Australia, Queensland. Annual or perennial, tufted, spikes purplish to reddish, found in barren soil, see *Prodromus florae Novae Hollandiae* 186. 1810, *Flora Australiensis: A Description ...* 7: 634. 1878 and *Bibliotheca Botanica* 85: 409. 1915, *Hooker's Icones Plantarum* 34: t. 3312. 1936.

E. leporina R. Br. var. *leporina* (*Ectrosia leporina* var. *longiglumis* C.E. Hubb.; *Ectrosia leporina* var. *pauciflora* C.E. Hubb.; *Ectrosia leporina* var. *spadicea* (R. Br.) Domin; *Ectrosia spadicea* R. Br.)

Australia. Perennial, see *Prodromus Florae Novae Hollandiae* 186. 1810 and *Bibliotheca Botanica* 85: 409. 1915.

E. leporina R. Br. var. *micrantha* Benth.

Australia. Annual, see *Flora Australiensis: A Description ...* 7: 634. 1878 and *Man. Grasses New Guinea* 74, t. 26. 1969.

E. nervilemma (B.K. Simon) Nightingale (*Planichloa nervilemma* B.K. Simon)

Australia. Ephemeral, see *Austrobaileya* 2: 212-215. 1986, *Fl. Australia* 44B: 461. 2002.

E. ovata Nightingale

Australia. Annual, see *Fl. Australia* 43: 376. 2002.

E. scabrida C.E. Hubb.

Australia. Annual, see *Hooker's Icones Plantarum* 34: t. 3312. 1936.

E. schultzei Benth.

Australia. Annual or perennial, see *Flora Australiensis: A Description ...* 7: 633. 1878 and *Hooker's Icones Plantarum* 34: t. 3312. 1936, *Fl. Kimberley Region* 1134, f. 327C. 1992.

E. schultzi Benth. var. *annua* C.E. Hubb.

Australia. Annual or short-lived perennial, see *Hooker's Icones Plantarum* 34: t. 3312, p. 8. 1936.

E. schultzi Benth. var. *schultzi*

Australia. Semiaquatic.

**Ectrosiopsis (Ohwi) Ohwi ex Jansen =
Ectrosiopsis (Ohwi) Jansen**

Resembling the genus *Ectrosia* R. Br.

One species, Australia, New Guinea, Caroline Islands. Chloridoideae, Eragrostideae, or Cynodonteae, perennial, herbaceous, unarmed, unbranched, caespitose, leaves mostly basal, auricles absent, ligule a fringe of hairs, plants bisexual, without cleistogamous spikelets, inflorescence a contracted panicle, spikelets flattened and linear, hidden cleistogenes, 2 deciduous glumes very unequal, lemmas lightly keeled, awn present or absent, palea with wingless keels, 2 free and fleshy lodicules, stamens 3, found in sandy areas, depressions, damp sites, damp sandy areas, open habitats, related to *Steirachne* and *Eragrostis*, type *Ectrosiopsis subtriflora* (Ohwi) Ohwi, see *Bulletin of the Tokyo Science Museum* 18: 1. 1947, *Acta Botanica Neerlandica* 1(3): 474. 1952, *Reinwardtia* 2: 267. 1953, *Am. J. Bot.* 50: 633. 1963, *Blumea* 47(1): 157-204. 2002, *Flora of Australia* 44B: 428. 2005.

Species

E. lasioclada (Merr.) Jansen (*Ectrosia eragrostoides* Domin; *Ectrosia lasioclada* (Merr.) S.T. Blake; *Ectrosiopsis aruensis* Jansen; *Ectrosiopsis curvifolia* Jansen; *Ectrosiopsis subaristata* (Chase) Jansen; *Eragrostis lasioclada* Merr.; *Eragrostis subaristata* Chase)

Southeast Asia, Indonesia. Ehrhartia Benth.

Orthographic variant of *Ehrharta* Thunb., see G. Bentham, in *Journal of the Linnean Society. Botany*. 19: 56. 1881.

Ehrharta Thunberg = *Diplax* Sol. ex Bennett, *Microlaena* R. Br., *Petriella* Curzi (Fungi), *Petriella* Zotov, *Tetrarrhena* R. Br., *Trochera* Rich., *Zotovia* Edgar & Connor

After the German (Swiss-born) botanist Jakob Friedrich Ehrhart, 1742-1795, naturalist, 1773-1776 pupil of

Linnaeus, from 1780 to 1795 government botanist at Herrenhausen, author of *Beiträge zur Naturkunde ... Hannover und Osnabrück 1787-1792*. See J.H. Barnhart, *Biographical notes upon botanists*. 1: 499. 1965; F.A. Stafleu & R.S. Cowan, *Taxonomic literature*. 1: 731-734. Utrecht 1976; Th. Krok (1834-1921), *Bibliotheca Botanica Suecana*. Uppsala, Stockholm [1925]; Jonas C. Dryander, *Catalogus bibliothecae historico-naturalis Josephi Banks*. London 1800; *Kongl. Vetenskaps Academiens Handlingar*. 40: 216-217, pl. 8. 1779; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 113. 1972; Frans A. Stafleu, *Linnaeus and the Linnaeans: The Spreading of Their Ideas in Systematic Botany, 1735-1789*. Utrecht 1971.

About 25-38 species, mostly tropical and southern Africa, Indonesia to New Zealand. Bambusoideae, Oryzodae, Ehrharteae, or Ehrhartoideae, Ehrharteae, annual and perennial, tufted, wiry, stoloniferous or rhizomatous, stems erect or scandent or decumbent, herbaceous or woody and persistent, leaf blades flat or rolled, auricles present or absent, short ligule truncate and membranous or a ring of hairs, leaves flat and linear to linear-lanceolate, plants bisexual, cleistogamous or chasmogamous, inflorescence usually a narrow panicle or rarely a raceme, spikelets pedicellate and solitary, spikelets 3-flowered, spikelets with 1 bisexual flower above 2 sterile ones, 2 glumes unequal and keeled, sterile lemmas awnless or terminal awned and hairy or glabrous, fertile lemma keeled and sometimes with earlike appendages at the base, palea narrow 2-nerved, 2 lodicules free and toothed, stamens 1 to 6, ovary glabrous without the apical appendage, 2 stigmas, cleistogenes occur in *Ehrharta stipoides* Labill. (*Microlaena stipoides* (Labill.) R. Br.), weed species, cultivated fodder, sand binder, useful for erosion control, larval food hosts for the butterflies, butterfly larvae have been found on these plants within South Australia, shade species or species of open habitats, habitat variable, wet places, native pasture grasses, coastal sand dunes, forest glades, type *Ehrharta capensis* Thunb., see *Species Plantarum* 1: 63-66. 1753, *Kongl. Vetenskaps Academiens Handlingar* 40: 216-217, pl. 8. 1779, *Observations sur la Physique, sur L'Histoire Naturelle et sur les Arts*. 13: 225. 1779, *Prodromus Florae Novae Hollandiae* 209-210. 1810, *Plantae Javanicae Rariores* 11. 1838, *Annales des Sciences Naturelles; Botanique, sér. 3* 2: 116. 1844 and *Lexicon* 364. 1903, *Transactions and Proceedings of the Royal Society of New Zealand* 73: 235. 1943, *Nucleus* 3: 81-110. 1960, *Botanical Gazette* 124: 264-270. 1963, *New Zealand J. of Botany* 15: 531-534. 1977, *Blumea* 28: 181-194. 1982, K.W. Species

E. barbinodis Nees ex Trin. (*Ehrharta barbinodis* Nees)

South Africa. Perennial, tufted, erect, shrubby, straggling, tussocky, branched, woody, short leaves with sharp points, sterile lemmas hairy, palatable, usually in rocky places, heavily grazed areas, hillsides, among shrubs, see *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 5,3(3): 66. 1839, *Florae Africae Australioris Illustrationes Monographicae* 215. 1841 and *Bothalia* 19: 125-132. 1989.

in South Africa: kruppelgras

E. brevifolia Schrad.

South Africa. Annual, glaucous, see *Göttingische gelehrte Anzeigen (unter der Aufsicht der Königl. Gesellschaft der Wissenschaften)* 3: 2077. 1821.

E. brevifolia Schrad. var. *brevifolia*

South Africa. Annual, erect, glaucous to blue-green, spikelets terete, sterile lemmas rounded, in sandy soils.

E. brevifolia Schrad. var. *cuspidata* Nees

South Africa. Annual, erect, reddish, spikelets compressed, sterile lemmas aristate, in sandy soils, hillsides, dry riverbeds, see *Florae Africae Australioris Illustrationes Monographicae* 215. 1841.

E. bulbosa Sm.

South Africa. Tufted, rhizomatous, bulblike swelling, lowest culm node bulbous, sterile lemmas corrugated, see Sir James Edward Smith (1759-1828), *Plantarum icones hactenus ineditae*. t. 33. Londini 1789-1791.

E. calycina J.E. Smith (*Aira capensis* L.f.; *Ehrharta adscendens* Schrad.; *Ehrharta auriculata* Steud.; *Ehrharta geniculata* (Thunb.) Thunb.; *Ehrharta laxiflora* Schrad.; *Ehrharta ovata* Nees; *Ehrharta paniculata* Sw. ex Poir.; *Ehrharta undulata* Nees ex Trin.; *Ehrharta undulata* var. *calycina* (Sm.) Nees; *Melica festucoides* Licht. ex Trin., nom. illeg., non *Melica festucoides* Licht. ex Roem. & Schult.; *Melica geniculata* Thunb.; *Trochera calycina* (Sm.) P. Beauv.)

Africa, South Africa. Perennial bunchgrass, rarely annual, plant habit and growth form variable, erect, prostrate, straggling, tufted, decumbent culm bases, sometimes or rarely stoloniferous, often with a creeping branched rhizome, roots fibrous and shallow, purple swollen nodes, leaf sheath keeled, short ligule membranous, green to red-green leaves flat and finely toothed, auricles ciliate, flowering stem erect or loosely arching with maturity, purple-red branched panicle loose and narrow, spikelets oblong, sterile florets subequal, sterile florets subequal, glumes subequal, upper glume glabrous, sterile lemmas with long soft hairs or shortly bearded, dark grains, seeds profusely, reproduces by seed and rhizomes, aggressive and highly invasive weed, a rapidly spreading pest naturalized elsewhere, cultivated fodder, highly palatable, useful pasture species on soils of low fertility, grazed by domestic animals, range reseeding and revegetation of disturbed areas, soil stabilization uses, useful to prevent soil erosion and for sand stabilisation, drought and frost resistant, susceptible to heavy grazing, common on the coastal sand dunes and sandy places, shady places, stabilized sand dunes, among shrubs, rocky places, a widespread weed of roadsides and bushland on sandy soils, wildlands, heavily grazed veld, see *Supplementum Plantarum* 108. 1781 [1782], *Plantarum Icones Hactenus Ineditae* pl. 33. Londini 1789-1791, Carl Peter Thunberg (1743-1828) *Prodromus Plantarum Capensium*: quas in promontorio Bonae Spei Africes, annis 1772-1775 collegit... 21. Upsaliae 1794-1800, *Flora Indica ... nec non Prodromus Florae Capensis* 192. 1800, *Encyclopédie Méthodique. Botanique ... Pascoe et al., "Ustilospores of *Tilletia ehrhartae*, a smut of *Ehrharta calycina*, are common contaminants of Australian wheat grain, and a potential source of confusion with *Tilletia indica*, the cause of Karnal bunt of wheat." *Plant Pathology* 54(2): 161-168. Apr 2005.

in English: common ehrharta, ehrharta, perennial veld grass, perennial veldt grass, veldt grass

in South Africa: gewone ehrharta, polgras

E. capensis Thunb. (*Ehrharta cartilaginea* Sm.; *Ehrharta mnemateia* L.f.; *Ehrharta nutans* Lam.)

Southern Africa. Perennial, blue-green to glaucous to dark green, erect, tufted, rhizomatous, different growth forms, bulbous rootstock, mass of lateral roots, lowest culm node bulbous, leaves sinuate along the edges, spikelets borne on long and thin pedicels, sterile lemmas corrugated, leaves very palatable, good quality grass, the common name derived from the small tubers resembling wheat kernels originating just above the root system, baboons often eat these nutgrass-like structures, usually found in the rocky soil, see *Kongl. Vetenskaps Academiens Handlingar* 40: 216-217, pl. 8. 1779, *Plantarum Icones Hactenus Ineditae* pl. 33. 1790 and G.A. Verboom, W.D. Stock & H.P. Linder, "Determinants of postfire flowering in the geophytic grass *Ehrharta capensis*." *Functional Ecology* 16(6): 705-713. Dec 2002.

in South Africa: bobbejaankoring

E. delicatula Stapf

South Africa. Annual, leafy, awnless, sterile lemmas corrugated, earlike appendages at the base of the second sterile lemma, growing among shrubs, rock outcrops, arid areas or damp places, stream beds, between rocks, see *Bulletin of Miscellaneous Information Kew* 1897: 288. 1897.

E. dura Nees ex Trin. (*Ehrharta dura* Nees)

South Africa. Perennial, tufted, rhizomatous, erect, basal leaf sheaths hard, reddish leaf sheath, leaves lanceolate, weed species, growing in open habitats, moist areas, sandstone, see *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 5,3(3): 59. 1839.

in South Africa: brandgras

E. eburnea Gibbs-Russ.

South Africa, Cape Province. Tufted, lowest culm nodes bulbous, basal sheaths purplish, sterile lemmas hairy on the keel, rare species, see *Bothalia* 15(1-2): 145. 1984.

E. erecta Lamarck (*Ehrharta panicea* Sm.; *Ehrharta paniciformis* Nees ex Trin.; *Panicum deflexum* Guss., nom. illeg., non *Panicum deflexum* Schumach.; *Trochera panicea* (Sm.) Kuntze; *Trochera panicea* Baill.)

South Africa. Perennial, variable, weakly or loosely tufted, slender, erect or ascending from a decumbent base, sometimes rooting at the lower nodes, sometimes sprawling, culms branched, creeping rhizome, annual-like rootstock, auricles ciliate, leaf sheaths glabrous or shortly hairy, membranous ligule lacerate and glabrous, leaves flat and soft, open or contracted panicle erect or nodding, spikelets pale green, glumes unequal, sterile lemmas glabrous and unawned, stamens 6, invasive weed naturalized elsewhere, a supply of food for the adult butterflies, in South Australia larval food hosts for the butterflies, a widespread weed in moist places, shady locations, waste places, along roadsides, disturbed creeklines and grazed woodlands, coastal dunes and sandy soils, stabilized sand dunes, see *Encyclopédie Méthodique, Botanique* 2: 347. 1786, *Plantarum Icones Hactenus Ineditae* 9. 1789, Michele Tenore (1780-1861), *Flora Napolitana* 5: 320. Napoli 1835-1836[-1838] *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 5,3(3): 64. 1839, *Revisio Generum Plantarum* 2: 795. 1891, *Histoire des Plantes* 12: 171, f. 313, f. 314. 1893.

in English: veld grass, Lamarck's ehrharta, upright veldt grass, panic veldt grass, panic veldt grass, perennial grass

in southern Africa: kholane, kgalane, kgolane (Sotho)

E. erecta Lamarck var. ***abyssinica*** (Hochst.) Pilg. (*Ehrharta abyssinica* Hochst.)

Tropical Africa, southern Arabia, Ethiopia. Perennial, loosely tufted, rambling, slender, straggling, ascending or erect, leaf blades flat, open or contracted panicle, spikelets oblong, lowest spikelets reduced to lemmas, glumes unequal, upper glume ovate-oblong, lower glume ovate, fertile lemma lanceolate, sterile lemmas lanceolate and awnless, moist soils, disturbed areas, rocky shaded places, forest margins, cliffs, mountain gullies, plantations, see *Flora* 38: 193. 1855 and *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 9(87): 508. 1926.

E. erecta Lamarck var. ***erecta***

South Africa, India. Perennial or annual, tufted, lax, prostrate, stoloniferous, sterile lemma rounded, growing in shady moist places, among shrubs and trees, along roadsides, ditches.

E. erecta Lamarck var. ***natalensis*** Stapf

South Africa. Perennial or annual, tufted, lax or loose, prostrate, leaf blade flexuous, ligule a pointed membrane,

narrow panicle with slender racemes, upper sterile lemma often bearded, growing in shady moist places, edge of dunes, among shrubs, shade of forest edge, along stream banks, see *Flora Capensis* 7: 671. 1900.

in English: veld grass

in southern Africa: kholane, kgalane, kgolane (Sotho)

E. longiflora Smith (*Ehrharta aristata* Thunb.; *Ehrharta banksii* Gmel.; *Ehrharta eckloniana* Schrad. ex Schult. & Schult.f.; *Ehrharta longiflora* Ecklon ex Schult. & Schult.; *Ehrharta longiflora* var. *eckloniana* (Schrad. ex Schult. & Schult.f.) Nees; *Ehrharta longiflora* var. *longisetata* (Schrad.) Nees; *Ehrharta longiflora* var. *urvilleana* (Kunth) Nees; *Ehrharta longisetata* Schrad.; *Ehrharta urvilleana* Kunth) (for the English (b. London) botanist Sir Joseph Banks, 1743-1820 (d. Spring Grove, Isleworth, Middx), patron of science, plant collector, naturalist, explorer and traveler, at 9 years of age went to Harrow and at thirteen to Eton (he left at eighteen), 1766 Fellow of the Royal Society, in 1766 sailed in the *Niger* to Labrador and Newfoundland (with his friend Captain Constantine John Phipps, 1744-1792, later Lord Mulgrave, and under the command of Sir Thomas Adams), in 1768 accompanied Captain James Cook's first voyage to "New Holland" (Banks took with him the medical botanist Daniel Carl Solander (1733-82), the naturalist Herman Sporing, the botanical artist Sydney Parkinson (1745-1771, d. Indian Ocean) and the draftsman Alexander Buchan), from 1778 to 1820 President of the Royal Society, in 1779 married Lady Dorothea Hugessen (1758-1828), baronet in 1781, in 1788 Fellow of the Linnean Society, author of *An Account of the Voyages ... in the Southern Hemisphere*. London 1773, co-author with Daniel Solander of *Illustrations of Australian Plants Collected in 1770 during Captain Cook's Voyage Round the World in HMS "Endeavour"*. London 1900-1905; see George A. Foote, in *D.S.B. (or Dictionary of Scientific Biography*. Editor in Chief Charles Coulston Gillispie) 1: 433-437. New York 1981; Harold B. May 1997; John Dunmore, *Who's Who in Pacific Navigation*. University of Hawaii Press, Honolulu 1991)

South Africa. Annual, lax, tufted, erect or geniculately ascending, often decumbent at the base, leafy, often with secondary inflorescences developing from the lower nodes, auricles ciliate, ligule truncate or lacerate, leaf sheath keeled and submembranous, leaves flat and soft, terminal panicle open and narrow, spikelets often nodding, glumes persistent and unequal, sterile lemmas scabrid and bearded at the base, awns on the lemmas, ornamental, weed, cover plant, growing on sandy moist soils, waste places, riverbeds, in the shade of shrubs and trees, wet places, in roadside drainage ditches, in disturbed areas, along roadsides, gardens, see *Plantarum Icones Hactenus Ineditae* t. 32. 1789, *Systema Naturae ... editio decima tertia, aucta, reformata* 2: 549. 1791, *Prodromus Plantarum Capensium: quas in promontorio Bonae Spei Africes, annis 1772-1775 collegit...* 66. 1794-1800, *Göttingische gelehrte Anzeigen ...* 3: 2078. 1821, *Systema Vegetabilium* 7(2): 1376. 1830, *Révision des Graminées* 2: 189, t. 6. 1830, *Florae Africae Australioris Illustrationes Monographicae* 220. 1841 and Marsusi Narhardiyati & Winston J. Bailey, "Biology and natural enemies of the leafhopper *Balclutha incisa* (Matsumura) (Hemiptera: Cicadellidae: Deltocephalinae) in southwestern Australia." *Australian Journal of Entomology* 44(2): 104-109. May 2005.

in English: annual veldt grass, oat-seed grass, annual veld grass

E. longifolia Schrad.

South Africa, Cape Province. Annual or perennial, rare, erect, vigorous, tufted, rhizomatous, bulbous bases, lowest culm node bulbous, useful for erosion control, common on sandy soils, along roadsides, see *Göttingische gelehrte Anzeigen ...* 3: 2077. 1821.

in English: annual veldt grass, annual veldt grass

E. longigluma C.E. Hubb.

Southern Africa. Perennial, rhizomatous, ligule a short membrane, narrow panicle with slender racemes, glumes longer than the florets, sterile lemmas awnless, earlike appendages at the base of the second sterile lemma, probably palatable, unknown grazing value, found in grassland, on mountain slopes, moist places, mountain grassland, high mountain grassveld, see *Bulletin of Miscellaneous Information Kew* 1933: 501. 1933.

E. melicoides Thunb. (*Ehrharta melicoides* Sw. ex Trin.; *Ehrharta melicoides* Willd. ex Nees)

Southern Africa. Perennial, rhizomatous, tufted, compact, dense, spreading, tussocky, culms not swollen, thick old leaf sheaths, thickened runners at the base of the plant, root system well developed, leaves basal, inflorescence an open plume with a slender central axis, individual spikelets attached to the central axis by means of long slender pedicels, sterile lemmas awnless, earlike appendages at the base of the second sterile lemma, palatable, grazable, usually in rocky places, burned areas, veld, in overgrazed grassland, see *Prodromus Plantarum Capensium* ... 192. 1800.

in Afrikaans: haasgras

in South Africa: soetbewertjiekweek

E. microlaena Nees ex Trin. (*Ehrharta microlaena* Nees)

South Africa. Perennial, rare, erect, tufted, basal leaf sheaths pale, leaf blades reduced, sterile lemmas awned, in mountain fynbos, damp places, streamsides, see *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 5,3(3): 59. 1839.

E. ottonis Kunth ex Nees

South Africa. Rhizomatous, tufted, lowest culm node bulbous, usually in disturbed areas, see *Florae Africae Australioris Illustrationes Monographicae* 201. 1841.

E. pusilla Nees ex Trin. (*Ehrharta pusilla* Nees)

South Africa. Annual, glaucous, leaf sheaths inflated, earlike appendages at the base of the second sterile lemma, grows on sandy soils, dry stream beds, moist places, sandy riverbeds, see *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 5,3(3): 68. 1839.

E. ramosa (Thunb.) Thunb. (*Ehrharta aphylla* Schrad.; *Ehrharta ramosa* (Thunb.) Sw. ex Trin.; *Ehrharta ramosa* Smith ex Steud.; *Ehrharta ramosa* subsp. *aphylla* (Schrad.) Gibbs-Russ.; *Ehrharta ramosa* subsp. *ramosa*; *Ehrharta ramosa* var. *aphylla* (Schrad.) E. Gluckman; *Ehrharta ramosa* var. *mucronata* Nees; *Ehrharta ramosa* var. *ramosa*; *Ehrharta ramosa* var. *tuberosa* Nees; *Melica ramosa* Thunb.)

South Africa. Perennial, rhizomatous to strongly rhizomatous, straggling culms, see *Prodromus Plantarum Capensium*, ... 21. 1794, *Prodromus Plantarum Capensium*, ... 192. 1800, *Flora* 12: 491. 1829.

E. ramosa (Thunb.) Thunb. subsp. *aphylla* (Schrad.) Gibbs-Russ. (*Ehrharta aphylla* Schrad.; *Ehrharta ramosa* var. *aphylla* (Schrad.) E. Gluckman)

South Africa. Perennial, robust, woody, shrubby, rhizomatous, inflorescence paniculate open, glumes longer than

sterile lemmas, sterile lemmas usually mucronate, earlike appendages at the base of the second sterile lemma, growing between rocks, in dry areas, see *Journal of South African Botany* 8(4): 273. 1942, *Bothalia* 19(2): 191. 1989.

E. ramosa (Thunb.) Thunb. subsp. *ramosa*

South Africa. Perennial, robust, woody, shrubby, rhizomatous, leafless, inflorescence paniculate contracted, glumes shorter than sterile lemmas, sterile lemmas usually mucronate, earlike appendages at the base of the second sterile lemma, growing between rocks, stony places, sandy soils, in dry areas.

E. rehmannii Stapf (after the Austrian-Polish plant collector and botanist Dr. Anton(i) Rehmman (Rehman), 1840-1917, geographer, traveler, plant collector in South Africa (1875-1877 and 1879-1880), author of "Geo-botaniczne stosunki Poludniowej Afryki." (Phytogeographical conditions in South Africa, or The geo-botanical relationship of South Africa) *Akad. Umiej. Krakowie Pam. Wyd. Mat. - Przyrod.* 5: 28-96. 1879, Abstracts in *Bot. Zbl.* 1880: 1119-1128, *Einige Notizen über die Vegetation der nördlichen Gestade des Schwarzen Meeres.* Brünn 1871 [1872]; see H.N. Dixon & A. Gepp, "Rehmann's South African mosses." *Kew Bull.* 1923: 193-238. 1923; J.H. Barnhart, *Biographical notes upon botanists.* 3: 139. Boston 1965; Stafleu & Cowan, *Taxonomic literature.* 4: 655-656. 1983; G. Murray, *History of the Collections Contained in the Natural History Departments of the British Museum.* 1: 176. 1904; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection.* 328. 1972; H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford.* 230. 1964; Mary Gunn & Leslie E. Codd, *Botanical Exploration of Southern Africa.* 292-294. 1981; R. Zander, F. Encke, G. Buchheim & S. Seybold, *Handwörterbuch der Pflanzennamen.* 14. Aufl. 1993)

Southern Africa. See *Bulletin of Miscellaneous Information Kew* 1897: 288. 1897 and *Flora Capensis* 7: 676-677. 1900, *Bothalia* 19(2): 193-194. 1989.

E. rehmannii Stapf subsp. *filiformis* (Nees) Gibbs-Russ. (*Ehrharta rehmannii* subsp. *filiformis* (Stapf) Gibbs.-Russ.; *Ehrharta rehmannii* var. *filiformis* Stapf)

South Africa. Perennial, tufted, erect or straggling, open raceme with several spikelets, glumes membranous, sterile lemmas glabrous, earlike appendages at the base of the second sterile lemma, growing in moist places, streamsides, between rocks, see *Flora Capensis* 7: 677. 1900, *Bothalia* 19(2): 193. 1989.

E. rehmannii Stapf subsp. *rehmannii*

South Africa. Perennial, tufted, erect, inflorescence racemose or paniculate, glumes membranous, sterile lemmas hairy to scabrous, earlike appendages at the base of the second sterile lemma, grows in mountain slopes, rocky areas, stream banks, shady places, under trees.

E. rehmannii Stapf subsp. *subspicata* (Stapf) Gibbs-Russ. (*Ehrharta subspicata* Stapf)

South Africa. Perennial, rare, erect, tufted, inflorescence narrowly racemose, appressed spikelets, glumes more or less coriaceous, earlike appendages at the base of the second sterile lemma, growing in moist places, sandy soils, see *Flora Capensis* 7: 676. 1900, *Bothalia* 19(2): 194. 1989.

E. rupestris Nees ex Trin. (*Ehrharta rupestris* Nees, nom. illeg., non *Ehrharta rupestris* Nees ex Trin.; *Trochera rupestris* (Nees ex Trin.) Kuntze)

South Africa. Perennial, rhizomatous, see *Revisio Generum Plantarum* 795. 1891.

E. rupestris Nees ex Trin. subsp. *dodii* (Stapf) Gibbs-Russ. (*Ehrharta dodii* Stapf) (named for Anthony Hurt Woolley-Dod, 1861-1948, with the South African (British born, Nottingham) businessman and botanist Harry Bolus, 1834-1911, wrote *A List of the Flowering Plants and Ferns of the Cape Peninsula*. 1903; see Mary Gunn & Leslie E. Codd, *Botanical Exploration of Southern Africa*. 378-379. Cape Town 1981; Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 752. London 1994; J.H. Barnhart, *Biographical notes upon botanists*. 3: 514. Boston 1965; Frans A. Stafleu & Richard S. Cowan, *Taxonomic literature*. 7: 428-429. 1988)

South Africa. Perennial, rare, rhizomatous, herbaceous, leaf blades erect, inflorescence racemose, sterile lemma glume-like, growing in wet places, among rocks, mountains, see *Flora Capensis* 7: 670. 1900, *Bothalia* 15: 150. 1984.

E. rupestris Nees ex Trin. subsp. *rupestris*

South Africa. Perennial, rare, rhizomatous, leaf blades folded and distichous, inflorescence racemose, sterile lemma glume-like, growing among rocks, mountain slopes.

E. rupestris Nees ex Trin. subsp. *tricostata* (Stapf) Gibbs-Russ. (*Ehrharta tricostata* Stapf)

South Africa. Perennial, shrubby to suffrutescent, rhizomatous, inflorescence racemose, spikelets oblong, sterile lemma glume-like, common on wet areas, on mountain slopes, see *Flora Capensis* 7: 669. 1900, *Bothalia* 15: 150. 1984.

E. setacea Nees

South Africa. Perennial, culms dimorphic, rhizomatous, inflorescence racemose, flowering culms decumbent, see *Bothalia* 15: 151. 1984.

E. setacea Nees subsp. *disticha* Gibbs-Russ.

South Africa. Perennial, rare, suffrutescent or shrubby, erect, rhizomatous, leaf blades distichous, inflorescence racemose, sterile lemma glume-like, common on dry places, rocky ground, mountain slopes.

E. setacea Nees subsp. *scabra* (Stapf) Gibbs-Russ. (*Ehrharta setacea* var. *scabra* Stapf)

South Africa. Perennial, rare, suffrutescent or shrubby, erect, rhizomatous, stoloniferous, leaf blades scabrous, inflorescence racemose, sterile lemma short and glume-like, growing among rocks, disturbed areas, seepage sites, mountain, see *Flora Capensis* 7: 669. 1900.

E. setacea Nees subsp. *setacea*

South Africa. Perennial, suffrutescent or shrubby, erect, rhizomatous, rigid leaf blades, inflorescence racemose, sterile lemma short and glume-like.

E. setacea Nees subsp. *uniflora* (Burch. ex Stapf) Gibbs-Russ. (*Ehrharta uniflora* Burch. ex Stapf)

South Africa. Perennial, rhizomatous, herbaceous, trailing or sprawling, inflorescence racemose, sterile lemma short and glume-like, common in wet places, forest margins, see *Flora Capensis* 7: 670. 1900.

E. stipoides Labill. (*Microlaena stipoides* (Labill.) R. Br.)

Australia, the Philippines, Indonesia, Papua New Guinea, New Zealand. Perennial, branched, erect, sprawling, smooth, thin, glabrous, shortly rhizomatous and stoloniferous, ligule a fringed membrane, cleistogenes, glumes smooth and keeled, sterile florets lemmas scabrous or scabrid, fertile floret lemma glabrous and smooth, commonly found in woodland on sandstone and clay soils, mountains, disturbed sites, shaded or semishaded sites, lawns, semi-shade in forests, along streams, high fertility, grazed situations, see *Novae Hollandiae Plantarum Specimen* 1: 91, t. 118. 1805, *Prodromus Florae Novae Hollandiae* 210. 1810 and *New Zealand J. of Botany* 15: 531-534. 1977.

E. thunbergii Gibbs-Russ. (*Aira villosa* L.f.; *Ehrharta gigantea* Ehrhart ex Steud; *Ehrharta gigantea* Nees ex Trin.; *Ehrharta gigantea* Sw., nom. illeg.; *Ehrharta gigantea* Thunb.; *Ehrharta gigantea* (Thunb.) Sw.; *Ehrharta villosa* (L.f.) Schult. ex Schult. & Schult.f.; *Ehrharta virgata* Launert; *Melica gigantea* Thunb.) (the name honors the Swedish botanist and physician Carl Peter Thunberg, 1743-1828 (Tunaberg, near Uppsala, Sweden), 1772 medical doctor at Uppsala, a pupil of Carl Linnaeus, plant collector, explorer, traveler, naturalist, professor of botany and medicine at Uppsala, to the Cape and interior with the British gardener and plant collector Francis Masson (1741-1805), among his numerous writings are *Flora japonica*. Lipsiae 1784, *Voyage en Afrique et en Asie*, principalement au Japon, pendant les années 1770-1779. Paris 1794, *Icones plantarum japonicarum*. Upsaliae [Uppsala] 1794-1805 and *Prodromus plantarum Capensium*: quas in promontorio Bonae Spei Africes, annis 1772-1775 collegit... Hepper & Fiona Neate, *Plant Collectors in West Africa*. 80. 1971; John Hutchinson (1884-1972), *A Botanist in Southern Africa*. London 1946)

Southern Africa. Perennial, tufted, rhizomatous, erect, robust leafless culms, overlapping hairy cataphylls, glumes shining or translucent, sterile lemmas hairy, common in sandy soil, coastal sand, see *Bothalia* 17(2): 192. 1987.

E. triandra Nees ex Trin. (*Ehrhartia triandra* Nees)

South Africa. Annual, erect, leafy, lax, delicate, sterile lemmas awned and not bearded at base, 3 stamens, shade species, disturbed areas, rock outcrop, along roadsides, rocks, shrubs and in shade of shrubs, wet places, on scraped roadsides, see *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 5,3(3): 61. 1839.

E. villosa Schult.f. (*Aira villosa* L.f.; *Ehrhartia villosa* (L.f.) Schult.f. ex Schult. & Schult.f.; *Ehrhartia villosa* Schult.; *Ehrhartia villosa* Schult. & Schult.f.)

South Africa, Cape Province. Perennial, strongly rhizomatous with robust creeping long rhizomes, canelike stems, robust leafless culms, sheath smooth, ligule ciliolate or ciliate, purplish panicle erect or a raceme, spikelets spreading or nodding, sterile florets similar and densely villous, glumes subequal and acute, sterile lemmas with long soft hairs and bearded at the base, sterile lemmas awned, weedy and invasive species, pasture grass, useful for soil erosion control, on sand dunes as a sand binder, usually on coastal sand dunes and sandy places, see *Systema Vegetabilium, editio decima sexta* 7(2): 1374. 1830.

in English: pyp grass, pipe grass, dunegrass

E. villosa Schult.f. var. ***maxima*** Stapf (*Ehrhartia gigantea* (Thunb.) Sw.; *Ehrhartia gigantea* (Thunb.) Thunb.; *Melica gigantea* Thunb.)

South Africa. Perennial, rare, tufted, robust, erect, often rooting at the lower nodes, sometimes rhizomatous, rhizomes naked, inflated leaf sheath, open unilateral panicle, inflorescence subtended by leaf sheath, lemmas long-haired and shortly awned, suitable for erosion control, useful sand binder and stabilizer, usually grows on sand, on coastal sand dunes, see *Prodromus Plantarum Capensium*, ... 21. 1794, *Prodromus Plantarum Capensium*, ... 192. 1800, *Transactions of the Linnean Society of London* 6: 58, t. 4, f. 8. 1802 and *Flora Capensis* 7: 681. 1900.

in English: dunegrass, dune ehrhartia

in South Africa: doppiesgras

E. villosa Schult.f. var. ***villosa***

South Africa. Perennial, rare, robust, tufted, rhizomatous, inflorescence exerted from leaf sheath, sterile lemmas hairy, useful for erosion control, usually on sand dunes.

Ehrhartia F.H. Wigg. = *Ehrhartia* Weber, *Homalocenchrus* Mieg, *Leersia* Sw., *Leersia* Sol. ex Sw.

Orthographic variant of *Ehrhartia* Thunb.

Bamusoideae, Oryzodae, Oryzeae, Oryzinae, or Ehrhar-toideae, Oryzeae, Oryzinae, type *Ehrhartia clandestina* F.H. Wigg., see *Primitiae Florae Holsaticae* 63-64. 1780, *Nova genera et species plantarum seu Prodromus descriptionum vegetabilium maximam partem incognitorum*. 1, 21. 1788, C.S. Rafinesque, *Neogenyton*, or Indication of Sixty-Six New Genera of Plants of North America. 4. 1825, William Griffith (1810-1845), *Icones plantarum asiaticarum*. 3: t. 144. Calcutta 1847-1854, G. Bentham, in *Journal of the Linnean Society. Botany*. 19: 56. 1881, *Index Kewensis* 1: 312. 1895 and *Contributions from the United States National Herbarium* 12(6): 183-258. 1909, E.D. Merrill, *Index rafinesquianus*. 75. 1949, E. Launert, "A survey of the genus *Leersia* in Africa." *Senckenbergiana Biologica* 46: 129-153. 1965, *Iowa St. J. Sci.* 44: 215-270. 1969,

Journal of the Arnold Arboretum 69(3): 263. 1988, *Flora Mesoamericana* 6: 221-222. 1994, *Contributions from the United States National Herbarium* 39: 56, 63, 64-67. 2000.

Ekmanochloa Hitchc.

For the Swedish botanist Erik Leonard Ekman, 1883-1931, explorer, plant collector in Argentina, Brazil, Cuba and Hispaniola. See J.H. Barnhart, *Biographical notes upon botanists*. 1: 502. 1965; Carl Frederik Albert Christensen (1872-1942), *The Collection of Pteridophyta Made in Hispaniola by E.L. Ekman 1917 and 1924-1930*. Stockholm 1936 in *Kongl. Vetenskaps Akademiens Handlingar*. Ser. 3. bd. 16. no. 2; [Por el Dr. Erik L. Ekman.], *Excursión Botánica al Nord-Oeste de la República Dominicana*. Santo Domingo 1930; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. Philadelphia 1964.

Two species, eastern Cuba, the Caribbean. Bambusoideae, Oryzodae, Olyreae, Olyrinae, perennial, erect, herbaceous, unarmed, caespitose, unbranched, dimorphic culms, tuberous, ligule a minute unfringed membrane, leaf sheaths glabrous or pubescent, auricles absent, leaf blades narrowly lanceolate or suppressed, flowering culms leafless, plants monoecious, inflorescence a pair of slender racemes, all the fertile spikelets unisexual, female spikelet lanceolate, male florets 2 or 3 staminate, 2 glumes herbaceous and acute, lower glume 5-nerved, upper glume 3-nerved, slenderly awned lemma cartilaginous or coriaceous, palea present, 3 membranous lodicules, no stamens, ovary glabrous, 2 stigmas, shade species, lowlands, rocky places, limestone cliffs, pine savannahs, type *Ekmanochloa subaphylla* Hitchc., see *Fl. Friburg*. 1: 172. 1825 and *Manual of the Grasses of the West Indies* 374-377. 1936, *Blumea, Suppl.* 3: 62. 1946, *Brittonia* 34: 25-29. 1982, *Brittonia* 37: 22-35. 1985, *Annals of the Missouri Botanical Garden* 80(4): 846-861. 1993, *American Bamboos* 272-274. 1999, *Contributions from the United States National Herbarium* 39: 56. 2000.

Species

E. aristata Ekman

Cuba. See *Manual of the Grasses of the West Indies* 377, f. 343B. 1936.

E. subaphylla Hitchc.

Cuba. Leaf blades may be suppressed or greatly reduced, photosynthetic function transferred to the culm, glumes emarginate and short, male florets 2 staminate.

Electra Panz. = *Electra* DC. (Compositae, alt. Asteraceae), *Schismus* P. Beauv.

Arundinoideae, Arundineae, or Danthonioideae, Danthonieae, type *Electra calycina* (Loefl.) Panz., see *Species*

Plantarum 1: 73. 1753, *Syn. Pl.* 1: 97. 1805, *Essai d'une nouvelle Agrostographie* 73, 162, 177, t. 15, f. 4. U.S. Natl. Herb.* 24: 181. 1925, *Abhandlungen herausgegeben von der Senckenbergischen Naturforschenden Gesellschaft* 532: 1-81. 1974 [Revision der Gattung *Schismus* (Poaceae: Arundinoideae: Danthonieae)], *Contributions from the United States National Herbarium* 46: 225, 558-560. 2003.

Eleusine Gaertner

From Eleusis, a very ancient city and deme (a township or division, a commune) of Attica, famous for the mysteries of Ceres, about 14 miles northwest of Athens; to the west of the town lay the Rharian, where Demeter, the Greek goddess of earth's fruits, was said to have sown the first seeds of corn; Demeter (Ceres for the Romans) was the daughter of Cronus and Rhea, and sister of Zeus, by whom she became the mother of Persephone; see Joseph Gaertner (1732-1791), *De fructibus et seminibus plantarum*. 1: 7, t. I. Stuttgart, Tübingen 1788.

About 9 species, tropical and subtropical, eastern and north-eastern tropical Africa, South America. Chloridoideae, Eragrostideae, or Chloridoideae, Cynodonteae, Eleusininae, annual or perennial, tufted or mat-forming, glabrous, herbaceous, more or less flattened, more or less erect to geniculate ascending, sometimes rooting at the lower nodes, rhizomatous, rarely stoloniferous, auricles absent, sheaths compressed and strongly keeled, ligule a fringed membrane, leaves flat or folded, plants bisexual, inflorescence spicate and terminal, unilateral branches, primary branches digitate or subdigitate terminating in a spikelet, bisexual and strongly compressed laterally spikelets several-flowered, spikelets secund and sessile to subsessile, florets bisexual, reduced floret at apex, 2 very unequal glumes keeled and awnless, lower glume 1-nerved, upper glume 3-7-nerved, lemmas entire with a prominent keel, palea keels winged or wingless, 2 minute lodicules joined or free, stamens 3, ovary glabrous, 2 plumose stigmas white or dark, small fruit sculptured, common weed species, often HCN toxic, ornamental when in flower, grain crop species, savannah and upland grassland, open habitats, weedy places, a taxonomically difficult genus consisting of closely related species linked to *Acrachne* and *Dactyloctenium* Willd., type *Eleusine coracana* (L.) Gaertner, see *De Fructibus et Seminibus Plantarum ...* 1: 7. 1788, *Journal de Botanique, Appliquée à l'Agriculture, à la Pharmacie, à la Médecine et aux Arts* 1: 75. 1813, *Rel. Haenk.* 1: 273. 1830 and *Contributions from the United States National Herbarium* 12(6): 183-258, vii-xi. 1909, *Fl. Trop. Afr.* 9: 22. 1917,

Contributions from the United States National Herbarium 24(9): 662. 1930, *Gram. Bonar.* edition 4: 28. 1946, *Bull. Soc. Bot. Fr.* 103: 272. 1956, *Acta Bot. Sin.* 9: 67. 1960, *Flora Illustrada de Entre Ríos (Argentina)* 6(2): 1-551. 1969, S.M. Phillips, "A survey of the genus *Eleusine* (Gramineae) in Africa." *Kew Bulletin* 27: 251-270. 1972, *Econ. Old World tropics, East Africa, Uganda. Annual, stout, very adaptable, robust, a low rainfall plant, thrives under hot

conditions, sometimes branching at the upper nodes, erect to ascending, often lodged or prostrate, densely tufted, tillering, root system fibrous and strong, tough leaves flat or folded, inflorescence spicate and involute, packed seed heads, spikes more or less digitate and broad, racemes curving inwards when in fruit, florets hermaphrodite, terminal florets sometimes sterile or male, spikelets persistent and very closely imbricate, lemmas broad-ovate or deeply boat-shaped, palea broadly winged, 3 stamens, small grains globose and usually dark brown, high methionine grain, perhaps a cultigen of the wild species *Eleusine indica* (L.) Gaertner or derives from *Eleusine africana* Kennedy-O'Byrne, flour used for treatment of chicken-pox, grain rather unpalatable but highly nutritious and sustaining, grains eaten by baboons, widely grown in warm regions of Africa and Asia, one of the best dryland crops, straw very tough, valuable fodder, recommended for diabetics, food grain, garden weeds, famine crop, birdseed, used for cooking breads and beer or boiled into a thick porridge (*nsima*), the grain is fermented for alcoholic drinks, the plant is reported to be diaphoretic, diuretic and vermifuge, useful for erosion control, withstand some salinity, can tolerate some waterlogging, found on porous soils, disturbed ground, in ordinary garden soil, roadsides and banks, in highland and lowland, in dry areas, rich loams, on black cotton soils, poor shallow upland soils, in savannah areas with moderate rainfall, on red lateritic loams, is being abandoned in Africa, see *Systema Naturae, Editio Decima* 2: 875. 1759, *Sp. Pl.* edition 2. 106. 1762, *De Fructibus et Seminibus Plantarum...* 1: 8, t. 1, f. 11. 1788, *Icones Stirpium Rariorum* 19. 1796, *A Botanical Materia Medica* 1: 149. 1812, *Flora Indica; or Descriptions ...* 1: 344. 1820, *Species Graminum* 1828-1836, *Hortus Britannicus* 571. 1830, *Museum Senckenbergianum* 2: 141. 1837, *Florae Africae Australioris Illustrationes Monographicae* 251. 1841, *Apontamentos Phytogeographicos sobre a flora da provincia de Angola na Africa equinocial...* 591. 1859, *Gartenflora* 21: 205. 1872, *Handbuch des Getreidebaus* 1: 329. E. coracana (L.) Gaertner subsp. *africana* (Kenn.-O'Byrne) Hilu & de Wet (*Eleusine africana* Kennedy-O'Byrne; *Eleusine indica* (L.) Gaertn. subsp. *africana* (Kenn.-O'Byrne) S.M. Phillips)

Pantropical, Asia, Africa. Annual or perennial, rather or moderately robust, tufted, extensive and vigorous root system, leaf sheath compressed, ligule a ciliate fringe, leaf blades shiny and keeled, racemes arranged digitately or subdigitately on the primary axis, flowering culm green, spikelets awnless, weed species, tetraploid, glumes acute, lower glume winged on the keel, lemmas lanceolate and acute, progenitor of finger millet, weed species, low grazing value, tough and unpalatable as it matures, utilized by livestock in the young stage, toxic to stock, grain crop, fermented for alcoholic drinks, seeds viable for many years, grains used to make flour and cereal, grains eaten by baboons, occurs in disturbed areas, grassland, savannah, slopes, limestone, streams and ditches, see *De Fructibus et Seminibus Plantarum*.... 1: 8. 1788 and *Kew Bulletin* 12: 65. 1957, *Kew Bulletin* 27(2): 259. 1972, *Economic Botany* 30: 202. 1976, *Phytologia* 78(5): 411. 1994.

in English: goose grass, African goose grass, African finger millet, wild finger millet, Bermuda grass, crab grass, crow-foot grass, dog's tail, wire grass, yard grass

in Somalia: baldole

in southern Africa: Afrikaanse osgras, jongosgras, jongospol, osgras, sterkpol, rapokagras; makha (Shona); maseka (Tswana); moseli (Sotho); pokwana (Ndebele); unyankomo (Zulu)

in Yoruba: ajilekege, oyinbo otosi

E. coracana (L.) Gaertn. subsp. *coracana* (*Cynosurus coracanus* L.; *Eleusine tocussa* Fresen.)

Cereal, widely cultivated in tropic, subtropic and warm temperate regions of Africa and Asia, the grains fermented for alcoholic drinks, see *De Fructibus et Seminibus Plantarum*.... 1: 8. 1788.

in English: coracan millet, caracan millet, finger millet

in Spanish: dagussa, mijo africano

in French: coracan, mil rouge

in India: ragi

E. floccifolia (Forssk.) Spreng. (*Chloris floccifolia* (Forssk.) Poir.; *Cynosurus floccifolius* Forssk.)

Ethiopia, Yemen. Perennial, coarse, densely tufted, branched below, tough leaves usually folded and hairy along the margins, ligule a ciliolate membrane, tough rhizome, slender subdigitate inflorescence, ascending or spreading spikes, elliptic spikelets, glumes unequal, lemmas acute, pasture, heavy clay soils, ditch sides and wet places, grassy

field borders, damp areas and pond margins, high rainfall areas, along roadsides, see *Flora Aegyptiaco-Arabica* 21. 1775, *Encyclopédie Méthodique. Botanique ... Supplément* 2: 238. 1811, *Systema Vegetabilium, editio decima sexta* 1: 350. 1824 and *Kew Bulletin* 27(2): 251-270. 1972, *Brigham Young University Science Bulletin: Biological Series* 19(2): 1-133. 1974.

in Somalia: gurgor

Pantropics and subtropics, origin paleotropics. Annual or short-lived perennial, rather coarse, vigorous, slender to robust, compact, glabrous, smooth, stoloniferous, extensive root system, forming thick clumps, culms laterally flattened, erect or spreading, ascending or prostrate and branching at the base, leaf sheaths hairy or smooth and flattened to keeled, shiny leaves flat or folded, ligule a tuft of hairs or minutely fringed, a cluster of digitate and terminal spikes green and sessile, awnless, loosely overlapping spikelets lanceolate and flattened, 2 glumes persistent, keeled glumes and lemmas, glumes shorter than the lemmas and oblong-lanceolate to narrow ovate, lemmas lanceolate and not incurved, palea membranous and narrowly winged, lodicules membranous, 3 stamens, anthers yellow to purplish, stigmas purple, rugose grain oblong reddish brown to black, infusion of macerated leaves drunk as a remedy for urine retention, infusion eases vaginal bleeding, used as flour for bread or soup in times of scarcity, a very strong and particularly tough fibrous root system, generally unpalatable to stock, eaten when young, when mature foliage is very tough, cyanogenic or HCN toxic, can be poisonous to stock, has been recorded as causing the deaths of calves and sheep, culms used for hats, can withstand flood inundation for limited periods, a very polymorphic species, suitable for stabilizing sandy soils, similar to and confused with *Lepidochloa digitata* (R. Br.) Domin, a common aggressive noxious weeds of lawns and playing fields, common in bare or

disturbed areas, lowlands, low hills, sandy soils, compacted soils, in ordinary garden soil, yards, sandy riverbanks, garden weeds and arable land, cultivated areas, waste places and along roadsides, hill forest, on rocky roadside and gravel, wet plains, farm tracks, on floodplains and shores, thickets, damp pasture, areas exposed to trampling, see *Species Plantarum* 1: 72-73. 1753, *Systema Naturae, Editio Decima* 2: 875. 1759, *Encyclopédie Méthodique, Botanique* 2: 188. 1786, *De Fructibus et Seminibus Plantarum...* 1: 8. 1788, *Methodus Plantas Horti Botanici ...* 210. 1794, *Prodromus stirpium in horto ad Chapel Allerton vigentium*. 19. in southern Africa: Indiese osgras, jongosgras, jongospol, osgras, ospol, sterkpol; lia-ngoetsi (Sotho); umnyalakhobe (Zulu); unyankomo (Ndebele)

in Upper Volta: garga, gatan, tar ganga, targanga

in Yoruba: gbagi, gbegi, gbegidina, ese kannakanna

in Bhutan: cholop, shade jhar, kongpu ngoon, daday, kodho jhar

in Cambodia: choeung kras

in India: chaodhara, chichora, gadha charwa, gadha chichora, gadha mandwi, ghada mandwi, ghod-chabba, gur-chawa, gurra gadi, hakki kaalina hullu, hechhuli hullu, jhingri, jhinjhor, kaaruchodi, kakariya, khurd, khurd mendi, kuror, lijhar, madanya, madhulika, mandial jori, mahar nachni, makaraita, makraila, mal ankuri, malankur, malankuri, malnkuri, mandla, mandwa, medwari, mirwari, nandia, nandimukhi, phanghad, ran nachani, thippa raagi, thippa ragi, thoseria pandhad

in Japan: o-hi-shiba

in Laos: nia pak kouay

Malayan name: rumpu sambau

in Okinawa: shipu-kusa, ibafusa

in the Philippine Islands: apidan, bakis-bakistan, barangan, bikad-bikad, bila-bila, bugtusan, dinapaiuk, gagabutan, kabit-kabit, palagtiki, paragis, parangis, parangis-sabungan, sabung-sabungan, sambali

in Sri Lanka: belatana, walmal kurakkan

in Thailand: ya pak khok, yaa paak khok, ya pak khwai, yaa paak khwaai, ya phak khwai, yaa phaak khwaai, yaa teenkaa, yaa teennok, ya tin nok, ya tin ka, yaa tinkaa, yoe khum

in Vietnam: tranh tam thao, co man trau, co viron trau, co chi tia, co dang, co bac

in the Pacific: mosie fahitalo

in Hawaii: manienie ali'i

in Samoa: lau ta'a ta'a, ta'a ta'a

in Tonga: takataka, takataka 'a leala

E. indica (L.) Gaertn. subsp. *indica* (*Cynosurus indicus* L.; *Eleusine distans* Moench; *Eleusine glabra* Schumach.; *Eleusine gracilis* Salisb.; *Eleusine indica* (L.) Gaertn.; *Eleusine indica* (L.) Gaertner var. *monostachya* F.M. Bailey; *Eleusine indica* var. *sandaensis* Vanderyst; *Eleusine textilis* Welw.)

Asia, India. Annual, stoloniferous, tufted, spikelets disarticulating at maturity, growing on rocky soil, ruderal, see *Species Plantarum* 1: 72-73. 1753, *De Fructibus et Seminibus Plantarum*... 1: 8. 1788, *Methodus Plantas Horti Botanici ...* 210. 1794, *Prodromus stirpium in horto ad Chapel Allerton vigentium*. 19. (Nov-Dec) 1796, *Beskrivelse af Guineiske planter* 53-54. 1827, *Kongel. Danske Vidensk. Selsk. Naturvidensk. Math. Afh.* 3: 73-74. 1828, *Journal of Travel and Natural History* 1: 31. 1868 and *The Queensland Flora* 6: 1898. 1902, *Bulletin agricole du Congo Belge* 11: 122. 1920, *Taxon* 49(2): 249. 2000.

in English: goose grass

in South Africa: osgras

E. intermedia (Chiov.) S.M. Phillips (*Eleusine indica* var. *intermedia* Chiov.)

Ethiopia. Perennial, tufted, leaf blades flat or folded, ligule a ciliolate membrane, stout rhizomes, inflorescence of ascending or spreading clustered spikes, spikelets elliptic, lemmas lanceolate-oblong, bushland, see *Webbia* 8: 113. 1951, *Kew Bulletin* 27: 269. 1972.

E. jaegeri Pilg. (*Eleusine jaegeri* var. *maxima* Peter)

Tropical and southern Africa, Tanzania. Perennial bunchgrass, coarse, densely tufted, very tough tussocks, compressed branching culms, leaf blades tightly folded, ligule a ciliate fringe, stiff leaves with sharp edges, stiff inflorescence, slender spikes on a short axis, spikelets densely crowded, unpalatable and avoided by stock, useful for erosion control and soil stabilization, used for weaving baskets, dominant in open areas, upland grassland, in dark volcanic sand, tussock grassland, see *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 43(1): 93. 1909, *Repertorium Specierum Novarum Regni Vegetabilis, Beihefte* 40(1) Anhang: 78. 1930.

in English: Manyatta grass

in Kenya: mafutiana

in Tanzania: arumakutiyni, ormakutian lendini, oramakutya

in Ethiopia: akirma

E. kigeziensis S.M. Phillips

Uganda. Perennial, tufted, branching at the lower nodes, leaf blades folded, ascending rhizome, inflorescence digitate with spikes loosely ascending to widely spreading, spikelets narrowly oblong, upper glume and lemmas with 3-nerved keel, lower glume narrowly winged on the keel, in forest, grassland, see *Kew Bulletin* 27: 266. 1972.

E. multiflora Hochst. ex A. Rich. (*Eleusine multiflora* Hochst.; *Eragrostis kwaiensis* Peter) (Tanzania, Usambaras, Kwai)

East tropical Africa, Yemen, Kenya, Tanzania, Ethiopia. Annual, ascending, loosely tufted, erect or decumbent, slender, internodes solid, leaves sparsely villous and acute, ligule truncate, inflorescence shortly racemose, short spikes oblong to ovate, lemmas cuspidate or mucronate, spikelets ovate, 5- to 15-flowered, glumes keels winged, lemmas narrowly ovate, anthers yellowish cream, fodder, ornamental, weed of cultivated fields, disturbed gravelly places, open habitats, bushveld, grassveld, see *Tentamen Florae Abyssinicae ...* 2: 412. 1850 and *Repertorium Specierum Novarum Regni Vegetabilis, Beihefte* 40(1) Anhang: 99. 1930, *Flora Novo-Galiciana* 14: 157. 1983.

in Spanish: pata de ganzo

in Mexico: pasto

E. semisterilis S.M. Phillips

Kenya. Racemes with imbricate spikelets terminating with a sterile spikelet, see *Kew Bulletin* 27: 263. 1972.

E. tristachya (Lam.) Lam. (*Agropyron geminatum* (Spreng.) Schult.; *Cynosurus tristachyos* Lam.; *Eleusine barcinonensis* Costa; *Eleusine coracana* sensu J. Black, non (L.) Gaertner; *Eleusine indica* var. *brachystachya* Trin.; *Eleusine indica* var. *condensata* Döll; *Eleusine indica* var. *tristachya* (Lam.) South America, Bolivia, southern Brazil to northern Argentina. Perennial or short-lived perennial bunchgrass, low, tufted, coarse, stout, erect, oblique or ascending, decumbent, densely spreading, sometimes shortly stoloniferous, culms striate and compressed, sheath keeled and coriaceous, ligule ciliolate or ciliate, leaves strongly keeled and flat or folded, a cluster of digitate and sessile short broad spikes, spikes usually 2 or 3, spikelets narrowly-ovoid and densely overlapping, unequal glumes obtuse and glabrous, lemmas keeled and acute, palea keels winged or wingless, lodicules 3-lobed, invasive weed species of no grazing value, forage, common on disturbed ground, wasteland, disturbed weedy places, heavy soils, along roadsides, on open slopes, moist savannah, lawns, golf courses, similar to *Eleusine indica* (L.) Gaertner, confused with *Eleusine coracana* (L.) Gaertner, see *Encyclopédie Méthodique, Botanique* 2: 188. 1786, *Tableau Encyclopédique et Méthodique ... Botanique* 1: 203. 1791 [1792], *Sylloge Plantarum Novarum* 1: 191. 1824, *Systema Vegetabilium, editio decima sexta* 1: 326. 1825, *Mantissa* 3(Add. 1): 655. 1827, *Hortus Regius Botanicus Berolinensis* 1: 60. 1827, *Species Graminum* 1828-1836, *Révision des Graminées* 1: 92. 1829, *Nomenclator Botanicus. SE Queensland* 3: 179, f. 27E. 1989, *Fl. New South Wales* 4: 528. 1993, *Fl. Victoria* 2: 570, f. 114c. 1994.

in English: American goose grass, crab grass, American crowfoot grass, goose grass, 3-spike goose grass

Elionurus Humb. & Bonpl. ex Willd. =
Callichloea Steud., *Elionurus* Kunth,
Elyonurus Humb. & Bonpl. ex Willd.,
Elyonurus Kunth & Bonpl. ex Willd.,
Elyonurus Kunth ex Willd., *Habrurus* Hochst.

From the Greek *heleios* “dor-mouse” (Aristoteles, *Historia animalium*. 600b 12 etc.) and *oura* “a tail,” the old racemes are like the tail of a dor-mouse; or from *elyo* “to cover, to wind” and *oura*, referring to the nature of the glume; or from *elyein* “to roll” and *oura*, alluding to the racemes, curling when old; see Carl L. von Willdenow, *Species Plantarum*. edition 4, 4(2): 941. 1806.

About 15-25 species, tropical and subtropical, Africa, America, Australia. Panicoideae, Andropogonodae, Andropogoneae, Rottboelliinae, perennial or annual, herbaceous and unbranched, tufted, erect or ascending, internodes solid, sheaths terete, leaves narrow and sometimes aromatic, blades flat or folded or involute, auricles absent, ligule a densely ciliate and very short membrane-like, plants bisexual, inflorescence a single terminal flexuous raceme, spikelets paired and dissimilar, sessile spikelet fertile and 2-flowered, large cuneate callus of sessile spikelet, lower floret sterile, upper floret bisexual, glumes very unequal to subequal, lower glume 2-keeled and ciliate, pedicellate spikelet reduced and sterile, palea present or absent, 2 lodicules free and fleshy, stamens 3, ovary glabrous, anthers brown or yellow or purple, stigmas red, fruit compressed, native pasture species, livestock forages of grasslands and savannahs, essential oils, open habitats, along streams and rivers, savannah, rainforest, grasslands, pampas, dry soils, sandy soils, sand dunes, close to *Loxodera* Launert, type *Elionurus tripsacoides* Humb. & Bonpl. ex Willd., see *Species Plantarum. Editio quarta* 4(2): 941-942. 1805 [1806], *Nov. Gen. Sp.* 1: 192. 1815, *Mémoires du Muséum d'Histoire Naturelle* 2: 69. 1815 [1816], *Nomenclator Botanicus. (Latin *muticus, a, um* "blunt," awnless)

Tropical and southern Africa, Brazil to Argentina, Yemen. Perennial, erect, herbaceous, unbranched, densely tufted, forming clumps or dense clumps, at base remains of old leaf-sheaths, aromatic, leaves mostly basal, leaf sheath thin and rounded, ligule a dense ring of hairs, leaf blade narrow and thread-like, single spike-like inflorescence with silky white hairs, upright and silver woolly spike, racemes solitary terminal, mature inflorescence curled and sickle-shaped, each raceme enclosed by the sheath of the upper leaf, spikelets paired, 2-lobed lower glume, sessile spikelets bisexual and awned, pedicelled spikelet male or sterile and awnless, provides some grazing before flowering, very low grazing value, hard and very unpalatable, the roots are chewed to alleviate toothache, occurs in moderately dry areas, well-drained mountain ridges, open deciduous bushland, heavily grazed fields, overgrazed veld, swampy places, wet savannah, savannah and grassland, mixed savannah, burned and mixed savannah, poor stony soils, cliff tops, along drainage, among boulders, coastal sand dunes, hill-sides, shallow soil, see *Systema Vegetabilium, editio decima sexta* 4(2): 32-33. 1827, *Flora Brasiliensis seu Enumeratio Plantarum* 357. 1829, *Révision des Graminées* 1: 166. 1829, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Elymandra Stapf = *Pleiadelphia* Stapf

From the Greek *elymos* "a cereal, millet" and *aner*, *andros* "man, stamen."

About 4-6 species, tropical Africa, Brazil. Panicoideae, Andropogonodae, Andropogoneae, Andropogoninae or Panicoideae, Andropogoneae, Anthistiriinae, annual or perennial, herbaceous, coarse, tufted, branched, auricles absent, ligule an unfringed membrane, plants bisexual, inflorescence paniculate, a pair of slender racemes long-exserted, spikelets in pairs or in triplets, dark sessile spikelets subterete with pungent callus, male-only spikelets or sterile pairs at the base, terminal heterogamous triad, olive-green homoganmous spikelets, 2 glumes more or less equal, lower glume not grooved, upper glume awned, upper lemma bilobed and awned, palea absent, 2 free and fleshy small lodicules, 3 stamens, ovary glabrous, 2 stigmas, pedicellate spikelets male and awnless, shade species or open habitats, sandy soils, open sand veld, savannah woodland, along roadsides, waste places, poor sandy soil in savannah, related to *Parahyparrhenia* and *Heteropogon*, type *Elymandra androphila* (Stapf) Stapf, see *Species Plantarum* 2: 1045. 1753, *Methodus Plantas Horti Botanici* ... 207. 1794, *Syn.*

Pl. 2: 533. 1807, *Mexicanas Plantas* 2: 51, 67. 1886 and *Flora of Tropical Africa* 9: 293, 320-321, 407-408. 1919, *Hooker's Icones Plantarum* 30: t. 3121. 1927, *Journal d'Agriculture Tropicale* 1: 48. 1954, *Kew Bulletin* 20(2): 287-293. 1966, W.D. Species

E. androphyla (Stapf) Stapf (*Andropogon androphilus* Stapf; *Heteropogon androphilus* (Stapf) Roberly)

Tropical Africa, French Guinea. Perennial, coarse, upper glume awnless, thatching grass, see *Journal de Botanique (Morot)* 19: 103. 1905, *Boissiera*. 9: 142. 1960, *Bulletin de l'Institut Française d'Afrique Noire* 22: 110. 1960.

in Sierra Leone: fualobi, lofuna

E. archaelymandra (Jacq.-Fél.) Clayton (*Hyparrhenia archaelymandra* Jacq.-Fél.)

Africa, Senegal. At the base of each raceme 2 homogamous pairs of spikelets separated by an internode, see *Journal d'Agriculture Tropicale* 1(1-4): 48, t. 7. 1954, *Kew Bulletin* 20(2): 291. 1966, *Kew Bulletin, Additional Series* 2: 173. 1969.

E. grallata (Stapf) Clayton (*Hyparrhenia eylesii* C.E. Hubb.; *Hyparrhenia grallata* Stapf)

Tropical Africa, Mozambique. Perennial, rare, tufted, spikelets olive-green to dark brown, in open sand veld, sandy soil in woodland, see *Flora of Tropical Africa* 9(2): 320-321. 1919, *Bulletin of Miscellaneous Information Kew* 1928(1): 37-38. 1928, *Kew Bulletin* 20(2): 292. 1966.

E. lithophila (Trin.) Clayton (*Andropogon bovonei* Chiov.; *Andropogon lithophilus* Trin.; *Hyparrhenia lithophila* (Trin.) Pilg.; *Sorghum lithophilum* (Trin.) Kuntze)

Brazil. See *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 2(3): 277. 1832, *Revisio Generum Plantarum* 2: 792. 1891 and *Nuovo Giornale Botanico Italiano*, n.s., 26: 59. 1919, *Die natürlichen Pflanzenfamilien, Zweite Auflage* 14e: 174. 1940, *Kew Bulletin* 20(2): 292-293. 1966.

E. subulata Jacq.-Fél.

Tropical Africa. Annual, tufted, floodplains, waste places, flooded areas, poor soils, savannah, see *Revue internationale de botanique appliquée et d'agriculture tropicale* 30: 170, f. 11-2. 1950.

in Guinea: chelbi, kelbi

Koch, *Semeiostrachys* Drobow, *Sitanion* Raf., *Sitospelos* Adans., *Stenostachys* Turcz., *Terrellia* Lunell, *Zeia* Lunell

From the Greek name *elymos* "millet" (*elyo* "to cover"); see Carl Linnaeus, *Species Plantarum*. 83. 1753 and *Genera Plantarum*. edition 5. 36. 1754.

Some 20 or 120-200 species, cosmopolitan, cool temperate regions. Pooideae, Triticeae, or Pooideae, Triticeae, Hordeinae, perennial, culms erect or ascending or decumbent, slender to stout, coarse, open, tussocky, herbaceous, leafy, unbranched above, densely to loosely tufted, with long spreading and creeping rhizomes or without rhizomes, culm nodes glabrous, culm internodes hollow, ligule membranous and short, leaf blade flat and linear, foliage clumps, plants bisexual, chasmogamous and cleistogamous, inflorescence an unbranched terminal spike, spicate and bristled inflorescence erect or nodding with spikelets sessile, spikelets several-flowered and solitary or in groups of 2 or 3 at each node, florets long-awned to mucronate, glumes persistent and unequal, lemmas lanceolate-oblongate and rounded on the back or keeled at the apex, awned or awn absent, spikelets with a callus at the base or also a pedicel, paleas 2-keeled, 2 ciliate lodicules free and membranous, ovary hairy with apical corona, stigmas white, fruit compressed dorsiventrally, sand binder, the grain in this genus is worth collecting for food, tussocks are very palatable and palatability depends often on the soils, found in woodland and steppes, hillsides, dunes in saline areas, nomenclatural problems, considerable taxonomic confusion concerning this genus and the related genera *Agropyron* Gaertn. and *Elytrigia* Desv., intergeneric hybrids with *Sitanion* Raf. and *Triticum* L., type *Elymus sibiricus* L., see *Species Plantarum* 1: 83-84. 1753, *Familles des Plantes* 2: 36, 606. 1763, *Botanisches Magazin (Römer & Usteri)* 7: 5. 1790, *Methodus Plantas Horti Botanici ...* 294-295. 1794, *Enumeratio Plantarum Horti Botanici Berolinensis, ...* 1: 132. 1809, *Nouveau Bulletin des Sciences, publié par la Société Philomatique de Paris* 2: 190. 1810, *Journal de Physique, de Chimie, d'Histoire Naturelle et des Arts* 89: 103. 1819, *Annals of Natural History* 1: 284. 1838, *Flore de Lorraine* 3: 191. 1844, *Nomenclator Botanicus Hortensis* 2: 174. 1846, *A Manual of the Botany of the Northern United States* 604. 1848, *Linnaea* 21(4): 413. 1848, *Flora Rossica* 4(13): 330. 1852, *Synopsis Plantarum Glumacearum* 1: 237, 354. 1854, *Bulletin de la Société Impériale des Naturalistes de Moscou* 35(2): 311, 330. 1862, *Genera Plantarum* 3(2): 1207. 1883, *Die Natürlichen Pflanzenfamilien* 2(2): 88. 1887, *Index Kewensis* 1: 836. 1893, *Consp. Species

E. abolinii (Drobow) Tzvelev (*Agropyron abolinii* Drobow; *Gouardia abolinii* (Drobow) Ikonn.; *Roegneria abolinii* (Drobow) Nevski)

China. Spikes nodding, spreading awns, see *Repertorium Specierum Novarum Regni Vegetabilis* 21(581-587): 42. 1925, *Genome* 32: 468-474. 1989.

E. africanus Á. Löve (*Agropyron elymoides* P. Candargy, nom. illeg., non *Agropyron elymoides* Hack.; *Anthosachne elymoides* (Hochst. ex A. Rich.) Nevski; *Elymus triticoides* Buckley; *Triticum elymoides* Hochst. ex A. Rich.)

Ethiopia. Perennial, tufted, slender, leaf blades narrowly linear, ligule truncate, slender inflorescence spicate and loose, spikelets 5- to 6-flowered, glumes subequal, lemmas narrowly lanceolate-oblong, stout awn strongly recurving, related to *Elymus longiaristatus* (Boiss.) Tzvelev, see *Tentamen Florae Abyssinicae ...* 2: 440. 1850 and *Archives de Biologie Végétale Pure et Appliquée* 1: 57. 1901, *Feddes Repertorium* 95(7-8): 468. 1984.

E. agropyroides J. Presl (*Elymus agropyroides* var. *brevimucronatus* Hauman; *Elymus albowianus* Kurtz; *Elymus angulatus* J. Presl; *Elymus antarcticus* Hook.f.)

South America, Chile, Argentina. Bunchgrass, rhizomatous, useful for erosion control, see *Reliquiae Haenkeanae* 1(4-5): 264-265. 1830, *Flora Antarctica* 2: 388. 1847, *Revista del Museo de La Plata* 7: 401. 1896 and *Bot. Jahrb. Syst.* 120(4): 511. 1998.

E. alashanicus (Keng) S.L. Chen (*Elymus alashanicus* (Keng ex Keng & S.L. Chen) S.L. Chen; *Roegneria alashanica* Keng ex Keng & S.L. Chen)

China. Glumes much shorter than the first lemma and glabrous on both surfaces, lemmas without awns, glabrous rachilla, see *Journal Nanjing University. Natural Sciences Edition* 3: 73. 1963, *Bulletin of the Nanjing Botanical*

Garden, Mem. Sun Yat Sen 8. 1988-1989 [Sun Yat-Sen Tomb and Memorial] [*Nanjing Zhongshan Zhiwuyuan yanjiu lunwenji*], *Bulletin of Botanical Research* 14(2): 142. 1994.

Lunell ex Hitchc.; *Terrellia diversiglumis* (Scribn. & C.R. Ball) Lunell (David Arthur Brodie, b. 1868)

Northern America. Perennial bunchgrass, loosely tufted, tall, greenish, coarse, robust, erect, shortly rhizomatous, clump-forming, roots fibrous, culms hollow, stems tough and woody at maturity, auricles present, ligules finely hairy, smooth sheaths open to the base, leaves scabrous bluish green to green, leaf blade flat and pointed, terminal spikes arching and bristly, 2 spikelets to a node, greenish flowers, narrow glumes slightly roughened and stiff, lemmas lanceolate and rough, awns curved and sharp, ornamental, good ground cover for dry sunny slopes, can be used for binding sand dunes, useful for erosion control, self-seeding tendencies, foliage and spikes turn tan in fall, when young is palatable to all classes of livestock, drought intolerant, naturalized in prairie, usually found dry habitats, in a disturbed part of a sand prairie, in open woods, gravelly banks of rivers, fields, stream banks and waste areas, disturbed roadsides, in moist to sandy meadows, chaparral, desert grasslands, in wetlands or nonwetlands, alluvial woods, sandy beaches, dry sandy gravelly or rocky soil, hybridizes with slender wheatgrass (*Elymus trachycaulus* (Link) Gould ex Shinners), Texas wildrye (*Elymus interruptus* Buckl.) and Virginia wildrye (*Elymus virginicus* L.), see *Species Plantarum* 1: 83-85. 1753, *Centuria I. Plantarum* ... 1: 6. 1755, *Methodus Plantas Horti Botanici* ... 199. 1794, *Enumeratio Plantarum Horti Botanici Berolinensis*, ... 1: 131. 1809, *A Flora of the Northern and Middle Sections of the United States* 1(1): 137. 1824 [1823], *A Manual of Botany* 232. 1840, *Bulletin, Division of Agrostology United States Department of Agriculture* 4: 37. 1897, *Bulletin, Division of Agrostology United States Department of Agriculture* 13: 49. 1898, *Erythea* 7: 100. 1899 and *Bulletin, Division of Agrostology United States Department of Agriculture* 24: 48, f. 22. 1901, *Synopsis der mitteleuropäischen Flora* 2: 745. 1902, *American Midland Naturalist* 4: 228. 1915, *Rhodora* 20(233): 90. 1918, *Report of the Michigan Academy of Science, Arts and Letters* 21: 357. 1920, *American Midland Naturalist* 10: 314. 1927, *Rhodora* 35(414): 191-193. 1933, *Nordisk Kärnväxtflora* 1: 381. 1953, *Canadian Journal of Botany* 42: 574-575. 1964, *Taxon* 29(1): 167.

in English: squirreltail

E. elymoides (Raf.) Swezey subsp. ***hordeoides*** (Suksd.) Barkworth (*Elymus hordeoides* (Suksdorf) Barkworth & D.R. Dewey; *Sitanion hordeoides* Suksdorf; *Sitanion hystrix* var. *hordeoides* (Suksdorf) C.L. Hitchc.)

California, U.S., Oregon. Perennial, usually occurs in nonwetlands, occasionally found on wetlands, see *Werdenda* 1(2): 4-5. 1923, *Vascular Plants of the Pacific Northwest* 1: 701. 1969, *American Journal of Botany* 72(5): 772. 1985, *Phytologia* 83(4): 306. 1997 [1998].

in English: barley squirreltail, squirreltail

E. enysii (Kirk) Á. Löve & Connor (*Agropyron enysii* Kirk) New Zealand. Pioneer grass, more or less geniculate, slender, tufted or open, drooping, rooting at nodes, stoloniferous, ligule erose, auricles present, compact inflorescence, glumes more or less equal, lemma apex bifid, palea apex pointed and bifid, high wind tolerance, found in stream banks, swamps, seepages, see *Transactions and Proceedings of the New Zealand Institute* 26: 272. 1894, *Transactions and Proceedings of the New Zealand Institute* 27: 352. 1895 and *Illus. Fl. N.Z.* 2: t. 234. 1914, *New Zealand Journal of Botany* 20(2): 183. 1982.

in English: wheatgrass

E. erosiglumis Melderis

Turkey. Rare species, see *Notes from the Royal Botanic Garden, Edinburgh* 42(1): 78. 1984.

E. falcis Connor

New Zealand. Pioneer grass, prostrate to ascendine, auricles tiny or absent, leaf blades falcate, glumes more or less equal, palea apex pointed and bifid, occasionally cleistogamous, high wind and drought tolerance, river beds, rocky places, along streams, see *New Zealand Journal of Botany* 32: 132, f. 3. 1994.

in English: wheatgrass

E. farctus (Viv.) Runem. ex Melderis (*Agropyron junceiforme* (Á. & D. Löve) Á. & D. Löve; *Agropyron junceum* (L.) P. Beauv.; *Agropyron junceum* subsp. *mediterraneum* Simonet; *Elymus junceus* Fisch.; *Elytrigia juncea* (L.) Nevski; *Elytrigia juncea* (L.) Nevski subsp. *juncea*; *Elytrigia juncea* subsp. *mediterranea* (Simonet) Hyl.; *Elytrigia junceiformis* Á. & D. Löve; *Thinopyrum junceum* (L.) Á. Löve; *Triticum farctum* Viv.; *Triticum junceum* L.) (from the Latin *farctus*, *a*, *um* participle of *farcio*, *farsi*, *farctum* "to stuff, fill full, to cram, to fill")

Mediterranean, Turkey, Israel, Europe. Perennial, rhizomatous, with long creeping rhizomes, stems rigid and glabrous, rigid leaves convolute or flat, spike narrow, fragile racemes, keeled glumes awnless and narrow-lanceolate or oblong, lemma unawned and glabrous, sand-binder especially in saline areas, closely related to *Elymus elongatus* (Host) Runemark, sometimes considered to be a synonym of *Elytrigia juncea* (L.) Nevski subsp. *juncea*, see *Annals of Botany* 1(2): 159. 1804 and *Botanical Journal of the Linnean Society* 76(4): 382. 1978, *Berichte des Geobotanischen Instituts der Eidg. Techn. Hochschule Stiftung Rübel* 57: 182-192. 1991.

in English: Russian wild rye, sand couch grass, sand couch, sea wheatgrass

in French: chiendent des sables

in Spanish: grama de las playas

Watson & J.M. Coult.; *Elymus sibiricus* var. *glaucus* (Buckley) Ramaley; *Elymus villosus* var. *glabriusculus* Torr.; *Terrellia glauca* (Buckley) Lunell) (named after Kenneth Kent Mackenzie, 1877-1934)

Northern America, Canada, U.S., California. Perennial bunchgrass, tufted, stiff-stemmed, light bluish, erect, short-lived, stoloniferous or shortly rhizomatous, commonly grows in small tufts of only a few stems, vigorous fibrous root system well branched, sheaths open, auricles present, inflorescence a dense erect and narrow spike, more than 1 spikelet per node, spikelets are 2 or rarely 3 per node or solitary at the upper and lower nodes, glumes narrow lance-shaped with edges transparent, curved or straight awn, very small grain, viable plant species, fodder, forage, drought-tolerant, not tolerant of shallow soils, planted near the coast to stabilize sand dunes, occurs from near sea level to sub-alpine montane sites, in sandy soils, among rocky knolls, moist or dry open thickets and shores, along lakeshores, in meadows, open woods and dry to moist hillsides, on moderately moist soils, see *Species Plantarum* 1: 83. 1753, *Enumeratio Plantarum Horti Botanici Berolinensis, ...* 1: 131. 1809, *Pacif. Railr. Rep.* 4(5): 157. 1857, *Proceedings of the Academy of Natural Sciences of Philadelphia* 14: 99-100. 1862, *Bulletin of the Torrey Botanical Club* 13(7): 120. 1886, *Bulletin Colorado State University Experiment Station* 12: 57. 1890, *A Manual of the Botany of the Northern United States (edition 6)* 673. 1890, *Minnesota Botanical Studies* 9: 112. 1894 and *A Flora of Western Middle California* 79-81. 1901, *Bulletin of the Torrey Botanical Club* 36: 539-540. 1909, *American Midland Naturalist* 4: 228. 1915, *American Midland Naturalist* 10: 53. 1926.

in English: blue wildrye, Western ryegrass, smooth wildrye

E. glaucus Buckley subsp. ***glaucus*** (*Elymus glaucus* var. *breviaristatus* Burt Davy)

California, northern America, Canada, U.S., Alaska. Perennial, usually occurs in nonwetlands, occasionally found on wetlands.

in English: blue wildrye, western ryegrass, Western rye, smooth wildrye

E. glaucus Buckley subsp. ***jepsonii*** (Burt Davy) Gould (*Clinelymus glaucus* var. *pubescens* Nevski; *Clinelymus velutinus* (Scribn. & Merr.) E. lanceolatus (Scribner & J.G. Smith) Gould (*Agropyron dasystachyum* (Hook.) Scribn.; *Agropyron lanceolatum* Scribn. & J.G. Sm.)

Northern America, Pacific Northwest, U.S., Colorado. Perennial, long-lived, blue-green, coarse, erect, sod-forming, spreading readily from branched rhizomes, aggressive creeping root system, auricles present, sheath open and densely hairy, ligule short, stiff and inrolled leaf blades, flower head erect and stiff, well-spaced spikelets, rounded glumes, lemmas rarely awned, awns slightly divergent, high drought tolerance, useful for conservation of disturbed areas and for critical areas stabilization, growing on sandy soils along lakeshores, benches, sandy loam, dry hillsides, dry banks, exposed flats and ridges, well-drained meadows, riverbanks and sandy dunes, open habitats, gravelly creek beds, on heavy alkaline flats, see *Flora Boreali-Americana* 2: 254. 1840, *Bulletin of the Torrey Botanical Club* 10(7): 78. 1883, *Bulletin, Division of Agrostology United States Department of Agriculture* 4: 34. 1897 and *Madroño* 10: 94. 1949, *Genome* 32: 468-474. 1989, *Genome* 36: 72-76. 1993.

in English: streamside wild rye, thick-spike wheatgrass, thickspike wildrye

South America. See *Revista del Museo de La Plata (Nueva Serie), Sección Botánica* 3: 14, f. 2-3. 1940, *Feddes Repertorium* 95(7-8): 472. 1984, *Darwiniana* 27(1-4): 562. 1986, *Genome* 35: 881-885. 1992, *Genome* 40: 518. 1997, *Bot. Jahrb. Syst.* 120(4): 528. 1998.

E. microlepis (Melderis) Melderis (*Agropyron microlepis* Melderis; *Elymus microlepis* (Melderis) Á. Löve)

Western Nepal. Perennial, slender, caespitose, leaf sheath glabrous, loose inflorescence, nodding spikes, 4-6 florets in each spikelet, glumes narrowly lanceolate and acute, lemma narrowly lanceolate, palea 2-keeled, see *Grasses of Burma ...* 692. 1960, *Enumeration of the Flowering Plants of Nepal* 1: 131. 1978, *Feddes Repertorium* 95(7-8): 456. 1984.

E. multiflorus (Banks & Sol. ex Hook.f.) Á. Löve & Connor (*Agropyron kirkii* Zotov; *Agropyron multiflorum* (Banks & Sol. ex Hook.f.) Kirk ex Cheeseman; *Triticum multiflorum* Banks & Sol. ex Hook.f.)

Australia, New South Wales, Victoria, Queensland, South Australia. Perennial, erect, tufted, ligule hyaline to membranous entire to lacerate, auricles present, basal leaf sheaths not keeled, leaf blade flat or involute, inflorescence

of cleistogamous spikelets, a single spike or a raceme, spikelets homomorphic or heteromorphic, hermaphrodite spikelets sessile or subsessile, straight awns, palea minutely narrowly elliptic and 2-keeled, fruit oblong, occurs on well-drained sandy soils, on the banks of waterways, on the edge of water courses, on clays, see *Flora Novae-Zelandiae* 1: 311. 1853 and *Man. N.Z. Fl.* 921-922. 1906, *T.R.S.N.Z.* 73: 233. 1943, *New Zealand Journal of Botany* 20(2): 183. 1982.

in English: common wheat grass

E. multiflorus (Banks & Sol. ex Hook.f.) Á. Löve & Connor var. ***kingianus*** (Endl.) Connor (*Agropyron kingianum* (Endl.) Patrie; *Elymus kingianus* (Endl.) Á. Löve; *Triticum kingianum* Endl.)

Australia. See *Prodromus Florae Norfolkicae* 21. 1833 and *Transactions and Proceedings of the New Zealand Institute* 47: 18. 1915, *Feddes Repertorium* 95: 469. 1984, *Kew Bulletin* 45(4): 680. 1990.

E. multiflorus (Banks & Sol. ex Hook.f.) Á. Löve & Connor var. ***multiflorus*** (*Agropyron multiflorum* var. *longisetum* Hack.; *Elymus multiflorus* var. *longisetus* (Hack.) Á. Löve & Connor)

Eastern Australia, New Zealand. Tufted, stoloniferous, open, many-noded, palea apex blunt, many-flowered spikelets, in coastal and inland areas.

E. multisetus (J.G. Smith) Burt Davy (*Elymus multisetus* (J.G. Sm.) M.E. Jones, nom. illeg., non *Elymus multisetus* (J.G. Sm.) Burt Davy; *Elymus sitanion* var. *jubatum* J.G. Sm.; *Sitanion breviaristatum* J.G. Sm.; *Sitanion jubatum* J.G. Sm.; *Sitanion multisetum* J.G. Sm.; *Sitanion polyantherix* J.G. Sm.; *Sitanion strictum* Elmer; *Sitanion villosum* J.G. Sm.)

U.S., Pacific Northwest, California, western North America. Perennial, useful for restoration and reclamation, occurs in sandy soil under dry conditions, loamy coarse sand, chaparral, subalpine forest, see *Bulletin, Division of Agrostology United States Department of Agriculture* 18: 10-12. 1899 and *University of California Publications in Botany* 1: 57. 1902, *Botanical Gazette* 36: 59. 1903, *Contributions to Western Botany* 14: 20. 1912, *Hereditas; genetiskt arkiv.* 114: 35-39. 1991.

in English: big squirrel tail, big wild rye, big squirrel tail grass

Northern America, U.S. See *Contributions from the United States National Herbarium* 13(3): 85. 1910, *Madroño* 10: 94. 1949, *Bulletin of the Torrey Botanical Club* 81(1): 33. 1954, *Taxon* 29(1): 168. 1980, *Brittonia* 35(1): 31. 1983, *Feddes Repertorium* 95: 470. 1984.

Elymus Mitch. = *Zizania* L.

Greek name *elymos* "millet" (*elyo* "to cover"), nom. illeg., non *Elymus* L.

Ehrhartoideae, Oryzeae, Zizaniinae, see *Species Plantarum* 2: 991. 1753, *Diss. Brev. Bot. Zool.* 32. 1769 and *American Midland Naturalist* 4: 214. 1915, *Phytologia* 72: 6. 1992, *Sida* 17(3): 533-549. 1997, *Newslett. Int. Organ. Pl. Biosyst. (Oslo)* 30: 10-15. 1999, *Contributions from the United States National Herbarium* 39: 56, 116-118. 2000.

Elyonurus Willd. = *Elionurus* Humb. & Bonpl. ex Willd.

Orthographic variant for *Elionurus* Humb. & Bonpl. ex Willd.; from the Greek *heleios* "a dor-mouse" and *oura* "a tail," referring to the shape of the spikes.

Panicoideae, Andropogoneae, Rottboelliinae, see P.M. Peterson & al., "Proposal to conserve the name *Elionurus* (Poaceae, Andropogoneae) with that spelling." *Taxon* 47: 737-738. 1998, R.K. Brummitt, "Report of the Committee for Spermatophyta: 49." *Taxon* 49: 273. 2000, *Contributions from the United States National Herbarium* 46: 225-229. 2003.

x Elysitanion Bowden = *Elymus* L.

Elymus x *Sitanion*.

See *Canadian Journal of Botany* 45: 721. 1967, *Genera Graminum* 374. 1986, *Contributions from the United States National Herbarium* 48: 279-307. 2003.

Elytrigia Desv. = *Elymus* L., *Lophopyrum* Á. Löve, *Pascopyrum* Á. Löve, *Psammopyrum* Á. Löve, *Pseudoroegneria* (Nevski) Á. Löve, *Thinopyrum* Á. Löve, *Trichopyrum* Á. Löve

Greek *elytron* “sheath, cover” or a combination of the generic names *Elymus* and *Triticum*.

About 5-8 species, Eurasia, north and south temperate. Pooideae, Triticoideae, Triticeae, or Pooideae, Triticeae, Hordeinae, perennial, stout, glaucous, aromatic, herbaceous, unbranched, rhizomatous with long and creeping rhizomes, auricles present or absent, sheaths margins free or joined, ligule truncate membrane-like, leaf blade flat or involute, plants bisexual, inflorescence a single spike erect or drooping with more or less sessile spikelets, spikelets solitary and distichous, rachis tough, florets hermaphrodite, glumes falling with spikelet, glumes more or less equal to very unequal and lanceolate to linear, lemmas lanceolate and rounded on the back, awned or awnless or mucronate, palea 2-nerved and 2-keeled, 2 lodicules membranous and ciliate, stamens 3, ovary hairy with apical corona, 2 stigmas, weed species, hay, occur in sand dunes, nomenclatural problems, there is considerable taxonomic confusion concerning this genus, sometimes referred to and often included in *Agropyron*, *Elymus* and *Thinopyrum*, hybrids with *Agropyron*, *Hordeum*, *Aegilops*, *Leymus*, *Lophopyrum*, *Secale*, *Triticum* and *Thinopyrum*, type *Elytrigia repens* (L.) Desv. ex B.D. Jacks., see *Species Plantarum* 1: 83. 1753, *Nouveau Bulletin des Sciences, publié par la Société Philomatique de Paris* 2: 190. 1810, *Index Kewensis* 1: 836. 1893 and *American Midland Naturalist* 4: 227. 1915, *Prop. Species

E. alata (Drobow) Nevski (*Agropyron alata* (Drobow) Á. Löve) (Kyrgyzstan, Khirgizia, Terskei-Alatau mountains, southwest of Prshevsk)

Russia, Asia. Spikes narrow and dark, single spikelets, short awns.

E. bessarabica (Savul. & Rayss) Dubovik (*Agropyron bessarabicum* Savul. & Rayss; *Thinopyrum bessarabicum* (Savul. & Rayss) Á. Löve)

Asia, Turkey, Bulgaria, Black Sea. Perennial, occurs in sea-shore sand dunes, sandy marsh.

E. caespitosa (K. Koch) Nevski

Armenia, Turkey, Pakistan, Asia, Europe. Perennial, loosely tufted, long flower heads, purple rachis, along roadsides, rocky dry places, scrub and grassland, sometimes confused with *Elymus nodosus* (Nevski) Melderis.

E. caespitosa (K. Koch) Nevski subsp. *caespitosa* (*Agropyron caespitosum* K. Koch; *Elymus nodosus* (Nevski) Melderis subsp. *caespitosus* (K. Koch) Melderis; *Lophopyrum caespitosa* (K. Koch) Á. Löve)

Asia, Iran, Turkey, Pakistan.

E. caespitosa (K. Koch) Nevski subsp. *nodosa* (Nevski) Tzvelev (*Agropyron nodosum* Nevski; *Elymus nodosus* (Nevski) Melderis; *Elytrigia nodosa* (Nevski) Nevski; *Lophopyrum nodosum* (Nevski) Á. Löve)

Europe, Eurasia. Densely to loosely tufted.

E. corsica (Hackel) J. Holub

Corsica. Rare species.

in French: élyme de Corse

E. curvifolia (Lange) Holub (*Agropyron curvifolium* Lange; *Elymus curvifolius* (Lange) Melderis; *Lophopyrum curvifolium* (Lange) Á. Löve)

Europe, Spain, Portugal.

E. disticha (Thunb.) Prokudin ex Á. Löve (*Agropyron distichum* (Thunb.) P. Beauv.; *Elymus distichus* (Thunb.) Melderis)

South Africa.

E. elongata (Host) Nevski (*Agropyron elongatum* (Host) P. Beauv.; *Agropyron rigidum* (Schrad.) P. Beauv.; *Elymus elongatus* (Host) Runemark; *Lophopyrum elongatum* (Host) Á. Löve; *Thinopyrum elongatum* (Host) D.R. Dewey; *Triticum elongatum* Host; *Triticum giganteum* Roth; *Triticum rigidum* Schrad.)

Africa, Eurasia, Armenia. Perennial bunchgrass, herbaceous, tufted, glabrous, coarse, robust, vigorous, without creeping rhizomes, leaves rigid, spike narrow, spikelets lanceolate or ovate-lanceolate, awnless glumes ovate-oblong or lanceolate, lemma notched and awnless, revegetation, fodder, forage, drought-resistant, growing on wet saline soils, seaside sandy beach, on canal bank along salt marsh, on wet alkaline soils, considered to be a synonym of *Elymus elongatus* (Host) Runemark, see also *Thinopyrum elongatum* (Host) D.R. Dewey.

in English: tall wheatgrass

in French: chiendent allongé

in Spanish: agropiro alargado

E. intermedia (Host) Nevski (*Agropyron intermedium* (Host) P. Beauv.; *Agropyron trichophorum* (Link) K. Richt.; *Elymus hispidus* (Opiz) Melderis subsp. *barbulatus* (Schur) Melderis; *Elymus hispidus* subsp. *hispidus*)

Asia temperate, Asia tropical, Europe. Forage, cultivated, see also *Thinopyrum intermedium* (Host) Barkworth & D.R. Dewey.

in English: intermediate wheatgrass, intermediate pubescent wheatgrass, wild triga

E. intermedia (Host) Nevski subsp. *gentryi* (Melderis) Á. Löve (*Agropyron gentryi* Melderis; *Elymus gentryi* (Melderis) Melderis; *Elytrigia gentryi* (Melderis) Tzvelev; *Thinopyrum gentryi* (Melderis) D.R. Dewey)

Iran. Perennial.

E. intermedia (Host) Nevski subsp. *intermedia* (*Agropyron aucheri* Boiss.; *Agropyron barbulatum* Schur; *Agropyron glaucum* (Desf.) Roem. & Schult.; *Agropyron intermedium* (Host) P. Beauv.; *Agropyron intermedium* var. *trichophorum* (Link) Hal.; *Agropyron trichophorum* (Link) K. Richt.; *Elymus hispidus* (Opiz) Melderis; *Elymus hispidus* subsp. *barbulatus* (Schur) Melderis; *Elymus hispidus* subsp. *hispidus*; *Elytrigia intermedia* subsp. *barbulata* (Schur) Á. Löve; *Elytrigia trichophora* (Link) Nevski; *Thinopyrum intermedium* (Host) Barkworth & D.R. Dewey; *Thinopyrum intermedium* subsp. *barbulatum* (Schur) Barkworth & D.R. Dewey; *Triticum intermedium* Host; *Triticum trichophorum* Link)

Eurasia, Asia temperate and tropical, Europe. Perennial, herbaceous, steel blue, creeping-rooted, sod-forming, leaves short-involute, almost evergreen foliage, lemma with a short apical point, fodder, forage, pasture, hay, useful for erosion control, growing on saline soils, areas of low soil moisture, in dry soil.

in English: intermediate wheatgrass, barbed intermediate wheatgrass, pubescent wheatgrass

E. intermedia (Host) Nevski subsp. *podperae* (Nábelek) Á. Löve (*Agropyron ciliatiflorum* Roshev.; *Agropyron podperae* Nábelek; *Elymus hispidus* subsp. *podperae* (Nábelek) Melderis)

Iran, Iraq, Turkey, Asia. Caespitose, green, coarse, erect, spreading, shortly rhizomatous, flat leaves pubescent, rigid spikes short and slender, reddish to purplish spikelets curved, glumes truncate or obtuse to acute, mucronate lemmas.

E. intermedia (Host) Nevski subsp. *pulcherrima* (Grossh.) Tzvelev (*Agropyron popovii* Drobow; *Agropyron pulcherrimum* Grossh.; *Elymus hispidus* subsp. *pulcherrimum* (Grossh.) Melderis)

Iran, Asia, Turkey, Eurasia, Europe. Pubescent spikes, awned.

E. juncea (L.) Nevski

Africa, Algeria, Mediterranean, Europe, coastal.

E. juncea (L.) Nevski subsp. *boreali-atlantica* (Simonet & Guin.) Hyl. (*Agropyron junceiforme* (Á. & D. Löve) Á. & D. Löve; *Agropyron junceum* (L.) P. Beauv. subsp. *boreali-atlanticum* Simonet & Guin.; *Elytrigia junceiformis* Á. Löve & D. Löve; *Thinopyrum junceiforme* (Á. Löve & D. Löve) Á. Löve; *Elymus farctus* subsp. *boreali-atlanticus* (Simonet & Guin.) Melderis)

Europe. Perennial, herbaceous, coastal.

in English: North Atlantic wheatgrass

in Danish: strand-kvik

E. juncea (L.) Nevski subsp. *juncea* (*Agropyron junceum* (L.) P. Beauv.; *Agropyron junceum* subsp. *mediterraneum* Simonet; *Elymus farctus* (Viv.) Runemark ex Melderis; *Elytrigia juncea* subsp. *mediterranea* (Simonet) Hyl.; *Thinopyrum junceum* (L.) Á. Löve; *Triticum junceum* L.)

Europe, Asia, Israel, Syria, Algeria, the Mediterranean. Growing along coast, sand dune habitats, sandy dunes beach areas, salt resistant.

in English: sand couch, sea wheatgrass

in French: chiendent des sables

in Spanish: grama de las playas

E. lolioides (P. Candargy) Nevski (*Agropyron lolioides* P. Candargy; *Elymus lolioides* (P. Candargy) Melderis; *Triticum lolioides* Kar. & Kir.)

Russia. In moist bottom lands.

E. pontica (Podp.) Holub (*Lophopyrum ponticum* (Podp.) Á. Löve; *Thinopyrum ponticum* (Podp.) Barkworth & D.R. Dewey; *Triticum ponticum* Podp.)

Europe, Armenia, Asia, Iran. Perennial bunchgrass, erect, growing on seashore sand dunes.

E. pungens (Pers.) Tutin (*Agropyron littorale* Dumort.; *Agropyron pungens* (Pers.) Roem. & Schult.; *Elymus pungens* (Pers.) Melderis; *Triticum littorale* Host; *Triticum pungens* Pers.)

Russia, Europe. Perennial, herbaceous, maritime-arenicolous, ballast, brackish streams, ditches and rubbish heaps, coastal sands.

in English: saltmarsh wheatgrass

E. pungens (Pers.) Tutin subsp. *campestris* (Gren. & Godr.) Á. Löve (*Agropyron campestre* Gren. & Godr.; *Elymus pungens* subsp. *campestris* (Gren. & Godr.) Melderis)

Russia, Europe. Perennial.

E. pungens (Pers.) Tutin subsp. *pungens* (*Agropyron pungens* (Pers.) Roem. & Schult.; *Elymus pungens* (Pers.) Melderis; *Triticum pungens* Pers.)

Eurasia. Perennial, erect, rhizomatous, auricles present, ligule hyaline, basal leaf sheaths not keeled, leaves more or less pointed, a single spike oblong and contracted, spikelets imbricate and distichous, hermaphrodite florets, chasmogamous spikelets, lemmas blunt or pointed, mucronate or awned, ovary pilose, very variable species, on low sand dunes, coastal, marshes and lake margins.

in English: sea couch, sea twitch

E. pycnantha (Godron) Á. Löve (*Agropyron pungens* (Pers.) Roem. & Schult. var. *acadiense* (F.T. Hubbard) Fernald; *Agropyron pycnanthum* (Godr.) Godr. & Gren.; *Elymus pycnanthus* (Godr.) Melderis; *Elytrigia pungens* (Persoon) Tutin; *Elytrigia pycnantha* (Godr.) Rauschert, nom. illeg., non *Elytrigia pycnantha* (Godr.) Á. Löve; *Triticum pycnanthum* Godr.)

Europe. Perennial, erect or geniculate, open, tufted, rhizomatous, strongly spreading, wiry rhizomes, inflorescence erect, glumes subequal, lemma coriaceous and keeled, occurs in salt marshes, sandy shores, sand dunes, mudflats, see *Mémoires, Société d'Émulation du Doubs*, sér. 2, 5: 10. 1854 and *List of British Plants* 84. 1908, *Prodrome de la Flore Corse* 1: 186. 1910, *Botanical Journal of the Linnean Society* 76(4): 378. 1978, *Taxon* 29(2-3): 351. 1980, *Feddes Repertorium* 93(1-2): 17. 1982, *Phytologia* 83(4): 304. 1997 [1998].

in English: sea couch

E. rechingeri (Runemark) Holub (*Agropyron rechingeri* Runemark; *Elymus farctus* subsp. *rechingeri* (Runemark) Melderis; *Elymus rechingeri* (Runemark) Runemark)

Syria, Europe, Greece, Asia.

E. repens (L.) Nevski (*Agropyron firmum* J. Presl; *Agropyron leersianum* (Wulfen ex Schweigg.) Rydb.; *Agropyron repens* (L.) P. Beauv.; *Agropyron repens* f. *geniculatum* Farw.; *Agropyron repens* f. *heberhachis* Fernald; *Agropyron repens* f. *pilosum* (Scribn.) Jackson; *Elytrigia repens* (L.) Desv.; *Elytrigia repens* (L.) Desv. ex Nevski; *Elytrigia repens* var. *vaillantiana* (Wulfen & Schreb.) Prokudin; *Elytrigia vaillantiana* (Wulfen & Schreb.) Beetle; *Triticum firmum* (J. Presl) Link; *Triticum infestum* Salisb.; *Triticum leersianum* Wulfen ex Schweigg.; *Triticum repens* L.; *Triticum vaillantianum* Wulfen & Schreb.; *Zeia repens* (L.) Lunell)

Europe, Mediterranean area, Libya to Morocco. Perennial, herbaceous, variable, sometimes tufted, stiff, robust, green or bluish green, glabrous or more or less densely hairy, rhizomatous with tough and branching rhizomes sharp-pointed, culms erect or bent below, decumbent and rooting from the nodes, auricles clasp the stems, ligule membranous minutely fringed, leaf sheaths open and mostly hairless, leaves stiff and rolled in bud, spike narrow and dense, usually overlapping and flattened spikelets, 2 glumes smooth or rough, lemmas keeled, lemma acute or shortly awned, awned or unawned glumes and lemmas, bad and noxious weed aggressive and highly competitive, a serious weed widely naturalized in temperate regions, lawn grass, cultivated and planted, rhizome diuretic and depurative, pasture forage or hay, flavoring, fodder, easily reproduces vegetatively from rhizomes and by seed, a very variable grass with many regional biotypes, very resistant to cold and heat, very resistant to drought, growing on peat soil or on shallow mineral soils, pastures, gardens, ditches, disturbed areas, cultivated fields, grassy banks, along roadsides, waste ground, ballast land, from dry to wet soils, see *Species Plantarum* 1: 86. 1753, *Enumeratio Plantarum in Partibus Saellandiae Septentrionalis et Orientalis* 1: 38. Hafniae 1801-1803, *Specimen Florae Erlangensis* 1: 143. 1804, *Journal de Botanique, rédigé par une société de botanistes* 1: 73. 1813, *Cat. Pl. Palat.* 5. 1814, *Systema Vegetabilium* 2: 754-755. 1817, *Enum. Pl. Palat.* 16. 1830, *Agrostographia Germanica* 1: t. 20, f. 1386. 1834, *Bulletin de la Société Impériale des Naturalistes de Moscou* 14: 866. 1841, *Flora Brasiliensis* 2(3): 226. 1880, *Index Kewensis* 1: 836. 1893 and *Botaniska Notiser* 1953: 357. 1953, *Novosti Sist. 485. 1984, *Phytologia* 55(3): 211. 1984, *Folia Musei Rerum Naturalium Bohemiae Occidentalis* 21: 16. 1984, *Taxon* 35(1): 198. 1986, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 120(4): 538. 1998, *Acta Botanica Boreali-Occidentalis Sinica* 18(2): 286, f. 2. 1998, *Folia Geobotanica et Phytotaxonomica* 28(1): 107. 1993.

in English: couch, twitch, couch grass, couch wheatgrass, English couch grass, English couch, couth, scutch, quick grass, whickens, wiry grass, quitch grass, witchgrass, twitch grass, wheat grass, quack grass, quackgrass, dog grass, shelly grass, knot grass, devils-grass, scutch grass

in French: chiendent rampant, petit chiendent, chiendent commun, chiendent

in Turkey: ayirik otu, ayrik otu

in Spanish: grama canina

in Mexico: acaxacahuistli, grama, k'an-suuk

in Arabic: najem, nedjil, khafour, seboulet el-far, guzmir, affar, thil

in South Africa: bloukweek, kweekgras, kweekkoringras, strand kweek

E. repens (L.) Nevski subsp. ***elongatiformis*** (Drobow) Tzvelev (*Agropyron elongatiforme* Drobow; *Elymus repens* subsp. *elongatiformis* (Drobow) Melderis; *Elytrigia elongatiformis* (Drobow) Nevski)

Eurasia, Turkey, Russia, Iran. See *Novosti Sist. Vyss. Rast.* 10: 31. 1973.

in English: quackgrass

E. repens (L.) Nevski subsp. ***repens*** var. ***aristata*** (L.) Nevski (*Triticum repens* L.; *Agropyron repens* (L.) P. Beauv.; *Zeia repens* (L.) Lunell; *Elymus repens* (L.) Gould; *Agropyron caesium* J. Presl & C. Presl; *Agropyron sachalinense* Honda; *Braconotia officinarum* Godron; *Triticum imbricatus* Lam.; *Triticum vaillantianum* Wulfen & Schreb.)

Eurasia, Turkey, Russia, Iran. Rhizomatous with wiry and extensive rhizomes, erect, auricles present, inflorescence a single spike narrowly oblong and contracted, spikelets imbricate and distichous, chasmogamous and strongly spreading spikelets.

E. repens (L.) Nevski subsp. ***repens*** var. ***repens***

Eurasia, Turkey, Russia, Iran. Rhizomatous with wiry rhizomes, erect, auricles present, ligule hyaline, a single spike narrowly oblong, spikelets imbricate and distichous, fleshy lodicules, a bad weed, used as a diuretic, a very variable species.

in English: couch, couch grass, couch wheat grass, scutch, quick grass, quitch grass, witch grass, twitch grass, quack grass

E. scirpea (C. Presl) Holub (*Agropyron scirpeum* C. Presl; *Agropyron scirpeum* var. *flaccidifolium* Boiss. & Heldr.;

Elymus flaccidifolius (Boiss. & Heldr.) Melderis; *Lophopyrum scirpeum* (C. Presl) Á. Löve; *Thinopyrum scirpeum* (C. Presl) D.R. Dewey)

Europe.

Elytrolepharum (Steud.) Schldl. = Digitaria Haller

From the Greek *elytron* "sheath, cover" and *blepharon* "an eyelid."

Panicoideae, Panicodae, Paniceae, or Panicoideae, Paniceae, Digitariinae, see *Historia Stirpium Indigenarum Helvetiae Inchoata* 2: 244. 1768, *Flora Carniolica, Editio Secunda* 1: 52. 1771, *Linnaea* 26(5): 533. 1855, *Synopsis Plantarum Glumacearum* 1: 37, 43. 1855 and *Bothalia* 7: 467. 1961, *Memoirs of the New York Botanical Garden* 78: 509-540. 1996, *Genera Graminum* 298-300. 1999, *Contributions from the United States National Herbarium* 46: 193-213. 2003.

Elytrophorus P. Beauv. = *Echinalysium* Trin.

From the Greek *elytron* “a sheath, cover” and *phoros* “bearing, carrying,” referring to the sheathing glumes; see A.M.F.J. Palisot de Beauvois, *Essai d'une nouvelle Agrostographie*, ou nouveaux genres des Graminées. 67, pl. XIV, f. II. Paris 1812.

About 2-4 species, Australia, tropical Africa and Asia. Arundinoideae, Arundineae, or Danthonioideae, Dantho-
nieae, annual or short-lived perennial, herbaceous, glabrous, ascending, tufted or caespitose, internodes solid, auricles absent, ligule a fringed to an unfringed membrane, narrow and flat leaves oblong to linear, plants bisexual, inflorescence a spike-like raceme or a compound spike, globular clusters of spikelets strongly compressed laterally and subtended by acuminate bracts, chaffy involucre, florets bisexual and several, lower floret perfect, 2 hispid glumes more or less equal, lemmas acuminate-awned and naviculate, palea bifid and winged on the keels, 1-2 lodicules free and fleshy, 1-3 stamens, ovary glabrous, 2 stigmas, weed of cultivation, green manure, forage, dry or wet places, water holes, ditches, rainforest, in or near water, depressions, resembling *Tribolium*, type *Elytrophorus articulatus* P. Beauv. (*Elytrophorus spicatus* (Willd.) E.G. Camus & A. Camus), see *Essai d'une nouvelle Agrostographie* 67, pl. XIV, f. II. Paris 1812, *Fundamenta Agrostographiae* 142. 1820 and *Amer. J. Bot.* 81: 1601-1610. 1994, Nigel P. Barker, “The relationships of *Amphipogon*, *Elytrophorus* and *Cyperochloa* (Poaceae) as suggested by rbcL sequence data.” *Telopea* 7(3): 205-213. 1997, *Austral. Syst. Bot.* 11: 41-52. 1998.

Species

E. globularis Hack.

Tropical Africa. Annual, panicle narrow, globose clusters of spikelets subtended by bracts, stiff awns, pasture, palatable when young, common in shallow water, vleis, damp places, see *Bulletin de l'Herbier Boissier*, sér. 2, 2: 935. 1902.

E. spicatus (Willd.) E.G. Camus & A. Camus (*Dactylis spicata* Willd.; *Echinalysium articulatum* Trin.; *Echinalysium strictum* Trin.; *Elytrophorus articulatus* P. Beauv.; *Sesleria spicata* (Willd.) Spreng.)

Australia, Africa, Tanzania, Ethiopia, Nigeria, China, Thailand, India, Nepal, Sri Lanka, Indonesia. Annual or short-lived perennial, tufted, small, erect or weakly geniculate, simple or sparsely branched, culms hispid or bristly-hairy, leaf blades hispid and flat, ligule a membranous rim, sheaths loose, clusters of ovate spikelets, florets bisexual, the uppermost floret sterile and reduced to a lemma, glumes narrowly lanceolate and ciliate on the margins, lemmas with a straight or curved awn, paleas membranous, weed species, forage, palatable, lacks bulk, grows in or near water, damp clay soils, seasonally swampy places, grassland, vleis, creeks,

margins of swamps, rice fields, see *Der Gesellschaft Naturforschender Freunde zu Berlin, neue Schriften* 3: 416. 1801, *Essai d'une Nouvelle Agrostographie* 74, 167, 173. 1812, *Enum. Pl. Zeyl.* 5: 374. 1864 and *Handb. Fl. Ceylon* 5: 288. 1900, *Fl. Gen. Indo-Chine* 7: 547. 1923, *Handb. Fl. Ceylon* 6: 338. 1931, *Grasses of Ceylon* 78. 1956, *Ceylon J. Sci., Biol. Sci.* 2(2): 124. 1959, *Grasses of Burma* ... 493. 1960.

in English: spike grass

in Niger: wuré dalam

in Senegal: cedar, kobin, ndedar, sedar

in India: balha, khet kapuri, kolhati, nela anthabu hullu, suria, vavaltenai, vayal thinai

x Elytrordeum Hylander

Elytrigia x *Hordeum*.

See *Nord. Karlväxtfl.* 1: 369. 1953, *Bot. Not.* 1953: 357. 1953, *Genera Graminum* 374. 1986.

Elytrostachys McClure

From the Greek *elytron* “a sheath, cover” and *stachys* “a spike.”

Two species, Central and South America, Honduras to Venezuela. Bambusoideae, Bambusodae, Bambuseae, Arthro-
stylidiinae, perennial, unarmed, viviparous, sympodial, persistent, scrambler, clambering, more or less scandent, subviny, woody, solitary branching, flowering culms leafy, spathiform sheaths, auricular bristles very prominent, leaf blades strongly reflexed, plants bisexual, inflorescence compound with pseudospikelets, 1-spikelet racemes gathered into a fascicle, glumes very unequal, lemma compressed, palea present and awnless, 3 free and membranous lodicules, stamens 6, ovary glabrous with a conical appendage, stigmas 2, rain forest, lowland, monsoon forest, wet lowland, open places, type *Elytrostachys typica* McClure, see *Journal Washington Acad. Sci.* 32(6): 173-174, 176, f. 4-6. 1942, *Smithsonian Contributions to Botany* 9: 1-148. 1973, *Annals of the Missouri Botanical Garden* 79(1): 160-183. 1992 [A revision of *Atractantha* (Poaceae: Bambusoideae: Bambuseae)], *Flora Mesoamericana* 6: 197. 1994, *American Bamboos* 175-177. 1999, *Contributions from the United States National Herbarium* 39: 56-57. 2000.

Species

E. clavigera McClure

Paraguay, Colombia, Nicaragua, Honduras. See *Journal Washington Acad. Sci.* 32(6): 173-174, 176, f. 5-6. 1942, *Annals of the Missouri Botanical Garden* 79(1): 163. 1992.

E. typica McClure

Venezuela, Colombia, Honduras. See *Journal Washington Acad. Sci.* 32(6): 174, f. 5-6. 1942.

Endallex Raf. = *Phalaris* L., *Phalaroides* Wolf

Pooideae, Poeae, Phalaridinae, see Constantine S. Rafinesque, in *Seringe Bull. Bot.* 1: 220. 1830 [also *Bulletin Botanique [Genève]*] and E.D. Merrill, *Index rafinesquianus*. 75. Jamaica Plain, Massachusetts, U.S. 1949, *Contributions from the United States National Herbarium* 48: 310, 479-488. 2003.

Endodia Raf. = *Leersia* Sw., *Leersia* Sol. ex Sw.

Bambusoideae, Oryzodae, Oryzeae, Oryzinae, or Ehrhar-toideae, Oryzeae, Oryzinae, type *Leersia lenticularis* Michx., see *Nova genera et species plantarum seu Prodr-omus descriptionum vegetabilium maximam partem incog-nitorum*. 1, 21. 1788, *Flora Boreali-Americana* 1: 39. 1803, C.S. Rafinesque, *Neogenyton, or Indication of Sixty-Six New Genera of Plants of North America*. 4. 1825, William Griffith (1810-1845), *Icones plantarum asiaticarum*. 3: t. 144. Calcutta 1847-1854, *Index Kewensis* 1: 312. 1895 and *Contributions from the United States National Herbarium* 12(6): 183-258. 1909, E.D. Merrill, *Index rafinesquianus*. 75. 1949, E. Launert, "A survey of the genus *Leersia* in Africa." *Senckenbergiana Biologica* 46: 129-153. 1965, *Iowa St. J. Sci.* 44: 215-270. 1969, *Journal of the Arnold Arboretum* 69(3): 263. 1988, *Flora Mesoamericana* 6: 221-222. 1994, *Contributions from the United States National Herbarium* 39: 57, 64-67. 2000.

Enneapogon Desv. ex P. Beauv. = *Calotheria* Wight and Arn., *Calotheria* Steud., *Enneapogon* P. Beauv., *Pappophorum* Schreb.

From the Greek *ennea* "nine" and *pogon* "a beard," referring to the soft plumose awns and to the lobes of the lemmas; see Ambroise Marie François Joseph Palisot de Beauvois (1752-1820), *Essai d'une nouvelle Agrostographie, ou nou-veaux genres des Graminées*. 81, 161. Paris 1812.

About 28-30 species, mainly warm and tropical regions of Africa, Australia, tropics and subtropics. Chloridoideae, Pappophoreae, or Chloridoideae, Eragrostideae, Cotteinae, annual and short-lived perennial, erect and slender, stiff and wiry, herbaceous, often glandular-hairy, caespitose or form-ing dense or sparse tussocks, internodes hollow, nodes hairy, some species with disarticulating culms, auricles present or absent, sheaths terete, ligule a rim of hairs, flat or rolled leaves linear and narrow, plants bisexual, inflorescence a feathery and contracted spike-like panicle terminal or axil-lary, spikelets shortly pedicellate and not disarticulating between the florets, sometimes cleistogamous spikelets borne in the basal leaf sheaths, lower florets 1-3 bisexual,

uppermost florets sterile or rudimentary or sometimes reduced to awns or to a brush-like appendage, 2 glumes 5- to 21-nerved more or less equal or very unequal or slightly unequal, many plumose awned lemma lobes, lemmas rounded on the back and nerved, female-fertile lemmas 9-lobed apically awned, awns equal and plumose to ciliate, 2 free and fleshy lodicules, stamens 3, ovary glabrous, 2 stig-mas, small ovoid fruit compressed, decorative and ornament-al, weed species, native pasture species, palatable and nutritious, found in grasslands and bushland, open habitats, arid and semiarid areas, semidesert and dry regions, type *Enneapogon desvauxii* P. Beauv. ex Desv., see *Genera Plan-tarum* 2: 787. 1791, *Symbolae Botanicae, ...* 3: 10, t. 51. 1794, *Essai d'une Nouvelle Agrostographie* 81, 161. 1812, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Species

E. sp.

in Morocco: gsiba, tawujjimt n-tgerdayt

in Niger: kokinshi, taebza-tagemer, tasbat n-aejemar, tâzbat n'jâmar

E. asperatus C.E. Hubb.

Australia.

E. avenaceus (Lindley) C.E. Hubb. (*Pappophorum avenaceum* Lindley)

Australia. Annual or short-lived perennial, tufted, forming small open tufts, base pubescent to hirsute to densely villous, simple or sparsely branched and culms not disarticulating, leaves scabrous with glandular hairs, panicle loosely contracted and ovate to lanceolate, fertile florets usually 2 or 4, glumes membranous and unequal, lowest lemma winged on the margins, awns plumose to feathery, upper florets similar, a valuable grazing species, very palatable when green and dry, regenerates rapidly, grows on sandy soils, on stony ridges, on calcareous and alluvial soils, infertile red earths, sandy calcareous soils, calcareous earths with sandy loam to sandy clay loam texture, in arid and semiarid areas.

in English: bottle-washers, bottlewashers, common bottle-washers, common bottle-washers, oat grass, native oat grass

E. caerulescens (Gaudich.) N.T. Burbidge (*Pappophorum caerulescens* Gaudich.) (Latin *caeruleum*, *i* "blue")

South Australia, Western Australia, Northern Territory. Annual or short-lived perennial, with glandular hairs, leafy and tufted near the base, compact and capitate panicle more or less ovate to lanceolate, glumes membranous, susceptible to dry periods, provides excellent forage, lacks bulk, requires heavy rain, indicator of good or fair range condition, see *Voyage autour de Monde exécuté pendant les Années 1836 et 1837 sur la Corvette la Bonite ... Botanique* 409. 1826 and *Proceedings of the Linnean Society of London* 153(1): 87. 1941.

E. cenchroides (Roemer & Schultes) C.E. Hubb. (*Enneapogon abyssinicus* (Hochst.) Rendle; *Enneapogon cenchroides* (Licht. ex Roemer & Schultes) C.E. Hubb.; *Enneapogon cenchroides* (Licht.) C.E. Hubb.; *Enneapogon mollis* Lehm.; *Pappophorum abyssinicum* Hochst.; *Pappophorum cenchroides* Licht.; *Pappophorum cenchroides* Licht. ex Roem. & Schult.; *Pappophorum cenchroides* var. *albescens* Schweinf.; *Pappophorum molle* (Lehm.) Kunth; *Pappophorum robustum* Hook.f.; *Pappophorum senegalense* Steud.) (like the genus *Cenchrus* L., Greek *kenchros* "millet")

South Africa, Mozambique, Tanzania, Uganda, Sudan, India, Yemen. Annual or short-lived perennial bunchgrass, variable, robust, coarse, sometimes branched, loosely tufted, erect or semierect, generally geniculate, not bulbous at base, densely covered with glandular hairs, leaf sheath rounded and hairy, ligule a row of short hairs, basal leaves few, leaf blades with short hairs and a rough margin, panicle loosely contracted, spikes pointed, contracted panicle branches spreading somewhat at maturity, upper glume generally 3-nerved, lemmas with 9 hairy to ciliate awns, third lemma vestigial or barren, valuable forage, pioneer grass,

useful for erosion control, weed species able to withstand long droughts, ground cover, growing in gravelly grassland, dry areas, dry sandy or stony soils, sandy wasteland, gypsum, woodland, cultivated ground, heavy soils, bushland, dry *Acacia-Commiphora* bushland, orange sandy plain, escarpment foothills, on disturbed areas, disturbed clay grassland, sandy soils, along roadsides, overgrazed veld, often confused with *Schmidtia kalahariensis* Stent or *Enneapogon persicus*, see *Systema Vegetabilium* 2: 616. 1817, *Novarum et Minus Cognitarum Stirpium Pugillus* 3: 40. 1831, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 255. 1833, *Synopsis Plantarum Glumacearum* 1: 199. 1854, *Flora* 38: 202. 1855, *Bulletin de l'Herbier Boissier*, sér. 2, App. 2: 99. 1894, *The Flora of British India* 7(22): 302. 1897 [1896], *Catalogue of the African Plants Collected by Dr. F. Welwitsch in 1853-61* 2(1): 229. 1899 and *Bulletin of Miscellaneous Information Kew* 1934: 119. 1934.

in English: common nine-awned grass, common nine-awned grass, nine-awned grass, furgrass, Sabigrass, sourgrass

in southern Africa: gewone negenaaldgras, negenaaldgras, suurgras, dassiegras, tuingras, eenjarige negenaaldgras, eenjähriqes neunborstengras, vaalsuurgras (Afrikaans); kabwele (Tonga); letsoa (Sotho)

in southwest Africa/Namibia: neunborsten sauergras

E. clelandii N.T. Burb. (after the Australian naturalist Sir John Burton Cleland, 1878-1971, botanist, ethnologist, explorer and plant collector, from 1920 to 1948 professor of pathology at the University of Adelaide, between August 1929 and August 1936 made numerous excursions into Central Australia (in connection with the Board for Anthropological Research, University of Adelaide, and the South Australian Museum), knighted in 1964, his works include *The Ancient Family of Cleland*. London 1905, *Royal Society of New South Wales, Sydney*. Presidential Address. Sydney 1918, *Toadstools and Mushrooms and other Larger Fungi of South Australia*. Adelaide 1934, with Edwin Cheel (1872-1951) wrote Notes on Australian Fungi. no. IV. *Polyporus, Fomes and Hexagona*. 1918 and *Notes on the Early Stages of Development of Lysurus gardneri-L. australiensis*, etc. 1918, with Thomas Harvey Johnston (1881-1951) wrote *Notes on Worm Nests in Australian Cattle due to Filaria, Onchocerca gibsoni, and on Similar Structures in Camels*. 1911, with Dr. C. Fenner wrote *The Geography and Botany of the Adelaide Coast*. Adelaide 1935. See E.C. Black, editor, *Memoirs of John McConnell Black*. Adelaide 1971; Constance Margaret Eardley (1910-1978), "John McConnell Black, A.L.S., M.B.E. (1855-1951)." *Trans. R. Soc. S. Aust.* 76: i-vi. 1953, and "John Burton Cleland - a tribute on his eightieth birthday." *Trans. R. Soc. S. Aust.* 82: 339-341. 1959; John Anderson Gilruth (1871-1937) and Georgina Sweet, *Onchocerca gibsoni: The Cause of Worm Nodules in Australian Cattle*. 1911; J.H. Barnhart, *Biographical notes upon botanists*. 1: 356. 1965; J. Lanjouw and F.A.

Stafleu, *Index Herbariorum. Collectors A-D*. Utrecht 1954; John McConnell Black (1855-1951), in *Transactions and Proceedings of the Royal Society of South Australia*. 56: 46, t. II, f. 3. 1932; Dennis John Carr and S.G.M. Carr (1912-1988), editors, *People and Plants in Australia*. London 1981; Garrison and Morton, *Medical Bibliography*. 4648, 5474. 1961)

South Australia, Western Australia, Northern Territory, Queensland. Short-lived perennial, branched, compact panicle linear or lanceolate to elliptic, glumes membranous, native pasture species, moderately palatable, see *Proceedings of the Linnean Society of London* 153(1): 80-81. 1941.

in English: Cleland nine-awn

E. cylindricus N.T. Burb.

Australia. Annual or short-lived perennial, pubescent or pilose, glandular, culms disarticulating at the nodes, panicle spike-like and cylindrical, glumes membranous with hyaline margins, a valuable grazing species, unpalatable to stock, grows on sandy or loamy red soils, sandy loam to sandy clay loam, on shallow soils, calcareous earths, calcareous rocks and soils, see *Proceedings of the Linnean Society of London* 153(1): 89-91, f. 5. 1941.

in English: limestone oat grass, jointed nine-awned, jointed nine-awn, jointed bottle-washers

E. decipiens Kakudidi

Australia.

E. desvauxii P. Beauv. (*Agrostis ciliata* Pall. ex Roshev., nom. illeg., non *Agrostis ciliata* Thunb.; *Czerniaevia rupestris* Turcz. ex Kom.; *Enneapogon brachystachyus* (Jaub. & Spach) Stapf; *Enneapogon desvauxii* P. Schmidt; *Pappophorum wrightii* S. Wats.; *Raspalia rupestris* Turcz. ex Kom.) (named for the French botanist Nicaise Auguste Desvaux, 1784-1856, in 1817 Director of the Angers Botanic Garden, among his works are *Nomologie botanique*. Angers 1817 and *Flore de l'Anjou*. Angers 1827; see J.H. Barnhart, *Biographical notes upon botanists*. 1: 447. 1965; Robert Brown (1773-1858), *Prodromus florae Novae Hollandiae*. 252. 1810; Ida Kaplan Langman, *A Selected Guide to the*

Literature on the Flowering Plants of Mexico. University of Pennsylvania Press, Philadelphia 1964)

Tropical Africa, southern Africa, India, China, Mexico, U.S., New Mexico, South America. Annual or perennial bunchgrass, rather short-lived or semiperennial, slender, wiry, small, erect or geniculately ascending, often decumbent, branched, densely tufted, dense basal leaf cover, stoloniferous, rooting at the lower nodes, often forming dense mat, glandular, very fine leaf blades filiform finely tapering, leaf sheaths rounded, ligule a fringe of hairs, old basal leaf sheaths fibrous and persistent, leaves folded and hairy, panicle spike-like unbranched and densely branched, cleistogenes in basal leaf sheaths, flower stalks sometimes purplish, vestigial third floret, hairy lemma, hairy seed heads, lemma 9 awns fringed or silky, a prolific seeder, forage, moderately palatable, grazed by sheep and goats, found in desert and semidesert areas, limestone hills, dry calcareous soils, arid and semiarid regions, in desert scrub and desert grassland areas, waste places, open stony plains, overgrazed veld, gravelly plains, coastal sand, degraded sites, on rocky slopes and gravelly bajadas, sometimes confused with *Enneapogon lophotrichus*, see *Essai d'une Nouvelle Agrostographie* 82, 161, t. 16, f. 11. 1812, *Systema Vegetabilium* 2: 616. 1817, *Mémoires de la Société d'Agriculture, Sciences et Arts d'Angers* 1: 202. 1831, *Annales des Sciences Naturelles; Botanique, sér. 3* 14: 365. 1850, *Illustrationes Plantarum Orientalium* 4: 34, t. 324. 1850-1853 [1851] *Flora Rossica* 4(13): 404. 1852, *Memorie della Reale Accademia delle Scienze di Torino, ser. 2* 12: 254. 1852, *Beiträge zur Flora der Cap Verdischen Inseln* 144. 1852, *Synopsis Plantarum Glumacearum* 1: 200. 1854, *Bulletin de la Société Impériale des Naturalistes de Moscou* 29(1): 30. 1856, *Proceedings of the American Academy of Arts and Sciences* 18: 178. 1883, *Flora Orientalis* 5: 558. 1884, *Biologia Centrali-Americana; ... Botany ...* 3: 586. 1885, *Mexicanas Plantas* 2: 133. 1886, *Catalogue of the African Plants Collected by Dr. F. Welwitsch in 1853-61* 2(1): 229. 1899 and *Flora Capensis* 7: 654-655. 1900, *Just's Botanischer Jahresbericht*. 27: 458. 1901 [also *Botanischer Jahresbericht, or Bot. Jahresber. (Just)*], *Plantae Novae vel Minus Notae ex Aethiopia* 31. 1928, *Flora URSS* 2: 297. 1934, *Zlaki SSSR* 418. 1937, *Proc. Linn. Soc. London* 57. 1940-1941, *Webbia* 8: 119. 1951, *Grasses of Saudi Arabia* 220-222. 1989.

in English: pappus grass, eight-day grass, eightday grass, eightdays grass, nine-awned pappus grass, nine-awn feather pappus grass, feather pappus grass, spike pappus grass, spike pappusgrass, Wright's-pappusgrass

in Mexico: pasto ladera, zacate cola de zorra, zacate ladera, zacate lobero

in Somalia: harfo

in South Africa: kalkgras, wondergras, agdae gras, agtdae-gras, kurzähriges neunborstengras

E. eremophilus Kakudidi

Australia.

E. glaber N.T. Burbidge

Tropical Western Australia, Northern Territory. Useful for erosion control, see *Proceedings of the Linnean Society of London* 153(1): 72-73. 1941

E. gracilis (R. Br.) P. Beauv. (*Pappophorum gracile* R. Br.)

Queensland, New South Wales. Annual or perennial, tufted, slender, with a thickened or knotty base, culms branched and not disarticulating, leaves pubescent to glabrous, inflorescence spicate, 1 fertile floret, glumes acute or acuminate and entire, body of basal lemma thickened, awns plumose, forage, useful for erosion control, found on red earths, woodland, in rock crevices, in open forests, see *Prodromus Florae Novae Hollandiae* 185. 1810, *Essai d'une Nouvelle Agrostographie* 82, 161, 171. 1812.

in English: slender nine-awn, slender bottle-washers

E. intermedius N.T. Burb.

Australia, Queensland. Perennial, tufted, hirsute to pubescent and thickened base, culms branched and not disarticulating, leaves pubescent and glandular, panicle spicate, fertile florets 2 or rarely 1, glumes membranous and glandular, awns plumose, second floret similar to first, upper florets reduced, grows on red earth soils, species often confused with *Enneapogon polyphyllus* (Domin) N.T. Burb., see *Proceedings of the Linnean Society of London* 153(1): 67-68. 1941.

in English: tall bottle-washers, tall bottlewash

E. lindleyanus (Domin) C.E. Hubb. (*Enneapogon pallidus* var. *brevisetus* N.T. Burb.; *Pappophorum lindleyanum* Domin) (dedicated to the English (b. near Norwich) botanist John Lindley, 1799-1865 (d. Middlesex), horticulturist, 1818 he went to London, 1820 Fellow of the Linnean Society, 1828 Fellow of the Royal Society, taxonomist, botanical artist, 1828/1829-1860 professor of botany at University College London, author of numerous and valuable botanical and horticultural works, his writings include *The Genera and Species of Orchideaceous Plants*. London 1830-1840 and *Sertum orchideaceum*. London [1837-] 1838 [-1841] he was the son of the nurseryman George Lindley (ca. 1769-1835); see William T. Stearn, in *D.S.B.* 8: 371-373. 1981; Brent Elliott, "Lindley's legacy." *The Garden*. 123(11): 808-809. Milner, *Catalogue of Portraits of Botanists Exhibited in the Museums of the Royal Botanic Gardens*. Royal Botanic Gardens, Kew, London 1906; Merle A. Reinikka, *A History of the Orchid*. Timber Press 1996)

South Australia, Queensland, Western Australia, Northern Territory, New South Wales. Perennial, tufted, wiry and erect, forming compact tussocks, culms hirsute and not disarticulating, leaves linear and smooth to scabrous, purplish panicle globular to oblong, spikelets shortly awned, 1 fertile floret, glumes truncate, body of basal lemma not thickened, awns plumose, decorative, attractive, tough, growing on rocky and stony soils, on loamy or sandy soils, see *Bibliotheca Botanica* 20: 379. 1915, *Bulletin of Miscellaneous Information Kew* 1934: 450. 1934.

in English: wiry nine-awn, conetop nine-awn

E. lophotrichus Chiov. ex H. Sholz & P. Koenig (*Enneapogon lophotrichus* Chiov. ex Chiarugi)

Ethiopia, Somalia, Arabia, Egypt. Annual or perennial, tufted, leaf blades linear filiform and ascending, oblong panicle loosely contracted, glumes pinkish, fertile lemma hairy on the back, awns ciliate, third lemma well developed but barren, absence of cleistogenes in the basal leaf sheaths, semidesert, hillsides, slopes, among rocks, dry stony soils, open shrubland, dry lowlands, similar to and often confused with *Enneapogon desvauxii* and *Enneapogon persicus*, see *Illustrationes Plantarum Orientalium* 4: 34, t. 324. 1850-1853 [1851] and *Webbia* 8: 119. 1951, *Willdenowia* 13(2): 369. 1983.

E. mollis Lehm. (*Enneapogon cenchroides* (Licht.) C.E. Hubb.; *Pappophorum molle* (Lehm.) Kunth)

U.S. See *Systema Vegetabilium* 2: 616. 1817, *Novarum et Minus Cognitarum Stirpium Pugillus* 3: 40. 1831, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 255. 1833 and *Bulletin of Miscellaneous Information Kew* 1934: 119. 1934.

in English: soft feather pappus grass

E. nigricans (R. Br.) P. Beauv. (*Enneapogon flavescens* (Lindl.) N.T. Burb.; *Enneapogon pallidus* (R. Br.) P. Beauv. p.p.; *Pappophorum flavescens* Lindl.; *Pappophorum nigricans* R. Br.)

South Australia, Queensland, Victoria, New South Wales. Perennial, tufted, black-green, wiry, stiff, small and sparse tussocks, culms usually simple and not disarticulating, leaves pubescent with glandular hairs, ornamental inflorescence a spike-like panicle, dark purple to blackish panicle oblong to narrow-cylindrical and dense, 1 fertile floret, glumes membranous and unequal, lemma with stiff awns, body of lowest lemma ribbed, awns plumose, a prolific seeder, susceptible to summer fires and overgrazing, slow growing, forage, much grazed, native pasture species, found in dry inland regions, grassy wetland, shrublands, degraded sites, grasslands, on red and red-brown earths, well-drained sandy loam soils, see *Prodromus Florae Novae Hollandiae* 185. 1810, *Essai d'une Nouvelle Agrostographie* 82, 161, 171. 1812.

in English: black heads, blackhead grass, black top grass, black grass, nigger heads, nigger head grass, niggerhead, pappus grass, bottle washers

E. oblongus N.T. Burb. (*Pappophorum lindleyanum* Domin var. *glaucum* Domin; *Pappophorum nigricans* R. Br. var. *barbinode* Domin)

South Australia, Queensland, Western Australia, Northern Territory. Perennial, stout and erect, forming sparse tussocks, bluish green and hairy leaves, purplish panicle compact and dense, small and crowded spikelets, inland regions, stony soils, moderately grazing value, often previously confused with *Pappophorum lindleyanum* Domin, see *Proceedings of the Linnean Society of London* 153(1): 85-86. 1941.

in English: purple-head nine-awn, purplehead nineawn, rock nineawn

E. pallidus (R. Br.) P. Beauv. (*Pappophorum pallidum* R. Br.)

Northern Territory, Western Australia. See *Prodromus Florae Novae Hollandiae* 185. 1810, *Essai d'une Nouvelle Agrostographie* 82, 161, 171. 1812 and *Proceedings of the Linnean Society of London* 153(1): 80. 1941.

E. persicus Boiss. (*Enneapogon elegans* (Nees ex Steud.) Stapf; *Enneapogon glumosus* (Hochst.) Maire & Weiller; *Enneapogon schimperanus* (Hochst. ex A. Rich.) Renvoize; *Pappophorum aucheri* Jaub.; *Pappophorum elegans* Nees

ex Steud.; *Pappophorum glumosum* Hochst.; *Pappophorum persicum* (Boiss.) Steud.; *Pappophorum schimperanum* Hochst. ex A. Rich.; *Pappophorum turcomanicum* Trautv.)

Tropical Africa, southwestern Asia, India. Perennial or annual, tufted, slender, wiry, tussocky, low, inrolled leaf blades often widely diverging, panicle loosely or densely contracted, glumes purplish, awns ciliate, lemma shortly hairy, third lemma developed and sterile, fourth lemma vestigial, palatable, browsed, useful for erosion control, grows in open habitats, dry stony soils, alluvial soil, gravel, grassland, woodland, sandy soils, dry rocky waste places, see *Diagnoses plantarum orientalium novarum* 1(5): 71. 1844, *Tentamen Florae Abyssinicae ...* 2: 403. 1850, *Illustrationes Plantarum Orientalium* 4: 32, t. 323. 1851, *Synopsis Plantarum Glumacearum* 1: 199-200. 1854, *Flora* 38: 203. 1855 and *Bulletin of Miscellaneous Information Kew* 1907: 224. 1907, *Flore de l'Afrique du Nord*: 2: 193. 1953, *Kew Bulletin* 22: 400. 1968.

in Somalia: dikil, jabioki, aus

E. polyphyllus (Domin) N.T. Burb. (*Pappophorum nigricans* R. Br. var. *polyphyllum* Domin; *Pappophorum nigricans* var. *pallidum* sensu Domin, non (R. Br.) Domin)

South Australia, Queensland, Western Australia, Northern Territory, New South Wales. Annual or perennial, tufted, sticky, hispid with fine glandular hairs, culms sparsely branched and not disarticulating, panicle spike-like, spikelets 5- or 6-flowered, 1 fertile floret, glumes more or less equal, lemma thickened and flattened, awns plumose, a pioneer and coloniser, regenerates rapidly after burning, fodder, a valued grazing species, nutritious when young, readily grazed, responds to rain in 4 or 5 days, grows on sandy soils, in spinifex areas, on alluvial or river floodplains, arid lands, on heavy cracking clays and stony ridges, on deep or shallow sandy or clayey soils, see *Bibliotheca Botanica* 20: 381. 1915, *Proceedings of the Linnean Society of London* 153(1): 69, f. 2. 1941.

in English: leafy nine-awn, leafy nineawn, limestone bottlewashers, woolly oat grass, oat grass

E. pretoriensis Stent

South Africa. Perennial, tufted, unbranched, base erect, yellow sheaths, branched contracted panicle, lemma awns fringed, usually on rocky areas, see *Bothalia* 1(3): 174-176, t. 3. 1922, *Kew Bulletin* 22: 399. 1968.

E. purpurascens (R. Br.) P. Beauv. (*Pappophorum purpurascens* R. Br.)

Australia, Queensland, Northern Territory. Perennial, erect, wiry and slender, attractive, forming short and sparse tussocks, leaves glandular hairy and linear, purplish panicle oblong to narrow-cylindrical and dense, lemma with prominent awns, weak growing, found in open woodlands, grassland, rocky or stony soils, see *Prodromus Florae Novae*

Hollandiae 185. 1810, *Essai d'une Nouvelle Agrostographie* 82, 161, 171. 1812.

in English: purple nineawn, nine awn grass

E. robustissimus (Domin) N.T. Burb.

Australia.

E. scaber Lehm. (*Enneapogon benguellensis* Rendle; *Pappophorum benguellense* (Rendle) K. Schum.; *Pappophorum laxum* Chiov.; *Pappophorum scabrum* (Lehm.) Kunth) (Benguela, Angola; see H. Capello [Hermenegildo Carlos Brito Capelo] and Roberto Ivens, *From Benguella to the Territory of Yacca*. Description of a journey into Central and West Africa ... by H.C. and R.I., Officers of the Royal Portuguese Navy Expedition organized in the years 1877-1880. Sampson Low & Co. London 1882; James Johnston, *Reality versus Romance in South Central Africa*. An account of a journey across the continent from Benguella on the West, ... to the Mouth of Zambesi on the East Coast. London 1893)

South Africa. Perennial or sometimes annual, tufted, small, branched, erect, leaf blades expanded or rolled, glandular, awns and leaf blades prickly, dense basal leaf cover, ligule a fringe of short hairs, leaf sheaths rounded and hairy, panicle rather loosely contracted, nonciliate awns, glumes sparsely pilose, lemma hairy on the back, awns of fertile lemma scabrid or scaberulous, third lemma vestigial, low grazing value, growing in sandy riverbanks, dry areas, along roadsides, in sand, see *Novarum et Minus Cognitarum Stirpium Pugillus* 3: 41. 1831, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 255. 1833, *Catalogue of the African Plants Collected by Dr. F. Welwitsch in 1853-61* 2(1): 230. 1899 and *Botanischer Jahresbericht* 27: 458. 1901, *Annali di Botanica* 10(3): 411. 1912, *Flore de l'Afrique du Nord*: 2: 196. 1953.

in South Africa: klipgras, rauhgranniges neunbortsengras

E. scaber Lehm. var. *scaber*

South Africa. Perennial, tufted, open panicle branched, growing among rocks.

in South Africa: klipgras, rauhgranniges neunbortsengras

E. schimperianus (Hochst. ex A. Rich.) Renvoize (*Calothesia elegans* Wight & Arn. ex Steud.; *Enneapogon dipsaceus* G.C. Wall. ex Hook.f.; *Enneapogon elegans* (Nees ex Steud.) Stapf; *Enneapogon elegans* (Steud.) Stapf; *Enneapogon glumosus* (Hochst.) Maire & Weiller; *Enneapogon persicus* Boiss.; *Enneapogon schimperanus* (Hochst. ex A. Rich.) Renvoize; *Pappophorum elegans* Nees ex Steud.; *Pappophorum glumosum* Hochst.; *Pappophorum molle* sensu Schwartz p.p.; *Pappophorum schimperanum* Hochst. ex A. Rich.; *Pappophorum schimperianum* Hochst. ex A. Rich.)

Yemen. Perennial, tufted, basal leaf sheaths not fibrous, leaves usually involute and pubescent, panicle spike-like, lowest lemma with ciliate awns, growing in stony bushland,

open rocky plains, see *Diagnoses plantarum orientalium novarum* 1(5): 71. 1844, *Tentamen Florae Abyssinicae* ... 2: 403. 1850, *Synopsis Plantarum Glumacearum* 1: 199. 1854, *Flora* 38: 203. 1855, *The Flora of British India* 7(22): 301. 1897 [1896] and *Bulletin of Miscellaneous Information Kew* 1907: 224. 1907, *Flore de l'Afrique du Nord*: 2: 193. 1953, *Kew Bulletin* 22: 400. 1968.

E. scoparius Stapf (*Enneapogon filifolius* (Pilg.) Stapf ex Garabedian; *Enneapogon filifolius* (Pilg.) Pilg.; *Pappophorum filifolium* Pilg.; *Pappophorum scoparium* (Stapf) Chiov.; *Pappophorum setifolium* Hochst.)

Southern tropical Africa, Yemen. Perennial, wiry, slender, erect, thin, branched, swollen base subbulbous to knotty, tufted to densely tufted, profusely branched, rhizomatous, leaf sheath very hairy and rounded, ligule a ring of hairs, leaf blades filiform and hairy, tough wiry leaves, densely contracted spike-like panicle unbranched, lemmas with 9 hairy to ciliate awns, third lemma reduced, moderately to very palatable, low grazing value, weed species used for broom-making, growing on open grassland, dry situations, under trees in disturbed veld, arid sweet bushveld, on sand, dry grasslands, on well-drained stony hills, limestone, on stony slopes, among rocks, stony hills, shallow soils, closely related to *Enneapogon cenchroides*, see *Flora Capensis* 7: 656. 1900, *Annuario del Reale Istituto Botanico di Roma* 8(3): 358. 1908, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 51(3-4): 419. 1914, *Annals of the South African Museum* 16: 424. 1925, *Willdenowia* 1: 210. 1954, *Kew Bulletin* 22: 397. 1968.

in English: wiry nine-awned grass, bottlebrush grass

in Somalia: caws mullaax

in southern Africa: borseltjiegras, dasgras, kalkgras, hard-enegenaaldgras, besen neunborstengras; joang-ba-mafika (Sotho)

E. spathaceus Gooss.

South Africa. Perennial, rhizomatous, tufted, hairy cataphylls, woody rootstock, more or less glandular, open panicle branched, lemma awns hairy, usually in sandveld, see *Bulletin of Miscellaneous Information Kew* 1934: 200. 1934.

E. truncatus Kakudidi (*Enneapogon flavescens* auct. non (Lindl.) N.T. Burb.)

Queensland, New South Wales. Perennial, tufted, glabrous, culms usually branched and not disarticulating, leaves glabrous or pubescent, inflorescence spicate and exserted, 1 fertile floret, glumes entire and acute, body of lowest lemma strongly ribbed, awns plumose, grows in open woodland or grassland, see *Australian Systematic Botany* 1(4): 350. 1988.

E. virens (Lindl.) Kakudidi (*Pappophorum virens* Lindley)

Queensland, New South Wales. Perennial, tufted, culms usually branched and not disarticulating, inflorescence spi-

cate, 1 fertile floret, glumes entire and acuminate, basal lemma hairy on the back, awns plumose, grows in open woodland, see *Journal of an Expedition into the Interior of Tropical Australia* 360. 1848.

Enodium Pers. ex Gaudin = *Molinia*
Schrank

From the Greek *enodios*, *enodion* “on the way, blisters, nets, seen on the way.”

Arundinoideae, Arundineae, type *Enodium caeruleum* (L.) Gaudin, see *Baiersche Flora* 1: 100, 334. 1789, *Agrostologia Helvetica, definitionem ...* 1: 145. 1811, *Handbok i Skandnaviens Flora, Fjerde Upplagan* 32. 1843 and *U.S. Dept. Agric. Bull.* 772: 50. 1920, *Contributions from the United States National Herbarium* 46: 230, 296. 2003.

Enteropogon Nees = *Macrostachya* A. Rich., *Sauge-tia* Hitchc. & Chase

From the Greek *enteron* “intestine” and *pogon* “beard,” probably referring to the bearded callus or to the beards in the axils of the spikes; see John Lindley (1799-1865), *A Natural System of Botany*. Second edition, with numerous additions and corrections, and a complete list of genera, with their synonyms. 448. London 1836.

About 9-17 species, tropics, Africa, Asia, Australia, Pacific. Chloridoideae, Cynodonteae, Chloridineae, annual or perennial, herbaceous, usually branched, caespitose, glabrous nodes, auricles absent, ligule a short ciliate membranous rim or a minutely fringed membrane, leaves flat and glabrous, plants bisexual, hidden cleistogenes present or absent, inflorescence a single terminal slender drooping spike, digitate spike or spikes arranged digitately and spreading at maturity, almost sessile spikelets compressed dorsiventrally and disarticulating above the glumes and between the florets, spikelets with 1 hermaphrodite dorsally flattened awned floret and 1 awned rudiment, only the lowest floret fertile, second floret male or sterile, spikelets solitary and secund, 2 glumes unequal and keeled, upper glume acute to shortly awned, lower lemma rounded on the back and long-awned, reduced upper lemma awned or awnless, callus bearded, palea present, 2 free and fleshy lodicules, stamens 3, anthers cream, ovary glabrous, 2 stigmas, small ellipsoid fruit longitudinally grooved, leaves harsh when old, shade species, drought resistant, adapted to medium to dry areas, growing in arid and semiarid places, open habitats, tropical savannah on sand or clay, rainforest, moist conditions, very closely related to and often confused with *Chloris* Sw., type *Enteropogon melicoides* (Koenig ex Willd.) Nees, see *Essai d'une Nouvelle Agrostographie* 41, 71, 74, 84, 164, 167, 176. 1812, *A Natural System of Botany* second edition 381, 448, 485. 1836, *Tentamen Fl. Abyss.* 2:

408. 1850 and *Contrib. U.S. Nat. Herbarium* 18: 378. 1917, *Kew Bulletin* 21: 105-110. 1967, D.E. Anderson, “Taxonomy of the genus *Chloris* (Gramineae).” *Brigham Young University Science Bulletin: Biological Series* 19(2): 1-133. 1974, *Taxon* 33: 126-134. 1984, *Journal of Cytology and Genetics* 20: 205-206. 1985, *Telopea* 3: 217-221. 1988, *Flora Mesoamericana* 6: 289. 1994, *Austral. Ecology* 25(2): 140-149. Apr 2000, *Flora of Ecuador* 68: 103-105. 2001, *Contributions from the United States National Herbarium* 41: 78-79, 139, 193. 2001, *Ecological Management and Restoration* 2(3): 179-188. Dec 2001, Ian Cole, Jean Metcalfe and Terry Koen, “The effect of removing seed from florets on germination and field establishment in a Wallaby Grass (*Austrodanthonia fulva*) accession.” *Ecological Management and Restoration* 5(2): 134-136. Aug 2004, *Ecological Management and Restoration* 6(1): 16-27. Apr 2005, Qing Liu, Nan-Xian Zhao, Gang Hao, Xiao-Ying Hu and Yun-Xiao Liu, “Caryopsis morphology of the Chloridoideae (Gramineae) and its systematic implications.” *Botanical Journal of the Linnean Society* 148(1): 57-72. May 2005.

Species

E. acicularis (Lindley) Lazarides (*Chloris acicularis* Lindley; *Chloris acicularis* var. *queenlandiae* Domin; *Chloris moorei* F. Muell.)

South Australia, Western Australia, Queensland, Victoria, New South Wales, Northern Territory. Perennial, tufted, glabrous to sparsely pilose, erect and tough, robust, forming tussocks, very sparse root system, sheath glabrous, ligule membranous, leaves linear and acuminate, many spikes radiating from the end of the culm, spikes rigid and spreading horizontally, purplish spikelets, glumes persistent and lanceolate, lemmas awned, lower lemma acute and notched, indicator of good to fair range condition, useful for erosion control, attractive and ornamental when in flower, salinity resistant, can tolerate or susceptible to heavy grazing and flooding, food for butterflies, forage, native pasture species, moderately palatable when dry, high palatable and grazed when young, widespread, found in fertile sandy and alluvial soils, in dry regions, arid and semiarid places, on alluvial fans, alluvial plains at the base of ranges and hills, channels, under trees in open woodland, on margins of claypans, moist conditions, on calcareous soils under gidgee, in shallow soils, closely related to *Enteropogon ramosus*, see *Linnaea* 25(4): 444. 1853 and *Bibliotheca Botanica* 85: 368. 1915, *Australian Journal of Botany, Supplementary Series* 5: 31. 1972.

in English: umbrella grass, branching umbrella grass, windmill grass, spider grass, curly windmill grass

E. barbatus C.E. Hubb.

Somalia, Ethiopia, Kenya. Perennial, tufted, erect, forming dense tussocks, leaf blades narrowly linear or inrolled, sheaths keeled and loosely hairy, spike solitary silky hairy,

upper glume 2-dentate and mucronate, fertile lemma hairy and 2-dentate, callus of fertile lemma bearded or long-silky, overgrazed areas, dry sandy soils, *Acacia* bushland, degraded woodland, see *Bulletin of Miscellaneous Information Kew* 1941: 196. 1941.

E. brandegei (Vasey) W.D. Clayton (*Chloris brandegei* (Vasey) Swallen; *Diplachne brandegei* Vasey; *Gouinia brandegei* (Vasey) Hitchc.; *Leptochloa brandegei* (Vasey) Hitchc.) (after the California botanist Townsend (Townsend) Stith Brandegee, 1843-1925, plant collector, civil engineer, topographer, botanical explorer (Southwest U.S. and Mexico) and collector, founder of *Zoe*, author of "A collection of plants from Baja California." *Proc. Calif. Acad. Sci.* ser. ii. 2: 117-225. 1889, husband of Mary Katherine Layne Currant Brandegee (1844-1920); see J.H. Barnhart, *Biographical notes upon botanists*. 1: 240. 1965; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 50. 1972; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. 1917-1933; Ira Loren Wiggins (1899-1987), *Flora of Baja California*. 42-43. Stanford, California 1980; Joseph Ewan, *Rocky Mountain Naturalists*. The University of Denver Press 1950; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. 1964; Gordon Douglas Rowley, *A History of Succulent Plants*. Mill Valley, California 1997; M.E. Jones, "Katherine Brandegee." in *Desert Plant Life*. 4: 41, 51, 65, 70. 1932)

North America, Mexico. See *Genera Plantarum* 3: 1178. 1883, *Proceedings of the California Academy of Sciences, Series 2*, 2: 213. 1889 and *U.S. Department of Agriculture Bureau of Plant Industry Bulletin* 33: 21. 1903, *American Journal of Botany* 22: 41. 1935, *Kew Bulletin* 37: 419. 1982.

E. chlorideus (J. Presl) W.D. Clayton (*Chloris chloridea* (J. Presl) Hitchc.; *Chloris clandestina* Scribn. & Merr.; *Chloris longifolia* (E. Fourn.) Vasey, nom. illeg., non *Chloris longifolia* Steud.; *Dinebra chloridea* J. Presl; *Eutriana chloridea* (J. Presl) Kunth; *Gymnopogon longifolius* E. Fourn.; *Gymnopogon virletii* E. Fourn.)

North and South America, Venezuela, Mexico, U.S., Texas. Perennial, erect, simple, caespitose, rhizomatous, hidden cleistogenes, rhizanthogenes on underground rhizomes, nodes and internodes glabrous, ligule ciliate, good forage, see *Fundamenta Agrostographiae* 161. 1820, *Reliquiae Haenkeanae* 1(4-5): 291. 1830, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 280. 1833, *Synopsis Plantarum Glumacearum* 1: 205. 1854, *Mexicanas Plantas* 2: 144. 1886 and *Bulletin, Division of Agrostology United States Department of Agriculture* 24: 25. 1901, *Proceedings of the Biological Society of Washington* 41: 162. 1928, *Kew Bulletin* 37: 419. 1982.

in English: bury-seed umbrella grass, buryseed chloris

in Mexico: verdillo cacahuatoide

E. dolichostachyus (Lag.) Keng ex Lazarides (*Chloris digitata* (Roxb.) Steud.; *Chloris dolichostachya* Lag.; *Chloris incompleta* Roth; *Chloris incompleta* Roth ex Roem. & Schult.; *Chloris panicea* Willd.; *Chloris radiata* Heyne ex Roth, nom. illeg., non *Chloris radiata* (L.) Sw.; *Chloris roxburghii* Edgew.; *Chloris tetrameris* Trin.; *Enteropogon dolichostachyus* (Lag.) Keng; *Lophacme incompleta* (Roth) Chiov.; *Melica digitata* Roxb.)

China, India, Sri Lanka, Southeast Asia, Thailand, Afghanistan, Australia. Perennial, terete or compressed, tufted, robust, tussock-forming, ascending or scrambling, erect or procumbent, branched, wiry, cylindrical, smooth, sometimes rooting at the lower nodes, external ligule absent, leaf sheaths cylindrical, leaf blades tapering to a fine point, inflorescence a terminal whorl of spikes, long naked peduncle, spikelets secund and 2-awned, 2 florets, 1 floret perfect and 1 floret neuter, glumes membranous and acuminate, palea scabrid, fodder grass, eaten by cattle before flowering, growing on rocky slopes, tropical forest, damp places or shady sites, hedges, thickets, plantations, dry zones, among bushes, along roadsides, similar to *Enteropogon acicularis* and *Enteropogon minutus*, see *Species Plantarum. Editio quarta* 4: 923. 1806, *Encyclopédie Méthodique. Botanique ... Supplément 2*: 236. 1811, *Genera et species plantarum* 5. 1816, *Systema Vegetabilium* 2: 607. 1817, *Flora Indica; or Descriptions ...* 1: 328. 1820, *Neue Entdeckungen im ganzen Umfang der Pflanzenkunde* 2: 64. 1821, *Novae Plantarum Species* 61. 1821, *Gram. Unifl. Sesquifl.* 235. 1824, *Journal of the Asiatic Society of Bengal* 21: 183. 1851, *Synopsis Plantarum Glumacearum* 1: 207. 1854, *Flora Capensis* 7(2): 316. 1898 and *Handb. Fl. Ceylon* 5: 275. 1900, *Annuario del Reale Istituto Botanico di Roma* 8: 350. 1908, *Grasses of Ceylon* 88. 1956, *Claves Generum et Specierum Graminearum Primarum Sinicarum Appendice Nomenclatione Systematica* 197. 1957, *Ceylon J. Sci., Biol. Sci.* 2(2): 126. 1959, *Grasses of Burma ...* 466. 1960, *Australian Journal of Botany, Supplementary Series* 5: 31. 1972.

in India: bamna, bansi, hika gadi, kanthari gadi, maituwa, mathaniya, melamalai hullu, sainder, tekhadia

E. macrostachyus (Hochst. ex A. Rich.) Munro ex Benth. (*Chloris macrostachya* Hochst. ex A. Rich.; *Chloris simplex* Schumach.; *Enteropogon macrostachyus* K. Schum. ex Engl.; *Enteropogon macrostachyus* (A. Rich.) Benth.; *Enteropogon simplex* (Schumach.) A. Chev.; *Macrostachya abyssinica* Hochst.; *Megastachya abyssinica* Steud.; *Megastachya abyssinica* Hochstätter ex Steud.)

Tropical Africa, Namibia, tropical Arabia. Perennial bunchgrass or annual, erect, densely tufted, leafy, termitophile, basal sheaths glabrous rounded or keeled, ligule a ciliate rim, leaves finely pointed, spikes or racemes solitary, spikelets glabrous, glumes unequal, upper glume short-awned, lemmas awned, lowest lemma scabrid, good seeder, good drought tolerance, thatching grass, useful for erosion

control, palatable, good grazing, growing in semiarid climates, *Acacia* bushland, open bushland, grassland, on saline sites, along water courses, canal banks, disturbed places, in shallow rocky clay, on alluvial silts, floodplains, rocky soils, savannah, brown clay soil, light shade, semishady soil, burned and cleared areas, red sandy soil, under trees, loose sandy loams and loams, in moist loamy sand, flat terrain, along roadsides, see *Beskrivelse af Guineiske planter* 54. 1827, *Tentamen Florae Abyssinicae ...* 2: 408. 1850, *Synopsis Plantarum Glumacearum* 1: 203. 1854, *Journal of the Linnean Society, Botany* 19: 101. 1881, *Abhandlungen der Königlich-Akademie der Wissenschaften in Berlin* 31. 1894 and *Revue de Botanique Appliquée et d'Agriculture Tropicale* 14(150): 125. 1934.

in English: bush rye, mopane grass, needle grass

E. minutus Lazarides

Australia, Queensland. Tussocky, robust, wiry, branched, flat glaucous leaf blades, external ligule a minute ciliate membrane, inflorescences digitate, flexible spikes, filiform awn, in sandy soils, alluvial soils, water courses, lagoons, similar to *Enteropogon acicularis* and *Enteropogon ramosus*, see *Australian Journal of Botany, Supplementary Series* 5: 28. 1972, *Flora of Australia* vol. 43, Poaceae 1: 328. 2002.

E. mollis (Nees) Clayton (*Chloris angustiflora* F. Aresch.; *Chloris anisopoda* Scribn. ex B.L. Rob.; *Chloris leptantha* Hitchc. ex Urb.; *Chloris luetzelburgii* Hitchc.; *Chloris mollis* (Nees) Swallen; *Chloris rupestris* (Ridl.) Hitchc.; *Gymnopogon mollis* Nees; *Gymnopogon rupestre* Ridl., also spelled *rupestris*) (after the German botanist Philipp von Luetzelburg, 1880-1948, explorer, plant collector in north-eastern Brazil and Amazonia, from 1928 to 1929 companion of Rondon, among his writings are *Mappas botanicos do Nordeste do Brasil* organizados por Philipp von Luetzelburg. Rio de Janeiro 1925, (his thesis) in *Flora* 100: 145-212. 1910 and *Estudo botânico do Nordeste*. Rio de Janeiro 1925-1926; see J.H. Barnhart, *Biographical notes upon botanists*. 2: 410. 1965; Stafleu and Cowan, *Taxonomic literature*. 3: 190-191. Utrecht 1981)

West Indies, Colombia, Brazil, Venezuela, Peru, Ecuador. Annual, densely caespitose, erect, simple, wiry, nodes and internodes glabrous, sheaths glabrous or hispid, leaves pubescent to pilose, ligule ciliate, leaf blades long-attenuate, single or clustered racemes, spikelets imbricate, awned, glumes subequal, lemma lanceolate, callus bearded, 2 stamens, plants cleistogamous, dry steppes, coastal lowlands, see *Flora Brasiliensis seu Enumeratio Plantarum* 2: 427. 1829, Nils Johann Andersson (Anderson), 1821-1880, *En Verldsomsegling Skildrad I Bref*. [First edition, the first account of the first Swedish circumnavigation in the *Eugenie*, 1851-1852] Stockholm 1854, *Journal of the Linnean Society, Botany* 27: 73. 1890 and *Proceedings of the American Academy of Arts and Sciences* 38: 118. 1902,

F.W.C. Areschoug (1830-1908), *Plantae sub itinere navis bellicae Eugeniae anno 1852 a N. J. Andersson circa Guayaquil collectae* 118. 1910, *Symbolae Antillarum* 7: 166. 1912, *Proceedings of the Biological Society of Washington* 36: 197. 1923, *Manual of the Grasses of the West Indies* 126. 1936, *North American Flora* 17: 596. 1939, *Kew Bulletin* 37: 419. 1982.

E. monostachyos (Vahl) K. Schum. (also spelled ***monostachyus***) (*Chloris monostachya* (Vahl) Poir., nom. illeg., non *Chloris monostachya* Michx.; *Cynosurus monostachyos* Vahl; *Eleusine monostachys* (Vahl) Spreng.; *Enteropogon badamicum* Bhide; *Enteropogon melicoides* (J. König ex Rottler) Nees; *Enteropogon melicoides* (Rottler) Nees; *Enteropogon melicoides* (J. König ex Willd.) Nees; *Enteropogon monostachyos* (Vahl) K. Schum. ex Engler; *Ischaemum melicoides* J. König ex Rottler; *Leptochloa monostachyos* (Vahl) Roem. & Schult.; *Leptochloa monostachya* (Vahl) P. Beauv. ex Roem. & Schult.; *Rabdochloa monostachya* (Vahl) P. Beauv.; *Rottboellia pilosa* Roth ex Roem. & Schult., nom. illeg., non *Rottboellia pilosa* Roth ex Roem. & Schult.; *Rottboellia triacantha* Roth)

Tropical Africa, Asia, Mozambique, India, Sri Lanka, Burma. Perennial, tufted, usually ascending and rooting at the lower nodes, tussock-forming, compact at the base, leaf sheaths keeled and flattened, racemes solitary, spikelets 3-awned, 3-flowered spikelet, 3 florets, 2 florets perfect and 1 neuter, lowest lemma scabrous, third floret reduced to a lemma, nutritive fodder grass, useful for erosion control, growing in dry and arid zones, savannah, scrub, along roadsides, see *Species Plantarum* 1: 72-73. 1753, *De Fructibus et Seminibus Plantarum...* 1: 7. 1788, *Der Gesellschaft Naturforschender Freunde zu Berlin, neue Schriften* 4: 211. 1803, *Species Plantarum. Editio quarta* 4(2): 941. 1806, *Encyclopédie Méthodique, Botanique, Suppl.* 2: 238. 1811, *Systema Vegetabilium* 2: 581, 785. 1817, *Novae Plantarum Species* 43. 1821, *Systema Vegetabilium, editio decima sexta* 1: 349. 1825, *Abhandlungen der Preussischen Akademie der Wissenschaften. Mathematisch-naturwissenschaftliche Klasse* 17. 1894, *Die Pflanzenwelt Ost-Afrikas* C: 110. 1895 and *Grasses of Ceylon* 93. 1956, *Ceylon J. Sci., Biol. Sci.* 2(2): 126. 1959, *Grasses of Burma ...* 472. 1960.

in English: needle grass

in India: kannai pullu

E. monostachyos (Vahl) K. Schum. subsp. ***africanus*** Clayton

Southern tropical Africa. Perennial, tufted, leaf sheaths keeled and flattened, 2-flowered spikelets, lemma of lower floret awned, shade species, growing in sandy soils near rivers, see *Kew Bulletin* 21: 109. 1967.

E. paucispiceus (Lazarides) B.K. Simon (*Enteropogon unispiceus* var. *paucispiceus* Lazarides)

Australia, southeast Queensland. Slender, tufted, compact, external ligule absent or a membrane ciliate, sparse inflorescences, smooth floret, in heavy soils, slopes, sandstone, close to *Enteropogon unispiceus*, see *Australian Journal of Botany, Supplementary Series 5*: 27, f. 10. 1972, *Austrobaileya* 2(1): 1. 1984.

E. prieurii (Kunth) W.D. Clayton (*Chloris cryptostachya* Steud. ex J.A. Schmidt; *Chloris multiradiata* Hochst.; *Chloris prieurii* Kunth; *Chloris punctulata* Hochst. ex Steud.; *Chloris subtriflora* Steud.) (named for Leprieur)

Tropical Africa, Arabia. Annual, tufted, erect or geniculate ascending, leaf blades flat, leaf sheaths keeled, digitate inflorescence of ascending racemes, spikelets long-awned, upper glume mucronate, hairy lemmas, dorsally flattened lemma and grain, good forage, growing in deep white sand, dry sandy soils, open bush, poor soils, disturbed places, see *Révision des Graminées* 1: 89. 1829, *Beiträge zur Flora der Cap Verdischen Inseln* 148. 1852, *Synopsis Plantarum Glumacearum* 1: 205, 208. 1854 and *Kew Bulletin* 37: 419. 1982.

in English: Prieur's umbrella grass

in Arabic: kraa l'grab

in Mali: pedu kéé, pedu kúú

in Mauritania: kraa l'grab

in Niger: buta'n kurégé, fulan kosey, garago, ikardan'allagh, ikardan n'allagh, karidinalak

in Nigeria: kafar gauraka

in Senegal: genudar, genumbam, las o fam, las a koy, laspis

in Upper Volta: nanarde, nanargal, ngangarde

E. ramosus B.K. Simon (*Chloris acicularis* auct. non Lindley; *Chloris acicularis* Lindl. var. *queenslandiae* Domin)

Australia, Queensland. Perennial, glabrous, tufted, tussocky, branched from the lower nodes, sheath glabrous, external ligule absent, leaves often twisted and more or less smooth, spikes digitate and spreading, glumes persistent and linear, lower lemma acuminate and minutely scabrous, third lemma minute or absent, coarse and unpalatable when old, moderately palatable when young, food for butterflies, found mainly in drainage lines and river floodplains, alluvial plains, arid and semiarid regions, in small depressions, savannah woodland, see *Journal of an Expedition into the Interior of Tropical Australia* 33. 1848 and *Bibliotheca Botanica* 85: 368. 1915, *Austrobaileya* 2(1): 1. 1984.

in English: curly windmill grass, tussock umbrella grass, windmill grass, creek windmill grass

E. rupestris (J.A. Schmidt) A. Chev. (*Ctenium rupestre* J.A. Schmidt; *Enteropogon ruspolianum* Chiov.; *Enteropogon somalensis* Chiov.) (Italian (b. Tiganesti, Romania) explorer Eugenio Ruspoli, 1866-1893 (Burgi, Somalia, killed by an elephant), ethnologist, botanical and zoological collector, naturalist, son of Emanuele Ruspoli, 1837-1899)

Central Africa, Mauritania, Capo Verde Islands, Namibia, Botswana, Sudan. Perennial, branched to much-branched, bushy or shrubby, wiry, leafy, tufted, pale cataphylls, short woody rhizome, leaf blades flat, leaf sheaths rounded and glabrous, rat-tail like inflorescence with inconspicuously awned spikes, spike solitary, spikelets 2-flowered occasionally a third floret present, lemma of lower floret awned, second lemma sterile, not drought resistant, low grazing value, culms used for roofing and thatching, growing among rocks, open *Acacia* bushland, dry habitats, deep red sand, tree grassland, black clay, silty soils, seasonally flooded grassy plains, similar to *Enneapogon macrostachyus*, see *Beiträge zur Flora der Cap Verdischen Inseln* 148. 1852, *Annuario del Reale Istituto Botanico di Roma* 7: 72, t. 3, f. 3. 1897 and *Revue de Botanique Appliquée et d'Agriculture Tropicale* 15: 1048. 1935.

in Niger: gubuwarem, niéré-dhu

in Somalia: gorrer, baldole, gauwadiri, gauwadere, gowdere

E. sechellensis (Baker) Durand & Schinz (*Ctenium sechellense* Baker; *Ctenium sechellarum* Baker; *Enteropogon leptophyllus* Benth.; *Enteropogon sechellarum* (Baker) Benth.)

Eastern Africa, Somalia, Madagascar, Mozambique, the Seychelles. Perennial, wiry, tufted, sheaths flattened and keeled, racemes solitary, on stabilized dunes, red sand, see *Flora of Mauritius and the Seychelles ...* 452. 1877, *Journal of the Linnean Society, Botany* 19: 101. 1881, *Conspectus Florae Africae* 5: 859. 1895.

E. somalense Chiov. (also spelled *somalensis*)

Africa, Kenya. Perennial, tufted, spreading habit, growing in seasonally waterlogged sites, heavy soils, see *Annuario del Reale Istituto Botanico di Roma* 6: 170, t. 16. 1896.

E. unispiceus (F. Muell.) Clayton (*Chloris unispicea* F. Muell.)

Australia, eastern Queensland, Pacific, Taiwan. Slender, tufted, compact, branched, leaves basal, external ligule absent, inflorescence a single spike or digitate, lower glume muticous or aristulate, basal lemma narrowly lanceolate acuminate, similar to *Enteropogon paucispiceus*, see *Fragmenta Phytographiae Australiae* 7: 118. 1870 and *Transactions of the Linnean Society of London, Botany*, ser. 2, 6: 305. 1903, *Kew Bulletin* 21: 108. 1967.

in English: windmill grass

Entolasia Stapf

From the Greek *entos* "within, inside" and *lasios* "shaggy, hairy, woolly," referring to the densely silky hairy lemmas.

About 5 species, tropical Africa, Australia. Panicoideae, Panicoideae, Paniceae, perennial, erect and branched, more or less scandent, rambling, wiry, bushy or shrubby, sometimes herbaceous, straggly or loosely tufted, shortly or long

rhizomatous, hollow internodes, leaf blades linear to lanceolate, auricles absent, ligule fringed, sheath glabrous or hairy, leaves disarticulating or persistent, bisexual plants, inflorescence a panicle or spike, primary axis with short racemes, florets awnless, spikelets pedicellate usually solitary, florets 2, lower floret sterile and the upper bisexual, 2 glumes unequal, lower glume 0- to 3-nerved short and triangular, upper glume 3- to 7-nerved, upper lemmas densely silky hairy, palea hairy, 2 fleshy and glabrous lodicules, stamens 3, ovary glabrous without the apical appendage, 2 stigmas, shade species, dry woodland, marshy places, rain-forest, damp grassland and dry forest, open habitats, groundcovers, type *Entolasia olivacea* Stapf, see *Flora of Tropical Africa* 9: 739. 1920, Liliana M. Giussani, J. Hugo Cota-Sánchez, Fernando O. Zuloaga and Elizabeth A. Kellogg, "A molecular phylogeny of the grass subfamily Panicoideae (Poaceae) shows multiple origins of C4 photosynthesis." *Am. J. Bot.* 88: 1993-2012. 2001, *Austral. Ecology* 27(2): 121-131. Apr 2002, *Ecological Management and Restoration* 3(1): 15-27. Apr 2002, *Ecological Management and Restoration* 3(3): 188-199. Dec 2002, *Restoration Ecology* 11(4): 489-503, Dec 2003, *Austral. Ecology* 30(3): 250-260, May 2005.

Species

E. imbricata Stapf

Tropical Africa. Perennial, simple, rhizomatous, tufted, glabrous, stemmy, soft, erect, nodes usually bearded, linear leaves, solitary inflorescence racemose, racemes appressed to the axis, green spikelets, fodder grass, very palatable, useful for erosion control, with the potential to grow in waterlogged areas, found in swamps, wetlands, in sandy and swampy places by rivers and in miombo, floodplains, see *Flora of Tropical Africa* 9: 739. 1920, *Flora of Tropical East Africa* 451-898. 1982.

in English: Bungoma grass

E. marginata (R. Br.) Hughes (*Panicum marginatum* R. Br.)

Australia, Victoria, Queensland, New South Wales. Perennial, variable, shortly rhizomatous, straggling or shrubby, scrambling, slender and wiry, branched near base, trailing culms often rooting at lower nodes, sheath glabrous or hairy, ligule hairy, more or less erect panicle, spikelets solitary, lower lemma sterile, naturalized in the Hawaiian Islands, groundcover, damp areas on sandy soils, forest margins, pasture, see *Prodromus Florae Novae Hollandiae* 1: 190. 1810 and *Bulletin of Miscellaneous Information Kew* 1923: 331. 1923.

in English: bordered panic, bordered panic grass, Australian panic grass, margined panic

E. olivacea Stapf (*Panicum endolasion* Mez ex Peter)

Tropical Africa. Perennial, rhizomatous, erect, geniculate, branched, leaves pointed, spikelets green, shade species,

usually in moist places, low ground, flooded depressions, see *Flora of Tropical Africa* 9: 740. 1920, *Repertorium Specierum Novarum Regni Vegetabilis* 40: 173 & Anhang, 24, t. 19, f. 1. 1930.

E. stricta (R. Br.) Hughes (*Panicum strictum* R. Br.; *Panicum strictum* Bosc ex Roem. & Schult., nom. illeg., non *Panicum strictum* R. Br.)

Queensland, New South Wales. Perennial, rhizomatous, straggling or shrubby, slender and wiry, forming loose and straggling tufts, new growth bright glossy green, culms erect or straggling, sheath glabrous or hairy, panicle narrow and terminal, green or purplish solitary spikelets, lower lemma sterile, ornamental, provides food for seed eating birds, common in woodland on sandstone usually amongst rocks, shallow sandy or stony soils, dry areas on sandy soils, see *Prodromus Florae Novae Hollandiae* 190. 1810, *Systema Vegetabilium* 2: 447. 1817, *Flora Australiensis: A Description ...* 7: 486. 1878 and *Bulletin of Miscellaneous Information Kew* 1923(9): 331. 1923.

in English: wiry panic

E. whiteana C.E. Hubb.

Queensland, New South Wales. Perennial, rhizomatous, tussocky, straggling or shrubby, slender and wiry, culms branched at the nodes, sheath glabrous or hairy, spikelets solitary, lower lemma sterile, groundcover, growing in damp areas on sandy soils, on dry barren rocky slopes, see *Hooker's Icones Plantarum* 34: t. 3338. 1937.

Entoplocamia Stapf

Probably from the Greek *entos* "within, inside" and *plokamos* "lock of hair," possibly referring to the shape of the spikelets.

One species, southwest and southern Africa, Namibia. Chloridoideae, annual, unarmed, herbaceous, robust, unbranched, glabrous, auricles absent, ligule a short fringe of hairs, leaves mostly basal, plants bisexual, inflorescence spicate or racemose, spikelets solitary or clustered, lower 2 florets barren, 2 glumes acuminate 3- to 5-nerved, lemmas ciliate on margins, spiky awns, palea 2-nerved 2-keeled, lodicules absent, 3 stamens, ovary glabrous, stigmas 2, growing in depressions where moisture collects, sandy rocky hills, brackish soil, desert, open habitats, savannah, on heavy stony soils, stony slopes, type *Entoplocamia aristulata* (Hack. & Rendle) Stapf, see *Flora Capensis* 7: 318. 1898, *Catalogue of the African Plants Collected by Dr. F. Welwitsch in 1853-61* 2(1): 228. 1899 and *Bolletino della Società Botanica Italiana* 45. 1924.

Species

E. aristulata (Hack. & Rendle) Stapf (*Tetrachne aristulata* Hack. & Rendle)

South Africa. Annual, stout, leaf blades prickly, leaf sheaths expanded and glabrous, inflorescence a spike or spike-like racemes, spiny spikelets sessile or pedicelled, lemma papery, short awn deflexed, palatable, dry river beds, see *Journal of Botany, British and Foreign* 29: 72. 1891 and *Flora Capensis* 7: 711. 1900.

in South Africa: veldskoengras, knoppiesgras, knopfgras

Ephobopogon Steud. = *Microstegium* Nees

From the Greek *ephebeia* “adolescence, youth,” *ephebos* “boy, young girl, one arrived at adolescence” and *pogon* “beard.”

Panicoideae, Andropogoneae, Saccharinae, see *A Natural System of Botany* 2nd edn., 447. 1836, *Nomenclator Botanicus. Editio secunda* 1: 556. 1840 and *Contributions from the United States National Herbarium* 46: 230, 292. 2003.

Epicampes J. Presl = *Muhlenbergia* Schreb.

From the Greek *epikampes* “curved, curling, convex,” perhaps referring to the rhizomes.

Chloridoideae, Cynodonteae, Muhlenbergiinae, type *Epicampes stricta* J. Presl, see *Genera Plantarum* 44. 1789, *Systema Naturae ... editio decima tertia, aucta, reformata* 2: 171. 1791, *Essai d'une Nouvelle Agrostographie* 28, t. 7, f. 10, t. 3, f. 20. 1812, *Systema Vegetabilium, editio decima sexta* 1: 262. 1825, K.B. Presl, *Reliquiae Haenkeanae* 1(4-5): 235, t. 39. 1830, *Nomenclator Botanicus. Editio secunda* 1: 41. 1840, *Gramineae* 12-13. 1841, *Nova Acta Phys.-Med. Acad. Caes. Leop.-Carol. Nat. Cur.* 19(Suppl. 1): 144-145. 1843, *Die Natürlichen Pflanzenfamilien* 2(2): 97. 1887, *Revisio Generum Plantarum* 3(3): 357. 1898 and *Contributions to Western Botany* 14: 7. 1912, *Ill. Fl. N. U.S.* (edition 2) 1: 184. 1913, *Die natürlichen Pflanzenfamilien, Zweite Auflage* 14d: 69-70. 1956, *Contributions from the United States National Herbarium* 34(4): 112. 1967, *Flora Mesoamericana* 6: 276-286. 1994, *American Journal of Botany* 81: 622-629. 1994, *Madroño* 42(4): 427-449. 1995, *Sida* 17: 349-365. 1996, *Brittonia* 50(1): 23-50. 1998, P.M. Peterson, “Systematics of the Muhlenbergiinae (Chloridoideae: Eragrostideae).” *Grasses: Systematics and Evolution* 195-212. 2000, *Contributions from the United States National Herbarium* 41: 79-81, 143-173. 2001.

Eragrostiella Bor

The diminutive of the related genus *Eragrostis* Wolf; see Norman Loftus Bor (1893-1972), *The Indian Forester*. 66: 269. 1940 and *Flora of Assam*. 5: 105. 1940.

Some 5 species, India, Myanmar (Burma), Sri Lanka, northern Australia, eastern Africa. Chloridoideae, Eragrostideae, perennial, compactly and densely caespitose, herbaceous, internodes hollow, basal sheaths persistent and fibrous when old, ligule a short ciliate membrane, leaf blades usually narrow and filiform, plants bisexual, inflorescence linear and spike-like or a single raceme, spikes solitary and slender, spikelets solitary, bisexual and sessile spikelets, perfect florets, spikelets rachilla and callus hairy, 2 glumes equal and keeled, lower glume carinate 1-nerved, upper glume 1- to 3-nerved, lemmas keeled deciduous awnless, palea keels narrowly winged, 2 small fleshy lodicules, stamens 3, ovary glabrous, 2 stigmas plumose, dry and wet areas, dry bushland, shallow soil, grassland, open habitats, wasteland, sandy soils, rocky places, type *Eragrostiella leioptera* (Stapf) Bor, see *Genera Plantarum* 23. 1776, *Journal of the Linnean Society, Botany* 19: 117. 1881 and *Indian Forester* 66: 269. 1940, *Grasses of Burma, Ceylon, India and Pakistan (excluding Bambuseae)* 493-495. 1960, *Contributions from Herbarium Australiense* 22: 1-7. 1976, *Trop. Grasses SE Asia* 172-173. 1980, *Flora of Ethiopia and Eritrea* 7: 129. 1995, *New Phytologist* 156(3): 327-349. Dec 2002, *Botanical Journal of the Linnean Society* 148(1): 57-72. May 2005.

Species

E. bifaria (Vahl) Bor (*Catapodium bifarium* (Vahl) Link; *Catapodium coromandelianum* (J. König ex Rottler) Link; *Eragrostiella coromandelina* (J. König ex Rottler) Keng f. & L. Liou, sometimes spelled *coromandeliana*; *Eragrostis bifaria* (Vahl) Wight ex Steud., nom. illeg., non *Eragrostis bifaria* (Vahl) Wight; *Eragrostis coromandeliana* (J. König ex Rottler) Trin.; *Poa bifaria* Vahl; *Poa coromandeliana* J. König ex Rottler; *Poa coromandelina* J. König ex Rottler)

Sri Lanka, India. Perennial, slender, erect, simple, glabrous, compact, leaf blades scabrous and pilose, leaves filiform often curved, spikelets closely imbricate, glumes membranous or coriaceous, lemmas membranous and mucous, paleas acute with winged keels, a resurrection plant, fodder grass eaten by cattle, roots used for flavouring Burmese *cheroots*, dry and wet areas, savannah, sandy and rocky ground, grassland, see *Symbolae Botanicae, ...* 2: 19. 1791, *Der Gesellschaft Naturforschender Freunde zu Berlin, neue Schriften* 4: 191. 1803, *Hortus Regius Botanicus Berolinensis* 2: 194. 1827, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 1(4): 415. 1830, *Catalogue of Indian Plants* 105. London 1833-1837, *Synopsis Plantarum Glumacearum* 1: 264. 1854 and *Handb. Fl. Ceylon* 5: 298. 1900, *Indian Forester* 66: 270. 1940, *Fl. Assam* 5: 107. 1940, *Grasses of Ceylon* 77. 1956, *Ceylon J. Sci., Biol. Sci.* 2(2): 124. 1959, *Grasses of Burma, Ceylon, India and Pakistan* 494. 1960, *Acta Botanica Sinica* 9: 50. 1960.

in India: chiraka, chota bhankta, chota blankta, godaru hullu, gubbikal gaddi, jadi hullu, kodimara hullu, moi, nooli gaddi, nosai hullu, nose hullu, oothu hullu, punya safed, punya sufed, udu thallam, wooda tallum

E. bifaria (Vahl) Bor var. *bifaria* (*Eragrostis bifaria* var. *australiana* F.M. Bailey)

India, Burma, northeastern Australia, eastern Africa. Perennial, densely caespitose, leaves convolute and filiform, solitary spikes, narrow spikelets, see *The Queensland Flora* 6: 1908. 1902, *Contributions from Herbarium Australiense* 22: 6. 1976.

E. bifaria (Vahl) Bor var. *secunda* (Nees ex Steud.) Lazarides (*Eragrostiella secunda* (Nees ex Steud.) Bor; *Eragrostis secunda* Nees ex Steud.)

India, Sri Lanka. Perennial, grassland, see *Synopsis Plantarum Glumacearum* 1: 264. 1854 and *Handb. Fl. Ceylon* 5: 298. 1900, *Indian Forester* 66: 270. 1940, *Fl. Assam* 5: 107. 20 July 1940, *Grasses of Ceylon* 77. 1956, *Ceylon J. Sci., Biol. Sci.* 2(2): 124. 1959, *Grasses of Burma, Ceylon, India and Pakistan* 495. 1960, *Contributions from Herbarium Australiense* 22: 6. 1976.

E. bifaria (Vahl) Bor var. *walkeri* (Stapf) Lazarides (*Eragrostiella walkeri* (Stapf) Bor; *Eragrostis walkeri* Stapf)

India, Sri Lanka. Perennial, robust, flat leaves, along roadsides, see *A Handbook to the Flora of Ceylon* 5: 298. 1900, *Indian Forester* 66: 270. 1940, *Fl. Assam* 5: 107. 1940, *Grasses of Ceylon* 78. 1956, *Ceylon J. Sci., Biol. Sci.* 2(2): 124. 1959, *Grasses of Burma, Ceylon, India and Pakistan* 495. 1960, *Contributions from Herbarium Australiense* 22: 7. 1976.

E. brachyphylla (Stapf) Bor (*Eragrostis brachyphylla* Stapf; *Panicum cordifolium* Steud., nom. illeg., non *Panicum cordifolium* Desv.)

India, Sri Lanka. Perennial, robust, compact, ligule densely ciliate, leaf sheaths scabrous, leaf blades glabrous and smooth, spikelets compressed and crowded, glumes more or less equal, lemmas obtuse, palea wings ciliolate, forest, rocky places, dry areas, along roadsides, see *Synopsis Plantarum Glumacearum* 1: 85. 1854, *The Flora of British India* 7: 327. 1896 and *Indian Forester* 66: 270. 1940, *Fl. Assam* 5: 107. 1940, *Grasses of Burma, Ceylon, India and Pakistan* 494. 1960.

E. collettii (Stapf) Bor (*Eragrostis collettii* Stapf)

Myanmar. See *The Flora of British India* 7(22): 326. 1897 [1896] and *Indian Forester* 66: 270. 1940.

E. leioptera (Stapf) Bor (*Eragrostis leioptera* Stapf)

India. See *The Flora of British India* 7(22): 325. 1897 [1896] and *Indian Forester* 66: 270. 1940.

E. nardoides (Trinius) Bor (*Catapodium nepalense* Link; *Eragrostis nardoides* Trinius)

Asia, Nepal. Perennial, tufted, wiry, culms erect, leaves filiform, see *Hortus Regius Botanicus Berolinensis* 2: 194. 1827, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 1(4): 415. 1830 and *Indian Forester* 66: 270. 1940, *Flora of Assam* 5: 107. 1940, *Contributions from Herbarium Australiense* 22: 1-7. 1976.

Eragrostis N.M. Wolf = *Acamptoclados* Nash, *Boriskellera* Terechov, *Boriskerella* Terechov, *Diandrochloa* De Winter, *Erochloe* Raf., *Erosion* Lunell, *Exagrostis* Steud., *Macrolepharus* Philippi, *Megastachya* P. Beauv., *Neeragrostis* Bush, *Psilantha* (K. Koch) Tzvelev, *Roshevitzia* Tzvelev, *Stiburus* Stapf, *Thellungia* Stapf, *Triphlebia* Stapf, *Vilfagrostis* Döll

From the Greek *eros* "love" and *agrostis*, *agrostidos* (*agros* "a field, country") "grass, weed, couch grass"; Latin *agrostis*, is "couch-grass, quitch-grass" (Pseudo Apuleius Barbarus); some suggested from *era* "earth"; see Nathaniel Matthaeus von Wolf, *Genera plantarum vocabulis characteristicis definita*. 23. [Danzig] 1776; F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 99. Berlin & Hamburg 1989; Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 328. Ansbach 1852.

About 250(-300)/350 cosmopolitan species, mostly tropical and subtropical, temperate. Chloridoideae, Eragrostideae, Eragrostidinae, annual and perennial bunchgrass, erect, usually herbaceous or sometimes shrubby or woody and persistent, delicate, wiry or canelike, slender, sometimes decumbent, usually caespitose, forming tussocks or spreading clumps, rhizomatous or stoloniferous, auricles absent, leaf blade narrow and flat, ligule a line of hairs, sheaths glandular, leaves linear and finely acuminate, plants perfect-flowered or dioecious, chasmogamous or cleistogamous, inflorescence open or contracted, a compound panicle or false spike exerted or partially included in upper sheath, rachilla fragile or tough, bisexual and compressed laterally spikelets, spikelets disarticulating at maturity or disarticulation commencing at the base of spikelet or spikelets falling entire, florets few to many, florets bisexual or the upper sterile and reduced, glumes more or less equal, glumes often early deciduous, glabrous entire lemma, 3-nerved lemmas awnless or mucronate or acute-tipped, lodicules usually present and when present 2 free and fleshy, stamens 1-3, ovary glabrous, 2 plumose stigmas, ornamental, showy and decorative branched inflorescences, used for reseeding denuded land, some species may naturalize readily, soil binder, planted to stabilize soil, weedy species, cultivated fodder, drought resistant, staple cereal, more or less

unpalatable, native pasture species, grain crop species, more or less glandular and aromatic, disturbed ground, weedy places, sandy or poor soils, poor dry soils, grasslands, rain-forest, pampas, open habitats, a large and difficult genus, a wide range of variation, type *Eragrostis minor* Host, see *Species Plantarum* 1: 67. 1753, *Genera Plantarum* 23. 1776, *Gen. Sp.* 63, 65. 1781, *Gram. Austr.* 4: 15. 1809, *Essai d'une Nouvelle Agrostographie* 74, 167. 1812, *Neogenyton* 4. 1825, *Nomenclator Botanicus. Editio secunda* 1: 622. 1840, *Florae Africae Australioris Illustrationes Monographicae* 384. 1841, *Linnaea* 21: 405. 1848, *Linnaea* 29: 96-110. 1858, *Flora Brasiliensis* 2(3): 137. 1878, *Flora Australiensis: A Description ...* 7. 1878, *Journal of the Linnean Society, Botany* 19: 117. 1881, *Flora Orientalis* 5: 599. 1883, *Fl. Species

E. sp.

in Nigeria: saraaho debbo

in Thailand: ya khai hao, yaa krok, yaa langkaa

E. abrumpens Kabuye

Africa. Shedding of the spikelets intact, see *Kew Bulletin* 28(3): 530. 1973[1974].

E. acraea De Winter

South Africa, Zimbabwe. Perennial, stout, robust, tufted, inflorescence open or contracted, spikelets appressed on the branches, glumes rough, lemma keeled, narrow and long palea, pasture, palatable when young, thatching grass, common in disturbed areas, mountain, stony places, between rocks, see *Kirkia* 1: 100. 1961.

E. acutiflora (Kunth) Nees (*Eragrostis acutiflora* (Kunth) J. Presl, nom. illeg., non *Eragrostis acutiflora* (Kunth) Nees; *Eragrostis acutiflora* var. *humilior* J. Presl; *Eragrostis flavescens* J. Presl; *Megastachya acutiflora* (Kunth) Roem. & Schult.; *Poa acutiflora* Kunth; *Poa flavescens* (J. Presl) Kunth)

Brazil, Mexico, Peru to Bolivia, Venezuela. Perennial, glabrous, caespitose, dense, erect to geniculate, compact, spreading, foliage mostly basal, leaf sheaths ciliate at the summit, ligules ciliolate-membranous, leaf blades flat and glabrous, panicle open to contracted, spikelets acute and strongly compressed, 7- to 21-flowered, glumes narrowly lanceolate, lemma apex acuminate to attenuate or subaristate, 2 stamens, common in moist areas, savannahs, sandy gravelly roadsides, see *Nova Genera et Species Plantarum* 1: 161. 1815 [1816], *Systema Vegetabilium* 2: 588. 1817, *Flora Brasiliensis seu Enumeratio Plantarum* 2: 501-502. 1829, *Reliquiae Haenkeanae* 1(4-5): 277-278. 1830, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 343. 1833.

E. acutiglumis Parodi

Brazil, Uruguay, Argentina. See *Notas del Museo de la Plata, Botánica* 2(Bot. 11): 7, f. 3. 1937.

E. advena (Stapf) S.M. Phillips (*Theellungia advena* Stapf)

Australia, Queensland, New South Wales. Perennial, erect, wiry, compact, tufted, cleistogamous, panicles spiciform, spikelets congested, florets 1-5, unequal glumes persistent or tardily deciduous, see *Bulletin of Miscellaneous Information Kew* 1920(3): 98, f. 1-11. 1920, *Kew Bulletin* 37(1): 159. 1982.

E. aegyptiaca (Willd.) Delile (*Eragrostis aegyptiaca* Delile; *Eragrostis aegyptiaca* Willd., nom. illeg., non *Eragrostis aegyptiaca* (Willd.) Delile; *Eragrostis aegyptiaca* (Willd.) Link, nom. illeg., non *Eragrostis aegyptiaca* (Willd.) Delile; *Poa aegyptiaca* Willd.)

Tropical Africa. Annual, tufted, browsed by cattle, in open habitats, open waste places, see *Enumeratio Plantarum*

Horti Botanici Berolinensis, ... 107. 1809, *Description de l'Égypte*, ... *Histoire Naturelle*, Tome Second 157, t. 4, f. 2. 1813, *Hortus Regius Botanicus Berolinensis* 1: 191. 1827, *Index Seminum [Berlin]* 3. 1857.

E. aegyptiaca (Willd.) Delile subsp. *humifusca* H. Scholz Sudan. See *Willdenowia* 26: 231, f. 2. 1996.

E. aethiopica Chiov.

South Africa, Uganda, Tanzania, Mozambique, Ethiopia. Annual, tufted, erect, slender, glabrous sheaths, loose or very diffuse inflorescence, elliptic panicle, linear spikelets distant and breaking from the base, glumes subequal or very unequal, lemma ovate and membranous, palea keels smooth, common in black clay soil, red sand, vleis, sandy fields, riverbeds, along lakeshore, silt, damp sand, grassland, see E. Chiovenda, *Graminacee dell'Harar e dei Somali* raccolte dall'ing. Luigi Robecchi-Bricchetti (1855-1926)... 1897 and *Ann. Ist. Bot. Roma* 8: 373. 1908, *Kew Bulletin* 47(2): 277-282. 1992.

in Somalia: gelmis

E. airoides Nees (*Agrosticula brasiliensis* (Raddi) Herter; *Aira brasiliensis* Raddi; *Airopsis millegrana* Griseb.; *Atropis millegrana* Griseb.; *Eragrostis airoides* var. *pluriflora* Döll; *Eragrostis brasiliensis* (Raddi) Nees; *Eragrostis triflora* Ekman; *Poa airoides* (Nees) Kunth, nom. illeg., non *Poa airoides* Koeler; *Poa brasiliensis* Raddi; *Sporobolus brasiliensis* (Raddi) Hack.; *Sporobolus ramosissimus* Kunth; *Vilfa ramosissima* (Kunth) Trin.)

The Caribbean to Argentina, Brazil, Paraguay. Perennial, caespitose, erect, low, leaf blades flat or inrolled, ornamental, leaves glabrous, ligules ciliolate, delicate inflorescence oblong and much-branched, diffuse panicle ovate, spikelets 1- to 3-flowered, pinkish red flushed flowers, glumes subequal lanceolate-ovate, 3 stamens, forming colonies, sandy areas, savannahs, seasonally inundated areas, disturbed places, see *Agrostografia Brasiliensis* 36, 51. 1823, *Flora Brasiliensis* 2: 497-499, 509-510. 1829, *Révision des Graminées* 2: 269, t. 46. 1830, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 360. 1833, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 6,4(1-2): 58. 1840, *Abhandlungen der Königlich Gesellschaft der Wissenschaften zu Göttingen* 19: 252. 1874, *Plantae Lorentzianae* 204. 1874, *Flora Brasiliensis* 2(3): 137. 1878 and *Bulletin de l'Herbier Boissier, sér. 2*, 4(3): 278. 1904, *Arkiv för Botanik utgivet av K. Svenska Vetenskapsakademien* 11(4): 42, t. 4, f. 1. 1912, *Revista Sudamericana de Botánica* 6: 145. 1939.

in English: darnel love grass

E. alveiformis Lazarides

Australia, Queensland, New South Wales. Perennial, compact, tufted, tussocky, open panicles, acute spikelets

lanceolate or ovate, 12- to 33-many loose florets, similar to *Eragrostis leptostachya*, see *Australian Systematic Botany* 10(1): 96. 1997.

E. amabilis (L.) Wight & Arnott ex Nees (*Cynodon amabilis* (L.) Raspail; *Cyperus paniculatus* M. Blanco (Cyperaceae); *Eragrostis amabilis* f. *varia* Kuntze; *Eragrostis amabilis* var. *plumosa* (Retz.) E.G. Camus & A. Camus; *Eragrostis ciliaris* (L.) R. Br.; *Eragrostis ciliaris* var. *patens* Chapm. ex Beal; *Eragrostis mangalorica* Hochst. ex Steud., nom. illeg., non *Eragrostis mangalorica* Hochst.; *Eragrostis plumosa* (Retz.) Link; *Eragrostis tenella* (L.) P. Beauv. ex Roem. & Schult.; *Eragrostis tenella* var. *koeningii* Kuntze; *Eragrostis tenella* var. *plumosa* (Retz.) Bot.* 6: 43. 1862, *Revisio Generum Plantarum* 2: 774. 1891, *Index Kewensis* 1: 886. 1893, *Die Pflanzenwelt Ost-Afrikas* 50: 115. 1895, *Grasses of North America for Farmers and Students* 2: 479. 1896, *The Flora of British India* 7: 315-316. 1896 and *Bulletin du Muséum d'Histoire Naturelle* 25: 498. 1919, *Flore Générale de l'Indo-Chine* 7: 557. 1923, *Regnum Veg.* 119: 309. 1988 [by Nicolson, Suresh et Manilal], *Journal of Economic and*

Taxonomic Botany 22: 216, t. 2. 1998, *Taxon* 49(2): 254. 2000.

in English: bug's egg grass, Japanese love grass, love grass, feather lovegrass

in Spanish: yerba de amor

in Mexico: saksuuk

in India: budi, rejhra

E. ambleia W.D. Clayton

Kenya. Annual, panicle elliptic with stiff branches, spikelets linear and shortly pedicelled, glumes subequal, lemmas oblong-elliptic, palea keels scabrous, on sandy soil, open bushland, see *Kew Bulletin* 27(1): 152. 1972.

E. ancashensis Paul M. Peterson, N. Refulio-R. & O. Tovar (*Eragrostis pilgeri* Fedde) (Ancash, Recuay, Cordillera Blanca, Andes, Peru)

Peru. Found along roadsides, dark green spikelets, considered to be a synonym of *Eragrostis pilgeri* Fedde, see *Just's Botanischer Jahresbericht*. 3: 18. 1908, Peterson, P.M., N. Refulio-Rodriguez, and O. Tovar, "Eragrostis ancashensis (Poaceae: Chloridoideae). A new species from Ancash, Peru." *Sida* 19(1): 65-70. 2000.

E. andicola R.E. Fr. (*Eragrostis andicola* Pilg., nom. illeg., non *Eragrostis andicola* R.E. Fr.)

Argentina. See *Nova Acta Regiae Societatis Scientiarum Upsaliensis, ser. 4*, 1(1): 180. 1905, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 37: 377. 1906.

E. annulata Rendle ex Scott-Elliot (*Eragrostis annulata* Chiov., nom. illeg., non *Eragrostis annulata* Rendle ex Scott-Elliot)

South Africa, Kalahari, Namaqualand. Annual, tufted, glandular, erect or geniculate, usually branched, leaf blades soft and expanded, ligule a fringe of short hairs, leaf sheaths rounded and hairy, inflorescence an open branched panicle, spikelets spreading, secondary axes not whorled, slender pedicels, swollen-tipped glandular hairs, glandular ring around each pedicel, low grazing value, usually on stony places, desert, sandy soils, in disturbed areas, see *Journal of Botany, British and Foreign* 29: 72. 1891, *Catalogue of the African Plants Collected by Dr. F. Welwitsch in 1853-61* 2(1): 233. 1899 and *Annuario del Reale Istituto Botanico di Roma* 8(1): 63-64. 1903.

in English: ring windgrass

in South Africa: ringwindhalmgras, ring windhalm

E. apiculata Döll

Brazil. See *Flora Brasiliensis* 2(3): 145. 1878.

E. aquatica Honda

Japan. See *Botanical Magazine* (Tokyo) 42: 508. 1928.

in Japan: numa-kazekusa

E. arenicola C.E. Hubb.

Tropical Africa. Annual, tufted, glandular, not sticky, contracted inflorescence, spikelets crowded, palea keels hairy, a weed of cultivation, usually growing in sandy soil, shallow soil, open dry places, disturbed areas, irrigated cultivations, along roadsides, cultivated land, see *Kew Bulletin* 4: 345. 1949.

in Nigeria: kamboora fage, kambura face

E. aristata De Winter

Namibia. Annual, tufted, erect, geniculate, lemma deeply lobed at the apex, along riverbeds, moist places, see *Bothalia* 7: 469. 1961.

E. aristiglumis Kabuye

Tanzania. Indeterminate species, see *Kew Bulletin* 26(1): 83. 1971.

E. articulata (Schrank) Nees (*Eragrostis articulata* (Schrank) Nees var. *eglandulosa* Nicora; *Eragrostis articulata* var. *glabrescens* Henrard; *Eragrostis articulata* var. *pauciflora* Döll; *Eragrostis brasiliensis* (Raddi) Nees var. *delta* Nees; *Eragrostis glareosa* Trin.; *Eragrostis neesii* Trin. var. *laxa* Jedwabn.; *Eragrostis pilosissima* Link; *Eragrostis villosa* Salzm. ex Steud., nom. illeg., non *Eragrostis villosa* Trin.; *Poa articulata* Schrank; *Poa brasiliensis* Raddi; *Poa pilosissima* (Link) Kunth)

South America, Paraguay, Argentina, Brazil. Annual, caespitose, small, erect, coarse, foliage hirsute, acuminate leaf blades linear or linear-lanceolate, open inflorescence, ovate or oblong panicles with stiff branches, spikelets awnless and breaking up from the base upward, pedicels stiff with a swollen articulation, weed and pioneer, along roadsides, in disturbed ground, sand dunes, similar to *Eragrostis neesii*, see *Sylloge Plantarum Novarum* 1: 194. 1824, *Hortus Regius Botanicus Berolinensis* 1: 189. 1827, *Flora Brasiliensis seu Enumeratio Plantarum* 2: 497, 502-503. 1829, *Révision des Graminées* 1: 112. 1829, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 1(4): 405-406. 1830, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 339. 1833, *Synopsis Plantarum Glumacearum* 1: 276. 1854, *Flora Brasiliensis* 2(3): 142. 1878 and *Bulletin du Jardin Botanique de l'État* 6: 58, t. 2. 1919, *Mededeelingen van 's Rijks-Herbarium* 40: 69. 1921, *Botanisches Archiv* 5(3-4): 206. 1924, *Revista Argentina de Agronomía* 7(4): 272, 259, f. 4C, 5B. 1940, *Iheringia, Bot.* 55: 86. 2001.

E. aspera (Jacq.) Nees (*Eragrostis devolvens* Gand.; *Eragrostis laxiflora* Schrad.; *Eragrostis paniculata* (Roxb.) Steud.; *Eragrostis quintasii* Gand.; *Poa aspera* Jacq.; *Poa paniculata* Roxb.)

Tropical Africa, India. Annual, vigorous, weakly tufted, coarse, erect, leaf sheath round and pilose, ligule a ring of short hairs, large open delicate feathery panicles elliptic to ovate, 6- to 22-flowered, spikelets pedicellate breaking up

from the top downward, awnless, glumes subequal, lemma obtuse to truncate, palea keels scabrid, 3 stamens, low grazing value, common weed species in disturbed and old cultivated areas, disturbed stony places, along roadsides, on foot trail, gardens, shady areas, uncultivated lands, poor sandy soils, wadis, see *Hortus Botanicus Vindobonensis* 3: 32, t. 56. 1776, *Flora Indica; or Descriptions ...* 1: 341. 1820, *Linnaea* 12(4): 451. 1838, *Florae Africae Australioris Illustrationes Monographicae* 408. 1841, *Synopsis Plantarum Glumacearum* 1: 266. 1854 and *Bulletin de la Société Botanique de France* 66(7): 300. 1919 [1920], *Repertorium Specierum Novarum Regni Vegetabilis* 40: (Anhang 107) 1930: 331. 1931, *Kew Bulletin* 47(2): 277-282. 1992.

in English: rough love grass

in Gambia: numu ju tio

in Ghana: buruburua, buruburwa

in Nigeria: odudo ezi, ogagai, yayanga

in southern Africa: grootpluim-eragrostis (Afrikaans); jatsa (Sotho); kabwele (Tonga)

E. astrepta S.M. Phillips

Ethiopia. Annual, tufted, rigid, ascending, glandular, leaf blades rigid and subacute, inflorescence contracted, panicles terminal and axillary, 10- to 14-flowered, spikelets linear-lanceolate, lemmas ovate subacute, open ground, resembling *Eragrostis minor*, see *Kew Bulletin* 46(1): 111. 1991.

E. atropioides Hillebrand

Hawaii. Growing in subalpine dry grassland, high shrublands, wet places, see *Flora of the Hawaiian Islands* 531. 1888.

in English: hard-stem love grass, hard-stemmed love grass

E. atrovirens (Desf.) Trin. ex Steud. (*Eragrostis atrovirens* Lange; *Eragrostis atrovirens* Trin.; *Eragrostis atrovirens* var. *hesperidum* Emb. & Maire; *Eragrostis atroviridis* Maire; *Eragrostis biformis* (Kunth) Benth.; *Eragrostis bromoides* Jedwabn., nom. illeg., non *Eragrostis bromoides* (Vahl) Steud.; *Eragrostis chariis* (Schult.) Hitchc.; *Eragrostis chariis* auct. non (J.A. Schultes) A.S. Hitchc.; *Eragrostis chloromelas* Steud.; *Eragrostis elegantula* (Kunth) Nees ex Steud., nom. illeg., non *Eragrostis elegantula* Nees; *Eragrostis inamoena* K. Schum.; *Eragrostis nutans* auct. non (Retz.) Nees ex Steud.; *Poa atrovirens* Desf.; *Poa biformis* Kunth; *Poa chariis* Schult.)

Tropical Africa, Southeast Asia, China, India. Perennial, tufted, tussock-forming, variable, vigorous, stout, culms blue-green, erect or geniculate, usually simple or branched, glabrous, auricles bearded, leaves mostly basal and stiffly pointed, leaf sheaths purplish and smooth, leaf blades inrolled when dry, ligule a shallow rim, inflorescence contracted and loose, terminal panicle with capillary branches, spikelets laterally compressed and tinged with purple when young, glumes subequal, lower glume lanceolate and

purplish, upper glume boat-shaped, lemma tough, palea narrow with margins infolded, 3 stamens, grains eaten by birds, good fodder, grazed by all stock, low to medium grazing value, thatching grass, growing in open pastures, hill forest, wet sites, pond, marshes, secondary situations, along roadsides, clay soil, sandy soil, damp places, swamps, streams, see *Flora Atlantica* 1: 73, t. 14. 1798, *Mantissa* 2: 314. 1824, *Révision des Graminées* 1: 114. 1829, *Révision des Graminées* 2: 471, t. 149. 1831, *Nomenclator Botanicus. E. attenuata A.S. Hitchc. (*Sporobolus scaber* Phil.)

Peru, Chile. Vulnerable species, common on sandy slopes, see *Florula Atacamensis seu enumeratio plantarum ...* 54. Halis Saxonom [Halle] 1860 and *Contributions from the United States National Herbarium* 24(8): 340. 1927, *Gayana, Botánica* 51(1): 1-10. 1994, *Boissiera. Mémoires du Conservatoire de Botanique et de l'Institut de Botanique Systématique de l'Université de Genève* 54: 1-109. 1998.

E. australasica (Steudel) C.E. Hubb. (*Glyceria australasica* Steudel; *Glyceria ramigera* (F. Muell.) Benth.; *Panicularia australasica* (Steud.) Kuntze; *Poa ramigera* F. Muell.)

South Australia, Western Australia, Victoria, Queensland, New South Wales. Perennial tussock grass, semiaquatic, canelike, erect or ascending, coarse, twiggy, stout, robust, shortly rhizomatous, large spreading clumps, shrubby and woody, base swollen and thickened by cataphylls, with a coating of whitish wax, much branched at lower and upper nodes, leaf blade often rolled, leaves linear and rigid or coriaceous, leaves disarticulating from the sheaths, much-branched panicle loose and spreading, spikelets linear, glumes lanceolate and acuminate to acute, lemmas ovate and often notched, palea 2-keeled, provides fodder for native fauna and feral pigs, drought and flood tolerant, salt-tolerant, may become a nuisance, used for thatching and fencing, fiber, provides habitat and cover for wildlife, common in wet conditions and moist depressions, in arid and semiarid regions, wetlands, in low lying areas subject to intermittent flooding, roadside drains, shallow depressions, swamps and lakes, seasonal swamps, slightly saline and heavy clay soils, ponds and dams, claypans, tabledrains, see *Synopsis Plantarum Glumacearum* 1: 286. 1854, *Revisio Generum Plantarum* 1: 782. 1891 and *Kew Bulletin* 1941: 26. 1941.

in English: cane grass, bamboo grass, swamp canegrass

E. bahamensis Hitchc.

Bahamas. Found on rocky shores, see *Annual Report of the Missouri Botanical Garden* 1893: 149, t. 14. 1893 and *Manual of the Grasses of the West Indies* 1-439. 1936.

E. bahiensis Schrad. ex Schult. (*Eragrostis bahiensis* (Steud.) Herter, nom. illeg., non *Eragrostis bahiensis* Schrad. ex Schult.; *Eragrostis bahiensis* Roem. & Schult.; *Eragrostis bahiensis* Schrad. ex Schultes f. *riparia* Burkart; *Eragrostis bahiensis* var. *bahiensis*; *Eragrostis bahiensis* var. *contracta* Döll; *Eragrostis bahiensis* var. *laxiuscula* Döll; *Eragrostis blepharophylla* Jedwabn.; *Eragrostis elatior* Stapf; *Eragrostis expansa* Link; *Eragrostis firma* Trin.; *Eragrostis macra* Jedwabn.; *Eragrostis microstachya* (Link) Link; *Eragrostis pilosa* var. *bahiensis* (Schrad. ex Schult.) Gmel.; *Poa microstachya* Link; *Poa psammodes* (Trin.) Kunth)

South America, Peru and Brazil to Argentina. Perennial, variable, caespitose, erect or geniculately ascending, simple, basal leaves, glabrous below the nodes, leaf blades linear acuminate, ligules ciliate, leaf sheaths ciliate at the summit, open panicle spike-like ovate or oblong and moderately branched with flexuous branches, spikelets strongly laterally compressed and awnless, 5- to 40-flowered, spikelets breaking up from the base upward, lanceolate to ovate glumes keeled and unequal, lemmas broadly ovate and leathery, 2 stamens, common along roadsides, disturbed habitats, seasonally humid savannah, coast, in damp places, seasonal ponds, lakeshores, in sandy soil near riverbanks,

damp grasslands, similar to *Eragrostis atrovirens*, see *Essai d'une Nouvelle Agrostographie* 71, 162, 175. 1812, *Mantissa* 2: 318. 1824, *Hortus Regius Botanicus Berolinensis* 1: 185, 190. 1827, *Révision des Graminées* 1: 113. 1829, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. in English: Bahia love grass

E. bahiensis Schrad. ex Schult. var. ***bahiensis*** (*Eragrostis elatior* Stapf; *Eragrostis elatior* Hack., nom. illeg., non *Eragrostis elatior* Stapf; *Eragrostis expansa* Link; *Eragrostis hackelii* Hassl.; *Eragrostis macra* Jedwabn.; *Eragrostis psammodes* Trin.; *Poa bahiensis* Schrad. ex Schult.; *Poa brasiliensis* Raddi)

Brazil, Bolivia, Argentina. Inflorescence with delicate branches, sandy soils, see *Agrostografia Brasiliensis* 51. 1823, *Mantissa* 2: 318. 1824, *Flora Brasiliensis seu Enumeratio Plantarum* 2: 497-499. 1829 and *Flora Capensis* 7: 617-618. 1900, *Repertorium Specierum Novarum Regni Vegetabilis* 7: 374. 1909, *Repertorium Specierum Novarum Regni Vegetabilis* 8: 47. 1910.

E. bahiensis Schrad. ex Schult. var. ***contracta*** Döll

Brazil, Uruguay, Argentina. Inflorescence with rigid branches, contracted spike-like panicle, see *Flora Brasiliensis* 2(3): 151. 1878 and *Willdenowia* 22: 268. 1992.

E. barbinodis Hack.

Africa, Transvaal, Mozambique. Perennial, tufted, sprawling, geniculate to decumbent, stoloniferous, rooting at the nodes, unbranched culm nodes hairy, open inflorescence, rachilla persistent, forage, growing in sandy soils, black turf, red sandy loam, see *Bulletin de l'Herbier Boissier* 3(8): 390. 1895.

E. barrelieri Daveau (*Eragrostis poaeoides* var. *barrelieri* (Daveau) Fiori; *Eragrostis vulgaris* Coss. & Germ.; *Eragrostis vulgaris* subsp. *barrelieri* (Daveau) R.C.V. Douin)

(dedicated to the French botanist Jacques Barrelier [Jacobus Barrelierus], 1606-1673, physician, Dominican monk, traveler, author of *Plantae per Galliam, Hispaniam et Italiam observata* ... Opus posthumum, editum cura et studio Antonio de Jussieu, medici. Paris 1714; see Mariella Azzarello Di Misa, a cura di, *Il Fondo Antico della Biblioteca dell'Orto Botanico di Palermo*. 33. Regione Siciliana, Palermo 1988; Blanche Henrey, *No Ordinary Gardener - Thomas Knowlton, 1691-1781*. Edited by A.O. Chater. British Museum (Natural History). London 1986)

Tropical Africa, southwestern Asia, Mediterranean. Annual, tufted to loosely tufted, simple or much branched near the base, erect or geniculate, sprawling to decumbent, prostrate, fibrous root, leaf sheaths glandular and ciliate, ligules ciliate, leaf blades flat or rolled without crateriform glands on the margins, inflorescence open and glandular, 7- to 20-flowered, panicles terminal and axillary, axils of inflorescence glabrous, spikelets linear-oblong breaking up from the bottom upward, glumes unequal without crateriform glands on the nerve, glumes and lemmas acute or obtuse, lemmas membranous and flattened, scabrid palea keels, 3 stamens, grain oblong or elliptic-oblong, forage, browsed by all stock, weed species naturalized elsewhere, often aromatic, growing on disturbed ground, cultivated land, sandy soil, gardens, road verges, gravelly roadsides, floodplains, Sub-Saharan Africa to northeast Africa, see *Journal de Botanique* (Morot) 8: 289. 1894 and *Flora Analitica d'Italia* 1: 82. 1908, *Flore Complète Illustrée en Couleurs de France, Suisse et Belgique* 12: 32. 1927-1932, *Bulletin de la Société d'Histoire Naturelle de l'Afrique du Nord* 1 30: 369. 1939, *Flore de l'Afrique du Nord*: 2: 173. 1953.

in English: pitted love grass, Mediterranean love grass, love grass

in French: éragrostis de Barrelier

in Mexico: pasto

in Arabic: lehmeire

in Mauritania: lehméire

in Somalia: agar

E. barteri C.E. Hubbard

Tropical Africa. Caespitose, woody, browsed, little grazing value, found in rocky sites, river beds, sandy places, sand banks, see *Bulletin of Miscellaneous Information Kew* 1936(5): 311. 1936, *Fl. W. Trop. Afr.*, 2: 514, in clavi, 516. 1936.

E. basedowii Jedwabnick (*Eragrostis concinna* sensu Benth., partly, non Steudel) (after the anthropologist Herbert Basedow, 1881-1933, geologist and botanical collector in central Australia, explorer, from March to November 1903 prospector to the South Australian Government North-West Prospecting Expedition, author of *The Australian Aboriginal*. Adelaide 1925, *Journal of the Government north-west expedition*. Royal Geographical Society of

Australasia. South Australian Branch. Adelaide 1914 and *Catalogue of Minerals in the Technological Museum of the South Australian School of Mines and Industries*. Adelaide 1907; see J. Lanjouw and F.A. Stafleu, *Index Herbariorum*. Part II, *Collectors A-D*. Regnum Vegetabile vol. 2. 1954)

South Australia, New South Wales, Queensland, Northern Territory. Annual, densely tufted, erect to ascending, sometimes branched, leaves more or less pilose, sheaths more or less bearded, blade rolled or flat, inflorescence contracted and often interrupted, panicles terminal and axillary, spikelets ovate to linear-oblong densely overlapping and flattened, florets 9-30, lemmas coriaceous and curved, palea with keels hirsute, grows on inland sand dunes, see *Prodrum Florae Novae Hollandiae* 180. 1810, *Synopsis Plantarum Glumacearum* 1: 279. 1854 and *Botanisches Archiv* 4: 328. 1923.

in English: neat love grass

E. benthamii Mattei (*Eragrostis brownii* var. *patens* Benth.; *Eragrostis brownii* sensu Jessop; *Eragrostis rara* Domin; *Eragrostis philippica* Jedwabnick) (after the English botanist George Bentham, 1800-1884, taxonomist, from 1829 to 1840 Secretary of the Horticultural Society, 1862 Fellow of the Royal Society of London and in 1826 of the Linnean Society, from 1861 to 1874 President of the Linnean Society, among his most valuable writings are *Handbook of the British Flora*. London 1858, *Flora hongkongensis*. London 1861, *Labiatarum genera et species*. London 1832-1836, *The Botany of the Voyage of H.M.S. Sulphur, under the Command of Captain Sir Edward Belcher ... during the Years 1836-1842*. London 1844[-1846] and *Catalogue des plantes indigènes des Pyrénées et du bas Languedoc*. Paris 1826 author of most of the *Genera Plantarum* (London 1862-1883) of Bentham and Joseph Dalton Hooker (1817-1911) and in collaboration with Ferdinand Mueller of *Flora Australiensis*. London 1863-1878; see J.H. Barnhart, *Biographical notes upon botanists*. 1: 165. 1965; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 34. 1972; George Taylor, in *D.S.B.* 2: 614-615. 1981; B. Daydon Jackson, *George Bentham*. London 1906; Francis Wall Oliver (1864-1951), editor, *Makers of British Botany*. Cambridge 1913; H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 130. Oxford 1964; S. Lenley et al., *Catalog of the manuscript and archival collections and index to the correspondence of John Torrey*. Library of the New York Botanical Garden. 447. 1973; N. Hall, *Botanists of the Eucalypts*. Melbourne 1978 and Supplement 1980; M. Hadfield et al., *British Gardeners: A Biographical Dictionary*. London 1980)

New Zealand, Australia. Perennial, compactly tufted, not branched, leaves glabrous and smooth, leaf blade rolled, panicle open or contracted, spikelets elliptic to ovate or linear to oblong, florets 5-24, glumes persistent and more or less acuminate, green lemmas membranous and

lanceolate, palea 2-keeled, occurs in woodland on sandy soils, see *Flora Australiensis: A Description ...* 7: 647. 1878 and *Contribuzioni alla Biologia Vegetale* 4: 237. 1909, *New Zealand Journal of Botany* 29: 117-129. 1991.

in English: common love grass, love grass, Brown's lovegrass, Bentham's love grass

E. bergiana (Kunth) Trin. (*Poa bergiana* Kunth) (the Swedish physician Peter (Petrus) Jonas Bergius, 1730-1790, botanist and plant collector, pupil of Linnaeus, from 1766-1790 professor of natural history and pharmacy in Stockholm, author of *Semina Muscorum detecta ... disputat ...* Pehr Jonas Bergius. Upsaliae 1750, *Descriptiones plantarum ex Capite Bonae Spei*. Stockholmiae 1767 (plants collected by J.A. Auge, employed by the East India Company at Cape Town) and *Materia medica e regno vegetabili, sistens simplicia officinalia, pariter atque culinaria*. Editio secunda correctior. Stockholm 1778; see J.H. Barnhart, *Biographical notes upon botanists*. 1: 169. 1965; Peter MacOwan, "Personalia of botanical collectors at the Cape." *Trans. S. Afr. Philos. Soc.* 4(1): xxxiv. 1884-1886; Martin Heinrich Karl von Lichtenstein (1780-1857), *Travels in Southern Africa*. Linnaeus, *Mantissa Plantarum Altera*. 152, 241. 1771; Antoine Lasègue, *Musée botanique de M. Benjamin Delessert*. Paris, Leipzig 1845; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 35. 1972)

South Africa, Namibia. Perennial, rhizomatous, tufted, mat-forming, leaf sheaths hairy, inflorescence branched, spikelets purplish densely clustered, lowest lemma obtuse to broadly obtuse, pasture, soil binder, useful for erosion control, often confused with *Eragrostis truncata* Hack., usually growing in disturbed places, eroded areas, see *Révision des Graminées* 2: 549, t. 189. 1832, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 4,2(1): 71. 1836.

in English: kwagga love grass

in South Africa: kalk-eragrostis, kalk-kweek, kwaggakweek (Afrikaans)

E. berteroniana (Schult.) Steud. (*Megastachya berteroniana* Schult.; *Poa berteroniana* (Schult.) Kunth)

The Caribbean. See *Mantissa* 2: 330. 1824, *Révision des Graminées* 1: 112. 1829, *Nomenclator Botanicus. Editio secunda* 1: 562. 1840 and *Acta Botanica Cubana* 4: 1-11. 1980, *Fontqueria* 46: [i-ii], 1-259. 1997.

E. bicolor Nees (*Eragrostis bicolor* Boiss., nom. illeg., non *Eragrostis bicolor* Nees)

South Africa, Namibia. Perennial bunchgrass, tufted to densely tufted, short, erect, unbranched, occasionally geniculate, shortly rhizomatous, with horizontal or oblique rhizome, ligule a fringe of short hairs, upper leaf sheaths rounded, leaves mostly basal, leaf sheaths of basal leaves flattened, open inflorescence paniculate, secondary axes not whorled, lemma bicolored, forming small clumps, fairly palatable, pasture, grazed, ground cover, useful for erosion control, growing in clay soils, brackish areas, wet soils, dry river beds, see *Florae Africae Australioris Illustrationes Monographicae* 407. 1841, *Flora Orientalis* 5: 581. 1884.

in English: vlei love grass, speckled vlei grass, bicolor lovegrass

in South Africa: blousaadgras, fynvleigras, kleinblousaadgras, pangras, polgras, zweifarbiges straußgras, vlei-eragrostis (Afrikaans)

E. biflora Hack. (*Eragrostis biflora* Hack. ex Schinz)

Kalahari. Annual, tufted, flimsy, erect or geniculate, leaf sheath keeled, ligule a ring of short hairs, leaf blade thin and expanded, long inflorescence open, much-branched panicle with long and slender pedicels, spikelets with 1 or 2 florets green to purplish, weed, low grazing value, shade species, common in disturbed areas and moist disturbed areas, gardens, in shade under trees and bushes, savannah, grassland, see *Bulletin de l'Herbier Boissier* 3(8): 390. 1895.

in English: shade eragrostis

in southern Africa: krulblaargras (Afrikaans), skadu-eragrostis, zweiblütiger windhalm

E. botryodes W.D. Clayton (*Eragrostis atrovirens* var. *congesta* Robyns & Tournay)

Congo, Zaire. Perennial, tufted, erect or ascending, loosely geniculate, panicle ovate, spikelets narrowly ovate and clustered, 7- to 25-flowered, florets imbricate at the base, glumes subequal and narrowly ovate, lemmas narrowly ovate and acute, moist habitats, in marshy places, swampy grasslands, see *Nomenclator Botanicus. Editio secunda* 1: 562. 1840 and *Bulletin du Jardin Botanique de l'État* 25: 243. 1955, *Kew Bulletin* 27(1): 153. 1972.

E. brainii (Stent) Launert (*Pogonarthria brainii* Stent)

Africa, Zimbabwe. Strongly developed racemes, see *Flora Capensis* 7: 316. 1898 and *Bulletin of Miscellaneous Information Kew* 1932: 325. 1932, *Senckenbergiana Biologica* 47(4): 307. 1966.

E. braunii Schweinf.

Arabia, Yemen. Perennial, tufted, vigorous, leaf blades flat, stiff leaves, sheaths glabrous or pilose, spike-like panicle long and narrow, 6- to 12-flowered, spikelets linear breaking up from the bottom upward, glumes unequal, palea persistent, 3 stamens, quite palatable, found on steep grassy slopes, see *Bulletin de l'Herbier Boissier* 2(App. 2): 38. 1894.

E. brizantha Nees

South Africa, Namibia. Annual, tufted, erect or geniculate, spikelets densely crowded, rachilla fragile, palea glandular, growing in sandy soils, rivers, disturbed areas, see *Flora Africa Australioris Illustrationes Monographicae* 411. 1841 and *Vierteljahrsschrift der Naturforschenden Gesellschaft in Zürich* 56: 82. 1911.

E. brownii (Kunth) Nees (*Eragrostis atrovirens* f. *brownii* Hack.; *Eragrostis browneana* Nees; *Eragrostis brownei* (Kunth) Nees ex Steud.; *Eragrostis brownii* (Kunth) Wight; *Eragrostis brownii* (Kunth) Nees ex Steudel; *Eragrostis brownii* Nees; *Eragrostis bulbifera* Steud.; *Eragrostis cumingii* var. *novoguineensis* Jansen; *Eragrostis polymorpha* (R. Br.) Jedwabn., nom. illeg., non *Eragrostis polymorpha* Roem. & Schult.; *Eragrostis pubescens* (R. Br.) in English: common love grass, Brown's love grass, bay grass

in India: asata, chir, choti khidi, jenkua, khari

E. burmanica Bor

Asia, Burma. See *Bulletin of Miscellaneous Information Kew* 1951: 166. 1951.

in Thailand: yaa krok, ya krok

E. caesia Stapf (*Eragrostis caesia* Ekman & Mansf.)

South Africa, Zimbabwe. Perennial, densely tufted, glaucous, ligule a ring of hairs, leaf blade usually rolled, sheaths papery, inflorescence a dense and contracted panicle, lemma with black dots or elongate black patches, palea keels hairy, tussock grass, forage, grazed pasture, for goats and sheep, grassland, moist sites, slopes, shallow soil, mountainous grassland, seepage areas, see *Flora Capensis* 7(4): 599. 1900.

in English: blackpatch lovegrass

in South Africa: lemena, modulana, tschaane, tshaane

E. caespitosa Chiov.

Northeast tropical Africa. Perennial, erect, tufted, rather wiry, low growing, basal shoots with hard yellow scales, stems densely set with short leaves, numerous small purple narrowly oblong panicles rather dense, spikelets oblong disarticulating between the florets, glumes lanceolate, lemmas membranous, seed in the form of naked caryopses, well grazed, of moderate nutritive value, useful for erosion control, growing in dry sandy places, dry overgrazed soils, on poor sandy soils, grassland, in arid and semiarid areas, semidesert and abandoned cultivation, see *Annali di Botanica* 13(3): 373. 1915, *Kew Bulletin* 47(2): 277-282. 1992.

in English: cushion love grass

E. camerunensis W.D. Clayton

Tropical Africa. Perennial, densely tufted, grazed by stock, grassy places, wasteland, montane grassland, see *Kew Bulletin* 20: 265, f. 3. 1966.

E. capensis (Thunb.) Trin. (*Briza capensis* Thunb.; *Eragrostis capensis* (Link) Jedwabn., nom. illeg., non *Eragrostis capensis* (Thunb.) Trin.)

South Africa, Mozambique, Tanzania, Angola, Kenya. Perennial bunchgrass, densely tufted, erect, slender, straw colored and sometimes purplish, leaves mostly basal, leaf sheaths smooth and round, old sheaths closely packed at base, no ligule or an inconspicuous ring of short hairs, narrow panicles sparsely branched, spikelets flattened, florets closely imbricate, greenish to purplish lemma granular, palatable grass, native pasture species, common in poorly drained areas, along vleis, waterlogged soil, disturbed clay loam, very shallow soil, rocky and disturbed places, open sour grassland, dry stream bed, on riverbanks, rocky soil, poor granite sandveld, moist areas, see *Prodromus Plantarum Capensium*, ... 21. 1794, *Hortus Regius Botanicus Berolinensis* 1: 195. 1827, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 1(4): 400. 1830 and *Botanisches Archiv* 5(3-4): 183. 1924.

in English: Cape love grass, small heart-seed grass, heart-seed lovegrass

in southern Africa: bosluisgras, hartjie-eragrostis, hartjiesgras (Afrikaans); baroa, barwa, barwana, senana (Sotho); umbimbane (Zulu)

in Thailand: yaa kon hep, ya kon hep

E. capillaris (L.) Nees (*Aira capillacea* Lam.; *Eragrostis capillaris* (L.) Steud., nom. illeg., non *Eragrostis capillaris* (L.) Nees; *Eragrostis pilosa* var. *capillaris* (L.) Kuntze; *Eragrostis tenuis* Steud.; *Eragrostis tenuis* A. Gray, nom. illeg., non *Eragrostis tenuis* Steud.; *Poa capillaris* L.; *Poa tenuis* Elliott, nom. illeg., non *Poa tenuis* Clairv.)

U.S. Annual, caespitose, erect, capillary culms, leaves erect and flat, sheaths pilose, open panicle oblong or elliptic, spikelets with long pedicels, glumes acute, lemmas acute and rounded on the back, occurs in dry, sandy or rocky soil, waste places, along roadsides and on recently cleared areas, see *Species Plantarum* 68. 1753, *Tableau Encyclopédique et Méthodique ... Botanique* 1: 177. 1791, *A Sketch of the Botany of South-Carolina and Georgia* 1: 156. 1816, *Flora Brasiliensis seu Enumeratio Plantarum* 2: 505. 1829, *Synopsis Plantarum Glumacearum* 1: 273. 1854, *A Manual of the Botany of the Northern United States (edition 6)* 661. 1890, *Revisio Generum Plantarum* 3: 353. 1898 and *Contr. U.S. Natl. Herb.* 12: 121. 1908, *Report of the Michigan Academy of Science, Arts and Letters* 17: 182. 1916.

in English: lace grass, lacegrass, tiny lovegrass

E. capitula Lazarides

Australia, Queensland. Perennial, leaves hirsute, compact capitate panicles, spikelets more or less sessile, florets closely overlapping, 3 stamens, see *Australian Systematic Botany* 10: 103. 1997.

E. capitulifera Chiov. (*Eragrostis cephalotes* Chiov. ex Chiarugi)

Ethiopia. Perennial, low, tussocky, tough leaf sheaths clustered at the base, leaf blades soft and acute, inflorescence solitary and capitate, spikelets shortly exerted from the uppermost sheaths, 6- to 8-flowered, glumes lanceolate-oblong, lemmas with green nerves, palea keels scabrid, sandy or loamy soils, grassland, see *Missione Biologica nel Paese dei Borana, 4. Raccolte Botaniche* 282. 1939, *Webbia* 8: 101. 1951.

E. cassa Lazarides

Australia, Queensland. Perennial, open sparse panicle, spikelet with 2 persistent sterile lemmas, fertile lemma strongly curved and orbicular, similar to *Eragrostis paniciformis*, see *Australian Systematic Botany* 10: 104. 1997.

E. cataclasta Nicora (Greek prefix *kato*, *kata* "below, downward, down from" and *klastos* "broken in pieces")

Argentina, South America. See *Flora Illustrada de Entre Ríos (Argentina)* 2: 189-190, f. 66. 1969.

E. cenolepis W.D. Clayton

Tropical Africa. Perennial, densely tufted, low grazing value, moist soils, see *Kew Bulletin* 20: 266, f. 4. 1966.

in Guinea: fonyi choli

E. chabouisii Bosser

Madagascar. See *Adansonia* sér. 2, 8(4): 513-522. 1968.

E. chalarantha Gilli

Africa. See *Annalen des Naturhistorischen Museums in Wien* 69: 46. 1966.

E. chalarothyrsos C.E. Hubb. (from the Greek *chalaros*, *chalaron* "loose, slack" and *thyrsos* "a panicle")

East Africa, Ghana, Sierra Leone. Perennial, erect, densely tufted, robust, shortly rhizomatous, narrow leaf blades convolute and filiform, inflorescence diffuse, ovate panicle loose and open, spikelets ovate, 9- to 34-flowered, florets not imbricate at the base, glumes subequal, lemmas narrowly ovate and acute, palea keels scabrid or ciliolate, swampy places, seasonally inundated fields, bushland, grassland, similar to *Eragrostis paniciformis*, see *Kew Bulletin* 1936(5): 310. 1936.

E. chapelierii (Kunth) Nees (*Poa chapelierii* Kunth)

Tropical Africa, South Africa, Sudan, Madagascar, Mozambique, Uganda, Tanzania. Perennial, densely tufted, erect, basal sheaths usually glabrous, dense and narrow inflorescence, spikelets reddish brown, lemma acute-acuminate, 2 anthers, rare in South Africa, weed, common in cultivated lands, see *Révision des Graminées* 2: 543, t. 186. 1832, *Flora Africae Australioris Illustrationes Monographicae* 392. 1841.

in southern Africa: bruinsaadgras

E. chiquitaniensis T. Killeen (San José de Chiquitos, Chiquitos, Bolivia)

South America, Bolivia, Paraguay. Annual, caespitose, endangered, pubescent, erect, branched, foliage hirsute, ligules ciliate, leaf blades linear and acuminate, inflorescence oblong with rigid branches, open panicle, spikelets narrowly oblong to pyramidal, 4- to 12-flowered, glumes subequal, imbricate lemmas ovate and acute, palea ciliate on the keels, savannah, open habitats, deciduous savannah, alluvial soil, closely related to *Eragrostis articulata*, see *Annals of the Missouri Botanical Garden* 77(1): 153-154, f. 3. 1990.

E. chloromelas Steud. (*Eragrostis atrovirens* (Desf.) Trin. ex Steud.; *Eragrostis curvula* (Schr.) Nees; *Poa atrovirens* Desf.) (Greek *chloros* "green" and *melas* "black")

South Africa. Perennial bunchgrass, tufted, culms erect and not branched, densely clumping, dense basal tufts of filiform and curling leaves, ligule a ring of hairs, basal sheaths glabrous, inflorescence open and lax, much-branched open panicle, purplish branches filiform and flexible, lower branches usually solitary, spikelets narrowly obovate and dark olive to gray-green, seed in the form of naked

caryopses, seed-heads are distinctly diamond shaped, spreads well by seed, easily killed by frost, palatability rather low, can withstand heavy grazing, used for making ropes, soil binder, adapted to semidesert conditions and very drought resistant, in time of scarcity and famine the seeds are used for making bread, a valuable grass in semidesert tropical grassland areas, hillslopes, disturbed areas or undisturbed stony slopes, overgrazed or trampled veld, disturbed veld, along roadsides, on sandy to loamy soils, rocky ridges, low lying areas, very similar to *Eragrostis curvula* (Schr.) Nees, see *Flora Atlantica* 1: 73, t. 14. 1798, *Göttingische gelehrte Anzeigen (unter der Aufsicht der Königl. Gesellschaft der Wissenschaften)* 3: 2073. 1821, *Nomenclator Botanicus. Editio secunda* 1: 562. 1840, *Flora Africae Australioris Illustrationes Monographicae* 397. 1841, *Synopsis Plantarum Glumacearum* 1: 271. 1854.

in English: blue love grass, boer love grass, curly leaf

in southern Africa: blouvleigras, krulblaar, krulblaargras, fyngras, fynvleigras, grootblouaadgras, growwvleigras, vleigras (Afrikaans); moseeka, moseka, tsane (Sotho)

Barton)

Mediterranean region, Africa, China, India. Annual bunchgrass, shallow-tufted, several culms from the base, highly variable, slender or stout, glandular below the nodes, terete or compressed, simple or branched, erect or ascending or geniculate and branched at the lower nodes, often prostrate at the base then erect, sprawling to decumbent and prostrate, weak root system, basal sheaths glabrous, ligule softly ciliate, crateriform glands mostly on leaf blades, erect and glandular panicles with ascending branches, 10- to 40-flowered, spikelets narrowly oblong and compressed breaking up from the bottom upward, glumes and lemmas keeled, glumes cartilaginous and boat-shaped, cartilaginous to papery lemmas ovate and subacute, palea keels entire or ciliate and scabrid, stamens 3, grains almost spherical, free-seeding, grains eaten by baboons, grows quickly, widely naturalized elsewhere, makes fair hay when mixed with other species, not very palatable or unpalatable to stock, species of no grazing value, eaten by cattle when young, often aromatic and stinking, unpleasant odour when fresh, native pasture species, when ingested fresh or dry reported to cause sickness in horses, in Lesotho the grains are used in time of famine for human food, pioneer species, suitable for reseeding denuded pastoral land in arid areas, straw for matting and thatching, a common weed in irrigation areas, agricultural fallows, vegetable garden, coastal plains, along washes in desert scrub and desert grassland, on arable land, in heavy bottomland soils, on rocky slopes, on bare ground, cultivation and disturbed ground, roadsides, mixed shrubland, railroads, dry roadside gravel, sandy flats, in deep red sand, on denuded land in semiarid areas, on partially denuded grassland, wasteland, on poor soils, rocky overgrazed pasture, overgrazed dry pastures, see *Species Plantarum* 1: 68, 70. 1753, *Flora Aegyptiaco-Arabica* 21. 1775, *Flora Pedemontana* 2: 246, t. 91, f. 2. 1785, *Methodus Plantas Horti Botanici* ... 185. 1794, *Descriptio Graminum in Gallia et Germania* 181. 1802, *Flora Lusitanica* 1: 103. 1804, *Icones et Descriptiones Graminum Austriacorum* 4: 14, t. 24. 1809, *Essai d'une Nouvelle Agrostographie* 74, 167, 175. 1812, *Enumeratio Stirpium Transsylvanicae* 3: 238. 1816, *Descriptio uberior Graminum* 154. 1817, *Systema*

South Australia, Queensland, Northern Territory. Annual, erect or ascending, leafy near the base, leaves flat and smooth, panicle spike-like, dense clusters of shortly pedicellate spikelets linear or narrowly oblong, glumes ovate

and more or less acute, lemmas ovate-oblong and obtuse, species of no grazing value, see *Transactions and Proceedings of the Royal Society of South Australia* 48: 253. 1924, *Transactions and Proceedings of the Royal Society of South Australia* 55: 136, f. 2. 1931.

in English: spike love grass

E. congesta Oliv.

Malawi, Zaire, South Africa, Uganda, Tanzania. Perennial, tufted, reddish, erect to geniculate, ligules dark, clusters of spikelets, common in moist areas, disturbed places, along roadsides, boggy grounds, see *Transactions of the Linnean Society of London* 29: 175. 1875 and *Repertorium Specierum Novarum Regni Vegetabilis, Beihefte* 40: (Anhang 101), t. 59, f. 2-3. 1930; 324. 1931.

in Tanzania: mahwa kinyaturu

E. contrerasii R.W. Pohl (*Neeragrostis contrerasii* (R.W. Pohl) P.M. Peterson)

Guatemala. See *Transactions of the Academy of Science of St. Louis* 13(7): 178. 1903, *Iowa State Journal of Research* 51(3): 323, f. 1. 1977, *Smithsonian Contributions to Botany* 87: 35. 1997.

E. crassinervis Hack.

Namibia. Perennial, stoloniferous, tufted, narrow inflorescence more or less unbranched, greenish purplish spikelets appressed to the axis, common in moist places, vleis, river beds, on brackish soils, see *Bulletin de l'Herbier Boissier, sér. 2*, 1: 774. 1901.

E. crateriformis Lazarides

Australia. Annual, tufted, culms with crateriform glands, panicles contracted, linear pedicellate spikelets, vestigial terminal floret, glumes dissimilar, palea 3-lobed, similar to *Eragrostis pilosa*, see *Australian Systematic Botany* 10(1): 108. 1997.

E. cubensis Hitchc.

The Caribbean, Cuba. See *Contributions from the United States National Herbarium* 12(6): 243. 1909, *Manual of the Grasses of the West Indies* 1-439. 1936, *Fontqueria* 46: [i-ii], 1-259. 1997.

London), British traveler and plant collector (in South America and Philippines), Fellow of the Linnean Society 1832, shell collector; see A. Lasègue, *Musée botanique de Benjamin Delessert*. Paris 1845; Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 183-184. London

1994; Gordon Douglas Rowley, *A History of Succulent Plants*. 1997)

Asia, Indonesia, Australia. Annual, variable, polymorphic, erect or ascending, sprawling, inflorescences terminal and axillary, terminal panicles open or spiciform, often cleistogamous, gibbous lemma, grain strongly compressed, noxious weed, along roadsides, seasonally wet sites, arid regions, white sand, sandy soil, on coastal sand dunes, see *Fragmentos de algunas plantas de Filipinas* 32. 1851, *Synopsis Plantarum Glumacearum* 1: 266. 1854 and *Bulletin, Division of Agrostology United States Department of Agriculture* 7: (edition 3)250, f. 244. 1900, *Philippine Bur. Govt. Lab. Bull.* 35: 81. 1906, *Philippine Journal of Science* 3(3): 168. 1908, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 10(91): 112. 1927, *Reinwardtia* 2(2): 271-272. 1953, *Journal of the Royal Society of Western Australia* 44(3): 77-83. 1961, *Rhodora* 80: 390-403. 1978.

in English: Cuming's love grass, lovegrass

in India: bharru

E. curtipedicellata Buckley (*Eragrostis brevipedicellata* A. Gray; *Eragrostis viscosa* Scribn., nom. illeg., non *Eragrostis viscosa* (Retz.) Trin.)

U.S., Texas, Mexico. Perennial, sticky, frequently found on limestone or granite prairies, see *Proceedings of the Academy of Natural Sciences of Philadelphia* 14: 97, 336. 1862, *Bulletin, Division of Agrostology United States Department of Agriculture* 11: 51, t. 7. 1898.

in English: gummy love grass, shortstalked lovegrass

E. curvula (Schrader) Nees (*Eragrostis chloromelas* Steud.; *Eragrostis curvula* var. *atrata* (Schweinf.) Cufod.; *Eragrostis curvula* var. *conferta* Nees; *Eragrostis curvula* var. *valida* Stapf; *Eragrostis jeffreysii* Hack.; *Eragrostis robusta* Stent; *Eragrostis subulata* Nees; *Eragrostis thunbergiana* Steud. var. *atrata* Schweinf.; *Poa curvula* Schrad.)

Africa, southern Africa. Perennial bunchgrass, apomictic, very variable, vigorous and long-lived, more or less thickened at base, flimsy to stout, stiff, slender or robust, simple or branched, densely clumped or strongly tufted, erect or ascending, sometimes bent at the lower nodes, extensive root system, roots fibrous, ligule a ring of short hairs, leaf sheaths pubescent and ribbed, leaf blade flat or rolled, dense or open panicle erect or pendent, spikelets short-stipitate and narrow-oblong to oblong to linear breaking up from the bottom upward, unequal glumes acute and glabrous, lemmas lanceolate-oblong with apex obtuse, palea persistent, stamens 3, minute seeds creamy to dark orange, edible grains as famine food, reproducing by seed, ornamental, a good forage producer, cultivated fodder, good hay, serious weed species naturalized elsewhere, a valuable native pasture species, good palatability or palatability low except when young, the young succulent growth generally palatable and nutritious to stock, quite drought-tolerant, tolerates fire, good cold tolerance, very tolerant of salinity, very

similar to *Eragrostis chloromelas* Steud., groundcover, valuable in erosion control and soil binder, to stabilize soil in tea estates, adapted to many habitats, common in disturbed land, moist sandy soils, stony flats, acid to loamy soils, dry areas, dry rocky soils, waste areas, on roadsides and water courses, on well-drained sandy soils, uncultivated lands, in high rainfall areas, along edge of road, stony mountains, see *Göttingische gelehrte Anzeigen unter der Aufsicht der Königl.* 3: 2073. 1821, *Nomenclator Botanicus. Editio secunda* 2(1): 564. 1840, *Florae Africae Australioris Illustrationes Monographicae* 397. 1841, *Synopsis Plantarum Glumacearum* 1: 271. 1854, *Bulletin de l'Herbier Boissier, sér. 2, App. 2*: 101. 1894, *Revisio Generum Plantarum* 3(1): 351. 1898, *Catalogue of the African Plants Collected by Dr. F. Tropical Africa. Annual or weak perennial, bunchgrass, tufted to loosely tufted, open, erect or geniculate, rooting at lower nodes, dark to brown nodes, leaf blades expanded or rolled, leaf sheaths glandular, ligule a fringe of short hairs, foliage sparse, inflorescence an open panicle, lowest branches of the inflorescences whorled, cylindrical spikelets, lowest lemma papery to membrane-like, pioneer grass of little agricultural value, good grazing for all stock, grains and leaves eaten by baboons, a weed of irrigation, in disturbed ground and along roadside, grassland, rocky soil, abandoned field, overgrazed fields, sandy soils, red sandy soil, river beds, depressions, see *Flora* 38: 324. 1855, *Bulletin de l'Herbier Boissier* 2(App. 2): 40. 1894 and *Annuario del Reale Istituto Botanico di Roma* 8(1): 63-64. 1903, *Bollettino r. Orto Botanico e Giardino Coloniale di Palermo* 7: 29-36. 1909, *Webbia* 8: 104. 1951.

in English: cylinderflower lovegrass

in South Africa: blousaadgras, naakte windhalmgras, kahler windhalm

E. deflexa A.S. Hitchc.

Hawaii. Endangered or extinct species, open areas, open woods, see *Memoirs of the Bernice Pauahi Bishop Museum* 8(3): 131, f. 18. 1922.

in English: Pacific lovegrass, bent lovegrass

E. desertorum Domin

Queensland, Northern Territory, New South Wales. Perennial with arching stolons, rhizomatous, erect, wiry, base swollen and thickened by woolly cataphylls, rooted tufts, leaf blade rolled, inflorescence open, florets 6-46, glumes and lemmas acute and keeled, palea 2-keeled, 2 stamens, grows in sandy areas of the inland, similar to *Eragrostis eriopoda*, see *Biblioth. Bot.* 20(85): 404. 1915.

in English: woollybutt

E. desolata Launert

Zimbabwe. Rare species, see *Boletim da Sociedade Broteriana, ser. 2* 35: 18. 1961.

in English: western love grass, spreading lovegrass, lovegrass, diffuse love grass

E. dinteri Stapf (*Bulletin of Miscellaneous Information Kew* 1906: 29. 1906)

Africa, Angola. Annual, aromatic, tufted, erect, upright or geniculate and rooting at lower nodes, basal leaf sheaths more or less glabrous, lemma acuminate, palea keels entire, common in red sandy soils, deep sandy soils, disturbed areas, see *Bulletin of Miscellaneous Information Kew* 1906: 29. 1906.

E. ecarinata Lazarides

Australia, Northern Territory. Perennial, erect, compact, tufted, tussocky, ligule a fringe of hairs, leaf sheaths overlapping, inflated florets, paleas with auricle-like flaps on the keels, similar to *Eragrostis paniciformis*, see *Australian Systematic Botany* 10(1): 114. 1997.

E. echinochloidea Stapf

Zimbabwe, Namibia, Botswana, South Africa. Perennial, tufted, unbranched, upright or geniculate, leaf margin with sunken glands, leaf sheaths keeled and papery, ligule a fringe of short hairs, leaf blade expanded or rolled, inflorescence a panicle sparsely branched, densely packed spikelets on solitary branches, spikelets shortly pedicellate and compressed, lower glume acuminate, palea acute, palea keels broad and notched, pioneer grass, fairly palatable pasture, medium palatability while still green, low grazing value, spikelets eaten by humans and baboons, drought resistant, an indicator of disturbed veld, found on rocky slopes, sandy soils, disturbed soils, disturbed sandy places, shallow moist soils, disturbed areas, roadsides, along washes, around pans, cultivated and uncultivated lands, disturbed veld, see *Flora Capensis* 7: 627. 1900.

in English: thick grass, tick grass, African love grass

in South Africa: bosluisgras, krummelgras, hirse straußgras

E. ekmanii A.S. Hitchc. (*Eragrostis diandra* (R. Br.) Steud.; *Eragrostis elongata* (Willd.) J. Jacq.; *Eragrostis stenoclada* J. Presl; *Poa elongata* Willd.; *Poa stenoclada* (J. Presl) Kunth) (for the Swedish botanist Erik Leonard Ekman, 1883-1931)

Cuba. Endangered species, common in sandy pinelands, see *Enumeratio Plantarum Horti Botanici Berolinensis, ...* 1: 108. 1809, *Prodromus Florae Novae Hollandiae* 180. 1810,

Eclogae Graminum Rariorum 3. 1813, *Reliquiae Haenkeanae* 1(4-5): 278. 1830, *Révision des Graminées* 1: Suppl. XXVIII. 1830, *Synopsis Plantarum Glumacearum* 1: 279. 1854 and *Manual of the Grasses of the West Indies* 43, f. 22. 1936.

E. elatior Stapf (*Eragrostis bahiensis* Schrad. ex Schult.; *Eragrostis bahiensis* var. *bahiensis*; *Eragrostis elatior* Hack., nom. illeg., non *Eragrostis elatior* Stapf; *Eragrostis pilosa* var. *bahiensis* (Schrad. ex Schult.) Kuntze)

South Africa. Perennial, tufted, rhizomatous, slender inflorescence usually unbranched, spikelets solitary and distant, upper glume lanceolate, common in riverbanks, rocky places along rivers, periodically inundated areas, see *Essai d'une Nouvelle Agrostographie* 71, 162, 175. 1812, *Mantissa* 2: 318. 1824, *Revisio Generum Plantarum* 3(2,2): 353. 1898 and *Flora Capensis* 7: 617-618. 1900, *Repertorium Specierum Novarum Regni Vegetabilis* 7: 374. 1909.

E. elegantissima Chiov.

Sahel, Sudan, Chad, Upper Volta, Niger. Annual, slender, wiry, leaf blades narrowly linear finely acute, panicle open and elliptic, spikelets linear, 10- to 45-flowered, glumes subequal, palea keels scabrid, lemmas narrowly lanceolate-oblong, resembling *Eragrostis tremula*, see *Annuario del Reale Istituto Botanico di Roma* 8: 367. 1908.

E. elliotii S. Watson (*Eragrostis acuta* A.S. Hitchc.; *Eragrostis campestris* Trin.; *Eragrostis macropoda* Pilg.; *Eragrostis nitida* (Elliott) Chapm., nom. illeg., non *Eragrostis nitida* Link; *Poa nitida* Elliott, nom. illeg., non *Poa nitida* Lam.)

U.S., Texas, the Caribbean. Perennial bunchgrass or annual, caespitose, erect, simple, glabrous, leaves mostly basal, narrow powder-blue foliage, inflorescence paniculate, found in dry sandy soil, open areas, open grassland, savannah, hummocks, along roadsides, see *A Sketch of the Botany of South-Carolina and Georgia* 1: 162. 1816, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 4,2(1): 72. 1836, *Flora of the Southern United States* 564. 1860, *Proceedings of the American Academy of Arts and Sciences* 25: 140. 1890 and *Symbolae Antillarum* 4: 106. 1903, *Proceedings of the Biological Society of Washington* 41: 159. 1928.

in English: Elliott lovegrass, blue love grass

E. elongata (Willd.) J.F. Jacq. (*Eragrostis cambessediana* (Kunth) Steud.; *Eragrostis diandra* (R. Br.) Steudel; *Eragrostis ekmanii* Hitchc.; *Eragrostis stenoclada* J. Presl; *Poa cambessediana* Kunth; *Poa diandra* R. Br.; *Poa elongata* Willd.) (for the French botanist Jacques Cambessèdes, 1799-1863, agronomist, plant collector, traveler, among his works are *Mémoire sur la famille des Sapindacées*. Paris 1829 and *Enumeratio plantarum quas in insulis Balearibus collegit J.C.* Paris 1827. See J.H. Barnhart, *Biographical notes upon botanists*. 1: 301. 1965; M. Colmeiro y Penido,

La Botánica y los Botánicos de la Península Hispano-Lusitana. 1858; Victor Jacquemont (1801-1832), *Voyage dans l'Inde par Victor Jacquemont, pendant les années 1828 à 1832*. Paris 1845; Ethelyn Maria Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933)

Australia. Perennial or annual, smooth, caespitose, erect and slender tussocks, simple, glabrous, leafy and compact near the base, sometimes branched at the lower nodes, bright green glabrous leaves, leaf blades flat or rolled, culms erect and simple or branched, narrow and contracted panicle usually spike-like or open, sessile or subsessile clusters of green to purplish and flattened spikelets, glumes acuminate, lemmas cartilaginous and shortly acuminate to acute, palea 2-keeled and glabrous, 2-3 stamens, often on inundated sandy soils, see *Enumeratio Plantarum Horti Botanici Berolinensis*, ... 1: 108. 1809, *Prodromus Florae Novae Hollandiae* 180. 1810, *Eclogae Graminum Rariorum* 3. 1813, *Reliquiae Haenkeanae* 1(4-5): 278. 1830, *Révision des Graminées* 1: Suppl. XXVIII. 1830, *Révision des Graminées* 2: 469, t. 148. 1831, *Synopsis Plantarum Glumacearum* 1: 279. 1854 and *Flora Capensis* 85: 400. 1915, *Manual of the Grasses of the West Indies* 43, f. 22. 1936.

in English: clustered love grass, common love grass, long love grass, close-headed love grass

in India: bara bhurbhuri, bharru

Malayan name: rumput kutu kerbau

E. eriopoda Benth. (Greek *erion* "wool" and *pous* "foot")
Western Australia, Queensland, Northern Territory, South Australia, New South Wales. Perennial and usually simple, wiry and erect, dense and spreading clumps, hirsute or woolly at the base of clumps, base swollen and thickened by woolly cataphylls, rhizomatous or with deep root system, knotty and woolly rhizomes, rolled leaves, sheaths ciliate on both margins, inflorescence open and much branched, spikelets more or less straight or curved and not woolly, florets 8-24, glumes and lemmas keeled and with margins translucent, heavy-seeding, a cover plant, very hardy and decorative species, extremely resistant to drought and grazing, survive severe droughts, regrows rapidly after burning, valuable fodder, eaten by domestic stock and kangaroos when green, new growth palatable or moderately palatable, becomes very fibrous when dry, grows in red sandy areas, coastal plains, open habitats, hind dunes, on shallow sandy soils, on river floodplains, red earths, semiarid and arid regions, on limestone slopes, see *Flora Australiensis: A Description* ... 7: 648. 1878.

in English: naked woollybutt grass, woollybutt, woollybutt grass, neverfail

E. erosa Scribn. ex Beal

U.S., Texas, Mexico. See *Grasses of North America for Farmers and Students* 2: 483. 1896.

in English: Chihuahuan love grass

E. exasperata Peter

East Africa. Delicate open panicle, ovate spikelets, palea keels ciliolate, frequent in gravel along road, closely related to *Eragrostis paniciformis*, see *Repertorium Specierum Novarum Regni Vegetabilis, Beihefte* 108. 1930.

E. excelsa Griseb. (*Eragrostis glumacea* E. Fourn.; *Eragrostis prolifera* (Sw.) Steud.; *Poa prolifera* Sw.)

Mexico, the Caribbean. Perennial bunchgrass, large, forming large clumps, in moist areas, sandy places, roadsides, marsh, see *Nova Genera et Species Plantarum seu Prodromus* 27. 1788, *Synopsis Plantarum Glumacearum* 1: 278. 1854, *Catalogus plantarum cubensium* ... 227. 1866, *Mexicanas Plantas* 2: 117. 1886.

E. exigua Lazarides

Australia. Annual, tufted, slender, ascending, branched, ligule membranous, panicles decompound loosely contracted, spikelets 3- to 7-flowered, vestigial terminal floret, glumes persistent, palea 3-lobed, alluvial soils, seasonally flooded areas, similar to *Eragrostis tenellula*, see *Australian Systematic Botany* 10(1): 118. 1997.

E. falcata (Gaudich.) Gaudich. ex Steudel (*Eragrostis trichophylla* Benth.; *Poa falcata* Gaudich.)

South Australia, New South Wales, Western Australia, Northern Territory, Queensland. Perennial, tufted, rhizomatous, sometimes stoloniferous, wiry, erect or ascending, simple or branched, thickened at the base, leaves filiform, inflorescence open, spikelets purple and sometimes curved, florets 8-40, subequal glumes cartilaginous and obtuse to acute, lemmas cartilaginous and keeled, grain ovoid, salt-tolerant fodder plant, grows in sandy areas, palatable, see *Voyage autour du Monde, entrepris par Ordre du Roi, ... exécuté sur les Corvettes de S. M. l'Uranie et la Physicienne* ... *Botanique* 408, t. 25. 1830, *Nomenclator Botanicus. Editio secunda* 1: 563. 1840, *Flora Australiensis: A Description* ... 7: 644. 1878 and *Anales del Museo Nacional de Buenos Aires* 21: 138. 1911.

in English: sickle love grass

E. fallax Lazarides

Western Australia, Northern Territory, Queensland. Perennial, tufted, compact, robust, tussocky, lower sheaths overlapping, panicles terminal and axillary, chasmogamous and cleistogamous spikelets, unequal glumes, alluvial soils, seasonally flooded areas, similar to *Eragrostis concinna*, see *Australian Systematic Botany* 10(1): 120. 1997.

E. fastigiata Cope

Africa. Perennial, tufted, branched, leaves rolled and wiry, amongst rocks, open habitats, hillsides.

E. fenshamii B.K. Simon (for R.J. Fensham, Queensland agrostologist and ecologist)

Australia. Perennial, tufted, densely rhizomatous, open panicles, spikelets long-pedicellate, florets loosely overlapping, unequal glumes persistent, 3 stamens, similar to *Eragrostis spartinooides* and *Eragrostis rigidiuscula*, see *Fl. Australia* 43: 333. 2002, *Fl. Australia* 44B: 377, 460. 2005.

E. ferruginea (Thunb.) P. Beauv. (*Poa ferruginea* Thunb.)

China, Japan, Nepal, India, Korea. Useful for erosion control, see *Systema Vegetabilium. Editio decima quarta* 14: 114. 1784, *Essai d'une Nouvelle Agrostographie* 71, 162, 174. 1812 and *Symbolae Sinicae* 7(5): 1282. 1936, *Botanical Magazine* (Tokyo) 51: 95. 1937, *Claves Generum et Specierum Graminearum Primarum Sinicarum Appendice Nomenclatione Systematica* 178. 1957, *Acta Botanica Yunnanica* 16(1): 24. 1994.

in Japan: kaze-kusa

E. ferruginea (Thunb.) P. Beauv. var. ***fujianensis*** N.X. Zhao & X.T. Ma

Asia, China. See *Essai d'une Nouvelle Agrostographie* 71, 162, 174. 1812 and *Acta Botanica Yunnanica* 16(1): 24. 1994.

E. filicaulis Lazarides

Western Australia, Northern Territory, Queensland. Perennial, filiform, tufted, compact, slender, leafy, hairy leaf blades, panicles spiciform or contracted, 2 minute anthers, in seasonally wet areas, sandy ridges, see *Australian Systematic Botany* 10(1): 121. 1997.

E. fosbergii Whitney

Hawaii. Perennial, endangered or rare species, found in dry forest, see *Occasional Papers of the Bernice Pauahi Bishop Museum* 13(8): 75, f. 1. 1937.

in English: Fosberg's lovegrass

E. fractus S.C. Sun & H.Q. Wang

China. See *Acta Phytotaxonomica Sinica* 19(4): 513-514, f. 1, 3. 1981.

E. frankii C.A. Meyer ex Steud. (*Eragrostis capillaris* (L.) Nees; *Eragrostis capillaris* var. *frankii* (C.A. Mey. ex Steud.) Farw.; *Eragrostis erythrogona* Nees ex Steud.; *Eragrostis frankii* var. *brevipes* Fassett; *Eragrostis frankii* var. *frankii*; *Poa micrantha* Schult.; *Poa parviflora* Nutt., nom. illeg., non *Poa parviflora* R. Br.)

U.S. Annual, somewhat decumbent, common along roadsides, on sandy soil, sandy riverbanks, in waste ground, mudflats of streams, see *The Genera of North American Plants* 1: 67. 1818, *Mantissa* 2: 305. 1824, *Flora Brasiliensis seu Enumeratio Plantarum* 2: 505. 1829, *Synopsis Plantarum Glumacearum* 1: 273. 1854 and *Report of the*

Michigan Academy of Science, Arts and Letters 17: 182. 1916, *Rhodora* 34(401): 95. 1932.

in English: sandbar lovegrass, love grass

E. galpinii Stent (after Ernest Edward Galpin, 1858-1941, banker and plant collector, author of "A contribution to the knowledge of the flora of Drakensberg." *S. Afr. J. Sci.* 6: 209-229. 1909 and *Botanical Survey of the Springbok Flats, Transvaal*. Cape Town [1927] [Botanical Survey of South Africa. Memoir. no. 12], he left more or less 16,000 sheets to the National Herbarium in Pretoria; see J. Lanjouw and F.A. Stafleu, *Index Herbariorum*. Part II (2), *Collectores E-H. Regnum Vegetabile* vol. 9. 1957; Gilbert Westacott Reynolds, *The Aloes of South Africa*. Balkema, Rotterdam 1982)

South Africa, Transvaal. See *Bothalia* 1: 176, t. 4. 1922.

E. gangetica (Roxb.) Steud. (*Eragrostis cambessediana* (Kunth) Steud.; *Eragrostis elegantula* (Kunth) Nees ex Steud., nom. illeg., non *Eragrostis elegantula* Nees; *Eragrostis elegantula* Nees; *Eragrostis flamignii* De Wild.; *Eragrostis luzoniensis* Steud.; *Eragrostis ovina* Hochst. ex A. Rich.; *Eragrostis stenoclada* J. Presl; *Eragrostis stenophylla* Hochst. ex Miq.; *Eragrostis willdenowii* Nees ex Steud.; *Poa cambessediana* Kunth; *Poa elegantula* Kunth; *Poa gangetica* Roxb.; *Poa ovina* A. Rich.)

Tropical Africa, Southeast Asia, India. Annual or short-lived perennial, variable, spreading, tufted to loosely tufted, erect or geniculate, simple or branched, glabrous, wiry, stout, coarse, knotty base, leaf blades finely pointed, ligule a shallow rim or a ciliolate membrane, leaf sheaths smooth and rather loose, very narrow leaves glabrous and mostly basal, grayish inflorescence, open linear-oblong panicles finally nodding, spikelets flat, long and slender pedicels, glumes subequal or unequal, lemmas flattened, a good fodder grass, pasture grass, heavily grazed when young, can be made into hay, a weed of cultivation, used for brooms, found in mountains, depressions, open habitats, grassland and savannah, low lying ground, heavy ground, open areas near marshes, vleis, temporary vleis, waste places, see *Enumeratio Plantarum Horti Botanici Berolinensis*, ... 1: 108. 1809, *Prodromus Florae Novae Hollandiae* 180. 1810, *Eclogae Graminum Rariorum* 3. 1813, *Flora Indica; or Descriptions* ... 1: 341. 1820, *Reliquiae Haenkeanae* 1(4-5): 278. 1830, *Révision des Graminées* 1: Suppl. XXVIII. 1830, *Révision des Graminées* 2: 469, t. 148. 1831, *Nomenclator Botanicus. Lenley et al., *Catalog of the manuscript and archival collections and index to the correspondence of John Torrey*. Library of the New York Botanical Garden. 262. 1973)

Virgin Islands, Cuba, Jamaica, Mexico. Vulnerable species, growing in thickets, along roadsides, see *Nova Genera et Species Plantarum seu Prodrromus* 26. 1788, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 1(4): 397. 1830, *Catalogus plantarum cubensium ...* 227. 1866 and *Contributions from the United States National Herbarium* 18(7): 388. 1917.

in English: sticky love grass

E. grandiflora J.G. Sm. & Bush

U.S. See *Transactions of the American Philosophical Society, new series*, 5: 146. 1835, *Linnaea* 22(3): 344. 1849, *A Class-book of Botany* 796. 1861, *Annual Report of the Missouri Botanical Garden* 6: 117, t. 55. 1895 and *Rhodora* 40(477): 331. 1938.

E. grandis Hillebrand (*Eragrostis grandis* var. *oligantha* Hillebrand; *Eragrostis grandis* var. *polyantha* Hillebrand)

Hawaii. See *Flora of the Hawaiian Islands* 528. 1888.

in English: large Hawaii lovegrass

in Hawaii: kawelu

E. guangxiensis S.C. Sun & H.Q. Wang

China. See *Acta Phytotaxonomica Sinica* 19(4): 514, f. 1, 4. 1981.

E. guatemalensis Witherspoon

Guatemala, South America. Perennial, caespitose, erect, simple, glabrous, leaves mostly basal, ligule a shallow rim, see *Annals of the Missouri Botanical Garden* 64: 324. 1977 [1978], *Flora Mesoamericana* 6: 263-272. 1994.

E. guianensis Hitchc.

Venezuela, South America. Annual, tufted, leaves mostly delicate, ligules ciliolate, leaf blades inrolled, inflorescence ovate, few-branched open panicle, spikelets linear to oblong, 19- to 55-flowered, florets strongly overlapping, glumes lanceolate, lemmas acute to obtuse, palea keels scaberulous, 2 stamens, sandy savannahs, sand, open grassland, see *Contributions from the United States National Herbarium* 22(6): 454, f. 78. 1922.

E. gummiflua Nees

South Africa, Botswana, Namibia, Mozambique. Perennial bunchgrass, tufted or densely tufted, wiry, sticky at the nodes, leaf sheaths shiny and sticky, ligule a membrane with hairy margin, hard and slightly contracted panicle, glabrous spikelets, rachilla fragile, hard and unpalatable, used for broom-making and some kind of an ointment used to promote fertility of the bulls, growing in shallow sandy soil, rocky soil, disturbed areas, along roadsides, open grassland, open habitats, open patches in bushveld, see *Florae Africae Australioris Illustrationes Monographicae* 393. 1841.

in English: gum grass, sticky-stem love grass

in southern Africa: gomgras, kleeftgras, kleeftalm eragrostis, koperdraadgras, taaigras; khita-poho, thita-poho, kgitapoho, likonono, dikonono, dikonokono, lefielo (Sotho)

E. habrantha Rendle (Greek *habros* "delicate, graceful, beautiful, pretty" and *anthos* "flower")

Tropical Africa, Angola, Mozambique. Perennial, tufted, erect, linear inflorescence much-branched, spikelets ovate, lowest floret persistent, in thicket-grown fields, sandy soils, vleis, along rivers, open habitats, open damp areas, see *Catalogue of the African Plants Collected by Dr. F. Welwitsch in 1853-61* 2(1): 246. 1899.

E. hackelii Hassl. (*Eragrostis bahiensis* var. *bahiensis*; *Eragrostis elatior* Stapf; *Eragrostis elatior* Hack., nom. illeg., non *Eragrostis elatior* Stapf)

Tropical Africa, South America, Paraguay. See *Mantissa* 2: 318. 1824 and *Flora Capensis* 7: 617-618. 1900, *Repertorium Specierum Novarum Regni Vegetabilis* 7: 374. 1909, *Repertorium Specierum Novarum Regni Vegetabilis* 8: 47. 1910.

E. henrardii Jansen (after the Dutch pharmacist Jan Theodor Henrard, 1881-1974, agrostologist, 1921-1946 Curator of the Rijksherbarium at Leiden, among his writings are *A Monograph of the Genus Aristida*. Leyden 1929-1932 and *Monograph of the Genus Digitalia*. Leiden 1950. See J.H. Barnhart, *Biographical notes upon botanists*. 2: 158. 1965; Elmer Drew Merrill (1876-1956), "A botanical bibliography

of the islands of the Pacific." *Contr. U.S. Natl. Herb.* 30(1): 148. 1947; August Adriaan Pulle (1878-1955), editor, *Flora of Suriname* (Netherlands Guyana). [Gramineae, by J.T. Henrard and Gerda Jane Hillegonda Amshoff, 1913-1985] 1948; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection.* 171. 1972; S. Lenley et al., *Catalog of the manuscript and archival collections and index to the correspondence of John Torrey.* Library of the New York Botanical Garden. 220. 1973)

Southwest Africa. See *Bulletin de la Société Botanique de France* 2: 311. 1855 and *Blumea, Supplement* 3: 42. 1946.

E. heteromera Stapf

Angola, Malawi, Mozambique, South Africa, Tanzania, Namibia, Ethiopia. Perennial bunchgrass, wiry, tufted, unbranched, slender, leaf sheath keeled, basal leaf sheaths glabrous or inconspicuously hairy, leaf blade with a delicate tip, open panicle with lax and flexible branches, spikelets purple to green appressed to the branchlets, pasture, reasonably palatable, useful for erosion control, growing in moist sites, in disturbed rocky soil, depressions, moist sandy soils, red clay or black clay soil, grassland, bushveld, disturbed areas, see *Flora Capensis* 7: 610. 1900.

in English: bronze lovegrass

in southern Africa: rooikopergras

E. hierniana Rendle (*Eragrostis uniglumis* Hack.) (named for the British botanist William Philip Hiern, 1839-1925 (Barnstaple, Devon), plant collector, 1873 Fellow of the Linnean Society, 1903 Fellow of the Royal Society, among his writings are *Catalogue of the African Plants Collected by Dr. Friedrich Welwitsch in 1853-1861.* London 1896-1901, *Index abecedarius.* An alphabetical index to the first edition of the *Species Plantarum* of Linnaeus. London 1904, "Further notes on Ebenaceae, with description of a new species." *J. Botany.* 13: 353-357. 1875 and "On the peculiarities and distribution of Rubiaceae in tropical Africa." *J. Linn. Soc. Bot.* 16: 248-280. 1877, with Francisco Manoel Carlos de Mello de Ficalho (1837-1903) wrote *Memoria sobre algumas plantas da Africa Central colligidas pelo Major Serpa Pinto.* Lisbon 1883. See J.H. Barnhart, *Biographical notes upon botanists.* 2: 172. 1965; H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford.* 183. Oxford 1964; G. Murray, *History of the collections contained in the Natural History Departments of the British Museum.* 190. London 1904; William Henry Harvey and Otto Wilhelm Sonder, *Flora Capensis.* 1904; Major Serpa Pinto, *How I Crossed Africa.* Hartford, Conn. 1881; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico.* Philadelphia 1964; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen.* 14. Aufl. Stuttgart 1993; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute*

portrait collection. 174. 1972; Ethelyn Maria Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University.* Cambridge, Mass. 1917-1933)

South Africa, Tanzania. Perennial, tufted, geniculate, lemma glabrous, palea keels hairy, in damp places, moist sandy soils, disturbed areas, along rivers, old cultivated lands, see *Catalogue of the African Plants Collected by Dr. F. Welwitsch in 1853-61* 2(1): 237. 1899 and *Proceedings of the Rhodesia Scientific Association* 7(2): 66. 1908.

E. hirsuta (Michx.) Nees (*Eragrostis hirsuta* var. *hirsuta*; *Eragrostis hirsuta* var. *laevivaginata* Fern.; *Eragrostis hypnoides* (Lam.) Britton, Sterns & Poggenb.; *Eragrostis sporoboloides* J.G. Sm. & Bush; *Erosion hypnoides* (Lam.) Lunell; *Megastachya hypnoides* (Lam.) P. Beauv.; *Neeragrostis hypnoides* (Lam.) Bush; *Poa hirsuta* Michx.; *Poa hypnoides* Lam.; *Poa reptans* Michx. var. *caespitosa* Torr.; *Poa simplex* Walter)

U.S. Perennial, common on sand washes, valley and creek alluvium, sandy roadsides and wastes, see *Flora Caroliniana, secundum ...* 70. 1788, *Tableau Encyclopédique et Méthodique ... Botanique* 1: 185. 1791, *Flora Boreali-Americana* 1: 68-70, t. 11. 1803, *Essai d'une Nouvelle Agrostographie* 74, 167, 175. 1812, *A Flora of the Northern and Middle Sections of the United States* 1: 115. 1823, *Flora Brasiliensis seu Enumeratio Plantarum* 2: 508. 1829, *Preliminary Catalogue of Anthophyta and Pteridophyta Reported as Growing Spontaneously within One Hundred Miles of New York* 69. 1888, *Annual Report of the Missouri Botanical Garden* 6: 116, t. 54. 1895 and *Transactions of the Academy of Science of St. Louis* 13: 180. 1903, *American Midland Naturalist* 4: 221. 1915, *Rhodora* 41(490): 500-501. 1939.

in English: big top lovegrass, stout love grass

E. hirta E. Fourn. (*Eragrostis intermedia* var. *praetermissa* (L.H. Harv.) Witherspoon; *Eragrostis praetermissa* L.H. Harv.)

Mexico, South America, Belize. Perennial, caespitose, erect, simple, glabrous, leaves mostly basal, ligule a shallow rim, open panicles, see *Mexicanas Plantas* 2: 115. 1886 and *Journal of the Washington Academy of Sciences* 21(17): 437. 1931, *Journal of the Washington Academy of Sciences* 23(10): 450. 1933, *Bulletin of the Torrey Botanical Club* 81(5): 408. 1954, *Annals of the Missouri Botanical Garden* 64: 327-328. 1977 [1978].

E. hirta E. Fourn. var. *hirta*

Mexico, South America.

E. hirta E. Fourn. var. *longiramea* (Swallen) Witherspoon (*Eragrostis longiramea* Swallen)

Mexico, South America. See *Journal of the Washington Academy of Sciences* 21(17): 437. 1931, *Annals of the Missouri Botanical Garden* 64: 328. 1977.

E. hirticaulis Lazarides

Australia, Northern Territory. Perennial, hirsute foliage, leaf sheaths overlapping, spiciform panicles, florets chasmogamous and cleistogamous, 3 stamens, in sandy soils, see *Australian Systematic Botany* 10(1): 122. 1997.

E. hispida K. Schumann

Tropical East Africa. Useful for erosion control, leaves revive after desiccation, in sandy open area, see *Die Pflanzenwelt Ost-Afrikas* C: 114. 1895.

E. hispida K. Schumann var. ***psilothyrsus*** Peter

Tropical East Africa. See *Die Pflanzenwelt Ost-Afrikas* C: 114. 1895 and *Repertorium Specierum Novarum Regni Vegetabilis, Beihefte* 40: Anhang 102. 1930; 326. 1931.

E. hochstetteri Steud. (the German botanist Christian Ferdinand Hochstetter, 1787-1860, clergyman, with E.G. Steudel founded the Esslinger Reiseverein, plant collector, 1838 voyage to Portugal and the Açores, his writings include "Plantarum nubucarum nova genera." in *Flora*. 24: 369-377. 1841 and *Nova genera plantarum Africae*. Regensburg 1842. See J.H. Barnhart, *Biographical notes upon botanists*. 2: 184. 1965; H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 184. Oxford 1964; Georg [Heinrich] Wilhelm Schimper (1804-1878), W. Schimper's *Reise nach Algier in ... 1831 und 1832 ...* Herausgegeben von [C.F. Hochstetter and E. Steudel], etc. Stuttgart 1834; Ethelyn Maria Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933; T.W. Asia, Mongolia. See *Essai d'une Nouvelle Agrostographie* 71, 162, 175. 1812, *Nouvelles archives du muséum d'histoire naturelle, sér. 2, 7*: 145. 1884.

E. inamoena K. Schum. (*Eragrostis atrovirens* (Desf.) Trin. ex Steud.; *Poa atrovirens* Desf.)

East Africa, South Africa. Perennial, tufted, rhizomatous, short or long rhizome, basal sheaths glabrous, inflorescence open to contracted, spikelets greenish, membranous palea obovate, usually in sandy soils, seasonally flooded areas, marshy places, see *Flora Atlantica* 1: 73, t. 14. 1798, *Nomenclator Botanicus. Editio secunda* 1: 562. 1840, *Die Pflanzenwelt Ost-Afrikas* C: 115. 1895.

E. incana Maury

South America, Venezuela. See *Journal de Botanique, rédigé par une société de botanistes* 3: 163, f. 6. 1889.

E. incrassata Cope

Africa, Somalia. Perennial, woody, spreading, mat-forming, much branched at the base, tufted, long stoloniferous and rhizomatous, with creeping woody rhizomes and stolons, leaves distichous, panicle oblong, glumes ovate and acute, lemmas membranous, palea keels scabrous, growing in damp places, near running water, see *Kew Bulletin* 47(2): 280. 1992.

in Somalia: ris

E. infecunda J.M. Black

South Australia, Victoria. Perennial, simple or branched, wiry, thickened or knotty at the base, ligule a fringe of hairs, rhizomes and stolons, leaves glabrous and smooth, stiff leaf blades flat or involute, panicle loose and contracted, spikelets more or less linear, loose florets, acuminate and lanceolate glumes more or less deciduous or persistent, lemmas persistent and lanceolate, 3 stamens, stipitate grain, alluvial soils, roadsides, seasonally flooded habitats, see *Transactions and Proceedings of the Royal Society of South Australia* 55: 137, pl. 6, f. 4. 1931.

E. insulatlantica A. Chev.

Capo Verde Islands. See *Revue internationale de botanique appliquée et d'agriculture tropicale* 15: 1042. 1935.

E. intermedia A.S. Hitchc. (*Eragrostis lugens* var. *major* Vasey ex L.H. Dewey)

U.S., Texas, Florida, Mexico. Perennial bunchgrass, spreading, coarse, tufted, erect, ascending, basal culm buds, light straw yellow, sheaths hairy at the throat, long and slender leaves, large open inflorescence, erect panicle, large and loose fruiting stalks, a good cattle forage species, palatable, growing in moist places, in canyons, on rocky slopes in desertscrub and desert grassland, rocky hillsides, open woods, rich soils, on sands and sandy loams, on dry or sandy prairies, dry slopes, disturbed sites, desert grasslands,

undisturbed grassland, semidesert grasslands, chaparral, see *Flora Brasiliensis seu Enumeratio Plantarum* 2: 505-506. 1829, *Contributions from the United States National Herbarium* 2(3): 542. 1894 and *Journal of the Washington Academy of Sciences* 23(10): 450. 1933, *Bulletin of the Torrey Botanical Club* 81(5): 407-408. 1954, *Annals of the Missouri Botanical Garden* 64: 325-327. 1977 [1978].

in English: plains love grass

in Mexico: pasto amor de las praderas, pasto amor de los llanos, zacate amor de planicie, zacate de amor, zacate llanero, zacate pradera, zacate volador

E. intermedia A.S. Hitchc. var. ***appressa*** Witherspoon

Mexico. See *Annals of the Missouri Botanical Garden* 64: 325. 1977 [1978].

Steud.)

Pantropical. Annual or short-lived perennial, variable, herbaceous, erect, sometimes geniculate below, clumped or loosely tufted, stems flimsy, mostly simple or with ascending

branches, branching from the lower and middle nodes, leaf sheaths overlapping, truncate ligule membranous and fimbriate or ciliolate or glabrous, leaves acuminate, inflorescence paniculate compact and interrupted, loose or dense panicles open and ovoid to ovoid-oblong, 4- to 12-flowered, short-stipitate spikelets linear disarticulating between the florets, spikelets breaking up from the apex downward, loosely imbricate florets, minute glumes subequal ovate to ovate-lanceolate, small lemmas lanceolate-oblong to ovate, keels of paleas minutely hispid or smooth, 2 stamens, ornamental, grazed by all stock and game, infusion of the fresh leaves used externally as a poultice for headaches, delicate spikelets, weed species widely naturalized in tropics, grazed or eaten by the cattle, common near water, sandy soils, in sand at riverbank, cultivated fields, marshy swales, open wet grasslands, damp soil beside rivers and streams, drainage ditches, see *Flora Japonica*, ... 51. 1784, *Flora Caroliniana, secundum* ... 80. 1788, *Observationes Botanicae* 5: 19. 1789, *Tableau Encyclopédique et Méthodique ... Africa. See *Encyclopédie Méthodique, Botanique* 5: 91. 1804, *Synopsis Plantarum Glumacearum* 1: 269. 1854, *Revisio Generum Plantarum* 2: 765. 1891.

E. jeffreysii Hack.

South Africa, Zimbabwe, Kalahari. Perennial, robust, woody, hard, tough, compressed, tufted, erect, unbranched, leaf blade stiff and rolled, basal leaf sheaths hairy or silky, leaves mostly basal, ligule a fringe of hairs, inflorescence a rigid and open panicle, of little value as forage, usually in sandy moist areas, see also *Eragrostis curvula* (Schrad.) Nees, see *Proceedings of the Rhodesia Scientific Association* 7(2): 68. 1908.

in South Africa: geelhoutpluimgras, gelbholz straußgras

E. jerichoensis B.K. Simon

Australia, Queensland, Jericho. Perennial, tufted, erect, ligule a fringe of hairs, open panicles, orbicular spikelets, 3 stamens, similar to *Eragrostis brownii*, see *Fl. of Australia* 43: 332. 2002, *Fl. of Australia* 44B: 406, 460. 2005.

E. karasbergensis L. Bolus

Africa, Namibia. See *Annals of the Bolus Herbarium* 1: 110. 1915.

E. katandensis Lebrum ex Mimeur

Africa. See *Mus. Hist. Nat. (Paris) Bull.* 23: 128. 1951.

E. keniensis Pilg.

Africa, Kenya. See *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 9(90): 1125. 1927.

E. kennedyae F. Turner (the type is from Wonnaminta Station, near Broken Hill; for a Mrs. Kennedy)

Central Australia, Western Australia, Northwest Territories, Queensland. Short-lived perennial or annual, tufted, slender and thin, simple and wiry, pubescent and thickened base, ligule a fringe of hairs, leaves often glaucous, panicle spike-like or loosely contracted, pedicellate ovate spikelets compressed laterally, ovate and subacute glumes strongly keeled, lemmas ovate, 2-3 stamens, not palatable, similar to *Eragrostis exigua*, see *Proceedings of the Linnean Society of New South Wales* 8: 535. 1894 and *Grasses of Central Australia* 141, pl. 40b. 1970, *Fl. New South Wales* 4: 542. 1993.

in English: small-flowered love grass

E. kingesii De Winter

Southwest Africa, Namibia. Annual, tufted, erect to decumbent, glandular, basal leaf sheaths glabrous, inflorescence more or less contracted, spikelets lanceolate, lower glume keeled, lemma acute, palea keels scabrid, weed, common in disturbed soils, desert, along roadsides, see *Bothalia* 7: 470. 1961.

E. kinshasaensis Vanderyst

Africa, Kinshasa. See *Bulletin agricole du Congo Belge* 11: 118. 1920.

E. kiwuensis Jedwabn. (*Eragrostis schweinfurthii* var. *kiwuensis* (Jedwabn.) S.M. Phillips)

Africa, Kiwu. See *Botanisches Archiv* 5(3-4): 206. 1924, *Kew Bulletin* 42(4): 930. 1987.

E. kneuckeri Hackel & Bornm.

Egypt. Rare species, see *Magyar Botanikai Lapok* 11: 12. Budapest 1912.

E. koenigii (Kunth) Steud. (*Eragrostis koenigii* Link; *Poa koenigii* Kunth)

Asia. See *Hortus Regius Botanicus Berolinensis* 2: 294. 1833, *Synopsis Plantarum Glumacearum* 1: 266. 1854, *The Flora of British India* 7: 316. 1896 and *Fl. Pres. Madras* 10: 1826. 1934.

Eurasia. See *Bulletin of the Botanical Survey of India* 9: 290. 1968.

E. kuchariana S.M. Phillips (Kuchar)

Africa, Somalia. Annual, leaf sheaths hairy and glandular, ligule a line of hairs, panicle diffuse, spikelets linear disarticulating between the florets, glumes unequal, lemmas papery, palea keels scabrous, orange sand, see *Kew Bulletin* 46(1): 111-117. 1991, *Kew Bulletin* 47(2): 277-282. 1992.

E. kuschelii Skottsbo. (*Eragrostis peruviana* var. *macranthera* Skottsbo.) (after Kuschel)

South America, Chile. Annual, see *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 1(4): 396. 1830 and *Kongl. Götheborgska Vetenskaps och witterhets Samhällets Handlingar. Vetenskaps Afdelningen* 5(6): 81, f. 43, 44 b-i. 1937, *Arkiv för Botanik, Andra Serien* 4(15): 485, t. 21-2, 22. 1962 [1963] and 4(12): 417. 1961 [1963], *Gayana, Botánica* 42: 1-157. 1985, *Gayana, Botánica* 51(1): 1-10. 1994.

E. kwaiensis Peter (*Eleusine multiflora* Hochst. ex A. Rich.)

Africa, Tanzania, Kwai. See *Tentamen Florae Abyssinicae ...* 2: 412. 1850 and *Repertorium Specierum Novarum Regni Vegetabilis, Beihefte* 40(1) Anhang: 99. 1930, *Kew Bulletin* 27(2): 251-270. 1972, *Fl. Novo-Galic.* 14: 157. 1983.

E. kwamouthensis Vander.

Africa, Kasai. See *Bulletin agricole du Congo Belge* 11: 119. 1920.

E. lacunaria F. Muell. ex Benth. (*Eragrostis falcata* var. *piliger* Domin; *Eragrostis rankingii* Bailey)

Australia. Annual or short-lived perennial, tufted, small, sparse and short, simple or branched, wiry, more or less pubescent and thickened base, leaf blade usually rolled, leaves filiform and convolute, panicle open, stiffly spreading linear and narrow spikelets, lemmas and glumes cartilaginous, grain compressed, useful forage, grows on clay soils, adapted to hot and sandy situations, subtropical, similar to *Eragrostis falcata*, *Eragrostis longipedicellata* and *Eragrostis subtilis*, see *First Gen. Report.* 20. 1853, *Fl. Austral.* 7: 649. 1878, *Dept. Agr. Brisbane Bot. Bull.* 2: 22. 1891 [also *Bot. Bull. Dept. Agric., Queensland*] and *Grasses of Central Australia* 135, pl. 38c. 1970, *Fl. New South Wales* 4: 540. 1993.

in English: purple love grass

E. laeviglumis Jedwabn.

Australia. See *Botanisches Archiv* 5(3-4): 209. 1924.

E. laevissima Hack.

South Africa. Perennial or annual, tufted, erect or geniculate, glandular, sometimes rhizomatous with oblique rhizome, inflorescence open, spikelets oblong, usually in brackish and sandy soils, see *Repertorium Specierum Novarum Regni Vegetabilis* 10(243-247): 170. 1911.

E. lamarckii Steud. (*Eragrostis tremula* Hochst. ex Steud.)

Asia, Africa. See *Synopsis Plantarum Glumacearum* 1: 269. 1854.

E. lamprospicula De Winter

South Africa, Transvaal, Zimbabwe. Perennial, tufted, geniculate, not sprawling habit, basal sheath glabrous, spikelets grayish, lower glume lanceolate, palea keels entire, common in open habitats, open places, brackish flats, bare brack flats, see *Bothalia* 7: 471. 1961.

E. lanicaulis Lazarides

Australia. Perennial, tussocky, wiry, rhizomatous, base bulbous or knotty, lower sheaths overlapping, panicles spiciform, palea 3-toothed, grain compressed dorsally, see *Australian Systematic Botany* 10(1): 126. 1997.

E. laniflora Benth. (*Eragrostis eriopoda* var. *laniflora* (Benth.) J.M. Black)

Australia. Perennial, simple, wiry and erect, vigorous, tussocky, rhizomatous, dense and spreading clumps, base swollen and thickened by woolly cataphylls, stout and branched rhizome knotty and woolly, leaves rigid and inrolled, inflorescence open to racemose with hairy spikelets, panicle sparse and much branched, linear-oblong or elliptic spikelets straight or sometimes curved, florets 6-42, woolly and softly hairy at the base of each floret, glumes and lemmas ovate and keeled, lemmas dark purplish, palea 2-keeled, 3 stamens, fodder plant moderately palatable, very hardy and attractive, decorative when in flower, useful as a sand binder, common in dry regions, deep loose sandy soils and dunes, red-brown sandy soils, related to *Eragrostis eriopoda*, see *Flora Australiensis: A Description ...* 7: 648. 1878 and *Flora South Australia (edition 2)* 1: 79. 1922, *Fl. New South Wales* 4: 537. 1993.

in English: hairy woollybutt grass, woollybutt grass, hairy-flowered woollybutt

E. lanipes C.E. Hubbard (*Eragrostis clelandii* S.T. Blake) (Latin *lana*, ae "wool" and *pes, pedis* "a foot")

South Australia, Western Australia. Perennial, simple or sparsely branched, wiry or slender and smooth, forming spreading clumps, woolly and bulbous or knotty at base, flat or inrolled leaves, ligule a fringe of hairs, loose open panicle, green to purplish hairy spikelets oblong or ovate, glumes broadly ovate with ciliate margins, lemmas hairy orbicular often purple, 3 stamens, forage, grazed, susceptible to moisture stress, decorative when in flower, see *Bulletin of Miscellaneous Information Kew* 1934: 449. 1934.

in English: love grass

E. lappula Nees (*Eragrostis lappula* Nees var. *divaricata* Stapf; *Eragrostis lappula* var. *lappula*)

East Africa, South Africa. Perennial, tufted, light green, shortly rhizomatous, erect, palea keels hairy, pasture, palatable, growing in red clay soil, sandy dambo, waste ground, moist sandy soils, seasonally flooded areas, river

beds, see *Florae Africae Australioris Illustrationes Monographicae* 412. 1841 and *Flora Capensis* 7: 628. 1900.

E. lasseri Luces

Venezuela. See *Boletín de la Sociedad Venezolana de Ciencias Naturales* 15(80): 6, f. 3. 1953.

E. ledermannii Pilg. (after the Swiss horticulturist Carl Ludwig Ledermann, 1875-1958, traveler, explorer, collected in West Cameroon (Kamerun, Cameroun), wrote "Eine botanische Wanderung nach Deutsch-Adamaua." *Mitteil. Deutsch. Schutzge.* 25: 20-55. 1912; see F.N. Hepper and F. Neate, *Plant Collectors in West Africa*. 48-49. 1971; René Letouzey, "Les botanistes au Cameroun." in *Flore du Cameroun*. 7: 1-110. Paris 1968; Frank Nigel Hepper, "Botanical collectors in West Africa, except French territories, since 1860." in *Comptes Rendus de l'Association pour l'étude taxonomique de la flore d'Afrique*, (A.E.T.F.A.T.). 69-75. Lisbon 1962; F.N. Hepper, "C. Ledermann's botanical collecting localities in Kamerun (Cameroun) 1908-1909." *Kew Bulletin*. 29(2): 365-381. 1974)

Africa. See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 45: 210. 1910.

E. leersiiformis Launert (resembling *Leersia* Swartz)

South Africa, Zambia. Annual, tufted, erect to geniculate, inflorescence open with spreading branches, palea keels ciliate, see *Prodromus einer Flora von Südwestafrika* 34(160): 224. 1970.

E. lehmanniana Nees (*Eragrostis lehmanniana* Nees var. *ampla* Stapf) (possibly after the German botanist Johann Georg Christian Lehmann, 1792-1860, professor of natural history at the Hamburg Johanneum and Director of the Hamburg Botanical Garden, his works include *Plantae Preissianae ... Plantarum quas in Australasia occidentali et meridionali-occidentali annis 1838-41 collegit L. Preiss. Hamburgi 1844-1847[-1848]*, *Semina in horto botanico hamburgensi 1822 collecta*. Hamburgi 1823 and *Novarum et minus cognitarum stirpium pugillus I-X* etc. Hamburgi 1828-1857; see J.H. Barnhart, *Biographical notes upon botanists*. 2: 363. 1965; J.C. Dryander, *Catalogus bibliothecae historico-naturalis Josephi Banks*. London 1796-1800; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. Philadelphia 1964; Frans A. Stafleu and Richard S. Cowan, *Taxonomic literature*. 2: 819-824. 1979; S. Lenley et al., *Catalog of the manuscript and archival collections and index to the correspondence of John Torrey*. Library of the New York Botanical Garden. 462. 1973; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. 1917-1933; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993; Jeannette E. Graustein, *Thomas Nuttall, Naturalist. Explorations in America, 1808-1841*. 376. 1967; Günther Schmid, *Chamisso als Naturforscher*. Eine Bibliographie.

Leipzig 1942; John Hutchinson (1844-1972), *A Botanist in Southern Africa*. 578, 582. London 1946)

South Africa, Mozambique, Namibia, Zimbabwe. Perennial bunchgrass, variable, slender to strong, clump forming, usually branched, sometimes unbranched, tufted, usually geniculate, slightly spreading, stoloniferous, prostrate stems root at the nodes, fibrous roots, basal leaves, ligule a fringe of short hairs, leaf blade expanded or somewhat rolled, leaves sharp pointed, papery lower leaf sheaths, rigid inflorescence, panicle lax and open, stiff secondary axes and pedicels, small seeds, useful for erosion control, suitable for range restoration purposes, used for range reseeding in warm semideserts areas, widely used for roadside stabilization, gives a rapid soil cover, quite tolerant of drought, cultivated for hay and pasture, forage, weed species naturalized elsewhere, aggressive and very competitive, it should not be too closely grazed, palatable when green, of low palatability when mature, adapted to semiarid tropical and subtropical summer rainfall areas, common in semiarid environments, sandy open savannah, disturbed soils, dry disturbed open areas, sandy- to sandy loam-textured soils, on gravelly bajadas, along roadsides, chaparral, along sandy washes in desert scrub and desert grassland, in semidesert grassland, closely related to *Eragrostis trichophora* Cosson & Durieu, see *Florae Africae Australioris Illustrationes Monographicae* 402. 1841 and *Flora Capensis* 7: 602. 1900, Erika L. Geiger and Guy R. McPherson, "Response of semi-desert grasslands invaded by non-native grasses to altered disturbance regimes." *Journal of Biogeography* 32(5): 895-902. May 2005.

in English: land grass, Lehmann love grass, Lehmann's love grass, Eastern Province vlei grass

in South Africa: Eastern province vlei grass, blousaadsoetgras, growwevleigras, kleinblousaadgras, kleinsoetgras, knietjiesgras, Lehmann-eragrostis, lidjiesgras, soetgras-blousaadgras, soetgras, gewöhnliches straußgras

E. lehmanniana Nees var. *chaunantha* (Pilg.) De Winter (*Eragrostis chaunantha* Pilg.)

South Africa. Perennial, tufted, erect, prostrate stems rooting at the nodes, culm nodes and internodes hairy, inflorescence open, spikelets linear, see *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 40: 84. 1907, *The Grasses and Pastures of South Africa* 147. 1955.

E. lehmanniana Nees var. *lehmanniana*

South Africa, Zimbabwe. Perennial, tufted, often branched, erect, sometimes rooting at the geniculate lower nodes, glabrous culm internodes, lower sheaths papery, ligule a ring of white hairs, leaf blade with a hard tip, contracted to open panicle, linear spikelets dark green to grayish green, palea keels thin, fodder, pasture grass, palatable when green, withstands heavy grazing, suitable for erosion control, useful in the stabilization of denuded and eroded sites,

common in disturbed soils, sandy to sandy loam soils, overgrazed veld, along roadsides, uncultivated lands, very dry areas, over limestone, denuded veld.

in English: land grass, Lehmann love grass, Lehmann's love grass, Eastern Province vlei grass

in South Africa: Eastern province vlei grass, blousaadsoetgras, growwevleigras, kleinblousaadgras, kleinsoetgras, knietjiesgras, Lehmann-eragrostis, lidjiesgras, soetgras-blousaadgras, soetgras, gewöhnliches straußgras

E. lepida (Hochst. ex A. Rich.) Hochst. ex Steud. (*Eragrostis ciliaris* (L.) R. Br.; *Eragrostis lepida* Hochst. ex A. Rich.; *Poa lepida* Hochst. ex A. Rich.)

Sudan, Ethiopia, Kenya. Annual, panicle loose and open, spikelets oblong, florets loose and divergent, glumes lanceolate, upper glume often mucronate, lemmas membranous and mucronate, palea hairy, found in disturbed areas, near water, see *Systema Naturae, Editio Decima* 875. 1759, *Narrative of an Expedition to Explore the River Zaire* 478. 1818, *Tentamen Florae Abyssinicae ... 2*: 424. 1850, *Flora* 38: 327. 1855.

E. lepriurii Steud. (*Eragrostis diplachnoides* Steud.) (after the French botanist F.M.R. Leprieur, 1799-1869, a dispenser in the French Navy, between 1824-29 in Senegambia, in 1829 returned to France and began his *Flora* continued by [Jean Baptiste] Antoine Guillemin (1796-1842), George Samuel Perrottet (1793-1870) and Achille Richard (1794-1852) as *Florae Senegambiae tentamen*. Paris (Treuttel et Wurtz), London 1830-1833; see Joseph Vallot (1854-1925), "Études sur la flore du Sénégal." in *Bull. Soc. Bot. de France*. 29: 168-238. Paris 1882; R.W.J. Keay, "Botanical Collectors in West Africa prior to 1860." in *Comptes Rendus A.E.T.F.A.T.* 55-68. Lisbon 1962; F.N. Hepper and Fiona Neate, *Plant Collectors in West Africa*. 49. 1971; G. Murray, *History of the collections contained in the Natural History Departments of the British Museum*. London 1904; J.H. Barnhart, *Biographical notes upon botanists*. Boston 1965)

E. leptocalymma Pilg.

Asia. See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 40: 84. 1907.

E. leptocarpa Benth.

South Australia, Queensland, New South Wales, Western Australia, Northern Territory. Annual or short-lived perennial, tufted, slender, simple or branched, erect or geniculate and rooting at the lower nodes, purple near the base, ligule a fringe of hairs, leaf blades flat or rolled, inflorescence open often lax to drooping, decompound panicles, spikelets linear loosely flowered, florets 6-12, vestigial apical floret, rounded on the back or keeled glumes linear to lanceolate or ovate, lemmas notched and lanceolate, not grazed, a weed of disturbed areas and gardens, floodways, similar to *Eragrostis parviflora*, see *Flora Australiensis: A Description* ... 7: 644. 1878.

in English: drooping love grass

E. leptophylla A.S. Hitchc.

U.S., Hawaii. Sandy plain, see *Memoirs of the Bernice Pauahi Bishop Museum* 8(3): 133, f. 21. 1922.

in English: mountain love grass

E. leptostachya (R. Br.) Steudel (*Eragrostis molybdea* Vicker; *Eragrostis osakai* O. Deg.; *Eragrostis rara* Domin; *Poa leptostachya* R. Br.)

Queensland, New South Wales, Victoria. Perennial, compact or loosely tufted, slender, leafy, erect, usually with glandular rings below nodes, leaf sheath keel glandular, leaf blades rolled or flat, open and spreading inflorescence paniculate, spikelets green on short glandular pedicels, florets 4-12, glumes unequal, glumes and lemmas acute and smooth, stamens 3, grain truncate, naturalized elsewhere, common in woodland and native pasture, similar to *Eragrostis alveiformis*, see *Prodromus Florae Novae Hollandiae* 180. 1810, *Synopsis Plantarum Glumacearum* 1: 279. 1854 and *Contr. New South Wales Natl. Herb.* 1: 338. 1950, *Austral. Grasses* 2: 45, pl. 7. 1968.

in English: paddock love grass, Australian love grass

E. leucosticta Nees ex Döll (*Eragrostis leucosticta* Nees)

Brazil, Paraguay. Leaves acuminate, panicle open, see *Flora Brasiliensis* 2(3): 144. 1878 and *Revista Brasileira de Botânica* 23(2): 177-194. 2000, *Iheringia, Série Botânica* 55: 23-169. 2001.

E. longapaniculata De Wild.

Africa. See *Bulletin du Jardin Botanique de l'État* 6: 67, t. 2. 1919.

E. longifolia Hochst. ex Steud. (*Eragrostis longifolia* Hochst.; *Eragrostis longifolia* Hochst. ex A. Rich.; *Eragrostis pobeguïnii* C.E. Hubb.; *Poa longifolia* Hochst. ex A. Rich., nom. illeg., non *Poa longifolia* Trin.)

Ethiopia, Yemen. Perennial, erect, rare, wiry, densely tufted, slender, basal sheaths coriaceous and swollen, leaf blades narrowly linear and flexuous, sheaths and leaf blades softly pilose, narrow panicle spike-like and very short, spikelets oblong to ovate, 5- to 17-flowered, florets loosely imbricate, lower glume lanceolate-oblong, upper glume ovate, lemmas

shortly acuminate, rocky places, grassland, related to *Eragrostis pobeguinii*, see *Flora* 24(1): 23. 1841, *Tentamen Florae Abyssinicae* ... 2: 425. 1850, *Synopsis Plantarum Glumacearum* 1: 268. 1854 and *Bulletin of Miscellaneous Information Kew* 1936(5): 312. 1936.

E. longipedicellata B.K. Simon

Australia, Queensland. Perennial, hispid, erect, filiform, rhizomatous, slender, compact, tufted, eglandular, knotty base, minute ligule, leaf blades filiform flexuose, open panicles, long-pedicellate spikelets, 3 stamens, similar to *Eragrostis lacunaria*, see *Austrobaileya* 1(5): 465. 1982.

E. lugens Nees (*Eragrostis flaccida* Lindm.; *Eragrostis lugens* f. *pallida* Hack.; *Eragrostis lugens* Nees subsp. *flaccida* (Lindm.) Hack.; *Eragrostis lugens* subsp. *lugens*; *Eragrostis lugens* var. *glabrata* Döll; *Eragrostis lugens* var. *glabrescens* Döll; *Eragrostis pilosa* (L.) P. Beauv. var. *lugens* (Nees) Griseb.; *Eragrostis pilosa* var. *lugens* Kuntze, nom. illeg., non *Eragrostis pilosa* var. *lugens* (Nees) Griseb.; *Eragrostis polytricha* Nees; *Eragrostis soratensis* Jedwabn.; *Poa lugens* (Nees) Kunth; *Poa polytricha* (Nees) Kunth)

South America, Brazil, Paraguay, Mexico to Argentina. Perennial, caespitose, erect or ascending, sometimes geniculate below, simple, glabrous, prominent nodes, leaves mostly basal, ligule ciliate, leaf blades involute to flat, open panicle ovate, secondary panicle branches and pedicels spreading, 2- to 7-flowered, flattened spikelets narrowly lanceolate, keeled glumes broadly ovate to narrowly lanceolate, lemmas broadly ovate and membranous, palea keels scaberulous, 3 stamens, forage, common in grassland, open sandy places, rocky areas, low prairies, similar to *Eragrostis soratensis*, see *Essai d'une Nouvelle Agrostographie* 71, 162, 175. 1812, *Flora Brasiliensis seu Enumeratio Plantarum* 2: 505-508. 1829, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 331. 1833, *Flora Brasiliensis* 2(3): 140-141. 1878, *Abhandlungen der Königlichen Gesellschaft der Wissenschaften zu Göttingen* 24: 290. 1879, *Contributions from the United States National Herbarium* 2(3): 542. 1894, *Revisio Generum Plantarum* 3(3): 352, 353. 1898 and *Kongliga Svenska Vetenskapsakademiens Handlingar* 34(6): 17, t. 9A. 1900, *Anales del Museo Nacional de Buenos Aires* 21: 134. 1911, *Botanisches Archiv* 5(3-4): 213. 1924, *Contr. U.S. Natl. Herb.* 24(8): 343. 1927, *Iheringia, Série Botânica* 55: 117, 125. 2001.

in English: mourning love grass

in Mexico: amor seco llorón, amor seco llorón, chuchun-arimbicua, cola de zorra, jiuatsiri eh' eti (Purépecha)

in Brazil: pasto-ilusão, capim-branco

E. lurida J. Presl (*Eragrostis bahiensis* var. *boliviensis* Henrard; *Eragrostis contracta* Pilg.; *Eragrostis contristata* Meyen; *Eragrostis contristata* Nees & Meyen; *Poa lurida* (J. Presl) Kunth)

Colombia, Bolivia, Peru, Argentina. Annual or perennial, herbaceous, mostly glabrous, erect, shrubby, caespitose, sometimes geniculate below, forming small clumps, leaf sheaths overlapping, leaves linear, ligule ciliate, dense inflorescence, panicle contracted, glomerate lobes of spikelets, 3-10 florets, glumes broadly ovate to lanceolate, lemmas broadly ovate and membranous, 3 stamens, forage, along roadsides, sandy areas, dry rocky hillsides, in moist places, rocky alluvial fans, see *Mantissa* 2: 318. 1824, *Reliquiae Haenkeanae* 1(4-5): 276. 1830, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 342. 1833, *Reise um die Erde* 1: 484. 1834, *Gramineae* 31-32. 1841, *Nova Acta Phys.-Med. Acad. Caes. Leop.-Carol. Nat. Cur.* 19(Suppl. 1): 163-164. 1843 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 37: 376. 1906, *Mededeelingen van's Rijks-Herbarium* 40: 68. 1921. in Ecuador: paja de burro, milín

E. lutensis Cope

Africa, Somalia. Perennial, tufted, scabrous leaves stiff and pungent, crateriform glands lacking, elliptic panicle, spikelets oblong, glumes unequal, lemmas obtuse and papery, palea keels scabrous, on floodplain, shallow water, see *Kew Bulletin* 50(1): 113, f. 3A-B. 1995.

E. lutescens Scribn.

U.S. Sandy banks, see *Circular, Division of Agrostology, United States Department of Agriculture* 9: 7. 1899.

in English: 6-weeks love grass

E. mabrana Schweinf.

Arabia. See *Bulletin de l'Herbier Boissier* 2(Append. 2): 24. 1894.

E. macilentata (A. Rich.) Steud. (*Eragrostis decidua* Hochst.; *Eragrostis dekindtii* Pilg.; *Eragrostis pseudonigra* Mattei ex Borzi; *Poa macilentata* A. Rich.)

Uganda, Tanzania, Nigeria, Angola, Yemen, Sudan. Annual, coarse to delicate, tufted to loosely tufted, leaf sheaths glabrous or sparsely hairy, leaf blades flat, diffuse spreading panicle, long pedicellate spikelets linear to narrowly ovate, spikelets oblong breaking up from the bottom upward, 4- to 18-flowered, acuminate glumes unequal to subequal, lemmas narrowly ovate and acute, palea persistent with scabrid keels, 3 stamens, good grazing, browsed by stock, weed of high rainfall areas, open habitats, evergreen bushland, forest, cultivated land, forest edge, roadsides, waste places, see *Tentamen Florae Abyssinicae* ... 2: 428. 1850, *Synopsis Plantarum Glumacearum* 1: 268. 1854, *Flora* 38: 324. 1855 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 40: 83. 1907, *Contr. Biol. Veg. R. Ist. Bot. Palermo* 4: 246. 1909.

E. macra Jedwabn. (*Eragrostis bahiensis* Schrad. ex Schult.; *Eragrostis bahiensis* var. *bahiensis*)

Brazil. See *Mantissa* 2: 318. 1824 and *Botanisches Archiv* 5(3-4): 200. 1924, *Iheringia, Série Botânica* 55: 147. 2001.

E. macrochlamys Pilg.

Africa. See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 48: 346. 1912.

E. macrochlamys Pilg. var. ***macrochlamys***

South Africa. Annual, tufted, erect and geniculate, sometimes procumbent, basal sheaths glabrous, inflorescence glandular, lemma acute, palea keels entire, common in sandy soils, river courses, disturbed areas, along roadsides.

E. macrochlamys Pilg. var. ***wilmaniae*** (C.E. Hubb. & Schweick.) De Winter

South Africa. Annual, tufted, erect and geniculate, sometimes procumbent, basal sheaths glabrous, inflorescence not glandular, lemma acute, palea keels entire, common in sandy soils, moist areas, river courses, disturbed areas, along roadsides, see *The Grasses and Pastures of South Africa* 176. 1955.

E. macrothyrsa Hack.

Paraguay, Bolivia. Foliage basal, panicle branches alternate, lemmas acuminate, forest margin, see *Repertorium Specierum Novarum Regni Vegetabilis* 8: 47. 1910.

E. maderaspatana Bor (*Eragrostis willdenowiana* Nees ex Hook.f., nom. illeg., non *Eragrostis willdenowiana* Nees ex Hook. & Arn.)

India. See *The Flora of British India* 7: 322. 1896 and *Grasses of Burma, Ceylon, India and Pakistan (excluding Bambuseae)* 509. 1960.

in India: kari jondu hullu

E. magna Hitchc.

Peru, South America. Common on rocky grasslands, see *Contributions from the United States National Herbarium* 24(8): 341. 1927.

E. mahrana Schweinf. (*Eragrostis hararensis* Chiov., sometimes spelled *haranensis*)

Africa, Ethiopia, Arabia, Somalia. Perennial, bushy, tough, spiny, robust, glaucous, leaves pungent, imbricate sheaths, panicle ovate, spikelets shortly pedicelled, glumes lanceolate, lemmas membranous, palea keels scabrous, alluvium, dry sandy soils, gravel, see *Annuario del Reale Istituto Botanico di Roma* 6: 163. 1896 and *Kew Bulletin* 47(2): 277-282. 1992.

in Somalia: gubangub

E. malayana Stapf

Asia, Borneo. See *The Flora of British India* 7(22): 317. 1897 [1896].

in Thailand: ya khai hep, yaa krok, yaa lang kaa, ya langka

E. margaritacea Stapf (*Eragrostis rotifer* Rendle)

Transvaal, Botswana. Perennial, erect, caespitose, ponds, see *Flora Capensis* 7: 604. 1899, *Catalogue of the African Plants Collected by Dr. F. Welwitsch in 1853-61* 2(1): 242. 1899.

E. marquisensis F. Brown (*Leptochloa marquisensis* (F. Br.) P.M. Peterson & Judz.)

Marquesas. Rare species, see *Bernice P. Bishop Museum Bulletin* 84: 81, t. 9b. 1931, *Taxon* 39(4): 659. 1990.

E. mauiensis A.S. Hitchc.

Hawaii. Extinct or endangered species, sand hills, see *Memoirs of the Bernice Pauahi Bishop Museum* ... 8(3): 129, f. 16. 1922.

in English: Maui lovegrass

E. maypurensis (Kunth) Steud. (*Eragrostis acuminata* Döll; *Eragrostis amoena* J. Presl; *Eragrostis lindeniana* Steud.; *Eragrostis maypurensis* (Kunth) Döll, nom. illeg., non *Eragrostis maypurensis* (Kunth) Steud.; *Eragrostis maypurensis* var. *densiuscula* Pilg.; *Eragrostis maypurensis* var. *meratiana* (Kunth) Pilg.; *Eragrostis meratiana* (Kunth) Steud.; *Eragrostis panamensis* J. in Mexico: pan caliente, pasto

E. megalosperma F. Muell ex Benth. (*Sporobolus indicus* var. *intermedius* F.M. Bailey)

Queensland, New South Wales. Perennial, erect, branched, tufted, compact, leafy tussocky, shortly rhizomatous, eglanular, often branched at lower nodes, leaf blades rolled, inflorescence contracted, spiciform panicle, glumes unequal and persistent, glumes and lemmas acute and keeled, 3 stamens, grain obtuse, occurs in woodland and semiarid native pasture, see *Flora Australiensis: A Description ...* 7: 644. 1878 and *Flora of New South Wales* 4: 542. 1993.

E. membranacea Hack. ex Schinz

Africa, Zambia, Zimbabwe. Annual, sometimes aquatic, erect, tufted, basal sheaths glabrous, inflorescence open, lemma ovate, palea keels entire, 3 anthers, found in moist areas, around water courses, sometimes in shallow water, see *Verhandlungen des Botanischen Vereins für die Provinz Brandenburg und die angrenzenden Länder* 30: 148. 1888.

E. mexicana (Hornem.) Link (*Eragrostis alba* J. Presl; *Eragrostis chilensis* (Moris) Nees; *Eragrostis cordobensis* Jedwabn.; *Eragrostis leptantha* Trin.; *Eragrostis limbata* E. in English: Mexican lovegrass, Chilean love grass

in South Africa: Chileense eragrostis

E. mexicana (Hornem.) Link var. ***mexicana*** (*Eragrostis limbata* E. Fourn.; *Eragrostis neomexicana* Vasey ex L.H. Dewey)

North and South America, U.S., Mexico. Annual, spikelets ovate to oblong, weed species, see *Hortus Regius Botanicus Hafniensis* 2: 953. 1815, *Genera et species plantarum* 3. 1816, *Hortus Regius Botanicus Berolinensis* 1: 190. 1827, *Mexicanas Plantas* 2: 116. 1886, *Contributions from the United States National Herbarium* 2(3): 542. 1894 and *Fl. Novo-Galic.* 14: 168. 1983, *Phytologia* 58: 379. 1985.

in English: Mexican lovegrass

in Mexico: pasto amor, zacate de agua, zacate de amor mexicano

E. micrantha Hack.

Namibia, South Africa. Perennial short-lived, tufted, weak, unbranched, erect, leaf sheath glabrous, leaf blade filiform, much-branched and spreading panicle, glumes more or less unequal, lemma greenish and keeled, little grazing value, generally in moist areas, disturbed places, moist places near vleis, wet areas, in light shade, see *Bulletin de l'Herbier Boissier* 3(8): 389. 1895.

in English: finesse grass

in South Africa: finessegras

E. microcarpa Vickery

Australia, Queensland, New South Wales. Perennial, slender, wiry, densely tufted, forming spreading clumps woolly at base, leaf blade rolled, pyramidal panicle open and loose, green overlapping spikelets, 3 stamens, grain obtuse, ornamental, moist and wet conditions, moist soils, in woodland on clay soils, similar to *Eragrostis parviflora*, see *Contributions from the New South Wales National Herbarium* 1(6): 339. 1951, *Flora of New South Wales* 4: 541. 1993.

in English: love grass

E. minor Host (*Eragrostis brizoides* Costa; *Eragrostis eragrostis* (L.) H. Karst., nom. illeg., non *Eragrostis eragrostis* (L.) P. Beauv.; *Eragrostis eragrostis* (L.) P. in Arabic: azmelil

in Mauritania: azmelil

in India: dodda purale hullu, maitari mulmul, sanna oogu hullu

E. moggii De Winter (the specific name honors the South African botanist A.O.D. Mogg, author of "An autecological note on the poisonous Gifblaar (*Dichapetalum cymosum* (Hook.) Engl.)." *S. Afr. J. Sci.* 27: 368-375. 1930, "A method of veld estimation." *S. Afr. J. Sci.* 17: 222-226. 1921 and *Important plants of Sterkfontein*. University of Witwatersrand. Johannesburg 1975)

Africa. See *Bothalia* 9: 137. 1966.

E. moggii De Winter var. **moggii**

Africa, Mozambique. Perennial, erect, tufted, geniculate to decumbent and rooting at the nodes, inflorescence open, spikelets linear, found in sandy soils, open habitats, open forests.

E. mokensis Pilg. (*Eragrostis moritzii* Jedwabn.) (Equatorial Guinea, Fernando Po) (named for the German botanical explorer Johann Wilhelm Karl Moritz, 1797-1866, collector in West Indies and Venezuela; see J.H. Barnhart, *Biographical notes upon botanists*. 2: 514. 1965; A. Lasègue, *Musée botanique de Benjamin Delessert*. 482, 505. Paris 1845; I.C. Hedge and J.M. Lamond, *Index of Collectors in the Edinburgh Herbarium*. 112. Edinburgh 1970)

South America, Venezuela, Brazil. Annual, slender, tillered, montane, a weed of cultivation, browsed by stock, see *Plantarum vascularium genera secundum ordines ...* 1: 188, 280. 1840 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 51(3-4): 419. 1914, *Botanisches Archiv* 4: 328. 1923, *Annals of the Missouri Botanical Garden* 75(2): 456-521. 1988, *Sida* 16(4): 769-771. 1995, *Revista Brasileira de Botânica* 23(2): 177-194. 2000, *Iheringia, Série Botânica* 55: 23-169. 2001.

E. mollior Pilg. ex R.E. Fr. (*Eragrostis mollior* (Pilger) Pilg.)

Africa, Tanzania. Densely tufted, along trails, roadsides, see *Wissenschaftliche Ergebnisse der Schwedischen Rhodesia-Kongo-Expedition, 1911-1912, unter Leitung von Eric Graf von Rosen* 1: 213. 1916, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 13: 409. 1936.

E. molybdea Vickery

New South Wales, Queensland, Victoria. Perennial, tufted, sometimes glandular, blade flat or rolled, inflorescence

open, spikelets green, florets 8-19, glumes and lemmas acute and keeled, grain truncate, occurs in woodland or native pasture, often in *Eragrostis leptostachya*, see *Contributions from the New South Wales National Herbarium* 1: 338. 1951.

E. monandra Hack. (*Briza bidentata* Roseng., B.R. Arrill. & Izag.; *Rhombolytrum monandrum* (Hack.) Nicora & Rúgolo)

Brazil. See *Repertorium Specierum Novarum Regni Vegetabilis* 7: 320. 1909, *Boletim de la Facultad de Agronomia de Universidad de la Republica, Montevideo* 105: 24. 1968, *Darwiniana* 23(1): 279-309. 1981, *Boletim do Instituto de Biociências, Universidade Federal do Rio Grande do Sul* 41: 1-191. 1987.

E. montana Balansa

Cambodia. See *Journal de Botanique* (Morot) 4(8): 168. 1890.

E. monticola (Gaudich.) Hillebr. (*Poa monticola* Gaudich.)

Hawaii. See *Voyage autour du Monde, entrepris par Ordre du Roi, ... exécuté sur les Corvettes de S. M. l'Uranie et la Physicienne ... Botanique* 408. 1830, *Flora of the Hawaiian Islands* 531. 1888.

E. obtusa Munro ex Ficalho & Hiern (*Eragrostis obtusa* Munro ex Durand & Schinz; *Eragrostis obtusa* Munro ex Stapf)

South Africa, Lesotho. Perennial bunchgrass, sometimes annual, densely clumped, often geniculate, leaf sheath glabrous and with a collar, inflorescence open and lax to contracted, panicle ovoid open to slightly contracted with the lower branches usually solitary, spikelets oval to oblong-oval, spikelets stipitate and flattened, glume and lemma keeled, lemma obtuse to round, palea keels entire, heavy seeder, leaves palatable, useful for erosion control, weed species, drought resistant, common on dry loam, disturbed areas, along roadsides, clay loam soil, disturbed roadside, edge of irrigated field, ungrazed pasture, heavily grazed areas, overgrazed pasture, sandy clay pasture, see *Transactions of the Linnean Society of London, Botany* 2: 32. 1881, *Conspectus Florae Africae* 5: 886. 1894, *Flora Capensis* 7: 625. 1898.

in English: dew grass

in South Africa: douvatgras

E. obtusiflora (E. Fourn.) Scribn. (*Brizopyrum obtusiflorum* Fourn.)

Mexico, U.S. Perennial, herbaceous, erect, greenish, rhizomatous, see *Mexicanas Plantas* 2: 120. 1886, *Bulletin, Division of Agrostology United States Department of Agriculture* 8: 10, t. 5. 1897.

in English: alkali love grass

in Mexico: zacahuixtle, zacate jihuite

E. olida Lazarides

Australia. Perennial, glandular, compact, tufted, tussocky, knotty base, leaf blades pungent, overlapping leaf sheaths, viscid, aromatic, prickly, panicles loose to open, 2-3 stamens, see *Austral. Syst. Bot.* 10: 137. 1997.

E. oligostachya Launert ex Cope

Zambia. See *Kew Bulletin* 53(1): 151, f. 4D-E. 1998.

E. olivacea K. Schum. (*Eragrostis lasiantha* Stapf)

East Africa, Ethiopia, Mozambique, Malawi, Tanzania. Perennial, tussocky, tufted, erect, reddish, leaf blades tough, basal sheaths papery, inflorescence dark gray, panicle diffuse to contracted, spikelets flattened, 5-20-flowered, glumes subequal, lemmas narrowly ovate, palea keels ciliate, ornamental grass, forage, viscous roots, found in moist meadow, open woodland, grassland, heavy soil, see *Bulletin of Miscellaneous Information Kew* 1906: 82. 1906.

E. omahekensis De Winter (the specific name from the Herero *Omaheke*, a term used for the sandy woodland savannah of Southwest Africa; the Herero people, a group of closely related Bantu-speaking peoples of southwestern Africa. See H. Beiderbecke, *Life among the Hereros in Africa*. New York 1922; Frank R. Vivel, *The Herero of Western Botswana*. St. Paul 1956; Dr. Emil Holub, *Sieben Jahre in Sud-Afrika*. Wien 1881)

South Africa. Annual, tufted, erect or geniculate at the basal nodes, may form pure stands, usually with a glandular ring beneath the node, leaf blade expanded and linear, leaves sharp pointed and flexible, leaf sheaths keeled and open, inflorescence a contracted panicle, spikelets densely clustered on the side branches, a glandular ring below the lowest whorl of secondary axes, stiff glume, lowest lemma papery, palea keels scabrid, pasture, used to make good hay, found in disturbed areas, sand, along roadsides, cultivated lands, old lands, can be confused with *Eragrostis cylindriflora* Hochst., see *Bothalia* 7: 473. 1961.

in South Africa: sandveldpluimgras, sandveld windhalm

E. orcuttiana Vasey (*Eragrostis mexicana* subsp. *virescens* (J. Presl) S.D. Koch & Sánchez Vega)

U.S. See *Hortus Regius Botanicus Berolinensis* 1: 190. 1827, *Reliquiae Haenkeanae* 1(4-5): 276. 1830, *Contributions from the United States National Herbarium* 1(8): 269. 1893 and *Phytologia* 58: 380. 1985.

E. orthoclada Hack. (*Eragrostis longipila* Hack.; *Eragrostis villamontana* Jedwabn.)

Brazil, Paraguay. Perennial, caespitose, herbaceous, erect, leaf blades linear and acuminate, inflorescence narrowly oblong, panicle branches verticillate, spikelets sessile or pedicellate, 3- to 10-flowered, glumes subequal and acute, lemmas oblong and acute, 3 stamens, dry areas, sandy soils, arid places, scrub forest, similar to *Eragrostis macrothyrsa*, see *Bulletin de l'Herbier Boissier, sér. 2*, 4(3): 281. 1904, *Anales del Museo Nacional de Buenos Aires* 21: 132. 1911,

Botanisches Archiv 5(3-4): 197. 1924, *Iheringia, Série Botânica* 55: 67. 2001.

E. palisoti Dur. & Schinz

Africa. See *Conspectus Florae Africae* 5: 887. 1894.

E. pallens Hack.

Mozambique, South Africa, Namibia, Kalahari. Perennial, densely tufted, coarse, robust, erect, smooth, glabrous, culms generally yellow, leaves mostly basal, rigid and hard leaf blades, sheath yellow when old, ligule a ring of short hairs, leaf sheaths persistent and tough, open or contracted panicle, spikelets shortly pedicellate, lowest lemma obtuse, palea ovate to obovate, unpalatable and avoided by cattle, sometimes used for thatching, found on sandy areas, in moist sandy soil, bushveld, dry woodlands, around seasonal pans, broad-leaved savannah, see *Bulletin de l'Herbier Boissier* 3(8): 392. 1895.

in English: broom love grass, broom grass

in Botswana: motsikiri

in South Africa: besemgras, gemsbokgras, sandveld straußgras

E. palmeri S. Watson (*Eragrostis caudata* E. Fourn., nom. illeg., non *Eragrostis caudata* Nees ex Steud.) (the American botanist Edward Palmer, 1831-1911, ethnologist, botanical explorer, to U.S. 1849, botanical and zoological collector, traveler, naturalist, physician, 1853-1855 La Plata Expedition, described the ethnobotany and aboriginal medical practice of the American Southwest)

U.S., Texas, Mexico. See *Proceedings of the American Academy of Arts and Sciences* 18: 182. 1883, *Mexicanas Plantas* 2: 115. 1886.

in English: Rio Grande love grass

in Mexico: amor seco

E. panamensis J. Presl (*Eragrostis maypurensis* (Kunth) Steud.; *Megastachya panamensis* (J. Presl) E. Fourn.)

Panama. See *Nova Genera et Species Plantarum* 1: 161-162. 1815 [1816], *Reliquiae Haenkeanae* 1(4-5): 277. 1830, *Synopsis Plantarum Glumacearum* 1: 276. 1854, *Mexicanas Plantas* 2: 118. 1886.

E. paniciformis (A. Braun) Steud. (*Poa paniciformis* A. Braun)

Ethiopia, Kenya, Zambia, Uganda, Tanzania. Perennial, loosely tufted, erect or geniculate, leaf sheaths purple, much-branched panicle, ovate spikelets sometimes loosely contracted, 7- to 25-flowered, glumes and lemmas narrowly ovate, ciliolate palea-keels, fodder grass, grazed, a weed of cultivation and irrigation, in sandy soil, moist habitats, ditches, irrigation channels, swampy grasslands, closely related to *Eragrostis exasperata*, see *Flora* 24: 274. 1841, *Synopsis Plantarum Glumacearum* 1: 268. 1854.

E. pappiana (Chiov.) Chiov. (*Eragrostis multiflora* var. *pappiana* Chiov.)

Africa.

E. papposa (Roem. & Schult.) Steud. (*Eragrostis aulacosperma* (Fresen.) Steud.; *Eragrostis rigidifolia* Hochst. ex Engl.; *Eragrostis rigidifolia* Schweinf.; *Eragrostis speirostachya* Coss. & Dur.; *Eragrostis sporostachya* (Coss. & Dur.) Coss. & Dur.; *Eragrostis vulgaris* var. *sporostachya* Coss. & Dur.; *Megastachya papposa* Roem. & Schult.; *Poa aulacosperma* Fresen.; *Poa papposa* Dufur. ex Roem. & Schult.)

Ethiopia, Kenya, Sudan, Uganda, Tanzania, Yemen, India, Nepal. Short-lived perennial, compact, tufted, stiff leaves, leaf sheaths glabrous, ovate panicle open or contracted, spikelets linear breaking up from the bottom upward, glumes unequal, lemmas membranous, palea persistent, weed of cultivation, useful for erosion control, found in shallow soil, rocky places, open stony hillsides, sandy and gravelly soil, dry alluvial plains, sandy loam basic soil, see *Systema Vegetabilium* 2: 585. 1817, *Museum Senckenbergianum* 2: 144. 1837, *Nomenclator Botanicus. Editio secunda* 1: 564. 1840, *Exploration Scientifique de l'Algérie* 2: 148. 1855, *Videnskabelige Meddelelser fra Dansk Naturhistorisk Forening i Kjøbenhavn* 1: 47. 1860, *Abhandlungen der Preussischen Akademie der Wissenschaften. Mathematisch-naturwissenschaftliche Klasse* 1891: 134. 1892, *Bulletin de l'Herbier Boissier* 2(App. 2): 39. 1894 and *Kew Bulletin* 47(2): 277-282. 1992.

in Somalia: manun, dihi, harfo, manoun, tingleh

E. paradoxa Launert

Africa, Zimbabwe. Rare species, low growing, leaves revive after desiccation.

E. parviflora (R. Br.) Trin. (*Eragrostis pellucida* (R. Br.) Steud.; *Eragrostis pilosa* sensu Benth., non (L.) P. Beauv.; *Poa parviflora* R. Br.; *Poa pellucida* R. Br.)

Australia. Annual or short-lived perennial, tufted, simple or sparsely branched, erect or ascending, leaf blade flat or rolled, panicle loose or open and sometimes drooping, dark olive-green and linear spikelets, glumes and lemmas keeled and glabrous, glumes acute to acuminate, lemmas membranous and lanceolate, palea 2-keeled, grain subglobose, sometimes semiaquatic, heavy seeding, fodder, not grazed, invasive species, a weed of irrigation, see *Prodromus Florae Novae Hollandiae* 181. 1810, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 1(4): 411. 1830, *Synopsis Plantarum Glumacearum* 1: 279. 1854.

in English: weeping love grass, soft love grass, love grass

E. pascua S.M. Phillips

Northeast tropical Africa, Ethiopia, Eritrea. Annual, tufted, erect or ascending, leaf blades acuminate, panicle open, spikelets narrowly oblong, 7- to 21-flowered, glumes lanceolate, lemmas oblong to elliptic, palea keels scabrid,

moist habitats, grassland, closely related to *Eragrostis nigra* Steud., see *Kew Bulletin* 46(1): 111-117. 1991.

E. pastoensis (Kunth) Trin. (*Eragrostis boliviensis* Jedwabn.; *Eragrostis buchtienii* Hack.; *Eragrostis contracta* Pilg.; *Eragrostis lehmannii* Pilg.; *Eragrostis montufari* (Kunth) Steud.; *Eragrostis olmedoi* (Kunth) Steud.; *Eragrostis setifolia* (Benth.) Steud., nom. illeg., non *Eragrostis setifolia* Nees; *Eragrostis trichophylla* Benth.; *Eragrostis virescens* J. Presl; *Eragrostis virescens* var. *trichophylla* Hack.; *Eragrostis virescens* var. *trichophylla* (Benth.) Hack. ex Stuck.; *Megastachya montufarii* (Kunth) Roem. & Schult.; *Megastachya olmedoi* (Kunth) Roem. & Schult.; *Megastachya pastoensis* (Kunth) Roem. & Schult.; *Poa montufari* Kunth; *Poa olmedoi* Kunth; *Poa pastoensis* Kunth; *Poa setifolia* Benth.) (*Eragrostis buchtienii* Hack. dedicated to Dr. Otto Buchtien, b. 1859; "Crescit in montibus Peruanis et Loxae ad vias, juxta domum botanici hispani Don Vicente Olmedo..." Don Vicente de Olmedo, in 1790 in Ecuador; Colombia, Pasto, Mt. Arand; "Crescit in alta planitie Chillensi prope la Hacienda de Don Carlos Montufar...")

Brazil, Peru, Bolivia, Ecuador, South America. Perennial bunchgrass, tufted, erect, sometimes geniculate, leaf sheaths overlapping, ligule ciliate, leaf blades involute or flat, inflorescence contracted or open, panicle ovate, 2-8 florets, loosely overlapping spikelets, lemmas and glumes membranous, glumes broadly ovate to lanceolate, lemma with conspicuous lateral nerves, 3 stamens, along roadsides, dry rocky hillsides, slopes, pastures, see *Nova Genera et Species Plantarum* 1: 159-160. 1815 [1816], *Systema Vegetabilium* 2: 586-587. 1817, *Botanisches Archiv* 5(3-4): 205. 1824, *Reliquiae Haenkeanae* 1(4-5): 276. 1830, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 4,2(1): 71. 1836, *Nomenclator Botanicus. Editio secunda* 1: 563-564. 1840, *Plantae Hartwegianae* (Plantas Hartwegianas imprimis Mexicanas adjectis nonnullis Grahamianis enumerat novisque describit) 262. London 1846 [1839-1857], *Synopsis Plantarum Glumacearum* 1: 274-275. 1854, *Flora Australiensis: A Description ...* 7: 644. 1878, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 27(1-2): 32. 1899 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 37: 376. 1906, *Anales del Museo Nacional de Buenos Aires* 13: 505. 1906, *Repertorium Specierum Novarum Regni Vegetabilis* 6: 157. 1908, *Anales del Museo Nacional de Buenos Aires* 21: 138. 1911.

E. patens Oliv.

Kenya, Zambia, Uganda, Tanzania, Mozambique, South Africa. Annual, tufted, ruderal, erect to decumbent to procumbent, inflorescence spike-like, lemma mucronate or awned, palea keels hairy, native pasture species, found in disturbed places, open areas, overgrazed veld, on sandy soil,

seepages, see *Transactions of the Linnean Society of London* 29: 175. 1875, *Bulletin de la Société d'Histoire Naturelle d'Autun* 8: 382. 1895 and *Repertorium Specierum Novarum Regni Vegetabilis, Beihefte* 40: Anhang, 101. 1930; 323. 1931.

in English: annual love grass, spreading annual love grass
in southern Africa: kleinbosluisgras; chisokwechamuganu (Tonga)

E. patentipilosa Hack. (*Eragrostis patenti-pilosa* Hack.; *Eragrostis pseudosclerantha* Chiov.)

Kenya, Zambia, Tanzania, South Africa. Perennial, tufted, weak, geniculate culms rooting from the lower nodes, sometimes stoloniferous, leaf sheath keeled and hairy, ligule a ring of short hairs, open panicle, spikelets on pedicels of different lengths, spikelets gray to grayish green, little grazing value, growing in red clay soils, under trees, roadsides, uncultivated lands, disturbed areas, overgrazed and trampled veld, bare taches, see *Proceedings of the Rhodesia Scientific Association* 7(2): 67. 1908, *Missione Biologica nel Paese dei Borana, 4. Raccolte Botaniche* 285. 1939.

in English: footpath love grass

in southern Africa: voetpad-eragrostis

E. patentissima Hack.

South Africa, Transvaal. Perennial bunchgrass, tufted, geniculate at the base, rhizomatous, stout rhizomes, ligule a ring of short and long hairs, basal sheaths glabrous, leaf blade often rolled, inflorescence an ovate open spreading panicle, spikelets at the end of very long stalks, lemma acuminate, palea keels entire, attractive and ornamental, a palatable grass early grazed by cattle, forage, pasture, growing in rocky clay loam, open habitats, on alluvium, open areas, sandy seepages, disturbed areas, damp places, see *Bulletin de l'Herbier Boissier* 3(8): 391. 1895.

E. patula (Kunth) Steud. (*Eragrostis tenuifolia* (A. Rich.) Hochst. ex Steud.; *Megastachya patula* (Kunth) Roem. & Schult.; *Poa patula* Kunth; *Poa tenuifolia* A. Rich.)

Ecuador, Colombia to Bolivia, Africa. Perennial or annual, tufted, leaf blades acuminate, inflorescence oblong and delicate, 4- to 16-flowered, glumes and lemmas deciduous, glumes unequal and acute, lemmas oblong, 3 stamens, along roadsides, see *Nova Genera et Species Plantarum* 1: 158-159. 1815 [1816], *Systema Vegetabilium* 2: 585. 1817, *Nomenclator Botanicus. Editio secunda* 1: 564. 1840, *Tentamen Florae Abyssinicae ...* 2: 425. 1850, *Synopsis Plantarum Glumacearum* 1: 268. 1854.

E. paupera Jedw. (*Eragrostis falcata* sensu A.S. Hitchc., non Gaud. ex Steud.; *Eragrostis whitneyi* Fosberg; *Eragrostis whitneyi* var. *caumii* Fosberg) (named for Edward Leonard Caum, 1893-1952)

Hawaii. See *Botanisches Archiv* 5(3-4): 214. 1924, *Occasional Papers of the Bernice Pauahi Bishop Museum* 15(3): 39, f. 1b, 2a-b. 1939.

in English: Oahu love grass

E. pectinacea (Michx.) Nees ex Jedwabn. (*Eragrostis bri-zoides* Schult.; *Eragrostis caroliniana* (Biehler) Scribn.; *Eragrostis cognata* Steud.; *Eragrostis delicatula* Trin.; *Eragrostis diffusa* Buckley; *Eragrostis diffusa* var. *diffusa*; *Eragrostis nuttalliana* Steud.; *Eragrostis pectinacea* (Michx.) E. perennans Keng

China. In open fields, see *Sunyatsenia* 3(1): 16-17. 1935.

E. perennis Döll

Uruguay, Argentina, Brazil, Bolivia. Perennial bunchgrass, base fibrous, caespitose, erect, leaves mostly basal, leaf blades erect and linear, inflorescence oblong, panicle stiffly branched, spikelets clustered, 6- to 10-flowered, glumes unequal, lemmas ovate and imbricate, 3 stamens, see *Flora Brasiliensis* 2(3): 144. 1878.

E. pergracilis S.T. Blake (Latin *pergracilis*, *is*, *e* "very slender")

South Australia, Queensland, Western Australia, Northern Territory, New South Wales. Annual or short-lived perennial, spreading, tufted, smooth, simple, very slender, erect or decumbent or prostrate, filiform, leaf blades rolled, panicle contracted and often dense, spikelets linear-filiform and curved, glumes ovate and keeled or rounded on the back, entire or notched lemmas oblong or broadly elliptic, palea 2-keeled, dorsally flattened grain, grows in dry areas, silty loam, claypans, streamlines, mulga scrubs, similar to *Eragrostis dielsii*, see *Proceedings of the Royal Society of Queensland* 59(7): 154-155. 1948.

in English: love grass

E. peruviana (Jacq.) Trin. (*Eragrostis deserticola* Phil.; *Eragrostis peruviana* var. *brachythyrsa* Pilg.; *Koeleria multiflora* Regel & Herter; *Poa peruviana* Jacq.)

Chile, Peru. Annual, prostrate, leaves basal, ligule membranous, forage, common on loose sandy soils, see *Collectanea* 1: 107. 1786 [1787], *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Tropical Africa, South Africa, Europe. Annual, tufted to loosely tufted, slender and sometimes delicate, robust or weak, flimsy, foliage mostly basal, sometimes or rarely glandular, simple or sparsely branched, erect or usually ascending, often decumbent at the base then erect, spreading to erect, ligule a ring of short hairs, leaf sheaths loose, leaf blade flat or rolled, open inflorescence ovoid to pyramidal, lacy panicles sometimes nodding, hairs in the axils of the lower panicle branches, very narrow linear spikelets, gray or purple spikelets stipitate and breaking up from the

base upward, 3- to 7-flowered, florets loosely imbricate and erect, glumes unequal to very unequal and the lower very small, glumes and lemmas acute and smooth, stamens 3, very small grain oblong or elliptic-oblong, progenitor of teff, native pasture species, a good fodder, grains edible, famine food, drought resistant, weed species of cultivation and disturbed ground, fallow farmland, gravelly sites, disturbed habitats and gardens, along forest margins, old fields, vleis, damp muddy or sandy banks along streams, riverbanks, roadsides, wetlands, railroads, waste places, barnyards and sandy places, sandy soils in wet areas, see *Species Plantarum* 1: 68. 1753, *Nicolai Josephi Jacquin Miscellanea austriaca* ... 2: 364. 1781, *Flora Caroliniana, secundum* ... 80. 1788, *Icones et Descriptiones Plantarum, quae aut sponte* ... 1(3): 63, pl. 93. 1791, *Plantarum Novarum ex Herbario Sprengelii Centuriam* 10. 1807, *Icones et Descriptiones Graminum Austriacorum* 4: 15. 1809, *Essai d'une Nouvelle Agrostographie* 71, 162, 175-176. 1812, *Flora Americae Septentrionalis; or, ...* 1: 80. 1814, *Systema Vegetabilium* 2: 575. 1817, *Mantissa* 2: 318. 1824, *Hortus Regius Botanicus Berolinensis* 1: 191. 1827, *Révision des Graminées* 1: 113. 1829, *Flora Brasiliensis seu Enumeratio Plantarum* 2: 505-506. 1829, *Ann. E. psammophila S.M. Phillips

Somalia. Annual, slender, small, sheaths pilose, ovate panicle, spikelets narrow oblong, glumes unequal, diffuse open panicle, straight-sided spikelets, lemmas papery and

truncate at the tip, palea keels scabrid, glossy grain, dry bushland, on red sandy soils, related to *Eragrostis gloeophylla* S.M. Phillips, see *Kew Bulletin* 46(1): 111-117. 1991, *Kew Bulletin* 47(2): 277-282. 1992.

E. pseudo-obtusa De Winter (*Eragrostis obtusa* x *Eragrostis echinochloidea*)

South Africa. Perennial, erect, tufted, basal sheaths glabrous, inflorescence more or less dense and sparsely branched, spikelets congested, rachilla fragile, palea keeled and notched, growing in shallow sandy soils, disturbed places, along stream beds, in moist areas, dams, ditches.

in English: dew grass

E. pseudo-teff Peter

South Africa. See *Repertorium Specierum Novarum Regni Vegetabilis, Beihefte* 40: Anhang, 107, t. 65, f. 1, 1930; 331. 1931.

E. pseudopoa C.E. Hubb.

Tanzania. Indeterminate species, densely tufted, see *Kew Bulletin* 1934: 115. 1934.

E. pseudosclerantha Chiov. (*Eragrostis patenti-pilosa* Hack.)

East Africa, Ethiopia, South Africa. Perennial, short-lived, sprawling, often stoloniferous, geniculate, rooting at the nodes, leaves in a dense basal tuft, spikelets greenish, rachilla persistent, lower glume lanceolate, weed, common in stony areas, disturbed places, open habitats or under the trees, see *Proceedings of the Rhodesia Scientific Association* 7(2): 67. 1908, *Missione Biologica nel Paese dei Borana, 4. Raccolte Botaniche* 285. 1939.

in English: foothpath love grass

E. puberula Steud. (*Poa leptoclada* A. Rich.)

Abyssinia. See *Tentamen Florae Abyssinicae ...* 2: 422. 1850, *Synopsis Plantarum Glumacearum* 1: 268. 1854.

E. pubescens (R. Br.) Steud. (*Eragrostis brownii* Nees; *Poa pubescens* R. Br.)

Queensland, New South Wales, New Guinea. Perennial, loosely tufted, erect, prostrate or scrambling, eglandular, sprawling, leaf blade rolled, large open panicles, spikelets subsessile, florets 12-90 closely overlapping, glumes unequal, glumes and lemmas acute and glabrous, lemma 3- to 5-nerved, 3 stamens, in sandy soils along the coast, dunes, alluvial soils, see *Prodrum Florae Novae Hollandiae* 181. 1810, *Synopsis Plantarum Glumacearum* 1: 279. 1854 and *Blumea* 47(1): 157-204. 2002.

E. purpurascens (Spreng.) Schult. (*Eragrostis megapotamica* (Spreng.) Schult.; *Poa megapotamica* Spreng.; *Poa purpurascens* Spreng.)

South America, Uruguay. See *Novi Proventus Hortorum Academicorum Halensis et Berolinensis* 33. Halae [Halle] [1818 or 1819], *Mantissa* 2: 317. 1824, *Systema Vegetabi-*

lium, editio decima sexta 4: Cur. Post. 35. 1827, *Mantissa* 3(add. I): 617. 1827.

E. pusilla Hack. (*Diandrochloa pusilla* (Hack.) De Winter; *Eragrostis pusilla* Scribn. ex Beal, nom. illeg., non *Eragrostis pusilla* Hack.)

Africa, Kalahari. Annual, tufted, inflorescence branches spreading, found near water, sandy soil, see *Bulletin de l'Herbier Boissier* 4(App. 3): 27. Sep 1896, *Grasses of North America for Farmers and Students* 2: 481. Nov 1896 and *Bothalia* 7(2): 388, 389-390. 1960.

E. pycnantha (Phil.) Parodi ex Nicora (*Poa pycnantha* Phil.) (Greek *pyknos* "dense, numerous, compact, crowded" and *anthos* "a flower")

Chile. See *Anales de la Universidad de Chile* 94: 165. 1896 and *Gayana, Botánica* 51(1): 4. 1994.

E. pygmaea De Winter

Namibia. Annual, tufted, erect or decumbent, glandular, basal sheaths hairy to villous, inflorescence contracted, spikelets lanceolate, rachilla persistent, lemma acute, found in sandy flats, shallow depressions, desert, sand dunes, see *Bothalia* 10: 72. 1969.

E. racemosa (Thunb.) Steud. (*Eragrostis chalcantha* Trin.; *Poa chalcantha* (Trin.) Kunth; *Poa racemosa* Thunb.) (Greek *chalkeios* "of copper, of bronze," *chalkanthon* "solution of blue vitriol" and *anthos* "flower," Greek *chalcas, ados* for *chrysanthemon*, see Dioscorides)

Tropical and southern Africa, Sudan, Madagascar, Mozambique, Lesotho. Perennial bunchgrass, small to dwarf, densely tufted, dark green to reddish brown, upright, forming small tufts, leaves mostly basal, leaf sheath round and veined, inconspicuous ligule a ring of hairs, inflorescence open or contracted, dark greenish spikelets shortly pedicellate and slightly rough, rachilla persistent, glumes boat-shaped, often confused with *Eragrostis nindensis* Fical. & Hiern, pasture, relatively palatable, low grazing value, useful for ground cover and erosion control, common in heavily grazed areas, among other grasses, near water's edge, bushveld, open grassland, semiarid grasslands, rocky ground, moist sites, stony soils, vleis, riverbanks, clay loam, in heavy red clay soil, on sandy roadside, shallow sandy soil, see *Prodromus Plantarum Capensium*, ... 21. 1794, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 1(4): 401. 1830, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 339. 1833, *Synopsis Plantarum Glumacearum* 1: 271. 1854 and *Raccolte Botaniche (Embryophyta diploidalia) fatte dai Missionari della Consolata nel Kenya* 135. Modena 1935.

E. rigidior Pilg. (*Eragrostis seineri* Jedwabn.)

East Africa, Tropical Africa, Kalahari. Perennial, rigid, tufted or densely tufted, straight or geniculate, rooting at lower nodes, culm nodes glabrous, profusely branched, papery basal sheaths, ligule a ring of short hairs, leaf blade strongly curling when dry, leaves hard and coarse, open to slightly contracted panicle, lower branches in a whorl, spikelets linear to oblong, rachilla fragile, glumes unequal, native pasture species, forage, low palatability, low grazing value, giving a high yield, palatable only in the young stage, useful for erosion control, common in alluvial sand, sandy and heavy loamy soils, open areas, disturbed areas, open grassland, uncultivated lands, old cultivated lands, overgrazed veld, see *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 48: 347. 1912, *Botanisches Archiv* 5(3-4): 194. 1924.

in English: curly-leaved love grass, curlyleaf love grass, curly-leaf, broad-leaved love grass, broad-leaved curly leaf

in South Africa: blousaadgras, krulblaar, krulblaarpluimgras, breëkrulblaar, krulblaar-eragrostis, soetgras, kräusel straußgras

in southwest Africa/Namibia: kräusel strausgrass

E. rigidiuscula Domin

Australia, Northern Territory. Rare species, perennial, leaf sheaths overlapping, leaf blades curling when old, scabrous inflorescences, open spreading panicles, 3 stamens, see *Bibliotheca Botanica* 85: 393. 1915.

E. riobrancensis Judz. & P.M. Peterson (*Eragrostis retinens* Hack. & Arechav.)

South America, Brazil. Perennial, tufted, glabrous, unbranched, leaf blades somewhat pungent, leaves glabrous and coriaceous, ligules ciliolate, lemmas narrowly lanceolate, inflorescence ovate, spikelets linear-oblong, 7- to 17-flowered, florets closely overlapping, glumes lanceolate, lemmas lanceolate, palea keels scabrid, solitary cleistogamous spikelets hidden within the sheaths, 2 stamens, sandy places, riverbanks, grasslands, savannahs, lowland, see *Anales del Museo Nacional de Montevideo* 1: 445-446, t. 56. 1896 and *Brittonia* 42: 47, f. 1. 1990.

Sloane, *The Stapelieae.* Pasadena 1937; Stafleu and Cowan, *Taxonomic literature.* 4: 860-861. 1983) Zimbabwe, Zambia. Annual, tufted, geniculate, rooting at the nodes, basal sheaths glabrous, spikelets distant, rachilla fragile, lemma acute more or less mucronate, palea keels entire, growing in sand, disturbed sandy soils, see *Proceedings of the Rhodesia Sci. Assn.* 32: 56. Bulawayo 1933, *Bulletin of Miscellaneous Information Kew* 1934: 115. 1934.

E. rojasii Hack. (for the Paraguayan botanist Teodor (Teodoro) Rojas, 1877-1954, plant collector with E. Hasler; see Stafleu and Cowan, *Taxonomic literature.* 4: 868. Utrecht 1983)

South America, Paraguay. See *Repertorium Specierum Novarum Regni Vegetabilis* 7: 373. 1909.

E. rotifer Rendle (*Eragrostis margaritacea* Stapf)

Kalahari, South Africa, Botswana, Transvaal, Zambia, Zimbabwe, Tanzania, Mozambique, Namibia, Angola. Perennial, tufted, erect, sometimes decumbent, greenish white, stiff, glabrous, basal leaf sheaths densely hairy and keeled, sparsely branched, leaf blades rolled or expanded, ligule a fringe of short hairs, inflorescence open with the lowest branches whorled, glandular rings above and below the whorls, open drooping panicle, spikelets contracted, rachilla persistent, readily eaten in dry times, common in alluvial sand, damp places, ponds, sandy soils in moist areas, riverbeds, vleis, disturbed areas, see *Catalogue of the African Plants Collected by Dr. F. Welwitsch in 1853-61* 2(1): 242. 1899, *Flora Capensis* 7: 604. 1899.

in Namibia: vleipluimgras, vley straußgras

E. rottleri Stapf

South India, Tranquebar. Extinct, annual, leaves flat or convolute, panicles oblong and open, viscid below the panicle, rachilla persistent, spikelets linear, 6-12 flowers, glumes subequal, lemma oblong, palea persistent, 3 stamens, coastal, plains, see *The Flora of British India* 7(22): 321. 1897 [1896] and *Flora Presid. Madras* 1827. 1934, *Grasses of Burma ...* 513. 1960.

E. scabra Phil. (*Eragrostis mexicana* subsp. *virescens* (J. Presl) S.D. Koch & Sánchez Vega)

Chile. See *Hortus Regius Botanicus Berolinensis* 1: 190. 1827, *Reliquiae Haenkeanae* 1(4-5): 276. 1830, *Florula Atacamensis seu enumeratio ...* 55. 1860 and *Phytologia* 58: 380. 1985.

E. scaligera Salzm. ex Steud. (*Eragrostis bahiensis* non Schrad. ex Schult., sensu Lemée; *Eragrostis rufescens* var. *laurentiana* Benoist; *Eragrostis virginica* (Zuccagni ex Roemer) Steud.; *Poa virginica* Zuccagni ex Roemer)

South America, Brazil, U.S. Perennial, tufted, knotted, foliage mostly basal, ligules ciliolate-membranous, leaf blades attenuate, leaves coarse and glabrous, inflorescence both terminal and axillary, spikelets elliptical to linear-oblong, 9- to 45-flowered, florets closely overlapping, glumes lanceolate-ovate, 2 stamens, cleistogamous spikelets in the axils of the middle and upper leaves, common along sandy roadsides, coastal sand dunes, related to *Eragrostis bahiensis* and to *Eragrostis atrovirens*, see *Mantissa* 2: 319. 1824, *Synopsis Plantarum Glumacearum* 1: 277. 1854 and *Bulletin du Muséum d'Histoire Naturelle sér. 2*, 17: 69. 1945, *Fl. Guy. Franç.* 1: 92. 1955, *Brittonia* 27: 123-126. 1975.

in English: tender lovegrass, coastal lovegrass

E. schimperi (A. Rich.) Benth. (*Harpachne schimperi* A. Rich.) (for the German botanist Andreas Franz Wilhelm Schimper, (born Strasbourg, France) 1856-1901 (d. Basel, Switzerland), son of Wilhelm Philipp Schimper (1808-1880, d. Strasbourg, France [then part of Germany], professor of natural history and geology at the University of Strasbourg), interested in plant geography, worked with Julius von Sachs (1832-1897) at Würzburg, 1880-1881 traveled in the eastern United States, 1882-1883 with the German botanist Friedrich Richard Adalbert Johow (1859-1933) to the West Indies (Barbados, Trinidad, Venezuela and Dominica), 1886 Brazil, Jena 1888-1901 editor of *Botanische Mittheilungen aus den Tropen*, 1889-1890 Ceylon and Java, succeeds the German botanist Georg Albrecht Klebs (1857-1918) at Basel, 1898 professor of botany at the University of Basel, 1898-1899 with the German *Valdivia* Deep Sea Expedition (“Deutsche Tiefsee-Expedition”) for study of plankton, visited Cameroon, among his works are *Untersuchungen über die Proteinkristalloide der Pflanzen*. Strasbourg 1878, *Taschenbuch der medicinisch-pharmaceutischen Botanik und pflanzlichen Drogenkunde*. Strassburg 1886, *Die epiphytische Vegetation Amerikas*. Jena 1888, *Die indo-malaysche Strandflora ...* Jena 1891 and “Rhizophoraceae.” in *Nat. Pflanzenfam.* 3(7): 42-48.

1892 and 49-56. 1893, until 1898 worked in the laboratory of Eduard Adolf Strasburger (1844-1912) at Bonn. See A.P.M. Sanders, in *D.S.B.* 12: 165-167. 1981; J.H. Barnhart, *Biographical notes upon botanists*. 3: 225. 1965; H. Schenk, “A.F.W. Schimper.” in *Berichte der Deutschen botanischen Gesellschaft, XIX, Generalversammlungsheft*. 1: 54-70. 1901; Mary Gunn and Leslie E. Codd, *Botanical Exploration of Southern Africa*. 311. Pasadena 1937)

Tropical Africa, Arabia, Yemen. Annual or short-lived perennial, usually erect, simple or sparsely branched, sheaths and leaf blades usually pilose, glandular on the culms, a glandular ring below the culm nodes, ligule a ciliolate membrane, panicle open with short stiff spreading branches, spikelets breaking up from the bottom upward, florets tightly imbricate, lemmas cartilaginous, palea persistent, weed, along roadsides, on montane grassland, compacted soil, in high rainfall areas, loamy sand, waterlogged places, see *Annuario del Reale Istituto Botanico di Roma* 8(3): 368-369. 1908.

E. schweinfurthii Chiov. var. ***kiwuensis*** (Jedwabn.) S.M. Phillips (*Eragrostis kiwuensis* Jedwabn.)

Arabia, Yemen. Panicle contracted and spike-like, see *Botanisches Archiv* 5(3-4): 206. 1924, *Kew Bulletin* 42(4): 930. 1987.

E. sclerantha Nees (lemmas cartilaginous)

Africa. Perennial, densely tufted, basal sheaths hairy, ligule a fringe of short hairs, inflorescence an open panicle, unknown grazing value, growing among rocks and sandy soils, see *Florae Africae Australioris Illustrationes Monographicae* 388. 1841.

E. sclerantha Nees subsp. ***sclerantha***

Zimbabwe, Angola. Perennial, tufted, basal sheaths densely hairy to woolly, inflorescence spreading and dark olive-green, spikelets appressed to the branches or spreading, rachilla persistent, lemma acute, palea keels entire, growing in sandy soils.

E. sclerantha Nees subsp. ***villosipes*** (Jedwabn.) Launert (*Eragrostis sclerantha* Nees var. *villosipes* (Jedwabn.) De Winter; *Eragrostis villosipes* Jedwabn.)

Tropical Africa. Perennial, erect, densely tufted, basal sheaths densely hairy to woolly, leaves in a dense basal tuft, olive-green inflorescence contracted and narrow, spikelets appressed and usually solitary, rachilla persistent, see *Botanisches Archiv* 5(3-4): 202. 1924, *The Grasses and Pastures of South Africa* 166. 1955, *Boletim da Sociedade Broteriana, ser. 2* 35: 19. 1961.

E. sclerochlaena Chiov.

Africa. See *Annali di Bot.* 13: 57. 1914.

E. sclerophylla Trin. (*Poa sclerophylla* (Trin.) Kunth)

South America, Brazil. See *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 1(4): 412. 1830, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 340. 1833.

E. scopelophila Pilg. (*Eragrostis karasbergensis* L. Bolus) (Greek *skopelos* "a high rock, peak," referring to the habitat) (the South African botanist Harriet Margaret Louisa Bolus (née Kensit), 1877-1970, with Frank Bolus, 1870-1945, and R. Glover wrote "Flowering plants and ferns collected on the Great Karasberg by the Percy Sladen Memorial Expedition, 1912-1913." *Ann. Bolus Herb.* 1: 9-19, 72-75, 97-114. 1914-1915)

Namibia, Karasberg, Africa. Perennial, shrubby, dwarf, much branched from the nodes, wiry, hard, smooth, erect or geniculate, woody at the base, many nodes, leaf blade expanded, ligule a whorl of short hairs, leaf sheaths rounded and smooth, basal sheath glabrous, greenish inflorescence, open and rigid panicle, rachilla persistent and fragile, pedicels of all spikelets with glandular rings, pasture, fairly palatable when green, growing in mountainous regions, steep slopes, see *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 51(3-4): 421. 1914.

in South Africa: bergpluimgras, fels straußgras

E. scotelliana Rendle

Tropical Africa. Annual, loosely tufted, aromatic, strongly lemon scented, rocky sites, see *Journal of the Linnean Society, Botany* 30: 99. 1894.

E. secunda Nees ex Steud. (*Eragrostiella bifaria* var. *secunda* (Nees ex Steud.) Lazarides; *Eragrostiella secunda* (Nees ex Steud.) Bor)

Asia, Sri Lanka. See *Synopsis Plantarum Glumacearum* 1: 326. 1896 and *Indian Forester* 66: 270. 1940, *Contributions from Herbarium Australiense* 22: 6. 1976.

in English: tumble lovegrass

E. seticaulis Chiov.

Africa. See *Nuov. Giorn. Bot. Ital. n. ser.* 26: 70. 1919.

E. setifolia Nees (*Eragrostis chaetophylla* Steudel; *Eragrostis setifolia* (Benth.) Steud., nom. illeg., non *Eragrostis setifolia* Nees; *Poa setifolia* Benth.) (Greek *chaite* “bristle, mane, crest, foliage” and *phyllon* “a leaf”)

Australia. Perennial without arching stolons, eglandular, rhizomatous, compact, tufted, simple, thin or slender and wiry, forming spreading clumps, hairy and knotty swollen base, leaves flat or inrolled and linear, leaf blades with sharp and thickened margins, green and contracted inflorescence rather loose to dense, flattened and linear spikelets straight or curved, florets 9-36(-70) rounded on the back or keeled glumes ovate and more or less entire or notched, lemmas keeled and with hyaline margins, palea 2-keeled, 2-3 stamens, heavy seeding, a decreaser species, an indicator of good range condition, survive severe droughts, responds rapidly to rainfall, heavily grazed in poor seasons, useful pasture grass, moderately palatable, valuable fodder, eaten green or dry by domestic stock and kangaroos, unpalatable with age, ornamental when in flower, common in moist soils, open habitats, on cracking clay and fine alluvial soils, arid and semiarid areas, heavy or light clay soils, degraded areas, see *Hooker's Journal of Botany and Kew Garden Miscellany* 2: 419. 1843, *Plantae Hartwegianae* (Plantae Hartwegianae imprimis Mexicanas adjectis nonnullis Grahamianis enumerat novasque describit). 262. London 1839-1857, *Synopsis Plantarum Glumacearum* 1: 274, 279. 1854, *Flora Australiensis: A Description ...* 7: 649. 1878.

in English: bristly love grass, neverfail, neverfail grass, narrow-leaved neverfail, narrow-leaf neverfail

Pilg.; *Poa solida* (Nees) Kunth)

Paraguay, Bolivia, Argentina, Brazil. Perennial, erect, caespitose, leaf blades rigid and acuminate to pungent, inflorescence oblong to ovate, spikelets elliptic-oblong and clustered, 10- to 22-flowered, glumes subequal, lemmas elliptic or oblong, 2 stamens, weed, grassland, sandy areas, weel drained soil, rocky sites, open habitats, see *Mantissa* 2: 319. 1824, *Flora Brasiliensis seu Enumeratio Plantarum* 2: 501. 1829, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 336. 1833, *Synopsis Plantarum Glumacearum* 1: 277. 1854, *Flora Brasiliensis* 2(3): 152. 1878 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 30(1): 141. 1902, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 70(3): 346, 347. 1939.

E. soratensis Jedwabn. (*Eragrostis botterii* E. Fourn.; *Eragrostis brachypodon* Hack.; *Eragrostis lugens* Nees) (Bolivia, La Paz, Sorata, Ticacirca)

Peru, Bolivia, Argentina. Perennial, caespitose, erect or decumbent, leaf blades acuminate, inflorescence ovate or oblong, spikelets ovate or oblong, 3- to 6-flowered, glumes unequal and acute, lemmas ovate and imbricate, 3 stamens, chaparral, stony places, see *Flora Brasiliensis seu Enumeratio Plantarum* 2: 505-506. 1829, *Mexicanas Plantas* 2: 115. 1886 and *Botanisches Centralblatt* 120: 548. 1912, *Botanisches Archiv* 5(3-4): 213. 1924, *Contributions from the Gray Herbarium of Harvard University* 184: 1-223. 1958.

E. sororia Domin (*Eragrostis diandra* var. *gillivrayi* Domin)

Queensland, Victoria, New South Wales, New Guinea. Perennial, polymorphic, tufted, erect or scrambling, leaf blade flat or rolled, inflorescence open or contracted and interrupted, spiciform panicle, florets 5-25, glumes deciduous, glumes and lemmas acute, lemma gibbous, 2 stamens, sometimes cleistogamous, on sandy soils, in woodland and native pasture, see *Biblioth. Bot.* 20(85): 399, pl. xvi, f. 1-5. 1915.

E. spartinoides Steud. (*Eragrostis brownii* Nees; *Eragrostis cumingii* var. *novaguineensis* Jansen; *Eragrostis elongata* var. *brachyclados* Domin; *Eragrostis elongata* var. *festucoides* Domin)

The Philippines, Australia. Perennial, tufted, wiry, open panicles, many-flowered spikelets, glumes and lemmas cartilaginous, 2-3 stamens, strongly compressed grain, see *Catalogue of Indian Plants* 105. London 1833-1837, *Synopsis Plantarum Glumacearum* 1: 265. 1854 and *Biblioth. Bot.* 20(85): 400. 1915, *Reinwardtia* 2: 271. 1953.

E. speciosa (Roemer & Schultes) Steudel (*Eragrostis oldfieldii* Domin; *Poa speciosa* Roem. & Schult.)

South Australia, Queensland, Northern Territory, Western Australia, New South Wales. Perennial, tufted, compact, forming slender tussocks, bright bluish green, mostly simple, eglandular, linear and rolled leaves, inflorescence contracted and often interrupted, grayish and narrow panicles spike-like often or sometimes drooping, flattened and clustered spikelets, florets 9-69(-145) closely overlapping, glumes and lemmas acute and keeled, palea 2-keeled, 2 stamens, very hardy species, useful for erosion control, semi-arid areas, alluvial beds, sandy floodways, see *Systema Vegetabilium* 2: 573. 1817, *Synopsis Plantarum Glumacearum* 1: 279. 1854.

in English: handsome love grass

E. spectabilis (Pursh) Steud. (*Eragrostis geyeri* Steudel; *Eragrostis pectinacea* var. *spectabilis* (Pursh) A. Gray; *Eragrostis spectabilis* var. *sparsihirsuta* Farw.; *Eragrostis spectabilis* var. *spectabilis*; *Eragrostis velutina* Schrad.; *Erochloe spectabilis* (Pursh) Raf. ex B.D. Second Edition* 565. 1856, *Index Kewensis* 1: 886. 1893 and *American Midland Naturalist* 10: 306. 1927.

in English: purple love grass, petticoat climber, sand love grass, tumbleweed lovegrass, tumble grass, ice cream grass

E. spicata Vasey (*Eragrostis spicata* (Heyne ex Stapf) Jeddabn., nom. illeg., non *Eragrostis spicata* Vasey; *Sporobolus tenuispica* Hack.)

Mexico, Paraguay. Robust, shade species, see *Botanical Gazette* 16(5): 146. 1891, *The Flora of British India* 7: 313. 1897 and *Repertorium Specierum Novarum Regni Vegetabilis* 6(21-26): 344. 1909, *Archives de Botanique* 5(3-4): 185. 1924.

in English: spiked lovegrass, spicate lovegrass, spike lovegrass

E. squamata (Lam.) Steud. (*Poa squamata* Lam.)

Tropical Africa, Zaire, Mali, Ghana, Nigeria. Perennial, caespitose, grazed by all stock, waste places, along roadsides, sandy areas, see *Encyclopédie Méthodique, Botanique* 1: 185. 1791, *Synopsis Plantarum Glumacearum* 1: 274. 1854.

in Nigeria: obumbe

in Senegal: diambul, firand, jambul, selguf u tan

in Sierra Leone: funfuri, ka soi, wunsune

E. stagnalis Lazarides

Australia, Northwest Territories, Queensland. Perennial, slender, tufted, erect, eglandular, open drooping panicles, 3 stamens, see *Austral. Syst. Bot.* 10: 152. 1997.

E. stapfii De Winter

Southern tropical Africa. Perennial, erect, tufted, basal sheaths glabrous, leaves in a dense basal tuft, inflorescence open with lowest branches whorled, lemma not strongly keeled, growing in sandy soils, shallow sand, in wet disturbed areas, see *The Grasses and Pastures of South Africa* 152. 1955.

E. stenoclada J. Presl (*Eragrostis elongata* (Willd.) J. Jacq.; *Eragrostis gangetica* (Roxb.) Steud.; *Poa gangetica* Roxb.; *Poa stenoclada* (J. Presl) Kunth)

Peru, the Philippines. See *Enumeratio Plantarum Horti Botanici Berolinensis, ...* 1: 108. 1809, *Eclogae Graminum Rariorum* 3. 1813, *Flora Indica; or Descriptions ...* 1: 341. 1820, *Reliquiae Haenkeanae* 1(4-5): 278. 1830, *Révision des Graminées* 1: Suppl. XXVIII. 1830, *Enum. Pl.* 1: 343. 1833, *Synopsis Plantarum Glumacearum* 1: 266. 1854.

E. stenostachya (R. Br.) Steud. (*Poa stenostachya* R. Br.)

Australia, Northwest Territories. Perennial, erect or stoloniferous, leaf blades acute, open panicles, unequal glumes, palea keels short, 3 stamens, see *Prodromus Florae Novae Hollandiae* 181. 1810, *Synopsis Plantarum Glumacearum* 1: 279. 1854.

E. stenothyrsa Pilg.

South Africa. Perennial, tufted, leaves in a dense basal tuft, inflorescence contracted, spikelets yellowish to purplish,

rachilla persistent, growing in moist areas, see *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 51(3-4): 421. 1914.

E. sterilis Domin

Australia, Queensland. Perennial, eglandular, tufted, compact, erect, panicles loose to dense, linear spikelets, many closely overlapping florets, glumes unequal, stamens usually 2, see *Bibliotheca Botanica* 85: 403, pl. xvi, figs. 6-8. 1915.

E. stolonifera A. Camus

Madagascar. See *Notulae Systematicae. Herbarium de Paris* 13: 263. 1949.

E. suaveolens A.K. Becker ex Claus (*Eragrostis minor* var. *suaveolens* (A.K. Becker ex Claus) Schmalh.; *Eragrostis suaveolens* Koch)

Eurasia, Russia. See *Beiträge zur Pflanzenkunde des Russischen Reiches* 8: 266. 1851.

in English: candy lovegrass

E. subsecunda (Lam.) E. Fourn. (*Poa subsecunda* Lam.)

Southern China, Southeast Asia, Malesia. Perennial, erect or decumbent, wiry, ovate panicles loosely contracted, spikelets linear shortly pedicellate, stamens 3, see *Mexicanas Plantas* 2: 118. 1886.

E. subtilis Lazarides

Australia. Perennial, very slender, leaf blades rolled, open panicles with stiffly spreading spikelets, lemma 1- to 3-nerved, stamens 3, grain compressed, similar to *Eragrostis lacunaria*, in red sands, near water courses, saline soils, see *Australian Systematic Botany* 10(1): 155, 1997.

E. superba Peyr. (*Eragrostis superba* f. *contracta* Piovano; *Eragrostis superba* f. *expansa* Piovano; *Eragrostis superba* var. *contracta* Peter)

Southern and tropical Africa. Perennial bunchgrass, densely tufted, tussocky, tough, smooth, erect or ascending, often geniculate, glabrous, simple or with a sparsely branched base, sometimes branched at the nodes, green vegetative growth, leaves coriaceous, leaf sheaths keeled, basal leaf sheaths persistent, curved ciliate ligule, leaves flat or involute, spike-like panicle, secondary axes rarely branched, spikelets strongly laterally compressed, florets strongly overlapping, spikelets toothed at the sides and heart-shaped, coriaceous glumes persistent and lanceolate, lemmas winged, palea keels broadly winged and thickened, 3 stamens, heavy seeder, escaped from cultivation, large seed-heads rather ornamental, very to fairly palatable, utilized as hay, forage, cultivated fodder, gives a high yield, weed of cultivation, native pasture species, stemmy and unpalatable at maturity, quick growing, dense undergrowth provides a habitat for wildlife, useful for erosion control and stabilization of bare soils, used for reseeding denuded land in dry areas, good drought tolerance, high tolerance to salinity and

alkalinity, grows on poor sandy soils, plains, omiramba, slopes, stony soils, sandy clay loam brushland, coastal bushland, in arid and semiarid land, in wooded grassland, disturbed sandy clay, disturbed sandy roadside, on dry sandy beach, disturbed rocky roadside, red sandy soil, clay loams and clays, shallow rocky clay, clay loam grassland, gravelly grassland, alluvial sand and irrigated orchards, black clay soil, drainage furrows, see *Sitzungsberichte der kaiserlichen Akademie der Wissenschaften. Wien. Mathematisch-naturwissenschaftliche Classe* 38: 584. Vienna 1860 and *Repertorium Specierum Novarum Regni Vegetabilis, Beihefte* 40: Anhang, 107, t. 63, f. 2, 1930; 330. 1931, *N. Giorn. Bot. Ital.* 63: 682. 1957.

in English: flat-seed love grass, heart-seed grass, heart-seed love grass, veld love grass, love grass, Masai love grass, sawtooth love grass, Wilman love grass, Wilman's love grass

in Spanish: pasto avena

in southern Africa: bosluissaadgras, bosluisgras, weeluisgras, breësaadgras, herz straußgras, buffelsgras, hartjiesgras, knoppiesgras, plakkiesgras, platsaad-eragrostis, platsaadgras, skulpsaadjiegras, soetgras, visgras, werluisaadgras, weeluiseragrostis; kampinupinu (Tonga); umadolwana (Zulu)

in Mozambique: cununo

in southwest Africa/Namibia: strausgras

E. swallenii A.S. Hitchc. (for the American botanist Jason Richard Swallen, 1903-1991, agrostologist, with U.S.D.A Bureau of Plant Industry, among his works are "Three new grasses from Mexico and Chile." *J. Wash. Acad. Sci.* 26: 207-209. 1936 and "Gramineae." in *Flora of Panama. Ann. Missouri Bot. Gard.* 30: 104-280. 1943; see J.H. Barnhart, *Biographical notes upon botanists.* 3: 351. 1965; T.W. Bosser, compil., *Biographical dictionary of botanists represented in the Hunt Institute portrait collection.* 390. 1972; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University.* 1917-1933; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico.* University of Pennsylvania Press, Philadelphia 1964)

U.S., Mexico. Fodder, common on sandy prairie, see *Journal of the Washington Academy of Sciences* 23(10): 451. 1933.

in English: Swallen's love grass, Swallen lovegrass

in Mexico: pasto

E. sylviae Cope (named for Sylvia M. Phillips)

Africa, Malawi. Perennial, tufted, basal leaf sheaths glabrous, inflorescence branches stiff, rachilla concealed, on montane grassland, see *Kew Bulletin* 53(1): 163, 7J-K. 1998.

E. taffzagra Steud.

Abyssinia. See *Synopsis Plantarum Glumacearum* 1: 268. 1854.

E. tef (Zuccagni) Trotter (*Cynodon abyssinicus* (Jacq.) Raspail; *Eragrostis abessinica* (Jacq.) Link; *Eragrostis abyssinica* (Jacq.) Link; *Eragrostis abyssinica* Link; *Eragrostis pilosa* (L.) P. Northeast Africa, Ethiopia. Annual bunchgrass, upright or spreading, solitary or tufted, slender, glabrous, forming scanty tufts, ligule a ring of hairs, leaf sheath usually rounded, leaf-blades narrow and folded, inflorescence pendent and loose, inflorescence open or contracted, panicle narrow with long flexuous drooping branches, spikelet usually 5-flowered, spikelets lanceolate and long-stipitate breaking up very slowly at maturity, florets persistent, rachilla persistent, glumes unequal, lemma lanceolate-oblong and persistent, palea keels scabrous, 3 stamens, violet-red and white varieties, famine crop possibly derived from *Eragrostis pilosa* (L.) P. Beauv., edible seeds, one of the faster growing hay crops known, food and fodder, straw used in brick manufacture, cultivated cereal, high grazing value, extremely palatable and very well grazed, valuable hay and pasture grass suitable for all kinds of stock, widely grown for hay, seed eaten by wildlife and cattle, cultivated by the ancient Egyptians, a staple cereal in Ethiopia, grain crop species, good for erosion control, in Ethiopia grains ground to flour and used for making unleavened bread and a pancake (*injera*), susceptible to frost, tolerant of drought, common on sandy loams or black soils, flood channels, weedy places, gardens, cultivated lands, disturbed veld, heavy loams, waste ground, along roadsides, similar to *Eragrostis pilosa*, see *Nicolai Josephi Jacquin Miscellanea austriaica ...* 2: 364. 1781, *Prodromus stirpium in horto ad Chapel Allerton vigentium*. 20. Londini [London] (Nov-Dec) 1796, *Essai d'une Nouvelle Agrostographie* 71, 162, 175. 1812, *Annales des Sciences Naturelles (Paris)* 5: 302. 1825, *Hortus Regius Botanicus Berolinensis* 1: 192. 1827 and *Synopsis der mitteleuropäischen Flora* 2: 374. 1900, *Bollettino della Società Botanica Italiana* 1918: 62. 1918, *Nuova Flora Analitica d'Italia* 1: 123. 1923, *Atti dell'Istituto Botanico dell'Università di Pavia* 2: 168. 1944, Amanda L. Old World Tropics. Annual or short-lived perennial, delicate, slender and leafy, flimsy, tufted to loosely tufted to densely tufted, loose, small, frequently branched, more or less erect or widely spreading or geniculate, often decumbent, semiprostrate, leaf-sheaths slipping from the culm, sheaths glabrous or pubescent to pilose, ligule a fringe of hairs, leaves mostly basal narrow-acuminate and flat, fragile root system, inflorescence loose and open with spreading spikelets, long narrow terminal panicle ovoid to oblong, small spikelets oblong and short-stipitate breaking up from the top upward, loosely imbricate florets, all flowers bisexual or the upper ones rudimentary, rachilla fragile, glumes 2 usually unequal and membranous, lemma blunt and oblong, keels of palea long-ciliate, stamens 3, stigmas white, very nutritious grains, weed species springing up after rain, grows quickly, a good grazing grass, eaten by cattle and horses, grazed by water buffaloes, limited fodder value, hay, low quality forage, often a synonym for *Eragrostis amabilis* (L.) Wight & Arn. ex Nees, found in moist sandy soils, well-grazed grassland, sand banks, lawns, on damp sand, disturbed places, waste places, cultivated lands, gardens, dry rocky soils, along roadsides, arable land, see *Species Plantarum* 1: 68-69. 1753, *Flora Japonica, ...* 51. 1784, *Observationes Botanicae* 4: 20. 1786, *Der Gesellschaft Naturforschender Freunde zu Berlin, neue Schriften* 4: 185. 1803, *Essai d'une Nouvelle Agrostographie* 74, 167, 173. 1812, *Systema Vegetabilium, editio decima sexta* 2: 576. 1817, *Annales des Sciences Naturelles, Botanique* 5:

E. tenellula (Kunth) Steudel (*Eragrostis interrupta* P. Beauv. var. *tenuissima* Stapf ex Hook.f.; *Eragrostis japonica* sensu Jessop, non (Thunb.) Trin.; *Eragrostis japonica* (Thunb.) Trin.; *Eragrostis tenella* sensu Benth., non (L.) P. Beauv. ex Roem. & Schult.; *Poa tenellula* Kunth)

Australia, Africa, Asia. Annual, delicate, loosely or densely tufted, simple or often branched, erect or ascending or semi-prostrate, leaf blades flat, ligule a fimbriate membrane, often drooping panicles open and decompound, spikelets linear 3- to 12-flowered, terminal floret vestigial, glumes persistent, lemmas ovate, palea 2-keeled 3-lobed, 2 stamens, grows in dry and tropical areas, in disturbed places, not grazed, moderately palatable, related to *Eragrostis japonica*, see *Flora Japonica*, ... 51. 1784, *Révision des Graminées* 1: 113. 1829, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 1(4): 405. 1830, *Synopsis Plantarum Glumacearum* 1: 279. 1854.

in English: delicate love grass

E. tenuiflora Rupr. ex Steud. (*Eragrostis pilosa* (L.) P. Beauv.; *Poa pilosa* L.)

Africa, Ethiopia. See *Species Plantarum* 1: 68. 1753, *Essai d'une Nouvelle Agrostographie* 71, 162, 175. 1812, *Synopsis Plantarum Glumacearum* 1: 268. 1854.

E. tenuifolia (A. Rich.) Hochst. ex Steud. (*Eragrostis callocarpa* K. Schum., also spelled *collocarpa*; *Eragrostis parviglumis* Hochst. ex Steud.; *Eragrostis patula* (Kunth) Steud.; *Eragrostis tenuifolia* (A. Rich.) Steud.; *Eragrostis tenuifolia* Hochst.; *Poa patula* Kunth; *Poa tenuifolia* A. Rich.)

Tropical Africa, North Africa, Asia. Annual or short-lived perennial, widely naturalized, tufted, weak, slender, glandular, erect or rarely geniculate, branched, thick clumps, compressed basal shoots, tough leaves and stems, leaf sheath loose and keeled, ligule a hairy ring, light green leaves long and very narrow, lax and open panicle oblong to ovate, diffuse seed head, elongated spikes, axils of inflorescence branches hairy, spikelet margin serrate, spikelets greenish brown to dark green breaking up from the bottom upward, florets loosely imbricate, rachilla persistent, glumes unequal or subequal, glumes and lemmas obscurely keeled or not keeled, palea 2-keeled, 3 stamens, seeds reddish brown and very small, low grazing value due to its wiry leaves, a problem weed of sportsfields and parks, a weed of cultivation, colonizing large areas, quickly builds up a huge seedbed, grazed by the cattle, grows in recreation and camping areas, football fields, on rocky soil, sandy and gravelly soils, turf, arable lands and undisturbed areas, disturbed open areas, tea estates, forests, wadi, open habitats, open grassland, grassland subject to heavy grazing, grasslands, infertile and compacted sites, edge of river, in moist places, muddy sites, open patches in bushveld, playgrounds, footpaths and other high traffic areas, allied to *Eragrostis plana*, see *Nova Genera et Species Plantarum* 1: 158-159. 1815 [1816], *Systema Vegetabilium* 2: 585. 1817, *Nomenclator Botanicus. in English: love grass

E. terecaulis Renvoize (Latin *teres*, *retis* (*tero*) "rounded off, smoothed, shapely" and *caulis* "the stalk, the stem of a plant")

Bolivia. Perennial, caespitose, geniculate, leaf blades linear and acute, lax inflorescence oblong or ovate, spikelets narrowly oblong, 3- to 5-flowered, glumes lanceolate and membranous, lemmas lanceolate, paleas exserted, 3 stamens, see *Gramíneas de Bolivia* 324. 1998.

E. trachyantha Cope

Somalia. Annual, erect or geniculate and ascending, leaves without crateriform glands on the margins, spikelets linear,

glumes unequal and very acute, lemmas coriaceous, palea keels scabrous, see *Kew Bulletin* 50(1): 115, f. 3C-D. 1995.

E. trachycarpa (Benth.) Domin (*Eragrostis nigra* var. *trachycarpa* Benth.)

New South Wales, Queensland, Victoria. Perennial, small tussock grass, small basal tuft yellowish green, leaf blade rolled, slender much-branched stems, wide spreading panicle, spikelets loosely flowered, florets 2-7 loosely overlapping, upper floret vestigial, glumes and lemmas acute and keeled, palea glabrous 2-keeled 3-toothed, 3 stamens, grows on dry soils, occurs in woodland or native pasture, moist depressions, damp sites, the plant is regarded as vulnerable, see *Flora Australiensis: A Description ...* 7: 643. 1878 and *Repertorium Specierum Novarum Regni Vegetabilis* 9: 552. 1911.

in English: rough-grain love grass

E. tracyi A.S. Hitchc. (*Eragrostis pectinacea* (Michx.) Nees; *Eragrostis pectinacea* var. *tracyi* (Hitchc.) P.M. Peterson)

U.S., Florida. Vulnerable species, see *Flora Boreali-Americana* 1: 69. 1803, *Florae Africae Australioris Illustrationes Monographicae* 406. 1841 and *American Journal of Botany* 21(3): 130, f. 1. 1934, *Sida* 17(1): 106. 1996.

in English: Sanibel lovegrass

E. tremula Hochst. ex Steud. (*Eragrostis lamarckii* Steud.; *Eragrostis multiflora* Trin.; *Eragrostis rhachitricha* Hochst. ex Miq.; *Eragrostis serpula* Chiov.; *Poa multiflora* Roxb., nom. illeg., non *Poa multiflora* Forssk.; *Poa tremula* Lam.)

Tropical Africa, India, Nepal, Southeast Asia, Pakistan. Annual or short-lived perennial, densely tufted to loosely tufted, smooth and glabrous, very leafy, often decumbent, erect or geniculately ascending, trembling, aromatic roots, sheaths striate and bearded, ligule a rim of short stiff hairs, leaves mostly basal and finely pointed, inflorescence a pyramidal panicle rather loose and widely spreading, long-pediced and trembling spikelets, 15- to 60-flowered, florets closely imbricate, glumes subequal and narrowly ovate, lemmas ovate and membranous, palea keels scaberulous, thatching grass, useful for erosion control, quite palatable, a very good fodder grass, eaten by all animals, can be ensilaged or used for broom production, used to make mats and cordage, famine food, grains eaten, a sand-loving species, ruderal, common in abandoned cultivation, waste places, sandy roadside, on poorly cultivated ground, in low rainfall areas, on sandy soils and light sandy soils, resembling *Eragrostis elegantissima*, see *Encyclopédie Méthodique, Botanique* 1: 185. 1791, *Flora Indica; or Descriptions ...* 1: 340. 1820, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 1(4): 401. 1830, *Analecta botanica indica ...* 2: 25. 1851, *Synopsis Plantarum Glumacearum* 1: 269. 1854 and *Annuario del Reale Istituto Botanico di Roma* 8(1): 66-67. 1903.

in English: hairy-sheath love grass

E. trichodes (Nutt.) Alph. Wood (*Eragrostis capillacea* Jedwabn.; *Eragrostis grandiflora* J.G. Sm. & Bush; *Eragrostis pilifera* Scheele; *Eragrostis tenuis* Steud.; *Eragrostis tenuis* A. Gray, nom. illeg., non *Eragrostis tenuis* Steud.; *Eragrostis tenuis* var. *texensis* Vasey; *Eragrostis trichodes* var. *pilifera* (Scheele) Fernald; *Eragrostis trichodes* var. *trichodes*; *Poa trichodes* Nutt.)

U.S., Texas. Perennial bunchgrass, vigorous, flimsy, erect, tufted, stiff, rooting at the nodes, dark green, sheaths hairy at the throat, a ring of hairs at the base of the leaf, leaves long-acuminate and flat, loose inflorescence oblong to elliptic, green or purple spikelets lanceolate to lanceolate-oblong and long-stipitate, glumes narrow lanceolate, lemma ovate-oblong, panicles elegant, deep root system, small seed, good drought resistance, ornamental, suitable for reclaiming disturbed sites, forage, fodder, highly palatable and nutritious, leaves tender and palatable at all stages of growth, found in silty clay, gravelly loam, on sandy soils, open alluvial lands, sandy hills, sand prairie, border of lakes, prairies, heavy soils, see *Transactions of the American Philosophical Society, new series*, 5: 146. 1835, *Linnaea* 22(3): 344. 1849, *Synopsis Plantarum Glumacearum* 1: 273. 1854, *A Class-book of Botany* 796. 1861, *A Manual of the Botany of the Northern United States (edition 6)* 661. 1890, *Contributions from the United States National Herbarium* 1(2): 59. 1890, *Annual Report of the Missouri Botanical Garden* 6: 117, t. 55. 1895 and *Botanisches Archiv* 5(3-4): 196. 1924, *Rhodora* 40(477): 331. 1938.

in English: love grass, sand love grass, icre cream grass, tall love grass, thread love grass

E. trichophora Coss. & Durieu (*Eragrostis atherstonei* Stapf, also spelled *atherstonii*; *Eragrostis henrardii* Jansen; *Eragrostis trichophora* var. *glabriculumis* Hack. ex Pilg.) (the English (b. Nottingham) botanist William Guybon Atherstone, 1814-1898 (d. Grahamstown, C.P., South Africa), physician and plant collector, geologist, naturalist; see Mary Gunn and Leslie E. Codd, *Botanical Exploration of Southern Africa*. 82-83. Cape Town 1981)

South Africa, tropical Africa, Kalahari, Transvaal. Perennial bunchgrass, glandular on culms and leaf sheaths, usually branched from the lower nodes, sometimes stoloniferous, erect or geniculate, wiry, slender, tufted, sometimes rooting at the lower nodes, may form dense stands, leaves pointed, leaf blades expanded or rolled, basal sheaths papery, ligule a ring of short hairs, leaf sheaths keeled, open panicle with stiff branches arranged in whorls around the primary axis, hairy ring immediately beneath each whorl, rachilla fragile and persistent, glumes almost equal, 2-3 stamens, pioneer grass, forage, relatively palatable, invasive, a good grass for

thatching, found in and around pools formed by overflowing rivers, ducks nest underneath it, common in grassland, clay loam, drains, omiramba, savannah, red clay soil, sandy areas, sandy to sandy loam soils, bushveld, disturbed areas, overgrazed veld, border of rivers, overflowing rivers, along roadsides, in and around pools formed in periodically flooded areas, similar to *Eragrostis curvula*, closely related to *Eragrostis cylindriflora*, see *Bulletin de la Société Botanique de France* 2: 311. 1855 and *Flora Capensis* 7: 607. 1900, *Blumea, Supplement* 3: 42. 1946, *Willdenowia* 1: 218. 1954.

in English: Atherstone's grass, Atherstone love grass, love grass, hairy love grass, Cochise love grass

in South Africa: blousaad, blousaadgras, blousaad soetgras, harige-pluimgras, haariges straußgras, soetgras, behaarde pluimgras, behaarde windhalmgras

in Zimbabwe: umachitshane

E. tridentata Cope

Somalia. Annual, inflorescence capitate subtended by the elongated uppermost leaves, spikelets elliptic-oblong, florets lax and divergent, glumes lanceolate, lemmas oblong 3-toothed or 3-nerved, palea keels hairy, open areas, rocky places, coastal plains, see *Kew Bulletin* 47(2): 280. 1992.

E. triquetra Lazarides

Australia. Perennial, slender, compact, tufted, filiform, curly leaves, panicles contracted, 2-3 stamens, see *Australian Systematic Botany* 10(1): 162. 1997.

E. truncata Hack.

Namibia, South Africa. Perennial, erect or geniculate, prostrate or decumbent, tufted to densely tufted, slender, glabrous, smooth, dark nodes conspicuous, rhizomatous, short and profusely branched rhizome, mat-forming, ligule a fringe of short hairs, leaf blade very short and hard, basal sheaths densely woolly, leaves rigid, compact panicle, spikelets sessile and closely packed on central axis, lowest lemma truncate, pasture, palatable, common along disturbed roadsides, see *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 11: 405. 1889.

in South Africa: bloupolgras, gemsbokgras, gestutzähriges straußgras

E. turgida (Schumach.) De Wild. (*Poa turgida* Schumach.)

Tropical Africa. Annual, loosely tufted, grain eaten in time of scarcity, good grazing, weedy places, along roadsides, see *Beskrivelse af Guineiske planter* 66-67. 1827.

in Guinea: diadié, ologonelé

in Nigeria: alkamar kwadi, ite emo, iti emo, samereeho, vutaleho

E. turgida (Schumach.) De Wild. var. *iverensis* Chevalier (also spelled *ivorensis*)

E. unioloides (Retzius) Nees ex Steudel (*Eragrostis amabilis* sensu Stapf; *Eragrostis rubens* Hochst.; *Poa unioloides* Retz.)

Tropical Asia, Southeast Asia, Oceania. Annual or short-lived perennial, extremely variable, tufted or solitary, slender, leafy, foliage mostly basal, simple or branched, erect or ascending from a geniculate base, erect or decumbent and rooting at the lowermost nodes, sometimes almost prostrate, often compact at the base, leaf sheaths chartaceous to membranous and often tinged with purple, leaves narrowly oblong and acute, crateriform glands absent, ligule a ciliolate membrane or a shallow rim with hairs, inflorescence loose to open or contracted and compact, lanceolate to ovoid panicles loose or dense, spikelets ovoid to cylindrical and laterally compressed, 11-43 florets, lower florets all fertile, tightly imbricate florets, zig-zag shaped rachilla, glumes subequal and packed, lower glume keeled and lanceolate, lemma ovate and overlapping, palea oval but forked at the tip, stamens 2-3, forage, green manure, good fodder grass for cattle and horses, not readily grazed by livestock, it does not withstand heavy grazing, weed species naturalized in tropics and subtropics, common along roadsides, disturbed ground, swampy fields, cultivated land, grazing grounds, sandy soil, periodically flooded areas, lowlands in thickets, near running fresh water, irrigated rice fields, see *Observationes Botanicae* 5: 19. 1788 [t.p. 1789], *The Botany of Captain Beechey's Voyage* 251. 1838, *Synopsis Plantarum Glumacearum* 1: 264. 1854, *Enum. Tropical Africa, India, Thailand, Philippines, Malaysia. Annual or short-lived perennial, glandular and densely viscid, short, caespitose, loosely tufted, often decumbent at the base, erect or ascending or geniculate, glabrous, culms thin and rather wiry, branched to strongly branched, a sticky substance at each node, leaf sheath keeled and covered with a sticky substance at the top, ligule membranous and hairy to ciliate, leaves rather stiff, inflorescence contracted and rather dense to compact, spike-like open panicle with many short glandular branches and branchlets, purplish hairy spikelets, florets loosely imbricate, spikelets rachilla fragile, glumes equal or subequal, margins of glumes and lemmas not ciliate, paleas hairy, 3 stamens, strong smelling or sweet scented, poor grazing grass, weed of tea estates, naturalized elsewhere, growing in sandy areas, saline flats, coastal, waste dry places, dry sandy and shallow soils, sandy foreshores, disturbed sites, disturbed natural veld, along river

beds, uncultivated lands, along roadsides, open sunny areas, mopani veld, see *Species Plantarum* 68. 1753, *Observationes Botanicae* 4: 20. 1786, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Zeyl.* 5: 373. 1864, *Journal of the Linnean Society, Botany* 13: 137. 1873, *The Flora of British India* 7: 319. 1896 and *Handb. Fl. Ceylon* 5: 295. 1900, *Grasses of Ceylon* 74. 1956, *Ceylon J. Sci., Biol. Sci.* 2(2): 124. 1959, *Grasses of Burma ...* 515. 1960.

in Thailand: yaa waai, yawai, ya wai

Eremitis Döll = *Pariana* Aublet

Greek *eremos* "lonely, solitary, desert," referring to a kind of inflorescence, buried like a peanut, the hidden cleistogenes subterranean.

Some 1-7 species, eastern Brazil, tropical South America. Bambusoideae, Olyreae, Parianeae, or Bambusoideae, Olyreae, Parianinae, perennial, herbaceous, uppermost sheath spathiform, ligule membranous, plants monoecious, inflorescence spiciform enclosed by uppermost sheath, female spikelet sessile, 2 stamens, ovary glabrous, 2 stigmas, cleistogamous inflorescences present, in evergreen forest, type *Eremitis monothalamia* Döll (nom. illeg. superfl. for *Pariana parviflora* Trin.), see J.B.C.F. Aublet, *Histoire des Plantes de la Guiane Française*. 876, t. 337. Paris 1775, *Flora Brasiliensis* 2(2): 338, pl. 48. 1877, *Die Natürlichen Pflanzenfamilien* 2(2): 88. 1887 and *The Families of Flowering Plants* II. Monocotyledons ... 2: 219. London 1934, *Journal of the Linnean Society, Botany* 50: 337-362. 1936, *Contributions from the Gray Herbarium of Harvard University* 184: 1-223. 1958, *Biotropica* 3: 1-16. 1971, *Smithsonian Contr. Bot.* 44: 20. 1980, *Flora of the Guianas. Series A, Phanerogams* 440-446. 1990, *Novon* 2(2): 81-110. 1992, *Ruizia* 13: 1-480. 1993, *Flora Mesoamericana* 6: 216-218. 1994, V.C. Species

E. parviflora (Trin.) C.E. Calderón and Soderstr. (*Eremitis monothalamia* Döll; *Pariana microstachya* Döll; *Pariana monothalamia* (Döll) Tutin; *Pariana parviflora* Trin.)

Brazil. See *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 3,1(2-3): 105. 1834, *Flora Brasiliensis* 2(2): 338-339, pl. 48. 1877 and *Journal of the Linnean Society, Botany* 50(334): 349. 1936, *Smithsonian Contributions to Botany* 44: 20. 1980.

Eremium Seberg & Linde-Laursen = *Leymus* Hochst.

From the Greek *eremos* "lonely, solitary, desert, lone, desolate," *eremia* "desert," alluding to the arid habitat and to the tolerance of the extreme drought.

One species, Argentina. Pooideae, Triticoideae, Triticeae, or Pooideae, Triticeae, Hordeinae, perennial, tufted, herbaceous, unbranched, auricles present, plants bisexual, inflorescence spicate, spikelets flattened, 2 glumes subequal 1- to 3-nerved, palea 2-nerved 2-keeled, 2 free and membranous lodicules, 3 stamens, ovary hairy, 2 stigmas, open habitats, desert, type *Eremium erianthum* (Phil.) Seberg & Linde-Laursen, see *Species Plantarum* 1: 85. 1753, *Reliquiae Haenkeanae* 1(4-5): 265. 1830, *Flora* 31: 118. 1848 and *Nom. Prop. Int. Bot. Congr. Cambridge* (England) 1930: 121. 1929, *Journal of the Faculty of Science: University of Tokyo, Botany* 3(1): 20. 1930, *Flora URSS* 2: 708. 1934, *Systematic Botany* 21(2): 3-15. 1996 [*Eremium*, a new genus of the Triticeae (Poaceae) from Argentina], *Genome* 40: 505-520. 1997, *Contributions from the United States National Herbarium* 48: 310, 422-425. 2003.

Species

E. erianthum (Phil.) Seberg & Linde-Laursen (*Elymus barbatus* Kurtz; *Elymus erianthus* Phil.; *Elymus erianthus* var. *aristatus* Hicken; *Elymus erianthus* var. *spgazzinii* Hauman; *Elymus spgazzinii* Kurtz; *Leymus erianthus* (Phil.) Dubcovs.)

Argentina. See *Anales del Museo Nacional de Chile. Primera Sección — Zoolojía* 13, t. 3, f. 2. 1892, *Boletín de Academia de Ciencias, Bellas Letras y Nobles Artes. Córdoba, Spain* 15: 522, 506. 1897 and *Boletín de la Academia Nacional de Ciencias, Córdoba, Argentina* 16: 259. 1900, *Physis. Eremocaulon Soderstrom & Londoño =
Criciuma Soderstr. & Londoño

Greek *eremos* “lonely, solitary” and *kaulos* “a stem, a branch or stalk,” referring to the spaced solitary culms.

One to five species, America. Bambusoideae, Bambuseae, Guaduinae, sympodial, woody, erect and arching, hollow, thick-walled, culm leaves leathery, pseudospikelets linear-lanceolate, florets with membranous lemmas, 3 lodicules, 6 stamens, ovary hairy, 2 stigmas plumose, disturbed areas of forest, edge of road, type *Eremocaulon aureofimbriatum* Soderstrom & Londoño, see *American Journal of Botany* 74(1): 27-39. 1987 [Two new genera of Brazilian bamboos related to *Guadua* (Poaceae: Bambusoideae: Bambuseae).], Emmet J. Judziewicz et al., *American Bamboos* 234-238. 1999, *Contributions from the United States National Herbarium* 39: 57. 2000, *Systematic Botany* 27(4): 703-721. 2002 [A revision of the Brazilian bamboo genus *Eremocaulon* (Poaceae: Bambuseae: Guaduinae)].

Species

E. amazonicum Londoño

Brazil.

E. asymmetricum (Soderstr. & Londoño) Londoño (*Criciuma asymmetrica* Soderstr. & Londoño)

Brazil.

E. aureofimbriatum Soderstrom & Londoño

Brazil. Erect, arching.

E. capitatum (Trin.) Londoño (*Arundarbor capitata* (Trin.) Kuntze; *Bambusa capitata* Trin.; *Guadua capitata* (Trin.) Munro; *Schizostachyum capitatum* (Trin.) Rupr.)

Brazil. See *Flora Brasiliensis seu Enumeratio Plantarum* 2: 535. 1829, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. E. setosum Londoño & L.G. Clark

Brazil.

Eremochlamys Peter = *Tricholaena* Schrad.
ex Schult. & Schult.f.

From the Greek *eremos* “lonely, solitary” and *chlamys* “cloak.”

Panicoideae, Paniceae, Melinidinae, type *Eremochlamys littoralis* Peter, see *Bibliotheca Botanica* 138: 1-149. 1988 [Revision der Melinideae Hitchcock (Poaceae, Pani-

coideae)], *Contributions from the United States National Herbarium* 46: 287. 2003.

Eremochloa Büse = *Pectinaria* (Benth.)
Hack.

From the Greek *eremos* “lonely, solitary, desert, desolate” and *chloe, chloa* “grass,” alluding to the arid habitat; see Friedrich Anton Wilhelm Miquel (1811-1871), *Plantae Junghuhnianae*. Enumeratio plantarum, quas in insulis Java et Sumatra, detexit Fr. Junghuhn. 3: 357. 1854.

About 9-10 species, temperate or tropical Asia, India, Sri Lanka, southern China, western Malaysia, Australia. Panicoideae, Andropogonodae, Andropogoneae, Rottboelliinae, perennial, coarse, creeping, caespitose or stoloniferous, forming dense clumps, internodes solid, ligule shortly membranous, sheaths with compressed keels, stiff blades linear and narrow, auricles absent, plants bisexual, inflorescence terminal, solitary terminal and exserted spike-like raceme, bisexual imbricate spikelets, florets 2, the lower floret male or staminate, upper floret bisexual or perfect, fertile spikelets sessile and overlapping, 2 glumes unequal, lower glume 2-keeled 5- to 9-nerved, upper glume 3-nerved, female-sterile spikelets vestigial, palea hyaline and nerveless, 2 lodicules free and fleshy, 3 stamens, ovary glabrous, 2 stigmas plumose, fruit small and compressed, lower glume of sessile spikelet with a row of marginal spines, useful for erosion control, grassland, playing fields, lawnglass, related to *Coelorachis*, type *Eremochloa horneri* Büse, see *Species Plantarum* 2: 1049. 1753, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 2(4): 296. 1832, *Plantae Junghuhnianae* 3: 357. 1854, *Journal of the Linnean Society, Botany* 19: 71. 1881, *Die Natürlichen Pflanzenfamilien* 2(2): 26. 1887 and *Flora Mesoamericana* 6: 397. 1994, *Blumea* 46(2): 399-420. 2001 [Revision of *Eremochloa* (Gramineae-Andropogoneae-Rottboelliinae)], *Contributions from the United States National Herbarium* 41: 19. 2001, *Contributions from the United States National Herbarium* 46: 230. 2003, *Diversity & Distributions* 9(5): 385-398. Sep 2003, *Restoration Ecology* 12(2): 190-199. June 2004, *Ecological Management and Restoration* 6(1): 43-50. April 2005, *Austral. Ecology* 30(4): 445-464. June 2005.

Species

E. bimaculata Hackel

Australia, India, Malesia. Perennial, tufted, erect, stout rootstock and roots, ligule hairy, inflorescence curved, spikelets dissimilar and paired, glumes unequal, lemmas similar and translucent, in tropical and subtropical woodland, see *Monographiae Phanerogamarum* 6: 265. 1889.

in English: poverty grass

in Thailand: yaa haang nok yuung, ya hang nok yung

E. ciliaris (L.) Merr. (*Andropogon leersioides* (Munro) F. Muell.; *Eremochloa horneri* Büse; *Eremochloa leersioides* (Munro) Hack.; *Ischaemum leersioides* Munro; *Nardus ciliaris* L.)

U.S., Southeast Asia. Tufted, terrestrial, delicate, fanlike base, ligule a hairy membrane, leaf sheath flattened and keeled with inrolled margins, leaf blades linear and flattened, single terminal curved inflorescence, spikelets in alternate pairs, lower glume ovate with purple bristles, upper glume hairy, lemmas and paleas hyaline, grows in dry sandy or rocky areas, a good fodder, considered a rare species in Australia, see *Species Plantarum* 1: 53. 1753, *Plantae Junghuhnianae* 3: 357. 1854, *Proceedings of the American Academy of Arts and Sciences* 4: 363. 1860, *Fragmenta Phytographiae Australiae* 8: 118. 1873, *Monographiae Phanerogamarum* 6: 264. 1889 and *Philippine Journal of Science* 1(Suppl. 5): 331-332. 1906.

in English: fringed centipede grass, centipede grass

E. ciliaris (L.) Merr. var. *elata* Reeder

U.S., Papua New Guinea. See *Philippine Journal of Science* 1(Suppl. 5): 331-332. 1906, *Journal of the Arnold Arboretum* 29: 351. 1948.

E. eriopoda C.E. Hubb.

Asia, Thailand. Sandy places, saline, see *Hooker's Icones Plantarum* 34: t. 3376. 1939.

in Thailand: yaa hang krarok, ya hang krarok, yaa haang krok

E. muricata (Retz.) Hackel (*Aegilops muricata* Retz.; *Andropogon pectinatus* (Trin.) Steud.; *Coelorachis muricata* (Retz.) Brongn.; *Ischaemum pectinatum* Trin.; *Rottboellia muricata* (Retz.) Retz.)

Southern India, Thailand, Australia, Burma. Perennial, rhizomatous, leaf blades flat, inflorescence racemose more or less flattened, raceme exserted, lower glume with fanlike wings at the tip, endangered plant in Australia, growing in sandy soils, see *Observationes Botanicae* 2: 27. 1781, *Observationes Botanicae* 3: 12. 1783, *Voyage autour du Monde* 8: 64, t. 14. 1831, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 2(4): 296. 1832, *Synopsis Plantarum Glumacearum* 1: 369. 1854, *Monographiae Phanerogamarum* 6: 262. 1889 and *Handb. Fl. Ceylon* 5: 220. 1900, *Grasses of Ceylon* 179. 1956, *Grasses of Burma ...* 146. 1960.

E. ophiuroides (Munro) Hackel (*Agrostis crinita* Rich. ex Trin. & Rupr., nom. illeg., non *Agrostis crinita* (Schreb.) Moench; *Andropogon ophiuroides* (Munro) F. Muell.; *Eremochloa ophiuroides* var. *longifolia* Hayata; *Ischaemum*

ophiuroides Munro; *Sehima ciliare* (L.) Robery subvar. *ophiuroides* (Munro) Robery)

China, Southeast Asia, Vietnam, Asia temperate and tropical. Perennial, stoloniferous, forming dense clumps, prostrate growth, high root density, flattened and keeled leaf sheath, ligule minute, leaves hairy, compressed racemes spicate and axillary, slender and laterally compressed rachis, flat spikelets, lower glume winged, lemma and palea hyaline, sprouts from stolons, reproduces by seed, caryopsis enclosed in a wax coating, shade tolerant, considered drought-tolerant to drought intolerant, used for lawns and/or playing fields, ornamental, cultivated and naturalized, occurs on wet grasslands, industrial sites, roadsides and sandy roadsides, found on disturbed sites, grows on the sandy acid soils, see *Species Graminum Stipaceorum* 4. 1842, *Proceedings of the American Academy of Arts and Sciences* 4: 363. 1860, *Fragmenta Phytographiae Australiae* 8: 118. 1873, *Monographiae Phanerogamarum* 6: 261. 1889 and *Icones plantarum formosandarum nec non et contributiones ad floram formosanam* 7: 78-79, f. 46. 1918, *Boissiera. Mémoires du Conservatoire de Botanique et de l'Institut de Botanique Systématique de l'Université de Genève* 9: 318. 1960.

in English: centipede grass, lazy man's grass

E. petelotii Merr.

Asia. Inflorescence axillary, see *University of California Publications in Botany* 10: 423. 1924.

E. zeylanica Hackel (*Eremochloa zeylanica* (Hack. ex Trimen) Hack.; *Eremochloa zeylanica* (Trimen) Hack.; *Ischaemum falcatum* Thwaites; *Ischaemum zeylanicum* Hack. ex Trimen)

Sri Lanka. Perennial, tufted, leaf blades acute, inflorescence racemose exserted, lower glume elliptic, see *Enumeratio Plantarum Zeylanicae* 436. 1864, *A Systematic Catalogue of the Flowering Plants and Ferns in Ceylon* 107. 1885, *Monographiae Phanerogamarum* 6: 263. 1889 and *Handb. Fl. Ceylon* 5: 221. 1900, *Grasses of Ceylon* 179. 1956, *Grasses of Burma ...* 148. 1960.

Eremochloe S. Watson = *Blepharidachne* Hack.

Greek *eremos* "lonely, solitary, desolate" and *chloe* "grass"; nom. illeg., non *Eremochloa* Büse.

Chloridoideae, type *Eremochloe kingii* S. Watson, see *Plantae Junghuhnianae* 357. 1854, *United States Geological Exploration [sic] of the Fortieth Parallel. Botany* 5: 382, t. 40, f. 10-16. 1871, *Monographiae Phanerogamarum* 6: 261. 1889 and *U.S.D.A. Bull.* 772: 78. 1920, *Contributions from the United States National Herbarium* 41: 19, 115. 2001.

Eremopoa Roshev.

From the Greek *eremos* “solitary, lonely” and *poa* “grass, pasture grass,” referring to the habitat.

About 4-5 species, Mediterranean, China, western and central Asia. Pooideae, Poeae, Poinae, or Pooideae, Poodae, Poeae, annual, herbaceous, hollow, auricles absent, ligule an unfringed membrane, plants bisexual, inflorescence paniculate, panicle branches whorled, spikelets pedicellate, 2 glumes unequal to very unequal, lower glume 1-nerved, upper glume 3-nerved, lemmas lanceolate to narrowly oblong, palea 2-nerved 2-keeled, 2 free lodicules, 3 stamens, ovary glabrous, 2 stigmas, type *Eremopoa persica* (Trin.) Roshev., see *Species Plantarum* 1: 67-70, 73-76. 1753, *Linnaea* 21(4): 409-410. 1848, *Flora Tasmaniae* 1(4): 353, t. 98. 1857, *Die Natürlichen Pflanzenfamilien* 2(2): 73. 1887, *The Flora of British India* 7(22): 337. 1897 [1896] and *Fl. URSS* 2: 429-430, 756, t. 32, f. 8. 1934, *Taxon* 33: 756-760. 1984, *Flora of Turkey and the East Aegean Islands* 9: 486-501. 1986 [1985], *International Organization of Plant Biosystematists Newsletter* 13: 16. 1989, *Flora Mediterranea* 8: 307-313. 1998, *Contributions from the United States National Herbarium* 48: 310-311. 2003.

Species

E. altaica (Trin.) Roshev. (*Aira altaica* Trin.; *Eremopoa bellula* (Regel) Roshev.; *Festuca bellula* Regel; *Nephelochloa altaica* (Trin.) Griseb.; *Poa altaica* Trin.; *Poa diaphora* Trin.)

Russia. See *Flora Altaica* 1: 97. 1829, *Mémoires Présentés à l'Académie Impériale des Sciences de Saint Pétersbourg par Divers Savans et lus dans ses Assemblées* 2: 526. 1835, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Eurasia. See *Enumeratio Plantarum Novarum* 1: 1. 1841, *Bulletin de la Société Impériale des Naturalistes de Moscou* 864. 1841, *Flora Rossica* 4(13): 367. 1852, *Enumeratio Plantarum Transsilvaniae* 776. 1866, *Flora Orientalis* 5: 610-611. 1884, *The Flora of British India* 7(22): 337. 1897 [1896] and *Flora URSS* 2: 430-431, 756, t. 32, f. 9, 10, 11. 1934, *Grasses of Burma, Ceylon, India and Pakistan (excluding Bambuseae)* 532. 1960, *Bot. Zhurn. (Moscow & Leningrad)* 51(8): 1104. 1966.

Eremopogon Stapf = Andropogon L., Dichanthium Willemet

From the Greek *eremos* “solitary, lonely” and *pogon* “beard,” referring to the spikelets.

About 4 species, Old World. Panicoideae, Andropogoneae, Sorghinae or Panicoideae, Andropogonodae, Andropogoneae, Andropogoninae, annual or perennial, herbaceous, caespitose, branched, auricles absent, plants bisexual, inflorescence racemose, spikelets paired, each inflorescence branch with a basal sheath, 2 glumes subequal, lower glume 2-keeled, upper glume 2-nerved, palea absent, 2 lodicules, 3 stamens, ovary glabrous, 2 stigmas, usually in or sometimes referred to *Dichanthium*, type *Eremopogon foveolatus* (Delile) Stapf, see *Species Plantarum* 2: 1045-1046. 1753, *Annalen der Botanick. ed. Usteri* 18: 11. 1796, *Flora Indica; or Descriptions ...* 1: 265. 1820, *Die Natürlichen Pflanzenfamilien* 2(2): 28. 1887 and *Flora of Tropical Africa* 9: 182-183. 1917, *Annales de la Société Linnéenne de Lyon, sér. 2*, 68: 208. 1921 [1922], *Journal of the Bombay Natural History Society* 32: 427. 1928, *Trudy Bot. Inst.*

Komarova Akad. Nauk S.S.S.R., Ser: 8, Paleobot. 63. 1936, Fl. Trop. E. Afr. Gramineae 770. 1982, Taxon 41: 556. 1992, Taxon 44: 611-612. 1995, Contributions from the United States National Herbarium 46: 20-64, 192-193, 230. 2003.

Species

E. delavayi (Hack.) A. Camus (*Andropogon bootanensis* Hook.f.; *Andropogon delavayi* Hack.; *Schizachyrium bootanense* (Hook.f.) A. Camus; *Schizachyrium delavayi* (Hack.) Bor)

Asia. See *Monographiae Phanerogamarum* 6: 404-405. 1889, *The Flora of British India* 7: 166-167. 1896 and *Annales de la Société Linnéenne de Lyon*, sér. 2, 68: 208. 1921 [1922], *Ann. Linn. Lyon* 70: 90. 1923, *Indian Forest Records, Botany* 1: 95. 1939.

E. foveolatus (Delile) Stapf (*Andropogon foveolatus* Delile; *Andropogon monostachys* Spreng.; *Andropogon strictus* Roxb.; *Eremopyrum strictus* (Roxb.) A. Camus; *Hypogynium foveolatum* (Delile) Haines)

India, Africa. A good fodder desert grass, eaten by the camels, see *Description de l'Égypte, ... Histoire Naturelle, Tome Second* 2: 160. 1812 [or 16, t. 8. f. 2. 1813], *Hortus Bengalensis, or a Catalogue ...* 82. 1814, *Plantarum Minus Cognitarum Pugillus* 2: 9. 1815, *Flora Indica; or Descriptions ...* 1: 265. 1820 and *Flora of Tropical Africa* 9: 183. 1917, *Annales de la Société Linnéenne de Lyon*, sér. 2, 68: 208. 1921 [1922], *The Botany of Bihar and Orissa* Pt. 5: 1041. 1924, *Annali di Botanica* 45: 75-102. 1987.

in India: boari, ghandel, kard, namala chettu, nanaballu gaddi, nanabalu gaddi

E. tuberculatus (Hack.) A. Camus (*Andropogon tuberculatus* Hack.; *Dichanthium tuberculatum* (Hack.) Cope; *Dichanthium tuberculatum* (Hack.) G. Singh)

Asia. See *Monographiae Phanerogamarum* 6: 404. 1889 and *Annales de la Société Linnéenne de Lyon*, sér. 2, 68: 208. 1921 [1922], *Kew Bulletin* 35(3): 703. 1980, *Journal of Economic and Taxonomic Botany* 8(2): 497. 1986.

Eremopyrum (Ledeb.) Jaub. & Spach

From the Greek *eremos* "solitary, lonely" and *pyros* "wheat," an allusion to the nature of the seeds.

About 5 species, Mediterranean, Turkey, central Asia, Pakistan. Pooideae, Triticeae, Hordeinae, or Pooideae, Triticeae, annual, caespitose, herbaceous, auricles present, ligule an unfringed membrane, leaf blades linear to linear-lanceolate, plants bisexual, racemes oblong, spikelets solitary, 2 glumes linear to narrowly ovate, lemmas keeled with nerves converging upward, palea present, 2 free membranous lodicules, 3 stamens, ovary hairy, 2 stigmas, stony places, slopes, similar to *Agropyron*, type *Eremopyrum orientale* (L.) Jaub. & Spach, see *Species Plantarum*

1: 84-87. 1753, *Novi Commentarii Academiae Scientiarum Imperialis Petropolitanae* 14(1): 539. 1770, *Flora Altaica* 1: 112. 1829, *Annales des Sciences Naturelles; Botanique, sér. 3* 14: 360. 1851, *Illustrationes Plantarum Orientalium* 4: 27, t. 319. 1851, *Enumeratio Plantarum Transsilvaniae* 807-808. 1866, *Genera Plantarum* 3(2): 1203. 1883 and *Canadian Journal of Botany* 36: 539-546. 1958, *Biol. Eriachne Phil. = *Digitaria* Haller

Greek *erion* "wool" and *achne* "chaff, glume."

Panicoideae, Panicodae, Paniceae, or Panicoideae, Paniceae, Digitariinae, type *Eriachne rigida* Phil., see *Bothalia* 7: 467. 1961, *Memoirs of the New York Botanical Garden* 78: 509-540. 1996, *Genera Graminum* 298-300. 1999, *Contributions from the United States National Herbarium* 46: 193-213, 230. 2003.

Eriachne R. Br. = *Achneria* P. Beauv., *Eriachne* Phil., *Massia* Balansa

From the Greek *erion* "wool" and *achne* "chaff, glume," referring to the hairy lemma or to cataphylls.

About 48-51 species, Asia and mostly Australia. Arundoideae (or Panicoideae), Eriachneae, annual or chiefly perennial, forming clumps or tussocks, rhizomatous or caespitose, usually with wiry culms, herbaceous, ligule a ciliate membrane, leaves sometimes rigid and spine-like, leaf blade flat or convolute, plants bisexual, cleistogamous or chasmogamous, inflorescence paniculate open or contracted, rarely racemose, bisexual and solitary spikelets, florets 2 perfect, upper floret sometimes reduced or absent, 2 glumes more or less equal and persistent, lemmas leathery or membranous and hairy on the back, awned or awnless, palea 2-keeled and more or less bifid, the apex of the palea entire or divided, 2 lodicules free and fleshy, stamens 3 or rarely 2, ovary glabrous, 2 stigmas, fodder in open range, of limited importance as pasture grass, grow on poor soils, savannah, arid and semiarid areas, inland regions and on the coast, type *Eriachne squarrosa* R. Br., see *Prodromus florae Novae Hollandiae*. 183. 1810, *Essai d'une Nouvelle Agrostographie* 72-73, 146. 1812, *Anales de la Universidad de Chile* 36: 207-208. 1870, *Journal de Botanique (Morot)* 4(8): 165. 1890 and *Acta Phytotaxonomica et Geobotanica* 11: 183. 1942, *Bulletin of the Torrey Botanical Club* 88: 11-20. 1961, Eck-Boorsboom, M.H.J. van, "A revision of *Eriachne* R. Br. (Gramineae) in Asia and Malesia." *Blumea* 26: 127, 130. 1980, M. Lazarides, "The genus *Eriachne* (Eriachneae, Poaceae)." *Australian Systematic Botany* 8(3): 355-452. 1995, Liliana M. Species

E. agrostidea F. Muell.

Australia, Northern Territory, Port Darwin. Annual or ephemeral, slender, mainly basal foliage, similar to *Eriachne filiformis*, see Mueller, F.J.H. von, Fascicles 50-57. *Fragmenta Phytographiae Australiae* 7: 82. 1870 and *Australian Systematic Botany* 8: 363. 1995.

E. aristidea F. Muell. (*Eriachne aristidea* var. *aristidea*; *Eriachne aristidea* var. *elegans* Domin; *Eriachne aristidea* var. *minor* Hartley; *Eriachne aristidea* var. *typica* Domin)

South Australia, Western Australia, Northern Territory, Queensland, New South Wales. Annual or short-lived perennial, slender, densely tufted, leafy, compact, stems bearded at the nodes, leaves flat and folded, panicle loose, few solitary and stalked spikelets, 2 florets, glumes hirsute to aristate, lemma villous on the back and tapering into a straight awn, palea bifid and silky, useful for erosion control, usually not very palatable, readily grazed when green, usually trampled or blown away, an inland species, stabilizer of loose sandy soils, an indicator of poor range condition, grows on loose sandy soils, sand dunes, see *Fragmenta Phytographiae Australiae* 5: 205. 1866 and *Journal of the Linnean Society, Botany* 41: 279. 1912, *Journal of the Linnean Society, Botany* 52: 344. 1942.

in English: three-awned wanderrie, threeawn wanderrie, three-awn wanderrie grass, broad-leaved wanderrie grass

E. armitii Benth. (also *armitti*) (*Eriachne armitii* F. Muell. ex Benth.) (Gilbert River, Armit)

Western Australia, Northern Territory, Queensland. Annual or short-lived perennial, ascending, spreading, branched, useful for erosion control, occurs on periodically flooded flats, red and yellow earths, related to *Eriachne stipacea*, similar to *Eriachne squarrosa*, see *Flora Australiensis: A Description ...* 7: 627. 1878 and *Australian Systematic Botany* 8: 366. 1995.

in English: longawn wanderrie

E. avenacea R. Br. (*Aira avenacea* (R. Br.) Spreng.; *Eriachne setacea* Benth.)

Western Australia, Northern Territory, Darwin and Gulf District. Annual or short-lived perennial, slender, compact, thin, hispid, variable, strongly many-nerved glumes, close to *Eriachne melicacea* and *Eriachne bleeseri*, see *Prodromus Florae Novae Hollandiae* 184. 1810, *Systema Vegetabilium, editio decima sexta* 1: 278. 1825, *Flora Australiensis: A Description ...* 7: 629. 1878.

E. axillaris Lazarides

Northern Territory, Darwin and Gulf District. Annual, slender, filiform, axillary and cleistogamous inflorescences, smooth glabrous glumes, palea pubescent, grain strongly compressed, see *Australian Systematic Botany* 8(3): 368, f. 260. 1995.

E. basalis Lazarides

Northern Territory, Darwin and Gulf District. Annual, axillary spikelets and racemes, acuminate glumes many-nerved, related to *Eriachne burkittii*, see *Australian Systematic Botany* 8(3): 369, f. 26B, 28K, 29J. 1995.

E. basedowii Hartley

Northern Territory, Arnhem Land. Perennial, wiry, bulbous, woolly, simple, compact inflorescences spiciform, villous panicles, see Hartley, W., "New species and varieties of *Eriachne* R. Br. family Gramineae." *Journal of the Linnean Society, Botany* 52: 344. 1942.

E. benthamii Hartley (*Eriachne ovata* var. *pallida* Benth.) (after the English (b. Devon) botanist George Bentham, 1800-1884 (London), nephew of Jeremy Bentham, taxonomist, from 1829 to 1840 Secretary of the Horticultural Society, 1862 Fellow of the Royal Society of London and in 1826 of the Linnean Society, from 1861 to 1874 President of the Linnean Society, among his most valuable writings are *Handbook of the British Flora*. London 1858, *Flora hongkongensis*. London 1861, *Labiatarum genera et species*. London 1832-1836, *The Botany of the Voyage of H.M.S. Sulphur, under the Command of Captain Sir Edward Belcher ... during the Years 1836-1842*. London 1844[-1846] and *Catalogue des plantes indigènes des Pyrénées et du bas Languedoc*. Paris 1826 author of most of the *Genera Plantarum* (London 1862-1883) of Bentham and Joseph Dalton Hooker (1817-1911) and in collaboration with Ferdinand Mueller of *Flora Australiensis*. London 1863-1878, his herbarium amounted to over 100,000 specimens. See J.H. Barnhart, *Biographical notes upon botanists*. 1: 165. 1965; Antoine Lasègue (1793-1873), *Musée botanique de M. Benjamin Delessert*. Paris, Leipzig 1845; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 34. 1972; George Taylor, in *D.S.B.* 2: 614-615. 1981; Leonard Huxley, *Life and Letters of Sir Joseph Dalton Hooker*. London 1918; B. Daydon Jackson, *George Bentham*. London 1906; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. Philadelphia 1964; Francis Wall Oliver (1864-1951), editor, *Makers of British Botany*. Cambridge 1913; H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 130. Oxford 1964; Mea Allan, *The Hookers of Kew*. London 1967; S. Lenley et al., *Catalog of the manuscript and archival collections and index to the correspondence of John Torrey*. Library of the New York Botanical Garden. 447. 1973; Merle A. Reinikka, *A History of the Orchid*. Timber Press

1996; Emil Bretschneider, *History of European Botanical Discoveries in China*. [Reprint of the original edition 1898] Leipzig 1981; N. Hall, *Botanists of the Eucalypts*. Melbourne 1978 and Supplement 1980; M. Hadfield et al., *British Gardeners: A Biographical Dictionary*. London 1980)

Northern Territory, Central Australia. Perennial, robust, glaucous or bluish green, forming dense and coarse tussocks, leathery leaves flat or inrolled, powdery blooms, panicle dense, lemmas with recurved awn, not eaten, areas subject to partial inundation, moist soils, warm inland regions, see *Flora Australiensis: A Description ...* 7: 631. 1878 and *Journal of the Linnean Society, Botany* 52: 345. 1942.

in English: swamp wanderrie grass

E. bleeseri Pilger (named for Florenz August Karl Bleeser, 1871-1942, of the Australian Post Office, botanical collector in the Northern Territory)

Northern Territory, Darwin and Gulf District. Perennial, slender, simple, thickened base, leaves densely hispid, aristulate lemmas, wetland, similar to *Eriachne melicacea* and *Eriachne avenacea*, see *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 10(91): 113. 1927.

E. brevifolia R. Br. (*Achneria brevifolia* (R. Br.) P. Beauv.) Australia. Cited by Sprengel as a synonym of *Eriachne mucronata* R.Br., base name for *Achneria brevifolia* (R. Br.) P. Beauv., see *Prodromus Florae Novae Hollandiae* 184. 1810, *Essai d'une Nouvelle Agrostographie* 73, 146. 1812.

E. burkittii Jansen (*Eriachne burkittii* var. *burkittii*; *Eriachne burkittii* var. *hirsutissima* Jansen; *Eriachne burkittii* var. *laidlawii* (Jansen) Eck-Boorsboom; *Eriachne laidlawii* Jansen)

Northern Territory, Darwin and Gulf District, Queensland. Short-lived perennial, glaucous or pruinose, leafy, open drooping panicle, scabrous lemma, recurved awn, palea beaked, similar to *Eriachne stipacea*, see *Mededeelingen van's Rijks-Herbarium* 59: 1. 1930, Eck-Boorsboom, M.H.J. van, "A revision of *Eriachne* R. Br. (Gramineae) in Asia and Malesia." in *Blumea*. 26: 127-128, 131, 133. 1980.

E. capillaris R. Br. (*Achneria capillaris* (R. Br.) P. Beauv.; *Achneria capillaris* (Thunb.) Stapf, nom. illeg., non *Achneria capillaris* (R. Br.) P. Beauv.; *Aira hispida* Sprengel; *Holcus capillaris* Thunb.)

Northern Territory, Darwin and Gulf District, North Coast, Arnhem Bay. Annual or ephemeral, slender, compact, branched and fastigiate, glabrous, hispid basal foliage, open panicle, spikelets obovate, awnless florets, similar to *Eriachne filiformis* and *Eriachne agrostidea*, see *Prodromus Plantarum Capensium, ...* 20. 1794, *Prodromus Florae Novae Hollandiae* 184. 1810, *Essai d'une Nouvelle Agrostographie* 73, 146. 1812, *Systema Vegetabilium, editio*

decima sexta 1: 276. 1825, *Hooker's Icones Plantarum* 27(1): t. 2604, 1-2. 1899.

E. ciliata R. Br. (*Aira ciliata* (R. Br.) Spreng.; *Eriachne gracilescens* Domin)

Western Australia, Northern Territory, Queensland. An increaser species, slender, annual or ephemeral, branched, culms and foliage hispid, short rigid leaf blades, lacking bulk, low forage value, on degraded soils, similar to *Eriachne capillaris*, *Eriachne semiciliata* and *Eriachne agrostidea*, see *Prodromus Florae Novae Hollandiae* 184. 1810, *Systema Vegetabilium, editio decima sexta* 1: 278. 1825 and *Feddes Repert. Spec. Nov. Regni Veg.* 10: 118. Nov 1911, *Bibliotheca Botanica* 85: 354. Dec 1915.

in English: slender wanderrie grass

E. compacta Lazarides

Northern Territory, Darwin and Gulf District, Kakadu National Park. Annual, slender, branched, compact ovate panicles, see *Australian Systematic Botany* 8(3): 377, f. 26F, 28F-G. 1995.

E. fastigiata Lazarides

Western Australia, Northern Territory. Annual, slender, branched, fastigiate, leaves hispid, racemose inflorescences, ribbed glumes and lemmas, awnless lemmas, similar to *Eriachne pulchella*, see Lazarides, M., in *Journal of the Royal Society of Western Australia*. 42(2): 22, 33. t. 1, f. 1. 1959, *Journal of the Royal Society of Western Australia* 44(3): 77-83. 1961.

E. festucacea F. Muell.

Western Australia, Northern Territory. Coarse, caespitose, perennial, simple, glabrous, smooth, base thickened, tussocky, fibrous roots, glossy cataphylls, narrow panicles, open floret, divergent lemma, aristulate glumes, usually unpalatable, grazed the green shoots, see *Fragmenta Phytographiae Australiae* 5: 205. 1866 and *Journal of the Royal Society of Western Australia* 44(3): 77-83. 1961.

in English: plains wanderrie grass

E. filiformis Hartley

Queensland, Northern Territory, Darwin and Gulf District, Arnhem Land. Slender, annual, branched, leaves mostly basal, similar to *Eriachne agrostidea*, *Eriachne humilis* and *Eriachne capillaris*, see *Journal of the Linnean Society, Botany* 52: 343. 1942.

E. flaccida Hartley

Western Australia, Northern Territory. Perennial, base thickened, valuable source of fodder, palatable to cattle, resistant to grazing and drought, an indicator of good range condition, related to *Eriachne ovata* and *Eriachne benthamii*, see *Journal of the Linnean Society, Botany* 52: 346. 1942.

E. gardneri Hartley (after Charles Austin Gardner, 1896-1970, from 1928 to 1960 Government Botanist and Curator

of Western Australia Herbarium, with H.W. Bennetts wrote *The Toxic Plants of Western Australia*. 1956)

Western Australia. Annual or perennial, glaucous, branched, cover plant, found in arid areas, on coastal sand dunes, sandy riverbanks, see *Journal of the Linnean Society, Botany* 52: 344. 1942.

E. glabrata (Maiden) Hartley (*Eriachne obtusa* R. Br. var. *glabrata* Maiden)

Queensland, New South Wales. Perennial, loosely or densely tufted, leaf blade rolled and glabrous, a compact panicle, 2 florets, glumes equal and ribbed, lemmas pubescent and awnless, palea awnless and more or less pubescent, on sandy soils, coastal areas, similar to *Eriachne insularis*, see *Agricultural Gazette of New South Wales* 19: 836, t. 1. 1908, *Journal of the Linnean Society, Botany* 52: 342, 347. 1942.

E. glandulosa Lazarides

Western Australia. Perennial, simple, base thickened and fibrous, leaves mainly basal, leaf sheaths persistent, glandular panicle, similar to *Eriachne bleeseri*, see *Australian Systematic Botany* 8(3): 384, f. 28L. 1995.

E. glauca R. Br. (*Aira laevis* Spreng.)

Western Australia, Northern Territory, Queensland, Gulf of Carpentaria. Perennial, glabrous, pruinose, smooth, branched, leafy, herbaceous, dense or loose panicles, grazed when young, tough and unpalatable when mature, an increaser species, on heavily grazed fields, clay, see *Prodromus Florae Novae Hollandiae* 184. 1810 and *Austral. Syst. Bot.* 8(3): 355-452. 1995.

in English: pan wanderrie grass

E. glauca R. Br. var. *glauca*

Western Australia, Northern Territory, Queensland, Gulf of Carpentaria. Culm nodes glabrous, see *Prodromus Florae Novae Hollandiae* 184. 1810 and *Journal of the Linnean Society, Botany* 52: 343. 1942.

E. glauca R. Br. var. *barbinodis* Hartley

Western Australia, Northern Territory, Queensland, North Kennedy District. Culm nodes bearded, growing on swamps, see *Prodromus Florae Novae Hollandiae* 184. 1810 and *Journal of the Linnean Society, Botany* 52: 343. 1942, *Austral. Syst. Bot.* 8: 387. 1995.

E. helmsii Domin (*Eriachne helmsii* (Domin) Hartley; *Eriachne helmsii* Domin ex Hartley; *Eriachne mucronata* sensu J. Black, non R. Br.; *Eriachne mucronata* R. Br. var. *helmsii* Domin; *Eriachne mucronata* R. Br. var. *villiculmis* Domin) (species dedicated to Richard Helms, 1842-1914, naturalist and botanist)

South Australia, Western Australia, Northern Territory, Queensland, New South Wales. Perennial, bluish green, coarse, erect or spreading or decumbent, wiry, tough, forming loose or straggly tussocks, base of the plant woolly and

thickened or bulbous, leaves firmly pointed and rough, leaf blade flat, panicle narrow and open, 2 florets, spikelets pale or straw colored and pedicellate, glumes glabrous and acute, lemmas awnless and with silky hairs, palea awnless, unpalatable appearance, heavily or seldom grazed, an indicator of poor range condition, on sandy soils, sandplains, on stony and shallow ground, inland regions, similar to *Eriachne mucronata*, see *Bibliotheca Botanica* 85: 361-362. Dec 1915 [= *Beiträge zur Flora und Pflanzengeographie Australiens* 362. Dec 1915, pro syn.], *Journal of the Linnean Society, Botany* 52: 346. 1942.

in English: woollybutt wanderrie, woollybutt wanderrie grass, buck wanderrie grass

E. humilis Hartley

Northern Territory, Queensland, Thursday Island. Annual or ephemeral, slender, branched, smooth, glabrous, leaves basal, leaf blades filiform, loose panicles, found on rocky places, related to *Eriachne agrostidea* and *Eriachne filiformis*, see *Journal of the Linnean Society, Botany* 52: 343. 1942.

E. imbricata Lazarides

Western Australia. Perennial, wiry, knotty base, branched, leaf sheaths overlapping, panicles spiciform, similar to *Eriachne bleeseri* and *Eriachne glandulosa*, see *Australian Systematic Botany* 8(3): 389, f. 27A. 1995.

E. insularis Domin

Queensland, Moreton District. Perennial, branched, leafy, compact, wiry, open panicle, awnless spikelets, hirsute florets, many-nerved glumes, similar to *Eriachne pallescens* var. *gracilis*, see *Bibliotheca Botanica* 85: 362. 1915.

E. laidlawii Jansen (*Eriachne burkittii* var. *laidlawii* (Jansen) Eck-Boorsb.) (named for the Australian botanist William Laidlaw, born in Scotland ca. 1866-1925, migrated to Victoria in 1908, 1924-1925 Government Botanist and Director of the Royal Botanic Gardens Melbourne, he died at the Gardens; see Richard Thomas Martin Pescott, *The Royal Botanic Gardens, Melbourne: A History from 1845 to 1970*. Published Melbourne: Oxford University Press, 1982; R.T.M. Pescott, "The Royal Society of Victoria from then, 1854 to now, 1959." *Proceedings of the Royal Society of Victoria*, vol. 73, no. 7, pp. 1-40. 1961; R.T.M. Pescott, *Collections of a Century: the History of the First Hundred Years of the National Museum of Victoria*, by R.T.M. Pescott; foreword by Sir Russell Grimwade [Melbourne]: National Museum of Victoria 1954)

Australia. See *Mededeelingen van's Rijks-Herbarium* 59: 1. 1930, Eck-Boorsboom, M.H.J. van, "A revision of *Eriachne* R. Br. (Gramineae) in Asia and Malesia." in *Blumea*. 26: 127-128, 131, 133. 1980.

E. lanata Lazarides

Western Australia, Great Sandy Desert. Perennial, compact, tufted, base thickened, branched or simple, hispid, leaf

blades curved, open panicle, awnless spikelets, see *Australian Systematic Botany* 8(3): 391, f. 26 J, K, 29D-E. 1995.

E. major (Ewart & O.B. Davies) Lazarides (*Eriachne obtusa* var. *major* Ewart & O.B. Davies)

Northern Territory, Darwin and Gulf District. Perennial, wiry, base knotty, open panicles, grain compressed, see *The Flora of the Northern Territory* 44. 1917, *Australian Systematic Botany* 8(3): 392, f. 26G, 28J. 1995.

E. meliacea F. Muell.

Australia. A variant of *Eriachne melicacea* F. Muell.

E. melicacea F. Muell.

Western Australia, Northern Territory, Victoria River District, Queensland. Annual or short-lived perennial, branched, leaves hispid, linear panicles, awnless spikelets, glumes many-nerved, palea with ciliate flaps, similar to *Eriachne avenacea*, see *Fragmenta Phytographiae Australiae* 5: 205. 1866 and *Queensland Agricultural Journal* 27: 69, t. 19. 1911.

E. minuta Lazarides

Northern Territory, Darwin and Gulf District, Kakadu National Park. Annual or ephemeral, delicate, branched, slender, leaves hispid to pilose, open panicles, tiny spikelets, 3-nerved hairy glumes, see *Australian Systematic Botany* 8(3): 395, f. 26L, 30D. 1995.

E. mucronata R. Br. (*Achneria mucronata* (R. Br.) P. Beauv.; *Aira mucronata* (R. Br.) Spreng.; *Eriachne inermis* Pilg.; *Eriachne mucronata* var. *bimucronata* Domin; *Eriachne mucronata* var. *desertorum* C.A. Gardner; *Eriachne mucronata* var. *elongata* (Benth.) Domin; *Eriachne mucronata* var. *glabrifolia* Domin; *Eriachne obtusa* R. Br.; *Eriachne ovata* Nees var. *pedicellata* J.M. Black; *Eriachne scleranthoides* var. *elongata* Benth.)

South Australia, Western Australia, Northern Territory, Queensland, New South Wales. Perennial, tufted and usually branched, wiry, tough, spiny, slender or dense, forming compact or loose tussocks, base of the plant shortly hairy, leaf blade flat or folded, distichous leaves stiff and pungent or sharply pointed, panicles purplish narrow and exerted, glumes glabrous, lemma awnless, lemma distinctly mucronate and villous, unpalatable or inaccessible to stock, semi-arid and arid areas, inland tropical and subtropical regions, used as lead indicator in Queensland, similar to *Eriachne obtusa* and *Eriachne helmsii*, see *Prodromus Florae Novae Hollandiae* 184. 1810, *Essai d'une Nouvelle Agrostographie* 73, 146. 1812, *Systema Vegetabilium, editio decima sexta* 1: 276. 1825, *Fragmenta Phytographiae Australiae* 8: 233. 1874, *Flora Australiensis: A Description ...* 7: 631. 1878 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 35: 75. 1904, *Bibliotheca Botanica* 85: 359-361, 385, f. 80, 81. 1915, *Flora South Australia* 1: 71. 1922, *Journal of the Linnean*

Society, Botany 52: 346. 1942, *Flora of Western Australia* 1(1): 51. 1952.

in Australia: mountain wanderrie, mountain wanderrie grass
E. mucronata R.Br. subsp. *eumucronata* Domin
Nom. inval., see also *Eriachne mucronata* subsp. *mucronata*.

E. mucronata R.Br. subsp. *mucronata*

See also *Eriachne mucronata* subsp. *eumucronata* Domin.

E. mucronata R.Br. subsp. *scleranthoides* (F. Muell.) Domin (*Eriachne scleranthoides* F. Muell.)

Australia. Leaves distichous and pungent, see *Fragmenta Phytographiae Australiae* 8: 233. 1874 and *Bibliotheca Botanica* 85: 359, 385, f. 80. 1915.

E. mucronata R.Br. var. *mucronata*

See also *Eriachne mucronata* subsp. *typica* Domin.

E. nervosa Ewart & Cookson

Northern Territory, Queensland. Perennial, glaucous or bluish green, robust, coarse, forming dense tussocks, leaves leathery and glaucous, culms shiny and purplish, panicle dense and purplish, hairy spikelets with long terminal awnlike points, on heavy clay soils, moist soils, similar to *Eriachne benthamii*, see *The Flora of the Northern Territory* 44, t. 4. 1917.

in Australia: plains wanderrie grass

E. nodosa Lazarides

Northern Territory, Darwin and Gulf District. Annual, branched, glabrous, open panicles, awnless spikelets, similar to *Eriachne obtusa* and *Eriachne major*, see *Australian Systematic Botany* 8(3): 401, f. 26M, 27I. 1995.

E. obtusa R. Br. (*Achneria obtusa* (R. Br.) P. Beauv.; *Eriachne obtusa* var. *glauca* Domin; *Eriachne obtusa* var. *obtusa*; *Eriachne obtusa* var. *typica* Domin)

Western Australia, Northern Territory, Queensland, Gulf of Carpentaria. Perennial, variable, wiry, branched, glabrous, base thickened, awnless spikelets, lemmas with ciliate margins, tropical savannah, resembles *Eriachne mucronata*, see *Prodromus Florae Novae Hollandiae* 184. 1810, *Essai d'une Nouvelle Agrostographie* 73, 146. 1812 and *Agricultural Gazette of New South Wales* 19: 836, t. 1. 1908, *Bibliotheca Botanica* 85: 362. 1915.

in English: northern wanderrie, wanderrie grass

E. obtusa R. Br. var. *major* Ewart & O.B. Davies (*Eriachne major* (Ewart & O.B. Davies) Lazarides)

Northern Territory. See *The Flora of the Northern Territory* 44. 1917, *Australian Systematic Botany* 8(3): 392, f. 26G, 28J. 1995.

E. ovata Nees (*Eriachne nana* Pilger; *Eriachne ovata* var. *nana* S. Moore; *Eriachne ovata* var. *ovata*; *Eriachne ovata* var. *villosa* Benth.; *Eriachne preissiana* Nees) (after the German botanist Johann August Ludwig Preiss, 1811-1883,

traveler, plant collector, from 1838 to 1842 in Western Australia; see Johann G.C. Lehmann (1792-1860), *Plantae Preissianae* sive enumeratio plantarum quas in Australasia occidentali et meridionali-occidentali annis 1838-41 collegit L. Preiss. Hamburgi 1844-1847[-1848]; J.H. Barnhart, *Biographical notes upon botanists*. 3: 107. 1965; D.J. Carr and S.G.M. Carr, editors, *People and Plants in Australia*. 1981; Mary Gunn and Leslie E. Codd, *Botanical Exploration of Southern Africa*. 287. Cape Town 1981; A. Lasègue, *Musée botanique de Benjamin Delessert*. Paris 1845; F. Ludwig Emil Diels (1874-1945), *Die Pflanzenwelt von West-Australien südlich des Wendekreises*. 1906, in H.G.A. Engler, *Die Vegetation der Erde*. no. VII. 1906; I.C. Hedge and J.M. Lamond, *Index of Collectors in the Edinburgh Herbarium*. Edinburgh 1970; N.S. Lander, "Asteraceae specimens collected by Johann August Ludwig Preiss.," in *Kingia*. 1(1): 9-19. 1987)

South Australia, Western Australia, Northern Territory. Perennial, stout, coarse, variable, forming dense tussocks, base thickened, leaves erect and glabrous, culms smooth, panicle contracted, spikelets numerous, glumes glabrous, lemma awnless, lemma exserted and mucronate, palea tip with 2 apical setae, eaten by stock, on heavy soils, sandplains, moist ground, rocky places, related to *Eriachne flaccida* and *Eriachne benthamii*, see *London Journal of Botany* 2: 416. 1843, *Plantae Preissianae* sive enumeratio plantarum ... 2: 102. Hamburgi 1844-1847[-1848], *Flora Australiensis: A Description* ... 7: 631. 1878, *Journal of the Linnean Society, Botany* 34: 229. 1899 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 35: 75. 1904, *Flora South Australia* 1: 71. 1922, *Transactions and Proceedings of the Royal Society of South Australia* 46: 565. 1922.

in Australia: swamp wanderrie, swamp wanderrie grass

E. pallescens R. Br. (*Aira chinensis* Retz.; *Aira effusa* Spreng.; *Eriachne chinensis* Hance; *Eriachne hookeri* Munro; *Tricholaena chinensis* (Retz.) Domin)

Northern Territory, Queensland, Cook District, New South Wales. Perennial, loosely to densely tufted, forming erect tussocks, leaves linear and ribbed, culms slender and branched in the lower parts, very sparse panicles, purplish spikelets on slender stalks, 2 florets, glumes acuminate and glabrous, lemmas awned and covered with silky hairs, awn terminal and straight, palea bifid and silky, may naturalize, ornamental, useful for erosion control, grows in coastal areas, ridge, steep slopes, in sandy and stony soils, white sand, see *Observationes Botanicae* 3: 10. 1783, *Prodromus Florae Novae Hollandiae* 184. 1810, *Annales des Sciences Naturelles; Botanique, série 4* 15: 228. 1861, *Journal of the Linnean Society, Botany* 6: 42. 1862 and *Bibliotheca Botanica* 85: 327. 1915, Eck-Boorsboom, M.H.J. van, "A revision of *Eriachne* R. Br. (Gramineae) in Asia and Malesia." *Blumea* 26: 127-138 (133-135). 1980, *Bibliotheca Botanica* 138: 1-149. 1988.

in Australia: wanderrie grass

in Thailand: ya chom chon, yaa nuat moen, ya nuat moen, yaa phraek saai, ya phraek sai

E. pallescens R. Br. var. ***gracilis*** (Brongn.) Lazarides (*Eriachne anomala* Hartley; *Eriachne gracilis* Brongn.; *Eriachne stricta* Steud.)

Queensland, Moluccas. Spikelets with 1-2 florets, see *Prodromus Florae Novae Hollandiae* 184. 1810, *Voyage autour du Monde* 2(2): 25. 1829, *Synopsis Plantarum Glumacearum* 1: 237. 1854 and *Journal of the Linnean Society, Botany* 52: 345. 1942, Lazarides, M., "The genus *Eriachne* (Eriachneae, Poaceae)." *Australian Systematic Botany* 8(3): 406-407, f. 27L, 29M-N. 1995.

E. pallescens R. Br. var. ***pallescens*** (*Eriachne chinensis* Hance; *Eriachne hookeri* Munro; *Eriachne muelleri* Domin; *Eriachne pallescens* var. *muelleri* (Domin) Hartley; *Eriachne yarrabensis* Domin)

Queensland, Northern Territory. Perennial, erect and slender, forming erect tussocks, sparse panicles, purplish spikelets 2-flowered, lemmas awned, see *Prodromus Florae Novae Hollandiae* 184. 1810, *Annales des Sciences Naturelles; Botanique, série 4* 15: 228. 1861, *Journal of the Linnean Society, Botany* 6: 42. 1862 and *Repertorium Specierum Novarum Regni Vegetabilis* 10: 118. 1911, *Bibliotheca Botanica* 85: 356. 1915, *Journal of the Linnean Society, Botany* 52: 345. 1942, *Blumea* 26: 134. 1980.

in Australia: wanderrie grass

E. pauciflora W. Fitzg.

Western Australia. Perennial or annual, branched at the lower nodes, beaked palea, similar to *Eriachne sulcata* and *Eriachne rara*, see Fitzgerald, W.V., *Journal and Proceedings of the Royal Society of Western Australia* 3: 115. 1918.

E. pulchella Domin

South Australia, Western Australia, Northern Territory, Queensland, New South Wales. Annual, densely tufted, slender, small, delicate, stems geniculate, panicle dense and oblong to oblong-lanceolate, spikelets shortly pedicellate, 2 florets, glumes glabrous and acute, hairy lemma awnless and mucronate, palea 2-lobed glabrous or silky, on sandy soils, see *Repertorium Specierum Novarum Regni Vegetabilis* 9: 552. 1911, Lazarides, M., "The genus *Eriachne* (Eriachneae, Poaceae)." in *Australian Systematic Botany* 8(3): 409. 1995.

in English: pretty wanderrie grass

E. pulchella Domin subsp. ***dominii*** (Hartley) Lazarides (*Eriachne dominii* Hartley; *Eriachne tuberculata* Domin)

Western Australia, Northern Territory, Queensland. Branched, see *Repertorium Specierum Novarum Regni Vegetabilis* 9: 552. 1911, *Journal of the Linnean Society, Botany* 41: 280, t. 11, f. 14-17. 1912, *Journal of the Linnean Soci-*

ety, *Botany* 52: 348. 1942, *Australian Systematic Botany* 8(3): 410, f. 261, 30G-I. 1995.

E. pulchella Domin subsp. ***pulchella*** (*Eriachne isingiana* J.M. Black) (for Mr. Ernest Horace Ising, 1884-1973, collector; see Kraehenbuehl, D.N. and Campbell, M.W., "Ernest Horace Ising: Tribute to a fine botanical worker." *South Australian Naturalist*, vol. 50, no. 2, pp. 19-27. 1975) Western Australia, South Australia. Short-lived, slender, compact leafy base, simple or sparsely branched, small dense panicles, see *Repertorium Specierum Novarum Regni Vegetabilis* 9: 552. 1911, Black, J.M., *Transactions and Proceedings of the Royal Society of South Australia* 57: 148, t. 9, f. 6. 1933.

E. rara R. Br. (*Aira rara* (R. Br.) Spreng.)

Western Australia, Northern Territory, Queensland. Perennial, loosely tufted, leaf blade ribbed and flat, loose open panicle, 2 florets, glumes aristate and equal, lemmas silky, awn terminal and curved, palea silky and bifid, on sandy soils, coastal species, similar to *Eriachne armitii* and *Eriachne squarrosa*, see *Prodromus Florae Novae Hollandiae* 183. 1810, *Systema Vegetabilium, editio decima sexta* 1: 278. 1825 and *Journal of the Royal Society of Western Australia* 44(3): 77-83. 1961, *Australian Systematic Botany* 8(3): 411. 1995.

E. schultzi F. Muell. (*Eriachne stipacea* var. *schultzi* (F. Muell.) Benth.) (named for Frederick Schultze, or Schultz, naturalist, 1868-1869 botanical collector on Goyder's Northern Territory Survey to Darwin)

Northern Territory, Darwin and Gulf District, Queensland. Perennial, base thickened, simple, glabrous, similar to *Eriachne squarrosa* and *Eriachne stipacea*, related to *Eriachne sulcata*, see *Fragmenta Phytographiae Australiae* 8: 137. 1873, *Flora Australiensis: A Description ...* 7: 627. 1878 and *Australian Systematic Botany* 8: 412. 1995.

E. scleranthoides F. Muell. (*Eriachne mucronata* subsp. *scleranthoides* (F. Muell.) Domin; *Eriachne mucronata* var. *scleranthoides* (F. Muell.) Domin; *Eriachne scleranthoides* var. *scleranthoides*)

Northern Territory, Western Australia, Central Australia. Perennial, shrubby, woolly, strongly branched, base thickened, overlapping leaf sheaths, leaf blades distichous and pungent, similar to *Eriachne mucronata*, see *Fragmenta Phytographiae Australiae* 8: 233. 1874, *Flora Australiensis: A Description ...* 7: 631. 1878 and *Bibliotheca Botanica* 85: 359, f. 80. 1915.

in English: Mount Olga wanderrrie grass

E. semiciliata Lazarides

Northern Territory, Darwin and Gulf District. Annual, slender, leafy, branched, hispid, glumes obtuse, similar to *Eriachne ciliata*, see *Australian Systematic Botany* 8(3): 415, f. 29F, I, 30A. 1995.

E. squarrosa R. Br. (*Aira squarrosa* (R. Br.) Spreng.)

Northern Territory, Queensland, Cook District, Western Australia, Malesia. Perennial, simple, hispid to hirsute, glumes hirsute elongate, similar to *Eriachne armitii* and *Eriachne sulcata*, see *Prodromus Florae Novae Hollandiae* 183. 1810, *Systema Vegetabilium, editio decima sexta* 1: 278. 1825 and *Journal of the Royal Society of Western Australia* 44(3): 77-83. 1961, *Blumea* 26: 127-138 (135-136). 1980.

E. stipacea F. Muell. (*Eriachne stipacea* var. *hirsuta* Hartley; *Eriachne stipacea* var. *stipacea*)

Northern Territory, Darwin, Queensland, Cook District. Perennial or annual, simple, loose hairy panicles, long-acuminate glumes, 2-awned paleas, on wet places, similar to *Eriachne squarrosa* and *Eriachne rara*, see *Fragmenta Phytographiae Australiae* 5: 206. 1866, *Fragmenta Phytographiae Australiae* 8: 137. 1873, *Flora Australiensis: A Description ...* 7: 627. 1878 and *Journal of the Linnean Society, Botany* 52: 342. 1942.

E. sulcata Hartley

Northern Territory, Western Australia, Goody Goody. Perennial, simple or sparsely branched, nodes bearded and tuberculate, dense panicles, hirsute glumes, awned 2-sulcate lemmas, shortly beaked paleas, similar to *Eriachne schultzi* and *Eriachne pauciflora*, see *Journal of the Linnean Society, Botany* 52: 342. 1942.

E. tenuiculmis Hartley (*Achneria pallida* (Nees) T. Durand & Schinz; *Eriachne pallida* Benth.)

Western Australia, Dampier's Archipelago. Perennial, base thickened, branched, glabrous, rigid leaf blades, loose linear panicles, glumes glabrous, see *Florae Africae Australioris Illustrationes Monographicae* I. Gramineae. 275. 1841, *Conspectus Florae Africae* 5: 836. 1894 and *Journal of the Linnean Society, Botany* 52: 346. 1942.

E. triodioides Domin (*Eriachne triodioides* var. *dietrichiae* Domin; *Eriachne triodioides* var. *triodioides*) (named for the German botanist Amalie Dietrich, née Nellen, 1822-1891, in Australia 1863-1873; see J.H. Barnhart, *Biographical notes upon botanists*. 1: 454. Boston 1965; Christian Luerssen, 1843-1916, *Zur Flora von Queensland*. Verzeichniss der von Frau Amalie Dietrich in den Jahren 1863 bis 1873 an der Nordostküste von Neuholland gesammelten Pflanzen. [Collector: Amalie Dietrich, née Nellen, 1822-1891] [Hamburg] 1874-1875; T.W. Bossert, compil., *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 102. Boston, Mass. 1972; Ignatz Urban, *Geschichte des Königlichen Botanischen Museums zu Berlin-Dahlem (1815-1913)*. Nebst Aufzählung seiner Sammlungen. 1916; Dennis John Carr and S.G.M. Carr, editors, *People and Plants in Australia*. London 1981)

Northern Territory, Queensland, Cook District, Western Australia. Perennial, robust, simple or branched at the base, tussocky, large spikelets, glumes hairy or glabrous, lemma awned 2-sulcate, palea bifid, deep sands, similar to *Eri-*

achne nervosa, see *Bibliotheca Botanica* 85: 356, f. 79. 1915.

E. trisetata Nees ex Steud. (*Megalachne zeylanica* Thw.; *Massia trisetata* (Nees ex Steud.) Balansa)

Sri Lanka, India, Southeast Asia, Australia, Northern Territory, Queensland, Western Australia. Perennial, tussock-forming, erect and simple, smooth, leaf sheaths bearded at mouth, leaves curly when dry, loose inflorescence, drooping panicle, floret shorter than the glumes, each floret with an apically-awned lemma and 2-awned palea, glumes subequal, awns of the palea slightly shorter than the awn of the lemma, weed, see *Synopsis Plantarum Glumacearum* 1: 237. 1854, *Enumeratio Plantarum Zeylanicae* 5: 372, 444. London Dec 1864, *Journal de Botanique (Morot)* 4(8): 165. 1890 and *Handb. Fl. Ceylon* 5: 266. 1900, *Grasses of Ceylon* 52. 1956, *Ceylon J. Sci., Biol. Sci.* 2(2): 23. 1959, Eck-Boorsboom, M.H.J. van, "A revision of *Eriachne* R. Br. (Gramineae) in Asia and Malesia." in *Blumea* 26: 127-138 (136-137). 1980.

in Sri Lanka: pini tuttiri, pinituttiri, pinitutturi

E. vesiculosa Lazarides

Northern Territory, Darwin and Gulf District. Perennial, herbaceous, branched, fastigiate, glabrous, nodes bearded, leaf blades convolute, loose open panicles, often cleistogamous florets, glumes mucicous, grooved lemmas, palea biaristate, similar to *Eriachne stipacea* and *Eriachne burkittii*, see M. Lazarides, "The genus *Eriachne* (Eriachneae, Poaceae)." *Australian Systematic Botany* 8(3): 423-424, f. 27F. 1995.

Erianthecium Parodi

Referring to the florets, perhaps from the Greek *erion* "wool" and *theke* "a case."

One species, Uruguay, southern Brazil. Pooideae, Poodae, Poeae, or Pooideae, Poeae, Brizinae, perennial, herbaceous, tuberous or bulbous, tufted, auricles absent, ligule an unfringed membrane, plants bisexual, cleistogamous, inflorescence paniculate, dense panicle, 3- to 4-flowered, spikelets flattened and usually with female fertile florets only, awned, 2 glumes unequal or subequal, lower glume 3- to 5-nerved, upper glume 7-nerved, lemmas coriaceous and densely pubescent, palea pubescent with ciliate keels, 2 lodicules free and membranous, 3 stamens, ovary glabrous, 2 stigmas pubescent, low forage value, related to *Sesleria*, type *Erianthecium bulbosum* Parodi, see *Notas del Museo de la Plata, Botánica* 8: 75-100. 1943, *Journal of Japanese Botany* 39(6): 161-164. 1964 [Notes on *Erianthecium* and *Ammochloa*], *Boletim do Instituto de Biociências, Universidade Federal do Rio Grande do Sul* 41: 1-191. 1987, *Contributions from the United States National Herbarium* 48: 312. 2003.

Species

E. bulbosum Parodi

Uruguay. Open habitats, rocky places, stony slopes, see *Notas del Museo de la Plata, Botánica* 8(Bot. 40): 77, f. 1. 1943, Rosengurt et al., *Gramíneas Uruguayas* 117. 1970.

Erianthus Michaux = *Eulalia* Kunth, *Miscanthus* Andersson, *Ripidium* Trin., *Saccharum* L.

From the Greek *erion* "wool" and *anthos* "flower," referring to the appearance of the inflorescence, to the woolly glumes.

About 0-28 species, Europe, Asia, Sahara, tropical America. Panicoideae, Andropogonodae, Andropogoneae, Andropogoninae, or Panicoideae, Andropogoneae, Saccharinae, perennial, tufted, reedlike, simple, auricles absent, ligule membranous more or less ciliate, plants bisexual, cleistogamous or chasmogamous, inflorescence paniculate, 2 glumes more or less equal, lower glume 2-keeled 2-nerved, upper glume 3-nerved, palea present, 2 free and fleshy lodicules, stamens 3, ovary glabrous, 2 stigmas, often in and hybrids with *Saccharum*, type *Erianthus saccharoides* Michx. (*Anthoxanthum giganteum* Walter), see *Species Plantarum* 1: 54. 1753, *Journal für die Botanik* 1800(2): 127. 1801, André Michaux, *Flora Boreali-Americana*. 1: 54-55. Paris 1803, *Fundamenta Agrostographiae* 169. 1820 and *N. Amer. Fl.* 17: 90. 30 June 1909, *Lloydia* 21(3): 157-188. 1958, *Darwiniana* 23: 559-585. 1981, *Flora Mesoamericana* 6: 378-379. 1994, *Contributions from the United States National Herbarium* 46: 230-233, 241, 294-295, 546, 550-557. 2003.

Species

E. sp.

in the Pacific Islands: a'eho, e poo-aiho

Erioblastus Honda = *Deschampsia* P. Beauv., *Erioblastus* Honda ex Nakai, *Erioblastus* Nakai ex Honda, *Vahlodea* Fr.

Greek *erion* "wool" and *blastos* "bud, sprout, germ, ovary, sucker."

Pooideae, Poeae, Airinae, see *Essai d'une Nouvelle Agrostographie* 91, 149, 160. 1812, *Botaniska Notiser* 1842: 141, 178. 1842, *Handbok i Skandinaviens Flora, Fjerde Upplagan* 30. 1843, *A Manual of the Botany of the Northern United States* 605. 1848, *A Manual of the Botany of the Northern United States. Second Edition* 572. 1856, *Die Natürlichen Pflanzenfamilien* 2(2): 54. 1887 and *Rep. Fl. Mt. Daisetsu (Stud. Nat. Monum. Japan Bot.)* 12(1): 73. 1930 [Report on the vegetation of Daisetsusan Mts. and

their vicinities, in: Preserv. Natural Monuments Japan, vol. 12(1): 1-80, pl. 1-19, map 1-2.], *J. Fac. Sci. Tokyo, Bot.*, 3: 142. 1930, F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 253. 1989, R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 629. 1993, *Willdenowia* 20: 139-152. 1991, *Flora Mesoamericana* 6: 235. 1994, *Plant Systematics and Evolution* 205: 99-110. 1997, *Botanical Journal of the Linnean Society* 134: 495-512. 2000 [The *Deschampsia cespitosa* complex in central and northern Europe: a morphological analysis.], *Contributions from the United States National Herbarium* 48: 245-256, 312, 687-688. 2003.

Eriochaeta Figari & De Not. = Pennisetum Rich.

From the Greek *erion* “wool” and *chaite* “bristle, long hair.”

Panicoideae, Panicodae, Paniceae, Cenchrinae, type *Eriochaeta secundiflora* F. & De Not., see *Synopsis Plantarum* 1: 72. 1805, *Enumeratio Plantarum Horti Botanici Berolinensis*, ... 1036-1037. 1809, *Essai d'une Nouvelle Agrostographie* 59. 1812, *Flora* 25(Beibl. 2): 2. 1842, *Systematisches Verzeichniss der im Indischen Archipel* 60. 1854, *Memorie della Reale Accademia delle Scienze di Torino, ser. 2* 14: 374-375. 1854, *Flora Brasiliensis* 2(2): 305, 308. 1877 and *Contr. U.S. Natl. Herb.* 22: 210-211. 1921, *Flora of Tropical Africa* 9: 956-957, 962, 966. 1934, *Amer. J. Bot.* 64: 161-176. 1977, *Econ. Bot.* 31: 163-174. 1977, *Flora Mesoamericana* 6: 371-374. 1994, *Contributions from the United States National Herbarium* 46: 527-536. 2003.

Eriochloa Kunth = Aglycia Steud., Alycia Willd. ex Steud., *Glandiloba* (Raf.) Steud., *Helopus* Trin., *Monachne* P. Beauv., *Oedipachne* Link

Woolly grass, hairy spikelets and pedicels, from the Greek *erion* “wool” and *chloe, chloa* “grass”; see Friedrich W.H.A. von Humboldt, Aimé J.A. Bonpland and Carl S. Kunth, *Nova Genera et Species Plantarum*. 1: 94-95. Lutetiae Parisorum [Paris] 1815-1825.

About 20-35 species, subtropical, tropical and warm regions. Panicoideae, Panicodae, Paniceae, or Panicoideae, Paniceae, Melinidinae, annual or perennial, softly herbaceous, branched or unbranched, decumbent, clumped, stoloniferous, hairy nodes, hollow internodes, ligule ciliate or a fringed membrane, auricles absent, flattened blades rolled in bud, plants bisexual, open and large inflorescence racemose or paniculate, racemes simple or compound along a central axis, spikelets solitary or clustered or paired, spike-

lets pedicellate and in 2 rows on 1 side of the rachis, characteristic hardened and cupuliform callus or beadlike structure at the base of each spikelet, florets 2, lower floret sterile or male, terminal floret fertile, 2 glumes usually very unequal or dissimilar, the lower glume very reduced or vestigial is the cupuliform callus, upper glume usually awned, short lemma mucronate and coriaceous, palea 2-nerved and 2-keeled or reduced or suppressed, 2 broadly cuneate lodicules free and fleshy, stamens 3, ovary glabrous, 2 stigmas red, fruit compressed, weed species, cultivated fodders, highly palatable nutritious, native pasture species, damp ground, rainforest, weedy places, grasslands, open habitats, *Paspalum*-like, see *Flora Boreali-Americana* 1: 47. 1803, *Essai d'une Nouvelle Agrostographie* 49, 168, t. 10, f. 10. 1812, *Nova Genera et Species Plantarum* 1: 94-95, t. 30. 1815 [1816] [folio, 1: 78. 1816], *Fundamenta Agrostographiae* 103-104, t. 4. 1820 [1822], *Hortus Regius Botanicus Berolinensis* 1: 51, 273, 1827, *Bulletin Botanique [Genève]* 1: 220. 1830, *Nomenclator Botanicus. Editio secunda* 1: 37, 66. 1840 and *Contributions from the United States National Herbarium* 12(6): 183-258. 1909, *N. Amer. Species

E. acuminata (J. Presl) Kunth (*Eriochloa gracilis* (E. Fourn.) Hitchc.; *Eriochloa lemmonii* Vasey & Scribn.; *Eriochloa lemmonii* var. *gracilis* (E. Fourn.) Gould; *Helopus acuminatus* (J. Presl) Steud.; *Helopus gracilis* E. Fourn.; *Piptatherum acuminatum* J. Presl)

Southwest U.S., New Mexico, Louisiana, Arkansas. Annual, forage, weed species of corn and soybeans, economic plant, see *Reliquiae Haenkeanae* 1(4-5): 221. 1830, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 72. 1833, *Nomenclator Botanicus. Editio secunda* 1: 747. 1840, *Botanical Gazette* 9(12): 185, pl. 2. 1884, *Mexicanas Plantas* 2: 13. 1886 and *Journal of the Washington Academy of Sciences* 23(10): 455. 1933, *Leaflets of Western Botany* 6(2): 51. 1950, *Taxon* 33: 126-134. 1984.

in English: taper-tip cup grass, cup grass

in Colombia: liendre de puerco

E. acuminata (J. Presl) Kunth var. ***acuminata*** (*Eriochloa gracilis* (E. Fourn.) Hitchc.; *Eriochloa gracilis* var. *gracilis*; *Eriochloa lemmonii* var. *gracilis* (E. Fourn.) Gould; *Eriochloa montevidensis* Griseb.; *Helopus acuminatus* (J. Presl) Steud.; *Helopus gracilis* E. Fourn.; *Piptatherum acuminatum* J. Presl)

Southwest U.S., Arizona, New Mexico, Louisiana, Arkansas, California. Annual, glabrous, caespitose, decumbent, smooth leaves, reproduce from the germination of abundant seeds, weed species, potentially a pest, growing in cultivated and disturbed sites, margin of field, floodplain soils, see *Reliquiae Haenkeanae* 1(4-5): 221. 1830, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 72. 1833, *Nomenclator Botanicus. in English: Southwestern cup grass, taper-tipped cup grass, taper-tip cup grass

E. acuminata (J. Presl) Kunth var. ***minor*** (Vasey) R.B. Shaw (*Eriochloa gracilis* (E. Fourn.) Hitchc. var. *minor* (Vasey) Hitchc.; *Eriochloa lemmonii* var. *minor* (Vasey) Beetle; *Eriochloa punctata* var. *minor* Vasey; *Eriochloa texana* Mez)

Northern America, U.S., Mexico, New Mexico. Annual, see *Prodromus Plantarum Indiae Occidentalis* 5. 1825, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 72. 1833, *Botanical Gazette* 9(12): 185, pl. 2. 1884, *Contributions from the United States National Herbarium* 3(1): 21. 1892 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 56(Beibl. 125): 12. 1921, *Journal of the Washington Academy of Sciences* 23(10): 455-456. 1933, *Phytologia* 54(1): 2. 1983, *Sida* 12(1): 174. 1987.

in English: small Southwestern cup grass, plains cup grass

E. aristata Vasey (*Eriochloa boxiana* Hitchc.; *Eriochloa punctata* var. *aristata* (Vasey) M.E. Jones) (named for Harold Edmund Box, b. 1898)

Northern and southern America, U.S., Mexico, Guatemala. Annual, forage, found in damp places, open areas, abandoned lands, swamps, see *Bulletin of the Torrey Botanical Club* 13(12): 229. 1886 and *Contributions to Western Botany* 14: 11. 1912, *Publications of the Carnegie Institution of Washington* 436: 339. 1934, *Sida* 12(1): 174. 1987.

in English: awned cup grass, bearded cup grass

E. aristata Vasey var. ***aristata*** (*Eriochloa punctata* var. *aristata* (Vasey) M.E. Jones)

Northern America, U.S., California. Annual.

in English: pointed cup grass

in Spanish: zacate taza

E. aristata Vasey var. ***boxiana*** (Hitchc.) R.B. Shaw (*Eriochloa boxiana* Vasey; *Eriochloa montevidensis* Griseb.)

Central and South America. Sandy places, near beaches, see *Abhandlungen der Königlichen Gesellschaft der Wissenschaften zu Göttingen* 24: 306. 1879 [*Symbolae ad Floram Argentinam* 306. Göttingen 1879], *Bulletin of the Torrey Botanical Club* 13(12): 229. 1886 and *Publications of the Carnegie Institution of Washington* 436: 339. 1934, *Sida* 12: 177. 1987.

E. australiensis Stapf ex Thell. (*Eriochloa longiflora* S.T. Blake)

South Australia, Western Australia, Northern Territory, Queensland, New South Wales. Annual, multistemmed, green to light green, leaves glabrous, leaf sheaths hairy and more or less inflated, panicle with many erect branches, short pedicels, racemes erect and appressed, silky and alternate spikelets long-acuminate, lower glume cupuliform, fertile lemma mucronate, economic plant, useful for erosion control, forage, palatable, see *Vierteljahrsschrift der Naturforschenden Gesellschaft in Zürich* 64: 697. 1919.

in English: Australian cup grass

E. boliviensis Renvoize

South America, Bolivia, Brazil. Annual, tufted, leaf blades linear and acuminate, pubescent racemes, solitary spikelets, lower glume reduced, moist sites.

E. contracta A.S. Hitchc. (*Helopus mollis* Müll.Stuttg., or Müll.Hal.)

Northern America, U.S., Arkansas. Annual, pubescent stems and blades, linear leaves, narrow inflorescence, short racemes, spikelet with a cuplike structure, awned fertile lemma, short grain, weedy grass, invasive, economic plant, naturalized, seeds are the only source of reproduction, grows on moist fields and ditches, open places, old fields, shade, in loose sand, corn and sorghum fields, pond banks, often in alluvial fields and river valleys, roadsides, waste ground and disturbed sites, see *Botanische Zeitung. Berlin*

19(43): 314. 1861 and *Proceedings of the Biological Society of Washington* 41: 163. 1928, *Sida* 12(1): 165-207. 1987.

in English: prairie cup grass, dense cup grass

E. crebra S.T. Blake (Latin *creber*, *bra*, *brum* “thick, close, numerous, clustered”)

Northern Territory, Queensland, New South Wales. Annual or shortly perennial, caespitose, erect, multistemmed, leaves glabrous and flat, leaf sheath smooth and glabrous, panicle with several scabrous branches, spikelets crowded and overlapping on the racemes, spikelets usually silky or sparsely hairy and acute or shortly acuminate, lower glume cupuliform, fertile lemma mucronate, forage, economic plant, indeterminate plant in Victoria, useful for erosion control, grows in dry grassland, on dark brown clay, in open grassland, confused with *Eriochloa pseudoacrotricha* (Stapf ex Thellung) J.M. Black, see *Proceedings of the Royal Society of Queensland* 59(7): 156-157. 1948.

in English: tall cup grass, cup grass

E. decumbens F.M. Bailey (*Eriochloa acrotricha* var. *decumbens* (F.M. Bailey) Domin; *Eriochloa nubica* (Steud.) Hack. & Stapf ex Thell.)

Australia, Pacific. See *Synopsis Plantarum Glumacearum* 1: 100. 1854, *Queensland Agricultural Journal* 1: 234. 1897 and *Bibliotheca Botanica* 85: 290. 1915, *Vierteljahrsschrift der Naturforschenden Gesellschaft in Zürich* 64: 697. 1919.

E. distachya Kunth (*Eriochloa tridentata* (Trin.) Kuhl.; *Helopus brachystachys* Trin.; *Paspalum brachystachyum* (Trin.) Trin.; *Paspalum tridentatum* Trin.)

Costa Rica, Bolivia, Paraguay. Perennial, caespitose, erect or geniculate, branched, leaf blades linear and acuminate, leaves pilose or subglabrous, solitary spikelets, lower glume reduced, dry or moist habitats, see *Nova Genera et Species Plantarum* 1: 95, t. 30. 1815 [1816], *De Graminibus Panicis* 119. 1826, *Species Graminum* 3: t. 277. 1829, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 3,1(2-3): 133. 1834 and *Comissão de Linhas Telegraficas, Botanica* 67(Bot. 11): 89. 1922.

E. eggersii Hitchc.

Ecuador. See *Contributions from the United States National Herbarium* 24(8): 430. 1927.

E. fatmensis (Hochst. & Steud.) W.D. Clayton (*Brachiaria leucacantha* (Schum.) Stapf; *Digitaria acrotricha* (Steud.) Roberty; *Eriochloa acrotricha* (Hook.f.) Schinz; *Eriochloa acrotricha* Hack. ex Thell., nom. illeg.; *Eriochloa acrotricha* (Steud.) Hack., nom. illeg., non *Eriochloa acrotricha* (Hook.f.) Schinz; *Eriochloa acrotricha* (Steud.) Thell.; *Eriochloa annulata* var. *acrotricha* (Steud.) Benth.; *Eriochloa fouchei* Stent; *Eriochloa nubica* (Steud.) Hack. & Stapf ex Thell.; *Eriochloa procera* auct. non (Retz.) C.E. Hubbard; *Eriochloa punctata* var. *acrotricha* (Steud.) K. Schum.;

Helopus acrotrichus Steud., nom. illeg. superfl.; *Helopus nubicus* Steud.; *Panicum acrotrichum* Hook.f.; *Panicum annulatum* A. Rich.; *Panicum fatmense* Hochst. & Steud.; *Panicum leucacanthum* Schum.; *Paspalum dimidiatum* L.)

Tropical and South Africa, Yemen, Thailand, India. Annual, leafy, clumped, creeping and ascending, erect or geniculately ascending, floating culms, ligule a dense fringe of hairs, linear leaf-blades, inflorescence narrow, silky spikelets paired, lower floret sterile, a tiny beadlike swelling below each spikelet, lower glume absent, upper glume shortly awned or attenuate to an awnlet, upper lemma mucronate, palea absent, seeds shed easily, used for thatching, naturalized, a weed on arable land, grains eaten by humans and wild animals, quite palatable, good grazing grass, grazed by stock, useful for erosion control, little drought tolerance, tolerates seasonal flooding and slightly saline soils, grows on alluvial soil in dry areas, marshes, wadi beds, black clay, dry arid localities, seasonally flooded disturbed places, inundated fields and seasonally flooded soils, dry sandy soils, lake sides, heavy soils, areas of cultivation, irrigated fields, on stream banks and roadsides, lagoon flats, damp and swampy places in grassland, on sandy and alluvial loams, sandy depressions, see *Systema Naturae, Editio Decima* 846, 855, 1359. 1759, *Tentamen Florae Abyssinicae ...* 2: 370. 1850, *Synopsis Plantarum Glumacearum* 1: 100. 1854, *Journal of the Linnean Society, Botany* 7: 226. 1864, *Flora Australiensis: A Description ...* 7: 463. 1878, *Die Pflanzenwelt Ost-Afrikas* C: 100, 102. 1895, *Queensland Agricultural Journal* 1: 234. 1897 and *Vierteljahrsschrift der Naturforschenden Gesellschaft in Zürich* 52: 435. 1907, *Contr. U.S. Natl. Herb.* 12: 116. 1908, *Flora of Tropical Africa* 9: 500, 540. 1919, *Vierteljahrsschrift der Naturforschenden Gesellschaft in Zürich* 64: 697. 1919, *Bothalia* 1: 260. 1924, *Bulletin de l'Institut Française d'Afrique Noire* 17: 63. 1955, *Kew Bulletin* 30(1): 108. 1975, *J. Cytol. Genet.* 20: 205-206. 1985, *Annals of the Missouri Botanical Garden* 81(4): 775-783. 1994, Phillips, S., *Flora of Ethiopia and Eritrea* 7: 1-420. 1995.

in English: tropical cup grass, ants millet

in Niger: buteri, kormoto

in Nigeria: geron kiyasi, geron kiyashi, gheron kiyashi

in Somalia: dalad, dhalad, darabo, agar

E. grandiflora (Trin.) Benth. (*Helopus grandiflorus* Trin.; *Paspalum ctenastachyum* Trin.)

Brazil, Paraguay, Bolivia. Perennial, caespitose, straight and erect, leaf blades linear and attenuate, racemes strongly unilateral, spikelets acute, lower glume reduced, in grassland, see *Species Graminum* 1828-1836, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 3,1(2-3): 133. 1834, *Journal of the Linnean Society, Botany* 19: 39.

1881 and *Annals of the Missouri Botanical Garden* 77(1): 125-201. 1990.

E. hackelii Honda

Japan. See *Botanical Magazine* (Tokyo) 37: 115. 1923.

E. leersioides (Munro) Hack.

U.S. Weed, probably introduced.

in English: sharp cup grass

E. lemmonii Vasey and Scribner (*Eriochloa lemmonii* var. *lemmonii*) (named for the American botanist John Gill Lemmon, 1832-1908, plant collector in Southern Arizona and Huachuca Mountains near Sierra Vista, correspondent of Asa Gray, he married Sara Allen Plummer (1836-1923), wrote *Conifers of the Pacific Slope*. [Oakland, California 1902]. See J.H. Barnhart, *Biographical notes upon botanists*. 2: 367 and 3: 93. 1965; S. Lenley et al., *Catalog of the manuscript and archival collections and index to the correspondence of John Torrey*. Library of the New York Botanical Garden. 262. 1973; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 234. 1972; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993; Irving William Knobloch, compil., "A preliminary verified list of plant collectors in Mexico." *Phytologia Memoirs*. VI. 1983; Ira L. Wiggins, *Flora of Baja California*. Stanford, California 1980; *Desert Plants*. vol. 1 no. 1, August 1979)

Northern America, U.S., Arkansas, Arizona, Texas, Sinaloa, Mexico, Sonora, Chihuahua. Rare species, forage, see *Botanical Gazette* 9(12): 185, pl. 2. 1884, *Mexicanas Plantas* 2: 13. 1886, *Contributions from the United States National Herbarium* 3(1): 21. 1892 and *Leaflets of Western Botany* 6(2): 51. 1950, *Phytologia* 54(1): 2. 1983, *Sida* 12: 184. 1987.

in English: canyon cup grass

E. longiflora S.T. Blake

Australia. See *Papers from the Department of Botany, University of Queensland* 1(18): 18. 1941.

E. macclounii Stapf (named for the British forester John McClounie, 1895-1897 and 1902-1903 botanical collector in Tropical Africa, Malawi, Zambia, author of *Rainfall Forecasts and Estimates from 1st June, 1903 to 31st May 1904* [Zomba, Nyasaland, Malawi] 1903; see Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists* 448.

London 1994; Association for the Taxonomic Study of the Flora of Tropical Africa. Plenary Meeting (13th: 1991: Zomba: Malawi) Proceedings of the 13th plenary meeting of AETFAT, Zomba Malawi, 2-11 Apr, 1991 / edited by J.H. Seyani and A.C. Chikuni. - Zomba: National Herbarium and Botanical Gardens, 1994. -2 Vols.)

Tanzania, Mozambique, Botswana. Annual, tufted, upper glume awned, lower floret staminate, palea present, found in grassland, floodplain, flooded grasslands, see *Flora of Tropical Africa* 9: 501. 1919.

E. meyeriana (Nees) Pilg. (*Eriochloa borumensis* sensu Hack., non Stapf; *Eriochloa meyeriana* subsp. *grandiglumis* (Stent & Rattray) Gibbs.-Russ.; *Panicum meyerianum* Nees; *Panicum meyerianum* var. *grandiglume* Stent & Rattray; *Panicum mite* Steud.; *Panicum schimperianum* Hochst. ex A. Rich.)

Tropical and South Africa, Arabia, Yemen, Tanzania, Swaziland, Botswana. Perennial, often woody, erect, decumbent, creeping and ascending, rooting from the lower nodes, branched to much-branched, often scrambling, forming large clumps, ligule a ciliate fringe, leaves flat, inflorescence a rather narrow panicle with lax pedunculated racemes along an axis, racemes often compound, spikelets glabrous paired or densely clustered on branchlets, lower floret paleate, lower glume present, upper glume acute, upper lemma mucronate, useful for erosion control, common in saline flooded grasslands, scrubby vegetation, swamps, on riverbanks, streambanks, wet wooded grasslands, see *Flora of Africa Australioris Illustrationes Monographicae* 32. 1841, *Tentamen Florae Abyssinicae ...* 2: 371. 1850, *Synopsis Plantarum Glumacearum* 1: 68. 1854 and *Bulletin de l'Herbier Boissier, sér. 2*, 1: 765. 1901, *Proceedings of the Rhodesia Scientific Association* 32: 28. 1933, *Die Natürlichen Pflanzenfamilien* edition 2 14e: 56. 1940, *Bothalia* 13(3-4): 457. 1981.

E. meyeriana subsp. *grandiglumis* (Stent & Rattray) Gibbs-Russell (*Panicum meyerianum* Nees var. *grandiglume* Stent & Rattray)

South Africa, Zimbabwe. Perennial, rare, lower glume acute, found along riverbanks, floodplains, low veld, see *Proceedings of the Rhodesia Scientific Association* 32: 28. 1933, *Bothalia* 13(3-4): 457. 1981.

E. meyeriana subsp. *meyeriana* (*Eriochloa borumensis* sensu Hack., non Stapf; *Panicum meyerianum* Nees var. *meyerianum*)

Tropical Africa, South Africa. Perennial or annual, robust, geniculate, rooting at the lower nodes, upper glume acute, found along riverbanks and lakeshore, floodplains, sandy soils, wet places.

E. michauxii (Poir.) A.S. Hitchc. (*Eriochloa debilis* Mez; *Eriochloa longifolia* (Vasey) Vasey; *Eriochloa mollis* (Michx.) Kunth; *Eriochloa mollis* var. *longifolia* Vasey; *Panicum georgicum* Spreng.; *Panicum michauxianum*

Schult.; *Panicum michauxii* Poir.; *Panicum molle* Michx., nom. illeg., non *Panicum molle* Sw.) (named for the French explorer André Michaux, 1746-1803 (died on an expedition to Madagascar), botanist and plantsman, plant collector, 1782-1785 Persia, 1785-1796 North America, author of *Flora Boreali-Americana*. 1: 51. Paris 1803 [Repr. New York 1973, intro. by J. Ewan], father of the French botanist François-André Michaux (1770-1855). See Stafleu and Cowan, *Taxonomic literature*. 3: 456-464. 1981; J.H. punctatus (L.) Fluegge; *Piptatherum punctatum* (L.) P. Beauv.)

West Indies, southern U.S. to northern Argentina, Venezuela, Brazil, Bolivia. Annual or perennial, branched, herbaceous, glabrous, loosely tufted, decumbent base, culms geniculate ascending, stoloniferous, dark green leaves, nodes densely hairy, secondary racemes sparse more or less bilateral, silvery and nearly sessile acuminate spikelets, oblong fruits, seeds rarely viable, quite palatable hay, cultivated fodder, usually cut for green chop, invasive weed species, withstands flooding, little drought tolerance, vigorous growth, propagated vegetatively, prefers moist sandy loams, along rivers and streamlets, moist places, sandy riverbank, damp grassland, frequently found in dry seeded rice, soya bean, maize and cotton, old fields, see *Systema Naturae, Editio Decima* 872. 1759, *Amoen. Acad.* 5: 392. 1759 [1760], *Encyclopédie Méthodique, Botanique* 1: 58. 1783, *Graminum Monographiae* ... Pars. I. *Paspalum. in English: silky cup grass, Texas cup grass, cup grass

E. setosa (A. Rich.) Hitchc. (*Eriochloa filifolia* Hitchc.; *Piptatherum setosum* A. Rich.)

The Caribbean, West Indies, Cuba. Perennial, tufted, slender, leaf blades filiform, inflorescence long-exserted, spikelets loosely arranged, second glume and sterile lemma acuminate to awn-tipped, see *Historia Fisica Politica y Natural de la Isla de Cuba, Botanica* 11: 311. 1850 and *Contributions from the United States National Herbarium* 12(6): 207-208. 1909, *Manual of the Grasses of the West Indies* 182-183. 1936.

E. setosa (A. Rich.) Hitchc. var. ***ekmanii*** (Hitchc.) R.B. Shaw (*Eriochloa ekmanii* Hitchc.)

Cuba. Perennial, slender, tufted, branched, decumbent at base, leaf sheaths puberulent, leaf blades flat or involute, see *Manual of the Grasses of the West Indies* 183. 1936, *Sida* 12: 202. 1987.

E. setosa (A. Rich.) Hitchc. var. ***setosa***

South America.

E. stapfiana Clayton (*Eriochloa borumensis* Stapf)

Tropical East Africa. Perennial, tufted, robust, leaf sheath shortly hairy, inflorescence ascending, a contracted panicle, spikelets with dark pedicels, lower floretstaminate, upper glume mucronate or awned, lemma with a sharp tip, pasture grass, grows on heavy soils, in wet areas, riverbanks, see *Kew Bulletin* 30(1): 109. 1975.

in English: harpoon grass

in South Africa: harpoengras

E. stevensii Davidse (*Eriochloa multiflora* Renvoize)

Nicaragua, Ecuador. Erect, savannah, see *Novon* 2(4): 325, f. 3A-F. 1992, *Kew Bulletin* 50(2): 345, f. 2. 1995.

E. villosa (Thunb.) Kunth (*Eriochloa villosa* var. *stenantha* Ohwi; *Helopus villosus* (Thunb.) Nees; *Helopus villosus* (Thunb.) Nees ex Steud., nom. illeg., non *Helopus villosus*

(Thunb.) Nees; *Paspalum distichum* Houtt., nom. illeg., non *Paspalum distichum* L.; *Paspalum villosum* Thunb.)

Asia temperate, China, Japan, Taiwan. Annual, densely pubescent, dark green, loosely clumped, erect, tillers profusely at base, adventitious root can form at base of plant, leaf sheath open near the collar and overlaps at base, leaf sheath densely covered with very short hairs, ligule a fine fringe of hairs, no auricle present, linear and velvety leaves, 1 leaf blade edge wrinkled or crinkled, several racemes per panicle, very large oval to roundish seeds hang in 2 rows from the raceme, spikelets pubescent and elliptic, very hairy pedicels, hardened first glume, upper lemma mucronate, cuplike depression at the base of the seed, seed light green to tan-brown to purple depending upon maturity, seeds shatter readily as they mature, economic plant, ornamental, naturalized, a prolific seed producer, potential seed contaminant, aggressive competitor with most crops, weed species in corn fields, see *Natuurlijke Historie* 13: 167, t. 89, f. 4. 1782 [this is a Dutch version of Linnaeus, *Syst. Nat.* edition 12, 1767, amended and enlarged], *Nova Acta Soc. Sc. Upsal.* 4: 40. 1783, *Flora Japonica, ...* 45. 1784, *Révision des Graminées* 1: 30. 1829, *Flora Brasiliensis seu Enumeratio Plantarum* 2: 17. 1829, *Nomenclator Botanicus* 1(2): 747. 1840, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 6: 49. 1885 and *Repertorium Specierum Novarum Regni Vegetabilis* 36(936-941): 41. 1934, *Journal of Cytology and Genetics* 18: 26-33, 60-61. 1983, *Blumea* 30: 279-318. 1985, *Journal of Cytology and Genetics* 22: 161-162. 1987.

in English: hairy cup grass, woolly cup grass, Chinese cup grass

in Japan: naruko-bie (= clapper *Echinochloa*)

E. weberbaueri Mez

Peru. See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 56(Beibl. 125): 11. 1921.

Eriochrysis P. Beauv. = *Leptosaccharum* (Hack.) A. Camus, *Plazerium* Kunth

From the Greek *erion* "wool" and *chrysos* "gold, golden," referring to the color of the hairs.

About 7 species, tropics of America and Africa, India. Panicoideae, Andropogonodae, Andropogoneae, Andropogoninae, or Panicoideae, Andropogoneae, Saccharinae, perennial, tufted, herbaceous, unbranched, internodes hollow, leaves mostly basal, auricles absent, ligule a fringed membrane, sometimes shortly rhizomatous, plants bisexual, narrow inflorescence spicate or paniculate, several rufous racemes more or less appressed or compact, spikelets paired sessile and pedicellate, pedicelled spikelets male, sessile spikelet bisexual and bearded, 2 glumes more or less equal,

lower glume 2-keeled or broadly convex, upper glume 1- to 3-nerved, upper lemmas awnless, palea absent, 2 free and fleshy lodicules, 3 stamens, ovary glabrous, 2 stigmas plumose, species of open habitats, found in swamps, marshes, riverbanks and moist places, allied to *Saccharum*, type *Eriochrysis cayennensis* P. Beauv., see *Species Plantarum* 1: 54. 1753, *Essai d'une Nouvelle Agrostographie* 8, t. 4, f. 11. 1812, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 474. 1833, *Flora Brasiliensis* 2(4): 253. 1883, *Die Natürlichen Pflanzenfamilien* 2(2): 24. 1887, *Monographiae Phanerogamarum* 6: 29. 1889 and *Bulletin de la Société Botanique de France* 70: 736. 1923, A.S. Species

E. brachypogon (Stapf) Stapf (*Eriochrysis brachypogon* subsp. *australis* J.G. Anderson; *Saccharum brachypogon* Stapf)

Tropical Africa, Central African Republic. Perennial, tufted, erect, tussocky, fibrous old leaf sheaths, leaf blades narrowly linear, inflorescence hairs shorter than the spikelets, sessile spikelet 3-denticulate, rare, common in riverbanks, floodplains, seasonal ponds, vleis, bogs, marshy grassland, see *Bulletin de la Société Botanique de France* 55: 97. 1908, *Flora of Tropical Africa* 9: 93. 1917.

E. cayennensis P. Beauv. (also *cayanensis*) (*Andropogon cayennensis* (P. Beauv.) Raspail; *Eriochrysis caryanensis* P. Beauv.; *Eriochrysis glabrifolia* Swallen; *Panicum lagopus* Willd. ex Spreng.; *Saccharum cayennense* (P. Beauv.) Benth.; *Saccharum cayennense* var. *genuinum* Hack.; *Saccharum cayennense* var. *laxiusculum* Hack.; *Typha latifolia* L., Typhaceae)

Mexico to Argentina, Uruguay. Perennial, caespitose, erect, herbaceous, leaf blades densely velvety, leaves lanceolate, compact silky panicle, sessile spikelet lanceolate, found in marshy places, marshy grassland, open areas, savannah and wet savannah, in or near water, wet ground, floodplains, in standing water, along roadsides, bogs and pond, stream banks, moist slopes, see *Species Plantarum* 2: 971. 1753, *Essai d'une Nouvelle Agrostographie* 8, t. 4, f. 11. 1812, *Annales des Sciences Naturelles (Paris)* 5: 307. 1825, *Systema Vegetabilium, editio decima sexta* 1: 265. 1825, *Journal of the Linnean Society, Botany* 19: 66. 1881, *Flora Brasiliensis* 2(4): 253. 1883 and *N. Amer. Fl.* 17: 3. 1909,

The Genera of South African Flowering Plants 78. 1951, *Phytologia* 14(2): 90. 1966.

E. filiformis (Hack.) Filg. (*Andropogon filiforme* Hack. ex A. Camus, nom. illeg., non *Andropogon filiformis* Pers.; *Leptosaccharum filiforme* (Hack.) A. Camus; *Saccharum filiforme* Hack.)

America. See *Monographiae Phanerogamarum* 6: 29. 1889 and *Bulletin de la Société Botanique de France* 70: 737. 1923, *Novon* 7(3): 231-233, f. 1. 1997.

E. holcooides (Nees) Kuhl. (*Anatherum holcooides* Nees; *Andropogon holcooides* (Nees) Kunth; *Saccharum holcooides* (Nees) Hack.; *Saccharum holcooides* var. *brevipilum* Hack.; *Saccharum holcooides* var. *penicillare* Hack.)

Colombia to Paraguay. Perennial, erect, herbaceous, caespitose, growing in damp places, marshy grassland, open areas, in or near water, seasonal ponds, wet ground, floodplains, in standing water, along roadsides, bogs and ponds, stream banks, wet savannah, see *Flora Brasiliensis seu Enumeratio Plantarum* 2: 324. 1829, *Révision des Graminées* 1: 49, t. 160. 1829, *Flora Brasiliensis* 2(4): 254. 1883, *Monographiae Phanerogamarum* 6: 126. 1889 and *Comissão de Linhas Telegraficas Estratégicas de Matto-Grosso ao Amazonas, Botanica* 67(Bot. 11): 89. 1922.

E. pallida Munro (*Eriochrysis munroana* (Hack.) Pilg.; *Saccharum munroanum* Hack.; *Saccharum pallidum* (Munro) Benth.; *Saccharum pallidum* (Munro) Roberty, nom. illeg., non *Saccharum pallidum* (Munro) Benth.)

Tropical East Africa, Tanzania. Perennial, densely tufted, slender, erect, leaf blades narrowly linear, inflorescence hairs longer than the spikelets, sessile spikelet acute, common in riverbanks, marshy grassland, vleis, wet meadows, damp places, wet ground, floodplains, in standing water, along roadsides, seasonal ponds, bogs and ponds, see *The Genera of South African Plants* 2: 440. 1868, *Journal of the Linnean Society, Botany* 19: 66. 1881, *Monographiae Phanerogamarum* 6: 124. 1889 and *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 11: 648. 1932, *Boissiera. Mémoires du Conservatoire de Botanique et de l'Institut de Botanique Systématique de l'Université de Genève* 9: 361. 1960.

E. purpurata (Rendle) Stapf (*Saccharum purpuratum* Rendle)

Tropical East Africa. See *Transactions of the Linnean Society of London, Botany* 4: 56. 1894 and *Flora of Tropical Africa* 9: 92. 1917.

E. rangacharii Fischer

India, Tamil Nadu, Nilgiri District. Probably extinct, perennial, tufted, erect, nodes villous, ligule shortly ciliate, leaf blades very narrow and acute, dense inflorescence, narrow panicle, 3-4 racemes sessile, 1 spikelet sessile and the other pedicelled, glumes subequal, 2 lodicules, 3 stamens, growing in hills, slopes, see *Bulletin of Miscellaneous Information*

Kew 1932: 246-247. 1932 [*Kew Bulletin*], *Flora Presid. Madras* 1710. 1934, *Grasses of Burma* ... 152. 1960.

E. warmingiana (Hack.) Kuhl. (*Eriochrysis warmingiana* (Hack.) Pilg.; *Saccharum holcooides* var. *warmingianum* (Hack.) Roberty; *Saccharum warmingiana* Hack.)

America, Bolivia, Brazil. Erect, leaf blades acute and vil-
lous, oblong panicle, spikelets sessile lanceolate, moist hab-
itats, see *Flora Brasiliensis* 2(4): 254. 1883 and *Commissão
de Linhas Telegraficas, Botanica* 67(Bot. 11): 29-30, 89.
1922, *Notizblatt des Botanischen Gartens und Museums zu
Berlin-Dahlem* 9(89): 1034. 1926, *Boissiera*. 355. 1960.

E. x concepcionensis Killeen [*Eriochrysis cayennensis* P.
Beauv. x *Eriochrysis laxa* Swallen] (*Eriochrysis concep-
cionensis* Killeen)

Mexico to Argentina, Bolivia. Perennial, caespitose, erect,
foliage mostly basal, leaf blades villous and acute, densely
silky cylindrical panicle, sessile spikelets lanceolate, wet
habitats, seasonally humid savannah, see *Annals of the Mis-
souri Botanical Garden* 77(1): 157, f. 4. 1990.

Eriocoma Nutt. = *Achnatherum* P. Beauv.,
Eriocoma Kunth (Asteraceae), *Oryzopsis*
Michx.

From the Greek *erion* “wool” and *kome* “hair of the head,
hair,” referring to the seeds.

Stipoideae, Stipeae or Pooideae, Stipeae, Stipinae or Arun-
dinoideae, Stipeae, type *Eriocoma hymenoides* (Roem. &
Schult.) Rydb., see *Flora Boreali-Americana* 1: 51, t. 9.
1803, *Essai d'une Nouvelle Agrostographie* 19, 146, pl. 6,
f. 7. 1812, *The Genera of North American Plants* 1: 40.
1818, *Nova Genera et Species Plantarum* [folio] 4: 210,
268, t. 396. 1818, *Fundamenta Agrostographiae* 109. 1820,
Species Graminum Stipaceorum 16, 19. 1842, *Genera Plan-
tarum* 3(2): 1143. 1883 and *Bulletin of the Torrey Botanical
Club* 39(3): 102. 1912, *Contr. U.S. Natl. Herb.* 24(6): 181.
1925, *Grasses: Systematics and Evolution* 75-82. 2000,
Contributions from the United States National Herbarium
48: 15-18, 312, 469-473. 2003.

Eriolytrum Kunth = *Panicum* L.

From the Greek *erion* “wool” and *elytron* “sheath, cover,
scale, husk.”

Panicoideae, Panicodae, Paniceae, Panicinae, see *Species
Plantarum* 1: 55, 58. 1753, *A Sketch of the Botany of South-
Carolina and Georgia* 1(2): 117. 1816, *Révision des
Graminées* 1: 219. 1829, *Bulletin Botanique [Genève]* 1:
220. 1830 and *Flora of the Southeastern United States* ...
104, 1327. 1903, *Contr. U.S. Natl. Herb.* 15: 13-15. 1910,
North American Flora 3(2): 200, 210. 1915, *Notizblatt des*

Botanischen Gartens und Museums zu Berlin-Dahlem
11(104): 242. 1931, *Taxon* 33: 126-134. 1984, *Flora
Mesoamericana* 6: 302-318. 1994, *Blumea* 41: 181-216,
416. 1996, *Taxon* 45: 319-320. 1996, *Taxon* 47: 869. 1998,
Taxon 48: 376. 1999, *Contributions from the United States
National Herbarium* 46: 306-441, 537. 2003.

Erioneuron Nash = *Dasyochloa* Willd. ex
Rydb., *Tridens* Roem. & Schult.

Greek *erion* “wool” and *neuron* “nerve,” referring to palea
hairs.

About 3-5 species, southwest U.S., Mexico, Argentina.
Chloridoideae, Eragrostideae, or Chloridoideae, Cynodon-
teae, Munroinae, perennial, herbaceous, densely caespitose
or not, erect, stoloniferous or not, leaves mostly basal, auri-
cles absent, ligule a line of hairs, plants bisexual, inflores-
cence a panicle exserted, spikelets solitary laterally
compressed, 2 glumes unequal or more or less equal, lem-
mas emarginate or lobed and shortly awned, palea ciliate
to villous, 2 fleshy lodicules cuneate, stamens 1-3, ovary
glabrous, 2 stigmas, found in rocky slopes, open habitats,
a segregate from *Tridens*, closely related to *Munroa* and
Dasyochloa, type *Erioneuron pilosum* (Buckley) Nash, see
Systema Vegetabilium 2: 34, 599. 1817, *Nomenclator Botan-
icus. Editio secunda* 1: 484. 1840 and *Flora of the South-
eastern United States* ... 143, 1327. 1903, *Agricultural
Experiment Station of the Agricultural College of Colorado.
Bulletin* 100: 18, 37. 1906 (also *Flora of Colorado*, in
*Bulletin of the Colorado State University Agricultural
Experiment Station* 100: 1-447. 1906), *Contributions from
the United States National Herbarium* 17: 181-189. 1913,

Erochloe Raf. = Eragrostis Wolf

Chloridoideae, Eragrostideae, Eragrostidinae, see *Genera Plantarum* 23. 1776, *Icones et Descriptiones Graminum Austriacorum* 4: 15. 1809, C.S. Rafinesque, *Neogenyton*, or Indication of Sixty-Six New Genera of Plants of North America. 4. 1825 and E.D. Merrill, *Index rafinesquianus*. 75. 1949, *Acta Bot. Neerl.* 15: 157. 1966, *Contributions from the United States National Herbarium* 41: 81-115, 116. 2001.

Erosion Lunell = Eragrostis Wolf

Chloridoideae, Eragrostideae, Eragrostidinae, see *Genera Plantarum* 23. 1776, *Icones et Descriptiones Graminum Austriacorum* 4: 15. 1809 and *American Midland Naturalist* 4: 221. 1915, *Acta Bot. Neerl.* 15: 157. 1966, *Contributions from the United States National Herbarium* 41: 81-115, 116. 2001.

Erucaria Cerv. = Bouteloua Lag., Chondrosium Desv., Chondrosium Desv., Erucaria Gaertn. (Brassicaceae)

Chloridoideae, Cynodonteae, Boutelouinae, type *Erucaria glandulosa* Cerv., see *De Fructibus et Seminibus Plantarum...* 2: 298. Apr-May 1791, *Variedades de Ciencias, Literatura y Artes* 2(4, 21): 134, 141. 1805, *Nouveau Bulletin des Sciences, publié par la Société Philomatique de Paris* 2: 188. 1810, *Gen. Sp. Nov.* 5. 1816, *A Manual of the Botany of the Northern United States. Second Edition* 553. 1856, *Naturaleza [Sociedad mexicana de historia natural]* 1: 347. 1870, *Die Natürlichen Pflanzenfamilien* 2(2): 59. 1887 and *Annals of the Missouri Botanical Garden*

66(3): 358. 1979 [1980], *Contributions from the United States National Herbarium* 41: 20-33, 52-55, 116-117. 2001.

Erythranthera Zotov = *Danthonia* DC.,
Rytidosperma Steud.

From the Greek *erythros* "red" and *anthera* "anther," having red anthers; see Victor Dmitrievich Zotov (1908-1977), "Synopsis of the Grass Subfamily Arundinoideae in New Zealand." in *New Zealand Journal of Botany*. 1(1): 124. 1963.

About 2-3 species, Australia, New Zealand. Arundinoideae, Danthoneae, Arundineae, or Danthonioideae, Danthoneae, perennial, tiny, dwarf, herbaceous, tufted or rhizomatous, often form a dense sward, glabrous nodes and hollow internodes, ligule a very short fringed membrane, leaf blade flat or folded, plants bisexual, inflorescence a raceme or a panicle, spikelets not secund, 2 glumes more or less equal, lower glume 3- to 5-nerved, upper glume 3-nerved, lemmas toothed and more or less glabrous, palea 2-nerved and 2-keeled, 2 lodicules toothed and joined or free, 3 stamens, ovary glabrous, 2 stigmas, fruit small, palatable to stock, alpine areas and open habitats, threatened alpine flora, sometimes referred to *Rytidosperma* and *Danthonia* sensu lato, type *Erythranthera australis* (Petrie) Zotov, see *Synopsis Plantarum Glumacearum* 1: 425. 1854 and *New Zealand Journal of Botany* 1(1): 124. 1963, H.P. Linder & G.A. Verboom, "Generic limits in the *Rytidosperma* (Danthoneae, Poaceae) complex." *Telopea* 6(4): 613. 1996, H.P. Linder, "Nomenclatural corrections in the *Rytidosperma* complex (Danthoneae, Poaceae)." *Telopea* 7(3): 269-274. 1997.

Species

E. australis (Petrie) Zotov (*Danthonia australis* (Petrie) Zotov; *Danthonia petriei* (Petrie) Zotov; *Danthonia petriei* var. *mucronulata* (Hack. ex Cheeseman) Zotov; *Rytidosperma australe* (Petrie) Connor & Edgar; *Rytidosperma australe* (Petrie) Clayton & Renvoize ex Connor & Edgar; *Rytidosperma australe* (Petrie) H.P. Linder, nom. illeg., non *Rytidosperma australe* (Petrie) Clayton & Renvoize ex Connor & Edgar; *Triodia australis* Petrie; *Triodia australis* var. *mucronulata* Hack. ex Cheeseman)

Victoria, Tasmania, New South Wales, New Zealand. Perennial, tufted, delicate, erect, branched, smooth, glabrous, leaf blade folded and bristle-like, a raceme exserted, floret 1, glumes ovate and nerved, lemmas glabrous and obtuse, palea 2-keeled with keels and apex ciliate, swampy places, see *Transactions and Proceedings of the New Zealand Institute* 22: 442. 1890 and *Manual of the New Zealand Flora* 897. 1906, *Transactions and Proceedings of the Royal Society of New Zealand* 73(3): 234. 1943, *New Zealand Journal*

of Botany 1: 125. 1963, *New Zealand Journal of Botany* 25(1): 166. 1987, *Telopea* 6(4): 613. 1996.

E. pumila (Kirk) Zotov (*Atropis pumila* Kirk; *Danthonia kirkii* Zotov; *Rytidosperma pumilum* (Kirk) Clayton & Renvoize ex Connor & Edgar; *Rytidosperma pumilum* (Kirk) Connor & Edgar; *Rytidosperma pumilum* (Kirk) H.P. Linder, nom. illeg., non *Rytidosperma pumilum* (Kirk) Clayton & Renvoize ex Connor & Edgar; *Triodia pumila* (Kirk) Hack.; *Triodia pumila* (Kirk) Hack. ex Cheeseman) New Zealand, Australia, New South Wales, Kosciuszko National Park. Perennial, tufted, delicate or inconspicuous, culms erect and smooth, leaves often curved or folded, broad papery sheaths, inflorescence racemose longer than the leaves, spikelets held against the flowering stem, 2-4 florets bisexual, lanceolate and nerved glumes, the flowers are completely enclosed by the glumes, usually silky hairy lemmas, palea 2-toothed and 2-keeled with keels ciliate, species vulnerable with a very narrow geographic distribution, tolerant of low temperature, recently renamed *Rytidosperma pumilum* (Kirk) H.P. Linder but it is still listed as *Erythranthera pumila* (Kirk) Zotov in the Schedules of the TSC Act, Threatened Species Conservation Act 1995, State of New South Wales, see *Transactions and Proceedings of the New Zealand Institute* 14: 379. 1882 and *Manual of the New Zealand Flora* 896. 1906, *T.R.S.N.Z.* 73(3): 234. 1943, *New Zealand Journal of Botany* 1: 124-125. 1963, *New Zealand Journal of Botany* 25(1): 166. 1987, *Telopea* 6(4): 615. 1996.

in English: feldmark grass (feldmark is a Norwegian name meaning *mountain field*)

Euchlaena Schrader = *Reana* Brign., *Zea* L.

Greek *eu* and *chlaena* "cloak, covering," referring to the stigma or to the fruting spikes.

About 4 species, Mexico, the Caribbean. Panicoideae, Andropogonodae, Andropogoneae, Maydeae, or Panicoideae, Andropogoneae, Tripsacinae, annual or perennial, herbaceous, robust, simple, auricles absent, ligule an unfringed membrane, plants monoecious, all the fertile spikelets unisexual, male spikelets in terminal panicles, pistillate spikelets in axillary spikes, 2 glumes subequal, palea present, lodicules absent, no stamens, ovary glabrous, 2 stigmas, cultivated fodder, often referred to and placed in *Zea* L. (*Zea* sect. *Euchlaena* (Schrader) Kuntze), type *Euchlaena mexicana* Schrad., see *Species Plantarum* 2: 971-972. 1753, Heinrich Adolph Schrader (1767-1836), *Index seminum horti academici goettingensis*. 3. 1832, *Annales des Sciences Naturelles; Botanique, sér. 3* 12: 365. 1849 and *Lexikon Generum Phanerogamarum* 600. 1904, *Amer. J. Bot.* 67: 1000. 1980, *Flora Mesoamericana* 6: 400-401. 1994, Alan R. Orr, Kevin Mullen, Darcey Klaahsen and Marshall D. Sundberg, "Inflorescence development in

a high-altitude annual Mexican teosinte (Poaceae).” *Am. J. Bot.* 89: 1730-1740. 2002, *Contributions from the United States National Herbarium* 46: 240-241, 543, 635-639. 2003.

Species

E. luxurians Durieu & Asch. (*Euchlaena luxurians* Miers; *Euchlaena mexicana* Schrad.; *Euchlaena mexicana* var. *luxurians* (Durieu & Asch.) Haines; *Reana luxurians* Durieu; *Zea luxurians* (Durieu & Asch.) R.M. Bird; *Zea mays* subsp. *luxurians* (Durieu & Asch.) H.H. Iltis; *Zea mexicana* subsp. *luxurians* (Durieu & Asch.) Greb.)

Guatemala. Excellent fodder grass, requires a rich soil and plenty of irrigation, see *Species Plantarum* 2: 971-972. 1753, *Index seminum horti academici goettingensis*. 3. 1832, *Linnaea* 8: Lit.-Ber. 25. 1833, *Bulletin de la Société Nationale d'Acclimatation de France* 19: 581. 1872, *Sitzungsberichte der Gesellschaft Naturforschender Freunde zu Berlin* 1876: 164. 1876 and *Lexikon Generum Phanerogamarum* 599. 1904, *The Botany of Bihar and Orissa* 6: 1065. 1924, *Flore de la Guayane Française* [Albert Lemée, Brest] 1: 160. 1955, *Phytologia* 23(2): 249. 1972, *Taxon* 27(4): 363. 1978, *American Journal of Botany* 67: 1000. 1980, *Verzeichnis Landwirtschaftlicher und Gärtnerischer Kulturpflanzen (ohne Zierpflanzen)* (edition 2) 3: 1594-1595. 1986.

in Colombia: teocinte

E. mexicana Schrad. (*Euchlaena luxurians* Durieu & Asch.; *Euchlaena mexicana* var. *luxurians* (Durieu & Asch.) Haines; *Reana luxurians* Durieu; *Zea mays* subsp. *mexicana* (Schrad.) H.H. Iltis; *Zea mays* subsp. *mexicana* H.H. Iltis; *Zea mexicana* (Schrad.) Kuntze; *Zea mexicana* (Schrad.) Reeves & Mangelsd., nom. illeg., non *Zea mexicana* (Schrad.) Kuntze)

Mexico. Fodder for cattle and horses, irrigated areas, see *Species Plantarum* 2: 971-972. 1753, *Index seminum horti academici goettingensis*. 3. 1832, *Linnaea* 8: Lit.-Ber. 25. 1833, *Bulletin de la Société Nationale d'Acclimatation de France* 19: 581. 1872, *Sitzungsberichte der Gesellschaft Naturforschender Freunde zu Berlin* 1876: 164. 1876 and *Lexikon Generum Phanerogamarum* 599. 1904, *The Botany of Bihar and Orissa* 6: 1065. 1924, *American Journal of Botany* 29(10): 817. 1942, *Annual Rev. Genetics* 5: 450. 1971, *Phytologia* 23(2): 249. 1972, *American Journal of Botany* 67: 1000. 1980, *Cytologia* 51: 527-547. 1986, *Journal of Cytology and Genetics* 25: 140-143. 1990, *Cuscatania* 1(6): 1-29. 1991.

in India: makhari, makya bajra, makya gehuma, makya janera

in Mexico: cocopi

E. perennis Hitchc. (*Zea perennis* (Hitchc.) Reeves & Mangelsd.; *Zea perennis* (Hitchc.) Reeves & Mangelsd. subsp. *perennis*)

Mexico. See *Journal of the Washington Academy of Sciences* 12(8): 207. 1922, *American Journal of Botany* 29(10): 817. 1942, *Agro-Ciencia* 58: 113-126. 1984, *Cytologia* 50: 643-648. 1985, *Genética Ibérica* 38: 27-45. 1986.

x *Euchlaeza* Jan. Ammal ex Bor

Euchlaena x *Zea*.

See *Grasses of Burma, Ceylon, India and Pakistan (excluding Bambuseae)* 266. 1960, *Genera Graminum* 375. 1986.

Euclasta Franchet = *Indochloa* Bor

From the Greek *eu* “good” and *klastos* “broken in pieces.”

About 2 species, tropical Africa, tropical America, India. Panicoideae, Andropogonodae, Andropogoneae, Andropogoninae, or Panicoideae, Andropogoneae, Sorghinae, annual, herbaceous, rambling, branched, aromatic, plants bisexual, inflorescence terminal and axillary, racemes solitary or clustered, 2 glumes subequal, more or less flat lower glume 2-keeled and 9-nerved, upper glume 3-nerved, upper lemma entire, awns hairy or glabrous, palea absent, 2 free and glabrous lodicules, 3 stamens, ovary glabrous, 2 stigmas, dry sand, deciduous bushland, damp sand, partial shade, shade species or open habitats, wooded grassland, savannah, similar to *Dichanthium*, type *Euclasta glumacea* Franch., see *Bulletin de la Société d'Histoire Naturelle d'Autun* 8: 335-336, t. 8. 1895 and *Kew Bulletin* 9: 75-76. 1954, *Fieldiana, Botany* 24(2): i-ix, 1-390. 1955, *Flowering Plants of Jamaica* 1-848. 1972, *Flora Mesoamericana* 6: 386. 1994, *Fontqueria* 46: [i-ii], 1-259. 1997, *Weed Research* 41(6): 475-490. Dec 2001, *Contributions from the United States National Herbarium* 46: 241, 273. 2003.

Species

E. clarkei (Hack.) Cope (*Andropogon clarkei* Hack.; *Dichanthium clarkei* (Hack.) Haines; *Indochloa clarkei* (Hack.) Bor) (for the eminent British botanist Charles Baron Clarke, 1832-1906 (Kew, Surrey), mathematician, worked on Indian botany, specialist on Cyperaceae, in 1867 Fellow of the Linnean Society, 1869-1871 Superintendent Calcutta Botanical Gardens, in 1882 Fellow of the Royal Society, contributed to *Flora of British India*, his writings include *Compositae indica*. London [1876] and *A Review of the Ferns of Northern India*. London 1880. See J.H. Barnhart, *Biographical notes upon botanists*. 1: 352. 1965; H.N. Clouie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 146. Oxford 1964; G. Murray, *History of the collections contained in the Natural History Departments of the British Museum*. 1: 140. Africa. See *Österreichische Botanische Zeitschrift* 41: 49. 1891 and *The Botany of Bihar and Orissa* pt. 5: 1040. 1924, *Kew Bulletin* 1954: 76. 1954, *Kew Bulletin* 35(3): 704. 1980.

E. condylotricha (Hochst. ex Steud.) Stapf (*Amphilophis piptatherus* (Hack.) Nash; *Andropogon condylotrichus* Hochst. ex Steud.; *Andropogon condylotrichus* var. *palmeri* Chiov.; *Andropogon condylotrichus* var. *piptatherus* (Hack.) Chiov.; *Andropogon piptatherus* Hack.; *Andropogon piptatherus* var. *palmeri* Hack.; *Bothriochloa piptathera* (Hack.) Gould; *Dichanthium condylotrichum* (Hochst. ex Steud.) Roberty; *Euclasta glumacea* Franch.; *Euclasta graminea* T. Durand & H. Durand; *Sorghum piptatherum* (Hack.) Kuntze)

Tropical Africa, America. Annual, weak, slender, rambling, geniculately ascending, a weed of rice fields, forage, grazed by cattle or unpalatable, found in partial shade, deciduous bushland, savannah, wooded grassland, see *Synopsis Plantarum Glumacearum* 1: 377. 1854, *Flora Brasiliensis* 2(4): 293. 1883, *Monographiae Phanerogamarum* 6: 580. 1889, *Revisio Generum Plantarum* 2: 792. 1891, *Bulletin de la Société d'Histoire Naturelle d'Autun* 8: 336, t. 8. 1895, *Malpighia* 12: 77. 1898 and *Sylloge florae congolanae* 649. 1909, *North American Flora* 17(2): 127. 1912, *Flora of Tropical Africa* 9: 181. 1917, *Bulletin de l'Institut Française d'Afrique Noire* 22: 108. 1960, *The Southwestern Naturalist* 15(3): 391-392. 1971.

in Guinea: ayen gekol

in Nigeria: kuse togun, ride bara, tusun zake

in Sierra Leone: funfure khamena

in Upper Volta: minga

Eudonax Fr. = *Arundo* L., *Donacium* E. M. Fries, *Donax* P. Beauv.

From the Greek *eu* "good, fine" and *donax*, *donakos* "a kind of reed."

Arundinoideae, Arundineae, see *Species Plantarum* 1: 81. 1753, *Botaniska Notiser* 1843: 132. 1843 and *Fl. Bermuda* 29. 28 Feb 1918, *Contributions from the United States National Herbarium* 46: 113-115, 214, 241. 2003.

Eufournia Reeder = *Calamochloa* E. Fourn., *Calamochloe* Rchb., *Sohnsia* Airy Shaw

Dedicated to the French botanist Eugène Pierre Nicolas Fournier, 1834-1884, wrote *Mexicanas Plantas*. Paris 1872

and 1886 [Associates: Émile Bescherelle, 1828-1903, Joseph Decaisne, 1807-1882, and William Nylander, 1822-1899], contributed to C.F.P. von Martius *Flora Brasiliensis*. 1885; see J.H. Barnhart, *Biographical notes upon botanists*. 1: 563. 1965; J. Decaisne, editor, *Mission scientifique au Mexique et dans l'Amérique centrale*. Paris 1868-1897; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 131. 1972; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. Philadelphia 1964; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993; S. Lenley et al., *Catalog of the manuscript and archival collections and index to the correspondence of John Torrey*. Library of the New York Botanical Garden. 172. 1973; George H.M. Lawrence, in *D.S.B.* 10: 165-166. 1981.

Chloridoideae, Cynodonteae, type *Eufournia filifolia* (E. Fourn.) Reeder, see *Conspectus Regnum Vegetabilis ... Pars I*. 1828, *Bulletin de la Société Botanique de France* 24: 177-178. 1877 and *The Families of Flowering Plants* 2: 199-229. 1934, *Journal of the Washington Academy of Sciences* 46: 109-112. 1956, *American Journal of Botany* 51: 453-463. 1964, *Kew Bulletin* 18(2): 272. 1965, *Brittonia* 19: 244. 1967, *Bulletin of the Torrey Botanical Club* 94: 1-17. 1967, *Contributions from the United States National Herbarium* 41: 35, 117, 195. 2001.

Euklastaxon Steud. = *Andropogon* L.

From the Greek *eu* "good, well," *klastos* "broken in pieces" and *axon* "axis."

Panicoideae, Andropogoneae, Andropogoninae, type *Euklastaxon tenuifolius* Steud., see *Species Plantarum* 2: 1045-1046. 1753, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 2(3): 268. 1832, *Flora* 29: 115. 1846, *Synopsis Plantarum Glumacearum* 1: 412. 28-29 Nov 1854 [1855] and *Bolletino della Società Botanica Italiana* 1917: 57. 1917, *Acta Bot. Neerl.* 15: 157. 1966, *Fl. Trop. E. Afr. Gramineae* 770. 1982, *Taxon* 41: 556. 1992, *Taxon* 44: 611-612. 1995, *Contributions from the United States National Herbarium* 46: 20-64, 241. 2003.

Eulalia Kunth = *Pseudopogonatherum* A. Camus, *Puliculum* Haines, *Puliculum* Stapf ex Haines

The genus was named to honor the painter and botanical artist Eulalie Delile, who illustrated *Voyage dans l'Inde par Victor Jacquemont, pendant les années 1828 à 1832*. Paris 1841-1844, by the French naturalist Victor Jacquemont (1801-1832), *Révision des Graminées*. Paris 1829-1834, by the German botanist Karl Sigismund Kunth (1788-1850),

Voyage aux Indes Orientales ... pendant 1825-29. Paris [1846], by Charles Bélanger (1805-1881), *Flora Brasiliae Meridionalis*. Parisii 1825-1833, by Auguste François César Prouvençal de Saint-Hilaire (1779-1853), and other works by Jean Baptiste George Geneviève Marcellin Bory (1778-1846) and Jules Paul Benjamin Delessert (1773-1847). Some suggested a derivation from the Greek *eu* "well" and *lalo* "to speak," well-spoken-of.

About 30 species, Old World tropics, tropical and subtropical. Panicoideae, Andropogonodae, Andropogoneae, Andropogoninae, perennial or rarely annual, variable, tufted or caespitose or forming tussocks, herbaceous, rhizomatous, simple, erect, sometimes decumbent, internodes solid, auricles absent, leaf blades linear, ligule a membrane densely ciliate or unfringed, plants bisexual, inflorescence digitate and plumose or silky-villous composed of subdigitate racemes bearing pairs of sessile and pedicellate spikelets, awned fertile pedicelled spikelets, florets 2, lower floret reduced or sometimes suppressed, upper floret perfect, 2 glumes more or less equal, lower glume cartilaginous to subcoriaceous, upper glume sometimes awned, upper lemma linear to oblong, awns hairy or glabrous, palea small or absent, 2 small lodicules free and fleshy, stamens 2-3, ovary glabrous, 2 stigmas, weed species, palatable to stock, native pasture species, grassland, moist places and sandy soils, maritime sand, open habitats, related to *Saccharum*, type *Eulalia aurea* (Bory) Kunth, see K.S. Kunth, *Révision des Graminées*. 1: 160. Paris 1829, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 4,2(1): 90. 1836, *Die Natürlichen Pflanzenfamilien*. 2(2): 24. 1887, *Monographiae Phanerogamarum* 6: 189, t. 1, f. 13. 1889, *Revisio Generum Plantarum* 2: 788. 1891 and *Annales de la Société Linnéenne de Lyon, sér. 2* 68: 203-205. 1921, *Fl. Indo-Chine* 7: 254. 1922, *The Botany of Bihar and Orissa* 5: 1018. 1924, *Bulletin of the Tokyo Science Museum* 18: 2. 1947, *Index Grass Sp.* 3: 203. 1962, *Journal of Biogeography* 26(6): 1255-1280. May 2005.

Species

E. sp.

in Thailand: yaa kaai, yaa ra ruen, yaa raruen

E. annua B.K. Simon

Australia. See *Austrobaileya* 3(1): 84-86, f. 2. 1989.

E. aurea (Bory) Kunth (*Andropogon aureus* Bory; *Erianthus aureus* (Bory) P. Beauv.; *Eulalia concinna* Nees ex Steud.; *Eulalia fulva* (R. Br.) Kuntze; *Eulalia geniculata* Stapf; *Pollinia aurea* (Bory) Benth.; *Pollinia fulva* (R. Br.) Benth.; *Saccharum fulvum* R. Br.)

Tropical Africa, Zambia. Perennial, erect tussocks, creeping rhizomatous, short rhizomes, green or reddish or bluish leaves, culms erect and branching, often decumbent, with trailing stolons, sheaths glabrous, dark reddish to golden brown racemes digitately arranged and densely hairy, spikelets in pairs with silky reddish brown hairs, glumes silky and subequal, lower lemma absent, a decreaser species, grazed when young, palatable to stock, unpalatable when dry, native pasture species, attractive when in flower, drought and grazing tolerant, occurs on dry areas, creek banks, grassland, earthy sands, coastal dunes, in local depressions, sandy red earths, along drainage lines, red and gray clays and calcareous soils, seepage, water courses and ephemeral water courses, floodplains, mainly on medium textured red earth soils in periodically flooded areas, see *Voyage dans les Quatre Principales Îles des Mers d'Afrique* 1: 367, t. 21. 1804, *Essai d'une Nouvelle Agrostographie* 14, 150, 162. 1812, *Révision des Graminées* 1: 160. 1829, *Synopsis Plantarum Glumacearum* 1: 412. 1855, *Journal of the Linnean Society, Botany* 19: 67. 1881 and *Flora of Tropical Africa* 9: 101. 1917.

in English: sugar grass, silky browntop grass, silky brown-top, browntop

E. contorta (Brongn.) Kuntze (*Eulalia contorta* (Brongn.) Pilg.; *Pogonatherum contortum* Brongn.; *Pollinia articulata* Trinius; *Pseudopogonatherum contortum* (Brongn.) A. Camus)

Annual, tufted, slender, leaves linear, spikelets pedicellate, see *Voyage autour du Monde* 2(2): 90, t. 17. 1831, *Revisio Generum Plantarum* 1(2): 775. 1891 and *Annales de la Société Linnéenne de Lyon, ser. 2* 68: 205. 1921, *Die natürlichen Pflanzenfamilien, Zweite Auflage* 14e: 121. 1940, *Journal of the Arnold Arboretum* 31: 130-132. 1950, *Claves Generum et Specierum Graminearum Primarum Sinicarum Appendice Nomenclatione Systematica* 140, 237. 1957, *Flora Hainanica* 4: 455, 540. 1977.

E. manipurensis Bor

India. Awnless, see *Grasses of Burma, Ceylon, India and Pakistan (excluding Bambuseae)* 156. 1960.

E. mollis (Griseb.) Kuntze (*Erianthus mollis* Griseb.; *Pogonatherum molle* (Griseb.) Roberty; *Pollinia mollis* (Griseb.) Hackel)

Perennial, tufted, hairy, leaves flat, spikelets sessile, see A.H.R. Grisebach (1814-1879), *Die geographische Verbreitung der Pflanzen Westindiens* Göttingen 1865, *Revisio Generum Plantarum* 1(2): 775. 1891 and *Boissiera*. 383. 1960.

E. monostachya (Balansa) A. Camus (*Pollinia monostachya* Balansa)

Asia. Large callus, see *Genera Plantarum* 3(2): 1127. 1883, *Journal de Botanique (Morot)* 4: 81. 1890 and *Annales de la Société Linnéenne de Lyon, sér. 2*, 68: 204. 1921 [1922].

E. phaeothrix (Hack.) Kuntze (*Andropogon pilosus* Willd. ex Wight; *Erianthus aureus* Nees ex Wight; *Pollinia phaeothrix* Hack.)

Southern India, Sri Lanka. Perennial, tussocky, slender, basal sheaths tomentose, leaves mainly radical or basal, inflorescence shortly racemose, spikelets elliptic-oblong, lower glume obtuse to truncate, upper lemma awned, see *Catalogue of Indian Plants* 1690. 1834, *Monographiae Phanerogamarum* 6: 168. 1889, *Revisio Generum Plantarum* 1(2): 775. 1891 and *Handb. Fl. Ceylon* 5: 204. 1900, *Grasses of Ceylon* 170. 1956, *Grasses of Burma ...* 156. 1960, *Taxon* 34: 159-164. 1985.

E. polyneura (Pilg.) Stapf (*Pollinia polyneura* Pilg.)

Kenya. Perennial, ascending, loosely tussocky, shortly rhizomatous, leaf blades tough and hispid, leaf sheaths keeled, subdigitate erect racemes, spikelets hairy on the back, lower glume narrowly elliptic-oblong, upper glume truncate and ciliate, upper lemma bifid, upland, swampy places, grassland, see *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 39: 597. 1907, *Flora of Tropical Africa* 9: 99. 1917.

E. quadrinervis (Hackel) Kuntze (*Eulalia quadrinervis* Sur; *Pollinia quadrinervis* Hackel; *Pollinia villosa* Munro ex Benth., nom. illeg., non *Pollinia villosa* Spreng.; *Pollinia villosa* var. *chefuensis* Franch.; *Pseudopogonatherum quadrinerve* (Hack.) Ohwi)

Southeast Asia, India. Perennial, tufted, stout, slender, rounded, hairy or smooth, stout woody rootstock, ligule short and hairy, leaf sheath smooth with scattered hairs, spreading leaves linear-acuminate and rather stiff, inflorescence racemose, racemes erect and nodding, rachis with long hairs, spikelets in pairs, lower glume narrow and keeled, upper glume hairy, lemma long awned, palea hyaline, drought resistant, rather fibrous, low value as a fodder grass, growing in open areas on slopes, rocky places, open grassy slopes, see *Flora Hongkongensis* 420-421. 1861, *Monographiae Phanerogamarum* 6: 158. 1889, *Revisio Generum Plantarum* 1(2): 775. 1891 and *Botany and Zoology; Theoretical and Applied* 6: 1868. 1938, *Bulletin of the Tokyo Science Museum* 18: 3. 1947, *Journal of Economic and Taxonomic Botany* 6(1): 185. 1985.

in English: sugar grass, silky browntop, 4-veined eulalia

in India: parai

in Japan: un-nuke-modoki

E. ridleyi (Hack.) A. Camus (*Pollinia ridleyi* Hack.)

Asia. Truncate glumes, see *Genera Plantarum* 3(2): 1127. 1883, *Österreichische Botanische Zeitschrift* 11(1): 7. 1891 and *Annales de la Société Linnéenne de Lyon, sér. 2*, 68: 204. 1921 [1922].

E. siamensis Bor

Asia, Thailand. Tufted, erect, see *Kew Bulletin* 1954: 499. 1954.

in Thailand: yaa kaai, ya kai, yaa ra ruen, yaa raruen

E. smitinandiana Bor

Asia, Thailand. Tufted, erect, rocky places, see *Kew Bulletin* 10: 256-257. 1956.

in India: belia marwel, bhabar grass, chota kusal, chota kussal, gandli, gonchi, kaudi, krer, liyun gadi, marwel, roira, sona jhara, tam, thrishoola gaddi

E. villosa (Thunb.) Nees (*Andropogon villosus* Thunb., nom. illeg., non *Andropogon villosus* Lam.; *Erianthus villosus* (Thunb.) Steud.; *Erianthus villosus* (Thunb.) F. Muell., nom. illeg., non *Erianthus villosus* (Thunb.) Steud.; *Pogonatherum villosum* (Thunb.) Roberty)

Tropical East Africa, South Africa, Madagascar, India. Perennial, erect, densely tufted, unbranched, tussocky, softly villous, robust, leaf blades flat and hard, leaf sheath round and hairy, ligule a dark membrane, slender inflorescence, white hairy racemes arranged digitately, spikelets paired and glabrous on the back, twisted awn, weed species, low grazing value, unpalatable grass, common in open grassland, tea plantation, on rocky shallow soils, on slopes, veld, hillsides, see *Species Plantarum* 2: 1045-1046. 1753, *Prodromus Plantarum Capensium, ...* 20. 1794, *Nomenclator Botanicus. Editio secunda* 1: 567. 1840, *Florae Africae Australioris Illustrationes Monographicae* 91. 1841, *Fragmenta Phytographiae Australiae* 8: 118. 1873 and *Boissiera*. 383. 1960, *Fl. Trop. E. Afr. Gramineae* 770. 1982, *Annals of the Missouri Botanical Garden* 75: 866-873. 1988, *Taxon* 41: 556. 1992, *Taxon* 44: 611-612. 1995.

in English: golden velvet grass

in South Africa: geel fluweelgras

Eulaliopsis Honda = *Pollinidium* Haines, *Pollinidium* Stapf ex Haines

Resembling the genus *Eulalia* Kunth.

Two species, India and Southeast Asia, China, Afghanistan, Taiwan, Philippine Islands. Panicoideae, Andropogonodae, Andropogoneae, Andropogoninae, perennial, densely tufted or caespitose, herbaceous, branched, ligule a fringed membrane, leaves linear and narrow to very narrow and tapering to a sharp fine point, plants bisexual, inflorescence axillary,

2-4 digitate racemes on a peduncle, spikelets with involucre hairs, spikelets paired sessile and pedicellate both awned, hermaphrodite florets, florets 2, lower floret sterile or male, upper floret bisexual, 2 glumes more or less equal, lower glume not 2-keeled, upper glume shortly awned or not, shortly awned upper lemma entire or 2-dentate, palea present, 2 free and ciliate lodicules, 3 stamens, ovary glabrous, 2 stigmas, weed species, used in papermaking and for cordage, resistant to burning, open habitats, dry hill-sides, dry slopes, type *Eulaliopsis angustifolia* (Trin.) Honda, see *Botanical Magazine* (Tokyo) 37: 124. 1923 [alt. 38: 56. 1924], *The Botany of Bihar and Orissa* 5: 1020. 1924, *Journal of the Bombay Natural History Society* 72(3): 815. 1975[1976].

Species

E. binata (Retz.) C.E. Hubb. (*Andropogon binatum* Retz.; *Andropogon involutus* Steud.; *Andropogon notopogon* Steud.; *Andropogon obvallatus* Steud.; *Eulaliopsis angustifolia* (Trin.) Honda; *Ischaemum angustifolium* (Trinius) Hackel; *Ischaemum binatum* (Retz.) Büse ex de Vriese; *Pollinidium angustifolium* (Trin.) Haines; *Pollinidium binatum* (Retz.) C.E. Hubb.; *Spodiopogon angustifolius* Trin.; *Spodiopogon binatus* (Retz.) Roberty; *Spodiopogon involutus* (Steud.) W. Watson)

India. Perennial, slender, erect, smooth, tufted, hardly branched, woolly at the base, tough and persistent basal sheaths, ligule a ridge of short hairs, leaves glabrous and mostly basal, cylindrical stout racemes on filiform peduncles, spikelets in pairs and hairy, upper floret hermaphrodite, ridged lower glume, employed in papermaking and for making ropes and mats, not eaten by cattle, prefers dry habitats, dry slopes, see *Observationes Botanicae* 5: 21. 1789, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 2(4): 300. 1832, *Plantae novae et minus cognitae Indiae Batavae Orientalis...* Amsterdam, Londres, Paris 1845, *Synopsis Plantarum Glumacearum* 1: 373. 1854, *Plantae Indiae Batavae Orientalis ...* 103. E. sykesii Bor (named for the English botanist James Sykes Gamble, 1847-1925 (d. Liss, Hants), forester, 1871-1879

Indian Forest Service, 1877 Fellow of the Linnean Society, 1899 elected a Fellow of the Royal Society, among his writings *A Manual of Indian Timbers*. Calcutta 1881 and *List of the Trees, Shrubs and Large Climbers Found in the Darjeeling District, Bengal*. Calcutta 1878, with Cecil Ernest Claude Fischer (1874-1950) and Stephen Troyte Dunn (1868-1938) wrote *Flora of Presidency of Madras*. London [1915-]-1936, with Sir George King (1840-1909) and Andrew Thomas Gage (1871-1945) "Materials for a Flora of the Malay Peninsula." in *Journal of the Asiatic Society of Bengal*. vol. 58-74. Calcutta 1889-1936. See J.H. Barnhart, *Biographical notes upon botanists*. 2: 26. 1965; Isaac Henry Burkill, *Chapters on the History of Botany in India*. Delhi 1965; H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 169. Oxford 1964; Clyde F. Reed, *Bibliography to Floras of Southeast Asia*. Baltimore, Maryland 1969)

Western Nepal. Perennial, caespitose, geniculate, woolly at the base, leaf blade narrowly linear and folded, leaves hairy on both surfaces, terminal racemes, lower glumes oblong, upper glumes keeled and awned, plumose stigmas, see *Kew Bulletin* 12(3): 412. 1957.

Eupogon Desv. = *Andropogon* L.

From the Greek *eu* and *pogon* "a beard."

Panicoideae, Andropogoneae, Andropogoninae, see *Species Plantarum* 2: 1045-1046. 1753, *Prodromus Plantarum Indiae Occidentalis* 9. 1825, *Mémoires de la Société d'Agriculture, Sciences et Arts d'Angers* 1: 171. 1831, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 2(3): 268. 1832, *Flora* 29: 115. 1846, *Synopsis Plantarum Glumacearum* 1: 412. 28-29 Nov 1854 [1855] and *Bolletino della Società Botanica Italiana* 1917: 57. 1917, *Acta Bot. Neerl.* 15: 157. 1966, *Fl. Trop. E. Afr. Gramineae* 770. 1982, *Taxon* 41: 556. 1992, *Taxon* 44: 611-612. 1995, *Contributions from the United States National Herbarium* 46: 20-64, 241-242. 2003.

Euraphis (Trin.) Lindley = *Boissiera* Hochst. ex Steud., *Euraphis* (Trin.) Kuntze

From the Greek *eu* "well" and *raphis* "a needle."

Pooideae, Triticodae, Bromeae, type *Euraphis pumilio* (Trin.) Kuntze, see *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 1(1): 92. 1830, *Flora* 21: 25. 1838, *Nomenclator Botanicus. Editio secunda* 1: 213. 1840, *The Vegetable Kingdom* 115. 1846, *Revisio Generum Plantarum* 1: 776. 1891.

Eustachys Desvaux = *Chloris* Sw.,
Chloroides Fisch. ex Regel, *Chloroides* Regel,
Eustachys Salisb. (Liliaceae), *Langsdorffia*
 Regel, *Schultesia* Spreng.

From the Greek *eu* "fine, good" and *stachys* "a spike," referring to the beauty of the spikes and dark brown lemmas; see A.N. Desvaux, in *Nouv. Bull. Sci. Soc. Philom. Paris*. 2: 188. 1810.

About 8-12 species, tropics and subtropics, mainly in the New World, tropical America, West Indies, tropical and southern Africa. Chloridoideae, Cynodonteae, Chloridinae, annual or perennial, glabrous, herbaceous, rhizomatous or tufted, caespitose, glabrous nodes, solid internodes, auricles absent, leaf sheaths compressed or strongly keeled, ligule a short fringe of hairs, leaves distichous, plants bisexual, short racemes digitate, spikelets solitary and secund, spikelets disarticulating above the glumes, florets 2 usually dark brown at maturity, lower floret fertile, upper floret sterile, 2 persistent and very unequal glumes shorter than the lemmas, upper glume obtuse to 2-lobed with a short awn apical or subapical, lemmas awnless or mucronate, fertile lemma mucronate and densely ciliate, palea present, 2 free and fleshy lodicules, stamens 3, ovary glabrous, 2 stigmas, trigonous and small fruit, native pasture species, cultivated, fodder grass, habitat variable, found in savannahs, grassland, open habitats, roadsides, sometimes included in and barely separable from *Chloris* Sw., type *Eustachys petraea* (Sw.) Desv., see *Nova Genera et Species Plantarum seu Prodrum* 1, 25. 1788, *Nouveau Bulletin des Sciences, publié par la Société Philomatique de Paris* 2: 188-189. 1810, *Plantarum Minus Cognitarum Pugillus* 2: 17. 1815, *Conspectus Regni Vegetabilis* 4. 1828, *Index Seminum [St. Petersburg]* 28. 1863, *The Genera of Plants* 33. 1866 and *Flora de la Provincia de Buenos Aires* 4(2): 1-624. 1970, *Flora Ilustrada Catarinense* 1(Gram.): 1-435. 1981, *Annals of the Missouri Botanical Garden* 77(1): 125-201. 1990, *Flora Mesoamericana* 6: 288-289. 1994, A.M. Molina, "Revisión taxonómica del género *Eustachys* Desv. (Poaceae: Chloridoideae, Cynodonteae) de Sudamérica." *Candollea* 51(1): 225-272. 1996, *Fontqueria* 46: [i-ii], 1-259. 1997, *Gramíneas de Bolivia* 353-355. 1998, *Journal of Biogeography* vol. 26, issue 6: 1307-1321. Nov 1999, E. William Hamilton III, Samuel J. McNaughton and James S. Coleman, "Molecular, physiological, and growth responses to sodium stress in C4 grasses from a soil salinity gradient in the Serengeti ecosystem." *Am. J. in English: Argentine finger grass, windmill grass

in Brazil: capim-coquerinho

in Spanish: pata-de-gallo

E. swalleniana A.M. Molina

America. See *Candollea* 51(1): 232, f. 2A-H, 8A. 1996.

E. uliginosa (Hack.) Herter (also spelled ***uliginosus*** or ***ulignosa***) (*Chloris dusenii* Ekm.; *Chloris petraea* Sw.; *Chloris swartziana* Döll; *Chloris uliginosa* Hack.; *Eustachys petraea* (Sw.) Desv.; *Eustachys petrea* (Sw.) Desv.; *Schultesia petraea* (Sw.) Spreng.)

South America, southern Brazil to northern Argentina, Uruguay, Paraguay. Lower lemma gibbous, useful for erosion control, found in swampy places, often in *Eustachys petraea*, see *Nova Genera et Species Plantarum seu Prodromus* 25. 1788, *Nouveau Bulletin des Sciences, publié par la Société Philomatique de Paris* 2: 189. 1810, *Plantarum Minus Cognitarum Pugillus* 2: 17. 1815, *Flora Brasiliensis* 2(3): 68-69. 1878 and *Repertorium Specierum Novarum Regni Vegetabilis* 7: 320. 1909, *Arkiv för Botanik utgivet av K. Svenska Vetenskapsakademien* 10(11): 26, t. 4, f. 2, t. 6, f. 14. 1911, *Revista Sudamericana de Botánica* 6(5-6): 147. 1940.

Euthryptochloa Cope

From the Greek *eu* “well, fine,” *thrypto* “to break in pieces, weaken” and *chloe*, *chloa* “grass.”

One species, Southeast Asia. Pooideae or Bambusoideae, perennial, loosely caespitose, herbaceous, auricles absent, leaf blades narrowed into a false petiole, ligule membranous, plants bisexual, inflorescence a large open to contracted panicle, spikelets all alike, floret 1, 2 glumes unequal, lower glume 1-nerved, upper glume 3-nerved, lemma 3-nerved, palea resembling lemma but 2-veined, lodicules 3 or 2, stamens 3, stigmas 2, along streams, mountain slopes, roadsides, forest, resembling *Cyathopus*, type *Euthryptochloa longiligula* Cope, see *J. Linn. Soc., Bot.* 19: 59. 1881 and *Kew Bulletin* 42(3): 707-709. 1987.

Species

E. longiligula Cope (*Euthryptochloa longiligulata* Cope)

China. Robust, solitary or tufted, montane, stiff, erect or climbing, unbranched, leaf sheaths smooth, ligule an unfringed membrane, leaf blades apex acuminate, ligule scabrous, panicle branches widely spreading at maturity, spikelets gaping at maturity and glossy, lemma narrowly ovate with apex obtuse, palea present.

Eutriana Trin. = *Bouteloua* Hornem. ex P. Beauv., *Bouteloua* Lag.

For the Colombian (b. Zipaquirá) botanist José Jerónimo (or Gerónimo) Triana, 1834-1890 (d. Paris), traveler, plant collector, botanical explorer, journalist, his writings include *Nuevos jeneros i especies de plantas para la flora*

Neo-Granadina. Bogotá 1854 and *Prodromus florum Novogranatensis*. Paris 1862-1867, pupil of Francisco Javier Matis (the last survivor of the Mutis botanical expedition); see Enrique Pérez Arbeláez, in *D.S.B.* 13: 463-464. 1981; J.H. Barnhart, *Biographical notes upon botanists*. 3: 400. 1965; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 406. Boston, Mass. 1972; M. Colmeiro y Penido, *La Botánica y los Botánicos de la Peninsula Hispano-Lusitana*. Madrid 1858; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. Philadelphia 1964; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993.

Chloridoideae, Cynodonteae, Boutelouinae, type *Eutriana curtispindula* (Michx.) Trin., see *Varietades de Ciencias, Literatura y Artes* 2(4,21): 134, 141. 1805, *Essai d'une Nouvelle Agrostographie* 40. 1812, *Gen. Sp. Nov.* 5. 1816), *Fundamenta Agrostographiae* 161. 1820, *De Graminibus unifloris et sesquifloris* 242. Petropoli 1824, *Genera Plantarum* 94. 1836 and *Contributions from the United States National Herbarium* 41: 20-33, 118-120. 2001.

Exagrostis Steudel = Eragrostis Wolf

See *Genera Plantarum* 23. 1776, *Icones et Descriptiones Graminum Austriacorum* 4: 15. 1809, *Nomenclator Botanicus. Editio secunda* 1: 622. 1840 and *Acta Bot. Neerl.* 15: 157. 1966, *Contributions from the United States National Herbarium* 41: 81-115, 120. 2001.

Exothea Andersson

From the Greek *exo* “outside” and *theke* “a case.”

One species, tropical Africa, Vietnam. Panicoideae, Andropogonodae, Andropogoneae, Andropogoninae, perennial, densely caespitose, herbaceous, branched or unbranched, auricles present, leaf blades linear, plants bisexual, inflorescence racemose, a pair of short racemes subtended by a narrow spatheole, spikelets of sexually distinct forms on the same plant, 2 glumes more or less equal, lower glume 9-nerved, upper glume 3-nerved, palea present, 2 free and glabrous lodicules, 3 stamens, ovary glabrous, 2 stigmas, species of open habitats, grassland, upland, similar to *Hyparrhenia*, type *Exothea abyssinica* (Hochst. ex A. Rich.) Andersson, see *Nova Acta Regiae Societatis Scientiarum Upsaliensis*, ser. 3, 2: 253, t. 3. 1856.

Species

E. abyssinica (Hochst. ex A. Rich.) Andersson. (*Andropogon exothecus* Hack.; *Andropogon monatherus* A. Rich.;

Anthistiria abyssinica Hochst. ex A. Rich.; *Exothea abyssinica* (A. Rich.) Andersson; *Hyparrhenia abyssinica* (Hochst. ex A. Rich.) Roberty; *Hyparrhenia monathera* (A. Rich.) Schweinf.)

Tropical Africa, Tanzania, mostly in central Africa. Perennial, coarse, densely to loosely tufted, robust, tussocky, herbaceous, tough leaves, inflorescence a single raceme-pair, glabrous spikelets, good frost tolerance, tolerates low soil fertility, grazed only when young, grows on seasonally wet ground, open field, along roadsides, wet meadow, montane grassland, on poorly drained areas, along streams, slopes, see *Tentamen Florae Abyssinicae* ... 2: 449, 462. 1850, *Nova Acta Regiae Societatis Scientiarum Upsaliensis*, ser. 3, 2: 253, t. 3. 1857, *Beitrag zur Flora Aethiopiens* ... 300, 310. 1867, *Mexicanas Plantas* 2: 51, 67. 1886, *Monographiae Phanerogamarum* 6: 617, 632. 1889 and *Boissiera. Mémoires du Conservatoire de Botanique et de l'Institut de Botanique Systématique de l'Université de*

Genève 9: 108. 1960, *Kew Bulletin, Additional Series* 2: 1-196. 1969 [A revision of the genus *Hyparrhenia*].

Exydra Endl. = *Glyceria* R. Br.

Perhaps from the Greek *exo* "outside" and *hydor* "water."

Pooideae, Poodae, Meliceae, type *Exydra aquatica* (L.) Endl., see *Species Plantarum* 75. 1753, *Prodromus Florae Novae Hollandiae* 1: 179. 1810, *Observations sur les Graminées de la Flore Belgique* 110-111. 1823 [1824], *Flora Posoniensis* 119. 1830 and *Botaniska Notiser* 1919: 97. 1919, *Aquatic and Wetland Plants of Southeastern United States Monocotyledons* 1-712. 1979, *Turun yliopiston julkaisu - Annales Universitatis Turkuensis, Sarja A II, Biologia-Geographica* 3: 1-12. 1982 [also *Ann. Univ. Fenn. Abo.*, A 3: 1-12. 1982], *Watsonia* 15: 38-39. 1984, *Acta Biologica Cracoviensia, Series Botanica* 27: 57-74. 1985, *Contributions from the United States National Herbarium* 48: 312, 371-379. 2003.

F

Falimiria Rchb. = *Arthrostachya* Link,
Falimiria (Reichenb.) Rchb., *Gaudinia* P.
Beauv.

Pooideae, Poodae, Aveneae, or Pooideae, Poeae, Aveninae, see *Essai d'une Nouvelle Agrostographie* 95, 153, 164. 1812, *Consp. Regn. Veg.* 54. 1828, *Flore du Département des Hautes-Pyrénées* 68. 1867 and *Acta Universitatis Lundensis* 36(1): 27. 1900, *Contr. U.S. Natl. Herb.* 24: 192. 1925, *Flora de la Provincia de Buenos Aires* 4(2): 39. 1970, *Contributions from the United States National Herbarium* 48: 121, 312, 370. 2003.

Falona Adans. = *Cynosurus* L., *Phalona*
Dumort.

From the Greek *phalos*, *phalon* "shining, bright, white."

Pooideae, Poodae, Poeae, or Pooideae, Poeae, Cynosurinae, type *Falona echinata* (L.) Dumort., see *Species Plantarum* 1: 72-73. 1753, *Familles des Plantes* 2: 496. 1763, *Observations sur les Graminées de la Flore Belgique* 114. 1823 [1824] *Genera Plantarum* 3(2): 1183. 1883, *Die Natürlichen Pflanzenfamilien* 2(2): 73. 1887 and *Boletim da Sociedade Broteriana, ser. 2* 63: 153-205. 1990, *Berichte des Geobotanischen Instituts der Eidg. Fargesia Franchet = *Thamnocalamus* Munro

After Père Paul Guillaume Farges, 1844-1912, naturalist, a French missionary in China.

About 2-3 or 80-83 species, China, Vietnam, Myanmar (Burma), temperate. Bambusoideae, Bambusodae, Bambuseae, or Bambusoideae, Bambuseae, Arundinariinae, or Thamnocalaminae, perennial, sympodial, woody and persistent, shrub or small tree, thick wall, cylindrical, 3 or more branches at each node, sheath persistent or shedding late, sheath blade narrow and long, pachymorph rhizomes, plants unarmed and bisexual, inflorescence terminal dense panicle, apical panicle or raceme, 2 glumes hairy and acuminate,

lower glume 5-nerved, upper glume 7-9-nerved, palea present, 3 lodicules membranous and ciliate, 3 stamens, 2-3 stigmas, problems for nomenclature and taxonomy, often referred to *Thamnocalamus*, type *Fargesia spathacea* Franch., see *Flora Boreali-Americana* 1: 73. 1803, *Abhandlungen der Mathematisch-Physikalischen Classe der Königlich Bayerischen Akademie der Wissenschaften* 3(3): 746, pl. 5, f. 3. 1843, *Transactions of the Linnean Society of London* 26(1): 33, 34, 157. 1868, *Journal Linn. Soc. Bot.* 19: 31. 1881, *Gen. Pl.* 3(2): 1208. 1883, *Die natürlichen Pflanzenfamilien, Zweite Auflage* 2: 93. 1887, *Bulletin Mensuel de la Société Linnéenne de Paris* 2: 1067. 1893 [1894] and *Florula austro-higoensis sive enumeratio plantarum in provincia Higo australe sponte nascentium ...* 86. Japan 1931, *Journal of Japanese Botany* 11(1): 1-2. 1935, *Acta Phytotax.* 6: 355. 1957, *Smithsonian Contrib. Bot.* 44: 21. 1980, *J. Dec 1999, *Conservation Biology* vol. 17, issue 2: 558-565. Apr 2003.

Species

F. acuticontracta T.P. Yi

China, Gongshan, Yunnan. Culm top slender and tapering, thick culm base, internode usually not pruinose, 3-11 branches at each node, sheath persistent and shorter than internode, sheath auricles absent, sheath ligule arcuate or truncate, leaves lanceolate, culm used for fishing rods, handles, for weaving, found in evergreen hardwood forests, see *Journal of Bamboo Research* 7(2): 98-101, f. 30. 1988.

F. adpressa T.P. Yi

China, Yunnan. Young culm pruinose, sheath annulus slightly convex, most branches fascicled, sheath persistent and shorter than internode, sheath blade linear-lanceolate, sheath auricles absent or tiny, sheath ligule circular, leaves linear-lanceolate, see *Journal of Bamboo Research* 4(2): 26-27, f. 8. 1985.

F. albocerea J.R. Xue [also Hsueh] & T.P. Yi (*Borinda albocerea* (J.R. Xue & T.P. Yi) Stapleton)

China, Yunnan, Lushui. Culm pruinose, glabrous, almost solid, coriaceous sheath shedding late, papery sheath blade

linear-lanceolate, sheath auricles absent or tiny, see *Journal of Bamboo Research* 7(2): 45-47, f. 11. 1988, *Kew Bulletin* 53(2): 455. 1998.

F. altior T.P. Yi

China, Yunnan. Young culm pruinose, coriaceous and caducous sheath longer than the internode, sheath blade linear-lanceolate, sheath auricles absent, sheath ligule purple glabrous, leaves narrowly lanceolate, culm used for fishing rods, handles, for weaving, found on stream banks, slopes, see *Journal of Bamboo Research* 7(2): 65-68, f. 18. 1988.

F. ampullaris T.P. Yi (*Arundinaria intermedia* Munro; *Drepanostachyum intermedium* (Munro) Keng f.)

China, Tibet. Young culm pruinose, clumped, most branches fascicled and slender, sheath contracted like a bottleneck and shedding late, sheath auricles absent, leaves narrowly lanceolate, used for weaving, see *Transactions of the Linnean Society of London* 26(1): 28. 1868 and *Journal of Bamboo Research* 2(2): 18, pl. 1. 1983.

F. angustissima T.P. Yi (*Arundinaria ferax* Keng; *Fargesia ferax* (Keng) T.P. Yi; *Sinarundinaria ferax* (Keng) Keng f.)

China, Sichuan. Young culm pruinose, distinct fine longitudinal stripes, 5-10 branches clustered, sheath persistent and much longer than internode, no auricles, sheath ligule truncate, leaves narrowly lanceolate, culm used for weaving, shrubby feeder plants for giant pandas, found under evergreen broad-leaved forest, see *Sinensia* 7(3): 408, f. 1. 1936, *Technical Bulletin of the National Forestry Research Bureau* 8: 13. 1948, *Journal of Bamboo Research* 2(2): 39. 1983, *Journal of Bamboo Research* 4(2): 21-22, f. 4. 1985.

F. aurita T.P. Yi (*Fargesia aurita* J.R. Xue & C.M. Hui, nom. illeg., non *Fargesia aurita* T.P. Yi; *Fargesia decurvata* J.L. Lu; *Fargesia scabrida* T.P. Yi)

China. Food for pandas, see *Journ. Henan Agric. Coll.* 2: 74, f. 6. 1981, *Journal of Bamboo Research* 4(2): 22-25, f. 6, 8. 1985, *Bulletin of Botanical Research* 18(3): 258, f. 1. 1998.

F. brevipaniculata (Hand.-Mazz.) Z.Y. Li & D.Z. Fu (*Arundinaria brevipaniculata* Hand.-Mazz.; *Arundinaria chungii* Keng; *Sinarundinaria brevipaniculata* (Hand.-Mazz.) Keng f.; *Sinarundinaria chungii* (Keng) Keng f.; *Yushania brevipaniculata* (Hand.-Mazz.) T.P. Yi; *Yushania chungii* (Keng) Z.P. Wang & G.H. Ye)

Asia temperate, China. See *Kaiserliche Akademie der Wissenschaften in Wien. Mathematisch-Naturwissenschaftliche Klasse. Anzeiger.* 57: 237. 1920, *Icon. Pl. Omeiensium* 1(2): t. 53. 1944, *Technical Bulletin of the National Forestry Research Bureau* 8: 13. 1948, *Journal Nanjing University. Natural Sciences Edition* 1981(1): 93. 1981, *Journal of Bamboo Research* 5(1): 44. 1986, *Vascular Plants of the Hengduan Mountains* 2: 2163. 1994.

F. brevipes (McClure) T.P. Yi (*Arundinaria brevipes* McClure; *Sinarundinaria brevipes* (McClure) Keng f.)

China. See *Sunyatsenia* 6(1): 28-32, t. 7. 1941, *Technical Bulletin of the National Forestry Research Bureau* 8: 14. 1948, *Journal of Bamboo Research* 7(2): 113-114. 1988.

F. brevissima T.P. Yi (*Fargesia scabrida* T.P. Yi)

China, Sichuan. Young culm pruinose, culm sheath shedding late, sheath blade triangular or broadly lanceolate, sheath auricles and cilia absent, sheath ligule glabrous, leaves lanceolate, edible shoots, culm used for weaving, see *Bulletin of Botanical Research* 5(4): 128-129, f. 5. 1985, *Journal of Bamboo Research* 4(2): 24-25, f. 8. 1985.

F. caduca T.P. Yi

China, Yunnan, Jinggu. Young culm pruinose, sheath caducous shorter than internode, sheath blade triangular or broadly lanceolate, sheath auricles and cilia absent, sheath ligule truncate and glabrous, greenish shoots, leaves narrowly lanceolate, in hardwood forests, see *Journal of Bamboo Research* 7(2): 108-110, f. 33. 1988.

F. canaliculata T.P. Yi

China, Sichuan. Sheath caducous and longer than internode, 5-7 fascicled branches at each node, sheath auricles and cilia absent, sheath ligule concave, leaves narrowly lanceolate or narrowly triangular, culm very hard used as timber, edible shoot, food for giant pandas, see *Journal of Bamboo Research* 4(1): 19-20, f. 1. 1985.

F. circinata J.R. Xue [also Hsueh] & T.P. Yi

China, Yunnan. Solid, 7-11 branches at each node, sheath coriaceous and longer than internode, sheath blade linear-lanceolate, sheath ligule truncate, leaves deciduous and papery, see *Journal of Bamboo Research* 7(2): 81-84, f. 24. 1988.

F. collaris T. P. Yi

China, Tibet. Culm annulus and sheath annulus convex, most branches fascicled, sheath coriaceous, sheath auricles absent, sheath ligule truncate or oblique, leaves lanceolate, used for weaving.

F. communis T.P. Yi

China, Gongshan, Yangbi, Yunnan. Culm pruinose, greenish, 4-10 branches at each node, slender longitudinal stripes, sheath persistent and much longer than the internode, sheath auricles absent, sheath ligule truncate, leaves lanceolate, used for weaving, in evergreen hardwood forests, see *Journal of Bamboo Research* 7(2): 51-53, f. 13. 1988.

F. concinna T.P. Yi

China. Young culm greenish, used for papermaking, see *Acta Botanica Yunnanica* 10(4): 437-438, f. 1. 1988.

F. conferta T.P. Yi (*Fargesia scabrida* T.P. Yi)

China, Sichuan. Internode not pruinose, sheath persistent and shorter than the internode, sheath blade erect linear-lanceolate, sheath auricles present or absent, sheath ligule convex, leaves narrow-lanceolate, shoots purplish red, see

Bulletin of Botanical Research 5(4): 123-125, f. 2. 1985, *Journal of Bamboo Research* 4(2): 24-25, f. 8. 1985.

F. contracta T.P. Yi

China, Lushui, Baoshan, Yunnan. Powdery culm green to greenish-yellow, 3-6 branches per node, sheath persistent, sheath blade linear-lanceolate and erect, sheath auricles absent, sheath ligule truncate, leaves narrow-lanceolate, in evergreen hardwood forests, see *Journal of Bamboo Research* 7(2): 60-63, f. 16. 1988.

F. contracta T.P. Yi f. *evacuata* T.P. Yi

China, Lushui, Yunnan. Hollow internodes, see *Journal of Bamboo Research* 7(2): 63. 1988.

F. contracta T.P. Yi f. *fugonensis* J.R. Xue & J.K. Duan

China. See *Journal of Bamboo Research* 7(2): 60-63, f. 16. 1988, *Bulletin of Botanical Research* 18(3): 271, f. 9. 1998.

F. crassinoda T.P. Yi

China, Tibet. Young culm pruinose, 3-6 branches fascicled, sheath caducous and coriaceous, sheath blade erect, sheath auricles absent, no cilia, sheath ligule circular, papery leaves narrow-lanceolate, used in house buildings, fencing.

F. cuspidata (Keng) Z.P. Wang & G.H. Ye (*Arundinaria cuspidata* Keng; *Fargesia hsuehana* T.P. Yi; *Sinarundinaria cuspidata* (Keng) Keng f.; *Thamnocalamus cuspidatus* (Keng) Keng f.)

China. Grows in woods, forest, see *Sinensia* 7(3): 410, f. 3. 1936, *Technical Bulletin of the National Forestry Research Bureau* 8: 15. 1948, *Claves Generum et Specierum Graminearum Primarum Sinicarum Appendice Nomenclatione Systematica* 153. 1957, *Flora Illustralis Plantarum Primarum Sinicarum: Gramineae* 1: 25. 1959, *Journal Nanjing University. Natural Sciences Edition* 1981(1): 95. 1981, *Journal of Bamboo Research* 7(2): 53-57, f. 14 and 104-108, f. 32. 1988, *Kew Bulletin* 53(2): 455-456. 1998.

F. declivis T.P. Yi

China, Yunnan, Gongshan. Erect, slanting, leaning, liana-like, young internodes pruinose, 3-5 branches at each node, sheath persistent, leaves narrow-lanceolate, see *Journal of Bamboo Research* 7(2): 101-104, f. 31. 1988.

F. decurvata J.L. Lu (*Fargesia aurita* T.P. Yi; *Fargesia dracocephala* T.P. Yi; *Thamnocalamus dracocephalus* (T.P. Yi) Demoly)

China, Hubei. Young culm pruinose, 3-7 branches on each node, culm sheath shedding late, sheath blade narrow linear to triangular, sheath auricles absent or tiny, sheath ligule very short, 2-4 leaves on each twig, leaf blade lanceolate, see *Journ. Henan Agric. Coll.* 2: 74, f. 6. 1981, *Bulletin of Botanical Research* 5(4): 127-128, f. 4. 1985, *Journal of Bamboo Research* 4(2): 22-24, f. 6. 1985, *Bulletin de l'Association Française de Botanique* 14: 30. 1991.

F. demissa T.P. Yi

China, Ningxia. Young culm pruinose, glabrous, green or purplish green, sheath persistent and shorter than the internode, sheath blade narrow linear to triangular, sheath auricles absent, no cilia, sheath ligule truncate, ornamental, see *Journal of Bamboo Research* 7(2): 93-96, f. 28. 1988.

F. denudata T.P. Yi (*Thamnocalamus denudatus* (T.P. Yi) Demoly)

China, Sichuan, Wudu, Wenxian. Young culm pruinose, 4-15 slender drooping branches per node, culm sheath caducous and about two thirds of internode, no sheath auricles and cilia, sheath ligule truncate, leaves linear-lanceolate or lanceolate, food for giant pandas, in forest of broad-leaved trees and coniferous, see *Journal of Bamboo Research* 4(1): 20-22, f. 2. 1985.

in China: quebao jianzhu

F. dracocephala T.P. Yi (*Thamnocalamus dracocephalus* (T.P. Yi) Demoly)

China, Yunnan, Wenxian, Gansu. Young culm pruinose, glabrous, coriaceous culm sheath shedding late and shorter than the internode, sheath blade narrow linear to triangular, sheath auricles absent and no cilia, sheath ligule truncate, food for giant pandas, see *Journ. Henan Agric. Coll.* 2: 74, f. 6. 1981, *Bulletin of Botanical Research* 5(4): 127-128, f. 4. 1985, *Journal of Bamboo Research* 4(2): 22-24, f. 6. 1985, *Bulletin de l'Association Française de Botanique* 14: 30. 1991.

F. dulcicula T.P. Yi

China. See *Journal of Bamboo Research* 11(2): 9, f. 2. 1992.

F. dura T.P. Yi

China, Yunnan. Young culm pruinose, greenish, culm nearly solid and waxy, sheath persistent and longer than internode, sheath blade narrow linear to linear-lanceolate, sheath auricles absent and no cilia, sheath ligule truncate, leaves linear-lanceolate, see *Journal of Bamboo Research* 7(2): 34-36, f. 7. 1988.

F. edulis J.R. Xue & T.P. Yi (*Borinda edulis* (J.R. Xue & T.P. Yi) Stapleton)

China, Lushui, Baoshan. Culm pruinose, green, with longitudinal stripes, 4-7 branches at each node, sheath shedding late, sheath blade erect, sheath auricles absent, sheath ligule truncate or concave, shoots edible, culm used for weaving or for papermaking, in evergreen hardwood forests, see *Journal of Bamboo Research* 7(2): 53-57, f. 14. 1988, *Kew Bulletin* 53(2): 455. 1998.

F. elegans T.P. Yi

China, Sichuan. Young culm pruinose, hollow culm, see *Acta Botanica Yunnanica* 14(2): 136, f. 2. 1992.

F. emaculata T.P. Yi

China, Sichuan. Young culm pruinose, 10-17 fascicled branches, sheath persistent and coriaceous and shorter than internode, sheath blade erect and linear-lanceolate, sheath

auricles absent and no cilia, leaves narrowly lanceolate, food for giant panda, in alpine coniferous forests, see *Journal of Bamboo Research* 4(2): 29-30, f. 11. 1985.

F. exposita T.P. Yi

China. See *Journal of Bamboo Research* 11(2): 12, f. 3. 1992.

F. extensa Yi (*Sinarundinaria extensa* Yi)

China, Tibet. Young culm pruinose, about 5-7 branches per node, sheath auricles absent and no cilia, sheath ligule palmate, sheath blade erect, leaves narrow-lanceolate.

F. fansipanensis T.Q. Nguyen (*Borinda fansipanensis* (T.Q. Nguyen) Stapleton)

Vietnam. See *Kew Bulletin* 53(2): 455. 1998.

F. farcta T.P. Yi

China, Tibet. Young culm pruinose, longitudinal striae, solid, 3-10 fascicled branches, sheath shedding late and longer than internode, sheath auricles tiny, leaves narrow-lanceolate.

F. ferax (Keng) T.P. Yi (*Arundinaria ferax* Keng; *Sinarundinaria ferax* (Keng) Keng f.)

China, Shimian, Sichuan, Kangding. Young culm pruinose, purple-spotted sheath persistent and longer than internode, sheath auricles absent, sheath ligule drooping, leaves narrow-lanceolate, food for pandas, along roadsides, along riverbanks and streams, see *Sinensia* 7(3): 408, f. 1. 1936, *Technical Bulletin of the National Forestry Research Bureau* 8: 13. 1948, *Journal of Bamboo Research* 2(2): 39. 1983.

in China: feng shi jian zhu

F. fractiflexa T.P. Yi

China, Sichuan, Yunnan. Culm asymmetrical, zigzag, 5-7 slender branches fascicled, sheath deciduous, sheath auricles absent and no cilia, sheath ligule protruding, leaves narrow-lanceolate, strips used for weaving, food for pandas, see *Journal of Bamboo Research* 4(1): 22-23, f. 3. 1985.

in China: sao-ba zhu

F. frigida T.P. Yi (*Sinarundinaria glabrifolia* Yi)

China, Tibet. Young culm pruinose, most branches fascicled, young shoots purplish red, sheath shedding late, no auricles, sheath ligule truncate, leaves narrow-lanceolate.

F. fungosa T.P. Yi (*Borinda fungosa* (T.P. Yi) Stapleton; *Yushania fungosa* (Yi) Demoly)

China. See *Bulletin of Botanical Research* 5(4): 121-123, f. 1. 1985, *Kew Bulletin* 53(2): 456. 1998.

F. funiushanensis T.P. Yi

China. See *Acta Botanica Yunnanica* 13(4): 375-376, f. 1. 1991.

F. gongshanensis T.P. Yi

China, Yunnan, Gongshan. Young culm pruinose, 5-15 branches at each node, young shoots purplish red, sheath

persistent or shedding late and longer than internode, sheath blade linear-lanceolate, no sheath auricles and no cilia, sheath ligule truncate, leaves narrow-lanceolate, culm used for weaving, found in evergreen hardwood forest, see *Journal of Bamboo Research* 7(2): 57-60, f. 15. 1988.

F. grossa T.P. Yi (*Sinarundinaria grossa* Yi)

China, Tibet. Culm not pruinose, most branches fascicled, young shoots purplish red, sheath coriaceous, no sheath auricles, sheath ligule truncate, leaves narrow-lanceolate.

F. gyirongensis T.P. Yi

China, Tibet. Young culm pruinose and glabrous, sheath coriaceous and caducous, sheath blade linear-lanceolate, no sheath auricles and no cilia, papery leaves lanceolate.

F. hainanensis T.P. Yi

China, Hainan. Slender, longitudinal striae, 3-7 branches not fascicled or clustered, sheath persistent and coriaceous, sheath blade linear-lanceolate, no sheath auricles, sheath ligule arcuate with silky margin, 2-3 leaves on each twig, leaves narrow-lanceolate, see *Bulletin of Botanical Research* 3(3): 151, pl. 1. 1983.

F. hsuehana T.P. Yi (also spelled *hsuehiana*) (*Borinda hsuehana* (T.P. Yi) Stapleton)

China, Yunnan. 6-9 branches at each node, sheath persistent shorter than the internode, no cilia and no sheath auricles, sheath ligule truncate, leaves narrow-lanceolate, in evergreen hardwood forests, slopes, hills, see *Journal of Bamboo Research* 7(2): 104-108, f. 32. 1988, *Kew Bulletin* 53(2): 456. 1998.

F. hygrophylla J.R. Xue & T.P. Yi (also spelled *hygrophylla*)

China, Yunnan. Young culm pruinose, 5-14 branches at each node, sheath persistent and much longer than internode, no sheath auricles, sheath ligule truncate, strong leaves lanceolate, used for weaving, handles, farm tools, see *Journal of Bamboo Research* 7(2): 74-76, f. 21. 1988.

F. jiulongensis T.P. Yi

China, Sichuan, Jiulong. Young culm pruinose and powdery, shoot light red to purplish, culm sheath caducous and longer than internode, sheath blade truncate linear-lanceolate, no sheath auricles and no cilia, leaves narrow-lanceolate, shoot edible, culm used for weaving, food for pandas, see *Journal of Bamboo Research* 4(2): 22, f. 5. 1985.

F. lincangensis T.P. Yi

China, Yunnan, Lincang. Culm greenish glabrous not pruinose, shedding late or persistent culm sheath coriaceous and shorter than internode, sheath blade linear-lanceolate, sheath auricles present or absent, leaves lanceolate, edible shoot, culm used for weaving, see *Journal of Bamboo Research* 7(2): 96-98, f. 29. 1988.

F. lushuiensis J.R. Xue & T.P. Yi (*Borinda lushuiensis* (J.R. Xue & T.P. Yi) Stapleton)

China, Lushui, Yunnan. Young culm pruinose and glabrous, 2-9 branches at each node, sheath caducous and shorter than internode, no sheath auricles and no cilia, sheath ligule truncate, leaves narrowly-lanceolate, see *Journal of Bamboo Research* 7(2): 111-113, f. 34. 1988, *Kew Bulletin* 53(2): 457. 1998.

F. mairei (Hack. ex Hand.-Mazz.) T.P. Yi (*Arundinaria mairei* Hack. ex Hand.-Mazz.; *Arundinaria mairei* Hack.; *Indocalamus mairei* (Hack. ex Hand.-Mazz.) McClure; *Sinarundinaria mairei* (Hack.) Keng f.; *Sinarundinaria mairei* (Hack. ex Hand.-Mazz.) Keng f.) (named for the French botanical collector Edouard Ernest Maire, 1848-1932, missionary in Yunnan, China, died in Dongchuan, Yunnan)

China, Yunnan, Dayao. Young culm silky, sheath persistent and longer than internode, edible shoot, culm used for weaving, in evergreen hardwood forests, see *Kaiserliche Akademie der Wissenschaften in Wien. Mathematisch-Naturwissenschaftliche Klasse. Anzeiger*. 62: 255. 1926, *Symb. Sin.* 7: 1273. 1936, *Lingnan University Science Bulletin* 9: 24. 1940, *Technical Bulletin of the National Forestry Research Bureau* 8: 114. 1948, *Journal of Bamboo Research* 7(2): 50. 1988.

F. mali T.P. Yi (*Arundinaria maling* Gamble; *Fargesia maling* (Gamble) H. Simon ex D. McClintock; *Sinarundinaria maling* (Gamble) C.S. Chao & Renvoize; *Yushania maling* (Gamble) R.B. Majumdar; *Yushania maling* (Gamble) D.C. McClint. & Stapleton, nom. illeg., non *Yushania maling* (Gamble) R.B. Majumdar; *Yushania maling* (Gamble) Demoly, nom. illeg., non *Yushania maling* (Gamble) R.B. Majumdar)

China, Sichuan. Glabrous, waxy, sheath coriaceous shedding late, sheath blade erect, sheath auricle and cilia absent, sheath ligule triangular with wavy serrate margin, 2-4 leaves on each twig, leaves linear-lanceolate, culm used for weaving, see *Bulletin of Miscellaneous Information Kew* 1912: 139. 1912, *Kew Bulletin* 44: 356 (1989, *Acta Botanica Yunnanica* 11(1): 37-38, f. 2. 1989, *Bamboo Soc. Newsl.* 12: 10. 1991, *Fl. Ind. Enumerat.-Monocot.* 15: 6. 1992.

F. maluo T.P. Yi

China. See *Journal of Bamboo Research* 11(2): 6. 1992.

F. melanostachys (Hand.-Mazz.) T.P. Yi (*Arundinaria acutissima* Keng; *Arundinaria forrestii* Keng; *Arundinaria melanostachys* Hand.-Mazz.; *Sinarundinaria acutissima* (Keng) Keng f.; *Sinarundinaria forrestii* (Keng) Keng f.; *Sinarundinaria melanostachys* (Hand.-Mazz.) Keng f.) (named for the British traveler George Forrest, 1873-1932, plant collector in China, F.L.S. 1924; see J.H. Barnhart, *Biographical notes upon botanists*. 1: 558 and 2: 121. Cowan, *The Journeys and Plant Introduction of George Forrest*. R.H.S. 1952; Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 116, 254-255, 690. London 1994; Brenda McLean, *A Pioneering Plantsman: A.K. Bulley and the Great Plant Hunters*. London, The Stationery Office 1997; M. Hadfield et al., *British Gardeners: A Biographical Dictionary*. London 1980; H.J. Noltje, in *The New Plantsman*. 5(1): 63-64. Mar 1998; [Anon.], in *Hortus*. no. 44: 120-121. [referring about *A Botanical Pioneer in South West China*, by Heinrich Handel-Mazzetti, translator and publisher David Winstanley, 1996] Winter 1997)

China, Gongshan, Yunnan, Weixi. Culm pruinose when young, 3-11 branches on each node, sheath persistent and longer than the internode, sheath blade triangular or broadly lanceolate, sheath auricles and cilia absent, purple sheath ligule triangular, leaves lanceolate and glabrous, culm used for fishing rods, see *Kaiserliche Akademie der Wissenschaften in Wien. Mathematisch-Naturwissenschaftliche Klasse. Anzeiger*. 61: 23. 1924, *Bulletin of Miscellaneous Information Kew* 1936(1): 106-107. 1936, *Technical Bulletin of the National Forestry Research Bureau* 8: 13-14. 1948, *Journal of Bamboo Research* 2(2): 39. 1983.

F. membranacea T.P. Yi

China, Sichuan. Straight culm, sheath persistent, sheath blade erect, similar to *Fargesia fractiflexa* Yi, see *Acta Botanica Yunnanica* 14(2): 135, f. 1. 1992.

F. murielae (Gamble) T.P. Yi (also spelled *murieliae*) (*Arundinaria murielae* Gamble; *Arundinaria spathacea* (Franch.) D.C. McClint.; *Bambusa murielae* E.H. Wilson; *Fargesia spathacea* Franch.; *Sinarundinaria murielae* (Gamble) Nakai; *Thamnocalamus murieliae* (Gamble) Demoly; *Thamnocalamus spathaceus* (Franch.) Soderstr.; *Thamnocalamus spathaceus* (Franch.) C.D. Chu & C.S. Chao, nom. illeg., non *Thamnocalamus spathaceus* (Franch.) Soderstr.) (after Ernest Henry Wilson's daughter, Muriel, Mrs George L. Slate, d. 1976)

China. Variable, culm slightly pruinose when young, similar to *Fargesia orbiculata* Yi, see *Bulletin Mensuel de la Société Linnéenne de Paris* 2: 1067. 1893 and *Bulletin of Miscellaneous Information Kew* 1920(10): 344-345. 1920, *Journal of Japanese Botany* 11(1): 1-2. 1935, *Brittonia* 31(4): 495.

1979, *Acta Phytotaxonomica Sinica* 18(1): 23. 1980, *Bamboo Research* 1: 5. 1981, *Journal of Bamboo Research* 2(1): 39. 1983, *Bulletin de l'Association Française de Botanique* 13: 10. 1990.

in English: umbrella bamboo

in China: shennong jianzhu

F. nitida (Mitford) Keng f. ex T.P. Yi (*Arundinaria nitida* Mitford ex Stapf; *Arundinaria nitida* Mitford; *Bambusa nitida* hort.; *Fargesia nitida* (Mitford ex Stapf) Keng f. ex T.P. Yi; *Semiarundinaria nitida* Q.T. Shi; *Sinarundinaria nitida* Nakai; *Sinarundinaria nitida* (Mitford) Nakai; *Sinarundinaria nitida* (Mitford ex Stapf) Nakai; *Sinoarundinaria nitida* Hillier; *Thamnocalamus nitidus* (Mitford) Demoly; *Thamnocalamus nitidus* (Mitford ex Stapf) Demoly)

Songpan, Wenchuan, Sichuan, Gansu, Ningxia, China. Arching when old, sympodial, 5-18 slender branches at each node, sheath persistent, no auricles or cilia, sheath ligule arcuate, leaves linear-lanceolate, culms used to weave baskets, a food plant for giant panda, see *Transactions of the Linnean Society of London* 26(1): 28. 1868, *Gard. Chron.* 3rd ser. 15: 301. 1894, *Gardener's Chronicle & Agricultural Gazette* ser. III 18: 186, f. 33. 1895, *Bull. Misc. Inform. Kew* 109: 20. 1896 and *Journal of Japanese Botany* 11(1): 1. 1935, *Bamb. Res. Asia* 58. 1980, *Journal of Bamboo Research* 6(4): 14. 1987, *Bambou* 9: 13. 1991, *Edinb. J. Bot.* 51: 308. 1994.

in English: fountain bamboo, hardy blue bamboo

in China: Huaxi jianzhu

in Japan: sen-chiku

F. obliqua T.P. Yi

China, Songpan, Sichuan. Young culm pruinose, sheath oblong or elliptic, sheath blade erect, sheath auricles absent, sheath ligule arcuate, leaves oblong-lanceolate, a food plant for the giant panda, see *Acta Botanica Yunnanica* 8(1): 48-50, f. 1. 1986.

F. orbiculata T.P. Yi

China, Yunnan. Young culm pruinose with longitudinal stripes, 5-18 fascicled branches at each node, sheath persistent, no sheath auricles, sheath ligule arcuate, shoot edible, culm used for furniture, see *Journal of Bamboo Research* 7(2): 22-25, f. 3. 1988.

F. papyrifera T.P. Yi (*Borinda papyrifera* (T.P. Yi) Stapleton)

China, Yunnan. Young culm pruinose with longitudinal stripes, 3-5 branches per node, sheath caducous, sheath auricles absent, sheath ligule more or less concave, edible shoot, culm used for papermaking, for weaving, punt poles, in hardwood forests, see *Journal of Bamboo Research* 7(2): 42-45, f. 10. 1988, *Kew Bulletin* 53(2): 457. 1998.

F. parvifolia T.P. Yi

China. See *Journal of Bamboo Research* 10(2): 15. 1991.

F. pauciflora (Keng) T.P. Yi (*Arundinaria pauciflora* Keng; *Fargesia pauciflora* (Keng) T.P. Yi; *Sinarundinaria pauciflora* (Keng) Keng f.)

China, Sichuan. Longitudinally striped, densely silky, sheath persistent or shedding late, sheath blade linear-lanceolate, no sheath auricle and no cilia, sheath ligule truncate or arcuate, leaves narrowly lanceolate, food for pandas, see *Journal of the Washington Academy of Sciences* 26: 397. 1936, *Technical Bulletin of the National Forestry Research Bureau* 8: 14. 1948, *Journal of Bamboo Research* 4(2): 25-26. 1985, *Bulletin of Botanical Research* 5(4): 125. 1985.

F. perlonga J.R. Xue & T.P. Yi (*Borinda perlonga* (J.R. Xue & T.P. Yi) Stapleton)

China, Yunnan, Kunming. Sheath persistent much longer than the internode, sheath auricles tiny or absent, sheath ligule truncate, papery leaves lanceolate, see *Journal of Bamboo Research* 7(2): 79-81, f. 23. 1988, *Kew Bulletin* 53(2): 457. 1998.

F. pleniculmis (Hand.-Mazz.) T.P. Yi (*Arundinaria pleniculmis* Hand.-Mazz.)

China, Yunnan, Gongshan. Young culm glabrous and pruinose, 1-3 leaves on each twig, edible shoot, see *Symbolae Sinicae* 7(5): 1276-1277. 1936, *Journal of Bamboo Research* 7(2): 113. 1988.

F. plurisetosa T.H. Wen

China, Yunnan. Sheath persistent and much longer than the internode, manifold branching, sheath blade triangular or broadly lanceolate, no sheath auricle, 3-6 leaves on each twig, leaves lanceolate and silky, see *Journal of Bamboo Research* 3(2): 27, f. 3. 1984.

F. porphyrea T.P. Yi

China, Yunnan. Young culm whitish silky, not pruinose, shoot red purplish, 5-11 branches at each node, sheath persistent and shorter than the internode, no auricles and no cilia, sheath ligule truncate, leaves linear-lanceolate, edible shoot, internodes used for making flutes, see *Journal of Bamboo Research* 7(2): 84-87, f. 25. 1988.

F. praecipua T.P. Yi

China, Yunnan. Green, 6-12 branches at each node, sheath persistent, no auricles and no cilia, sheath ligule truncate or slightly concave, leaves lanceolate, used for making handicrafts, crossbows, in evergreen hardwood forests, see *Journal of Bamboo Research* 7(2): 68-71, f. 19. 1988.

F. qinlingensis T.P. Yi & J.X. Shao

China, Shaanxi. Young culm glabrous and pruinose, sheath auricles sickle-shaped, sheath ligule truncate, leaf blade lanceolate or narrowly lanceolate, a feeding plant for giant pandas, see *Journal of Bamboo Research* 6(1): 42-45, f. 1. 1987.

F. robusta T.P. Yi (*Thamnocalamus robustus* (T.P. Yi) Demoly)

China, Wenchuan, Sichuan. Sheath caducous or shedding late, 15-20 branches clustered, no auricles and no cilia, sheath ligule truncate, leaves lanceolate or linear-lanceolate, food for pandas, edible shoots, culm used for weaving, for making walking stick, see *Journal of Bamboo Research* 4(2): 28-29, f. 10. 1985, *Bulletin de l'Association Française de Botanique* 13: 10. 1990.

in English: walking stick bamboo

in China: Guaigun zhu

F. rufa T.P. Yi

China, Sichuan, Gansu. Smooth, pruinose, glabrous, sheath shedding late and much longer than internode, sheath blade linear-lanceolate, no auricles or cilia, sheath ligule truncate or concave, leaves linear-lanceolate, food for pandas, see *Journal of Bamboo Research* 4(2): 27, f. 9. 1985.

F. sagittata T.P. Yi

China. Dark green, 7-10 branches at each node, sheath persistent and much longer than the internode, sheath blade erect, no sheath auricles, sheath ligule concave or truncate, twigs slender, leaves lanceolate, used for making handicrafts, crossbow, in evergreen hardwood forests, see *Journal of Bamboo Research* 7(2): 63-65, f. 17. 1988.

F. scabrida T.P. Yi

China, Sichuan, Songpan, Wenxian. Clumped, 3-8 branches per node, sheath persistent, sheath blade erect, no sheath auricles, leaves lanceolate, food for pandas, see *Journal of Bamboo Research* 4(2): 24-25, f. 8. 1985.

in English: yellow bamboo, rough-flowered bamboo

in China: huang zhu, cao hua jian zhu, kongxin zhu

F. semicoriacea T.P. Yi

China, Yunnan, Dongchuan. Young culm pruinose, shoot purple with brown spots, sheath persistent, purplish green sheath blade linear-lanceolate, no sheath auricles and no cilia, sheath ligule purple and truncate, leaves narrow-lanceolate, see *Journal of Bamboo Research* 7(2): 71-73, f. 20. 1988.

F. semiorbiculata T.P. Yi (*Sinarundinaria semiorbiculata* Yi)

China, Tibet. Young culm pruinose, shoot purple, sheath coriaceous yellowish, sheath blade linear-lanceolate to triangular, no sheath auricles and cilia, sheath ligule present and scabrous, leaves narrowly lanceolate, see *Journal of Bamboo Research* 2(2): 40, f. 9. 1983.

F. setosa T.P. Yi (*Sinarundinaria setosa* Yi)

China, Tibet. Culm top slightly bending, pruinose, young internode silky, sheath persistent or shedding late, sheath blade linear-lanceolate to triangular, sheath auricles absent, sheath ligule truncate, leaves lanceolate.

F. similaris J.R. Xue & T.P. Yi

China, Yunnan. Yellowish, glabrous, 3-8 fascicled branches, culm sheath yellow shorter than internode, sheath blade erect, sheath auricles absent, sheath ligule truncate, leaves narrow lanceolate, see *Journal of Bamboo Research* 7(2): 25-28, f. 4. 1988.

F. solida T.P. Yi

China, Yunnan. Pruinoso, longitudinal stripes, 4-9 branches at each node, sheath persistent and longer than the internode, sheath blade erect, no sheath auricles and no cilia, sheath ligule protruding, in hardwood forests, along riverbanks and streams, see *Journal of Bamboo Research* 7(2): 47-50, f. 12. 1988.

F. spathacea Franch. (*Arundinaria spathacea* (Franch.) D.C. McClint.; *Fargesia murielae* (Gamble) T.P. Yi; *Thamnocalamus spathaceus* (Franch.) Soderstr.; *Thamnocalamus spathaceus* (Franch.) C.D. Chu & C.S. Chao, nom. illeg., non *Thamnocalamus spathaceus* (Franch.) Soderstr.)

China. See *Bulletin Mensuel de la Société Linnéenne de Paris* 2: 1067. 1893 and *Bulletin of Miscellaneous Information Kew* 1920(10): 344-345. 1920, *Journal of Japanese Botany* 11(1): 1-2. 1935, *Brittonia* 31(4): 495. 1979, *Acta Phytotaxonomica Sinica* 18(1): 23. 1980, *Bamboo Research* 1: 5. 1981, *Journal of Bamboo Research* 2(1): 39. 1983, *Bulletin de l'Association Française de Botanique* 13: 10. 1990.

in English: arrow bamboo

in China: Jianzhu

F. stenoclada T.P. Yi

China, Sichuan. Erect, pruinose, sheath caducous and coriaceous, sheath blade erect, no sheath auricles, sheath ligule arcuate or nearly truncate, 1-2 leaves on each twig, leaves linear-lanceolate, food for pandas, culm used for fishing rods, for weaving, see *Journal of Bamboo Research* 8(2): 30-33, f. 1. 1989.

in English: slender branched arrow bamboo

in China: Xizhi Jianzhu

F. strigosa T.P. Yi

China, Yunnan. Young culm pruinose, 5-10 branches at each node, sheath persistent and shorter than the internode, sheath blade linear-lanceolate, sheath auricles absent and no cilia, sheath ligule arcuate or truncate, leaves narrow-lanceolate, see *Journal of Bamboo Research* 7(2): 90-93, f. 27. 1988.

F. subflexuosa T.P. Yi

China, Yunnan. Sigmoid to asymmetrical, young culm pruinose, 2-7 branches at each node, sheath caducous and longer than the internode, no sheath auricles and no cilia, sheath ligule concave or truncate, used for weaving, found in hardwood forests, see *Journal of Bamboo Research* 7(2): 36-39, f. 8. 1988.

F. sylvestris T.P. Yi

China, Yunnan. Young culm pruinose and greenish, 6-10 branches at each node, sheath persistent coriaceous, sheath blade linear-lanceolate, no sheath auricles and no cilia, sheath ligule truncate, leaves narrowly lanceolate, see *Journal of Bamboo Research* 7(2): 31-34, f. 6. 1988.

F. tenuilignea T.P. Yi

China, Yunnan. Greenish, glabrous, young culm more or less pruinose, 8-11 branches at each node, sheath persistent and coriaceous yellowish brown, sheath blade linear-lanceolate, no sheath auricles, sheath ligule truncate, leaves lanceolate, edible shoot, culm used for papermaking, for weaving, see *Journal of Bamboo Research* 7(2): 39-42, f. 9. 1988.

F. unguata T.P. Yi

China. See *Journal of Bamboo Research* 8(1): 22-24, f. 5. 1989.

F. utilis T.P. Yi

China, Yunnan. Greenish, young culm more or less pruinose, 7-18 fascicled branches per node, sheath persistent and longer than the internode, no sheath auricles and no cilia, edible shoot, culm used in house building, see *Journal of Bamboo Research* 7(2): 28-31, f. 5. 1988.

F. vicina (Keng) T.P. Yi (*Arundinaria vicina* Keng; *Pseudosasa vicina* (Keng) T.Q. Nguyen; *Sinarundinaria vicina* (Keng) Keng f.)

China. See *Sinensia* 7(3): 410, f. 2. 1936, *Symb. Sin.* 7: 1275. 1936, *Technical Bulletin of the National Forestry Research Bureau* 8: 14. 1948, *Journal of Bamboo Research* 7(2): 113. 1988.

F. wuliangshanensis T.P. Yi

China. Longitudinal stripes, 3-4 leaves on each twig, resembles *Fargesia glabrifolia* Yi, culm used for weaving, see *Acta Botanica Yunnanica* 10(4): 438-440, f. 2. 1988.

F. yuanjiangensis Xue & T.P. Yi

China, Yunnan, Yuanjiang. Shrubby, pruinose, glabrous, 15-18 branches at each node, sheath persistent and longer than the internode, sheath blade erect linear-lanceolate, no sheath auricles, sheath ligule truncate, leaves narrow-lanceolate, see *Journal of Bamboo Research* 7(2): 76-79, f. 22. 1988.

F. yulongshanensis T.P. Yi

China, Yunnan. Pruinoso when young, several branches at each node, shoots purplish, sheath shedding late or persistent, sheath blade linear-lanceolate, sheath auricles absent, sheath ligule truncate or concave, leaves narrowly lanceolate, edible shoot bitter, strips used in weaving, see *Journal of Bamboo Research* 7(2): 87-90, f. 26. 1988.

F. yunnanensis J.R. Xue & T.P. Yi (*Sinarundinaria yunnanensis* (J.R. Xue & T.P. Yi) J.R. Xue & D.Z. Li; *Yushania yunnanensis* (J.R. Xue & T.P. Yi) Keng f. & T.H. Wen)

China, Yunnan, Sichuan, Kunming. Young culm glabrous or sparsely silky, sheath persistent coriaceous, yellowish, no sheath auricles and no cilia, purple sheath ligule truncate, leaf lanceolate, shoot edible, see *Journal of Bamboo Research* 6(2): 21. 1987 and 6(4): 16. 1987, *Bulletin of Botanical Research* 5(4): 125-126, f. 3. 1985.

F. zayuensis T.P. Yi

China, Tibet. Culm hollow, longitudinal stripes, 5-10 fascicled branches at each node, sheath coriaceous shedding late and shorter than internode, no sheath auricles, sheath ligule truncate, 1-3 leaves on each twig, see *Journal of Bamboo Research* 7(2): 20-22, f. 2. 1988.

Farrago W.D. Clayton

Latin *farrago* "mixed fodder for cattle, mash, hodge-podge, a trifle," possibly referring to the spikelets or to the complex racemelets.

One species, Africa, Tanzania. Chloridoideae, Zoysiinae, annual, herbaceous, unarmed, wiry, slender, unbranched, auricles absent, leaf blades acuminate, ligule a fringe of hairs, plants bisexual, inflorescence a unilateral false raceme or a false spike, 1 fertile and 2 vestigial spikelets, 2 glumes more or less equal and dorsally compressed, lower glume long-awned and asymmetrical, upper glume symmetrical and shortly awned, lemma a nerveless scale, palea present, 2 free and glabrous lodicules, 3 stamens, ovary glabrous, 2 stigmas, open habitats, rocky places, type *Farrago racemosa* Clayton, see *Kew Bulletin* 21: 125. 1967, Carina K. Anttila, Curtis C. Daehler, Nathan E. Rank and Donald R. Strong, "Greater male fitness of a rare invader (*Spartina alterniflora*, Poaceae) threatens a common native (*Spartina foliosa*) with hybridization." *Am. J. Bot.* 85: 1597-1601. 1998.

Species***F. racemosa*** Clayton

Tanzania.

Fartis Adans. = *Zizania* L.

Ehrhartoideae, Oryzaceae, Zizaniinae, see *Species Plantarum* 2: 991. 1753, *Familles des Plantes* 2: 37, 557. 1763, *Diss. Brev. Bot. Zool.* 32. 1769 and *American Midland Naturalist* 4: 214. 1915, *Phytologia* 72: 6. 1992, *Sida* 17(3): 533-549. 1997, *Newslett. Int. Organ. Pl. Biosyst. (Oslo)* 30: 10-15. 1999, *Contributions from the United States National Herbarium* 39: 116-118. 2000.

Fasciculochloa B.K. Simon & C.M. Weiller= *Steinchisma* Raf.

Latin *fasciculus* “a small bundle, packet,” *fascicularia* “things carried in bundles” and *chloe*, *chloa* “grass,” referring to the fasciculate spikelets.

One species, Australia, southeast Queensland. Panicoideae, Panicodae, Paniceae, or Panicoideae, Paniceae, Paspalinae, perennial, herbaceous, caespitose, branched or unbranched, auricles absent, linear leaves, ligule a fringed membrane, plants bisexual, inflorescence paniculate, spikelets fasciculate and terminal, 2 glumes very unequal to subequal, palea awnless, 2 glabrous lodicules, 2 stamens, ovary glabrous, 2 stigmas, type *Fasciculochloa sparshottiorum* B.K. Simon & C.M. Weiller, see *Seringe Bull. Bot.* 1: 220. 1830 [also *Bulletin Botanique [Genève]* 1: 220. 1830] and *Flora of the Southeastern United States ...* 105. 1903, *Austrobaileya* 4(3): 369-379. 1995 [*Fasciculochloa*, a new grass genus (Poaceae: Paniceae) from southeastern Queensland], *Austrobaileya* 5(3): 585-586. 1999 [*Steinchisma hians* (Elliott) Nash, the correct name for *Fasciculochloa sparshottiorum* B.K. Simon & C.M. Weiller], *Contributions from the United States National Herbarium* 46: 607-608. 2003, *Austrobaileya* 6(3): 561-562. 2003 [*Steinchisma laxa* (Sw.) Zuloaga, the correct name for *Cliffordiochloa parvispiculata* B.K. Simon].

Species

F. sparshottiorum B.K. Simon & C.M. Weiller (*Aira incompleta* Bosc ex Steud.; *Panicum hians* Elliott; *Panicum hians* var. *palescens* Döll; *Panicum jejunum* Trin.; *Panicum megapotamicum* Spreng.; *Panicum milioides* Nees, nom. illeg., non *Panicum milioides* Nees ex Trin.; *Panicum milioides* Nees ex Trin.; *Panicum milioides* var. *filifolium* R.A. Palacios; *Panicum oblongiflorum* Desv.; *Steinchisma hians* (Elliott) Nash ex Small; *Steinchisma hians* (Elliott) Nash) (named for P. Sparshott and K.M. Sparshott, Queensland Herbarium, Brisbane Botanic Gardens)

Tropical Australia. Perennial, delicate, caespitose, clumped, forming colonies, panicle ovate with long spreading branches, terminal spikelets, lower glume 3-nerved, upper glume not saccate 3- to 5-nerved, lower palea ciliolate, disturbed places, moist ground, rocky or stony places, marshy meadows, depressions, open areas, often in *Steinchisma hians*, see *A Sketch of the Botany of South-Carolina and Georgia* 1: 118. 1816, *De Graminibus Panicis* 225. 1826, *Systema Vegetabilium, editio decima sexta* 4(2): 34. 1827, *Flora Brasiliensis seu Enumeratio Plantarum* 175. 1829, *Bulletin Botanique [Genève]* 1: 220. 1830, *Mémoires de la Société d'Agriculture, Sciences et Arts d'Angers* 1: 193. 1831, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série.*

Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles 2(1): 103. 1836, *Nomenclator Botanicus* editor 2 1: 45. 1840, *Flora Brasiliensis* 2(2): 240. 1877 and *Flora of the Southeastern United States ...* 105. 1903, *Flora Illustrada de Entre Ríos (Argentina)* 6(2): 302. 1969, *Austrobaileya* 4(3): 374, f. 1-4. 1995, *Ann. Missouri Bot. Gard.* 85: 647-649. 1998.

Fendleria Steudel = Achnatherum P. Beauv., Oryzopsis Michx.

Named for the German-born American explorer August (Augustus) Fendler, 1813-1883, traveler, botanical and plant collector in North and South America, with the American botanist Asa Gray (1810-1888) wrote *Plantae fendlerianae novi-mexicanae*. [Philadelphia 1849]. See F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 103. Berlin & Hamburg 1989; J.H. Barnhart, *Biographical notes upon botanists*. 1: 534. 1965; Daniel Cady Eaton (1834-1895), *Filices wrightianae et fendlerianae*. 1860; A.H. Dupree, *Asa Gray — American Botanist, Friend of Darwin*. Ferrocalamus Hsueh & P.C. Keng =
Indocalamus Nakai

From the Latin *ferrum* "iron" and *calamus* "a reed, cane."

Two species, China, Yunnan. Bambuseae, Arundinariinae, monopodial, 1 branch at each node, stout, culm wall thick, large leaves, tubercular aerial roots at base of branch, sheath thick coriaceous hard but fragile, apical panicle, 3 stamens, 2 stigmas, thick and fleshy pericarp, used for roofing, type *Ferrocalamus strictus* J.R. Xue & Keng f., see *Flora Boreali-Americana* 1: 73. 1803 and *Journal of the Arnold Arboretum* 6(3): 148. 1925, *Taxon* 6(7): 203. 1957, *Acta Phytotaxonomica Sinica* 18(1): 24-25. 1980, *Journal of Bamboo Research* 1: 3, 21, 137. 1982 [1981], *Acta Phytotaxonomica Sinica* 23(6): 460, 462. 1985, E. Species

F. rimosivaginus T.H. Wen

China. Sheath papery, leaf sheath glabrous, see *Journal of Bamboo Research* 1(2): 3. 1982, *Journal of Bamboo Research* 3(2): 26, f. 2. 1984.

F. strictus J.R. Xue [also Hsueh] & P.C. Keng [also Keng f.]

China, Yunnan. Type species, solid base, sheath coriaceous, sheath auricles absent, leaf sheath ciliate, sheath blade linear-lanceolate, 1 or 3-5 branches at each node, large leaves long cuspidate, used for handicrafts, leaves used as roofing materials, see *Journal of Bamboo Research* 1(2): 3. 1982.

Festuca L. = *Amphigenes* Janka, *Anatherum* Nabelek, *Argillochloa* W.A. Weber, *Bucetum* Parnell, *Drymochloa* Holub, *Drymonaetes* Fourr., *Festucaria* Fabr., *Festucaria* Hesit. ex Fabr., *Gnomonia* Lunell, *Gramen* Krause, *Helleria* E. Fourn., *Hellerochloa* Rauschert,

Hesperochloa (Piper) Rydb., *Leiopoa* Ohwi, *Leucopoa* Griseb., *Lojaconoa* Gand., *Nabelekia* Roshev., *Pseudobromus* K. Schum., *Schedonorus* P. Beauv., *Tzvelevia* E.B. Alexeev, *Wasatchia* M.E. Jones

From the Latin *festuca*, *ae* "a straw, stalk" but also "a straw-like weed among barley, *Avena sterilis* L. or *Aegilops ovata* L." (Plinius), Akkadian *desu* "broken, smashed," *dasu* "to thresh"; see Carl Linnaeus, *Species Plantarum*. 73. 1753 and *Genera Plantarum*. edition 5. 33. 1754.

Some 300(-360)/450 species, cosmopolitan, cold and temperate regions and tropical mountains. Pooideae, Poodae, Poeae, or Pooideae, Poeae, Loliinae, perennial, variable, densely or loosely tufted, glabrous, herbaceous, rhizomatous or stoloniferous, erect or decumbent, forming swards or tussocks, stems flimsy or rigid, culms stout or slender, leaves auriculate or nonauriculate, ligule membranous and usually short, sheath margins joined or free, leaves flat and linear to linear-lanceolate, glabrous nodes, culm internodes solid or hollow, plants bisexual, occasionally dioecious, inflorescence a panicle dense or loose, spikelets solitary and often on long pedicels, upper floret vestigial, glumes more or less equal narrow and keeled, glumes shorter than the spikelets and shorter than the lemmas, lemmas rounded on the back and tapering into a short straight awn or awnless, awn terminal or nearly so, hairy callus absent, palea apically notched, 2 lodicules free and membranous, 3 stamens, ovary without the apical appendage, stigmas white, fruit compressed and grooved, pasture and lawn grasses, useful and ornamental, playing fields, occur in hillsides, alpine zones, rainforest, grasslands, dry grasslands, moist valley bottoms, pampas, mountains, plains, meadows, a difficult genus close to *Poa* and *Bromus*, the closely related genus *Vulpia* C.C. Gmelin has an annual habit, intergeneric hybrids with *Vulpia* C.C. Gmelin, *Lolium* L. and *Bromus* L., see *Species Plantarum* 1: 73-74, 83. 1753, *Enumeratio Methodica Plantarum* 207. 1759, *Essai d'une Nouvelle Agrostographie* 99, 162, 177, pl. 19, f. 2. 1812, *Systema Vegetabilium* 698-710. 1817, *Synopsis Florae Germanicae et Helveticae* 813. 1837, *Florae Africae Australioris Illustrationes Monographicae* I. - F. actae*** Connor
- New Zealand. Perennial, slender, erect or geniculate at the base, tussocky, glaucous, leaf blades disarticulating at the collar, inflorescence paniculate, rachis prickly, glumes unequal and keeled, lemma rounded, palea deeply bifid, lodicules lobed or entire, anthers yellow, ovary apex hispid, see *New Zealand Journal of Botany* 36(3): 335. 1998.
- F. aequipaleata*** E. Fourn. (*Festuca tolucensis* subsp. *aequipaleata* (E. Fourn.) Piper)
- Mexico. See *Nova Genera et Species Plantarum (quarto ed.)* 1: 153. 1815 [1816], *Biologia Centrali-Americana; ... Botany* ... 3(20): 581. 1885, *Mexicanas Plantas* 2: 125. 1886 and *Contributions from the United States National Herbarium* 16(5): 198. 1913.
- F. africana*** (Hack.) Clayton (*Brachyelytrum africanum* Hack.; *Pseudobromus africanus* (Hack.) Stapf; *Pseudobromus silvaticus* K. Schum.)
- South Africa, Kenya. Perennial, in large tufts, rhizomatous, inflorescence branches flexuous, spikelets solitary and 1-flowered, glumes unequal, lemma awned and 3-nerved, shade species, in forest, near streams, see *Bulletin de l'Herbier Boissier* 3(8): 382. 1895 and *Flora Capensis* 7: 763. 1900, *Kew Bulletin* 40: 727. 1985.

F. aguana E.B. Alexeev (*Festuca panamica* E.B. Alexeev) Guatemala. See *Bot. Zhurn. (Moscow & Leningrad)* 66: 1493. 1981, *Bot. Zhurn. (Moscow & Leningrad)* 67: 1290. 1982.

F. agustini Lindinger

Europe, Spain, Canary Islands. Rare species, see *Abhandlungen aus dem Gebiet der Auslandskunde*. Reihe C: *Naturwissenschaften* 21(8): 298. Hamburg 1926.

F. airoides Lam. (*Festuca airoides* (Koeler) Mutel, nom. illeg., non *Festuca airoides* Lam.; *Festuca ovina* L. subsp. *ovina* var. *supina* (Schur) Hack.; *Festuca ovina* var. *supina* (Schur) Hack.; *Poa airoides* Koeler)

Europe. See *Encyclopédie Méthodique, Botanique* 2: 464. 1788, *Descriptio Graminum in Gallia et Germania* 194. 1802, *Flore Française* 4: 115. 1837 and *Fragmenta Floristica et Geobotanica* 28: 363-369. 1982.

in English: tufted fescue

F. albida Lowe (*Festuca albida* (Turcz. & Trin.) Malyshev, nom. illeg., non *Festuca albida* Lowe; *Parafestuca albida* (Lowe) E.B. Alexeev)

Portugal, Madeira. Rare species, see *Transactions of the Cambridge Philosophical Society* 4: 10. 1831.

F. alpina Suter (*Festuca alpina* Host, nom. illeg., non *Festuca alpina* Suter; *Festuca ovina* var. *alpina* (Suter) Wimm. & Grab.)

Europe, Alps, Pyrénées. Glabrous, spikelets yellow-green, upper glume linear to oblong-lanceolate and acuminate, lemma oblong-lanceolate, subalpine, see *Icones et Descriptiones Graminum Austriacorum* 4: 36, t. 63. 1809.

F. altaica Trin. (*Festuca altaica* Trin. f. *pallida* Jordal; *Festuca altaica* f. *vivipara* Jordal; *Festuca altaica* subsp. *eu-altaica* var. *genuina* subvar. *typica* St.-Yves; *Festuca altaica* Trin. subsp. *scabrella* (Torr. ex Hook.) Hultén; *Festuca altaica* subsp. *scabrella* (Torr.) Hultén; *Festuca altaica* var. *major* (Vasey) Gleason; *Festuca altaica* Trin. var. *scabrella* (Torr. ex Hook.) Breitung; *Festuca altaica* var. *scabrella* (Torr.) Breitung; *Festuca campestris* Rydb.; *Festuca hallii* (Vasey) Piper; *Festuca scabrella* Torr. ex Hook.; *Festuca scabrella* Torr.; *Festuca scabrella* subsp. *scabrella*; *Festuca scabrella* var. *major* Vasey; *Festuca scabrella* var. *scabrella*)

Circumboreal, Asia, China, Russia, Siberia, Altai, Mongolia. Perennial bunchgrass, erect, densely tufted, greenish or green, rarely rhizomatous, leaves mostly basal, sheaths glabrous or glabrescent, auricles present or absent, ligules ciliate, leaf blades erect, purplish or dark purple inflorescences, glumes unequal with margins ciliate, ovary apex pubescent, highly palatable forage to livestock and wildlife, useful in rehabilitation projects, useful for roadside plantings, growing in forest steppe, open forests, montane and subalpine grasslands, loam and silty loams, grasslands, dark mountain brown soil, alpine meadows, woodland

opening, wet meadow area, see *Flora Altaica* 1: 109-110. 1829, *Flora Boreali-Americana* 2: 252, t. 233. 1840 and *American Midland Naturalist* 58: 12. 1957, *Canad. J. Bot.* 62: 1744. 1984, *Canadian Journal of Botany* 70: 1940-1944. 1992, *Journal of Ecology* 90(2): 325-337. Apr 2002, *Functional Ecology* 18(5): 692-699. Oct 2004, *Global Change Biology* 10(12): 1996-2004. Dec 2004.

in English: Altai fescue, plains rough fescue, mountain rough fescue, alpine rough fescue, northern rough fescue, rough fescue

F. altaica Trin. f. *pallida* Jordal

U.S., Alaska. See *Rhodora* 54(638): 36. 1952.

F. altaica Trin. f. *vivipara* Jordal

U.S., Alaska. See *Rhodora* 54(638): 36. 1952.

F. altaica Trin. subsp. *altaica*

Alaska, British Columbia. Perennial, densely caespitose, rarely rhizomatous or with short inconspicuous rhizomes, yellowish to dark green foliage, 3-5 florets per spikelet, in tundra meadows.

in English: northern rough fescue

F. altaica Trin. subsp. *hallii* (Vasey) Harms (*Festuca hallii* (Vasey) Piper; *Melica hallii* Vasey)

North America, British Columbia, Manitoba, Colorado, Rocky Mountains. Perennial bunchgrass, bluish or gray-green, somewhat shortly rhizomatous, mat-forming, dead sheaths persisting, 2-3 florets per spikelet, grows along the foothills and in mountain grasslands, see *Botanical Gazette* 6: 296. 1881 and *Contributions from the United States National Herbarium* 10: 31. 1906, *Madroño* 32(1): 9. 1985.

in English: plains rough fescue

F. altaica Trin. subsp. *scabrella* (Torr.) Hultén (*Festuca altaica* Trin. subsp. *scabrella* (Torr. ex Hook.) Hultén; *Festuca campestris* Rydb.)

British Columbia, Alberta, Montana, Oregon. Perennial bunchgrass, densely caespitose, forms large clumps, rarely rhizomatous, bluish gray-green to glaucous, 4-6 florets per spikelet, see *Flora Altaica* 1: 109-110. 1829, *Flora Boreali-Americana* 2: 252, t. 233. 1840 and *Memoirs of the New York Botanical Garden* 1: 57. 1900.

in English: mountain rough fescue

F. altissima All. (*Festuca altissima* Boiss., nom. illeg., non *Festuca altissima* All.; *Festuca sylvatica* Vill., non Huds.; *Festuca sylvatica* (Pollich) Vill.; *Poa sylvatica* Pollich; *Schedonorus altissimus* (All.) P. Beauv.)

Europe, Denmark, Eurasia. Clump-forming, fibrous roots, useful for erosion control, found in meadows, see *Essai d'une Nouvelle Agrostographie* 177. 1812.

in Danish: skov-svingel

in Mexico: zacatón criollo, zacate del volcán

F. amethystina L. (*Festuca amethystina* All.; *Festuca amethystina* auct.; *Festuca amethystina* Host, nom. illeg., non *Festuca amethystina* L.)

Central Europe, Turkey. Perennial, stems flimsy, mauve, dense tussocks, leaves with very narrow soft blades, branched and flexuous panicle, glumes unequal, lemma acute to shortly awned, useful for erosion control, sometimes cultivated as an ornamental, see *Species Plantarum* 1: 74. 1753, *Flora Pedemontana* 2: 252. 1785 and *Bull. Soc. Bot. Centre-Ouest* 10: 117. 1989, *Taxon* 49(2): 250. 2000.

in English: tufted fescue, amethyst fescue

F. amethystina L. subsp. ***amethystina***

Alps and central Europe. See *Species Plantarum* 1: 74. 1753, *Flora Pedemontana* 2: 252. 1785 and *Bull. Soc. Bot. Centre-Ouest* 10: 117. 1989, *Taxon* 49(2): 250. 2000.

F. amethystina L. subsp. ***kummeri*** (Beck) Markgr.-Dann. (*Festuca amethystina* L. subsp. *amethystina* var. *kummeri* Beck; *Festuca amethystina* var. *kummeri* Beck)

Europe. See *Botanical Journal of the Linnean Society* 76(4): 326. 1978.

F. amethystina L. subsp. ***orientalis*** Krajina

Central Europe. See *Species Plantarum* 1: 74. 1753, *Flora Pedemontana* 2: 252. 1785 and *Bull. Soc. Bot. Centre-Ouest* 10: 117. 1989, *Taxon* 49(2): 250. 2000.

F. amethystina L. subsp. ***ritschlii*** (Hack.) Lemke ex Markgr.-Dann. (*Festuca amethystina* L. subsp. *amethystina* var. *cechoslovenica* Krajina; *Festuca amethystina* L. subsp. *amethystina* var. *ritschlii* Hack.)

North-central Europe. See *Botanical Journal of the Linnean Society* 76(4): 327. 1978.

F. ammobia Pavlick (*Festuca arenaria* Osbeck, non Lam.; *Festuca rubra* subsp. *arenaria* (Osbeck) Syme; *Festuca rubra* L. subsp. *arenicola* E.B. Europe, temperate Asia, northwest Africa. Long-lived perennial bunchgrass, erect and stout, tufted, green to dark green, hollow, herbaceous, aggressive and vigorous, unbranched, forms heavy clumps, sometimes tussock-forming, almost reedlike, deep-rooted, roots tough and coarse, short-rhizomatous or without rhizomes, rarely stoloniferous, sheaths smooth to slightly roughened, auricles claw-like and strong, dead sheaths remain at the base of the plant, ligule a minute rim truncate, leaves with a rough upper surface, leaf blade flat and grooved, inflorescence an open to narrow branched panicle, green to purple panicle loose with unequal twin branches, chasmogamous spikelets, 3-10-flowered, uppermost floret often reduced, glumes 2 per spikelet, glumes lanceolate and unequal, lemmas awnless to short-awned, lemma stiff with a terminal awn or mucro, palea 2-keeled with wingless keels, ovary apex hairy or glabrous, grain compressed and reddish, planted as a pasture grass, cultivated for hay and fodder, turf, forage, palatable when young and succulent, coarse and tough when mature, noxious and invasive weed widely naturalized elsewhere, potential seed contaminant, ornamental, sometimes poisonous due to phytotoxins, drought-resistant, resistant to trampling, tolerant of poor drainage and seasonal flooding, ground cover, excellent soil improver, colonizes bare soil, useful in rehabilitation and watershed protection, suitable for reclamation of surface mines and for erosion control, usually found on both wet and dry sites, marshes, in grazed woods, bottomlands, meadows, eroded patches, open habitats, ditches, in fallow and abandoned fields, damp hollows, disturbed areas, along roadsides, railroad tracks, on heavy clay soils or on deep loam, fields and open grounds, swampy verges, occasionally referred to as *Festuca elatior* L., see *Species Plantarum* 1: 64, 75. 1753, *Spicilegium Florae Lipsicae* 57. 1771, *Tentamen Florae Germanicae* 2: 141. 1789, *Essai d'une Nouvelle Agrostographie* 177, pl. 19, f. 2. 1812, *Monographia Festucarum Europearum* 152, 154. 1882 and *Brittonia* 19: 131. 1967, *Bothalia* 16: 59. 1986, Clay K., "Effects of fungal endophytes on the seed and seedling biology of *Lolium perenne* and *Festuca arundinacea*." *Oecologia* 73: 358-362. 1987, *Taxon* 40: 135-137. 1991, *Novon* 3(3): 241. 1993, D.J. F. breviaristata Pilg. (*Festuca breviaristata* Krajina, nom. illeg., non *Festuca breviaristata* Pilg.; *Festuca subulifolia* Benth.)

Ecuador. See *Plantas Hartwegianas imprimis Mexicanas* 262. 1846, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 25(5): 717-718. 1898.

F. brevifolia Muhl. (*Festuca brevifolia* R. Br., nom. illeg., non *Festuca brevifolia* Muhl.; *Triplasis purpurea* (Walter) Chapm.)

North America, U.S. See *Catalogus Plantarum Americae Septentrionalis* 13. 1813, *Chloris Melvilliana* 31. 1823.

F. brevifolia Muhl. var. **utahensis** St.-Yves (*Festuca brachyphylla* var. *utahensis* (St.-Yves) Litard.)

North America, U.S., Colorado, Utah. Tufted, alpine, erect, small, sheaths glabrous or glabrescent, auricles present or absent, ligules ciliate, glumes unequal, ovary apex densely hairy or pubescent, see *Candollea* 2: 257. 1925 and *Candollea* 10: 108. 1945.

F. breviglumis Swallen (*Bromus cernuus* Swallen)

Costa Rica. See *Contributions from the United States National Herbarium* 29(9): 398. 1950, *Boletín de la Sociedad Botánica de México* 23: 26-28, f. 1. 1958 [1959].

F. brevipila R. Tracey (*Festuca brevipila* Tracey; *Festuca duriuscula* auct. non L.; *Festuca longifolia* forma *villosa* (Schrad.) Dore, non *Festuca ovina* var. *villosa* Schrad.; *Festuca longifolia* auct. pl.; *Festuca ovina* var. *duriuscula* hort.; *Festuca ovina* L. subsp. *ovina* var. *duriuscula* Hack. subvar. *trachyphylla* Hack.; *Festuca ovina* subsp. *eu-ovina* var. *duriuscula* subvar. *trachyphylla* Hack.; *Festuca ovina* var. *duriuscula* auct. non (L.) Koch; *Festuca trachyphylla* (Hack.) Krajina, nom. illeg.)

Europe, Eurasia. Densely tufted, bluish green, erect, open sheaths entire and persisting, auricles present, ligules ciliate, leaf blades plicate, ovary apex glabrous, cultivated crop, ornamental, used as ground cover and for land stabilization, disturbed areas, lawn grass, turf, naturalized elsewhere, see *Monographia Festucarum Europaeum* 91. 1882 and *Acta Botanica Bohemica* 9: 190, t. 2, f. 5-6. 1930, *Plant Systematics and Evolution* 128(3-4): 287. 1977, *Bot. J. Linn. Soc.* 106: 393. 1991, *Phytologia* 82: 73-78. 1997, *Watsonia* 17: 293. 1998.

in English: hard fescue, sheep fescue

F. brevissima Jurtzev (*Festuca brachyphylla* subsp. *coloradensis* Fred.; *Festuca brachyphylla* var. *brevissima* (Jurtzev) Kosh.; *Festuca brevissima* f. *pallida* (Holmen) Frederiksen; *Festuca ovina* subsp. *alaskana* Holmen, pro parte; *Festuca ovina* subsp. *alaskana* f. *pallida* Holmen; *Festuca ovina* var. *alaskana* (Holmen) Welsh; *Festuca ovina* var. *alaskensis* Holmen)

Northern America, U.S., Canada, Alaska, Yukon Territory, Russia. Densely tufted, sheaths glabrous and entire, auricles present, ligules ciliate, open panicle with spreading branches, rare species, grows on rocky tundra, see *Species Plantarum* 1: 73-74. 1753, *Mantissa* 3 (Add. 1): 646. 1827 and *Botaniska Notiser* 117(2): 114. Lund 1964.

in English: Alaska fescue

F. brigantina (Markgr.-Dann.) Markgr.-Dann. (*Festuca ovina* L. subsp. *brigantina* Markgr.-Dann.)

Portugal. Endangered species, see *Botanical Journal of the Linnean Society* 76(4): 328. 1978.

F. buchtienii Hack. (*Festuca dolichophylla* J. Presl; *Festuca humilior* Nees & Meyen; *Festuca scirpifolia* subsp. *buchtienii* (Hack.) St.-Yves)

Bolivia. Caespitose, erect, leaf blades involute and rigid, lax panicle oblong or linear-oblong with scabrous branches, spikelets elliptic-lanceolate, 4-5-flowered, glumes linear-lanceolate, lemmas lanceolate acute mucronate, see *Reliquiae Haenkeanae* 1(4-5): 258. 1830, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 403. 1833, *Gramineae* 35. 1841, *Nova Acta Phys.-Med. Turkey, Asia, Greece. Bunchgrass, on black soil, see *Candollea* 3: 347. 1928, *Repertorium Specierum Novarum Regni Vegetabilis, Beihefte* 30(3): 278. 1932.

F. calligera (Piper) Rydberg (*Festuca amethystina* var. *asperrima* Hack. ex Beal; *Festuca ovina* subsp. *calligera* Piper)

Northern America, southwestern U.S., New Mexico, Arizona. Perennial bunchgrass, green or glaucous, vigorous, many-stemmed, densely tufted, erect, strongly rooted, sheaths glabrous or hairy, auricles present, leaves mostly basal hard and wiry, inflorescence usually rather open with ascending side branches, erect and slender flower stalks, glumes unequal, forage, moderately palatable, highly nutritious seed heads, not particularly shade tolerant, found in dry habitats, open areas, see *Species Plantarum* 1: 73-74. 1753, *Grasses of North America for Farmers and Students*

2: 601. 1896 and *Contributions from the United States National Herbarium* 10(1): 27. 1906, *Bulletin of the Torrey Botanical Club* 36: 537. 1909.

in English: southwest fescue, western sheep fescue

F. callosa (Piper) St. Yves (*Festuca ovina* subsp. *callosa* Piper)

America, Mexico. Fodder, see *Species Plantarum* 1: 73-74. 1753 and *Contributions from the United States National Herbarium* 17(3): 379. 1913, *Candollea* 2: 291. 1925.

in Mexico: zacate

F. campestris Rydb. (*Festuca altaica* subsp. *scabrella* (Torr.) Hultén; *Festuca altaica* Trin. var. *major* (Vasey) Gleason; *Festuca altaica* var. *scabrella* (Torr.) Breitung; *Festuca doreana* Looman; *Festuca scabrella* var. *major* Vasey)

North America, U.S. Perennial bunchgrass, densely tufted, glaucous to bluish, erect, short rhizomes present or absent, both living and dead leaf sheaths at the base, sheaths glabrous or glabrescent, ligules ciliate, erect and stiff leaves, stiff inflorescence branches, bluish green inflorescences, glumes smooth or slightly rough, lemma rough, forage, palatable, common on prairies, forest openings, dry habitats, in dry-to-moist meadows, montane and subalpine zones, see *Flora Altaica* 1: 109-110. 1829, *Flora Boreali-Americana* 2: 252, t. 233. 1840, *Contributions from the United States National Herbarium* 1(8): 278-279. 1893 and *Memoirs of the New York Botanical Garden* 1: 57. 1900, *Phytologia* 4(1): 21. 1952, *American Midland Naturalist* 58: 12. 1957, *Budd's Flora of the Canadian Prairie Provinces*. Canadian Government Publish Centre. 128. 1979.

in English: rough fescue, prairie fescue, mountain rough fescue, foothills rough fescue, buffalo bunchgrass

F. camusiana St.-Yves (*Bromus dissitiflorus* Baker; *Festuca dissitiflora* Steud. ex Griseb.; *Festuca saximontana* Rydb.)

Madagascar. Related to *Festuca chodatiana* (St.-Yves) E.B. Alexeev, see *Abhandlungen der Königlichen Gesellschaft der Wissenschaften zu Göttingen* 24: 287. 1879, *Journal of the Linnean Society, Botany* 20: 301. 1883 and *Bulletin de la Société Botanique de Genève* 18: 156. 1926.

F. canadensis E.B. Alexeev (*Festuca saximontana* Rydb.)

North America, Canada. On the sand dunes, considered to be synonymous with *Festuca saximontana* Rydb., see *Bulletin of the Torrey Botanical Club* 36: 536. 1909.

F. cappadocica (Hackel) Markgr.-Dann.

Turkey. Rare species, see *Willdenowia* 11(2): 207. 1981.

F. caprina Nees (*Festuca nubigena* Jungh. subsp. *caprina* (Nees) St.-Yves)

Tropical Africa, Malawi, Tanzania, South Africa. Perennial, variable, tufted to densely tufted, clump-forming, rhizomatous, ligule a short unfringed membrane, leaves filiform, old sheaths persisting as fibers, inflorescence open loose

panicle, lemmas awned, probably highly palatable, unknown grazing value, used for making ropes, common in moist areas, wet places, slopes, vleis, open meadows, moist mountain grassveld, high altitude, near stream, on stream bank in dry soil, around rock outcrop, see *Florae Africae Australioris Illustrationes Monographicae* 443. 1841.

in English: goat-bearded grass, goat-beard grass

in South Africa: bokbaardgras, letsiri, letswiri

Peru. See *Reliquiae Haenkeanae* 1(4-5): 259. 1830 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 37: 509. 1906.

F. contracta Kirk (*Festuca erecta* d'Urv., nom. illeg., non *Festuca erecta* (Huds.) Wallr.; *Festuca paludicola* Roiv.)

Antarctic, southern America, Chile, Argentina, Falkland Islands. Perennial, tufted, tussocky, glaucous, nodes hidden, leaf sheath glabrous, narrow panicle compact and spike-like, inflorescence branches stiff and erect, spikelets closely packed, cleistogamous, glumes more or less equal, lemma prickly, lodicules lobed, purple anthers, ovary apex glabrous, found in rocky areas, see *Transactions and Proceedings of the New Zealand Institute* 27: 353. 1895 and *Annales Botanici Societatis Zoologicae-Botanicæ Fennicæ "Vanamo"* 28: 200. Helsinki 1954, *New Zealand J. Bot.* 36: 471-476. 1998.

F. copei Renvoize

Bolivia. Caespitose, leaf blades scabrous, lax panicle oblong with flexuous branches, spikelets closely packed, 4- to 7-flowered, glumes lanceolate or subulate, lemmas

lanceolate, palea keels scabrous, ovary glabrous, rocky slopes, see *Gramíneas de Bolivia* 117. 1998.

F. coromotensis B. Briceño

Venezuela, Laguna de Coromoto. See *Ernstia* 4(3-4): 76-77, f. 5-6. 1994.

F. costata Nees

South Africa. Perennial, variable, forming clumps, erect, rhizomatous, tough, short or long rhizomes, old sheaths persisting as coarse fibers, leaves inrolled, inflorescence open panicle, spikelets 3- to 7-flowered, lemma acute or awned, common in moist areas, wet places, vleis, mountain grassveld, high altitude, see *Florae Africae Australioris Illustrationes Monographicae* 447. 1841.

in English: tussock fescue

in South Africa: polswenkgras

Europe. See *Lejeunia* 89: 22. 1977, *Botanical Journal of the Linnean Society* 76(4): 327. 1978.

F. coxii (Petrie) Hack. (*Agropyron coxii* Petrie; *Agropyron coxii* Petrie)

New Zealand. Tufted, tussocky, tall, many-leaved shoots, sometimes geniculate, sometimes rooting at nodes, culms included by leaf blades, ligule ciliate, compact and short inflorescence paniculate, spikelets shortly pedicelled and imbricate, florets long-awned, chasmogamous, glumes unequal, lodicules hairy, ovary hispid, coastal, seaside rocks, cliffs, see *Transactions and Proceedings of the New Zealand Institute* 34: 395. 1902, *Manual of the New Zealand Flora* 919. 1906, *New Zealand J. Bot.* 36: 339. 1998.

F. cratericola Markgr.-Dann.

Turkey. Rare species, see *Willdenowia* 11(2): 203. 1981.

F. cretacea T. Pop. & Proskor. (*Festuca cretacea* (Lavr.) Czern. ex Krecz. & Bobrov; *Festuca issatchenkoi* St.-Yves; *Festuca rubra* subsp. *cretacea* Lavr.; *Festuca rubra* L. subsp. *rubra* var. *cretacea* Lavrenko)

Europe, Russia. Useful for erosion control, see *Candollea* 5: 134. 1932.

F. cryptantha T. Cope

Yemen. Perennial, densely tufted, erect, leaves convolute and filiform often curved, linear panicle spike-like, spikelets sessile on the axis, glumes longer than the spikelet, lowest lemma shortly awned, common on cliff ledges, see *Kew Bulletin* 39(4): 834. 1984.

F. cumminsii Stapf (*Festuca rubra* L. subsp. *schlagintweitii* St.-Yves) (for the German travelers, explorers and plant

collectors Adolf von Schlagintweit (1829-1857) and his brother Hermann Alfred Rudolph von Schlagintweit-Sakünlinski (1826-1882); see J.H. (Peru, Cajamarca; Peru, Ancash, Cordillera Negra, Caraz)

Southern America, Peru, Bolivia. Perennial bunchgrass, tufted, forming dense and large clumps, erect to prostrate, leaf blades filiform, narrow panicles linear, spikelets elliptic-oblong, 4- to 7-flowered, florets purplish to brown to pinkish, glumes lanceolate, lemmas lanceolate acuminate, palea keels scabrous, ovary glabrous, palatable, growing in mountain meadow, in boggy spots, in sheltered arroyos, among rocks, in moist areas, grasslands, scrubs, dry roadsides, pasture, in moist quebrada, hillsides, see *Prodromus Systematis Naturalis Regni Vegetabilis* 1: 163. 1815 [1816], *Reliquiae Haenkeanae* 1(4-5): 258, 261. 1830, *Abhandlungen der Königlichen Gesellschaft der Wissenschaften zu Göttingen* 19: 203. 1874 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 37: 508, 510-516. 1906, *Repertorium Specierum Novarum*

Regni Vegetabilis 6: 160. 1908, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 49: 188. 1913, *Candollea* 3: 220, 222, 224-225, 232, 239. 1927.

in Bolivia: chillagua, paja churca

F. donax Lowe

Portugal, Madeira. Vulnerable species, see *Transactions of the Cambridge Philosophical Society* 4: 9. 1831.

F. dracomontana Linder

South Africa. Perennial, rare, rhizomatous, inflorescence open panicle, spikelets 3- to 7-flowered, lemmas awned, found in high mountains, sour grassveld, see *Bothalia* 16(1): 59. 1986.

F. drymeja Mert. & W.D.J. Koch (*Drymochloa drymeja* (Mert. & W.D.J. Koch) Holub; *Festuca exaltata* C. Presl; *Festuca montana* M. Bieb., nom. illeg., non *Festuca montana* Savi; *Poa bakuensis* Litv. ex Rosh.; *Poa drymeja* (Mert. & W.D.J. Koch) Heynh.)

Asia, Armenia, Iran, Europe. Useful for erosion control, see *Flora Taurico-Caucasica* 3: 75. 1819 and *Folia Geobotanica et Phytotaxonomica* 19(1): 99. 1984.

F. durandoi Clauson (also spelled *durandii*) (*Festuca spadicica* subsp. *durandoi* (Clauson) Jahand. & Maire)

Europe, Spain, Algeria, Morocco. See *Fontqueria* 48: 82. 1997.

F. durandoi Clauson subsp. *capillifolia* (Pau ex Willk.) Rivas Ponce, Cebolla & M.B. Crespo (*Festuca spadicica* var. *capillifolia* Pau ex Willk.)

Spain. Rare species, see *Prodromus Florae Hispanicae*, Suppl. 26. 1893 and *Fontqueria* 31: 256. 1991.

F. duriotagana Franco & Rocha Afonso

Portugal. Vulnerable species, see *Boletim da Sociedade Brotariana*, ser. 2 54: 91. 1980 [1981].

in Morocco: gousmir

in Colombia: cañuela alta

F. elegans Boiss. (*Festuca merinoi* Pau)

Europe, Spain. Useful for erosion control, see *Elenchus Plantarum Novarum* 92. 1838 and *Botanical Journal of the Linnean Society* 146: 331-337. 2004.

F. elmeri Scribn. & Merr. (*Festuca elmeri* subsp. *elmeri*; *Festuca elmeri* subsp. *luxurians* Piper; *Festuca elmeri* var. *conferta* (Hack. ex Beal) A.S. Hitchc.; *Festuca howellii* Hack. ex Beal; *Festuca jonesii* Vasey var. *conferta* Hack. ex Beal; *Festuca viridula* var. *howellii* (Hack. ex Beal) St.-Yves) (for the American botanist Adolph Daniel Edward Elmer, 1870-1942, plant collector in Borneo, California, Washington and in the Philippines; see Elmer Drew Merrill, *Plantae Elmerianae Borneenses*. Berkeley 1929; J. Lanjouw and F.A. Stafleu, *Index Herbariorum*. Part II (2), *Collectors E-H*. Regnum Vegetabile vol. 9. 1957) (*Festuca jonesii* Vasey dedicated to the American plant collector Marcus Eugene Jones, 1852-1934, botanist, explorer, mining engineer, Latinist, botanized in Texas and Colorado, collected widely in the Intermountain West. See J.H. Barnhart, *Biographical notes upon botanists*. 2: 262. Boston 1965; S. Lenley et al., *Catalog of the manuscript and archival collections and index to the correspondence of John Torrey*. 246. 1973; Ignatz Urban, *Geschichte des Königlichen Botanischen Museums zu Berlin-Dahlem (1815-1913). Nebst Aufzählung seiner Sammlungen*. 277, 361. 1916; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. Philadelphia 1964; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993)

Northern America, northwestern and southwestern U.S., California, Oregon. Perennial, tufted, sheaths glabrous and open, ligules ciliate, auricles absent, open panicle, spikelets loosely scattered, glumes unequal, lemma hispid, ovary apex pubescent, see *Contributions from the United States National Herbarium* 1(8): 278. 1893, *U.S. Department of Agriculture. Division of Botany. Bulletin* 13(2): t. 93. 1893, *Grasses of North America* (edition 2) 2: 591, 593. 1896 and *Bulletin of the Torrey Botanical Club* 29(7): 468. 1902, *Contributions from the United States National Herbarium* 10(1): 38. 1906, *Candollea* 2: 266. 1925, *American Journal of Botany* 21(3): 128. 1934, *Phytologia* 82(2): 76. 1997.

in English: coast fescue, coast range fescue, Elmer fescue

F. elviae B. Briceño

Venezuela. Páramos, see *Ernstia* 4(3-4): 77-78, f. 2-4. 1994.

F. engleri Pilg. (*Pseudobromus engleri* (Pilg.) Clayton)

Kenya to Malawi. Lemmas scaberulous, ovary apex hairy, similar to *Festuca mekiste* W.D. Clayton, see *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 40: 85. 1907, *Kew Bulletin* 23: 293. 1969.

F. eriopoda Vickery (*Austrofestuca eriopoda* (Vickery) S.W.L. Jacobs; *Festucella eriopoda* (Vickery) E.B. Alexeev)

Australia, New South Wales, Victoria. Perennial, slender and erect, greenish, forming dense tussocks, leaves rough

and linear, panicle slender and open, decorative, moist soils, forage grass, see *Contributions from the New South Wales National Herbarium* 1: 10. 1939 and *Telopea* 3(4): 602. 1990.

in English: lanky fescue, snow fescue

F. eriostoma Hack. (*Festuca orthophylla* var. *eriostoma* (Hack.) St.-Yves)

Argentina. Similar to *Festuca orthophylla*, see *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 25(5): 717. 1898 and *Österreichische Botanische Zeitschrift* 53: 32. 1903, *Candollea* 3: 195. 1927, *Bot. Zhurn.* 69: 348. 1984.

F. eskia Ramond ex DC. (*Festuca eskia* Lej.; *Festuca varia* Haenke subsp. *eskia* (Ramond ex DC.) Hack.; *Schedonorus eskia* (Ramond ex DC.) P. Beauv.)

Europe, Pyrénées, France, Spain. A calcifuge species, dense carpeting habit, stems flimsy, creeping rhizomes, leaves filiform and stiff, blades acute to pungent, pendent and ovoid panicles, spikelets narrowly ovate, lemmas acute and mucronate, useful for erosion control, rock garden, see *Essai d'une Nouvelle Agrostographie* 177. 1812 and *Botanical Journal of the Linnean Society* 146: 331-337. 2004.

F. extremiorientalis Ohwi (*Festuca subulata* subsp. *japonica* (Hack.) T. Koyama & Kawano; *Festuca subulata* var. *japonica* Hack.)

Asia, China, Japan, Siberia, Russia. Useful for erosion control, see *Bulletin de l'Herbier Boissier* 7(9): 713. 1899 and *Botanical Magazine* (Tokyo) 45: 194. 1931.

F. fiebrigii Pilg. (*Festuca procera* Kunth)

Bolivia. Caespitose, erect, pungent leaf blades filiform and involute, lax panicle oblong, lax spikelets elliptic, 4-8-flowered, glumes lanceolate or subulate, lemmas lanceolate, paleas scabrous, ovary glabrous, see *Nova Genera et Species Plantarum* (quarto ed.) 1: 154. 1815 [1816] and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 37: 510. 1906.

in English: hair fescue, fine-leaved sheep fescue, fine-leaf sheep fescue, sheep fescue, slender fescue

F. fimbriata Nees (*Festuca ampliflora* Döll)

Central and southern Brazil. Lemmas awnless, found in swampy places, see *Flora Brasiliensis seu Enumeratio Plantarum* 2(1): 472-473. 1829, *Flora Brasiliensis* 2(3): 116, pl. 34. 1878 and *Bot. Zhurn. (Moscow & Leningrad)* 69: 348. 1984, *Parodiana* 7: 91-99. 1992.

F. flacca Hack. ex E.B. Alexeev (*Festuca flacca* Hack. ex Sodiro; *Festuca subulata* var. *fraseriana* St.-Yves)

Ecuador. See *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 2(2): 173. 1832, *Anales de la Universidad Central del Ecuador* 3(25): 483. 1889 and *Candollea* 3: 451. 1928, *Bot. Zhurn. (Moscow & Leningrad)* 69(11): 1543. 1984.

F. fragilis (Luce) B. Briceño (*Festuca fragilis* Luce; *Helleria fragilis* Luce; *Hellerochloa fragilis* (Luce) Rauschert)

South America. See *Journal of the Washington Academy of Sciences* 32(6): 157, f. 1. 1942, *Taxon* 31(3): 561. 1982, *Ernstia* 4(3-4): 78-79, f. 1a. 1994.

F. frederikseniae E.B. Alexeev (*Festuca duriuscula* var. *hirsuta* Lange, nom. illeg., non *Festuca duriuscula* var. *hirsuta* (Host) Gaudin; *Festuca ovina* var. *hirsuta* Lange, nom. illeg., non *Festuca ovina* var. *hirsuta* Link; *Festuca vivipara* (L.) Sm.; *Festuca vivipara* subsp. *hirsuta* Frederiksen; *Festuca vivipara* subsp. *hirsuta* (Schol.) Fred.; *Festuca vivipara* var. *hirsuta* Schol.)

North America, Canada, Europe, Greenland. Densely tufted, glaucous or greenish blue, erect, conspicuous and persisting sheaths glabrescent or hairy, auricles present, ligules ciliate, vegetatively proliferating inflorescences, glumes unequal, ovary apex glabrous, pioneer grass, arctic or cold coastal habitats, see *Species Plantarum* 1: 73-74.

1753, *Flora Britannica* 1: 114. 1800, *Conspectus Florae Groenlandicae* 1: 179-180. 1880 and *Nordic J. Bot.* 1(3): 287-288. 1981.

F. frigida (Hack.) K. Richt. (*Festuca buschiana* (St.-Yves) Tzvelev; *Festuca frigida* Hack.; *Festuca frigida* (Hackel) Grossh.; *Festuca rubra* subsp. *buschiana* St.-Yves)

Spain. Rare species, see *Botanisches Centralblatt* 8: 406. 1881.

F. gautieri (Hackel) K. Richt. (*Festuca crinum-ursi* hort., non Rum.; *Festuca gautieri* subsp. *scoparia* (Kerner & Hackel) Kerguelen; *Festuca scoparia* A. Kerner ex Nyman non Hook.f.; *Festuca varia* subsp. *scoparia* Kerner & Hackel; *Festuca varia* var. *gautieri* Hack.)

Europe, northeastern Spain, southwestern France. Leaves pungent and curved, dense panicle, spikelets yellow-green, upper glume ovate-lanceolate and short-acuminate, lemma lanceolate and acuminate, mucronate or unawned, see *Plantae Europaeae* 1: 105. 1890 and *Lejeunia* 110: 58. 1983, *Botanical Journal of the Linnean Society* 146: 331-337. 2004.

F. gigantea (L.) Vill. (*Bromus giganteus* L.; *Festuca bonasorum* Bornm.; *Festuca gigantea* Krock.; *Festuca pseudogigantea* Ovcz. & Shibkova; *Forasaccus giganteus* (L.) Europe, West and Central Asia, North Africa, India, Himachal Pradesh, Jammu and Kashmir, Meghalaya, Uttar Pradesh, Bhutan, Nepal. Perennial bunchgrass, stems tufted, erect, bright green to deep green, sheaths open, auricles present, ligules very short and without cilia, leaves glabrous and linear, blades flat and acute, loose and nodding panicles lanceolate to ovate, glumes unequal, lemmas awned, awn bent, ovary apex glabrous, fodder, tolerant of shade, dry sites or wet soils, see *Species Plantarum* 1: 77. 1753, *Index Kewensis* 2: 1249. 1895, *The Flora of British India* 7: 280. 1896 and *Brittonia* 5: 431. 1945, *Novon* 3: 241. 1993, *Phytologia* 83: 86. 1997, *Preslia* 70: 113. 1998, *Bot. Zhurn. (Moscow & Leningrad)* 84: 114. 1999, *Taxon* 49(2): 248. 2000.

in English: giant fescue

F. gilbertiana E.B. Alexeev ex S.M. Phillips

Ethiopia. Perennial, erect, densely tussocky, wiry, leaf blades smooth and filiform, panicle few-spiculate and racemose, spikelets narrowly oblong, 3- to 4-flowered, glumes unequal and acute, lemmas narrowly lanceolate-oblong awned, ovary apex hairy, montane grassland, see *Nordic Journal of Botany* 14(6): 649, f. 1. 1994, *Flora of Ethiopia* 7: 27. 1995.

F. glabrata Tovar

Peru. See *Memorias del Museo de Historia Natural "Javier Prado"* 16: 30, t. 6A. 1972.

F. glacialis Miégev.

Europe, Pyrénées, Alps. Dense tussocks, stems flimsy, old leaf sheaths at the base, gray-green leaves filiform and obtuse, narrow and branched panicles, spikelets solitary, lemmas acute not awned or mucronate, see *Bulletin de la Société Botanique de France* 21: 9. 1874.

F. glauca Vill. (*Festuca arvensis* Augier, Kerguelen & Markgr.; *Festuca cinerea* var. *glauca* Stohr; *Festuca glauca* auct.; *Festuca glauca* Plan. ex Willk. & Lange, nom. illeg., non *Festuca glauca* Vill.; *Festuca glauca* Lam., nom. illeg., non *Festuca glauca* Vill.; *Festuca glaucantha* (Hack.) Blocki; *Festuca ovina* proles. *glauca* (Vill.) Douin; *Festuca ovina* subsp. *glauca* (Lam.) Hack. ex Hegi; *Festuca ovina* subvar. *glauca* (Lam.) G. Mey., nom. illeg., non *Festuca ovina* var. *glauca* Fries; *Festuca ovina* L. var. *glauca* (Vill.) Hackel; *Festuca ovina* var. *glauca* (Lam.) Kozłowska, nom. illeg., non *Festuca ovina* var. *glauca* Fries; *Festuca ovina* var. *glauca* (Vill.) W.D.J. Koch, nom. illeg., non *Festuca ovina* var. *glauca* Fries)

Europe, France. Perennial, stems upright and flimsy, densely tufted, blue-green leaves glabrous and glaucous, rigid blades filiform and obtuse, erect and obovate panicles, spikelets elliptic to oblong, lemmas with a short spine at apex, awn bent, ornamental, cultivated, often confused with *Festuca cinerea* Vill., see *Species Plantarum* 1: 73-74. 1753, *Encyclopédie Méthodique, Botanique* 2: 459. 1788, *Synopsis Florae Germanicae et Helveticae* 812. 1837, *Prodromus Florae Hispanicae* 1: 95. 1861, *Botanisches Centralblatt* 8: 405. 1881, *Österreichische Botanische Zeitschrift* 39: 155. 1889 and *Lejeunia*, n.s., 89: 1-92. 1977, *Bot. J. Linn. Soc.* 106: 390-393. 1991.

in English: blue fescue, grey fescue, gray fescue

F. glumosa Hack. ex E.B. Alexeev (*Festuca glumosa* Hack. ex Sodiro; *Festuca ovina* subvar. *jamesonii* St.-Yves)

Ecuador, Andes. See *Anales de la Universidad Central del Ecuador* 3(25): 483. 1889 and *Candollea* 3: 166. 1927, *Bot. Zhurn. (Moscow & Leningrad)* 69(11): 1549. 1984.

F. glyceriantha Pilg. (*Festuca scirpifolia* subsp. *glyceriantha* (Pilg.) St.-Yves)

Peru. See *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 403. 1833 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 37: 516. 1906, *Candollea* 3: 231. 1927.

F. macrophylla Hochst. ex A. Rich. (*Festuca nubigena* var. *macrophylla* (Hochst. ex A. Rich.) St.-Yves)

Ethiopia. Perennial, erect, wiry, densely tussocky, stiff leaf blades filiform to acicular, narrow panicle many-spiculate with short branches ascending, spikelets wedge-shaped, 3- to 5-flowered, glumes unequal, lower glume acuminate-aristate, upper glume narrowly lanceolate-oblong, lemmas narrowly lanceolate-oblong and awned, ovary apex hairy, montane grassland, closely related to *Festuca obturbans* St.-Yves, see *Tentamen Florae Abyssinicae* ... 2: 434. 1850 and *Revue Bretonne de Botanique Pure et Appliquée* 2: 79. 1927, *Flora of Ethiopia* 7: 25-27. 1955.

F. madida Connor

New Zealand. Tufted, tussocky, slender, smooth, forming clumps, nodes hidden, long-auricled, leaf sheath glabrous, flowers cleistogamous, short inflorescences, glumes unequal and keeled, palea shortly bifid, lodicules lobed, ovary apex hispid, boggy spots, alpine and subalpine, mountains, wet sites, shrubs, see *New Zealand Journal of Botany* 36(3): 345, 471-476. 1998.

F. magellanica Lam. (*Festuca hystricola* (Hack.) E.B. Alexeev; *Festuca ovina* subsp. *hystricola* Hack.; *Festuca ovina* subsp. *magellanica* (Lam.) St.-Yves; *Festuca ovina* subvar. *dusenii* St.-Yves; *Festuca ovina* subvar. *eulamarkiana* St.-Yves; *Festuca ovina* var. *antarctica* Hack.; *Festuca ovina* var. *hystricola* Hack.; *Festuca ovina* var. *lamarckiana* St.-Yves; *Festuca ovina* var. *magellanica* (Lam.) Hack.; *Festuca ovina* var. *wilczekii* St.-Yves; *Festuca pyrogea* Speg.) (Straits of Magellan)

South America, Argentina, Chile. Perennial, dark blue to green, growing in open sites, see *Species Plantarum* 1: 73-74. 1753, *Encyclopédie Méthodique, Botanique* 2: 461. 1788, *Anales del Museo Nacional de Buenos Aires* 5: 97. 1896 and *Candollea* 3: 163, 168. 1927.

F. magensiana Potztal

Chile. See *Willdenowia* 2(2): 166. 1959.

F. magniflora E.B. Alexeev (*Festuca grandiflora* Steud.; *Festuca pallescens* var. *grandiflora* Parodi)

Argentina. See *Synopsis Plantarum Glumacearum* 1: 311. 1854 and *Revista Argentina de Botánica* 20(4): 211. 1953, *Bot. Zhurn. (Moscow & Leningrad)* 69: 351. 1984.

F. mairei St.-Yves (*Festuca mairei* Hack. ex Hand.-Mazz., nom. illeg., non *Festuca mairei* St.-Yves) (for the French botanist René Charles Joseph Ernest Maire, 1878-1949, professor of botany in Algeria, physician, mycologist, an authority on N. African flora; see J.H. Barnhart, *Biographical notes upon botanists*. 2: 438. Boston 1965; Louis Emberger (1897-1969) and René Maire, *Catalogue des plantes du Maroc, spermatophytes et ptéridophytes*. 1941; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 249. 1972; Frans A. Stafleu and Richard S. Cowan, *Taxonomic literature*. 3: 257-260. 1981; S. Lenley et al., *Catalog of the manuscript and archival collections and index to the correspondence of John Torrey*. Stafleu, *Index Herbariorum*. Part II (2), *Collectors E-H*. *Regnum Vegetabile* vol. 9. 1957; I. Urban, *Geschichte des Königlichen Botanischen Museums zu Berlin-Dahlem (1815-1913). Nebst Aufzählung seiner Sammlungen*. Dresden 1916; F.N. Hepper and F. Neate, *Plant Collectors in West Africa*. 53. 1971; A. White and B.L. Sloane, *The Stapelieae*. Pasadena 1937)

Morocco, Algeria. Perennial, gray-green, erect, clump-forming, leaves semirigid, panicles slender and sparsely branched, useful for erosion control, see *Candollea* 1: 45. 1922, *Fontqueria* 48: 81-82. 1997.

in English: Atlas fescue

F. matthewsii (Hack.) Cheeseman (*Festuca matthewsii* (Hack.) St.-Yves, nom. illeg., non *Festuca matthewsii* (Hack.) Cheeseman; *Festuca ovina* subsp. *matthewsii* Hack.; *Festuca ovina* var. *matthewsii* (Hack.) Cheeseman; *Festuca petriei* Howarth; *Festuca petriei* f. *petriei*)

New Zealand. Tussocky, glaucous, leaf blades persisting on sheath, lemmas glabrous, lodicules hairy, ovary apex hispid, in grasslands, see *Species Plantarum* 1: 73-74. 1753 and *Transactions and Proceedings of the New Zealand Institute* 35: 385. 1903, *Manual of the New Zealand Flora* 918. 1906, *Manual of the New Zealand Flora* 205. 1925, *Revue Bretonne de Botanique Pure et Appliquée* 2: 19, 53. 1927, *Journal of the Linnean Society London* 48: 68. 1928, *New Zealand J. Bot.* 36: 347. 1998.

F. matthewsii (Hack.) Cheeseman subsp. *aquilonia* Connor
New Zealand. Scabrous to scabrid, glaucous, culm internodes prickly, scabrid leaves, inflorescence wide-angled, rachis prickly, awned spikelets, glumes unequal and keeled, palea apex deeply bifid, ovary apex hispid, in grassland, see

Manual of the New Zealand Flora 205. 1925, *New Zealand Journal of Botany* 36(3): 351. 1998.

F. matthewsii (Hack.) Cheeseman subsp. *latifundii* Connor
New Zealand. Tall, glaucous, tussocky, scabrid to rough leaves, leaf sheath glabrous, panicle erect, glumes unequal, lemma keeled, palea bifid, ovary apex hispid, on hillsides, plains, grassland, see *New Zealand Journal of Botany* 36(3): 352. 1998.

F. matthewsii (Hack.) Cheeseman subsp. *matthewsii*
New Zealand. Tufted or shortly stoloniferous, culm internodes glabrous, leaf sheath keeled, leaf blades thick, awned florets, glumes unequal and keeled, palea acute and deeply bifid, lodicules often lobed, ovary apex hispid, in grassland, see *Manual of the New Zealand Flora* 205. 1925.

F. matthewsii (Hack.) Cheeseman subsp. *pisamontis* Connor (Mt. Pisa)

New Zealand. Erect, slender, leaf blades thin, culm internodes glabrous or prickly, loosely branched inflorescence, florets conspicuously awned, glumes unequal, palea acute, lodicules lobed, ovary apex hispid, see *Manual of the New Zealand Flora* 205. 1925, *New Zealand Journal of Botany* 36(3): 354. 1998.

F. mekiste W.D. Clayton

Kenya. Perennial, robust, stout, leaf blades broadly linear, open inflorescence, panicle narrowly ovate with flexuous branches, spikelets linear-oblong, 4- to 5-flowered, florets loosely imbricate, glumes narrowly lanceolate acuminate, lemmas narrowly elliptic-oblong and awned, ovary glabrous, woodland, upland forest, similar to *Festuca engleri*, see *Kew Bulletin* 23: 293. 1969.

F. meyenii (St.-Yves) E.B. Alexeev (*Festuca orthophylla* var. *meyenii* St.-Yves)

South America. See *Candollea* 3: 198. 1927, *Bot. Zhurn. (Moscow & Leningrad)* 69: 348. 1984.

F. minutiflora Rydberg (*Festuca brachyphylla* var. *endotera* (St.-Yves) Litard.; *Festuca brevifolia* var. *endotera* St.-Yves; *Festuca brevifolia* var. *utahensis* St.-Yves; *Festuca ovina* var. *minutiflora* (Rydb.) J.T. Howell)

North America, southwestern and south central U.S., Canada. Perennial, loosely to densely tufted, green, erect, delicate, smooth stem, sheaths entire and glabrous, auricles present, ligules ciliate, leaf blades bristle-like, small and narrow flower head with short branchlets, glumes unequal, lemma pointed and rough, ovary apex pubescent, on dry sandy soils, dry stony slopes, in meadows, alpine zone, in subalpine openings, see *Species Plantarum* 1: 73-74. 1753 and *Bulletin of the Torrey Botanical Club* 32(11): 608-609. 1905, *Candollea* 2: 254, 257. 1925, *Candollea* 10: 108. 1945, *Leaflets of Western Botany* 6(7): 151. 1951.

in English: small-flower fescue, small-flowered fescue, smallflower fescue

F. monguensis Stancik

Colombia. Páramos, see *Darwiniana* 41(1-4): 139, f. 8a-e. 2003

Edinburgh

1970; Jonathan Wantrup, *Australian Rare Books, 1788-1900*. Hordern House, Sydney 1987)

Australia, New South Wales, Kosciuszko National Park, Victoria. Perennial, tufted, branched, slender and erect, forming coarse tussocks, auricles absent, ligule a membranous rim, leaves channeled and very rough to scabrous, green to purplish panicle nodding and loose, chasmogamous spikelets, uppermost floret often reduced, hermaphrodite florets 3-5(-7) per spikelet, glumes awnless, palea 2-keeled, 2 lodicules joined at the base, anthers yellow or purple, ovary glabrous, fruit compressed, grows in grassland and montane woodland, eucalypt woodlands, subalpine and subhumid woodlands, see *Contributions from the New South Wales National Herbarium* 1(1): 9. 1939.

in English: alpine fescue

F. multinodis Petrie & Hack.

New Zealand. Glaucous, open, densely caespitose, prostrate to ascending, scrambling, stoloniferous, many-noded stolons, leaf sheath ribbed, inflorescence structure variable, glumes unequal and keeled, lemma glaucous, palea acute and shortly bifid, lodicules lobed or bifid, ovary glabrous or hispid, coastal, found in rocky places, coastal cliffs, rocky slopes, shores, bluffs, see *Trans. and Proc. New Zealand Inst.* 44: 186. 1912, *New Zealand Journal of Botany* 6: 295-308. 1968, *New Zealand J. Bot.* 36: 355. 1998.

Circumboreal, Europe, northern temperate, Asia, North America. Perennial, very variable, bluish green to glaucous, slender, vigorous, herbaceous, loosely caespitose, loosely to densely tufted, stiff and erect stems from a curved base, hollow culms, usually long rhizomatous and creeping, slender rhizomes, leaves mostly basal, auricles absent or reduced, ligule a narrow rim, lower sheaths disintegrate into loose fibers, leaves pubescent and filiform, inflorescence a lax green to purple panicle with solitary branches, uppermost floret reduced, glumes unequal and awnless, upper glume lanceolate and acuminate, lemmas awned to awnless, awn variable, palea acute and 2-keeled, lodicules usually lobed, anthers yellow or purple, ovary glabrous or sometimes hispidat apex, fruit glabrous and furrowed, flowers chasmogamous, weed species naturalized elsewhere, lawn and pasture grass, cultivated fodder, may colonize disturbed areas, forming a turf, good ground cover, useful for erosion control and revegetation of high-altitude disturbed lands, can be used to revegetate burned lands, not shade tolerant, somewhat tolerant of salinity and resistant to salt sprays, tolerates spring flooding and some waterlogging, able to withstand some drought, usually found on dry to wet sites, wetland habitats, in damp areas, open habitats, in mountain meadows and clearings, on freshwater shores, on sand dunes, very close to the shores, hillsides, fields, in channel

banks on waterways, bogs, dry beaches, cliffs, abandoned roads, on disturbed sites and on disturbed subalpine sites, dry woods, roadsides, along highway and railway rights-of-way, highway slopes, waste ground, irrigation ditches, ballast, marshes, swamps and at the upper zone of tidal salt marshes, coastal headlands, includes many subspecies and many varieties, subspecies are considered to be species by some authors, see *Species Plantarum* 1: 73-74. 1753, *Observations sur les Graminées de la Flore Belgique* 106. 1823, *English Flora* 1: 139. 1824, *Flora Helvetica* 1: 287. 1828, *Synopsis Florae Germanicae et Helveticae* 812. 1837, *Die Flora der Schweiz* 93. 1840, *The American Botanist and Florist* 2: 399. 1871, *Botanical Gazette* 2(10): 126-127. 1877, *Botanisches Centralblatt* 8: 405. 1881, *Monographia Festucarum Europearum* 139. 1882, *The Student's Flora of the British Islands* edition 3. 497. 1884, *Botanical Exchange Club and Society of the British Isles* 1884: 119. 1885, *A Descriptive Catalogue of the Grasses of the United States* 85. 1885, *Proceedings of the American Academy of Arts and Sciences* 28: 123. 1893, *Grasses of North America for Farmers and Students* 2: 607. 1896 and *Memoirs of the New York Botanical Garden* 1: 57. 1900, *Synopsis der mitteleuropäischen Flora* 2: 299. 1900, *Bulletin of the Torrey Botanical Club* 32(11): 608. 1905, *Contributions from the United States National Herbarium* 10(1): 21-22. 1906, *Rhodora* 10: 65. 1908, *Bulletin de l'Académie Polonaise des Sciences: Classe 2e, sér. Asia, India, Armenia, Russia, Europe. See *Hort. Berol.* 2: 267. 1833 and *Novosti Sist. Vyssh. Rast.* 15: 58. 1979.

F. varia Haenke (*Avena varia* (Haenke) Raspail)

Europe, Alps. Leaves pungent, lax panicle, spikelets violet and glaucous, upper glume short-acuminate and broad-lanceolate to broad-ovate-lanceolate, awned, open meadows, moist to seasonally dry, subalpine meadow zones, see *Collectanea* 2: 94. 1788, *Annales des Sciences Naturelles* 5: 439. 1825.

F. varia Haenke subsp. *alpestris* (Roem. & Schult.) Hack.

Europe. See *Bot. Centralbl.* 8: 407. 1801, *Monographia Festucarum Europearum.* 1882.

F. varia Haenke subsp. *scoparia* A. Kern. & Hack. (*Festuca gautieri* subsp. *scoparia* (Kerner & Hackel) Kerguélen)

Europe. See *Lejeunia* 110: 58. 1983.

F. vasconcensis (Markgr.-Dann.) Auquier & Kerguélen (*Festuca ovina* L. subsp. *vasconcensis* Markgr.-Dann.)

Europe. See *Bulletin du Centre d'Etudes et de Recherches Scientifiques. Biarritz* 10(2): 321. 1974, *Bull. Soc. Bot. Fr.* 123(5-6): 320. 1976.

F. venezuelana Stancik

Venezuela. Páramos, see *Darwiniana* 41(1-4): 111-112, f. 15b-l. 2003.

F. ventanica Speg.

Argentina, Buenos Aires, Sierra Ventana. Rare species, see Carlos Luigi Spegazzini (1858-1926), *Contribucion al estudio de la flora de la Sierra de la Ventana ...* 72. La Plata 1896 and *Boletín de la Sociedad Argentina de Botánica* 25: 415-423. 1988.

F. venusta St.-Yves

Mongolia, Russia. Mountain steppe, poorly drained areas.

F. versuta Beal (*Festuca johnsonii* (Vasey) Piper; *Festuca nutans* var. *johnsonii* Vasey; *Festuca obtusa* subsp. *versuta* (Beal) St.-Yves; *Festuca texana* Vasey, nom. illeg., non *Festuca texana* Steud.)

North America, U.S. Perennial, contains endophytes, tufted, green or glaucous, slender, glabrous, erect, sheaths open, auricles present or absent, ligules without cilia, open panicle, ovary apex pubescent, spikelets loosely arranged, found in forest and woodland, moist shaded sites, see *Bulletin of the Torrey Botanical Club* 13(7): 119. 1886, *Contributions from the United States National Herbarium* 2(3): 548. 1894, *Grasses of North America for Farmers and Students* 2: 589. 1896 and *Contributions from the United States National Herbarium* 10: 35. 1906, *Candollea* 2: 280. 1925.

in English: Texas fescue

F. villipalea (St.-Yves) E.B. Alexeev (*Festuca dissitiflora* subsp. *loricata* var. *villipalea* St.-Yves)

Peru, Bolivia. Caespitose, erect, ligules ciliolate, leaf blades densely scabrous or shortly pubescent, lax panicles linear with scabrous branches, spikelets elliptic-oblong, 3- to 4-flowered, scabrous glumes lanceolate, lemmas lanceolate acuminate or mucronate, palea apex pubescent, ovary glabrous, see *Candollea* 3: 250. 1927, *Bot. Zhurn. (Moscow & Leningrad)* 70(9): 1244. 1985.

F. violacea Schleich. ex Gaudin (*Festuca rubra* subsp. *violacea* (Gaudin) Hack.; *Festuca rubra* var. *violacea* (Gaudin) Hack.; *Festuca violacea* Gaudin; *Schedonorus violaceus* (Gaudin) P. Beauv.)

Europe, Greece, Italy. Useful for erosion control, see *Species Plantarum* 1: 74. 1753, *Alpina* 3: 57. 1808, *Agrost. Helv.* 1: 231. 1811, *Essai d'une Nouvelle Agrostographie* 177. 1812, *Botanisches Centralblatt* 7(12): 406. 1881 and *Candollea* 52: 411. 1997, *Canad. J. Bot.* 77: 995. 1999.

F. violacea Schleich. ex Gaudin subsp. *handellii* Markgr.-Dann.

Europe, Greece. See *Veröffentlichungen des Geobotanischen Institutes Rübel in Zürich* 56: 139. 1976.

F. violacea Schleich. ex Gaudin subsp. *macrathera* (Hack.) Markgr.-Dann. (*Festuca macrathera* (Hack.) Pignatti & Markgr.-Dann.; *Festuca violacea* f. *macrathera* (Hack.) Hayek; *Festuca violacea* subsp. *macrathera* (Hack.) Europe, Italy. See *Alpina* 3: 57. 1808, *Annalen des K. K. Naturhistorischen Hofmuseums* 2: 45. Vienna 1887 and *Repertorium Specierum Novarum Regni Vegetabilis, Beihefte* 30(3): 283. 1933, *Botanical Journal of the Linnean Society* 76(4): 326. 1978, *Flora Analytica d'Italia* 3: 493. 1982.

F. violacea Schleich. ex Gaudin subsp. *violacea*

Europe, France. See *Alpina* 3: 57. 1808.

F. viridula Vasey (*Festuca howellii* Hack. ex Beal; *Festuca viridula* var. *howellii* (Hack. ex Beal) St.-Yves; *Festuca viridula* var. *vaseyana* St.-Yves; *Festuca viridula* var. *viridula*; *Gnomonia viridula* (Vasey) Lunell)

North America, northwestern and southwestern U.S., Canada. Perennial, green, erect, densely tufted, small clumps forming, shortly rhizomatous, dead sheaths do not remain around the base of the plants, open sheaths entire and glabrous, auricles present, ligules ciliate, flower head open to somewhat contracted, glumes unequal and distinctly keeled, lemmas keeled, awnless or awned, ovary apex densely pubescent, forage, palatable, common in dry habitats, dry

slopes, subalpine or alpine meadows, see *U.S. Department of Agriculture. Division of Botany. Bulletin* 13(2): t. 93. 1893, *Contr. U.S. Natl. Herb.* 1: 279. 1893, *Grasses of North America for Farmers and Students* 2: 591. 1896 and *American Midland Naturalist* 4: 224. 1915, *Candollea* 2: 265-266. 1925.

in English: green fescue, green-leaf fescue, mountain bunchgrass, mountain bunchfescue

F. vivipara (L.) Sm. (*Festuca frederikseniae* E.B. Alexeev; *Festuca ovina* f. *vivipara* (L.) St.-Yves; *Festuca ovina* L. subsp. *ovina* var. *vivipara* L.; *Festuca ovina* subvar. *vivipara* (L.) Hack.; *Festuca ovina* var. *vivipara* L.; *Festuca supina* auct. non Schur.; *Festuca supina* subsp. *vivipara* (L.) Richt.; *Festuca tenuifolia* var. *vivipara* (L.) Ducommun; *Festuca vivipara* auct. non (L.) Sm.; *Festuca vivipara* (L.) Sm. subsp. *glabra* Frederiksen; *Festuca vivipara* subsp. *vivipara*; *Festuca vivipara* var. *vivipara*; *Festuca viviparoides* Krajina ex Pavlick)

North Europe, Russia, North America. Perennial, spikelets producing small plantlets, waterside of lakes and streams, see *Species Plantarum* 1: 73-74. 1753, *Flora Suecica, Editio Secunda Aucta et Emendata* 31. 1755, *Flora Britannica* 1: 114. 1800, *Monographia Festucarum Europearum* 89. 1882 and *Candollea* 2: 244. 1925, *Canadian Journal of Botany* 62: 2454. 1984, *Novosti Sist. Vyss. Rast.* 22: 28. 1985, *Symbolae Botanicae Upsaliensis* 27: 155-167. 1986, *Watsonia* 16: 301. 1987, *Bot. J. Linn. Soc.* 106: 371. 1991.

in English: northern fescue

F. viviparoides Krajina ex Pavlick (*Festuca brachyphylla* f. *vivipara* Skvortsov; *Festuca brevifolia* R. Br. var. *arctica* Saint-Yves subv. *genuina* f. *vivipara* Saint-Yves; *Festuca ovina* var. *vivipara* L. pro parte; *Festuca supina* auct. non Schur.; *Festuca vivipara* auct. non (L.) Sm.; *Festuca vivipara* subsp. *glabra* Frederiksen; *Festuca vivipara* var. *glabra* Frederiksen; *Festuca viviparoides* subsp. *krajinae* Pavlick; *Festuca viviparoides* var. *krajinae* Pavlick)

North America, U.S., British Columbia. Caespitose, glaucous, erect, glabrous or hairy, leaves mostly basal, sheaths fused, ligule membranous, inflorescence paniculate, spikelets pedicellate, palea absent, found in imperfectly drained moist areas, often confused with *Festuca baffinensis* Polunin or *Festuca brachyphylla* Schult. & Schult.f., see *Flora Britannica* 1: 114. 1800 and *Nordic Journal of Botany* 1: 288 (-289). 1981, *Canadian Journal of Botany* 62: 2454, 2457. 1984.

in English: northern fescue

Festucaria Link = Vulpia Gmelin

Referring to *Festuca* L., pertaining to *Festuca*.

Pooideae, Poodae, Poeae, or Pooideae, Poeae, Loliinae, type *Festucaria psilantha* (Link) Link, see *Species Plantarum* 1: 73-74. 1753, *Enumeratio Methodica Plantarum* 207. 1759, *Flora Badensis Alsatica* 1: 8. 1805, *Observations sur les Graminées de la Flore Belgique* 99, 100. 1824, *Genera Plantarum* 101. 1836, *Linnaea* 17(4): 398. 1844, *Die Natürlichen Pflanzenfamilien* 2(2): 75. 1887 and *Ill. Fl. U.S. Canad.*, edition 2, 1: 269. 1913, *Nordic Journal of Botany* 1(1): 17-26. 1981, *Watsonia* 16: 300. 1987, *Flora Mesoamericana* 6: 228. 1994, *Bothalia* 27: 75-82. 1997, *Flora Mediterranea* 8: 307-313. 1998, *Bothalia* 29(2): 335-341. 1999, *Systematic Botany* 27(2): 241-251. 2002, *Contributions from the United States National Herbarium* 48: 368, 690-694. 2003.

Festucella E.B. Alexeev = Austrofestuca (Tzvelev) Alexeev

The diminutive of *Festuca* L.

1 species, eastern Australia. Pooideae, Poodae, Poeae, perennial, densely caespitose, herbaceous, unbranched, glabrous, leaves mainly basal, auricles absent, ligule an unfringed membrane, plants bisexual, inflorescence paniculate, spikelets flattened, 2 glumes more or less equal or

subequal, palea present, 2 free and membranous lodicules, 3 stamens, ovary glabrous, 2 stigmas, type *Festucella eriopoda* (Vickery) E.B. Alexeev, see *Bot. Zhurn.* 56: 1257. 1971, *New Zealand Journal of Botany* 24: 425-503. 1986, *New Zealand Journal of Botany* 36: 329-367. 1998.

Species

F. eriopoda (Vickery) E.B. Alexeev (*Austrofestuca eriopoda* (Vickery) S.W.L. Jacobs; *Festuca eriopoda* Vickery)

Australia, New South Wales, Victoria. Perennial, slender and erect, greenish, forming dense tussocks, leaves rough and linear, panicle slender and open, lower glume 3-nerved, upper glume 3-5-nerved, decorative, moist soils, forage grass, see *Contributions from the New South Wales National Herbarium* 1: 10. 1939, *Telopea* 3(4): 602. 1990.

in English: lanky fescue, snow fescue

Festucopsis (C.E. Hubbard) Melderis = *Elymus* L.

Resembling the genus *Festuca* L.

Two species, Albania, High Atlas of Morocco. Pooideae, Triticoideae, Triticeae, perennial, caespitose, herbaceous, leaves nonauriculate, connate basal sheaths, ligule a very short unfringed membrane, old basal sheaths fibrous, plants bisexual, inflorescence a single spike, 2 glumes more or less equal or subequal, lower glume 1-3-nerved or 3-4-nerved, upper glume 3-6-nerved, palea present, 2 free and membranous lodicules, 3 stamens, ovary hairy, 2 stigmas, open habitats, stony ground, rocky places, see *Botanical Journal of the Linnean Society* 76: 317. 1978, *Willdenowia* 21: 87-104. 1991, *Contributions from the United States National Herbarium* 48: 279-307, 312-368. 2003.

Species

F. festucoides (Maire) Á. Löve (*Agropyron festucoides* Maire; *Agropyron festucoides* f. *acutiflorum* (Emb.) Brichambaut & Sauvage; *Agropyron festucoides* f. *atherantha* Brichambaut & Sauvage; *Agropyron festucoides* f. *muticum* (Emb.) Emb.; *Agropyron pseudofestucoides* f. *glabrum* Maire; *Agropyron pseudofestucoides* f. *leiorrhachis* Maire; *Agropyron pseudofestucoides* var. *acutiflorum* Emb.; *Agropyron pseudofestucoides* var. *mutica* Emb.)

Morocco, Grand Atlas. See *Bulletin de la Société des Sciences Naturelles du Maroc* 8: 142. 1928, *Bulletin de la Société des Sciences Naturelles du Maroc* 15: 191. 1935, *Flore de l'Afrique du Nord* 460. 1936, *Bulletin de la Société d'Histoire Naturelle de l'Afrique du Nord* 30: 95, 369-370. 1939, *Bulletin de la Société des Sciences Naturelles du Maroc* 34: 245, 250. 1954, *Flore de l'Afrique du Nord* 3: 321-322, 332. 1955, *Feddes Repertorium* 95(7-8): 442. 1984.

F. serpentina (C.E. Hubb.) Melderis (*Agropyron festucifolium* Czernj. & C.D. Chase; *Agropyron kosaninii* Czernj. & Soska, nom. illeg., non *Agropyron kosaninii* Nábelek; *Brachypodium albanicum* Auct. & Kitan.; *Brachypodium serpentina* C.E. Hubb.)

North Africa. See *Hooker's Icones Plantarum* 33: t. 3280. 1935, *Novosti Sist. Vyss. Rast.* 1966: 302, 306. 1966, *Journal of the Linnean Society, Botany* 76: 317. 1978, *Willdenowia* 21: 87-104. 1991, *Berichte des Geobotanischen Instit. der Eidgenössische Techn. Hochschule Stiftung Rübel* 57: 182-192. Zürich 1991, *Candollea* 50(2): 457-493. 1995, *Plant Systematics and Evolution* 201: 75-82. 1996.

x Festulolium Asch. & Graebn.

Festuca x *Lolium*.

See *Synopsis der mitteleuropäischen Flora* 2(1): 768. 1902, *Genera Graminum* 375. 1986, *Contributions from the United States National Herbarium* 48: 368. 2003.

x Festulpia Stace & Cotton

Festuca x *Vulpia*.

See *Watsonia* 10: 136. 1974, *Genera Graminum* 375. 1986.

Fibichia Koeler = *Cynodon* Rich.

Chloridoideae, Cynodonteae, Chloridinae, type *Fibichia umbellata* Koeler (nom. illeg. superfl. for *Panicum dactylon* L.), see *Descriptio Graminum in Gallia et Germania* 302. 1802, *Syn. Pl.* 1: 85. 1805 and *Contributions from the United States National Herbarium* 41: 59-63, 121. 2001.

Filgueirasia Gerald F. Guala

Dedicated to Dr. Tarciso S. Filgueiras.

Two species, Brazil. Bambusoideae, Bambuseae, Arthrostylidiinae, perennial, caespitose, erect, coarse, branch complement 1-15, culm leaves lanceolate, compact knotty rhizomes, florets 3-15 per spikelet, lodicules ovate, good forage for domestic stock and wildlife, cerrado, open savannah, Brazilian planalto, see *Smithsonian Contributions to Botany* 9: 9-12, figs. 1-2. 1973, *Contributions from the*

United States National Herbarium 39: 12. 2000, *Bamboo Science & Culture: The Journal of the American Bamboo Society* 17(1): 1-3. 2003 [A new genus of bamboos from the cerrados of Brazil].

Species

F. arenicola (McClure) Guala (*Apoclada arenicola* McClure)

Brazil, Matto Grosso. Culm leaves deciduous, midculm branch complements with usually 1-3 primary branches in vegetative condition, raceme of 1-4 spikelets, drought-tolerant, sandy soils, see *Smithsonian Contr. Bot.* 9: 9, f. 1-2. 1973.

F. cannavieria (Silveira) Guala (*Apoclada cannavieira* (Silveira) McClure; *Arundinaria cannavieira* Alvaro da Silveira)

Brazil. Culm leaves persistent, midculm branch complements with usually 5-15 primary branches in vegetative condition, sandy soils, see *Flora Boreali-Americana* 1: 73. 1803 and *Arquivos do Museu Nacional do Rio de Janeiro* 22: 101, f. 2. 1919, *Smithsonian Contr. Bot.* 9: 12, f. 3. 1973, *Edinburgh Journal of Botany* 48: 73-80. 1991.

Filipedium Raizada & S.K. Jain = *Capillipedium* Stapf

Latin *filum* "thread" and *pes, pedis* "a foot," see also *Capillipedium* Stapf, Latin *capillus, i* "the hair" and *pes, pedis*, referring to the spikelet, pedicels and base are ciliate.

Panicoideae, Andropogonodae, Andropogoneae, Andropogoninae, type *Filipedium planipedicellatum* (Bor) Raiz. & Jain, see *Flora of Tropical Africa* 9: 11, 169. 1917, *Journal of the Bombay Natural History Society* 49: 682-683. 1951.

Fimbribambusa Widjaja

Two species, Indonesia. Sympodial, erect, loosely tufted, spreading crest on each node, lodicules entire, 6 stamens, ovary glabrous and ovoid, type *Fimbribambusa horsfieldii* (Munro) Widjaja, see *Transactions of the Linnean Society of London* 26(1): 115. 1868 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 52: 175. 1914, *Reinwardtia* 11(2): 80-83. 1997.

Species

F. horsfieldii (Munro) Widjaja (*Bambusa horsfieldii* Munro)
Indonesia.

F. microcephala (Pilg.) Widjaja (*Dendrocalamus microcephalus* Pilg.)

Indonesia.

Fingerhuthia Nees ex Lehm. = *Fingerhuthia* Nees, *Lasiotrichos* Lehm.

After the German botanist Carl (Karl) Anton Fingerhuth, 1798-1876, physician, author of *Tentamen florulae lichenum Eiffliaeae*. [Norimbergae] Nürnberg 1829 and *Monographia generis Capsici*. Düsseldorf 1832, with the German botanist Mathias Joseph Bluff (1805-1837) wrote Sectio 1 [*Plantae phanerogamicae seu vasculosae*. 1825-1826] of *Compendium florum Germanicae*; see J.H. Barnhart, *Biographical notes upon botanists*. 1: 541. 1965; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. Philadelphia 1964; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. Stuttgart 1993.

About 1 or 2 species, southern Africa, Afghanistan, Arabia. Chloridoideae, Eragrostideae, or Chloridoideae, Eragrostideae, Unioliinae, perennial or annual, unarmed, caespitose, herbaceous, unbranched, bend of the culms at the nodes, auricles absent, ligule a fringe of hairs, leaves mainly basal, plants bisexual, inflorescence racemose or paniculate, spikelets falling entire, 1 fertile floret, 2 glumes more or less equal and shortly awned, upper glume and lower glume 1-nerved, lemmas entire and shortly awned, palea present, 2 lodicules free and fleshy, 3 stamens, ovary glabrous, 2 stigmas white, open habitats, desert areas, along roadsides, rocky hillsides, savannah, dry riverbeds, type *Fingerhuthia africana* Nees ex Lehm., see *Semina in Horto Botanico Hamburgensi* 1834: 7. 1834 [also *Delectus Seminum quae in Horto Hamburgensium Botanico* 1834: 7. 1834], *Linnaea* 10, litt.: 112. 1836 and *Journal of Applied Ecology* 37(3): 491-507. June 2000, *Contributions from the United States National Herbarium* 41: 121, 130. 2001, *Journal of Biogeography* 31(5): 831-841. May 2004.

Species

F. africana Nees ex Lehm. (*Fingerhuthia afghanica* Boiss.; *Fingerhuthia africana* Lehman ex Aitch., nom. illeg., non *Fingerhuthia africana* Lehm.; *Fingerhuthia africana* Lehm.)

Afghanistan, Arabia, Angola, Namibia, South Africa. Perennial bunchgrass, sometimes annual and smaller, very variable, robust, more or less leafy, unbranched, rhizomatous, erect, tufted to densely tufted, slender rhizomes, fairly strong root system, leaf blade expanded, ligule a ring of short hairs, leaves ending in a sharp point, inflorescence dense cylindrical spike-like panicle, spikelets single and flattened, each glume shortly awned and shortly hairy on the keels, lemma apex rounded, reasonably palatable, pasture, growing on open grassland, rocky hillsides, on dry stony hills, along roadsides, on well drained sandy and gravelly soils, shallow rocky soil, disturbed sites, waste grounds, on stream bank, cliffs, dry regions, on lime-rich and stony soils, see *Semina in Horto Botanico Hamburgensi*

1834: 7. 1834, *Journal of the Linnean Society, Botany* 10: 193. 1882, *Flora Orientalis* 5: 569. 1884.

in English: thimble grass

in South Africa: vingerhoedgras, stechdegengras, kalkgras

F. sesleriiformis Nees (also spelled *sesleriaeformis*)

Namibia, South Africa. Perennial bunchgrass, robust, rhizomatous, rhizome robust, ligule a fringe of short hairs, basal leaf sheaths shining, inflorescence spike-like panicle, glumes shortly hairy on the keels, lemma apex acuminate, usually forming clumps or large tussocks, pasture, palatable or relatively palatable when young, stiff brooms making, useful for erosion control, found in moist sand in stream bed, in waterlogged and poorly drained soils, in vleis and near rivers, dry stream bank, overgrazed fields, black clay in vleis, see *Florae Africae Australioris Illustrationes Monographicae* 138. 1841.

in English: thimble grass

in South Africa: vingerhoedgras

Fiorinia Parl. = *Aira* L.

Pooideae, Poaceae, Airinae, see *Species Plantarum* 1: 63-66. 1753, *Flora italiana, ossia descrizione delle piante* ... 1: 232. 1848[-1850] and *Amer. J. Bot.* 21: 135. 1934, *Taxon* 41: 556. 1992, *Taxon* 44: 611-612. 1995, *Contributions from the United States National Herbarium* 48: 89-96, 368. 2003.

Flavia Heist. ex Fabr. = *Anthoxanthum* L.,

Flavia Fabricius

Latin *flavus* "pure yellow," see also *Anthoxanthum* L., Greek *anthos* "flower" and *xanthos* "yellow," the spikelets are yellowish.

Pooideae, Poaceae, Phalaridinae, see *Species Plantarum* 1: 28. 1753, *Enumeratio Methodica Plantarum* 206. 1759 and *Regnum Veg.* 127: 19. 1993, *Contributions from the United States National Herbarium* 48: 111-115, 368. 2003.

Flexularia Raf.

Latin *flexus* "a bending, winding."

Chloridoideae, see C.S. Rafinesque, *Journal de Physique, de Chimie, d'Histoire Naturelle et des Arts* 89: 105. 1819 and E.D. Merrill, *Index rafinesquianus*. 75. 1949, *Genera Graminum* 376. 1999.

Fluminia Fr. = *Scolochloa* Link

Pooideae, Poaceae, Scolochloinae, type *Fluminia arundinacea* (Roem. & Schult.) Fr., see *Hort. Berol.* 1: 136-137. 1827, *Summa Vegetabilium Scandinaviae* 1: 247. 1846 and

United States Department of Agriculture: Bulletin 772: 38, f. 11. 1920, *Contributions from the United States National Herbarium* 48: 368, 609. 2003.

Foenodorum E.H.L. Krause =

Anthoxanthum L.

Pooideae, Poaceae, Phalaridinae, see *Species Plantarum* 1: 28. 1753 and *Regnum Veg.* 127: 19. 1993, *Contributions from the United States National Herbarium* 48: 111-115, 368. 2003.

Forasaccus Bubani = *Bromus* L.

Latin *foro*, *avi*, *atum* "to bore, pierce" and *saccus* "a sack, bag."

Pooideae, Bromaceae, see *Species Plantarum* 1: 76. 1753 and *U.S.D.A. Div. Agrostol. Bull.* 23: 1-66. 1900, *Flora Pyrenaea* ... 4: 379. 1901, *Brittonia* 7: 421. 1952, *Notes Roy. Bot. Gard. Edinburgh* 30: 366. 1970, *Bot. Jahrb. Syst.* 102: 447. 1981, *Taxon* 41: 559. 1992, *Taxon* 44: 611-612. 1995, *Contributions from the United States National Herbarium* 48: 154-191, 368-369. 2003.

Fourniera Scribn. = *Bouteloua* Lag.,

Fourniera J. Bommer ex E. Fourn.

(Cyatheaceae), *Soderstromia* C.V. Morton

Possibly dedicated to the French botanist Eugène Pierre Nicolas Fournier, 1834-1884, wrote *Mexicanas plantas*. Paris 1872 and 1886 [Associates: Émile Bescherelle, 1828-1903, Joseph Decaisne, 1807-1882, and William Nylander, 1822-1899], contributed to C.F.P. von Martius *Flora Brasiliensis*. 1885; see J.H. Barnhart, *Biographical notes upon botanists*. 1: 563. 1965; J. Decaisne, editor, *Mission scientifique au Mexique et dans l'Amérique centrale*. Paris 1868-1897; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 131. 1972; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. Philadelphia 1964; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993; S. Lenley et al., *Catalog of the manuscript and archival collections and index to the correspondence of John Torrey*. Library of the New York Botanical Garden. 172. 1973; George H.M. Lawrence, in *D.S.B.* 10: 165-166. 1981.

Chloridoideae, Cynodonteae, Boutelouinae, type *Fourniera mexicana* Scribn., see *Annales des Sciences Naturelles; Botanique, sér. 5*, 18: 347. 1873, *Bulletin, Division of Agrostology United States Department of Agriculture* 4: 7-9. 1897 and *Leaflets of Western Botany* 10: 327. 1966, *Contributions*

from the *United States National Herbarium* 41: 20-33, 121, 195. 2001.

Froesiochloa G.A. Black

Named for Ricardo de Lemos Fróes, 1891-1960.

About 1 or 2 species, Brazil, French Guiana. Bambusoideae, Oryzodae, Olyreae, or Bambusoideae, Olyreae, Olyrinae, perennial, leafy, herbaceous, ligule an unfringed membrane, plants monoecious, all fertile spikelets unisexual, inflorescence spicate, 1 female spikelet surrounded by 6-10 male spikelets, 2 glumes acuminate, lower glume 3- to 7-nerved, upper glume 3- to 7-nerved, lemma coriaceous, spikelets falling in clusters, palea present, lodicules present, no stamens, ovary glabrous, male florets staminate, forest shade, primary forest, type *Froesiochloa boutelouoides* G.A. Black, see *Fl. Friburg.* 1: 172. 1825 and *Blumea, Suppl.* 3: 62. 1946, *Boletim Técnico do Instituto Agrônomo do Norte* 20: 29-30, pl. 1. Belém, Brazil 1950, *Brittonia* 34: 25-29. 1982, *Brittonia* 37: 22-35. 1985, *Flora of the Guianas. Series A, Phanerogams* 229-233. 1990, *American Bamboos* 278-280. 1999, *Contributions from the United States National Herbarium* 39: 57-58. 2000.

Species

F. boutelouoides G.A. Black

Brazil. See *Boletim Técnico do Instituto Agrônomo do Norte* 20: 30, pl. 1. 1950, *Smithsonian Contributions to Botany* 44: 17, 20. 1980.

Fruentum E.H.L. Krause = *Triticum* L.

Latin *frumentum* "corn, grain."

Pooideae, Triticeae, Triticinae, see *Species Plantarum* 1: 85-87. 1753, *Oekonomisch-technische Flora Böhmens* 1: 425. 1836, *Annales des Sciences Physiques et Naturelles, d'Agriculture et de l'Industrie, Publiées par la Société Royale d'Agriculture, etc., de Lyon.* 5: 103-196, pl. 2-10. 1842 [*Descriptions et figures des céréales européennes*], *Botanisches Centralblatt* 73: 339. 1898 and A. Prati, *Vocabolario etimologico italiano.* Torino 1951, *Feddes Repert.* 95(7-8): 497. 1984, *Taxon* 35: 144-149. 1986, *Wageningen Agricultural University Papers* 94-7: 1-512. 1994 [Wild wheats: a monograph of *Aegilops* L. and *Amblyopyrum* (Jaub. & Spach) Eig.], *Contributions from the United States National Herbarium* 48: 369, 676-684. 2003.

Fussia Schur = *Aira* L.

After Johann Mihály (Michael) Fuss, 1814-1883, botanist, preacher, author of *Flora transsilvaniae excursoria.* Hermannstadt 1866; see J.H. Barnhart, *Biographical notes upon botanists.* 2: 21. 1965.

Pooideae, Poeae, Airinae, type *Fussia praecox* (L.) Schur, see *Species Plantarum* 1: 63, 65-66. 1753, *Enumeratio Plantarum Transsilvaniae* 754. May-Sep 1866 and *U.S. Dept. Agr. Bull.* 772: 116. 1920, *Amer. J. Bot.* 21: 135. 1934, *Taxon* 41: 556. 1992, *Taxon* 44: 611-612. 1995, *Contributions from the United States National Herbarium* 48: 89-96, 369. 2003.

G

Galeottia M. Martens & Galeotti =
Galeottia A. Rich. & Galeotti (Orchidaceae),
Galeottia Nees (Acanthaceae), *Krombholzia*
Rupr. ex E. Fourn., *Zeugites* P. Browne

For the French-born Belgian botanist Henri-Guillaume Galeotti, 1814-1858, explorer in Central America, Director of the Botanic Garden of Bruxelles; see J.H. Barnhart, *Biographical notes upon botanists*. 2: 24. 1965; *Bulletin de l'Académie Royale des Sciences et Belles-lettres de Bruxelles* 9(2): 247. 1842; Antoine Lasègue (1793-1873), *Musée botanique de M. Benjamin Delessert*. 209-211. Paris, Leipzig 1845; *Annales des Sciences Naturelles; Botanique, sér. 3* 3: 25. 1845; R. Zander, F. Encke, G. Buchheim & S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 713. Stuttgart 1993; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. University of Pennsylvania Press, Philadelphia 1964; Rogers McVaugh, "Galeotti's Botanical Work in Mexico: The Numbering of his Collections and a Brief Itinerary." *Contr. Univ. Mich. Herb.* 11(5): 291-297. 1972; Michael Joseph Scheidweiler (1799-1861), "Descriptio diagnostica nonnullarum Cactearum quae a domino Galeotti in provinciis Potosi et Guanaxato regni Mexicani inveniuntur. Genus *Ariocarpus*." in *Bull. Acad. Sci. Brux.* 5: 491-492. 1838; I.C. Hedge & J.M. Lamond, *Index of Collectors in the Edinburgh Herbarium*. Edinburgh 1970.

Centothechoideae, Centotheceae, or Panicoideae, Centotheceae, see *The Civil and Natural History of Jamaica in Three Parts* 341. 1756, *Species Plantarum. Editio quarta* 4: 204. 1805, *Bulletin de l'Académie Royale des Sciences et Belles-lettres de Bruxelles* 9(2): 247. 1842, *Annales des Sciences Naturelles; Botanique, sér. 3* 3: 25. 1845, *Prodromus Systematis Naturalis Regni Vegetabilis* 11: 291, 311. 1847, *Biologia Centrali-Americana; ... Botany ...* 2(12): 512. 1882 and *Contributions from the United States National Herbarium* 46: 242, 277, 639-641. 2003.

Gamelythrum Nees = *Amphipogon* R. Br.

Possibly from the Greek *gamos* "marriage, stigma, female part" and *elytron* "sheath, cover, scale, husk."

Arundinoideae, Amphipogoneae, see *Prodromus Florae Novae Hollandiae* 175. 1810, *Hooker's London Journal of*

Botany. 2: 415. 1843 and *Contributions from the New South Wales National Herbarium* 1(5): 281-295. 1950.

Gaoligongshania D.Z. Li, J.R. Xue & N.H. Xia
= *Monocladus* L.C. Chia, H.L. Fung & Y.L.
Yang

One species, China, northwestern Yunnan, Gaoligongshan. Bambusoideae, Bambuseae, Arundinariinae, sympodial, shrubby, tufted, scrambling, sometimes epiphytic on trees, rhizomes pachymorph, culms zigzag, branch complement solitary, culm sheaths persistent and leathery, ligules short, auricles large and embracing culms, leaf blades lanceolate and recurved, inflorescence semelauctant and arching, open large panicle on leafy or leafless flowering branches, spikelets 4- to 9-flowered, 2 glumes, lemmas sometimes awned, paleas 2-keeled, 3 lodicules, 3 stamens, ovary glabrous, 3 stigmas plumose, in evergreen broad-leaved forests, medium mountainous area, type *Gaoligongshania megalothyrsa* (Hand.-Mazz.) D.Z. Li, J.R. Xue & N.H. Xia, see *Symbolae Sinicae* 7(5): 1270-1271. 1936, E. Uchimura, "Growth environment and characteristics of some tropical bamboos." *Bamboo Journal* No. 4: 51-60. 1987, *Acta Phytotaxonomica Sinica* 26(3): 211-216, f. 1. 1988, K. Wang & C. Species

G. megalothyrsa (Hand.-Mazz.) D.Z. Li, J.R. Xue & N.H. Xia (*Arundinaria megalothyrsa* Hand.-Mazz.; *Indocalamus megalothyrsa* (Hand.-Mazz.) C.S. Chao & C.D. Chu; *Monocladus macrophyllus* Hsueh & C.M. Hui; *Monocladus megalothyrsus* (Hand.-Mazz.) T.P. Yi; *Yushania megalothyrsa* (Hand.-Mazz.) T.H. Wen)

China, Gaoligong Mountain Range. Covered with white powders when young, culm sheaths persistent yellowish or greenish brown, densely covered by short spiny hairs, auricles falcate, leaf blades oblong lanceolate, leaves sheaths white powdery and densely yellowish hispid, spikelets linear, glumes long awned, lemmas lanceolate, ovary oblong, noninvasive, see *Symbolae Sinicae* 7(5): 1270-1271. 1936, *J. Nanjing Techn. Forest Prod.* 1981(3): 33-44, f. 1-6. 1981 [also *Journal of Nanjing Technological College of Forest Products*], *Journal of Bamboo Research* 6(3): 34. 1987, *Journal of Bamboo Research* 12(2): 54. 1993.

in China: gongshanzhu shu

Garnotia Brongn. = *Berghausia* Endl., *Miquelia* Arn. & Nees

For the French (b. Brest) naturalist Prosper Garnot, 1794-1838 (Paris), M.D. in 1822, assistant surgeon in the French navy and on the voyage of the *Coquille* commanded by Louis-Isidor Duperrey (1786-1865), zoologist and anthropologist (described the Alfurs, a people who inhabit the interior of New Guinea), he made several voyages to Cayenne, Martinique, the Antilles and the South Pacific, he wrote *Essai sur le Cholera-morbus*. Paris 1822 and *Remarques sur la Zoologie des Iles Malouines, faites pendant le voyage autour du monde de la corvette la Coquille, exécuté en 1822-25.* [Paris] 1826. See A.P.M. Sanders, in *Dictionary of Scientific Biography*. Editor in Chief Charles Coulston Gillispie. 5: 276-277. 1981; L.I. Duperrey, *Mémoire sur les opérations géographiques faites dans la campagne de la corvette de S.M. La Coquille*. Paris [1827] and *Voyage autour du Monde exécuté par ordre du Roi sur la corvette La Coquille pendant les années 1822-1825*. Paris 1826; R.P. Lesson, *Journal d'un Voyage Pittoresque autour du Monde exécuté sur la Corvette La Coquille commandée par M. L.I. Duperrey*. Paris 1830 and *Voyage autour du Monde entrepris par ordre du Gouvernement sur la Corvette La Coquille*. Paris 1838-1839; C.A. Sharp, *Duperrey's Visit to New Zealand in 1824*. Wellington 1971; Mary Gunn & Leslie E. Codd, *Botanical Exploration of Southern Africa*. 164. Cape Town 1981.

Some 29-30 species, tropical Asia, south and eastern Asia to Pacific, Polynesia, northeast Australia, Queensland.

Panicoideae, Panicodae, Arundinelleae, or Andropogoneae, annual or mostly perennial, tufted, rhizomatous or often caespitose, slender, weak or stiff, slender to stout, erect or decumbent, geniculate, auricles absent, ligule a short fringed membrane, leaf blades linear to lanceolate, plants and spikelets bisexual, cleistogamous or chasmogamous, inflorescence a narrow panicle open or contracted, spikelets geminate or solitary or in threes and usually bearded at the base, 1-flowered lanceolate spikelets, a single bisexual floret, when present hidden cleistogenes in the leaf sheaths, 2 glumes more or less equal acute to awned, lower glume convex on the back 3-5-nerved, upper glume 3-5-nerved, lemma 3-nerved cartilaginous and long-awned with geniculate or straight awn, palea auriculate, 2 free and fleshy small lodicules, 3 stamens, ovary glabrous, 2 stigmas, woodland, mostly in shady places, near the edges of forest, open grassland, rocky slopes, moist areas, type *Garnotia stricta* Brongn., see *Voyage autour du Monde* 2(2): 132-133, t. 21. 1832 [also *Voy. La Coquille Bot. Phan.*], *Gramineae* 45-48. 1841, *Genera Plantarum Suppl.* 3: 57. 1843 and *Kew Bulletin* 27: 515-562. 1972, *Bot. Review* (Lancaster) 59(4): 273-343. 1993.

Species

G. acutigluma (Steudel) Ohwi (*Garnotia acutigluma* var. *aberrans* Santos; *Garnotia acutigluma* var. *ambigua* Santos; *Garnotia acutigluma* var. *longiaristata* (Santos) Jansen; *Garnotia acutigluma* var. *subvestita* Santos; *Garnotia caespitosa* Santos; *Garnotia caespitosa* var. *emarginata* Santos; *Garnotia caespitosa* var. *longiuscula* Santos; *Garnotia erecta* Santos; *Garnotia erecta* var. *tonkinensis* Santos; *Garnotia flexuosa* Santos; *Garnotia himalayensis* Santos; *Garnotia himalayensis* var. *lanceolata* Santos; *Garnotia himalayensis* var. *sikkimensis* Santos; *Garnotia khasiana* Santos; *Garnotia khasiana* f. *mucronata* Santos; *Garnotia khasiana* var. *clarkei* Santos; *Garnotia khasiana* var. *hemitrichophylla* Santos; *Garnotia khasiana* var. *partipubens* Santos; *Garnotia longiaristata* Santos; *Garnotia longiaristata* var. *basilanensis* Santos; *Garnotia sandwicensis* Hillebr.; *Garnotia trisetata* Hitchc.; *Garnotia trisetata* var. *decumbens* Keng; *Urachne acutigluma* Steud.)

Asia, Japan. Perennial, caespitose, erect or ascending, branched, glabrous, leaf sheaths usually hirsute, leaf blades linear or lanceolate and acuminate, leaves hirsute, spikelets with bearded base, glumes acuminate-awned, awn of lemma not geniculated, on grassy slopes, along streams, in moist shady places, see *Synopsis Plantarum Glumacearum* 1: 121. 1854, *Flora of the Hawaiian Islands* 1: 513. 1888 and *Lingnan Science Journal* 7: 200-201. 1929 [1931], *Sunyatsenia* 3(1): 18. 1935, *Botanical Magazine* 55: 393. 1941, *Journal of the Arnold Arboretum* 25(1): 92-93, t. 2. 1944, *Natural and Applied Science Bulletin Univ. Philipp.* 10: 67-68, 70-71, 73-74, 76, 78, 80, 84-85, 87, 94. 1950, *Acta Botanica Neerlandica* 2: 382. 1950.

G. acutigluma (Steudel) Ohwi var. *acutigluma*

Java. Densely tufted, much-branched, with strong well-developed root system, leaf blades usually linear, lemma awn tapering to apex, grazed by cattle, useful as a soil binder.

G. acutigluma (Steudel) Ohwi var. *longiseta* (Hack.) V. Prakash & S.K. Jain (*Garnotia stricta* Brongn.; *Garnotia stricta* var. *longiseta* Hack.)

India, the Philippines. Leaf blades usually lanceolate, awn of lemma with crinkled apical portion, see *Voyage autour du Monde* 2(2): 133, t. 21. 1832 and *Allgemeine Botanische Zeitschrift für Systematik, Floristik, Pflanzengeographie* 15: 141. 1909, *Fascicles of Flora of India* 3: 5-6. 1979.

G. arborum Stapf (*Garnotia arborum* Woodrow; *Garnotia arborum* var. *saxicola* Santos) (growing on branches of trees, with mosses)

India, Deccan. Annual, weak, delicate, hispid at nodes, leaf sheaths hispid or glabrous, leaf blades glabrous, lax panicle with horizontally spreading or deflexed branches, few florets, subequal glumes acuminate-awned, lemma long-awned, see *Journal of the Bombay Natural History Society* 13: 439. 1901, *The Flora of the Presidency of Bombay* 2: 1013. 1908, *Natural and Applied Science Bulletin* 10: 143. 1950, *Grasses of Burma* ... 567. 1960, *Kew Bulletin* 27: 536. 1972.

G. arundinacea Hook.f. (*Garnotia arundinacea* var. *globerrima* Santos)

South India. Perennial, erect, trailing, nodes pubescent, leaf blades subcordate broadly lanceolate and finely tipped, contracted inflorescence paniculate, panicle with densely flowered capillary branches, subequal glumes acuminate-awned, lemma awned, see *The Flora of British India* 7: 243. 1896 and *Natural and Applied Science Bulletin* 10: 116. 1950, *Cytologia* 36: 585. 1971, *Kew Bulletin* 27: 532. 1972.

in India: dobrai hullu

G. barbulata (Nees) Janowski (*Garnotia barbulata* (Nees) Miq.; *Miquelia barbulata* Nees)

Asia. See *Gramineae* 46. 1841 and *Philippine Journal of Science* 13(3): 130. 1918, *Repertorium Specierum Novarum Regni Vegetabilis* 17(477-480): 86. 1921.

G. courtallensis (Arn. & Nees) Thwaites (*Berghausia courtallensis* (Arn. & Nees) Endl. ex Miq.; *Berghausia courtallensis* (Arn. & Nees) Miq.; *Berghausia courtallensis* (Arn. & Nees) Endl.; *Garnotia courtallensis* var. *divaricata* Santos; *Garnotia laevis* Santos; *Garnotia laevis* var. *pilosiuscula* Santos; *Garnotia palniensis* Santos; *Garnotia palniensis* var. *seminudata* Santos; *Garnotia puchiparensis* Bor; *Garnotia subinvoluta* Santos; *Garnotia verticillata* Santos; *Miquelia courtallensis* Arn. & Nees)

Southern India, Chennai, Sri Lanka. Annual, weak, slender, branched, not densely caespitose, erect, geniculate or decumbent at base, nodes villous or hirsute, leaf sheaths

hispid, ligule a ciliate membrane, leaf blades lanceolate-acute, leaves hispid or hirsute, inflorescence paniculate with spaced spikelets, panicle few-flowered, awned or awnless, unequal glumes acute or mucronate, lemma with a geniculate awn, see *Gramineae* 47-48. 1841, *Nova Acta Phys.-Med. Acad. Caes. Leop.-Carol. Nat. Cur.* 19(Suppl. 1): 179-180. 1843, *Analecta botanica indica* ... 2: 32. 1851, *Nieuwe Verh. Eerste Kl. Konik. Nederl. Inst. Wetensch. Amsterdam* 3: 32. 1851, *Enumeratio Plantarum Zeylaniae* 363. 1864 and *Handb. Fl. Ceylon* 5: 257. 1900, *Indian Forest Records. Botany* 2: 234. 1941, *Natural and Applied Science Bulletin* 10: 143, 146-147, 150-151. 1950, *Grasses of Ceylon* 58. 1956, *Grasses of Burma* ... 567. 1960, *Kew Bulletin* 27: 519. 1972, *Taxon* 34: 159-164. 1985.

G. elata (Arn. ex Miq.) Jan (*Berghausia elata* Arn. ex Miq.; *Garnotia scoparia* Stapf ex Hook.f.; *Garnotia tenuiglumis* Stapf ex Hook.f.)

South India, Uttar Pradesh. Perennial, erect, caespitose, glabrous, leaf sheaths flabellate, leaf blades linear, panicle densely flowered, spikelets scabrid with bearded base, lower glume acuminate to awned, upper glume acuminate, lemma 2-dentate and awned, awn of lemma geniculate and with twisted column, see *Grasses of Burma* ... 567. 1960, *Indian Forester* 92: 640. 1966, *Cytologia* 36: 585. 1971, *Kew Bulletin* 27: 556. 1972, *Taxon* 25: 161. 1976.

G. exaristata Gould (*Garnotia mutica* sensu Bor; *Garnotia tectorum* var. *valide* Santos)

Southern India, Sri Lanka. Perennial, densely caespitose, clumped, unbranched, stiffly erect, leaf blades lanceolate to oblanceolate, panicle densely flowered with branches short and stiff, spikelets awnless, glumes acute-acuminate, lemma acute-mucronate, in moist places, moist meadows, leaves used for thatching, see *Natural and Applied Science Bulletin* 10: 50. 1950, *Grasses of Burma* ... 568. 1960, *Kew Bulletin* 27(3): 558. 1972.

G. fergusonii Trimen (*Garnotia bidentata* Santos; *Garnotia deflexa* Santos; *Garnotia deflexa* var. *affinis* Santos; *Garnotia deflexa* var. *ferruginea* Santos; *Garnotia fergusonii* var. *fastigiata* Hook.f.; *Garnotia zelanica* Santos) (for the British botanist William Ferguson, 1820-1887 (Colombo, Sri Lanka/Ceylon), in 1862 a Fellow of the Linnean Society, 1839-1887 civil servant in Ceylon, amateur botanist, entomologist, collected algae, wrote *The Palmyra Palm. Borasus flabelliformis*. Colombo 1850, contributed to George Henry Kendrick Thwaites (1812-1882) & Joseph Dalton Hooker, *Enumeratio plantarum Zeylaniae*. London [1858-] 1864. See Edward Frederick Kelaart, *Acantho fiat Justitia*, etc. (Correspondence on the *Acanthus mollis*, etc., between E.F. Kelaart, W. Ferguson, etc.) Colombo 1859; J.H. Barnhart, *Biographical notes upon botanists*. 1: 536. 1965; Henry Trimen (1843-1896), *A Handbook to the Flora of Ceylon*. 5: 375. London 1893-1931; Isaac Henry Burkill

(1870-1965), *Chapters on the History of Botany in India*. Delhi 1965)

Southern India, Sri Lanka. Perennial or annual, slender, decumbent or trailing, branched, nodes glabrous or villous, leaf sheaths more or less glabrous, minute membranous ligule, leaf blades thin and linear-lanceolate, panicle with erect-spreading branches, subequal glumes acuminate to awned, lower glume acute-awned from bilobed apex, lemma awn variable, along riverbanks, grassy ditch, moist ridges, see *Journal of Botany, British and Foreign* 27: 170. 1889 and *A Handbook to the Flora of Ceylon* 5: 255-256. 1900, *Natural and Applied Science Bulletin* 10: 108-109, 111. 1950, *Grasses of Ceylon* 57. 1956, *Grasses of Burma* ... 568. 1960, *Kew Bulletin* 27(3): 519, 537. 1972.

G. fuscata Thwaites

Asia, Sri Lanka. Perennial, decumbent and rooting at the lower nodes, leaf sheaths pilose or glabrous, ligule a short membrane, narrow panicle few-flowered, glumes acuminate or short-awned, lemma with a geniculate awn, see *Enumeratio Plantarum Zeylaniae* 363. 1864 and *Handb. to the Flora of Ceylon* 5: 255. 1900, *Grasses of Ceylon* 57. 1956, *Grasses of Burma* ... 568. 1960.

G. mezii Janowsky (*Garnotia stricta* var. *longiseta* Hack.)

Asia. See *Allgemeine Botanische Zeitschrift für Systematik, Floristik, Pflanzengeographie* 15: 141. 1909, *Repertorium Specierum Novarum Regni Vegetabilis* 17(4-7): 86. 1921, *Natural and Applied Science Bulletin* 10: 92-93. 1950.

G. micrantha Thwaites

Sri Lanka. Perennial, decumbent and erect, leaf sheaths glabrous, awned or awnless, see *Enumeratio Plantarum Zeylaniae* 363. 1864 and *Handb. to the Flora of Ceylon* 5: 256. 1900, *Grasses of Ceylon* 58. 1956, *Grasses of Burma* ... 568. 1960.

G. micrantha Thwaites var. *micrantha*

Sri Lanka.

G. micrantha Thwaites var. *nana* Stapf (*Garnotia panicoides* var. *puberula* Santos)

Sri Lanka. Lemmas awnless, see *The Flora of British India* 7: 244. 1896[1897] and *Natural and Applied Science Bulletin* 10: 59. 1950.

G. mutica (Munro) Druce (*Berghausia mutica* Munro; *Garnotia tectorum* Hook.f.)

Southern India, Sri Lanka. See *Proceedings of the American Academy of Arts and Sciences* 4: 362. 1864, *The Flora of British India* 7: 242-243. 1897 and *Botanical Exchange Club and Society of the British Isles* 4: 624. 1917.

G. panicoides Trimen

Sri Lanka. Perennial or annual, ligule a minute membrane, panicle branches spreading, awnless, see *Journal of Botany, British and Foreign* 27: 170. 1889 and *Enumeratio Plantarum Zeylaniae* 363. 1864 and *Handb. to the Flora of*

Ceylon 5: 257. 1900, *Natural and Applied Science Bulletin* 10: 59. 1950, *Grasses of Ceylon* 58. 1956, *Grasses of Burma* ... 568. 1960.

G. patula (Munro) Benth. (*Berghausia patula* Munro)

Asia, Hong Kong. See *Proceedings of the American Academy of Arts and Sciences* 4: 362. 1860, *Flora Hongkongensis* 416. 1861 and *Natural and Applied Science Bulletin* 10: 102-103. 1950.

G. patula (Munro) Benth. var. *mucronata* L.C. Chia

China. See *Flora Hainanica* 4: 539. 1977.

G. patula (Munro) Benth. var. *mutica* (Munro) Rendle (*Berghausia mutica* Munro; *Garnotia mutica* (Munro) Druce; *Garnotia mutica* (Munro) Janowski, nom. illeg., non *Garnotia mutica* (Munro) Druce; *Garnotia tectorum* Hook.f.; *Garnotia tectorum* var. *burmensis* Santos)

Asia. See *Proceedings of the American Academy of Arts and Sciences* 4: 362. 1864, *The Flora of British India* 7: 242-243. 1897 and *Journal of the Linnean Society, Botany* 36(254): 387. 1904, *Botanical Exchange Club and Society of the British Isles* 4: 624. 1917, *Repertorium Specierum Novarum Regni Vegetabilis* 17(477-480): 86. 1921, *Natural and Applied Science Bulletin Univ. Philipp.* 10: 50. 1950.

G. polypogonoides Munro ex Oliver

Nepal. Perennial, erect, decumbent, stiff, leaf sheaths glabrous to hispid, leaf blades linear acuminate, narrow panicle contracted with ascending branches, spikelets densely bearded at base, glumes subequal and awned, lemma long awned, see *The Flora of British India* 7: 243. 1897 and *Fl. Assam* 5: 153. 1940, *Natural and Applied Science Bulletin* 10: 139. 1950, *Grasses of Burma* ... 567. 1960, *Fl. E. Himal.* 364. 1966, *Kew Bulletin* 27(3): 535. 1972.

G. puchiparensis Bor

South India, Tamil Nadu, Chennai. Annual, densely tufted, stiff, erect, prostrate, rooting at nodes, branched, nodes pubescent, leaf sheaths softly hairy, leaf blades lanceolate acute, leaves hirsute, panicle many-flowered, branches appressed at nodes, scabrid spikelets, glumes unequal, lower glume almost acute, thatching, see *Voyage autour du Monde* 2(2): 133, t. 21. 1832, *Analecta botanica indica* ... 2: 21-22. 1851, *Nieuwe Verh. Eerste Kl. Konik. Nederl. Inst. Wetensch. Amsterdam* 3(4): 33-34. 1851, *The Flora of British India* 7: 243. 1896[1897] and *Repertorium Specierum Novarum Regni Vegetabilis* 17(4-7): 86. 1921, *Indian Forest Records. Botany* 2: 234-236. 1941, *Natural and Applied Science Bulletin* 10: 53. 1950, *Grasses of Burma* ... 569. 1960, *Kew Bulletin* 27(3): 531. 1972.

G. schmidii Hook.f.

India, Nilgiri Hills. Perennial, caespitose, stiffly erect, smooth, leaf sheaths keeled, panicle congested with erect branches, spikelets with densely bearded base, lower glume aristate, upper glume acuminate or mucronate, lemma awned from the 2-lobed apex, very close to *Garnotia elata*,

see *The Flora of British India* 7: 242. 1896[1897] and *Natural and Applied Science Bulletin* 10: 163. 1950, *Grasses of Burma ...* 568. 1960, *Kew Bulletin* 27(3): 558. 1972, *Taxon* 25: 158. 1976.

G. scoparia Thwaites (*Berghausia scoparia* Munro ex Thwaites; *Garnotia alstonii* Santos; *Garnotia atribrunnea* Santos; *Garnotia decidua* Santos; *Garnotia scoparia* Stapf, nom. illeg., non *Garnotia scoparia* Thwaites; *Garnotia thwaitesii* Stapf ex Hook.f.) (dedicated to the British pteridologist Arthur Hugh Garfit Alston, 1902-1958 (d. Barcelona, Spain), traveler, systematic botanist, 1927 F.L.S., 1938-1939 plant collector in Ceylon and Central America, 1953-1954 collected plants in Indonesia, 1947-1958 President British Pteridological Society, 1937-1949 editor of the *British Fern Gazette*, author of *The Kandy flora*. Colombo 1938, the son of Rev. Frank Simpson Alston, 1863-1931; see J.H. Barnhart, *Biographical notes upon botanists*. 1: 45. 1965; T.W. Bossert, compil., *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 9. 1972; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 1993; *Taxon* 8: 83-86. 1949)

Sri Lanka. Perennial, densely caespitose, stout, stiff, erect, smooth, lower sheaths usually keeled and papery, ligule a minute fringed membrane, panicle loosely contracted with erect branches, glumes scabrous, lower glume acuminate-awned, upper glume acute-acuminate, lemma awn deflexed from the apex, on rocky places, slopes, stream banks, very close to *Garnotia elata*, see *Enumeratio Plantarum Zeylanicae* 363. 1864, *The Flora of British India* 7: 241-242. 1896 and *Natural and Applied Science Bulletin* 10: 154, 156, 158. 1950, *Grasses of Ceylon* 56. 1956, *Grasses of Burma ...* 568. 1960, *Kew Bulletin* 27(3): 555. 1972, *Taxon* 25: 158. 1976.

G. stricta Brongn. (*Berghausia pallens* Arn. ex Miq.; *Berghausia tenella* Arn. ex Miq.; *Garnotia acutigluma* (Steud.) Ohwi; *Garnotia ascendens* Munro ex Hook.f.; *Garnotia pallens* (Arn. ex Miq.) Janowski; *Garnotia puchi-parensis* Bor; *Urachne acutigluma* Steud.)

Asia, Australia. Thatching, see *Voyage autour du Monde* 2(2): 133, t. 21. 1832, *Analecta botanica indica ...* 2: 21-22. 1851, *Nieuwe Verh. Eerste Kl. Konik. Nederl. Inst. Wetensch. Amsterdam* 3(4): 33-34. 1851, *The Flora of British India* 7: 243. 1896 and *Repertorium Specierum Novarum Regni Vegetabilis* 17(4-7): 86. 1921, *Indian Forest Records. Botany* 2: 234. 1941, *Natural and Applied Science Bulletin* 10: 53. 1950.

in Japan: ao-shiba (= blue lawngrass)

G. stricta Brongn. var. **longiseta** Hackel (*Garnotia acutigluma* var. **longiseta** (Hack.) V. Prakash & S.K. Jain; *Garnotia mezii* Janowski; *Garnotia mezii* var. **clemensiana** Santos; *Garnotia mezii* var. **longiramosa** Santos; *Garnotia*

Asia, India, Indonesia. Perennial, polymorphic, erect or ascending, branched, loosely to densely tufted, often rooting at the lower nodes, leaf sheaths glabrous, leaf blades lanceolate or linear-lanceolate, leaves almost hispid, panicle narrow and contracted, spikelets scabrid, glumes unequal, lower glume acute-awned, lower segment of awn well-twisted, see *Analecta botanica indica ...* 2: 22. 1851, *Nieuwe Verh. Eerste Kl. Konik. Nederl. Inst. Wetensch. Amsterdam* 3(4): 33-34. 1851 and *Repertorium Specierum Novarum Regni Vegetabilis* 17(4-7): 86. 1921, *Fl. Assam* 5: 152. 1940, *Journal of the Arnold Arboretum* 25(1): 89-90, t. 1. 1944, *Bulletin of the Tokyo Science Museum* 18: 9. 1947, *Natural and Applied Science Bulletin Univ. Philipp.* 10: 113, 116, 118-119, 121-125, 127-128, 132-133. 1950, *Grasses of Burma ...* 569. 1960, *Cytologia* 36: 585. 1971, *Kew Bulletin* 27: 528. 1972, *Taxon* 23: 808. 1974, *Cytologia* 40: 453-462. 1975, *Taxon* 25: 158. 1976.

Garnotiella Stapf = *Asthenochloa* Büse

The diminutive of *Garnotia*.

Panicoideae, Andropogonodae, Andropogoneae, Andropogoninae, type *Garnotiella philippinensis* Stapf, see *Plantae Junghuhnianae* 3: 367, 368. 1854, *Hooker's Icones Plantarum* 25: t. 2494. 1896.

Gastridium P. Beauv.

Diminutive of the Greek *gaster* “abdomen, belly, paunch,” referring to the base of the spikelets, to the basally swollen glumes; see Ambroise M.F.J. Palisot de Beauvois, *Essai d'une nouvelle Agrostographie, ou nouveaux genres des Graminées*. 21, t. 6, f. 6. Paris 1812.

Some 2-3 species, Mediterranean, North Africa, western Europe. Pooideae, Poodae, Aveneae, or Pooideae, Poeae, Agrostidinae, annual, slender, erect, herbaceous, tufted or sometimes solitary, auricles present or absent, ligule membranous, leaf sheath rounded and sometimes keeled above, leaves flat and linear, plants bisexual, a dense spike-like panicle, spikelets compressed laterally and swollen at the base, 1 bisexual floret, 2 unequal glumes persistent on axis and ventricose, lower glume and upper glume 1-nerved, lemmas cartilaginous more or less incised or dentate, awn present or absent, slender dorsal awn or apical, callus short and blunt, palea narrow and 2-keeled, 2 lodicules free and not toothed, 3 stamens, ovary glabrous, styles free, 2 stigmas, small fruit compressed, weed species, disturbed land, open habitats, grassy places, open pasture, arable land, wasteland, along roadsides, linked to *Agrostis*, type *Gastridium australe* P. Beauv., see *Essai d'une nouvelle Agrostographie, ou nouveaux genres des Graminées*. 21, 164, t. 6, f. 6. 1812 and *Willdenowia* 16(1): 65-68. 1986, *Anales del Jardín Botánico de Madrid* 54: 399-406. 1996, *Taxon* 49(2): 243, 252. 2000, *Brittonia* 54(3): 154-163. 2002, *Contributions from the United States National Herbarium* 48: 369-370. 2003.

Species

G. phleoides (Nees & B. Meyen) C.E. Hubbard (*Agrostis phleoides* (Nees & Meyen) Desv.; *Agrostis ventricosa* auct. non Gouan; *Calamagrostis phleoides* (Nees & Meyen) Steud.; *Gastridium lendigerum* sensu Schwartz; *Gastridium lendigerum* (L.) Desv.; *Gastridium lendigerum* var. *longearistatum* Schweinf.; *Gastridium oblongatum* Coincy; *Gastridium ventricosum* sensu J.M. Black, non (Gouan) Schinz & Thellung; *Gastridium ventricosum* (Gouan) Schinz & Thell.; *Gastridium ventricosum* subsp. *phleoides* (Nees & Meyen) Tzvelev; *Lachnagrostis phleoides* Nees & B. Meyen; *Milium lendigerum* L.)

North Africa, Mediterranean. Annual, rare, tufted, glabrous, slender, erect, basal leaf sheaths keeled, leaf blade flat or folded, leaves rough, ligule obtuse membranous, narrow spike-like panicle with short and erect branches, spikelets 1-flowered and linear-oblong, unequal glumes ventricose and linear-lanceolate, pubescent lemma narrowly elliptic with a toothed apex, awn bent, palea elliptic, lodicules with entire margins, anthers yellow or purple, chasmogamous, weed species, occasional weed of disturbed sites, rubbish, in open habitats, open veld, escarpment mountains, often identified as *Gastridium ventricosum* (Gouan) Schinz &

Thell., see *Species Plantarum, Editio Secunda* 91. 1762, *Observations sur les Plantes des Environs d'Angers* 48. 1818, *Gramineae* 14-15. 1841, *Nova Acta Phys.-Med. Acad. Caes. Leop.-Carol. Nat. Cur.* 19(Suppl. 1): 146-147. 1843, *Flora Chilena* 6: 320. 1854, *Nomenclator Botanicus. Zhurn.* (St. Petersburg) 51(8): 1104. 1966, *Folia*

Geobotanica et Phytotaxonomica 23(4): 413. 1988, *Taxon* 49(2): 243, 252. 2000.

in English: nitgrass, nit grass

in Italian: codino maggiore

in German: Südliches Nissengras

Gastropyrum (Jaub. & Spach) Á. Löve =
Aegilops L., *Gastropyrum* (Jaub.) Á. Löve

From the Greek *gaster*, *gastros* “belly” and *glossa* “tongue.”

Pooideae, Triticeae, or Pooideae, Triticeae, Triticinae, type *Gastropyrum ventricosum* (Tausch) Á. Löve, see *Species Plantarum* 1: 85-87. 1753, *Species Plantarum* 2: 1050-1051. 1753, *Illustrationes Plantarum Orientalium* 4: 12. 1851, *Flore de France* 3: 601. 1856 and *Feddes Repert.* 91: 225-228. 1980, *Biologisches Zentralblatt* 101(2): 207-208. 1982, *Genera graminum. Kew Bulletin, Additional Series* 13: 157-158. 1986 [by W.D. Clayton and S.A. Renvoize], *Taxon* 41: 555-556. 1992, *Taxon* 44: 611-612. 1995, *Contributions from the United States National Herbarium* 48: 20-23, 370. 2003.

Gaudinia P. Beauv. = *Arthrostachya* Link,
Cyclichnium Dulac, *Falimiria* Reichenb.,
Falimiria (Reichenb.) Rchb., *Gaudinia* J. Gay
(Aizoaceae), *Meringurus* Murbeck

Named for the Swiss botanist Jean François Aimé (Gottlieb) Philippe Gaudin, 1766-1833, clergyman, professor of botany at Lausanne, author of *Agrostologia helvetica*. Paris, Genève 1811 and *Flora helvetica*. Zürich 1828-1833. See J.H. Barnhart, *Biographical notes upon botanists*. 2: 33. Boston 1965; see Ambroise Marie François Joseph Palisot de Beauvois, *Essai d'une nouvelle Agrostographie, ou nouveaux genres des Graminées*. 95, 104. Paris 1812; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 141. 1972; Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 382. Ansbach 1852; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 714. Stuttgart 1993.

About 4 species, Mediterranean. Pooideae, Poodae, Aveneae, or Pooideae, Poeae, Aveninae, annual or biennial, tufted, herbaceous, auricles absent, ligule an unfringed membrane, plants bisexual, inflorescence a single spike, bilateral raceme, spikelets sessile and solitary partially embedded in the rachis, several-flowered, 2 glumes subequal or unequal, lower glume 3- to 5-nerved, upper glume 5- to 11-nerved, lemmas coriaceous and keeled with dorsal geniculate awn, palea present, 2 free and membranous lodicules, 3 stamens, ovary hairy, 2 stigmas, disturbed places, weedy areas, open habitats, type *Gaudinia fragilis* (L.) P.

Beauv., see *Essai d'une Nouvelle Agrostographie* 95, 153, 164. 1812, *Hortus Regius Botanicus Berolinensis* 1: 151. 1827, *Conspectus Regni Vegetabilis* 54. 1828, *Flore du Département des Hautes-Pyrénées* 68. 1867 and *Acta Universitatis Lundensis* 36(1): 27. 1900, *Contr. U.S. Natl. Herb.* 24: 192. 1925, *Flora de la Provincia de Buenos Aires* 4(2): 39. 1970, *Grass and Forage Science* 57(3): 224-231. Sep 2002, *Contributions from the United States National Herbarium* 48: 121, 241, 312, 370. 2003, *Botanical Journal of the Linnean Society* 141(1): 125-131. Jan 2003, W.D. Zhang, S.Y. Chen, G.S. Liu and C.C. Jan, “Seed-set and pollen stigma compatibility in *Leymus chinensis*.” *Grass and Forage Science* 59(2): 180-185, June 2004.

Species

G. fragilis (L.) P. Beauv. (*Avena fragilis* L.)

Algeria, Israel, Europe. Short-lived, pasture grass, weed, along roadsides, useful for erosion control, see *Species Plantarum* 80. 1753, *Essai d'une Nouvelle Agrostographie* 95, 153, 164. 1812 and *Anales del Jardín Botánico de Madrid* 44: 509-512. 1987, *Anales del Jardín Botánico de Madrid* 45: 273. 1988, *Boletim da Sociedade Broteriana, ser. 2* 63: 153-205. 1990, *Taxon* 49(2): 247. 2000.

in French: gaudinie

in Morocco: rhortal-diel-ma

G. hispanica Stace & Tutin

Spain. Awnless, see *Botanical Journal of the Linnean Society* 76: 353. 1978, *Taxon* 33: 351-354. 1984, *Anales del Jardín Botánico de Madrid* 45: 273. 1988.

G. maroccana Trab.

Morocco. Shortly awned, see *Botanical Journal of the Linnean Society* 76: 353-356. 1978.

Gaudinopsis (Boissier) Eig = Gaudiniopsis
(Boiss.) Eig, *Ventenata* Koeler

Resembling *Gaudinia*.

One species, Asia Minor. Pooideae, Poodae, Aveneae, or Pooideae, Poeae, Agrostidinae, annual, herbaceous, erect or ascending, auricles absent, ligule an unfringed membrane, plants bisexual, inflorescence paniculate and contracted, 2 glumes very unequal, lower glume 3-nerved, upper glume 3- to 5-nerved, palea short, 2 free and membranous lodicules, 3 stamens, ovary glabrous, 2 stigmas, sometimes referred to *Ventenata*, see *Descriptio Graminum in Gallia et Germania* 272. 1802, *Flora Taurico-Caucasica* 1: 77. 1808, *Flora Orientalis* 5: 540. 1884 and *Repertorium Specierum Novarum Regni Vegetabilis* 26: 74. 1929, *Notes from the Royal Botanic Garden, Edinburgh* 40(1): 81, 85-86. 1982, *Willdenowia* 13(1): 111. 1983, *Notes from the Royal Botanic Garden, Edinburgh* 40(3): 507. 1983, *Notes from the Royal Botanic Garden, Edinburgh* 42(1): 74. 1984,

Conspectus Florae Orientalis 6: 93. 1991, *Contributions from the United States National Herbarium* 48: 370, 688. 2003.

Species

G. macra (Steven ex M. Bieb.) Eig (*Avena macra* Steven ex M. Bieb.; *Ventenata macra* (Steven ex M. Bieb.) Boiss.)

Eurasia. See *Flora Taurico-Caucasica* 1: 77. 1808, *Flora Orientalis* 5: 540. 1884.

Gazachloa J.B. Phipps = *Danthoniopsis* Stapf

Perhaps from the Greek *gaza* “riches, the royal treasure” and *chloe*, *chloa* “grass,” Latin *gaza*, *ae* “wealth.”

Arundinelleae, type *Gazachloa chimanimaniensis* J.B. Phipps, see *Hooker's Icones Plantarum* 31: t. 3075. 1916, *Kirkia* 4: 116. 1964, *Kirkia* 5: 235-258. 1966, *Kew Bulletin* 21(1): 119-124. 1967, *Kew Bulletin* 26(1): 111-123. 1971.

Gelidocalamus T.H. Wen = *Indocalamus* Nakai

From the Latin *gelidus* “very cold” and *calamus* “a reed, cane.”

About 11-12 species, Taiwan, China, Guangdong, Guangxi, Hunan. Bambusoideae, Bambuseae, Arundinariinae, shrub-like or arbuscular, sympodial, erect, twig short with 2-3 internodes, manifold branching, branches slender and fascicled, internodes cylindrical, leaves with veinlets on both surfaces, sheath persistent, auricles absent or present, sheath blade awl-shaped, large panicle, 6 stamens, 1-2 stigmas, forests and along streams, in mountainous regions, type *Gelidocalamus stellatus* T.H. Wen, see *Flora Boreali-Americana* 1: 73. 1803 and *Journal of the Arnold Arboretum* 6(3): 148, 152. 1925, *Technical Bulletin of the National Forestry Research Bureau* (China) 8: 15. 1948, *Taxon* 6(7): 203, 209. 1957, *Journal of Bamboo Research* 1(1): 21, 140-164. 1982, *Bambou* 7: 22. 1990, Li, Z.-L., The *Flora of China* Bambusoideae project — problems and current understanding of bamboo taxonomy in China. *The Bamboos* 5: 61-81. 1997, *Contributions from the United States National Herbarium* 39: 63-64. 2000.

Species

G. albopubescens W.T. Lin & Z.J. Feng

China. See *Acta Phytotaxonomica Sinica* 30(6): 561, f. 3, 1-2. 1992.

G. annulatus T.H. Wen

China, Guizhou. Young culms finely pubescent and verrucose, manifold branching, internodes crooked, a branch with 2-4 internodes, sheath persistent with white flecks,

sheath auricles absent, sheath ligule truncate and scabrous, sheath blade narrow, 1-2 leaves on each twig, leaves broadly lanceolate to rectangular, see *Journal of Bamboo Research* 7(1): 27-28, f. 3. 1988.

G. kunishii (Hayata) Keng f. & T.H. Wen (*Arundinaria kunishii* Hayata; *Pleioblastus kunishii* Hayata; *Pleioblastus kunishii* (Hayata) Ohki; *Pleioblastus kunishii* Ohki; *Pseudosasa kunishii* (Hayata) Makino & Nemoto; *Pseudosasa kunishii* Makino & Nemoto; *Pseudosasa taiwanensis* Masamune & Mori; *Sinarundinaria kunishii* (Hayata) Kanehira & Hatusima; *Sinobambusa kunishii* (Hayata) Nakai; *Sinobambusa kunishii* Nakai)

Taiwan. Culms hollow and green below the nodes, normally three branches on each node, nodes of lower culm with aerial roots, more branches clustered at upper part of the culm, sheath coriaceous caducous purplish red, sheath auricles inconspicuous, sheath ligule truncate with a ciliate margin, sheath blade narrow-lanceolate to linear-lanceolate, 1-3 or more leaves on each twig, leaves elliptic to lanceolate, used for fences and for making pipes, see *Icones plantarum formosandarum nec non et contributiones ad floram formosanam*. 6: 136-137, f. 47. 1916, *Botanical Magazine* (Tokyo) 42: 581. 1928, *Flora of Japan* edition. 2. 1389. 1931, *Science Education [Rika Kyô-iku]* 15: 77. Tokyo 1932, *Transactions of the Natural History Society of Taiwan* 29: 23, 25. 1939, *Transactions of the Natural History Society of Taiwan* 30: 239. 1940, *Journal of Bamboo Research* 2(1): 20. 1983.

in Japan: Taiwan-yadake

G. latifolius Q.H. Dai & T. Chen

China, Guangxi. Dark green, densely silky, 3-8 branches on each node and only 1 leaf on each branch, sheath auricles absent, sheath without dark purple flecks and hispid, no sheath auricles, sheath blade linear-lanceolate and wrinkled, sheath ligule short, leaves ovate lanceolate, used for arrow shaft, leaves used for wrapping rice food, see *Journal of Bamboo Res.* 4(1): 53-55, f. 1. 1985.

G. longüinternodus T.H. Wen & S.C. Chen

China, Hunan. Young internodes densely silky, manifold branching, branches clustered together, sheath coriaceous persistent, sheath auricles elliptic and conspicuous and glabrous, sheath blade lanceolate, 1-3 leaves on each twig, leaves broad-lanceolate to elliptic, see *Journal of Bamboo Res.* 5(2): 24, f. 6. 1986.

G. monophyllus (Yi & B.M. Yang) B.M. Yang (*Yushania monophylla* Yi & B.M. Yang)

China. See *Journal of Bamboo Res.* 5(1): 50, f. 18. 1986, *Nat. Sci. J. Hunan Norm. Univ.* 12(4): 338. 1989.

G. multifolius B.M. Yang

China, Jiangxi. Sheath green, sheath auricles absent, sheath ligule truncate or concave, sheath blade linear-lanceolate glabrous, 4-6 branches on each node, 2-4 leaves on each

branch, leaves lanceolate or ovate pubescent beneath, see *Nat. Sci. J. Hunan Norm. Univ.* 9(3): 4-6, f. 2, 3. 1986.

G. rutilans T.H. Wen

China, Zhejiang. Young culms glaucous, slender branches, not pruinose, sheath pubescent or hispid, sheath auricles absent, sheath ligule arcuate, leaves sheathless, see *Journal of Bamboo Res.* 2(1): 66, f. 18. 1983.

G. solidus C.D. Chu & C.S. Chao

China, Guangxi. Culms solid, robust, green, straight, pubescent, 4-5 branches per node, branch with 3-4 internodes, sheath persistent, auricles inconspicuous, sheath ligule convex with a ciliate margin, sheath blade linear-lanceolate, 1-3 leaves on each branch, leaves broad-lanceolate, used for hedge, leaves used for wrapping rice food, see *Journal of Nanjing Institute of Forestry* 1984(2): 75, f. 2. 1984.

G. stellatus T.H. Wen (*Gelidocalamus monophyllus* (T.P. Yi & B.M. Yang) B.M. Yang; *Yushania monophylla* T.P. Yi & B.M. Yang)

China, Jiangxi. Type species, green, glabrous, pruinose, culms hollow and glaucous below the nodes, sheath persistent, sheath auricles inconspicuous, twig slender, only 1 leaf on each twig, leaves lanceolate to broad-lanceolate, edible shoot, ornamental, see *Journal of Bamboo Res.* 1(1): 22-23, f. 1. 1982, *Journal of Bamboo Research* 5(1): 50, f. 18. 1986, *Nat. Sci. J. Hunan Norm. Univ.* 12(4): 338. 1989, *Acta Phytotaxonomica Sinica* 29(5): 452-455. 1991.

G. subsolidus W.T. Lin & Z.J. Feng

China. Young culms glaucous, auricles absent, leaves sheathing, see *J. Nanjing Inst. For.* 1984(2): 73-75, f. 1. 1984, *Guihaia* 10(1): 18-19, f. 3. 1990.

G. tessellatus T.H. Wen & C.C. Chang

China, Libo, Guizhou. White tomentum, silky, sheath coriaceous, sheath auricles absent, sheath with dark purple flecks and glabrous, leaves broad-lanceolate, see *Journal of Bamboo Res.* 1(1): 24, f. 2. 1982.

G. velutinus W.T. Lin & X.B. Ye

China. Conspicuous auricles oblong and velutinous, see *Acta Phytotaxonomica Sinica* 26(3): 233-245, f. 14. 1988.

Genea (Dumort.) Dumort. = *Bromus* L.,
Genea Vittad. (Fungi)

From the Greek *genea* "race, family, offspring, generation."

Pooideae, Bromeae, see *Species Plantarum* 1: 76-78. 1753, *Observations sur les Graminées de la Flore Belgique* 116. 1823 [1824], *Monogr. Tubercularum* 27. 1831, *Bulletin de la Société Botanique de Belgique* 7: 67. 1868 and *U.S.D.A. Div. Agrostol. Bull.* 23: 1-66. 1900, *Brittonia* 7: 421. 1952, *Notes Roy. Bot. Gard. Edinburgh* 30: 366. 1970, *Taxon* 41: 559. 1992, *Taxon* 44: 611-612. 1995, *Contributions from*

the United States National Herbarium 48: 154-191, 370. 2003.

Geopogon Steud. = *Chloris* Sw.

From the Greek *gea* "earth, land, ground" and *pogon* "beard."

Chloridoideae, Cynodonteae, Chloridinae, see *Nova Genera et Species Plantarum seu Prodromus* 1, 25. 1788, *Nomenclator Botanicus. Editio secunda* 1: 353. 1840 and *Contributions from the United States National Herbarium* 41: 39-52. 2001.

Germainia Balansa & Poitr. =
Balansochloa Kuntze, *Chumsriella* Bor,
Germainia Post & Kuntze (Lamiaceae, alt.
Labiatae), *Sclerandrium* Stapf & C.E. Hubb.

About 8-9 species, northern Australia, Southeast Asia, tropics. Panicoideae, Andropogonodae, Andropogoneae, Andropogoninae, perennial or sometimes annual, herbaceous, tufted, stoloniferous, auricles absent, ligule membranous, plants monoecious, capitate inflorescence enclosed by a bractiform involucre of sessile spikelets, digitate racemes, large imbricate sessile spikelets, pedicelled spikelets enclosed by an involucre of sessile spikelets, all the fertile spikelets unisexual, sessile spikelets male or barren, pedicelled spikelets female, male and female-fertile spikelets mixed in the inflorescence, sessile and involucral spikelets awnless, 2 male florets, 2 glumes more or less equal or subequal, coriaceous to papery lower glume 0- to 5-nerved, upper glume 0- to 3-nerved, palea present, lodicules absent, no stamens, ovary glabrous, 2 stigmas, desert and arid places, savannah, type *Germainia capitata* Balansa & Poitr., see *Bulletin de la Société d'Histoire Naturelle de Toulouse* 7: 344, f. 1-9. 1873, *Flora Australiensis: A Description ...* 7: 518. 1878, *Journal de Botanique (Morot)* 4: 83. 1890 and *Lexikon Generum Phanerogamarum* 247. 1903 [1904], *Bulletin du Muséum d'Histoire Naturelle* 25: 285. 1919, O. Stapf & Charles Edward Hubbard, *Hooker's Icones Plantarum*. Ser. 5. 3, t. 3262. 1935, *Die natürlichen Pflanzenfamilien, Zweite Auflage* 14e: 124. 1940, *Australian Journal of Botany* 2: 108. 1954, *Journal of the Royal Society of Western Australia* 44(3): 77-83. 1961, *Dansk Botanisk Arkiv* 23(4): 467-471. 1968, *Thai Forest Bulletin. Botany* 6: 29-59. 1972, *Genera Graminum* 337-338. 1999, *Blumea* 45: 443-475. 2000.

Species

G. capitata Balansa & Poitr. (*Themeda capitata* (Balansa & Poitr.) Roberty)

Southeast Asia. See *Bulletin de la Société d'Histoire Naturelle de Toulouse* 7: 344, f. 1-9. 1873 and *Boissiera*.

Mémoires du Conservatoire de Botanique et de l'Institut de Botanique Systématique de l'Université de Genève 101. 1960, *Queensland Dept. Prim. Ind. Bot. Branch Tech. Bull.* no. 3: 11. 1978, *Blumea* 45: 443-475. 2000.

G. flosculosa (F. Muell.) C.E. Hubb. (*Anthistiria flosculosa* F. Muell.)

Australia. See *Fragmenta Phytographiae Australiae* 10: 75. 1876 and *Kew Bulletin* 1934: 445. 1934, *Thai Forest Bulletin. Botany* 6: 46. 1972 [under "dubious species"].

G. grandiflora (S.T. Blake) Chai-Anan (*Sclerandrium grandiflorum* S.T. Blake)

Australia. See *Australian Journal of Botany* 2: 108. 1954, *Thai Forest Bulletin. Botany* 6: 44, figs 1. 8. 1972.

in English: yellow spear grass

G. lanipes Hook.f.

Asia, India. See *The Flora of British India* 7(21): 163. 1897 [1896].

G. pilosa Chai-Anan

Thailand. Lower glume chartaceous, see *Thai Forest Bulletin. Botany* 6: 39, f. 3. 1972.

G. tenax (Balansa) Chai-Anan (*Lophopogon tenax* Balansa; *Sclerandrium tenax* (Balansa) Pilg.)

Thailand. Lower glume papery, see *Journal de Botanique (Morot)* 4: 83. 1890 and *Die natürlichen Pflanzenfamilien, Zweite Auflage* 14e: 124. 1940, *Thai Forest Bulletin. Botany* 6: 35. 1972.

G. thailandica (Bor) Chai-Anan (*Chumsriella thailandica* Bor)

Thailand. Lower glume chartaceous, see *Dansk Botanisk Arkiv* 23: 467. 1968, *Thai Forest Bulletin. Botany* 6: 37. 1972.

G. truncatiglumis (F. Muell. ex Benth.) Chai-Anan (*Ischaemum truncatiglume* F. Muell. ex Benth.; *Lophopogon truncatiglumis* (F. Muell. ex Benth.) Hack.; *Sclerandrium truncatiglume* (F. Muell. ex Benth.) Stapf & C.E. Hubb.)

Asia, Australia. See *Flora Australiensis: A Description* ... 7: 518. 1878, *Monographiae Phanerogamarum* 6: 255. 1889 and *Hooker's Icones Plantarum* 33: t. 3262. 1935, *Thai Forest Bulletin. Botany* 6: 45, figs. 1, 9. 1972.

Gerritea Zuloaga, Morrone & Killeen

Dedicated to Gerrit Davidse, agrostologist, Missouri Botanical Garden.

One species, Bolivia. Panicoideae, Panicodae, Paniceae, perennial, herbaceous, branched, tufted, erect and procumbent, rigid, ligule a fringed membrane, plants bisexual, inflorescence paniculate and terminal, 2 florets, spikelets flattened and solitary, 2 glumes unequal to subequal, lower glume 3-nerved, lower lemma glabrous, palea present, 2

free and fleshy lodicules, 3 stamens, ovary glabrous, 2 stigmas cream or white, shady places, moist areas, see *Novon* 3(2): 213-219. 1993.

Species

G. pseudopetiolata Zuloaga, Morrone & Killeen

Bolivia. Lax inflorescence, panicle elliptic-oblong, see *Novon* 3(2): 213, f. 1-2. 1993.

Gigachilon Seidl = *Triticum* L.

Probably from the Greek *gigas* "a giant" and *cheilos*, *chilos* "lip."

Pooideae, Triticeae, Triticinae, see *Species Plantarum* 1: 85-87. 1753, *Oekonomisch-technische Flora Böhmens* 1: 425. 1836, *Annales des Sciences Physiques et Naturelles, d'Agriculture et de l'Industrie, Publiées par la Société Royale d'Agriculture, etc., de Lyon*. 5: 103-196, pl. 2-10. 1842 [*Descriptions et figures des céréales européennes*] and *Feddes Repert.* 95(7-8): 497. 1984, *Taxon* 35: 144-149. 1986, *Wageningen Agricultural University Papers* 94-7: 1-512. 1994, *Contributions from the United States National Herbarium* 48: 370, 676-684. 2003.

Gigantochloa Kurz ex Munro = *Gigantochloa* Munro

From the Greek *gigas*, *gigantos* "a giant" and *chloe*, *chloa* "grass," giant bamboos.

About 15-37 species, Southeast and tropical Asia, Indomalayan forests, Assam to Malaya. Bambusoideae, Bambusoideae, Bambuseae, Bambusinae, perennial, sympodial, robust, straight, usually large, erect to suberect, more or less scandent, usually never climbing or clambering, arborescent, woody to moderately thick-walled, basal nodes with short aerial roots, manifold branching, branching at upper part of the culm, unarmed, densely tufted, persistent, naked at the base, rhizomes pachymorph, young culm often coarsely hairy, culm sheath deciduous, blades erect first then spreading, large leaves auriculate, inflorescences on branches of leafless culms, plants bisexual, large compound inflorescence, pseudospikelets at nodes of flowering branches, 2 to several glumes present, long narrow empty lemma, palea of all florets strongly 2-keeled, lodicules absent or present, 6 stamens, ovary hairy, 1 stigma plumose or 1-3, useful species, wild or cultivated, naturalized, in forest margins, along rivers and dry riverbeds, steep slopes, heavy clay soils, humid tropics, forest, lowlands and highlands, wastelands, disturbed forests, wet montane forests, type *Gigantochloa atter* (Hassk.) Kurz, see *Natuurkundig Tijdschrift voor Nederlandsch-Indië* 27: 226. 1864, *Transactions of the Linnean Society of London* 26(1): 123. 1868 and *Fieldiana, Botany* 24(2): 38-331. 1955, *Taxon* 5: 28-

30. 1956, *Reinwardtia* 10(3): 291-380. 1987, *Plant Resources of South-East Asia* 7: 1-191. 1995, Li, Z.-L., *The Flora of China Bambusoideae project — problems and current understanding of bamboo taxonomy in China. The Bamboos* 5: 61-81. 1997, *Contributions from the United States National Herbarium* 39: 58. 2000.

Species

G. spp.

Common names: awi ater, awi hideung, awi lengka tali, awi tali, awi tela, awi temen, awi ular, bambu apus, bambu hitam, bambu lengka tali, bambu tali, bulok busi, buluh awi, buluh didi, buluh elang, buluh hariman, buluh koreng, buluh kuring, buluh kuring biasa, buluh kuring hitam, buluh leku-kai, buluh mario, buluh mayan, buluh munti, buluh serik, buluh soriak, buluh sorik, buluh tali, paring tali, perreng keles, perreng queles, perreng tale, pring apus, pring ireng, pring jajang kapur, pring jajang kertas, pring Jawa, pring legi, pring tali, pring ulung, pring wulung, tiying putih, tiying tabah, tiying tali, tyng tali, wado, wapado, watho, wato

G. achmadii Widjaja

Indonesia, Sumatra. Internodes yellowish green, culm sheath dark brown pubescent, blade ovate, inflorescence on leafless branch, groups of pseudospikelets at each node, culms used for construction, in forest, see *Reinwardtia* 10(3): 373. 1987.

in Indonesia: buluh apa, buluh apo

G. albociliata (Munro) Kurz (*Dendrocalamus albociliata* (Munro) J.L. Sun; *Gigantochloa albo-ciliata* (Munro) Kurz; *Oxytenanthera albociliata* Munro; *Pseudotenanthera albociliata* (Munro) R.B. Majumdar; *Pseudoxytenanthera albociliata* (Munro) T.Q. Nguyen)

Myanmar, Thailand, China, Yunnan. Arborescent, densely tufted, sympodial, evergreen or deciduous, walls moderately thick, young culms densely pubescent, culms elongate-arcuate, top bending, nodes prominent, internodes light green, manifold branching, branches arising at nodes, culm sheaths folded and coriaceous, sheath blade erect, sheath auricles inconspicuous, sheath ligule present and developed, leaves glaucescent beneath, leaf blades linear-lanceolate and chartaceous, slender spreading branchlets bearing clusters of 10-20 pseudospikelets at each node, spikelets elongate-linear more or less curved, 1-2 male florets and 1-2 hermaphrodite florets, 1-2 empty glumes, paleas 2-keeled, stamens long-exserted, ovary pubescent, 2 stigmas, can be propagated by seed and by rhizome cuttings, flowers sporadically and gregariously, seeds from such sporadic flowering are sterile, often deciduous in the dry season, a troublesome weed, cultivated ornamental garden plant, young shoots eaten as a vegetable, used in light construction, fences, furniture, for weaving, raw material for paper, in dry forest hills, dry tropical mixed forest, well-drained

soils, see *Transactions of the Linnean Society of London* 26(1): 129. 1868, S. Kurz (1834-1878), *Preliminary Report on the Forest and other Vegetation of Pegu* App. A: 136, App. B: 93. Calcutta 1875, *Forest Flora of British Burma* 2: 555. 1877 and *Fl. Ind. Enumerat.-Monocot.* 280. 1989, *Bot. Zhurn. (Moscow & Leningrad)* 76(7): 993. 1991.

in Cambodia: rosey khlech

in India: kalia, kalisuneti

in Myanmar: wa-hpyu-ka-le

in Thailand: hai, phai-rai, phai-ruaklek, phai ruak, phai sot

G. albopilosa K.M. Wong (*Gigantochloa latifolia* var. *alba* Holttum)

Peninsular Malaysia. Stiffly erect, see *Gard. Bull. Sing.* 16: 133. 1958.

Local names: buluh apa, buluh pahit

G. albovestita (Holttum) K.M. Wong (*Gigantochloa scortechinii* var. *albovestita* Holttum)

Peninsular Malaysia. Erect, see *Gard. Bull. Sing.* 16: 124. 1958.

G. apus (Schult. & Schult.f.) Kurz (*Bambusa apus* Schult. & Schult.f.; *Gigantochloa apus* (J.H. Schultes) Kurz ex Munro; *Gigantochloa kurzii* Gamble; *Gigantochloa takserah* Camus; *Schizostachyum apus* (Schult. & Schult.f.) Steud.)

India, Indonesia, Myanmar, Thailand. Strongly tufted, open, sympodial, erect, drooping, shiny, glabrous, culm size variable, branched from the upper half portion of the culm, culm sheaths persistent, nodes slightly swollen, leaf blades lanceolate, leafy panicles, groups of pseudospikelets and each group with up to 30 pseudospikelets, slender spikelets narrowly ovate with 3 perfect florets, 2-3 empty glumes, lemmas with stiff pointed apex, paleas acute, ovary densely hairy at the apex, stigma plumose, flowers very rarely, commonly propagated by rhizome and culm cuttings, young shoots very bitter eaten as a vegetable once the taste is removed, used for building materials and for making strings, roofings and walls, basketry, fishery and cooking utensils, weaving hats, grows in open areas or disturbed forests, tropical humid lowlands, on sandy soil or clay soil, along riverbanks, on hill slopes, see *Systema Vegetabilium* 7(2): 1353. 1830, *Synopsis Plantarum Glumacearum* 1: 332. 1854, *Natuurkundig Tijdschrift voor Nederlandsch-Indië* 27: 226. 1864, *Annals of the Royal Botanic Garden, Calcutta* 7: 65, t. 56. 1896 and *Fieldiana, Botany* 24(2): 38-331. 1955, *Reinwardtia* 10(3): 348-353. 1987, *PROSEA* 7: 100-102. 1995.

in India: tekserah

in Indonesia: bambu tali, bambu apus, pring tali, pring apus, awi tali

in Thailand: buulo maataa ruusa, phai kriap, phai ta kwang, phai taa kwaang, taa kwaang

Local common names: awi tali (Sundanese), bambu apus, bambu tali, perreng tale, pring apus (Javanese), pring tali, tying tali, wado, wapado, watho, wato

G. atroviolacea Widjaja (*Gigantochloa atter* sensu Kurz; *Gigantochloa atter* f. *nigra* Hildebrand; *Gigantochloa atter* var. *nigra* Gamble; *Gigantochloa verticillata* (Willd.) Munro sensu Backer)

Java, origin unknown. Loosely tufted, clumped, sympodial, branched, variable, thin culms purplish to blackish, lower nodes with aerial roots, young shoots slender, culm sheath auricles rounded, leaf blades lanceolate and glabrous, branches with groups of pseudospikelets, spikelets ovoid-lanceolate, 4 perfect florets and 1 imperfect terminal, glumes mucronate, lemmas acuminate, narrow paleas acute and pointed, lodicules absent, ovary hairy, propagated vegetatively by rhizome or culm cuttings, used for building construction and for making furniture, traditional musical instruments (*angklung*, *calung*, *celempung*, *gambang*) and handicrafts, widely cultivated, young shoots edible, grows in dry areas, humid lowland tropics, limestone, related to *Gigantochloa atter* (Hasskarl) Kurz, see *Annals of the Royal Botanic Garden, Calcutta* 7: 61. 1896 and *Handb. Fl. Java* 2: 275. 1928, *J. American Bamboo Society* 5(3-4): 58, 67. 1984 [1986], *Reinwardtia* 10(3): 323-327, f. 10-12. 1987, *PROSEA* 7: 102-104. 1995.

in English: black bamboo

in Indonesia: bambu hitam, pring ulung, pring wulung, awi hideung

Common names: awi hideung, awi tali, bambu hitam, bambu tali, perreng tale, pring ireng, pring tali, pring ulung, pring wulung, tying tali, wado, wapado, watho, wato

G. atter (Hasskarl) Kurz (*Bambusa atter* Hassk.; *Bambusa atter* Hassk. ex Kurz; *Bambusa thouarsii* Kunth; *Bambusa thouarsii* var. *atter* Hassk.; *Bambusa verticillata* Willd.; *Gigantochloa atter* Munro; *Gigantochloa atter* (Hasskarl) Kurz ex Munro; *Gigantochloa verticillata* (Willd.) Munro sensu Backer p.p.)

Malaya, Indonesia, origin unknown. Large, densely tufted, sympodial, distinct rings on the nodes, lower nodes with aerial roots, culm sheaths auricles rounded to curved outward, leaf blades oblong-lanceolate and glabrous, pseudospikelets groups at the nodes of leafy branches, spikelets ovoid-lanceolate, 4 perfect florets and 1 terminal imperfect, glumes mucronate at apex, lemmas acuminate, paleas acuminate and keeled, lodicules absent, flowers gregariously and subsequently dies, propagated vegetatively by rhizome or culm cuttings, cultivated, young shoots delicious, culms used for building material and for making musical instruments, furniture, see *Species Plantarum. Editio quarta* 2: 245. 1799, *The Cyclopaedia; or, Universal Dictionary of Arts, ...* 24: no. 3. 1819, *Plantae Javanicae Rariores* 41. 1848, *Fl. Nederl. Ind.* 3, 3: 416. 1857, *Natuurkundig Tijdschrift voor Nederlandsch-Indië* 27: 226.

1864, *Transactions of the Linnean Society of London* 26(1): 123, 124, 125. 1868 and *Reinwardtia* 10(3): 315-323, f. 6-9. 1987.

in English: sweet bamboo

in Indonesia: awi temen, bambu ater, buluh jawa, péréng keles, perreng keles, perreng queles, pring legi

in Java: bambu legi (= sweet bamboo)

in the Philippines: kayali

Local names: awi ater, awi hideung, awi tali, bambu apus, bambu hitam, bambu tali, perreng tale, pring apus, pring ireng, pring Jawa, pring tali, pring ulung, pring wulung, tying tali, wado, wapado, watho, wato

G. auriculata (Kurz) Kurz (*Bambusa auriculata* Kurz; *Gigantochloa nigrociliata* var. *hohenackeri* (Fisch.) H.B. Naithani; *Oxytenanthera auriculata* (Kurz) Prain; *Oxytenanthera nigrociliata* (Büse) Munro; *Oxytenanthera nigrociliata* var. *hohenackeri* Fisch.)

Myanmar, India, Bangladesh. Suitable for paper-pulp, see *Plantae Junghuhniana* 3: 389. 1854, *Transactions of the Linnean Society of London* 26(1): 123, 128. 1868, *Journal of the Asiatic Society of Bengal* 39(2): 86. 1870, *Preliminary Report on the Forest and other Vegetation of Pegu* App. A. 137; App. B. 94. 1875, *Forest Flora of British Burma* 2: 557. 1877, *Annals of the Royal Botanic Garden, Calcutta* 7: 55, pl. 49. 1896 and *Bengal Plants* 2: 1234. 1903, *Flora of the Presidency of Madras* 10: 1861. 1934, *Flow. Pl. India, Nepal and Bhutan* 514. 1990.

in India: bolanji, kalia, podah, washut

in Thailand: phai man

Local name: talakuva, talakuwa

G. balui K.M. Wong (after the local vernacular name)

Origin unknown. Densely tufted, large to medium, thin walls, densely clumped, sympodial, erect and arching outward, internodes not waxy, nodes not prominent, culm sheaths with silver hairs, groups of 3-10 pseudospikelets at each node on branches of leafy or leafless culms, spikelets flattened, 2-3 perfect florets and a vestigial terminal one, 3-5 glumes, empty lemma, palea keels hairy, propagated vegetatively by rhizome or culm cuttings, cultivated and wild, young shoots edible, culms used as fishing stakes and for framing, making handicrafts, building structures, growing on rich alluvial sites, secondary forest, along roadsides, wastelands, riverbanks, see *For. Dept. Occ. Papers, Brunei* 1: 1-10. 1990 [also *Brunei Forestry Department, Occasional Papers*], S. Dransfield, "The bamboos of Sabah." *Sabah Forest Record* 14: 38-43. 1992.

in Brunei: buluh balui

in Indonesia: buluh abe

in Malaysia: balui, bambu taris, buluh taris

G. calcicola Widjaja

Indonesia. See *Reinwardtia* 11(2): 57-152. 1997.

G. cochinchinensis A. Camus

Vietnam. See *Bulletin du Muséum d'Histoire Naturelle* 26: 567. 1920, *Bulletin du Muséum d'Histoire Naturelle* 28: 381. 1922, *Fl. Génér. Indo-Chine* 7, 1: 623. 1923.

in Thailand: phai sot

G. compressa R. Parker

Burma. See *Indian Forester* 54: 98, pl. 9. 1928.

in Thailand: phai khaai dam, phai khai dam, phai kam dam

G. felix (Keng) Keng f. (*Oxytenanthera felix* Keng)

China, Yunnan. Green, young culms tomentose, most of the branches spreading, sheath coriaceous and caducous, sheath auricles and cilia absent, sheath blade long-triangular to broadly lanceolate, leaves pubescent underside, edible shoots, culms used in construction and furniture making, see *Journal of the Washington Academy of Sciences* 30(10): 425. 1940, *Journal of Bamboo Research* 3(1): 24. 1984.

G. hasskarliana (Kurz) Backer ex Heyne (*Melocanna hasskarliana* Kurz ex Teijsmann & Binn.; *Schizostachyum hasskarlianum* Kurz) (dedicated to the German botanist Justus Karl Hasskarl, 1811-1894, traveler (Java), author of *Horti malabarici Rheedeani clavis locupletissima*. Dresden 1867, he was a friend of the Dutch physician Pieter Bleeker, 1819-1878, naturalist and zoologist; see J.H. Barnhart, *Biographical notes upon botanists*. 2: 137. 1965; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 167. 1972; Ethelyn Maria Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. Philadelphia 1964; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993)

Peninsular Malaysia, Indonesia. Erect, sympodial, thin-walled, densely tufted, young internodes covered with dark brown hairs, young shoots very slender, culm sheaths triangular with erect and lanceolate blades, sheath ligule irregularly toothed, sheath auricles firm and rimlike, leaf blade lanceolate, leaves glabrous on lower surface, spikelets arranged in clusters at the distal nodes of a shoot terminating a leafy branch, up to a 20 clustered pseudospikelets in a cluster, slender spikelets narrowly ovoid, 3-4 perfect florets and 1 vestigial apical floret, 2 glumes, lodicules absent, 6 stamens, propagated from rhizome and culm cuttings, wild and widely planted, very fast growing, young shoots may be eaten, used as a tall fence and large living hedges, basketry, used to prevent soil erosion and for establishing large living hedges, humid tropics conditions, lowlands, steep hills, see *Neue Entdeckungen im ganzen Umfang der Pflanzenkunde* 2: 43. 1820, *Indian Forester* 1: 352. 1876 and *De Nuttige Planten van Nederlandsch- Indië* 1: 299. 1927, *Gard. Bull. Sing.* 16: 118-119. 1958 [also *Gardens' Bulletin*,

Straits Settlements], *Flora of Java* 3: 636-637. 1968, *Reinwardtia* 10(3): 335-339, f. 16-17. 1987.

in Indonesia: bambu lengka tali, bambu tali, bulok busi, buluh sorik

in Thailand: phai phaak man, phai phak, phai phak man

Local common names: awi ater, awi hideung, awi lengka tali, awi tali, awi tela, awi temen, bambu hitam, buluh didi, buluh lekukai, buluh mayan, perreng tale, pring ireng, pring jajang kapur, pring jajang kertas, pring Jawa, pring legi, pring tali, pring ulung, pring wulung, tiying putih, tiying tali, tying tali, wado, wapado, watho, wato

G. heteroclada Stapf

Gigantochloa robusta Kurz; *Gigantochloa scribneriana* Merrill) (for Hugh McCullum Curran, 1875-1920)

Origin unknown, Malaysia, Indonesia, the Philippines, China, Yunnan. Erect, strong, densely tufted, sympodial, nonwaxy culms, thick-walled, most of branches fascicled, young culms densely covered with brown or white tomentum, nodes not swollen, internodes densely dark hairy, culm sheath broadly triangular and dark hairy, culm sheath caducous and coriaceous, sheath auricles oblong and ciliate, sheath ligule developed and lacerate, inflorescence a cluster of up to 70-75 pseudospikelets at the node, 4-5 perfect florets and a vestigial terminal floret reduced to an empty lemma, 2-3 bracts, 2-3 glumes, 3 lodicules, wild or cultivated and naturalized, propagated vegetatively by rhizome or culm cuttings, vegetable, good quality edible shoots, used as building material, framework, for making rafts, handicraft, fences, water pipes, raw material for papermaking, split for plaiting walls, commonly found on slopes of hills, secondary forest, lowlands, hill forest, can be confused with *Dendrocalamus asper* (Schult. & Schult.f.) Backer ex Heyne and *Gigantochloa thooi* K.M. Wong, see *Species Plantarum. Editio quarta* 2: 245. 1799, *Flora de Filipinas* 1: 272. 1837, *Syn. Pl. Glumac.* 1: 331. 1854, *Transactions of the Linnean Society of London* 26(1): 123, 124, 150, 152, pl. 6. 1868, *Indian Forester* 1: 344. 1876, *Revisio Generum Plantarum* 2: 761. 1891 and *Philippine Journal of Science* 1(Suppl.): 390. 1906, *Philippine Journal of Science* 5: 271, 291. 1910, *Philippine Journal of Science* Sect. C, Botany, 8(4): 203-206. 1913, *American Journal of Botany* 3(2): 61. 1916, *Gardens' Bulletin, Straits Settlements* 16: 1-135. 1958, *Journal of Agricultural Research Quarterly* 20(1): 85-91. 1986, *Reinwardtia* 10(3): 353-357, f. 26-27. 1987, *Sabah Forest Record* 14: i-xi, 1-94. 1992, *Sandakanian* 1: 15-21, f. 1. 1992.

in English: smooth-shoot gigantochloa

in Brunei: buloh betung, buluh betung

in Indonesia: buluh suluk, buluh tup

Local names: anoh, boho, bulih betung, buluh pering, buluh poring, poring, poring bamboo

in Malaysia: paling, pering, poring

in the Philippine Islands: boko, bolo, bongcina, botong, buhong-china, bulung-china, buton, kabolian, kauayang-china, kauayang-puti, kauayan-sina, kayali, patong

G. ligulata Gamble

Peninsular Malaysia, Thailand, China, Yunnan. Densely tufted, sympodial, thick-walled to solid, slender, closely growing, clambering up trees, curved, top drooping, culm with yellow streaks, young culms densely tomentose, nodes prominent, internodes dark green, branching from the lower half of the culm, culm sheath persistent or caducous, sheath blade erect and lanceolate to broadly lanceolate, sheath ligule thin and prominent, sheath auricles more or less

curved and more or less absent or present, large leafed, leaves erect, leaf blades oblong-lanceolate to long-triangular, drooping inflorescence, pseudospikelet clusters at the distal nodes, spikelet ovate-lanceolate, 2-4 perfect flowers and 1 rudimentary sterile floret, 3-4 glumes, lemma fringed, lodicules absent, 6 stamens, flowering cycle poorly known, very variable species, ornamental, vegetable, edible shoots, raw material for paper pulp, used for rural construction and for making mats and baskets, for furniture making, to frame chairs, for weaving, usually found in damp ground, wet tropical monsoon rain forest, mixed forest, overlogged forest, secondary forest, wasteland, sandy soils, along roadsides, forest edge, along streams or ponds, resembles *Gigantochloa latifolia* Ridley, see *Annals of the Royal Botanic Garden, Calcutta*. 7: 67, pl. 58. 1896, *The Flora of British India* 7: 400. 1896 and *Gard. Bull. Singapore* 16: 129-132. 1958, *Reinwardtia* 10(3): 361-365, f. 30-31. 1987, *Journal of the American Bamboo Society* 7(1-2): 1-15. 1989, *Nature Malaysiana* 16(4): 130-135. 1991.

in Peninsular Malaysia: buloh bilalai, buloh gala, buloh mata rusa, buloh tikus, buloh tilan, buloh tumpat, buluh galah, buluh mata rusa, buluh tikus, buluh tilan, buluh tumpat

in Thailand: lai, nae, pao lai, pao laai, phai daam phraa, phai dam phra, phai-damphra, phai laai, phai-lai, phai-nae

Indonesia. See *Reinwardtia* 11(2): 57-152. 1997.

G. macrostachya Kurz (*Bambusa macrostachya* Kurz; *Oxytenanthera macrostachya* (Kurz) Brandis)

India, Myanmar. Evergreen, large, glaucous when young, nodes hairy and scarcely swollen, lower internodes very short, leaves thin and lanceolate, culm sheaths short and contracted at the summit, leaf sheaths hairy then glabrescent, large inflorescence, leafy panicle, spikelets covered by long-ciliate glumes and lemmas, 2-3 florets hermaphrodite, 2-3 glumes mucronate, paleas 2-keeled, lodicules absent, used for construction and for making mats and baskets, see *Bambuseae* 39, t. 15, f. 35. 1839, *Journal of the Asiatic Society of Bengal. Part 2. Natural History* 42: 251. 1873, *Preliminary Report on the Forest and other Vegetation of Pegu* App. A, 137, App. B, 94. Calcutta 1875, *For. Fl. Brit. Burma* 2: 557. 1877 and *Indian Trees* Addenda: 719. 1906, *Smithsonian Contributions to Botany* 9: 68. 1973.

in India: tekserah

G. magentea Widjaja

Indonesia. See *Reinwardtia* 11(2): 57-152. 1997.

G. manggong Widjaja

Indonesia, origin unknown. Sympodial, densely tufted, fast growing, internodes smooth, culm sheath persistent, sheath blade erect and triangular, leaf blades lanceolate and glabrous, on leafy branches groups of pseudospikelets, spikelets lanceolate to ovate-lanceolate, 3 perfect florets, 2 glumes, rare, propagated by rhizome cuttings, flowers gregariously, young shoots eaten, used for building construction, scaffolding, paperpulp, growing on riverbanks, slopes, mountains, tropical climate, see *J. American Bamb. Soc.* 5(3-4): 64, 67, 68. 1984 [1986], *Reinwardtia* 10(3): 365-368, f. 32-33. 1987.

in Indonesia: poring manggong, pring manggong, tiying jahe, tiying jawe

Indonesia. See *Reinwardtia* 11(2): 57-152. 1997.

G. ridleyi Holttum

Origin unknown, only known in cultivation. Erect and densely tufted, ornamental, used for thatching and roofing, see *Natuurkundig Tijdschrift voor Nederlandsch-Indië* 27: 226. 1864 and *Gard. Bull. Singapore* 15: 275. 1956 [also *Gardens' Bulletin, Straits Settlements*], *Gard. Bull. Singapore* 16: 1-135. 1958, *Reinwardtia* 10(3): 347, f. 23. 1987.

in Indonesia: tiyang jajang, tiyang jajang batuh, tiyang aya, tiyang kaas

G. robusta Kurz (*Gigantochloa verticillata* (Willd.) Munro sensu Backer)

Indonesia, origin not known. Densely tufted, sympodial, rather variable, lowest nodes with aerial roots, basal portion of the culm yellow striped, internodes nonwaxy, culm sheath triangular with dark pubescence, culm sheath auricles well-developed, leaf blade lanceolate, leaves hairy beneath, groups of pseudospikelets, spikelets ovoid and compressed, 4 perfect florets and 1 imperfect, vegetatively propagated by rhizome or culm cuttings, young shoots eaten as a vegetable, used for building construction and for traditional musical instruments, used as poles and for roofings and walls, water carrying vessel (*kele*), as water pipes, see *Catalogus Plantarum in Horto Botanico Bogoriensi Cultarum Alter* 19. Bataviae 1844, *Indian Forester* 1: 60, 344. 1876 and *Reinwardtia* 10(3): 310-315, f. 3-5. 1987.

in Indonesia: awi mayan, bamboe maijang, bambu mayang, buluh batuang, buluh riau, buluh riaw, tiyang jajang suwat, tiyang jelepung

G. rostrata K.M. Wong (*Bambusa gracilis* Wall.; *Gigantochloa maxima* var. *minor* Holttum; *Oxytenanthera nigrociliata* Munro)

Peninsular Malaysia, Myanmar, China, Yunnan. Erect, top slightly drooping, tufted, culms dark green with yellow stripes, thick-walled, basal nodes with aerial roots, culm sheath caducous and coriaceous, sheath auricles small, sheath ligule dentate, slender spikelets, lemmas apex

pointed and rotate paleas notched to bifid, gregarious flowering and seeding, linear-oblong seeds used as food by the local people, culms used for building huts and making baskets, weaving and raw material for paper manufacture, along streams and lower slips, fertile loam, moist areas, in semideciduous forests, see *A Numerical List of Dried Specimens of plants, in the East India Company's Museum ...* 5033. London 1831-1832, *Catalogus Plantarum quae in Horto Botanico Bogoriensi Coluntur* 20. Batavia 1866, *Bulletin de la Société Nationale d'Acclimatation de France* 3: 5: 682. 1878 and *Gard. Bull. Sing.* 16: 116, f. 29. 1958, *Malaysian Forester* 45(3): 349, f. 3-4. 1982, *Reinwardtia* 10: 333. 1987.

in India: bolangi, kailyai, pani bans, panibans

G. scortechinii Gamble (after the Italian clergyman Rev. Benedetto (Bertold) Scortechini, 1845-1886, botanist, botanical explorer, traveler, from 1871 to 1884 in Queensland (Australia), 1881 Fellow of the Linnean Society, from 1884 to 1886 Government botanist of Perak, plant collector in the Straits settlements, Malay Peninsula, collaborated with Bailey and von Mueller. See J.H. Barnhart, *Biographical notes upon botanists*. 3: 251. 1965; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 358. 1972; D.J. Carr & S.G.M. Carr, editors, *People and Plants in Australia*. 1981; Henry Nicholas Ridley (1855-1956), *The Flora of the Malay Peninsula*. London 1922-1925; I.H. Vegter, *Index Herbariorum*. Part II (6), *Collectors S. Regnum Vegetabile* vol. 114. 1986; M.N. Chaudhri, I.H. Vegter and C.M. De Wal, *Index Herbariorum*, Part II (3), *Collectors I-L. Regnum Vegetabile* vol. 86. 1972; Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 613. London 1994).

Peninsular Malaysia, Indonesia, Thailand, China, Yunnan. Densely tufted, gregarious species, sympodial, erect, top drooping, young culms pruinose to waxy, young shoots orange-green, basal nodes with aerial roots, branches from the midculm upward, sheath auricles absent, culm sheath coriaceous and with appressed black hairs, sheath ligule developed, leaf blades softly pubescent beneath, globular clusters of pseudospikelets, 2-5 fertile pseudospikelets mixed with sterile ones, flattened spikelets ovate to oblong-ovate, 3-5 perfect florets and 1 imperfect terminal, 2-3 empty glumes, flowering sporadic, wild, cultivated and naturalized, propagated by seed and cuttings, used for fences, handicrafts, building construction, papermaking, basketry, poultry cages, young shoots rather bitter, found in disturbed areas, overlogged forest, sandy loams, ravines, similar to *Gigantochloa wrayi* Gamble, see *Annals of the Royal Botanic Garden, Calcutta*. 7: 62, pl. 53. 1896, *The Flora of British India* 7: 398. 1896 and *Gard. Bull. Sing.* 16: 122-124. 1958, *Nature Malaysiana* 7: 34-39. 1982, *Reinwardtia* 10: 341-347, f. 20-22. 1987, *Journal of Tropical Forest Science* 2(3): 227-234. 1990, *Nature Malaysiana* 16(4):

130-135. 1991, *Journal of Tropical Forest Science* 4(1): 87-93. 1992.

in Indonesia: buloh rayah, buloh semantan, buloh seremai, buloh telor, buluh kapal

Vernacular names: buloh gala, buloh paa, buloh rayah, buloh semantan, buluh galah, buluh minyak, buluh pa'ao, buluh rayah, buluh semantan, buluh telur

G. scortechinii Gamble var. *albovestita* Holttum

Malaysia. Culm sheath with white, auricles glabrous hairs, see *Gardens' Bulletin, Straits Settlements* 16: 124. 1958, *Reinwardtia* 10: 347. 1987.

Common names: buloh gala, buloh paa, buloh rayah, buloh semantan, buloh seremai, buloh telor, buluh galah, buluh minyak, buluh pa'ao, buluh rayah, buluh semantan, buluh telur

G. scortechinii Gamble var. *scortechinii*

Peninsular Malaysia, Thailand, Indonesia. Culm sheath with blackish hairs, auricles bristly.

in Indonesia: buloh rayah, buloh semantan, buloh telor, buluh kapal

Gilglochloa Pilger

For the German botanist Ernst Friedrich Gilg, 1867-1933, taxonomist, contributor to H.G.A. Engler and K.A.E. Prantl *Die Natürlichen Pflanzenfamilien* edition I and edition 2, to Engler's *Das Pflanzenreich*. (with J. Perkins); see J.H. Barnhart, *Biographical notes upon botanists*. 2: 48. 1965; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 144. 1972; Stafleu & Cowan, *Taxonomic literature*. 1: 941-942. Utrecht 1976.

One species, tropical Africa, East Africa. Panicoideae, Panicodae, Arundinelleae, annual, herbaceous, unarmed, ligule fringed, plants bisexual, inflorescence paniculate and contracted, panicle spiciform, spikelets purplish, 2 glumes very unequal, lower glume awned 3-nerved, upper glume 3-nerved, upper lemma hairy and bilobed, lower lemma 5- to 7-nerved, palea thickened with keels winged, 2 free and fleshy lodicules, 3 stamens, ovary glabrous, 2 stigmas, open habitats, thicket, woodland, segregate from *Danthoniopsis*, type *Gilglochloa indurata* Pilg., see *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 51(3-4): 415, 416, f. 1. 1914, *Kirkia* 5: 235-258. 1966, *Kew Bulletin* 21(1): 119-124. 1967, *Kew Bulletin* 26(1): 111-123. 1971.

Species

G. indurata Pilger (*Gilglochloa alopecuroides* Peter)

Tanzania. See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 51(3-4): 416, f. 1. 1914, *Repertorium Specierum Novarum Regni Vegetabilis, Beihefte* 40(1): 92. 1930, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 77(2-3): 226-354, f. 18. 1957.

Ginannia Bubani = *Ginannia* Scop.
(Fabaceae), *Holcus* L.

Pooideae, Poaeae, Holcinae, see *Species Plantarum* 2: 1047-1048. 1753, *Introductio ad Historiam Naturalem* 300. 1777 and *Flora Pyrenaea ...* 4: 321. 1901, *Contributions from the United States National Herbarium* 48: 370-371, 387-388. 2003.

Glandiloba (Raf.) Steud. = *Eriochloa* Kunth

From the Latin *glans*, *glandis* "any acorn-shaped fruit" and *loba*, *ae* "the haulm of Indian millet" or Greek *lobos* "a pod."

Panicoideae, Paniceae, Melinidinae, see *Nova Genera et Species Plantarum* 1: 94-95, t. 30. 1815 [1816], *Bulletin Botanique [Genève]* 1: 220. 1830, *Nomenclator Botanicus. Editio secunda* 1: 687. 1840 and E.D. Merrill, *Index rafinesquianus*. 75. 1949, *Contributions from the United States National Herbarium* 46: 233-239, 242. 2003.

Glaziophyton Franch.

For the French botanist Auguste François Marie Glaziou, 1828-1906, traveler, plant collector in Brazil, author of "Plantae Brasiliae centralis a Glaziou lecta. Liste des plantes du Brésil Central recueillies en 1861-1895." in *Mém. Soc. Bot. France*. 1(3): 1-661. 1905-1913, collaborator of Antoine L.A. Fée (1789-1874) for *Cryptogames vasculaires du Brésil ... avec le concours ... de ...* F.M.G. Strasbourg 1869, with the Swedish botanist Gustaf Oskar Andersson Malme (né Andersson), 1864-1937, wrote *Xyridaceae brasilienses*. Stockholm 1898. See J.H. Barnhart, *Biographical notes upon botanists*. 2: 54. 1965; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 145. 1972; I. Urban, *Geschichte des Königlichen Botanischen Museums zu Berlin-Dahlem (1815-1913). Nebst Aufzählung seiner Sammlungen*. 1916; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 715. Stuttgart 1993; D. de Andrade Lima, "Plantas das Caatingas." *Academia Brasileira de Ciências*, Rio de Janeiro. 218-219. 1989; Raymond M. Harley, "Plant Diversity: Kew's Role in North-east Brazil." *The Kew Magazine*. vol. 9. 3: 103-116. Aug 1992; Simon Mayo, "*Neoglaziovia variegata* (Bromeliaceae)." *The Kew Magazine*. 9(3): 124-127. Aug 1992.

One species, eastern and central Brazil. Bambusoideae, Bambusodae, Bambuseae, Arthrostylidiinae, perennial, sympodial, caespitose, erect, reedlike or juncooid or rushlike, simple, hollow, herbaceous to woody and persistent, leafless, rhizomes pachymorph, plants bisexual, inflorescence compound and reduced, large terminal false panicle,

spikelet subtended by bract and prophyll, 2 fertile florets plus a rudiment, 0-3 glumes very unequal, palea nerved, 3 free and membranous lodicules, stamens 3, ovary glabrous, stigmas 2, páramos, related to *Myriocladus*, type *Glaziophyton mirabile* Franch., see *Flora Boreali-Americana* 1: 73. 1803, *Journal de Botanique (Morot)* 3(17): 277, f. A. 1889, *Die Natürlichen Pflanzenfamilien* Nachtrag (2-4 Teil) 1: 9. 1897 and *Bambusées* 16, 25. 1913, *Smithsonian Contributions to Botany* 9: 1-148. 1973 [Genera of bamboos native to the New World (Gramineae: Bambusoideae).], Emmet J. Judziewicz et al., *American Bamboos*. 178-180. 1999, *Journal of Biogeography* 26(4): 693-712. July 1999 [Brazilian Páramos I. An introduction to the physical environment and vegetation of the *campos de altitude*.], *Contributions from the United States National Herbarium* 39: 58. 2000.

Species

G. mirabile Franch. (*Arundinaria mirabile* (hort. ex Burb.) Hack.; *Arundinaria palmata* (hort. ex Burb.) Bean; *Bambusa palmata* hort. ex Burb.; *Sasa palmata* (hort. ex Burb.) E.G. Camus; *Sasa palmata* (hort. ex Burb.) Nakai, nom. illeg., non *Sasa palmata* (hort. ex Burb.) E.G. Camus)

Brazil. Slender, small, densely clumped, woody, culms hollow and chambered, rhizomes with elongated necks, flowering culms leafless, synflorescence paniculate and drooping, functional florets ovate obtuse, stigmas plumose, see *Journal de Botanique (Morot)* 3(17): 277, f. A. 1889, *Gardener's Chronicle*, ser. 3 7: 641. 1890, *Gardener's Chronicle*, ser. 3 15: 238. 1894 and *Les Bambusées* 25. 1913, *Trees and Shrubs Hardy in the British Isles* 1: 218. 1914, *Journal of Japanese Botany* 10: 561. 1934.

Glyceria R. Br. = *Desvauxia* P. Beauv. ex Kunth, *Devauxia* Kunth, *Devauxia* R. Br. (Centrolepidaceae), *Exydra* Endl., *Heleochoa* Fries, *Hemibromus* Steud., *Hydrochloa* Hartm., *Hydrochloa* P. Beauv., *Hydropoa* (Dumort.) Dumort., *Nevroloma* Raf., *Plotia* Steud., *Porroteranthe* Steud.

From the Greek *glykys* "sweet," referring to the edible grains of *Glyceria fluitans* (L.) R. Br., alluding to the the sweet seeds that are favored by many waterfowl; see Robert Brown (1773-1858), *Prodromus florae Novae Hollandiae*. 179. 1810.

About 16-40 species, northern hemisphere, North America, Australia, New Zealand, South America, temperate regions. Pooideae, Poodae, Meliceae, perennial, tall, glabrous, herbaceous, usually aquatic or marsh grasses, strongly rhizomatous with creeping rhizomes or stoloniferous, stems reedlike and pithy, culms decumbent and rooting from lower nodes, glabrous nodes, hollow internodes, auricles absent,

leaves mostly basal, sheaths tubular with the margins united, ligule membranous, leaf blades linear and broad or narrow, plants bisexual, inflorescence open or contracted, flowers usually in panicles or rarely in racemes, spikelets solitary and slightly compressed laterally or cylindrical, spikelets stalked and linear to ovate, 2 glumes unequal and ovate to oblong, lower glume 1- to 3-nerved, upper glume 1- to 5-nerved, lemmas rounded on the back and not keeled, lemmas 7- to 9-nerved or ridged, palea 2-keeled, 2 lodicules joined and fleshy, stamens 3 or 2, ovary glabrous, stigmas 2, fruit compressed, vestigial foliar structure subtending the inflorescence absent or present, aquatic weeds, in some of the species the leaves may float on the water surface, spread vigorously in water, useful in controlling erosion of riverbanks, species very palatable, the seeds are eaten by waterfowl, some species may cause cyanogenic poisoning in livestock, found in marshes, moist woodlands, wet and swampy places, sides of lakes and ponds, bog gardens, native pasture grasses, pampas, grasslands, similar to *Puccinellia*, type *Glyceria fluitans* (L.) R. Br., see *Species Plantarum* 1: 67. 1753, *Familles des Plantes* 2: 226. 1763, Noel [Natalis] Joseph de Necker (1730-1793), *Elementa botanica genera genuina*, species naturales omnium vegetabilium detectorum ..., secundum systema omologium seu naturale ... 2: 55. Neowedae ad Rhenum [Neuwied] 1790, *Prodromus Florae Novae Hollandiae* 179, 532. 1810, *Genera Graminum* 8. 1819, *Journal de Physique, de Chimie, d'Histoire Naturelle et des Arts* 89: 106. 1819, *Observations sur les Graminées de la Flore Belgique* 111. 1824, *Flora Posoniensis* 119. 1830, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 367. 1833, *Floram Scanicam* 202. 1835, *Nomenclator Botanicus. Species

G. acutiflora Torr. (*Festuca acutiflora* (Torr.) Bigelow; *Festuca grandiflora* Spreng. ex Steud., nom. illeg., non *Festuca grandiflora* Lam.; *Hemibromus japonicus* Steud.; *Panicularia acutiflora* (Torr.) Kuntze)

North America. Perennial, herbaceous, spikelets linear-cylindrical, straight and dense inflorescence, lemma acute, projecting palea, very small grain, emergency food, found in ponds and streams, shallow water of pools, muddy shores, paddy fields, swamps, bog garden, see *A Flora of the Northern and Middle Sections of the United States* 1: 104. 1823, *Flora Bostoniensis* third edition ... 39. 1840, *Nomenclator Botanicus. Editio secunda* 1: 630. 1840, *Synopsis Plantarum Glumacearum* 1: 317. 1854, *Revisio Generum Plantarum* 2: 783. 1891.

in English: sharp-scaled mannagrass, sharp-glumed manna grass, creeping manna grass, creeping mannagrass, manna grass, mannagrass

in Japan: mutsuoregusa

G. alnasteretum Komarov (*Glyceria remota* var. *japonica* Hack.)

Japan, Hokkaido, southern and eastern Kamchatka, China. See *Repertorium Specierum Novarum Regni Vegetabilis* 13: 87. 1914.

in Japan: miyamadojotunagi

G. aquatica (L.) J. Presl & C. Presl (*Aira aquatica* L.; *Catabrosa aquatica* (L.) P. Beauv.)

Europe, North temperate. See *Species Plantarum* 1: 64, 66-70, 73-76. 1753, *Prodromus stirpium in horto ad Chapel Allerton vigentium*. 20. 1796, *Primitiae Florae Werthemensis* 116. 1799, *Descriptio Graminum in Gallia et Germania* 194. 1802, *Prodromus Florae Novae Hollandiae* 179. 1810, *Mémoires de la Société Impériale des Naturalistes de Moscou* 3, t. 13. 1812, *Essai d'une Nouvelle Agrostographie* 97, 135, 142, 149, 157, 160, 162, 165, pl. 19. 1812, *Genera Graminum* 5. 1819, *Flora Cechica* 25. 1819, *A Natural Arrangement of British Plants* 2: 133. 1821, *Annales des Sciences Naturelles, Botanique* 5: 447. 1825, *Flora Gallica*, éd. 2, 1: 59. 1828, *Flora der Phanerogamischen Gewächse der Umgegend von Leipzig* 96. 1830, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. G. australis C.E. Hubb. (*Glyceria fluitans* sens. Rodway, atque sens. Morris, atque sens. J.M.Black, non (L.) R. Br.)

South Australia, Victoria, Tasmania, New South Wales. Perennial, stout, glabrous, rhizomatous, creeping rootstock, caespitose or in loose open tussocks, rooting at lower nodes, leaves nonauriculate, sheath closed, ligule hyaline to membranous, a raceme or a panicle unilateral, spikelets almost cylindrical and after broader and flattish, chasmogamous spikelets, vestigial foliar structure subtending the inflorescence absent, glumes thin, lemmas acuminate, palea linear, anthers yellow, fruit compressed, fodder and cover plant, found in fresh water swamps, open habitats, in shallow water, swampy depression, mud, alongside creeks and rivers, in shallow water at margin of reed-swamp, see *Kew Bulletin* 1934: 450. 1934.

in English: manna grass, Australian sweet grass

G. borealis (Nash) Batchelder (*Glyceria borealis* (Nash) A. Nelson, nom. illeg., non *Glyceria borealis* (Nash) Batch.; *Glyceria borealis* (Nash) Piper, nom. illeg., non *Glyceria borealis* (Nash) Batch.; *Glyceria fluitans* var. *angustata* Vasey ex Fernald; *Panicularia borealis* Nash)

North America, U.S., California, Mexico. Perennial, weak, endangered, herbaceous, sometimes decumbent at the base, often producing adventitious roots from submerged lower nodes, no auricles, sheaths glabrous and flattened, ligule rounded or sharply pointed, leaves glabrous, narrow flower

head, panicle branches stiff and erect, spikelets linear, glumes obtuse, lemmas oblanceolate and smooth between slightly rough veins, grain dark brown, grains worth gathering for food, occurs in wetlands and in meadow habitats, in shallow water or mud of streams, around margins, shallow water of lakes and streams, fens, ditches, ponds and marshes, swamps, along lakeshores, similar to *Glyceria fluitans* (L.) R. Br., see *Prodromus Florae Novae Hollandiae* 1: 179. 1810, *Proceedings of the Portland Society of Natural History* 2: 91. 1895, *Bulletin of the Torrey Botanical Club* 24(7): 348-349. 1897 and *Proceedings of the Manchester Institute of Arts and Sciences* 1: 74. 1900, *New Manual of Botany of the Central Rocky Mountains* 74. 1909, *Ill. Fl. Pacific States* 1: 211. 1923.

in English: small floating manna grass, northern manna grass

G. canadensis (Michx.) Trinius (*Briza canadensis* Michx.; *Briza canadensis* Nutt., nom. illeg., non *Briza canadensis* Michx.; *Glyceria canadensis* var. *canadensis*; *Megastachya canadensis* (Michx.) Michx. ex Roem. & Schult.; *Nevroloma canadensis* (Michx.) Raf.; *Panicularia canadensis* (Michx.) Kuntze; *Poa canadensis* (Michx.) Torr.)

North America, Canada, U.S. Perennial, herbaceous, clumped, open inflorescence, drooping branches, green flower clusters, found in swamps, edge of swampy forests, moist woods, marshes, shores and wet shores, wet woods, lakeshore, see *Flora Boreali-Americana* 1: 71. 1803, *Systema Vegetabilium* 2: 593. 1817, *The Genera of North American Plants* 1: 69. 1818, *Journal de Physique, de Chimie, d'Histoire Naturelle et des Arts* 89: 106. 1819, *A Flora of the Northern and Middle Sections of the United States* 1: 112. 1823, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. in English: rattlesnake manna grass, rattlesnake grass

G. colombiana Giraldo-Cañas

South America, Colombia. See *Caldasia* 24(1): 9-13. 2002.

G. declinata Bréb. (*Glyceria cookei* Swallen; *Glyceria fluitans* subsp. *declinata* (Bréb.) O. Bolòs, Masalles & Vigo; *Glyceria fluitans* var. *declinata* (Bréb.) Ghisa; *Glyceria notata* subsp. *declinata* (Bréb.) Weeda; *Glyceria plicata* subsp. *declinata* (Bréb.) Weeda; *Glyceria plicata* var. *declinata* (Bréb.) Druce) (for William Bridge Cooke, b. 1908)

Europe, Eurasia, America. Perennial, glabrous, loosely tufted, slender, flaccid, erect or ascending, rooting at the lower nodes, rhizomatous, creeping rootstock, base prostrate or curved, leaves nonauriculate, leaf sheath closed and submembranous, sheath enclosing culm, ligule membranous and truncate or tapered to a point, leaves folded and

flat, a green panicle or raceme unilateral and loose, spikelets almost cylindrical and later broader and flattish, chasmogamous spikelets, glumes thin and unequal, lemmas toothed and scabrous, palea 2-keeled and 2-lobed or deeply bifid, anthers yellow or purple, ovary glabrous, fruit compressed, grows in damp areas, lowland to montane, on alluvial gravel, wet places, damp pasture, stream margins, in shallow ponds, along drains, swamps, see *Prodromus Florae Novae Hollandiae* 1: 179. 1810, *Flore de la Normandie* 354. 1859 and *List of British Plants* 83. 1908, *Journal of the Washington Academy of Sciences* 31(8): 348, f. 1. 1941, *Flora Republicii Socialiste Romania* 12: 441. 1972, *Gorteria* 11(9): 214. in English: manna grass, waxy manna grass, Australian sweet grass, sweet grass, glaucous sweet grass

in Finnish: Pikkusorsimo

in Swedish: Blågrönt mannagräs

G. drummondii (Steudel) C.E. Hubb. (*Porroteranthe drummondii* Steud.)

Western Australia. Extinct species, see *Synopsis Plantarum Glumacearum* 1: 287. 1854 and *Kew Bulletin* 1934: 450. 1934.

G. elata (Nash) M.E. Jones (*Glyceria elata* (Lam.) Hitchc.; *Glyceria elata* (Nash) Hitchc., nom. illeg., non *Glyceria elata* (Nash) M.E. Jones; *Glyceria latifolia* J.S. Cotton; *Panicularia elata* Nash; *Panicularia nervata* subsp. *elata* (Nash) Piper)

Northern America, U.S., California, Canada. Perennial, herbaceous, creeping rhizomes, auricles absent, rough sheath, ragged blunt ligules, pyramid-like flower head loose and open, lemmas ridged, palea often almost transparent, grains worth gathering for food, native pasture grass, occurs in wet areas, in wetlands and in montane meadow habitats, seepage areas, swampy places, along streams and rivers, lakeshores and wet meadows, shallow red rocky soil, see *Revisio Generum Plantarum* 1: 783. 1891 and *Memoirs of the New York Botanical Garden* 1: 54. 1900, *Bulletin of the Torrey Botanical Club* 29(9): 573. 1902, *Contributions from the United States National Herbarium* 11: 140. 1906, *Biological Series of the Bulletin of the State University of Montana* 15: 17. Missoula 1910, *A Flora of California* 1: 162. 1912.

in English: fowl manna grass, tall manna grass

G. fluitans (L.) R. Br. (*Desvauxia fluitans* P. Beauv. ex Kunth; *Devauxia fluitans* (L.) P. Beauv. ex Kunth; *Festuca fluitans* L.; *Glyceria fluitans* var. *acutiflora* Döll; *Hydrochloa fluitans* (L.) Hartm.; *Melica fluitans* (L.) Raspail; *Panicularia brachyphylla* Nash; *Panicularia fluitans* (L.) Kuntze; *Poa fluitans* (L.) Scop.)

Temperate regions of the northern hemisphere. Perennial, hairless, herbaceous, lowland to montane, loosely tufted or forming loose masses, stoloniferous, stems horizontal then ascendant, erect or spreading, sometimes prostrate or floating at base, auricles absent, leaf sheath closed and papery, ligule acute or rounded on the top, blade folded when young, panicle-like inflorescence loose and spreading or open at anthesis, spikelets 5- to 14-flowered linear-cylindrical or slightly compressed, glumes unequal, scabrous or minutely scabrid lemmas, palea apex shortly bidentate, foliage relished by the cattle, human food, sweet seed raw or cooked in porridge and soups, a flour from the seed, occasionally cultivated, this grass can cover the surface of ponds or rivers by its stems and its floating leaves, tolerates strongly acid soils, occurs on very wet or boggy soils, in shallow pond margins, shallow water either stagnant or slow flowing, marshes, open swamps, ponds, on riversides, in soft mud on margins, on alluvial or peat soils, see *Species Plantarum* 1: 75. 1753, *Flora Carniolica, Editio Secunda* 73. 1772, *Prodromus Florae Novae Hollandiae* 1: 179. 1810, *Genera Graminum* 8. 1819, *Annales des Sciences Naturelles; Botanique, sér. 5*, 5: 443. 1825, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 367. 1833, *Flora Chilena* 6: 390. 1854, *Flora des Grossherzogthums Baden* 1: 170. 1855 [1857], *Revisio Generum Plantarum* 2: 782. 1891, *Bulletin of the Torrey Botanical Club* 24(7): 349-350. 1897 and *New Zealand Journal of Botany* 29: 101-116. 1991.

Watson) Nash; *Poa aquatica* [sensu] Pursh; *Poa aquatica* var. *americana* Torr.)

North America, U.S., California, Canada. Perennial, herbaceous, stout, rhizomatous, no auricles, smooth to slightly rough sheaths, ligules blunt, leaves with rough upper surface and a smooth underside, open and loose flower head with numerous spreading branches, spikelets purplish and slightly flattened, glumes ovate to ovate-lanceolate to pointed, lemmas purplish oblong-lanceolate and nerved,

grain dark brown, rare to extremely rare species, native pasture grass, grows in swampy places, in wet areas along lakeshores, shallow water, ditches, lake-margins, freshwater wetlands, shores, bogs and fens, stream bank, brooksides, meadows and wet meadows, edge habitats, mud of marshes, ponds, lakes, cyanogenic potential, see *Species Plantarum* 1: 67. 1753, *A Flora of the Northern and Middle Sections of the United States* 1: 108. 1823, *A Manual of the Botany of the Northern United States* (edition. 6) 667. 1890, *The Metaspermae of the Minnesota Valley* 81. 1892 and *The Grasses of Iowa* 2: 271. 1905, *Biological Series of the Bulletin of the State University of Montana* 15: 17, t. 2. 1910, *An Illustrated Flora of the Northern United States* 1: 265. 1913, *Botaniska Notiser* 1919: 97. 1919, *Rhodora* 23(274): 231. 1921 [1922], *Man. G. maxima (Hartm.) E. Holmb. (*Catabrosa hydrophila* Link; *Exydra aquatica* (L.) Endl.; *Festuca aquatica* (L.)

Mutel; *Glyceria altissima* (Moench) Schloss. & Vuk.; *Glyceria altissima* Garcke; *Glyceria aquatica* (L.) Wahlb., nom. illeg., non *Glyceria aquatica* (L.) J. Presl & C. Presl; *Glyceria spectabilis* Mertens & W.D.J. Koch; *Heleochoa aquatica* (L.) Drejer; *Hydropoa spectabilis* (Mert. & W.D.J. Koch) Dumort.; *Molinia maxima* Hartm.; *Panicularia aquatica* (L.) Kuntze; *Poa aquatica* L.)

Temperate Eurasia, Europe. Perennial, aquatic or semi-aquatic, tall, wide-leaved, glabrous, caespitose, stout stems erect and unbranched, robust, large, rhizomatous with stout creeping rhizomes, auricles absent, blade acute and a little bit rough, leaf sheaths with prominent midribs or cross-veinlets, frequently with closed sheath, ligule firmly membranous short and pointed in the middle, much-branched panicles broadly ovate to oblong, the inflorescence can be open (chasmogamous) or contracted and symmetrical, yellow to green spikelets oblong, glumes subequal, lemmas obtuse and coriaceous, palea membranous to chartaceous with scabrid keels, anthers yellow, ovary glabrous, dark brown seeds, native pasture grass, used as a forage crop, palatable, a nutritious wetland fodder for cattle, ornamental grass naturalized elsewhere in temperate regions, vigorous growth, extensive root system, potential seed contaminant, reproduces vegetatively, troublesome aquatic weed and aggressive species, has the potential to be a serious invader of wetlands, sometimes forms vast floating mats, forms dense monoculture in fertile sites, forms dense settlements in the most frequently flooded areas, poisonous due to the presence of smut only in fresh foliage, in Australia and New Zealand cattle poisoning due to cyanide production in the young shoots, a poor food-plant and nesting substrate for wetland wildlife, provide shelter for water birds and other aquatic organisms, tolerates strongly acid soils, useful for erosion control, suitable for reducing erosion of riverbanks, grows in slow moving streams, edges of slow flowing streams, lowland swamps, drains, creeks, dams, open habitats, swampy places, pools, waterholes, wet areas, very wet or boggy soils, on alluvial or peat soils, irrigation and drainage channels, ditches, on riversides and waterways, see *Species Plantarum* 1: 67. 1753, *Fl. Gothob.* 18. 1820, *Handbok i Skandnaviens Flora* 56. 1820, *Flora Excursoria Hafniensis* 40. 1838, *Linnaea* 17(4): 405. 1844, *Flora von Nord- und Mittel-Deutschland* edition. 2 375. 1851, *Bulletin de la Société Botanique de Belgique* 7: 67. 1868, *Revisio Generum Plantarum* 2: 782. 1891 and *Botaniska Notiser* 1919: 97. 1919, *Taxon* 49(2): 255. 2000.

in English: reed meadow grass, meadow reed grass, reed sweet grass, reed manna grass

in Danish: høj sødgræs

in Finnish: Komea sorsimo

in French: glycérie aquatique

G. maxima (Hartm.) Holmb. var. *variegata* Boom & Ruys
North America. Clumped, leaves longitudinally striped green and creamy yellow flushed pink, arching, open heads

of tiny green flowers flushed with purple, ornamental grass, in full sun or shade, grows in heavy clay, in wet soils, stream sides, in lighter soils the plant will spread by rhizomes to the point of being invasive, tends to naturalize itself.

G. melicaria (Michx.) F.T. Hubbard (*Glyceria elongata* (Torr.) Trin.; *Glyceria torreyana* (Spreng.) Hitchc.; *Panicularia elongata* (Spreng.) Kuntze; *Panicularia melicaria* (Michx.) A.S. G. nubigena W.A. Anderson

North America, North Carolina, Tennessee. Vulnerable species, see *Rhodora* 35: 321, f. B. 1933, *Manual of the Vascular Flora of the Carolinas* i-lxi, 1-1183. 1968.

in English: Smoky Mountains manna grass, great Smoky Mountains manna grass

G. obtusa (Muhl.) Trinius (*Panicularia obtusa* (Muhl.) Kuntze; *Poa obtusa* Muhl.)

Northern America, U.S., Canada. Perennial, herbaceous, endangered, conelike dense inflorescence, branches all point upward, occurs in wet sandy soils, wet woods, swamps, bogs, moist sandy peaty ground, see *Descriptio uberior Graminum* 147. 1817, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles.* 1(4): 366. 1830, *Revisio Generum Plantarum* 2: 763. 1891.

in English: Atlantic manna grass, coastal manna grass, blunt mannagrass

G. occidentalis (Piper) J.C. Nelson (*Panicularia occidentalis* Piper)

North America, U.S., California, Canada. Perennial, aquatic, herbaceous, seed ground into a flour and used as a cereal, found in freshwater wetlands, in marshy areas, freshwater-marsh habitats, along the sides of lakes, ponds and streams, on wet heavy soil, see *Fl. N.W. Coast* 59. 1915, *Torreyia* 19: 224. 1919, *Vascular Plants of the Pacific Northwest* 1: 1-914. 1969, *Vascular Plants of the Intermountain West, U.S.A.* 6: 1-584. 1977.

in English: Northwestern manna grass, waxy mannagrass, Western manna grass

G. otisii A.S. Hitchc. (*Torreyochloa otisii* (Hitchc.) G.L. Church; *Torreyochloa pallida* var. *pauciflora* (J. Presl) J.I. Davis) (named after Ira Clinton Otis, 1861-1938, collector)

North America, Oregon, Washington. Endangered species, see *Reliquiae Haenkeanae* 1(4-5): 257. 1830 and *American Journal of Botany* 21(3): 128. 1934, *American Journal of Botany* 36: 163-164. 1949, *Manual of the Grasses of the United States* (edition 2, revised by A. Chase). 1951, *Phytologia* 70(5): 364. 1991.

G. plicata (Fries) Fries (*Glyceria fluitans* (L.) R. Br. subsp. *plicata* Fries; *Glyceria fluitans* var. *plicata* Fr.; *Glyceria notata* Chevall.; *Glyceria plicata* Fr.; *Glyceria turcomanica* Kom.)

Eurasia, northwestern Africa. Perennial, prostrate and ascending, rooting and branching at lower nodes, internodes spongy, leaves nonauriculate, leaf sheath papery and closed,

ligule acute membranous, a green panicle erect and contracted or very lax, fragile spikelets, florets readily disarticulating at maturity, glumes unequal membranous, lemma compressed obtuse or slightly lobed, palea chartaceous and 2-keeled with keels narrowly winged, anthers dehiscent, ovary glabrous, growing in open meadows, open habitats, lowland to montane, roadside drains, pools, water meadows, shallow water, in streams and watersides in coniferous woods, marshy valleys, sandy floodplains, ditches, wet conditions, ponds, often considered a synonym of *Glyceria notata* Chevall., see *Flore des Environs de Paris* 174. 1827, Elias Magnus Fries, *Novitiarum florum suecicae mantissa* [prima, altera, tertia] et Continuationes [1-5] [Academic Dissertations]. Lund 1832-1845 and *Flora URSS* 2: 452, 757. 1934, *New Zealand Journal of Botany* 29: 101-116. 1991, *Darwiniana* 35(1-4): 155-158. 1998.

G. pulchella (Nash) K. Schum. (*Panicularia pulchella* Nash)

Boreal North America, Canada, U.S., Alaska. Perennial, rare, rhizomatous, no auricles, open sheath smooth, pointed membrane-like ligules, drooping flat leaf blades, loose and sometimes drooping flower head, papery glumes pale purplish brown or whitish and transparent, awnless lemmas rough, may be confused with *Glyceria striata* (Lam.) A.S. Hitchcock, see *Bulletin of the New York Botanical Garden* 2(6): 157-158. 1901, *Botanischer Jahresbericht* 29(1): 513. 1903, *Checklist of the Vascular Plants of the Northwest Territories Canada* i-viii, 1-607. 1980, *Flora of Alberta* (edition 2) i-xii, 1-687. 1983, *Flora of the Yukon Territory* i-xvii, 1-669. 1996.

in English: Mackenzie valley manna grass, slender manna grass

Br.; *Poa striata* Lam.; *Poa striata* Michx., nom. illeg., non *Poa striata* Lam.; *Poa sulcata* Roem. & Schult., nom. illeg., non *Poa sulcata* Lag.)

Northern America, U.S., California, Canada, Mexico, Guatemala. Perennial, slender, herbaceous, erect, smooth, densely tufted, clumped or single, shortly rhizomatous, stoloniferous, leaf sheaths closed glabrous to rough, ligule rounded and membranous, leaves glabrous to somewhat rough, panicle loosely spreading and open, mature flower head open with slender upward-pointing branches, spikelets ovate often purplish, many-flowered and awnless spikelets, glumes subequal ovate-elliptic and minutely hairy with rough jagged margins, first glume is twice as long as the second, lemmas elliptic and broad, palea keels scabrid, grain shiny dark brown to reddish, grains large and worth gathering for food, naturalized elsewhere, occurs in wetlands and in meadow habitats, moist meadows, light woodland, shady places, sandy soil, open areas, sandy floodplain, low woods, bogs, saturated soil, sand bars, lakeshores,

roadside ditches, fresh wet meadows, wet grounds, ponds, wet woods, wet places, low wet grounds, swamps, springs and stream margins, see *Tableau Encyclopédique et Méthodique ... Botanique* 1: 183. 1791, *Species Plantarum. Editio quarta* 1: 389. 1797, *Flora Boreali-Americana* 1: 69. 1803, *Syn. G. x gatineauensis Bowden (*Glyceria melicaria* (Michx.) F.T. Hubb. x *Glyceria striata* (Lam.) A.S. Hitchc.) (Canada, Gatineau Park)

Northern America, Canada. See *Canadian Journal of Botany* 38: 126. 1960.

G. x laxa (Scribn.) Scribn. (*Glyceria canadensis* var. *laxa* (Scribn.) A.S. Hitchc.; *Glyceria laxa* Scribn. ex E.L. Rand & Redfield; *Glyceria laxa* (Scribn.) Scribn.; *Glyceria x ottawensis* Bowden; *Panicularia laxa* Scribn.)

Northern America, Canada, U.S. Perennial, see *Prelim. Cat. Pl. Mount Desert* 180. 1890.

in English: limp manna grass, lax mannagrass, northern mannagrass

G. x pedicellata F. Towns.

New Zealand. Branched at base, stoloniferous with long floating stolons, culm internodes spongy, leaf sheaths chartaceous, ligule membranous, leaf blade flat or folded, panicle branches erect or spreading, spikelets persistent, glumes unequal and membranous, lemma obtuse, palea shortly bidentate and keels narrowly winged, anthers indehiscent, found in swamps, along streams, drains, see *Annals and Magazine of Natural History, ser. 2* 5: 105. 1850 and *New Zealand Journal of Botany* 29: 101-116. 1991.

Glyphochloa W.D. Clayton

From the Greek *glypho* "to carve, engrave," *glyphe* "a carving" and *chloe, chloa* "grass."

About 8 species, India. Panicoideae, Andropogonodae, Andropogoneae, Rottboelliinae, annual, herbaceous, branched, slender, geniculate, leaf blades linear to filiform, ligule an unfringed membrane, plants bisexual, inflorescence terminal or axillary, racemose or pseudospicate,

single flattened dorsiventral raceme, lower floret barren, 2 glumes often equal, lower glume long-awned 2-keeled, lemma and palea acute, 2 fleshy lodicules, 3 stamens, similar to *Heteropholis*, type *Glyphochloa forficulata* (C.E.C. Fischer) Clayton, forest floor, moist shady areas, rocky places, see *Mantissa Plantarum* 2: 164. 1767, *Supplementum Plantarum* 13, 114. 1781 [1782] and *Grasses of Burma* ... 190-193. 1960, *Bull. Bot. Surv. India* 12(1-4): 6-17. 1970, *Kew Bulletin* 35(4): 813-818. 1981.

Species

G. acuminata (Hack.) Clayton (*Manisuris acuminata* (Hack.) Kuntze; *Rottboellia acuminata* Hack.)

Karnataka, Maharashtra, Tamil Nadu, Kerala. Annual, lower glume ridged, single awned, rocky areas, moist places, see *Monographiae Phanerogamarum* 6: 291. 1889, *Revisio Generum Plantarum* 2: 779. 1891 and *Kew Bulletin* 35(4): 815. 1981.

G. acuminata (Hack.) Clayton var. *acuminata*

India.

G. acuminata (Hack.) Clayton var. *stocksii* (Hook.f.) Clayton (*Manisuris acuminata* var. *stocksii* (Hook.f.) Jain; *Rottboellia acuminata* var. *stocksii* Hook.f.)

India. See *The Flora of British India* 7(21): 153. 1897 [1896] and *Bulletin of the Botanical Survey of India* 12(1-4): 9. 1970 [1972], *Kew Bulletin* 35(4): 815. 1981.

G. acuminata (Hack.) Clayton var. *woodrowii* (Bor) Clayton (*Manisuris acuminata* var. *woodrowii* Bor)

India. See *Grasses of Burma, Ceylon, India and Pakistan* 191. 1960, *Kew Bulletin* 35(4): 815. 1981.

G. divergens (Hook.f.) Clayton (*Manisuris divergens* (Hack.) Kuntze; *Rottboellia divergens* Hack.)

India, Mysore, Karnataka, Kerala. Rare, annual, 2-awned, leaves basal, upper leaves pilose, lower glume of sessile spikelets bifid and awned, back of the glumes pitted, on hill slopes, grasslands, wet habitats, see *Monographiae Phanerogamarum* 6: 292. 1889, *Revisio Generum Plantarum* 2: 779. 1891 and *Bull. Bot. Surv. India* 9(1-4): 293-294, figs. 1-17. 1967, *Kew Bulletin* 35(4): 815. 1981.

G. divergens (Hook.f.) Clayton var. *hirsuta* (Fischer) Clayton (*Manisuris divergens* var. *hirsuta* (C.E.C. Fisch.) Jain; *Manisuris forficulata* var. *hirsuta* C.E.C. Fisch.)

India. See *Bulletin of Miscellaneous Information Kew* 933: 357f. 6. 1933, *Bulletin of the Botanical Survey of India* 12(1-4): 12. 1970 [1972], *Kew Bulletin* 35(4): 815. 1981.

G. forficulata (Fischer) Clayton (*Manisuris forficulata* Fischer)

Karnataka, Maharashtra, Tamil Nadu. Annual, 2-awned, leaf blades glabrous or hairy, back of the glumes hairy,

common along roadsides, grassy slopes, see *Bulletin of Miscellaneous Information Kew* 1933: 353. 1933, *Kew Bulletin* 35(4): 815. 1981.

G. goensis (Rolla Rao & Hemadri) Clayton (*Manisuris goensis* Rao & Hemadri)

India. See *Bulletin of the Botanical Survey of India* 10: 106. 1968, *Kew Bulletin* 35(4): 815. 1981.

G. henryi Janarth.

India. See *Rheedea* 10(2): 99-101, f. 1. 2000.

G. mysorensis (Jain & Hemadri) Clayton (*Manisuris mysorensis* Jain & Hemadri)

India. See *Bulletin of the Botanical Survey of India* 10: 280. 1969, *Kew Bulletin* 35(4): 815. 1981.

G. ratnagirica (Kulk. & Hemadri) Clayton (*Manisuris ratnagirica* Kulk. & Hemadri)

India. See *Indian Forester* 100(4): 250. 1974, *Kew Bulletin* 35(4): 815. 1981.

G. santapau (Jain & Deshpande) Clayton (*Manisuris santapau* Jain & Desh.)

India, Maharashtra. Annual, tufted, leaves linear and acute, inflorescence erect, racemes solitary, stout internode, lower glume of sessile spikelet awned and densely ciliate, rare, marshy places, see *Bulletin of the Botanical Survey of India* 10(3-4): 277-279. 1969 [1968], *Bulletin of the Botanical Survey of India* 12(1-4): 15, f. 11. 1970, *Kew Bulletin* 35(4): 815. 1981.

G. talbotii (Hook.f.) Clayton (*Manisuris talbotii* (Hook.f.) Bor; *Peltophorus talbotii* (Hook.f.) Camus; *Rottboellia talbotii* Hook.f.)

India, Goa. Vulnerable, annual, leaves linear, stout racemes, sessile spikelets imbricate, long-awned, grassy slopes, hillsides, high rainfall areas, see *The Flora of British India* 7(21): 155. 1897 [1896] and *Bulletin du Muséum d'Histoire Naturelle* 27: 371. 1921, *The Bombay Grasses* 35. 1935, *Grasses of Burma* ... 192, t. 10. 1960, *Bulletin of the Botanical Survey of India* 12(1-4): 16, f. 9. 1970 [1972], *Kew Bulletin* 35(4): 815. 1981.

Gnomonia Lunell = *Festuca* L., *Gnomonia* Ces. & De Not. (Fungi)

From the Greek *gnomon* "interpreter, pointer, carpenter's square, point."

Pooideae, Poeae, Loliinae, see *Commentario della Società Crittogamologica Italiana* 1: 231. 1863 and *American Midland Naturalist* 4: 224. 1915, *Contributions from the United States National Herbarium* 48: 312-368, 379. 2003.

Goldbachia Trin. = *Arundinella* Raddi,
Calamochloe Rchb., *Goldbachia* DC.
(Brassicaceae, alt. Cruciferae)

After the German Karl (Carl) Ludwig Goldbach, 1793-1824.

Panicoideae, Arundinelleae, type *Goldbachia mikanii* Trin. ex Spreng., see *Neue Entdeckungen im ganzen Umfang der Pflanzenkunde* 2: 42, 81. 1820, *Mémoires du Muséum d'Histoire Naturelle* 7: 242. 1821, *Regni Vegetabilis Systema Naturale* 2: 577. 1821, *Agrostografia Brasiliensis* 36-37, t. 1, f. 3. 1823, *Conspectus Regni Vegetabilis* 52. 1828 and *Contributions from the United States National Herbarium* 46: 111-113, 144, 242. 2003.

Gossweilerochloa Renvoize = *Tridens* Roem. & Schult.

For the botanist John Gossweiler, 1873-1952, plant collector, author of *Carta fitogeografica de Angola*. [Luanda] 1939, *Flora exotica de Angola*. Luanda 1950, "Bibliografia das viagens feitas em Angola por exploradores de diversas nacionalidades, cujos relatorios se referem à flora, fauna e agricultura." *Bol. Serv. Agr. Com. Col. Flor.* Ano VII, 28-31: 121-125. 1935, "Elementos para a Historia da Exploração Botanica de Angola." *Bol. Soc. Broter.* 13: 303-304. 1939 and "Relação dos viajantes que coligiram plantas em Angola actualmente depositadas nos institutos botanicos de Londres, Berlim, Paris, Montpelier, Zürich, Lisboa, Coimbra, Cabo da Boa Esperança e Washington onde estão sendo estudadas desde 1868." *Bol. Serv. Agr. Com. Col. Flor.* Ano VII, 28-31: 126-130. 1935; see Alberto Judice Leote Cavaco (b.1916), *Contribution à l'étude de la flore de la Luanda d'après les récoltes de Gossweiler, 1946-1948*. Lisboa 1959 [Publicações culturais da Companhia de Diamantes de Angola, vol. 42].

Chloridoideae, Cynodonteae, see *American Journal of Botany* 48(7): 565-573. 1961, *Darwiniana* 22(1-3): 159-175. 1979, *Kew Bulletin* 33(3): 525-527. 1979, *Dominguezia* 2: 18-20. 1981, *Iheringia*, Ser. Bot. 35: 25-44. 1986, *Flora Mesoamericana* 6: 259. 1994, *American Journal of Botany* 81: 622-629. 1994, *Contributions from the United States National Herbarium* 41: 121-122, 225-228. 2001.

Gouinia E. Fourn. = *Gouinia* E. Fourn. ex Benth., *Gouinia* E. Fourn. ex Benth. & Hook.f., *Gouinia* Benth., *Hackelia* Vasey, *Hackelia* Vasey ex Beal, *Pogochloa* S. Moore, *Schenckochloa* J.J. Ortíz

Named for the French botanist Antoine Gouan (Gouin) (Dupuy des Esquiles, pseud.), 1733-1821, professor of

botany at Montpellier, correspondent of Linnaeus, his principal writings are *Hortus regius monspeliensis*. Lyon 1762, *Flora monspeliaca*. Lyon 1765, *Explication du système botanique du Chevalier von Linné*. Montpellier 1787 and *Description du Ginkgo-Biloba, dit Noyer du Japon*. Montpellier 1812. See J.H. Barnhart, *Biographical notes upon botanists*. 2: 69. 1965; Nikolaus Joseph von Jacquin (1727-1817), *Selectarum stirpium americanarum historia*. 1: 263, t. 179, f. 40. Vindobonae [Wien] 1763; Clap, *Antoine Gouan*, Essais et documents inédits. Montpellier 1955; J.D. Milner, *Catalogue of Portraits of Botanists Exhibited in the Museums of the Royal Botanic Gardens*. Royal Botanic Gardens, Kew, London 1906; M. Colmeiro y Penido, *La Botánica y los Botánicos de la Peninsula Hispano-Lusitana*. Madrid 1858; Jonas C. Dryander, *Catalogus bibliothecae historico-naturalis Josephi Banks*. London 1796-1800; [Pierre Cusson, Antoine Gouan & P.E. Crassous] Dupuy des Esquiles, *Leçons de Botanique*, faites au jardin royal de Montpellier; par Monsieur Imbert, Professeur & Chancelier en l'Université de Médecine. [A satire directed at François Imbert] en Hollande [Avignon] 1762; S. Lenley et al., *Catalog of the manuscript and archival collections and index to the correspondence of John Torrey*. Library of the New York Botanical Garden. 456. 1973; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 149. 1972; Mariella Azzarello Di Misa, a cura di, *Il Fondo Antico della Biblioteca dell'Orto Botanico di Palermo*. 115. Palermo 1988; Frans A. Stafleu, *Linnaeus and the Linnaeans: The Spreading of Their Ideas in Systematic Botany, 1735-1789*. Utrecht 1971.

About 10-13 species, Central and South America, from Mexico to Argentina. Chloridoideae, Cynodonteae, Gouiniinae, perennial, erect, wiry, robust, caespitose, leaf blades linear, auricles absent, sheaths ciliate or not with scabrous margins, ligule a membrane ciliate or not, inflorescence a panicle exserted, racemes on a central axis, spikelets solitary and more or less laterally compressed, 2-6 florets per spikelet, rachilla between each floret, uppermost floret rudimentary and awned, 2 glumes unequal to very unequal and lanceolate, lower glume 1- to 5-nerved, upper glume 1- to 7-nerved, lemmas keeled, palea glabrous or hairy, lodicules truncate, stamens 3, stigmas 2, open habitats, dry open places on hill slopes, thickets, similar to *Silentvalleya* Nair et al., allied to *Leptochloa* P. Beauv., type *Gouinia polygama* E. Fourn., see *Genera Plantarum* 3: 1178. 1883, *Mexicanas Plantas* 2: 103. 1886, *Transactions of the Linnean Society of London, Botany* 4(3): 509, t. 37, f. 9-23. 1895, *Contributions from the United States National Herbarium* 1(9): 365. 1895, *Grasses of North America for Farmers and Students* 2: 438. 1896 and *Journal of the Washington Academy of Sciences* 17: 73, f. 2. 1927, Jason Richard Swallen, "The grass genus *Gouinia*." *Amer. J. Bot.* 22: 31-41. 1935, *Bull. Torrey Botanical Club* 88: 143-152. 1961, *Brittonia* 23(3): 293-324. 1971, *Lilloa* 34(6): 57-88. 1975

[Contribución al conocimiento de las especies argentinas del género *Gouinia* Fournier (Gramineae — Eragrostoideae — Eragrosteae)], *Candollea* 46: 241-249. 1991 [*Schenckochloa* (Poaceae, Chloridoideae, Eragrostoideae), un genero nuevo del noreste de Brasil.], *Acta Botanica Mexicana* 23: 1-33. 1993 [Estudio sistemático del género *Gouinia* (Gramineae, Chloridoideae, Eragrostoideae)], *Annals of the Missouri Botanical Garden* 81(4): 768-774. 1994, *Flora Mesoamericana* 6: 262. 1994, *Contributions from the United States National Herbarium* 41: 122-123, 127, 190, 193. 2001, *Hickenia* 3(28): 99-103. 2001, *Flora of Ecuador*. Gramineae (part 2) Subfam. Chloridoideae. 68: 23-25. 2001.

Species

G. barbata (Hack.) Swallen (*Diplachne barbata* Hack.; *Schenckochloa barbata* (Hack.) J.J. Ortíz)

South America. Ligule a line of hairs, see *Österreichische Botanische Zeitschrift* 52: 240. 1902, *American Journal of Botany* 22: 37. 1935, *Candollea* 46(2): 243. 1991.

G. brasiliensis (S. Moore) Swallen (*Pogochloa brasiliensis* S. Moore)

Bolivia, Brazil, Paraguay, Argentina. Leaf blades acuminate, lax racemes, spikelets sessile elliptic, 4- to 5-flowered, lower glume acuminate, upper glume acuminate or 2-dentate, palea keels scabrous, see *Transactions of the Linnean Society of London, Botany* 4(3): 509, t. 37, f. 9-23. 1895 and *American Journal of Botany* 22: 36. 1935.

G. cearensis (Ekman) Swallen (*Diplachne cearensis* Ekman)

South America. Callus bearded, palea shortly 2-awned, see *Arkiv för Botanik utgivet av K. Svenska Vetenskapsakademien* 10(17): 32, t. 5, f. 3, t. 6, f. 18. 1911, *American Journal of Botany* 22: 39. 1935.

G. gracilis Ekman ex Swallen

Cuba. See *American Journal of Botany* 22: 33, f. 1. 1935.

G. isabelensis J.J. Ortíz

Mexico. See *Acta Botánica Mexicana* 23: 18. 1993.

G. latifolia (Griseb.) Vasey (*Diplachne guatemalensis* Hack.; *Diplachne latifolia* (Griseb.) Hack.; *Diplachne latifolia* Nakai, nom. illeg., non *Diplachne latifolia* (Griseb.) Hack.; *Diplachne monticola* (Chase) McNeill; *Gouinia guatemalensis* (Hack.) Swallen; *Gouinia ramosa* Swallen; *Leptochloa monticola* Chase; *Sieglingia latifolia* (Griseb.) Kuntze; *Tricuspis latifolia* Griseb.)

Argentina, Mexico. Leaf blades acuminate scabrous, lax racemes, spikelets oblong and mainly terminal, 3- to 6-flowered, lower glume acuminate, upper glume acute or obtuse, lemmas 2-dentate, see *Abhandlungen der Königlichen Gesellschaft der Wissenschaften zu Göttingen* 19: 259-260. 1874, *Revisio Generum Plantarum* 2: 789. 1891, *Contributions from the United States National Herbarium* 1(9):

365. 1895 and *Österreichische Botanische Zeitschrift* 52: 274. 1902, *Botanical Magazine* (Tokyo) 35: 139. 1921, *Journal of the Washington Academy of Sciences* 17: 73, f. 2. 1927, *Publications of the Carnegie Institution of Washington* 436: 333, f. 1. 1934, *Brittonia* 31(3): 401. 1979.

Gouldochloa J. Valdés, Morden & S.L. Hatch = *Chasmanthium* Link

Named for Frank W. Gould, 1913-1981, North American agrostologist, botanical collector in Dominican Republic, Mexico and United States of America, author of *Texas Plants-A Checklist and Ecological Summary*, 3rd Edition, College Station, Texas: Texas Agricultural Experiment Station, Texas A&M University, 1975, *Common Texas Grasses: An Illustrated Guide* 1978, *Grass Systematics*, McGraw-Hill, New York 1968, with Valloo Kapadia wrote *The Grasses of Texas*, Texas A&M University Press 1975.

Centothecoideae, Centothecae, or Panicoideae, Centothecae, perennial, caespitose, erect, decumbent to ascending, flowering culms leafy, ligule a fringed membrane, plants bisexual, contracted inflorescence paniculate, 2 glumes subequal, palea 2-keeled, 2 free lodicules, 1 stamen, ovary glabrous, 2 stigmas, open habitats, sometimes referred to *Chasmanthium*, type *Gouldochloa curvifolia* Valdés-Reyna, Morden & S.L. Hatch, see *Hortus Regius Botanicus Bero-linensis* 1: 159. 1827 and *Southw. Nat.* 11(2): 145-189. 1966, *Southw. Nat.* 11(4): 415-455. 1966 [Revision of grasses traditionally referred to *Uniola*, II. *Chasmanthium*], *Systematic Botany* 11(1): 112-119. 1986 [*Gouldochloa*, a new genus of centothecoid grasses from Tamaulipas, Mexico], *Contributions from the United States National Herbarium* 46: 158-159, 242. 2003.

Species

G. curvifolia Valdés-Reyna, Morden & S.L. Hatch (*Chasmanthium curvifolium* (Valdés-Reyna, Morden & S.L. Hatch) Wipff & S.D. Jones)

America, Mexico. Glumes 7- to 9-nerved, see *Systematic Botany* 11(1): 112-118, f. 1-5. 1986, *Phytologia* 69(6): 469. 1990 [1991].

Gracilea Koenig ex Hook.f. = *Melanocenchris* Nees

Chloridoideae, Cynodonteae, type *Gracilea nutans* Hook.f., see *Nova Graminum Genera* 31. 1780 [21 Dec 1779], *Der Gesellschaft naturforschender Freunde zu Berlin, neue Schriften* 4: 218. 1803, *Novae Plantarum Species* 33. 1821, *Proceedings of the Linnean Society of London* 1: 94, 95. 1841, *Nomenclator Botanicus. Editio secunda* 2: 379. 1841, *Illustrationes Plantarum Orientalium* 4: 38, pl. 326. 1850-1853, *Revisio Generum Plantarum* 1(2): 780. 1891, *The Flora of British India* 7: 283, 300. 1896 and *Handb. Fl. Ceylon* 5: 284, 286. 1900, *Flora of the Presidency of*

Madras 10: 1831. 1934, *Kew Bulletin* 1935: 148. 1935, *Grasses of Ceylon* 87, 92. 1956, *Ceylon J. Sci., Biol. Sci.* 2(2): 123. 1959, *Grasses of Burma ...* 473, 620, f. 74. 1960.

Gramen Krause = *Festuca* L., *Gramen* Ség.,
Gramen W. Young, *Secale* L.

Latin *gramen*, *graminis* “a blade of grass, a plant, herb, couch-grass.”

Pooideae, Poeae, Loliinae, see *Species Plantarum* 1: 73, 84. 1753, *Plantae Veronenses* 3: 145. 1754, *Catalogue d'Arbres Arbustes et Plantes Herbacées d'Amérique* 36. 1783 and *Beihefte zum Botanischen Centralblatt* 32(2): 331. 1914, *Torreyia* 16: 244-245. 1916, *Watsonia* 16: 300. 1987, *Contributions from the United States National Herbarium* 48: 312-368, 379-380, 610. 2003.

Gramen Séguier = *Secale* L.

Latin *gramen*, *graminis* “a blade of grass, a plant, herb, couch-grass.”

Pooideae, Triticaceae, Triticinae, see *Species Plantarum* 1: 73, 84. 1753, *Plantae Veronenses* 3: 145. 1754, *Catalogue d'Arbres Arbustes et Plantes Herbacées d'Amérique* 36. 1783 and *Beihefte zum Botanischen Centralblatt* 32(2): 331. 1914, *Torreyia* 16: 244-245. 1916, *Watsonia* 16: 300. 1987, *Contributions from the United States National Herbarium* 48: 610. 2003.

Gramerium Desv. = *Digitaria* Haller,
Digitaria Heist. ex Fabr., *Paspalum* L.,
Syntherisma Walter

Latin *gramen*, *graminis* “a blade of grass, a plant, herb, couch-grass, dog's-grass.”

Panicoideae, Paniceae, Digitariinae, type *Gramerium convolutum* Desv., see *Enumeratio Methodica Plantarum* 207. 1759, *Systema Naturae, Editio Decima* 846, 855, 1359. 1759, *Historia Stirpium Indigenarum Helvetiae Inchoata* 2: 244. 1768, *Flora Carniolica, Editio Secunda* 1: 52. 1771, *Flora Caroliniana, secundum ...* 76. 1788, *Mémoires de la Société d'Agriculture, Sciences et Arts d'Angers* 1: 165, t. 7, f. 1. 1831 and *Contr. U.S. Natl. Herb.* 12: 116. 1908, *Contributions from the United States National Herbarium* 46: 193-213, 242-243, 611-612. 2003.

Graminastrum E.H.L. Krause =
Dissanthelium Trin.

Resembling *gramen*, *graminis* “a blade of grass, a plant, herb, couch-grass, dog's-grass.”

Pooideae, Poeae, Poinae, type *Graminastrum macusaniense* E.H.L. Krause, see *Linnaea* 10(3): 305. 1836, *Gramineae* 29. 1841, *Nova Acta Phys.-Med. Acad. Caes. Leop.-Carol. Nat. Cur.* 19(Suppl. 1): 161. 1843, *Proceedings of the Academy of Natural Sciences of Philadelphia* 4: 25. 1848 and *Beihefte zum Botanischen Centralblatt* 32(2): 348. 1914, *Contributions from the United States National Herbarium* 48: 271-273, 380. 2003.

Graphephorum Desv. = *Graphephorum*
Honda

From the Greek *graphe* “drawing, painting, picture” and *phoros* “bearing.”

About 2-3 species, North and Central America. Pooideae, Triticodae, Aveneae, or Pooideae, Poeae, Aveninae, perennial, caespitose, herbaceous, ligule membranous, leaf blades linear, auricles absent, plants bisexual, panicle contracted, spikelets 2- to several-flowered, 2 glumes unequal to subequal, lemmas keeled membranous obtuse to acute, palea present, ovary glabrous, stigmas 2, open habitats, boggy spots, meadows, lowland meadows, near water, high mountains, moist sites, sometimes referred to *Trisetum*, type *Graphephorum melicoides* (Michx.) Desv. (also spelled *melicoideum*), see *Syn. Pl.* 1: 97. 1805, *Nouveau Bulletin des Sciences, publié par la Société Philomatique de Paris* 2: 189. 1810, *Chloris Melvilliana* 32. 1823, *Hortus Regius Botanicus Berolinensis* 1: 136. 1827, *Genera Plantarum* 3(2): 1197. 1883 and *Syn. Mitteleur. Fl.* 2, 1: 342. 1900, *Rhodora* 30(359): 211. 1928, *Journal of Japanese Botany* 10: 693. 1934, *Nord. Karlvoxifl.* 1: 278. 1953, *Contributions from the United States National Herbarium* 48: 380-381. 2003.

Species

G. melicoides (Michx.) Desv. (*Agrostis airoides* (Poir.) Raspail, nom. illeg., non *Agrostis airoides* Torr.; *Aira melicoides* Michx.; *Arundo airoides* Poir.; *Calamagrostis airoides* (Poir.) Steud.; *Deyeuxia airoides* (Poir.) P. Beauv.; *Dupontia cooleyi* A. Gray; *Graphephorum cooleyi* (A. Gray) Farw.; *Graphephorum melicoides* var. *cooleyi* (A. Greslania Balansa

Named for the French agronomist de Greslan.

Three or four species, New Caledonia. Bambusoideae, Bambusodae, Bambuseae, or Bambuseae, Hickeliinae, perennial, sympodial, woody, shrubby, forming dense clumps, unbranched, rhizomes pachymorph, plants bisexual, inflorescence compound bracteate paniculate determinate, spikelets 1-flowered subtended by bract, 2 glumes, awnless, 6 stamens, ovary glabrous, 3 stigmas, fleshy pericarp, slopes, riversides, mountain slopes, marshy places, forests, related to *Nastus*, similar to *Myriocladus* and *Glaziophyton*, type *Greslania montana* Balansa, see *Bulletin de la Société Botanique de France* 19: 319-320. 1873 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 74: 22-24. 1945, *Taxon* 6(7): 203. 1957, R.E. Holtum, *The Bamboos of the Malay Peninsula*. Gardens' Bulletin Singapore 16: 1-135. 1958, *Kew Bulletin* 49: 429-443. 1994, *Bambou* no. 36: 9-10. 2001, Soejatmi Dransfield, "Greslania circinata and Greslania rivularis (Poaceae-Bambusoideae) from New Caledonia." *The Journal of the American Bamboo Society* 16(1): 1-8. 2002.

Species

G. circinata Balansa

New Caledonia. Leaf blades without midribs.

G. montana Balansa

New Caledonia.

G. multiflora Pilger

New Caledonia. See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 39: 23. 1906.

G. rivularis Balansa

New Caledonia.

Griffithsochloa G.J. Pierce = *Bouteloua* Lag.

Named for David Griffiths, 1867-1935, botanical collector in Mexico and U.S., professor of botany at the University of Arizona, an authority on cacti, 1901 assistant agrostologist Bureau of Plant Industry, United States Department of Agriculture (USDA), author of "Illustrated studies in the genus *Opuntia*: 1." *Report Missouri Bot. Gdn.* 19: 259-272. 1908, "The Grama grasses: *Bouteloua* and related genera." *Contr. U.S. Nat. Herb.* 14: 343-428. 1912. See Joseph Ewan, *Rocky Mountain Naturalists*. 220, 246, 338. The University of Denver Press 1950; Joseph William Blankinship (1862-1938), "A century of botanical exploration in Montana, 1805-1905: collectors, herbaria and bibliography." in *Montana Agric. Coll. Sci. Studies Bot.* 1: 1-31. 1904; *Annual Report of the Missouri Botanical Garden* 19: 259-260, 261-265, t. 21, 23, 24, 26. 1908; *Annual Report of the Missouri Botanical Garden* 21: 165-166, 172-173, t. 19, 20, 26. 1910; *Annual Report of the Missouri Botanical Garden* 22: 25. 1912; *Proceedings of the Biological Society of Washington* 27: 25, 27, 28. 1914; *Proceedings of the Biological Society of Washington* 29: 10, 11, 13. 1916; *Bulletin of the Torrey Botanical Club* 43: 92, 523, 524, 528. 1916; *N. Amer. Fl.* 21(2): 128. 1917; *Bulletin of the Torrey Botanical Club* 46: 199. 1919.

One species, Mexico. Chloridoideae, Cynodonteae, Boutelouinae, perennial, herbaceous, unbranched, caespitose, ligule a fringe of hairs, plants bisexual, inflorescence spiciform, spikelets in triplets, central spikelet 3-flowered and shortly stipitate, 2 linear glumes very unequal, upper lemma 5- to 9-awned, lateral spikelets sessile and 2-flowered, 0-3 stamens, ovary glabrous, 2 stigmas, a new genus segregated from and sometimes referred to *Cathestechum* J. Presl, open habitats, dry areas, scrubs, type *Griffithsochloa multifida* (Griffiths) G.J. Pierce, see *Bulletin of the Torrey Botanical Club* 105(2): 134-138. 1978, *Contributions from the United States National Herbarium* 41: 20-33, 124. 2001.

Species

G. multifida (Griffiths) G.J. Pierce (*Bouteloua multifidum* (Griffiths) Columbus; *Cathestechum multifidum* Griffiths)

Mexico. Perennial, erect, foliage mainly basal, auricles absent, spikelets subtended by solitary bristles, palea 2-keeled, 2 free and fleshy lodicules, 0 or three stamens, fodder, see *Contributions from the United States National Herbarium* 14(3): 360, f. 24. 1912, *Bulletin of the Torrey Botanical Club* 105(2): 134. 1978, *Aliso* 18(1): 63. 1999.

in Mexico: pasto

Guadella Franch. = *Guaduella* Franch.

Guadua Kunth = *Bambusa* Schreb., *Guadua* (Kunth) Hackel

From the vernacular name.

About 24/30-34 species, tropical and subtropical regions of Mexico, southern and northern America. Bambusoideae, Bambuseae, Guaduinae, woody, long and thorny culms, hollow internodes, spiny branches, white hair bands in the nodal regions, large culm leaves with a triangular form, palea keels winged, stamens 6, three feathery stigmas, grows extremely fast, strong, flexible, resistant and lightweight, used for bridges, fences, paper, baskets and all kinds of furniture and construction, useful for erosion control, lowland tropical, lower montane forests, edge of forest, savannah, seasonally inundated areas, cerrado, gallery forests, sometimes in *Bambusa*, type *Guadua angustifolia* Kunth, see *Genera Plantarum* 1: 236. 1789, *Species Plantarum. Editio quarta* 2: 245. 1799, *Journal de Physique, de Chimie, d'Histoire Naturelle et des Arts* 95: 150. 1822, *Synopsis Plantarum* 1: 253. 1822, *Die Natürlichen Pflanzenfamilien* 2(2): 95. 1887 and *Österreichische Botanische Zeitschrift* 53: 194. 1903, *Fieldiana, Botany* 24(2): 38-331. 1955, *Taxon* 6(7): 203. 1957, Leonardo Tascón, *Diccionario de provincialismos y barbarismos del Valle del Cauca y quechuismos usados en Colombia*. (for Frederik Michael Liebmann, 1813-1856)

Ecuador, Venezuela, Colombia, Paraguay. Erect, arching, large, tall, woody, stout, giant, hollow, grows very quickly, forming groves and extensive thickets, armed at the base, lower branches strongly thorny with long straight thorns, branched above, rhizomes pachymorph, culm internodes sometimes filled with water, short internodes with broad white band, culm sheaths covered with brown hairs, foliage leaf blades sparsely hairy on both surfaces, ciliolate margins on the foliage leaf sheath, inflorescences axillary, straight or slightly curved pseudospikelets, lemmas with smooth papery margins, paleas with glabrous enfolded margins, glabrous and hispid fusiform ovary, self-reproducing, high quality timber, excellent building material, ideal for

seismic-resistant constructions, rot and insect resistant, drinkable water from the nodes of the stems, found along rivers and streams, forest edge on riverbanks, alluvial soils, see *Plantae Aequinoctiales* 1: 68, t. 20. 1808, *Synopsis Plantarum* 1: 253. 1822, *Systema Vegetabilium, editio decima sexta* 2: 113. 1825, *Flora Brasiliensis* 2(3B): 161-242, t. 44-58. 1880, *Mexicanas Plantas* 2: 129-130. 1886, *Revisio Generum Plantarum* 2: 761. 1891 and *Contributions from the United States National Herbarium* 17(3): 387. 1913, *Les Bambusées* 1: 112. 1913, *Bulletin de l'Académie Internationale de Géographie, Botanique* 26(4): 157, f. 1. 1918, *Contributions from the United States National Herbarium* 24(8): 291-556. 1927, Fortunato L. Costa Rica, Brazil, Guatemala, Mexico, Argentina. Spreading stems, erect and strongly arching, thick, woody, dimorphic, nearly cylindrical, thorny below, culms thick-walled, some internodes with water, pubescent pseudospikelets in loose fascicles, 4-7 florets, spikelets green to purplish, palea keels ciliolate, growing in large colonies, forming dense thickets, forest edge, see *Transactions of the Linnean Society of London* 26(1): 85. 1868, *Biol. Cent.-Amer., Bot.* 3: 587. 1885, *Mexicanas Plantas* 2: 131. 1886, *Revisio Generum Plantarum* 2: 761. 1891 and *Österreichische Botanische Zeitschrift* 53: 195. 1903, *Repertorium Specierum Novarum Regni Vegetabilis* 7(149-151): 374. 1909, *Field-*

iana, Botany 24(2): 38-331. 1955, *Annals of the Missouri Botanical Garden* 77(1): 125-201. 1990, *Novon* 1(1): 27-32. 1991, *Cuscatlania* 1(6): 1-29. 1991, *Edinburgh Journal of Botany* 48: 73-80. 1991, *Monographs in Systematic Botany from the Missouri Botanical Garden* 47: i-xi, 1-178. 1994.

in Bolivia: tacuara, guapá, baparr

in Venezuela: carrizo

G. paraguayana Döll (*Bambusa paraguayana* (Döll) Bertoni)

Brazil, Argentina, Bolivia, Paraguay. Erect, arching, thorny at the base, forming dense thickets, see *Flora Brasiliensis seu Enumeratio Plantarum* 2(3): 179, t. 48. 1880 and *Flora Illustrada de Entre Ríos (Argentina)* 6(2): 1-551. 1969.

in Bolivia: tacuarembó

G. polyclados Döll

Venezuela. See *Flora Brasiliensis* 2(3): 182. 1880.

G. refracta Munro (*Arundarbor refracta* (Munro) Kuntze; *Bambusa refracta* (Munro) McClure)

Brazil. See *Transactions of the Linnean Society of London* 26(1): 84. 1868, *Revisio Generum Plantarum* 2: 761. 1891 and *Smithsonian Contr. Bot.* 9: 68. 1973.

G. ribbentropii Herter (*Bambusa riograndensis* Dutra; *Bambusa tacuara* Arechav.; *Bambusa trinii* Nees)

Uruguay. See *Anales del Museo Nacional de Montevideo* 1(6): 550, t. 72-73. 1897 and *Revista Sudamericana de Botánica* 6(5-6): 148. 1940.

G. riograndensis (Dutra) Herter (*Bambusa riograndensis* Dutra; *Bambusa trinii* Nees; *Guadua trinii* (Nees) Nees ex Rupr.)

Brazil. See *Linnaea* 9(4): 469. 1834, *Bambuseae* 40, t. 15, f. 38. 1839 and *Revista Sudamericana de Botánica* 6(5-6): 148. 1940.

G. sarcocarpa Londoño & P.M. Peterson

Peru, Bolivia, Brazil. Erect, arching, green culms and flowers, pseudospikelets lanceolate, stamens red, green fleshy fruits, aggressive and running, fruits and young shoots eaten by local people, growing in alluvial soils, see *Systematic Botany* 16(4): 631, f. 1-3. 1991.

G. sarcocarpa Londoño & P.M. Peterson subsp. *purpurea* Londoño & P.M. Peterson

Peru, Bolivia. Erect, arching, flowers purplish, upper portion of the lodicules prickly, ovary hispidulous, fruits fleshy and green, growing in lowland forest, riverbanks, see *Systematic Botany* 16(4): 631, 635, f. 3E-G. 1991.

in Bolivia: tacuara, taquara bambú

G. sarcocarpa Londoño & P.M. Peterson subsp. *sarcocarpa* Peru, Brazil.

G. spinosissima (Hackel) Camus (*Bambusa sinospinosa* McClure; *Bambusa spinosissima* Hack.; *Bambusa tagoara* Nees; *Guadua tagoara* (Nees) Kunth)

Brazil. See *Österreichische Botanische Zeitschrift* 53(5): 197. 1903, *Les Bambusées* 1: 112. 1913, *Lingnan Science Journal* 19(3): 411, t. 19. 1940.

G. superba Huber (*Bambusa superba* (Huber) McClure; *Bambusa tessmannii* (Pilg.) McClure; *Guadua tessmannii* Pilger)

Peru, Bolivia, Brazil, Ecuador. Erect and arching, giant, woody, thorny below, pseudospikelets pubescent, forming dense thickets, see *Boletim do Museu Paraense de Historia Natural e Ethnographia* 4: 479. 1904, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 10(100): 124. 1927, *Smithsonian Contributions to Botany* 9: 68. 1973.

in Bolivia: tacuarembó

in Brazil: rafu

G. tagoara (Nees) Kunth (*Arundarbor distorta* (Nees) Kuntze; *Arundarbor tagoara* (Nees) Kuntze; *Bambusa barbata* Trin.; *Bambusa distorta* Nees; *Bambusa glaziovii* Hack.; *Bambusa longifimbriata* (E.G. Camus) McClure; *Bambusa spinosissima* Hack.; *Bambusa tagoara* Nees; *Guadua distorta* (Nees) Rupr.; *Guadua glaziovii* (Hack.) E.G. Camus; *Guadua longifimbriata* E.G. Camus; *Guadua spinosissima* (Hack.) E.G. Camus; *Nastus barbatus* (Trin.) Rupr.)

Brazil. Erect, scandent to subscaudent, arching, leaning, pendent, climbing, secondary branches very elongate, internodes hollow, sympodial, rhizomes pachymorph, very broadly triangular culm leaves coriaceous and deciduous, branches solitary and armed, thorns usually on the lateral branches, synflorescences terminating leafy or leafless branches, pseudospikelets linear-lanceolate, 1-6 fertile florets and a terminal rudimentary floret, 3 lodicules, 6 stamens, ovary fusiform, 3 plumose stigmas, split culms used for water pipes and in construction of mud huts, montane forests, morphological variation, closely resembles *Guadua weberbaueri* and *Guadua sarcocarpa*, see *Flora Brasiliensis seu Enumeratio Plantarum* 2: 532. 1829, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 434. 1833, *Linnaea* 9(4): 470. 1834, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. G. uncinata Londoño & L.G. Clark (*Guadua angustifolia* Kunth)

Colombia, Ecuador, Andes. Suberect to erect, subscaudent, climbing, arching, trailing, nodding, weak, woody, rhizomatous, branches with strongly recurved thorns, forming very dense clumps, internodes densely pubescent with stiff hairs, rhizomes pachymorph, foliage leaf blades with sparse hairs on both surfaces, culm leaves deciduous and triangular, synflorescences terminating leafy or leafless branches, pseudospikelets linear-lanceolate straight to slightly curved, lemmas with smooth papery margins, palea with glabrous enfolded margins, 3 lodicules, 6 stamens, ovary apically densely hispid, 3 plumose stigmas, poor wood quality, found along rivers and streams, foothills of the mountains, in swamps, similar to *Guadua angustifolia*, see *Novon* 12(1): 69-72, f. 2. 2002.

Local name: cachupenda

G. velutina Londoño & L.G. Clark

Mexico. See *Nordic J. Botany* 11(3): 328. 1991.

G. venezuelae Munro (*Arundarbor venezuelae* (Munro) Kuntze; *Bambusa venezuelae* (Munro) McClure)

Venezuela. See *Transactions of the Linnean Society of London* 26(1): 86. 1868, *Revisio Generum Plantarum* 2: 761. 1891 and *Smithsonian Contributions to Botany* 9: 68. 1973.

G. virgata (Trin.) Rupr. (*Arundarbor virgata* (Trin.) Kuntze; *Bambusa virgata* Trin.)

Brazil. See *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 3,1(6): 624. 1835, *Bambuseae* 40. 1839, *Revisio Generum Plantarum* 2: 761. 1891.

G. weberbaueri Pilg. (*Bambusa weberbaueri* (Pilg.) McClure; *Guadua latifolia* (Bonpl.) Kunth)

Peru, Bolivia, Ecuador. Erect, arching, scandent, woody, thorny branches, pseudospikelets linear-lanceolate and pubescent, 5-10 florets, upper portion of the lodicules prickly, ovary hispidulous, aggressive and running, forming dense colonies, along riverbanks, see *Syn. Pl.* 1: 254. 1822 and *Repertorium Specierum Novarum Regni Vegetabilis* 1(10): 152. 1905, *Field Museum of Natural History, Botanical Series* 13(1/1): 96-261. 1936, *Smithsonian Contributions to Botany* 9: 68. 1973.

in Bolivia: tacuara

in Peru: paca, marona, taquara

Guaduella Franch. = *Microbambus* K. Schum.

A diminutive of *Guadua*.

About 6-8 species, West tropical Africa, Sierra Leone to Angola. Bambusoideae, Bambusodae, Guaduellaeae, perennial, sympodial, herbaceous, small sized, unarmed, glabrous, simple to sparsely branched, rhizomatous with

rhizomes pachymorph, culm sheath persistent, leaves non-auriculate, ligule a fringed membrane, plants bisexual, open inflorescence racemose or paniculate, spikelets shortly pedicelled or sessile, 2-4 glumes very unequal, palea present, 3 lodicules free and ciliate, stamens 6, ovary hairy without the apical appendage, stigmas 2, shade species, in forest, rainforest, undergrowth, resembling *Aframomum* Schumann (Zingiberaceae), type *Guaduella marantifolia* Franchet, see *Genera Plantarum* 1: 236. 1789, *Bulletin Mensuel de la Société Linnéenne de Paris* 1: 676. 1887, *Die Natürlichen Pflanzenfamilien* 2(2): 95. 1887, *J. Bot. Paris* 3: 305. 1889, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 24(3): 336, t. 4. 1897 and *Kew Bulletin* 16: 247-250. 1962, *Kew Bulletin, Additional Series* 13: 46-47. 1986 [*Genera Graminum*], Sarah Mathews, Rocky C. Tsai and Elizabeth A. Kellogg, "Phylogenetic structure in the grass family (Poaceae): evidence from the nuclear gene phytochrome B." *Am. J. Bot.* 87: 96-107. 2000.

Species

G. densiflora Pilg. (*Guaduella foliosa* Pilg.; *Guaduella ledermannii* Pilg.)

Africa, Cameroon. Herbaceous, fertile branches at the base, shade species, in dense rainforest, see *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 30(1): 123. 1902, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 43: 387. 1909, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 45: 211. 1910, *Kew Bulletin* 16: 247-250. 1962.

G. dichroa T.A. Cope

Africa, Angola. See *Kew Bulletin* 37(4): 660. 1983.

G. foliosa Pilg. (*Guaduella densiflora* Pilg.)

Africa, Gabon. See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 45: 211. 1910, *Kew Bulletin* 16: 247-250. 1962.

G. humilis W.D. Clayton

Africa, Nigeria, Cameroon. Rainforest, see *Kew Bulletin* 16: 247-250. 1962.

G. macrostachys (K. Schum.) Pilger (also spelled ***macrostachyus***) (*Guaduella zenkeri* Pilg.; *Microbambus macrostachys* K. Schum.; *Puelia guluensis* Vanderyst)

Africa, Cameroon, Gabon. Herbaceous, found in forest, dense rainforest, see *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 24(3): 336, t. 4. 1897 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 30(1): 123. 1902[1901], *Bull. Agr. Congo Belge* 11(1-2): 125. 1920, *Wissenschaftlichen Ergebnisse der zweiten deutschen Zentral-Afrika-Expedition, Botanik* 2: 93. 1922, *Kew Bulletin* 16: 247-250. 1962.

G. marantifolia Franchet (*Arundarbor marantifolia* (Franch.) Kuntze; *Guaduella longifolia* E.G. Camus; *Guaduella marantifolia* var. *brevifolia* Franchet; *Guaduella marantifolia* var. *duparquetii* Franchet; *Guaduella longifolia* Camus; *Guaduella mildbraedii* Pilg., also spelled *mildbraedii* or *milbreadii*)

Africa, Gabon, Cameroon. Herbaceous, loosely tufted, green to purplish, inflorescence terminal on leafy stem, shady places in dense rainforest, in forest, see *Bulletin Mensuel de la Société Linnéenne de Paris* 1: 676. 1887, *Revisio Generum Plantarum* 2: 761. 1891, *Bulletin de la Société d'Histoire Naturelle d'Autun* 8: 388-389. 1895 and *Les Bambusées* 114, t. 83, f. B. 1913, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 51(3-4): 422. 1914, *Kew Bulletin* 16: 247-250. 1962.

G. oblonga Hutchinson ex W.D. Clayton (*Guaduella oblonga* Hutchinson; *Puelia ciliata* Chev., not Franchet)

Africa, Sierra Leone. Herbaceous, short creeping rhizome, forest, rainforest, see *Kew Bulletin* 16: 247. 1962.

in Sierra Leone: esulerokant, kotopi, kotopo, pongi, povi hina, povo hina

G. zenkeri Pilg. (*Guaduella macrostachys* (K. Schum.) Pilg.)

Cameroon. See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 30(1): 123. 1902[1901].

Gymnachne Parodi = *Rhombolytrum* Link

From the Greek *gymnos* “naked” and *achne* “chaff, glume, scale.”

One species, Chile. Pooideae, Poeae, Brizinae, or Pooideae, Poodae, Poeae, perennial, caespitose, herbaceous, auricles absent, narrow leaf blades linear, ligule an unfringed membrane, plants bisexual, inflorescence paniculate, contracted panicle, spikelets flattened laterally, 2 glumes more or less equal, palea keels hairy, 2 free lodicules, 1 stamen, ovary glabrous, 2 stigmas, exposed-cleistogamous, nomenclatural and taxonomic confusion, often in *Rhombolytrum*, type *Gymnachne jaffuelii* Parodi, see *Species Plantarum* 1: 67, 70. 1753, *Prodromus Florae Novae Hollandiae* 182. 1810, *Hortus Regius Botanicus Berolinensis* 2: 296. 1833, *Flora Chilena* 6: 387, t. 81, f. 1. 1854, *Linnaea* 33(3-4): 293. 1864, *Die Natürlichen Pflanzenfamilien* 2(2): 68. 1887, *U.S. Department of Agriculture. Division of Botany. Bulletin* 12(2): t. 33. 1891 and *Manual of the Flora of the Northern States and Canada* 129. 1901, *Notas del Museo de la Plata, Botánica* 3(17): 29, 30, f. 4. 1938, *Revista Argentina de Agronomía* 29(1-2): 19. 1962, *Darwiniana* 23: 298-302.

1981, *Contributions from the United States National Herbarium* 48: 381, 602-603. 2003.

Species

G. koelerioides (Trin.) Parodi (*Gymnachne jaffuelii* Parodi; *Poa koelerioides* Trin.; *Poa philippii* Steud.; *Poa tenuiculmis* Steud.; *Rhombolytrum berterioanum* E. Desv.)

South America. Glumes 3-nerved, see *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 4,2(1): 62. 1836, *Flora Chilena* 6: 387, t. 81, f. 1. 1854, *Synopsis Plantarum Glumacearum* 1: 259, 426. 1855 [1854] and *Notas del Museo de la Plata, Botánica* 3(17): 30, f. 4. 1938, *Revista Argentina de Agronomía* 29(1-2): 19. 1962 [1963].

Gymnandropogon (Nees) Duthie = *Bothriochloa* Kuntze

From the Greek *gymnos* “naked,” *aner, andros* “man, stamen” and *pogon* “a beard.”

Panicoideae, Andropogonodae, Andropogoneae, Andropogoninae, or Panicoideae, Andropogoneae, Sorghinae, see Paul Usteri (1768-1831), in *Annalen der Botanick. [Annalen der Botanik]* 18: 11. 1796, *Fundamenta Agrostographiae* 203, t. 18. 1820, *Fund. Agrost.* 203. 1820, *Mémoires de la Société d'Agriculture, Sciences et Arts d'Angers* 1: 170, t. 8, f. 1. 1831, *Florae Africae Australioris Illustrationes Monographicae* 103. 1841, Edwin Felix Thomas Atkinson (1840-1890), “Botany [of the Himalayan Districts of the North-Western Provinces].” *Gazetteer North-Western Provinces and Oude*, vol. 10: 638. 1882, *Revisio Generum Plantarum* 2: 762. 1891 and *Flora of Tropical Africa* 9: 182-183. 1917, *Bol. Soc. Arg. Bot.* 12: 206-227. 1968, *Syst. Bot.* 8(2): 168-184. 1983, *Austrobaileya* 3(1): 79-99. 1989, *Flora Mesoamericana* 6: 384-386. 1994, *Darwiniana* 38(1-2): 127-186. 2000, *Contributions from the United States National Herbarium* 46: 135-141. 2003.

Gymnanthelia Andersson = *Cymbopogon* Spreng., *Gymnanthelia* Schweinf.

From the Greek *gymnos* “naked” and *anthele* “a type of inflorescence, a little flower.”

Panicoideae, Andropogonodae, Andropogoneae, Andropogoninae, see *Plantarum Minus Cognitarum Pugillus* 2: 14-15. 1815, *Beitrag zur Flora Aethiopiens ...* 229. 1867 and *Bot. Porto Rico* 1: 27. 1923, *Contributions from the United States National Herbarium* 46: 167-169, 243. 2003.

Gymnopogon P. Beauv. = *Alloiatheros* Raf., *Alloiatheros* Elliott ex Raf., *Anthopogon* Nutt., *Biatherium* Desv., *Doellochloa* Kuntze, *Monochaete* Döll, *Sciadonardus* Steud.

From the Greek *gymnos* “naked” and *pogon* “a beard.”

About 15 species, North and South America, India, Thailand. Chloridoideae, Cynodonteae, perennial or annual, caespitose, herbaceous, stiff, erect or ascending, internodes hollow, leaves distichous, leaf blades narrowly lanceolate, leaf sheaths margins open, auricles absent, ligule membranous, short scaly rhizomes, plants bisexual, awned, cleistogamous or chasmogamous, 2-flowered, reduced floret at apex, inflorescence spicate subdigitate to nondigitate, panicles with several spicate primary unilateral branches, spikelets solitary and appressed, 2 glumes equal to subequal, palea present, 3 stamens, ovary glabrous, open habitats and shade, pinelands, coastal plain, dry sandy woods, dry sandy soil, related to *Chloris*, type *Gymnopogon ambiguus* (Michx.) Britton, Sterns & Poggenb., see *Species Plantarum* 1: 61-63, 78-79. 1753, *Species Plantarum* 2: 1045. 1753, *Genera Plantarum* 44. 1789, *Nouveau Bulletin des Sciences, publié par la Société Philomatique de Paris* 2: 190. 1810, *Essai d'une Nouvelle Agrostographie* 29, 41, 164. 1812, *Mémoires du Muséum d'Histoire Naturelle* 2: 73. 1815, *The Genera of North American Plants* 1: 81. 1818, *Flora Brasiliensis seu Enumeratio Plantarum* 2: 430. 1829, *Bulletin Botanique [Genève]* 1: 221. 1830, *Mémoires de la Société d'Agriculture, Sciences et Arts d'Angers* 1: 172, 176, t. 8, f. 2. 1831, *Flora* 33: 229. 1850, *Flora Brasiliensis* 2(3): 78-79. 1878, *Preliminary Catalogue of Anthophyta and Pteridophyta Reported as Growing Spontaneously within One Hundred Miles of New York* 69. 1888, *Revisio Generum Plantarum* 2: 773. 1891 and *Die natürlichen Pflanzenfamilien, Zweite Auflage* 14d: 94. 1956, *Brittonia* 23(3): 293-324. 1971, *Iowa State College Journal of Science* 45(3): 319-385. 1971 [Taxonomic revision of the genus *Gymnopogon* (Gramineae)], *Flora Mesoamericana* 6: 290. 1994, *Annals of the Missouri Botanical Garden* 81(4): 768-774. 1994, *Global Ecology and Biogeography* 7(6): 441-455. Nov 1998, *Journal of Biogeography* 26(6): 1307-1321. Nov 1999, *Contributions from the United States National Herbarium* 41: 15, 16, 19, 73, 124-127, 142, 194, 2001.

Species

G. ambiguus (Michx.) Britton, Sterns & Poggenb. (*Agrostis boeckleri* Seub. ex Steud.; *Alloiatheros ambiguus* Elliott ex B.D. Jacks.; *Alloiatheros ambiguus* Elliott ex Kunth; *Alloiatheros aristatus* Raf. ex B.D. Jacks.; *Andropogon ambiguus* Michx.; *Andropogon ambiguus* Gennari ex Barbey, nom. illeg., non *Andropogon ambiguus* Michx.; *Andropogon ambiguus* Steud., nom. illeg., non *Andropogon ambiguus* Michx.; *Alloiatheros lepturoides* (Nutt.) Steud.;

Elytrigia gmelinii (Trin.) Nevski; *Gymnopogon distichophyllus* Steudel; *Gymnopogon racemosus* P. Beauv.; *Gymnopogon scoparius* Trin.; *Sciadonardus distichophyllus* Steud.; *Triticum gmelinii* Trin.)

U.S., Florida, Georgia. Perennial, caespitose, suberect or ascending, herbaceous, decumbent at the base, rigid, leaf sheaths overlapping, very short membranous ligule, with short scaly rhizomes, spikes slender and 1-sided, narrow acuminate glumes, lemmas cylindrical and involute, palea 2-keeled, see *Flora Boreali-Americana* 1: 58. 1803, *Essai d'une Nouvelle Agrostographie* 41, 164, t. 9, f. 3. 1812, *The Genera of North American Plants* 1: 82. 1818, *Gram. Unifl. Sesquifl.* 237. 1824, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 284. 1833, *Linnaea* 12(4): 467. 1838, *Nomenclator Botanicus Editio secunda* 2: 55, 643. 1840-1841, *Flora* 33: 229. 1850, *Synopsis Plantarum Glumacearum* 1: 218. 1854, *Florae Sardoae Compendium* 190. 1884, *Index Kewensis* 1: 83. 1893.

in English: bearded skeleton grass

G. aristiglumis Hitchc.

America. See *Proceedings of the Biological Society of Washington* 40: 82. 1927.

G. brevifolius Trin. (*Anthopogon brevifolius* Nutt. ex Trin.; *Anthopogon filiformis* Nutt.; *Gymnopogon racemosus* var. *filiformis* Chapm.; *Gymnopogon racemosus* var. *racemosus*)

U.S., Florida, Georgia. Perennial, see *Gram. Unifl. Sesquifl.* 238. 1824, *Transactions of the American Philosophical Society, new series*, 5: 152. 1835, *Flora of the Southeastern United States* ... 556. 1860.

in English: shortleaf skeleton grass

G. burchellii (Munro) Ekm. (*Gymnopogon burchellii* (Munro ex Döll) Ekman; *Gymnopogon muticus* Hack.; *Leptochloa burchellii* Munro ex Döll; *Rhabdochloa burchellii* (Munro ex Döll) Kuntze)

Southern Brazil to northern Argentina, Bolivia. Perennial, delicate, weak, erect, inflorescence racemose, spikelets muticous 2-flowered, glumes subequal narrowly ovate, lemmas awnless, see *Flora Brasiliensis* 2(3): 93. 1878, *Revisio Generum Plantarum* 2: 788. 1891 and *Anales del Museo Nacional de Buenos Aires* 21: 117. 1911, *Arkiv för Botanik utgivet av K. Svenska Vetenskapsakademien* 11(4): 35, t. 1, f. 4. 1912.

G. chapmanianus A.S. Hitchc. (*Gymnopogon floridanus* Swallen)

U.S., Florida, Georgia. Perennial, see *American Journal of Botany* 2: 306. 1915, *North American Flora* 17(8): 607. 1939.

in English: Chapman's skeleton grass

G. doellii Boechat & Valls (*Gymnopogon rigidus* Döll, nom. illeg., non *Gymnopogon rigidus* Thwaites)

Brazil. See *Flora Brasiliensis* 2(3): 80. 1878 and *Bradea, Boletim do Herbarium Bradeanum* 5(28): 314, f. 1. 1990.

G. fastigiatus Nees (*Doellochloa fastigiata* (Nees) Kuntze; *Gymnopogon fastigiatus* subsp. *jubiflorus* (Hitchc.) J.P. Smith; *Gymnopogon jubiflorus* Hitchc.; *Monochaete fastigiata* (Nees) Döll)

Costa Rica, Bolivia, Brazil. Perennial, caespitose, delicate, erect, racemes ascending, spikelets 1-2-flowered, glumes subequal narrowly ovate acuminate, moist savannahs, see *Flora Brasiliensis seu Enumeratio Plantarum* 2: 430. 1829, *Flora Brasiliensis* 2(3): 79. 1878, *Revisio Generum Plantarum* 2: 773. 1891 and *Contributions from the United States National Herbarium* 24(8) 412. 1927, *Iowa State Journal of Science* 45: 361. 1971.

G. fastigiatus Nees subsp. *fastigiatus*

America.

G. fastigiatus Nees subsp. *jubiflorus* (Hitchc.) J.P. Smith (*Gymnopogon jubiflorus* Hitchc.)

America. See *Contributions from the United States National Herbarium* 24(8) 412. 1927, *Iowa State Journal of Science* 45: 361. 1971.

G. foliosus (Willd.) Nees

U.S., Florida, Georgia. Annual, densely tufted, glabrous, hollow, foliage strongly distichous, leaf sheaths strongly overlapping, ligules ciliate, fibrous-rooted, 3-8 densely flowered subdigitate racemes, spikelets 2-flowered, lower floret bisexual, upper floret a rudiment, glumes subulate and subequal, in sandy savannahs, dry savannahs, white sand, see *Species Plantarum. Editio quarta* 4: 924. 1806, *Flora Brasiliensis seu Enumeratio Plantarum* 2: 426. 1829.

in English: leafy skeleton grass

G. glaber Caro

Argentina. See *Dominguezia* 5: 17, f. 5. 1982.

G. grandiflorus Roseng., B.R. Arrill. & Izag. (*Gymnopogon brevisetus* (Hack.) J.P. Smith; *Gymnopogon spicatus* var. *brevisetus* Hack.)

South America, Uruguay. See *Revisio Generum Plantarum* 3(2): 354. 1898 and *Anales del Museo Nacional de Buenos Aires* 21: 117. 1911, *Boletín de la Facultad de Agronomía de Universidad de la República, Montevideo* 103: 20, f. 4. 1968, *Iowa State Journal of Science* 45(3): 344. 1971.

Schult.)

Mexico to northern Argentina. Perennial, delicate, erect, tufted, glabrous, ligule ciliate-membranous, shortly rhizomatous, loosely ovate panicle, several ascending flexuous racemes borne singly on a long axis, spikelets 1- to 3-flowered, upper floret sterile, glume subequal narrowly lanceolate acuminate, lemmas narrowly lanceolate awned, sandy soils, see *Systema Vegetabilium, editio decima sexta* 1: 243. 1824, *Mantissa* 3: 577. 1824, *Flora Brasiliensis seu Enumeratio Plantarum* 2: 428. 1829, *Flora of the British West Indian Islands* 538. 1864, *Flora Brasiliensis* 2(3): 81. 1878, *Revisio Generum Plantarum* 354. 1891 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 30(1): 139. 1901, *Anales del Museo Nacional de Buenos Aires* 21: 117. 1911.

G. spicatus (Spreng.) Kuntze f. *longiaristatus* (Kuntze) J.P. Smith (*Gymnopogon spicatus* var. *longiaristatus* Kuntze; *Muhlenbergia spicata* (Spreng.) Kunth; *Polypogon spicatus* Spreng.)

South America. See *Systema Vegetabilium, editio decima sexta* 1: 243. 1824, *Révision des Graminées* 1: 64. 1829, *Revisio Generum Plantarum* 354. 1891 and *Iowa State Journal of Science* 45(3): 371-372. 1971.

G. spicatus (Spreng.) Kuntze f. *spicatus*

South America.

Gymnostichum Schreb. = *Elymus* L., *Hystrix* Moench

From the Greek *gymnos* "naked" and *stichos* "a row."

Pooideae, Triticeae, or Pooideae, Triticeae, Hordeinae, type *Gymnostichum hystrix* (L.) Schreb., see *Species Plantarum* 1: 83-84, 560. 1753, *Botanisches Magazin (Römer & Usteri)* 7: 5. 1790, *Methodus Plantas Horti Botanici et agri marburgensis, a staminum situ describendi* ... 294-295. Marburgi Cattorum [Marburg] 1794, *Beschreibung der Gräser Leipzig 1769-1810, A Manual of the Botany of the Northern United States* 604. 1848, *Flora of New Zealand* 1: 312, t. 70. 1853, *Geological Survey of California, Botany* 2: 327. 1880 and *American Midland Naturalist* 4: 228. 1915, *Canad. J. Bot.* 42: 554. 1964, *Taxon* 41: 562-563. 1992, *New Zealand J. Bot.* 32: 146. 1994, *Taxon* 44: 611-612. 1995, C. Baden, S. Frederiksen and O. Seberg, "A taxonomic revision of the genus *Hystrix* Moench (Triticeae, Poaceae)." *Nord. J. Bot.* 17(5): 449-467. 1997,

Nordic Journal of Botany 18(1): 89-94. 1998, Zhou Yong-Hong, Zheng You-Liang, Yang Jun-Liang and Yen Chi, "Relationships among species of *Hystrix* Moench and *Elymus* L. assessed by RAPDs." *Genetic Resources and Crop Evolution* 47(2): 191-196. Apr 2000, *Contributions from the United States National Herbarium* 48: 279-307, 381, 402. 2003.

Gymnotrix P. Beauv. = *Pennisetum* Rich.

From the Greek *gymnos* "naked" and *thrix*, *trichos* "hair."

Panicoideae, Panicoideae, Paniceae, Cenchrinae, type *Gymnotrix thuarii* P. Beauv., see *Synopsis Plantarum* 1: 72. 1805, *Enumeratio Plantarum Horti Botanici Berolinensis*, ... 1036-1037. 1809, *Essai d'une Nouvelle Agrostographie* 59. 1812, *Memorie della Reale Accademia delle Scienze di Torino*, ser. 2 14: 374-375. 1854, *Flora Brasiliensis* 2(2): 305, 308. 1877 and *Contr. Gynerium Willd. ex P. Beauv. = *Gynerium* Bonpl., *Gynerium* P. Beauv., *Gynerium* Humb. & Bonpl.

One species, tropical and subtropical America, Mexico, Peru, Brazil and West Indies, Argentina. Arundinoideae, Danthoieae, or Panicoideae, Gynerieae, perennial, large to huge, giant, stout, woody, erect, often forming dense stands, rhizomatous, auricles absent, ligule fringed, lacking outer ligules or very short, sterile culms crowned by a fan-shaped leaf cluster, plants dioecious, very large and open inflorescence paniculate, solitary spikelets usually 2-flowered, disarticulation above the glumes, 2 glumes very unequal and not persistent, lower glume 1-nerved, upper glume 3-nerved, female lemmas plumose, palea 2-nerved 2-keeled, lodicules present, no stamens, ovary glabrous, 2 stigmas red, male florets 2-staminate, culms and leaves used for thatching, baskets, containers and arrows, found in wet places, secondary woodland, swampy areas, streamside, along riverbanks, type *Gynerium sagittatum* (Aubl.) P. Beauv., see *Species Plantarum* 1: 63-66, 73-76, 81-82. 1753, *Essai d'une Nouvelle Agrostographie* 78, 138, 152-153, 161, 164, pl. 24, f. 6. 1812, *Plantae Aequinoctiales* 2: 112, pl. 115. 1813 and *Brittonia* 23(3): 293-324. 1971, *Kew Bulletin* 49(2): 305-320. 1994 [One or more species of *Gynerium*? (Poaceae)], *Flora Mesoamericana* 6: 252-253. 1994, *Am. J. Bot.* 88: 1993-2012. 2001, *Am. J. Bot.* 89: 494-499. 2002, *Contributions from the United States National*

Herbarium 46: 244-246. 2003, *Conservation Biology* 18(6): 1562-1570. Dec 2004.

Species

G. sagittatum (Aubl.) P. Beauv. (*Aira gigantea* Steud.; *Arundo fastuosa* Willd. ex Steud.; *Arundo festucacea* Willd.; *Arundo rugi* Molina; *Arundo saccharoides* (Bonpl.) Beauv.; *Gynerium saccharoides* Bonpl.; *Saccharum sagittatum* Aubl.; *Scolochloa festucacea* (Willd.) Link; *Triodia festucacea* (Willd.) Roth)

Brazil, tropical America. Erect, tough, giant, scrambling, rhizomatous, solid, lower part covered by sheaths, leaves linear 2-ranked, leaf blades borne on main stem, edges of leaves slightly serrated, inflorescence paniculate with drooping branches, large plumose panicles, female spikelets 2-flowered, glumes unequal, long trichomes exceeding the awn, ornamental, growing in dense colonies, medicinal, soil binding, durable culms used for construction and manufacturing purposes, fencing and for fishing poles, a source of arrow shaft, found in damp soil, on the margins of rivers and streams, in seasonally inundated areas, see *Histoire des plantes de la Guiane Françoise* 1: 50. 1775, *Saggio sulla Storia Naturale del Chili* ... 154. 1782, *Syn. Pl.* 1: 102. 1805, *Enumeratio Plantarum Horti Botanici Berolinensis*, ... 1: 126. 1809, *Encyclopédie Méthodique, Botanique Suppl.* 4: 703. 1816, *Flora Suecica* 1: 64. 1824, *Enumeratio Plantarum Horti Botanici Berolinensis*, ... 1: 137. 1827, *Enumeratio Plantarum Phaenogamarum in Germania* 1(1): 382. 1827, *Flora Brasiliensis seu Enumeratio Plantarum* 2: 463. 1829, *Nomenclator Botanicus. Kalliola, "Shoot dynamics of the giant grass *Gynerium sagittatum* in Peruvian Amazon floodplains, a clonal plant that does show self-thinning." *Oecologia* 101: 124-131. 1995.

in English: uva grass, wild cane, white roseau, arrow grass

in French: roseau à flèche

in Spanish: caña brava

in Bolivia: caña brava, caña de monte, charo, chuchillo, chuchío, shu ru

in Brazil: caña brava

in Colombia: caña brava de tierra caliente, caña flecha, chusque, pajitas del Niño Dios, pindos

in Cuba: caña de Güin, caña flecha

in Ecuador: caña brava, caña veral

in Mexico: caña brava, caña de castilla, carrizo real, otatillo, shiiavén, xita-queza, yaga-xicho-gueza

in Nicaragua: dapa, gániesi haráchan, gániesiharáchan

in Paraguay: cañaboba, carrizo, huiva, lata, zuza

in Peru: caña brava, pintoc

G. sagittatum (Aubl.) P. Beauv. var. ***glabrum*** Renvoize & Kalliola

Bolivia, Brazil, Peru, the Caribbean. Unbranched, dense thickets, tropical lowland, riverbanks and along streams, see *Kew Bulletin* 49(2): 314. 1994.

G. sagittatum (Aubl.) P. Beauv. var. ***sagittatum***

Central America, Brazil, Paraguay. Unbranched or moderately branched, tropical lowland, riverbanks and along streams.

G. sagittatum (Aubl.) P. Beauv. var. ***subandinum*** Renvoize & Kalliola

Central America, Bolivia. Branched, glaucous, tropical lowland, in disturbed sites, riverbeds, sea shores, along roadsides, see *Kew Bulletin* 49(2): 315. 1994.

H

Habrochloa C.E. Hubb.

From the Greek *habros* “delicate, graceful, beautiful, pretty, soft” and *chloe, chloa* “grass”; Akkadian *ebru, ibru*, Hebrew *haber*, Aramaic *habra* “favourite slave, friend”; Akkadian *habaru, kabaru* “to become fat, thick,” *kabru* “fat.”

One species, tropical Africa, East Africa. Arundinoideae, Danthoniaeae, or Eragrostideae, annual, slender, herbaceous, auricles absent, ligule fringed or ciliate, plants bisexual, cleistogamous, delicate and open inflorescence paniculate, spikelets flattened, 2 glumes more or less equal or subequal, lemmas keeled and ciliate on margins, long flexuous awn, palea 2-nerved 2-keeled, 2 free and fleshy lodicules, 3 stamens, ovary glabrous, 2 stigmas, shade species, shady banks, hillsides, slopes, type *Habrochloa bullockii* C.E. Hubbard, see G.C. Wittstein, *Etymologisch-botanisches Handwörterbuch*. 2. 1852 and *Hooker's Icones Plantarum* 37: t. 3645. 1967, H. Genast, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 32. Basel 1996.

Species

H. bullockii C.E. Hubb. (named for the British botanist Arthur Allman Bullock, 1906-1980, Kew herbarium, botanical collector in Africa, author of *Flora of Southern Africa*, *Bibliography of South African Botany* (up to 1951), edited by O.A. Leistner, Pretoria 1978, *A Bibliography Relating to the History, Theory and Practice of Botanical Nomenclature*; with Additamenta 1-3/1965-1967, *Taxon* 17: 504-596. 1968 [What is a new taxon?], *Taxon* 9: 93-102. 1960 [Dr. Thomas Archibald Sprague, 1877-1958]. See J.H. Barnhart, *Biographical notes upon botanists*. 1: 280. 1965; I.K. Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. 169. 1964; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993)

Central Africa, Malawi, Tanzania, Zambia, Zimbabwe. Glumes 1-nerved.

Habrurus Hochst. = Elionurus Humb. & Bonpl. ex Willd., Elionurus Kunth

From the Greek *habros* “splendid, graceful” and *oura* “a tail.”

Panicoideae, Andropogoneae, Rottboelliinae, see *Species Plantarum. Editio quarta* 4(2): 941-942. 1806, *Mémoires du Muséum d'Histoire Naturelle* 2: 69. 1815 [1816], *Flora* 39: 90. 1856 and *Taxon* 47: 737. 1998, *Taxon* 49: 273. 2000, *Contributions from the United States National Herbarium* 46: 225-230, 246. 2003.

Hackelia Vasey ex Beal = Gouinia E. Fourn. ex Benth. & Hook.f., Hackelia Opiz (Boraginaceae)

Chloridoideae, Cynodonteae, Gouiniinae, see *Oekonomisch-technische Flora Böhmens* 2(1): 146-147. 1838, *Mexicanas Plantas* 2: 103. 1886, *Grasses of North America for Farmers and Students* 2: 438. 1896 and *Amer. J. Bot.* 22: 32. 1935, *Contributions from the United States National Herbarium* 41: 122-123, 127. 2001.

Hackelochloa Kuntze = Manisuris L., Mnesithea Kunth, Rytlix Raf. ex Hitchc.

Named after the Greek *chloe, chloa* “grass” and the Bohemia-born Austrian botanist Eduard Hackel, 1850-1926, agrostologist, high school teacher at St. Pölten and at Graz, his publications include *Monographia Festucarum Europaeorum*. Kassel and Berlin 1882 and *Catalogue raisonné des Graminées du Portugal*. Coimbre [Coimbra] 1880, contributor to Martius, *Flora Brasiliensis, Gramineae* V, fasc. 90, vol. 2 (3): 245-326. 1883; see J.H. Barnhart, *Biographical notes upon botanists*. 2: 106. 1965; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. Philadelphia 1964; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. 1917-1933; Leonard Huxley, *Life and Letters of Sir J.D. Hooker*. London 1918; Elmer Drew Merrill (1876-1956), *Contr. U.S. Natl. Herb.* 30(1): 141-142. 1947.

About 2 species, tropical. Panicoideae, Andropogonodae, Andropogoneae, Rottboelliinae, annual, caespitose, herbaceous, coarse, sprawling, decumbent, branched near base, culm internodes solid, auricles absent, ligule a very short fringed membrane, leaves linear-lanceolate and flat, plants bisexual, inflorescence axillary, pedunculated flattened

racemes into a compound panicle, pairs of sessile and pedicellate spikelets and a terminal triad, spikelets dissimilar and unawned, globose wrinkled sessile spikelets with 2 florets, upper floret perfect, pedicellate spikelet sterile or male, 2 glumes more or less equal or very dissimilar, lower glume of female-fertile spikelet crustaceous globose or concave and crustaceous or tuberculate or pitted, lower floret barren reduced to a hyaline lemma, palea present or absent, fleshy lodicules, 3 stamens, ovary glabrous, 2 stigmas, open habitats, in high-rainfall areas, weedy places, disturbed ground, grassland, similar to *Heteropholis* C.E. Hubbard, sometimes included in *Mnesithea* Kunth, type *Hackelochloa granularis* (L.) Kuntze, see *Révision des Graminées* 1: 153-154. 1829, *Monogr. Phan.* 6: 314. 1889, *Revisio Generum Plantarum* 2: 776. 1891 and *United States Department of Agriculture: Bulletin* 772: 278. 1920, *Fieldiana, Botany* 24(2): 38-331. 1955, *Blumea* 31(2): 281-307. 1986, *Cytologia* 51: 43-50. 1986, *Journal of Cytology and Genetics* 21: 152-154. 1986, *Flora of the Guianas. Series A, Phanerogams* 8: 249-252. 1990, *Cuscatania* 1(6): 1-29. 1991, *Flora Mesoamericana* 6: 398. 1994, *Annals of the Missouri Botanical Garden* 81(4): 775-783. 1994, *Fontqueria* 46: [i-ii], 1-259. 1997, *Global Ecology and Biogeography* 7(6): 441-455. Nov 1998, *Weed Research* 41(6): 475-490. Dec 2001, *Contributions from the United States National Herbarium* 46: 246, 285-286, 295-296, 550. 2003, *Diversity & Distributions* 9(1): 73-87. Jan 2003.

Species

H. granularis (L.) Kuntze (*Cenchrus granularis* L.; *Manisuris granularis* (L.) L.f.; *Manisuris granularis* (L.) Sw.; *Manisuris granularis* L.; *Manisuris polystachya* P. Beauv.; *Mnesithea granularis* (L.) de Koning & Sosef; *Rottboellia granularis* (L.) Roberty; *Rytilyx glandulosa* Raf.; *Rytilyx granularis* (L.) Skeels; *Tripsacum granulare* (L.) Raspail)

Southeast Asia, India, Darjeeling, Sikkim. Annual, short-lived, much-branched, slender, erect, flattened and narrow, leaf blades linear-lanceolate, sheaths hairy and inflated, ligule a very short ciliate membrane, leaves hairy to hispid, racemes arranged along an axis, sessile spikelet globose, upper glume crested at the apex, lower glume of sessile spikelet shallowly pitted, the roots are good in cases of enlarged liver and spleen, palatable grazing, fodder for horses, pasture, good hay, weed species eaten by cattle when young, leaves or sheaths somewhat irritant to the skin, ruderal, growing in disturbed places, waste places, dry soil, barren places, grassy slopes, cultivations, weedy sites, see *Mantissa Plantarum* 2: 575. 1771, *Nova Graminum Genera* 37, 40, t. 1, f. 4-7. 1779, *Amoenitates Academici* ... 10: 40. 1779, *Nova Genera et Species Plantarum seu Prodromus* 25. 1788, *Flore d'Oware* 1: 24, t. 14. 1804, *Annales des Sciences Naturelles, Botanique* 5: 306. 1825, *Bulletin Botanique [Genève]* 1: 219. 1830, *Revisio Generum Plantarum* 2: 776. 1891 and *Handb. Fl. Ceylon* 5: 209. 1900, *U.S. Department*

of Agriculture Bureau of Plant Industry Bulletin 282: 20. 1913, *Grasses of Ceylon* 178. 1956, *Boissiera. Mémoires du Conservatoire de Botanique et de l'Institut de Botanique Systématique de l'Université de Genève* 9: 79. 1960, *Grasses of Burma* ... 159. 1960, *Blumea* 31(2): 295. 1986.

in English: lizard-tail grass, hare's maize

in India: chiria, dhaturoghas, guru singu gaddi, kaadu sanna haaraka hullu, kadu sanna harka hullu, kangni, kasiungas, kurujedanai gaddi, moti shimpi, nali poonuku, pairia, palangini, phulwa, ratob, suklu, trinipali

in Japan: Yae-gaya (= Yaeyama grass)

in the Philippine Islands: gingetkaran

in Thailand: yaa kha naeng, ya kha naeng

in Brazil: capim mimosa, mimosinho

in Mexico: sit-suuk

in Mali: bambari ladde, kanyane maka, ngoriri, susan kaba

in Senegal: susan kaba

in Sierra Leone: andande, fesifesi, gungulwi, kanyane maka, sanywanya, tamedi sarana

in Upper Volta; njadere, soham kamani, suambu kamana, zoomena

H. porifera (Hackel) Rhind (*Cenchrus granularis* L.; *Manisuris porifera* Hackel; *Mnesithea granularis* (L.) de Koning & Sosef)

India, Sikkim, Darjeeling. Annual, lower glume of sessile spikelet deeply pitted, see *Mantissa Plantarum* 2: 575. 1771, *Österreichische Botanische Zeitschrift* 41(2): 48. 1891 and *Grasses of Burma* 77. 1945, *Blumea* 31(2): 295. 1986.

Hainardia Greuter = Monerma (Willd.)

Coss. & Dur., *Monerma* P. Beauv.

Presumably after P. Hainardi, Swiss phytogeographer; see Werner Rodolfo Greuter, born 1938, Director of the Herbarium of the Botanischer Garten und Botanisches Museum Berlin-Dahlem, in *Boissiera*. 13: 178. 1967.

Monotypic genus, Mediterranean, Europe to Middle East. Pooideae, Poodae, Poeae, or Pooideae, Poeae, Ammochloinae, annual, caespitose, erect to decumbent, herbaceous and branched above the base, slender, glabrous, solid internodes, leaves nonauriculate, sheaths terete, ligule membranous and truncate, leaves linear and flat or involute, plants bisexual, a slender single cylindrical spike straight or curved, spikelets sessile and solitary, 1 bisexual floret, spikelets edgeways to rhachis, 1 stiff glume per spikelet, first glume absent, second glume present, lemmas hyaline and 3-nerved, palea thin with keels wingless, 2 lodicules free and membranous, stamens 1-3, anthers yellow, ovary glabrous, 2 stigmas white, fruit narrowly oblong to

ellipsoid, naturalized elsewhere in temperate regions, weed of disturbed places, meadows and areas subject to flooding, lakes, salt flats, black sand beach, swamps and estuaries, occurring in coastal and salt-marsh habitats, adapted to saline soils, usually occurs in wetlands, resembles *Parapholis* C.E. Hubbard, type *Hainardia cylindrica* (Willd.) W. Greuter, see *Supplementum Plantarum* 13, 114. 1781 [1782], *Essai d'une Nouvelle Agrostographie* 116-117, 168, 176-177, t. 20, f. 10. 1812 and *Contr. U.S. Natl. Herb.* 24: 201. 1925, H. Runemark, "A revision of *Parapholis* and *Monerma* (Gramineae) in the Mediterranean." *Bot. Not.* 115: 1-17. 1962, *Boissiera. Mémoires du Conservatoire de Botanique et de l'Institut de Botanique Systématique de l'Université de Genève* 13: 179-180. 1967, *Gayana, Botánica* 42: 1-157. 1985, *Kew Bulletin, Additional Series* 13: 111. 1986, *New Zealand Journal of Botany* 29: 101-116. 1991, *Feddes Repert.* 106: 169-171. 1995, *Harvard Pap. Bot.* 8: 65. 1996, *Contributions from the United States National Herbarium* 48: 381-382, 453. 2003.

Species

H. cylindrica (Willd.) W. Greuter (*Lepturus cylindricus* (Willd.) Trinius; *Lepturus cylindricus* var. *cylindricus*; *Lolium cylindricum* (Willd.) Asch. ex Graebner; *Monerma cylindrica* (Willd.) Cosson & Durieu; *Monerma monandra* P. Beauv.; *Monerma subulata* (Savi) P. Beauv.; *Ophiurus cylindricus* (Willd.) P. Beauv.; *Ophiurus cylindricus* (Willd.) P. Beauv.; *Rottboellia cylindrica* Willd.)

Mediterranean. Annual, semiaquatic, tufted, stiff, erect or ascending, smooth, glabrous, ligule membranous and glabrous, leaf sheaths submembranous glabrous, blade flat, stiff cylindrical green spike straight or slightly curved, spikelets 1-flowered, glumes very hard and rigid, a single glume green and linear-lanceolate, lower glume suppressed, lemmas with very short lateral nerves, palea 2-keeled, fruit dorsiventrally compressed, weed, salt-tolerant, useful fodder and cover plant, usually grows on saline and alkaline soils, in open sands, coastal salt marshes, moist places, meadows, roadsides, sometimes confused with *Hemarthria* R. Br., see *Species Plantarum. Editio quarta* 1: 464. 1797, *Essai d'une Nouvelle Agrostographie* 116-117, 168, 176-177, t. 20, f. 10. 1812, *Fundamenta Agrostographiae* 123. 1820, *Exploration Scientifique de l'Algérie* 2: 214. 1855 and *Synopsis der mitteleuropäischen Flora* 2: 761. 1902, *Boissiera.* 13: 178. 1967.

in English: common barbgrass, hard grass, thin tail, monerma, barb grass

Hakonechloa Makino ex Honda

Fuji-Hakone-Izu (Hakone-yama), Japan.

One species, Japan. Arundinoideae, Arundineae, perennial, shortly rhizomatous, herbaceous, unarmed, unbranched,

rhizomes leptomorph, auricles absent, ligule a fringed or ciliolate membrane, plants bisexual, small inflorescence paniculate, 2 glumes unequal to very unequal to very dissimilar, lemmas membranous with margins pilose, straight awn, palea 2-keeled 2-nerved, free and fleshy lodicules present, 3 stamens, ovary glabrous, 2 stigmas, type *Hakonechloa macra* (Munro) Honda, see *Botanical Magazine* (Tokyo) 26: 237. 1912, *Journal of Japanese Botany* 5: 24. 1928, *Journal of the Faculty of Science: University of Tokyo, Botany* 3: 133. 1930, *Illustrated Flora of Nippon* 859. 1940, *Jissai-Engei* 26: 1085. 1940, *Acta Phytotaxonomica et Geobotanica* 10: 267. 1941, *Contributions from the United States National Herbarium* 46: 246. 2003.

Species

H. macra (Munro) Honda (*Phragmites macer* Munro)

Japan. See *Journal of Botany, British and Foreign* 15: 298, 350. 1877 and *Botanical Magazine* (Tokyo) 26: 237. 1912.

H. macra (Munro) Honda var. ***albo-marginata*** Makino (*Hakonechloa macra* (Munro) Honda)

Japan. See *Botanical Magazine* (Tokyo) 26: 237. 1912, *Illustrated Flora of Nippon* 859. 1940, *Acta Phytotaxonomica et Geobotanica* 10: 267. 1941.

H. macra (Munro) Honda var. ***albo-variegata*** Makino (*Hakonechloa macra* (Munro) Honda)

Japan. See *Botanical Magazine* (Tokyo) 26: 237. 1912, *Jissai-Engei* 26: 1085. 1940, *Acta Phytotaxonomica et Geobotanica* 10: 267. 1941.

H. macra (Munro) Honda var. ***aureola*** Makino (*Hakonechloa macra* (Munro) Honda)

Japan. See *Botanical Magazine* (Tokyo) 26: 237. 1912, *Journal of Japanese Botany* 5: 24. 1928, *Acta Phytotaxonomica et Geobotanica* 10: 267. 1941.

Halochloa Griseb. = Halochloa Kütz. (Algae), Monanthochloe Engelm.

From the Greek *hals*, *halos* "salt, sea" and *chloe*, *chloa* "grass."

Chloridoideae, Cynodonteae, Monanthochloinae, see *Botanische Zeitung. Berlin* 1: 55. 1843, *Transactions of the Academy of Science of St. Louis* 1: 436, 437, pl. 13-14. 1859, *Abhandlungen der Königlichen Gesellschaft der Wissenschaften zu Göttingen* 24: 285. 1879 and *Contributions from the United States National Herbarium* 41: 127, 142. 2001, *Flora Fanerogámica Argentina* 86: 1-68. 2003.

Halopyrum Stapf

From the Greek *hals*, *halos* "salt, sea" and *pyros* "grain, wheat," see *Hooker's Icones Plantarum* 25: t. 2448. 1896.

One species, from Mozambique to Sri Lanka, Indian Ocean, northeast Africa. Chloridoideae, Eragrostideae, perennial, herbaceous, robust, tough, vigorous, tufted, spreading, strongly stoloniferous, internodes bearded, thick roots woolly, auricles absent, sheaths coriaceous, ligule fringed to woolly-ciliate, stiff leaves junciform, plants bisexual, inflorescence spicate or paniculate with short racemes appressed along a long central axis, panicle contracted, spikelets solitary and flattened, 2 glumes acute and coriaceous, lower glume 3-5-nerved, upper glume 5-7-nerved, lemmas acute and mucronate, palea 2-nerved 2-keeled, 2 free and fleshy lodicules, 3 stamens, ovary glabrous, 2 plumose stigmas, useful for erosion control, little value as fodder, open habitats, coastal, shores, see *Flora of Ethiopia and Eritrea* 7: 94-95. 1995, W.M. Musila, J.I. Kinyamario and P.D. Jungerius, "Vegetation dynamics of coastal sand dunes near Malindi, Kenya." *African Journal of Ecology* 39(2): 170-177. June 2001, M. Ajmal Khan and Salman Gulzar, "Light, salinity, and temperature effects on the seed germination of perennial grasses." *Am. J. Bot.* 90: 131-134. 2003, Hester L. Bell and James W. O'Leary, "Effects of salinity on growth and cation accumulation of *Sporobolus virginicus* (Poaceae)." *Am. J. Bot.* 90: 1416-1424. 2003, *Botanical Journal of the Linnean Society* 148(1): 57-72. May 2005.

Species

H. mucronatum (L.) Stapf (*Briza mucronata* (L.) Lam.; *Brizopyrum mucronatum* (L.) Wight; *Brizopyrum mucronatum* Nees; *Desmazeria uniolooides* Deflers, also spelled Defleors; *Eragrostis mucronata* (L.) Defleors, nom. illeg., non *Eragrostis mucronata* Roem. & Schult.; *Triticum repens* Thwaites, nom. illeg., non *Triticum repens* L.; *Uniola mucronata* L.)

Africa, Indian Ocean. Perennial, coarse, rigid, robust, woody, tough, tussocky, strongly branched, dead stalks protect new growth, leaves inrolled and filiform, narrow inflorescence very lax, panicles loose, without hidden cleistogenes, callus of each floret bearded, lemmas rounded on the back and shortly mucronate, useful sand binder, abundant on sand dunes by the sea, in small depressions, coastal sand, dunes near the ocean, see *Species Plantarum* 1: 86. 1753, *Species Plantarum, Editio Secunda* 1: 104. 1762, *Encyclopédie Méthodique, Botanique* 1: 465. 1785, *Syst. Veget.* 2: 577. 1817, *A Numerical List of Dried Specimens* no. 8898. 1849 [Wallich's Catalogue], *Enum. Pl. Zeyl.* 376. 1864, *Bull. Soc. Bot. France* 34: 69. 1887, Albert Deflers (1841-1921), *Voyage au Yémen, Journal d'une excursion botanique faite en 1887 dans les montagnes de l'Arabie heureuse suivi du Catalogue de plantes.* 220. Paris 1889, *Hooker's Icones Plantarum* 25: t. 2448. 1896 and *Handb. Fl. Ceylon* 5: 299. 1900, *Grasses of Ceylon* 67. 1956, *Ceylon J. Sci., Biol. Sci.* 2(2): 124. 1959, *Grasses of Burma* ... 516. 1960, *Taxon* 49(2): 258. 2000, M. Ajmal Khan and Salman Gulzar, "Light, salinity, and temperature effects on the seed

germination of perennial grasses." *American Journal of Botany* 90: 131-134. 2003.

in Somalia: sido

in India: uppukarai pullu

Haplachne Presl = *Dimeria* R. Br.

From the Greek *haplos* "simple, single" and *achne* "chaff, glume, scale."

Andropogoneae, type *Haplachne pilosissima* J. Presl, see *Prodromus Florae Novae Hollandiae* 204. 1810, *Reliquiae Haenkeanae* 1(4-5): 234-235, t. 38. 1830, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 2(3): 326. 1832.

Harpachne Hochst. ex A. Rich. = *Harpachne* A. Rich.

Latin *harpago* "a grappling-hook," Greek *harpagos*, *harpagē* "a hook" and *achne* "chaff, glume, scale."

Two species, tropical Africa, Arabia, North and northeast Africa. Chloridoideae, Eragrostideae, perennial, herbaceous, unbranched, unarmed, tufted, auricles absent, glandular, ligule a fringe of hairs, plants bisexual, bottlebrush-like inflorescence racemose or paniculate, a single raceme or a false spike, reflexed spikelets hanging on slender pedicels, florets increasing in size upward, hooked or pungent pedicel, 2 glumes very unequal, lemmas keeled acute to acuminate, palea short and gibbous, 2 free and fleshy lodicules, 3 stamens, ovary glabrous, 2 white stigmas, open habitats, open stony ground, savannah, type *Harpachne schimperi* A. Rich., see *Tentamen Florae Abyssinicae* ... 2: 431-432. 1850.

Species

H. bogdanii Kenn.-O'Byrne (*Harpachne bogdanii* Kenn.-O'Byrne ex Bogdan) (named for A.V. Bogdan, author of *Tropical Pasture and Fodder Plants (Grasses and Legumes)* London/New York Longman Publishing Group 1977)

Kenya. See D.C. Edwards & A.V. Bogdan, *Important Grassland Plants of Kenya* Nairobi 1951, *Revised List of Kenya Grasses* ... 17. 1958, *Hooker's Icones Plantarum* 36: t. 3596. 1962.

H. schimperi A. Rich. (*Eragrostis schimperi* (A. Rich.) Benth.; *Harpachne schimperi* Hochst. ex A. Rich.)

Ethiopia, Uganda. Perennial, densely tufted, slender, panicle oblong, racemes solitary, spikelets densely crowded and falling entire, villous pedicels, glumes unequal, a wide-spread weed, stemmy grass, low grazing value, sandy areas, grassland, see *Icones Plantarum* 14: 1371. 1881.

in East Africa: aginga (Luo)

Harpochloa Kunth

From the Greek *harpe* “sickle” and *chloe, chloa* “grass.”

One-two species, southern Africa, Lesotho. Chloridoideae, Cynodonteae, perennial, densely caespitose, unarmed, herbaceous, unbranched, leaves mostly basal, often forming small mats, auricles absent, ligule a fringed membrane, basal sheaths keeled and persistent, plants bisexual, inflorescence a single raceme usually nondigitate, spikelets in 2 rows, incomplete florets distal to the female-fertile florets, 2 dark green glumes very unequal, upper glume rounded on back, lower glume keeled and awnless, lemma keeled and bidenticulate, palea present, lodicules free and fleshy, 3 stamens (in hermaphrodite and male florets), ovary glabrous, 2 dark stigmas, species of open habitats, grassland, overgrazed areas, on moist stony slopes, type *Harpochloa capensis* Kunth, see *Révision des Graminées* 1: 92. 1829, *Revisio Generum Plantarum* 764. 1891, *Transactions of the Linnean Society of London, Botany* 4: 57, t. 10, f. 7-12. 1894 and *Flora Capensis* 7: 637. 1900, *Bothalia* 21(2): 163-170. 1991, *Bothalia* 24(1): 92-96. 1994.

Species

H. falx (L.f.) Kuntze (*Chloris falcata* (L.f.) Sw.; *Cynosurus falcatus* (L.f.) Thunb.; *Eleusine falcata* (L.f.) Spreng.; *Melica falx* L.f.)

South Africa. Perennial, tufted, rhizomatous, sheath glabrous, ligule an inconspicuous fringed membrane, stiff leaves with a blunt tip, single unilateral spike curved in a sickle shape when mature, spikelets flattened and woolly, pasture, relatively palatable in an early stage, unpalatable and hard when mature, occurs on well-drained stony soils, among boulders, slopes, compacted soil, see *Supplementum Plantarum* 109. 1781, *Prodromus Plantarum Capensium*, ... 23. 1794, *Der Gesellschaft Naturforschender Freunde zu Berlin, neue Schriften* 3: 160, t. 1, f. 1. 1801, *Systema Vegetabilium, editio decima sexta* 1: 349. 1825.

in English: caterpillar grass

in South Africa: ruspergras, bohole, mothene

H. pseudoharpechloa (Chiov.) Clayton (*Rendlia pseudoharpechloa* Chiov.)

Africa. See *Annali di Botanica* 13: 53, 55. 1914, *Kew Bulletin* 37: 419. 1982.

Haynaldia Schur = *Dasypyrum* (Coss. & Durieu) T. Durand, *Haynaldia* Kanitz (Campanulaceae), *Haynaldia* Pant. (Campanulaceae), *Haynaldia* Schulzer (Campanulaceae)

For the Hungarian botanist Stephan Franz Ludwig Hayland, 1816-1891, clergyman; see J.H. Barnhart, *Biographical*

notes upon botanists. 2: 144. 1965; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 168. 1972; Ethelyn Maria Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933.

Pooideae, Triticoideae, Triticeae, or Pooideae, Triticeae, Triticinae, see *Exploration Scientifique de l'Algerie, Botanique II, Phanérogamie* 202. Paris 1855, *Verhandlungen der kaiserlich-königlichen zoologisch-botanischen Gesellschaft in Wien* 16: 37. 1866, *Enumeratio Plantarum Transsilvaniae* 807. 1866, *Index Generum Phanerogamorum* 504. 1888 and *Archives de Biologie Végétale Pure et Appliquée* 1: 35, 62. 1901, *Bulletin de la Société d'Histoire Naturelle de l'Afrique du Nord* 33: 101. 1942, *Fl. Afrique Nord* 3: 333. 1955, *Acta Botanica Academiae Scientiarum Hungaricae* 17(1-2): 120. 1971[1972], *Hereditas; genetiskt arkiv*. 114: 237-244. 1991, *Nordic Journal of Botany* 11: 135-142. 1991, *Acta Phytotaxonomica Sinica* 37(2): 125-130. 1999, *Plant Breeding* 118(3): 215-219. July 1999, *Plant Breeding* 118(4): 293-296. Sep 1999, *Plant Breeding* 119(1): 21-24. Jan 2000, *Plant Breeding* 119(6): 449-454. Dec 2000, *Plant Breeding* 120(4): 285-289. Aug 2001, *Plant Breeding* 120(5): 375-380. Oct 2001, *Contributions from the United States National Herbarium* 48: 245, 382. 2003, *Plant Breeding* 122(3): 283-284. June 2003, *Molecular Plant Pathology* 5(4): 235-252. July 2004, H. Li, X. Chen, Z.Y. Xin, Y.Z. Ma, H.J. Xu, X.Y. Chen and X. Jia, “Development and identification of wheat *Haynaldia villosa* T6DL.6VS chromosome translocation lines conferring resistance to powdery mildew.” *Plant Breeding* 124(2): 203-205. Apr 2005, *Weed Biology and Management* 5(2): 62-68. June 2005.

x Haynaldoticum Ciferri & Giacomini

Haynaldia x *Triticum*.

See *Nomencl. Fl. Ital.* 1: 50. 1950, *Genera Graminum* 375. 1986.

Hekaterosachne Steud. = Oplismenus P. Beauv.

From the Greek *hekateros* “each of 2, each singly” and *achne* “chaff, glume, scale.”

Panicoideae, Paniceae, Panicinae, type *Hekaterosachne elatior* Steud., see *Flore d'Oware* 2: 14-15, t. 68. 1807 [1810], *Synopsis Plantarum Glumacearum* 1: 118. 2-3 Mar 1854 [1855] and *Flora Mesoamericana* 6: 299-300. 1994, *Memoirs of the New York Botanical Garden* 78: 509-540. 1996, *New Zealand Journal of Botany* 34: 447-462. 1996, *Castanea* 64(2): 201-202. 1999, *Contributions from the United States National Herbarium* 46: 299-303. 2003.

Heleochloa Fr. = *Glyceria* R. Br., *Puccinellia* Parl.

Greek *helos* “swamp, a marsh, bog” and *chloe*, *chloa* “grass.”

Pooideae, Poodae, Meliceae, or Pooideae, Poeae, Puccinelliinae, see *Species Plantarum* 75. 1753, *Prodromus Florae Novae Hollandiae* 1: 179. 1810, *Observations sur les Graminées de la Flore Belgique* 110-111. 1823 [1824], *Flora Posoniensis* 119. 1830 and *Botaniska Notiser* 1919: 97. 1919, *Aquatic and Wetland Plants of Southeastern United States Monocotyledons* 1-712. 1979, *Turun yliopiston julkaisu - Annales Universitatis Turkuensis, Sarja A II, Biologia-Geographica* 3: 1-12. 1982 [also *Ann. Univ. Fenn. Abo.*, A 3: 1-12. 1982], *Watsonia* 15: 38-39. 1984, *Acta Biologica Cracoviensia, Series Botanica* 27: 57-74. 1985, *Flora Mesoamericana* 6: 231-232. 1994, *Grasses: Systematics and Evolution* 61-74. 2000, *Contributions from the United States National Herbarium* 48: 371-379, 591-601. 2003.

Heleochloa (Fr.) Drejer = *Puccinellia* Parl.

Greek *helos* “swamp, a marsh, bog” and *chloe*, *chloa* “grass.”

Pooideae, Poeae, Puccinelliinae, see *Fl. Excurs. Hafn.* 39. 1838, *Summa Veg. Scand.* 1: 77. 1845 and *Grasses: Systematics and Evolution* 61-74. 2000, *Contributions from the United States National Herbarium* 48: 382, 591-601. 2003.

Heleochloa Host ex Roem. = *Crypsis* Aiton

Greek *helos* “swamp, a marsh, bog” and *chloe*, *chloa* “grass.”

Chloridoideae, Cynodonteae, Sporobolinae, or Chloridoideae, Zoysieae, Sporobolinae, type *Heleochloa alopecuroides* (Pill. & Mitt.) Roem., see *Hortus Kewensis; or, a Catalogue ...* 1: 48. 1789, *Collectanea ad omnem rem botanicam spectantia partim e propriis, partim ex amicorum schedis manuscriptis concinnavit et edidit J.J. Roemer*. Turici [Zürich], apud H. Gessnerum, [1806-]1809, *Prodromus Florae Novae Hollandiae* 1: 179. 1810, *Essai d'une Nouvelle Agrostographie* 24. 1812, E.M. Fries, *Corpus Florarum Provincialium Sueciae. I. Floram Scanicam* 202. Uppsala 1835[-1837], *Flora Excursoria Hafniensis* 39. 1838, *Novitiae Florae Suecicae. Edit. Altera* 1: 8. 1839, *Flora italiana, ossia descrizione delle piante ...* 1: 366-367. 1848 and *Bull. Research Council of Israel* 11D: 91-126. 1962, *Systematic Botany* 4(4): 267-280. 1979, *Boletim da Sociedade Broteriana, ser. 2* 64: 35-74. 1991, *Preslia* 64: 193-206. 1992, *Contributions from the United States National Herbarium* 41: 56-57, 143-173. 2001.

Heleochloa P. Beauv. = *Phleum* L.

Greek *helos* “swamp, a marsh, bog” and *chloe*, *chloa* “grass.”

Pooideae, Poeae, Alopecurinae, type *Heleochloa phalaroides* (Koel.) P. Beauv., see *Essai d'une Nouvelle Agrostographie* 24. 1812 and *Flora Mesoamericana* 6: 242. 1994, *Plant Systematics and Evolution* 203: 11-25. 1996, *Willdenowia* 29(11-12): 45-49. 1999, *Contributions from the United States National Herbarium* 48: 382, 491-494. 2003.

Helictotrichon Besser ex Roem. & Schultes f.

= *Amphibromus* Nees, *Avenastrum* Jess., *Avenastrum* Opiz, *Avenochloa* Holub, *Avenula* (Dumort.) Dumort., *Danthorhiza* Tenore, *Helictotrichon* Besser, *Helictotrichon* Schult., *Heuffelia* Schur, *Stipavena* Vierh.

From the Greek *heliktos* “twisted, a spiral, rolled” (*helisso* “to wind, to turn round”) and *thrix*, *trichos* “hair, spine,” an allusion to the twisted awns.

About 60-100 species, tropical mountains, temperate Eurasia, Africa, Southeast Asia, North and South America. Pooideae, Poodae, Aveneae, or Pooideae, Poeae, Aveninae, perennial, herbaceous, slender and erect, unbranched, caespitose, forming tussocks, internodes hollow, auricles absent, sheaths rounded, ligule an unfringed membrane, leaf blades flat and ribbed and linear, rounded basal hummocks of foliage, plants bisexual, arching inflorescence, panicle usually narrow and erect, 2-several fertile florets plus 1-2 reduced florets, hermaphrodite florets and the uppermost rudimentary, flowers in compound panicles erect or nodding or drooping, panicles slender and cylindrical, usually spikelets oblong, awn twisted and abruptly bent, 2 hyaline glumes very unequal or subequal, lower glume 1- to 3-nerved, upper glume 3- to 5-nerved, lemmas with hyaline margins and bifid with a bent awn, palea present, 2 lodicules free and membranous, 3 stamens, ovary hairy or glabrous, 2 stigmas, chasmogamous or cleistogamous, ornamental, native pasture species, found in meadows, margin of woods, open habitats, dry hillsides, type *Helictotrichon sempervirens* (Vill.) Pilg., see *Species Plantarum* 1: 79-81. 1753, *Flora Anglica* 42. 1762, *Flora Napolitana* 1: x. Napoli 1811, *Observations sur les Graminées de la Flore Belgique* 122. 1824, *Syst. Veg. Mant.* 3: 526. 1827, *Synopsis Florae Germanicae et Helveticae* 795. 1837, *London Journal of Botany* 2: 420. 1843, *Synopsis Plantarum Glumacearum* 1: 328. 1854, *A Manual of the Botany of the Northern United States. Second Edition* 573. 1856, *Deutschlands Gräser und Getreidearten* 53, 214, f. 95. Leipzig 1863, *Enumeratio Plantarum Transsilvaniae* 760. 1866, *Bulletin de la Société Botanique de Belgique* 7(1): 68. 1868 and *Verhandlungen*

der Gesellschaft Deutscher Naturforscher und Ärzte 85(2): 671-672. 1914, *Introd. S. African Grasses* 32. 1931, *Feddes Repertorium* 45: 7. 1938, *N. Amer. Fl.* 17(8): 568. 1939, *Bot. Jahrb.* 75: 321-332. 1951, *Philipp Maximilian Opiz und seine Bedeutung für die Pflanzentaxonomie* 123-126. Praha 1958, *Acta Horti Botanici Pragensis* 1962: 75-86. 1962[1963], *Folia Geobot. Phytotax.* 2: 402. 1967, *Canadian Journal of Botany* 52(11): 2259. 1974, *Folia Geobotanica et Phytotaxonomica* 11(3): 294. 1976, *Preslia* 49: 203-221. 1977, *Plant Systematics and Evolution* 203: 181-281. 1997, *Grasses: Systematics and Evolution* 61-74. 2000, *Molecular Phylogenetics and Evolution* 21(2): 198-217. 2001, *Contributions from the United States National Herbarium* 48: 108-109, 138-139-140, 244, 382-383, 384, 650. 2003, M. Castro and J.A. Rosselló, "Chromosome numbers in plant taxa endemic to the Balearic Islands." *Botanical Journal of the Linnean Society* 148(2): 219-228. June 2005.

Species

H. altaicum Tzvelev (*Helictotrichon desertorum* subsp. *altaicum* (Tzvelev) Holub; *Helictotrichon desertorum* subsp. *centroasiaticum* Holub; *Helictotrichon desertorum* var. *centroasiaticum* (Holub) Tzvelev)

Species

H. fragilis Luces (*Festuca fragilis* (Luces) B. Briceño; *Hellerochloa fragilis* (Luces) Rauschert)

Venezuela. Páramos, see *Journal of the Washington Academy of Sciences* 32(6): 157, f. 1. 1942, *Taxon* 31(3): 561. 1982, *Ernstia* 4(3-4): 78-79, f. 1a. 1994.

H. livida (Kunth) E. Fourn. (*Bromus lividus* Kunth; *Festuca livida* (Kunth) Trin.; *Festuca livida* (Kunth) Willd. ex Spreng.; *Hellerochloa livida* (Kunth) Rauschert; *Schedonorus lividus* (Kunth) Roem. & Schult.)

Mexico. See *Nova Genera et Species Plantarum* 1: 150. 1815 [1816], *Systema Vegetabilium* 2: 707. 1817, *Systema Vegetabilium, editio decima sexta* 1: 353. 1825, *Mexicanas Plantas* 2: 129. 1886 and *Novosti Sist. Vyss. Rast.* 17: 42-53. 1980, *Taxon* 31(3): 561. 1982.

Hellerochloa Rauschert = *Festuca* L.

Pooideae, Poaeae, Loliinae, see *Species Plantarum* 1: 73-74. 1753, *Systema Vegetabilium, editio decima sexta* 1: 353. 1825 and *Novosti Sist. Vyss. Rast.* 17: 51. 1980, *Taxon* 31(3): 561. 1982, *Watsonia* 16: 300. 1987, *Flora Mesoamericana* 6: 223-227. 1994, *Contributions from the United States National Herbarium* 48: 312-368, 383. 2003.

Helopus Trin. = *Eriochloa* Kunth

Greek *heleos*, *helos* “a marsh, wet, low ground, meadow” and *pous* “a foot.”

Panicoideae, Paniceae, Melinidinae, type *Helopus pilosus* Trin., see *Nova Genera et Species Plantarum* 1: 94-95, t. 30. 1815 [1816], Carl Bernhard von Trinius, *Fundamenta Agrostographiae*. 103-104, t. 4. Viennae 1820 [1822] and *N. Amer. Fl.* 17: 157. 18 Sep 1912, *Kurtziana* 2: 95-106.

1965, *Contributions from the United States National Herbarium* 46: 233-239, 246-247. 2003.

Hemarthria R. Br. = *Lodicularia* P. Beauv., *Rottboellia* L.f.

Perhaps from *haima* “blood” and *arthron* “a joint,” or from *hemi* “half” and *arthron*, referring to the reddish color in the joints or alluding to the resistance to the breaking or to the rachis not splitting; see Robert Brown (1773-1858), *Prodromus florum Novae Hollandiae*. 207. 1810.

About 10-14 species, tropical and subtropical areas of the Old World, mainly in Southeast Asia. Panicoideae, Andropogonodae, Andropogoneae, Rottboelliinae, perennial, tufted or rhizomatous, stoloniferous, rambling, ascending or sometimes decumbent and rooting from nodes, herbaceous, branched above, auricles absent, ligule a very short ciliate membrane, leaves flat and linear-lanceolate or linear, plants bisexual, inflorescence a spike-like spatheate raceme pedunculated and linear, flattened dorsiventral single raceme tough and embraced by a subtending sheath, rachides hollowed, bisexual spikelets, pairs of sessile and pedicellate spikelets, sessile spikelet with a triangular callus and 2-flowered, the lower floret sterile and reduced to a hyaline lemma, upper floret perfect with lemma entire and awnless, pedicellate spikelets similar to the female-fertile spikelets, 2 glumes subequal or more or less equal, lower glume of female-fertile spikelet not pitted, upper glume sometimes awned, lemmas nerveless, first lemma sterile, second lemma fertile, palea present, 2 cuneate lodicules free and fleshy, 3 stamens, ovary glabrous, 2 stigmas, brown fruits lanceolate and compressed, cleistogamous or chasmogamous, pedicel fused to the rachis internode, weed species, adapted to disturbed open habitats, frequently in wet or moist sites, shores, in water or near water, grassland, pampas, closely related to *Phacelurus* and *Heteropholis*, type *Hemarthria compressa* (L.f.) R. Br., see *Supplementum Plantarum* 13, 114. 1781 [1782], *Prodromus Florae Novae Hollandiae* 207. 1810, *Essai d'une Nouvelle Agrostographie* 108, 166, 176, t. 21, f. 6. 1812, *Voyage autour du Monde* 2: 64, f. 14. 1829 [1831], *Die Natürlichen Pflanzenfamilien* 2(2): 25. 1887, *The Flora of British India* 7: 152. 1896 and *Annales de la Société Linnéenne de Lyon, sér. 2*, 68: 198. 1921, *Botaniska Notiser* 119(2): 209-212. 1966, *Flora Illustrada de Entre Ríos (Argentina)* 6(2): 447-508. 1969, *Phytologia* 37(4): 317-407. 1977, *Flora Mesoamericana* 6: 396. 1994, *Blumea* 45: 443-475. 2000 [Revision of *Hemarthria* (Gramineae-Andropogoneae-Rottboelliinae)], *Conservation Biology* 15(3): 675-684. June 2001, *Journal of Agronomy and Crop Science* 187(1): 1-9. July 2001, *Contributions from the United States National Herbarium* 46: 247-248, 284, 546-548. 2003, *Ecological Management and Restoration* 4(3): 170-179. Dec 2003.

Species

H. altissima (Poir.) Stapf & C.E. Hubb. (*Andropogon altissimus* (Poir.) Raspail; *Andropogon fasciculatus* (Lam.) Hack.; *Rottboellia fasciculata* Lam.; *Rottboellia heterochroa* Gand.; *Rottboellia spathacea* Ten.)

Tropical Africa, Southeast Asia, India. Perennial with a distinctive rust-red color, aquatic, emergent, leafy, straggling, mat-forming, prostrate habit, rhizomatous with a creeping and branched rhizome, stoloniferous, culms compressed and usually decumbent and rooting from the lower nodes, ligule a ring of soft hairs, leaves smooth and usually folded, inflorescence a solitary cylindrical raceme with reduced spikelets, several racemes from each node, sessile spikelet elliptic-oblong, pedicelled spikelet narrowly lanceolate, lower glume of sessile spikelet obtuse with membranous wings, rhizomes eaten raw by children, stems used for making screens, weed species, tolerates overgrazing, animal food, pasture, excellent forage grass, highly palatable, provides grazing and fodder, readily grazed by all stock, if not overgrazed will compete with most weedy grasses, spreads rapidly by creeping rhizomes and rooted culms, hardy with a good cold tolerance, prefers moist humid soils, requires a high rainfall, can withstand seasonal flooding and seasonal droughts, it does not tolerate long droughts, adapted to the wetter flatwood sites, disturbed places, depressions, standing water, ponds, flooded areas, in rivers and on riverbanks, sandy soils, along vleis and stream edges, swamps and lakes, marshy areas, see *Supplementum Plantarum* 114. 1781 [1782], *Voyage en Barbarie* 2: 105. Paris 1789, *Tableau Encyclopédique et Méthodique ... Botanique* 1: 204. 1791, *Prodromus Florae Novae Hollandiae* 207. 1810, *Essai d'une Nouvelle Agrostographie* 108, 166, 176, t. 21, f. 6. 1812, *Fundamenta Agrostographiae* 123. 1820, *Flora Napolitana Prodr.* 11. 1823 [1826], *Annales des Sciences Naturelles (Paris)* 5: 307, 459, t. 9, f. 3. 1825, *Révision des Graminées* 1: 153.

1829, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. in English: Batavian quick grass, African joint grass, snake grass, horse grass, couch grass, red vlei grass, halt grass, limpo grass, Floralta limpo grass, red swamp grass, red quick, swamp couch

in Spanish: gramilla canita, pasto clavel

in Nigeria: burgu, damarage, manu

in southern Africa: Bataviese kweek, perdekweek, perdegras, rooikweek, rooivleigras; marotlo-a-mafubelu, marotlo a mafubedu (Sotho, this common name also for *Andropogon appendiculatus* Nees)

H. compressa (L.f.) R. Br. (*Hemarthria coromandelina* Steud.; *Hemarthria glabra* (Roxb.) Blatt. & McCann; *Hemarthria laxa* Nees ex Steud.; *Manisuris compressa* (L.f.) Kuntze; *Rottboellia compressa* L.f.; *Rottboellia compressa* subvar. *laxa* (Nees ex Steud.) Roberty; *Rottboellia compressa* var. *genuina* Hack.; *Rottboellia glabra* Roxb.)

Asia temperate and tropical, China, Japan, India, Indonesia. Perennial, smooth, creeping, climbing, decumbent and rooting from the lower nodes, rhizomatous, leaf blades linear, sessile spikelet narrowly elliptic-oblong, lower glume of sessile spikelet oblong, upper glume acute, moist pasture grass, weed species, swampy soils, see *Supplementum Plantarum* 114. 1781 [1782], *Voyage en Barbarie* 2: 105. 1789, *Tableau Encyclopédique et Méthodique ... Botanique* 1: 204. 1791, *Prodromus Florae Novae Hollandiae* 207. 1810, *Hortus Bengalensis, or a Catalogue ...* 8. 1814, *Flora Indica; or Descriptions ...* 1: 353. 1820, *Synopsis Plantarum Glumacearum* 1: 358. 1854, *Monographiae Phanerogamarum* 6: 286, 288. 1889, *Revisio Generum Plantarum*

in English: whip grass

in India: baika, biksa, buksha, panie shir, pansheru, shervu panuku, sunku dabbe hullu

in Japan: koba-no-ushi-no-shippei (= small-leaved *Hemarthria*)

H. debilis Bor

Asia, Thailand. Indeterminate species, biaristate, see *Dansk Botanisk Arkiv* 23: 162. 1965, *Blumea* 45(2): 443-475. 2000.

H. longiflora (Hook.f.) A. Camus (*Hemarthria longiflora* var. *tonkinensis* (A. Camus) A. Camus; *Rottboellia longiflora* Hook.f.; *Rottboellia tonkinensis* A. Camus)

Southeast Asia, India, Vietnam, China. Elegant, leaf sheaths smooth and purplish, leaf blades purplish and folded, ligule a rim of hairs, purplish spikes, jointed rachis, spikelets stalked or sessile, gaping glumes, lemmas and paleas hyaline and ovate, see *The Flora of British India* 7: 154. 1896 and *Bulletin du Muséum National d'Histoire Naturelle* 25: 369. 1919, *Flore Générale de l'Indo-Chine* 7: 379-380. 1922, *Blumea* 45(2): 459. 2000.

H. natans Stapf (*Rottboellia compressa* subvar. *natans* (Stapf) Roberty)

Malawi. Perennial, procumbent, flattened, stoloniferous, rooting at the lower nodes, racemes in fascicles in the upper leaf axils, sessile spikelet elliptic-oblong, lower glume of sessile spikelet acute to acuminate, upper glume acute to acuminate, pedicelled spikelet narrowly lanceolate acuminate, wet ground, riverbanks and streams, see *Supplementum Plantarum* 114. 1781 [1782] and *Flora of Tropical Africa* 9: 56. 1917, *Boissiera. Mémoires du Conservatoire de Botanique et de l'Institut de Botanique Systématique de l'Université de Genève* 9: 60. 1960.

H. pratensis (Balansa) Clayton (*Coelorachis pratensis* (Balansa) A. Camus; *Rottboellia pratensis* Balansa)

Asia. See *Journal de Botanique (Morot)* 4: 110. 1890 and *Annales de la Société Linnéenne de Lyon, sér. 2*, 68: 198. 1921, *Kew Bulletin* 24(2): 314. 1970.

H. protensa Nees ex Steudel (*Hemarthria humilis* (Keng) Hackel; *Hemarthria vaginata* Büse; *Manisuris protensa* (Nees ex Steudel) Hack.; *Manisuris protensa* (Nees ex

Steud.) Hitchc.; *Rottboellia compressa* subvar. *protensa* (Nees ex Steud.) Roberty; *Rottboellia protensa* Nees ex Steudel; *Rottboellia protensa* (Nees ex Steud.) Hack.; *Rottboellia vaginata* (Büse) Backer) (from the Latin *protendo, di, sum, tum* "to stretch forth, to stretch out, to extend")

India, Nepal, China, Bangladesh, Kaliajuri Area. Lower glume of sessile spikelet oblong-lanceolate, upper glume of the pedicellate spikelet extended into a long minutely hispid apiculus, fodder grass, swamp forest patches, rot resistant, used in the construction of homestead erosion protection works, growing in marshy sites, swamps, remains alive under the water during the monsoons, see *Synopsis Plantarum Glumacearum* 1: 359. 1854, *Plantae Junghuhnianae* 3: 354. 1854, *Monographiae Phanerogamarum* 6: 289. 1889 and *De Nuttige Planten van Nederlandsch- Indië* 1: 176. 1927, *Sunyatsenia* 1(2-3): 128-129. 1933, *Brittonia* 2(2): 127. 1936, *Boissiera*. 6: 60. 1960, *Journal of Cytology and Genetics* 25: 140-143. 1990.

in India: chailla, challiya, dudh chaulia

H. stolonifera Bor

Asia, Thailand. Indeterminate species, see *Dansk Botanisk Arkiv* 23: 163. 1965.

H. uncinata R. Br. (*Hemarthria compressa* sensu Benth., non (L.f.) R. Br.; *Hemarthria foliata* Steud.; *Rottboellia compressa* L.f.; *Rottboellia compressa* subvar. *australis* (Hack.) Roberty; *Rottboellia compressa* subvar. *uncinata* (R. Br.) Roberty; *Rottboellia compressa* var. *australis* Hack.; *Rottboellia compressa* var. *uncinata* (R. Br.) Hack.; *Rottboellia uncinata* (R. Br.) Spreng.; *Rottboellia uncinata* (R. Br.) Sm.)

Queensland, Victoria, South Australia, New South Wales, Western Australia, Tasmania. Perennial, creeping, rigid and branching, culms ascending and rooting at nodes, mat-forming, semiaquatic, solitary and stiff racemes often slightly curved, paired spikelets, glumes coriaceous, anthers purple, low forage value, useful soil binder for erosion control on wet places, sometimes forming dense mats in damp areas, provides habitat for small animals and birds, grows in swamps, wet soils and damp places, resembles *Hainardia cylindrica* (Willd.) Greuter, see *Supplementum Plantarum* 114. 1781 [1782], *Prodromus Florae Novae Hollandiae* 207. 1810, *The Cyclopaedia; or, Universal Dictionary of Arts, ...* 30. 1815, *Systema Vegetabilium, editio decima sexta* 1: 299. 1824 [1825], *Synopsis Plantarum Glumacearum* 1: 259. 1854, *Monographiae Phanerogamarum* 6: 288. 1889 and *Bibliotheca Botanica* 85(2): 261-262, f. 62. 1915, *Boissiera. Mémoires du Conservatoire de Botanique et de l'Institut de Botanique Systématique de l'Université de Genève* 6: 60-61. 1960, *Contributions from the New South Wales National Herbarium* 3(2): 83. 1961, *Blumea* 45(2): 465. 2000.

in English: mat grass

H. uncinata R. Br. var. *spathacea* (Domin) Vickery (*Rottboellia compressa* var. *spathacea* Domin)

Queensland, New South Wales. Expanded leaf sheaths, occurs in swamps and creeks, see *Supplementum Plantarum* 114. 1781 [1782], *Prodromus Florae Novae Hollandiae* 207. 1810 and *Bibliotheca Botanica* 85(2): 261-262, f. 62. 1915, *Contributions from the New South Wales National Herbarium* 3(2): 83. 1961.

H. uncinata R. Br. var. *uncinata* (*Hemarthria uncinata* R. Br.)

Queensland, Victoria, South Australia, New South Wales, Western Australia, Tasmania. Leaf sheaths encircling the stem, grows in wet places, see *Prodromus Florae Novae Hollandiae* 207. 1810, *The Cyclopaedia; or, Universal Dictionary of Arts, ...* 30. 1815, *Systema Vegetabilium, editio decima sexta* 1: 299. 1824 [1825], *Monographiae Phanerogamarum* 6: 288. 1889 and *Boissiera*. 6: 60-61. 1960.

Hemibromus Steud. = *Brachypodium* P. Beauv., *Glyceria* R. Br.

From the Greek *hemi* “half” and the genus *Bromus*.

Pooideae, Meliceae, type *Hemibromus japonicus* Steud., see *Prodromus Florae Novae Hollandiae* 179. 1810, *Essai d'une Nouvelle Agrostographie* 100, 101, 155, t. 19, f. 35. 1812, *A Flora of the Northern and Middle Sections of the United States* 1: 104. 1823, *Synopsis Plantarum Glumacearum* 1: 259, 317. 1854, *Annales Museum Botanicum Lugduno-Batavi* 2: 281. 1866 and *Contr. U.S. Natl. Herb.* 24: 196. 1925, *Canadian Journal of Botany* 42(7): 868, pl. 5, f. 4c, 7. 1964, *Flora Mesoamericana* 6: 231-232, 246. 1994, *Contributions from the United States National Herbarium* 48: 143-145, 371-379. 2003.

Hemigymnia Stapf = *Hemigymnia* Griff. (Boraginaceae), *Ottochloa* Dandy

From the Greek *hemi* “half” and *gymnos* “naked,” *hemigymnos* “half-naked.”

Paniceae, type *Panicum nodosum* Franch., see *Species Plantarum* 69. 1753, *Nova Genera et Species Plantarum seu Prodromus* 23. 1788, *Encyclopédie Méthodique. Botanique ... Supplément* 4: 274. 1816, *Calcutta Journal of Natural History and Miscellany of the Arts and Sciences in India* 3: 363. 1842, *Synopsis Plantarum Glumacearum* 1: 55, 59. 1854, *Contributions à la flore du Congo Français* 38. 1896 and *Flora of Tropical Africa* 9: 741-742. 1920, *Flore Générale de l'Indo-Chine* 7: 455. 1922, *The Flora of the Malay Peninsula* 5: 228. 1925, *Mededeelingen van's Rijks-Herbarium* 61: 12. 1930, *Suppl. Fl. Ceylon* 6: 323-324. 1931, *Journal of Botany, British and Foreign* 69(2): 54-55. 1931, *Journal of the Arnold Arboretum* 29: 267. 1948, *Novon* 13(4): 467-468. 2003.

Hemimunroa Parodi = *Hemimunroa* (Parodi) Parodi, *Munroa* Torr.

From the Greek *hemi* “half” and the genus *Munroa* Torr.

Chloridoideae, Cynodonteae, Munroinae, type *Hemimunroa andina* (Phil.) Parodi, see *Pacif. Railr. Rep.* 4(5,4): 158. 1857, *Die Natürlichen Pflanzenfamilien* 2(2): 65. 1887, *Verzeichniss der von Friedrich Philippi auf der Hochebene der Provinzen Antofagasta und Tarapacá gesammelten Pflanzen* 8: 90. 1891 and *Revista del Museo de La Plata (Nueva Serie), Sección Botánica* 34: 180. 1934, *Notas del Museo de la Plata, Botánica* 2(11): 4-6, f. 2. 1937, *Boletín de la Academia Nacional de Ciencias, Córdoba, Argentina* 52(3-4): 242. 1978, *Darwiniana* 25: 43-57. 1984, *Sida* 14: 531-549. 1991, *American Journal of Botany* 81: 622-629. 1994, *Contributions from the United States National Herbarium* 41: 127, 174. 2001.

Hemisacris Steud. = *Schismus* P. Beauv.

Arundinoideae, Arundineae, or Danthonioideae, Danthonieae, type *Hemisacris gonatodes* Steud., see *Species Plantarum* 1: 73. 1753, *Syn. Pl.* 1: 97. 1805, *Essai d'une nouvelle Agrostographie* 73, 162, 177, t. 15, f. 4. Paris 1812, *Ideen zu einer künftigen Revision der Gattungen der Gräser...* 49. 1813, *Denkschriften der Königlichen Akademie der Wissenschaften zu Muenchen* 4: 253-312. 1813 [1814], *Flora* 12: 490. 1829 and *Contr. U.S. Natl. Herb.* 24: 181. 1925, *Abhandlungen herausgegeben von der Senckenbergischen Naturforschenden Gesellschaft* 532: 1-81. 1974 [Revision der Gattung *Schismus* (Poaceae: Arundinoideae: Danthonieae)], *Contributions from the United States National Herbarium* 46: 248, 558-560. 2003.

Hemisorghum C.E. Hubb. ex Bor = *Hemisorghum* C.E. Hubb.

From the Greek *hemi* “half” and *Sorghum* Moench.

About 2 species, tropical Asia. Panicoideae, Andropogonodae, Andropogoneae, Andropogoninae, perennial, herbaceous, tufted, ligule membranose densely ciliate and very short, leaf blades flat or rolled, plants bisexual, open inflorescence paniculate nondigitate, large terminal panicle, long loose racemes, paired dissimilar spikelets, sessile spikelet 2-flowered and flattened, upper floret perfect, lower floret reduced to a lemma, pedicelled spikelet staminate or sterile or barren, 2 glumes subequal and dissimilar, lower glume coriaceous and keeled, upper lemma awnless or 2-dentate and awned, palea present or suppressed, 2 free and fleshy glabrous lodicules, 3 stamens, ovary glabrous, 2 red stigmas, open habitats, along streams and riverbanks, hillsides, slopes, a link between *Sorghum* and *Saccharum*, type *Hemisorghum mekongense* (A. Camus) C.E. Hubb., see *Grasses*

of Burma, Ceylon, India and Pakistan (excluding Bambuseae) 686-687. 1960, *Kew Bulletin* 27(3): 447-450. 1972.

Species

H. mekongense (A. Camus) C.E. Hubb. (*Sorghum halepense* var. *mekongense* A. Camus; *Sorghum mekongense* (A. Camus) A. Camus)

Asia. See *Bulletin du Muséum d'Histoire Naturelle* 25: 497. 1919, *Flore Générale de l'Indo-Chine* 7: 323, f. 35. 1922, *Grasses of Burma ...* 687-688. 1960.

H. venustum (Thw.) W.D. Clayton (*Andropogon venustus* Thwaites; *Bothriochloa venusta* (Thwaites) A. Camus; *Capillipedium venustum* (Thwaites) Bor; *Vetiveria venusta* (Thwaites) Willis)

Southern India, Sri Lanka. Perennial, tussocky, basal sheaths flabellate, leaf blades rolled when dry, panicle elliptic to narrowly elliptic, spikelets paired, lower glume keeled, upper lemma 2-dentate, pedicelled spikelet sterile and awnless, see *Enumeratio Plantarum Zeylaniae* 136, 367. 1864 and *Rev. Cat. Pl. Ceylon* 110. 1911 [also *Ann. Bot. Gard. Perad.* 5: 88. 1911], *Bulletin du Muséum d'Histoire Naturelle* 25: 497. 1919, *Flore Générale de l'Indo-Chine* 7: 323, f. 35. 1922, *Annales de la Société Linnéenne de Lyon, sér. 2*, 76: 165. 1931, *Handb. Fl. Ceylon* 6: 332. 1931, *Grasses of Ceylon* 184. 1956, *Grasses of Burma ...* 113. 1960, *Kew Bulletin* 27(3): 448. 1972.

Henrardia C.E. Hubb. = *Aegilops* L., *Rottboellia* L.f.

After the Dutch pharmacist Jan Theodor Henrard, 1881-1974, malacologist, agrostologist, from 1921 to 1946 Curator of the Rijksherbarium at Leiden, among his writings are *A Monograph of the Genus Aristida*. Leyden 1929-1932 and *Monograph of the Genus Digitaria*. Leiden 1950. See J.H. Barnhart, *Biographical notes upon botanists*. 2: 158. 1965; Elmer Drew Merrill (1876-1956), "A botanical bibliography of the islands of the Pacific." *Contr. U.S. Natl. Herb.* 30(1): 148. 1947; August Adriaan Pulle (1878-1955), editor, *Flora of Suriname* (Netherlands Guyana). [Gramineae, by J.T. Henrard and Gerda Jane Hillegonda Amshoff, 1913-1985] 1948; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 171. 1972; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. Philadelphia 1964; S. Lenley et al., *Catalog of the manuscript and archival collections and index to the correspondence of John Torrey*. Library of the New York Botanical Garden. 220. 1973.

About 2 species, Middle East, southwest and central Asia, temperate and tropical. Pooideae Triticoideae, Triticeae, annual, herbaceous, auricles present or absent, ligule unfringed membrane, plants bisexual, inflorescence spicate,

slender cylindrical raceme, spikelets solitary and distichous, 2 glumes more or less equal to subequal and enclosing the lemma, lower glume 3-7-nerved, upper glume 5-9-nerved, lemma membranous 3-nerved awnless, palea present, 2 free and membranous lodicules ciliate, 3 stamens, ovary hairy, 2 stigmas, open habitats, dry areas, slopes, type *Henrardia persica* (Boiss.) C.E. Hubb., see *Species Plantarum* 1: 85. 1753, *Species Plantarum* 2: 1050-1051. 1753, *Supplementum Plantarum* 13, 114. 1781 [1782], *Flore de France* 3: 601. 1856 and *Blumea, Supplement* 3: 15, 17. 1946, *Willdenowia* 5(3): 472. 1969, *Feddes Repert.* 91: 225-228. 1980, *Taxon* 41: 555-556. 1992, *Nordic Journal of Botany* 13: 481-493. 1993, *Blumea* 31: 281-307. 1993, *Taxon* 44: 611-612. 1995, *Contributions from the United States National Herbarium* 46: 546-548. 2003, *Contributions from the United States National Herbarium* 48: 20-23, 383, 604. 2003, *Weed Biology and Management* 5(2): 62-68. June 2005.

Species

H. persica (Boiss.) C.E. Hubb. (*Henrardia glabriglumis* (Nevski) Tzvelev; *Henrardia persica* subsp. *glabriglumis* (Nevski) Czopanov; *Henrardia persica* var. *erecta* (Griseb.) C.E. H. pubescens (Bertol.) C.E. Hubb. (*Henrardia hirtella* Nikiforova; *Henrardia pubescens* subsp. *hirtella* (Nikiforova) Á. Löve; *Lepturus pubescens* (Bertol.) Boiss.; *Pholiurus pubescens* (Bertol.) A. Camus; *Rottboellia pubescens* Bertol.)

Middle East. See *Prodromus Florae Novae Hollandiae* 207. 1810, *Fundamenta Agrostographiae* 131. 1820, *Miscellanea Botanica* 1: 10, t. 1, f. 3-4. 1842, *Flora Orientalis* 5: 685. 1884 and *Annales de la Société Linnéenne de Lyon*, sér. 2, 69: 90. 1923, *Blumea*, Supplement 3: 19. 1946, *Taxon* 16: 68. 1967, *Feddes Repertorium* 95(7-8): 508. 1984.

Heptasetta Koidz. = *Agrostis* L., *Senisetum* Honda

From the Greek *hepta*- “seven” and Latin *saeta* (*seta*), *ae* “a bristle, hair.”

Pooideae, Poeae, Agrostidinae, see *Species Plantarum* 1: 61-63. 1753 and *Botanical Magazine* (Tokyo) 46: 371. 1932, *Botanical Magazine* (Tokyo) 47: 146. 1933, *Fl. Fenn.* 5: 29. 1971, *Taxon* 41: 556. 1992, *Taxon* 44: 611-612. 1995, *Contributions from the United States National Herbarium* 48: 42-89, 383, 610. 2003.

Hesperochloa (Piper) Rydb. = *Festuca* L., *Leucopoa* Griseb.

From the Greek *hesperos* “western, at evening” and *chloe*, *chloa* “grass.”

Pooideae, Poeae, Loliinae, type *Hesperochloa kingii* (S. Watson) Rydb., see *Species Plantarum* 1: 73-74. 1753, C.F. von Ledebour, *Flora Rossica* 4(13): 383, 388. 1852 [Grisebach is the author of the Gramineae], *Bulletin Colorado State University Experiment Station* 12: 36. 1890 and *Contributions from the United States National Herbarium* 10: 10. 1906, *Feddes Repertorium* 2(18): 70-71. 1906, *Bulletin of the Torrey Botanical Club* 39(3): 106. 1912, *Ill. Fl. U.S. Canada* edition 2, 1: 269. 1913, *Novosti Sistematiki Vysshchikh Rastenii* 17: 42-53. 1980, *American Journal of Botany* 82(10): 1287-1299. 1995, *Grasses: Systematics and Evolution* 61-74. 2000, *Contributions from the United States National Herbarium* 48: 312-368, 422. 2003.

Hesperostipa (M.K. Elias) Barkworth = *Sparteum* P. Beauv.

From the Greek *hespera* “evening, the west,” *hesperos* “western, at evening” plus *Stipa*.

About 4-5 species, northern America. Stipoideae, Stipeae, or Pooideae, Stipeae, Stipinae, perennial, densely caespitose, herbaceous, branched or unbranched, erect or ascending, auricles absent, ligules membranous, plants bisexual, cleistogamous or chasmogamous, panicles open or contracted, spikelets solitary, 2 subequal glumes acuminate and long-awned, palea and lodicules present, 3 stamens, ovary glabrous, 2 stigmas, weed species, sharp awn may injure grazing animals, open habitats, on seasonally

dry grasslands, sometimes included in *Stipa* L. (*Stipa* sect. *Hesperostipa* M.K. Elias), type *Hesperostipa comata* (Trin. & Rupr.) Barkworth, see *Species Plantarum* 1: 78. 1753, *Essai d'une Nouvelle Agrostographie* 178. 1812, *Species Graminum Stipaceorum* 75. 1842 and L. Abrams, *Illustrated Flora of the Pacific States* 1: 1-557. 1923, *Special Paper(s): Geological Society of America* 41: 67. 1942, A.S. Hitchcock, *Manual of the Grasses of the United States (edition 2, revised by A. Chase)* 1951, C.L. Hitchcock, A. Cronquist, M. Ownbey and J.W. Thompson, “Vascular Cryptogams, Gymnosperms, and Monocotyledons.” *Vascular Plants of the Pacific Northwest* 1: 1-914. 1969, D.S. Correll and M.C. Johnston, *Manual of the Vascular Plants of Texas* 1970, S.L. Welsh, *Anderson's Flora of Alaska and Adjacent Parts of Canada* 1974, A. Cronquist, A.H. Holmgren, N.H. Holmgren and J.L. Reveal, “Vascular Plants of the Intermountain West, U.S.A.” *Intermountain Flora* 6: 1-584. 1977, H.J. Scoggan, *The Flora of Canada* 2: 93-545. 1978 [1979], E.H. Moss, *Flora of Alberta* (edition 2) 1983, *Taxon* 39(4): 597-614. 1990, *Phytologia* 74(1): 15-16. 1993, W.J. Cody, *Flora of the Yukon Territory* 1996, Clair L. Kucera, *The Grasses of Missouri* University of Missouri Press, Columbia 1998, *Contributions from the United States National Herbarium* 48: 383-384, 617-650. 2003, *Am. J. Bot.* 91: 2004-2012. 2004, *Conservation Biology* 17(2): 420-432. Apr 2003, *Conservation Biology* 17(5): 1425-1434. Oct 2003, *Journal of Applied Ecology* 41(6): 1058-1064. Dec 2004.

Species

H. comata (Trin. & Rupr.) Barkworth (*Stipa comata* Trin. & Rupr.; *Stipa comata* subsp. *intonsa* Piper; *Stipa comata* var. *suksdorfii* H. St. John)

Northern America, U.S., Canada, Saskatchewan, Columbia Basin of British Columbia. Perennial bunchgrass, tufted, erect, leafy, fibrous roots, shallow rooted to medium rooted, basal leaves, sheaths open, ligule membranous, blade usually inrolled, no auricles, narrow flower head with long slender awns, 1-flowered spikelets, glumes almost equal and persistent, lemmas hardened and hairy, flexible and curved awns twisted many times from the tip of the lemma, forage, moderately palatable to wildlife and domestic stock, sharp awn may injure grazing animals, a grassland species, useful for stabilizing eroded or degraded sites, found on dry sandy ground, open valley bottoms, see *Species Graminum Stipaceorum* 75. 1842 and *Contributions from the United States National Herbarium* 11: 109. 1906, *Contr. U.S. Natl. Herb.* 24(7): 232. 1925, *Fl. S.-E. Washington* 61. 1937, *Phytologia* 74(1): 16. 1993.

in English: needle-and-thread grass, needle-and-thread, needlegrass

H. comata (Trin. & Rupr.) Barkworth subsp. ***comata*** (*Stipa comata* Trin. & Rupr.; *Stipa comata* subsp. *intonsa* Piper; *Stipa comata* subsp. *comata*; *Stipa comata* var. *comata*)

Northern America, U.S., Canada. Perennial, see *Species Graminum Stipaceorum* 75. 1842 and *Contributions from the United States National Herbarium* 11: 109. 1906, *Phytologia* 74(1): 16. 1993.

in English: needle-and-thread

H. comata (Trin. & Rupr.) Barkworth subsp. *intermedia* (Scribn. & Tweedy) Barkworth (*Stipa comata* var. *falcata* Boivin p.p.; *Stipa comata* var. *intermedia* Scribn. & Tweedy; *Stipa comata* var. *suksdorfii* St. John; *Stipa spartea* var. *intermedia* (Scribn. & Tweedy) B. Boivin; *Stipa spartea* var. *tweedyi* (Scribn.) M.E. Jones; *Stipa tweedyi* Scribn.)

Northern America, U.S., Canada. Perennial, see *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 1(1): 82. 1830, *Species Graminum Stipaceorum* 75. 1842, *Botanical Gazette* 11: 171. 1886, *Bulletin, Division of Agrostology United States Department of Agriculture* 11: 47. 1898 and *Contributions to Western Botany* 14: 11. 1912, *Fl. S.-E. Washington* 61. 1937, *Phytologia* 43(1): 106. 1979, *Phytologia* 74(1): 16. 1993.

in English: intermediate needle-and-thread

H. curtiseta (Hitchc.) Barkworth (*Stipa curtiseta* (Hitchc.) Barkworth; *Stipa spartea* subsp. *curtiseta* Hitchc.; *Stipa spartea* var. *curtiseta* Hitchc.)

U.S., Canada. See *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 1(1): 82. 1830 and *Contributions from the United States National Herbarium* 24(7): 230. 1925, *Canadian Journal of Botany* 56(6): 624. 1978, *Phytologia* 74(1): 16. 1993.

H. neomexicana (Thurb.) Barkworth (*Stipa neomexicana* (Thurb.) Scribn.; *Stipa pennata* L.; *Stipa pennata* var. *neomexicana* Thurb.)

Northern America, Mexico, U.S. Perennial, forage, see *Species Plantarum* 1: 78. 1753, *Manual of the Botany ... of the Rocky Mountain Region* . . 408. 1885, *American Grasses - II* 132, f. 428. 1899 and *Contr. U.S. Natl. Herb.* 24(7): 220 (1925, *Phytologia* 74(1): 16. 1993.

in English: New Mexico feathergrass, needlegrass

in Mexico: barba blanca, flechilla neomexicana

H. saxicola (Hitchc.) Valdés-Reyna & Barkworth (*Stipa saxicola* Hitchc.)

Northern America, Mexico. See *Contributions from the United States National Herbarium* 24(7): 232, t. 51, f. 1-2. 1925.

H. spartea (Trin.) Barkworth (*Stipa robusta* Nutt. ex Trin.; *Stipa robusta* Nutt. ex Trin. & Rupr.; *Stipa spartea* Trin.; *Stipa spartea* var. *spartea*)

Northern America, Canada, U.S. Perennial bunchgrass, pioneer species, sharp awns may injure grazing livestock, high palatability when plants young and succulent, forage,

upland grassland, dry sand prairies, foothills, see *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 1(1): 82. 1830, *Species Graminum Stipaceorum* 69, 75. 1842 and *Contributions to Western Botany* 14: 11. 1912, *Phytologia* 74(1): 16. 1993.

in English: porcupine grass, big needlegrass, short-awn porcupine grass, western porcupine grass

Heterachne Benth.

Greek *heteros* “different, variable” and *achne* “chaff, glume, scale,” the glumes are variable, the lemmas are different; see G. Bentham, in *Hooker's Icones Plantarum*. 13: 40, t. 1250. (Dec) 1877.

About 3 species, northern Australia. Chloridoideae, Eragrostideae, annual, tufted, herbaceous, unbranched, auricles absent, ligule a line of hairs or a ciliate membrane, plants bisexual, inflorescence spicate or paniculate, a contracted panicle spiciform or condensed, cleistogamous or chasmogamous, solitary or paired spikelets oblong to orbicular with zig-zag rachilla, the lower 1-2 florets bisexual, the upper florets sterile and clustered, 2 deciduous glumes subequal or unequal, lower glume 1-nerved, upper glume 1-3-nerved, lemmas strongly flattened with winged keels, palea gibbous with winged keels, 2 fleshy lodicules, 3 stamens, ovary glabrous, 2 stigmas, damp soil, moist ground, depressions, type *Heterachne gulliveri* Benth., see *Journal of the Royal Society of Western Australia* 44(3): 77-83. 1961.

Species

H. abortiva (R. Br.) Hughes (*Eragrostis abortiva* (R. Br.) Steud.; *Poa abortiva* R. Br.)

Tropical Australia. Inflorescence a false spike, spikelets 4-25-flowered, 1-3 bisexual florets, see *Prodromus Florae Novae Hollandiae et Insulae van Diemen* ... 181. London 1810, *Synopsis Plantarum Glumacearum* 1: 279. 1854 and *Botanical Exchange Club of the British Isles. Report* 1916 627. 1917.

H. baileyi C.E. Hubb. (named for John Frederick Bailey, 1866-1938, from 1917 to 1932 Director of the Adelaide Botanic Garden, wrote “Introduction of economic plants into Queensland.” *Proc. R. Soc. Queensland*. 22: 77-102. 1910; the British born Australian botanist Frederick Manson Bailey (1827-1915), 1878 F.L.S., was the father of John Frederick B., he was the author of *Catalogue of the Indigenous and Naturalized Plants of Queensland*. Brisbane 1890, *The Queensland Flora*. Brisbane 1899-1905 and *Comprehensive Catalogue of Queensland Plants both Indigenous and Naturalised*. Brisbane [1913]. See D.J. Carr and S.G.M. Carr, eds., *People and Plants in Australia*. 1981; J.H. Barnhart, *Biographical notes upon botanists*. 1: 104, 105. 1965; *Contributions from the Arnold Arboretum of*

Harvard University. 4: 29, t. IV. 1933; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933; Gordon Douglas Rowley, *A History of Succulent Plants*. Strawberry Press, Mill Valley, California 1997).

Australia, Queensland. Inflorescence paniculate, spikelets 3-6-flowered, 1-3 bisexual florets, glumes more or less equal, see *Hooker's Icones Plantarum* 33, sub t. 3283. 1935.

H. gulliveri Benth. (*Heterachne gulliveri* C.E. Hubb.)

Tropical Australia. Inflorescence paniculate, spikelets 3-5-flowered, 1-2 bisexual florets, glumes unequal, lemma margins ciliolate, shrubland, woodland, in sandy and swampy areas, see *Hooker's Icones Plantarum* 13: 39, t. 1250. 1877 and *Hooker's Icones Plantarum* 33, sub t. 3283. 1935.

H. gulliveri Benth. var. *gulliveri*

Tropical Australia. Basal leaf sheaths margins glabrous.

H. gulliveri Benth. var. *major* C.E. Hubb.

Tropical Australia. Basal leaf sheaths margins pilose.

Heterantherium Hochst. ex Jaub. & Spach = *Heterantherium* Hochst., *Heterantherium* Jaub. & Spach

From the Greek *heteros* "different, various" and *anthele* "a type of inflorescence, a floret, a little flower," referring to the inflorescence and to fertile and sterile spikelets.

One species, southwest Asia, Turkey, Pakistan. Pooideae, Triticoideae, Triticeae, annual, herbaceous, nodes bristly, narrow leaves, auricles present, ligule an unfringed membrane, plants bisexual, inflorescence spike-like, raceme oblong, spikelets clustered and flattened, hermaphrodite and sterile spikelets on the same plant, fertile spikelets 1-2-flowered, 2 glumes more or less equal to similar, lemma rounded on the back and long-awned, palea present, 2 free and membranous lodicules, 3 stamens, ovary hairy, 2 stigmas, open habitats, dry places, slopes, type *Heterantherium piliferum* (Banks & Sol.) Hochst., see *Illustrationes Plantarum Orientalium auctoribus Comite Jaubert et Eduardo Spach ... Parisiis 1842-1857* and *Nordic Journal of Botany* 13: 481-493. 1993, Roberta J. Mason-Gamer, "The β -amylase genes of grasses and a phylogenetic analysis of the Triticeae (Poaceae)." *Am. J. Bot.* 92: 1045-1058. 2005.

Species

H. piliferum (Banks & Sol.) Hochst. (*Agropyron piliferum* (Hochst.) Benth.; *Elymus pilifer* Banks & Sol.; *Eremopyrum olgae* (Regel) P. Candargy; *Heterantherium aleppicum* Gand.; *Heterantherium assyriacum* Gand.; *Heterantherium hermoneum* Gand.; *Heterantherium piliferum* (Banks & Sol.) Hochst. ex Jaub. & Spach, nom. illeg., non *Heterantherium piliferum* (Banks & Sol.) Hochst.; *Triticum olgae* Regel)

Asia. Glumes awnlike, see *The Natural History of Aleppo* 2: 244. 1794, *Illustrationes Plantarum Orientalium ...* 4: 24, pl. 318. 1842-1857, *Acta Horti Petrop.* 7: 588. 1881, *Transactions of the Linnean Society of London, Botany* 3: 126. 1888 and *Archives de Biologie Végétale Pure et Appliquée* 1: 33. 59. 1901, *Bulletin de la Société Botanique de France* 66(7): 300. 1919 [1920], *Nord. J. Bot.* 13: 486. 1993.

Heteranthoecia Stapf

From the Greek *heteros* "different, variable," *anthos* "flower" and *oikos* "house, any dwelling-place."

One species, tropical Africa. Panicoideae, Panicodae, Isachneae, annual, herbaceous, decumbent, trailing, mat-forming, auricles absent, ligule fringed and narrow, plants bisexual, inflorescence with several short unilateral racemes, spikelets flattened, 2 female fertile florets, lower floret hermaphrodite, 2 glumes more or less equal, upper floret female only, lower lemma narrowly ovate and acute, upper lemma elliptic and obtuse, palea present, 2 free and fleshy lodicules, 3 stamens, ovary glabrous, 2 stigmas, swamps, floodplains, seasonal ponds, shallow water, type *Heteranthoecia isachnoides* Stapf, see *Hooker's Icones Plantarum* 30: t. 2937. 1911, *Willdenowia* 32(2): 237-238. 2002.

Species

H. guineensis (Franch.) Robyns (*Dinebra guineensis* Franch.; *Dinebra tuaensis* Vanderyst; *Heteranthoecia guineensis* (Franchet) Roberty, nom. illeg., non *Heteranthoecia guineensis* (Franch.) Robyns; *Heteranthoecia isachnoides* Stapf)

Tropical Africa. Annual, rooting at the lower nodes, ascending, mat-forming, branched, ligule pubescent, lower floret hermaphrodite, glumes 4-7-nerved, in swamps, pond margins, shallow water, inundated sandy places, shallow streams, see *Species Plantarum* 2: 1049. 1753, *Bulletin de la Société d'Histoire Naturelle d'Autun* 8: 376. 1895 and *N. Amer. Fl.* 17: 94. 1909, *Hooker's Icones Plantarum* 30: t. 2927. 1911, *Bulletin agricole du Congo Belge* 11: 123. 1920, *Bulletin du Jardin Botanique de l'État* 9(3): 201. 1932.

in Sierra Leone: alate, boxi forotai, silero

Heteranthus Borkh. = *Ventenata* Koeler

Diversely flowered, from the Greek *heteros* "different, variable, diverse" and *anthos* "flower."

Pooideae, Poaceae, Agrostidinae, see *Botaniker* 16-18: 71. 1796, *Descriptio Graminum in Gallia et Germania* 272, 273. 1802 and *Contributions from the United States National Herbarium* 48: 384, 688. 2003.

Heterelytron Jungh. = *Themeda* Forssk.

From the Greek *heteros* “variable, diverse” and *elytron* “sheath, cover, scale, husk.”

Panicoideae, Andropogoneae, Anthistiriinae, type *Heterelytron scabrum* Jungh. see *Flora Aegyptiaco-Arabica* 178. 1775, *Tijdschrift voor Natuurlijke Geschiedenis en Physiologie* 7: 294-295. 1840 and *Contributions from the United States National Herbarium* 46: 248, 613. 2003.

Heterocarpha Stapf & C.E. Hubb. = *Drake-Brockmania* Stapf

From the Greek *heteros* “different, variable” and *karphos* “chip of straw, chip of wood, splinter, nail.”

One species, tropical East Africa. Chloridoideae, Eragrostidae, perennial, stoloniferous, tufted, herbaceous, unbranched, unarmed, auricles absent, leaves lanceolate, ligule a fringed membrane, plants bisexual, inflorescence spicate, short racemes, 2 glumes more or less equal, palea 2-nerved 2-keeled, 2 free and fleshy lodicules, 3 stamens, ovary glabrous, 2-3 stigmas reddish, open habitats, maritime, sands, saline soils, see *Mémoires de l'Herbier Boissier* 20: 6. 1900, *Bulletin of Miscellaneous Information Kew* 1912: 197. 1912, *Bulletin of Miscellaneous Information Kew* 1929: 263. 1929, *Kew Bulletin* 29(2): 267-270. 1974, *Flora of Ethiopia and Eritrea* 7: 108-110. 1995.

Species

H. haareri Stapf & C.E. Hubb. (*Drake-Brockmania haareri* (Stapf & C.E. Hubb.) S.M. Phillips; *Eleusine conglomerata* Peter; *Eleusine conglomerata* f. *littoralis* Peter; *Eleusine conglomerata* var. *littoralis* (Peter) Peter)

Africa, Tanzania, Ethiopia. Lower glume 1-2-nerved, upper glume 5-8-nerved, see *Bulletin of Miscellaneous Information Kew* 1929: 263. 1929, *Repertorium Specierum Novarum Regni Vegetabilis, Beihefte* 40(Anhang): 78-79, t. 42a-b. 1930, *Repertorium Specierum Novarum Regni Vegetabilis, Beihefte* 40(Anhang): 270. 1931, *Kew Bulletin* 29(2): 268. 1974.

Heterochaeta Schult. = *Heteranthus* Borkh., *Heterochaeta* Besser ex Schult. & Schult. f., *Heterochaeta* DC. (Asteraceae, alt. Compositae), *Ventenata* Koeler

From the Greek *heteros* “different, variable, various, diverse” and *chaite* “bristle, long hair.”

Pooideae, Poaeae, Agrostidinae, see *Botaniker* 16-18: 71. 1796, *Descriptio Graminum in Gallia et Germania* 272, 273. 1802, *Prodromus Systematis Naturalis Regni Vegetabilis* 5:

282. 1836 and *Contributions from the United States National Herbarium* 48: 384, 688. 2003.

Heterochloa Desv. = *Andropogon* L.

From the Greek *heteros* “different, variable, various, diverse” and *chloe, chloa* “grass.”

Panicoideae, Andropogoneae, Andropogoninae, type *Heterochloa alopecurus* Desv., see *Species Plantarum* 2: 1045-1046. 1753, *Mémoires de la Société d'Agriculture, Sciences et Arts d'Angers* 1: 170, t. 8, f. 3. 1831 and *Fl. Trop. E. Afr. Gramineae* 770. 1982, *Taxon* 41: 556. 1992, *Taxon* 44: 611-612. 1995, *Contributions from the United States National Herbarium* 46: 20-64, 248. 2003.

Heterolepis Boiss. = *Chloris* Sw., *Heterolepis* Cass. (Asteraceae), *Heterolepis* Ehrenb. ex Boiss.

Chloridoideae, Cynodonteae, Chloridinae, see *Nova Genera et Species Plantarum seu Prodromus* 1, 25. 1788, *Bull. Sci. Soc. Philom. Paris* 1820: 26. 1820, *Flora Orientalis* 5: 554. 1884 and *Contributions from the United States National Herbarium* 41: 39-52. 2001.

Heteropholis C.E. Hubbard = *Mnesithea* Kunth

From the Greek *heteros* “different, dissimilar” and *pholis* “a horny scale.”

About 5 species, Asia, tropical Africa to Indochina, Australia, the Philippines. Panicoideae, Andropogonodae, Andropogoneae, Rottboelliinae, annual or perennial, slender, herbaceous, branched, prostrate to decumbent, rooting at the nodes, leaf blades flat and narrowly lanceolate, auricles present or absent, ligule shortly membranous, plants bisexual, inflorescence racemose, simple racemes cylindrical or flattened, pedicelled spikelets with fused pedicels, sessile spikelet 2-flowered, upper floret perfect, lower floret barren, male spikelets with glumes, 2 glumes more or less equal, lower glume oblong awnless 7-9-nerved, upper glume 3-5-nerved, palea present, 2 free and fleshy lodicules, 3 stamens, ovary glabrous, 2 stigmas, grassland, woodland, edge of forest, sometimes referred to *Mnesithea*, type *Heteropholis sulcata* (Stapf) C.E. Hubb., see *Révision des Graminées* 1: 153-154. 1829 and *Hooker's Icones Plantarum* 36: t. 3548. 1956, R. de Koning, M.S.M. Sosef and J.F. Veldkamp, “A revision of *Heteropholis* and *Thaumas-tochloa* (Gramineae).” *The Gardens' Bulletin Singapore* 36: 137-162. 1983, *Blumea* 31(2): 281-307. 1986 [Generic delimitation of *Rottboellia* and related genera (Gramineae)], *Contributions from the United States National Herbarium*

46: 295-296. 2003, *Austral. Ecology* vol. 28, issue 3: 339-348. June 2003.

Species

H. annua Lazarides (*Mnesithea annua* (Lazarides) de Koning & Sosef)

Australia. See *Nuytsia* 5(2): 288, f. 1c-d, 7f. 1984[1985], *Blumea* 31(2): 295. 1986.

H. benoistii A. Camus (*Mnesithea benoistii* (A. Camus) de Koning & Sosef)

Madagascar. See *Bulletin de la Société Botanique de France* 103: 476. 1956 and *Blumea* 31(2): 287. 1986.

H. cochinchinensis (Lour.) W.D. Clayton (*Mnesithea laevis* (Retz.) Kunth; *Mnesithea laevis* var. *cochinchinensis* (Lour.) de Koning & Sosef; *Ophiuros cochinchinensis* (Lour.) Tropical Africa. See *Flora of Tropical Africa* 9: 59. 1917, *Journal of Botany, British and Foreign* 69(2): 54. 1931, *Hooker's Icones Plantarum* 36: t. 3548, 2. 1956, *Boissiera*. 9: 82. 1960, *The Gardens' Bulletin Singapore* 36: 137-162. 1983, *Blumea* 31(2): 287. 1986.

Heteropogon Pers. = *Spirotheros* Raf.

From the Greek *heteros* "different, variable, other" and *pogon* "a beard," the spikelets are awned and awnless, awned female-fertile and awnless male-fertile; see Christian Hendrik Persoon (1761/1762-1836), *Synopsis Plantarum, seu enchiridium botanicum complectens enumerationem systematicam specierum hucusque cognitorum* ... 2: 533. Parisiis lutetiorum [Paris] 1805-1807.

About 6-7 species, tropics and subtropics. Panicoideae, Andropogonodae, Andropogoneae, Andropogoninae, or Panicoideae, Andropogoneae, Anthistirinae, annual or perennial, herbaceous, branched, tufted, stems geniculate, internodes solid, auricles absent, ligule a very short fringed or ciliate membrane, sheaths keeled, leaves linear and narrow, plants bisexual, inflorescence a spatheate panicle, terminal and lateral pedunculated racemes, simple and fragile racemes with homogamous and heterogamous spikelets pairs, florets 2, lower floret sterile reduced to a hyaline lemma, upper floret perfect in the sessile spikelets of the heterogamous pairs, fertile spikelets awned, callus long and pungent, well developed pedicelled spikelet callus, 2 glumes more or less equal, lower glume of sessile spikelet coriaceous and not grooved, pedicelled spikelet male or barren and awnless, upper lemma entire with pubescent awn, palea present or absent, lodicules present or absent, stamens 0-3, ovary glabrous, stigmas 2, fruit compressed

and grooved, weed species, ornamental, good grazing when young, native pasture species, piercing grass, painful to stock, some species with awns or long slender and pungent callus with hygroscopic action and penetrative, often on poor soils, open habitats, dry and stony places, dry open places, rainforest, grassland, related to *Elymandra*, type *Heteropogon glaber* Pers. (*Heteropogon contortus* (L.) P. Beauv. ex Roem. & Schult.), see *Species Plantarum* 2: 1045. 1753, *Synopsis plantarum* 2: 533. 1807, *Bulletin Botanique [Genève]* 1: 221. 1830, *Die Natürlichen Pflanzenfamilien* 2(2): 29. 1887 and *N. Amer. Fl.* 17: 127. 1912, *Kew Bulletin* 1954: 74. 1954, *Folia Primatologica* 21: 36-60. 1974, *Folia Primatologica* 48: 78-120. 1987, *Bulletin of the Botanical Survey of India* 30(1-4): 120-125. 1988, *Flora Mesoamericana* 6: 395. 1994, *Memoirs of the New York Botanical Garden* 78: 509-540. 1996, Lucia G. London 1956; Claus Nissen, *Die Botanische Buchillustration*. 1951)

Warm temperate regions, throughout tropics and subtropics. Perennial bunchgrass or rarely annual, variable, vigorous, tufted, clumped, hummock forming, coarse, quick growing, blue-green to green to glaucous, erect, branched near the top or unbranched, prostrate to decumbent at base, glabrous, shortly rhizomatous, roots fibrous, leaf sheaths keeled and wrapped around the stem, basal sheaths laterally compressed, ligule membranous and short, leaves oblong and usually folded, inflorescence a raceme solitary or a false panicle, racemes 1 to many, spikelets overlapping, female spikelets with brown hairs, long awns strongly twisted when mature, sessile spikelets with a pungent pointed bearded callus, male spikelets green, pedicellate and lower sterile spikelets unawned, paleas absent, needle-sharp penetrative callus, fruits can become entangled in the wool of sheep

and puncture their skin, an increaser species, seldom cultivated, rarely sown, native pasture species, low to medium palatability, early palatable, good and nutritious only when young, coarse and unpalatable when old, valuable as fodder or hay, forage grass for cattle, eaten by mountain zebra and waterbuck, tillers eaten by baboons, noxious weed species, invasive, does not persist in semiarid areas, does not tolerate flooding and high levels of salinity, fairly tolerant of short-term droughts, useful in soil erosion control, used in India for making coarse mats, a very good grass for thatching or roofing, suitable for paper manufacture, medicinal, used in India for dysentery, fever, myalgia, rheumatism and toothache, widespread in tropical open forest and woodland, savannah, *Acacia* scrub, dry woodland forest, field margins, open places in forest, cliff slopes, sandy alluvial soil, on poor soils, on sandy loams, coarse sand, in loose dry sand, open sandy soils, lawn, roadsides, moist ground, sandy ligh-orange soil, on well drained and stony soils, disturbed sites and flatwoods, hillsides, infertile and shallow soils, grassland, bushveld areas, on rocky slopes and canyons, rocky ground in open places, see *Species Plantarum* edition 1, 2: 1045. 1753, *Flore de France* 3: 97. 1805, *Syn. Pl.* 2: 533. 1807, *Essai d'une Nouvelle Agrostographie* 134. 1812, *Systema Vegetabilium* 2: 835-836. 1817, *Flora Indica; or Descriptions ...* 1: 265. 1820, *Annales des Sciences Naturelles (Paris)* 5: 307. 1825, *Flora Brasiliensis seu Enumeratio Plantarum* 2: 364. 1829, *Reliquiae Haenkeanae* 1(4-5): 334. 1830, *Tentamen Florae Abyssinicae ...* 2: 453. 1850, *Analecta botanica indica ...* 2: 24. London 1895 and *Annals of the Missouri Botanical Garden* 75: 866-873. 1988.

in English: sweet tanglehead, tanglehead

in Spanish: arrocillo

in Mexico: barba negra dulce, retorcido negro

in Senegal: balambal

in South Africa: eenjarige assegaagrass, einjähriges speergras

H. polystachyus (Roxb.) Schult. (*Andropogon contortus* subvar. *polystachyus* (Roxb.) Hack.; *Andropogon polystachyos* Roxb.; *Heteropogon contortus* var. *polystachyos* (Roxb.) Deshp.; *Heteropogon polystachyus* (Roxb.) Nees, nom. illeg., non *Heteropogon polystachyus* (Roxb.) Schult.)

India. Indeterminate species, see *Systema Vegetabilium* 2: 836. 1817, *Flora Indica; or Descriptions ...* 1: 265. 1820, *Systema Vegetabilium* 2: 460. 1824, *Flora Brasiliensis seu Enumeratio Plantarum* 364. 1829, *Monographiae Phanerogamarum* 6: 588. 1889 and *Bulletin of the Botanical Survey of India* 30(1-4): 121. 1988 [1990].

H. triticeus (R. Br.) Stapf & Craib (*Andropogon ischyranthus* Steud.; *Andropogon liananthus* Steud.; *Andropogon lianatherus* Steud.; *Andropogon segaenensis* Steud.; *Andropogon triticeus* R. Br.; *Heteropogon insignis* Thwaites; *Heteropogon ischyranthus* (Steud.) Miq.; *Heteropogon lianatherus* (Steud.) Miq.; *Heteropogon triticeus* (R. Br.) Stapf ex Craib)

Southern India, Southeast Asia, Thailand, Burma, Sri Lanka, through Indonesia to Australia. Perennial, large and coarse, stout, erect, tall, forming loose tussocks and small clusters, basal sheaths compressed, linear leaves, homogamous spikelets paired and basal, male spikelets acute, female spikelets brown, callus bearded and pungent, lower glume hispid, awn pubescent, ornamental, used by Aborigines for food and fiber, moist soils in tropical woodlands, rocky hillsides, see *Prodromus Florae Novae Hollandiae* 1: 201. 1810, *Synopsis Plantarum Glumacearum* 1: 367. 1854, *Flora van Nederlandsch Indië* 3: 493. 1857, *Enumeratio Plantarum Zeylaniae* 437. 1864 and *Handb. Fl. Ceylon* 5: 239. 1900, *Bulletin of Miscellaneous Information Kew* 1912(10): 432. 1912, *Handb. Fl. Ceylon* 6: 334. 1931, *Grasses of Ceylon* 201. 1956, *Grasses of Burma ...* 165. 1960, *Journal of Cytology and Genetics* 25: 140-143. 1990, *Journal of Phytopathology* vol. 150, issue 4-5: 196-199. May 2002.

in English: wheat spear grass

in Thailand: yaa luuk nong, ya luk nong, ya nong, yaa nong

Heterosteca Desv. = Bouteloua Lag.

Greek *heteros* “different, varying, variable” and *theke* “a case, ovary, sheath.”

Chloridoideae, Cynodonteae, Boutelouinae, type *Heterosteca juncifolia* Desv., see *Nouv. Bull. Sci. Soc. Philom.* Paris 2: 188. 1810 and *Contributions from the United States National Herbarium* 41: 20-33, 127-128. 2001.

Heterostega Kunth = *Bouteloua* Lag.

Orth. var., *Heterosteca* Desv.

Chloridoideae, Cynodonteae, Boutelouinae, see *Mémoires du Muséum d'Histoire Naturelle* 2: 73. 1815 and *Contributions from the United States National Herbarium* 41: 20-33, 127-128. 2001.

Heterostipa (Elias) Barkworth = *Hesperostipa* (M.K. Elias) Barkworth

From the Greek *heteros* "different, diverse" plus the generic name *Stipa* L.

Stipoideae, Stipeae, or Pooideae, Stipeae, Stipinae, see *Phytologia* 74(1): 15-16. 1993, *Contributions from the United States National Herbarium* 48: 383-384, 617-650. 2003.

Heuffelia Schur = *Helictotrichon* Besser ex Schult. & Schult. f., *Heuffelia* Opiz (Cyperaceae)

For the Hungarian botanist Johann A. Heuffel, 1800-1857, physician; see J.H. Barnhart, *Biographical notes upon botanists*. 2: 169. 1965; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 174. 1972; H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 183. Oxford 1964; Ethelyn Maria Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993.

Pooideae, Poodae, Aveneae, or Pooideae, Poeae, Aveninae, see *Enumeratio Plantarum Transsilvaniae* 760. 1866 and *Feddes Repertorium* 45: 7. 1938, *Contributions from the United States National Herbarium* 48: 108-109, 382-383. 2003.

Hexarrhena Presl = *Hilaria* Kunth

From the Greek *hex* "six" and *arrhen* "male, stamen."

Chloridoideae, Cynodonteae, Hilariinae, type *Hexarrhena cenchroides* J. Presl, see *Nova Genera et Species Plantarum* 1: 116-118, pl. 37. 1815 [1816], *Reliquiae Haenkeanae* 1(4-5): 326, t. 14. 1830 and *Contributions from the United States National Herbarium* 41: 128-129. 2001.

x Hibanobambusa I. Maruyama & H. Okamura = *Hibanobambusa* I. Maruyama, H. Okamura & Murata

Sasa x *Semiarundinaria*.

Bamboo growing in Mt. Hiba, Nogi Country, Shimane Prefecture, Japan. Hybrid, slender, erect, arching, sympodial, culm base bent, leaves lanceolate, sheath deciduous, 2 branches per node, 6 stamens, good wood quality, type *Hibanobambusa tranquillans* (Koidz.) Maruy. & H. Okamura, see *Report Fuji Bamboo Garden* 16: 30. 1971, *Report Fuji Bamboo Garden* 17: 8. 1972, *Acta Phytotax. Geobot.* 30: 151. 1979, *Genera Graminum* 375. 1986.

Species

H. tranquillans (Koidzumi) Maruyama & H. Okamura (*Hibanobambusa tranquillans* Maruy. & H. Okamura; *Phyllostachys tranquillans* (Koidz.) Muroi; *Semiarundinaria tranquillans* Koidz.; *Sinoarundinaria nipponica* Muroi; *Sinoarundinaria tranquillans* (Koidzumi) Muroi)

Japan. Running bamboos, sympodial branching, culm base bent, large leaves, ligule truncated, ornamental, used for hedging and screen, see *Acta Phytotaxonomica et Geobotanica* 10: 314. 1941.

in Japan: inyou-chiku zoku, inyou-chiku, kinmei inyou, kimmei-inyo (green stripes on yellow culms), shiroshima-inyo (numerous white stripes on the leaf blade)

Hickelia A. Camus = *Cephalostachyum* Munro, *Decaryochloa* A. Camus, *Pseudocoix* A. Camus

Named for the French dendrologist Paul Robert Hickel, 1865-1935, forester, a friend of A. Camus.

One species or four, Madagascar, Tanzania. Bambusoideae, Bambusoideae, Bambuseae, Bambusinae, Hickeliinae, perennial, liana, branched, scrambling, trailing, slender, woody, scandent, leaning on trees, pendulous, climber, leafy, persistent, leaves acuminate, small ligules, plants bisexual, inflorescence iterant, spikelets clustered around the nodes, several glumes dimorphic, palea and lodicules present, 6 stamens, ovary hairy, 3 stigmas, forest, along streams, wet places, type *Hickelia madagascariensis* A. Camus, see *Reliquiae Haenkeanae* 1: 256. 1830, *Transactions of the Linnean Society of London* 26(1): 138-139. 1868 and *Comptes Rendus Hebdomadaires des Séances de l'Académie des Sciences* 179: 478-480. 1924, *Bulletin de la Société Botanique de France* 71: 899-906. 1925 [1924], *Archives du Muséum d'Histoire Naturelle*, sér. 6, 12: 603. Paris 1935, *Bulletin de la Société Botanique de France* 93: 242, 244. 1947, *Bulletin de la Société Botanique de France* 102: 120-122. 1955, *Taxon* 6(7): 201. 1957, *Kew Bulletin* 49(3): 429-443. 1994 [The genus *Hickelia* (Gramineae-Bambusoideae), by S. Dransfield], *The Journal of the American Bamboo Society* 16(1): 1-8. 2002.

Species

H. africana S. Dransfield (*Pseudocoix perrieri* A. Camus)

Madagascar, Tanzania. Along streams, see *Comptes Rendus Hebdomadaires des Séances de l'Académie des Sciences* 179: 478. 1924, *Kew Bulletin* 49(3): 440, f. 2-3. 1994.

H. alaotrensis A. Camus

Madagascar. See *Bulletin de la Société Botanique de France* 102: 120. 1955, *Kew Bulletin* 49(3): 441. 1994.

H. madagascariensis A. Camus

Madagascar. Erect, scrambling, see *Comptes Rendus Hebdomadaires des Séances de l'Académie des Sciences* 179: 478-480. 1924, *Bulletin de la Société Botanique de France* 71: 899-906. 1925 [1924], *Kew Bulletin* 49(3): 439, f. 1. 1994.

H. perrieri (A. Camus) S. Dransfield (*Pseudocoix perrieri* A. Camus)

Madagascar. See *Comptes Rendus Hebdomadaires des Séances de l'Académie des Sciences* 179: 478-480. 1924, *Kew Bulletin* 49(3): 441, f. 4. 1994.

Hierochloe R. Br. = *Anthoxanthum* L., *Ataxia* R. Br., *Dimeria* Raf., *Dimesia* Raf., *Disarrenum* Labill., *Hierochloe* Gmelin ex R. Br., *Savastana* Schrank, *Torresia* Ruiz & Pavon

Holy grass, from the Greek *hieros* "sacred" and *chloe*, *chloa* "grass," sacred grass, referring to its use in religious ceremonies, fragrant and strewn before church doors and floors on holy festivals; see Robert Brown, *Prodromus florae Novae Hollandiae*. 208. 1810.

About 20-30 species, temperate and cold regions, tropical mountains, arctic or subantarctic. Pooideae, Poodae, Aveneae, or Pooideae, Poeae, Phalaridinae, perennial, rhizomatous or tufted, sweetly or strongly coumarin scented, herbaceous, culms hollow, auricles absent, sheaths open and rounded, ligule membranous and not truncate, blade flat, plants bisexual, a loose and open panicle with branches spreading, spikelets ovate laterally compressed, usually 3 florets, lower 2 florets male or incomplete, uppermost floret bisexual, vestigial foliar structure subtending the inflorescence often present, 2 glumes more or less equal to subequal and shining, lower glume 1- to 5-nerved, upper glume 3- to 5-nerved, male lemmas sometimes short-awned, fertile lemma awnless, paleas of male florets 2-keeled, palea of bisexual floret 1-keeled, 2 lodicules free and membranous, stamens 2 in bisexual florets and 3 in staminate florets, ovary glabrous, 2 long plumose stigmas, fruit small and compressed laterally, shade species, common in woods, grasslands and open grassland, tundra, marshes and marshy places, open habitats, close to *Anthoxanthum* and *Phalaris*, type *Hierochloe odorata* (L.) P. Beauv., see *Species Plantarum* 1: 28. 1753, *Baiersche Flora* 1: 100, 337. Regensburg 1789, *Flora Peruviana, et Chilensis Prodromus* 125. 1794, *Systema Vegetabilium Florae Peruviana et Chilensis* 1:

251. 1798, *Novae Hollandiae Plantarum Specimen* 2: 82-83, f. 232. 1807, *Prodromus Florae Novae Hollandiae* 208. 1810, *Essai d'une Nouvelle Agrostographie* 62, 164, t. 12, f. 5. 1812, *American Monthly Magazine and Critical Review* 1: 442. 1817, *Révision des Graminées* 1: 22. 1829 and *Fieldiana, Botany* 24(2): 38-331. 1955, *Rec. Dom. Mus.* 5: 101-146. 1965, Weimarck, G. "Variation and taxonomy of *Hierochloë* (Gramineae) in the northern hemisphere." in *Bot. Not.* 124: 129-175. 1971, *New Zealand Journal of Botany* 11: 561-580. 1973, *Darwiniana* 19(2-4): 422-457. 1975 [Las especies del género *Hierochloe* (Gramineae) de Argentina y Chile], *Flora Patagónica* 3: 276-285. 1978, Y. Species

H. alpina (Swartz ex Willd.) Roem. and Schult. (*Aira alpina* auct.; *Aira alpina* Lilj., nom. illeg., non *Aira alpina* L.; *Anthoxanthum monticolum* (Bigelow) Veldkamp; *Dimesia monticola* (Bigelow) Raf.; *Dimesia monticola* Raf. ex B.D. Jacks.; *Hierochloe alpina* var. *aristata* Raspail; *Holcus alpinus* Sw. ex Willd.; *Holcus monticola* Bigelow; *Savastana alpina* (Sw. ex Willd.) Scribn.; *Torresia alpina* (Sw. ex Willd.) Hitchc.)

Norway, Canada. Densely to loosely tufted, ligule is half membrane-like and the other half is long hairs, staminate florets awned, grows in the subalpine and alpine zones, see *Utkast til en Svensk Flora* 49. Upsala 1792, *Species Plantarum. Editio quarta* 4(2): 937. 1806, *New England Journal of Medicine and Surgery, and the Collateral Branches of Science* 5: 334. 1816, *Systema Vegetabilium* 2: 515. 1817,

American Monthly Magazine and Critical Review 1: 442. 1817, *Annales des Sciences d'Observation* 2: 85. 1829, *Index Kewensis* 1: 760. 1893, *Memoirs of the Torrey Botanical Club* 5(3): 34. 1894 and *American Journal of Botany* 2: 300. 1915, *Blumea* 30(2): 347. 1985.

in English: alpine sweet grass

in Finnish: Tunturimaarianheinä

in Swedish: Fjällmyskgräs

in Japan: miyamakobo

H. alpina (Swartz ex Willd.) Roem. and Schult. subsp. **alpina** (*Anthoxanthum monticolum* (Bigelow) Veldkamp; *Anthoxanthum monticolum* subsp. *alpinum* (Sw. ex Willd.) Soreng; *Hierochloe alpina* f. *soperi* Polunin; *Hierochloe alpina* subsp. *orthantha* (T.J. Sørensen) Weim.; *Hierochloe alpina* var. *orthantha* (T.J. Sørensen) Hultén; *Hierochloe monticola* (Bigelow) Á. Löve and D. Löve; *Hierochloe odorata* auct. non (L.) P. Beauv. p.p.; *Hierochloe orthantha* T.J. Sørensen; *Holcus alpinus* Swartz ex Willd.; *Holcus monticola* Bigelow; *Savastana alpina* (Sw. ex Willd.) Scribn.)

North America, Canada. More or less loosely caespitose, aromatic, robust, compact, erect, rhizomatous, leaves mostly in a basal tuft, sheaths persisting, ligule a fringed membrane, inflorescence paniculate, spikelets dark purple at the base, 3 florets per spikelet, awn usually twisted at base and geniculate, white stigma, common along streams, river terraces, slopes, along drainage creek, see *Species Plantarum. Editio quarta* 4(2): 937. 1806, *Systema Vegetabilium* 2: 515. 1817, *Annales des Sciences d'Observation* 2: 85. 1829 and *Blumea* 30(2): 347. 1985.

H. alpina (Swartz ex Willd.) Roem. and Schult. subsp. **orthantha** (Sørensen) G. Weim. (*Anthoxanthum monticolum* (Bigelow) Y. Schouten & Veldkamp; *Anthoxanthum monticolum* subsp. *monticolum*; *Anthoxanthum monticolum* subsp. *orthantha* (Sørensen) G. Tucker; *Hierochloe alpina* var. *orthantha* (Sørensen) Hultén; *Hierochloe monticola* (Bigelow) Á. & D. Löve, non Mez; *Hierochloe orthantha* Sørensen)

Northern America, U.S., Alaska, Canada, northern Labrador, Newfoundland, Ontario, Quebec. Rare species, awn of the upper male floret inserted above the lemma base and straight, see *Systema Vegetabilium* 2: 515. 1817 and *Meddelelser om Grønland* 136(8): 1. 1954, *Blumea* 30(2): 347. 1985.

H. angusta Hitchc. (*Anthoxanthum angustum* (Hitchc.) Ohwi; *Anthoxanthum horsfieldii* var. *angustum* (Hitchc.) Y. Schouten)

Papua New Guinea. Perennial, erect, panicle contracted, lemmas deeply cleft at the tip, fertile lemma awnless, on grassland, see *Brittonia* 2(2): 118. 1936, *Bulletin of the Tokyo Science Museum* 18: 8. 1947, *Blumea* 30(2): 333. 1985.

H. australis (Schrad.) Roemer and Schultes (*Anthoxanthum australe* (Schrad.) Veldkamp; *Holcus australis* Schrad.)

Europe. See *Flora Germanica* 1: 253. 1806, *Systema Vegetabilium* 2: 514. 1817 and *Blumea* 30(2): 347. 1985.

in Finnish: Metsämaarianheinä, Etelän maarianheinä

in Swedish: Finskt myskgräs

H. brunonis Hook.f. (*Hierochloe antarctica* var. *brunonis* (Hook.f.) Zotov)

New Zealand. Loosely tufted, coastal, leaf sheath keeled, ligule membranous, panicle dense and nodding, glumes subequal, sterile florets awned, bisexual floret mucronate, see *Prodromus Florae Novae Hollandiae* 1: 209. 1810, *Flora Antarctica* 1: 93, t. 52. 1845 and *Transactions and Proceedings of the New Zealand Institute* 73: 234. 1943.

H. cuprea Zotov

New Zealand. Alpine, tufted to loosely tufted, robust, leaf sheath glabrous and ligule ciliate, loose inflorescence, glumes subequal, lemma of bisexual floret bearded to densely long-ciliate, see *New Zealand Journal of Botany* 11(3): 571. 1973.

H. equiseta Zotov (*Danthonia buchananii* Hook.f.)

New Zealand. Alpine, tufted to loosely tufted, robust, leaf sheath glabrous and ligule hairy, glumes subequal, awns stout with column twisting, see *Indig. Grasses* t. 35. 1879, *T.N.Z.I.* 14: 385. 1882 and *New Zealand Journal of Botany* 11(3): 568. 1973.

H. flexuosa Hook.f. (*Anthoxanthum flexuosum* (Hook.f.) Veldkamp)

India, Asia, Nepal. See *The Flora of British India* 7: 222. 1896 and *Blumea* 30(2): 347. 1985.

H. fraseri Hook.f. (*Anthoxanthum fraseri* Y. Schouten & Veldkamp; *Hierochloe redolens* var. *fraseri* (Hook.f.) Benth.; *Savastana fraseri* (Hook.f.) Skeels; *Torresia fraseri* (Hook.f.) Hitchc.)

Tasmania, Mt. Field National Park. Unbranched, slender, leaves along the culms, internodes solid, aromatic, ligule membranous, no auricles, leaf sheaths not keeled, panicle purple to dark and somewhat contracted, vestigial foliar structure subtending the inflorescence often present, lower glume elliptic, palea clasped by the lemmas, ovary glabrous, fruit compressed, common amongst rocks, in open rocky and sandy situations, alpine heath, alpine moorland and boulder field, see *Flora Antarctica* 1: 93. 1845, *Fl. Tasm.* 2: 108. 1860 and *Manual of the New Zealand Flora* 856. 1906, *U.S. Department of Agriculture Bureau of Plant Industry Bulletin* 248: 21. 1912, *Proceedings of the Biological Society of Washington* 28: 182. 1915.

H. fusca Zotov

New Zealand. Coastal, tufted to loosely tufted, robust, leaf sheath glabrous and ligule hairy, panicle more or less erect, spikelets densely crowded with florets included by glumes,

glumes subequal, slender awns more or less straight, bisexual floret mucicous or mucronate, see *New Zealand Journal of Botany* 11(13): 576. 1973.

H. glabra Trin. (*Anthoxanthum glabrum* (Trin.) Veldkamp; *Hierochloa bungeana* Trin.; *Hierochloa grandiflora* (Litv.) Petrov; *Hierochloa odorata* f. *pubescens* Kryl.; *Hierochloa odorata* subsp. *glabra* (Trin.) Tzvelev; *Hierochloa odorata* subsp. *pubescens* (Kryl.) Hara)

China, Asia, Mongolia, Siberia. Found in open mountain meadows, disturbed areas along roadsides, sandy brown soil, mountain brown soil, see *Neue Entdeckungen im ganzen Umfang der Pflanzenkunde* 2: 66. Leipzig 1821, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 5,3(3): 82. 1839 and *Novosti Sist. Vyss. Rast.* 10: 83. 1973, *Novosti Sist. Vyss. Rast.* 13: 38. 1976, *Blumea* 30(2): 347-348. 1985, *Fl. Sibir. (Poaceae)* 2: 118. 1990.

Java, Indonesia. Good cattle fodder, see *Révision des Graminées* 1: 22. 1829, *Plantae Javanicae Rariores* 8, t. 3. 1838, *Cat. Pl. Hort. Bot. Bogor.* 16. 1844, *Diagnoses plantarum novarum asiaticarum* 7: 930. 1888, *The Flora of British India* 7: 223. 1896 and *Repertorium Specierum Novarum Regni Vegetabilis* 17(19-30): 291. 1921, *Bulletin of the Tokyo Science Museum* 18: 8. 1947, *Journal of the Arnold Arboretum* 24: 325, 327. 1950.

H. laxa R. Br. ex Hook.f. (*Anthoxanthum laxum* (R. Br. ex Hook.f.) Veldkamp)

India, Western Himalaya, Kashmir. Spreading, erect leafy shoots, rhizomes slender, sweet-scented grass, ensiform leaves, spreading inflorescence paniculate, spikes on slender axis, spikelets shining, elegant, high altitude, see *Species Plantarum* 1: 28. 1753, *The Flora of British India* 7: 222. 1897 [1896] and *Blumea* 30(2): 348. 1985.

H. novae-zelandiae Gand. (*Hierochloa alpina* sensu Hook.f.; *Hierochloa borealis* sensu Hook.f.; *Hierochloa fraseri* sensu Cheeseman)

New Zealand. Alpine, densely to loosely tufted, slender, sometimes rhizomatous, leaf sheath glabrous and ligule membranous, leaf blade margins toothed, lax and spreading panicles, glumes obovate and membranous, awns straight and slender, bisexual floret mucicous or mucronate with subapical mucro, see *Bulletin de la Société Botanique de France* 66(7): 300. 1919 [1920].

H. occidentalis Buckley (*Anthoxanthum occidentale* (Buckl.) Veldkamp; *Anthoxanthum occidentale* (Buckley) G.C. Tucker, nom. illeg., non *Anthoxanthum occidentale* (Buckley) Veldkamp; *Hierochloa macrophylla* Thurb. ex Boland.; *Savastana macrophylla* (Thurb. ex Bol.) Beal; *Torresia macrophylla* (Thurb. ex Bol.) Hitchc.)

North America, U.S. Perennial bunchgrass with white flowers, scented, bisexual floret equalling or exceeding the glume apices, both staminate lemmas mostly glabrous sometimes scabrous distally, grows in shady conditions with average to low water, see *Proceedings of the Academy of Natural Sciences of Philadelphia* 14: 100. 1862, *Calif. Agric. Soc. Trans.* 1864-65: 132. 1866, *Grasses of North America for Farmers and Students* 2: 187. 1896 and *American Journal of Botany* 2: 300. 1915, *Blumea* 30(2): 348. 1985, *Harvard Papers in Botany* 1(9): 66. 1996.

in English: California sweet grass, California vanilla grass, Western sweetgrass

H. odorata (L.) P. Beauv. (*Anthoxanthum nitens* (Weber) Y. Schouten & Veldkamp; *Avena odorata* (L.) Koeler; *Dimesia fragrans* Raf.; *Hierochloa arctica* J. Presl; *Hierochloa borealis* (Schrad.) Wahlenb.; *Hierochloa odorata* f. *eamesii* Fernald; *Hierochloa odorata* subsp. *dahurica* (Trin.) Printz; *Hierochloa odorata* var. *fragrans*

(Willd.) K. Richter; *Holcus borealis* Schrad.; *Holcus fragrans* Willd.; *Holcus odoratus* L.; *Savastana nashii* E.P. Bicknell; *Savastana odorata* (L.) Scribn.; *Savastana odorata* var. *fragrans* (Willd.) Farw.; *Torresia nashii* (E.P. Bicknell) House; *Torresia odorata* (L.) A.S. Hitchc.)

Circumboreal, North. temperate, Asia, Europe. Perennial and extremely rare grass, extremely long lived, erect, glabrous, herbaceous, aromatic with a strong scent of coumarin or vanilla, long leaves develop from separate sterile basal off-shoots, rhizomatous with an extensive root systems, rhizomes slender and creeping, rhizomes and roots form a dense mat, culms arise from among dead foliage of the preceding year, auricles absent, leaf blade flat, sheaths glabrous or puberulent, ligule membranous, inflorescence an open pyramidal panicle with slender branches spreading to ascending, spikelets 3-flowered, the lower 2 florets staminate, the terminal 1 perfect-flowered and exceeded by the glume apices, glumes subequal, lemmas awnless, largely infertile, rarely produces seed, probably no truly wild sweetgrass populations in the world, cultivated and selected for the length of the leaves, very hardy, spreads rapidly and vigorously, produces very little forage, may be useful for soil stabilization, used to scent clothes, long leaves of sterile shoots are used by Native Americans to make baskets which retain the vanilla-like scent for many years, leaves are dried and made into braids and burned as incense in New Mexico, the peoples of both Europe and North America considered this plant sacred, used in peace and healing rituals, strewn before church doors on saints' days in northern Europe, tea was used for coughs and sore throats, dried leaves can be smoked, usually occurs in wetlands, forest openings, moist meadows on river shore, sandy soils, bogs, under moist conditions in meadow habitats, seeps, low prairies, riparian habitats, shores, stream banks, marshes and salt marshes, occasionally found in nonwetlands, see *Species Plantarum* 2: 1048. 1753, *Descriptio Graminum in Gallia et Germania* 299. 1802, *Flora Germanica* 1: 252. 1806, *Species Plantarum. Editio quarta* 4(2): 936. 1806, *Essai d'une Nouvelle Agrostographie* 62, 164, t. 12, f. 5. 1812, *Systema Vegetabilium* 2: 513-514. 1817, *American Monthly Magazine and Critical Review* 1: 442. 1817, *Flora Upsaliensis* 8: 32. 1820, *Reliquiae Haenkeanae* 1(4-5): 252. 1830, *Plantae Europaeae* 1: 31. 1890, *Memoirs of the Torrey Botanical Club* 5(3): 34. 1894, *Bulletin of the Torrey Botanical Club* 25(2): 104, pl. 328. 1898 and *American Midland Naturalist* 3: 198. 1914, *American Journal of Botany* 2: 301. 1915, *Rhodora* 19: 152. 1917, *Report of the Michigan Academy of Science, Arts and Letters* 21: 350. 1920, *New York State Museum Bulletin* 243-244: 58. 1923, K.J. Norstog, "Some observations on the spikelet of *Hierochloë odorata*." in *Bull. Torrey Bot. Club*. 87: 95-98. 1960, *Blumea* 30(2): 348. 1985.

in English: holy grass, vanilla grass, vanilla sweet grass, sweet grass, common sweet grass, manna grass, buffalo grass, Seneca grass, Zebrovka, Mary's grass

in Finnish: Lännenmaarianheinä, Hyvähajuinen maarianheinä

in Swedish: myskgräs, Ängsmyskgräs

in Japan: kobo

H. pauciflora R. Br. (*Anthoxanthum arcticum* Veldkamp; *Hierochloe pauciflora* f. *setigera* E. Lepage; *Savastana pauciflora* (R. Br.) Scribn. & Merr.)

North America, Canada. Single, tiny, noncaespitose, unbranched, rhizomatous, erect, delicate, glabrous, ligule membranous, sheaths glabrous, flag leaf sheaths inflated, purplish and white inflorescences, panicles spike-like with 1-2 spikelets per branch, spikelets 3-flowered, terminal spikelet hermaphrodite, purple anthers, white stigmas, growing in wet meadows, on fluvial deltas and lowlands, on seepage slopes, disturbed areas, around the margins of ponds, marshes, on wet peaty soils, see *Chloris Melvilliana* 35. 1823 and *Blumea* 30(2): 349. 1985.

in English: Arctic sweet grass

H. pluriflora Koidzumi (*Anthoxanthum pluriflorum* (Koidz.) Veldkamp)

Japan. See *Bulletin de l'Herbier Boissier* 7(9): 646. 1899 and *Botanical Magazine* 31: 136. 1917, *Blumea* 30(2): 349. 1985, *Grasses of Japan and its Neighboring Regions* 510. 1987.

in Japan: ezokobo

H. rariflora Hook.f. (*Anthoxanthum rariflorum* (Hook.f.) Veldkamp)

Tasmania, New South Wales, Victoria, Queensland. Perennial, aromatic, wiry, slender or robust, caespitose, erect or geniculate, often scrambling, much branched above, shortly rhizomatous, membranous ligule short and truncate, leaf sheath smooth and not keeled, no auricles, open panicle green to purple, chasmogamous spikelets, vestigial foliar structure subtending the inflorescence often present or absent, glumes green and purplish and unequal, lower 2 lemmas male and usually unawned, palea clasped by the lemmas, ovary glabrous, shade species, fodder, rare species associated with toxic effects, usually occurs in shaded and rocky habitats, on rocky slopes and hillsides, see *Flora Antarctica* 1: 93. 1845 and *Blumea* 30(2): 349. 1985.

in English: scented holy grass, cane holy grass

H. recurvata (Hack.) Zotov (*Hierochloe fraseri* var. *recurvata* Hack.)

New Zealand. Alpine, loosely tufted, usually more or less rhizomatous, leaf sheath glabrous, lax and spreading inflorescence with slender branches, awn of upper male floret with twisting column, bisexual floret with stout subapical awn, see *Systema Vegetabilium* 2: 515. 1817, *Flora Antarctica* 1: 93. 1845 and *Manual of the New Zealand Flora* 856. 1906, *Transactions and Proceedings of the Royal Society*

of New Zealand 73: 235. 1943, *New Zealand Journal of Botany* 11(3): 566. 1973.

H. redolens (M. Vahl) Roemer & Schultes (*Anthoxanthum redolens* (Vahl) P. Royen; *Anthoxanthum redolens* (Vahl) P. Royen var. *redolens*; *Avena redolens* (Vahl) Pers.; *Disarrenum antarcticum* Labill.; *Hierochloe antarctica* var. *redolens* (Vahl) Brongn.; *Hierochloe arenaria* Steud.; *Hierochloe banksiana* Endl.; *Hierochloe magellanica* (Desr.) Hook.f.; *Hierochloe magellanica* Hook.f. ex Steud.; *Hierochloe magellanica* Hook.f.; *Hierochloe moorei* De Paula; *Hierochloe redolens* R. Br. ex Hook.f., nom. illeg., non *Hierochloe redolens* (Vahl) Roem. & Schult.; *Hierochloe redolens* G. Forst. ex R. Br.; *Hierochloe redolens* var. *magellanica* (Hook.f.) Macloskie; *Hierochloe redolens* (Vahl) Roem. & Schult. var. *redolens*; *Hierochloe redolens* var. *typica* Parodi; *Hierochloe sorianoi* De Paula; *Holcus redolens* Vahl; *Melica magellanica* Desr.; *Savastana antarctica* (Labill.) Speg.; *Torresia antarctica* (Labill.) P. Beauv.; *Torresia magellanica* (Desr.) P. Beauv.; *Torresia redolens* (Vahl) Roem. & Schult.)

Australia, New Guinea, New Zealand, South America. Perennial bunchgrass, unbranched, erect, robust, loosely tufted, rhizomatous with a shortly creeping rhizome, no auricles, leaf sheath purple and not keeled, ligule obtuse and firmly membranous to chartaceous, leaves and culms stiffly erect, foliage aromatic with sweet coumarin odor, panicle exserted and open to nodding above, vestigial foliar structure subtending the inflorescence often present or absent, spikelets 3-flowered, glumes unequal, male or sterile lower lemmas with a dorsal awn, awn of upper sterile floret straight, ovary glabrous, fruit compressed, fodder, medium drought tolerance, high wind and frost tolerance, with the squeezed leaves of *Pittosporum eugenioides* A. Cunn. a remedy for "whitemouth" in Maori babies, the pathogen *Uredo karetu* G. Cunn. associated with *Hierochloe redolens* in New Zealand, pioneer species, usually grows in damp situations, wood's edge, páramos, stream banks, cliff bases, wetlands, seepages and swamps, tussock grassland, in swampy ground, see *Symbolae Botanicae, ...* 2: 101, 102. 1791, *Encyclopédie Méthodique, Botanique* 4: 72. 1797, *Syn. Pl.* 1: 100. 1805, *Novae Hollandiae Plantarum Specimen* 2: 83, f. 232. 1807, *Prodromus Florae Novae Hollandiae* 1: 209-210. 1810, *Essai d'une Nouvelle Agrostographie* 63, 160, 164, 179. 1812, *Systema Vegetabilium* 2: 514, 516. 1817, *Ann. Sci. Obs.* 1: 83. 1829, *Voyage autour du Monde* 144, t. 23. 1829, *Annalen des Wiener Museums der Naturgeschichte* 1: 156. 1836, *Flora Antarctica* 1: 91-92. 1844, *Flora Antarctica* 2: 375. 1846, *Synopsis Plantarum Glumacearum* 1: 14. 1853, *Synopsis Plantarum Glumacearum* 1: 416. 1854, *Anales Museo Nacional de Historia Natural de Buenos Aires* 5: 81. 1896 and *Anales Museo Nacional de Historia Natural de Buenos Aires* 7: 184. 1902, *Reports of the Princeton University Expeditions to Patagonia ... Botany* 5(1): 167. 1904, *Revista del Museo*

de La Plata (Nueva Serie), Sección Botánica 3: 189, 195, f. 1-3. 1941, *New Zealand J. Bot.* 11: 574. 1973, *Boletín de la Sociedad Argentina de Botánica* 15: 393, 396. 1974, *Darwiniana* 19: 422-457. 1975, *Flora Patagónica* 3: 276-285. 1978, *The Alpine Flora of New Guinea* 2: 1185, f. 382. 1979 [1980], *Blumea* 30: 341. 1985, *Ruizia* 13: 165. 1993, *Allertonia* 7: 345. 1998.

in English: sweet holy grass, holy grass, sweet scented grass
in Colombia: étamo real

Maori name: karetu

H. submutica F. Muell. (*Anthoxanthum submuticum* (F. Muell.) Veldkamp)

Australia, New South Wales, Victoria. Perennial, rare, loosely tufted, unbranched, aromatic, rhizomatous, no auricles, leaf sheaths not keeled, ligule membranous and acute, blade flat, a contracted panicle erect to nodding, vestigial foliar structure subtending the inflorescence often present, spikelets 3-flowered, glumes hyaline and subequal, male or sterile lower lemmas usually awnless, ovary glabrous, fruit compressed, alpine, at high altitudes in moist sites, see *Transactions and Proceedings of the Victorian Institute for the Advancement of Science* 1855: 48. 1855 and *Blumea* 30(2): 349. 1985.

in English: alpine holy grass

Hilaria Kunth = *Hexarrhena* Presl,
Pleuraphis Torrey, *Schleropelta* Buckley,
Symbasiandra Steud.

Dedicated to the French botanist Auguste (Augustin) François César Prouvençal de Saint-Hilaire, 1779-1853 (Loiret, France), plant collector, explorer, entomologist, naturalist, traveler (Brazil and Uruguay), his writings include *Voyage dans le district des diamans et sur le littoral du Brésil*. Paris 1833 and *Flora Brasiliae Meridionalis*. [Written with A. de Jussieu and J. Cambessèdes] Parisiiis 1824[-1833]. See Francisco Guerra, in *D.S.B.* 12: 72. 1981; J.H. Barnhart, *Biographical notes upon botanists*. 3: 200. 1965; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 345. 1972; A. Lasègue, *Musée botanique de Benjamin Delessert*. Paris 1845; S. Lenley et al., *Catalog of the manuscript and archival collections and index to the correspondence of John Torrey*. Library of the New York Botanical Garden. 358. Boston, Mass. 1973; Ethelyn Maria Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933; Stafleu and Cowan, *Taxonomic literature*. Second edition. 4: 1064-1071. Utrecht 1983.

About 9-10 species, southwest U.S., Mexico, Venezuela, Guatemala. Chloridoideae, Cynodonteae, or Chloridoideae, Cynodonteae, Hilarinae, perennial, herbaceous, caespitose,

rhizomatous or stoloniferous, branched or not, auricles present or absent, ligule a fringed membrane to a fringe of hairs, plants bisexual, inflorescence spike-like, deciduous racemes appressed to a central axis, bisexual spikelets, triplets of dimorphous spikelets, 2 spikelets staminate and 1 hermaphrodite, lateral spikelets sessile and dorsally compressed, central spikelet subsessile laterally compressed and hidden by the laterals, 2 glumes more or less equal, large involucrel glumes variable, upper glume 5- to 7-nerved, lemma bilobed, palea present, lodicules absent or present, 3 stamens, ovary glabrous, 2 stigmas reddish, native pasture species, species of open habitats, dry plains, arid and semi-arid areas, type *Hilaria cenchroides* Kunth, see *Nova Genera et Species Plantarum* 1: 116-118, pl. 37. 1815 [1816], *Annals of the Lyceum of Natural History of New York* 1: 148-150, t. 10. 1824, *Reliquiae Haenkeanae* 1(4-5): 326, t. 14. 1830, *Nomenclator Botanicus. in Spanish: espiga negra, toboso menudo, zacate grama

in Mexico: espiga negra, grama, guishi, toboso, zacate galleta, zacate grama

H. ciliata (Scribner) Nash (*Hilaria cenchroides* var. *ciliata* Scribn.; *Hilaria ciliata* (Scribn.) Sohns, nom. illeg., non *Hilaria ciliata* (Scribn.) Nash)

Mexico. Perennial, caespitose, stoloniferous, decumbent, forage, along roadsides, see *Proceedings of the Academy of Natural Sciences of Philadelphia* 43(2): 293-294, t. 13, f. 2, 2a. 1891 and *North American Flora* 17(2): 136. 1912, *Journal of the Washington Academy of Sciences* 46: 317. 1956, *Taxon* 33: 126-134. 1984.

in Mexico: tempranero anual

H. hintonii Sohns (dedicated to the English (b. London) George Boole Hinton, 1882-1943 (d. Mexico), plant collector in Mexico (1931-1941), botanist; see Charles Glass, "The *Geohintonia* circus." in *Cactus and Succulent Journal*. vol. 69. 1: 3-7. 1997; Gordon Douglas Rowley, *A History of Succulent Plants*. Strawberry Press, Mill Valley, California 1997; Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 344. London 1994; Irving William Knobloch, compil., "A preliminary verified list of plant collectors in Mexico." *Phytologia Memoirs*. VI. [b. 1883] 1983; J. Hinton and J. Rzedowski, "George B. Hinton, collector of plants in southwestern Mexico." *J. Arnold Arb.* 53: 141-181. 1972; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. University of Pennsylvania Press, Philadelphia 1964)

Mexico. See *Journal of the Washington Academy of Sciences* 46(10): 319, f. 30-34. 1956.

H. jamesii (Torr.) Benth. (*Hilaria sericea* Benth.; *Pleuraphis jamesii* Torr.; *Pleuraphis sericea* Nutt. ex Benth.)

U.S., Texas, New Mexico. See *Annals of the Lyceum of Natural History of New York* 1(1): 148-150, t. 10. 1824, *Journal of the Linnean Society, Botany* 19: 62. 1881.

H. mutica (Buckley) Benth. (*Pleuraphis mutica* Buckley)

U.S., Mexico. Perennial, decumbent at base, stoloniferous, lower nodes pubescent, upper nodes glabrous, leaf blades flat or involute, a good forage, alluvial plains, see *Proceedings of the Academy of Natural Sciences of Philadelphia* 14: 95. 1862, *Journal of the Linnean Society, Botany* 19: 62. 1881.

in English: tobosa grass

in Mexico: toboso, toboso común, zacate toboso

H. semplei Sohns (for A.T. Semple, botanical collector)

Mexico. Forage, heavy soil, see *Journal of the Washington Academy of Sciences* 46(10): 319, f. 36-50. 1956.

H. swallenii Cory (for the American botanist Jason Richard Swallen, 1903-1991)

Mexico, U.S. Perennial, forage, see *Wrightia* 1: 215. 1948, *Taxon* 33: 126-134. 1984.

in English: Swallen's curly-mesquite

in Mexico: toboso esbelto

Himalayacalamus Keng f. = *Drepanostachyum* Keng f., *Thamnocalamus* Munro

Kalamos "a reed, cane" from Himalaya.

About 7-9 species, China, Himalaya, subtropical to temperate. Poaceae, Bambusoideae, Bambuseae, Thamnocalaminae, or Bambusoideae, Bambuseae, Arundinariinae, densely caespitose, forming dense clumps, unicaespitose, erect below, rhizomes pachymorph, very short sympodial rhizomes, culm internodes hollow, culm-sheaths deciduous, leaf-sheath without auricles, ligule pubescent, leaf-blades lacking cross-veins, flowering semelautant, inflorescence a large racemose panicle, spikelets usually with 1 fertile floret, 2 glumes strongly nerved, 3 stamens, 3 stigmas, sometimes included in *Thamnocalamus* Munro, used for weaving, type *Himalayacalamus falconeri* (Hook.f. ex Munro) Keng f., see *Flora Boreali-Americana* 1: 73. 1803, *Transactions of the Linnean Society of London* 26(1): 33-34, 157. 1868, *Gen. Pl.* 3(2): 1208. 1883, *Die natürlichen Pflanzenfamilien, Zweite Auflage* 2: 93. 1887 and *Journal of Bamboo Research* 2(1): 15-16, 23-24. 1983, *Kew Bulletin, Additional Series* 13: 43. 1986, *Kew Bulletin* 44(2): 349-367. 1989, *Edinburgh J. Bot.* 51: 308. 1994, Z.-L. Li, The *Flora of China* Bambusoideae project, problems and current understanding of bamboo taxonomy in China. The *Bamboos* 5: 61-81. 1997, *Flora of New Zealand* 5: 24-25. 2000, *Contributions from the United States National Herbarium* 39: 62-63, 115-116. 2000.

Species

H. asper Stapleton (*Drepanostachyum asper* (Stapleton) Demoly)

Nepal. See *Edinburgh Journal of Botany* 51(3): 310-312, f. 2. 1994, *Bambou*, Association Européenne du Bambou, EBS Section France 29: 13. 1998.

H. brevinodus Stapleton

Nepal. See *Edinburgh Journal of Botany* 51(3): 312-314, f. 3. 1994.

H. collaris (Yi) Ohmb.

China.

H. cupreus Stapleton

Nepal. See *Edinburgh Journal of Botany* 51(3): 314, f. 4. 1994.

H. falconeri (Hook.f. ex Munro) Keng f. (*Arundinaria falconeri* (Hook.f. ex Munro) Benth. & Hook. ex Gamble; *Arundinaria falconeri* (Hook.f. ex Munro) Benth. & Hook.f. ex Duthie; *Arundinaria falconeri* (Hook.f. ex Munro) Benth. & Hook.f.; *Arundinaria falconeri* (Hook.f. ex Munro) Duthie; *Arundinaria nobilis* Mitf.; *Drepanostachyum falconeri* (Hook.f. ex Munro) J.J.N. Campb. ex D.C. McClint.; *Fargesia collaris* Yi; *Fargesia gyirongensis* Yi; *Himalayacalamus falconeri* (Munro) Keng f.; *Thamnocalamus falconeri* Munro; *Thamnocalamus falconeri* Hook.f. ex Munro) (named for the Scottish (d. Forres, Morayshire) botanist Hugh Falconer, 1808-1865 (London), physician, M.D. Edinburgh 1829, plant collector, 1830-1855 in India, 1832 Superintendent of the Serampore [Saharanpur] Botanical Garden, 1844 Fellow of the Linnean Society, 1845 Fellow of the Royal Society, 1848 Superintendent of the Calcutta Botanic Gardens. See J.H. Barnhart, *Biographical notes upon botanists*. 1: 525. 1965; John Chalinor, in *D.S.B.* 4: 518-519. 1981)

India, Bhutan, Sikkim, Nepal. Erect and arching, slender, shrubby, fistular, thick walls, clump-forming, glaucous and greenish, many branches at each node, rhizomes not running, internodes red and smooth, culm sheaths glabrous, leaf sheaths glabrous, auricles absent, large and loose panicle, inflorescence often purplish, 2 glumes, 3 lodicules ciliate on the margins, stamens exerted, ovary glabrous, 3 stigmas long-plumose, cultivated as an ornamental, plant dies after flowering and seeding, new culms with white wax, edible shoots, culms for weaving and mats, basketry, making furniture, animal fodder, on steep mountain slopes, moist ravines, on banks of water courses, see *Transactions of the Linnean Society of London* 26(1): 34. 1868, *The Fodder Grasses of Northern India* 46. 1883, *Genera Plantarum* 3: 1208. 1883, *Annals of the Royal Botanic Garden, Calcutta* 7: 20. 1896 and *Journal of Bamboo Research* 2(1): 24. 1983, *Kew Bulletin* 44: 363. 1989, *Cell and Chromosome Research* 15(3): 12. 1992 [alt. *Bamboo Soc. Newsletter* 15: 12. 1992], *Edinburgh J. Bot.* 51: 308, 314, 316. 1994. in English: fountain bamboo, fairy bamboo

Local name: singhane

in India: bodputra, chye, deo ringal, dev ringal, kag, nigal, pas mung, phusre nagalo, ringal

H. fimbriatus Stapleton

Nepal. See *Edinburgh Journal of Botany* 51(3): 316-318, f. 5. 1994.

H. gyirongensis (Yi) Ohrnb.

China.

H. hookerianus (Munro) Stapleton (*Arundinaria hookeriana* Munro; *Chimonobambusa hookeriana* (Munro) Nakai;

Drepanostachyum hookerianum (Munro) Keng f.; *Sinarundinaria hookeriana* (Munro) C.S. Chao & Renvoize)

India, Sikkim, Darjeeling, Khasia, Bhutan, Nepal, east Himalayas. Caespitose, internodes smooth, nodes prominently ringed, culm sheaths glabrous, leaf sheaths glabrous, auricles absent, new culms with blue wax, 1-2 spikelets, wild and cultivated, animal fodder, seeds boiled and eaten like rice or made into beer, culms used for weaving, see *Transactions of the Linnean Society of London* 26(1): 29. 1868 and *Journal of the Arnold Arboretum* 6(3): 151. 1925, *Journal of Bamboo Research* 2(1): 17. 1983, *Kew Bulletin* 44(2): 358. 1989, *Bamboo Society Newsletter* 17: 21. 1993, *Edinburgh Journal of Botany* 51(3): 318. 1994.

Local names: padang, parang

H. porcatus Stapleton (*Drepanostachyum porcatum* (Stapleton) Demoly)

Nepal. Used for weaving, see *Edinburgh Journal of Botany* 51(3): 318-320, f. 6. 1994, *Bambou*, Association Européenne du Bambou, EBS Section France 29: 13. 1998.

Hippagrostis Kuntze = *Oplismenus* P. Beauv.

From the Greek *hippos* "horse" and *agrostis* "grass, weed, couch grass," forage for horses.

Panicoideae, Paniceae, Panicinae, type *Panicum burmannii* Retz., see *Observationes Botanicae* 3: 10. 1783, *Flore d'Oware* 2: 14, 15, t. 68, f. 1. 1807 [1810], *Revisio Generum Plantarum* 2: 776. 1891 and *Contr. U.S. Natl. Herb.* 22(3): 123. 1920, *Contributions from the United States National Herbarium* 46: 250, 299-303. 2003.

Hitchcockella A. Camus

After the American botanist Albert Spear Hitchcock (né Jennings), 1865-1935 (d. on board the S.S. *City of Norfolk*), agrostologist, explorer and plant explorer, plant collector, promoter of scientific researches, among his numerous and valuable writings are *A Text-book of Grasses*. New York 1914, *The Genera of Grasses of the United States*. Washington [D.C.] 1920, "New species of *Aulacolepis* and other grasses." in *Jour. Wash. Acad. Sci.* 24: 7. 1934, *The Grasses of Hawaii*. Honolulu 1922, "The grasses of Ecuador, Perú, and Bolivia." *Contr. U.S. Natl. Herb.* 24(8): i-v, 291-556, vii-xx. 1927 and *The Grasses of Central America*. Washington [D.C.] 1930, with Paul Carpenter Standley (1884-1963) wrote *Flora of the District of Columbia and Vicinity*. Washington [D.C.] 1919, with Mary Agnes Chase (née Merrill, 1869-1963) wrote *Grasses of the West Indies*. Washington [D.C.] 1917. See J.H. Barnhart, *Biographical notes upon botanists*. 2: 182. 1965; J. Ewan, editor, *A Short History of Botany in the United States*. 14, 20. New York and London 1969; S. Lenley et al., *Catalog of the manuscript and archival collections and index to the correspondence*

of John Torrey. Library of the New York Botanical Garden. 224. 1973; Elmer Drew Merrill, "A botanical bibliography of the islands of the Pacific." *Contr. U.S. Natl. Herb.* 30(1): 151-152. 1947; Ignatz Urban, editor, *Symbolae Antillanae*. 1: 70-71. 1898, 3: 61. 1902; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 177. 1972; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. Philadelphia 1964; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993; Ethelyn Maria Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933; Joseph Ewan, *Rocky Mountain Naturalists*. The University of Denver Press 1950.

One species, Madagascar. Bambusoideae, Bambusoideae, Bambuseae, Hickeliinae, perennial, slender, persistent, shrubby, woody, leafy, branched, plants bisexual, inflorescence racemose of 1-3 spikelets, involucre leaf blades protecting the inflorescence, spikelets 1-flowered, 2-4 or several glumes, upper glume lemma-like, lemma keeled and compressed, palea present, stamens 6, ovary glabrous, 2 stigmas, type *Hitchcockella baronii* A. Camus, see *Comptes Rendus Hebdomadaires des Séances de l'Académie des Sciences* 181: 253-255. 1925.

Species

H. baronii A. Camus (for the English (b. Westmorland) missionary Rev. Richard Baron, 1847-1907 (d. Lancs), botanist, plant collector in Madagascar, 1882 Fellow of the Linnean Society; see Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 47. London 1994)

Madagascar. See *Comptes Rendus Hebdomadaires des Séances de l'Académie des Sciences* 181: 253. 1925.

Holboellia Hook. = *Holboellia* Wall.
(Lardizabalaceae), *Lopholepis* Decne.

For the Danish botanist Fredrik Ludvig Holbøll, 1765-1829; see Georg Christian Wittstein (1810-1887), *Etymologisch-botanisches Handwörterbuch*. 447. Ansbach 1852; F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 114. 1989.

Cynodonteae, type *Holboellia ornithocephala* Hook., see *Tentamen Florae Napalensis Illustratae* 23. Calcutta and Serampore 1824-1826, *Botanical Miscellany* 2: 144. 1831, *Archives du Muséum d'Histoire Naturelle* 1: 147. 1839.

Holcolemma Stapf & C.E. Hubb.

From the Greek *holkos* "a strap, a furrow, a kind of grain" and *lemma* "skin, bark, scale, a sheath."

Four species, Asia and Africa, southern India, Sri Lanka, East Africa, Australia, Queensland. Panicoideae, Panicodae, Paniceae, annual or perennial, weak, slender, herbaceous, geniculately ascending, caespitose to loosely caespitose, knotty rootstock, leaf blades hirsute or hispid, sheaths rounded on the back, ligule a short fringed membrane, leaves flat, auricles absent, plants bisexual, inflorescence a panicle contracted and spicate, spikelets often clustered, the terminal spikelet of each branch subtended by an inconspicuous bristle, spikelets compressed laterally and awnless, upper floret perfect, lower floret male or barren, 2 glumes shorter than spikelet, lower glume 3- to 9-nerved, upper glume 3-5-13-nerved, lemma herbaceous, lower lemma sulcate, upper lemma gibbous and rugose, palea with enlarged keels, free and fleshy lodicules, 3 stamens, ovary glabrous, 2 stigmas, in dry areas, shade species, open habitats, coastal, grassland, weedy places, resembling *Paspalidium*, type *Holcolemma canaliculatum* (Nees ex Steud.) Stapf & C.E. Hubb., see *Bulletin of Miscellaneous Information Kew* 1929: 244. 1929, *Kew Bulletin* 32(4): 773-774. 1978, *Flora of Tropical East Africa* 451-898. 1982.

Species

H. canaliculatum (Nees ex Steud.) Stapf & C.E. Hubb. (*Aira interrupta* Rottler ex Steud.; *Hemigymnia canaliculata* (Nees ex Steud.) Alston; *Panicum canaliculatum* Nees ex Steud.; *Panicum canaliculatum* Nees; *Panicum myurum* Wight ex Steud.; *Panicum stenostachyum* Thwaites)

Southern India, Sri Lanka. Perennial, tufted, slender, decumbent, stoloniferous, sheaths usually villous to hispid, ligule a ciliate membrane, small clusters of spikelets, 2 glumes more or less subequal, see *Cat. Indian Pl.* 95, no. 1624. 1833, *Synopsis Plantarum Glumacearum* 1: 55. 1854, *Enum. Pl. Zeyl.* 436. 1864 and *Bulletin of Miscellaneous Information Kew* 1929: 246. 1929, *Handb. Fl. Ceylon* 6: 324. 1931, *Grasses of Ceylon* 123. 1956, *Grasses of Burma* ... 313. 1960.

H. dispar W.D. Clayton (*Panicum inaequale* F. Muell.; *Paspalidium inaequale* (F. Muell.) Hughes; *Setaria inaequalis* (F. Muell.) R.D. Webster)

Africa, Australia. Inflorescence spreading and raceme-like, upper glume papery, see *Fragmenta Phytographiae Australiae* 8: 189. 1874 and *Bulletin of Miscellaneous Information Kew* 1923(9): 317. 1923, *Kew Bulletin* 42(2): 401-403. 1987, *Sida* 16(3): 443. 1995.

H. inaequale Clayton

Tanzania, Kenya. Perennial, slender, loosely tufted, knotty rootstock, leaves linear, panicle with short appressed branches, spikelets lanceolate, glumes obtuse, lower floret male, upper lemma rugose and shorter than the lower, degraded areas, bushland, grassland, coastal, see *Fragmenta Phytographiae Australiae* 8: 189. 1874 and *Bulletin of*

Miscellaneous Information Kew 1923(9): 317. 1923, *Kew Bulletin* 32(4): 773. 1978, *Sida* 16(3): 443. 1995.

H. transiens (K. Schum.) Stapf & C.E. Hubb. (*Setaria transiens* K. Schum.)

Tanzania. See *Die Pflanzenwelt Ost-Afrikas* 5C: 105. 1895 and *Bulletin of Miscellaneous Information Kew* 1929: 246. 1929.

Holcus L. = *Arthrochloa* R. Br., *Ginannia* Bubani, *Ginannia* Scop. (Fabaceae, alt. Leguminosae), *Homalachna* (Benth. & Hook.) Engl. & Prantl, *Homalachna* Kuntze, *Homalachne* Kuntze, *Homalachne* (Benth. & Hook.) Kuntze, *Homalachne* (Benth. & Hook.) Engl. & Prantl, *Nothololcus* Nash, *Nothololcus* Hitchc., *Nothololcus* Nash ex Hitchc., *Sorghum* Adans., *Sorghum* Adans.

From the Latin *holcus*, i “a barley, a mouse-barley, *Hordeum murinum* Linn.” (Plinius); *holkos*, a Greek name for “a kind of grain or a species of grass or cereal,” perhaps *Sorghum*; see Carl Linnaeus, *Species Plantarum*. 1047. 1753 and *Genera Plantarum*. Edition 5. 469. 1754.

Some 6-9 species, temperate Eurasia, Europe to Asia Minor and Caucasus, Mediterranean to Middle East, North Africa, Canary Islands. Pooideae, Poodae, Aveneae, or Pooideae, Poeae, Holcinae, perennial or rarely annual, herbaceous, tufted, leafy with soft velvety foliage, long-rhizomatous to stoloniferous, caespitose, stems erect and flimsy, unbranched, hollow internodes, auricles absent, sheaths open, ligule more or less entire and membranous, leaf blades erect linear to linear-lanceolate, plants bisexual, inflorescence a compound panicle erect or nodding, solitary spikelets stalked and laterally flattened, lower floret perfect and awnless, upper floret staminate with awned lemma, dorsal awn geniculate or hooked or straight, 2 glumes equal to subequal and keeled, lower glume 1-nerved, upper glume 3-nerved, shiny and obtuse lemmas, lower lemma awnless, callus very short, membranous palea narrow and 2-keeled, 2 lodicules free and membranous, 3 stamens, ovary apex glabrous, styles free, 2 stigmas, these ornamental grasses can be increased by lifting and dividing them, weed species, cultivated fodder, invasive and nuisance, shade species or of open habitats, occur around ditches, springs, wet meadows, grasslands, open woodland, disturbed ground, often in *Sorghum* Moench, intergrading with *Deschampsia* P. Beauv., type *Holcus lanatus* L., see *Species Plantarum* 2: 1047-1048. 1753, *Familles des Plantes* 2: 38, 606. 1763, *Introductio ad Historiam Naturalem* 300. Pragae [Praha] 1777, *Chloris Melvillianae: A List of Plants Collected in Melville Island ...* 35. London 1823, *Genera Plantarum* 3(2): 1159. 1883 and *Flora Pyrenaea ...* 4: 321. Milano

1901-1902, *Lexicon Generum Phanerogamarum* 285. 1903, *Die Natürlichen Pflanzenfamilien* 3: 13. 1906, *A Flora of California* 1: 126. 1912, *An Illustrated Flora of the Northern United States* 1: 109, 214. 1913, *New Phytol.* 61: 72-84. 1962, *Botanical Journal of the Linnean Society* 64: 183-198. 1971, *Proceedings of the Koninklijke Nederlandse Akademie van Wetenschappen, Series C: Biological and Medical Sciences* 85: 413-437. 1982, *Kew Bulletin* 40(4): 727-729. 1984 [1985], *Flora Mesoamericana* 6: 235. 1994, *Journal of Ecology* 86(4): 588-596. Thunb.; *Ginannia lanata* (L.) F.T. Hubb.; *Ginannia pubescens* Bubani; *Holcus argenteus* C. Agardh ex Roem. & Schult.; *Holcus glaucus* Willk.; *Holcus mollis* L.; *Notholcus lanatus* (L.) Nash; *Notholcus lanatus* (L.) Nash ex Hitchc.; *Notholcus* Nash ex Hitchc.)

Europe, Eurasia, North Africa, temperate areas. Perennial and usually tufted, adaptable, sea level to montane, sometimes subalpine, gray-green, medium size, fibrous-rooted, erect or geniculate, lacking rhizomes, sometimes stoloniferous, downy or tomentose or softly villous to velvety, stems erect and clustered, unbranched, joints glabrous, hairy ligule membranous and toothed or dentate, flat leaves acuminate and velvety, flowers arranged in a dense or sparse panicle ovoid-oblong, chasmogamous and crowded spikelets light green to pink-purple to violet, florets with a short hooked awn or awnless, glumes boat-shaped and downy, upper glume usually shortly awn-tipped, bisexual lemma acute and keeled, male lemma with a short dorsal awn, awn of upper lemma uncinat, palea hyaline and 2-keeled, anthers yellow, pasture grass, poor forage grass, low palatability to stock, velvety leaves generally avoided by stock, widespread temperate species, an ancestor of the polyploid complex represented by *Holcus mollis* L., a prolific seeder, moderately drought-tolerant, in some countries it is used as a pioneer grass in erodible areas, reported to produce hydrocyanic acid poisoning, a weed of fine turf, an aggressive weed and can become dominant if not controlled, cultivated fodder, sometimes grown for hay, ornamental and attractive in flower, frequently occurs on poor and moist soils, colonises destabilised pastures mostly in wetter areas, optimum on cool and humid soils, moist and fertile soils, meadows, river shores and roadsides, wet localities and damp sites, in white sandy soil, swamps, in disturbed sites, rocky slope, shady areas, low ground or ditches, sterile fields, old fields, see *Species Plantarum* 2: 1048. 1753, *Systema Naturae, Editio Decima* 2: 1305. 1759, *Histoire des Plantes de Dauphiné* 2: 87. 1787, *Prodromus stirpium in horto ad Chapel Allerton vigentium*. 24. in English: common velvet grass, velvet grass, Yorkshire fog, meadow softgrass, mesquite, tufted softgrass, creeping softgrass, soft meadow grass, woolly soft grass, soft grass
in Spanish: falsa poa

in South Africa: blinkgras, fluweelgras, witgras

H. mollis L. (*Aira holcus-mollis* Vill.; *Aira mollis* (L.) Schreb.; *Avena mollis* (L.) Koeler, nom. illeg., non *Coelachyrum indicum* Hack.; *Avena sylvatica* Salisb.; *Ginannia mollis* (L.) Bubani; *Ginannia mollis* (L.) H. St. John, nom. illeg., non *Ginannia mollis* (L.) Bubani; *Notholcus mollis* (L.) Hitchc.)

Temperate Eurasia. Perennial, sea level to montane, medium size, strongly rhizomatous with thin and creeping rhizomes, soft velvety foliage, stems erect or spreading often decumbent, joints downy or densely hairy to bearded, auricles absent, sheaths glabrous or hirsute, velvety ligule membranous and erose, grayish green leaves acute and flat, inflorescence reddish white to pink, loose or contracted panicles oblong to ovate, florets 2, lower floret perfect and upper staminate, spikelets falling entire, 2 glumes hairy and papery, upper glume awnless, bisexual lemma acute and keeled, male lemma with a slightly bent or straight awn but not hooked, palea slightly shorter than the lemmas, ovary glabrous, fruit glabrous, weed naturalized elsewhere, invasive, ornamental, fodder plant, useful for ground covering, frequent in dry grassy places, shady hedgebanks, on acid soils in open woodland, damp areas, damp pastures, lawns, wasteland, see *Systema Naturae, Editio Decima* 2: 1305. 1759, *Spicilegium Florae Lipsicae* 51. 1771, *Histoire des Plantes de Dauphiné* 2: 88. 1787, *Prodromus stirpium in horto ad Chapel Allerton vigentium* 24. 1796, *Descriptio Graminum in Gallia et Germania* 300. 1802 and *Flora Pyrenaea ...* 4: 321. 1901, *American Journal of Botany* 2: 304. 1915, *Proceedings of the Biological Society of Washington* 41(45): 192. 1928, *Grasses of Ceylon* 49. 1956, *Grasses of Burma ...* 443. 1960, *Lagascalia* 12: 124-128. 1983, *Boletim da Sociedade Broteriana, ser. 2* 63: 29-66. 1990, M.-M. Duckert-Henriod, *Flora Mediterranea* 1: 229-236. 1991, *Taxon* 49(2): 251. 2000.

in English: creeping fog, creeping softgrass, softgrass, German velvet grass, soft fog-grass, creeping soft rush

in French: houlque molle

H. mollis L. subsp. *mollis*

Europe. Stems not thickened and tuberous at the base, a purplish to brownish lax panicle, see *Boletim da Sociedade Broteriana*, ser. 2 63: 29-66. 1990.

in English: creeping fog, creeping softgrass, German velvet grass, soft fog-grass

H. mollis L. subsp. *reuteri* (Boiss.) Tutin (*Holcus mollis* subsp. *reuteri* (Boiss.) Malagarriga; *Holcus reuteri* Boiss.)

Europe, Spain. Perennial, stems thickened and tuberous at the base, inflorescence a whitish narrow panicle, see *Pugillus Plantarum Novarum Africae Borealis Hispaniaeque Australis* 119. Genève 1852 and *Las Subesp. y Variac. Geogr.* 28. 1973, *Botanical Journal of the Linnean Society* 76(4): 363. 1978.

H. setiger Nees

Europe. Annual, tufted or solitary, dark green, leaves mostly basal, auricles absent, basal leaf sheaths keeled, ligule membranous, a purplish panicle erect and contracted, inflorescence of chasmogamous and overlapping spikelets, upper floret sterile, hermaphrodite florets protandrous, upper glume narrowly elliptic or oblong, palea gaping and narrowly ovate, free lodicules, anthers yellow or purple, ovary glabrous, found in sandy soils, sandy loam, damp places, sheltered areas.

H. setiglumis Boiss. & Reut.

Europe. Glumes awned, sandy areas, hillsides, see *Diagnoses Plantarum Novarum Hispanicarum* 27. 1842 and *Anales del Jardín Botánico de Madrid* 45: 273. 1988.

H. setiglumis Boiss. & Reut. subsp. *duriensis* Pinto da Silva

Europe, Portugal, Spain. Indeterminate species.

Hologamium Nees = *Sehima* Forssk.

From the Greek *holos* "complete, all, entire" and *gameo* "to marry."

Panicoideae, Andropogoneae, Ischaeminae, type *Hologamium nervosum* (Rottler ex Roem. & Schult.) Nees, see *Flora Aegyptiaco-Arabica* 178. 1775, *Edinburgh New Philosophical Journal* 18: 185. 1835 and *Contributions from the United States National Herbarium* 46: 569. 2003.

Holosetum Steud. = *Alloteropsis* J. Presl

Greek *holos* "whole, all, entire" and Latin *saeta* (*seta*), *ae* "a bristle, hair."

Panicoideae, Panicoideae, Paniceae, Setariinae, or Panicoideae, Paniceae, Paspalinae, type *Holosetum philippicum* Steud., see *Reliquiae Haenkeanae* 1(4-5): 343-344, t. 47.

1830, *Synopsis Plantarum Glumacearum* 1: 118. 1854 [1855] and *Contributions from the United States National Herbarium* 12(6): 210. 1909, *Annali di Botanica* 13: 47. 1914, *Willdenowia* 4: 209, 21. 1966, *Flora of Tropical East Africa* 451-898. 1982, *Annals of the Missouri Botanical Garden* 75: 866-873. 1988, *Botanical Journal of the Linnean Society* 97: 255-259. 1988, *ASBS Symposium 1990: Indo-Pacific Biogeography*, 14. 1990, *Contributions from the United States National Herbarium* 46: 16. 2003.

Holttumochloa K.M. Wong

After the British botanist Richard Eric Holttum, 1895-1990 (d. London), a specialist on ferns, professor of botany, bambusologist, traveler and botanical explorer (Malay Peninsula), 1927 a Fellow of the Linnean Society; see J.H. Barnhart, *Biographical notes upon botanists*. 2: 197. 1965; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 180. 1972; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. Philadelphia 1964; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993; Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 351. London 1994.

Three species, Peninsular Malaysia. Bambuseae, Bambusiinae, rhizomes sympodial, culms erect to suberect, slender, never climbing, 1 to several pseudospikelets developing in clusters, 1-3 small empty bracts, 1-2 empty glumes, 1-2 bracts subtending prophyllate buds, 2-5 perfect flowers and a terminal vestigial flower, lodicules 3, 6 stamens, 3 stigmas plumose, upper montane forests, hill forest, type *Holttumochloa magica* (Ridl.) K.M. Wong, see *Kew Bulletin* 48(3): 518, 520, f. 1-2. 1993.

Species***H. korbuensis*** K.M. Wong (Gunung Korbu, Perak)

Peninsular Malaysia, Perak. See *Kew Bulletin* 48(3): 520, f. 3. 1993.

H. magica (Ridley) K.M. Wong (*Bambusa elegans* Ridl.; *Bambusa magica* Ridl.)

Peninsular Malaysia. Elegant, ornamental, densely clumped, ascribed with magical properties, see *Journal of the Straits Branch of the Royal Asiatic Society* 44: 208-209. 1905, *Gard. Bull. Sing.* 16: 75. 1958, *Kew Bulletin* 48(3): 520, f. 1-2. 1993.

Local name: buluh perindu

H. pubescens K.M. Wong

Peninsular Malaysia, Kelantan. See *Kew Bulletin* 48(3): 523. 1993.

Homalachna (Benth. & Hook.) Engl. & Prantl
= *Holcus* L.

Greek *homalos* “even, regular, smooth, flat” and *achne* “chaff, glume, scale.”

Poodeae, Aveneae, or Pooideae, Poeae, Holcinae, see *Species Plantarum* 2: 1047-1048. 1753 and *Lexicon Generum Phanerogamarum* 285. 1903, *Die Natürlichen Pflanzenfamilien* 3: 13. 1906, *Contributions from the United States National Herbarium* 48: 387-388. 2003.

Homalachna (Benth. & Hook.) Kuntze =
Holcus L., *Homalachna* (Benth. & Hook.)
Engl. & Prantl

Greek *homalos* “even, regular, smooth, flat” and *achne* “chaff, glume, scale.”

Poodeae, Aveneae, or Pooideae, Poeae, Holcinae, see *Species Plantarum* 2: 1047-1048. 1753, *Genera Plantarum* 3(2): 1159. 1883 and *Lexicon Generum Phanerogamarum* 285. 1903, *Die Natürlichen Pflanzenfamilien* 3: 13. 1906, *Contributions from the United States National Herbarium* 48: 387-388. 2003.

Homalachne (Benth. & Hook.) Engl. & Prantl
= *Holcus* L.

Greek *homalos* “even, regular, smooth, flat” and *achne* “chaff, glume, scale.”

Poodeae, Aveneae, or Pooideae, Poeae, Holcinae, *Holcus* sect. *Homalachne* Benth. & Hook., see *Species Plantarum* 2: 1047-1048. 1753, *Familles des Plantes* 2: 38, 606. 1763, *Introductio ad Historiam Naturalem* 300. Pragae [Praha] 1777, *Chloris Melvilliana*. A list of plants collected in Melville Island... 35. London 1823, *Genera Plantarum* 3(2): 1159. 1883 and *Flora Pyrenaea* ... 4: 321. Milano 1901-1902, *Lexicon Generum Phanerogamarum* 285. 1903, *Die Natürlichen Pflanzenfamilien* 3: 13. 1906, *A Flora of California* 1: 126. 1912, *An Illustrated Flora of the Northern United States* 1: 109, 214. 1913, *New Phytol.* 61: 72-84. 1962, *Kew Bulletin* 40(4): 727-729. 1984 [1985], *Contributions from the United States National Herbarium* 48: 387-388. 2003.

Homalachne (Benth. & Hook.) Kuntze =
Holcus L., *Homalachna* (Benth. & Hook.)
Engl. & Prantl

Greek *homalos* “even, regular, smooth, flat” and *achne* “chaff, glume, scale.”

Poodeae, Aveneae, or Pooideae, Poeae, Holcinae, *Holcus* sect. *Homalachne* Benth. & Hook., see *Species Plantarum* 2: 1047-1048. 1753, *Familles des Plantes* 2: 38, 606. 1763, *Introductio ad Historiam Naturalem* 300. Pragae [Praha] 1777, *Chloris Melvilliana*. A list of plants collected in Melville Island... 35. London 1823, *Genera Plantarum* 3(2): 1159. 1883 and *Flora Pyrenaea* ... 4: 321. Milano 1901-1902, *Lexicon Generum Phanerogamarum* 285. 1903, *Die Natürlichen Pflanzenfamilien* 3: 13. 1906, *A Flora of California* 1: 126. 1912, *An Illustrated Flora of the Northern United States* 1: 109, 214. 1913, *New Phytol.* 61: 72-84. 1962, *Kew Bulletin* 40(4): 727-729. 1984 [1985], *Contributions from the United States National Herbarium* 48: 387-388. 2003.

Homalocenchrus Miègev. = *Leersia* Sw.,
Leersia Sol. ex Sw.

Greek *homalos* “smooth, flat” and *kenchros* “millet,” genus *Cenchrus* L., referring to the flat seeds.

Bambusoideae, Oryzodae, Oryzeae, Oryzinae, or Ehrhartoideae, Oryzeae, Oryzinae, type *Homalocenchrus oryzoides* (L.) Haller, see *Acta Helvetica, Physico-Mathematico-Anatomico-Botanico-Medica* 4: 307. 1760, *Historia Stirpium Indigenarum Helvetiae Inchoata* 2: 201. 1768, *Nova genera et species plantarum seu Prodromus* descriptionum vegetabilium maximam partem incognitorum. 1, 21. 1788, William Griffith (1810-1845), *Icones plantarum asiaticarum*. 3: t. 144. Calcutta 1847-1854, *Index Kewensis* 1: 312. 1895 and *Contributions from the United States National Herbarium* 12(6): 183-258, vii-xi. 1909, E. Launert, “A survey of the genus *Leersia* in Africa.” *Senckenbergiana Biologica* 46: 129-153. 1965, *Iowa St. J. Sci.* 44: 215-270. 1969, *Journal of the Arnold Arboretum* 69(3): 263. 1988, *Flora Mesoamericana* 6: 221-222. 1994, *Contributions from the United States National Herbarium* 39: 64-67. 2000.

Homoeatherum Nees = *Andropogon* L.,
Homoeatherum Nees ex Lindl.

Greek *homo-* “alike, like, resembling” and *ather* “stalk, barb, spine, beard, awn.”

Panicoideae, Andropogoneae, Andropogoninae, type *Homoeatherum chinense* Nees, see *Species Plantarum* 2: 1045-1046. 1753, *A Natural System of Botany* edition 2 448. 1836 and *Fl. Trop. E. Afr. Gramineae* 770. 1982, *Taxon* 41: 556. 1992, *Taxon* 44: 611-612. 1995, *Contributions from the United States National Herbarium* 46: 20-64, 251. 2003.

Homoiachne Pilg. = *Deschampsia* P. Beauv.

From the Greek *homoios* “like, resembling, the same” and *achne* “chaff, glume, scale.”

Pooideae, Poeae, Airinae, type *Homoiachne caespitosa* (Boiss.) Pilg., see *Essai d'une Nouvelle Agrostographie* 91, 149, 160. 1812, *Hortus Regius Botanicus Berolinensis* 1: 122. 1827, *Flora Excursoria Hafniensis* 32. 1838, *Botaniska Notiser* 1842: 141, 178. 1842, *Flore du Département des Hautes-Pyrénées* 82. 1867, *A Manual of the Botany of the Northern United States* 605. 1848, *Flora italiana, ossia descrizione delle piante ...* 1: 246. 1848, *Flora Rossica* 4(13): 420, 422. 1852, *Synopsis Plantarum Glumacearum* 1: 423, 425. 1854, *A Manual of the Botany of the Northern United States. Second Edition* 572. 1856, *Enumeratio Plantarum Transsylvanicae* 753. 1866, *Die Natürlichen Pflanzenfamilien* 2(2): 54. 1887 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 74: 556. 1949, *British Antarctic Survey Scientific Reports* 60: 1-202, 1-6 pls. 1968, *Willdenowia* 8(1): 83. 1977, *Contributions from the United States National Herbarium* 48: 245-256, 388. 2003.

Homolepis Chase

From the Greek *homos* “similar” and *lepis* “scale.”

About 3-4 species, tropical America, Mexico to Brazil. Panicoideae, Panicodae, Paniceae, or Panicoideae, Paniceae, Paspalinae, annual or perennial, unarmed, erect, creeping, more or less scandent, herbaceous, semiaquatic, tufted, branched, stoloniferous, rooting at the nodes, auricles present, leaf sheaths hispid, ligule membranous or ciliate, plants bisexual, open inflorescence paniculate, lanceolate spikelets flattened and entirely enclosed by the pair of glumes, lower floret sterile or male, upper floret bisexual, 2 glumes more or less equal, lower glume 5- to 9-nerved, upper glume 7- to 9-nerved, lower lemma margins pilose, thin upper lemma cartilaginous with flat margins, palea present, 2 free and fleshy lodicules, 3 stamens, ovary glabrous, 2 stigmas, pioneer species, weed, shade, wet places, openings, ponds, open areas, moist woods, along the edge of the rivers, along roadsides and trails, floodplains, along riverbanks, marshy sites, inundated savannah, resembling *Panicum*, type *Homolepis aturensis* (Kunth) Chase, see *Species Plantarum* 1: 55. 1753, *Nova Genera et Species Plantarum seu Prodrromus* 24. 1788 and *Proceedings of the Biological Society of Washington* 24: 146, f. 12. 1911, *North American Flora* 3(2): 200, 205. 1915, *Contributions from the United States National Herbarium* 24(8): 291-556. 1927, *Field Museum of Natural History, Botanical Series* 13(1/1): 96-261. 1936, *Hickenia* 1(29): 156. 1978, *Fieldiana: Botany, New Series* 4: 1-608. 1980, *Smithsonian Contributions to Botany* 59: i-iii, 1-63. 1985, *Flora of the*

Guianas. Series A, Phanerogams 8: 257-262. 1990, *Edinburgh Journal of Botany* 48: 73-80. 1991, *Flora Mesoamericana* 6: 327-328. 1994, *Global Ecology and Biogeography* 7(6): 441-455. Nov 1998 [The nature of savannah heterogeneity in the Orinoco Basin], *Contributions from the United States National Herbarium* 46: 251-252. 2003.

Species

H. aturensis (Kunth) Chase (*Panicum aturense* Kunth; *Panicum blepharophorum* J. Presl; *Panicum tumescens* Trin.; *Panicum viridiflorum* Nees)

Southern America. Perennial, caespitose, semiaquatic, glabrous, stoloniferous, herbaceous, compressed, hollow, erect, decumbent, straggling, spreading, creeping and rooting at the nodes, leaf sheaths margins silky hairy, lax panicles densely flowered, spikelets narrowly lanceolate, lower floret sterile, upper floret acuminate, densely matted, cultivated, open habitats, along roadsides, seasonally inundated ground, riverbanks, disturbed areas, savannah, near water or in shallow water, see *Nova Genera et Species Plantarum* 1: 103, t. 33. 1815 [1816], *Flora Brasiliensis seu Enumeratio Plantarum* 2: 135-136. 1829, *Reliquiae Haenkeanae* 1(4-5): 312. 1830, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 3,1(2-3): 316. 1834 and *Proceedings of the Biological Society of Washington* 24: 146, f. 12. 1911. in Spanish: carricillo

H. glutinosa (Sw.) Zuloaga & Sodestr. (*Panicum glutinosum* Sw.; *Panicum lindenii* Griseb.; *Panicum obtusiflorum* A. Rich., nom. illeg., non *Panicum obtusiflorum* Hochst. ex A. Rich.)

America tropical, Ecuador, Galápagos, Andean. Perennial, strongly viscid, caespitose, rhizomatous, coarse, herbaceous, hollow, erect, prostrate to semiprostrate, leaning, procumbent, creeping, rooting at the nodes, papery leaves, inflorescence erect, panicle exerted, sticky spikelets, lower floret sterile, weed species, invasive, found on grassy slopes, hillsides, open areas, disturbed areas, along roadsides, humid forests, abandoned plantations, dense shade, see *Nova Genera et Species Plantarum seu Prodrromus* 24. 1788, *Histoire Physique, Politique et Naturelle de l'Île de Cuba ... Botanique. — Plantes Vasculaires* 3: 305. 1853, *Catalogus plantarum cubensium ...* 233. Leipzig 1866 and *Smithsonian Contributions to Botany* 59: 19. 1985.

in English: sticky panic grass

in Peru: parentoqui, palentoqui

H. isocalycia (Meyer) Chase (also spelled *isocalycina*) (*Panicum billbergianum* Beurl.; *Panicum glutinosum* Sw.; *Panicum isocalycium* G. Mey.; *Panicum langei* E. Fourn.; *Panicum olyrachne* Beurl.; *Panicum renggeri* Steud.; *Panicum tumescens* Trin.) (named for the Swedish botanist Gustaf Johan Billberg, 1772-1844, zoologist, author of

Botanicon Scandinaviae seu plantarum in Suecia et Norvegia sponte crescentium icones ... Stockholm, Uppsala, Carlstad, Arosia, Orebrô 1822; see J.H. Barnhart, *Biographical notes upon botanists*. 1: 186. 1965)

Brazil. Annual or short-lived perennial, herbaceous, loosely tufted, hollow, trailing, decumbent or scrambling and often rooting at the lower nodes, leaf blades acuminate with cordate base, inflorescence base included in uppermost sheath, panicle ovate or elliptic and sparsely branched, spikelets acute or blunt, lower floret sterile, glumes ovate, lower lemma margins glabrous, upper lemma with coriaceous margins, forage, along roadsides, common in marshy or damp areas, open habitats, riverbanks, savannah edges, forests, riverbanks, see *Nova Genera et Species Plantarum seu Prodrum* 24. 1788, *Primitiae Florae Essequiboensis ...* 59-60. 1818, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 3,1(2-3): 316. 1834, *Synopsis Plantarum Glumacearum* 1: 89. 1854, *Kongliga Svenska Vetenskapsakademien Handlingar* 40: 112-113. 1854 [1856] and *Proceedings of the Biological Society of Washington* 24: 147. 1911, *Smithsonian Contributions to Botany* 59: 19, 24, 27. 1985.

H. longispicula (Döll) Chase (*Homolepis longiflora* (Benth.) Pilg.; *Homolepis longispicula* (Döll) Kuhlm., nom. illeg., non *Homolepis longispicula* (Döll) Chase; *Ichnanthus longiflorus* Benth.; *Panicum longiflorum* Trin., nom. illeg., non *Panicum longiflorum* (Retz.) J.G. Gmel.; *Panicum longispiculum* Döll)

Brazil. See *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 3,1(2-3): 317. 1834, *Flora Brasiliensis* 2(2): 261. 1877, *Journal of the Linnean Society, Botany* 19: 45. 1881 and *Proceedings of the Biological Society of Washington* 24: 147. 1911, *Comissão de Linhas Telegraficas Estratégicas de Matto-Grosso ao Amazonas, Botanica* 67(Bot. 11): 90. 1922, *Die natürlichen Pflanzenfamilien, Zweite Auflage* 14e: 35. 1940.

H. villaricensis (Mez) Zuloaga & Sodestr. (*Panicum villaricense* Mez)

America tropical, Paraguay. See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 56(Beibl. 125): 1. 1921, *Smithsonian Contributions to Botany* 59: 29. 1985.

Homopholis C.E. Hubb.

From the Greek *homos* “similar, the same” and *pholis* “a horny scale,” referring to the glumes in the spikelets; see C.E. Hubbard, in *Bulletin of Miscellaneous Information, Kew*. 126. 1934.

About 1-2 species, Australia. Panicoideae, Panicodae, Paniceae, perennial, tufted, stoloniferous, herbaceous, often with leafy shoots at the nodes, hollow internodes, glabrous nodes, leaves narrow, auricles absent, ligule an unfringed membrane, plants bisexual, open panicle, capillary branchlets, terminal spikelets, florets 2, lower floret sterile, upper floret bisexual, 2 glumes more or less equal, glume nerves ribbed, lower glume hairless, upper glume hairy on the back, upper lemma smooth and briefly rostrate, upper glume and lower lemma similar, palea present, 2 lodicules free and fleshy, 3 stamens, ovary glabrous, 2 stigmas, fruit compressed, shade species, in forest, native pasture species, woodland shade, type *Homopholis belsonii* C.E. Hubb., see *Bulletin of Miscellaneous Information Kew* 1934: 126-127. 1934, *Global Change Biology* 8(7): 679-693. July 2002, Wilfried Thuiller, “Patterns and uncertainties of species’ range shifts under climate change.” *Global Change Biology* 10(12): 2020-2027. 2004, *Ecological Management and Restoration* 6(1): 34-42. Apr 2005.

Species

H. belsonii C.E. Hubb. (after E. Belson, original collector)

Queensland, New South Wales. Perennial, rare species, tufted, spreading, rhizomatous or stoloniferous, erect or prostrate, glabrous, sheath glabrous, leaves bluish green and glabrous, panicles rigid and not fully exerted, terminal spikelets, lower glume glabrous, upper glume sparsely hairy, lower sterile lemma strigose between the nerves, useful for pasture, ornamental, not invasive, on heavy soils, poor soils, dry woodland, see *Bulletin of Miscellaneous Information Kew* 1934: 126-127. 1934.

H. proluta (F. Muell.) R.D. Webster (*Panicum prolutum* F. Muell.; *Whalleya proluta* (F. Muell.) Wills & J. Bruhl) (Latin *prolutus, a, um* part. from *proluo, lui, lutum* “to wash forth, to cast out, to moisten, to overflow”)

Queensland, New South Wales, Victoria, South Australia. Perennial, rhizomatous, sheath and leaves glabrous, rigid, leaves flat and glabrous, panicle loose, spikelets purple and acute, inflorescence fully exerted at maturity, lower sterile lemma glabrous, fertile lemma smooth and shining, grows near water, found in dry areas or swamps, native grasslands, in floodways, hills and tablelands, see *Transactions and Proceedings of the Victorian Institute for the Advancement of Science* 1854/1855: 46. 1855 and *The Australian Paniceae (Poaceae)* 96. 1987, *Australian Systematic Botany* 13: 465, f. 2b. 2000.

in Australia: rigid panic grass, rigid panic, perennial panic grass, pallid panic grass, Coolah grass

Homoplitis Trin. = *Pogonatherum* P. Beauv.

Panicoideae, Andropogoneae, Saccharinae, type *Homoplitis crinita* (Thunb.) Trin., see *Flora Japonica, ...* 40, t. 7. 1784,

Essai d'une Nouvelle Agrostographie 56, 176, pl. 11, f. 7. 1812, *Fundamenta Agrostographiae* 166. 1820 and *Contributions from the United States National Herbarium* 46: 252, 540-541. 2003.

Homopogon Stapf = *Trachypogon* Nees

From the Greek *homos* "similar, the same" and *pogon* "beard," possibly referring to *Trachypogon*.

Panicoideae, Andropogoneae, Germainiinae, type *Homopogon chevalieri* Stapf, see *Mémoires de la Société Botanique de France* 8(b): 103. 1908, *Flora Mesoamericana* 6: 380-381. 1994, *Contributions from the United States National Herbarium* 46: 617-622. 2003.

Homozeugos Stapf

From the Greek *homozygeo* "to be yoked together," *homozygos* "yoked together, in the same row," *zygon* "a yoke," referring to paired spikelets.

About 5-6 species, tropical Africa, Tanzania, Angola. Panicoideae, Andropogonodae, Andropogoneae, Andropogoninae, perennial, herbaceous, tufted, auricles present or absent, ligule an unfringed membrane, plants bisexual, inflorescence of 1-several digitate racemes, racemes fascicled or solitary, terete spikelets, long callus pungent, 2 glumes more or less equal, lower glume convex 7-8-nerved, upper glume 3-nerved, upper lemma linear 2-dentate with a hairy awn, open habitats, forest, savannah, a segregate from *Eulalia*, type *Homozeugos fragile* Stapf, see *Hooker's Icones Plantarum* 31: t. 3033. 1915.

Species

H. conciliatum Guala

Western Africa, Angola. Inrolled leaves, see *Novon* 12(2): 196-199, f. 1. 2002.

H. eylesii C.E. Hubb.

Southern Africa. See *Bulletin of Miscellaneous Information Kew* 1936(5): 295. 1936.

H. fragile Stapf

West tropical Africa. See *Hooker's Icones Plantarum* 31: t. 3033. 1915.

H. gossweileri Stapf

Guinea, Angola. See *Flora of Tropical Africa* 9: 103. 1917.

H. huillensi (Rendle) Stapf (*Pogonatherum huillense* (Rendle) Roberty; *Pollinia huillensis* Rendle)

Tropical Africa. See *Catalogue of the African Plants Collected by Dr. F. Welwitsch in 1853-61* 2(1): 136. 1899 and *Hooker's Icones Plantarum* 31: t. 3033. 1915, *Boissiera. Mémoires du Conservatoire de Botanique et de l'Institut de*

Botanique Systématique de l'Université de Genève 381. 1960.

H. katakton Clayton (Greek *kataktos*, *katakton* "capable of being broken")

Angola. See *Garcia de Orta, Série de Botânica* 1(1-2): 11. 1973, *Novon* 12(2): 196-199, f. 1. 2002.

Hookerochloa E.B. Alekseev = *Austrofestuca* (Tzvelev) Alexeev

One species, eastern Australia. Pooideae, Poodae, Poeae, perennial, herbaceous, erect, caespitose, unbranched, auricles absent or present, leaves mostly basal, ligule an unfringed membrane, plants bisexual, inflorescence paniculate, 2 glumes unequal, lower glume 3-nerved, upper glume 3-5-nerved, palea 2-nerved 2-keeled, 2 free and membranous lodicules, 3 stamens, ovary glabrous, 2 stigmas, found in swampy places, boggy or waterlogged sites, near streams, open moist sites, in subalpine swamp, in open forest or grassland, in eucalypt woodland, dry sclerophyll forest, in open areas, rough pasture, type *Hookerochloa hookeriana* (F. Muell. ex Hook.f.) E.B. Alexeev, see *Bot. Zhurn. (Moscow & Leningrad)* 56(9): 1257. 1971, *New Zealand Journal of Botany* 24: 425-503. 1986, *New Zealand Journal of Botany* 36: 329-367. 1998, *Flora of New Zealand* 5: 85-87. 2000.

Species

H. hookeriana (F. Muell. ex Hook.f.) E.B. Alexeev (*Austrofestuca hookeriana* (F. Muell. ex Hook.f.) S.W.L. Jacobs; *Festuca hookeriana* F. Muell. ex Hook.f.; *Poa hookeriana* (F. Muell.) F. Muell.; *Poa hookeriana* (F. Muell. ex Hook.f.) F. Muell.; *Schedonorus hookerianus* (F. Muell. ex Hook.f.) Benth.) (after the British botanist Sir William Jackson Hooker, 1785-1865, from 1841 to 1865 director Royal Botanic Gardens, Kew, father of Sir Joseph Dalton Hooker, 1817-1911, see Stafleu and Cowan, *Taxonomic literature*. 2: 283-301. 1979)

Victoria, New South Wales, Tasmania. Perennial, erect, caespitose, culms stout and robust, bright green, forming coarse and leafy tussocks, glabrous, auricles present or absent, sheath striate, ligule obtuse, leaves scabrous, very loose panicle spreading to nodding, green or purplish spikelets 3-5-flowered, chasmogamous spikelets, vestigial foliar structure subtending the inflorescence present or absent, glumes lanceolate or narrowly elliptic, palea lanceolate, ovary glabrous, fruit compressed and grooved, will not tolerate heavy grazing, in Tasmania grows on dry hillsides under light eucalypt forest in the Central Highlands and East Coast, see *Flora Tasmaniae* 2: 127, t. 165. 1858, *Fragmenta Phytographiae Australiae* 8: 131. 1873, *Flora Australiensis: A Description ...* 7: 656. 1878 and *Telopea* 3(4): 602. 1990.

Hoplismenus Hassk. = *Oplismenus* P. Beauv.

From the Greek *hoplismos* “a weapon,” referring to the awned spikelets.

Panicoideae, Paniceae, Panicinae, see *Species Plantarum* 1: 55. 1753, *Observationes Botanicae* 3: 10. 1783, *Flore d'Oware* 2: 14, 15, t. 68, f. 1. Sep 1810, *Prodromus Florae Novae Hollandiae* 194. 1810, *Essai d'une Nouvelle Agrostographie* 54, 169. 1812, *Fundamenta Agrostographiae* 181. 1820, *Cat. Hort. Bogor.* 16. 1844, *Tentamen Florae Abyssinicae ...* 2: 377. 1850, *Synopsis Plantarum Glumacearum* 1: 46, 118. 1854, *Flora Brasiliensis* 2(2): 144. 1877, *Indig. Grasses N.Z.* t. 11. 1878, *Revisio Generum Plantarum* 2: 776. 1891 and *Contr. U.S. Natl. Herb.* 22(3): 123. 1920, *U.S. Dept. Agric. Bull.* 772: 238. 20 Mar 1920, *Fieldiana, Botany* 24(2): 38-331. 1955, *Kew Bulletin* 33: 147-157. 1978, *Phanerogamarum Monographiae* 13: 1-213. 1981, *Micronesica* 18: 45-102. 1982, *Memoirs of the New York Botanical Garden* 78: 509-540. 1996, *New Zealand Journal of Botany* 34: 447-462. 1996, *Contributions from the United States National Herbarium* 46: 299-303. 2003.

x Hordale Ciferri & Giacomini

Hordeum x *Secale*.

See *Nom. Fl. Ital.* 180. 1950, *Genera Graminum* 375. 1986.

x Hordelymus (Jessen) Harz = *Cuviera* Koeler, *Hordelymus* Bachtj & Darevsk, *Hordelymus* (Jess.) Jess. ex Harz, *Hordelymus* (Jess.) Jessen, *Hordelymus* (Jessen) Jessen in Harz, *Leptothrix* (Dumort.) Dumort., *Medusather* P. Candargy, *Orostachys* Steud.

From the genera *Hordeum* L. and *Elymus* L.

One species, Europe, Asia, North Africa. Pooideae, Triticoideae, Triticeae, perennial, herbaceous, caespitose, auricles present, ligule an unfringed membrane, plants bisexual, inflorescence spicate, raceme oblong to linear, spikelets in triplets and distichous, the central spikelet imperfect, 1-2-flowered, 2 glumes subequal or more or less equal, lemma acuminate awned, palea present, 2 free and membranous lodicules, 3 stamens, ovary hairy, 2 stigmas, woodland, shade, see *Species Plantarum* 1: 84-85. 1753, *Descriptio Graminum in Gallia et Germania* 1802, *Observations sur les Graminées de la Flore Belgique* 92. 1823 [1824], *Nomenclator Botanicus. Hordeum L. = *Critesion* Raf., *Critho* E.

Meyer, *Zeocrithon* P. Beauv., *Zeocrithon* Wolf

From the classical Latin name *hordeum*, i “barley” (Plinius, Marcus Porcius Cato, L. Junius Moderatus Columella and Marcus Terentius Varro); Latin *horreum*, i (*horreus*) “a storehouse,” Greek *crithe*, Akkadian *qaritum*, *qiritu* “granary, store room,” Hebrew *qorah* “beam, roof”; “hordea qui dixit, superest ut tritica dicat” Virg., *Georg.* 1, 200 and “antiquissimum in cibis hordeum, sicut Atheniensium ritu apparet et gladiatorum cognomine qui hordearii vocabantur” Plinius; see Carl Linnaeus, *Species Plantarum*. 84. 1753 and *Genera Plantarum*. Edition 5. 37. 1754; Giovanni Semerano, *Le origini della cultura europea*. Dizionario della lingua Latina e di voci moderne. 2(2): 427-428. Leo S. Olschki Editore, Firenze 1994.

Monotypic or 20-40 species, in temperate and subtropical areas of the world. Pooideae, Triticoideae, Triticeae, or Pooideae, Triticeae, Hordeinae, annual or perennial, herbaceous, caespitose or solitary, erect or decumbent, flimsy to stout, hollow, basal culm internodes sometimes swollen,

auricles present or absent, leaf sheath glabrous and rounded, ligule a short ciliolate membrane, linear leaves flat or rolled, plants bisexual, cleistogamous or chasmogamous, inflorescence erect or nodding with a tough rachis, unbranched spicate inflorescence, flowers in dense and narrow spike-like panicle, feathery flower heads, spikelets in threes at each inflorescence node, spikelets usually 1-flowered, lateral spikelets usually smaller or incomplete, flowers of lateral spikelets often aborted, central spikelet usually hermaphrodite, 2 stiff glumes narrow and usually long or short awned, glumes persistent, lemma convex awned or unawned, lemma of central spikelet rigid and awned or unarmed, palea entire or notched or bifid, 2 lodicules free and ciliate, 3 stamens, ovary apex coronate and hairy, 2 plumose white stigmas, fruit longitudinally grooved and compressed dorsiventrally, a serious weed species in many countries, grain crop, ornamental, sharp seeds of some species can enter the eyes, skin and wool of sheep, tolerant of saline soils, growing in dry soils, sandy places, rather moist habitats, there is considerable taxonomic confusion concerning this genus, in some floras *Hordeum* is restricted to *Hordeum vulgare* L. while the rest are placed in *Critesion* Raf., intergeneric hybrids with *Elytrigia* Desv., *Agropyron* Gaertner, *Secale* L., *Sitanion* Raf., *Triticum* L., type *Hordeum vulgare* L, see Johannes Loesel (1607-1655), *Flora Prussica*. Editor Johann Gottsched (1668-1704). H. agriocrithon Aberg (*Hordeum vulgare* L.; *Hordeum vulgare* subsp. *agriocrithon* (Aberg) Á. Löve)

Asia. Six-rowed barley, fragile rachis, see *Species Plantarum* 1: 84-85. 1753 and *Symb. Bot. Upsal.* 4(2): 93, 148. 1940, *Angewandte Bot.* 22: 116. 1940, *Canad. J. Bot.* 37: 677-681. 1959, *Feddes Repertorium* 95(7-8): 435. 1984, *Cytologia* 57: 51-57. 1992.

H. arizonicum Covas (*Critesion arizonicum* (Covas) Á. Löve; *Hordeum adscendens* Hitchc.)

U.S., Arizona. Annual to biennial or perennial, slender, tufted, glaucous, lower sheaths pubescent, auricles usually absent, spikes pale green, lateral spikelets sterile, grows in saline habitats, canals and ponds, along irrigation ditches, see *Madroño* 10(1): 16-17, pl. 2, f. 11. 1949, *Taxon* 29(1): 166. 1980, *Memoir San Diego Society of Natural History* 12: 1-140. 1981.

in English: Arizona barley, Arizona foxtail

H. bogdani Wilensky (*Critesion bogdani* (Wilensky) Á. Löve; *Hordeum secalinum* var. *bogdani* (Wilensky) Roshev.)

Asia, China, Pakistan, India, Eurasia. Perennial, slender spikes, useful for erosion control, found in ditches, wet habitats, along roadsides, see *Feddes Repertorium* 95(7-8): 438. 1984, *Genome* 29: 594-597. 1987, *Willdenowia* 16: 479-490. 1987, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 110: 7-15. 1988, *Hereditas; genetiskt arkiv.* Mendelian Society of Lund. 112: 109-116. 1990, *Acta Botanica Yunnanica* 12: 57-66. 1990.

H. brachyantherum Nevski (*Critesion brachyantherum* (Nevski) Barkworth & D.R. Dewey; *Critesion brachyantherum* (Nevski) W.A. Weber, nom. illeg., non *Critesion brachyantherum* (Nevski) Barkworth & D.R. Dewey; *Critesion jubatum* (L.) Nevski subsp. *breviaristatum* (Bowden) Á. & D. Löve; *Hordeum boreale* Scribn. & J.G. Sm., nom. illeg., non *Hordeum boreale* Gand.; *Hordeum jubatum* L. subsp. *brachyantherum* (Nevski) Bondar; *Hordeum jubatum* L. subsp. *breviaristatum* Bowden; *Hordeum nodosum* L. var. *boreale* (Scribn. & J.G. Sm.) A.S. Hitchc.; *Hordeum nodosum* var. *boreale* Hitchc.)

Eurasia, Russia, U.S., North America, Canada. Perennial, loosely to densely caespitose, slender to robust, erect to geniculate, sheaths glabrous to densely pubescent, auricles absent, spikes green to purplish, lateral spikelets staminate, found in roadside ditch, in moist meadows, at the edge of marshes or streams along forest openings, grassy areas, see *Species Plantarum* 1: 85. 1753, *Species Plantarum, Editio Secunda* 1: 126. 1762, *Bulletin, Division of Agrostology United States Department of Agriculture* 4: 24-25. 1897 and *American Journal of Botany* 21(3): 134. 1934, *Canadian Journal of Botany* 40: 1690-1691. 1962, *Le Naturaliste Canadien* 94: 525. 1967, *Botaniska Notiser* 128(4): 503. 1975[1976], *Genetica* 64: 93-100. 1984, *American Journal of Botany* 72(5): 768. 1985, *Genome* 30: 204-210. 1988, *Phytologia* 67(6): 425. 1989, *Canadian Journal of Botany* 68(11): 2433-2442. 1990, *Hereditas; genetiskt arkiv.* 114: 35-39. 1991, *Nord. J. Bot.* 13: 3-17. 1993 [1992], *Nordic Journal of Botany* 14(2): 117-136. 1994, *Annals of Botany* 73: 195-203. 1994, *Systematic Botany* 21(2): 3-15. 1996.

in English: meadow barley

H. brachyantherum Nevski subsp. *brachyantherum* (*Critesion brachyantherum* (Nevski) Barkworth & D.R. Dewey; *Critesion jubatum* (L.) Nevski subsp. *breviaristatum* (Bowden) Á. & D. Löve; *Hordeum boreale* Scribn. & J.G. Sm., nom. illeg., non *Hordeum boreale* Gand.; *Hordeum jubatum* L. subsp. *breviaristatum* Bowden; *Hordeum jubatum* L. var. *boreale* (Scribn. & J.G. Sm.) Boivin; *Hordeum nodosum* L. p.p.; *Hordeum nodosum* L. var. *boreale* (Scribn. & J.G. Sm.) A.S. Hitchc.; *Hordeum nodosum* var. *boreale* Hitchc.)

Russia, U.S., North America, Canada. Perennial, slender to robust, densely tufted, grows in pastures, along streams and lakeshores, drainage, moist areas, see *Species Plantarum* 1: 85. 1753, *Species Plantarum, Editio Secunda* 1: 126. 1762, *Bulletin, Division of Agrostology United States Department of Agriculture* 4: 24-25. 1897 and *Le Naturaliste Canadien* 94: 525. 1967, *Botaniska Notiser* 128(4): 503. 1975[1976], *American Journal of Botany* 72(5): 768. 1985, *Phytologia* 67(6): 425. 1989, *Nord. J. Bot.* 13: 3-17. 1993 [1992], *Annals of Botany* 73: 471-479. 1994.

in English: meadow barley, northern barley

H. brachyantherum Nevski subsp. **californicum** (Covas & G.L. Stebbins) Bothmer, N. Jacobsen & Seberg (*Critesion californicum* (Covas & Stebbins) Á. Löve; *Critesion californicum* subsp. *californicum*; *Hordeum brachyantherum* var. *gracilius* Nevski; *Hordeum californicum* Covas & Stebbins)

U.S., California. Perennial, slender, loosely tufted, basal sheaths usually densely pubescent, occurs in dry meadow, grasslands, see *Madroño* 10: 5. 1949, *Taxon* 29(1): 166. 1980, *Genome* 29: 247-252, 594-597. 1987, *Genome* 32: 1124-1127. 1989, *Nordic Journal of Botany* 11(2): 153. 1991.

in English: California barley, California meadow barley, meadow barley

H. brachyatherum Phil. (*Critesion brachyatherum* (Phil.) Á. Löve)

Chile. See *Anales Univ. Chile* 94: 346. 1896 and *Feddes Repert.* 95(7-8): 440. 1984.

H. brevisubulatum (Trin.) Link (*Hordeum macilentum* Steud.; *Hordeum secalinum* var. *brevisubulatum* Trin.)

China, Asia, India, Nepal. Perennial, useful for erosion control, see *Spicilegium Florae Lipsicae* 148. 1771, *Linnaea* 17(4): 491-492. 1844, *Synopsis Plantarum Glumacearum* 1: 352. 1854 and *Biologisches Zentralblatt* 101(2): 208. 1982, *Genome* 32: 1124-1127. 1989, *Flora Liaoningica* 2: 1159. 1992, *Acta Phytotaxonomica Sinica* 30(4): 342-345. 1992.

H. brevisubulatum (Trin.) Link subsp. **Brevisubulatum** (*Critesion brevisubulatum* (Trin.) Á. Löve; *Hordeum secalinum* var. *brevisubulatum* Trin.)

China, Russia. Perennial, see *Linnaea* 17(4): 491-492. 1844 and *Biologisches Zentralblatt* 101(2): 208. 1982, *Plant Systematics and Evolution* 145: 259-267. 1984, *Willdenowia* 16: 479-490. 1987, *Acta Botanica Yunnanica* 12: 57-66. 1990.

H. brevisubulatum (Trin.) Link subsp. **iranicum** Bothmer (*Critesion iranicum* (Bothmer) Á. Löve; *Hordeum iranicum* (Bothmer) Tzvelev)

Asia, Iran. Perennial, occurs in wet meadow areas, see *Botanisk Tidsskrift* 74(23): 139. 1979, *Feddes Repertorium* 95(7-8): 438. 1984, *Bot. Zhurn. (Moscow & Leningrad)* 78(10): 88. 1993.

H. brevisubulatum (Trin.) Link subsp. **nevskianum** (Bowden) Tzvelev (*Critesion brevisubulatum* subsp. *nevskianum* (Bowden) Á. Löve; *Hordeum nevskianum* Bowden)

Asia, China, Nepal, India. Perennial, see *Canadian Journal of Genetics and Cytology* 7: 396. 1965, *Novosti Sist. Vyss. Rast.* 8: 66. 1971, *Willdenowia* 16: 479-490. 1987.

H. brevisubulatum (Trin.) Link subsp. **turkestanicum** (Nevski) Tzvelev (*Critesion brevisubulatum* subsp. *turkestanicum* (Nevski) Á. Löve; *Hordeum turkestanicum* Nevski)

Eurasia, China, Pakistan. Perennial, see *Linnaea* 17(4): 491-492. 1844 and *Novosti Sist. Vyss. Rast.* 8: 66. 1971, *Plant Systematics and Evolution* 145: 259-267. 1984, *Flora Xizangica* 5: 177. 1987, *Willdenowia* 16: 479-490. 1987.

H. brevisubulatum (Trin.) Link subsp. **violaceum** (Boiss. & Hohen.) Tzvelev (*Hordeum violaceum* Boiss. & Hohen.)

Turkey, Iran. Perennial, found in subalpine regions, in ditches, moist drainage areas, wet areas, meadows and wet meadows, waste areas and roadsides, dry saline sites, moist areas, see *Linnaea* 17(4): 491-492. 1844, *Diagnoses plantarum orientalium novarum, ser. 1*, 2(13): 70. 1853 and *Novosti Sist. Vyss. Rast.* 9: 62. 1972.

H. bulbosum L. (*Critesion bulbosum* (L.) Á. Löve; *Critesion secalinum* (Schreb.) Á. Löve; *Hordeum bulbosum* subsp. *nodosum* (L.) B.R. Baum; *Hordeum jubatum* var. *boreale* (Hitchc.) B. Boivin; *Hordeum kaufmannii* Regel; *Hordeum nodosum* L.; *Hordeum secalinum* Schreb.; *Hordeum strictum* Desf.)

Eastern Mediterranean, Europe, Algeria, Israel. Perennial, caespitose, basal internodes swollen or bulbous, unbranched, auricles present and well-developed, leaf sheaths not keeled, ligule entire to erose, leaves linear and pilose, plants bisexual, a single spike contracted and oblong, spikelets heteromorphic and distichous, 1 floret bisexual per spikelet, palea chartaceous, 3 stamens, ovary pilose, diploid and tetraploid plants, see *Centuria II. Plantarum ...* 115. 1756, *Species Plantarum, Editio Secunda* 1: 126. 1762, *Spicilegium Florae Lipsicae* 148. 1771 and *American Journal of Botany* 21(3): 134. 1934, *Le Naturaliste Canadien* 94: 525. 1967, *Taxon* 29(2-3): 350. 1980, Tutin, T.G. et al. (eds.), "Flora Europaea. vol. 5. Poaceae." University Press Cambridge 1980, *Nord. J. Bot.* 2: 421-434. 1982, *Euphytica* 33: 99-106. 1984, *Feddes Repertorium* 95(7-8): 441. 1984, *Acta Botanica Croatica* 43: 335-340. 1984, *Genetica* 64: 93-100. 1984, *Canadian Journal of Botany* 63(4): 743. 1985, *Anales del Jardín Botánico de Madrid* 41: 361-365. 1985, *Taxon* 34: 531. 1985, *Hereditas; genetiskt arkiv.* 105: 179-185. 1986, *Bjulleten glavnogo botaniceskogo sada* 140: 68-73. 1986, *Annali di Botanica* 45: 75-102. 1987, *Scientia Agricultura Sinica* 21: 32-34. 1988, *Genome* 30: 204-210. 1988, *Genome* 32: 1124-1127. 1989, *Genome* 33: 425-432. 1990, *Boletim da Sociedade Broteriana, ser. 2* 63: 29-66, 153-205. 1990, *Plant Systematics and Evolution* 172: 141-150. 1990, *Hereditas; genetiskt arkiv.* 114: 35-39. 1991, *Nordic Journal of Botany* 13: 481-493. 1993, *Agriculture and Horticulture* 68: 515-523. 1993, *Journal of Jiangsu Agricultural College* 17(4): 27-30. 1996.

in English: bulbous barley

in French: orge bulbeuse

in Turkey: çavdarcik, yabani arpa

H. capense Thunb. (*Critesion capense* (Thunb.) Á. Löve; *Hordeum nodosum* L.)

South Africa. Perennial, tufted, auricles absent, leaf sheaths fibrous when old, weed species, along riverbanks, riverbeds, see *Centuria II. Plantarum* ... 115. 1756, *Species Plantarum, Editio Secunda* 1: 126. 1762, *Prodromus Plantarum Capensium*, ... 23. 1794 and *American Journal of Botany* 21(3): 134. 1934, *Le Naturaliste Canadien* 94: 525. 1967, *Nord. J. Bot.* 2: 421-434. 1982, *Feddes Repertorium* 95(7-8): 438. 1984, *Taxon* 34: 531. 1985, *Canadian Journal of Botany* 63(4): 743. 1985, *Hereditas; genetiskt arkiv.* 105: 179-185. 1986, *Genome* 30: 204-210. 1988.

in English: Cape wild barley

in southern Africa: Kaapse wildegars, vulletjiestertgras; litse-ba-ntja (Sotho)

H. chilense Roem. & Schult. (*Critesion chilense* (Roem. & Schult.) Á. Löve; *Hordeum chilense* Brongn., nom. illeg., non *Hordeum chilense* Roem. & Schult.; *Hordeum chilense* var. *chilense*; *Hordeum chilense* var. *pseudosecalinum* Haudeman; *Hordeum cylindricum* Steud.; *Hordeum depauperatum* Steud.; *Hordeum secalinum* var. *chilense* E. Desv.)

Southern America, Argentina. Perennial, found on the shore of lakes, see *Spicilegium Florae Lipsicae* 148. 1771, *Systema Vegetabilium* 2: 796. 1817, *Reliquiae Haenkeanae* 1: 327. 1830, *Voyage autour du Monde* 2: 54. 1831, *Flora Chilena* 6: 458. 1854, *Synopsis Plantarum Glumacearum* 1: 353. 1854, *Abhandlungen der Königlichen Gesellschaft der Wissenschaften zu Göttingen* 19: 249. 1874 and *Anales Museo Nacional de Historia Natural de Buenos Aires* 28: 272-273, 275-276, 278. 1916, *Hickenia* 1(11): 61. 1977, *Feddes Repertorium* 95(7-8): 439. 1984, *Genome* 29: 683-688. 1987, *Scientia Agricultura Sinica* 21: 32-34. 1988, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 109(3): 380. 1988, *Annals of Botany* 64: 315-324. 1989, *Hereditas; genetiskt arkiv.* 110: 289-305. 1989, *Monographs in Systematic Botany from the Missouri Botanical Garden* 47: i-xi, 1-178. 1994.

Richardson; *Hordeum leporinum* subsp. *glaucum* (Steud.) T.A. Booth & A.J. Richards; *Hordeum murinum* L.; *Hordeum murinum* L. subsp. *glaucum* (Steudel) Tzelev; *Hordeum murinum* var. *pedicellatum* Pau & Font Quer; *Hordeum pedicellatum* Pau & Font Quer; *Hordeum stebbinsii* Covas; *Zeocriton murinum* (L.) P. Beauv.)

Europe, Mediterranean region. Annual, tufted, geniculate, leaves auriculate, basal leaf sheaths not keeled, ligule membranous and truncate, leaf blade flat and linear, inflorescence spicate dense and elliptic, spikelets in triplets and heteromorphic, lateral spikelets male and pedicellate, central spikelet female and sessile, hermaphrodite florets 1 per spikelet, cleistogamous spikelets, male spikelet with glumes unequal, female spikelet with glumes equal, lemmas of the lateral spikelets much longer than the glumes, 2 lodicules free and hyaline, anthers of the central floret usually black, pilose fruit elliptical or obovoid, pasture species, a widespread weed of disturbed sites, waste ground, grazed woodlands and shrublands, host to several cereal diseases, its sharp seeds can enter the eyes and the skin of sheep, closely resembling *Hordeum leporinum* Link, see *Species Plantarum* 1: 85. 1753, *Essai d'une Nouvelle Agrostographie* 115, 182. 1812, *Linnaea* 9(1): 133. 1834, *Synopsis Plantarum Glumacearum* 1: 352. 1854 and *Iter Maroc.* 96. 1927, *Madroño* 10(1): 17-19, pl. 2. f. 8, 12, 13. 1949, *Can. Hordeum maritimum subsp. *hystrix* (Roth) Dostál; *Hordeum maritimum* var. *gussonianum* (Parl.) K. Richt.)

Central and Southwest Asia, Mediterranean. Annual, small, solitary or tufted, erect or geniculate, auricles absent, leaf sheaths not keeled, ligule membranous to hyaline, leaf blade flat and hairy to downy, trichomes on the sheaths of lower leaves, spikes ovate to oblong-ovate and bristly, spikelets heteromorphic and strongly imbricate, 1 floret, lateral spikelets barren with stiff and bristle-like glumes, central spikelet fertile and sessile, lemmas unarmed or awned, membranous to chartaceous palea narrowly oblong or narrowly ovate to narrowly elliptic, 2 free and hyaline lodicules, purplish anthers, ovary pilose, fruit ovoid, weed of disturbed ground, swamps, sandy and saline soils, often confused with *Hordeum marinum* Hudson, see *Species Plantarum* 1: 560. 1753, *Flora Anglica, Editio Altera* 1: 57. 1778, *Flora Pedemontana* 2: 259, 3: t. 91, f. 3. 1785, *Catalecta Botanica* 1: 23. 1797, *Flora Palermitana* 1: 246. 1845, *Plantae Europaeae* 1: 131. 1890 and *Synopsis der mitteleuropäischen Flora* 2: 737. 1902, *Botanisch Jaarboek* 40: 109. 1907, *Vierteljahrsschrift der Naturforschenden Gesellschaft in Zürich* 52: 441. 1908, *Botaniska Notiser* 1953(3): 359. 1953, *Flora Republicii Socialiste Romania* 12: 591. 1972, *Acta Botanica Academiae Scientiarum Hungaricae* 17(1-2): 120. 1971[1972], *Taxon* 29(2/3): 350. 1980, *Boletim da Sociedade Broteriana* 54: 240 (1980-81). 1981, *Feddes Repertorium* 95(7-8): 440. 1984, *American Journal of Botany* 72(5): 772. 1985, *Citol. in English: Mediterranean barley, Mediterranean barley grass

H. intercedens Nevski (*Hordeum pusillum* var. *euclaston* (Steud.) Hauman)

U.S., Mexico, southwest California. Annual, rare, loosely caespitose, erect to geniculate, auricles usually absent or tiny, leaf blades sparsely to densely pubescent, pale green spikes, lateral spikelets usually sterile, found in alkaline flats, vernal pools, in flooded and often saline river beds, see *Synopsis Plantarum Glumacearum* 1: 353. 1854 and *Anales Museo Nacional de Historia Natural de Buenos Aires* 28: 297. 1916, *Canadian Journal of Botany* 66: 401-408. 1988, *Genome* 32: 1124-1127. 1989, *Annals of Botany* 73: 471-479. 1994.

in English: bobtail barley, little barley, vernal barley

H. jubatum L. (*Critesion geniculatum* Raf.; *Critesion jubatum* (L.) Nevski; *Critesion jubatum* subsp. *jubatum*; *Elymus jubatus* (L.) Link; *Hordeum caespitosum* Scribn.; *Hordeum*

North America, U.S., Mexico, Northeast Asia. Short-lived perennial or rarely annual, riparian, erect or spreading, densely tufted, stems numerous or solitary, fibrous roots, extensive root system, sheaths glabrous to pubescent, auricles absent, leaf blades scabrous, whitish green to light purplish inflorescences, bristly and soft nodding spikes, lateral spikelets asexual or staminate, long awns straight and silky, prolific seeder, weed species, aggressive, highly ornamental, useful for erosion control, potential for revegetation, pasture grass, sometimes injurious to stock, grows in meadows and prairies around riverbeds and seasonal lakes, on the edges of sloughs and salt marshes, basins, drawdown areas, irrigated pastures and ditches, dry old fields, waste ground, moist places along roadsides, railroads, disturbed sites, often in saline or alkaline habitats, beaches and salt marshes, in grain and hay fields, grassy slopes, flatlands, see *Species Plantarum* 1: 85. 1753, *Journal de Physique, de Chimie, d'Histoire Naturelle et des Arts* 89: 103. 1819, *Hortus Regius Botanicus Berlinensis* 1: 19. 1827, *Reliquiae Haenkeanae* 1(4-5): 327. 1830, *Flora Antarctica* 2: 388. 1847, *Mission Scientifique du Cap Horn, Botanique* 5: 389. 1889, *Revisio Generum Plantarum* 3: 355. 1898, *Proceedings of the Davenport Academy of Natural Sciences* 7: 245. 1899 and *Contr. Richt.; *Hordeum murinum* var. *leporinum* (Link) Arcang.; *Hordeum murinum* var. *velutinum* Speg.; *Hordeum pseudomurinum* Tapp.; *Hordeum rubens* Willk.)

Europe, Asia, Mediterranean. Annual, tufted, erect, spreading or nearly prostrate, auricles absent or present and encircling culm at base, ligule membranous and truncate, leaf sheaths keeled and glabrous, leaf blade flat, dense single erect flowering spike, spikelets heteromorphic and distichous, floret 1, central spikelet fertile with a lanceolate lemma and a straight terminal awn, lateral spikelets barren or male or neuter, anthers of the central floret usually pale, male spikelet with glumes unequal, female spikelet sessile and with glumes equal, lemmas of the lateral spikelets much

longer than the glumes, palea membranous to chartaceous, anthers pale to dark, ovary pilose, yellow obovoid grain, fodder, a widespread weed of crops and pastures, common on disturbed soil of roadsides, lawns, road verges and irrigation ditches, in shade of trees or shrubs, the spikelets a nuisance to man and beast and a contaminant of wool, spear-like seeds highly injurious to sheep, seeds 200 years old found to be viable, see *Species Plantarum* 1: 85. 1753, *Revista de la Facultad de Agronomia y Veterinaria* 30-31: 588. 1822, *Voyage autour du Monde* 2: 56. 1831, *Linnaea* 9(1): 133. 1834, *Synopsis Florae Germanicae et Helveticae (edition 2)* 955. 1845, *Österreichische Botanische Zeitschrift* 25: 109. 1875, *Flora Brasiliensis* 2(3): 231, f. 57. 1880, *Compendio della Flora Italiana* 805. Northern America, U.S., Canada, Mexico. Annual, short, loosely caespitose, erect, fibrous roots, leaf sheaths glabrous to weakly pubescent, auricles usually absent, leaves elongate and narrow, green to yellowish inflorescences, spike bristly, lateral spikelets usually sterile, straight awns, poor grazing, eaten by livestock, the awns on the spikelets may cause injury to the mouths of the animals, found along roadsides, in full sun, roadside ditches and roadside banks, disturbed places, grassy areas, marsh borders, open grasslands, pastures, waste places, saline plains, swamps, see *The Genera of North American Plants* 1: 87. 1818, *Synopsis Plantarum Glumacearum* 1: 353. 1854 [1855] and *Anales Museo Nacional de Historia Natural de Buenos Aires* 28: 266, 297. 1916, *Journal of the Washington Academy of Sciences* 23(10): 453. 1933, *Flora de la Provincia de Buenos Aires* 4(2): 184. 1970, *Taxon* 29(1): 166. 1980, *Annals of Botany* 73: 471-479. 1994.

in English: little barley, mouse barley

H. roshevitzii Bowden (*Critesion californicum* subsp. *sibiricum* Á. Löve; *Hordeum sibiricum* Roshev., nom. illeg., non *Hordeum sibiricum* (L.) Schenck)

Asia, China, Russia, Mongolia. Perennial, slender spikes, see *Canadian Journal of Genetics and Cytology* 7: 395. 1965, *Feddes Repertorium* 95(7-8): 438. 1984, *Willdenowia* 16: 479-490. 1987, *Genome* 32: 1124-1127. 1989, *Hereditas; genetiskt arkiv.* 112: 109-116. 1990, *Acta Botanica Yunnanica* 12: 57-66. 1990.

H. secalinum Schreber (*Critesion secalinum* (Schreb.) Á. Löve; *Hordeum nodosum* auct., non L.; *Hordeum nodosum* L.; *Hordeum pratense* Huds.)

Europe, North Africa. Perennial, tufted, hairy, erect, slender, ligule short and truncate, sheaths always hairy to densely pubescent, auricles present, blade rolled when young, slender spike-like inflorescence, spikelets aristate and clustered per 3, central spikelet sessile, 1 flower bisexual, lateral spikelet usually staminate, weed species, tolerates drought, growing on clay soils, in moist saline areas, on normally drained soils, in coastal meadows, see *Centuria II. Plantarum ...* 115. 1756, *Species Plantarum, Editio Secunda* 1: 126. 1762, *Spicilegium Florae Lipsicae* 148. 1771, *Flora Anglica, Editio Altera* 56. 1778, *Flora Antarctica* 2: 388. 1847, *Flora Chilena* 6: 458. 1854, *Abhandlungen der Königlichen Gesellschaft der Wissenschaften zu Göttingen* 24: 285. 1879, *Revisio Generum Plantarum* 3(3): 355. 1898 and *Anales del Museo Nacional de Buenos Aires* 13: 533.

Eurasia. Annual, largely variable, loosely to densely tufted, usually erect, robust, rough-awned, auricles present, ligule membranous and obtuse, lower sheaths pilose or glabrous, leaf blade flat and ribbed, seminal roots and nodal roots, inflorescence a terminal cylindrical spike, 3 spikelets at each inflorescence node, central spikelet sessile, a single spikelet dense and oblong, cleistogamous and heteromorphic spikelets, floret 1, all the spikelets of the triplet fertile, incomplete florets morphologically similar to hermaphrodite florets, central spikelets and often the lateral spikelet fertile, lateral spikelets sterile, 2 glumes subulate tapering to an awn, palea 2-keeled and narrowly elliptic to narrowly obovate, 2 lodicules, 3 stamens, ovary pilose, 2 plumose white stigmas, grain crop species widely domesticated and cultivated, straw as fodder for livestock, stir-baked as a digestive and lactifuge, used raw as a carminative, a cooling drink from the grains (*sattu*, in India), useful for erosion control on disturbed sites, food and forage crop, numerous cultivars are grown throughout the temperate regions of the world, occurs as a weed on roadsides and rail verges, in low-moisture areas, waste areas, damp soil, see *Species Plantarum* 1: 84-85. 1753, *Syn. Pl.* 1: 108. 1805, *A Botanical Materia Medica* 1: 166. 1812, *Essai d'une Nouvelle Agrostographie* 115,165,182. t. 21. f. 2. 1812, *Flora Friburgensis* 1: 168. 1825, *Linnaea* 11(4): 543-544. 1837, *Illustrations of the Botany ... of the Himalayan Mountains and of the Flora of Cashmere ...* 1(11): 418. Houzeaubambus Mattei = *Oxytenanthera* Munro

Bambusoideae, Bambusodae, Bambuseae, Bambusinae, type *Houzeaubambus borzii* (Mattei) Mattei, see *Tent. Fl. Abyss.* 2: 439. 1850, *Transactions of the Linnean Society of London* 26(1): 126-127. 1868, *Die Natürlichen Pflanzenfamilien* 2(2): 96. 1887 and *Lexicon* 509. 1903, *Die Natürlichen Pflanzenfamilien*, Nachtrag 3: 21. 1906, *Boll. Soc. Ort. Mutuo Soccorso*. Palermo 8(6): 84. 1910, *Taxon* 6(7): 206. 1957, *Kyoto University African Studies* 7: 37-129. 1972, *Kyoto University African Studies* 10: 143-212. 1976, *Indian Forester* 109: 306-308. 1983, *African Studies Monographs* 3: 109-130. 1983.

Hubbardia Bor

For the British botanist Charles Edward Hubbard, 1900-1980, gardener, authority on grasses, from 1920 Kew Gardens, 1930 collected plants in Australia, 1935 Fellow of the Linnean Society, 1956-1957 President Kew Guild, contributed to *Flora of Tropical Africa* (Gramineae). 1937, his writings include "Vasey-grass in Africa (*Paspalum larranagai* Arech.)." *Kew Bull.* 94-96. 1926, "Notes on African grasses: XV." *Bull. Misc. Inform.* 1934(3): 107-119. 1934, "Key to the genera of the Eragrosteae." *Hooker's Icon. Pl.*

34: 3-9. 1936, "*Eremochloa eriopoda* C.E. Hubbard. (Siam and Indo-China)." *Hook. Icon. Pl.* 34(4): pl. 3376. 1939, "Malayan Grasses." *Kew Bull. Misc. Inf.* (1), Art. VI: 24-25. 1941 and *Grasses. A guide to their structure, identification, uses, and distribution in the British Isles*. Third edn., revised by J.C.E. Hubbard. Bungay 1984, with R.E. Vaughan wrote *The Grasses of Mauritius and Rodriguez*. London 1940. See *Pacific Sci.* 23(1): 104. 1969; *Contr. Queensland Herb.* 4: 2. 1969; J.H. Barnhart, *Biographical notes upon botanists*. 2: 213. 1965; S. Lenley et al., *Catalog of the manuscript and archival collections and index to the correspondence of John Torrey*. Library of the New York Botanical Garden. 233. Boston, Mass. 1973; Elmer Drew Merrill, *Contr. U.S. Natl. Herb.* 30(1): 163. 1947; T.W. Bossert, compil., *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 185. 1972; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. 380. Philadelphia 1964; Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 361. 1994; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993.

One species, southern India, Sharavati River, Karnataka, Maharashtra. Panicoideae, Panicodae, Isachneae, or Hubbardieae, annual, slender, delicate, stoloniferous, herbaceous, flimsy, trailing, pendulous, rooting at the nodes, translucent leaves, auricles absent, ligule absent, leaf blades narrowly elliptic, plants bisexual, small inflorescence paniculate, slender axillary panicle, spikelets all alike, 2-flowered, the incomplete florets proximal to the female-fertile florets, the proximal incomplete florets 1, 2 glumes subequal or more or less equal and veined, lower glume and upper glume 5-7-nerved, lemmas membranous rounded on back, paleas absent, 2 free and fleshy lodicules, 3 stamens, ovary glabrous, 2 stigmas, endangered grass species, moist places, wet soils, high humidity, type *Hubbardia heptaneuron* Bor, see *Kew Bulletin* 1950: 385-388. 1951, *Grasses of Burma, Ceylon, India and Pakistan ...* 572-573. 1960, *Kew Bulletin* 21: 169-174. 1967, Sandra S. Aliscioni, Liliana M. Giussani, Fernando O. Zuloaga and Elizabeth A. Kellogg, "A molecular phylogeny of *Panicum* (Poaceae: Paniceae): tests of monophyly and phylogenetic placement within the Panicoideae." *Am. J. Bot.* 90: 796-821. 2003.

Species

***H. heptaneuron* Bor**

India, Gersoppa waterfalls, Western Ghats, Karnataka. This species, of great botanical interest, reported as probably extinct after dam construction on the river and the drying of Jog Falls, recently rediscovered in Kolhapur district, see *Kew Bulletin* 1950: 385. 1951, M.P. Nayar & A.R.K. Sastry (eds.), *Red Data Book of Indian Plants*. vol. 1: 303. Calcutta, Botanical Survey of India 1987.

Hubbardochloa Auquier = Muhlenbergia Schreb.

For the British botanist Charles Edward Hubbard, 1900-1980.

One species, Africa, Burundi, Zambia, Rwanda. Chloridoideae, annual, herbaceous, branched, slender, auricles absent, ligule fringed or ciliate, plants bisexual, cleistogamous or chasmogamous, inflorescence paniculate, panicle open, spikelets solitary fusiform rounded, 2 glumes more or less equal, glumes 1-nerved and acute, lemma 1-nerved with a long flexuous terminal awn, palea and lodicules absent, 3 stamens, ovary glabrous, 2 stigmas, open habitats, savannah, slopes, stony places, type *Hubbardochloa gracilis* Auquier, see *Genera Plantarum* 44. 1789, *Systema Naturae ... editio decima tertia, aucta, reformata* 2: 171. 1791 and *Ill. Fl. N. U.S.* (edition 2) 1: 184. 1913, J.H. Barnhart, *Biographical notes upon botanists*. 2: 213. 1965, *Bulletin du Jardin Botanique National de Belgique* 50(1-2): 241-242. 1980, *Flora Mesoamericana* 6: 276-286. 1994, *American Journal of Botany* 81: 622-629. 1994, *Madroño* 42(4): 427-449. 1995, *Sida* 17: 349-365. 1996, *Brittonia* 50(1): 23-50. 1998, P.M. Peterson, "Systematics of the Muhlenbergiinae (Chloridoideae: Eragrostidae)." *Grasses: Systematics and Evolution* 195-212. 2000, *Contributions from the United States National Herbarium* 41: 143-173. 2001.

Species

H. gracilis Auquier

Africa. See *Bulletin du Jardin Botanique National de Belgique* 50(1-2): 242. 1980.

Humbertochloa A. Camus and Stapf

Named for the French botanist Henri Humbert, 1887-1967, botanical traveler, explorer of Madagascar, his writings include *Les composées de Madagascar*. Caen 1923, *La destruction d'une flore insulaire par le feu. Principaux aspects de la végétation à Madagascar*. [in *Mémoires de l'Académie Malgache*. fasc. 5] Tananarive 1927 and "François Gagnepain, in Memoriam." *Not. Syst.* 14(4): 221-229. 1952, editor and joint author of *Flore de Madagascar et des Comores*. 1936-1967, with F. Gagnepain wrote *Supplément à la Flore générale de l'Indo-Chine*. vol. 1: 1-1027, f. 1-131. Paris 1938-1951; see J.H. Barnhart, *Biographical notes upon botanists*. 2: 218. 1965; T.W. Bossert, compil., *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 186. 1972; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. Philadelphia 1964; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 729. Stuttgart 1993; Mary Gunn and Leslie E. Codd, *Botanical Exploration of Southern*

Africa. 194. 1981; Laurence J. Dorr, *Plant Collectors in Madagascar and the Comoro Islands*. 214-218. 1997.

Two species, Madagascar, Tanzania, tropical East Africa. Bambusoideae, Oryzodae, Phyllorhachideae, perennial, cane- or bamboo-like, unarmed, persistent, woody, suffrutescent, leafy, branched, slender, auricles absent, ligule a very short membrane with ciliate fringe, leaves cordate, plants monoecious, inflorescence unisexual, with or without hidden cleistogenes, all the fertile spikelets unisexual, female spikelet 2-flowered with rachilla extension, 2 glumes very unequal or unequal, lower glume nerveless, upper glume 5-7-nerved, lower floret reduced to a lemma, lower lemma of female spikelet rounded, upper lemma awnless, palea keeled, lodicules 2, male florets 3-6 staminate, stamens absent or 3 to 6, ovary glabrous, 2 stigmas, in forest shade, forest floor, type *Humbertochloa bambusiuscula* A. Camus & Stapf, see *J. Bot.* 17: 353. 1879 and *Bulletin de la Société Botanique de France* 81: 467-472. 1934, *Hooker's Ic. Pl.* 34: t. 3386. 1939, *Botanical Magazine* (Tokyo) 69: 83-86. 1956, *Bulletin de la Société Botanique de France* 108: 158-163. 1961.

Species

H. bambusiuscula A. Camus & Stapf

Madagascar. Rhizomatous, inflorescence exserted, see *Bulletin de la Société Botanique de France* 81: 470. 1934.

H. greenwayi C.E. Hubbard (dedicated to the South African (b. Transvaal) botanist Percy (Peter) James Greenway, 1897-1980. See Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 295. 1994; F. Nigel Hepper, "Botanical collectors in West Africa, except French territories, since 1860." in *Comptes Rendus de l'Association pour l'étude taxonomique de la flore d'Afrique*. 69-75. 1962; Mary Gunn and Leslie E. Codd, *Botanical Exploration of Southern Africa*. 103. 1981; F.N. Hepper and Fiona Neate, *Plant Collectors in West Africa*. 13. 1971)

Tanzania. See *Hooker's Icones Plantarum* 34: t. 3387. 1939.

Hyalopoa (Tzvelev) Tzvelev = Colpodium Trin.

From the Greek *hyalos* "glass" and *poa* "grass, pasture grass."

About 4-7 species, Eurasia, Caucasus, Turkey, northwest Himalaya, northeast Siberia. Pooideae, Podaceae, Aveneae, perennial, herbaceous, unbranched or branched, caespitose, plants bisexual, open inflorescence paniculate nodding, spikelets flattened, 2 glumes very unequal or more or less equal, lower glume 1-nerved, upper glume 1-3-nerved, palea present, 2 free and membranous lodicules, 3 stamens, ovary glabrous, 2 white stigmas, moist areas, upland, species of open moist habitats, type *Hyalopoa pontica* (Balansa) Tzvelev, see *Fundamenta Agrostographiae* 119, t. 7.

1820, *Neue Entdeckungen im ganzen Umfang der Pflanzenkunde* 2: 37, 58. 1821 and *Grasses of Burma* ... 1960, *Arkticheskaia Flora SSSR* [Flora of the Russian Arctic] 2: 172. Akademija nauk SSSR Leningrad 1964, *Bot. Zhurn. (Moscow & Leningrad)* 50(9): 1320. 1965, *Zlaki SSSR* 485. 1976, *Sosudistye Rasteniia SSSR* 363. 1981, *Flora of Turkey and the East Aegean Islands* 9: 486-501. 1985, *Nordic Journal of Botany* 14(6): 601-607. 1994.

Species

H. czirahica Sh. A. Guseinov

Caucasus. See *Bot. Zhurn. (Moscow & Leningrad)* 73(12): 1743. 1965.

H. ivanoviae (Malyshev) Czer. (*Colpodium ivanoviae* Malyshev; *Hyalopoa lanatiflora* subsp. *ivanoviae* (Malyshev) Tzvelev)

Russia. See *Novosti Sistematiki Vysshchikh Rastenii* 7: 295. 1970[1971].

H. lakia (Woronow) Tzvelev (*Colpodium lakium* Woronow)

Russia. See *Trudy Bot. Inst. Akad. Nauk S.S.S.R., Ser. I, Fl. Sist. Vyssh. Rast.* 1: 214. 1933, *Novosti Sistematiki Vysshchikh Rastenii* 1966: 32. 1966.

H. lanatiflora (Roshev.) Tzvelev (*Colpodium lanatiflorum* (Roshevitz) Tzvelev; *Poa lanatiflora* Roshev.)

Russia. See *Flora Arctica URSS* 2: 172. 1964 [also *Arkticheskaia Flora SSSR* [Flora of the Russian Arctic] 2: 172. Akademija nauk SSSR Leningrad 1964], *Novosti Sist. Vyssh. Rast.* 1966: 32. 1966.

H. momica (Tzvelev) Czer. (*Colpodium lanatiflorum* subsp. *momicum* Tzvelev; *Hyalopoa lanatiflora* subsp. *momicum* (Tzvelev) Tzvelev)

Russia. See *Sosudistye Rasteniia SSSR* 363. 1981.

H. nutans (Stapf) Alexeev ex T.A. Cope (*Catabrosa nutans* Stapf; *Colpodium nutans* (Stapf) Bor; *Hyalopoa nutans* Tzvelev)

Pakistan. See *The Flora of British India* 7: 312. 1896 and *Novosti Sist. Vyssh. Rast.* 1966: 33. 1966, *Flora Iranica: Flora des Iranischen Hochlandes und der Umrahmenden Gebirge: Persien, Afghanistan, Teile von West-Pakistan, Nord-Iraq, Azerbaidjan, Turkmenistan.* 70: 54. Rechinger, Karl Heinz. Graz 1970, *Flora of Pakistan* 143: 423. 1982.

H. pontica (Balansa) Tzvelev (*Catabrosa pontica* Balansa; *Colpodium ponticum* (Balansa) Woronow; *Poa alboviolacea* Balansa; *Poa capillipes* Somm. & Lev.)

Eurasia, Caucasus. Shade tolerant, see *Bulletin de la Société Botanique de France* 21: 15. 1874, *Trudy Imperatorskago Saint Peterburgskago Botaniceskago Sada* [also *Acta Horti Petropolitani* 16: 45. 1900] 13(1): 52. 1893 and *Bot. Zhurn. (Moscow & Leningrad)* 50: 1320. 1965.

Hydrochloa Hartm. = *Glyceria* R. Br.

From the Greek *hydor* "water" and *chloe, chloa* "grass," the habitat.

Pooideae, Meliceae, type *Hydrochloa fluitans* (L.) Hartm., see *Species Plantarum* 1: 67. 1753, *Prodromus Florae Novae Hollandiae* 179. 1810, *Genera Graminum Scand.* 8. 1819, *Journal de Physique, de Chimie, d'Histoire Naturelle et des Arts* 89: 106. 1819, *Observations sur les Graminées de la Flore Belge* 111. 1824, *Flora Posoniensis* 119. 1830, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 367. 1833, *Floram Scanicam* 202. 1835, *Nomenclator Botanicus. Editio secunda* 2: 356. 1841, *Syn. Pl. Glum.* 1: 287, 317. 1854, *Bull. Soc. Roy. Bot. Belgique* 7: 67. 1868, *Gen. Pl.* 3(2): 1197. 1883 and *Aquatic and Wetland Plants of Southeastern United States Monocotyledons* 1-712. 1979, *Contr. U.S. Natl. Herb.* 48: 371-379, 402. 2003.

Hydrochloa P. Beauv. = *Luziola* Juss.

From the Greek *hydor* "water" and *chloe, chloa* "grass," referring to the habitat.

One species, southeast U.S. Bambusoideae, Oryzodae, Oryzeae, or Ehrhartoideae, Oryzeae, Luziolinae, perennial, aquatic, herbaceous, branched, slender, floating, trailing, auricles present, ligule an unfringed membrane, plants monoecious, panicles or racemes, male and female-fertile spikelets in different inflorescences, all the fertile spikelets unisexual, male spikelets without glumes, male florets 6 staminate, glumes absent, palea present, stamens 0, 2 stigmas, type *Hydrochloa caroliniensis* P. Beauv., see *Genera Plantarum* 33. 1789, *Systema Naturae ... editio decima tertia, aucta, reformata* 2: 637. 1791, Ambroise Marie François Joseph Palisot de Beauvois (1752-1820), *Essai d'une nouvelle Agrostographie, ou nouveaux genres des Graminées.* 135, 165, 182, pl. 3. f. 18, pl. 24, f. 4. Paris 1812, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 11. 1833 and *Manual of the Southeastern Flora* 1933, *Annals Missouri Botanical Garden* 52: 472-475. 1965, R.W. Long & O. Lakela, *A Flora of Tropical Florida* 1971, *Bulletin Torrey Botanical Club* 101(5): 244. 1974, R.K. Godfrey & J.W. Wooten, *Aquatic and Wetland Plants of Southeastern United States Monocotyledons* 1-712. 1979, *Flora Novo-Galiciana* 14: 1-436. 1983, *Flora Mesoamericana* 6: 222-223. 1994, *Contributions from the United States National Herbarium* 39: 69-71. 2000, Song Ge et al., "A phylogeny of the rice tribe Oryzeae (Poaceae) based on *matK* sequence data." *Am. J. Bot.* 89: 1967-1972. 2002.

SPECIES:

H. caroliniensis P. Beauv. (*Hydrochloa fluitans* (Michx.) Torr., nom. illeg., non *Hydrochloa fluitans* (L.) Hartm.; *Hydropyrum fluitans* (Michx.) Kunth; *Luziola caroliniana*

Trin. ex Steud.; *Luziola caroliniensis* (P. Beauv.) Raspail; *Luziola fluitans* (Michx.) Terrell & H. Rob.; *Zizania fluitans* Michx.; *Zizania natans* Bosc ex Trin.; *Zizania natans* Michx. ex P. Beauv.)

U.S. Stream banks, ponds, marshes, see *Flora Boreali-Americana* 1: 75. 1803, *Essai d'une Nouvelle Agrostographie* 135, 165, 182, pl. 3. f. 18, pl. 24, f. 4. 1812, *Annales des Sciences Naturelles (Paris)* 5: 304. 1825, John Torrey (1796-1873), *Compendium of the Flora of the Northern and Middle States* 354, 403. New York 1826, *Révision des Graminées* 1: 7. 1829, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 5,3(4): 186. 1839 [1840 Feb], *Nomenclator Botanicus. Editio secunda* 2: 79. 1841 and *Contr. U.S. Natl. Herb.* 12: 156. 1908, *Bulletin of the Torrey Botanical Club* 101(5): 244. 1974, *Phytologia* 48(1): 77, 79. 1981, *Journal of the Arnold Arboretum* 69(3): 272. 1988.

Hydropoa (Dumort.) Dumort. = *Glyceria* R.
Br.

From the Greek *hydor* “water” and *poa* “grass, pasture grass.”

Pooideae, Meliceae, *Glyceria* sect. *Hydropoa* Dumort. (*Poa* sect. *Hydropoa* Dumort.), see *Prodromus Florae Novae Hollandiae* 179. 1810, *Observations sur les Graminées de la Flore Belgique* 110-111. 1824, *Bull. Soc. Roy. Bot. Belgique* 7: 67. 1868, *Gen. Pl.* 3(2): 1197. 1883 and *Aquatic and Wetland Plants of Southeastern United States Monocotyledons* 1-712. 1979, *Contr. U.S. Natl. Herb.* 48: 371-379, 402. 2003.

Hydropyrum Link = *Zizania* L.

From the Greek *hydor* “water” and *pyros* “grain, wheat.”

Ehrhartoideae, Oryzaceae, *Zizaniinae*, type *Hydropyrum esculentum* Link, see *Species Plantarum* 2: 991. 1753, *Fam. Pl.* 2: 37. 1763, John Mitchell, 1711-1768, *Dissertatio brevis de principiis botanicorum et zoologorum...* 32. Nürnberg 1769, Johann Heinrich Friedrich Link (1767-1851), *Enumeratio plantarum horti regii berolinensis altera*. 1: 252. Berolini [Berlin] 1827, *Handbuch zur Erkennung der nutzbarsten und am häufigsten vorkommenden Gewächse*. 1: 96. 1829, *Journal of the Linnean Society, Botany* 19: 54. 1881 and *American Midland Naturalist* 4: 214. 1915, *U.S.D.A Bull.* 772: 18. 1920, *Canada Department of Agriculture Publications [Publications, Department of Agriculture, Canada]* 1393: 1-84. Ottawa 1960, *Journal d'Agriculture Traditionnelle et de Botanique Appliquée [J.A.T.B.A.]* 25: 67-84 Paris 1978, *The Flora of Canada* 2: 93-545. 1978 [1979], *Econ. Botany* 36: 274-285. 1982,

Proceedings of the International Symposium on Botanical Gardens 593-605. Nanjing 1988, *Phytologia* 72: 6. 1992, *Sida* 17(3): 533-549. 1997, *Newslett. Int. Organ. Pl. Biosyst. (Oslo)* 30: 10-15. 1999, *Contributions from the United States National Herbarium* 39: 116-118. 2000.

Hydrothauma C.E. Hubb.

From the Greek *hydor* “water” and *thauma*, *thaumatos* “a wonder, marvel.”

One species, southern tropical Africa. Panicoideae, Panicodae, Paniceae, annual, aquatic, herbaceous, branched, floating, emergent, leaves pseudopetiolate, leaf blades linear with longitudinal lamellae, ligule an unfringed membrane, plants bisexual, short inflorescence racemose or paniculate, slender spiciform panicle, paired spikelets dorsally compressed, 2 glumes unequal or very unequal, upper glume gibbous 7- to 9-nerved, lower glume truncate nerveless, upper lemma without basal wings or scars, palea present, 2 free and fleshy lodicules, 3 stamens, ovary glabrous, 2 stigmas, pools, ponds, shallow water, related to *Sacciolepis*, type *Hydrothauma manicatum* C.E. Hubb., see *Hooker's Icones Plantarum* 35: t. 3458. 1947.

Species

H. manicatum C.E. Hubb.

Zambia, Zaire. See *Hooker's Icones Plantarum* 35: t. 3458. 1947.

Hygrochloa Lazarides

From the Greek *hygros* “damp, wet” and *chloe*, *chloa* “grass,” aquatics.

Two species, North Australia. Panicoideae, Panicodae, Paniceae, annual or perennial, aquatic or semiaquatic, herbaceous, erect, submerged or not submerged, floating, decumbent, internodes hollow, auricles absent, ligule a fringe of hairs, plants monoecious, inflorescence spicate with racemes of female spikelets below and solitary male spikelets above, male florets 1-3 staminate, male and female-fertile spikelets on different branches of the same inflorescence, male spikelets with glumes, 2 glumes unequal or very unequal, lower glume 0-3-nerved, upper glume 5-7-nerved, palea awnless 1-nerved 2-keeled, 2 free and fleshy lodicules, stamens 0, ovary glabrous, 2 stigmas, see M. Lazarides, “*Hygrochloa*, a new genus of aquatic grasses from the Northern Territory.” *Brunonia*. 2: 85-91. 1979, R.D. Webster, *Austral. Paniceae (Poaceae)* 1-322. 1987.

Species

H. aquatica Lazarides

Northern Territory, Darwin and Gulf District. Annual or short-lived perennial, aquatic, floating or submerged culms, probably grazed by buffaloes, see *Brunonia* 2: 86-87. 1979.

H. cravenii Lazarides (for the Australian botanist Lindley Alan Craven, b. 1945, Research Botanist in the Australian National Herbarium, Centre for Plant Biodiversity Research, 1984 Degree of Master of Science, Macquarie University, Sydney)

Northern Territory, Darwin and Gulf District. See *Brunonia* 2: 89. 1979.

Hygrorrhiza Benth. = *Hygroryza* Nees

From the Greek *hygros* “damp” and *rhiza* “a root,” see *J. Linn. Soc. Bot.* 19: 55. 1881.

Hygroryza Nees = *Potamochoa* Griff.

From the Greek *hygros* “damp, moist” and *oryza* “rice.”

One species, through Southeast Asia, India to Sri Lanka, including southern China. Bambusoideae, Oryzodae, Oryzeae, perennial, aquatic, floating on the surface of the water or creeping on wet ground, herbaceous, spongy, diffusely branched or unbranched, stoloniferous, glabrous, leafy, feathery adventitious roots arising from the nodes, auricles absent, leaf sheaths inflated and bladder-like, ligule an unfringed membrane, leaf blades broad and blunt, plants bisexual, open inflorescence, spikelets solitary, few-spikeleted panicle, base enclosed by uppermost leaf sheath, spikelets with 1 floret, spikelets with female-fertile florets only, long slender stipe derived from floret callus, glumes usually lacking, papery lemma lanceolate and strongly 5-veined, slender awn, palea acuminate, 2 free and membranous lodicules, stamens 6, ovary glabrous, 2 stigmas, forming floating masses, type *Hygroryza aristata* (Retzius) Nees ex Wright & Arn., see *Nomenclator Botanicus* (edition 2) 1: 783. 1841, *Edinburgh New Philosophical Journal* 15: 380. 1833, *Journal of the Asiatic Society of Bengal* 5: 571, t. 24. 1836, *J. Linn. Soc. Bot.* 19: 55. 1881 and *Cytologia* 56: 95-102. 1991, *Am. J. Bot.* 89: 1967-1972. 2002.

Species

H. aristata (Retzius) Nees ex Wright & Arn. (*Hygroryza aristata* (Retz.) Nees; *Leersia aristata* Roxb.; *Leersia aristata* (Retzius) Roxb.; *Pharus aristatus* Retz.; *Potamochoa aristata* (Retz.) Griff. ex Steud.; *Potamochoa retzii* Griff.; *Zizania aristata* (Retz.) Kunth; *Zizania retzii* Spreng.) (for the Swedish botanist Anders Jahan (Johan) Retzius, 1742-1821, naturalist, entomologist, professor of natural history at the University of Lund; see J.H. Barnhart, *Biographical notes upon botanists*. 3: 146. 1965; T.W. Bosser, compil., *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 329. Boston,

Utrecht 1983)

Asia, Taiwan, India, China. Perennial, aquatic, floating, glabrous, diffusely branched, creeping, spongy long stems, lower portions usually submerged, rooting at the nodes, leaf sheaths inflated, leaf blades elliptic, ligule membranous, inflorescence a panicle with whorled branches, narrow spikelets 1-flowered, glumes none, coriaceous lemma acuminate and long-awned, palea keeled, 6 stamens, shade species forming extensive floating mats, whole plant a good fodder relished by cattle and buffaloes, grains sweet and oleaginous eaten in times of scarcity, seeds cooling and astringent, weed in rice, growing in ponds and lakes, navigation canals, muddy areas, slow-moving streams, shallow water, marshes, rivers, wet ground, canals, irrigation canals, see *Observationes Botanicae* 5: 23. 1789, *Hortus Bengalensis, or a Catalogue ...* 26. 1814, *Systema Vegetabilium, editio decima sexta* 2: 136. 1825, *Révision des Graminées* 1: 8. 1829, *Edinburgh New Philosophical Journal* 15: 380. 1833, *Journal of the Asiatic Society of Bengal* 5: 571, t. 24. 1836, *Synopsis Plantarum Glumacearum* 1: 4. 1855 [1853] and *Handb. in English: Bengal wild rice

in India: aranyadhaanya, aranyadhanya, aranyajali, deobhaatha, deobhata, devadhaana, erra changala gaddi, janglidal, jyarahu medhe, iyarahumedhe, kaadu bili sajjabu hullu, munidhaanya, neervallipullu, nirvallipullu, nivaara, nivara, nyare hullu, parsal, passahi, passai, passari, pastal, phasai, phutki, prosadhika, putidal, thili, thini, thrinadhaanya, thrinodbhava, tinni, uridhan, valli pullu, vallipullu, vanavrihi, vanti

in Sri Lanka: go jabba

in Thailand: puu chao loi thaa, pu chao loi tha, puchaoloitha, ya phong lom, yaa phong lom, ya-phonglom

in Vietnam: thia thia

Hylebates Chippindall

Greek *hyle* “a wood, woodland” and *bates* “one that treads or covers,” *baino* “to go, walk,” *hylobates* “one who haunts the woods.”

Two species, central Africa. Panicoideae, Panicodae, Paniceae, annual or perennial, herbaceous, decumbent, ligule a fringed membrane, plants bisexual, open inflorescence paniculate, capillary branchlets, spikelets flattened, upper floret acute, 2 glumes very unequal and very dissimilar, lower lemma briefly awned, palea present, 2 fleshy lodicules, 3 stamens, 2 stigmas, native pasture species, forest, shade species, riverine forest, woodland, resembles *Panicum*, type *Hylebates cordatus* Chippindall, see *Journal of South African Botany* 11: 127. 1945, *Flora of Tropical East Africa* 451-898. 1982.

Species

H. chlorochloe (K. Schum.) Napper (*Panicum chlorochloe* K. Schum.)

South Africa. Native pasture species, see *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 24(3): 333. 1897 and *Kirkia* 3: 130. 1963.

H. cordatus Chippindall

South Africa. See *Journal of South African Botany* 11: 128. 1945.

Hymenachne P. Beauv.

From the Greek *hymen* “a membrane” and *achne* “chaff, glume, scale,” possibly alluding to membranous glumes in spikelet, to lemmas and paleas; see A.M.F.J. Palisot de Beauvois, *Essai d'une nouvelle Agrostographie, ou nouveaux genres des Graminées*. 48, 165, t. 10, f. 8. Paris 1812.

About 5-10 species, tropical Asia and America, Australasia. Panicoideae, Panicodae, Paniceae, or Panicoideae, Paniceae, Paspalinae, perennial, aquatic, paludose, creeping or floating, sprawling, stoloniferous, herbaceous, spongy, leafy, succulent, thick, decumbent and rooting from nodes, auricles absent, ligule an unfringed membrane, leaves linear-lanceolate and cordate at base, plants bisexual, inflorescence an open or contracted panicle, panicle densely flowered with the spikelets arranged in unilateral racemes, bisexual spikelets narrowly lanceolate to acuminate, florets 2, lower floret sterile, upper floret bisexual, lacking bristles, 2 glumes very unequal, glumes separated by an internode, lower glume less than half the length of the spikelet and 3-nerved, upper glume and lower lemma membranous 5-nerved, lower lemma acuminate or shortly awned, upper lemma acute, lower palea and lower flower present or absent, upper antheridium membranous, 2 free and fleshy lodicules, 3 stamens, ovary glabrous, 2 stigmas, fodders, native pasture species, occurs in swamps and wet places, marshy habitats, segregate from *Panicum*, resembling *Sacciolepis*, type *Hymenachne amplexicaulis* (Rudge) Nees (*Agrostis monostachya* Poir.), see *Species Plantarum* 1: 55. 1753, *Essai d'une Nouvelle Agrostographie* 48-49, 99, 165, t. 10, f. 8. 1812, *Nomenclator Botanicus* 1: 1702. Cassellius

Species

H. acutigluma (Steudel) Gilliland (*Hymenachne amplexicaulis* sensu Backer; *Hymenachne myurus* sensu Burkill; *Hymenachne pseudo-interrupta* Müll. Hal.; *Hymenachne pseudointerrupta* C.H. Müller, also Müll. Hal.; *Panicum acutiglumum* Steud.)

Northern Australia, Malaysia. Perennial, stoloniferous, aquatic, erect, succulent, hollow or filled with a spongy pith, creeping, rooting at the nodes, often forming floating mats, leaves finely acuminate or elongate, thin membranous ligules, feathery rootlets, inflorescence a terminal spike-like panicle, narrow panicles erect and dense, lower glume acuminate and ovate, upper glume acuminate and linear-lanceolate, native pasture species, foliage used as fodder, very palatable, grazed by cattle and water buffaloes, very variable, sometimes a troublesome weed in irrigated rice fields, it is not drought-tolerant, survives floods well, grows in fresh water swamps, open swamps and ditches, wet habitats, slow streams and rivers, swamps and margins of swamps, shallow water, peat swamps, often confused with *Hymenachne amplexicaulis* (Rudge) Nees, see *Synopsis Plantarum Glumacearum* 1: 66. 1853, *Botanische Zeitung, Berlin* 19(45): 333. 1861 and *Grasses of Ceylon* 122. 1956, *Grasses of Burma ...* 313. 1960, *The Gardens' Bulletin Singapore* 20(4): 314. 1964, *Fl. Java* 3: 561. 1968.

Kunth)

Pantropical, South America, Mexico to Argentina. Perennial, aquatic or semiaquatic, emergent, forming colonies and floating mats, herbaceous, erect, decumbent, ascending, stoloniferous, creeping, coarse, rather stout and succulent, frequently rooted from the basal nodes, ligule membranous, leaf sheath overlapping and loose with hairy margins, leaf blade linear with a clasping base, narrow panicles or contracted spike-like inflorescence, lateral branches strongly ascending, spikelet acuminate and pedicellate, lower glumes rough, lemma with a short rough awn, lower lemma attenuate to subaristate, palea membranous, hay and silage, useful fodder for stock and buffaloes, pith used for making garlands, a harmful effect on the development of some larvae, floating islands in Amazon, grows in ponds and on marshy ground, in the stagnant pools, shallow water, in creeks, riverbanks, abandoned rice paddies, tropical wetlands, margins of streams and swampy places, inundated areas, see *Actes de la Société d'Histoire Naturelle de Paris* 1: 106. 1792, *Plantarum Guianae Rariorum Icones et Descriptiones* ... 1: 21, t. 27. 1805, *Encyclopédie Méthodique, Botanique* Suppl. 1: 256. 1810, *Essai d'une Nouvelle Agrostographie* 99. 1812, *Flora Brasiliensis seu Enumeratio Plantarum* 2: 276. 1829, *Mémoires de la Société d'Agriculture, Sciences et Arts d'Angers* 1: 186. 1831, *Synopsis Plantarum Glumacearum* 1: 65-66. 1853, *Botanische Zeitung. Brazil. Aquatic and semiaquatic, herbaceous, robust, emergent, floating, decumbent at the base, ascending, culm bases creeping and rooting at the nodes, forming large and dense colonies or stands, membranous ligules, inflorescence an open and contracted panicle with the spikelets arranged in unilateral racemes, nodding inflorescence loosely contracted with branches divergent, panicle oblong, upper glume and lower lemma 5-nerved, short lower glume 3-nerved, lower lemma acuminate, lower palea reduced or absent, upper antherium membranous, growing in ponds and marshy areas, shallow water, small streams, mud banks, creeks, riverbanks and river margins, floodplains, abandoned cultivations, pools, margins of streams and swampy places, inundated areas, see *Plantarum Guianae Rariorum Icones et Descriptiones* ... 1: 21, t. 27. 1805, *Agrostografia Brasiliensis* 44. 1823, *Systema Vegetabilium, editio decima sexta* 1: 322. 1824, *De Graminibus Paniceis* 181. 1826, *Flora Brasiliensis seu Enumeratio Plantarum* 2: 179, 276. 1829, *Reliquiae Haenkeanae* 1(4-5): 312. 1830, *Flora Brasiliensis* 2(3): 239. 1880, *Mexicanas Plantas* 2: 37. 1886 and *Proceedings of the Biological Society of Washington* 21: 5. 1908, *Comissão de Linhas Telegraficas Estratégicas de Matto-Grosso ao Amazonas, Botanica* 67(Bot. 11): 90. 1922, *Journal of the Washington Academy of Sciences* 13(9): 177. 1923, *Contribuciones Ocasionales del Museo de Historia Natural del Colegio "De La Salle"* 8: 158. 1946, *Darwiniana* 30(1-4): 87-94. 1990.

in Brazil: capim

H. grumosa (Nees) Zuloaga (*Panicum grumosum* Nees; *Panicum knuthii* Herter; *Panicum pavonii* Mez; *Panicum pycnanthum* Steud.; *Panicum rivulare* var. *grumosum* (Nees) Hack.; *Panicum schroederi* Herter) (for the Spanish botanist José Antonio Pavón y Jiménez, 1754-1844, traveler, explorer, between 1777-1788 he traveled with Hipolito Ruíz Lopez (1754-1815) and Joseph Dombey in Chile and Peru, his works include *Disertacion botanica sobre los generos Tovaria, Actinophyllum, Araucaria y Salmia*. [Madrid 1797], with H. Ruíz wrote *Flora peruviana, et chilensis prodromus*. Madrid 1794, *Systema vegetabilium florum*

peruviana et chilensis. [Madrid] 1798 and *Flora peruviana, et chilensis*. Madrid 1798-1802; see J.H. Hymenothecium Lag. = *Aegopogon* Humb. & Bonpl. ex Willd.

From the Greek *hymen* "a membrane" and *theke* "a box, case, envelope," referring to the membranous glumes.

Chloridoideae, Cynodonteae, Muhlenbergiinae, type *Hymenothecium tenellum* (Cav. ex DC.) Lag., see *Species Plantarum. Editio quarta* 4(2): 899. 1805 [1806], *Genera et species plantarum* 4. 1816 and *Flora Mesoamericana* 6: 296-297. 1994, *Contributions from the United States National Herbarium* 41: 9-11, 129. 2001.

Hyparrhenia Andersson ex E. Fourn. = *Dybowskia* Stapf, *Hyparrhenia* E. Fourn.

From the Greek *hypo* "beneath, under, below" and *arren* "male," referring to the staminate spikelets at raceme bases; see Eugène Pierre Nicolas Fournier (1834-1884), *Mexicanas plantas*. 2: 51, 67. Paris 1886.

About 53-75 species, tropical Africa, Middle East, Mediterranean. Panicoideae, Andropogonodae, Andropogoneae, Andropogoninae, or Panicoideae, Andropogoneae, Anthistiriinae, annual or perennial, tall, usually caespitose, herbaceous, solid, coarse, vigorous, flimsy to stout, never aromatic, erect branched stems, rarely trailing, auricles absent, ligule an unfringed membrane, leaves linear and acuminate, plants bisexual with an intricately branched inflorescence, elaborate compound leafy panicles, compound inflorescence composed of paired racemes with a spatheole or spathe-like bract at the base, spikelets in pairs, spikelets of sexually distinct forms on the same plant, sessile spikelet dorsally compressed or subterete, pedicelled spikelet staminate or barren and usually a little longer than the sessile, the lower spikelet pairs homogamous, the upper pairs heterogamous, lower floret reduced to a membranous lemma, upper floret hermaphrodite, glumes equal lemma, glumes of fertile spikelet equal, first glume truncate or 2-toothed, second glume boat-shaped, first glume of sessile spikelet rounded and incurved, first lemma hyaline, second lemma with a geniculate hairy awn, palea present or absent, 2 lodicules free and fleshy, 3 stamens, ovary glabrous, stigmas red, weed, cultivated fodder, native pasture species, more or less unpalatable, grazed when young, widely used for thatching, tropical savannah, dry areas, montane forests, along roadsides, open habitats, rainforest, a very difficult genus, many species difficult to distinguish, type *Hyparrhenia foliosa* (Kunth) Andersson ex E. Fourn., see *Species Plantarum* 2: 1045. 1753, *Mexicanas Plantas* 2: 51, 67. 1886, *Monographiae Phanerogamarum* 6: 617. 1889 and *Flora of Tropical Africa* 9: 382, 383. 1919, W.D. Species

H. sp.

Tropical Africa.

in English: spear grass

in Guinea-Bissau: nentamo, nhentam-o, nhentara-o

in Nigeria: azarà

in Senegal: bowal, fukabin, kali, kali ba, kali ni

H. anamesa Clayton (referring to this species being intermediate between *Hyparrhenia hirta* (L.) Stapf and *Hyparrhenia filipendula* (Hochst.) Stapf, from the Greek *ana* "up, back again, upward, like" and *mesos* "in the middle, middle")

Eastern Africa, South Africa, Sudan. Perennial, erect, tufted to densely tufted, rhizomatous, ligule a short membrane surrounded by hairs, leaf blade usually flattened, inflorescence a false panicle, spatheate racemes paired and awned, racemes 4-6-awned per pair, spikelets in pairs, 1 spikelet

sessile and awned, awn column pubescent, pedicellate spikelets usually awnless, more or less unpalatable, palatable when young, hard and fibrous when mature, tussocky, a source of thatching, growing in open habitats, montane forests, dry areas, open grassland, pasture, woodland, along roadsides, steep slopes, see *Kew Bulletin, Additional Series* 2: 38, 85. 1969, *Kew Bulletin* 30: 512. 1975, *Bothalia* 18: 111-114, 119-122. 1988, *Bothalia* 24: 241-246. 1994.

in English: bundle thatching grass

in southern Africa: gerftamboekiegras (referring to Tambuki or Amathembu tribe), leqokwana; sesigo (Tswana)

H. anthistirioides (Hochst. ex A. Rich.) Stapf (*Andropogon anthistirioides* Hochst. ex A. Rich.; *Anthistiria pseudocymbaria* Steud.; *Anthistiria quinqueplex* Hochst. ex Steud.; *Hyparrhenia anthistirioides* (Hochst. ex A. Rich.) Fourn.; *Sorghum anthistirioides* (Hochst. ex A. Rich.) Kuntze)

East Africa, Ethiopia, Sudan, Tanzania. Annual, variable, solitary or tufted, geniculate or ascending, slender to robust, sometimes rooting at the lower nodes, false panicle, racemes 3-5-awned per pair, raceme-bases subequal and flattened, spatheoles or spathe-like bracts lanceolate, homogamous spikelet at the base of the lower raceme, sessile spikelet usually glabrous, long dark awns, useful for erosion control, weed, growing in rocky places, dry slopes, sorghum fields, open weedy places, hillsides, see *Tentamen Florae Abyssinicae ...* 2: 463. 1850, *Synopsis Plantarum Glumacearum* 1: 399-400. 1854, *Beitrag zur Flora Aethiopiens ...* 300. Berlin 1867, *Revisio Generum Plantarum* 2: 791. 1891 and *Flora of Tropical Africa* 9: 329-331. 1919.

in tropical Africa: katengo, okatengo, okate

H. arrhenobasis (Hochst. ex Steud.) Stapf (*Andropogon arrhenobasis* Hochst. ex Steud.; *Andropogon papillipes* var. *major* Hochst. ex Steud.; *Heteropogon arrhenobasis* (Hochst. ex Steud.) Andersson; *Sorghum arrhenobasis* (Hochst. ex Steud.) Kuntze)

Ethiopia. Perennial, tufted, racemes compact 7-several-awned per pair, peduncles arching and bearded with yellow hairs, homogamous spikelets at the base of both racemes, margins of homogamous spikelets pectinate, callus of sessile spikelet acute, awn hairy, grassland, stony hillsides, highlands, uplands, confused with *Hyparrhenia diplandra*, see *Tentamen Florae Abyssinicae ...* 2: 460. 1850, *Synopsis Plantarum Glumacearum* 1: 385. 1854, *Beitrag zur Flora Aethiopiens ...* 310. 1867, *Revisio Generum Plantarum* 2: 791. 1891 and *Flora of Tropical Africa* 9(2): 348-350. 1919.

H. baddadae Chiov.

East Africa, Somalia. See *Flora Somalia* 2: 440, f. 243. 1932.

H. barteri (Hack.) Stapf (*Andropogon barteri* Hack.; *Sorghum barteri* (Hack.) Kuntze) (after the English plant

collector Charles Barter (d. 1859 in West Africa, North Nigeria, Rabba), Kew gardener, 1857 botanist on William Balfour Baikie's Niger Expedition, author of *The Dorp and the Veld; or, Six Months in Natal*. London 1852. Mémoires du Conservatoire de Botanique et de l'Institut de Botanique Systématique de l'Université de Genève* 9: 113. 1960, *Journal of the Arnold Arboretum* 64(2): 217, f. 11C-D, 32-33. 1983.

in West Africa: soso

H. figariana (Chiov.) W.D. Clayton (*Andropogon figarianus* Chiov.; *Andropogon filipendulus* Hochst.; *Andropogon filipendulus* var. *calvescens* Hack.; *Cymbopogon figarianus* Chiov.; *Hyparrhenia barteri* var. *calvescens* (Hack.) Stapf) (named for the Italian botanist Antonio Figari Bey, 1804–1870, plant collector in Egypt, Ethiopia, Italy, Sudan, with Giuseppe De Notaris (1805–1877) wrote *Agrostographiae Aegyptiacae Fragmenta* ... Torino 1851; see J.H. Barnhart, *Biographical notes upon botanists*. 1: 540. 1965; T.W. Bosser, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 125. 1972; A. Lasègue, *Musée botanique de Benjamin Delessert*. 163. Paris 1845)

Tropical Africa. Annual, erect, grazed by cattle, used for thatching, growing in deciduous bush, wasteland, along roadsides, see *Flora* 29: 115. 1846, *Monographiae Phanerogamarum* 6: 635. 1889 and *Bollettino della Società Botanica Italiana* 1917: 59. 1917, *Flora of Tropical Africa* 9(2): 321–322. 1919, *Kew Bulletin, Additional Series* 2: 94. 1969.

H. filipendula (Hochst.) Stapf (*Andropogon filipendulinus* Hochst. ex Steud.; *Andropogon filipendulus* Hochst.; *Andropogon filipendulus* var. *thwaitesii* Hack. ex Trimen; *Andropogon kimuingensis* Vanderyst; *Anthistiria fasciculata* Thwaites; *Cymbopogon filipendulus* (Hochst.) Rendle; *Cymbopogon filipendulus* var. *angolensis* Rendle; *Sorghum filipendulum* (Hochst.) Kuntze)

Tropical Africa, Madagascar, Southeast Asia, from Sri Lanka to Australia, Indonesia. Perennial, caespitose, slender, robust, erect, tall, short scaly rhizomes, false panicle narrow with slender branches, spatheoles linear or filiform often reddish, racemes paired with a pair of similar sterile spikelets at the base of lower raceme and 2 pairs at base of upper, at maturity the raceme forms a distinctive L-shaped unit, lower raceme nearly sessile, upper raceme with a long filiform base, pedicellate spikelets male, racemes 2- to 4-awned per pair, pungent callus, awn column hirsute, useful grass, the whole plant eaten by baboons, commonly used for thatching, fodder, forage, more or less unpalatable, palatability falls toward maturity, low nutritive value, a source of paper pulp, growing in clumps, common in woodland, savannah, weedy places, sandy soil, wooded savannah, well-drained grassland and open woodland, *Brachystegia* woodlands (miombo), see *Flora* 29: 115. 1846, *Synopsis Plantarum Glumacearum* 1: 389. 1854, *Enumeratio Plantarum Zeylaniae* 366. 1864, *A Systematic Catalogue of the Flowering Plants and Ferns in Ceylon* 107. 1885, *Monographiae Phanerogamarum* 6: 635. 1889, *Revisio Generum Plantarum* 2: 791. 1891, *Catalogue of the African Plants Collected by Dr. F. Welwitsch in 1853–61* 2(1): 157. 1899 and *Handb. Fl. Ceylon* 5: 245. 1900, *Flora of Tropical Africa* 9(2): 322–325. 1919, *Handb. Fl. Ceylon* 6: 335. 1931, *Bulletin agricole du Congo Belge* 11: 144. 1920, *Symb. Sin.* 7(5): 1314. 1936, *Grasses of Ceylon* 195. 1956, *Grasses of Burma* ... 167. 1960.

in English: blue grass, fine thatching grass, Tambookie, Tambookie grass, Tambuki grass, thatching grass

in Burundi: Umukenke (Kirundi)

in Malawi: nyumbu, kanyumbu, lipe, kanyece, kanyungu-nyungu

in Nigeria: tsiikà, wadeho

in southern Africa: rooigras, fyntamboekiegras, blougras, dekgras; isibusana (Sotho)

H. filipendula (Hochst.) Stapf var. **filipendula**

Tropical Africa, Madagascar, Southeast Asia. Perennial, rhizomatous, tufted, many slender branches, glabrous spikelets, the 2 racemes form an L-shaped unit, pedicellate spikelets awned, 2 pairs of homogamous spikelets at the base of upper raceme, drooping peduncles, thatching grass, grows in woodlands, open habitats, along roadsides, open veld, higher rainfall areas, edge of riverine forests, see *Flora of Tropical Africa* 9(2): 322–325. 1919, *Bothalia* 24: 241–246. 1994.

in English: three o'clock thatching grass

H. filipendula (Hochst.) Stapf var. **pilosa** (Hochst.) Stapf (*Andropogon filipendulus* f. *bispiculatus* Hack.; *Andropogon filipendulus* var. *lachnatherus* (Benth.) Hack.; *Andropogon filipendulus* var. *pilosus* Hochst. ex Hack.; *Andropogon filipendulus* var. *thwaitesii* Hack., nom. illeg., non *Andropogon filipendulus* var. *thwaitesii* Hack. ex Trimen; *Andropogon finitimus* var. *rectirameus* Hack.; *Andropogon lachnatherus* Benth.; *Anthistiria fasciculata* Thwaites; *Cymbopogon filipendulus* var. *thwaitesii* (Hack.) Hand.-Mazz.; *Hyparrhenia filipendula* var. *pilosa* (Hochst. ex Hack.) Stapf; *Hyparrhenia piovanii* Chiov.)

Tropical Africa, Southeast Asia, Australia. Perennial, tufted, rhizomatous, leaf sheath round, ligule a chartaceous membrane, hairy spikelets, paired racemes, each pair with 2–4 awns, the 2 racemes form an L-shaped unit, at the base of upper raceme 2 pairs of homogamous spikelets, sessile spikelets with a long awn, pedicellate spikelets with a short straight awn, thatching grass, more or less palatable, unpalatable when hard and woody, found in disturbed places, wooded savannah, *Brachystegia* woodland, higher rainfall areas, riverbanks, near vleis, bushveld, along roadsides, open veld, near rivers, see *Flora* 29: 115. 1846, *Enumeratio Plantarum Zeylaniae* 366. 1864, *Flora Australiensis: A Description* ... 7: 534. 1878, *Boletim da Sociedade Broteriana* 3: 137. 1885, *Monographiae Phanerogamarum* 6: 635. 1889 and *Philippine Journal of Science* 1 (Suppl.): 267. 1906, *Flora of Tropical Africa* 9(2): 322–325. 1919, *Symbolae Sinicae* 7(5): 1314. 1936, *Atti della Reale Accademia d'Italia. Memorie della classe di scienze fisiche, matematiche e naturali* 11(2): 63. Roma 1950, *Bothalia* 24: 241–246. 1994.

in English: fine thatching grass

in southern Africa: fyntamboekiegras

H. finitima (Hochst.) Stapf (*Andropogon finitimus* Hochst. ex A. Rich.; *Cymbopogon finitimus* (Hochst. ex A. Rich.) Thomson; *Cymbopogon finitimus* (Hochst. ex A. Rich.) Rendle, nom. illeg., non *Cymbopogon finitimus* (Hochst. ex A. Rich.) Thomson; *Hyparrhenia finitima* (Hochst.) Andersson; *Hyparrhenia finitima* (Hochst. ex A. Rich.) Stapf; *Hyparrhenia finitima* (Hochst. ex A. Rich.) Andersson ex Stapf; *Hyparrhenia hirta* var. *garambensis* Troupin; *Hyparrhenia rhodesica* Stent & Rattray; *Sorghum finitimum* (Hochst. ex A. Rich.) Kuntze)

Southern tropical Africa, Uganda, Kenya, Tanzania, Zaire. Perennial, tufted, rhizomatous, robust, sometimes with stilt roots, panicle much branched, raceme pairs with 2-6 awns, raceme bases unequal, spikelets glabrous to shortly hispidulous, thin pungent callus, pedicelled spikelets bristly, useful thatching grass, found in stony places, farm fallows, rocky sites, disturbed areas, deciduous bushland, roadsides, waste places, wooded grassland, see *Tentamen Florae Abyssinicae* ... 2: 465. 1850, *Journal of the Discovery of the Source of the Nile* 652. 1863, *Revisio Generum Plantarum* 2: 791. 1891, *Catalogue of the African Plants Collected by Dr. F. Welwitsch in 1853-61* 2(1): 157. 1899 and *Flora of Tropical Africa* 9(2): 299-300. 1919, *Proceedings of the Rhodesia Scientific Association* 32: 14. Bulawayo, Rhodesia 1933, *Exploration du Parc National de la Garamba* 1: 47, f. 3. 1956.

H. formosa Stapf (*Andropogon formosus* Klotzsch ex Hack.)

East Africa, Malawi, Arabia, Yemen. Perennial, rare, robust, panicle narrow rather dense, raceme pairs with 6-8 awns, raceme-bases subequal, broad rounded callus, found in montane grassland, see *Monographiae Phanerogamarum* 6: 623. 1889 and *Flora of Tropical Africa* 9(2): 340-341. 1919.

H. gazensis (Rendle) Stapf (*Andropogon gazensis* (Rendle) Torre & Harms ex Eyles; *Cymbopogon gazensis* Rendle; *Hyparrhenia snowdenii* C.E. Hubb.) (after the British (b. Silverdale, Staffs) botanist Joseph Davenport Snowden, 1886-1973, Kew gardener, economic botanist, traveler and plant collector (Uganda), wrote *The Cultivated Races of Sorghum*. London 1936; see T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 375. 1972; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. University of Pennsylvania Press, Philadelphia 1964; Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 641-642. London 1994; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993)

Southern tropical Africa, Malawi. Perennial, tufted, glaucous, rhizomatous, slender, raceme pairs with 4-5 awns, callus cuneate, common on poor soils, ruderal, along roadsides, broad-leaved deciduous woodland, savannah, see *Journal of the Linnean Society, Botany* 40: 226. 1911,

Transactions of the Royal Society of South Africa 5: 295. Cape Town 1916, *Flora of Tropical Africa* 9(2): 301-302. 1919, *Bulletin of Miscellaneous Information Kew* 1928(1): 38-39. 1928.

in southern Africa: polgras; benzwa (Tswana)

H. glabriuscula (A. Rich.) Stapf (*Andropogon glabriusculus* Hochst. ex A. Rich.; *Hyparrhenia amaena* Jacq.-Fél.; *Sorghum glabriusculum* (Hochst. ex A. Rich.) Kuntze)

West Africa, Benin. Perennial, densely tufted, slender, erect, stiff, robust, unbranched, leaf blades narrowly linear and nonaromatic, loosely imbricate glabrous sessile spikelets, short broad exerted callus, with medicinal properties, growing in seasonally flooded areas, swampy soils, river floodplains, see *Tentamen Florae Abyssinicae* ... 2: 468. 1850, *Revisio Generum Plantarum* 2: 791. 1891 and *Flora of Tropical Africa* 9(2): 372-373. 1919, *Journal d'Agriculture Tropicale et de Botanique Appliquée* 1(1-4): 46, t. 6. [J.A.T.B.A.] Paris 1954.

in Guinea: onydi

in Senegal: gindyi gumbara, ondji

in Upper Volta: bukkaho

Kuntze; *Trachypogon hirtus* (L.) Nees)

Kenya, South Africa, Algeria, Mediterranean, Asia temperate and tropical, India, Pakistan. Perennial, variable, erect or ascending, densely tufted, often branching from the lower nodes, sometimes rhizomatous or shortly rhizomatous, wiry, robust, slender, with dense basal tussock, leaf blade expanded, leaf sheath keeled, ligule a dark membrane short and stiff, leaves narrow pointed and glaucous, inflorescence a panicle with conspicuous spathes, panicle loose and elongated, spathe-like bracts, spatheoles glabrous and reddish, white or gray spike-like racemes erect or nodding, racemes paired with a pair of sterile spikelets at the base of the lower racemes, each pair of racemes with 8-16 awns, sessile spikelet villous, pedicellate spikelets male and more or less hairy to white-villous, readily grazed by all stock, valuable fodder grass, not very palatable except for the young growth, forage, stems eaten by baboons, a valuable crop, naturalized, useful thatching grass, used to weave large baskets, grain baskets and courtyard screens, extremely drought-tolerant and persistent, sensitive to frost, stands heavy grazing, flavonoids in *Hyparrhenia hirta* are associated with anti-oxidant and anti-inflammatory activities of the plant, weed species, potentially a very serious roadside and bushland weed, a pioneer grass, grown for erosion control and to revegetate eroded slopes, establishes on hard stony soils, well drained stony soils, common near rivers, in the shade of trees and bushes, bare and sandy soils, open grassland, montane grassland, desert and xeric shrublands, deciduous bushland, dry woodland, dry rocky hillsides, stony hillsides, disturbed areas, rocky places and rocky slopes, stony slopes, roadsides, on clays and sandstone, uncultivated lands, dry open places, see *Species Plantarum* 2: 1046. 1753, *Systema Vegetabilium* 2: 819. 1817, *Flora* 12(Erganz. 1): 3. 1829, *Flora Brasiliensis seu Enumeratio Plantarum* 2: 346. 1829, *Flora Napolitana* 5: 285. 1835-1836[-1838], *Annales des Sciences Naturelles; Botanique, sér. 2*, 7: 285. 1836 [or 1837], *Linnaea* 12(4): 475. Africa, Benin, Liberia, Uganda. Tufted, robust, stout, tall, large, upper lemma awnless, see *Kew Bulletin, Additional Series* 2: 161-163. 1969.

H. multiplex (Hochst. ex A. Rich.) Anderss. ex Stapf (*Andropogon multiplex* (Hochst. ex A. Rich.) Hack.; *Anthistiria multiplex* Hochst. ex A. Rich.; *Hyparrhenia multiplex* var. *leiopoda* Stapf; *Sorghum multiplex* (Hochst. ex A. Rich.) Kuntze)

Africa. Annual, slender, small, tufted, racemes compact 3-11-awned per pair, raceme-bases narrowly oblong usually yellow hispid, raceme-pairs with stout hairy awns, homogenous spikelets glabrous on the back, lower glume of the sessile spikelet with a median longitudinal depression, see *Tentamen Florae Abyssinicae ...* 2: 449. 1850, *Monographiae Phanerogamarum* 6: 631. 1889, *Revisio Generum Plantarum* 2: 792. 1891 and *Flora of Tropical Africa* 9(2): 374-376. 1919, *Kew Bulletin, Additional Series* 2: 152-154. 1969.

H. neglecta S.M. Phillips

Africa. Annual, slender, leaf blades glabrous, ligule truncate, loose panicle, spatheoles narrowly lanceolate, peduncle beard yellow, racemes 4-awned per pair, raceme-bases subequal, sessile spikelet glabrous and ribbed, pedicelled spikelets glabrous acuminate, see *Kew Bulletin* 49(3): 537, f. 1. 1994.

H. newtonii (Hack.) Stapf (*Andropogon bisulcatus* Chiov.; *Andropogon lecomtei* Franch.; *Andropogon newtonii* Hack.; *Andropogon nlemfuensis* var. *villosus* Vanderyst; *Cymbopogon lecomtei* (Franch.) Rendle; *Hyparrhenia bisulcata* Chiov.; *Hyparrhenia cirrosula* Stapf; *Hyparrhenia cirrulosula* Stapf; *Hyparrhenia lecomtei* (Franch.) Stapf; *Hyparrhenia lecomtei* var. *bisulcata* (Chiov.) Robyns; *Hyparrhenia squarrulosa* Peter; *Hyparrhenia stolzii* Stapf; *Sorghum newtonii* (Hack.) Kuntze)

Tropical Africa. Perennial, erect, tufted to densely tufted, submontane to montane, provides thatching material, useful grazing grass, growing in dry areas, grassland, savannah, stony hillsides, see *Boletim da Sociedade Broteriana* 3: 137. 1885, *Revisio Generum Plantarum* 2: 792. 1891, *Bulletin de la Société d'Histoire Naturelle d'Autun* 8: 329. 1895 and *Journal of the Linnean Society, Botany* 40: 227. 1911, *Flora of Tropical Africa* 9(2): 363-366. 1919, *Nuovo Giornale Botanico Italiano*, n.s., 26: 60. 1919, *Bull. Agric. Congo Belge* 11: 145. 1920, *Bulletin de la Société Botanique de Belgique* 55: 44. 1923, *Flore Agrostologique du Congo Belge* 1: 192. 1929, *Repertorium Specierum Novarum Regni Vegetabilis, Beihefte* 40(1): 375. 1936.

in Nigeria: jemuwel debbo, yemuwel debbo

H. newtonii (Hack.) Stapf var. *macra* Stapf

Tropical Africa, South Africa. Perennial, tufted, rhizomatous, basal sheaths usually tomentose or glabrous, raceme bases hairy, raceme pairs with 2-4 awns, sessile spikelet with hairy lower glume, callus pungent, grass used for thatching, found in stony hillsides, grassland, savannah, see *Flora of Tropical Africa* 9(2): 363-366. 1919, *Kew Bull., Add. Ser.* 2: 150. 1969.

in English: thatching grass

H. newtonii (Hack.) Stapf var. *newtonii*

Tropical Africa, Madagascar, Southeast Asia. Perennial, tufted, rhizomatous, basal sheaths usually tomentose or glabrous, raceme pairs with 2-4 awns, raceme bases hairy, sessile spikelet with glabrous lower glume, callus pungent, thatching grass, found in stony hillsides, grassland, savannah, see *Flora of Tropical Africa* 9(2): 363-364. 1919.

in English: bearded thatching grass

H. nyassae (Rendle) Stapf (*Andropogon chrysargyreus* (Stapf) Stapf ex A. Chev.; *Andropogon lasiobasis* Pilg.; *Andropogon lugugaensis* Vanderyst; *Andropogon nyassae* Rendle; *Andropogon rufus* var. *auricomus* Pilg.; *Andropogon vanderystii* De Wild.; *Cymbopogon chrysargyreus* Stapf; *Cymbopogon nyassae* (Rendle) Pilg.; *Cymbopogon*

schmidianus (A. Camus) A. Camus ex M. Schmid; *Cymbopogon solutus* f. *trichophyllus* Stapf; *Cymbopogon vanderystii* De Wild.; *Hyparrhenia chrysargyrea* (Stapf) Stapf; *Hyparrhenia schmidiana* A. Camus; *Hyparrhenia vanderystii* (De Wild.) Vanderyst; *Hyparrhenia vulpina* Stapf (to honor the Belgian botanist Hyacinthe Julien Robert Vanderyst, 1860-1934, missionary in the Congo, agronomist, traveler and plant collector, among his works are *Prodrome des maladies cryptogamiques belges*. Bruxelles 1904-1905 and *Jardin agrostologique de Kisanti*. Bruxelles 1928; see Stafleu and Cowan, *Taxonomic literature*. 6: 662-663. Utrecht 1986)

Tropical Africa, Benin, Malawi, Tanzania, Southeast Asia. Perennial, tufted, upright, rhizomatous, basal sheaths hairy, ligule membranous with a ciliate margin, inflorescence densely golden-pubescent, raceme pairs with 6-14-18 awns, spikelets arranged in pairs and 1-flowered, callus linear, when young browsed by stock, thatching grass, grain eaten, moist places in open veld, swamp edges, moist meadow, damp sites, along roadsides, savannah, wooded savannah, broad-leaved deciduous woodland, sandy loam, see *Journal of Botany, British and Foreign* 31: 358. London 1893 and *Journal de Botanique (Morot) sér. 2, 2*: 213. 1909, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 30: 268. 1901, *Sudania* 1: 77. 1911, *Wissenschaftliche Ergebnisse der Schwedischen Rhodesia-Kongo-Expedition, 1911-1912, unter Leitung von Eric Graf von Rosen* 1: 197, t. 14, f. 1. 1916 [1915], *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 54: 287. 1917, *Bulletin agricole du Congo Belge* 9: 241. 1918, *Bulletin du Jardin Botanique de l'État* 6: 24. 1919, *Flora of Tropical Africa* 9(2): 310-314. 1919, *Bulletin agricole du Congo Belge* 11: 144. 1920, *Journal d'Agriculture Tropicale* 2: 201. 1955, M. Schmid, *Flore Agrostologique de l'Indochine* 229. 1958, *Kew Bull., Add. Ser. 2*: 1-196. 1969, *Blumea* 45(2): 456. 2000.

in English: bronze awned thatching grass, bush thatching grass

in Malawi: kanyumbu, nuymbu, chatungwa, chisamphe, kamphe, kamphi

in South Africa: bronsaartamboekiegras

H. papillipes (Hochst. ex A. Rich.) Stapf (*Andropogon papillipes* Hochst. ex A. Rich.; *Cymbopogon papillipes* (Hochst. ex A. Rich.) Chiov.; *Cymbopogon papillipes* (Hochst. ex A. Rich.) Pilg., nom. illeg., non *Cymbopogon papillipes* (Hochst. ex A. Rich.) Chiov.; *Hyparrhenia lintonii* Stapf; *Hyparrhenia papillipes* (Hochst. ex A. Rich.) Andersson ex Stapf; *Sorghum papillipes* (Hochst. ex A. Rich.) Kuntze)

Africa, Ethiopia, Uganda, Tanzania, East Africa, Yemen. Perennial, tussocky, wiry, numerous fine stems, erect and loosely ascending, slender, scrambling, very leafy, shortly rhizomatous, loose panicles, spatheoles linear-lanceolate,

peduncle long-exserted near the tip, raceme pairs with 7-9-19 awns, spikelets densely villous, narrowly cuneate acute callus, lower raceme-base with 1 pair of homogamous spikelets, well grazed when young, occurs on black clay seasonally waterlogged, open woodland, open stony places, see *Tentamen Florae Abyssinicae ... 2*: 460. 1850, *Revisio Generum Plantarum* 2: 792. 1891 and *Flora of Tropical Africa* 9(2): 347-348, 350-351. 1919, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 10(96): 597. 1929, *Kew Bull., Add. Ser. 2*: 121. 1969.

H. pilgeriana C.E. Hubb. (also *pilgerana*) (*Cymbopogon stolzii* Pilg.; *Hyparrhenia claessensii* Robyns) (dedicated to the German botanist Robert Knuds Friedrich Pilger, 1876-1953, traveler, botanical explorer, plant collector in Brazil (Matto Grosso), Director at Botanical Garden Berlin-Dahlem, his works include "Gramineae novae, a cl. K. Skottsberg in Patagonia australi et in Fuegia collectae." *Repert. Spec. Nov. Regni Veg.* 12: 304-308. 1913 and "Sobra algunas gramíneas de América del Sur." *Revista Argent. Agron.* 11(4): 257-264. 1944. See L.R. Parodi, "Robert Pilger." *Revista Argent. Agron.* 20(2): 107-114. 1953; H. Melchior, "Zum Gedächtnis von Robert Pilger." *Bot. Jahrb. Syst.* 76(3): 385-409. 1954; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. University of Pennsylvania Press, Philadelphia 1964; E.D. Merrill, in *Bernice P. Bishop Mus. Bull.* 144: 151. 1937; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 310. 1972; S. Lenley et al., *Catalog of the manuscript and archival collections and index to the correspondence of John Torrey*. Library of the New York Botanical Garden. 327. 1973; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. 1917-1933; August Weberbauer, *Die Pflanzenwelt der peruanischen Andes in ihren Grundzügen dargestellt*. 39. Leipzig 1911)

Tropical eastern Africa, South Africa. Perennial, tufted, slender, weak-stemmed, wiry, straggling, rambling, trailing, lax and leaning on other grasses, rhizomatous, panicle loose and open, long arching peduncles yellow-bearded, racemes exserted, raceme pairs with 4-8 awns, raceme-bases flattened, lower spathe boat-shaped, lower raceme-base with 1 pair of homogamous spikelets, pedicellate spikelets glabrous, glossy sessile spikelets, callus oblong, useful for erosion control, found in seasonal swamps, hill slope, along trails and roadsides, see *Mexicanas Plantas* 2: 51, 67. 1886 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 54: 286. 1917, *Bulletin of Miscellaneous Information Kew* 1928(1): 39-40. 1928, *Flore Agrostologique du Congo Belge* 1: 180. 1929, *Kew Bull., Add. Ser. 2*: 38. 1969, *Bothalia* 24: 241-246. 1994.

in English: thatching grass

H. pilosissima (Hack.) J.G. Anderson (*Andropogon pilosissimus* Hack.; *Hyparrhenia dregeana* (Nees) Stapf ex Stent) South Africa. Used for making grain baskets and courtyard screens, see *Monographiae Phanerogamarum* 6: 690. 1889 and *Bothalia* 1: 249. 1923, *Bothalia* 9: 130. 1966.

in South Africa, Lesotho: qokoa

H. poecilotricha (Hack.) Stapf (*Andropogon buchananii* Stapf; *Andropogon pleiarthron* Stapf; *Andropogon poecilotricha* Hack.; *Andropogon poecilotrichus* Hack.; *Cymbopogon pleiarthron* (Stapf) Stapf ex Burt Davy; *Hyparrhenia buchani* (Stapf) Stent; *Hyparrhenia buchani* (Stapf) Stapf ex Stent; *Hyparrhenia familiaris* var. *pilosa* Robyns; *Sorghum poecilotrichum* (Hack.) Kuntze)

Eastern tropical Africa, South Africa. Perennial, variable, tufted, leaf blades rigid, basal leaf sheaths glabrous, rhizomatous, panicle lax and open, callus pungent or acute, raceme pairs with 4-7 awns, long upper raceme base with 2 pairs of homogamous spikelets, useful fodder grass, habitat late successional, bushveld, savannah, wooded grassland, deciduous bushland, see *Boletim da Sociedade Broteriana* 3: 138. 1885, *Revisio Generum Plantarum* 2: 792. 1891, *Flora Capensis* 7: 362, 364. 1898 and *Annals of the Transvaal Museum* 3: 121. 1912, *Flora of Tropical Africa* 9(2): 309-310. 1919, *Bothalia* 1: 249. 1924, *Flore Agrostologique du Congo Belge* 1: 176. 1929.

in Uganda: lojokopolon

H. quarrei Robyns (*Hyparrhenia hirta* (L.) Stapf) (named for Paul Quarre, b. 1904, botanical collector in Zaire and tropical Africa)

Tropical and South Africa. Perennial, tufted, robust, montane, tussocky, basal leaf sheaths pubescent, shortly rhizomatous, narrow panicle, raceme pairs with 6-10 awns, racemes deflexed when old, spatheoles lanceolate, spikelets pubescent to villous, used for thatching, grazed by domestic stock, found in floodplains, disturbed sites, clearings, roadsides, forest margins, grassy banks, field borders, wooded savannah, deciduous bushland, see *Flore Agrostologique du Congo Belge* 1: 171. 1929.

in English: thatching grass

H. rudis Stapf (*Andropogon rudis* Nees ex Steud.; *Arthraxon rudis* (Nees ex Steud.) Hochst.; *Hyparrhenia acutispathacea* (De Wild.) Robyns var. *pilosa* Bamps)

Central Africa, Madagascar, Zaire. Perennial, very robust, coarse, thick, rhizomatous, tufted, with stilt roots, culms exposed at base, leaf blades scabrid, loosely arranged raceme pairs with 4-8 awns, callus cuneate narrowly obtuse to subacute, pedicellate spikelets villous, long stout awns, browsed while it is still young, growing in moist soils, upland grassland, deciduous bushland, savannah grassland, see *Flora of Tropical Africa* 9(2): 344-346. 1919, *Bulletin du Jardin Botanique de l'État* 25: 392. 1955, *Kew Bulletin, Additional Series* 2: 1-196. 1969.

H. Orufa (Nees) Stapf (*Andropogon altissimus* Hochst., nom. illeg., non *Andropogon altissimus* (Poir.) Raspail; *Andropogon bouangensis* Franch.; *Andropogon fulvicomus* Hochst. ex A. Tropical Africa and America. Perennial or rarely annual, erect, herbaceous, very variable, rather coarse, tall, robust, densely tufted, unbranched, reedlike, tussocky or clumped, rhizomatous, leaf blade expanded and finely pointed, leaf sheaths rounded and sparsely long-pilose, ligule firmly membranous and brownish, inflorescence a panicle contracted or slightly open, spatheoles linear-lanceolate, spike-like racemes enclosed by a large spathe, spikelets with reddish brown hairs, bracts at raceme bases green and narrowly lanceolate, 7-14-17 awns per raceme, short obtuse callus, flexuous pedicels, awns dark red and twisted, sessile spikelet bisexual and awned, pedicelled spikelet male or sterile and awnless, not very palatable, leaves and stems eaten by baboons, palatable before the formation of tussocks, cultivated and naturalized, medicinal, good fodder when cut back or kept low by grazing, useful pulp for paper, used in Africa as a coarse thatching grass, aggressive weed species, invasive, it stands waterlogging and temporary flooding, does not persist under continuous close grazing, susceptible to frost, common on disturbed areas, omiramba, rivers, vleis, wooded grassland, on dry ground, lawn, trampled soil, along roadsides and in roadbeds, cultivated fields, dry to mesic roadsides, at the edge of floodplain, deciduous bushland, disturbed moist places, wet savannahs, among rocks and under trees, seasonally flooded grassland and open woodland, in shade and in sun, near trainage ditches, shrubby areas, along trail, on termite mounds, see *Flora Brasiliensis seu Enumeratio Plantarum* 2: 345. 1829, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 2(3): 281. 1832, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 492. 1833, *Flora* 24: 277. 1841, *Schimperi iter Abyssinicum. H. rufa (Nees) Stapf subsp. *altissima* (Stapf) B.K. Simon (*Hyparrhenia altissima* Stapf)

Africa. Annual or perennial, erect, reddish spatheoles, racemes paired with a pair of sterile spikelets at the base of the lower racemes, sessile spikelets hairy, pedicellate spikelets hairy, a roadside weed, see *Flora of Tropical Africa* 9(2): 304-308. 1919, *Austrobaileya* 3: 86. 1989.

H. rufa (Nees) Stapf var. *rufa*

Tropical Africa. Perennial or annual, very variable, rhizomatous, sessile spikelets yellowish to reddish, lax or contracted panicle, 7-14 awns per raceme pairs, glossy lower glume, used in Africa as a coarse thatching grass, pasture, palatable when young, found in disturbed moist places, wooded savannah, along roadsides, wet meadows, sandy clearings, edge of floodplain, along riverbanks, sandy loam, see *Flora of Tropical Africa* 9(2): 304-308. 1919.

in English: thatching grass, giant thatching grass

in South Africa: geelaartamboekiegras

H. schimperi (Hochst. ex A. Rich.) Andersson ex Stapf (*Andropogon schimperi* Hochst. ex A. Rich.; *Andropogon schimperi* var. *longicuspis* Hochst.; *Cymbopogon schimperi* (Hochst. ex A. Rich.) Rendle; *Hyparrhenia viridescens* Robyns; *Sorghum schimperi* (Hochst. ex A. Rich.) Kuntze)

Tropical Africa, Madagascar. Perennial, erect, slender to robust, coarse, thick, tufted, leaf blades scabrid, shortly rhizomatous, stilt roots, panicle contracted, spatheoles narrowly lanceolate, 5-9 awns per raceme pairs, raceme-base tip with a scarious lobe, pedicellate spikelets glabrous to pilose, thatching grass, used for making fences, found in swampy areas, savannah, moist places, see *Schimperi iter Abyssinicum. Sectio secunda* 1052. 1842, *Tentamen Florae Abyssinicae* ... 2: 466. 1850, *Mexicanas Plantas* 2: 51, 67. 1886, *Revisio Generum Plantarum* 2: 792. 1891, *Catalogue of the African Plants Collected by Dr. F. Welwitsch in 1853-61* 2(1): 155. 1899 and *Flora of Tropical Africa* 9(2): 341-343. 1919, *Flore Agrostologique du Congo Belge* 1: 182. 1929, *Kew Bull., Add. Ser.* 2: 38. 1969.

in English: thatching grass

H. smithiana (Hook.f.) Stapf (*Andropogon smithianus* Hook.f.; *Sorghum smithianum* (Hook.f.) Kuntze)

Tropical Africa. Perennial, tufted, dangling spikelets, feathery inflorescence branched, see *Journal of the Proceedings of the Linnean Society* 7: 232. 1864, *Revisio Generum Plantarum* 2: 792. 1891 and *Flora of Tropical Africa* 9(2): 314-315. 1919, *Opera Botanica* 121: 159-172. 1993.

in Nigeria: geena saabal, geene saabal

in Sierra Leone: fualobi, lofu-na

in Upper Volta: jantaaje, yantaare

H. smithiana (Hook.f.) Stapf var. *major* Clayton

Africa, Benin, Ghana. Good thatching grass, see *Kew Bulletin, Additional Series* 2: 57. 1969.

H. subplumosa Stapf

Tropical Africa, Nigeria, Tanzania, Benin. Perennial, useful, robust, coarse, brittle, hard pointed flower spikes, thatching grass, palatable only when young, savannah woodland, see *Flora of Tropical Africa* 9(2): 366-368. 1919, *Kew Bulletin, Additional Series* 2: 164-167. 1969.

in Niger: féhindé, korkondi

in Nigeria: buta, butar kurege, celbi, celbol, cika daafi, cika daajii, cika dawà, garlabbe, geena saabal, kibiar daajii, lalemo, mokoro, selbo, tsiikar-daajii, tsiikar-dawà, tumaa da goobaraa, wodeho

in Sierra Leone: banbira, fualobi, gbokilobon, khalansogona, kobonkolo, lofu-na, ngale, nyanda binye, pankasaxi, tikolo-yo

in Upper Volta: bukkaho, jantaaje, lassa, yantaare

H. tamba (Steud.) Stapf (*Andropogon lepidus* Nees var. *tamba* (Hochst. ex Steud.) Hack.; *Andropogon tamba* Hochst. ex Steud.; *Cymbopogon tamba* (Hochst. ex Steud.) Rendle; *Hyparrhenia glauca* Stent; *Hyparrhenia tamba* (Hochst. ex Steud.) Andersson ex Stapf)

Tropical Africa, Ethiopia. Perennial, erect, densely tufted, thick, rhizomatous, robust, stout, sometimes with small stilt roots at the lower nodes, basal leaf sheaths hairy to silky pubescent, ligule membranous, racemes 5-8 awns per pair, spathe at raceme bases, spikelets dark purplish, sessile spikelet with a curved awn, pedicellate spikelets awnless or mucronate, low grazing value, too hard to be palatable, thatching grass, found along roadsides and streamsides, vleis, in grassland, moist soils, bushveld areas, grassy slopes, very close to *Hyparrhenia schimperii*, see *Flora of Africa Australioris Illustrationes Monographicae* 1: 113. 1841, *Synopsis Plantarum Glumacearum* 1: 385. 1854, *Monographiae Phanerogamarum* 6: 625. 1889 and *Journal of the Linnean Society, Botany* 40: 227. 1911, *Flora of Tropical Africa* 9(2): 336-337. 1919, *Bothalia* 1: 251. 1923.

in English: blue thatching grass

in South Africa: bloutamboekiegras

H. tuberculata W.D. Clayton

Ethiopia. Perennial, caespitose, slender, rhizomatous, inflorescence paniculate of 2-4 nodding raceme pairs, racemes 8-11-awned per pair, raceme-bases oblong hispid with golden bristles, homogamous spikelets tuberculate-hispid on the back, spikelets sessile and pedicelled, leaves and grains eaten by baboons, upland grassland, among rocks, dry grasslands, highlands, closely related to *Hyparrhenia arrhenobasis* (Hochst. ex Steud.) Stapf, see *Kew Bulletin, Additional Series* 2: 155-156. 1969.

H. umbrosa (Hochst.) Andersson ex W.D. Clayton (*Andropogon lepidus* Nees subvar. *umbrosus* (Hochst.) Hack.; *Andropogon umbrosus* Hochst.; *Cymbopogon umbrosus* (Hochst.) Pilg.)

Tropical Africa. Perennial, slender, robust, stout, montane, rambling, rhizomatous with a slender rhizome, with small stilt roots at the lower nodes, paired racemes with 4-6 awns, oblong to rounded callus, pedicellate spikelets villous, grazed by all stock when still young, used for thatching, found along roadsides, old cultivations, grass savannah, see *Flora of Africa Australioris Illustrationes Monographicae* 1: 113. 1841, *Schimperi iter Abyssinicum. Sectio secunda* no. 1116. 1842, *Monographiae Phanerogamarum* 6: 625. 1889 and *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 10(96): 598. 1929, *Kew Bulletin, Additional Series* 2: 127. 1969.

in Nigeria: sambawal, shambawal

H. variabilis Stapf (*Andropogon acutispathaceus* De Wild.; *Cymbopogon acutispathaceus* De Wild.; *Hyparrhenia acutispathacea* (De Wild.) Robyns; *Hyparrhenia iringensis* Pilg.; *Hyparrhenia spectabilis* Stapf)

Tropical eastern Africa, South Africa, Transvaal, Yemen. Perennial, decumbent, rhizomatous, robust, with small stilt roots at the lower nodes, long narrow dense panicle much branched, 2-5 awns per raceme pair, raceme-bases very short and flattened, spatheoles deeply concave and boat-shaped, sessile spikelets pubescent, callus cuneate, pedicellate spikelets glabrous and awned, pith eaten by chimpanzees, found in open swampy areas, tall grassland, see *Flora of Tropical Africa* 9(2): 334-336, 338-340. 1919, *Bulletin du Jardin Botanique de l'État* 6: 7. 1919, *Flore Agrostologique du Congo Belge* 1: 181. 1929, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 14: 101. 1938, *Kew Bulletin, Additional Series* 2: 113. 1969, *Kew Bulletin* 30: 517. 1975, *Bothalia* 24: 241-246. 1994.

in tropical Africa: katengo, kimbulu, okatengo, okate

H. violascens (Stapf) W.D. Clayton (*Hyparrhenia soluta* var. *violascens* Stapf)

Tropical Africa. Annual, erect, good fodder when young, used for thatching and matting, old cultivations, along roadsides, see *Flora of Tropical Africa* 9(2): 319, 334-336, 338-340. 1919, *Kew Bulletin, Additional Series* 2: 88. 1969.

in Nigeria: eeruwe, gajiri, jimfa jimfa, jimfi, jimfihu

H. welwitschii (Rendle) Stapf (*Andropogon chrysopogon* Welw. ex Rendle; *Andropogon welwitschii* (Rendle) K. Schum.; *Cymbopogon welwitschii* Rendle; *Hyparrhenia gracilescens* Stapf)

Africa, Benin, Angola. Annual, coarse, tufted, awns twisted when dry, browsed when young, used for thatching, sandy soils, savannah woodland, damp soil, see *Catalogue of the African Plants Collected by Dr. F. Welwitsch in 1853-61* 2(1): 157. 1899 and *Just's Botanischer Jahresbericht*. 27(1): 454. 1901, *Flora of Tropical Africa* 9(2): 356-358. 1919.

in Guinea: Kassa, Kpala, Gbali

in Sierra Leone: bintanana, buitanana, funfurekhame-na, gbokilobon, kimbigira-na

Hyperthelia W.D. Clayton

From the Greek *hyper* “above, over” and *thela* “nipple” or *thelys, theleia, thelia* “female.”

About 6-7 species, tropical Africa. Panicoideae, Andropogonodae, Andropogoneae, Andropogoninae, or Panicoideae, Andropogoneae, Anthistiriinae, annual or perennial, caespitose, tall, herbaceous, branched or unbranched, leaf blades linear, auricles absent, culm sheaths persistent, ligule an unfringed membrane, plants bisexual, paired racemes subtended by spatheoles, large compound panicle, raceme-pairs 2-awned, very long raceme-base appendages, pedicellate spikelets male, 1 pair of spikelets at the base of the lower raceme, male spikelets with 2 florets, 2 glumes subequal or more or less equal, lower glume of sessile spikelet with a median groove, lower floret reduced to an empty lemma, palea present or absent, 2 free and fleshy lodicules, 3 stamens, ovary glabrous, 2 stigmas dark to reddish, species of open habitats, savannah, grasslands, disturbed areas, uncultivated lands, bushveld, on sandy soils, sometimes referred to *Hyparrhenia* Andersson ex Fourn., type *Hyperthelia dissoluta* (Nees ex Steud.) Clayton, see *Kew Bulletin* 20: 438, 441. 1966, *Kew Bulletin, Additional Series* 2: 173-174. 1969, *Flora Mesoamericana* 6: 394. 1994, *African Journal of Ecology* 37(2): 202-210. June 1999, *Contributions from the United States National Herbarium* 46: 257. 2003, *Journal of Applied Ecology* 40(3): 430-444. June 2003, *Journal of Biogeography* 31(1): 5-18. Jan 2004, *African Journal of Ecology* 42(4): 328-337. Dec 2004.

SPECIES:

H. colobantha Clayton (from the Greek *kolobos* “stunted, mutilated” and *anthos* “flower”)

Africa. Upper raceme abortive, see *Kew Bulletin* 20: 439. 1966.

H. cornucopiae (Hack.) Clayton (*Andropogon cornucopiae* Hack.)

Africa, Central African Republic. Woodland, wooded savannah, sandy loam, see *Flora* 68(7): 126. 1885 and *Kew Bulletin* 20: 446. 1966.

H. dissoluta (Nees ex Steudel) Clayton (*Andropogon antherioides* Rupr.; *Andropogon anthistirioides* Rupr.; *Andropogon arundinaceus* Scop., nom. illeg., non *Andropogon arundinaceus* Bergius; *Andropogon dissoluta* Nees ex Steud.; *Andropogon luteolus* Vanderyst; *Andropogon macrolepis* Hack.; *Andropogon ruprechtii* Hack.; *Anthistiria dissoluta* Steud.; *Anthistiria dissoluta* Nees ex Steud.; *Cymbopogon ruprechtii* (Hack.) Rendle; *Cymbopogon ruprechtii* (Hack.) Hitchc., nom. illeg., non *Cymbopogon ruprechtii* (Hack.) Rendle; *Hyparrhenia dissoluta* (Nees) C.E. Hubb.; *Hyparrhenia dissoluta* (Steud.) C.E. Hubb.; *Hyparrhenia dissoluta* (Steud.) C.E. Hubb.; *Hyparrhenia macrolepis* (Hack.) Stapf; *Hyparrhenia ruprechtii* (Hack.)

E. Fourn.; *Hyparrhenia ruprechtii* E. Fourn.; *Hyperthelia dissoluta* (Nees ex Steud.) Clayton; *Hyperthelia dissoluta* (Nees) Clayton; *Hyperthelia macrolepis* (Hack.) Clayton; *Sorghum ruprechtii* (Hack.) Kuntze) (for the Austrian botanist Franz Josef Ruprecht, 1814-1870, physician; see J.H. Barnhart, *Biographical notes upon botanists*. 3: 192. 1965; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 1993; Ethelyn Maria Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933; Emil Bretschneider, *History of European Botanical Discoveries in China*. Leipzig 1981; Stafleu and Cowan, *Taxonomic literature*. 4: 993-997. 1983; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 342. 1972; Mariella Azzarello Di Misa, editor, *Il Fondo Antico della Biblioteca dell'Orto Botanico di Palermo*. 240. Palermo 1988)

Tropical and South Africa, Madagascar. Perennial, tufted, robust, montane, erect, usually unbranched, leaf blades smooth to scabrid, ligule a membrane, panicle narrow and stiff, paired racemes each with a spathe and 2 yellow awns, spikelets in pairs pungently bristled, pedicellate spikelet with a straight awn, sessile spikelet with a twisted awn, lower glume of sessile spikelets narrowly grooved, useful grass, fiber for matting or thatching, used for reed-work, naturalized, palatable when young, grazed in the very early stage of growth, common in disturbed areas, deciduous bushland, grassland, waysides, uncultivated lands, pastures, on sandy soils, woodland, savannah, veld, field margins, along roadsides, see *Bulletin de l'Académie Royale des Sciences et Belles-lettres de Bruxelles* 9(2): 243, 245. 1842, *Synopsis Plantarum Glumacearum* 1: 400. 1854, *Flora* 68(7): 125-126. 1885, *Mexicanas Plantas* 2: 67. 1886, *Revisio Generum Plantarum* 2: 792. 1891, *Catalogue of the African Plants Collected by Dr. F. Welwitsch in 1853-61* 2(1): 160. 1899 and *Contributions from the United States National Herbarium* 17(3): 209. 1913, *Bulletin agricole du Congo Belge* 9: 241. 1918, *Flora of Tropical Africa* 9(2): 328-329. 1919, *Flora of West Tropical Africa* 2: 591. 1936, *Kew Bulletin* 20: 441, 445. 1966, *Cuscatlania* 1(6): 1-29. 1991, *Bothalia* 24: 241-246. 1994, *Flora Mesoamericana* 6: 394. 1994.

in English: thatching grass, yellow thatching grass, yellow hard grass

in Malawi: chipepati, cilela, kampiti, kanyumbu, mpsyipe, nyumba ya nantchengwa

in Senegal: cicca, dazo, fodod, khat, mbombod, sel a baré, yegalé

in South Africa: bootjietamboekiegras, geeltamboekiegras, dekgras, geeldekras, rooigras, tamboekiegras

in tropical Africa: katengo, okatengo, okate

in Upper Volta: bodooko, boduko, gonyamba

in Yoruba: sege

H. edulis (C.E. Hubb.) Clayton (*Hyparrhenia edulis* C.E. Hubb.)

Africa, Sudan. Harvested for grains, see *Hooker's Icones Plantarum* 35: t. 3495. 1951, *Kew Bulletin* 20: 447. 1966.

H. kottoensis Desc.

Africa. See *Bulletin de la Société Botanique de France, Lettres Botanique* 134(2): 203. 1987.

H. macrolepis (Hack.) Clayton (*Andropogon macrolepis* Hack.; *Anthistiria dissoluta* Nees ex Steud.; *Hyparrhenia macrolepis* (Hack.) Stapf; *Hyperthelia dissoluta* (Nees ex Steud.) Clayton)

Africa. See *Synopsis Plantarum Glumacearum* 1: 400. 1854, *Flora* 68(7): 125. 1885 and *Flora of Tropical Africa* 9(2): 328-329. 1919, *Kew Bulletin* 20: 441, 445. 1966, *Bothalia* 24: 241-246. 1994.

H. polychaeta Clayton

Africa. See *Kew Bulletin* 20: 441. 1966.

Hypogynium Nees = *Andropogon* L.

From the Greek *hypo* "beneath, underneath" and *gyne* "female."

About 2 species, tropical America and Africa. Panicoideae, Andropogonodae, Andropogoneae, Andropogoninae, perennial, herbaceous, unarmed, densely caespitose, erect, auricles absent, leaf sheaths glabrous, plants monoecious, inflorescence paniculate, male florets 3 staminate, all the fertile spikelets unisexual, 2 glumes more or less equal, lower glume 2-keeled, upper glume 1- to 3-nerved, palea present or absent, 2 fleshy lodicules, stamens 0, ovary glabrous, 2 stigmas, open habitats, savannah, marshy areas, often referred to *Andropogon* L., type *Hypogynium spathiflorum* Nees, see *Species Plantarum* 2: 1045-1046. 1753, *Flora Brasiliensis seu Enumeratio Plantarum* 364, 366. 1829 and *Fl. Trop. E. Afr. Gramineae* 770. 1982, *Taxon* 41: 556. 1992, *Flora Mesoamericana* 6: 390. 1994, *Taxon* 44: 611-612. 1995, *Fontqueria* 46: [i-ii], 1-259. 1997, *Contributions from the United States National Herbarium* 46: 20-64, 257. 2003.

Species

H. virgatum (Desv. ex Ham.) Dandy (*Anatherum inerme* (Steud.) Griseb.; *Anatherum spathiflorum* (Nees) Griseb.;

Anatherum virgatum (Desv. ex Ham.) Desv.; *Andropogon spathiflorus* (Nees) Kunth; *Andropogon virgatus* Desv. ex Ham.; *Hypogynium spathiflorum* Nees)

Venezuela, West Indies. Perennial, erect, see *Prodromus Plantarum Indiae Occidentalis* 9. 1825, *Flora Brasiliensis seu Enumeratio Plantarum* 2: 364, 366. 1829, *Mémoires de la Société d'Agriculture, Sciences et Arts d'Angers* 1: 175. 1831, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 496. 1833, *Synopsis Plantarum Glumacearum* 1: 390. 1854, *Catalogus plantarum cubensium ...* 236. 1866 and *Journal of Botany, British and Foreign* 69(2): 54. 1931, *Hickenia* 1: 73-78. 1977, *Brittonia* 38(4): 411-414. 1986.

Hypseochloa C.E. Hubb.

From the Greek *hypsos*, *hypseos* "height, sublimity" and *chloa* "grass."

2 species, tropical West Africa, mountains. Pooideae, Poodae, Aveneae, annual, slender, herbaceous, auricles absent, ligule an unfringed membrane, plants bisexual, cleistogamous or chasmogamous, open inflorescence paniculate, spikelets with minute rachilla extension, 2 glumes equal 3-5-nerved, lemma margins inrolled and clasping palea keels, dorsal geniculate awn, palea 2-keeled 2-nerved, 2 free and membranous lodicules, 3 stamens, ovary glabrous, 2 stigmas, species of open habitats, grassland, type *Hypseochloa cameroonensis* C.E. Hubb., see *Bulletin of Miscellaneous Information Kew* 1936(5): 300, f. 1. 1936.

Species

H. cameroonensis C.E. Hubb.

Southern Nigeria. See *Bulletin of Miscellaneous Information Kew* 1936(5): 300, f. 1. 1936, *Flora of West Tropical Africa* 2: 499, 530. 1936.

H. matengoensis C.E. Hubb.

Africa, Tanzania. See *Kew Bulletin* 36(1): 62. 1981.

Hypudaerus A. Braun = *Anthephora* Schreb.

Panicoideae, Paniceae, Cenchrinae, see *Beschreibung der Gräser* 2: 105, t. 44. Leipzig 1769-1810, *Flora* 24: 275. 1841, *Florae Africae Australioris Illustrationes Monographicae* 1: 74. 1841, *Flora* 27: 249-250. 1844, *Tentamen Florae Abyssinicae ...* 2: 389. 1850, *Die Pflanzenwelt Ost-Afrikas* 50: 99. 1895 and *Vierteljahrsschrift der Naturforschenden Gesellschaft in Zürich* 56: 70. 1911, *Transactions of the Royal Society of South Africa* 20: 189-200. 1932, *Contributions from the United States National Herbarium* 46: 67-68, 257. 2003.

Hystericina Steud. = *Ancistragrostis* S.T. Blake, *Echinopogon* P. Beauv.

Pooideae, Poodae, Aveneae, type *Hystericina alopecuroides* Steud., see *Essai d'une Nouvelle Agrostographie* 42-43, 148, 161. 1812, *Synopsis Plantarum Glumacearum* 1: 35, 37. 1855 [1853] and *Hooker's Icones Plantarum* 33: tab 3261. 1935, *Blumea*, Supplement 3: 56-62. 1946.

Hystringium Steud. = *Tribolium* Desv.

Danthonioideae, Danthoneiae, or Arundinoideae, Danthoneiae, see *Prodromus Plantarum Capensium*, ... 19. 1794, *Mantissa* 2: 351. 1824, *Mémoires de la Société d'Agriculture, Sciences et Arts d'Angers* 1: 168, t. 7, f. 2. 1831, *Révision des Graminées* 2: 555, t. 192. 1832, *Nomenclator Botanicus. Editio secunda* 2: 11. 1841 and *Blumea* 4(3): 502. 1941, *Journal of South African Botany* 8(4): 272. 1942, *Kew Bulletin* 40(4): 798. 1985, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 119(4): 445-507. 1997, *Contributions from the United States National Herbarium* 46: 622. 2003

Hystrix Moench = *Asperella* Humb., *Elymus* L.

From the Greek *hystrix*, *hystrichos* "porcupine, bristles," referring to the awns.

About 9 species, temperate Asia, North America, New Zealand. Pooideae, Triticoideae, Triticeae, or Pooideae, Triticeae, Hordeinae, perennial, herbaceous, tufted, auricles present, leaf blades flexible and broadly linear, ligule an unfringed membrane, plants bisexual, inflorescence spicate, spikelets solitary to paired, 1- to 4-flowered, 2 or 1 glumes per spikelet, glumes reduced or usually suppressed, lemmas rounded on back and awned, lemma tapering into long awns nongeniculate, palea present, free and ciliate lodicules, 3 stamens, ovary hairy, 2 stigmas, shade species, woods and thickets, open habitats, woodland, meadows, often referred and closely related to *Elymus* L., type *Hystrix patula* Moench, see *Species Plantarum* 1: 83. 1753, *Botanisches Magazin (Römer & Usteri)* 7: 5. 1790, *Methodus Plantas Horti Botanici et agri marburgensis, a staminum situ describendi* ... 294-295. Marburgi Cattorum [Marburg] 1794 and *Canad. J. Bot.* 42: 554. 1964, *Taxon* 41: 562-563. 1992, *Taxon* 44: 611-612. 1995, C. Baden, S. Frederiksen and O. Seberg, "A taxonomic revision of the genus *Hystrix* Moench (Triticeae, Poaceae)." *Nord. J. Bot.* 17(5): 449-467. 1997, Clair L. Kucera, *The Grasses of Missouri* University of Missouri Press, Columbia 1998, *Nordic Journal of Botany* 18(1): 89-94. 1998, Zhou Yong-Hong, Zheng You-Liang, Yang Jun-Liang and Yen Chi, "Relationships among species of *Hystrix* Moench and *Elymus* L. assessed by

RAPDs." *Genetic Resources and Crop Evolution* 47(2): 191-196. Apr 2000, *Contributions from the United States National Herbarium* 48: 279-307. 2003.

Species

H. coreana (Honda) Ohwi (*Asperella coreana* (Honda) Nevski; *Elymus coreanus* Honda)

Asia. See *Journal of the Faculty of Science: University of Tokyo, Botany* 3(1): 17. 1930, *Flora URSS* 2: 693. 1934, *Journal of Japanese Botany* 12(9): 653. 1936.

H. gracilis (Hook.f.) Kuntze (*Gymnostichum gracile* Hook.f.)

Asia. Leaf blades slender and flaccid, spikelets solitary, see *Flora of New Zealand* 1: 312, t. 70. 1853, *Revisio Generum Plantarum* 2: 778. 1891 and *New Zealand J. Bot.* 32: 146. 1994.

H. laevis (Petrie) Allan (*Asprella laevis* Petrie)

Asia. Leaf blades slender and flaccid, spikelets solitary, see *Transactions and Proceedings of the New Zealand Institute* 27: 406. 1895 and *New Zealand Department of Scientific and Industrial Research Bulletin* 49: 88. 1936, *New Zealand J. Bot.* 32: 147. 1994.

- in English: eastern bottle-brush, bottlebrush grass

I

Ichnanthus P. Beauv. = *Ischnanthus* Roemer & Schultes, *Navicularia* Raddi, *Yakirra* Lazarides & R.D. Webster

From the Greek *ichnos* “a track, footprint, footstep” and *anthos* “flower,” possibly referring to the appendages of the upper floret; see A.M.F.J. Palisot de Beauvois, *Essai d'une Nouvelle Agrostographie*. 56, t. 12, f. 1. 1812.

Some 33-40 species, New World tropics, pantropical. Panicoideae, Panicodae, Paniceae, or Panicoideae, Paniceae, Paspalinae, annual or perennial, habit variable, sprawling, creeping, caespitose, leafy and herbaceous, mostly stoloniferous, culms often decumbent and rooting from lower nodes, culm nodes hairy or glabrous, culm internodes solid or hollow, the shoots not aromatic, auricles absent or present, leaves lanceolate or linear or short broadly ovate, ligule a fringed or ciliolate membrane, leaf sheaths usually auriculate, plants bisexual, open or contracted inflorescence paniculate and terminal, spikelets solitary or in pairs, laterally compressed spikelets, 2 florets, lower floret male, upper floret bisexual, two glumes keeled and membranous, lower glume 3- to 7-nerved, upper glume 5- to 9-nerved, upper lemma with flat or inrolled margins, callus of upper floret with firm or delicate wings adnate to the base of lemma, palea present, 2 free and fleshy small lodicules broadly cuneate, 3 stamens, ovary glabrous, 2 stigmas red to dark, shade species, grassland, disturbed places, forest shade, forest margin, rain forest, closely related to *Panicum*, type *Ichnanthus panicoides* P. Beauv., see *Species Plantarum* 1: 55. 1753, *Essai d'une Nouvelle Agrostographie* 56, 57, t. 12, f. 1. 1812, *Systema Vegetabilium* 2: 28, 497. 1817, *Agrostografia Brasiliensis* 38, 40, t. 1, f. 5. 1823, *De Graminibus Paniceis* 52, 159. 1826, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Species

I. annuus Killeen & Kirpes

Brazil. See *Novon* 1(4): 179, f. 3. 1991.

I. bambusiflorus (Trin.) Döll (*Ichnanthus damazianus* Hack.; *Oplismenus penicillatus* (Nees) Kunth; *Panicum bambusiflorum* Trin.; *Panicum penicillatum* Nees; *Panicum penicillatum* Willd. ex Nees, nom. illeg., non *Panicum penicillatum* Nees ex Trin.) (named for Leonidas Botelho Damazio, 1854-1922, botanical collector in Brazil)

Brazil. Perennial, robust, herbaceous, scandent, trailing upward, leaf sheaths more or less glabrous to hispid, stiff leaf blades cordate and lanceolate acuminate, panicle ovate with spreading or ascending branches, spikelets congested and ovate, lower glume acuminate to aristate, upper glume ovate, lower lemma ovate, upper lemma with 2 scars at the base, in shade of bush and small trees, gallery forest shade, see *De Graminibus Paniceis* 188. 1826, *Révision des Graminées* 1: 45. 1829, *Flora Brasiliensis seu Enumeratio Plantarum* 145, 242. 1829, *Flora Brasiliensis* 2(2): 288. 1877 and *Repertorium Specierum Novarum Regni Vegetabilis* 12(333-335): 385. 1913.

I. breviscrobis Döll (*Ichnanthus rondonii* Kuhlm.; *Panicum breviscrobis* (Döll) Pilg.; *Panicum magnum* Hitchc.) (Latin *scrobis* or *scrobs* “a ditch, trench,” *scrobiculus* “a little ditch”)

Brazil. Perennial, herbaceous, suffrutescent, rhizomatous, robust, tough, scandent, clambering, sprawling, scrambling, prostrate, ligule membranous, leaf blades lanceolate acuminate, panicle linear-oblong, spikelets ovate pubescent, lower glume ovate acute, upper lemma without wings, found along edge of forest, riverbanks, forest openings, see *Species Plantarum* 1: 55, 58. 1753, *Flora of the British West Indian Islands* 551. 1864, *Flora Brasiliensis* 2(2): 294. 1877 and *Contributions from the United States National Herbarium* 15: 13-16. 1910, *Comissão de Linhas Telegraficas Estratégicas de Matto-Grosso ao Amazonas, Botanica* 67(Bot. 11): 66-67, t. 6. Rio de Janeiro 1922, *Contributions from the United States National Herbarium* 22(6): 489, f.

84. 1922, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 11(104): 242. 1931, F.C. Hoehne (1882-1959), J.G. Kuhlmann (1882-1958) et al., *Indice bibliográfico e numérico das plantas colhidas pela Comissão Rondon*. São Paulo 1951, *Syst. Bot.* 12: 190. 1987, *Bonplandia* 9: 35. 1996.

in Colombia: subia

I. calvescens (Nees ex Trin.) Döll (*Ichnanthus acuminatus* Swallen; *Ichnanthus amplus* Swallen; *Ichnanthus calvescens* var. *pilosus* Döll; *Ichnanthus calvescens* var. *scabrius* Döll; *Ichnanthus chaseae* Swallen; *Ichnanthus hispidus* Swallen; *Ichnanthus ichnodes* (Griseb.) Hitchc. & Chase; *Ichnanthus indutus* Swallen; *Ichnanthus pallidus* Swallen; *Ichnanthus vestitus* Swallen; *Panicum calvescens* Nees ex Trin.; *Panicum calvescens* Nees; *Panicum ichnodes* Griseb.)

South America, Brazil. Perennial or annual, herbaceous, tall, tufted, large, erect or scrambling, sprawling, arching, rooting at the nodes, clumped, leaf blades lanceolate to ovate-lanceolate, leaves glabrous or hairy, panicle much branched with spreading branches, spikelets ovate, lower glume ovate, upper lemma winged, growing along streams and rivers, riverbanks, wooded slopes, scrub savannah, forest, rocky soils, similar to *Panicum hebotos* Trin., see *Species Plantarum* 1: 55, 58. 1753, *De Graminibus Paniceis* 193. 1826, *Flora of the British West Indian Islands* 551. 1864, *Fl. Bras.* 2(2): 285-287. 1877 and *Contr. U.S. Natl. Herb.* 15: 13-16. 1910, *Contributions from the United States National Herbarium* 18(7): 335. 1917, *Contributions from the United States National Herbarium* 29(6): 271-272. 1948 [1949], *Fieldiana, Botany* 28(1): 28. 1951, *Memoirs of the New York Botanical Garden* 9(3): 265. 1957, *Phytologia* 11(2): 74-78. 1964, *Syst. Bot.* 7(1): 109, 111. 1982.

I. calvescens (Nees ex Trin.) Döll var. ***calvescens***

Brazil. Leaf blades hispid subcordate, grassland, open places.

I. calvescens (Nees ex Trin.) Döll var. ***scabrius*** Döll (*Ichnanthus auriculatus* Swallen; *Ichnanthus calvescens* var. *glabrescens* Döll; *Ichnanthus ichnodes* (Griseb.) Hitchc. & Chase; *Ichnanthus luetzelburgii* Mez; *Ichnanthus pallidus* Swallen; *Ichnanthus silvestris* Swallen; *Ichnanthus trinitensis* Mez; *Ichnanthus verticillatus* Mez; *Ichnanthus vestitus* Swallen; *Panicum ichnodes* Griseb.)

Brazil. Leaf blades attenuate glabrous to hirsute, grassland, forest shade, see *Flora of the British West Indian Islands* 551. 1864, *Flora Brasiliensis* 2(2): 286. 1877 and *Contributions from the United States National Herbarium* 18(7): 335. 1917, *Repertorium Specierum Novarum Regni Vegetabilis* 15: 126, 130. 1918, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 56(125): 9. 1921, *Phytologia* 11(2): 75, 77-79. 1964, *Syst. Bot.* 7: 111. 1982.

I. camporum Swallen (*Panicum procurrens* var. *solutum* Döll)

Brazil. Delicate, weak, fragile, clambering, found in sandy soil, see *De Graminibus Paniceis* 183. 1826, *Flora Brasiliensis* 2(2): 272. 1877 and *Phytologia* 11(3): 149. 1964, *Novon* 1(4): 177-184. 1991.

I. dasycoleus Tutin (*Ichnanthus villosus* Swallen) (from the Greek *dasys* "thick, shaggy, hairy" and *koleos* "a sheath")

British Guiana, Brazil, Venezuela. Perennial or annual, herbaceous, tufted, terrestrial, creeping, hirsute, leaf sheaths woolly, pubescent leaf blades lanceolate tapering at the base, panicle ovate with spreading branches, spikelets elliptic-oblong, lower glume ovate acute or acuminate, upper glume and lower lemma ovate, upper lemma with membranous wings, found in damp areas, forest, savannah, sandy places, along rivers, see *Species Plantarum* 1: 55, 58. 1753 and *Contr. U.S. Natl. Herb.* 15: 13-16. 1910, *Journal of Botany, British and Foreign* 72(864): 337, f. 8a. 1934, *Journal of the Washington Academy of Sciences* 28(1): 10-11. 1938, *Fieldiana, Botany* 24(2): 38-331. 1955.

I. drepanophyllus Mez (*Ichnanthus riedelii* (Trin.) Döll; *Panicum riedelii* Trin.)

Brazil. Annual, erect, tufted or shortly stoloniferous, foliage basal, leaf sheaths hirsute, leaf blades lanceolate pseudo-petiolate, leaves glabrous and scabrous, panicle narrowly oblong sparsely branched, branches appressed to the axis, spikelets lanceolate, lower glume narrowly ovate acute, upper glume ovate, lower lemma ovate, upper lemma winged, see *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 3,1(2-3): 327. 1834, *Flora Brasiliensis* 2(2): 277. 1877 and *Repertorium Specierum Novarum Regni Vegetabilis* 15: 131. 1918.

I. ephemerolepharis G.A. Black & Fróes ex G.A. Black & Pires (*Ichnanthus angustus* Swallen; *Ichnanthus longifolius* Swallen; *Ichnanthus neblinaensis* Swallen; *Ichnanthus serratus* Swallen; *Ichnanthus tectus* Swallen) (from the Greek *ephemeros* "temporary," *epi* "upon, over," *hemera* "day," and *blepharis* "eyelash," *blepharon* "an eyelid")

Brazil, Venezuela. Perennial, blunt lower glume, upper lemma with membranous wings, growing along stream, in sandy places, gravel bar, rocky slopes, riverbeds, stream bank, see *Boletim Técnico do Instituto Agrônomo do Norte* 15: 5. 1948, *Fieldiana, Botany* 28(1): 29-30. 1951, *Memoirs of the New York Botanical Garden* 9(3): 265-266, f. 7. 1957, *Phytologia* 14(2): 84. 1966.

I. glaber (Raddi) Hitchc. (*Echinolaena navicularis* (Nees) Kunth; *Ichnanthus cynotis* (Trin.) Döll; *Ichnanthus glaber* Link ex Steud.; *Ichnanthus glaberrimus* Swallen; *Ichnanthus longispiculus* Swallen; *Navicularia glabra* Raddi; *Panicum glaberrimum* Steudel; *Panicum naviculare* Nees)

(possibly from the Greek *kynos*, *kyon* “a dog” and *ous*, *otos* “an ear”)

Brazil. Forest, see *Agrostografia Brasiliensis* 39. 1823, *Fl. Bras. Enum. Pl.* 2: 136. 1829, *Révision des Graminées* 1: 54. 1829, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 3,1(2-3): 325. 1834, *Synopsis Plantarum Glumacearum* 1: 94. 1854, *Flora Brasiliensis* 2(2): 284. 1877 and *Contributions from the United States National Herbarium* 22: 10. 1920, *Phytologia* 11(3): 147-148. 1964, *Syst. Bot.* 7: 112. 1982.

I. grandifolius (Döll) Zuloaga & Soderstr. (*Ichnanthus nervosus* Swallen; *Ichnanthus umbraphilus* Renvoize; *Panicum grandifolium* Döll)

Brazil. See *Flora Brasiliensis* 2(2): 195. 1877 and *Phytologia* 11(3): 147. 1964, *Kew Bulletin* 39(1): 180. 1984, *Smithsonian Contributions to Botany* 59: 31. 1985.

I. hirtus (Raddi) Chase (*Echinolaena loliacea* (Bert.) Kunth; *Ichnanthus candicans* (Nees) Döll; *Ichnanthus candicans* var. *candicans*; *Ichnanthus candicans* var. *genuinus* Döll; *Ichnanthus planotis* var. *glaber* Döll; *Ichnanthus planotis* (Trin.) Döll; *Ichnanthus planotis* var. *pilosus* Döll; *Ichnanthus planotis* var. *planotis*; *Navicularia hirta* Raddi; *Panicum bertolonianum* Schult.; *Panicum candicans* Nees; *Panicum loliaceum* Bert., nom. illeg., non *Panicum loliaceum* Lam.; *Panicum planotis* Trin.)

Brazil. Perennial, tufted, leaf blades narrowly lanceolate subcordate at the base, panicle ovate sparsely branched, spikelets elliptic-oblong pilose, lower glume ovate, upper lemma with membranous wings, clearings, forest shade, sandy soils, see *Opuscoli Scientifci* 3: 408. 1819, *Agrostografia Brasiliensis* 39. 1823, *Mantissa* 2: 240. 1824, *Flora Brasiliensis seu Enumeratio Plantarum* 2: 133. 1829, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 172. 1833, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 3,1(2-3): 322. 1834, *Flora Brasiliensis* 2(2): 279-280, 291-292. 1877 and *Journal of the Washington Academy of Sciences* 13(9): 175. 1923, *Syst. Bot.* 7: 103. 1982, *Darwiniana* 26: 7-14. 1985.

I. hoffmannseggii (Roem. & Schult.) Döll (*Ichnanthus piresii* G.A. Black; *Panicum eriophorum* Link ex Nees; *Panicum hoffmannseggii* Roem. & Schult.; *Panicum villosum* Hoffmanns. ex Roem. & Schult., nom. illeg., non *Panicum villosum* Lam.) (dedicated to the Brazilian botanist João Murça Pires, 1916-1994, Center for Tropical Research, Brazilian Institute for Agricultural Research, Belém, collected extensively in Amazonas and Paras, Brazil, with Ghilleen T. Prance wrote “The vegetation types of the Brazilian Amazon.” in G.T. Prance and Thomas E. Lovejoy, editors. *Key Environments: Amazonia*. Pergamon Press,

Oxford 1985, with Ricardo de S. Seco e Joaquim Ivanir Gomes wrote *Taxonomia e Fitogeografia das Espécies de Seringueira*. Embrapa Amazônia Oriental 2002; see *Taxon* 44: 653-655. 1995) (named for the German botanist Johann Centurius Graf von Hoffmannsegg, 1766-1849, entomologist, ornithologist, traveler, with Heinrich Friedrich Link (1767-1851) wrote *Flore portugaise*. Berlin 1813-1820. See J.H. Barnhart, *Biographical notes upon botanists*. 2: 189. 1965; A. Lasègue, *Musée botanique de Benjamin Delessert*. Paris 1845; Ethelyn Maria Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933; T.W. Bossert, compil., *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 178. 1972; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993)

Brazil, French Guiana. Annual, savannah, forest, see *Systema Vegetabilium* 2: 450. 1817, *Flora Brasiliensis seu Enumeratio Plantarum* 148. 1829, *Flora Brasiliensis* 2(2): 287. 1877 and *Boletim Técnico do Instituto Agrônomo do Norte* 20: 31, t. 4. 1950, *Systematic Botany* 7(1): 85-115. 1982, *Acta Amazonica* 14(1/2): 95-99, f. 1. 1984 [1986].

I. inconstans (Trin. ex Nees) Döll (*Ichnanthus congestus* Swallen; *Ichnanthus inconstans* var. *dumetorum* (Trin.) Döll; *Ichnanthus inconstans* var. *inconstans*; *Ichnanthus inconstans* var. *montanus* (Trin.) Döll; *Ichnanthus lasiochlamys* Mez; *Ichnanthus mexicanus* E. I. lanceolatus Scribn. & J.G. Sm. (*Panicum lindenii* E. Fourn., nom. illeg., non *Panicum lindenii* Griseb.)

Belize, Guatemala, Honduras, Mexico. Perennial, herbaceous, erect, creeping, prostrate, stoloniferous, forage, abandoned fields, forest, riverbanks, forest edge, along roadsides, see *Mexicanas Plantas* 2: 29. 1886, *Bulletin, Division of Agrostology United States Department of Agriculture* 4: 36-37, t. 5. 1897 and *Syst. Bot.* 12: 193. 1987.

in Mexico: k'an-chim, xhanchim, x-k'anchim

I. lancifolius Mez (*Ichnanthus weberbaueri* Mez)

Brazil. Perennial, rhizomatous, erect, foliage mainly basal, leaf blades lanceolate and pseudopetiolate, panicle ovate, spikelets paired oblong or narrowly oblong, lower glume narrowly oblong, upper lemma with wings, see *Repertorium Specierum Novarum Regni Vegetabilis* 15: 126-127. 1918.

I. lancifolius Mez var. ***lancifolius***

Southern America.

I. lancifolius Mez var. ***weberbaueri*** (Mez) Stieber (*Ichnanthus duidensis* Swallen; *Ichnanthus weberbaueri* Mez)

Southern America. Perennial, rhizomatous, found in forest, see *Repertorium Specierum Novarum Regni Vegetabilis* 15: 126-127. 1918, *Fieldiana, Botany* 28(1): 28. 1951, *Systematic Botany* 7(1): 106. 1982.

I. leiocarpus (Spreng.) Kunth (*Ichnanthus fastigiatus* Brongn.; *Ichnanthus leiocarpus* var. *glabrescens* Döll; *Ichnanthus leiocarpus* var. *leiocarpus*; *Ichnanthus martianus* (Nees) Döll; *Navicularia lanata* Raddi; *Panicum leiocarpon* Spreng.; *Panicum martianum* Nees; *Panicum maximilianii* Schrad. ex Schult.; *Panicum maximilianii* var. *glabrescens* Döll)

Brazil, Venezuela, Trinidad, the Caribbean, Guyana. Perennial, erect, rambling, rhizomatous, herbaceous, creeping, leaf sheaths villous, leaf blades lanceolate shortly pseudopetiolate, large panicle much branched, spikelets elliptic-ovate on long pedicels, lower glume ovate, upper glume and lower lemma ovate, upper lemma with wings, upper lemma 2-winged at the base, in shade of forest, see *Neue Entdeckungen im ganzen Umfang der Pflanzenkunde* 1: 243. 1820, *Agrostografia Brasiliensis* 40, t. 1, f. 5. 1823, *Mantissa* 2: 255. 1824, *Flora Brasiliensis seu Enumeratio Plantarum* 2: 138. 1829, *Révision des Graminées* 2: 507. 1831, *Voyage autour du Monde* 10: 118. 1832, *Flora Brasiliensis* 2(2): 222, 280, 282. 1877 and *Newslett. Int. Organ. Pl. Biosyst. (Oslo)* 26/27: 23-24. 1997.

I. leptophyllus Döll

Brazil. See *Flora Brasiliensis* 2(2): 287. 1877 and *Syst. Bot.* 7: 96. 1982.

I. longiglumis Mez

Brazil. Weak culms, growing in stony places, among rocks, see *Repertorium Specierum Novarum Regni Vegetabilis* 15: 131. 1918, *Syst. Bot.* 7: 95. 1982.

I. mayarensis (C. Wright) Hitchc. (*Ichnanthus conjunctus* Hitchc. & Ekman; *Ichnanthus cordatus* Ekman; *Ichnanthus pilosomarginatus* Catasús; *Ichnanthus wrightii* Hitchc.; *Panicum mayarense* C. Wright)

Cuba. See *Anales de la Academia de Ciencias Medicas Habana* 8: 206. 1871, *Fl. Cub.* 197. 1873 and *Contr. U.S. Natl. Herb.* 12(6): 228-229. 1909, *Arkiv för Botanik utgivet av K. I. umbraphilus Renvoize (*Ichnanthus grandifolius* (Döll) Zuloaga & Soderstr.; *Ichnanthus ruprechtii* Döll; *Panicum grandifolium* Döll)

Brazil. Perennial, pubescent base, leaf blades oblong-lanceolate and acuminate, leaf sheaths pilose, ligule densely villous, rhizomatous, spikelets oblong arranged in long- and short-pedicelled pairs, lower glume broadly ovate, upper lemma without appendages at the base, coastal rain forest, see *Flora Brasiliensis* 2(2): 195, 293. 1877 and *Kew Bulletin* 39(1): 180. 1984, *Smithsonian Contributions to Botany* 59: 31. 1985, *Syst. Bot.* 12: 195. 1987.

I. vicinus (F.M. Bailey) Merr. (*Ichnanthus pallens* sensu Hook.f., non (Swartz) Munro ex Bentham; *Ichnanthus pallens* var. *majus* (Nees) Stieber; *Panicum nitens* Merr., nom. illeg., non *Panicum nitens* (Rendle) K. Schum.; *Panicum pallens* var. *majus* Nees; *Panicum vicinum* F.M. Bailey)

Tropics, Southeast Asia, India, Australia, Polynesia. Perennial, weak, slender, flaccid, scrambling, pubescent to hirsute, decumbent, creeping to long creeping, rooting at the nodes, loosely branched, leaf blades acuminate, leaf sheaths pubescent or glabrous, paniculate inflorescence contracted and dense, spikelets gaping at maturity, upper floret obtuse, glumes membranous, palea acute and 2-keeled, forage, palatable to cattle and readily eaten, growing in forest, montane, open habitats, damp sites, clearings, shade or partial shade, see *Flora Brasiliensis seu Enumeratio Plantarum* 2: 137. 1829, *A Synopsis of the Queensland Flora* 3: 82. 1890, *Fl. Br. India* 7: 60. 1896 and *Handb. Fl. Ceylon* 5: 161. 1900, *Publications of the Bureau of Science Government Laboratories* 17: 8-9. 1904, *Philippine Journal of Science* 20(4): 367-368. 1922, *An Enumeration of Philippine Flowering Plants* 1(1): 70. 1922[1923], *Handb. Fl. Ceylon* 6: 325. 1931, *Grasses of Ceylon* 119. 1956, *Ceylon J. Sci., Biol. Sci.* 2(2): 127. 1959, *Australian Journal of Botany* 7(3): 328-346. 1959, *Grasses of Burma* ... 314. 1960, *Systematic Botany* 12(2): 207. 1987.

I. zehntneri Mez (for Léo Zehntner, botanical collector in Brazil, 1905-1911 Director of the Escola Agrícola da Bahia or Escola Média-Teórico-Prática de Agricultura da Bahia; see *The Cactaceae; descriptions and illustrations of plants of the cactus family* 3: 218-220, pl. 24, f. 4. 1922 and 4: 252. 1923)

Brazil. Perennial, erect, shortly rhizomatous, leaf blades narrowly lanceolate tapering at the base and pungent, stiff leaves acuminate, panicle oblong with branches spreading or ascending, spikelets ovate very short pedicellate, lower glume ovate, upper glume and lower lemma ovate, upper lemma with membranous wings, similar to *Ichnanthus ephemerolepharis* G.A. Black & Fróes ex G.A. Black & Pires, see *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 56(124): 9. 1921, *Mem. New York Bot. Gard.* 65: 282. 1991.

Imperata Cirillo = *Syllepis* Fourn.

After the Italian apothecary Ferrante Imperato, 1550-1625, botanist, author of *Dell'istoria naturale libri XXVIII*. Editor Francesco Imperato. Costantino Vitale, Napoli 1599; the French Nicholas (Nicolas) Claude Fabry (Fabri) de Peiresc (1580-1637) visited him in 1601; see Domenico Maria Leone Cirillo (1739-1799), *Plantarum rariorum regni neapolitani*. Fasciculus primus [secundus] cum tabulis aenis. 26, t. 11. Napoli 1788-1792; Mariella Azzarello Di Misa, a cura di, *Il Fondo Antico della Biblioteca dell'Orto Botanico di Palermo*. 129. Palermo 1988; [Librairie Paul Jammes - Paris], Cabinets de Curiosités. Collections. Collectionneurs. [Item no. 171: Ferrante Imperato, Bois original ayant servi à l'impression du frontispice de son livre *Dell'Historia naturale libri XXVIII*. 1599. 278 x 398 mm.] 1998; F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 118. 1989; Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 473. 1852.

About 8-10 species, throughout tropics and subtropics, warm temperate regions. Panicoideae, Andropogonodae, Andropogoneae, Andropogoninae, or Panicoideae, Andropogoneae, Saccharinae, perennial, herbaceous, unbranched, erect, cylindrical, strongly rhizomatous with spreading subterranean rhizomes, internodes solid, leaf sheaths rounded, ligule a fringed or ciliate membrane, auricles absent, leaf blades linear, leaves tough and pointed to acuminate, plants bisexual, silvery silky and contracted spike-like cylindrical panicle, very short racemes with tough rachis, sessile and pedicellate spikelets alike, racemes concealed, spikelets hidden by the long silky hairs of the inflorescence, 2 florets, lower floret sterile or reduced to the hyaline lemma, upper floret perfect, two membranous glumes more or less equal and more or less silky pilose, lower glume 5- to 7-nerved, upper glume 3- to 5-nerved, lemmas reduced sometimes absent, upper lemma entire and awnless, callus hairs white, finely toothed palea hyaline and nerveless, lodicules absent, 1-2 stamens, ovary glabrous, 2 stigmas plumose, fluffy inflorescence, bad and troublesome weed species, among the world's worst weeds, suggested for reclamation, thatching, hat-making, papermaking, grow on poor soils, open areas, clearings, ditchbanks, open sandy habitats, high-rainfall areas, marshes, in wetlands or nonwetlands, coastal sand, abandoned pasture, eroded land, wasteland, weedy places, damp places, drylands, fallow fields, rainforest, grasslands, pampas, related and allied to *Miscanthus* Andersson, hybridize with *Saccharum* L., type *Imperata arundinacea* Cirillo, see *Species Plantarum* 1: 54. 1753, *Plantarum Rariorum Regni Neapolitani* 2: 26-27, t. 11. 1792, *Syn. Pl.* 1: 103. 1805, *Mexicanas Plantas* 2: 52. 1886 and *Contr. U.S. Natl. Herb.* 28(1): 9. 1929, *Journal of Zoology, London* 149: 344-364. 1966, *Kyoto University African Studies* 10: 143-212. 1976, *Flora Patagónica* 3: 1-583.

Species

I. brasiliensis Trin. (*Erianthus asper* Nees; *Imperata arundinacea* var. *americana* Andersson; *Imperata brasiliensis* var. *mexicana* Rupr.; *Imperata caudata* Cirillo ex Chapm.; *Imperata caudata* Cirillo, nom. illeg., non *Imperata caudata* (G. Mey.) Trin.; *Imperata sape* (A. St.-Hil.) Andersson; *Paspalum lenticulare* Kunth; *Saccharum sape* A. St.-Hil.; *Syllepis ruprechtii* E. Fourn.)

Brazil, Mexico to Argentina, Venezuela, Bolivia, U.S. Erect, emergent, semiaquatic or aquatic, strongly rhizomatous, spike-like plumose panicle, noxious weed growing in large colonies or floating mats, potential seed contaminant, pasture, forage, rhizomes diuretic, common in damp ground, burned areas, roadsides, near shallow water, along rivers and streams, see *Plantarum Rariorum Regni Neapolitani* 2: 27, t. 11. 1792, *Nova Genera et Species Plantarum* 1: 92. 1815 [1816], *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 2(3): 331. 1832, *Voyage dans le district des diamans et sur le littoral du Brésil ...* 1: 368. Paris 1833, *Bulletin de l'Académie Royale des Sciences et Belles-lettres de Bruxelles* 9(2): 245. 1842, *Öfversigt af Förhandlingar: Kongl. Svenska Vetenskaps-Akademiens* 12: 160 [159]. Stockholm 1855, *Flora of the Southern United States* 668. 1883, *Mexicanas Plantas* 2: 52. 1886 and *Annals of the Missouri Botanical Garden* 81(4): 768-774. 1994.

in English: Brazilian satin tail

in Bolivia: cola de ardilla, paja sujo, sarr, sujo

in Brazil: agreste, capim agreste, capim massapê, capim sapê, jucapê, massapê, sapê

in Mexico: isho-juki, zacate clavo, zacate cortado, zacate de cortado

I. brevifolia Vasey (*Imperata arundinacea* subsp. *hookeri* Rupr. ex Andersson; *Imperata hookeri* (Rupr. ex Andersson) Rupr. ex Hack.; *Saccharum mexicanum* Brouss. ex Horn)

Northern America, Mexico, U.S., California. Perennial, coarse, erect, leafy, rhizomatous with creeping and scaly rhizomes, ligule membranous, sheaths open and glabrous, silky white flower inflorescences, panicles terminal, glumes unequal, forage, cultivated as ornamental, noxious weed, can be invasive on moist soils and along the banks of irrigation ditches and canals, occurs in wetlands or nonwetlands, arid and semiarid regions, rarely invades dry areas, see *Plantarum Rariorum Regni Neapolitani* 2: 27, t. 11. 1792, *Hortus Regius Botanicus Hafniensis* 1: 75. 1813, *Öfversigt af Förhandlingar: Kongl. Svenska Vetenskaps-Akademien* 12: 160. 1855, *Bulletin of the Torrey Botanical Club* 13(2): 26. 1886, *Monographiae Phanerogamarum* 6: 97. 1889 and *Memoir San Diego Society of Natural History* 12: 1-140. 1981, *Flora Novo-Galiciana* 14: 200. 1983.

in English: satin tail, satintail, California satin tail, cogon grass, congo-grass

I. cheesemanii Hack.

New Zealand. Rhizomatous, clumped, leaf sheaths glabrous, ligule ciliate or ciliolate, leaf blade linear, panicle narrow-lanceolate, spikelets densely hairy, lemmas and palea denticulate, one stamen, stigmas purple, forming mat, see *Transactions and Proceedings of the New Zealand Institute* 35: 378-379. 1903.

I. condensata Steud. (*Imperata arundinacea* var. *condensata* (Steud.) Hack.; *Imperata cylindrica* var. *condensata* (Steud.) Hack. ex Stuck.; *Imperata cylindrica* var. *condensata* (Steud.) Hack.)

Chile, Bolivia. Perennial, erect, rhizomatous, linear leaves, dense inflorescence paniculate, silky white flower inflorescences, noxious weed growing in large colonies or floating mats, see *Plantarum Rariorum Regni Neapolitani* 2: 27, t. 11. 1792, *Nomenclator Botanicus* edition 3, 3: 10. 1797, *Synopsis Plantarum Glumacearum* 1(6): 431. 1855 [1854], *Monographiae Phanerogamarum* 6: 94. 1889 and *Reports of the Princeton University Expeditions to Patagonia, 1896-1899, Volume viii, 1 [2], Botany* 8(1,5,1): 161. 1904, *Anales del Museo Nacional de Buenos Aires* 21: 9. 1911, N.B. De la Barra, *Reconstrucción y Evolución del Paisaje Vegetal Autóctono de la Zona Urbana y Peri-Urbana de la Ciudad de Cochabamba* i-v, 1-174. 1997.

I. conferta (Presl) Ohwi (*Imperata exaltata* (Roxb.) Brongn.; *Imperata exaltata* subsp. *merrillii* Hack.; *Imperata exaltata* var. *genuina* Hack.; *Imperata ramosa* Andersson; *Saccharum confertum* J. Presl)

Asia. Perennial, erect, strongly rhizomatous, leaves radical, culm with glabrous nodes, noxious pest, in open areas, disturbed places, lowlands, see *Reliquiae Haenkeanae* 1(4-5): 346. 1830, *Voyage autour du Monde* 2(2): 101. 1829 [1831], *Öfversigt af Förhandlingar: Kongl. Svenska*

Vetenskaps-Akademien 12: 158. 1855, *Monographiae Phanerogamarum* 6: 98. 1889 and *Philippine Journal of Science* 1: 264. 1906, *Botanical Magazine* (Tokyo) 55: 549. 1941, *Micronesica* 18(2): 45-102. 1982.

in New Guinea: tuo

I. contracta (Kunth) A.S. Hitchc. (*Anatherum berterioanum* Spreng. ex Schult.; *Anatherum berterianum* Spreng. ex Schult.; *Anatherum caudatum* (G. Mey.) Schult.; *Anatherum portoricense* Spreng.; *Imperata caudata* (G. Mey.) Trin.; *Imperata contracta* (Kunth) Kuhlm., nom. illeg., non *Imperata contracta* (Kunth) Hitchc.; *Imperata exaltata* (Roxb.) Brongn.; *Imperata exaltata* var. *caudata* (G. Mey.) Hack.; *Imperata flexuosa* Swallen; *Imperata longifolia* Pilg.; *Saccharum caudatum* G. Mey.; *Saccharum contractum* Kunth; *Saccharum cylindricum* var. *contractum* (Kunth) Roberty; *Saccharum cylindricum* var. *longifolium* (Pilg.) Roberty; *Saccharum dubium* Kunth)

West Indies to Brazil, Bolivia. Erect, herbaceous, rhizomatous, leaf blades linear acuminate, white spike-like panicle, single stamen, forage, rhizomes diuretic, forming large colonies, common in damp places on sandy soils, seasonally inundated savannah, wet soils, along roadsides, see *Nova Genera et Species Plantarum* 1: 182-183. 1815 [1816], *Primitiae Florae Essequiboensis* ... 68. Gottingae 1818, *Mantissa* 2: 443, 445. 1824, *Systema Vegetabilium, editio decima sexta* 1: 290. 1825, *Voyage autour du Monde* 2(2): 101. 1829 [1831], *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 2(3): 331. 1832, *Monographiae Phanerogamarum* 6: 99. 1889, *Annual Report of the Missouri Botanical Garden* 4: 146. 1893 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 30(1): 136. 1901, *Comissão de Linhas Telegráficas Estratégicas de Matto-Grosso ao Amazonas, Botanica* 67(Bot. 11): 90. 1922, *Boissiera. Mémoires du Conservatoire de Botanique et de l'Institut de Botanique Systématique de l'Université de Genève* 9: 375. 1960, *Phytologia* 14(2): 87. 1966.

in Brazil: sapê

in Venezuela: paja pelúa

in Bolivia: sujo

in Mexico: lishiquini-sacat, zacate amarillo, zacate clavo, zacate colorado

I. cylindrica (L.) P. Beauv. (*Calamagrostis lagurus* (L.) Koeler; *Imperata allang* Jungh.; *Imperata angolensis* Fritsch; *Imperata arundinacea* Cirillo; *Imperata arundinacea* subvar. *europaea* (Andersson) Hack.; *Imperata arundinacea* subvar. *glabrescens* (Büse) Hack.; *Imperata arundinacea* subvar. *thunbergii* (Retz.) Beauv.; *Lagurus cylindricus* L.; *Saccharum cylindricum* (L.) Lam.; *Saccharum cylindricum* var. *europaeum* Pers.; *Saccharum europaeum* Pers.; *Saccharum koenigii* Retz.; *Saccharum laguroides* Pourret; *Saccharum sisca* Cav.; *Saccharum thunbergii* Retz.)

Tropics and subtropics. Perennial, yellowish-green and reddish, sweet-smelling, clumped or densely tufted, spreading, strongly rhizomatous with branched and tough rhizomes, fire-resistant rhizomes, roots fibrous, stems wiry and erect, slender, culm bases and rhizomes deeply buried, leaf sheaths round and smooth to pilose, ligule a membrane glabrous or minutely ciliate, extreme point and the margins of the leaves are sharp, stiff leaves linear and acuminate, mature leaves with rough edges, leaf margins scabrous and embedded with silica crystals, culm nodes pubescent, spike-like panicles silver-white and erect, spikelets lanceolate and acute, spikelets enveloped by long white silky hairs, more or less equal glumes membranous and lanceolate, lower lemma hairy and sterile, upper lemma hairy, stigmas purple, spreads readily by rhizomes and seed, highly variable habits, bad weed species, can invade and overtake disturbed ecosystems, potential seed contaminant, noxious and very aggressive weed difficult to eradicate, useful for reclamation and erosion control, appears as the first coloniser after fire, ground cover, mulching, thatching, hat-making, fuel, papermaking, ornamental and attractive grass, cultivated, used for the sacrificial thread of the Hindu, in Lesotho rhizomes are eaten raw by herders and are used as a remedy for chest colds in children, the ash of the plant is used as a salt substitute, root astringent and antifebrile, rootbark is febrifuge, fodder, little forage value, very low grazing value, not palatable or palatable to few animals, palatable if cut frequently, only the young shoots eaten by stock, rhizomes eaten by pigs, dense and spreading patches a refuge for reptiles and small animals, extremely drought resistant, cannot stand continuous flooding, the young ear taste sweet when chewed, fluff from the flower heads a substitute for

cotton-wool in treating sores, grows on poor soils poorly drained, disturbed areas, damp soils, eroded land, vleis, seasonally wet places, open sandy habitats, high-rainfall areas, riverbanks, fynbos, coastal sand, savannah, in open grassland, abandoned pasture, lower montane forest, wasteland, subhumid and humid grassland, open woodland, see *Systema Naturae*, edition 2 2: 878. 1759, *Encyclopédie Méthodique, Botanique* 1: 594. 1783, *Mémoires de l'Académie des Sciences, Inscriptions et Belles-Lettres de Toulouse* 3: 326. 1788, *Observationes Botanicae* 5: 16-17. 1789, *Plantarum Rariorum Regni Neapolitani* 2: 27, t. 11. 1792, *Icones et Descriptiones Plantarum, quae aut sponte ...* 3: 47, pl. 292. 1794, *Nomenclator Botanicus* edition 3, 3: 10. 1797, *Descriptio Graminum in Gallia et Germania* 112. 1802, *Syn. in Morocco: silet, silt, l-halfa, diel-el-far, alfa, gousmir, ïbestaû, taicest, tibesteû, tebanawut, uhri

in Niger: tofa

in Nigeria: aatsupa, achala, achalà, acharà, akata, asai, ata, ekan, ekyé, epe, fura, gasa kigere, ihila, isa, iwo, katsupa, soo'o, soyoji, soyore, tofofa, toohaa, zakaran tofofa, zarenshi

in Sahara (Tassili): ébastaw

in Senegal: badied, bodé, dol, dolè, falint, hada, idiol, madiel, sodo, solim, solimo

in Sierra Leone: alath, awoaralal, awoararal, bola, dokin domai, leti, lolin, pobege, pobeje, povege, pulmasa,

solondo, suane, sukinyi, sule-na, sulunyi, sununwuri, surenyi, taga, tele, tere, yobainyi

in southern Africa: beddinggras, donsgras, lalanggras, palinggras, silweraargras, sygras, qheme; mohlorumo, mohlabalerumo (Sotho); umthente (Zulu)

in Tanzania: masengesela

in Upper Volta: dolinji, fofo, gay, lollé, pulundi

in Yoruba: eesa, ekan, isa

in Tibetan: rtsva-ram-pa, se'u, sor-ba

in Bhutan: becho, siru, khar, teo posem

in Burma: kyet-mei

in Cambodia: sbeou, sbö'w, smao kantuy ses

in China: bai mao gen, mao ya ken, pai mao, ssu mao (= floss grass)

in Japan: chigaya, fushige chigaya, tsubana

in India: balbajamu, barhis, barhisan, barhissu, batta, bhara-vai, bharwi, chero, chitra, dab, dabh, darbha, darbha gaddi, darbhad, darbhapullu, dharba gaddi, dharbai pul, dharbai pullu, dhub, gondi, inankapillu, khair, khans, kusa, lotan, modavagaddi, nanal, nanalle pullu, neeru hatthi hullu, ooloo, padiali, phulya, pottar, sanna dabbai hullu, sanna darbhe hullu, sil, sir sil, sirhu, siru, tharabai pul, ullu, ulu, usirh, varli pillu, vidulam, vidulum

in Indonesia: alang-alang, ilalang, kambengan, llalang

in Laos: hnha:z kh'a

in Malaysia: alang-alang, lalang

in Okinawa: makaya

in Papua New Guinea: kunai, riek

in the Philippines: buchid, bulum, gaon, gocon, gogon, goon, ilib, kogon, pan-au, panau, parang, parrang

in Sri Lanka: iluk

in Thailand: alang alang, koe hee, koe hi, koehi, la lang, laa laang, laalaang, la lae, laa lae, lalang, yaa khaa, ya kha
in Vietnam: co tranh, co'tranh, bach mao can, tranh

I. cylindrica (L.) P. Beauv. var. ***africana*** (Andersson) C.E. Hubb. (*Imperata arundinacea* var. *africana* Andersson; *Imperata cylindrica* (L.) P. Beauv.; *Imperata cylindrica* (L.) Raeusch.; *Lagurus cylindricus* L.)

Africa, Nigeria. Perennial, spreading, rhizomatous, erect, light green, leaf blades strongly ribbed, ligule membranous, plants bisexual, inflorescence a silky spike-like panicle, spikelets all alike borne in pairs, 1-flowered, 2 glumes, very tiny palea, lodicules absent or present, 2 or 3 stamens, feathery purple stigmas, raw rhizomes eaten by local people, shoots and rhizomes eaten by baboons, a serious noxious weed of cultivated ground, see *Systema Naturae*, edition 2 2: 878. 1759, *Nomenclator Botanicus* edition 3, 3: 10. 1797, *Essai d'une Nouvelle Agrostographie* 8, 165, 177, t. 5, f. 1. 1812, *Öfversigt af Förhandlingar: Kongl.*

Svenska Vetenskaps-Akademien 12: 159. 1855 and *Joint Publication of the Imperial Agricultural Bureaux* 7: 10, t. 3, f. 2. 1944.

I. cylindrica (L.) P. Beauv. var. ***major*** (Nees) C.E. Hubb. (*Imperata allang* Jungh.; *Imperata arundinacea* var. *pedicellata* (Steud.) Debeaux; *Imperata cylindrica* (L.) P. Beauv.; *Imperata cylindrica* (L.) Raeusch.; *Imperata cylindrica* subvar. *koenigii* (Retz.) T. Durand & Schinz; *Imperata filifolia* Nees ex Steud.; *Imperata koenigii* (Retz.) P. Beauv.; *Imperata koenigii* var. *major* Nees; *Imperata pedicellata* Steud.; *Saccharum diandrum* K.D. Koenig ex Retz.; *Saccharum koenigii* Retz.)

Palaeotropics. Loosely or densely tufted, rhizomatous with tough and scaly rhizomes, forming colonies, leaf sheath fibrous when old, ligule ciliate, panicle densely spiciform, 2 stamens, anthers yellowish to orange, stigmas purple or reddish, diuretic and hemostatic action, rhizoma used in edema and jaundice, see *Observationes Botanicae* 5: 16. 1789, *Plantarum Rariorum Regni Neapolitani* 2: 27, t. 11. 1792, *Nomenclator Botanicus* edition 3, 3: 10. 1797, *Essai d'une Nouvelle Agrostographie* 8, 165, 177, t. 5, f. 1. 1812, *Tijdschrift voor Natuurlijke Geschiedenis en Physiologie* 7: 295. 1840, *Florae Africae Australioris Illustrationes Monographicae* 90. 1841, *Flora* 29: 22. 1846, *Synopsis Plantarum Glumacearum* 1: 405. 1854[1855], *Flora Hongkongensis* 419. 1861, *Conspectus Florae Africae* 5: 694. 1894 and *Fragmenta Florae Philippinae* 137. 1904, *The Grasses of Mauritius and Rodriguez* 96. 1940, *Zlaki SSSR* 691. 1976.

in English: bladey grass, alang-alang, cranberry grass, lalang, lallang, blady grass

in China: bai mao gen, pai mao ken

in East Africa: bibimbet, ebiat, ebuyat, ekebabe, lalang

in Indonesia: alang-alang, Ilalang

in Malaysia: lalang

I. cylindrica (L.) P. Beauv. var. ***thunbergii*** (Retz.) T. Durand & Schinz (*Saccharum thunbergii* Retz.)

Tropical Africa. Densely caespitose, simple, erect, short membranous ligule, noxious weed, see *Observationes Botanicae* 5: 17. 1789, *Systema Vegetabilium* 2: 289. 1817, *Monographiae Phanerogamarum* 6: 94. 1889, *Conspectus Florae Africae* 5: 693. 1894, *Flora Capensis* 7:320. 1898.

in Angola: mbamba, munangu, senu, sonhi, tembe

I. exaltata (Roxb.) Brongn. (*Saccharum exaltatum* Roxb.)

Asia. Medicinal, see *Primitiae Florae Essequiboensis* ... 68. 1818, *Flora Indica; or Descriptions* ... 1: 249. 1820, *Voyage autour du Monde* 2(2): 101. 1829 [1831], *Monographiae Phanerogamarum* 6: 98-99. 1889 and *Philippine Journal of Science* 1: 264. 1906.

in the Philippines: gocon, gogon, goon, ilib, kogon, kogon laké, pandang lubuk, paraugtau

I. minutiflora Hack.

Patagonia, Bolivia, Amazonia. Erect, tufted, leaf blades linear acuminate, panicle linear, plumose inflorescence terminal, single stamen, a medicinal plant, growing in moist places, see *Monographiae Phanerogamarum* 6: 100. 1889 and *Contributions from the United States National Herbarium* 24(8): 291-556. 1927, *Contributions from the Gray Herbarium of Harvard University* 184: 1-223. 1958, *Monographs in Systematic Botany from the Missouri Botanical Garden* 47: i-xi, 1-178. 1994.

in Bolivia: Dersibunare (Chimane), Guasi (Chácobo), Nudillo (Santa Cruz), Sarr (Chiquitano), Sujo, Sujubache (Tacana), Yachitari (Cavineño), Yobokaä (Esse Ejja), Gramalote (Castellano)

I. parodii Acevedo

Chile. See *Bol. Soc. Argent. Bot.* 12: 358. 1968.

I. tenuis Hack. (*Imperata exaltata* var. *angustifolia* Hack.; *Imperata minutiflora* Hack.)

Bolivia, Paraguay, Brazil. Perennial, erect, herbaceous, tufted, rhizomatous, leaf blades linear pungent, panicle narrowly oblong, roadside grass, moist areas, see *Monographiae Phanerogamarum* 6: 99-100. 1889 and *Annals of the Missouri Botanical Garden* 81(4): 768-774. 1994.

Imperatia Post & O. Kuntze = Imperatia Moench (Caryophyllaceae)

Orthographic variant of *Imperata* Cirillo.

Panicoideae, Andropogonodae, Andropogoneae, Andropogoninae, or Panicoideae, Andropogoneae, Saccharinae, see *Methodus Plantas Horti Botanici et agri marburgensis, a staminum situ describendi* ... 294-295. Marburgi Catalogum [Marburg] 1794 and *Contributions from the United States National Herbarium* 46: 270-273. 2003.

Indocalamus Nakai = Ferrocalamus J.R. Xue & Keng f., Gelidocalamus T.H. Wen

From Latin *Indus* "Indian" and *calamus* "a reed, cane."

About 6-10/35 species, tropical Asia, southern China, Japan, Sri Lanka. Bambusoideae, Bambusodae, Bambuseae, Arundinariinae, perennial, woody, shrubby, slender, one branch at each node, flowering culms leafy, rhizomes leptomorph, culm sheaths persistent, nodes of young culms with long hairs, terminal panicle, 3 stamens, 2 stigmas, forming thickets and large clusters, open habitats, wet sites, woodland, alpine regions, type *Indocalamus sinicus* (Hance) Nakai, see *Flora Boreali-Americana* 1: 73. 1803 and *Journal of the Arnold Arboretum* 6(3): 148. 1925, *Taxon* 6(7): 203. 1957, *Acta Phytotaxonomica Sinica* 18(1): 24-25. 1980, *Journal of Bamboo Research* 1: 3, 21, 137. 1982

[1981], *Acta Phytotaxonomica Sinica* 23(6): 460, 462. 1985, T.R. Soderstrom and R.P. Ellis, "The woody bamboos (Poaceae: Bambuseae) of Sri Lanka: a morphological-anatomical study." *Smithsonian Contributions to Botany* 72: 1-75. 1988, C.S. Chao and S.A. Renvoize, "A revision of the species described under *Arundinaria* (Gramineae) in south-east Asia and Africa." *Kew Bulletin* 44(2): 349-367. 1989, *J. Nanjing Univ. Nat. Sci.* 26(2): 282-290. 1990, *Bambou*, Association Européenne du Bambou, EBS Section France 7: 22. 1990, *Flora Reipublicae Popularis Sinicae* 9(1): 1-761. 1996, Z.-L. Li, The *Flora of China* Bambusoideae project, problems and current understanding of bamboo taxonomy in China. The *Bamboos* 5: 61-81. 1997, *Contributions from the United States National Herbarium* 39: 63-64. 2000, *Ecological Research* 16(3): 509-517. Sep 2001.

Species

I. sp.

in China: ruozhu shu

in Japan: indokaramusu zoku, ohoba-yadake Zoku

I. auriculatus (H.R. Zhao & Y.L. Yang) Y.L. Yang & H.R. Zhao (*Indocalamus auriculatus* (H.R. Zhao & Y.L. Yang) Y.L. Yang; *Indocalamus hispidus* var. *auriculatus* H.R. Zhao and Y.L. Yang)

China, Sichuan. Green, pruinose, yellowish brown silky, culm sheath dark green, sheath auricles falciform, sheath ligule weak, sheath blade erect, see *Acta Phytotaxonomica Sinica* 23(6): 460-462. 1985, *Journal Nanjing University. Natural Sciences Edition* 26(2): 282. 1990.

I. barbatus McClure

China, Guangxi. Solid or nearly solid, densely silky, sheath persistent shorter than internode, sheath auricle well developed, sheath ligule short, sheath blade ovate lanceolate, culm used for handicrafts, leaves used for making hats, see *Sunyatsenia* 6(1): 32-35. 1941, *Acta Phytotaxonomica Sinica* 29(5): 452-455. 1991.

I. bashanensis (C.D. Chu & C.S. Chao) H.R. Zhao & Y.L. Yang (*Sasa bashanensis* C.D. Chu & C.S. Chao)

China, Sichuan, Shaanxi. Mountains, hardy, pruinose, short silky pubescence, sheath persistent, no sheath auricles and cilia, sheath ligule nearly truncate, sheath blade narrow lanceolate, one branch on each node, leaves elliptic to lanceolate, see *Acta Phytotaxonomica Sinica* 18(1): 30, f. 3. 1980, *Bamboo Research* 1: 14. 1981, *Acta Phytotaxonomica Sinica* 23(6): 465. 1985.

I. chishuiensis Y.L. Yang & Hsueh (also J.R. Xue)

China. Slope, hills, see *Acta Phytotaxonomica Sinica* 31(1): 68-69, f. 1. 1993.

I. confertus C.H. Hu

China. Mountains, see *Journal of Bamboo Research* 15(1): 1-2, f. 1. 1996.

I. cordatus T.H. Wen & H.Y. Zou

China. See *Journal of Bamboo Research* 10(1): 18, f. 3. 1991.

I. dayongensis W.T. Lin

China. See *Journal of Bamboo Research* 13(4): 3, f. 2. 1993.

I. decorus Q.H. Dai

China. See *Acta Phytotaxonomica Sinica* 20(4): 494-495, f. 1. 1982.

I. emeiensis C.D. Chu & C.S. Chao (*Arundinaria emeiensis* (C.D. Chu & C.S. Chao) Demoly; *Indocalamus omeiensis* C.D. Chu & C.S. Chao)

China, Sichuan. Hardy, silky when young, internodes reddish pubescent, sheath persistent, sheath auricles developed, sheath blade lanceolate to broadly lanceolate, leaves linear to lanceolate, see *Acta Phytotaxonomica Sinica* 18(1): 25-26, f. 1. 1980, *Bambou*, Association Européenne du Bambou, EBS Section France 29: 13. 1998.

I. floribundus (Thwaites) Nakai (*Arundinaria floribunda* Thwaites; *Sinarundinaria floribunda* (Thwaites) C.S. Chao & Renvoize)

Sri Lanka. Erect, shrubby, nodes swollen, internodes hairy, leaves lanceolate with an acuminate tip, glandular short petiole, leaf sheath striate and hairy, auricles short and with bristles on the margin, short ligule fimbriate, mountains, often excluded from *Indocalamus*, see *Enumeratio Plantarum Zeylaniae* 375. 1864 and *Journal Arnold Arboretum* 6: 148. 1925, *Smithsonian Contrib. Botany* no. 72: 14, f. 9-11. 1988, *Kew Bulletin* 44(2): 356. 1989.

I. guangdongensis H.R. Zhao & Y.L. Yang

China, Guangdong, Guizhou. Pruinoso, hairy, sheath persistent shorter than internode, sheath auricles small and falciform, sheath ligule truncate, sheath blade ovate lanceolate, leaves ovate lanceolate glabrous, cultivated, see *Acta Phytotaxonomica Sinica* 23(6): 462, f. 2, 1-4. 1985.

I. guangdongensis H.R. Zhao & Y.L. Yang var. *mollis* H.R. Zhao & Y.L. Yang

China. See *Acta Phytotaxonomica Sinica* 23(6): 462-463. 1985.

I. herklotsii McClure

China, Guangdong, Hong Kong, Guangxi, Hunan. Almost solid, sheath shedding late shorter than internode, sheath auricles small or absent, sheath ligule nearly truncate, sheath blade erect ovate lanceolate, leaves oblong-lanceolate glabrous, cultivated, used for making handicrafts, mat, cap, see *Lingnan Univ. Sci. Bull.* no. 9: 22. 1940, *Hong Kong Bamb.* 65. 1985.

I. hirsutissimus Z.P. Wang & P.X. Zhang

China, Guizhou. Densely silky and white pubescent, nodes strongly convex, sheath coriaceous, sheath auricle curved upward, sheath ligule truncate or arcuate, sheath blade

lanceolate, one branch on each node, leaves pubescent beneath, see *Journal of Bamboo Research* 4(1): 44, f. 1. 1985.

I. hirsutissimus Z.P. Wang & P.X. Zhang var. *glabrifolius* Z.P. Wang & N.X. Ma

China. Glabrous leaf blades, see *J. Bamb. Res.* 4(1): 45-46. 1985.

I. hirtivaginatus H.R. Zhao & Y.L. Yang

China, Jiangxi. White and short pubescence or glabrous, sheath longer than internode, no sheath auricles or indistinct, sheath ligule minutely pubescent, sheath blade erect linear-lanceolate, leaf blade lanceolate, see *Acta Phytotaxonomica Sinica* 23(6): 463-464, f. 2, 5-7. 1985.

I. hispidus H.R. Zhao & Y.L. Yang

China. See *Acta Phytotaxonomica Sinica* 23(6): 460-461, f. 1. 1985, *Journal Nanjing University. Natural Sciences Edition* 26(2): 282. 1990, *J. Bamb. Res.* 11(3): 54. 1992.

I. hispidus H.R. Zhao & Y.L. Yang f. *levis* T.P. Yi
