920, *Journal of the Arnold Arboretum* 6(3): 150. 1925, *Journal of Japanese Botany* 6(7): 15-16. 1929, *Taxon* 6(7): 207. 1957, *Contributions from the United States National Herbarium* 39: 106-107. 2000.

Yakirra Lazarides & R. Webster

The Aboriginal (in Australia) name for a species of the genus.

About 5-7 species, Australia, Myanmar (Burma). Panicoideae, Panicodae, Paniceae, annual or short-lived perennial, herbaceous, caespitose, narrow leaves flat and linear to lanceolate, plants bisexual, inflorescence racemose or paniculate sometimes unbranched, panicle open and terminal or more or less contracted and axillary, dorsally compressed spikelets long-pedicellate and solitary, upper floret borne on a cylindrical internode, glumes very unequal, sterile lemma stipitate, second glume and sterile lemma beaked, fertile lemma hard and smooth, elongated rachilla internode between the glumes, elongated rachilla internodes between the florets, 2 membranous auricles never adnate to the lemma base, elaiosomes, sometimes referred to *Ichnanthus* P. Beauv., seeds ground with water and baked, type *Yakirra pauciflora* (R. Br.) Lazarides & R.D. Webster, see *Essai d'une Nouvelle Agrostographie* 56. 1812 and *Austral. J. Bot.* 33: 579-583. 1985, Michael Lazarides and Robert D. Webster, in *Brunonia*. 7(2): 292. (Mar) 1985, *Flora of Australia* 43: 223, 242, 276. 2002.

Species

Y. australiensis (Domin) Lazarides & R.D. Webster (*Ichnanthus australiensis* (Domin) Hughes; *Panicum australiense* Domin; *Panicum pauciflorum* R. Br. var. *fastigiatum* Benth.)

South Australia, Western Australia, Northern Territory, Queensland. Short-lived, low, dense, several stems, leaf blades lanceolate, panicle more or less contracted and axillary, spikelets acute and glabrous, first glume acute and

broad, second glume acuminate, fertile lemma smooth and glossy, a 2-lobed appendage below the palea, fodder, see *Prodromus Florae Novae Hollandiae* 191. 1810, *Flora Australiensis: A Description ...* 7: 483. 1878 and *Journal of the Linnean Society, Botany* 41: 271, t. 10, 11, f. 7, 8-12. 1912, *Bulletin of Miscellaneous Information Kew* 1923(9): 329. 1923, *Brunonia* 7(2): 293. 1985.

in English: bunch panic

Y. australiensis (Domin) Lazarides & R.D. Webster var. *australiensis*

Australia.

Y. australiensis (Domin) Lazarides & R.D. Webster var. *intermedia* R.D. Webster

Australia. See *The Australian Paniceae (Poaceae)* 266. 1987.

Y. websteri B.K. Simon

Australia, Queensland. See *Austrobaileya* 3(4): 602, f. 9. 1992.

Ystia Compère = *Schizachyrium* Nees

Named after Rd. Père Vanderyst (van der Yst), Belgian agrostologist.

Panicoideae, Andropogoneae, Andropogoninae, type *Ystia stagnina* Compère, see *Flora Brasiliensis seu Enumeratio Plantarum* 2(1): 331-332. 1829, *Plantae Junghuhnianae* 3: 359. 1854 and *Bulletin du Jardin Botanique de l'État* 33: 400. 1963, *Contributions from the United States National Herbarium* 46: 560-569, 635. 2003.

Yuezhuea Yi = *Chimonobambusa* Makino, *Menstruocalamus* Yi, *Monstruocalamus* Yi, *Sinobambusa* Makino ex Nakai

From the Chinese yueyue-zhu shu, yueyue-zhu, yue yue zhu.

Bambusoideae, Bambuseae, Arundinariinae, or Bambusoideae, Bambuseae, Shibataeinae, ornamental, hedges, type *Yuezhuea sichuanensis* (Yi) Yi, see *Journal of the Arnold Arboretum* 6(3): 152. 1925, *Taxon* 6(7): 209. 1957, *Agriculture Handbook* 193: i-iii, 1-74. 1961, *Bulletin of Botanical Research, Harbin* 2(4): 105-107, f. 4. 1982, *J. Bamboo Res.* 6(3): 33. 1987, *Kew Bulletin* 44(2): 349-367. 1989, *Acta Phytotaxonomica Sinica* 29(5): 452-455. 1991, *Journal of Bamboo Research* 11(1): 38, 40, 41, f. 1. 1992, *A Compendium of Chinese Bamboo* 221. 1994, *Flora Reipublicae Popularis Sinicae* 9(1): i-xxvi, 1-761. 1996, D. Ohrenberger, *The Bamboos of the World*, Elsevier Science B.V., Amsterdam, The Netherlands. 1999, *Contributions from the United States National Herbarium* 39: 36, 113. 2000.

Yushania Keng f. = *Burmabambus* Keng f., *Butania* Keng f., *Fargesia* Franch., *Otatea* (McClure & E.W. Sm.) Calderón & Soderstrom, *Sinarundinaria* Nakai

Of Yushan, Taiwan.

About 60-84 species, Asia and Africa, Taiwan to Sabah, Malaysia, China. Bambusoideae, Bambusodae, Bambuseae, perennial, sympodial, arbuscular, shrubby, woody and persistent, diffuse, erect below and nodding above, 1-7-many branches at each node, nodes not swollen, nodes supranodal ridge with spine-like aerial roots below, rhizomes pachymorph and invasive, rhizome long necks hollow or solid, diffuse or pluricaespitose, walls relatively thin, flowering culms leafy, leaves lanceolate, culm sheaths persistent, culm

internodes hollow, plants bisexual and unarmed, flowering semelautant, inflorescence paniculate borne terminally on leafy branches, spikelets several-to many-flowered, bisexual spikelets, 2-14 florets, 2 glumes, 3 lodicules, 3 stamens, 2-3 stigmas plumose, temperate bamboos, forming dense thickets difficult to control, waxy internodes usually rough, culms are harvested for fencing, found in mountain forests, some taxonomic confusion concerning this genus, type *Yushania niitakayamensis* (Hayata) Keng f., see *J. Linn. Soc. Bot.* 19: 31. 1881 and *Journal of Japanese Botany* 11(1): 1. 1935, *Acta Phytotaxonomica Sinica* 6(4): 355-356. 1957, *Primates* 10: 103-148. 1969, *Smithsonian Contributions to Botany* 9: 1-148. 1973, *Smithsonian Contributions to Botany* 44: 1-27. 1980, *Journal Nanjing University. Y. auctiaurita Yi

China. See *Acta Botanica Yunnanica* 13(2): 145-146, pl. 2. 1991.

Y. baishanzuensis Z.P. Wang & G.H. Ye

China. Young culm scabrous, dark purple sheath shedding late, sheath blade hastate or linear, sheath auricles present and indistinct, sheath ligule truncate and finely ciliate, leaves glabrous linear-lanceolate or ovate lanceolate, see *Journal Nanjing University. Natural Sciences Edition* 1983(3): 494, f. 4, 5. 1983, *Acta Phytotaxonomica Sinica* 29(5): 452-455. 1991.

Y. basihirsuta (McClure) Z.P. Wang & G.H. Ye (*Indocalamus basihirsutus* McClure; *Sinarundinaria basihirsuta* (McClure) C.D. Chu & C.S. Chao; *Yushania longipilosa* Wen & S. C. Chen)

China, Guangdong. See *Sunyatsenia* 6(1): 35-37. 1941, *Acta Phytotaxonomica Sinica* 18(1): 22. 1980, *Journal Nanjing University. Natural Sciences Edition* 1981(1): 92. 1981, *Bamboo Research in Asia* 1: 4. 1981, *Journal of Bamboo Research* 4(2): 13, f. 4. 1985.

Y. baviensis (Balansa) J.J.N. Campbell ex Ohrnb. (*Arundinaria baviensis* Bal.; *Chimonobambusa baviensis* (Bal.) Nakai; *Pleioblastus baviensis* (Bal.) T.Q. Nguyen)

Vietnam. See *Journal de Botanique* (Paris) 4: 27. 1890 and *Journal of the Arnold Arboretum* 6: 151. 1925, *Bot. Zhurn.* 75(2): 225. 1990.

Y. bojieiana Yi

China, Yunnan. Sheath persistent shorter than internode, 6-8 branches on each node, in evergreen hardwood forests, see *Journal of Bamboo Research* 5(1): 8, f. 1. 1986.

Y. brevipaniculata (Hand.-Mazz.) T.P. Yi (*Arundinaria brevipaniculata* Hand.-Mazz.; *Arundinaria chungii* Keng; *Fargesia brevipaniculata* (Hand.-Mazz.) Z.Y. Li & D.Z. Fu; *Sinarundinaria brevipaniculata* (Hand.-Mazz.) Keng f.; *Sinarundinaria chungii* (Keng) Keng f.; *Yushania chungii* (Keng) Z.P. Wang & G.H. Ye)

Asia temperate, China, Sichuan. Sheath persistent or falling late, sheath blade slender and long lanceolate, sheath auricle sickle-shaped and densely silky, leaves lanceolate, food for panda, see *Kaiserliche Akademie der Wissenschaften in Wien. Mathematisch-Naturwissenschaftliche Klasse. Anzeiger.* 57: 237. 1920, *Icon. Pl. Omeiensium* 1(2): t. 53. 1944, *Technical Bulletin of the National Forestry Research Bureau* 8: 13. 1948, *Journal Nanjing University. Natural Sciences Edition* 1981(1): 93. 1981, *Journal of Bamboo Research* 5(1): 44. 1986, *Vascular Plants of the Hengduan Mountains* 2: 2163. 1994.

Y. brevis Yi

China, Yunnan. Culm wall thick, solid, sheath persistent, 3-6 branches on each node, shoot greenish, sheath auricles absent, sheath ligule truncate, leaves linear-lanceolate, in evergreen hardwood forests, see *Journal of Bamboo Research* 5(1): 11, t. 2. 1986.

Y. burmanica Yi

Burma. See *Journal of Bamboo Research* 14(2): 1, f. 1. 1995.

Y. canoviridis G.H. Ye & Z.P. Wang (*Fargesia canoviridis* Z.Y. Li; *Monospatha canoviridis* (G.H. Ye & Z.P. Wang) W.T. Lin)

China. Sheath greenish, sheath auricle present, small and narrow leaf, similar to *Yushania farinosa* Wang & Ye, see *Acta Phytotaxonomica Sinica* 27(3): 228, pl. 1, f. 1-4. 1989, *Journal of Bamboo Research* 13(4): 1-3, f. 1. 1994, *Journal of South China Agricultural University* 16(3): 49. 1995, *Keys to the Vascular Plants of the Wuling Mountains*, edited by Wang Wen Tsai, Li Zheng Yu, Li Liang Qian, Su Zhi Yun, Wang Ying Ming, Wu Te-Lin and Zhao Zuo Cheng, Beijing 1995.

Y. cartilaginea Wen

China, Guangxi. Sheath hard coriaceous much shorter than internode and ciliate, sheath auricle ovate to falciform, sheath ligule indistinct, leaves broadly lanceolate, see *Journal of Bamboo Research* 3(2): 28, t. 4. 1984.

Y. cava Yi

China, Sichuan, Shimian. Smooth, glabrous, hollow, 4-9 branches per node, sheath caducous, sheath blade erect, sheath auricles absent, sheath ligule concave, leaves linear-lanceolate, food for giant panda, see *Journal of Bamboo Research* 4(2): 33-34, f. 13. 1985.

Y. chingii Yi (*Sinarundinaria chingii* (T.P. Yi) K.M. Lan)

China, Guangxi, Tianlin, Guizhou. Erect or slanting, internodes usually scabrous, a pruinose ring below joint, 1 branch at each node, sheath persistent, sheath blade linear-lanceolate, sheath auricles falciform, sheath ligule truncate, leaves lanceolate to oblong-lanceolate, see *Journal of Bamboo Research* 5(1): 45, f. 16. 1986, *Flora Guizhouensis* 5: 290. 1988.

Y. chungii (Keng) Z.P. Wang & G.H. Ye (*Arundinaria chungii* Keng; *Sinarundinaria chungii* (Keng) Keng f.; *Yushania brevipaniculata* (Hand.-Mazz.) T.P. Yi)

China. See *Icon. Pl. Omeiensium* 1(2): t. 53. 1944, *Technical Bulletin of the National Forestry Research Bureau* 8: 13. 1948, *Journal Nanjing University. Natural Sciences Edition* 1981(1): 93. 1981.

Y. collina Yi (*Fargesia collina* (T.P. Yi) Z.Y. Li & D.Z. Fu)

China, Sichuan. Young culm with a pruinose ring below joint, 6-10 branches on each node, sheath persistent, no sheath auricles, sheath ligule truncate or concave, leaves lanceolate, see *Journal of Bamboo Research* 5(1): 13, t. 3. 1986, *Vascular Plants of the Hengduan Mountains* 2: 2164. 1994.

Y. complanata Yi (*Fargesia canoviridis* Z.Y. Li; *Fargesia canoviridis* (T.P. Yi) Z.Y. Li; *Fargesia complanata* (T.P. Yi) Z.Y. Li; *Sinarundinaria complanata* (T.P. Yi) K.M. Lan)

China, Guizhou. Sheath caducous, 3-5 branches on each node, no sheath auricles, sheath ligule concave, leaves lanceolate, see *Journal of Bamboo Research* 5(1): 15, f. 4. 1986, *Flora Guizhouensis* 5: 290. 1988, *Keys to the vascular plants of the Wuling mountains* 581. 1995.

Y. confusa (McClure) Z.P. Wang & G.H. Ye (*Arundinaria nitida* Mitford ex Stapf; *Fargesia confusa* (McClure) Z.Y. Li & D.Z. Fu; *Indocalamus confusus* McClure; *Sinarundinaria confusa* (McClure) Keng f.)

China, Sichuan, Yunnan, Jiangxi. Culm sheath caducous purplish, see *Bulletin of Miscellaneous Information Kew* 109: 20. 1896 and *Lingnan University Science Bulletin* 9: 20. 1940, *Technical Bulletin of the National Forestry Research Bureau* 8: 13. 1948, *Journal Nanjing University. Natural Sciences Edition* 1981(1): 92. 1981, *Vascular Plants of the Hengduan Mountains* 2: 2164. 1994.

Y. crassicollis Yi

China, Yunnan. Sheath persistent longer than internode and densely silky, 6-11 branches on each node of the culm, sheath blade linear-lanceolate, sheath auricles absent, sheath ligule concave, 3-6 leaves on each twig, leaves lanceolate, edible shoot, culms used in weaving, see *Bulletin of Botanical Research* 8(4): 68-69, f. 3. 1988.

Y. crispata Yi (*Fargesia crispata* (T.P. Yi) Z.Y. Li & D.Z. Fu)

China, Sichuan. Culm nearly solid, pruinose when young, longitudinal stripes, sheath persistent coriaceous, sheath blade linear-lanceolate, sheath auricles absent, sheath ligule arcuate or truncate, leaves linear-lanceolate, culm used for house buildings, handles, for weaving, in hardwood forest, see *Journal of Bamboo Research* 19(1): 26. 1991, *Vascular Plants of the Hengduan Mountains* 2: 2163. 1994.

Y. dafengdingensis Yi

China. See *Journal of Bamboo Research* 15(3): 9-12, f. 4. 1996.

Y. densifolia (Munro) R.B. Majumdar (*Arundinaria densifolia* Munro; *Chimonobambusa densifolia* (Munro) Nakai; *Sinarundinaria densifolia* (Munro) C.S. Chao & Renvoize)

Sri Lanka. See *Transactions of the Linnean Society of London* 26(1): 32. 1868 and *Journal of the Arnold Arboretum* 6: 151. 1925, *Smithsonian Contr. Bot.* 72: 12. 1988, *Kew Bulletin* 44(2): 354. 1989, *Fl. Ind. Enumerat.-Monocot.* 282. 1989.

Y. elegans (Kurz) R.B. Majumdar (*Arundinaria elegans* Kurz; *Burmabambus elegans* (Kurz) Keng f.; *Sinarundinaria elegans* (Kurz) C.S. Chao & Renvoize; *Sinobambusa elegans* (Kurz) Nakai)

Burma. See *Journal of the Asiatic Society of Bengal. Part 2. Natural History* 42: 249. 1873 and *Journal of the Arnold Arboretum* 6(3): 152. 1925, *Journal of Bamboo Research* 1(2): 40. 1982, *Kew Bulletin* 44(2): 357. 1989, *Fl. Ind. Enumerat.-Monocot.* 282. 1989.

Y. elevata Yi

China, Yunnan. Sheath shedding late, sheath shorter than internode, 10-20 branches per node, no sheath auricles, sheath ligule concave, leaves narrow lanceolate, culm used in fencing, in hardwood forests, along stream banks, see *Journal of Bamboo Research* 5(1): 17, t. 5. 1986.

Y. exilis Yi

China, Sichuan. Sheath persistent, 5-8 branches on each node of the culm, slender twigs, no sheath auricles, sheath ligule truncate, leaves linear-lanceolate, in evergreen broad-leaved forest, see *Journal of Bamboo Research* 5(1): 20, t. 6. 1986.

Y. falcataurita Hsueh & Yi

China, Yunnan. Culm wall thick nearly solid, pruinose under the node, 5-15 branches per node, sheath shedding late, sheath auricles falciform, sheath ligule concave, leaves lanceolate, see *Journal of Bamboo Research* 5(1): 22, f. 7. 1986.

Y. farcticaulis Hsueh & Yi (*Fargesia farcticaulis* (T.P. Yi) Z.Y. Li & D.Z. Fu)

China, Yunnan. Internode nearly solid, mostly branches fascicled, sheath persistent, sheath auricles absent, sheath ligule arcuate or truncate, leaves lanceolate, see *Journal of Bamboo Research* 5(1): 24, f. 8. 1986, *Vascular Plants of the Hengduan Mountains* 2: 2164. 1994.

Y. farinosa Wang & Ye

China, Yangming, Hunan. Culm sheath blackish purple shedding late, sheath blade narrow-lanceolate to ribbon-like, no sheath auricles, sheath ligule purplish green, 3-5 leaves on each twig, leaf long ovate-lanceolate, see *Journal Nanjing University. Natural Sciences Edition* 1981(1): 93, f. 1. 1981.

Y. flexa Yi

China, Sichuan. Similar to *Yushania exilis* Yi, strips used in weaving, found in hardwood forests, along stream banks, on hill slopes, see *Acta Phytotaxonomica Sinica* 25(6): 480-481, pl. 1. 1987.

Y. glandulosa Hsueh & Yi

China, Yunnan. Pruinose ring under node, sheath persistent and coriaceous, shorter than internode, sheath blade linear-lanceolate, sheath auricle and cilia absent, sheath ligule drooping, 1-3 leaves on each twig, leaves ovate-lanceolate and glabrous, see *Bulletin of Botanical Research* 8(4): 73-76, f. 6. 1988.

Y. glauca Yi & T.L. Long

China, Sichuan. Young culm pruinose and glabrous, 3-5 branches at each node, sheath persistent oblong yellowish, sheath blade triangular or lanceolate, sheath auricles purplish red and prominent, leaves lanceolate, a food species for giant panda, see *Journal of Bamboo Research* 8(2): 33-36, f. 2. 1989.

Y. grammata Yi (also spelled *grummata*)

China, Yunnan. Sheath persistent shorter or longer than internode, 1 branch at each node, small sheath auricles deciduous, sheath ligule truncate, leaves lanceolate, culm used for house buildings and for making musical instruments, see *Journal of Bamboo Research* 9(3): 30-33, f. 3. 1990.

Y. hirsuta (Munro) R.B. Majumdar (*Arundinaria hirsuta* Munro; *Sinarundinaria hirsuta* (Munro) Chao & Renvoize)

India, Sikkim, Bhutan. Culm sheaths solid, see *Transactions of the Linnean Society of London* 26(1): 30. 1868 and *Fl. Ind. Enumerat.-Monocot.* 282. 1989, *Kew Bulletin* 44: 355. 1989.

Common names: hima, ustoh

Y. hirticaulis Wang & Ye

China, Jiangxi. Silky and pruinose, 3 or more branches per node, dark purple sheath persistent or shedding late, sheath blade triangular or broadly lanceolate, small sheath auricle slanting, sheath ligule dark purple slightly arcuate and ciliate, 3-5 leaves on each twig, leaves linear-lanceolate, see *Journal Nanjing University. Natural Sciences Edition* 1981(1): 94, f. 2. 1981.

Y. humbertii (A. Camus) Ohrnb. (*Arundinaria humbertii* A. Camus; *Sinarundinaria humbertii* (A. Camus) C.S. Chao & Renvoize)

Madagascar. See *Bulletin de la Société Botanique de France* 73: 624-625. 1927, *Kew Bulletin* 44(2): 362. 1989.

Y. lacera Q.F. Zheng & K.F. Huang

China. Young culm pruinose, 3-6 branches per node, sheath coriaceous shorter than internode, sheath auricles absent or papillose, 3-5 leaves on each twig, leaves lanceolate, see

Acta Phytotaxonomica Sinica 22(3): 218-219, pl. 1, f. 2a-g. 1984.

Y. laetevirens Yi

China, Yunnan. Internode pruinose when young, 5-9 branches on each node, sheath persistent, no sheath auricles and no cilia, sheath ligule truncate, leaves linear-lanceolate, see *Journal of Bamboo Research* 9(3): 34-35, f. 4. 1990.

Y. levigata Yi

China, Yunnan. Sheath persistent, 4-15 branches per node, no sheath auricles and no cilia, sheath ligule truncate or concave, leaves lanceolate or linear-lanceolate, shoot not edible, culms for papermaking and weaving, see *Journal of Bamboo Research* 5(1): 27, f. 9. 1986.

Y. lineolata Yi

China, Sichuan. Pruinose when young, sheath persistent or shedding late, 3-7 branches per node, sheath blade linear-lanceolate, food for giant panda, see *Journal of Bamboo Research* 4(2): 31-33, f. 12. 1985.

Y. longiaurita Q.F. Zheng & K.F. Huang

China. When young pruinose under the node, 1-5 branches on each node, sheath shorter than internode, leaf lanceolate, 5-9 leaves on each twig, leaf lanceolate, see *Acta Phytotaxonomica Sinica* 22(3): 217, pl. 1, f. 1a-f. 1984.

Y. longissima K.F. Huang & Q.F. Zheng (*Yushania longissima* T.P. Yi, nom. illeg., non *Yushania longissima* K.F. Huang & Q.F. Zheng)

China, Tibet. Young culm densely silky, pruinose under the node, 3-7 branches on each node, sheath shedding late, sheath coriaceous, no sheath auricles and no cilia, sheath ligule truncate, leaves linear-lanceolate or lanceolate, found on acid soil, see *Wuyi Science Journal* 2(2): 20, f. 3. 1982, *Journal of Bamboo Research* 2(2): 46, f. 11. 1983.

Y. longiuscula Yi

China, Yunnan. Internode solid, 8-13 fascicled branches on each node, sheath persistent, no sheath auricles, sheath ligule truncate or concave, leaves lanceolate, found in hardwood forest, see *Journal of Bamboo Research* 5(1): 30, f. 10. 1986.

Y. mabianensis Yi

China, Sichuan, Mabian. Purple spot when young, 1 or 3-4 branches per node, sheath persistent, auricles falciform, sheath ligule truncate, leaves lanceolate, in broad-leaved forest, see *Journal of Bamboo Research* 5(1): 47, f. 17. 1986.

Y. maculata Yi (*Fargesia maculata* (T.P. Yi) Z.Y. Li & D.Z. Fu)

China, Yunnan. Young culm pruinose, sheath persistent densely silky, sheath blade linear-lanceolate, no sheath auricles, sheath ligule truncate, leaves linear-lanceolate, see *Journal of Bamboo Research* 5(1): 33, f. 11. 1986, *Vascular Plants of the Hengduan Mountains* 2: 2163. 1994.

Y. madagascariensis (A. Camus) Ohrnb. (*Arundinaria madagascariensis* A. Camus; *Sinarundinaria madagascariensis* (A. Camus) C.S. Chao & Renvoize)

Madagascar. See *Bulletin du Muséum National d'Histoire Naturelle* 30: 394. 1924, *Kew Bulletin* 44(2): 362. 1989.

Y. maling (Gamble) R.B. Majumdar (*Arundinaria maling* Gamble; *Fargesia maling* T.P. Yi; *Fargesia maling* (Gamble) H. Simon ex D. McClintock; *Sinarundinaria maling* (Gamble) C.S. Chao & Renvoize; *Yushania maling* (Gamble) D.C. McClint. & Stapleton, nom. illeg., non *Yushania maling* (Gamble) R.B. Majumdar; *Yushania maling* (Gamble) Demoly, nom. illeg., non *Yushania maling* (Gamble) R.B. Majumdar)

India, Sikkim, Darjeeling, Bhutan, East Nepal. Erect, long rhizome, culm sheaths papery, spikelets long and narrow, see *Bulletin of Miscellaneous Information Kew* 1912: 139. 1912, *Kew Bulletin* 44: 356. 1989, *Fl. Ind. Enumerat.-Monocot.* 283. 1989, *Acta Botanica Yunnanica* 11(1): 37-38, f. 2. 1989, *Bamboo Soc. Newsl.* 12: 10. 1991, *Fl. Ind. Enumerat.-Monocot.* 15: 6. 1992.

Common names: maling, pheung

Y. marojejensis (A. Camus) Ohrnb. (*Arundinaria marojejensis* A. Camus)

Madagascar. See *Bulletin de la Société Botanique de France* 97: 84. 1950.

Y. megalothyrsa (Hand.-Mazz.) Wen (*Arundinaria megalothyrsa* Hand.-Mazz.; *Gaoligongshania megalothyrsa* (Hand.-Mazz.) D.Z. Li, J.R. Xue & N.H. Xia; *Indocalamus megalothyrsa* (Hand.-Mazz.) C.S. Chao & C.D. Chu; *Monocladus megalothyrsus* (Hand.-Mazz.) T.P. Yi)

China, Yunnan. See *Symbolae Sinicae* 7(5): 1270-1271. 1936, *J. Nanjing Techn. Forest. Prod.* 1981(3): 44. 1981, *Journal of Bamboo Research* 6(3): 34. 1987, *Acta Phytotaxonomica Sinica* 26(3): 212. 1988, *Journal of Bamboo Research* 12(2): 54. 1993, *Acta Phytotaxonomica Sinica* 33(6): 598, 600-601, pl. 1. 1995.

Y. menghaiensis Yi

China, Yunnan. Glossy, green, pruinose when young, 5-20 branches at each node, sheath persistent yellowish, sheath blade linear-lanceolate to triangular, no sheath auricles, sheath ligule truncate or concave, leaves lanceolate, growing in evergreen hardwood forest, see *Acta Botanica Yunnanica* 10(4): 441-443, f. 4. 1988.

Y. microphylla (Munro) R.B. Majumdar (*Arundinaria microphylla* Munro; *Sinarundinaria microphylla* (Munro) Chao & Renvoize)

Asia tropical, Nepal, Bhutan. Internodes smooth, waxy rings below nodes, culm sheaths tough, forming colonies, forage, animal food, alpine to subalpine, see *Transactions of the Linnean Society of London* 26(1): 32. 1868 and *Fl. Ind. Enumerat.-Monocot.* 283. 1989, *Kew Bulletin* 44(2): 354. 1989, *Rheedea* 7(11): 11-14. 1997.

Common names: mingma, meg

Y. mitis Yi

China, Yunnan. Culm pruinose when young, glabrous, 3-7 branches on each node, sheath caducous with purplish brown spots, no sheath auricles and no cilia, sheath ligule truncate, leaves narrow-lanceolate, edible shoot, culm tough and pliable used for weaving, see *Journal of Bamboo Research* 9(3): 35-37, f. 5. 1990.

Y. monophylla Yi & Yang (*Gelidocalamus monophyllus* (T.P. Yi & B.M. Yang) B.M. Yang; *Gelidocalamus stellatus* T.H. Wen)

China, Hunan. Glabrous, 1 or more leaves on each twig, sheath persistent yellowish brown, sheath blade erect linear-lanceolate, no auricles and no cilia, sheath ligule truncate, leaves lanceolate, see *Journal of Bamboo Research* 1(1): 22-23, f. 1. 1982, *Journal of Bamboo Research* 5(1): 50, f. 18. 1986, *Natural Science Journal of Hunan Normal University* 12(4): 338. 1989, *Acta Phytotaxonomica Sinica* 29(5): 452-455. 1991.

Y. multiramea Yi

China, Yunnan. Culm pruinose when young, solid, sheath persistent, sheath yellowish brown and coriaceous, sheath blade linear-lanceolate, no auricles and no cilia, sheath ligule truncate or concave, leaves lanceolate, see *Bulletin of Botanical Research* 8(4): 69-71, f. 4. 1988.

Y. niitakayamensis (Hayata) Keng f. (*Arundinaria niitakayamensis* Hayata; *Arundinaria oiwakensis* Hayata; *Indocalamus niitakayamensis* (Hayata) Nakai; *Indocalamus oiwakensis* (Hayata) Nakai; *Pleioblastus niitakayamensis* (Hayata) Ohki; *Pleioblastus oiwakensis* (Hayata) Ohki; *Pseudosasa oiwakensis* (Hayata) Makino & Nemoto; *Sasa niitakayamensis* (Hayata) E.G. Camus; *Sinarundinaria niitakayamensis* (Hayata) Keng f.)

Taiwan, the Philippines. Sympodial, erect, base arcuate, 1-3 or more branches on each node, sheath shedding late or persistent, leaves lanceolate, 3 stamens, ornamental, useful for erosion control, found in open grassland, forest, see *Botanical Magazine* 15(168): 18. 1901, *Botanical Magazine* 21(242): 49-50. 1907, *Les Bambusées* 24. 1913, *Icones plantarum formosandarum nec non et contributiones ad floram formosanam*. 6: 137-138, f. 48. 1916, *Journal of the Arnold Arboretum* 6(3): 145, 148, 150. 1925, *Botanical Magazine* (Tokyo) 43: 202. 1929, *Flora of Japan* edition 2, 1389. 1931, *Science Education [Rika Kyô-iku]* 15(6): 67. Tokyo 1932, *Flora of Japan*, Supplement 863. 1936, *Technical Bulletin of the National Forestry Research Bureau* 8: 14. 1948, *Acta Phytotaxonomica Sinica* 6(4): 357. 1957, *Claves Generum et Specierum Graminearum Primarum Sinicarum Appendice Nomenclatione Systematica* 153. 1957, J.Y. Hsiao and L.H. Rieseberg, "Population genetic structure of *Yushania niitakayamensis* (Bambusoideae, Poaceae) in Taiwan." *Molecular Ecology* 3: 201-208. 1994, J.Y. Hsiao and S.M. Lee, "Genetic diversity and microgeo-

graphic differentiation of Yushan cane (*Yushania niitakayamensis*; Poaceae) in Taiwan." *Molecular Ecology* 8(2): 263-270. Feb 1999.

in the Philippines: utod

Y. niitakayamensis (Hayata) Keng var. *microcarpa* (Camus) H.L. Li (*Sasa niitakayamensis* var. *microcarpa* E.G. Camus; *Yushania niitakayamensis* var. *microcarpa* (Hayata) Li)

The Philippines. See *Les Bambusées* 24. 1913, *Woody Fl. Taiwan* 915. 1963.

Y. oblonga Yi

China, Yunnan. Stem knee-jointed, smooth, glossy, pruinose, sheath persistent and yellowish brown, sheath blade erect and linear-lanceolate, sheath auricles oblong purple, sheath ligule truncate, leaves oblong-lanceolate, shoots edible, culm used for weaving and making flutes, see *Journal of Bamboo Research* 5(1): 52, f. 19. 1986.

Y. pachyclada Yi

China, Sichuan. Culm pruinose when young, solid, 1 or 2-5 branches on each node, sheath persistent, no auricles and no cilia, sheath ligule truncate or arcuate, leaves lanceolate, in evergreen hardwood forest, see *Journal of Bamboo Research* 5(1): 54, t. 20. 1986.

Y. pantlingii (Gamble) R.B. Majumdar (*Arundinaria pantlingii* Gamble; *Butania pantlingii* (Gamble) Keng f.; *Semiarundinaria pantlingii* (Gamble) Nakai; *Sinarundinaria pantlingii* (Munro) Chao & Renvoize; *Sinarundinaria pantlingii* (Gamble) C.S. Chao & Renvoize) (for the British botanist Robert Pantling, 1856/1857-1910 (Egypt), Kew gardener, Curator Royal Botanic Gardens Calcutta and Deputy Superintendent of the Government Cinchona Plantation in Bengal, illustrated Sir George King's (1840-1909) "The Orchids of the Sikkim-Himalaya." in *Annals of the Royal Botanic Garden, Calcutta*. 8(1-4). 1898; see J.H. Barnhart, *Biographical notes upon botanists*. 3: 47. 1965; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. 1917-1933)

Bhutan. Culms very tough, solid, long and narrow spikelets, used for flooring, forest, see *Annals of the Royal Botanic Garden, Calcutta*. 7: 129, t. 118. 1896 and *Journal of the Arnold Arboretum* 6(3): 150-151. 1925, *Journal of Bamboo Research* 1(2): 42. 1982, *Fl. Ind. Enumerat.-Monocot*. 283. 1989, *Kew Bulletin* 44(2): 359. 1989.

Common name: zing

Y. papillosa (W.T. Lin) Ohrnb. (*Sinarundinaria papillosa* W.T. Lin; *Yushania papillosa* (W.T. Lin) W.T. Lin)

China. See *Journal South China Agricultural University* 14(3): 111-112. 1993, *Journal South China Agricultural University* 16(3): 49. 1995.

Y. pauciramificans Yi

China, Yunnan. Green, dark purple, pruinose when young, solid, 1 or 2-5 branches on each node, sheath persistent shorter than internode, sheath blade linear-lanceolate, no sheath auricles, sheath ligule truncate or concave, leaves ovate-lanceolate, see *Bulletin of Botanical Research* 8(4): 71-73, f. 5. 1988.

Y. perrieri (A. Camus) Ohrnb. (*Arundinaria perrieri* A. Camus)

Madagascar. See *Bulletin du Muséum National d'Histoire Naturelle* 30: 395. 1924.

Y. polytricha Hsueh & Yi

China, Yunnan. Culm pruinose when young, solid, 1-5 branches on each node, sheath persistent yellowish, purple sheath auricles falciform, sheath ligule truncate or arcuate, leaves lanceolate, in evergreen hardwood forest, see *Journal of Bamboo Research* 5(1): 58, f. 21. 1986.

Y. punctulata Yi

China, Sichuan. Young culm purplish, a pruinose ring below each joint, dark purple sheath persistent, sheath blade linear-lanceolate, no sheath auricles, sheath ligule truncate, leaves lanceolate or linear-oblong, in evergreen hardwood forest, see *Journal of Bamboo Research* 5(1): 59, f. 22. 1986.

Y. qiaojaensis Hsueh & Yi

China, Yunnan. Culm pruinose when young, 5-6 branches at each node, sheath caducous yellowish brown shorter than internode, sheath blade erect linear-triangular, no sheath auricles, sheath ligule truncate, leaves lanceolate or linear-lanceolate, see *Journal of Bamboo Research* 5(1): 35, f. 12. 1986.

Y. qiaojaensis Hsueh & Yi f. *nuda* Yi

China, Yunnan, Yongshan. Back of sheath glabrous, shoot edible, strips for weaving, see *Journal of Bamboo Research* 9(3): 42-43. 1990.

Y. qiaojaensis Hsueh & Yi var. *nuda* Yi

China, Yunnan, Yongshan. Back of sheath glabrous, shoot edible, strips for weaving, see *Journal of Bamboo Research* 9(3): 42-43. 1990.

Y. qiaojaensis Hsueh & Yi var. *qiaojaensis*

China, Yunnan.

Y. racemosa (Munro) R.B. Majumdar (*Arundinaria racemosa* Munro; *Fargesia racemosa* (Munro) Yi; *Sarocalamus racemosus* (Munro) Stapleton)

India, Bhutan, China. See *Transactions of the Linnean Society of London* 26(1): 17. 1868 and *Journal of Bamboo Research* 2(1): 39. 1983, *Fl. Ind. Enumerat.-Monocot*. 283. 1989, *Kew Bulletin* 44: 352. 1989, *Cell and Chromosome Research* 15(3): 12. 1992, *Novon* 14(3): 347. 2004.

Y. rigidula (A. Camus) Ohrnb. (*Arundinaria rigidula* E.G. Camus; *Indocalamus rigidulus* (E.G. Camus) Nakai)

China. See *Notulae Systematicae. Herbarium du Museum de Paris* 2(8): 243. 1912, *Journal of the Arnold Arboretum* 6: 148. 1925.

Y. rolloana (Gamble) Yi (*Arundinaria rolloana* Gamble; *Sinarundinaria rolloana* (Gamble) C.S. Chao & Renvoize) (for James Rollo)

India, Naga Hills. See *Annals of the Royal Botanic Garden. Calcutta*. 7: 24, t. 23. 1896 and *Journal of Bamboo Research* 2(1): 39. 1983, *Kew Bulletin* 44(2): 355. 1989.

Y. rugosa Yi (*Sinarundinaria rugosa* (T.P. Yi) K.M. Lan)

China, Guizhou. Young culm purplish, a pruinose ring below each joint, 1-2 nodes basal with aerial roots, 1 branch on each node, shoot purplish red, sheath persistent, no sheath auricles, sheath ligule concave, leaves oblong-lanceolate or ovate-elliptic, old leaves wrinkled, see *Journal of Bamboo Research* 5(1): 61, t. 23. 1986, *Flora Guizhouensis* 5: 292. 1988.

Y. straminea Yi

China, Yunnan. Young culm purplish, a pruinose ring below each joint, 1-3 branches on each node, sheath persistent shorter than the internode, sheath auricles falciform, sheath ligule truncate, culm used in house building and in weaving, see *Journal of Bamboo Research* 9(3): 37-40, f. 6. 1990.

Y. suijiangensis Yi

China, Yunnan. Sheath persistent oblong, 1-4 branches on each node, sheath blade linear-lanceolate, no sheath auricles and no cilia, sheath ligule truncate, leaves oblong-lanceolate, culm used for the abacus, see *Journal of Bamboo Research* 9(3): 40-42, f. 7. 1990.

Y. tessellata (Holtum) S. Dransf. (*Racemobambos tessellata* Holtum)

Sabah, Mt. Kinabalu, Malaysia. Sympodial, erect, open tufted, thin walls, reduced terminal floret, 2 glumes with acuminate tips, palea 2-keeled with hairy keels, 3 lodicules, 3 stamens, ornamental, common in mountain forest, see *Gard. Bull. Sing.* 26: 211. 1973 [also *Gardens' Bulletin, Straits Settlements* 26(2): 211. 1973], *Kew Bulletin* 37(4): 661-679. 1983, S. Dransfield, "The bamboos of Sabah." *Sabah Forest Record* 14: 78-80. 1992.

Y. uniramosa Hsueh & Yi (*Sinarundinaria uniramosa* (J.R. Xue & T.P. Yi) K.M. Lan)

China, Guizhou. Young culm purplish, solid, a pruinose ring below each joint, sheath persistent, sheath blade narrow-lanceolate, no sheath auricles and no cilia, sheath ligule truncate or concave, leaves lanceolate, see *Journal of Bamboo Research* 5(1): 64, f. 24. 1986, *Flora Guizhouensis* 5: 292. 1988.

Y. varians Yi

China, Jiangxi. Sheath persistent, 3-7 branches on each node, leaves linear-lanceolate, see *Journal of Bamboo Research* 5(1): 38, f. 13. 1986.

Y. vigens Yi

China, Yunnan. Solid or nearly solid, culm sheath persistent, 5-9 branches, 3-5 leaves per twig, strips used in weaving, found in evergreen hardwood forests, see *Journal of Bamboo Research* 5(1): 40, f. 14. 1986.

Y. violascens (Keng) Yi (*Arundinaria violascens* Keng; *Fargesia violascens* (Keng) Z.Y. Li & D.Z. Fu; *Sinarundinaria violascens* (Keng) Keng f.)

China, Yunnan. See *Journal of the Washington Academy of Sciences* 26(10): 396. 1936, *Technical Bulletin of the National Forestry Research Bureau* 8: 14. 1948, *Journal of Bamboo Research* 5(1): 45. 1986, *Vascular Plants of the Hengduan Mountains* 2: 2163. 1994.

Y. walkeriana (Munro) R.B. Majumdar (*Arundinaria walkeriana* Munro; *Indocalamus walkerianus* (Munro) Nakai; *Sinarundinaria walkeriana* (Munro) C.S. Chao & Renvoize)

Sri Lanka. See *Transactions of the Linnean Society of London* 26(1): 21. 1868 and *Journal of the Arnold Arboretum* 6: 148. 1925, *Bull. Misc. Inform.* 1938: 126. 1938, *Smithsonian Contr. Bot.* 72: 27. 1988, *Kew Bulletin* 44(2): 354. 1989, *Fl. Ind. Enumerat.-Monocot.* 282. 1989.

Y. wardii (Bor) J.J.N. Campbell ex Ohrnb. (*Arundinaria wardii* Bor)

Burma. See *Kew Bulletin* 12(3): 418. 1958.

Y. weixiensis Yi (*Fargesia weixiensis* (T.P. Yi) Z.Y. Li & D.Z. Fu)

China, Yunnan, Weixi. Young culm pruinose, 3-5 branches on each node, sheath persistent and coriaceous, sheath blade linear-lanceolate, no sheath auricles and no cilia, sheath ligule truncate or arcuate, leaves narrowly lanceolate, see *Journal of Bamboo Research* 5(1): 42, f. 15. 1986, *Vascular Plants of the Hengduan Mountains* 2: 2164. 1994.

Y. wightiana (Nees) R.B. Majumdar (*Arundinaria hispida* Steud.; *Arundinaria wightiana* Nees; *Arundinaria wightiana* var. *hispida* (Steud.) Gamble; *Indocalamus wightianus* (Nees) Nakai; *Indocalamus wightianus* var. *hispida* (Steud.) Nakai; *Sinarundinaria wightiana* (Nees) C.S. Chao & Renvoize; *Yushania wightiana* var. *hispida* (Steud.) R.B. Majumdar & Karth.)

India. See *Linnaea* 9(4): 482. 1834, *Synopsis Plantarum Glumacearum* 1: 335. 1854, *Annals of the Royal Botanic Garden. Calcutta*. 7: 5. 1896 and *Journal of the Arnold Arboretum* 6: 149. 1925, *Kew Bulletin* 44(2): 356. 1989, *Fl. Ind. Enumerat.-Monocot.* 283. 1989.

Y. wuyishanensis Q.F. Zheng & K.F. Huang

China, Fujian. Sheath coriaceous shorter than internode yellow purplish, 3-5 branches on each node, sheath blade linear-lanceolate erect, no sheath auricles, sheath ligule truncate, 6-8 leaves on each twig, leaves lanceolate glabrous

beneath, see *Acta Phytotaxonomica Sinica* 22(3): 219-220, pl. 2. 1984.

***Y. xizangensis* Yi**

China, Tibet. Smooth, glabrous, 12-19 branches on each node, sheath shedding late or persistent and coriaceous, no sheath auricles, sheath ligule arcuate, leaves narrow-lanceolate, on riverbanks, see *Journal of Bamboo Research* 2(2): 50, t. 12. 1983.

***Y. yadongensis* T.P. Yi** (*Fargesia longissima* (Yi) T.P. Yi; *Sinarundinaria longissima* Yi; *Yushania longissima* T.P. Yi, nom. illeg., non *Yushania longissima* K.F. Huang & Q.F. Zheng)

Bhutan, India, Sikkim. Internodes scabrous, temperate forests, along riverbanks and streams, see *Enumeration of the Vascular Plants of Xizang* 387. 1980, *Wuyi Science Journal* 2(2): 20, f. 3. 1982, *Journal of Bamboo Research* 2(2): 46, f. 11. 1983, *Journal of Bamboo Research* 4(2): 33. 1985, *Flora Xizangica* 5: 34-37, f. 16. 1987.

Yvesia A. Camus

Dedicated to the French botanist Alfred Marie Augustine Saint-Yves, 1855-1933, soldier, agrostologist; see J.H.

Barnhart, *Biographical notes upon botanists*. 3: 201. 1965; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 1972; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. 664-665. Philadelphia 1964; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993.

One species, Madagascar. Panicoideae, Panicodae, Paniceae, annual, slender, herbaceous, auricles absent, ligule a fringed membrane, plants bisexual, open inflorescence paniculate, spikelets single, unilateral filiform rachis, 1 glume per spikelet, lower glume absent, upper glume 3-nerved, lemmas mucronate, palea present, 2 free and fleshy lodicules, 3 stamens, ovary glabrous, 2 stigmas, a segregate from *Brachiaria*, see *Bulletin de la Société Botanique de France* 73: 687-690. 1927.

Species

***Y. madagascariensis* A. Camus**

Madagascar. See *Bulletin de la Société Botanique de France* 73: 690, f. 1. 1927.

Z

Zea L. = *Euchlaena* Schrad., *Mays* Miller, *Mayzea* Raf., *Reana* Brignoli, *Thalysia* Kuntze

From the Greek *zeia*, *zea*, name used for a kind of cereal, probably a coarse barley or a fodder for horses; Akkadian *se'u* "grain corn," Sanskrit *yava* "barley," Latin *zea*, *ae* for spelt, *Triticum spelta* L., or for rosemary; see Carl Linnaeus, *Species Plantarum*. 971. 1753 and *Genera Plantarum*. Ed. 5. 419. 1754; Carmen Aguilera, *Flora y fauna Mexicana*. Mitología y tradiciones. 148-152. México [1985]; H. Gen-aust, *Etymologisches Wörterbuch der botanischen Pflanzen-namen*. 697-698. Basel 1996.

About 1-4 species, tropical America. Panicoideae, Andropogonodae, Maydeae, or Panicoideae, Andropogoneae, Tripsacinae, annual and rarely perennial, herbaceous, solid, tall, robust, thick, unbranched, adventitious roots from the lower nodes, culm nodes glabrous, ligule a fringed membrane, leaf sheaths strongly overlapping, leaves with wavy margins, modified leaves forming the ear, plants monoecious, all the fertile spikelets unisexual, male inflorescence a terminal panicle, composed of many spike-like racemes, male and female spikelets on different inflorescences, female inflorescence cylindrical, female inflorescences axillary, male flowers in terminal tassels or terminal primary axis, female flowers on a lateral thickened elongated axis, two glumes subequal, male florets 3-staminate, palea present, lodicules absent, stamens 0, ovary glabrous, 2 stigmas, fruiting inflorescence a cob, the fruits in many rows, cultigen, cultivated fodder, ground as flour, alcohol production, grain crop species, ornamental, intergeneric hybrids with *Euchlaena*, *Saccharum* and *Tripsacum*, type *Zea mays* L., see *Species Plantarum* 2: 971-972. 1753, Philip Miller (1691-1771), *The Gardeners Dictionary*. Containing the methods of cultivating and improving all sorts of trees, plants, and flowers, .. Abridged from the last folio ed. The 4th ed., cor. and enl. London 1754, *The Gardeners Dictionary*: . . . The 8th ed., rev. and altered according to the latest system of botany ... *Zea* no. 1, 3. London 1768, J.M. da Conceição Velloso (1742-1811), *Floræ fluminensis*, seu *Descriptionum plantarum praefectura Fluminensi* sponte nascentium liber primus ad systema sexuale concinnatus. Augustissimæ dominæ nostræ per manus ill.mi ac ex.mi Aloysii de Vasconcellos & Souza Brasilæ pro-regis quarti .. sistit fr. Josephus Marianus a Conceptione Vellozo .. 1790. Sturtev.; *Zea vittata* Hort. ex Vilmorin; *Zea vulgaris* Mill.)

New World, Mexico, Central America. Annual, solid, coarse, stout, tall and robust, straight, growing in dense stands, thick stems filled with pith, upright, poorly developed root system, rooting at basal nodes, internodes cylindrical in the upper part, arching leaves lanceolate and acuminate, sheaths overlapping, separate staminate (male) and pistillate (female) inflorescences, male inflorescences erect in large terminal panicles, the pistillate flowers occur as spikes (cobs) rising from axils of the lower leaves enveloped by large membranous bracts, cultivated as a food crop plant for humans and domesticated animals, palatability excellent for all green matter, ground as flour, alcohol production, the main use of the whole plant is as silage, corn may accumulate free nitrates, dry weather at pollination time seriously affects pollination, period of flowering and to maturity varies greatly, maize is subject to many diseases, maize has no tolerance to flooding, crops are very susceptible to erosion, seed is diuretic and a mild stimulant, a glue is made from the starch in the seed, dried cobs used as a fuel, pith of the stems used as a packing material, a decoction of the leaves and roots is used in the treatment of strangury, dysuria and gravel, numerous cultivars are available throughout the world, cultivated in field, requires a well-drained and fertile soil, fairly drought tolerant, very susceptible to frosts, stigmas are diuretic and anti-hypertensive, see *De Fructibus et Seminibus Plantarum*. . . . 1: 6, t. 1, f. 9. 1788, *Enumeratio Stirpium Transsilvaniae* 3: 281. 1816, *A Manual of Botany for the Northern States* 500. 1818, *Nomenclator Botanicus* 1: 898. 1821, *Annales des Sciences Naturelles, Botanique* 16: 144. 1829, *Catalogo del Real Orto Botanico di Napoli* 99. 1845, *Botanische Zeitung, Berlin* 9: 718. 1851, *Landwirthschaftliche Flora* 309. 1866, *The American Botanist and Florist* 2: 409. 1870, *Proceedings of the American Academy of Arts and Sciences* 26: 160. 1891, *Bulletin of the Torrey Botanical Club* 21: 335. 1894 and *Escritos de Don Damaso Antonio Larrañaga* 1: 217,

Han et al., "Physical mapping of the 5S and 45S rDNA in teosintes." *Hereditas* 137(1): 16-19. Oct 2002.

in English: perennial teosinte

Zeia Lunell = *Triticum* L.

Greek *zeia*, *zea*, name used by Dioscorides for one-seeded wheat, a species of *Triticum*, and by Theophrastus (*HP*. 8.9.2) for rice-wheat.

Pooideae, Triticeae, Triticinae, type *Zeia spelta* (L.) Lunell, see *Species Plantarum* 1: 85-87. 1753 and *American Midland Naturalist* 4: 226. 1915, *Contributions from the United States National Herbarium* 48: 676-684, 694. 2003.

Zenkeria Trinius = *Zenkeria* Arn. (Fabaceae),
Zenkeria Rchb. (Bignoniaceae)

After the German botanist Jonathan Karl Zenker, 1799-1837, studied theology, natural history and medicine, botanical collector, 1825 Dr. med. at Jena, professor of natural history, 1836 professor in the medical faculty, his works include *Die Pflanzen*. Eisenach 1830 and *Plantae indicae*. Jena 1835-1837, with David Nathaniel Friedrich Dietrich (1799-1888) wrote *Musci thuringici*. Jenae 1821; see John H. Barnhart, *Biographical notes upon botanists*. 3: 539. 1965; H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 268. Oxford 1964; G. Schmid, *Goethe und die Naturwissenschaften*. Halle 1940; Giulio Giorello & Agnese Grieco, a cura di, *Goethe scienziato*. Einaudi Editore, Torino 1998.

About 4 species, India, Sri Lanka, Myanmar/Burma. Arundinoideae, Danthonieae, perennial, herbaceous, erect, simple culms, tufted, fibrous base, ligule a fringe of hairs, nodes sparsely pilose, leaf blades flat or rolled, plants bisexual, open inflorescence paniculate, 2 florets, spikelets pedicellate and flattened, two glumes unequal or subequal shorter than lemma, lemmas membranous acute to acuminate, palea present, 2 free and membranous lodicules glabrous, 3 stamens, open areas, grassland, hills, upland, type *Zenkeria elegans* Trin., see *An Introduction to the Natural System of Botany* 449. 1836, *Linnaea* 11(2): 150. 1837, *Mag. Zool. Bot.* 2: 548. 1838, *Der Deutsche Botaniker Herbarienbuch* 236. 1841, *Videnskabelige Meddelelser fra Dansk Naturhistorisk Forening i Kjøbenhavn* 88. 1853 and *Grasses of Burma ...* 481-482. 1960, *Bulletin of the Botanical Survey of India* 15(1-2): 142. 1973[1976], *Ecological Research* 14(4): 371-383. Dec 1999.

Species

Z. elegans Trin. (*Amphidonax heynei* Nees ex Steud.; *Amphidonax tenella* Wight & Arn. ex Steud.)

Southern India. Erect, bunchgrass, large, ligule fimbriate, panicle more or less contracted, spikelets 2-flowered, glumes 1-5-nerved, lemmas 7-9-nerved, palea 2-keeled and ciliate, 3 stamens, see *Linnaea* 11(2): 150, t. 3, f. 1-8. 1837, *Synopsis Plantarum Glumacearum* 1: 197. 1855 [1854] and *Handb. Fl. Ceylon* 5: 268. 1900, *Grasses of Ceylon* 53. 1956, *The Flora of the Tamilnadu Carnatic* 3: 1914. 1983.

in India: kallu bodhai

Z. jainii N.C. Nair, Sreek. & V.J. Nair

India. See *Journal of the Bombay Natural History Society* 78(2): 354. 1981.

Z. obtusiflora (Thw.) Benth. (*Amphidonax obtusiflora* Thwaites)

Sri Lanka. Robust, stout, lemmas obtuse, see *Enumeratio Plantarum Zeylaniae* 370. 1864, *Journal of the Linnean*

Society, Botany 19: 93. 1881 and *Grasses of Ceylon* 53. 1956.

Z. stapfi Henrard

Southern India, Sri Lanka. See *Repertorium Specierum Novarum Regni Vegetabilis* 17: 396. 1921.

Zeocriton Wolf = *Hordeum* L.

Greek *zeia*, *zea* “a kind of cereal” and *krithe* “barley-corn, barley.”

Pooideae, Triticeae, Hordeinae, type *Hordeum zeocriton* L., see *Species Plantarum* 1: 84-85, 560. 1753, *Genera Plantarum* 21. 1776, *Essai d'une Nouvelle Agrostographie* 115, 165, 182, t. 21, f. 2. 1812, *Genera Plantarum* 3(2): 1206. 1883 and *Canad. J. Bot.* 37: 679. 1959, *Acta Bot Neerl.* 15: 161. 1966, *Contributions from the United States National Herbarium* 48: 389-402, 695. 2003.

Zerna Panz. = *Bromopsis* (Dumort.) Fourr., *Bromus* L., *Vulpia* Gmel.

Pooideae, Bromoideae, type *Zerna ramosa* (Huds.) Lindm., see *Species Plantarum* 1: 76-78. 1753, *Flora Badensis Alsatica* 1: 8. 1805, *Ideen zu einer künftigen Revision der Gattungen der Gräser*. 46, 59. 1813, *Observations sur les Graminées de la Flore Belgique* 116, 117. 1823 [1824], *Annales de la Société Linnéenne de Lyon, sér. 2*, 17: 187. 1869 and *U.S.D.A. Div. Agrostol. Bull.* 23: 1-66. 1900, *Svensk Fanerogamflora* 101. 1918, *Brittonia* 7: 421. 1952, *Notes Roy. Bot. Gard.* 30: 366, 372. 1970, *Bot. Jahrb. Syst.* 102: 447. 1981, *Taxon* 41: 559. 1992, *Taxon* 44: 611-612. 1995, *Contributions from the United States National Herbarium* 48: 153-191, 695. 2003.

Zeugites P. Browne = *Desprezgia* Kunth, *Galeottia* M. Martens & Galeotti, *Krombholzia* Rupr. ex E. Fourn., *Senites* Adans.

Greek *zeugites* “yoked, joined in pairs,” Latin *zeugites*, *ae* for Plinius a kind of reed.

About 10-12 species, West Indies, Peru, Mexico, Guatemala, the Caribbean, Venezuela, from northwestern Mexico to central-northern South America. Centothecoideae, Centothecoaceae, or Panicoideae, Centothecoaceae, perennial, herbaceous, sometimes reed-like, branched above, unarmed, erect, decumbent, rooting at the nodes, trailing, scandent, stoloniferous, auricles absent, leaf blades lanceolate to ovate, contracted or long-pseudopetiolate leaves, plants bisexual, open inflorescence paniculate, 2-15-flowered, spikelets with one female and 1-2 male florets, lowermost florets in each spikelet female, male florets acute, glumes

truncate to dentate, palea present, 2 free lodicules, 0 stamens, 2 stigmas, damp places, forest margins, humid slopes, shade, forest floor, hillsides, type *Zeugites americana* Willd., see *Species Plantarum* 1: 82. 1753, *The Civil and Natural History of Jamaica in Three Parts* 341. 1756, *Familles des Plantes* 2: 39, 604. 1763, *Bulletin de la Société Botanique de Belgique* 15(3): 464. 1876, *Mexicanas Plantas* 2: 121. 1886, *Botanical Gazette* 21: 134, t. 12. 1896 and *Österreichische Botanische Zeitschrift* 52(10): 373. 1902, *Fl. Zingeria Smirnov = Zingeriopsis Prob.

After the Russian botanist Basil [Vasilij Jakovlevic, Vasilij Jakololewitsch] Zinger, see *Novosti Sist. Vyss. Rast.* 14: 12. 1977.

About 4-5 species, Russia, Eurasia, Western Asia. Pooideae, Poodae, Aveneae, annual, herbaceous, auricles absent, ligule an unfringed membrane, plants bisexual, open inflorescence paniculate, spikelets pedicellate and flattened or dorsally compressed, two glumes unequal or subequal, lower glume 1-nerved, upper glume 3-nerved, hairy awnless lemmas 3-nerved, palea 2-keeled 2-nerved, 2 free and membranous lodicules, 3 stamens, ovary glabrous, 2 stigmas, open areas, streams and meadows, streamsides, roadsides, similar to *Milium*, see *Species Plantarum* 1: 61. 1753 and *Novitates Botanicae ex Universitate Carolinae* 1963: 1-3. 1963, *Bot. Zhurn. (Moscow & Leningrad)* 59: 265-269. 1974, *Bot. Zhurn. (Moscow & Leningrad)* 70(5): 698-700. 1985, *Canadian Journal of Genetics and Cytology* 28: 554-562. 1986, *Bot. Zhurn. Russia. See *Diagnoses plantarum orientarium novarum* 2(13): 45. 1854, *Annales des Sciences Naturelles; Botanique, série 4* 2: 255. 1854, *Flora Orientalis* 5: 516. 1884 and *Botanical Journal of the Linnean Society* 76(4): 365. 1978, *Flora of Turkey and the East Aegean Islands* 9: 365. 1985.

Z. verticillata (Boiss. & Balansa) Chrték (*Milium verticillatum* Boiss. & Balansa; *Zingeriopsis verticillata* (Boiss. & Balansa) Prob.)

Central Europe. Glumes very unequal, see *Bulletin de la Société Botanique de France* 5: 169. 1858 and *Novitates Botanicae ex Universitate Carolinae* 1963: 3. 1963, *Novosti Sist. Vyss. Rast.* 14: 12. 1977.

Zingeriopsis Prob. = *Zingeria* P.A. Smirn.

Resembling *Zingeria* P.A. Smirn., see *Novosti Sist. Vyss. Rast.* 14: 12. 1977.

Zizania L. = *Ceratochaete* Lunell, *Elymus* J. Mitch., *Fartis* Adans., *Hydropyrum* Link, *Melinum* Link

Greek *zizanon*, ancient name for a wild grain, a weed that grows in wheat, Latin *zizania, orum* "darnel, cockle, tares"; see Manlio Cortelazzo & Paolo Zolli, *Dizionario etimologico della lingua italiana*. 5: 1468. Zanichelli, Bologna 1988; Giovanni Semerano, *Le origini della cultura europea*. Dizionario della lingua Latina e di voci moderne. 2(2): 620. Leo S. Olschki Editore, Firenze 1994; Giovanni Semerano, *Le origini della cultura europea*. Dizionari Etimologici. Basi semitiche delle lingue indeuropee. Dizionario della lingua Greca. Leo S. Olschki Editore, Firenze 1994.

About 3-4 species, eastern Asia, Indochina, North America. Bambusoideae, Oryzodae, Oryzeae, or Ehrhartoideae, Oryzeae, Zizaniinae, annual or perennial, herbaceous, hollow, succulent, aquatic, paludal, extremely variable, sometimes with creeping rhizomes, auricles absent, ligule an unfringed membrane, leaf blades linear-lanceolate, plants monoecious, inflorescence a large terminal panicle, panicle branches unisexual, lower branches spreading to ascending, spikelets unisexual, staminate spikelet generally drooping, pistillate spikelet generally ascending to erect, on the lower branches male spikelets, on the ascending branches female spikelets, male florets 6-staminate, glumes vestigial or absent, lemmas membranous to chartaceous terminating in a stiff twisted awn, palea present one-keeled, stamens 0, ovary glabrous, 2 stigmas, fruit a linear caryopsis, wild rice is unusually high in protein content, grain crop species, grow only in water, in lakes or ponds not stagnant, marshes, swamps, shallow water, type *Zizania aquatica* L., see *Species Plantarum* 2: 991. 1753, *Familles des Plantes* 2: 37, 557. 1763, John Mitchell (1711-1768), *Dissertatio brevis de principijs botanicorum et zoologorum...* 32. Zonotriche (C.E. Hubb.) J.B. Phipps =
Mitwabochloa J.B. Phipps, *Piptostachya* (C.E. Hubb.) J.B. Phipps

From the Greek *zone* "a belt, armour, girdle" and *thrix*, *trichos* "hair."

Three species, tropical Africa. Panicoideae, Panicodae, Arundinelleae, perennial, tufted, herbaceous, erect, clumped, ligule fringed, fibrous roots, plants bisexual, open or contracted inflorescence paniculate, spikelets pedicellate and in triplets, two glumes unequal 3-nerved, lemmas cleft and awned, palea 2-keeled 2-nerved, fleshy lodicules, 3

stamens, woodland, savanna, along roadsides, type *Zonotriche decora* (Stapf) J.B. Phipps, see *Bulletin of Miscellaneous Information Kew* 1936(5): 322. 1936, *Kirkia* 4: 107-109, 113. 1964, *Kirkia* 5: 235-258. 1966, *Kew Bulletin* 21(1): 119-124. 1967, *Boletim da Sociedade Broteriana, ser. 2* 41: 199-200. 1967, *Kew Bulletin* 26(1): 111-123. 1971.

Species

Z. brunnea (C.E. Hubb.) J.B. Phipps (*Mitwabochloa brunnea* J.B. Phipps)

Africa. See *Boletim da Sociedade Broteriana, ser. 2* 41: 200. 1967, *Kew Bulletin* 26(1): 119. 1971.

Z. decora (Stapf) J.B. Phipps (*Tristachya decora* Stapf)

Africa, Zambia. See *Flora Brasiliensis seu Enumeratio Plantarum* 2: 458. 1829, *Bulletin of Miscellaneous Information Kew* 1895: 75. 1895 and *Kirkia* 4: 113. 1964.

Z. inamoena (K. Schum.) Clayton (*Piptostachya inamoena* (K. Schum.) J.B. Phipps; *Tristachya inamoena* K. Schum.)

Tanzania, Zambia, Malawi. Perennial, tufted, clumped, erect, spikelets in triads, see *Die Pflanzenwelt Ost-Afrikas* C: 109. 1895 and *Kirkia* 4: 109. 1964, *Kew Bulletin* 21(1): 124. 1967.

Zotovia Edgar & Connor = Petriella Curzi
(Fungi), *Petriella Zotov*

For Victor Dmitrievich Zotov (1908-1977), born in Vladivostok, Russia, in 1924 emigrated to New Zealand with his parents, August 1928 became the assistant to H.H. Allan, 1936 contributed some 30 drawings for Allan's *An Introduction to the Grasses of New Zealand*, 1949 a member of the New Zealand - American Fiordland Expedition, in January 1961 collected specimens on Campbell Island, wrote *Survey of the Tussock-Grasslands of the South Island*, New Zealand. Wellington, N.Z. 1939 [*Dep. Sci. Ind. Res., Bull.* 73], "Synopsis of the grass subfamily Arundinoideae in New Zealand." *N.Z. J. Bot.* 1: 78-136. 1963, "Grasses of the subantarctic islands of the New Zealand region." *Rec. Dom. Mus., Wellington* 5: 101-146. 1965.

Three species, New Zealand. Bambusoideae, Oryzodae, Ehrharteae, perennial, rhizomatous, cushion-like, branching intravaginal, auricles fringed or absent, ligule ciliate, leaf blade flat or inrolled, inflorescence a contracted panicle or a raceme, spikelets shining and shortly pedicelled, uppermost floret bisexual, subequal persistent glumes, palea membranous, 2 lodicules, stamens 2, alpine, subalpine, found in moist sites, shady places, sometimes referred to *Ehrharta* Thunb. and *Tetrarrhena* R. Br., type *Zotovia colensoi* (Hook.f.) Edgar & Connor, see *Kongl. Vetenskaps Academiens Handlingar* 40: 217, pl. 8. 1779 and *Transactions and Proceedings of the Royal Society of New Zealand*

73: 235-236. 1943, *New Zealand Journal of Botany* 36: 565-586. 1998, *Flora of New Zealand* 5: 52-56. 2000.

Species

Z. acicularis Edgar & Connor

New Zealand. Perennial, slender, pubescent, rhizomatous, leaf sheath keeled, auricles absent, ligule ciliate and membranous, leaf blade inrolled, leaves with needle-like tips, spikelets pedicels pubescent to scabrid to prickly, palea apex ciliate, shady places, wet ground, see *New Zealand Journal of Botany* 36: 569-571, f. 2. 1998.

Z. colensoi (Hook.f.) Edgar & Connor (*Ehrharta colensoi* Hook.f.; *Microlaena colensoi* (Hook.f.) J.C. Sm.; *Microlaena colensoi* (Hook.f.) Mez; *Petriella colensoi* (Hook.f.) Zotov) (after the missionary Rev. (John) William Colenso, 1811-1899 (d. Napier, New Zealand), ethnologist and explorer, botanist, printer, plant collector, North Island, New Zealand)

New Zealand. Perennial, short, small, tufted, trailing, branching intravaginal, papery leaves, leaf blade flat, inflorescence a drooping contracted panicle, spikelets small and shortly pedicelled, found in shady wet places, grassland, forest margins, near streams, rock crevices, alpine, mountains, see *Prodromus Florae Novae Hollandiae* 210. 1810, *Flora Novae-Zelandiae* 1: 288, t. 65a. 1853 and *Transactions and Proceedings of the New Zealand Institute* 43: 253. 1911, *Repertorium Specierum Novarum Regni Vegetabilis* 17(19-30): 292. 1921, *Transactions and Proceedings of the Royal Society of New Zealand* 73: 236. 1943, *New Zealand Journal of Botany* 36: 571-573, f. 4. 1998.

Z. thomsonii (Petrie) Edgar & Connor (*Ehrharta thomsonii* Petrie; *Microlaena thomsonii* (Petrie) Petrie; *Petriella thomsonii* (Petrie) Zotov) (dedicated to the British (Indian-born, Calcutta) botanist and naturalist George Malcolm Thomson, 1848-1933, zoologist, 1868 in New Zealand, FLS 1879; see R. Glenn, *The Botanical Explorers of New Zealand*. 138-140. Wellington 1950; Thomas Frederick Cheeseman, *Manual of the New Zealand Flora*. xxxii. Wellington 1906; Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 681-682. London 1994; J.H. Barnhart, *Biographical notes upon botanists*. 3: 379. 1965; Ethelyn Maria Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933)

New Zealand. Perennial, low, erect, forming dense and compact mats, rhizomatous, branching intravaginal, ligule a minute rim, leaf sheath smooth, leaf blade flat inrolled to incurved, inflorescence an erect raceme, spikelet pedicels glabrous, on wet ground, open habitat, rock crevices, alpine, mountains, bogs, grassland, see *Transactions and Proceedings of the New Zealand Institute* 12: 356, t. 10. 1880 and *The Subantarctic Islands of New Zealand* 2: 472. 1909, *Transactions and Proceedings of the Royal Society of New*

Zealand 73: 235. 1943, *New Zealand Journal of Botany* 36: 573-575, f. 3. 1998.

Zoydia Pers. = *Zoysia* Willdenow

See *Syn. Pl.* 1: 73. 1805.

Zoysia Willd. = *Brousemichea* Balansa, *Matrella* Pers., *Osterdamia* Kuntze, *Osterdamia* Neck. ex Kuntze

After the Austrian botanist Karl von Zoys, 1756-1800, plant collector.

Species

A genus of about 11 species, tropical and subtropical, Southeast Asia, Australasia, New Zealand, coastlines of Indian and Pacific Oceans. Chloridoideae, Cynodonteae, Zoysiinae, perennial, small, low, herbaceous, tough leaves and stems, low growing, often densely branched at base, decumbent, more or less shallow or deep rooted, creeping rhizomes and/or stolons, monopodial rhizomes, no auricles, ligule a very short ciliate membrane or a fringe of hairs, leaf sheath round to slightly flattened, distichous leaves short and pungent, leaf blades flat and rigid, plants bisexual, inflorescence base enclosed in inflated uppermost leaf sheaths, terminal cylindrical racemes spike-like and slender, spikelets solitary and laterally compressed, small spikelets shortly pedicellate and 1-flowered, floret bisexual, floret enclosed by the upper glume, glumes one per spikelet or two and very unequal, lower glume usually absent or minute, second glume mucronate or short-awned, lemma membranous, palea present or absent, lodicules absent, 2-3 stamens, ovary glabrous, 2 stigmas, fruit small, cultivated fodder, aggressive, salt tolerant, mat forming, develop a thick thatch layer, usually extremely drought tolerant, fairly resistant to weeds and diseases, highly versatile species, used for lawn grasses and golf courses, playing fields, excellent green turf grasses, resist weed invasion, halophytic, grows on sand dunes, secondary trampled sites, along sandy seashores, margins of salt swamps, coastal sands, open habitats, type *Zoysia pungens* Willd., see *Der Gesellschaft Naturforschender Freunde zu Berlin, neue Schriften* 3: 440-441. 1801, *Syn. Pl.* 1: 73. 1805, *Journal de Botanique (Morot)* 4(8): 163. 1890, *Revisio Generum Plantarum* 2: 781. 1891 and N.L. Bor, *Grasses of Burma, Ceylon, India and Pakistan* 684. 1960, *Proc. N.Z. Ecol. Species

Z. japonica Steud. (*Osterdamia japonica* (Steud.) Hitchc.; *Zoysia koreana* Mez; *Zoysia matrella* subsp. *japonica* (Steudel) Masamune & Yanagita; *Zoysia matrella* var. *japonica* (Steudel) Sasaki; *Zoysia pungens* var. *japonica* (Steud.) Hack.)

China, Korea, Japan, Taiwan. Perennial or annual, light green, erect, coarse and tough, creeping, sometimes branched at base, sod forming, slender stolons, basal sheaths persistent, leaves flat and obtuse, loosely overlapping ovate spikelets, lower glume absent, palea absent, ornamental lawn grass cultivated and naturalized elsewhere, harsh and unpalatable to livestock, usually drought resistant, useful for erosion control, used on golf course greens, playing fields, found along sea cliffs, open places, near dams, moderately wet areas, under shade of trees, on heavy soils, grassy hillsides, see *Der Gesellschaft Naturforschender Freunde zu Berlin, neue Schriften* 3: 441. 1801, *Synopsis Plantarum Glumacearum* 1: 414. 1854, *Bulletin de l'Herbier Boissier* 7(9): 642. 1899 and *United States Department of Agriculture: Bulletin* 772: 166. 1920, *Repertorium Specierum Novarum Regni Vegetabilis* 17(8-12): 146. 1921, *Journal of the Faculty of Science: University of*

in English: Korean grass, Korean temple grass, Korean lawngrass, Korean lawn grass, Japanese lawn grass, Japanese lawngrass, zoysia, zoysiagrass

in Japan: shiba

in Thailand: ya yipun

Z. macrantha Desv.

Asia, Australia. Perennial, leaf blades rigid, strongly rhizomatous and stoloniferous, a narrow raceme, spikelets solitary and smooth, smooth and shining glume mucronate or entire, lemma 1-keeled and shortly mucronate, pioneer grass, salt and drought tolerant, sand binder, lawn grass, palatable, fodder, readily grazed, grows on coastal sand, coastal foreshores, saline grasslands, along beach and estuarine areas, sand dunes, salt marshes, margins of salt swamps, see *Mémoires de la Société d'Agriculture, Sciences et Arts d'Angers* 1: 158. 1831.

in English: dune couch, coast couch, prickly couch

Z. macrantha Desv. subsp. *macrantha*

Asia, Australia.

Z. macrantha Desv. subsp. *walshii* Nightingale

Australia. See *Fl. Australia* 43: 376. 2002.

Z. macrostachya Franch. & Sav. (*Osterdamia macrostachya* (Franch. & Sav.) Honda)

Asia, Japan, Korea. Perennial, lawn grass, leaf sheaths overlapping, stiff leaf blades, extensive rhizomes, spikelets closely overlapping, lower glume absent, palea absent, see *Enumeratio Plantarum in Japonia Sponte Crescentium ...* 2: 608. 1879 and *Botanical Magazine* (Tokyo) 36: 114. 1932.

in Japan: onishiba

Z. matrella (L.) Merr. (*Agrostis matrella* L.; *Matrella juncea* Pers.; *Osterdamia matrella* (L.) Durand & Schinz; *Zoysia serrulata* Mez; *Zoysia tenuifolia* Willd. ex Thiele)

China, Thailand, Japan, Taiwan, Indonesia, Malaysia. Perennial, caespitose, sod forming, short, erect, slow growing,

variable, flowering culms erect, often strongly stoloniferous and branched, weakly rhizomatous with well-developed creeping rhizome, leaf blades flexible lanceolate contracted into a short pseudopetiole, leaf sheath loose and bearded at mouth, ligule very shallow sometimes with long hairs, distichous leaves erect or ascending and filiform or sometimes almost pungent, small terminal and cylindrical spike-like raceme, spikelets spirally arranged on short stalks, spikelets lanceolate to oblong, lower glume usually absent, upper glume with a short awn, lemma folded with a notched tip, palea narrow and hyaline or absent, ornamental, extensively cultivated, easily established, required frequent grazing to stimulate new growth, young leaves palatable to stock, ground cover, specialized fine-leaved lawn grass, turfgrass for putting greens, good sand-binder useful for erosion control, good for playing fields, weed species often growing in sand near the sea, coconut plantations, sandy soils in coastal areas, see *Mantissa Plantarum* 185. 1771, *Der Gesellschaft Naturforschender Freunde zu Berlin, neue Schriften* 3: 441. 1801, *Syn. Pl.* 1: 73. 1805, *Linnaea* 9(3): 309. 1835, *Botanische Zeitung. Berlin* 13(16): 272-273. 1855, *Revisio Generum Plantarum* 2: 781. 1891, *Conspectus Florae Africae* 5: 734. 1894 and *Handb. Fl. Z. matrella (L.) Merr. var. *matrella*

Indian Ocean, SE Asia. Perennial, foliage more or less spreading, racemes exerted above the foliage.

Z. matrella (L.) Merr. var. *pacifica* Goudswaard (*Zoysia pacifica* (Goudswaard) M. Hotta & Kuroki; *Zoysia tenuifolia* Willd. ex Trin., nom. illeg., non *Zoysia tenuifolia* Willd. ex Thiele)

Pacific, Japan. Perennial, caespitose, foliage usually erect, stoloniferous or shallowly rhizomatous, forming low mats, stolons or rhizomes wiry, ligule a line of very short hairs, leaf blades linear and long-attenuate, inflorescence a narrow cylindrical spike-like raceme with 15-20 spikelets on appressed pedicels, spikelets lanceolate, first glume missing, 3 stamens, lawn grass, forming dense turfs, see *Mémoires de l'Académie Impériale des Sciences de Saint-Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 4,2(1): 96. 1836 and *Philippine Journal of Science* (ser. C) 7(4): 230. 1912, *Blumea* 26: 172, 174, Map 1. 1980, *Acta Phytotaxonomica et Geobotanica* 45(1): 71-72, f. 1A. 1994.

in English: zoysia grass

Z. minima (Colenso) Zotov (*Gaimardia minima* Colenso)

New Zealand. Perennial, culm ridged, rhizomatous with a stout rhizome, ligule ciliate, leaf blades divergent and folded, inflorescences usually solitary, a single spikelet, lower glume usually absent or much reduced, lemma ovate, dry areas, sand dunes, open ground, gravel, see *Annales des Sciences Naturelles (Paris)* 5: 100. 1825, *Transactions of the Royal Society of New Zealand* 22: 491. 1890 and *Transactions and Proceedings of the Royal Society of New Zealand* 73: 237. 1943, *New Zealand Journal of Botany* 9: 640. 1971.

Z. pacifica (Goudswaard) M. Hotta & Kuroki (*Zoysia matrella* var. *pacifica* Goudswaard; *Zoysia tenuifolia* Willd. ex Trin., nom. illeg., non *Zoysia tenuifolia* Willd. ex Thiele)

Pacific, Japan. Perennial, caespitose, foliage usually erect, much branched and densely growing, stoloniferous, inflorescence linear, spikelets loosely overlapping, lower glume absent, upper glume sometimes awned, palea absent, excellent lawn grass, forming dense low turfs, see *Mémoires de l'Académie Impériale des Sciences de Saint-Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 4,2(1): 96. 1836 and *Philippine Journal of Science* (ser. C) 7(4): 230. 1912, *Blumea* 26: 172, 174, Map 1. 1980, *Acta Phytotaxonomica et Geobotanica* 45(1): 71-72, f. 1A. 1994.

in English: zoysia grass

Z. pauciflora Mez

New Zealand. Perennial, coastal, variable, inflorescence loose or contracted, racemes imbricate, lower glume present or absent, sandy beach, rocky places, see *Repertorium Specierum Novarum Regni Vegetabilis* 17(8-12): 145. 1921 [also *Feddes Repertorium*].

Z. planifolia Zotov

New Zealand. See *New Zealand Journal of Botany* 9(4): 641. 1971.

Z. seslerioides (Bal.) Clayton & F.R. Richardson (*Brousemichea seslerioides* Bal.)

Asia. See *Journal de Botanique (Morot)* 4(8): 163. 1890 and *Kew Bulletin* 28(1): 41. 1973.

Z. sinica Hance (*Osterdamia sinica* (Hance) Kuntze; *Zoysia matrella* var. *macrantha* Nakai ex Honda; *Zoysia sinica* subsp. *nipponica* (Ohwi) T. Koyama; *Zoysia sinica* var. *macrantha* (Nakai ex Honda) Ohwi; *Zoysia sinica* var. *nipponica* Ohwi)

China, Korea, Japan, Malaysia. Perennial, erect, branched at base, leaf sheaths usually persistent at base, leaf blades apex pungent, slender rhizomes, inflorescence usually shortly exerted from uppermost leaf sheath, spikelets closely overlapping and with falcate tips, lower glume absent, palea absent, excellent tolerance to salt, suitable for turf use, good lawn grass, coastal sand, see *Journal of Botany, British and Foreign* 7(79): 168. 1869, *Revisio Generum Plantarum* 2: 781. 1891 and *Journal of the Faculty of Science: University of Tokyo, Botany* 3(1): 317. 1930, *Acta Phytotaxonomica et Geobotanica* 10(4): 269. 1941, *Acta Phytotaxonomica et Geobotanica* 12: 112. 1943, *Grasses of Japan and its Neighboring Regions* 534. 1987.

in English: seashore zoysia grass

Z. tenuifolia Willd. ex Thiele (*Agrostis matrella* L.; *Osterdamia tenuifolia* (Willd. ex Thiele) Kuntze; *Osterdamia zoysia* var. *tenuifolia* (Willd. ex Thiele) Honda; *Zoysia matrella* (L.) Merr.; *Zoysia matrella* subsp. *tenuifolia* (Willd. ex Thiele) T. Koyama; *Zoysia matrella* var. *matrella*; *Zoysia matrella* var. *tenuifolia* (Willd. ex Thiele) Sasaki; *Zoysia pungens* var. *tenuifolia* (Willd. ex Thiele) T. Durand & Schinz; *Zoysia tenuifolia* Willd. ex Trin., nom. illeg., non *Zoysia tenuifolia* Willd. ex Thiele)

Tropical Asia, China, Thailand, Japan, Taiwan, Indonesia, Malaysia. Prostrate, creeping, mat forming, dark green dense fluffy turf, shallow-rooted, leaves threadlike and strongly involute, small inconspicuous inflorescence subspicate, rachis undulate, spikelets lanceolate to oblong to narrowly oblong-lanceolate, ornamental grass ground cover, tolerates traffic and shade, resistant to salinity and drought, extremely slow growing, naturalized elsewhere, specialized lawn grass, playing fields, see *Mantissa Plantarum* 2: 185. 1771, *Der Gesellschaft Naturforschender Freunde zu Berlin, neue Schriften* 3: 441. 1801, *Linnaea* 9(3): 309. 1835, *Mémoires de l'Académie Impériale des Sciences de Saint-Pétersbourg. in French: gazon des Mascareignes

in Mauritius: herbe pique fesses

in Thailand: ya kammayi, ya kao li, ya mutkarin

Zygochloa S.T. Blake

From the Greek *zygon*, *zygos* “yoke” and *chloe*, *chloa* “grass,” referring to the dioecious spikelets.

One species, Australia. Panicoideae, Panicoideae, Paniceae, or Spinificinae, perennial, bushy or shrubby, cane-like, woody, rhizomatous and stemmy tussock-forming, much branched and grooved along one side, solid internodes, leaf blades flat and stiff, ligule a fringe of hairs, leaves disarticulating from the sheaths, no auricles, plants dioecious, spikelets dimorphous and solitary, without hermaphrodite florets, female inflorescence of bracteate heads of spikelets, male spikelets with both florets male, male spikelets on separate individuals in small bracteate heads, female spikelets with lower floret sterile and upper female, two glumes subequal and awnless, palea present, 2 fleshy lodicules, stamens 0, ovary glabrous, 2 stigmas plumose, herbaceous seedheads, small fruit, a shelter and cover for wildlife, grazed by sheep and cattle, useful in trapping windborne sand, grows on arid sandy and rocky areas, hills, desert sand dunes and sand hills, sand ridges, open habitats, type *Zygochloa paradoxa* (R. Br.) S.T. Blake, see *Species Plantarum* 1: 55. 1753, *Mantissa Plantarum* 163, 300. 1771, *Exped. Centr. Austral.* 2: App. 89. 1849, *Fragmenta Phytographiae Australiae* 8: 199. 1874, *Hooker's Icones Plantarum* 3: t. 1243-1244. 1877-1879 and *University of Queensland Papers, Department of Biology*. 1(19): 7. 1941, *Genera Graminum* 307-308. 1986, *Flora of Australia* 43: 122-123, 163, 218. 2002.

Species

Z. paradoxa (R. Br.) S.T. Blake (*Neurachne paradoxa* R. Br.; *Panicum pseudo-neurachne* (R. Br.) F. Muell.; *Spinifex paradoxus* (R. Br.) Benth., also spelled *paradoxa*)

New South Wales, Queensland, Northern Territory, South Australia. Perennial, dioecious, robust, persistent, solid, glabrous, rhizomatous, shrubby, rigid or hard stems branching and spreading, creeping at the base, forming tussocks, leaves short and often drought-deciduous, male heads globose, female heads globose, spikelets of female plants with winged bracts, male spikelets shortly pedicellate, female spikelets shortly pedicellate, male florets 3-staminate, glumes much shorter than the lemmas, fertile lemma ovoid and acute, extremely drought-resistant, suitable as a sand-binder, grazed when young, found on desert sand-dunes, arid areas, on dune crests.

in English: sandhill canegrass, cane grass

Quod erat demonstrandum.

Biological Sciences

CRC WORLD DICTIONARY OF GRASSES

Common Names, Scientific Names,
Eponyms, Synonyms, and Etymology

VOLUME I A-D

"I think very highly of this work.... It represents an achievement unparalleled, to my knowledge, by any other botanist, compiler, taxonomist or encyclopaedist...."

"The scheme is alphabetical and easy to follow. Each genus and species has a detailed morphological description, a note of its geographical distribution, and a list of synonyms and vernacular names in many languages. Habitats, economic uses, historical and biographical allusions, botanical exploration and linguistics are all detailed. Most important are the bibliographies, which accompany each entry. These are comprehensive, up-to-date and multi-lingual. They represent years of painstaking research and will be of incalculable use to students and researchers in the future."

— Charles Quest-Ritson

Uniquely qualified by his passion and scholarship in the fields of botany, linguistics, medicine, and history, Umberto Quattrocchi has created a master reference that boldly organizes thousands of species of grasses with unparalleled detail and precision.

The *CRC World Dictionary of Grasses: Common Names, Scientific Names, Eponyms, Synonyms, and Etymology* draws on a tremendous range of secondary and primary sources to bring together a vast range of otherwise dispersed data. While this work is the most authoritative and sophisticated lexicon ever compiled in this area, it is much more than a dictionary. It includes historical, biographical, and linguistic information on botany and medicine, as well as insight into the general history of mankind and science.

Providing ready access to a wealth of information never before found in a single volume, the *CRC World Dictionary of Grasses*—

- Offers an indispensable time-saving guide for all those involved with plants and gardens whether they are growing, studying, or writing about them
- Leads to a huge number of obscure sources of nearly impossible-to-find information
- Details approximately 800 generic names and thousands of species of grasses, including cereals and forages
- Lists all relevant properties related to the main and secondary uses of the grasses, as well as detailed descriptions and geographical distribution

Umberto Quattrocchi is the author of the bestselling *CRC World Dictionary of Plant Names*, winner of the prestigious Hanbury Botanical Garden Award.
