Dedication

To Paola, Daria, and Salvatore

*If circumstances lead me, I will find
Where truth is hid, though it were hid indeed
Within the centre.
(W. Shakespeare, Hamlet)*

FOREWORD

Communication is both a complex matter and a universal phenomenon. A sender, a receiver, and the information to be transferred form the essential elements. Communication takes place between humans, between animals, and between plants, but also between humans and animals, as well as between animals and plants. The information to be transferred takes many forms — visual, acoustic, olfactory, and tactile. In science, communication takes place as a rule in rather condensed forms, often visual as a written text; information may even be still more condensed as in a mathematical formula, in bar codes, or in digitized images. In theory, communication in the sciences should be precise and unequivocal, but in real life many ambiguities exist, some of them by coincidence and some deliberately introduced and the source of much confusion. A large number of dictionaries have been published to try to clarify scientific terminology and to ease communication.

Within the natural sciences, the large field of biodiversity uses scientific names for communication, not bar codes or digitized images. The International Codes of Botanical and Zoological Nomenclature set the rules for the use of scientific plant and animal names, resulting in their universal and unequivocal application. Since scientific names cannot by their nature be abbreviated, every specialist has to be aware of an extremely large number of them, many difficult to memorize. Therefore, it is most helpful to know and understand the background of the respective scientific name — its etymology, its history, the name of the person who first coined it, the circumstances of its origin. There is always a time axis in this: scientific names have been formed over centuries; some are ancient, some recent, and this is often not evident to the uninitiated.

There is a high degree of standardization in scientific names, which largely has helped their universal use in communication. By contrast, common names are neither standardized nor universally in use. For species, they may consist of one or more words. In addition, they are only applicable locally, i.e., within the region where a given language is spoken. As a consequence, common names are totally unsuitable for international communication. However, it should be noted that common names also have their background, etymology, and history, often undergoing more changes over time and often more diversified locally than the standardized scientific names.

Umberto Quattrocchi has dealt with this subject in a general way in his *CRC World Dictionary of Plant Names* in four volumes, obligatory reading for all those interested in — as the subtitle puts it — *Common Names, Scientific Names, Eponyms, Synonyms, and Etymology*. Although dealing with names of vascular plants only, this mine of information has found its place on the shelves of reference libraries all over the world and is constantly used by a wide spectrum of users. However, any work of this kind cannot be comprehensive, in particular when considering plant diversity on a global scale and the multitude of languages spoken today, all of them possessing names for plants. Therefore, an in-depth study of a single plant family is most welcome.

For good reasons, Quattrocchi has chosen the grasses, a very large plant group, worldwide in distribution and of prime importance for the world economy, including such major crops as wheat, rice, maize, sugar, and barley, to mention just a few important ones. And he is most suited to do this job: he is well-read, multilingual, possessing a general level of culture equalled by few, and therefore able to go back into etymology and history, often right to the original mention of a particular grass name in the scientific literature long before Linnaeus.

Quattrocchi has had to deal with tens of thousands of grass names and a considerable number of languages, several of them used only outside Europe for an obvious reason. This plant group dominates many extensive areas of the globe: the prairies in temperate North America, the forests of bamboo in Southeast Asia, the dry savannahs in subtropical Africa, as well as the spinifex grassland of central Australia or, in Europe, the wetlands in the Danube delta densely covered by reeds. In short, this new dictionary helps us to understand the complex background of grass names and forms an invaluable addition to our knowledge of this plant family. It is of particular relevance to all of us since the grasses provide the most important source of protein for human nutrition on a global scale, for, as Isaiah V put it “All flesh is grass.”

ABOUT THE AUTHOR

Umberto Quattrocchi was born December 21, 1947, in Bergamo, Italy. He received his degree in political science, his M.D., and his specialization in obstetrics and gynecology all from the University of Palermo.

The author of numerous political and botanical books and articles, his articles on plants and gardening recently have been published in *Hortus* and *The Garden*. A member of the Royal Horticultural Society and Botanical Society of America, a Fellow of the Linnean Society, his studies in

plants and ethnomedicine have taken him to remote areas of the globe.

In 1992 he retired from the practice of medicine to pursue studies in botany and to continue teaching as a professor of political science at the University of Palermo.

His interests include jazz, classical music, book collecting, and the cultivation of tropical, subtropical, and desert species of plants. He lives in Palermo with his wife Paola (also a physician) and their two children Daria and Salvatore.

INTRODUCTION TO THE GRASS FAMILY (POACEAE – GRAMINEAE)

To err is human! ...and any errors are mine alone.

These pages bring together a great deal of otherwise-dispersed data — information and morphological description regarding the genera and the species, their geographical distribution, distinctive characters, common and vernacular names, etc.

This account is certainly not complete in itself, also because of the numerous nomenclatural and taxonomic problems encountered and the conflicting taxonomic treatments (see C.W. Hamilton and S.H. Reichard, Current practice in the use of subspecies, variety, and forma in the classification of wild plants. *Taxon* 41: 485-498. 1992), this will always be a work in progress and neverending.

The study is based on secondary and primary data, and the information derives from several sources. It is gathered from a wide variety of electronic, print, and other sources, such as papers of general interest, reports and records, taxonomic revisions, field studies, herbaria and herbarium collections, notes, monographs, pamphlets, botanical literature and literature *tout court*, sources available at various natural history libraries, floras and standard flora works, local floras and local histories, nomenclatural histories, ICBN (W. Greuter et al. 2000: International Code of Botanical Nomenclature [Saint Louis Code] adopted by the Sixteenth International Botanical Congress St. Louis, Missouri, July/August 1999), ICNCP (International Code of Nomenclature for Cultivated Plants), International Union for Conservation of Nature and Natural Resources, IPNI. Also useful have been reference collections, botanical gardens and nurseries, dictionaries, drawings, poetry, journal articles, personal communications, biographies and scientific biographies, and the British Museum General Catalogue of Printed Books, the Royal Botanic Gardens Kew Library Catalogue on the World Wide Web, Manuel du Libraire et de l'Amateur de Livres (by Jacques-Charles Brunet), the Catalogue of Books, Manuscripts, Maps, and Drawings in the British Museum (Natural History), and the Catalogue of Botanical Books in the Collection of Rachel McMasters Miller Hunt, etc.

Classification follows the treatments proposed by W.D. Clayton and S.A. Renvoize (*Genera Graminum*, 1986), Watson and Dallwitz (*The Grass Genera of the World*, Wallingford: CAB International 1992 and 1994), S.W.L. Jacobs and J.E. Everett, Editors, (*Grasses: Systematics and Evolution*, 2000), *Grass Phylogeny Working Group* (GPWG) (Phylogeny and subfamilial classification of the grasses (Poaceae), *Annals of the Missouri Botanical Garden* 88(3): 373-457, 2001), Gerrit Davidse et al. (Missouri Botanical Garden – w3 TROPICOS, Missouri Botanical Garden's

VAST (VAScular Tropicos) nomenclatural database), and *Catalogue of New World Grasses* (R.J. Soreng, G. Davidse, P.M. Peterson, F.O. Zuloaga, E.J. Judziewicz, T.S. Filgueiras, and O. Morrone, Smithsonian Institution, *Contributions from the United States National Herbarium*, 2000-2003).

The classification of Australian grasses follows *Flora of Australia*, Volume 43, Poaceae 1, Introduction and Atlas, Melbourne 2002; and *Flora of Australia*, Volume 44B, Melbourne 2005. The arrangement of subfamilies and tribes follows *Flora of Australia*, 43: 245-277, 2002.

The nomenclature of South African grasses closely follows T.H. Arnold and B.C. de Wet, Editors, *Plants of Southern Africa: Names and Distribution*. Memoirs of the Botanical Survey of South Africa No. 62, Pretoria 1993.

Descriptions compiled follow the patterns and the paths and the outlines and the schemes of the great authors and their works (not necessarily about grasses!): Engler and Sir J.D. Hooker, Michel Adanson, Humboldt, Charles Russell Metcalfe, Frans A. Stafleu and friends, McClure, M.E. Barkworth, Agnes Chase, H.J. Conert, T.A. Cope, Hackel, Grisebach, Henrard, C.E. Hubbard, Hitchcock, R. Pilger, O. Stapf, Steudel, Trinius, L. Watson and M.J. Dallwitz, Constantine S. Rafinesque, William T. Stearn, R.K. Brummitt, H. Walter Lack, W.D. Clayton, S.A. Renvoize, Sylvia Phillips, D.J. Mabberley, Dan H. Nicolson, and others. Their knowledge is the main source of whatever new light this work has been able to shed on the history of grasses. Their work is my cornerstone.

We have obviously included reference information to denote the original sources and all available descriptions. Every effort has been made to ensure the accuracy of the references and other data, but this has not been possible in every case. In the meanwhile, every effort has been made to trace the original source of copyright material contained in this dictionary.

The genera and species dealt with in this work are arranged in alphabetical order. The correct identities and names of all the taxa listed were checked and, where names have changed, the currently accepted name has been applied and the previous name (or names) used have been placed into synonymy.

Obviously, this listing is not meant to be exhaustive, and I do not know most of the species. I also recognize that it is impossible that everyone will agree with the generic and specific treatment I decided to follow, and many decisions may prove to be incorrect, but this work is so full of important and useful information that perhaps it may be considered worthy to serve as a starting point for something better.

After the generic names, after the equal sign (=), could be listed: accepted name, earlier name, blocking name, correct name, homonyms, replaced name, synonyms, or similar names, etc. For names that are not grasses, e.g., *Abola* Lindl. (Orchidaceae), the given data are the testimony of the history and “movement” of the name.

Bibliographic references are listed by year, usually with the exact titles or sometimes using the abbreviation recommended by *Botanico-Periodicum-Huntianum* and G.D.R. Bridson (compiler), S.T. Townsend (Ed.), E.A. Polen (Ed.), and E.R. Smith (editorial assistant), *BPH-2: Periodicals with Botanical Content; Constituting a Second Edition of Botanico-Periodicum-Huntianum*, Hunt Institute for Botanical Documentation, Carnegie Mellon University, Pittsburgh 2004. The names of the authors of all plant names listed follow the abbreviations published by Brummitt and Powell, but usually full names and initials have been used.

This is my choice, probably not the standard way or the correct one, but I clearly don't like the reference given simply by author and date. I prefer to have all the data and full details in front of me quickly and unequivocally intelligible! This work has been arranged in a manner considered most convenient for the user, the references are probably tens of thousands. I understand that such an arrangement makes necessary the duplication of many details, but I believe this is advantageous in that each subject and each entry is a “self-contained unit” which can be utilized without reference elsewhere.

Repetita iuvant... Each entry must be considered nothing less than a monograph, more or less complete, more or less exhaustive, more or less boring.

The responsibility of all judgments and errors is my own, and if anything is omitted, misstated, misjudged, or misquoted in the text, I hope the reader will excuse my human limitations.

This dictionary is not meant to be “only” and “strictly” a nomenclatural work. Many and different are the subjects involved: history of botany and botanists, travels and botanical discoveries, history of medicine, explorations, history of genera and species and their names, biography, bibliography, linguistics, history of mankind, history of ideas, history of science, geography, ethnography, etc.

I understand that the choice to include such material could be in some way misleading, but all this too belongs to the history of botany.

Warning:

Many of the plants here described have reputed medicinal properties according to some sources; the traditional medicinal remedies have been taken from the literature and from interviews with healers, traditional or not. They have not been tested. We have reproduced only information we believe to be correct, but we make no claims as to the validity of this information, and anyone testing it does so at his own risk. Self-treatment is dangerous. It is not our intention to prescribe or make specific health claims for any of the described species. Any attempt to diagnose and treat illness should come under the direction of a health-care practitioner.

A

Abola Adans. = *Abola* Lindl. (Orchidaceae),
Cinna L.

Pooideae, Poeae, Aveninae, see *Species Plantarum* 1: 5. 1753, *Familles des Plantes* 2: 31, 511. 1763, John Lindley (1799-1865), *Folia Orchidacea. Abola* 4. London 1852-1855 and *Repertorium Specierum Novarum Regni Vegetabilis, Beihefte* 35: 343. 1934, *Transactions of the Kentucky Academy of Science* 52: 94-96, 1991, *Sida* 14(4): 581-596. 1991, *Flora Mesoamericana* 6: 242-243. 1994, *Contributions from the United States National Herbarium* 48: 15, 234-236. 2003.

Acamptocladus Nash = *Eragrostis* Wolf

From the Greek *akamptos* “unbent, stiff” and *klados* “a branch.”

One species, North America, Mexico. Chloridoideae, Cynodonteae, or Chloridoideae, Eragrostideae, Eragrostidinae, perennial, unbranched, caespitose, tuberous, herbaceous, unarmed, culm internodes short, culm nodes hidden by leaf sheaths, ligule a fringe of hairs, leaves mostly basal, plants bisexual, deciduous inflorescence paniculate, bisexual spikelets, 2 glumes subequal, palea 2-nerved 2-keeled, 2 lodicules free and fleshy, 3 stamens, ovary glabrous, 2 stigmas, open habitats, sandy areas, prairies, plains, often in *Eragrostis*, type *Acamptocladus sessilispicus* (Buckley) Nash, see *Genera Plantarum* 23. 1776, *Icones et Descriptiones Graminum Austriacorum* 4: 15. 1809, *Proceedings of the Academy of Natural Sciences of Philadelphia* 14: 97. 1862 and *Flora of the Southeastern United States* ... 139-140, 1327. 1903, *Man. Grass. U.S.* 852. 1935, *Acta Bot. Neerl.* 15: 157. 1966, *Contributions from the United States National Herbarium* 41: 9, 81-115. 2001.

Species

A. sessilispicus (Buckley) Nash (*Eragrostis sessilispica* Buckley)

North America. Glumes 1-nerved.

Achaeta E. Fourn. = *Calamagrostis* Adans.

From the Greek *a* “without, lacking” and *chaite* “a bristle.”

Pooideae, Poeae, Agrostidinae, see *Familles des Plantes* 2: 31, 530. 1763, *Tentamen Florae Germanicae* 1: 34. 1788, *Mexicanas Plantas* 2: 109. 1886 and *Contributions from the United States National Herbarium* 48: 15, 191-227. 2003.

Achlaena Griseb. = *Arthropogon* Nees

From the Greek *a* “without, lacking” and *chlaena*, *chlaenion* “cloak, blanket.”

One species, Cuba and Jamaica. Panicoideae, Panicodae, Paniceae (Arthropogoneae), or Panicodae, Paniceae, Arthropogoninae, perennial, caespitose, herbaceous, foliage mainly basal, auricles absent, ligule a fringed membrane, plants bisexual, open inflorescence paniculate, spikelets laterally compressed and stipitate, 2 narrow glumes unequal, lemmas pointed, palea present, 2 free lodicules, 2 stamens, woods, open areas, savannah, slopes, dry places, close to *Arthropogon* Nees, type *Achlaena piptostachya* Griseb., see *Flora Brasiliensis seu Enumeratio Plantarum* 2(1): 319-320. 1829, *Catalogus plantarum cubensium* ... 228-229. 1866, *Sitzungsberichte der kaiserlichen Akademie der Wissenschaften. Wien. Mathematisch-naturwissenschaftliche Classe* 89: 125. 1884 and *Revista do Museu Paulista. Universidade de São Paulo* 13: 1250. 1922, *Botanical Magazine* (Tokyo) 76(902): 290. 1963, *Bradea, Boletim do Herbarium Bradeanum* 3: 303-322. 1982, *Annals of the Missouri Botanical Garden* 88(2): 351-372. 2001, *Contributions from the United States National Herbarium* 46: 13, 110-111. 2003.

Species

A. piptostachya Griseb. (*Arthropogon piptostachyus* (Griseb.) Pilg.; *Arthropogon piptostachyus* (Griseb.) Tateoka, nom. illeg., non *Arthropogon piptostachyus* (Griseb.) Pilg.; *Arthropogon stipitatus* Hack.)

The Caribbean, Cuba.

Achnatherum P. Beauv. = *Aristella* (Trin.) Bertol., *Eriocoma* Nutt., *Fendleria* Steud., *Jarava* Ruiz & Pav., *Lasiagrostis* Link, *Macrochloa* Kunth, *Orthoraphium* Nees, *Patis* Ohwi, *Stipa* L., *Timouria* Roshev., *Trichosantha* Steud.

Awne d scale, Greek *achne* "chaff, glume" and *ather* "stalk, barb," referring to the lemma.

About 100-300 species, Eurasia, Africa, America, New Zealand. Stipoideae, Stipeae, or Pooideae, Stipeae, Stipinae, annual or perennial, herbaceous, simple, erect, unbranched, caespitose or shortly rhizomatous, ligule an unfringed membrane or a fringed membrane, auricles present or absent, plants bisexual, with or without cleistogones, inflorescence paniculate few spikeleted to many spikeleted, open or narrow panicle, 1 floret, 2 glumes very unequal, lower glume 1-3-5-nerved, upper glume 3-5-7-nerved awns hairless to hairy to long-plumose, awn persistent, lemma cylindrical and membranous, palea with long hairs, 3 lodicules present, 3 stamens, ovary glabrous, 2 stigmas, open habitats, on dry hillsides, in shallow rocky soil, sometimes included in *Stipa* L., type *Achnatherum calamagrostis* (L.) P. Beauv., see *Species Plantarum* 1: 61, 78-79. 1753, *Flora Peruviana, et Chilensis Prodrumus* 2. 1794, *Flora Peruviana* 1: 5, t. 6, f. b. 1798, *Essai d'une Nouvelle Agrostographie* 19-20, 146, t. 6, f. 7. 1812, *The Genera of North American Plants* 1: 40. 1818, *Fundamenta Agrostographiae* 110. 1820, *Hortus Regius Botanicus Berlinensis* 1: 99. 1827, *Révision des Graminées* 1: 58. 1829, Antonio Bertoloni (1775-1869), *Flora Italica ...* 1: 690. Bologna 1833 [1835], *Nomenclator Botanicus. Editio secunda* 2: 702. 1841, *Synopsis Plantarum Glumacearum* 1: 419-420. 1854 and *Bulletin of the Torrey Botanical Club* 39(3): 102. 1912, *Contr. Denslow, "Microhabitat distribution of two Florida scrub endemic plants in comparison to their habitat-generalist congeners." *Am. J. Bot.* 92: 411-421. 2005, *Global Change Biology* 11(5): 749-756. May 2005.

Species

A. acutum (Swallen) Valdés-Reyna & Barkworth (*Stipa acuta* Swallen)

America, Mexico. See *Journal of the Washington Academy of Sciences* 30(5): 212. 1940.

A. altum (Swallen) Hoge & Barkworth (*Stipa alta* Swallen)

America, Mexico. See *Proceedings of the Biological Society of Washington* 56: 79. 1943.

A. aridum (M.E. Jones) Barkworth (*Stipa arida* M.E. Jones; *Stipa mormonum* Mez)

U.S., California. Inflorescence often partly enclosed by uppermost leaf sheath, see *Proceedings of the California Academy of Sciences, Series 2*, 5: 725. 1895 and *Repertorium Specierum Novarum Regni Vegetabilis* 17: 209. 1921. in English: Mormon needlegrass, desert needlegrass

A. brachychaetum (Godr.) Barkworth (*Jarava brachychaeta* (Godr.) Peñailillo; *Nassella brachychaeta* (Godr.) Barkworth; *Stipa brachychaeta* Godr.; *Stipa brachychaeta* f. *brachychaeta*; *Stipa brachychaeta* var. *minor* Speg.; *Stipa eminens* f. *viridis* Kuntze; *Stipa lorentziana* Griseb.) (for the German botanist Paul Günther Lorentz, 1835-1881, bryologist, professor of botany in Argentina and Uruguay, explorer, plant collector, owner of a moss herbarium. See P.G. Lorentz and Gustavo Niederlein, *Enumeración sistemática de las plantas colectadas durante la expedición. Informe oficial de la Comisión Científica agregada al Estado Mayor General de la expedición al Rio Negro (Patagonia)*, realizada en los meses de abril, mayo y junio de 1879, bajo las órdenes del Gral. Julio A. Roca. Buenos Aires. Entrega segunda. *Botánica*. 173-294. 1881; Stafleu and Cowan, *Taxonomic literature*. 3: 157-160. 1981; August Heinrich Rudolph Grisebach (1814-1879), *Plantae lorentzianae*. Göttingen 1874; J.H. Barnhart, *Biographical notes upon botanists*. 2: 402. 1965; T.W. Bossert, compil., *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 243. 1972; H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 203. Oxford 1964; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. 1917-1933; Ignatz Urban, *Geschichte des Königlichen Botanischen Museums zu Berlin-Dahlem (1815-1913). Nebst Aufzählung seiner Sammlungen*. Dresden 1916; F.A. Maximilian Kuhn (1842-1894), *Filices africanae ... Accedunt filices Deckenianae et Petersianae*. Lipsiae [Leipzig] 1868; Otto Kersten (1839-1900), *Geographische Nachrichten für Welthandel und Volkswirtschaft ... unter der ... Redaktion von Dr. O.K. [Berlin - Central-Verein für Handelsgeographie, etc. Geographische Nachrichten, etc.] Berlin 1879; Carl Claus von der Decken (1833-1865), Baron C.C. von der Decken's Reisen in Ost Afrika in 1859-61*. Leipzig & Heidelberg 1869-1879).

South America, Argentina, Peru, Uruguay. Perennial bunchgrass, densely tufted, roots fibrous and shallow, erect stems, sheaths open and glabrous, ligule truncate and membranous, auricles absent, foliage tough, blade expanded and linear, panicle exserted and contracted, 1 floret, spikelets gaping, glumes subequal and glabrous, lemmas stiff to hard, callus straight and densely silky, awn once or twice bent, paleas thick and stiff, small cleistogamous seeds develop within the basal leaf sheaths, cleistogamous seed hard-coated, unpalatable to livestock, reproduces by seed, an invasive and noxious weed of pasture, disturbed sites, nearby or along drainage and irrigation ditches, see *Mémoires de la Section des Sciences; Académie des Sciences et Lettres de*

Montpellier 1: 450. 1853, *Flora Chilena* 6: 263. 1854 and *Contr. U.S. Natl. Herb.* 24(6): 181. 1925, J.A. Caro, "Las especies de *Stipa* (Gramineae) de la region central Argentina." *Kurtziana* 3: 7-119. 1966, J.A. Caro & E. Sanchez, "La identidad de *Stipa brachychaeta* Godron, *S. caudata* Trinius y *S. bertrandii* Philippi." *Darwinia* 16(3-4): 637-653. 1971, *Taxon* 39(4): 609. 1990, *Gayana, Botánica* 59(1): 30. 2002.

in English: puna grass

in Spanish: espartillo

A. bracteatum (Swallen) Valdés-Reyna & Barkworth (*Stipa bracteata* Swallen)

America, Mexico. See *Journal of the Washington Academy of Sciences* 30(5): 213. 1940.

A. bromoides (L.) P. Beauv. (*Agrostis bromoides* L.; *Aristella bromoides* (L.) Bertol.; *Lasiagrostis bromoides* (L.) Nevski & Roshev.; *Stipa aristella* L.; *Stipa bromoides* (L.) Dörfli.; *Stipa bromoides* (L.) Beck, nom. illeg., non *Stipa bromoides* (L.) Dörfli.; *Stipa bromoides* (L.) Pilg., nom. illeg., non *Stipa bromoides* (L.) Dörfli.)

Algeria, Armenia, Turkey, Iran, Europe. Perennial, coarse, robust, erect to semierect, leaves mostly basal, open panicles, useful for erosion control, on dark soil, see *Mantissa Plantarum* 30. 1767, *Flora Italica ...* 1: 690. 1834 and *Essai d'une Nouvelle Agrostographie* 20, 146, 147. 1812, *Herbarium normale Cent.* xxxiv, no. 3386. 1897 and *Flora URSS* 2: 72, t. 6, f. 7-9. 1934, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 74: 235, f. 5. 1948, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 107: 203-228. 1985, *Acta Botanica Malacitana* 21: 125-189. 1996.

A. calamagrostis (L.) P. Beauv. (*Achnatherum hallerii* (Willd.) P. Beauv.; *Agrostis calamagrostis* L.; *Arundo halleri* Willd.; *Calamagrostis argentea* DC.; *Lasiagrostis calamagrostis* (L.) Link; *Stipa calamagrostis* (L.) Wahlenb.; *Stipa longifolia* Phil., nom. illeg., non *Stipa longifolia* Borbás; *Streptachne calamagrostis* (L.) Dumort.)

South and central Europe. Perennial, stems clumped and robust, leaves attenuate, inflorescence loose, useful for erosion control, see *Systema Naturae, Editio Decima* 2: 872. 1759, *Flora Berolinensis Prodrumus* 60. 1787, *Prodrumus Florae Novae Hollandiae* 174. 1810, *Essai d'une Nouvelle Agrostographie* 20, 146, 152, t. 6, f. 7. 1812, Georgii Wahlenberg ... *De vegetatione et climate in Helvetia septentrionali ...* 23. U.S. Natl. Herb.* 24(6): 181. 1925, *Berichte der Bayerischen Botanischen Gesellschaft zur Erforschung der Heimischen Flora* 56: 95-102. 1985, *Fitologija* 39: 72-77. 1991, Roser Guàrdia, José Raventós & Hal Caswell, "Spatial growth and population dynamics of a perennial tussock grass (*Ach-*

natherum calamagrostis) in a badland area." *Journal of Ecology* 88(6): 950-963. Dec 2000.

A. capense (L.) P. Beauv. (*Agrostis capensis* (L.) Lam.; *Danthonia capensis* (L.) Druce; *Milium capense* L.)

South Africa. See *Mantissa Plantarum* 185. 1771, *Encyclopédie Méthodique, Botanique* 1: 58. 1783, *Flore Française. Troisième Édition* 3: 32. 1805, *Essai d'une Nouvelle Agrostographie* 146, 167. 1812 and *Botanical Exchange Club and Society of the British Isles* 1916: 619. Manchester 1917.

A. caragana (Trin. & Rupr.) Nevski (*Achnatherum caragana* (Trin.) Nevski; *Achnatherum caragana* (Trin. & Rupr.) Prokh., nom. illeg., non *Achnatherum caragana* (Trin. & Rupr.) Nevski; *Lasiagrostis caragana* (Trin.) Trin. & Rupr.; *Lasiagrostis caragana* (Trin. & Rupr.) Trin. & Rupr.; *Stipa caragana* Trin.; *Stipa caragana* Trin. & Rupr.)

Asia, China, Russia, Armenia. Perennial bunchgrass, open panicles, straight short deciduous awn, useful for erosion control, common in meadows, see *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 1(1): 74. 1830, *Species Graminum Stipaceorum* 90. 1842.

A. caudatum (Trin.) S.W.L. Jacobs & J. Everett (*Jarava bertrandii* (Phil.) Peñailillo; *Jarava caudata* (Trin.) Peñailillo; *Stipa amphicarpa* Phil.; *Stipa bertrandii* Phil.; *Stipa caudata* Trin.)

South America, Chile, Argentina. Perennial, caespitose, stout, erect, tall, nodes swollen, intravaginal branching, often cleistogamous, cleistogenes in leaf sheaths, lemma hairy, awned, lodicules nerved, noxious weed species naturalized elsewhere, see *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 1(1): 75. 1830, *Linnaea* 33(3-4): 283. 1864, *Anales de la Universidad de Chile* 93: 717, 726. 1896 [also *Anales del Museo Nacional de Chile. Primera Sección — Zoología* 1892: 11, Lam. 3 f. 2. Santiago de Chile 1892] and *Telopea* 6(4): 582. 1996, *Gayana, Botánica* 59(1): 30-31. 2002.

in Spanish: espartillo

A. clandestinum (Hack.) Barkworth (*Stipa clandestina* Hack.)

Northern America, U.S., Mexico. See *Repertorium Specierum Novarum Regni Vegetabilis* 8: 516. 1910, *Contr. U.S. Natl. Herb.* 24(7): 238. 1925, *Phytologia* 74(1): 6. 1993.

A. constrictum (Hitchc.) Valdés-Reyna & Barkworth (*Stipa constricta* Hitchc.)

America, Mexico. See *Contributions from the United States National Herbarium* 24(7): 244, t. 51, f. 28-29. 1925.

A. contractum (B.L. Johnson) Barkworth (*Oryzopsis contracta* (B.L. Johnson) Schlechter; *Oryzopsis hymenoides* var. *contracta* B.L. Johnson; *Stipa contracta* (B.L. Johnson) W.A. Weber, nom. illeg., non *Stipa contracta* Phil.)

U.S. Rare grass, see *Flora Boreali-Americana* 1: 51. 1803 and *Contributions from the United States National Herbarium* 11: 109. 1906, *Botanical Gazette* 107: 24. 1945, *Brittonia* 18(4): 342. 1967 [1966], *Phytologia* 67(6): 428. 1989, *Phytologia* 74(1): 6. 1993.

A. coronatum (Thurb.) Barkworth (*Stipa coronata* Thurb.; *Stipa coronata* var. *coronata*)

U.S., California. Glabrous to hairy, leaf sheaths ciliate, inflorescence branches widely spreading to ascending, glumes unequal, chaparral, slopes, gravelly soil, rocky places, see *Geological Survey of California, Botany* 2: 287-288. 1880 and *Taxon* 33: 126-134. 1984, *Phytologia* 74(1): 6. 1993.

A. curvifolium (Swallen) Barkworth (*Stipa curvifolia* Swallen)

Northern America, U.S. See *Journal of the Washington Academy of Sciences* 23(10): 456. 1933, *Phytologia* 74(1): 7. 1993.

in English: Guadalupe grass

A. diegoense (Swallen) Barkworth (*Stipa diegoensis* Swallen)

North America, Mexico, U.S., California, San Diego Co. Perennial, basal leaf sheaths hairy, lowest internode hairy throughout, glumes subequal, rare or uncommon species, chaparral, rocky soil, see *J. Wash. Acad. Sci.* 30(5): 212, f. 2. 1940, *Phytologia* 74(1): 7. 1993.

in English: San Diego County needlegrass, San Diego needlegrass

A. duthiei (Hook.f.) P.C. Kuo & S.L. Lu (*Achnatherum duthiei* (Hook.f.) P.C. Kuo & S.L. Lu ex J.L. Yang; *Stipa duthiei* Hook.f.) (for the British botanist John Firminger Duthie, 1845-1922 (Sussex), 1875 Fellow of the Linnean Society, professor of natural history, plant collector in India, wrote *The Orchids of the North-Western Himalaya*. Calcutta 1906; see J.H. Barnhart, *Biographical notes upon botanists*. 1: 486. 1965; Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 223. 1994; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 110. 1972; Isaac Henry Burkill (1870-1965), *Chapters on the History of Botany in India*. 150-151. Delhi 1965; R. Desmond, *The European Discovery of the Indian Flora*. Oxford 1992)

China, India, Nepal, Western Himalaya. On rocky clay soil, alpine and subalpine shrub, gravelly sand, see *Fl. Brit. India* 7(22): 232. 1896 and *Kew Bull.* 125-128. 1922, *Flora Republicae Popularis Sinicae* 9(3): 322, pl. 80, f. 9-14. 1987, *Flora Sichuanica* 5(2): 190. 1988.

A. editorum (E. Fourn.) Valdés-Reyna & Barkworth (*Stipa editorum* E. Fourn.)

America, Mexico. See *Mexicanas Plantas* 2: 75. 1886.

A. eminens (Cav.) Barkworth (*Stipa eminens* Cav.; *Stipa erecta* E. Fourn., nom. illeg., non *Stipa erecta* Trin.; *Stipa flexuosa* Vasey)

South America, U.S., North America, Texas, Mexico. Perennial, forage, see *Icones et Descriptiones Plantarum, quae aut sponte ...* 5: 42, t. 467, f. 1. 1799, *Mexicanas Plantas* 2: 75. 1886, *Bulletin of the Torrey Botanical Club* 15(2): 49. 1888 and *Taxon* 33: 126-134. 1984, *Phytologia* 74(1): 7. 1993.

in Mexico: agujilla grande, flechilla, flechilla grande

A. hendersonii (Vasey) Barkworth (*Oryzopsis exigua* Thurb.; *Oryzopsis exigua* var. *hendersonii* (Vasey) M.E. Jones; *Oryzopsis hendersonii* Vasey; *Stipa hendersonii* (Vasey) Muhl.) (named for professor Louis Forniquet Henderson, 1853-1942, botanist, University of Idaho, plant collector, author of *The Early Flowering of Plants in Lane County, Oregon, in 1934*. Genève 1834; Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch*. 469. Ansbach 1852)

Asia, China, India. Subalpine meadow, silt loam, gravelly loam, see *Illustrationes Plantarum Orientalium* 4: 60, t. 339. Parisii 1851, *Journal of the Linnean Society, Botany* 18: 107. 1880, *Flora Orientalis* 5: 506. 1884 and *Flora Reipublicae Popularis Sinicae* 9(3): 323, pl. 80, f. 15-19. 1987.

A. latiglume (Swallen) Barkworth (*Stipa latiglumis* Swallen)

U.S., California, Sierra Nevada. Hairy, basal leaf sheaths hairy, glumes subequal and acuminate, lemma awn bent twice, found in dry slopes, forest, see *Journal of the Washington Academy of Sciences* 23(4): 198, f. 1. 1933, *Phytologia* 74(1): 8. 1993.

A. lemmonii (Vasey) Barkworth (*Achnatherum lemmonii* (Swallen) Barkworth; *Stipa columbiana* Macoun; *Stipa columbiana* var. *columbiana*; *Stipa lemmonii* (Vasey) Scribn.; *Stipa lemmonii* var. *pubescens* Crampton; *Stipa minor* (Vasey) Scribn.; *Stipa pringlei* var. *lemmonii* Vasey; *Stipa viridula* var. *minor* Vasey) (for the American botanist John Gill Lemmon, 1832-1908, plant collector in Southern Arizona and Huachuca Mountains near Sierra Vista, correspondent of Asa Gray, he married Sara Allen Plummer (1836-1923), wrote *Conifers of the Pacific Slope*. [Oakland, California 1902], see J.H. Barnhart, *Biographical notes upon botanists*. 2: 367 and 3: 93. 1965)

Northern America, Canada, U.S. Perennial, good for restoring disturbed or degraded areas, used for revegetation of mined land and for dryland soil stabilization, serpentine slopes in chaparral, rich soils, dry rocky ground, dry grav-

elly soil, see *Catalogue of Canadian Plants* 2(4): 191. 1888, *Contributions from the United States National Herbarium* 3(1): 50, 54-55. 1892, *Bulletin, Division of Agrostology United States Department of Agriculture* 11: 46-47. 1898 and *Circular, Division of Agrostology, United States Department of Agriculture* 30: 3. 1901, *Contributions from the United States National Herbarium* 24(7): 253. 1925, *Leaflets of Western Botany* 7(9): 220. San Francisco 1955, *Taxon* 28: 623. 1979, *Phytologia* 74(1): 8. 1993.

in English: Lemmon's needlegrass, pubescent needlegrass

A. lemmonii (Vasey) Barkworth subsp. *lemmonii* (*Achnatherum lemmonii* (Swallen) Barkworth var. *lemmonii*; *Stipa lemmonii* (Vasey) Scribn.; *Stipa lemmonii* var. *jonesii* Scribn.; *Stipa lemmonii* var. *lemmonii*)

Northern America, U.S. Perennial, spikelets laterally compressed, glumes more or less equal, coniferous forest, sagebrush scrub, see *Phytologia* 74(1): 8. 1993.

in English: Lemmon's needlegrass

A. lemmonii (Vasey) Barkworth subsp. *pubescens* (Crampton) Barkworth (*Achnatherum lemmonii* (Swallen) Barkworth var. *pubescens* (Crampton) Barkworth; *Stipa lemmonii* var. *pubescens* Crampton)

Northern America, U.S. Perennial, see *Leaflets of Western Botany* 7(9): 220. 1955, *Phytologia* 74(1): 8. 1993.

in English: pubescent Lemmon's needlegrass, Lemmon's needlegrass

A. lettermanii (Vasey) Barkworth (*Stipa lettermanii* Vasey; *Stipa minor* (Vasey) Scribn.; *Stipa occidentalis* var. *minor* (Vasey) C.L. Hitchc.; *Stipa viridula* Trin. var. *lettermanii* (Vasey) Vasey; *Stipa viridula* var. *minor* Vasey) (named for George Washington Letterman, 1841 (or 1840)-1913, teacher, plant collector, explorer and traveler, see Joseph Ewan, *Rocky Mountain Naturalists*. 249-250. The University of Denver Press 1950)

California, Sierra Nevada, U.S. Perennial, rare, leaf blades usually curled, awn bent twice, forage, dry slopes, sagebrush scrub, meadows, coniferous forest, see *Bulletin of the Torrey Botanical Club* 13: 53. 1886, *Contributions from the United States National Herbarium* 3(1): 50. 1892, *Bulletin, Division of Agrostology United States Department of Agriculture* 11: 46-47. 1898 and *Contributions from the United States National Herbarium* 24(7): 253. 1925, *Vascular Plants of the Pacific Northwest* 1: 714. 1969, *Taxon* 28: 623-624. 1979, *Taxon* 31(2): 294, f. 6. 1982, *Phytologia* 74(1): 9. 1993.

in English: Letterman's needlegrass

A. multinode (Scribner ex Beal) Valdés-Reyna & Barkworth (*Stipa multinodis* Scribn. ex Beal)

America, Mexico. See *Grasses of North America for Farmers and Students* 2: 222. 1896.

A. nelsonii (Scribn.) Barkworth (*Stipa columbiana* var. *nelsonii* (Scribn.) Hitchc.; *Stipa columbiana* var. *nelsonii* (Scribn.) H. St. John, nom. illeg., non *Stipa columbiana* var. *nelsonii* (Scribn.) Hitchc.; *Stipa nelsonii* Scribn.; *Stipa williamsii* Scribn.) (named for Aven Nelson, 1859-1952, Rocky Mountains botanist, plant collector, professor of biology at the University of Wyoming, his works include *The Cryptogams of Wyoming*, Laramie, Wyoming 1900, with James Francis Macbride (1892-1976) wrote "Western plant studies. II." *Bot. Gaz.* 56: 469-479. Crawfordsville 1913. See J.H. Barnhart, *Biographical notes upon botanists*. 2: 544. 1965; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 284. 1972; S. Lenley et al., *Catalog of the manuscript and archival collections and index to the correspondence of John Torrey*. Library of the New York Botanical Garden. 307. 1973; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933; Joseph Ewan, *Rocky Mountain Naturalists*. The University of Denver Press 1950; Joseph William Blankinship (1862-1938), "A century of botanical exploration in Montana, 1805-1905: collectors, herbaria and bibliography." in *Montana Agric. Coll. Sci. Studies Bot.* 1: 1-31. 1904 (*Stipa williamsii* Scribn. dedicated to the American botanist Thomas Albert Williams, 1865-1900, professor of botany, plant collector, see Joseph Ewan, *Rocky Mountain Naturalists*. 338. The University of Denver Press 1950 and Joseph William Blankinship (1862-1938), "A century of botanical exploration in Montana, 1805-1905: collectors, herbaria and bibliography." in *Montana Agric. Coll. Sci. Studies Bot.* 1: 1-31. 1904 [1905])

Northern America, Canada, U.S. Perennial, dry soils, see *Catalogue of Canadian Plants* 2(4): 191. 1888, *Bulletin, Division of Agrostology United States Department of Agriculture* 11: 45-46, t. 4. 1898 and *Contributions from the United States National Herbarium* 24(7): 254. 1925, *Phytologia* 74: 9. 1993.

in English: Columbia needlegrass

A. nelsonii (Scribn.) Barkworth subsp. **dorei** (Barkworth & J.R. Maze) Barkworth (*Stipa columbiana* auct.; *Stipa minor* (Vasey) Scribn.; *Stipa nelsonii* subsp. *dorei* Barkworth & J. Maze; *Stipa nelsonii* Scribn. var. *dorei* (Barkworth & Maze) Dorn; *Stipa occidentalis* Thurb. var. *minor* sensu C.L. Hitchc., non (Vasey) C.L. Hitchc.) (for William George Dore, 1912-1996, author of *Wild-rice*. Dept. of Agriculture, Research Branch, Ottawa 1969 [Canada. Dept. of Agriculture. Publication 1393, *Zizania*], *Grasses of Ontario* / William G. Dore and J. McNeill. Ottawa: Research Branch, Agriculture Canada, no. 26. Hull, Que. 1980)

Northern America, U.S., British Columbia. Perennial, tufted, open sheaths smooth to densely hairy, no auricles, inrolled to flattened leaf blades, narrow spikelike and bristly flower head, glumes subequal, lemma covered in white hairs, awns twice bent, the lowest segment of the awn is

rough, found in dry plains, open woods, clearings, meadows, see *Bulletin, Division of Agrostology United States Department of Agriculture* 11: 46. 1898 and *Taxon* 28(5/6): 623. 1979, *Vascular Plants of Wyoming* 298. 1988, *Phytologia* 74(1): 9. 1993.

in English: Columbia needlegrass, Columbian needle grass, Dore's needlegrass

A. nelsonii (Scribn.) Barkworth subsp. **nelsonii** (*Stipa columbiana* Macoun var. *nelsonii* (Scribn.) St. John; *Stipa nelsonii* Scribn.; *Stipa nelsonii* subsp. *nelsonii*; *Stipa occidentalis* Thurb. var. *nelsonii* (Scribn.) C.L. Hitchc.; *Stipa williamsii* Scribn.)

Northern America, U.S. Perennial, forage, revegetation, see *Bulletin, Division of Agrostology United States Department of Agriculture* 11: 46. 1898 and *Vascular Plants of the Pacific Northwest* 1: 715. 1969, *Phytologia* 74(1): 9. 1993.

in English: Columbia needlegrass, Nelson's needlegrass

A. nevadense (B.L. Johnson) Barkworth (*Stipa nevadensis* B.L. Johnson)

U.S., Sierra Nevada. Perennial, delicate, leaf blades usually inrolled, awn bent twice, in open woodlands, sagebrush scrub, see *American Journal of Botany* 49: 257. 1962, *Phytologia* 74(1): 9. 1993.

in English: Nevada needlegrass

A. occidentale (Thurb.) Barkworth (*Achnatherum occidentale* (Thurb. ex S. Watson) Barkworth; *Achnatherum occidentale* subsp. *occidentale*; *Stipa occidentalis* Thurb.; *Stipa occidentalis* Thurb. ex S. Watson; *Stipa occidentalis* Bol. ex Hitchc., nom. illeg., non *Stipa occidentalis* Thurb. ex S. Watson; *Stipa occidentalis* var. *montana* Merr. & Davy; *Stipa oregonensis* Scribn.; *Stipa stricta* Vasey, nom. illeg., non *Stipa stricta* Lam.; *Stipa stricta* var. *sparsiflora* Vasey)

Northern America, U.S. Perennial, sheath ciliate at top, leaf blades rolled, leaf glabrous to hairy, glumes more or less equal, awn bent twice, found in dry rocky soil, open places, coniferous forest, see *United States Geological Exploration [sic] of the Fortieth Parallel. Botany* 380. 1871, *Proc. Calif. Acad. Sci.* 4: 169. 1872, *Bulletin of the Torrey Botanical Club* 10: 42. 1883, *Contributions from the United States National Herbarium* 3(1): 51. 1892, *Bulletin, Division of Agrostology United States Department of Agriculture* 17: 130, f. 426. 1899 and *University of California Publications in Botany* 1: 62. 1902, *Contr. U.S. Natl. Herb.* 24(7): 242. 1925, *Manual of the Grasses of the United States* 963. 1935, *Phytologia* 74(1): 10. 1993.

in English: Western needlegrass

A. occidentale (Thurb.) Barkworth subsp. **californicum** (Merr. & Burt Davy) Barkworth (*Achnatherum nelsonii* (Scribn.) Barkworth subsp. *longiaristatum* (Barkworth & Maze) Barkworth; *Achnatherum occidentale* subsp. *californicum* (H.M. Hall) Barkworth; *Stipa californica* Merr. & Burt Davy; *Stipa nelsonii* Scribn. var. *longiaristata*

Barkworth & Maze; *Stipa occidentalis* var. *californica* (Merr. & Burt Davy) C.L. Hitchc.)

Northern America, U.S. Perennial, small, upper awn segment rough to smooth, used for revegetation of mined land and for dryland soil stabilization, found in damp soil, disturbed or degraded areas, coniferous forest, see *Bulletin, Division of Agrostology United States Department of Agriculture* 11: 46. 1898 and *University of California Publications in Botany* 1: 61. 1902, *Vascular Plants of the Pacific Northwest* 1: 715. 1969, *Taxon* 28(5/6): 623. 1979, *Phytologia* 74(1): 9-10. 1993.

in English: California needlegrass

A. occidentale (Thurb.) Barkworth subsp. **occidentale** (*Stipa occidentalis* Thurb. ex S. Wats.; *Stipa occidentalis* var. *montana* Merr. & Davy; *Stipa occidentalis* var. *occidentalis*)

Northern America, U.S., California. Perennial, hairy awn, found in dry rocky soil, coniferous forest, disturbed or degraded areas, see *University of California Publications in Botany* 1: 62. 1902, *Contr. U.S. Natl. Herb.* 24(7): 242. 1925, *Phytologia* 74(1): 10. 1993.

in English: Western needlegrass

A. occidentale (Thurb.) Barkworth subsp. **pubescens** (Vasey) Barkworth (*Stipa elmeri* Piper & Brodie ex Scribner; *Stipa occidentalis* var. *pubescens* (Vasey) Maze, Taylor & MacBryde; *Stipa viridula* var. *pubescens* Vasey) (for the American botanist Adolph Daniel Edward Elmer, 1870-1942, plant collector in Borneo, California, Washington and in the Philippines, author of "A new Grewia." *Leaflet. Philip. Bot.* 2, 1909. See Elmer Drew Merrill, *Plantae Elmerianae Borneenses*. Berkeley 1929; J. Lanjouw and F.A. Stafleu, *Index Herbariorum*. Part II (2), *Collectors E-H*. Regnum Vegetabile vol. 9. 1957; Joseph Ewan, *Rocky Mountain Naturalists*. 203. The University of Denver Press 1950)

Northern America, U.S. Perennial, strongly tufted, sheaths open and smooth or hairy, no auricles, leaves stiff and usually inrolled, spiky and bristly flower head medium to long, protruding and bristly twice-bent awns, on dry ground, coniferous forest, disturbed or degraded areas, see *Contributions from the United States National Herbarium* 3(1): 50. 1892, *Bulletin, Division of Agrostology United States Department of Agriculture* 11: 46. 1898 and *Contr. U.S. Natl. Herb.* 24(7): 241. 1925, *Canadian Journal of Botany* 56(2): 193. 1978, *Phytologia* 74(1): 10. 1993.

in English: stiff needle grass, pubescent Western needlegrass

A. parishii (Vasey) Barkworth (*Stipa coronata* subsp. *parishii* (Vasey) Hitchc.; *Stipa coronata* var. *depauperata* (M.E. Jones) Hitchc.; *Stipa coronata* var. *parishii* (Vasey) S.L. Welsh; *Stipa parishii* Vasey)

Sierra Nevada, U.S., California. Basal leaf sheaths ciliate, glumes unequal, awn bent, dry rocky slopes, see *Species*

Graminum Stipaceorum 75. 1842, *Geological Survey of California, Botany* 2: 287-288. 1880, *Botanical Gazette* 7(3): 33. 1882 and *Contributions from the United States National Herbarium* 24(7): 227. 1925, *Journal of the Washington Academy of Sciences* 24(7): 292. 1934, *Phytologia* 74(1): 11. 1993, *A Utah Flora: Third Edition, revised* 800. 2003.

A. parishii (Vasey) Barkworth subsp. **depauperatum** (M.E. Jones) Barkworth (*Stipa coronata* var. *depauperata* (M.E. Jones) Hitchc.; *Stipa parishii* var. *depauperata* M.E. Jones)

America, U.S., Utah. See *Contributions to Western Botany* 14: 11. 1912, *Journal of the Washington Academy of Sciences* 24(7): 292. 1934, *Phytologia* 74(1): 11. 1993.

A. parishii (Vasey) Barkworth subsp. **parishii** (*Stipa parishii* var. *parishii*)

America. See *Botanical Gazette* 7(3): 33. 1882.

A. pekinense (Hance) Ohwi (*Achnatherum extremorientale* (Hara) Keng; *Achnatherum extremorientale* (Hara) Hara, nom. illeg., non *Achnatherum extremorientale* (Hara) Keng; *Achnatherum extremorientale* (Hara) Keng ex P.C. Kuo, nom. illeg., non *Achnatherum extremorientale* (Hara) Keng; *Stipa extremorientalis* Hara; *Stipa japonica* Hack ex Honda; *Stipa pekinense* Hance; *Stipa sibirica* (L.) Lam.)

China, Japan. Useful for erosion control, see *Species Plantarum* 1: 79. 1753, *Primitiae Florae Amurensis* 326. 1859, *Journal of Botany, British and Foreign* 15(177): 268. 1877 and *Journal of Japanese Botany* 15(7): 459. 1939, *Journal of Japanese Botany* 17(7): 401. 1941, *Bulletin of the National Science Museum* 33: 66. 1953, *Claves Generum et Specierum Graminearum Primarum Sinicarum Appendice Nomenclatione Systematica* 107, 212. 1957, *Flora Illustralis Plantarum Primarum Sinicarum: Gramineae* 590, f. 524. 1959, *Flora Tsinlingensis*. Tomus 1, Spermatophyta 1(1): 153. Peking 1976 [China. Academia Sinicae. Institutum Botanicum], *Grasses of Japan and its Neighboring Regions* 483. 1987.

A. perplexum Hoge & Barkworth (*Stipa perplexa* (Hoge & Barkworth) Wipff & S.D. Jones)

America, U.S., New Mexico. See *Phytologia* 74(1): 11. 1993, *Phytologia* 77(6): 461. 1994[1995].

A. petriei (Buchanan) S.W.L. Jacobs & J. Everett (*Stipa petriei* Buchanan) (for the Scottish (b. Morayshire) botanist Donald Petrie, 1846-1925, went to Australia in 1868, in New Zealand 1874-1925, in 1894 chief inspector of schools, Auckland, New Zealand, wrote "List of the flowering plants indigenous to Otago." *Trans. Proc. New Zealand Inst.* 1896, "The Gramina of the Subantarctic Islands of New Zealand." *Subantarct. Is N.Z.* 2: 472-481. 1909 and "Some additions to the Flora of the Subantarctic Islands of New Zealand." *T.N.Z.I.* 47: 59-60. 1915. See J.H. Barnhart, *Biographical notes upon botanists*. 3: 76. 1965; Thomas Frederick Cheeseman, *Manual of the New Zealand Flora*. xxvii.

Wellington 1906; I.H. Vegter, *Index Herbariorum*. Part II (5), *Collectors N-R*. Regnum Vegetabile vol. 109. 1983; I.C. Hedge & J.M. Lamond, *Index of Collectors in the Edinburgh Herbarium*. Edinburgh 1970)

New Zealand. Perennial, erect, wiry, branching extravaginal, short cataphylls, narrow panicle, lemma hairy, awned, chasmogamous, see *Indigenous Grasses of New Zealand* t. 17, 2, addenda. 1880 and *Telopea* 6(4): 582. 1996.

A. pinetorum (M.E. Jones) Barkworth (*Stipa pinetorum* M.E. Jones)

Sierra Nevada, Utah. Inflorescence branches appressed, glumes subequal, awn bent twice, on rocky soil, coniferous forest, see *Proceedings of the California Academy of Sciences*, Series 2, 5: 724. 1895 and *Phytologia* 74(1): 12. 1993.

A. richardsonii (Link) Barkworth (*Oryzopsis richardsonii* (Link) Beal; *Stipa richardsonii* Link; *Stipa richardsonii* var. *major* Macoun)

Northern America, U.S., Canada. Perennial, tufted, often purplish, several stemmed, sheaths open and smooth or slightly hairy, no auricles, basal leaves, rough blades usually folded to slightly inrolled, sparse open and drooping flower head with spreading and flexuous branches, single-flowered spikelets, 2 narrow glumes, awn twice bent, grows in low-elevation grasslands and montane openings in forests, see *Enumeratio Plantarum Horti Botanici Berolinensis*, ... 2: 245. 1833, *Catalogue of Canadian Plants* 2(4): 191. 1888, *Botanical Gazette* 15(5)12: 111. 1890 and *Phytologia* 74(1): 12. 1993.

in English: Richardson's needlegrass, spreading needle grass

A. robustum (Vasey) Barkworth (*Achnatherum lobatum* (Swallen) Barkworth; *Stipa lobata* Swallen; *Stipa robusta* (Vasey) Scribn.; *Stipa vaseyi* Scribn.; *Stipa viridula* var. *robusta* Vasey)

Northern America, U.S., Mexico. Perennial, a stock-poisoning grass, on rocky areas, hillsides, rocky hill, see *Contributions from the United States National Herbarium* 1(2): 56. 1890, *Bulletin, Division of Agrostology United States Department of Agriculture* 5: 23. 1897, *Bulletin, Division of Agrostology United States Department of Agriculture* 11: 46. 1898 and *Journal of the Washington Academy of Sciences* 23(10): 199, f. 2. 1933, *Taxon* 42: 711. 1993, *Phytologia* 74(1): 9, 12. 1993, *Taxon* 44: 610. 1995.

in English: sleepygrass

A. scribneri (Vasey) Barkworth (*Stipa scribneri* Vasey)

U.S., New Mexico. Perennial, see *Bulletin of the Torrey Botanical Club* 11: 125. 1884 and *Phytologia* 74(1): 13. 1993.

in English: Scribner needlegrass

A. speciosum (Trin. & Rupr.) Barkworth (*Jarava patagonica* (Speg.) Peñailillo; *Jarava speciosa* (Trin. & Rupr.) Peñailillo; *Stipa californica* Vasey ex S. Watson; *Stipa humilis* Cav.; *Stipa humilis* var. *jonesiana* Kuntze; *Stipa humilis* var. *speciosa* (Trin. & Rupr.) Kuntze; *Stipa patagonica* Speg.; *Stipa speciosa* Trin. & Rupr.; *Stipa speciosa* f. *minor* Speg.; *Stipa speciosa* f. *speciosa*; *Stipa speciosa* var. *minor* Vasey; *Stipa speciosa* var. *speciosa*; *Stipa tehuelches* Speg.) (named for the American plant collector Marcus Eugene Jones, 1852-1934, botanist, explorer, mining engineer, Latinist, botanized in Texas and Colorado, collected widely in the Intermountain West, among his writings are *Ferns of the West*. Salt Lake City, Utah 1882 and *Revision of North-American Species of Astragalus*. Salt Lake City, Utah 1923. See J.H. Barnhart, *Biographical notes upon botanists*. 2: 262. Boston 1965; S. Lenley et al., *Catalog of the manuscript and archival collections and index to the correspondence of John Torrey*. 246. 1973; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. 1917-1933; Ignatz Urban, *Geschichte des Königlichen Botanischen Museums zu Berlin-Dahlem (1815-1913). Nebst Aufzählung seiner Sammlungen*. 277, 361. 1916; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. Philadelphia 1964; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993; Joseph Ewan, *Rocky Mountain Naturalists*. The University of Denver Press 1950)

Argentina, Chile, Baja California, U.S., Arizona, Mexico. Perennial, caespitose, forming small clumps, basal leaf sheath hairy, inflorescence partly enclosed by uppermost leaf sheath, glumes subequal, awn bent, on rocky slopes, canyons, see *Icones et Descriptiones Plantarum, quae aut sponte ...* 5: 41, t. 466, f. 1. 1799, *Species Graminum Stipaceorum* 45. 1842, *Proceedings of the American Academy of Arts and Sciences* 24: 80. 1889, *Contributions from the United States National Herbarium* 3(1): 52. 1892, *Revista de la Facultad de Agronomía y Veterinaria* 3: 581. 1897, *Revisio Generum Plantarum* 3(2): 371. 1898 and *Anales del Museo Nacional de Montevideo* 4: 58, f. c-d. 1901, *University of California Publications in Botany* 1: 61. 1902, *Contr. U.S. Natl. Herb.* 24(7): 222. 1925, *Revista Argentina de Botánica* 1: 24. 1925, *Phytologia* 74(1): 13. 1993, *Gayana, Botánica* 59(1): 32. 2002.

in English: desert needlegrass

A. splendens (Trin.) Nevski (*Lasiagrostis splendens* Kunth; *Lasiagrostis splendens* (Trin.) Kunth; *Stipa altaica* Trin. ex Ledeb.; *Stipa schlagintweitii* Mez; *Stipa splendens* Trin.) (for the German traveler, explorer and plant collector Hermann Alfred Rudolph von Schlagintweit-Sakünlinski (1826-1882), author of *Reisen in Indien und Hochasien*. ... Basirt auf die resultate der wissenschaftlichen mission von Hermann, Adolph und Robert von Schlagintweit, ausgeführt in den jahren 1854-1858. Jena 1869-1880, *Unter-*

suchungen über die physikalische Geographie der Alpen in ihren Beziehungen zu den Phänomenen der Gletscher, zur Geologie, Meteorologie und Pflanzengeographie, von Hermann Schlagintweit und Adolph Schlagintweit. Leipzig 1850, *Ueber die Ernährung der Pflanzen mit besonderer Rücksicht auf die Bedingungen ihres Gedeihens in verschiedenen Höhen der Alpen*. [Leipzig, 1850]; he was brother of Adolf von Schlagintweit (1829-1857). See J.H. Barnhart, *Biographical notes upon botanists*. 3: 228. 1965; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 353. 1972; Emil Bretschneider (1833-1901), *History of European Botanical Discoveries in China*. [Reprint of the original edition 1898.] Leipzig 1981; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933; Stafleu & Cowan, *Taxonomic literature*. 5: 187-189. 1985)

China, Tibet, Mongolia, Russia, Siberia. Perennial bunchgrass, clumped, robust and stout stems, leaves scabrous, eaten by sheep, useful for erosion control, occurs in meadows, forest and open grassland areas, lowlands, gravelly sand, deep gravelly loam, brown gravelly soil, swamps, marshy ground along river, stream bottoms, see *Neue Entdeckungen im ganzen Umfang der Pflanzenkunde* 2: 54. 1821 and *Repertorium Specierum Novarum Regni Vegetabilis* 17(13-18): 208. 1921, *J. Jap. Bot.* 17: 404. 1941.

in English: chee grass

A. stillmanii (Bol.) Barkworth (*Lasiagrostis tenacissima* (L.) Trin. & Rupr.; *Macrochloa tenacissima* (L.) Kunth; *Stipa stillmanii* Bol.; *Stipa tenacissima* L.)

California, Sierra Nevada, U.S. Leaf blade folded or rolled, basal leaf sheath smooth and hairy, glumes subequal, awn bent, found on dry red soil, rocky slopes, coniferous forest, see *Centuria I. Plantarum* ... 6. 1755, *Amoen. Acad.* 4: 266. 1759, *Révision des Graminées* 1: 58. 1829, *Species Graminum Stipaceorum* 94. 1842, *Proceedings of the California Academy of Sciences* 4: 169. 1872 and *Phytologia* 74(1): 14. 1993, *Anal. Jard. Bot. Madrid* 52(2): 179-186. 1995.

A. swallenii (C.L. Hitchc. & Spellenb.) Barkworth (*Oryzopsis swallenii* C.L. Hitchc. & Spellenb.)

America. See *Brittonia* 20: 164. 1968, *Phytologia* 74(1): 14. 1993.

A. thurberianum (Piper) Barkworth (*Stipa occidentalis* Thurb. ex Torr., nom. illeg., non *Stipa occidentalis* Thurb. ex S. Watson; *Stipa occidentalis* Thurb., nom. illeg., non *Stipa occidentalis* Thurb. ex S. Watson; *Stipa thurberiana* Piper) (after George Thurber, 1821-1890, American botanist, naturalist, 1850-1853 Mexican-U.S. Boundary Survey, chemist, professor of botany and horticulture at Michigan Agricultural College 1859-1863 and editor of the *American Agriculturalist* 1863-1890; see J. Ewan, *Rocky Mountain Naturalists*. 64, 321. 1950; J.H. Barnhart, *Biographical notes upon botanists*. 3: 382. 1965)

Sierra Nevada, U.S. Perennial, hairy, awn bent twice, useful for erosion control, found on foothills, canyons, juniper woodland, disturbed areas, sagebrush scrub, see *United States Geological Exploration [sic] of the Fortieth Parallel. Botany* 380. 1871, *United States Exploring Expedition* 17: 483. 1874 and *Circular, Division of Agrostology, United States Department of Agriculture* 27: 10. 1900, *Phytologia* 74(1): 14. 1993.

in English: Thurber needlegrass, Thurber's needlegrass

A. wallowaense J. Maze & K. Robson

U.S., Oregon, Wallowa Co. See *Madroño* 43(3): 401, f. 1-2. 1996.

A. webberi (Thurb.) Barkworth (*Eriocoma webberi* Thurb.; *Oryzopsis webberi* (Thurb.) Benth. ex Vasey; *Stipa webberi* (Thurb.) B.L. Johnson)

U.S., California. Stiff, leaf blades rolled, dense inflorescence often enclosed by upper leaf sheath, glumes subequal, lemma hairy, straight awn, open places, slopes, dry flats, disturbed areas, see *Geological Survey of California, Botany* 2: 283-284. 1880, *The Grasses of the United States* 23. 1883 and *Botanical Gazette* 107: 25. 1945, *Phytologia* 74(1): 14. 1993.

A. x bloomeri (Boland.) Barkworth (*Oryzopsis bloomeri* (Boland.) Ricker ex Piper; *Oryzopsis bloomeri* (Bol.) Ricker; *Stipa bloomeri* Boland.; x *Stiporyzopsis bloomeri* (Boland.) B.L. Johnson) (for the American (San Francisco) botanist H.G. Bloomer, 1821-1874, see James C. Hickman, editor, *The Jepson Manual: Higher Plants of California*. 1180. University of California Press, Berkeley 1993; F. Boerner & G. Kunkel, *Taschenwörterbuch der botanischen Pflanzennamen*. 4. Aufl. 67. Berlin & Hamburg 1989)

North America, U.S., Oregon. Found in dry sandy soils, desert, see *Proceedings of the California Academy of Sciences* 4: 168. 1872 and *Contributions from the United States National Herbarium* 11: 109. 1906, *American Journal of Botany* 30: 55. 1943, *American Journal of Botany* 32: 602, f. 14-18. 1945, *Phytologia* 74(1): 14. 1993.

Achneria Munro ex Benth. = *Achneria* Benth., *Afrachneria* Sprague, *Pentaschistis* (Nees) Spach

Greek *achne* "chaff, glume."

Arundinoideae, Arundineae, see *Flore Française. Troisième Édition* 3: 32. 1805, *Essai d'une Nouvelle Agrostographie* 72, 146. 1812, *Histoire naturelle des Végétaux* 13: 164. Paris 1841, C.G.D. Nees von Esenbeck (1776-1858), *Florae Africae Australioris Illustrationes Monographicae* ... I. Gramineae. Glogaviae 1841, *Genera Plantarum* 3(2): 1158, 1163. 1883 and *Journal of Botany, British and Foreign* 60: 138. 1922, *Blumea* 26(1): 130. 1980, *Wageningen Agricultural University Papers* 92-1(2): 1-557. 1992, M. Lazarides,

“The genus *Eriachne* (Eriachneae, Poaceae).” *Australian Systematic Botany* 8(3): 355-452. 1995, K.C. Klopfer, J.J. Spies & B. Visser, “Cytogenetic studies in the genus *Pentaschistis* (Poaceae: Arundinoideae).” *Bothalia* 28(2): 231-238. 1998.

Achneria P. Beauv. = *Eriachne* R. Br.

See *Eriachne* R. Br.

Eriachneae, type *Achneria obtusa* (R. Br.) P. Beauv., see *Prodromus Florae Novae Hollandiae* 183. 1810, Ambroise Marie François Joseph Palisot de Beauvois (1752-1820), *Essai d'une nouvelle Agrostographie, ou nouveaux genres des Graminées*. 72, 73, 146. Paris 1812 and *Blumea* 26(1): 127, 130. 1980.

Achnodon Link = *Achnodonton* P. Beauv.,
Phleum L.

From the Greek *achne* “chaff, glume” and *odous, odontos* “tooth.”

Pooideae, Poeae, Alopecurinae, see *Species Plantarum* 1: 59-60. 1753, *Der Gesellschaft Naturforschender Freunde zu Berlin, neue Schriften* 3: 415. 1801, *Hortus Regius Botanicus Berolinensis* 1: 65. 1827, C.F. Ledebour, *Flora Rossica sive enumeratio plantarum in totius imperii Rossici provinciis Europaeis, Asiaticis et Americanis hucusque observatarum*. 4: 455. Stuttgartiae, E. Schweizerbart, 1842-1853, *Synopsis der mitteleuropäischen Flora* 2: 154. 1899 and *Contributions from the United States National Herbarium* 48: 19, 491-494. 2003.

Achnodondon Kunth = *Achnodon* Link,
Achnodonton P. Beauv.

See *Mém. Mus. Hist. Nat.* [Paris] 2: 72. 1815.

Achnodonton P. Beauv. = *Phleum* L.

From the Greek *achne* “chaff, glume” and *odous, odontos* “tooth.”

Pooideae, Poeae, Alopecurinae, type *Achnodonton tenuis* (Host) P. Beauv., see *Species Plantarum* 1: 59-60. 1753, *Der Gesellschaft Naturforschender Freunde zu Berlin, neue Schriften* 3: 415. 1801, *Icones et Descriptiones Graminum Austriacorum* 2: 27, t. 36. 1802, *Essai d'une Nouvelle Agrostographie* 24-25, 146, 173, t. 7, f. 5. 1812, *De Graminibus unifloris et sesquifloris* 164. Petropoli 1824, *Hortus Regius Botanicus Berolinensis* 1: 65. 1827, *Tourist's Fl.* 398. 1850 and *Contr. U.S. Nat. Herb.* 24: 161. 1925, *Contributions from the United States National Herbarium* 48: 19, 491-494. 2003.

Achrochloa B.D. Jacks. = *Koeleria* Pers.

From the Greek *a* “absence, lacking,” *chroa* “color, to color” and *chloe, chloa* “grass.”

Pooideae, Poeae, Aveninae, see Christiaan Hendrik Persoon (1761/1762-1836), *Synopsis Plantarum, seu enchiridium botanicum complectens enumerationem systematicam specierum hucusque cognitorum ...* 1: 97. Parisiis lutetiorum [Paris] 1805-1807.

Achroostachys Benth. = *Athroostachys*
Benth.

Greek *a* “absence, lacking,” *chroa* “color, to color” and *stachys* “a spike,” or simply referring to *Athroostachys*.

Bambusoideae, Bambuseae, Arthrostylidiinae, see *Genera Plantarum* 3: 1208-1209. 1883 and *Contributions from the United States National Herbarium* 39: 25. 2000.

Achyrodes Boehm. = *Lamarckia* Moench

From the Greek *achyron* “chaff, husk.”

Pooideae, Poeae, Dactylidinae, type *Achyrodes aureum* (L.) Kuntze, see *Species Plantarum* 1: 73. 1753, *Definitiones Generum Plantarum* 420. 1760, *Methodus Plantas Horti Botanici ...* 201. 1794, *Descr. Gram.* 376. 1812, *Revisio Generum Plantarum* 2: 758. 1891 and *Contributions from the United States National Herbarium* 48: 420-421. 2003.

Aciachne Benth.

From the Greek *ake, akis, akidos* “a point” and *achne* “chaff, glume.”

About 1-3 species, Venezuela to Peru, high Andes, northern Argentina, Costa Rica. Stipoideae, Stipeae, or Pooideae, Stipeae, Stipinae, perennial, xerophytic, low, tufted, dense mat-forming or cushions, herbaceous, unbranched, wiry, auricles absent, sheaths overlapping, ligule an unfringed membrane, stiff narrow leaves with spiny tips, fibrous roots, plants bisexual, panicle reduced, spikelets pedicellate, 2 glumes more or less equal, lower glume 3- to 5-nerved, upper glume 5-nerved, lemma coriaceous, palea coriaceous, 3 free lodicules, 3 stamens, ovary glabrous, 2 stigmas, cleistogamous or chasmogamous, ground cover, rocky slopes, open habitats, disturbed sites, montane grassland, marshy ground, páramos, puna vegetation, type *Aciachne pulvinata* Benth., see *Hooker's Icones Plantarum* 14: 44-45, pl. 1362. 1881 and *Contributions from the United States National Herbarium* 24(8): 291-556. 1927, *Field Museum of Natural History, Botanical Series* 13(1/1): 96-261. 1936, *Contributions from the Gray Herbarium of Harvard University* 184: 1-223. 1958, *Boletín de la Sociedad Argentina de Botánica*

12: 268-283. 1968, *Taxon* 29: 645-666. 1980, *Nordic Journal of Botany* 7(6): 662-672. 1987, *Flora Mesoamericana* 6: 245. 1994, *Contributions from the United States National Herbarium* 48: 19. 2003.

Species

A. acicularis Laegaard (*Acicarpa uniflora* Baill.)

Bolivia, Peru. Prickly, leaves narrow and sharp, see *Bulletin Mensuel de la Société Linnéenne de Paris* 12: 1073. 1893 and *Nordic Journal of Botany* 7(6): 669. 1987.

in Peru: paku

A. flagellifera Laegaard

Ecuador. Tufted, leaves sharp pointed, see *Nordic Journal of Botany* 7(6): 669. 1987.

A. pulvinata Benth. (*Agrostis delicatula* Steud. ex Lechler)

Bolivia, Ecuador, Colombia. See *Berberides Americae Australis* 56. 1857, *Hooker's Icones Plantarum* 14: 44-45, t. 1362. 1881 and *Nord. J. Bot.* 7(6): 667. 1987.

Acicarpa Raddi = *Acicarpa* (Calyceraceae), *Digitaria* Haller, *Trichachne* Nees

From the Greek *ake*, *akis*, *akidos* "a point" and *karpos* "fruit."

Panicoideae, Paniceae, Digitariinae, type *Acicarpa sacchariflora* Raddi, see *Historia Stirpium Indigenarum Helvetiae Inchoata* 2: 244. 1768, *Flora Carniolica, Editio Secunda* 1: 52. 1771, *Annales du muséum national d'histoire naturelle* 2: 347, t. 58. 1803, *Agrostografia Brasiliensis sive enumeratio plantarum ad familias naturales graminum et ciperoidarum spectantium, quas in Brasilia ... Lucca* [1823], *Agrostologia Brasiliensis* 2: 85, 87. 1829 [or *Flora Brasiliensis seu Enumeratio Plantarum in Brasilia ... Stuttgartiae et Tubingae 1829-1833*] and *Monograph of the Genus Digitaria* 573, 851, 866. 1950, *Contributions from the United States National Herbarium* 46: 13, 193-213, 622-623. 2003.

Acidosasa C.D. Chu & C.S. Chao = *Acidosasa* C.D. Chu & C.S. Chao ex Keng f., *Metasasa* W.T. Lin

From the Greek *akidos*, *akis* "a point" plus *Sasa*, or from the Latin *acidum* (sour) and *Sasa* (another bamboo genus), referring to the sour edible shoots.

A genus of about one/(six-)eight/22 species, southern China, Guangdong, Hunan, Yunnan, Jiangxi, Fujian, Vietnam. Bambusoideae, Bambusodae, Bambuseae, perennial, monopodial, unarmed, diffuse, shrubby, erect, hollow and cylindrical, woody, 3-5 branches at each node, rhizomes leptomorph, running underground stems, culm sheaths

deciduous, leaves variable in size, plants bisexual, inflorescence a panicle or a raceme, spikelets several-many-flowered and pedicellate, the flowering culms leafy, glumes 2-4 or several, lemmas acuminate or shortly awned, paleas 2-keeled, 3 lodicules, 6 stamens, 3 feathery stigmas, edible young shoots, the young shoots are preserved by local people as a vegetable, in evergreen broad-leaved forest, type *Acidosasa chinensis* C.D. Chu & C.S. Chao (*Acidosasa chinensis* C.D. Chu & C.S. Chao ex Keng f.), see *Journal of Nanjing Technological College of Forest Products* 1979: 142. 1979, *Journal of Bamboo Research* 1(2): 31-33. 1981[1982], *Acta Phytotaxonomica Sinica* 26(2): 145-146, f. 1. 1988, Chao Chi-Son & S.A. Renvoize, "A revision of the species described under *Arundinaria* (Gramineae) in southeast Asia and Africa." *Kew Bulletin* 44(2): 349-367. 1989, *Acta Phytotaxonomica Sinica* 29(6): 517-524. 1991, *A Compendium of Chinese Bamboo* 197-198. 1994, *Taxon* 46(1): 105-107. 1997, *The Flora of China* 5: 61-81. 1997.

Species

A. sp.

in China: suanzhu shu

A. bilamina W.T. Lin & Z.M. Wu

China. See *J. South China Agr. Univ.* 14(3): 113, f. 5. 1993.

A. breviclavata W.T. Lin

China. See *Journal of Bamboo Research* 5(2): 22-27, f. 1-3. 1986.

A. brilletii (A. Camus) C.S. Chao & Renvoize (*Arundinaria brilletii* A. Camus)

Vietnam. See *Bulletin de la Société Botanique de France* 74: 620. 1927 [1928], *Kew Bulletin* 44(2): 351. 1989.

in Vietnam: tre trung, tre tien

A. chienouensis (T.H. Wen) C.S. Chao & T.H. Wen (*Acidosasa glauca* B.M. Yang; *Indosasa chienouensis* T.H. Wen)

China. Hunan. Young culms glaucous or green, glabrous, nodes prominent, pruinose below nodes, sheath caducous, sheath blade narrow-triangular to lanceolate, leaves lanceolate, auricles falciform, sheath ligule ciliate, inflorescence racemose and terminal, 2-5 spikelets, glabrous glumes, lemma acuminate, palea rounded, see *Journal of Bamboo Research* 2(1): 67, f. 19. 1983, *Acta Phytotaxonomica Sinica* 22(1): 85-86, f. 1. 1984, *Journal of Bamboo Research* 7(1): 31. 1988, *Acta Phytotaxonomica Sinica* 29(6): 522. 1991.

in China: jan-ou suanzhu, jan'ou suanzhu, chien-ou suanzhu

A. chinensis C.D. Chu & C.S. Chao (*Acidosasa chinensis* C.D. Chu & C.S. Chao ex Keng f.)

China, Guangdong. Young culms pubescent, culms green and narrow-striate, nodes prominent, 3 branches on each node, culm sheaths crisp and acuminate, sheaths auricles

absent, sheath ligule short and ciliate, 2-5 leaves on each twig, simple raceme or panicle, flowering branchlets terminal, usually 4 glumes, shoots edible, used for papermaking and weaving, in open areas, mountains, see *Journal of Nanjing Technological College of Forest Products* 1979: 142, t. 1. 1979, *Journal of Bamboo Research* 1: 31. 1982, *Acta Phytotaxonomica Sinica* 29(6): 520, f. 1. 1991, *Taxon* 46(1): 105-107. 1997.

in China: suanzhu

A. dayongensis T.P. Yi

China, Jiangxi. Culm green, glabrous, 3 branches on each node, sheath auricles narrow and sickle-shaped, sheath ligule ciliate, sheath blade purplish lanceolate, leaves broad-lanceolate to lanceolate, cultivated, shoot edible, see *Journal Nanjing University, Natural Sciences Edition* 1981: 98. 1981, *Acta Phytotaxonomica Sinica* 21(1): 94-96, pl. 1. 1983, *Bulletin of Botanical Research* 6(4): 25-26, f. 1. 1986, *Journal of Wuhan Botanical Research* 4(4): 335. 1986, *Acta Phytotaxonomica Sinica* 29(6): 524, f. 4. 1991.

in China: Dayong suanzhu

A. edulis (T.H. Wen) T.H. Wen (*Sinobambusa edulis* Wen)

China. Young culms not glaucous or only below nodes, shoots eaten as a vegetable, see *Journal of Bamboo Research* 3(2): 30, f. 6. 1984, *Journal of Bamboo Research* 7(1): 31. 1988.

in China: Huang tian zhu

A. fujianensis C.S. Chao & H.Y. Zou

China. See *J. Nanjing Inst. Forestry* 88, f. 1. 1984.

in China: Fujian suanzhu

A. gigantea (Wen) Q.Z. Xie & W.Y. Zhang (*Indosasa gigantea* (Wen) Wen; *Sinobambusa gigantea* Wen)

China, Fujian. Erect, straight, young culm pinkish green, pruinose, 3 branches on each node, sheath coriaceous, golden yellow to reddish brown, sheath auricles ovate or falciform, leaves long lanceolate, cultivated, ornamental, used as timber, see *Journal of Bamboo Research* 2(1): 57, f. 10. 1983, *Journal of Bamboo Research* 10(1): 22. 1991, *Bulletin of Botanical Research* 13(1): 74. 1993.

A. glauca B.M. Yang

China. See *Acta Phytotaxonomica Sinica* 22(1): 85, pl. 1. 1984.

in China: Fen suanzhu

A. gracilis W.T. Lin & X.B. Ye

China. Young culms pubescent, see *Acta Phytotaxonomica Sinica* 26(2): 149, f. 4. 1988.

in China: Xiao suanzhu

A. guangxiensis Q.H. Dai & C.F. Huang ex Ohrnb.

China. See *Journal of Bamboo Research* 5(3): 64-66, f. 1. 1986.

in China: Guangxi suanzhu

A. heterolodicula (W.T. Lin & Z.J. Feng) W.T. Lin (*Oligostachyum heterolodiculum* W.T. Lin & Z.J. Feng)

China. See *Bulletin of Botanical Research* 12(4): 352. 1992, *Guihaia* 10(1): 16, f. 2. 1996.

A. hirtiflora Wang & G.H. Ye (*Acidosasa dayongensis* T.P. Yi; *Acidosasa hirtiflora* Z.P. Wang & G.H. Ye ex C.S. Chao & C.D. Chu; *Acidosasa purpurea* (J.R. Xue & T.P. Yi) Keng f.; *Indosasa purpurea* J.R. Xue & T.P. Yi)

China, Guangxi. Young culms glabrous or sparsely pubescent, culm sheaths densely setose, no sheath auricles and cilia, sheath ligule arcuate, glume and lemma densely hairy, shoot edible, see *Journal Nanjing University, Natural Sciences Edition* 1981: 98. 1981, *Acta Phytotaxonomica Sinica* 21(1): 94-96, pl. 1. 1983, *Bulletin of Botanical Research* 6(4): 25-26, f. 1. 1986, *Journal of Wuhan Botanical Research* 4(4): 335. 1986, *Acta Phytotaxonomica Sinica* 29(6): 524, f. 4. 1991.

A. lentiginosa W.T. Lin & Z.J. Feng

China. See *Journal of Bamboo Research* 12(2): 37, t. 3. 1993.

A. lingchuanensis (C.D. Chu & C.S. Chao) Q.Z. Xie & X.Y. Chen (*Indosasa lingchuanensis* (C.D. Chu & C.S. Chao) Q.Z. Xie & X.Y. Chen; *Indosasa lingchuanensis* (C.D. Chu & C.S. Chao)

China, Lingchuan, Guangxi. Young culm sparsely silky, shoot reddish or greenish, auricles falciform, ligule truncate or convex, sheath blade light green broadly lanceolate, used for fencing, edible shoots, growing along riverbanks, moist ground, along streams, see *Acta Phytotaxonomica Sinica* 21(1): 69-71, pl. 4. 1983, *Bulletin of Botanical Research* 13(1): 74, f. 1-2. 1993, *Acta Phytotaxonomica Sinica* 37(6): 541-544. 1999.

A. longiligula (T.H. Wen) C.S. Chao & C.D. Chu (*Acidosasa fujianensis* C.S. Chao & H.Y. Zou; *Indosasa longiligula* T.H. Wen)

Asia, China. Young culms glaucous, see *Journal of Bamboo Research* 2(1): 68, t. 20. 1983, *J. Nanjing Inst. Forest.* 1984(3): 88, f. 1. 1984, *Acta Phytotaxonomica Sinica* 29(6): 524, f. 5. 1991, *Fl. Reipubl. Pop. Sin.* 9(1): 568, pl. 172, f. 6-7. 1996.

A. longiligula (T.H. Wen) C.S. Chao & C.D. Chu var. **amara** (Wen) Ohrnb. (*Indosasa longiligula* var. *amara* Wen)

China. Bitter shoots, see *Journal of Bamboo Research* 2(1): 70. 1983.

A. macula W.T. Lin & Z.M. Wu

China. See *Journal of Bamboo Research* 11(1): 36, t. 6. 1992.

A. notata (Wang & X.B. Ye) S.S. You (*Acidosasa fujianensis* C.S. Chao & H.Y. Zou; *Acidosasa longiligula*

(T.H. Wen) C.S. Chao & C.D. Chu; *Arundinaria concava* C.D. Chu & H.Y. Zou; *Arundinaria notata* (Z.P. Wang & G.H. Ye) Q.H. Dai; *Arundinaria notata* (Z.P. Wang & G.H. Ye) H.Y. Zou; *Arundinaria notata* (Z.P. Wang & G.H. Ye) H.Y. Zuo ex C.S. Chao & G.Y. Yang; *Indosasa longiligulata* T.H. Wen; *Indosasa pusilloaurita* W.T. Lin; *Pleioblastus intermedius* S.Y. Chen; *Pleioblastus maculosoides* T.H. Wen; *Pseudosasa longiligulata* T.H. Wen; *Pseudosasa notata* Z.P. Wang & G.H. Ye; *Pseudosasa wuyiensis* S.L. Chen & G.Y. Sheng).

China, Fujian. Young culm pruinose, nodes weakly prominent, 3 branches at each node, small sheath auricles densely pubescent, sometimes sheath auricles absent, sheath ligule arcuate, raceme terminal or lateral, glabrous glumes, lemmas and palea pubescent, shoots edible, culms used to make containers or instruments, see *Journal Nanjing University, Natural Sciences* 1981(1): 97, f. 4. 1981, *J. Bamboo Res.* 1(1): 27. 1982, *Journal of Bamboo Research* 2(1): 68, t. 20. 1983, *Acta Phytotax. Sin.* 21(4): 408. 1983, *J. Nanjing Inst. Acostia Swallen

Dedicated to the Ecuadorian botanist Misael Acosta Solis, 1910-1994, professor of botany, plant collector, author of *Glumifloras del Ecuador*: Catálogo fitogeográfico de las Gramíneas, Ciperáceas y Juncáceas. Quito 1969 [Flora (Ecuador), nos. 13(47-50): 1-216], *Las Fibras y lanas vegetales en el Ecuador*. (Inst. Ecuat. Cienc. Nat., Contrib., no. 21) Bol. Inform. Cient. Nac., no. 48, 1952, "Los pastizales naturales del Ecuador: Conservación y aprovechamiento de los páramos y sabanas." *Revista Geogr.* (Rio de Janeiro) 53: 87-99. 1960, "Plantas indígenas para forrajicultura tropandina." *Revista Acad. Colomb. Ci. Exact.* 15(56): 57-97. 1980. See J.H. Barnhart, *Biographical notes upon botanists*. 1: 10. 1965; R.B. Miller, *Taxon* 34: 178. 1985.

One species, Ecuador. Panicoideae, Panicodae, Paniceae, or Panicoideae, Paniceae, Paspalinae, perennial, herbaceous, slender, densely tufted, leaf sheaths keeled, ligule a fringed membrane, inflorescence spicate, spikelets solitary and paired, glumes one per spikelet, lower glume absent or vestigial, upper glume densely hairy, palea present, growing along rivers and stream banks, sometimes referred to *Digitaria* or *Panicum*, type *Acostia gracilis* Swallen, see *Prodromus Florae Novae Hollandiae* 190. 1810 and *Boletín de la Sociedad Argentina de Botánica* 12: 109. 1968, *Sida* 13(4): 396. 1989, *Contributions from the United States National Herbarium* 46: 13. 2003.

Species

A. gracilis Swallen (*Panicum acostia* R.D. Webster; *Panicum gracile* R. Br.)

Ecuador.

Acrachne Wight & Arn. ex Chiov. =
Acrachne Chiov., *Arthrochloa* J.W. Lorch,
Arthrochloa R. Br., *Camusia* Lorch,
Normanboria Butzin

Greek *akros* “the summit, terminal, highest, at the top” and *achne* “chaff, glume, scale,” referring to the terminal glume and lemmas.

Three species, Old World tropics, Africa, Southeast Asia, Australia, China. Chloridoideae, Cynodonteae, or Chloridoideae, Eragrostideae, Eleusininae, annual, mesophytic, herbaceous, tufted, auricles absent, ligule membranous with a ciliate fringe, flat leaf blades, plants bisexual, cleistogamous or chasmogamous, inflorescence spicate digitate or subdigitate or whorled, bisexual solitary spikelets, 6-20 florets, terminal spikelet suppressed or abortive, upper florets reduced, 2 glumes unequal or subequal, upper glume awned and acuminate, lemmas strongly keeled and membranous, palea present, 2 lodicules free and fleshy, 3 stamens, ovary glabrous, 2 stigmas, shade and open habitats, sandy areas, among rocks, seacoast, savannah, closely related to *Eleusine* and *Dactyloctenium*, type *Acrachne verticillata* (Roxb.) Wight & Arn. ex Chiov., see *Chloris Melvilliana* 35. 1823, *Nomenclator Botanicus* edition 2 1: 21. 1840 and *Annuario Reale Ist. Bot. Roma* 8(3): 361-362. 1908, *Bulletin de la Société Botanique de France* 75: 913. 1928, *Blumea* 3: 164-167. 1938, *Atti della reale accademia d'Italia. Memorie della classe di scienze fisiche, matematiche e naturali* 11(2): 65. 1940, *Blumea, Supplement* 3: 44. 1946, *Journal of the Indian Botanical Society* 39: 490. 1960, *Grasses of Burma ...* 487. 1960, *Bulletin of the Research Council of Israel, Section D, Botany* 9: 155. 1961, *Taxon* 27(2-3): 301. 1978, *Kew Bulletin* 37(1): 158-159. 1982, *Grasses S. Queensland* 78-79. 1983, *Journal of Cytology and Genetics* 25: 322-323. 1990, Qing Liu, Nan-Xian Zhao, Gang Hao, Xiao-Ying Hu and Yun-Xiao Liu, “Caryopsis morphology of the Chloridoideae (Gramineae) and its systematic implications.” *Botanical Journal of the Linnean Society* 148(1): 57-72. May 2005.

Species

A. henrardiana (Bor) S.M. Phillips (*Arthrochloa henrardiana* (Bor) J.W. Lorch; *Dactyloctenium henrardianum* Bor)

India, Tamil Nadu. See *Enumeratio Plantarum Horti Botanici Berolinensis, ...* 2: 1029. 1809 and *Blumea, Supplement* 3: 44. 1946, *Journal of the Indian Botanical Society* 39(3): 490, f. 1-5. 1960, *Kew Bulletin* 37(1): 158. 1982.

A. racemosa (B. Heyne ex Roem. & Schult.) Ohwi (*Acrachne racemosa* (Roem. & Schult.) Ohwi; *Acrachne racemosa* (B. Heyne) Ohwi; *Acrachne verticillata* (Roxb.) Lindl. ex Chiov.; *Acrachne verticillata* Roxb.; *Acrachne verticillata* (Roxb.) Chiov.; *Acrachne verticillata* (Roxb.) B.D. Jacks.;

Acrachne verticillata (Roxb.) Wight & Arn. ex Chiov.; *Eleusine racemosa* Heyne ex Roem. & Schult.; *Eleusine verticillata* Roxb.; *Leptochloa racemosa* (B. Heyne ex Roem. & Schult.) Kunth; *Leptochloa schimperiana* Hochst.; *Leptochloa verticillata* (Roxb.) Kunth; *Sclerodactylon micrandrum* P. C. Keng & L. Liou) (for G.W.H. Schimper)

Africa, Arabia, China, Hainan, Yunnan. Annual, tufted, herbaceous, smooth, erect or geniculately ascending, sparsely branched or simple, ligule a fringed membrane, leaf blades tapering to a tip, slender ascending inflorescence, spike-like racemes whorled, glumes unequal, lanceolate upper glume shortly awned and acuminate, narrowly oblong lower glume acute and mucronate, lemmas tipped with a stout short awn-point, a good fodder grass for cattle, low grazing value, a weed of cultivation, shade-loving, occurs in moist places, field margins, waste ground, ruderal, sandy soils, disturbed places, in gravelly wadi beds, riverbanks, see *Hortus Bengalensis, or a catalogue ...* 8. 1814, *Systema Vegetabilium* 2: 583. 1817, *Flora Indica; or Descriptions ...* 1: 346. 1820, *Nov. Pl. Sp.* 80. 1821, *Révision des Graminées* 1: 91. 1829, *Flora* 38: 203. 1855, *Index Kewensis* 1: 32. 1895 and *Handbook Fl. Ceylon* 5: 277. 1900, *Annuario del Reale Istituto Botanico di Roma* 8(3): 361-362. 1908, *Bulletin of the Tokyo Science Museum* 18: 1. 1947, *Grasses of Ceylon* 81. 1956, *Ceylon Journal of Science, Biological Sciences* 2(2): 125. Colombo 1959.

in Niger: najim, sabagha

in Somalia: dhamba, dhalad

in India: chhinke, jharna, kaadu kapai, kangsi, kuri chinke
 in Thailand: ya tin ka, ya tin mue kak, ya tin mue tuttu, ya yon hu, yaa teenkaa, yaa teenmue tuttuu, yaa yonhuu

A. sundararajii Umamaheswari, Muthukumar & P. Daniel
 India, Tamil Nadu. See *Kew Bulletin* 52(4): 1007, f. 1. 1997.

Acratherum Link = *Arundinella* Raddi

From the Greek *akros* “the summit, highest, at the top” and *ather* “stalk, barb.”

Panicoideae, Arundinelleae, type *Acratherum miliaceum* Link, see *Agrostografia Brasiliensis* 36-37, t. 1, f. 3. 1823, *Hortus Regius Botanicus Berolinensis* 1: 230. 1827, *Hooker's Journal of Botany and Kew Garden Miscellany* 2: 102. 1850, *Tentamen Florae Abyssinicae ...* 2: 414. 1850, *Synopsis Plantarum Glumacearum* 1: 114. 1854, *Index Kewensis* 1: 32. 1895 and *Botanical Exchange Club of the British Isles. Report* 1916: 605. 1917, *Graminées du Cameroun* 2: 361. Wageningen: Wageningen Agricultural University Papers, 1992, *Contributions from the United States National Herbarium* 46: 111-113. 2003.

Acritochaete Pilger

Greek *akritos* “unarranged, confused, doubtful, undistinguishable” and *chaite* “a bristle.”

One species, tropical Africa, from Nigeria to East Africa, Ethiopia. Panicoideae, Panicodae, Paniceae, annual or short-lived perennial, decumbent, trailing, straggling, montane, herbaceous, branched, auricles absent, ligule an unfringed membrane, plants bisexual, inflorescence spicate, erect and spaced racemes, spikelets pedicellate and solitary, 2 glumes very unequal, long awns filiform and flexuous, palea present, 2 free and fleshy lodicules, 3 stamens, ovary glabrous, 2 stigmas, shade species, upland forest, see *Flore d'Oware* 2: 14. 1807 [1810] and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 32: 53-54. 1902, *Repertorium Specierum Novarum Regni Vegetabilis, Beihefte* 40(1,A): 222. 1931, *American Journal of Botany* 52(8): 864-869. 1965, *Flora of Tropical East Africa Gramineae* (part 3). 451-898. Rotterdam 1982.

Species

A. volkensis Pilger (*Oplismenus volkensis* (Pilg.) Mez ex Peter) (for Georg Ludwig August Volkens, 1855-1917)

Africa. Annual, weak, trailing, stoloniferous, rooting at the nodes, lower glume very small, upper lemma acuminate, low grazing value, grazed by stock.

Acroceras Stapf = *Commelinidium* Stapf, *Neohusnotia* A. Camus

From the Greek *akros* “the summit, terminal, extremity” and *keras* “horn,” referring to the terminal glume or to the thickened crested lemmas.

Some 15/19 species, Old World tropics, Africa, Madagascar, Indomalayan region. Panicoideae, Panicodae, Paniceae, Setariinae, or Panicoideae, Paniceae, Panicinae, perennial or annual, herbaceous, slender, nonwoody, semiaquatic, branched, coarse, tufted, rhizomatous or stoloniferous, usually with long prostrate base, trailing, sprawling, creeping or decumbent-based culms, leaning, often rooting at the lower nodes, culms leafy, auricles absent, narrow membranous ligule, leaves lanceolate to linear-lanceolate to ovate-lanceolate, plants bisexual, inflorescence paniculate, loose racemes, bisexual paired spikelets, 2 florets, lower floret sterile or male, upper floret bisexual or perfect, 2 very unequal glumes keeled with keel apex crested, upper glume and lower lemma thickened and flattened, green crest at the tip of the upper lemma, 2 fleshy and free lodicules, 3 stamens, ovary glabrous, 2 stigmas, sometimes forming floating mats, shade and open habitats, near running fresh water, understory, damp places, shallow water, marshy ground, forests, stream and lake margins, resembling *Lasiacis*, type *Acroceras oryzoides* Stapf, see *North American Flora* 3(2):

200, 210. 1915, *Flora of Tropical Africa* 9: 621-622, 627. 1920, *Bulletin du Muséum National d'Histoire Naturelle (Paris)* 26(7): 664. 1921 [1920], *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 11(104): 240. 1931, *Heredity; An International Journal of Genetics* 3: 369-374. 1949, *Bull. Soc. Bot. Aliscioni, Liliana M. Giussani, Fernando O. Zuloaga and Elizabeth A. Kellogg, “A molecular phylogeny of *Panicum* (Poaceae: Paniceae): tests of monophyly and phylogenetic placement within the Panicoideae.” *Am. J. Bot.* 90: 796-821. 2003, *Contributions from the United States National Herbarium* 46: 13-14. 2003.

Species

A. amplexans Stapf (*Acroceras basicladum* Stapf; *Neohusnotia amplexans* (Stapf) C.C. Hsu; *Panicum amplexans* (Stapf) Pilg., nom. illeg., non *Panicum amplexans* Chapm.)

Senegal, Ghana, Nigeria, Sudan, Upper Nile, Tanzania, Uganda. Annual, decumbent, scrambling, straggling, weak, linear-lanceolate leaf blades, economic plant, useful grass, sometimes floating, forage, hay, good fodder, high grazing value weakly stemmed, a serious pest of cultivation, a weed of rice paddies and hill rice, marshes, shallow water, wet areas, similar to *Acroceras zizanioides* (Kunth) Dandy, see *Botanical Gazette* 3(3): 20. 1878 and *Flora of Tropical Africa* 9: 625-626. 1920, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 11(104): 241. 1931, *Journ. Fac. Sci. Univ. Tokyo, Sect. 3* 9: 94. 1965.

in Gambia: jajeo, njaro, nyaro

in Guinea Bissau: labar, lábar

in Mali: diivoonu, haratébé, kitibué, mbu niari, mbuniari, soko, sogo, soko

in Nigeria: geeron tsuntssayee

in Sierra Leone: babarawo, karinkasui, kobolo, mbowi, pisui, sunyugi, yuwi

in Upper Volta: bugau, komudo

A. attenuatum Renvoize

Tanzania. Annual, slender, decumbent, branched, mat-forming, rooting at the lower nodes, inflorescence paniculate, poorly branched oblong panicle, spikelets ovate-oblong, in forest shade, see *Kew Bulletin* 34(3): 556. 1979 [1980].

A. chaseae Zuloaga & Morrone (*Panicum planopteris* Trin. ex Döll) (for Mary Agnes Chase, 1869-1963)

South America, Brazil. See *Flora Brasiliensis* 2(2): 222. 1877 and *Darwiniana* 28(1-4): 198, f. 2. 1987[1988].

A. excavatum (Henrard) Zuloaga & Morrone (*Lasiacis excavata* (Henrard) Parodi; *Panicum excavatum* Henrard)

South America, Paraguay. Perennial, rigid, stoloniferous, open panicle, spreading pedicels, palatable, in forest openings, in semideciduous forest, see *Contributions from the United States National Herbarium* 15: 16. 1910, *Repertorium Specierum Novarum Regni Vegetabilis* 23: 179. 1926, *Notas del Museo de la Plata, Botánica* 8: 92. 1943, *Darwiniana* 28(1-4): 195. 1987 [1988].

in Bolivia: taquarilla

A. fluminense (Hack.) Zuloaga & Morrone (*Agenium villosum* (Nees) Pilg.; *Panicum fluminense* Hack.)

South America, Brazil. Ascending, see *Flora Brasiliensis seu Enumeratio Plantarum* 2: 362-363. 1829, *A Natural System of Botany* 447. 1836 and *Österreichische Botanische Zeitschrift* 51: 457. 1901, *Repertorium Specierum Novarum Regni Vegetabilis* 43: 82. 1938, *Darwiniana* 28(1-4): 197. 1987[1988].

A. gabunense (Hack.) Clayton (*Commelinidium gabunense* (Hack.) Stapf; *Commelinidium mayumbense* (Franchet) Stapf; *Commelinidium nervosum* Stapf; *Echinochloa nervosa* (Stapf) Roberty; *Panicum gabunense* Hack.; *Panicum hensii* K. Schum.; *Panicum mayumbense* Franch.)

Africa, Gabon, Tanzania. Perennial, scrambling, prostrate at the base, rooting at the lower nodes, leaf blades ovate, fodder, found in forest shade, see *Essai d'une Nouvelle Agrostographie* 52, 53, t. 11, f. 1. 1812, *Verhandlungen des Botanischen Vereins für die Provinz Brandenburg und die angrenzenden Länder* 31: 70. 1889, *Bulletin de la Société d'Histoire Naturelle d'Autun* 8: 343. 1895, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 24(3): 332. 1897 and *Flora of Tropical Africa* 9: 627-629. 1920, *Petite Flore de l'Ouest-Africain* 398. 1954, *Bull. Inst. Franç. Afrique Noire Sér. A*, 17: 64. 1955, *Kew Bulletin* 34(3): 557. 1979 [1980].

in Sierra Leone: ngale

A. macrum Stapf (*Neohusnotia macra* (Stapf) C.C. Hsu; *Panicum gimmae* Fiori)

Northeastern and southern tropical Africa, Transvaal, Tanzania, Namibia, Mozambique. Perennial, tufted and simple, slender, geniculate and sometimes prostrate, rooting at the lower nodes, with creeping rhizomes, leaf sheath papery

when dry, ligule a ring of short hairs, leaf blades linear and acuminate, racemes erect and arranged singly on the primary axis, spikelets awnless and glabrous, spikelets single or in pairs, lower lemma male, little drought tolerance, useful grass, used for silage, makes good hay, very palatable, high grazing value, native pasture grass, forage, cultivated fodder, tolerates seasonal flooding, occurs in riversides, lake margins, shallow water, sand to black clay soils, seasonally flooded damp grassland, marshy grassland, damp places, vleis, swamps, see *Flora of Tropical Africa* 9: 624. 1920, *Agricoltura Coloniale* 35: 56, 62. 1941, *Journal of the Faculty of Science: University of Tokyo, Botany* 9: 94. 1965.

in English: Nile grass

in Southern Africa: Nylgras

A. munroanum (Balansa) Henrard (*Acroceras crassiapiculatum* (Merr.) Alston; *Acroceras ridleyi* (Hack. ex Ridl.) Stapf; *Brachiaria crassiapiculatum* (Merr.) Hitchc. ex Groff, Ding & Groff; *Panicum crassiapiculatum* Merr.; *Panicum latifolium* L.f., nom. illeg., non *Panicum latifolium* L.; *Panicum munroanum* Bal.; *Panicum ridleyi* Hack. ex Ridl.)

Eastern India, Sri Lanka, Malaya, Malaysia, Myanmar (Burma). Perennial, slender and creeping culms with erect tips, rooting at the nodes, ligule membranous, spikelets short-pedicelled, moist habitats, marshes, rice fields, see *Journal de Botanique (Morot)* 4(7): 140. 1890, *Trans. Linn. Soc. London, Bot.* 3: 400. 1893, *The Flora of British India* 7(21): 39. 1896[1897] and *Botanisk Tidsskrift* 24: 98. 1901, *Philippine Journal of Science* 1(Suppl. 5): 356. 1906, George Weidman Groff (1884-1954), *Lingnaam Agricultural Review* 1: 48. 1923 [An Enumeration of the McClure collection of Hainan plants. 1923-1924], *The Flora of the Malay Peninsula* 5: 229. 1925, *A Handbook to the Flora of Ceylon*, Suppl. 6: 324. 1931, *Blumea* 3(3): 444-445. 1940, *Grasses of Ceylon* 125. 1956.

in Thailand: ya bai phai, yaa bai phai

A. ridleyi (Hack. ex Ridl.) Stapf (*Panicum ridleyi* Hack. ex Ridl.)

Malay Penins. See *Trans. Linn. Soc. London, Bot.* 3: 400. 1893 and *Botanisk Tidsskrift* 24: 98. 1901, *The Flora of the Malay Peninsula* 5: 229. 1925.

A. tonkinense (Balansa) C.E. Hubb. ex Bor (*Acroceras tonkinense* (Balansa) Henrard, nom. illeg., non *Acroceras tonkinense* (Balansa) C.E. Hubb. ex Bor; *Neohusnotia tonkinensis* (Balansa) A. Camus; *Panicum latifolium* var. *majus* Hook.f.; *Panicum tonkinense* Balansa)

Vietnam. See *Species Plantarum* 1: 58-59. 1753, *Journal de Botanique (Morot)* 4(7): 140. 1890, *The Flora of British India* 7(21): 39. 1897 [1896] and *Bulletin du Muséum National d'Histoire Naturelle* 26(7): 664. 1921, *Indian Forest Records: Botany* 1: 3, 78. 1939, *Blumea* 3(3): 451. 1940.

A. zizanioides (Kunth) Dandy (*Acroceras oryzoides* Stapf; *Astragalus schimperi* Boiss.; *Astragalus schimperi* var. *aradensis* Zohary; *Echinochloa zizanioides* (Kunth) Roberty; *Panicum balbisanum* Schult.; *Panicum grandiflorum* Trin. ex Nees; *Panicum latifolium* L.f., nom. illeg., non *Panicum latifolium* L.; *Panicum lutetens* K. Schum.; *Panicum melicoides* Poir.; *Panicum ogowense* Franch.; *Panicum oryzoides* Sw., nom. illeg., non *Panicum oryzoides* Ard.; *Panicum pseudoryzoides* Steud.; *Panicum zizanioides* Kunth; *Panicum zizanioides* var. *microphyllum* Döll) (Zaire, Lutete)

Tropical Africa, southern Mexico to northern Argentina, India. Perennial, rhizomatous, weed species, prostrate, scrambling, decumbent and rooting at the lower nodes, leaves lanceolate and acuminate, racemes divergent and spaced, spikelets narrow-oblong, lower lemma sterile, useful grass, good forage and hay, occurs in damp places in shade, roadside ditches, swampy places, seasonally inundated savannahs, in shallow water, see *Animadversionum Botanicarum Specimen Alterum* 2: 16, t. 5. 1764, *Nova Genera et Species Plantarum seu Prodrum* 23. 1788, *Nova Genera et Species Plantarum* 1: 82. 1815 [1816], *Encyclopédie Méthodique, Botanique* Suppl. 4: 283. 1816, *Mantissa* 2: 254. 1824, *Agrostologia Brasiliensis* 2(1): 143. 1829 [or *Flora Brasiliensis seu Enumeratio Plantarum in Brasilia ... Acrochaete Peter = *Acrochaete* N. Pringsheim (Algae), *Setaria* P. Beauv.

From the Greek *akros* “the summit, terminal, highest, top-most” and *chaite* “bristle, mane.”

Panicoideae, Paniceae, Setariinae, type *Acrochaete pseudaristata* Peter, see *Essai d'une Nouvelle Agrostographie* 51, 178. 1812, Nathanael Pringsheim (1823-1894), *Beiträge zur Morphologie des Meeres-Algen ...* Berlin 1862 and *Contr. U.S. Natl. Herb.* 22(3): 156. 1920, *Repertorium Specierum Novarum Regni Vegetabilis, Beihefte* 40(1): 203, Anh. 54, t. 28, f. 2. 1930, *Die Natürlichen Pflanzenfamilien* edition 2 14e: 72. 1940, *Taxon* 31(3): 561. 1982, *Contributions from the United States National Herbarium* 46: 569-593. 2003.

Acroelytrum Steud. = *Lophatherum* Brongn.

From the Greek *akros* “the summit, terminal, highest” and *elytron* “a sheath, a cover,” *elyo* “to wind.”

Centothecoideae, Centothecae, see *Voyage autour du Monde* 2(2): 49-50, t. 8. 1831 [1829-30], *Flora* 29: 20-21. 1846 and *Bulletin of the Nanjing Botanical Garden, Mem. Sun Yat Sen* 1988-1989: 14-20. 1988-1989, *Investigatio et Studium Naturae* 12: 48-65. 1992.

Acrospelion Besser ex Schult. & Schult.f. = *Acrospelion* Steud, *Trisetum* Pers., *Trisetum* (Besser ex Schult. & Schult.f.) Trin.

Greek *akros* “the summit, terminal, highest” and *spelion*, *pselion*, *psellion* “armlet, bracelet,” *pselioo* “to twine, wreath, crown.”

Pooideae, Poeae, Aveninae, see *Prospectus de l'Histoire des Plantes de Dauphiné* 2: 144. 1787, *Syn. Pl.* 1: 97. 1805, *Essai d'une Nouvelle Agrostographie* 88, 153, t. 18, f. 1. 1812, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 1(1): 59. 1830 and *U.S.D.A. Bull.* 772: 107-109. 1920, *Taxon* 36: 75. 1987, *Contributions from the United States National Herbarium* 48: 19, 659-676. 2003.

Acroxis Steud. = *Muhlenbergia* Schreb.

Chloridoideae, Cynodonteae, Muhlenbergiinae, see *Genera Plantarum* 44. 1789, *Systema Naturae ... editio decima tertia, aucta, reformata* 2: 171. 1791, *Nomenclator Botanicus. Editio secunda* 1: 22. 1840 and *Contributions from the United States National Herbarium* 41: 9, 143-173. 2001.

Actinochloa Willd. ex Roemer & Schultes
= *Actinochloa* Roem. & Schult., *Bouteloua*
Hornem. ex P. Beauv., *Bouteloua* Lag.,
Chondrosum Desv.

Greek *aktis*, *aktin* “a ray” and *chloe*, *chloa* “grass.”

Chloridoideae, Cynodonteae, Boutelouinae, see *Varietades de Ciencias, Literatura y Artes* 2(4,21): 134, 141. 1805, *Nouveau Bulletin des Sciences, publié par la Société Philomatique de Paris* 2: 188. 1810, *Essai d'une Nouvelle Agrostographie* 40. 1812, *Gen. Sp. Nov.* 5. 1816, *Systema Vegetabilium* 2: 22, 417. 1817, *A Manual of the Botany of the Northern United States. Second Edition* 553. 1856, *Genera Plantarum* 3(2): 1168. 1883, *Die Natürlichen Pflanzenfamilien* 2(2): 59. 1887 and *Annals of the Missouri Botanical Garden* 66(3): 358. 1979 [1980], *Contributions from the United States National Herbarium* 41: 9, 20-33, 52-55. 2001.

Actinochloris Steud. = *Chloris* Sw.

From the Greek *aktis*, *aktin* “a ray” plus *Chloris* Sw.

Chloridoideae, Cynodonteae, see *Nova Genera et Species Plantarum seu Prodromus* 25. 1788, *Nomenclator Botanicus. Editio secunda* 1: 352. 1840 and *Contributions from the United States National Herbarium* 41: 39-52. 2001.

Actinocladum McClure ex Soderstr. =
Actinocladum Soderstr.

From the Greek *aktis*, *aktin* “a ray” and *klados* “a branch,” referring to the branching.

One species, Bolivia, central Brazil. Bambusoideae, Bambusoideae, Bambuseae, or Bambusoideae, Bambuseae, Arthrostylidiinae, perennial, tufted, forming extensive colonies, erect, unarmed, branched, sympodial, hollow, woody and persistent, flowering culms leafy, rhizomes pachymorph, ligule a ciliate rim, leaf blades pseudopetiolate, plants bisexual, inflorescence a sparse panicle or raceme, spikelets pedicellate, 2 glumes unequal and acuminate, lemma acuminate or short-beaked, palea acute and 2-keeled, 3 free lodicules, 3 stamens, ovary hairy, 2 stigmas, achene-like caryopsis, savannah, *cerrado*, open savannah, dense scrub, *campo rupestre*, similar to *Rhipidocladum* McClure, *Aulonemia* and *Merostachys*, type *Actinocladum verticillatum* (Nees) McClure ex Soderstr., see *American Journal of Botany* 68(9): 1200-1211. 1981, *Edinburgh Journal of Botany* 48: 73-80. 1991, *Taxon* 42: 879. 1993, Emmet J. Judziewicz et al., *American Bamboos*. 148-150. Smithsonian Institution Press, Washington and London 1999, *Contributions from the United States National Herbarium*

39: 11. 2000, *Flora Fanerogamica do Estado de São Paulo* 1: i-xxv, 1-292. 2001.

Species

A. verticillatum (Nees) McClure ex Soderstr. (*Actinocladum verticillatum* (Nees) Soderstr.; *Arundinaria verticillata* Nees; *Ludolfia verticillata* (Nees) A. Dietr.; *Rhipidocladum verticillatum* (Nees) McClure)

Central Brazil. Forming dense clumps, caespitose, rhizomatous, leaves monomorphic, synflorescences paniculate, drought-tolerant and fire resistant, forage, arrows made from culm, see *Familles des Plantes* 2: 244. 1763, *Flora Boreali-Americana* 1: 73. 1803, *Flora Brasiliensis seu Enumeratio Plantarum* 2(1): 523-525. 1829 [or *Agrostologia Brasiliensis* 1829], *Species Plantarum. Editio sexta* 25. 1833 and *Smithsonian Contributions to Botany* 9: 101, 106, f. 42. 1973, *American Journal of Botany* 68(9): 1201, 1204, f. 1-39. 1981.

in Brazil: taquari, taquari mirim

Aechmophora Steud. = *Bromus* L.,
Michelaria Dumort.

From the Greek *aichme* “a point” and *phoros* “bearing, carrying.”

Pooideae, Bromaceae, see *Species Plantarum* 1: 76-78. 1753, *Observations sur les Graminées de la Flore Belgique* 77. 1823 [1824], *Nomenclator Botanicus. Editio secunda* 1: 29. 1840 and *U.S.D.A. Div. Agrostol. Bull.* 23: 1-66. 1900, *Brittonia* 7: 421. 1952, *Notes Roy. Bot. Gard. Edinburgh* 30: 366. 1970, *Bot. Jahrb. Syst.* 102: 447. 1981, *Taxon* 41: 559. 1992, *Taxon* 44: 611-612. 1995, *Contributions from the United States National Herbarium* 48: 20, 154-191. 2003.

Aegialina Schult. & Schult.f. = *Aegialina*
Schult., *Aegialitis* Trin., *Rostraria* Trin.

Greek *aigialos* “seashore,” *aiges* “waves.”

Pooideae, Poaceae, Aveninae, type *Aegialina tenuis* (Trin.) Schult., see *Syn. Pl.* 1: 97. 1805, *Fundamenta Agrostographiae* 127, 149, t. 9, 13. 1820, *Mantissa* 2: 13, 222. 1824, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 1(1): 65. 1830 and *Zlaki SSSR* 267. 1976, *Contributions from the United States National Herbarium* 48: 20, 604. 2003.

Aegialitis Trin. = *Aegialitis* R. Br.
(Plumbaginaceae), *Rostraria* Trin.

Greek *aigialos* “seashore,” *aiges* “waves.”

Pooideae, Poeae, Aveninae, type *Aegialitis tenuis* Trin., see *Prodrum Florae Novae Hollandiae* 426. 1810, *Fundamenta Agrostographiae* 127, t. 9. 1820, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 1(1): 65. 1830 and *Contributions from the United States National Herbarium* 48: 20, 604. 2003.

Aegicon Adans. = *Aegilops* L.

Pooideae, Triticeae, Triticinae, see *Species Plantarum* 1: 85-87. 1753, *Species Plantarum* 2: 1050-1051. 1753, *Familles des Plantes* 2: 36, 513. 1763, *Enumeratio Methodica Plantarum* 371. 1763, *Illustrationes Plantarum Orientalium* 4: 12, 23. 1851, *Flore de France* 3: 601. 1856 and *Blumea, Supplement* 3: 15, 17. 1946, *Grasses of Burma, Ceylon, India and Pakistan (excluding Bambuseae)* 653-655. 1960, *Feddes Repert.* 91: 225-228. 1980, *Biologisches Zentralblatt* 101(2): 206-208. 1982, *Taxon* 41: 552-583. 1992, *Agric. Univ. Wageningen Papers* 94-7: 1-512. 1994, *Taxon* 44: 611-612. 1995, *Flora de Veracruz* 114: 1-16. 2000, *Contributions from the United States National Herbarium* 48: 20-23. 2003.

Aegilemma Á. Löve = *Aegilops* L.

Greek *aix*, *aigos* "a goat" and *lemma*, *lemmatos* "skin, bark, scale."

Pooideae, Triticeae, Triticinae, type *Aegilemma kotschyi* (Boiss.) Á. Löve, see *Species Plantarum* 1: 85-87. 1753, *Species Plantarum* 2: 1050-1051. 1753, *Familles des Plantes* 2: 36, 513. 1763, *Enumeratio Methodica Plantarum* 371. 1763, *Illustrationes Plantarum Orientalium* 4: 12, 23. 1851, *Flore de France* 3: 601. 1856 and *Blumea, Supplement* 3: 15, 17. 1946, *Grasses of Burma ...* 653-655. 1960, *Feddes Repert.* 91: 225-228. 1980, *Biologisches Zentralblatt* 101(2): 206-208. 1982, *Taxon* 41: 552-583. 1992, *Agric. Univ. Wageningen Pap.* 94-7: 1-512. 1994, *Taxon* 44: 611-612. 1995, *Flora de Veracruz* 114: 1-16. 2000, *Contributions from the United States National Herbarium* 48: 20-23. 2003.

Aegilonearum Á. Löve = *Aegilops* L.

Pooideae, Triticeae, Triticinae, type *Aegilonearum juvenale* (Thell.) Á. Löve., see *Species Plantarum* 1: 85. 1753, *Species Plantarum* 2: 1050-1051. 1753, *Familles des Plantes* 2: 36, 513. 1763, *Enumeratio Methodica Plantarum* 371. 1763, *Illustrationes Plantarum Orientalium* 4: 12, 23. 1851, *Flore de France* 3: 601. 1856 and *Blumea, Supplement* 3: 15, 17. 1946, *Grasses of Burma ...* 653-655. 1960, *Feddes Repert.* 91: 225-228. 1980, *Biologisches Zentralblatt* 101(2): 206-208. 1982, *Taxon* 41: 552-583. 1992, *Agric.*

Univ. Wageningen Pap. 94-7: 1-512. 1994, *Taxon* 44: 611-612. 1995, *Flora de Veracruz* 114: 1-16. 2000, *Contributions from the United States National Herbarium* 48: 20-23. 2003.

Aegilopodes Á. Löve = *Aegilops* L.

Pooideae, Triticeae, Triticinae, see *Species Plantarum* 1: 85. 1753, *Species Plantarum* 2: 1050-1051. 1753, *Familles des Plantes* 2: 36, 513. 1763, *Enumeratio Methodica Plantarum* 371. 1763, *Illustrationes Plantarum Orientalium* 4: 12, 23. 1851, *Flore de France* 3: 601. 1856 and *Blumea, Supplement* 3: 15, 17. 1946, *Grasses of Burma ...* 653-655. 1960, *Feddes Repert.* 91: 225-228. 1980, *Biologisches Zentralblatt* 101(2): 206-208. 1982, *Taxon* 41: 552-583. 1992, *Agric. Univ. Wageningen Pap.* 94-7: 1-512. 1994, *Taxon* 44: 611-612. 1995, *Flora de Veracruz* 114: 1-16. 2000, *Contributions from the United States National Herbarium* 48: 20-23. 2003.

Aegilops L. = *Aegicon* Adans., *Aegilemma* Á. Löve, *Aegilonearum* Á. Löve, *Aegilopodes* Á. Löve, *Amblyopyrum* Eig, *Amblyopyrum* (Jaub.) Eig, *Chennapyrum* Á. Löve, *Comopyrum* (Jaub. & Spach) Á. Löve, *Comopyrum* (Jaub.) Löve, *Cylindropyrum* (Jaub. & Spach) Á. Löve, *Cylindropyrum* (Jaub.) Löve, *Gastropyrum* (Jaub. & Spach) Á. Löve, *Gastropyrum* (Jaub.) Á. Löve, *Henrardia* C.E. Hubb., *Kiharapyrum* Á. Löve, *Orrhopygium* Á. Löve, *Patropyrum* Á. Löve, *Perlaria* Heist. ex Fabr., *Sitopsis* (Jaub. & Spach) Á. Löve, *Triticum* L.

From an ancient Greek name for a long awned or bearded grass, *aigilops*, applied by Theophrastus to a kind of oak with sweet fruit, and by Dioscorides (4.70) to describe the lachrymal fistula, an ulcer in the eye; *aigilos* is an herb of which goats are fond; Latin *aegilops*, *opis* and *aegilopa*, *ae* for a disease of the eyes, for a kind of oak with edible acorns, for a kind of bulbous plant or for a weed among barley.

About 21-27 species, Mediterranean, Asia, North Africa. Pooideae, Triticeae, Triticinae, annual, herbaceous, rhizomatous, tufted, usually erect, internodes hollow, auricles present or absent, ligule an unfringed membrane, plants bisexual, open to dense inflorescence spicate, spikelets solitary and distichous, 2 glumes subequal and thick, lemmas apex usually toothed or awned, awned or awnless, palea 2-keeled, 2 free and membranous lodicules, 3 stamens, ovary hairy, 2 stigmas, weed species, useful native pasture species, open habitats, sometimes included in *Triticum*, type *Aegilops triuncialis* L., see J.C. Buxbaum,

- Plantarum minus cognitarum centuriae, complectens plantas circa Byzantium et in Oriente observatas* Centuria I. Aegopogon Humb. & Bonpl. ex Willd. = *Atherophora* Steud., *Hymenothecium* Lag., *Schellingia* Steud.

From the Greek *aix*, *aigos* “a goat” and *pogon* “a beard,” referring to the spikes, to the awns.

About 3-4 species, southern America, U.S., Mexico, Guatemala, Argentina. Chloridoideae, Cynodonteae, Muhlenbergiinae, annual or perennial, rather small, herbaceous, straggling, sprawling, stoloniferous, weak, auricles absent, ligule a fringed membrane, narrow linear leaf blades persistent, plants bisexual, inflorescence a false spike, a terminal raceme, central spikelet 1-flowered sessile or pedicelled, deciduous branchlets with clusters of 1-flowered spikelets, spikelets in triplets, longer spikelets male or sterile, shorter

spikelets bisexual, 2 glumes more or less equal and apically 2-lobed, lemma 3-nerved, glumes and lemma awned, palea present, 2 lodicules fleshy and glabrous, 3 stamens, ovary glabrous, 2 stigmas, lateral spikelets pedicelled 1-flowered, forest margins, type *Aegopogon cenchroides* Humb. & Bonpl. ex Willd., see *Species Plantarum. Editio quarta* 4(2): 899. 1805 [1806], *Genera et species plantarum* 4. 1816, *Nomenclator Botanicus. Aelbroeckia De Moor = *Aeluropus* Trin., *Chamaedactylis* T.F.L. Nees

Chloridoideae, Eragrostideae, see *Fundamenta Agrostographiae* 143, t. 12. 1820, *Flora italiana, ossia descrizione delle piante ...* 1: 461. 1848, *Traité des Graminées* 134. 1854 and *Novosti Sist. Vyss. Rast.* 1966: 25. 1966.

Aeluropus Trin. = *Aelbroeckia* De Moor, *Calotheca* Desv. ex Spreng., *Calotheca* Desv., *Chamaedactylis* T.F.L. Nees

Greek *ailouros* "a cat, a weasel" and *pous* "foot," Latin *aelurus* "a cat," referring to the nature of the spikes.

Some 3-5/10 species, Mediterranean, northern China, India, Ethiopia, Sri Lanka. Chloridoideae, Eragrostideae, perennial, low, tough, rigid, herbaceous, decumbent, halophytes, much-branched, toughly rhizomatous or stoloniferous, caespitose, leaf blades often distichous, auricles absent, ligule a very short membrane fringed with hairs, leaves linear often pungent, plants bisexual, inflorescence spicate to capitate, a densely flowered head, florets bisexual, spikelets sessile and solitary, 2 glumes unequal and mucronate, lower glume 1-3-nerved, upper glume 5-7 nerved, lemmas mucronate and chartaceous, palea 3-lobed, 2 free and fleshy lodicules, 3 stamens, ovary glabrous, 2 stigmas, valuable fodder, open habitats, dry saline areas, sand of seashores, salt flats and deserts, type *Aeluropus laevis* Trin., see *Species Plantarum* 1: 66-71, 73-76. 1753, *Nouveau Bulletin des Sciences, publié par la Société Philomatique de Paris* 2: 190. 1810, *Anleitung zur Kenntniss der Gewächse* 2(1): 167. 1817, Carl Bernhard von Trinius (1778-1844), *Fundamenta Agrostographiae*. 143, t. 12. Bieb.; *Poa tunetana* Spreng.; *Sesleria lagopoides* (L.) Spreng.) (Greek *lagos* “a hare”)

Southern India, Northeast Africa, Mediterranean. Perennial, variable, erect, harsh or pruinose, much-branched, shrubby, sometimes densely tufted, mat-forming, with woody rootstock, with scaly rhizomes and strongly stoloniferous, creeping, sometimes with long prostrate stems rooting at the nodes, leaf blades tough, ligule a ring of hairs, pungent leaves narrow and rigid, inflorescence capitate, 1 ovoid raceme, spikelets elliptic-oblong and curling, florets closely imbricate, glumes hirsute or villous, lower glume ovate-oblong and subacute, lemmas villous on the margins, of some fodder value, good grazing for all stocks, extremely salt-tolerant, useful for erosion control, abundant along the seashores, salt pans, sea littoral, sandy seashores, foreshore sand dunes, seasonally flooded salt plains, salt marshes and saline areas, subkhal, dry saline places, in low moist areas, dry hillsides, saline plains, sandy soils, heavily grazed sites, inhospitable saline soils, see *Flora Carniolica* 189. 1760, *Mantissa* 1: 33. 1767, *Systema Naturae, edition 12* 2: 95. 1767, *Species Plantarum. A. macrostachyus Hack. (*Aeluropus grandiflorus* Munro; *Aeluropus monostachyus* Hack. ex Bor; *Catapodium pungens* Boiss.)

Asia, Afghanistan, India. See *Hortus Regius Botanicus Berolinensis* 1: 44, 280. 1827, *Catalogue of the plants distributed at the Royal Gardens, Kew ...* from the herbaria of Griffith, Falconer, and Helfer. Royal Botanic Gardens, Kew [London] 1865, *Flora Orientalis* 5: 635. 1884 and *Österreichische Botanische Zeitschrift* 52(10): 374. 1902.

A. micrantherus Tzvelev (*Aeluropus littoralis* subsp. *micrantherus* (Tzvelev) Tzvelev; *Aeluropus littoralis* var. *micrantherus* (Tzvelev) K.L. Chang)

China, Russia, Mongolia. Procumbent or ascending, branched, leaf blades flat or involute, leaf sheaths glabrous and pilose, ligule usually pilose, inflorescence spike-like, compact congested racemes, spikelets ovate, glumes scabrous, lemmas ovate or broadly ovate, along water courses, on hill slopes, desert, in sandy places, see *Zlaki SSSR* 621. 1976, *Flora in Desertis Reipublicae Populorum Sinarum* 1: 42. 1985.

in China: wei yao zhang mao

A. pilosus (X.L. Yang) S.L. Chen & H.L. Yang (*Aeluropus littoralis* var. *pilosus* H.L. Yang; *Aeluropus pilosus* (H.L. Yang) S.L. Chen)

China. Erect or decumbent, densely pubescent, leaf sheaths densely pubescent, leaf blades flat or involute, leaves hispid to densely pubescent, ligule margin ciliate, rhizomes and stolons present, inflorescence spike-like, racemes solitary, spikelets distichous, glumes pubescent and hispid, lemmas apex cuspidate, palea keels hispid, desert sand, see *Acta Botanica Yunnanica* 5(1): 74, pl. 1, f. 9-16. 1983, *Flora Reipublicae Popularis Sinicae* 10(1): 8. 1990.

in China: mao ye zhang mao

A. pungens (M. Bieb.) K. Koch (*Aeluropus littoralis* (Gouan) Parl.; *Aeluropus littoralis* subsp. *pungens* (M. Bieb.) Tzvelev; *Aeluropus pungens* (Vahl) Boiss., nom. illeg., non *Aeluropus pungens* (M. Bieb.) Koch; *Festuca pungens* Vahl; *Poa pungens* M. Bieb., nom. illeg., non *Poa pungens* Georgi)

Europe, Russia, Caucasus. Perennial, erect or decumbent, usually branched at base, leaf sheaths glabrous, leaf blades flat or involute, ligule very short with margin ciliate, rhizomatous, inflorescence spike-like, racemes solitary and rather spaced, lemmas with membranous ciliate margins, good forage species, drought resistant, turf, heavy clay loam soil, bank of irrigation canal, alkaline soil, highly salty soils, sandy places, see *Symbolae Botanicae, ...* 1: 10, t. 2. 1790, *Flora Taurico-Caucasica* 1: 65. 1808, *Linnaea* 21(4): 408. 1848, *Flora italiana, ossia descrizione delle piante ...* 1: 461. 1848, *Flora Orientalis* 5: 595. 1884 and *Novosti Sist. Vyss. Rast.* 8: 73. 1971.

in China: xiao zhang mao

A. pungens (M. Bieb.) K. Koch var. *hirtulus* S.L. Chen & X.L. Yang

China. Leaf blades densely hirsute, glumes sparsely glabrous, desert sand, see *Bulletin of Botanical Research (Harbin)* 4(2): 123-124. 1984.

in China: ci ye zhang mao

A. pungens (M. Bieb.) K. Koch var. *pungens* (*Aeluropus littoralis* subsp. *pungens* (M. Bieb.) Tzvelev; *Poa pungens* M. Bieb.)

China, Eurasia. Leaf blades glabrous, glumes margins ciliate, bank of irrigation canal, alkaline soil, highly salty soils, sandy places.

in China: xiao zhang mao

A. sinensis (Debeaux) Tzvelev (*Aeluropus littoralis* subsp. *sinensis* (Debeaux) Tzvelev; *Aeluropus littoralis* var. *sinensis* Debeaux)

China. Nodes more or less pubescent, leaf blades flat, leaf sheaths glabrous and pilose, inflorescence spike-like, compact congested racemes, glumes and lemmas glabrous or scabrous, see *Actes de la Société Linnéenne de Bordeaux* 33: 73. 1879 and *Zlaki SSSR* 621. 1976.

in China: zhang mao

Aera Asch. = *Aira* L.

Orthographic variant, from the Greek *aer* “air.”

Pooideae, Poaeae, Airinae, see Paul Friedrich August Ascherson (1834-1913), *Flora der Provinz Brandenburg* 1: 830. Berlin 1864 and *Contributions from the United States National Herbarium* 48: 89-96. 2003.

Aeropsis Asch. & Graebn. = *Airopsis* Desv.

Aveneae, see *Species Plantarum* 1: 79-81. 1753, *Icones et Descriptiones Plantarum, quae aut sponte ...* 3: 37, t. 274, f. 1. 1794, *Journal de Botanique (Desvaux)* 1: 200. 1809, *A Manual of the Botany of the Northern United States. Second Edition* 573. 1856, Paul Friedrich August Ascherson, *Synopsis der mitteleuropäischen Flora* 2(1): 298. Leipzig 1899.

Aethonopogon Kuntze = *Pollinia* Trin.
Polytrias Hack.

Possibly from the Greek *aethes* “irregular, unusual” or Greek *aitho*, *aithen* “to light up, to burn, blaze, to scorch.”

Panicoideae, Andropogoneae, Saccharinae, see *Révision des Graminées* 1: 160. 1829, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 2(4): 304. 1832, *Hooker's Journal of Botany and Kew Garden Miscellany* 2: 98. 1850, *Genera Plantarum* 3(2): 1127. 1883 [*Pollinia* sect. *Eulalia* (Kunth) Benth. & Hook.f.], *Die Natürlichen Pflanzenfamilien* 2(2): 24. 1887, *Monographiae Phanerogamarum* 6: 189, t. 1, f. 13. 1889, *Revisio Generum Plantarum* 2: 788. 1891 [*Aethonopogon praemorsus* (Nees) Hack. ex Kuntze] and *Flora Mesoamericana* 6: 380. 1994, *Contributions from the United States National Herbarium* 46: 14, 541-542. 2003.

Afrachneria Sprague = *Achneria* Munro ex Benth., *Pentaschistis* (Nees) Spach

From Africa and the genus *Achneria*.

Arundinoideae, Arundineae, see *Flore Française. Troisième Édition* 3: 32. 1805, *Essai d'une Nouvelle Agrostographie* 72, 146. 1812, *Histoire naturelle des Végétaux* 13: 164. Paris 1841, C.G.D. Nees von Esenbeck (1776-1858), *Flora Africae Australioris Illustrationes Monographicae ...* I. Gramineae. Glogaviae 1841, *Genera Plantarum* 3(2): 1158, 1163. 1883 and *Journal of Botany, British and Foreign* 60: 138. 1922, *Wageningen Agricultural University Papers* 92-1(2): 1-557. 1992, M. Lazarides, “The genus *Eriachne* (*Eriachne*, Poaceae).” *Australian Systematic Botany* 8(3):

355-452. 1995, K.C. Klopffer, J.J. Spies & B. Visser, “Cytogenetic studies in the genus *Pentaschistis* (Poaceae: Arundinoideae).” *Bothalia* 28(2): 231-238. 1998.

Afrotrichloris Chiov.

From Africa and *Trichloris* Fourn. ex Benth.

Two species, Somalia, northeast tropical Africa. Chloridoideae, Cynodonteae, perennial, herbaceous, unbranched, unarmed, tufted, ligule pilose or a narrow ciliate membrane, narrow leaf blades, plants bisexual, inflorescence a single spike or racemes solitary, 1-sided spike with closely imbricate sessile spikelets several-flowered, lowest floret fertile, 2 glumes acuminate and more or less unequal, lemmas cleft or deeply bifid, sterile lemmas clustered and long-awned, fertile lemma 1-awned and rounded on the back, palea present, 2 free and glabrous lodicules, 3 stamens, ovary glabrous, 2 stigmas, resistant to grazing, sandy soils, woodland, type *Afrotrichloris martinii* Chiov., see *Annali di Botanica* 13(3): 371-372. 1915, *Flora of Ethiopia and Eritrea* 7: 165. 1995.

Species***A. hyaloptera*** Clayton

Somalia. Perennial bunchgrass, erect, robust, wiry, densely tufted, leaf blades tough, inflorescence linear, fertile lemma ciliate and villous, sterile lemmas clustered, bushland, orange sand, open areas, dry sandy soil, mixed bushland, see *Kew Bulletin* 21: 105. 1967.

A. martinii Chiov.

Somalia. Perennial bunchgrass, wiry, tufted, spike oblong-ovate, fertile lemma pubescent, disturbed sandy areas, stabilized or fixed dunes, coastal, see *Annali di Botanica* 13(3): 372. 1915.

in Somalia: use mullè, ouse mulleh

Agenium Nees

From the Greek *a* “absence, negative” and *geneion* “beard.”

About 4 species, Brazil, Argentina, Paraguay. Panicoideae, Andropogonodae, Andropogoneae, Andropogoninae, or Panicoideae, Andropogoneae, Anthistiriinae, perennial, tufted, herbaceous, branched, leaf blades acuminate, ligule an unfringed membrane, plants bisexual, inflorescence spicate digitate or subdigitate, bisexual spikelets, the upper pedicelled spikelets male, male and female spikelets mixed in the inflorescence, 2 glumes more or less equal, palea absent, 2 free and fleshy lodicules, ovary glabrous, 2 reddish stigmas, savannah, dry areas, open areas, type *Agenium nutans* Nees, see John Lindley (1799-1865), [*An Introduction to the*] *Natural System of Botany* 447. 1836 [*An Introduction to the Natural System of Botany* London 1830] and

Flora Illustrada de Entre Ríos (Argentina) 6(2): 447-508. 1969, *Contributions from the United States National Herbarium* 46: 14. 2003.

Species

A. leptocladum (Hack.) Clayton (*Agenium goyazense* (Hack.) Clayton; *Andropogon goyazensis* Hack.; *Andropogon leptocladus* Hack.; *Heteropogon leptocladus* (Hack.) Roberty)

Brazil, Paraguay, northern Argentina. Racemes solitary more or less glabrous, see *Österreichische Botanische Zeitschrift* 51(5): 152. 1901, *Kew Bulletin* 27(3): 447. 1972.

A. majus Pilg.

Paraguay. Perennial, tufted, see *Repertorium Specierum Novarum Regni Vegetabilis* 43: 82. 1938.

A. nutans Nees (*Agenium villosum* (Nees) Pilg.; *Andropogon agenium* Steud.; *Andropogon neesii* var. *apogynus* (Nees) Hack.; *Andropogon nutans* L.; *Andropogon villosus* f. *apogyna* (Nees) Henrard; *Heteropogon villosus* var. *apogynus* Hack.)

Brazil. See *Species Plantarum* 2: 1045. 1753, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 2(3): 263. 1832, *An Introduction to the Natural System of Botany* 447. 1836, *Synopsis Plantarum Glumacearum* 1: 395. 1854, *Flora Brasiliensis* 2(4): 270. 1883, *Monographiae Phanerogamarum* 6: 582. 1889 and *Contr. U.S. Natl. Herb.* 12: 125. 1908, *Arkiv för Botanik utgivet av K. Svenska Vetenskapsakademien* 11(4): 9. 1912, *Mededeelingen van's Rijks-Herbarium* 40: 44. 1921, *Taxon* 33: 95-97. 1984.

A. villosum (Nees) Pilg. (*Agenium nutans* Nees; *Andropogon agenium* Steud.; *Andropogon neesii* Kunth, nom. illeg., non *Andropogon neesii* Trin.; *Andropogon neesii* subvar. *glabrescens* Pilg.; *Andropogon neesii* subvar. *paraguayensis* Hack.; *Andropogon neesii* var. *apogynus* (Nees) Hack.; *Andropogon neesii* var. *dactyloides* (Hack.) Hack.; *Andropogon nutans* subvar. *elongatus* Hack.; *Andropogon nutans* subvar. *fuliginosus* Hack.; *Andropogon nutans* subvar. *neesii* Hack.; *Andropogon villosus* Lam.; *Andropogon villosus* (Nees) Ekm., nom. illeg., non *Andropogon villosus* Lam.; *Andropogon villosus* f. *apogyna* (Nees) Henrard; *Andropogon villosus* subvar. *gardneri* (Hack.) Henrard; *Andropogon villosus* subvar. *leianthus* (Hack.) Ekman; *Andropogon villosus* subvar. *leiophyllus* (Hack.) Henrard; *Andropogon villosus* subvar. *paraguayensis* (Hack.) Henrard; *Andropogon villosus* subvar. *typicus* Henrard; *Andropogon villosus* var. *dactyloides* (Hack.) Hack. ex Henrard; *Andropogon villosus* var. *genuinus* (Hack.) Ekman; *Heteropogon villosus* Nees; *Heteropogon villosus* subvar. *gardneri* Hack.; *Heteropogon villosus* subvar. *leianthus*

Hack.; *Heteropogon villosus* subvar. *leiophyllus* Hack.; *Heteropogon villosus* subvar. *riedelianus* Hack.; *Heteropogon villosus* subvar. *selloanus* Hack.; *Heteropogon villosus* subvar. *typicus* Hack.; *Heteropogon villosus* var. *apogynus* Hack.; *Heteropogon villosus* var. *dactyloides* Hack.; *Heteropogon villosus* var. *genuinus* Hack.)

Brazil, Paraguay, Argentina, Bolivia. Perennial bunchgrass, tufted, erect, forming clumps, villous racemes in clusters, sandy soils, *cerrado*, see *Flore de France* 3: 634. 1778, *Flora Brasiliensis seu Enumeratio Plantarum* 2: 362-363. 1829, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 491. 1833, *Synopsis Plantarum Glumacearum* 1: 395. 1854, *Flora Brasiliensis* 2(4): 269-270, pl. 62, f. 2. 1883, *Monographiae Phanerogamarum* 6: 582. 1889 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 30(1): 137. 1901, *Arkiv för Botanik utgivet av K. Svenska Vetenskapsakademien* 11(4): 9-10. 1912, *Mededeelingen van's Rijks-Herbarium* 40: 44. 1921, *Repertorium Specierum Novarum Regni Vegetabilis* 43: 82. 1938.

Aglycia Willd. ex Steud. = *Aglycia* Steud., *Eriochloa* Kunth

Perhaps from the Greek *agleykes* "not sweet, sour, harsh."

Panicoideae, Paniceae, Melinidinae, see *Nova Genera et Species Plantarum* 1: 94-95, t. 30. 1815 [1816], *Nomenclator Botanicus. Editio secunda* 1: 37, 66. 1840 and *N. Amer. Fl.* 17: 157. 1912, *Flora Mesoamericana* 6: 333-335. 1994, *Contributions from the United States National Herbarium* 46: 233-239. 2003.

Agnesia Zuloaga & Judziewicz

Dedicated to the American botanist Mary Agnes Chase (*née* Merrill), 1869-1963, agrostologist, plant collector, traveler, among his writings are *First Book of Grasses*. New York 1922 and "Poaceae (pars)." *North Amer. Fl.* 17(8): 568-579. 1939, with the American botanist Albert Spear Hitchcock (*née* Jennings) (1865-1935) wrote *Grasses of the West Indies*. Washington [D.C.] 1917, *Tropical North American Species of Panicum*. Washington [D.C.] 1915 and *The North American Species of Panicum*. Washington [D.C.] 1910, in 1950 revised the *Manual of the Grasses of the United States* (by A.S. Hitchcock), with Cornelia D. Niles edited *Index to Grass Species*. Boston 1962. See J.H. Barnhart, *Biographical notes upon botanists*. 1: 335. 1965; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 71. 1972; J. Ewan, editor, *A Short History of Botany in the United States*. New York and London 1969; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. 1964; Frans A. Stafleu & Erik A. Menega, *Taxonomic literature. Suppl. IV*. 57-60. 1997.

One species, Amazonia, South America. Bambusoideae, Oryzodae, Olyreae, or Bambusoideae, Olyreae, Olyrinae, perennial, delicate, dwarf, herbaceous, unarmed, caespitose, flowering culms leafy, plants monoecious, at the upper nodes raceme-like panicles, all the fertile spikelets unisexual, several male spikelets subterminal, 1 single terminal female spikelet, 2 glumes more or less equal, female floret shortly awned, male spikelets without glumes, palea present, shade lover, clumps forming, wet forests, lowland, forest understories, type *Agnesia lancifolia* (Mez) Zuloaga & Judziewicz, see *Systema Naturae, Editio Decima* 1253, 1261, 1379. 1759, *Fam. Pl.* 2: 39, 574. 1763 and *Blumea, Supplement* 3: 62. 1946, *Brittonia* 37: 22-35. 1985, *Systematic Botany* 17(1): 25-28. 1992, *Novon* 3(3): 306-309. 1993, *American Bamboos* 262-264. 1999, *Contributions from the United States National Herbarium* 39: 11. 2000.

Species

A. lancifolia (Mez) Zuloaga & Judziewicz (*Olyra lancifolia* Mez)

Amazonia, Brazil, Colombia, Peru. See *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 7(63): 45. 1917, *Novon* 3(3): 307. 1993.

Agraulus P. Beauv. = *Agrostis* L.

From the Greek *agraulos*, *agraulon* “dwelling in the field, a boor,” *agros* “field” and *aule* “the court-yard, court, hall.”

Pooideae, Poeae, Agrostidinae, type *Agraulus caninus* (L.) P. Beauv., see *Species Plantarum* 1: 61-63. 1753, *Essai d'une Nouvelle Agrostographie* 5, 146-147, t. 3, f. 2, t. 4, f. 7. 1812 and *U.S. Dept. Agric. Bull.* 772: 127. 1920, *Claves Generum et Specierum Graminearum Primarum Sinicarum Appendice Nomenclatione Systematica* 99. 1957, *Novosti Sist. Vyss. Rast.* 6: 2. 1970, *Fl. Fenn.* 5: 29. 1971, *Taxon* 41: 556. 1992, *Taxon* 44: 611-612. 1995, *Contributions from the United States National Herbarium* 48: 42-89. 2003.

Agrestis Bubani = *Agrostis* L.

Latin *agrestis* “pertaining to fields.”

Pooideae, Poeae, Agrostidinae, see *Species Plantarum* 1: 61-63. 1753, *Essai d'une Nouvelle Agrostographie* 5, 146-147, t. 3, f. 2, t. 4, f. 7. 1812 and Pietro Bubani (1806-1888), *Flora Pyrenaea* ... 4: 281. 1901, *U.S. Dept. Agric. Bull.* 772: 127. 1920, *Claves Generum et Specierum Graminearum Primarum Sinicarum Appendice Nomenclatione Systematica* 99. 1957, *Novosti Sist. Vyss. Rast.* 6: 2. 1970, *Taxon* 41: 556. 1992, *Taxon* 44: 611-612. 1995, *Contributions from the United States National Herbarium* 48: 42-89. 2003.

Agriopyrum Maly

See *Species Plantarum* 1: 86-87. 1753 and *Verhandlungen der kaiserlich-königlichen zoologisch-botanischen Gesellschaft in Wien* 54: 180. 1904, *Illustrierte Flora von Mitteleuropa* 1: 488. 1908.

x Agrocalamagrostis Aschers. & Graebn.

Agrostis x *Calamagrostis*.

Agropyron x *Hordeum*.

See *Riviera Scientifique* 21: 44-45. 1934, *Genera Graminum* 374. 1986.

Agropyron Gaertn. = Australopyrum (Tzvelev) Á. Löve, Costia Willk., Kratzmannia Opiz

From the Greek *agros* "a field, country" and *pyros* "grain, wheat."

About 12-25 species, temperate Old World, Mediterranean to China and Russia. Pooideae, Triticeae, Triticeae, or Pooideae, Triticeae, Hordeinae, perennial, erect or geniculate at base, generally tufted or with creeping rhizomes, herbaceous, mesophytic or xerophytic, unbranched, more or less tuberous or not, leaf blades flat or involute, auricles present or absent, ligule an unfringed membrane, plants bisexual, inflorescence a single spike linear-oblong or ovoid, 3-10 florets, spikelets solitary pedicellate, 2 glumes more or less equal, lemmas lanceolate-oblong and coriaceous, lemmas acute or with a straight apical awn, palea present, 2-3 free and ciliate lodicules, 3 stamens, ovary hairy, 2 stigmas, Ayurvedic use, dry places, dry stony soil, dry sandy soils, open habitats, open steppes, sandy and rocky slopes, waste places, type *Agropyron cristatum* (L.) Gaertn., see *Novi Commentarii Academiae Scientiarum Imperialis Petropolitanae* 14(1): 539-540. 1770, *Nouveau Bulletin des Sciences, publié par la Société Philomatique de Paris* 2: 190. 1810, *Essai d'une Nouvelle Agrostographie* 102, 146, 180. 1812, *Observations sur les Graminées de la Flore Belgique* 95. 1823 [1824], *Flora Altaica* 1: 112. 1829, *Flore de Lorraine* 3: 191. 1844, *Linnaea* 21(4): 425. 1848, *Botanische Zeitung. Agropyropsis (Batt. & Trabut) A. Camus
= *Agropyropsis* A. Camus, *Agropyropsis* (Trab.)
A. Camus, *Catapodium* Link

Resembling the genus *Agropyron* Gaertn.

Two species, North Africa. Pooideae, Poodae, Poeae, perennial, herbaceous, halophytic, tufted, stoloniferous, unbranched, leaves mainly basal, auricles absent, ligule an unfringed membrane, plants bisexual, inflorescence a single spike, spikelets solitary, 2 glumes more or less equal, palea present, 2 free membranous lodicules, 3 stamens, ovary glabrous with the apical appendage, 2 stigmas, in saline soils, damp places, see *Hortus Regius Botanicus Berolinensis*

1: 44, 280. 1827 and *Flore d'Alger* 233. 1904, *Bulletin de la Société Botanique de France* 82: 11. 1935.

Species

A. gracilis (Balansa ex Coss. & Durieu) A. Camus (*Festuca lolium* Balansa ex Coss. & Durieu)

North Africa, Algeria. See *Société Botanique de France* 2: 311. 1855 and *Revue de Botanique Appliquée et d'Agriculture Tropicale* 15: 1050. 1935.

A. lolium (Balansa ex Coss. & Durieu) A. Camus (*Catapodium lolium* (Balansa ex Coss. & Durieu) Hack.; *Festuca lolium* Balansa ex Coss. & Durieu)

North Africa, Algeria. See *Société Botanique de France* 2: 311. 1855 and *Revue de Botanique Appliquée et d'Agriculture Tropicale* 15: 1050. 1935, *Bulletin de la Société Botanique de France* 82: 11. 1935.

Agropyrum Roemer & Schultes

Orthographic variant of *Agropyron* Gaertn., see *Systema Vegetabilium* 2: 750. 1817.

x Agrositanion Bowden

Agropyron x *Sitanion*.

See *Canadian Journal of Botany* 45: 720. 1967, *Genera Graminum* 374. 1986.

Agrosticula Raddi = Sporobolus R. Br.

Greek *agrostis*, *agrostidos* "grass, weed, couch grass," Latin *agrostis*, *is*.

Chloridoideae, Cynodonteae, Sporobolinae, type *Agrosticula muralis* Raddi, see *Prodromus Florae Novae Hollandiae* 169-170. 1810, *Agrostografia Brasiliensis* 33, 36, t. 1, f. 2. 1823, *Nom. Bot.* 2: 1274. 1874 and *Contributions from the United States National Herbarium* 18(7): 368. 1917, *Revista Sudamericana de Botánica* 6(5-6): 145. 1940, *Flora Mesoamericana* 6: 273-276. 1994, *Contributions from the United States National Herbarium* 41: 200-219. 2001.

Agrostis L. = *Agraulus* P. Beauv., *Agrestis* Bubani, *Anomalotis* Steud., *Bromidium* Nees, *Bromidium* Nees & Meyen, *Candollea* Steud., *Chaetotropis* Kunth, *Decandolea* Bastard, *Decandolia* Batard, *Didymochaeta* Steud., *Heptaseta* Koidz., *Lachnagrostis* Trin., *Linkagrostis* Romero García et al.,

Neoschischkinia Tzvelev, *Notonema* Raf.,
Pentatherum Nabelek, *Podagrostis* (Griseb.)
 Scribn. & Merr., *Senisetum* Koidz., *Senisetum*
 Honda, *Trichodium* Michaux, *Vilfa* Adans.

From the Latin *agrostis*, *is* and Greek *agrostis*, *agrostidos* “grass, weed, couch grass,” *agron*, *agros* “field,” probably referring to the habitat; Latin *ager*, the ancient Indian *ajrah*, the Gothic *akrs*.

About 200-220 species, temperate regions and tropical mountains. Pooideae, Poodae, Aveneae, or Pooideae, Poaceae, Agrostidinae, annual or perennial bunchgrass, variable, tufted, erect, decumbent and geniculately ascending, sometimes rhizomatous or stoloniferous, herbaceous and leafy, glabrous nodes, hollow internodes, auricles absent, leaf sheath rounded, ligule membranous, bristled leaves linear and narrow, leaf blades flat or involute, plants bisexual, culm with panicle rachis persistent, inflorescence paniculate more or less deciduous, loose or contracted panicles of very small spikelets whorled and slightly laterally flattened, 1-flowered spikelets borne on thread-like branches, 1 floret bisexual, 2 glumes coarse and keeled exceeding the single floret, lemmas 3- to 5-nerved and membranous, unawned or awned, awn sharply bent, short and small callus glabrous or bearded, palea present or absent, 2 free and glabrous lodicules, 3 stamens, ovary glabrous and without the apical appendage, 2 stigmas plumose, small fruit longitudinally grooved, endosperm sometimes liquid, weed species, ornamental, shade species, for pastures and lawns, bowling greens, putting greens and playing fields, cultivated fodder, forage, native pasture species, found in grasslands, páramos, rainforest, pampas, sometimes sand dunes, woodland, dry and rocky habitats, open habitats, there is considerable taxonomic confusion concerning this genus, this group is (or should be) currently under revision and review, intergeneric hybrids with *Polypogon* Desf., *Calamagrostis* Adans. and *Lachnagrostis* Trin., type *Agrostis canina* L., see *Species Plantarum* 1: 61-63. 1753, *Genera Plantarum*. edition 5. 30. 1754, *Familles des Plantes* 2: 495. 1763, *Flora Boreali-Americana* 1: 41-42, t. 8. 1803, *Essai sur la Flore du Département de Maine et Loire* 15, 28-29. 1809, *Essai d'une Nouvelle Agrostographie* 5, 146-148, 182, t. 3, 4, f. 2, 7. 1812, *A Sketch of the Botany of South-Carolina and Georgia* 1: 134. 1816, *Syst. Species

A. adamsonii Vickery (*Lachnagrostis adamsonii* (Vickery) S.W.L. Jacobs)

Australia, Victoria. Endangered species, annual, erect or geniculate, leaf blades linear, auricles absent, basal leaf sheaths scabrous, ligule membranous, leaf blades linear, inflorescence a large panicle, spikelets one-flowered, 2 glumes, see *Contributions from the New South Wales National Herbarium* 1: 107. 1941, *Telopea* 9(3): 445. 2001.

in English: Adamson's bent

A. aemula R. Br. (*Agrostis semibarbata* Trin.; *Agrostis solandri* F. Muell.; *Calamagrostis aemula* (R. Br.) Steud.; *Deyeuxia aemula* (R. Br.) Kunth; *Deyeuxia forsteri* sensu Rodway, non Kunth; *Lachnagrostis aemula* (R. Br.) Nees ex Hook.f.; *Lachnagrostis aemula* (R. Br.) Trin.; *Vilfa aemula* (R. Br.) P. Beauv.)

Australia, South Australia. Annual or perennial, erect, tufted, glabrous, coastal, ligule membranous, leaves linear to shortly acuminate and flat, inflorescence of chasmogamous spikelets, panicle spreading and not drooping, spikelets usually purple, glumes acuminate, lemma truncate and hairy on the back, callus shortly bearded, palea thin and bifid, weedy grass, grows in grassland, in open habitats, grassland, see *Prodromus Florae Novae Hollandiae* 172. 1810, *Essai d'une Nouvelle Agrostographie* 16, 146, 181. 1812, *Fundamenta Agrostographiae* 128. 1820, *Révision des Graminées* 1: 77. 1829, *Nomenclator Botanicus. Editio secunda* 1: 249. 1840, *Handbook of the New Zealand Flora* 329. 1867, *Lund Fysiogr. Sällsk. Minneskr. med ...* 8: 32, t. 7, f. 41-47. 1878 and *Contr. New South Wales Herb.* 1: 101-119. 1941, *New Zealand J. Bot.* 29: 147. 1991.

in English: blown grass

A. aemula R. Br. var. **aemula**

Australia. Leaf blades flat and linear, see *A Key to Australian Grasses* 1-150. 1990.

A. aemula R. Br. var. **setifolia** (Hook.f.) Vickery (*Agrostis billardieri* var. *setifolia* Hook.f.; *Lachnagrostis punicea* (A.J. Brown & N.G. Walsh) S.W.L. Jacobs)

Australia, Tasmania, Victoria. Found in dry areas, leaf blades filiform, lower glume acuminate, see *Prodromus Florae Novae Hollandiae* 171-172. 1810, *Flora Tasmaniae* 2: 115. 1858 and *Contributions from the New South Wales National Herbarium* 1: 116. 1941, *Telopea* 9(3): 446. 2001.

A. aequata Nees (*Calamagrostis aequata* (Nees) J.M. Black; *Deyeuxia aequata* (Nees) Benth.; *Lachnagrostis aequata* (Nees) S.W.L. Jacobs)

New South Wales, Victoria, South Australia, Tasmania. Annual, more or less tufted, geniculate and ascending, auricles absent, basal leaf sheaths not keeled, ligule membranous, leaves narrow and flat, inflorescence of chasmogamous spikelets, panicle loose with numerous spreading branches, glumes scabrous on the keels, lemma truncate and glabrous, awnless, palea present, hairy callus, grows in coastal habitats, in beach sands, sometimes considered a synonym for *Agrostis rudis* Roemer & Schultes, see *Hooker's Journal of Botany and Kew Garden Miscellany* 2: 412. 1843, *Flora Australiensis: A Description ...* 7: 578. 1878 and *Flora of South Australia* 1: 70. 1922, *Telopea* 9(3): 445. 2001.

in English: blown grass

A. aequivalvis (Trin.) Trin. (*Agrostis canina* var. *aequalis* Trin.; *Calamagrostis aequivalvis* (Trin.) Steffen; *Deyeuxia aequivalvis* Benth. ex Vasey; *Podagrostis aequivalvis* (Trin.) Scribn. & Merr.)

U.S., Pacific Northwest, northern America, Canada. Perennial, see *Species Plantarum* 1: 62. 1753, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 2(2): 171. 1832, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Tasmania. Leaf blades involute, lemma awned, a coastal grass, see *Prodromus Florae Novae Hollandiae* 171. 1810 and *Contributions from the New South Wales National Herbarium* 1: 110. 1941, *Telopea* 9(3): 447. 2001.

A. billardieri R. Br. var. **tenuiseta** D.I. Morris (*Lachnagrostis billardieri* subsp. *tenuiseta* (D.I. Morris) S.W.L. Jacobs)

Tasmania. Rare species, leaf blades flat, a coastal grass, see *Prodromus Florae Novae Hollandiae* 171. 1810, *Fundamenta Agrostographiae* 128, t. 10. 1820 and *Muelleria* 7(2): 147. 1990, *Telopea* 9(3): 445. 2001.

A. blasdalei A.S. Hitchc. (*Agrostis blasdalei* var. *blasdalei*; *Agrostis blasdalei* var. *marinensis* Crampton; *Agrostis breviculmis* auct. non A.S. Hitchc.) (named for Walter Charles Blasdale, b. 1871, plant collector)

U.S., California. Vulnerable and rare species, perennial, rhizomatous, decumbent to erect, dense cylindrical inflorescence, base often partly enclosed by upper leaf, lemma sometimes awned above middle, awn straight, gravelly soils, dunes, coastal bluffs, see *Proceedings of the Biological Society of Washington* 41: 160-161. 1928.

in English: Blasdale's bent grass, Blasdale's bentgrass, cliff bent, cliff bent grass

A. blasdalei A.S. Hitchc. var. **blasdalei**

U.S., California. Vulnerable species.

in English: Blasdale's bent grass

A. blasdalei A.S. Hitchc. var. **marinensis** Crampton (California, Marin County)

U.S., California. Endangered or possibly extinct species, erect, slender, found in coastal prairie, coastal dunes, see *Proceedings of the Biological Society of Washington* 41: 160-161. 1928.

in English: Marin bent grass

A. boormanii Vickery (John Luke Boorman, fl. 1899-1919, botanist, plant collector in Australia)

Australia, New South Wales. Annual, slender, erect to geniculate, tufted, nonauriculate, basal leaf sheaths not keeled, ligule membranous and glabrous, leaves acuminate, inflorescence of chasmogamous spikelets, green and purple panicle contracted, greenish and purple spikelets, glumes acute, lemma awned and glabrous, palea absent, see *Contributions from the New South Wales National Herbarium* 1: 105. 1941, *Telopea* 9(3). 2001.

A. borealis Hartm. (*Agrostis bakeri* Rydb.; *Agrostis borealis* f. *macrantha* (Eames) Fernald; *Agrostis borealis* var. *americana* (Scribner ex Macoun) Fernald; *Agrostis borealis* var. *macrantha* Eames; *Agrostis borealis* var. *typica* Fernald; *Agrostis canina* var. *alpina* Oakes; *Agrostis canina* var. *tenella* Torr.; *Agrostis concinna* Tuck.; *Agrostis mertensii* Trin. subsp. *borealis* (Hartm.) in English: northern bentgrass

in Japan: miyamanukabo

A. bourgeaei E. Fourn. (*Agrostis alba* (L.) Lunell; *Agrostis alba* L.; *Agrostis bourgeaei* E. Fourn. ex Hemsl.; *Agrostis thyrsgera* Mez)

North America, Mexico. Aquatic, see *Species Plantarum* 1: 63. 1753, *Biologia Centrali-Americana; ... Botany ...* 3: 550. 1885, *Mexicanas Plantas* 2: 95. 1886 and *American Midland Naturalist* 4: 216. 1915, *Repertorium Specierum Novarum Regni Vegetabilis* 17(19-30): 301. 1921.

A. boyacensis Swallen & García-Barriga

Colombia, Boyaca. See *Caldasia* 2(8): 303, f. A. 1943.

A. brachiata Munro ex Hook.f.

India, Bihar, West Bengal. Lemma awnless and glabrous, palea minute, see *The Flora of British India* 7: 256. 1897 and *Edinburgh J. Bot.* 56: 388. 1999.

A. brachyathera Steud. (*Agrostis flavidula* Steud.)

Argentina, Chile, Sandy Point-Punta Arenas, Magellan Strait, Tierra del Fuego. See *Synopsis Plantarum Glumacearum* 1: 421-422. 1854.

A. breviculmis A.S. Hitchc. (*Agrostis nana* (J. Presl) Kunth, nom. illeg., non *Agrostis nana* Delile; *Trichodium nanum* J. Presl)

Southern America, Peru, Argentina, Chile. Perennial bunchgrass, herbaceous, montane, densely tufted, prostrate, forming small clumps, ligule erose, inflorescence erect, spikelets green with purple to violet tips, growing in gravelly soil, grassland, moist places, muddy bogs, flood deposit, disturbed areas, bottomland, sandy soil, see *Révision des Graminées* 3: 596. 1829, *Reliquiae Haenkeanae* 1(4-5): 243. 1830, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1(1): 226. 1833 and *U.S. Department of Agriculture Bureau of Plant Industry Bulletin* 68: 36, t. 18. 1905, *Contributions from the United States National Herbarium* 24(8): 291-556. 1927, *Field Museum of Natural History, Botanical Series* 13(1/1): 96-261. 1936, *Contributions from the Gray Herbarium of Harvard University* 184: 1-223. 1958.

A. calderoniae Acosta Cast.

North America, Mexico. See *Phytologia* 62(6): 449, f. 1. 1987.

A. canina L. (*Agraulis caninus* (L.) P. Beauv.; *Agrostis canina* (L.) Bubani; *Agrostis alba* f. *aristata* Millsp.; *Agrostis canina* Ucria; *Agrostis canina* f. *fasciculata* J. Ducommun; *Agrostis canina* var. *fascicularis* (Curtis ex Sinclair) Martin; *Agrostis canina* var. *stolonifera* Blytt; *Agrostis canina* var. *stolonifera* Meinsh., nom. illeg., non *Agrostis canina* var. *stolonifera* Blytt; *Agrostis canina* var. *stolonifera* Vasey, nom. illeg., non *Agrostis canina* var. *stolonifera* Blytt; *Agrostis canina* var. *stolonifera* Walp., nom. illeg., non *Agrostis canina* var. *stolonifera* Blytt; *Agrostis canina* var. *varians* (Thuill.) Ducomm.; *Agrostis falklandica* Hook.f.; *Agrostis fascicularis* Sincl.; *Agrostis fascicularis* Curtis ex Sinclair; *Agrostis stricta* Parl.; *Agrostis sudavica* Natk.-Ivanauk.; *Agrostis tenuifolia* Curtis; *Agrostis tenuis* Batard. ex Roemer & Schultes, nom. illeg., non *Agrostis tenuis* Sibth.; *Agrostis wightii* Nees ex Steud.; *Milium caninum* (L.) Lag.; *Trichodium caninum* (L.) Schrad.)

Europe. Perennial, small, tufted to loosely tufted, often stoloniferous, without rhizomes, erect or ascending, slender, ligules acute, pale-green to grayish green leaves, inflorescence loosely panicle-like, spikelets 1-flowered, dark purple glumes elliptic-lanceolate and acute, lemma shorter than glumes, on the lemma awn geniculate and bent, palea minute, small seeds, weed species naturalized elsewhere,

soil binder and cover species, useful for erosion control, suitable for lawns and golf courses, putting greens, permanent wet pastures, very resistant to cold, sensitive to drought, optimum on very acid soils, found in fields and meadows, hillsides, open sandy field, shady slopes, in wet and very wet soils, in marshy places, sandy or peaty soil, rocks near the sea, see *Species Plantarum* 1: 62. 1753, *Enum. Brit. Grasses* 42. 1787, *Hortus regius Panhormitanus* ... 57. Europe, western Asia. Perennial, variable, slender, small size, forming large clumps, erect or spreading, loosely to densely tufted or rhizomatous, with short rhizomes, often stoloniferous with trailing stolons, stems horizontal then ascendent, leaves flat and narrow, ligule obtuse or truncate, leaf sheath glabrous, inflorescence of chasmogamous spikelets, panicle ovoid and loose, 1 floret, glumes subequal acute and lanceolate, lemma truncate and usually awnless, no awn in the spikelets except the aristate form, callus usually glabrous, palea present, small seeds, pastures, ornamental cultivated grass widely naturalized elsewhere, lawns and bowling greens, sometimes cut for hay, occasional weed in higher rainfall areas, pasture weed, turf species, tolerates shade and drought, extremely resistant to summer heat and

winter cold, producing stolons and rhizomes simultaneously, useful for erosion control and soil conservation, found on sandy soils and dunes, open meadows, along roadsides, waste places, thickets, riverbanks, rocky soils, lawns, open habitats, fields, disturbed ground, hillsides, pastures, modified grassland, peaty soil, dry fields, often associated with *Festuca rubra* L., hybridizes with *Agrostis stolonifera* L., see *Species Plantarum* 1: 62-63. 1753, *Flora Anglica* 27-28. 1762, *Mantissa Plantarum* 1: 31. 1767, *Flora Anglica, Editio Altera* 1: 31. 1778, *Flora Oxoniensis* 36. 1794, *An Arrangement of British Plants, Third Edition* 1796, *Species Plantarum* 1: 366, 370. 1797, *Essai d'une Chloris du Département des Landes, à Dax ...* 26. 1803, *Synopsis Plantarum* 1: 75. 1805, *Essai sur la Flore du Département de Maine et Loire* 28. 1809, *Descriptio uberior Graminum* 65. 1817, *Systema Vegetabilium* 2: 281. 1817, *A Natural Arrangement of British Plants* 2: 147. A. clavata Trin. var. *szechuanica* Y.C. Tong ex Y.C. Yang (*Agrostis szechuanica* (Y.C. Tong ex Y.C. Yang) L. Liou)

China. See *Neue Entdeckungen im ganzen Umfang der Pflanzenkunde* 2: 55. 1821 and *Bulletin of Botanical Research* 4(4): 99. 1984, *Vascular Plants of the Hengduan Mountains* 2: 2247. 1994 [Heng Duan shan qu wei guan zhi wu = Vascular plants of the Heng Duan mountains: vol 2 / editor-in-chief: Wang Wen Tsai, / vice editor-in-chief: Wu Su Gong / editors: Lang Kai Yong, Li Pei Qiong, Pu Fa Ting, Chen Shu Kun. Beijing: Science Press, 1994].

A. clivicola Crampton (*Agrostis densiflora* Vasey)

U.S., California. See *Contributions from the United States National Herbarium* 3(1): 72. 1892 and *Brittonia* 19: 174. 1967.

in English: coastal bluff bentgrass

A. clivicola Crampton var. *clivicola*

U.S. See *Brittonia* 19: 174. 1967.

in English: coastal bluff bentgrass

A. clivicola Crampton var. *punta-reyesensis* Crampton

U.S., California. Vulnerable species, see *Brittonia* 19: 174. 1967.

in English: Point Reyes bentgrass

A. continuata Stapf (*Agrostis natalensis* Stapf)

South Africa. Perennial, tufted, coarse, inflorescence spicate dense and narrow, overlapping spikelets, found in moist places, wet sites, sandy areas, see *Kew Bulletin* 1897: 290. 1897 [*Bulletin of Miscellaneous Information Kew* 1897: 290. 1897].

A. curtisii Kerguelen (*Agrostis setacea* Curtis)

Europe. Perennial, densely tufted, panicle purple and oblong, useful for erosion control, see William Curtis (1746-1799), *Flora Londinensis* London [1775-] 1777-1798 and *Lejeunia* 75(Err. & Corr.): 1. 1975, *Bulletin de la Société Botanique de France* 123(5-6): 318. 1976, *Boletim da Sociedade Broteriana, ser. 2* 61: 81-104. 1988, *Boletim da Sociedade Broteriana, ser. 2* 63: 153-205. 1990.

in English: bristle-leaved bent grass

A. cypricola Lindb.f.

Cyprus. Indeterminate species, see Harald Lindberg, 1871-1963, *Itinera mediterranea*. Helsingfors 1932, *Årsbok-vousikirja. Societas Scientiarum Fennica ...* 20(7): 5. Helsinki 1942.

A. densiflora Vasey (*Agrostis arenaria* (Vasey) Scribn., nom. illeg., non *Agrostis arenaria* Gouan; *Agrostis californica* Trin.; *Agrostis clivicola* Crampton; *Agrostis clivicola* var. *clivicola*; *Agrostis clivicola* Crampton var. *punta-reyesensis* Crampton; *Agrostis densiflora* var. *arenaria* Vasey; *Agrostis densiflora* var. *densiflora*; *Agrostis glomerata* auct. non (J. Presl) Kunth)

U.S., California. Perennial, dense inflorescence cylindrical, glumes back scabrous, lemma sometimes awned above middle, awn straight, seashore, sandy soils, coastal bluffs, see *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 6,4(3-4): 328, 359. 1841, *Bulletin of the Torrey Botanical Club* 13: 54. 1886, *Contributions from the United States National Herbarium* 3(1): 72. 1892 and *Brittonia* 19: 174. 1967.

in English: bent grass, California bent grass, California bentgrass, Point Reyes bent grass, coastal bluff bent grass

A. diffusa S.M. Phillips (*Agrostis kilimandscharica* Mez; *Agrostis kilimandscharica* var. *sororia* (C.E. Hubb.) Hedberg; *Agrostis sororia* C.E. Hubb.)

Ethiopia. Perennial, slender, loosely tufted, ascending, straggling, linear leaves, large inflorescence paniculate, open panicle ovate, glumes unequal and keeled, lemma awned, awn geniculate, see *Repertorium Specierum Novarum Regni Vegetabilis* 18(1-3): 2. 1922, *Bulletin of Miscellaneous Information Kew* 1936(5): 303. 1936, *Symbolae Botanicae Upsaliensis* 15: 51. 1957, *Kew Bulletin* 41(1): 137, f. 4A-D. 1986.

A. dimorpholemma Ohwi

Japan, Asia. Indeterminate species, see *Botanical Magazine (Tokyo)* 55(656): 351. 1941.

A. drummondiana (Steud.) Vickery (*Deyeuxia drummondiana* (Steud.) Benth.; *Deyeuxia drummondii* (Steud.) Benth.; *Dichelachne drummondiana* Steud.; *Lachnagrostis drummondiana* (Steud.) Rúgolo & A.M. Molina; *Lachnagrostis drummondiana* (Steud.) S.W.L. Jacobs)

Western Australia. Annual, caespitose, noded, auricles absent, basal leaf sheaths not keeled, ligule membranous, inflorescence of chasmogamous spikelets, a panicle yellowish green and loosely contracted, see *Synopsis Plantarum Glumacearum* 1: 120. 1854, *Flora Australiensis: A Description ...* 7: 580. 1878 and *Contributions from the New South Wales National Herbarium* 1(3): 111. 1941, *Blumea* 22(1): 5-12. 1974, *Telopea* 9(3): 445. 2001.

A. dyeri Petrie (*Agrostis dyeri* var. *aristata* Hack.) (named for the British (b. Westminster, London) botanist Sir William Turner Thiselton-Dyer, 1843-1928 (d. Witcombe, Gloucestershire), married the eldest daughter of Sir J.D. Hooker Lady Harriet Ann Hooker (1854-1945, d. Weir Quay, Devon), student of Thomas Henry Huxley (1825-1895), naturalist, professor of Natural History and Botany, 1872 private secretary and editorial assistant to J.D. Hooker, 1872 Fellow of the Linnean Society, from 1872 to 1876 taught botany at the Royal Horticultural Society at South Kensington and Chiswick, 1880 Fellow of the Royal Society, succeeded his father-in-law (Sir J.D. Hooker) as Director of the Royal Botanic Gardens at Kew 1885-1905, 1899 knighted, his works include *Cycadaceae of Mexico and Central America*. London 1883, with Henry Trimen (1843-1896) published *Flora of Middlesex*. 1869, with Arthur H. Church *How Plants Grow*. 1869, 1902-1913 editor of *Flora of Tropical Africa*, in 1905-1906 editor of the *Curtis's Botanical Magazine*. See Gerald L. Geison, in *D.S.B.* 13: 341-344. 1981; Gilbert Westacott Reynolds (1895-1967), *The Aloes of South Africa*. 95, 249, 499. Balkema, Rotterdam 1982; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Fletcher, *Story of the Royal Horticultural Society, 1804-1968*. Oxford 1969; Andrew Thomas Gage (1871-1945), *A History of the Lin-*

nean Society of London. London 1938; H.R. Fletcher & W.H. Brown, *Royal Botanic Garden Edinburgh, 1670-1970*. Edinburgh 1970; A. White & B.L. Sloane, *The Stapelieae*. Pasadena 1937; Ernest Nelmes & William Cuthbertson, *Curtis's Botanical Magazine Dedications, 1827-1927*. [1931]; Francis Wall Oliver (1864-1951), editor, *Makers of British Botany*. Cambridge 1913).

New Zealand. Subalpine to alpine, tufted, stiff, erect or geniculate at base, leaf blade usually flat, leaf sheaths membranous and ribbed, ligule truncate, panicle lanceolate and narrowly branched, panicle open or contracted after flowering, glumes equal to subequal smooth and acute, awn absent or present, found in grassland, herbfield, tussock grassland, see *Transactions and Proceedings of the New Zealand Institute* 22: 441. 1889 and *Manual of the New Zealand Flora* 865. 1906, *New Zealand J. Bot.* 25: 41-78. 1987, *New Zealand J. Bot.* 29: 148-149. 1991.

A. elliotii Hack. (for the English (b. India, Calcutta) botanist George Francis Scott-Elliot, 1862-1934 (d. Dumfries, Scotland), 1890 Fellow of the Linnean Society, botanist on the Sierra Leone Boundary Commission, plant collector in Sierra Leone (1891-1892) and in East Africa (with the British East Africa Expedition, 1893-1894), President of the Antiquarian Society, among his writings are *Report on the District Traversed by the Anglo-French Boundary Commission*. Sierra Leone. Botany. 1893, *The Flora of Dumfriesshire*. Dumfries 1896 and *A Naturalist in Mid-Africa: Being an Account of a Journey to the Mountains of the Moon and Tanganyika*. London 1896; see Samuel P. Oliver, *The Life of Philibert Commerson*. Edited by G.F. Scott-Elliot. London 1909; J.H. Barnhart, *Biographical notes upon botanists*. 1: 504. 1965; Benjamin Daydon Jackson (1846-1927), "A list of the contributors to the herbarium of the Royal Botanic Gardens, Kew, brought down to 31st December 1899." *Bull. Misc. Inf. Kew*. 1901 and "A list of the collectors whose plants are in the herbarium of the Royal Botanic Gardens, Kew, to 31st December 1899." in *Kew Bulletin*. 1-80. 1901; Mary Gunn & Leslie E. Codd, *Botanical Exploration of Southern Africa*. 320. Cape Town 1981; [Sotheby's - Marquess of Bute], *Catalogue of a portion of the valuable library from Dumfries House, Ayrshire*. The Property of the Most Hon. The Marquess of Bute. The First Portion: the important collection of mathematical and scientific books. Sale of 3-4 July 1961. The Second Portion: Americana, early printed books, travel, early Italian literature, bibliography, books on the arts and architecture. Sale of 16-18 Oct. 1961. London; F.N. Hepper and Fiona Neate, *Plant Collectors in West Africa*. 73-74. 1971; G. Murray, *History of the Collections Contained in the Natural History Departments of the British Museum*. London 1904; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933; Auguste Jean Baptiste Chevalier (1873-1956), *Flore vivante*

de l'Afrique Occidentale Française. 1: xxvii-xxx. Paris 1938)

Madagascar. See *Journal of the Linnean Society, Botany* 29: 65. 1891.

A. *elliottiana* J.A. Schultes (*Agrostis arachnoides* Elliott, nom. illeg., non *Agrostis arachnoides* Poir.; *Agrostis elliottiana* Schult.f. *elliottiana*; *Agrostis elliottiana* f. *molesta* Shinnery; *Agrostis exigua* Thurb.; *Notonema agrostoides* Raf. ex Merr.; *Notonema arachnoides* Raf. ex B.D. Jacks.) (named for the American botanist Stephen Elliott, 1771-1830, author of *A Sketch of the Botany of South-Carolina and Georgia*. Charleston 1821-1824; see J.H. Barnhart, *Biographical notes upon botanists*. 1: 504. Boston 1965; J.W. Harshberger, *The Botanists of Philadelphia and Their Work*. Philadelphia 1899; Jeannette E. Graustein, *Thomas Nuttall, Naturalist. Explorations in America, 1808-1841*. Harvard University Press 1967; Ernest Earnest, *John and William Bartram, Botanists and Explorers 1699-1777, 1739-1823*. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 115. 1972; William Darlington (1782-1863), *Reliquiae Baldwinianae*. Philadelphia 1843; S. Lenley et al., *Catalog of the manuscript and archival collections and index to the correspondence of John Torrey*. Library of the New York Botanical Garden. 454. 1973)

Northern America, U.S., Indiana, Missouri. Annual, delicate, caespitose, lower blades flat to inrolled, rhizomatous, open inflorescence paniculate with lower branches spreading and upper ascending, lemma generally awned from near tip, awn wavy to bent, found in fields, foothills, roadsides, rocky riverbeds, vernal pool margins, open sandy soils, dry soils, see *Encyclopédie Méthodique, Botanique* Suppl. 1: 249. 1810, *A Sketch of the Botany of South-Carolina and Georgia* 1: 134. 1816, *Mantissa* 2: 202. 1824, *Geological Survey of California, Botany* 2: 275. 1880, *Index Kewensis* 2: 319. 1894 and *Index Rafinesquianus* 74, 76. 1949, *Rhodora* 56(662): 28. 1954, *Phytologia* 37(4): 317-407. 1977, *Taxon* 34: 547-551. 1985.

in English: Elliott's bent, Elliott's bent grass, annual tick-legrass

A. *eriantha* Hack.

South Africa. Perennial, tufted, rhizomatous, inflorescence a large open panicle with spreading and straight branches, lemmas with delicate awns, relatively palatable, little grazing value, grows in wet and damp areas, open sour grassland, cultivated lands, in mountain grassveld, see *Vierteljahrsschrift der Naturforschenden Gesellschaft in Zürich* 49: 172. 1904.

in English: large panicle agrostis

in South Africa: grootpluim-agrostis

A. *eriantha* Hack. var. ***eriantha***

South Africa. Perennial, tufted, rhizomatous, folded leaf blade, panicle with rigid and straight branches, lemmas awned, grows in wet areas, disturbed areas, cultivated lands.

A. *eriantha* Hack. var. ***planifolia*** Gooss. & Papendorf

South Africa. Rare species, flat leaf blade, see *South Africa J. Sci.* 41: 181. 1945.

A. *exarata* Trinius (*Agrostis aenea* Trinius; *Agrostis aenea* (Trin.) Trin.; *Agrostis alashana* Hultén; *Agrostis alaskana* Hultén; *Agrostis alascana* Hultén; *Agrostis alaskana* var. *breviflora* Hultén; *Agrostis albicans* Buckley; *Agrostis ampla* A.S. A. goughensis C.E. Hubb. (Gough Island is situated at 40°20'S, 10°0'W, 230 miles (350 km) South East of Tristan da Cunha, South Atlantic Ocean)

Tristan da Cunha. Indeterminate species, see J.B. Heaney & M.W. Holdgate, "The Gough Island Scientific Survey." *Geographical Journal* 123: 20-31. 1957, *Bulletin of the British Museum (Natural History), Botany* 8: 379. 1981, Y.M. Chamberlain, M.W. Holdgate and N.M. Wace, "The littoral ecology of Gough Island, South Atlantic Ocean." *Tethys* 11: 302-319. 1985.

A. gracilifolia C.E. Hubb. (*Agrostis bryophila* var. *elgonensis* C.E. Hubb.; *Agrostis dissitiflora* C.E. Hubb.; *Agrostis leptophylla* C.E. Hubb.)

Uganda. Perennial bunchgrass, variable, alpine, slender, erect, loosely to densely tufted, leaf blades filiform, open inflorescence paniculate lanceolate, panicle branches spreading, spikelets lanceolate, glumes subequal, lemma mucronate and awned, awn geniculate, damp grassland, mountains, moist or boggy places, meadows, see *Kew Bulletin* 1936(5): 307-309. 1936, *Bulletin of Miscellaneous Information Kew* 1937: 63. 1937.

A. gracilifolia C.E. Hubb. subsp. *bryophila* (C.E. Hubb.) S.M. Phillips (*Agrostis bryophila* C.E. Hubb.; *Agrostis bryophila* var. *bryophila*)

Uganda, Zaire. Perennial, loosely tufted, glabrous lemma, awn geniculate, see *Bulletin of Miscellaneous Information Kew* 1936(5): 307, 309. 1936 [*Kew Bulletin* 1936(5): 307, 309. 1936], *Opera Botanica* 121: 54, f. 3,3. 1993.

A. gracilifolia C.E. Hubb. subsp. *gracilifolia* (*Agrostis bryophila* var. *elgonensis* C.E. Hubb.; *Agrostis dissitiflora* C.E. Hubb.; *Agrostis leptophylla* C.E. Hubb.; *Agrostis volkensii* var. *deminuta* Pilg.)

Uganda, Kenya. Perennial, densely tufted, lemma glabrous or pilose, awn geniculate, see *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 9(87): 512. 1926.

A. gracilifolia C.E. Hubb. subsp. *parviflora* S.M. Phillips
Ethiopia. Perennial, loosely tufted, ligule pointed to acute, narrow leaves, awn geniculate, see *Opera Botanica* 121: 55, f. 3,1. 1993.

A. griffithiana (Hook.f.) Bor (*Calamagrostis griffithiana* Hook.f.)

India, Himachal Pradesh, Uttar Pradesh, Meghalaya, Nagaland. Lemma hairy, awn of lemma always exerted, found growing on moist places, on hilly slopes, see *The Flora of British India* 7(22): 263. 1897 [1896] and *Grasses of Burma, Ceylon, India and Pakistan* 387. 1960.

A. hallii Vasey (*Agrostis davyi* Scribn.; *Agrostis hallii* var. *hallii*; *Agrostis hallii* var. *pringlei* (Scribn.) A.S. Hitchc.; *Agrostis occidentalis* Scribn. & Merr.; *Agrostis pringlei* Scribn.) (named for Elihu Hall, 1822-1882, plant collector in U.S., with J.P. Harbour in plant collecting expedition to the mountains of central Colorado; see Joseph Ewan, *Rocky Mountain Naturalists*. 36, 221, 223-224, 278, 285, 340. The University of Denver Press 1950; Edith M. Allison, "Bibliography and History of Colorado Botany." *Univ. Colorado Studies*. 6: 51-76. 1908; *Mem. New York Bot. Gard.* 19(3): 331. 1975; Stafleu & Cowan, *Taxonomic literature*. 2: 17-18. Utrecht 1979; J.H. Barnhart, *Biographical notes upon botanists*. 2: 113. 1965; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 159. 1972; S. Lenley et al., *Catalog of the manuscript and archival collections and index to the correspondence of John Torrey*. Library of the New York Botanical Garden. 192. 1973; Ethelyn Maria Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933)

U.S., California, Oregon. Perennial, rhizomatous, lower leaf blades flat, open to compact inflorescence lanceolate to ovate with branches ascending to appressed, awnless, hillsides, moist areas, open oak woodland, coniferous forest, see *Contributions from the United States National Herbarium* 3(1): 74. 1892, *Bulletin, Division of Agrostology United States Department of Agriculture* 7: 156, f. 138. 1897 and *Circular, Division of Agrostology, United States Department of Agriculture* 30: 3. 1901, *Bulletin of the Torrey Botanical Club* 29(7): 466. 1902, *U.S. Department of Agriculture Bureau of Plant Industry Bulletin* 68: 33, t. 12. 1905.

in English: Hall's bent grass, Hall's bent, Hall's bentgrass, Hall redtop

A. hendersonii A.S. Hitchc. (*Agrostis aristiglumis* Swallen; *Agrostis microphylla* Steud. var. *hendersonii* (A.S. Hitchc.) Beetle) (named for professor Louis Forniquet Henderson, 1853-1942, botanist, University of Idaho, plant collector, friend of Charles Vancouver Piper, 1867-1926; see Joseph Ewan, *Rocky Mountain Naturalists*. 36, 227. 1950)

U.S., California, Oregon. Endangered and rare species, uncommon, annual, lower leaf blades flat to inrolled, inflorescence cylindrical with branches ascending to appressed, glumes tip acuminate, lemma awned at the middle, awn more or less bent, palea absent, found in wet areas, vernal pools, see *Synopsis Plantarum Glumacearum* 1: 164. 1854 and *Journal of the Washington Academy of Sciences* 20(15):

381. 1930, *Bulletin of the Torrey Botanical Club* 72(6): 547, f. 8. 1945.

in English: Henderson's bent grass, Henderson's bent, Henderson's bentgrass

A. hideoi Ohwi (*Senisetum hideoi* (Ohwi) Honda)

Asia, Japan. Indeterminate species, see *Botanical Magazine* (Tokyo) 44: 568. 1930 and 46: 371. 1932.

A. hissarica Roshev. (*Polypogon hissaricus* (Roshev.) Bor)

Iran. Open panicle, see *Flora Iranica* ... 70: 307. 1970, *Cytologia* 56: 437-452. 1991.

A. holdgateana C.E. Hubb.

Tristan da Cunha. Indeterminate species, see J.B. Heaney & M.W. Holdgate, "The Gough Island scientific survey." *Geographical Journal* 123: 20-31. 1957, M.W. Holdgate, "The biological report of the Royal Society Expedition to Tristan da Cunha, 1962, part III—the fauna of the Tristan da Cunha islands." *Philosophical Transactions, Royal Society of London Series B, Biological Sciences* 249: 361-402. 1965, N.M. Wace & M.W. Holdgate, *Man and Nature in the Tristan da Cunha Islands*. Gland and Cambridge, IUCN. (IUCN Monograph No. 6) 1976, Y.M. Chamberlain, M.W. Holdgate and N.M. Wace, "The littoral ecology of Gough Island, South Atlantic Ocean." *Tethys* 11: 302-319. 1985.

A. hookeriana C.B. Clarke ex Hook.f. (*Agrostis hookeriana* C.B. Clarke; *Agrostis hookeriana* Munro ex Duthie; *Agrostis poluninii* Bor)

India, Nepal, Jammu-Kashmir, Himachal Pradesh, Sikkim, Tamil Nadu. Lemma glabrous and awned, grows at higher altitudes, see *Grasses of North-Western India* 30. 1883, *The Flora of British India* 7(22): 256. 1897 [1896] and *Kew Bulletin* 1953: 269. 1953, *Bulletin of Botanical Research* 4(4): 100-101, f. 6. 1984.

A. hooveri Swallen (dedicated to Robert Francis Hoover, 1913-1970)

U.S., California. Vulnerable and rare species, uncommon, perennial, lower leaf sheaths finely tomentose, leaf blades flat and inrolled, inflorescence lanceolate with ascending branches, lemma awned below middle, awn bent, palea absent, in dry sandy soils, open woodland, oak woodland, open chaparral, see *Leaflets of Western Botany* 5(12): 198. 1949.

in English: Hoover's bent grass, Hoover's bent, Hoover's bentgrass

A. howellii Scribn. (after the American botanist Thomas Jefferson Howell, 1842-1912, see J.H. Barnhart, *Biographical notes upon botanists*. 2: 211. 1965; Joseph Ewan, *Rocky Mountain Naturalists*. 73, 227. 1950; T.W. Bossert, compil., *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 184. 1972; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. 1917-1933; R. Zander, F. Encke, G. Buch-

heim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993; J. Ewan, edition, *A Short History of Botany in the United States*. New York and London 1969)

U.S., Oregon. Vulnerable species, see *Contributions from the United States National Herbarium* 3(1): 76. 1892.

in English: Howell's bent grass, Howell's bent

A. hugoniana Rendle

China. Found in subalpine meadows, abandoned fields, see *Journal of the Linnean Society, Botany* 36(254): 389-390. 1904, *Bulletin of Botanical Research* 4(4): 99-100, f. 4. 1984.

A. hugoniana Rendle var. *aristata* Keng ex Y.C. Yang

China. See *Journal of the Linnean Society, Botany* 36(254): 389-390. 1904, *Bulletin of Botanical Research Harbin* 4(4): 99-100, f. 4. 1984.

A. humilis Vasey (*Agrostis thurberiana* A.S. Hitchc.; *Podagrostis humilis* (Vasey) Björkman; *Podagrostis thurberiana* (A.S. Hitchc.) Hultén)

British Columbia, California, Oregon, Sierra Nevada. Perennial, tufted, no auricles, open sheaths, ligule somewhat toothed, leaves mostly basal, very narrow leaves, inflorescence narrowly oblong and open, small and narrow flower head, awnless, palea present, rare species, grows in subalpine to alpine meadows, slopes and stream banks, intergrades with *Agrostis thurberiana* Hitchc., see *Bulletin of the Torrey Botanical Club* 10: 21. 1883 and *Symbolae Botanicae Upsaliensis* 17: 15. 1960.

in English: mountain bent grass, alpine bentgrass

A. hyemalis (Walter) Britton, Sterns & Poggenburg (*Agrostis hyemalis* (Walter) Lunell; *Agrostis antecedens* E.P. Bicknell; *Agrostis canina* var. *hiemalis* (Walter) Kuntze; *Agrostis canina* var. *hyemalis* (Walter) Kuntze; *Agrostis hiemalis* (Walter) Britton, Sterns & Poggenb.; *Agrostis hyemalis* (Walter) Lunell; *Agrostis hyemalis* var. *hyemalis*; *Agrostis hyemalis* var. *laxiflora* (Michx.) Beetle; *Agrostis laxiflora* Poir.; *Agrostis leptos* Steud.; *Agrostis scabra* Willd.; *Cornucopiae hyemalis* Walt.; *Trichodium laxiflorum* Muhl., nom. illeg., non *Trichodium laxiflorum* Michx.; *Trichodium laxum* Schult.)

Asia, Japan, Korea, U.S., Mexico, northern America. Perennial, tufted, slender, erect to decumbent, no auricles, sheaths glabrous, ligule hyaline and often erose, leaves mostly basal and very narrow, panicle open and diffuse, spikelets purplish or reddish, panicles break off and blow around in the wind, palea absent, found in dry fields, in dry to moist open soils, dry sandy places, sandy soil, seepage areas, sterile soil, ditches, stream banks, shores and rocky shores, wet meadows, open woods, open fallow field, abandoned fields, see *Flora Caroliniana, secundum* ... 73. 1788, *Species Plantarum. Editio quarta* 1: 370. 1797, *Flora Boreali-Americana* 1: 42, t. 8. 1803, *Encyclopédie Méthodique. Botanique* ... *Supplément* 1: 255. 1810, *Descriptio uberior*

Graminum 60. 1817, *Mantissa* 2: 157. 1824, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 222. 1833, *Synopsis Plantarum Glumacearum* 1: 169. 1854, *Pittonia* 1: 184-189. Berkeley, California, U.S. 1888, *Preliminary Catalogue of Anthophyta and Pteridophyta Reported as Growing Spontaneously within One Hundred Miles of New York City* 68. in English: winter bent, winter bentgrass, ticklegrass, slender bent grass, fly-away grass, hairgrass

in French: agrostis d'hiver

A. *hyemalis* (Walter) Britton & al. var. ***hyemalis***

Northern America, U.S. Annual, small, caespitose, clumps forming, disturbed soil, moist areas, dry places, ravines, see *Preliminary Catalogue of Anthophyta and Pteridophyta Reported as Growing Spontaneously within One Hundred Miles of New York City* 68. New York 1888.

in English: winter bentgrass, ticklegrass, hairgrass

in French: agrostis d'hiver

A. *hyemalis* (Walter) Britton & al. var. ***scabra*** (Willd.) H.L. Blomq. (*Agrostis hyemalis* var. *tenuis* (Tuck.) Gleason; *Agrostis scabra* Willd.; *Agrostis scabra* var. *tenuis* Tuck.)

Asia, Japan, Korea, U.S., Mexico, Canada, Northern America. Annual, useful for erosion control, see *Species Plantarum. Editio quarta* 1: 370. 1797, *American Journal of Science and Arts* 45: 45. 1843, *Preliminary Catalogue of Anthophyta and Pteridophyta Reported as Growing Spontaneously within One Hundred Miles of New York City* 68. New York 1888 and *Phytologia* 4(1): 21. 1952, *Diversity* 16: 43-45. 2000.

in English: rough hair grass, winter bentgrass, ticklegrass, hairgrass

A. *hygrometrica* Nees (*Agrostis juergensii* Hack.; *Bromidium hygrometricum* (Nees) Nees & Meyen; *Bromidium ramboi* (Parodi) Rúgolo; *Bromidium ramboi* (Parodi) Rúgolo var. *ramboi*; *Deyeuxia hygrometrica* (Nees) Speg.) (for Balduino Rambo, S.J., 1905-1961, plant collector in Brazil)

Southern America, southern Brazil to Argentina, Uruguay. Contracted panicle, lemma 5-awned and one awn conspicuous, found near rivers, small streams, low fields, marshy ground, see *Flora Brasiliensis seu Enumeratio Plantarum* 2: 404. 1829, *Gramineae* 23. 1841, *Revisio Generum Plantarum* 3(3): 343. 1898 and *Repertorium Specierum Novarum Regni Vegetabilis* 7: 318. 1909, *Bradea*, *Boletim do Herbarium Bradeanum* 2(35): 244. 1978, *Flora Illustrada Catarinense* 1(Gram.): 443-906. 1982.

A. *hygrometrica* Nees var. ***hygrometrica*** (*Agrostis juergensii* Hack.; *Agrostis ramboi* Parodi; *Bromidium hygrometricum* (Nees) Nees & Meyen)

South America. See *Flora Brasiliensis seu Enumeratio Plantarum* 2: 404. 1829, *Gramineae* 23. 1841, *Nova Acta Phys.-Med. Acad. Caes. Leop.-Carol. Nat. Cur.* 19(Suppl. 1): 155. 1843 and *Repertorium Specierum Novarum Regni Vegetabilis* 7: 318. 1909, *Boletín de la Sociedad Argentina de Botánica* 1: 119, f. 1. 1946.

A. lachnantha Nees (*Agrostis vestita* Hochst. ex A. Rich.; *Lachnagrostis lachnantha* (Nees) Rúgolo & A.M. Molina)

Tropical Africa, Namibia, Sudan, South Africa, Yemen, Ethiopia. Annual or short-lived perennial bunchgrass, slender, erect or ascending, sometimes rooting at the nodes, loosely tufted, forming small clumps, sometimes stoloniferous or rhizomatous, ligule a membrane-like, narrow spike-like panicle with ascending branches, glumes persistent after the flower has fallen, lemma 3-nerved and pilose, useful to stabilizing waterlogged soils, found in open habitats, rocky soil, pastures, swamps and marshes, pond margins, low lying areas, wet areas, mountain springs, see *Linnaea* 10(Litt.): 115-116. 1836, *Tentamen Florae Abyssinicae ...* 2: 401. 1850 and *Prodromus einer Flora von Südwestafrika* 160: 1-228. 1970, *Annals of the Missouri Botanical Garden* 75: 866-873. 1988, *Bothalia* 26(1): 63-67. 1996, Alina Freire Fierro y David A. Neill, eds, *La Botánica en el Nuevo Milenio: Memorias del Tercer Congreso Ecuatoriano de Botánica* 29. Quito 2002 [Publicaciones de la Fundación Ecuatoriana para la Investigación y el Desarrollo de la Botánica].

in English: South African bent grass, bent grass

in Southern Africa: sesweu, vinkagrostis, vinkgras, vleigras, mohlwa wa mafika (= grass of the boulders), chabola, tjhabola, tihaloa, tjhaola

A. lachnantha Nees var. **glabra** Gooss. & Papendorff

South Africa. See *Linnaea* 10: 115-116. 1836 and *South African Journal of Science* 41: 184. 1945.

A. lachnantha Nees var. **lachnantha** (*Agrostis huttoniae* (Hack.) C.E. Hubb.; *Agrostis huttoniae* (Hack.) C.E. Hubb. ex Gooss. & Papendorff; *Agrostis lachnantha* var. **glabra** Goossens & Papendorff; *Calamagrostis huttoniae* Hack.)

Tropical Africa, Sudan, South Africa. Perennial bunchgrass or annual, short-lived, loosely tufted, robust, forming small clumps, found in open habitats, riverbanks, seepage, wet places, marshy areas, see *Linnaea* 10: 115-116. 1836 and *Rec. Albany Museum* 1: 340. Grahamstown 1905, *Flora of*

Tropical Africa 10: 172. 1937, *South African Journal of Science* 41: 179. 1945.

in English: South African bent grass

in Southern Africa: bandgras, kruipgras, polgras, roggras, vinkagrostis, vinkgras, vleigras; chabola (Sotho)

A. lacunis D.I. Morris (*Lachnagrostis lacunis* (D.I. Morris) S.W.L. Jacobs)

Tasmania. Perennial, hydrophytic, aquatic, erect or geniculate to ascending, branched above and rooting at the nodes, leaves nonauriculate, basal leaf sheaths not keeled, ligule membranous, chasmogamous spikelets, panicle open and pyramidal, growing in shallow water, see *Muelleria* 7(2): 149-153. 1990, *Telopea* 9(3): 446. 2001.

A. laxissima Swallen (*Agrostis abietorum* Swallen)

Guatemala. See *Contributions from the United States National Herbarium* 29(9): 402-403. 1950.

A. lehmannii Swallen

Colombia. Páramo, see *Contributions from the United States National Herbarium* 29(6): 263-264. 1948 [1949].

A. lenis Roseng., Arrill. & Izag.

Southern Brazil and Uruguay. Perennial, erect, ascending, stoloniferous, panicle effuse, lemma awnless, callus glabrous, common in swampy places, sandy soils, see *Gramíneas Uruguayas* 19, 21, 23-24, f. 1. 1970.

A. lepida A.S. Hitchc. (*Agrostis pallens* Trin.)

U.S., California, Oregon. Rare species, found in open areas, gravelly soil, woods, see *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 6,4(3-4): 328. 1841 and *A Flora of California* 1: 121. 1912.

in English: sequoia bent grass

A. leptotricha E. Desv. (*Agrostis lechleri* Steud.; *Agrostis moyanoi* Speg.; *Agrostis moyanoi* var. **major** Speg.; *Agrostis moyanoi* var. **puberigluma** Speg.) (dedicated to the German botanist Wilibald (Willibaldus) Lechler, 1814-1856, naturalist, pharmacist, explorer, 1850-1855 Chile) (for Carlos Moyano, Argentina)

Southern America, Chile, Argentina. See *Flora Chilena* 6: 316, t. 76, f. 1. 1854, *Synopsis Plantarum Glumacearum* 1: 422. 1854, *Revista de la Facultad de Agronomía; Universidad Nacional de La Plata* 3: 627. 1897 and *Anales Museo Nacional de Historia Natural de Buenos Aires* 7: 189. 1902, *Gayana, Botánica* 42: 1-157. 1985, *Gayana, Botánica* 54(2): 113. 1997.

A. liebmanni (E. Fourn.) Hitchc. (*Apera liebmanni* E. Fourn.)

America. See *Mexicanas Plantas* 2: 97. 1886 and *North American Flora* 17(7): 519. 1937.

A. limitanea J. Black (*Lachnagrostis limitanea* (J.M. Black) S.W.L. Jacobs)

South Australia. Endangered species, perennial, noded, tufted, glabrous, erect, stiff, leaves nonauriculate, basal leaf sheaths densely scabrous, ligule acute and membranous, loose panicle partially exerted, glumes scabrous on the keel, lemmas glabrous and awnless, callus glabrous, see *Transactions and Proceedings of the Royal Society of South Australia* 55: 137, f. 5. 1931, *Telopea* 9(3): 446. 2001.

A. limprichtii Pilger (for the German botanist Hans Wolfgang Limpricht, b. 1877, traveler, botanical explorer in China and Tibet, wrote *Botanische Reisen in den Hochgebirgen Chinas und Ost-Tibets*. Dahlem bei Berlin 1922, he was son of the German bryologist Karl Gustav Limpricht (1834-1902); see E.D. Merrill & Egbert H. Walker, *A Bibliography of Eastern Asiatic Botany*. 273. The Arnold Arboretum of Harvard University, Jamaica Plain, Massachusetts 1938; J.H. Barnhart, *Biographical notes upon botanists*. 2: 382. 1965; T.W. Bossert, compil., *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 238. 1972; S. Lenley et al., *Catalog of the manuscript and archival collections and index to the correspondence of John Torrey*. Library of the New York Botanical Garden. 267 and 268. 1973)

Asia, China. Alpine shrub, subalpine meadows, pastures, rocky clay loam, marsh meadow, granitic gravelly loam, see *Repertorium Specierum Novarum Regni Vegetabilis, Beihefte* 12: 307. 1922.

A. longiberbis Hack. (*Agrostis capillaris* L.; *Agrostis longiberbis* Hack. ex L.B. Sm.; *Agrostis longiberbis* Hack. ex Usteri; *Calamagrostis capillaris* Nees ex Steud.)

Southern Brazil. Panicle effuse, lemma awnless, callus ciliate, found in fields, see *Species Plantarum* 1: 62. 1753, *Synopsis Plantarum Glumacearum* 1: 188. 1854 and Alfred Usteri, *Flora der Umgebung der Stadt São Paulo in Brasilien* 152. Jena 1911, *Phytologia* 22(2): 88, f. 1-3. 1971.

A. longiligula Hitchc. (*Agrostis exarata* Trin.)

Northern America, U.S., California. Found in shallow water, swamps, wet meadow, see *De Graminibus unifloris et sesquifloris* 207. Petropoli 1824 and *U.S. Department of Agriculture Bureau of Plant Industry Bulletin* 68: 54, t. 36, f. 3. 1905, *Leaflets of Western Botany* 4: 246. 1946.

in English: Pacific bentgrass, long-tongue bent

A. lyallii Hook.f. (*Deyeuxia filiformis* var. *lyallii* (Hook.f.) Petrie; *Deyeuxia filiformis* var. *lyallii* (Hook.f.) Zotov; *Deyeuxia forsteri* var. *lyallii* (Hook.f.) Hack.; *Lachnagrostis lyallii* (Hook.f.) Zotov) (named for the British (b. Kincardineshire) naturalist David Lyall, 1817-1895 (Cheltenham, Glos), British Columbia Boundary Commission, surgeon, explorer, plant collector, botanist, 1839-1842 on Ross's Antarctic Voyage, 1847 New Zealand, 1852 with Edward Belcher (1799-1877) in the Arctic (a search for the lost

Franklin expedition), in 1862 a Fellow of the Linnean Society. See J.H. Barnhart, *Biographical notes upon botanists*. 2: 415. 1965; H.N. Scribn.; *Deyeuxia alopecuroides* Nutt. ex A. Gray; *Polypogon alopecuroides* Buckley)

British Columbia, Mexico, California. Annual, leaf blades scabrous, inflorescence dense and cylindrical, glumes acuminate, lemma awned from middle, awn slightly bent, palea absent, on wet soil, slopes, vernal pools, on rocks, cliffs, see *Nova Genera et Species Plantarum* 1: 135-136. 1815 [1816], *Gram. Unifl. Sesquifl.* 207. 1824, *Synopsis Plantarum Glumacearum* 1: 164. 1854, *Proceedings of the Academy of Natural Sciences of Philadelphia* 14: 88, 333. 1862, *Contributions from the United States National Herbarium* 3(1): 58, 72. 1892, *Canadian Record of Science* 6: 152. 1894 and *Circular, Division of Agrostology, United States Department of Agriculture* 30: 2-3. 1901, *American Journal of Botany* 2: 303. 1915, *Journal of the Washington Academy of Sciences* 20(15): 381. 1930, *Bulletin of the Torrey Botanical Club* 72(6): 547, f. 7, 8. 1945, *Leaflets of Western Botany* 5(3): 56. 1947.

in English: small-leaf bentgrass, small-leaf bent, small-leaved bentgrass, little-leaf bentgrass, awned bent grass

A. moldavica Dobrescu & Beldie (*Agrostis gigantea* subsp. *moldavica* (Dobrescu & Beldie) Dihoru)

Romania. Rare species.

A. mongolica Roshev.

Mongolia. Found on marshy areas along the rivers and small streams, moist meadows, dry stream beds, mountain steppe, dark soils.

A. montevidensis Spreng. ex Nees (*Agrostis canina* L. var. *montevidensis* (Spreng. ex Nees) Kuntze; *Agrostis laxiflora* var. *aristata* Griseb.; *Agrostis montevidensis* var. *aristata* Döll; *Agrostis montevidensis* var. *montevidensis*; *Agrostis montevidensis* var. *submutica* Döll)

Uruguay, southern Brazil to Argentina, Bolivia, Paraguay. Annual, rare, tufted, inflorescence a strongly spreading panicle with ascending branches, spikelets distant, straight pedicels, paleas usually absent, little grazing value, common in moist and disturbed areas, mountain grasslands, along roadsides, see *Encyclopédie Méthodique. Botanique ... Supplément* 1: 255. 1810, *Botanical Appendix to Captain Franklin's Narrative* 731. 1823, *Flora Brasiliensis seu Enumeratio Plantarum* 2: 403. 1829, *Abhandlungen der Königlichen Gesellschaft der Wissenschaften zu Göttingen* 19: 254. 1874, *Plantae lorentzianae*. [Plants collected by the German botanist Paul Günther Lorentz, 1835-1881.] 206. Göttingen 1874, *Flora Brasiliensis* 2(3): 29. 1878, *Revisio Generum Plantarum* 3(2): 338. 1898.

in English: fog grass

in Spanish: pasto ilusión

in South Africa: misbeltgras

A. montevidensis Spreng. ex Nees f. *montevidensis* (*Agrostis montevidensis* var. *aristata* Döll)

South America, Uruguay. See *Flora Brasiliensis* 2(3): 29. 1878.

A. montevidensis Spreng. ex Nees f. *submutica* (Döll) Kämpf (*Agrostis montevidensis* var. *submutica* Döll)

South America. See *Flora Brasiliensis* 2(3): 29. 1878 and *Anuário Técnico do Instituto de Pesquisas Zootécnicas "Francisco Osorio"* 2: 577. Porto Alegre 1974[1975].

A. muelleriana Vickery (*Agrostis canina* var. *gelida* (F. Muell.) Buchanan; *Agrostis canina* var. B. Hook.f.; *Agrostis gelida* F. Muell., nom. illeg., non *Agrostis gelida* Trin.; *Agrostis muelleri* Benth., nom. illeg., non *Agrostis muelleri* J. Presl)

New Zealand, Australia, Victoria, Tasmania, New South Wales. Annual, small, tufted to densely tufted, slender, erect, noded, nonauriculate, leaf blade with rough margins, leaf sheath more or less membranous, basal leaf sheaths not keeled, ligule membranous acute to truncate, leaf blades flat or folded or involute, inflorescence of chasmogamous spikelets, short panicles narrow and contracted, spikelets purplish, glumes acute to lanceolate more or less unequal,

lemma awned and glabrous, slender awn, palea minute and ovate, found in alpine and subalpine grasslands, wet situations, fens and bogs, seepages, rocky ground, see *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 6,4(3-4): 343. 1841, *Abhandlungen der Böhmisches Gesellschaft der Wissenschaften, nebst der Geschichte derselben* 3: 550. Prague 1845, *Transactions of Proceedings of the Royal Society of Victoria* 43. 1854-1855, *Handbk. N.Z. Fl.* 328. 1864, *Flora Australiensis: A Description ...* 7: 576. 1878, *Indigenous Grasses of New Zealand* pl. 20A. Wellington 1878-1880 [illustrated by John Buchanan, 1819-1898] and *Contributions from the New South Wales National Herbarium* 1: 103. 1941, *New Zealand Journal of Botany* 29: 101-116, 139-161. 1991.

in English: Mueller's bent

A. munroana Aitchison & Hemsley (*Calamagrostis munroana* (Aitch. & Hemsley) Boiss.; *Calamagrostis munroana* var. *stricta* Hook.f.)

Pakistan. Lemma hairy, awn of lemma very short and shortly exerted beyond the glumes, fodder, pasture grass, see *Journal of the Linnean Society, Botany* 19: 192. 1882, *Flora Orientalis* 5: 523. 1884 and *Grasses of Burma, Ceylon, India and Pakistan ...* 388. 1960, *Journal of Cytology and Genetics* 21: 155. 1986, *Cytologia* 56: 437-452. 1991, *Annals of the Missouri Botanical Garden* 81(4): 784-791. 1994.

A. munroana Aitch. & Hemsley subsp. *indica* Sunanda Bhattacharya & S.K. Jain

India, Himachal Pradesh, Uttar Pradesh, Jammu-Kashmir. Stout, tall, leaf blades linear-lanceolate, panicle open, common in moist open fields, hilly slopes, see *Bulletin of the Botanical Survey of India* 25(1-4): 205. 1983[1985].

A. munroana Aitch. & Hemsley subsp. *munroana*

India, Pakistan. Dwarf, slender, leaf blades linear to filiform, inflorescence spicate, panicle linear, eaten by sheep, cattle and goats, common on alpine slopes, near snow, see *Journal of the Linnean Society, Botany* 19: 192. 1882.

A. muscosa Kirk (*Agrostis aemula* subsp. *spathacea* Berggr.; *Agrostis parviflora* var. *perpusilla* Hook.f.)

New Zealand. Perennial, small, low, montane to subalpine, glaucous or greenish, much branched at base, forming round cushions, leaf sheaths hyaline, ligule truncate to acute and fimbriate, leaves usually reflexed, inflorescence often recurved contracted, panicle sometimes hidden among leaf sheaths, glumes more or less unequal, lemma awnless, in tussock grassland, lowland, stony ground, bare soil, see *Prodromus Florae Novae Hollandiae* 170, 172. 1810, *Flora Novae-Zelandiae* 1: 296. 1853, *Handbook N.Z. Fl.* 328. 1864, Sven Berggren (1837-1917), *Lund Fysiogr. Sällsk. Minneskr. med ...* 8: 32, t. 7, f. 41-47. 1878 [Regia Societas

Physiographorum Lundensis], *Transactions and Proceedings of the New Zealand Institute* 13: 385. 1881 and *New Zealand J. Bot.* 29: 139-161. 1991.

in English: pincushion grass

A. myriantha Hook.f. (*Agrostis himalayana* Bor; *Agrostis platyphylla* Mez)

India, China, Tibet, Nepal. Glumes equal to subequal, a good fodder grass, grows on sandy soil, on hills under coniferous forest, see *The Flora of British India* 7(22): 257. 1897 and *Repertorium Specierum Novarum Regni Vegetabilis* 17(492-503): 302. 1921, *Kew Bulletin* 8: 269. 1953, *Edinb. J. Bot.* 56(3): 390. 1999.

A. myriantha Hook.f. var. **myriantha** (*Agrostis myriantha* var. *khasiana* Hook.f.)

India, China, Tibet, Nepal. See *The Flora of British India* 7(22): 257. 1897 and *Edinb. J. Bot.* 56(3): 390. 1999.

A. myriantha Hook.f. var. **yangbiensis** B.S. Sun & Y. Cai Wang

Yunnan, China. See *Acta Phytotaxonomica Sinica* 30(4): 366. 1992.

A. nebulosa Boiss. & Reut. (*Agrostis capillaris* hort. non L.; *Agrostis elegans* Thore; *Agrostis nebulosa* Bourg. ex Reuter & Lange; *Neoschischkinia nebulosa* (Boiss. & Reut.) Tzvelev)

Morocco, Europe, Spain, Portugal. Annual, ornamental, tufted, linear and flat leaves, panicle loose and oblong, awns lacking, see *Diagnoses Plantarum Novarum Hispanicarum* 27. 1842, *Bibliothèque Universelle de Genève* 38: 218. 1842, *Bulletin de la Société Botanique de France* 11: 47. 1864 and *Bot. Zhurn. (Moscow & Leningrad)* 53: 309. 1968, *Lagascalia* 12: 124-128. 1983, *Boletim da Sociedade Brotteriana, ser. 2* 61: 81-104. 1988, *Gayana, Botánica* 54: 118. 1997.

in English: cloud grass

A. nervosa Nees ex Trin. (*Agrostis clarkei* Hook.f.; *Agrostis nervosa* Nees)

India, Pakistan, Nepal. Leaf blades narrow and filiform, glumes unequal, lower glume longer, palea absent, an excellent fodder grass, grows at higher altitudes, on hilly slopes, on alpine pastures, see *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 6,4(3-4): 328. 1841.

A. nipponensis Honda

Asia, Japan. See *Botanical Magazine (Tokyo)* 41: 380. 1927.

A. novogaliciana McVaugh

Mexico. Rare species, see *Flora Novo-Galiciana* 14: 41-42, f. 10. 1983, *Monocotiledóneas Mexicanas: una Sinopsis Florística* 10: 7-236. 2000.

A. oregonensis Vasey (*Agrostis attenuata* Vasey; *Agrostis borealis* var. *californica* (Vasey) T. Koyama ex B. Boivin; *Agrostis diegoensis* Vasey; *Agrostis hallii* var. *californica* Vasey; *Agrostis lepida* A.S. Hitchc.; *Agrostis oregonensis* Nutt. ex A. Gray; *Agrostis pallens* var. *vaseyi* St. John; *Agrostis schiedeana* var. *armata* Suksd.)

U.S., California, Alaska, Wyoming. Perennial, leaf blades flat, inflorescence ovate to lanceolate, lemma sometimes awned above middle, awn straight, forage, moist areas, swamps, stream banks, meadows, see *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 6,4(3-4): 327. 1841, *Proceedings of the Academy of Natural Sciences of Philadelphia* 14: 334. 1862, *Bulletin of the Torrey Botanical Club* 13: 55. 1886, *Botanical Gazette* 11(12): 337. 1886, *Contributions from the United States National Herbarium* 3(1): 74. 1892 and *Werdenda* 1(2): 1. 1923, *Phytologia* 43(1): 105. 1975.

in English: Oregon bent, Oregon bentgrass, Oregon redtop

A. oresbia Edgar (Greek *oresbios*, living on mountains, *oros* "mountain")

New Zealand. Perennial, subalpine to alpine, tufted, erect, sometimes stoloniferous, leaf blade flat or folded, leaf sheath hyaline and ribbed, ligule smooth truncate, open panicle oblong to pyramidal with spreading branches, glumes more or less unequal, lemmas awned, palea ovate, water courses, cliffs, tussock grassland, rocky places, seepages, also in shade, see *New Zealand Journal of Botany* 29(2): 143, f. 2. 1991.

A. pallens Trin. (*Agrostis canina* var. *stolonifera* Vasey, nom. illeg., non *Agrostis canina* var. *stolonifera* Blytt; *Agrostis densiflora* var. *littoralis* (Vasey) Vasey; *Agrostis diegoensis* Vasey; *Agrostis diegoensis* var. *foliosa* Vasey; *Agrostis exarata* var. *littoralis* Vasey; *Agrostis foliosa* Vasey, nom. illeg., non *Agrostis foliosa* hort. ex Roem. & Schult.; *Agrostis lepida* A.S. Hitchc.; *Agrostis multiculmis* Vasey ex Beal; *Agrostis pallens* var. *foliosa* Hitchc.; *Agrostis pallens* var. *vaseyi* St. John)

U.S., California, British Columbia. Perennial, small, creeping rhizomes, leaves mostly basal, leaf blades flat to inrolled, inflorescence lanceolate to narrowly ovate, spike-like panicle, lemma sometimes awned near tip, awn straight, palea absent or vestigial, forage, found in open meadows and woodland, forest, subalpine zones, gravelly woods, dry places, see *Species Plantarum* 1: 62. 1753, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 6,4(3-4): 328. 1841, *Bulletin of the Torrey Botanical Club* 13: 54-55. 1886, *Contributions from the United States National Herbarium* 3(1): 72, 74-75. 1892, *Grasses of North America for Farmers and Students* 328. 1896 and *U.S. Department*

of Agriculture Bureau of Plant Industry Bulletin 68: 34, t. 14, f. 1. 1905, *A Flora of California* 1: 121. 1912, *Flora of Southeastern Washington and adjacent Idaho* 30. 1937.

in English: seashore bent, bent grass, leafy bent grass, sea-shore bentgrass, thingrass

A. pallescens Cheeseman (*Agrostis muelleri* var. *paludosa* Hack.)

New Zealand. Montane to alpine grass, rhizomatous, small, tufted, slender, erect, leaf blade involute and filiform, leaf sheath more or less hyaline, ligule truncate and ciliate, narrowly branched inflorescence, open panicle delicate ovate to pyramidal to oblong, glumes more or less equal and subobtusate, lemma glabrous and awnless, palea ovate, swamps and seepages, mountains, boggy spots, tussock grassland, see *Flora Australiensis: A Description ...* 7: 567. 1878 and *Manual of the New Zealand Flora* 864. 1906, *Transactions and Proceedings of the New Zealand Institute* 53: 423. 1921, *New Zealand Journal of Botany* 29: 152. 1991.

A. pallida With. (*Agraulus pallidus* (With.) Gray; *Agrostis pallida* DC., nom. illeg., non *Agrostis pallida* With.; *Agrostis pallida* Nees ex Steud.; *Agrostis pallida* Schkuhr)

Europe. See Christian Schkuhr (1740-1811), *Botanisches Handbuch* 1791-1803, *Flore de France* Suppl. 5: 251. 1815, *A Natural Arrangement of British Plants* 2: 149. 1821, *Flora Lipsiensis Excursoria* 83. 1838, *Nomenclator Botanicus* edition 2 1: 45. 1840 and *Flore de France* 14. 1913, *Berichte der Bayerischen Botanischen Gesellschaft zur Erforschung der Heimischen Flora* 14: 72. 1914.

A. pallida With. subvar. **violacea** Rouy

France.

A. pallida With. var. **virescens** Zimm.

Europe.

A. parviflora R. Br. (*Agrostis intricata* Nees; *Agrostis parviflora* Chev., nom. illeg., non *Agrostis parviflora* R. Br.; *Agrostis scabra* sensu Rodway, p.p., non Willd.; *Vilfa parviflora* (R. Br.) P. Beauv.)

Australia, Victoria, Tasmania, New South Wales. Annual, delicate, noded, loosely tufted, slender, erect or ascending, nonauriculate, basal leaf sheaths not keeled, ligule membranous obtuse or truncate, panicles spreading and few-flowered, spikelets purplish or greenish, glumes acute, lemma unawned and truncate, palea minute, found in alpine and subalpine grasslands, wet situations, open habitats, fens, bogs, see *Prodromus Florae Novae Hollandiae* 170. 1810, *Flore Descriptive et Analytique des Environs de Paris* 2: 141. 1827, *Flora Novae-Zelandiae* 1: 296. 1853.

in English: hair bent

A. peninsularis Hook.f.

India, Tamil Nadu, Kerala. Lemma glabrous, awn basal, grows on exposed hill slopes, see *The Flora of British India* 7(22): 255. 1897 [1896].

Sri Lanka, India, Sikkim, Nepal, Pakistan, Himalaya. A very variable species, slender, tufted, caespitose, perennial, erect, leaf sheaths glabrous, glumes subequal, lemmas awned and pubescent, in moist places, montane grasslands, see *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 6,4(3-4): 371-373. 1841, *Synopsis Plantarum Glumacearum* 1: 174. 1854, *The Flora of British India* 7: 263, 265. 1896 and *Kew Bulletin* 1954: 459. 1954, *Grasses of Ceylon* 61. 1956, *Grasses of Burma ...* 388. 1960, *Bulletin of the Botanical Survey of India* 25(1-4): 210. 1983[1985], *Journal of Cytology and Genetics* 22: 161-162. 1987, *Cytologia* 56: 437-452. 1991.

A. pilosula Trin. f. *ciliata* (Trin.) Bhattacharya & S.K. Jain (*Agrostis ciliata* Trin.; *Agrostis pilosula* var. *ciliata* (Trin.) Bor)

India. Spikelets purple, grows on exposed hilly slopes, see *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 6,4(3-4): 373. 1841 and *Kew Bulletin* 1954: 459. 1954, *Bulletin of the Botanical Survey of India* 25(1-4): 210. 1983[1985].

A. pilosula Trin. f. *filifolia* (Bor) Bhattacharya & S.K. Jain (*Agrostis pilosula* var. *filifolia* Bor)

India, Tamil Nadu. Leaves filiform, see *Kew Bulletin* 1954: 459. 1954, *Bulletin of the Botanical Survey of India* 25(1-4): 210. 1983[1985].

A. pilosula Trin. f. *pilosula*

India, Sri Lanka, Pakistan. Inflorescence paniculate effuse, grows on open hilly slopes, near water.

A. pilosula Trin. f. *wallichiana* (Steud.) Bhattacharya & S.K. Jain (*Agrostis wallichiana* Steud.)

India, Tamil Nadu, Sikkim. Leaves linear-lanceolate, on wet sandy soils, see *Synopsis Plantarum Glumacearum* 1: 174. 1854 and *Bulletin of the Botanical Survey of India* 25(1-4): 210. 1983[1985].

A. pilosula Trin. var. *alpestris* (Hook.f.) Veldkamp

India. See *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 6,4(3-4): 372. 1841, *The Flora of British India* 7: 264. 1896 and *Blumea* 28(1): 203. 1982.

A. pilosula Trin. var. **ciliata** (Trin.) Bor (*Agrostis ciliata* Trin., nom. illeg., non *Agrostis ciliata* Thunb.; *Calamagrostis ciliata* Nees ex Steud.; *Calamagrostis jacquemontii* Hook.f.; *Lachnagrostis ciliata* Nees ex Trin.)

India. See *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Murray, *History of the collections contained in the Natural History Departments of the British Museum.* 1: 175. London 1904; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico.* 585-586. Philadelphia 1964; Irving William Knobloch, compil., "A preliminary verified list of plant collectors in Mexico." *Phytologia Memoirs.* VI. 1983)

Costa Rica. Vulnerable species, perennial, herbaceous, caespitose, erect, leaves mostly basal and glabrous, lax panicles, see *Österreichische Botanische Zeitschrift* 52(2): 60. 1902.

A. planifolia K. Koch (*Agrostis vinealis* subsp. *planifolia* (K. Koch) Tzvelev)

Europe, northern America. Erect, herbaceous, subalpine, clumping, purplish, meadows and wet meadows, slopes, steep slopes, see *Linnaea* 21(3): 380. 1848 and *Novosti Sist. Vyss. Rast.* 8: 61. 1971.

A. planifolia K. Koch var. **mutica** Grossh.

Russia. See *Not. Syst. Herb. Hort. Bot. Petrop.* 4: 17. 1923.

A. planifolia K. Koch var. **pallida** Grossh.

Russia. See *Not. Syst. Herb. Hort. Bot. Petrop.* 4: 17. 1923.

A. planifolia K. Koch var. **pudica** Grossh.

Russia. See *Not. Syst. Herb. Hort. Bot. Petrop.* 4: 17. 1923.

A. planifolia K. Koch var. **variiflora** Grossh.

Russia. See *Not. Syst. Herb. Hort. Bot. Petrop.* 4: 17. 1923.

A. platensis Parodi

Argentina. See *Revista Argentina de Agronomía* 18: 143, f. 1. 1951.

A. plebeia R. Br. (*Calamagrostis aemula* var. *plebeia* Maiden & Betche; *Calamagrostis aemula* var. *plebeia* (R. Br.) Maiden & Betche; *Calamagrostis plebeia* (R. Br.) Kuntze; *Deyeuxia australis* (Steud.) Benth. & Hook.f.; *Deyeuxia plebeia* (R. Br.) Benth.; *Deyeuxia plebeia* (R. Br.) Kuntze; *Didymochaeta australis* Steud.; *Lachnagrostis plebeia* (R. Br.) Trin.; *Vilfa plebeia* (R. Br.) P. Beauv.)

Western Australia. Annual, caespitose, noded, auricles absent, basal leaf sheaths not keeled, ligule membranous, inflorescence of chasmogamous spikelets, a panicle loosely contracted, see *Prodromus Florae Novae Hollandiae* 1: 172. 1810, *Fundamenta Agrostographiae* 128. 1820, *Nomenclator Botanicus. Editio secunda* 1: 249. 1840, *Flora Australiensis: A Description ...* 7: 580-581. 1878 and J.H. Maiden (1859-1925) & Ernst Betche (1851-1913), *A Census of New South Wales Plants.* Sydney 1916.

A. polypogonoides Stapf

South Africa. Perennial, tufted, glumes awned, occurs in wet places, see *Flora Capensis* 7: 549. 1899.

A. preissii (Nees) Vickery (*Agrostis preissii* Vickery; *Agrostis solandri* F. Muell.; *Calamagrostis filiformis* var. *preissii* (Nees) Pilg.; *Deyeuxia filiformis* var. *preissii* (Nees) Domin; *Deyeuxia forsteri* var. *preissii* (Nees) Benth.; *Deyeuxia preissii* Nees; *Deyeuxia preissii* (Nees) B.D. Jacks.; *Lachnagrostis preissii* Nees)

Western Australia. Annual, caespitose, noded, erect or geniculate, auricles absent, basal leaf sheaths not keeled, ligule membranous and acute, leaf blades folded, inflorescence of chasmogamous spikelets, a green panicle loosely contracted, see *Plantae Preissianae* 2: 97. 1846-1847, *Flora Australiensis: A Description ...* 75: 579. 1878, *Index Kewensis* 1: 740. 1895 and *Bibliotheca Botanica* 85: 352. 1915, *Contributions from the New South Wales National Herbarium* 1: 111. 1941.

A. producta Pilg. (*Calamagrostis producta* (Pilg.) Mez ex Peter)

East Africa. Perennial, tufted, erect or decumbent, fibrous basal sheaths, leaf blades usually linear, glumes subequal, hairy awned lemma, in upland grassland, see *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 39: 600. 1907, *Feddes Repertorium, Beiheft* 40(1): 294. 1931.

A. quinqueseta (Hochst. ex Steud.) Hochst. (*Agrostis alpicola* Hochst.; *Agrostis congesta* C.E. Hubb.; *Agrostis mildbraedii* Pilg.; *Agrostis quinqueseta* (Steud.) C.E. Hubb.; *Agrostis quinqueseta* (Steud.) Hochst.; *Anomalotis quinqueseta* Steud.; *Trisetaria quinqueseta* Hochst.)

Ethiopia, Uganda. Perennial, variable, slender, wiry, stout, erect to ascending, loosely tufted, leaf blades linear, shortly rhizomatous, linear inflorescence spicate, erect panicle, narrow spikelets linear-oblong, glumes lanceolate-oblong enclosing the floret, lemma 5-nerved, awn weakly geniculate, see *Synopsis Plantarum Glumacearum* 1: 198. 1854, *Flora* 38: 284-285. 1855 and *Wissenschaftliche Ergebnisse der Deutschen Zentral-Afrika-Expedition 1907-1908, Botanik* 2: 47. 1910, *Bulletin of Miscellaneous Information Kew* 1936(5): 301. 1936, *Flora of Tropical Africa* 10: 182. 1937, *Opera Botanica* 121: 159-172. 1993.

A. reuteri Boiss.

Spain. See P.E. Boissier (1810-1885), *Voyage botanique dans le midi de l'Espagne* 2: 645. Paris Mai 1844 and *Flore de l'Afrique du Nord*: 2: 128. 1953, *Boletim da Sociedade Broteriana, ser. 2* 61: 81-104. 1988 and 63: 29-66. 1990.

A. rossiae Vasey (*Agrostis exarata* var. *rossiae* (Vasey) G. Jones; *Agrostis variabilis* auct. non Rydb.) (named for the botanical collector Edith A. Ross, see Joseph Ewan, *Rocky Mountain Naturalists*. 293. The University of Denver Press 1950)

U.S., Wyoming, Yellowstone National Park. Endangered species, small, see *De Graminibus unifloris et sesquifloris* 207. 1824, *Contributions from the United States National Herbarium* 3(1): 76. 1892 and *University of Washington Publications in Biology* 5: 113. 1936.

in English: Ross' bentgrass, Ross bentgrass, Ross' bent

A. royleana Trin. (*Agrostis pilosula* Trin.; *Agrostis pilosula* var. *royleana* (Trin.) Bor)

India, Jammu-Kashmir, Himachal Pradesh; Sri Lanka, Pakistan. Alpine grass, awn exserted, see *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg, Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 6,4(3-4): 371-372. 1841 and *Kew Bulletin* 1954: 459. 1954.

Europe, exact native range obscure. Perennial, variable, sometimes loosely or densely tufted, leafy stolons, mat-forming, small size, low-growing and trailing, slender, culms ascendant and decumbent, base prostrate, sometimes rooting from the lower nodes, auricles absent, leaf sheath smooth or scabrid, basal leaf sheaths not keeled, ligule rounded obtuse and membranous, leaves rolled and then flat, inflorescence of chasmogamous spikelets, loose panicle contracted after flowering, spikelets clustered and lanceolate, glumes acute more or less equal or unequal, glabrous lemmas unawned and oblong, palea present, small seeds, fodder grass, forage, palatable, cultivated, ornamental, weed species widely naturalized elsewhere, pioneer species, tolerates cold and shade, resistant to salt-spray, turf grass mixtures, suitable for lawns and golf courses, pasture grass, useful for erosion control, recommended for marshlands and moist pastures, found in wet meadows and wasteland, disturbed sites, in boggy places, on sand, along roadsides and in ditches, grassy roadsides, open habitats, prairies, forest openings, lawns, on riverbanks, margins of marsh, seepage areas, stream and lake margins, fresh to wet soils, shores, in salt marshes, shallow water, closely related to and difficult to separate from *Agrostis gigantea* Roth and *Agrostis capillaris* L., hybridizes with *Agrostis capillaris* L., see *Species Plantarum* 1: 62-63. 1753, *Flora Anglica* 27. 1762, *Flora Anglica, Editio Altera* 1: 31-32. 1778, *Encyclopédie Méthodique, Botanique* 1: 61. 1783, *Supplemento Florae Holsaticae* 6: 4. 1787, *Journal für die Botanik* 2: 313. 1789, *Deutschland Flora* 1: 37. 1800, *Gramina Britannica*; or representations of the British grasses pl. 28, 116. in English: fiorin, white bent

A. subpatens Hitchc. (*Agrostis vinosa* Swallen)

Costa Rica, Guatemala. Perennial, caespitose, erect, leaves mostly basal, forage, found in dry rocky soil, in disturbed sites, alpine meadows, see *North American Flora* 17(7): 527. 1937, *Contributions from the United States National Herbarium* 29(9): 402. 1950.

A. subrepens (Hitchc.) Hitchc. (*Agrostis hiemalis* var. *subrepens* Hitchc.; *Agrostis hyemalis* var. *subrepens* Hitchc.)

North America, Mexico. See *U.S. Department of Agriculture Bureau of Plant Industry Bulletin* 68: 44. 1905, *North American Flora* 17(7): 525. 1937.

A. subulata Hook.f

New Zealand. Perennial, alpine, tufted, prostrate to erect, leaf blade ribbed and inrolled, leaf sheath ribbed, ligule denticulate, spike-like contracted oblong panicles, glumes subequal, usually awnless, see *Flora Antarctica* 1: 95, t. 53. 1845[ante] and *Bot. Not.* 113: 185-191. 1960, *New Zealand J. Bot.* 21: 13-20. 1983, *New Zealand Journal of Botany* 29: 101-116, 139-161. 1991.

A. subulifolia Stapf

South Africa. Annual or perennial, delicate, tufted, leaf blade folded, ligule a membrane unfringed, panicle open to contracted, lemmas glabrous, grows in mountain, wet places, bogs, marshy places, see *Bulletin of Miscellaneous Information Kew* 1910: 130. 1910.

in South Africa: jwang ba phororo (= grass of the waterfall), mathubisa a dibata

A. tandilensis (Kuntze) Parodi (*Agrostis hygrometrica* Nees var. *tandilensis* (Kuntze) L.B. Sm. & Wassh.; *Agrostis kennedyana* Beetle; *Agrostis koelerioides* var. *pampeana* Parodi; *Bromidium hygrometricum* (Nees) Nees & Meyen; *Bromidium hygrometricum* var. *tandilense* Kuntze; *Bromidium tandilense* (Kuntze) Rúgolo; *Deyeuxia hygrometrica* var. *tandilense* (Kuntze) Speg.)

Argentina. Annual, leaf blades flat and inrolled, dense inflorescence cylindrical, lemma awned below middle, lemma tip 4-toothed, awns bent, palea absent, vernal pools, see *Flora Brasiliensis seu Enumeratio Plantarum* 2: 404. 1829, *Gramineae* 23. 1841, *Flora Chilena* 6: 317. 1854, *Revisio Generum Plantarum* 3(3): 343. 1898 and *Contribución al Estudio de la Flora del Tandil* 54. La Plata & Buenos Aires 1901, *Revista de la Facultad de Agronomía y Veterinaria* 7: 161, f. 10D. 1930, *Darwiniana* 6: 158. 1943, *Bulletin of the Torrey Botanical Club* 72(6): 547, f. 6. 1945, *Manual*

of the Grasses of the United States (edition 2, revised by A. Chase) 1951, *Bradea*, *Boletim do Herbarium Bradeanum* 2(35): 244. 1978, *Darwiniana* 24(1-4): 202. 1982.

in English: Kennedy's bent, Kennedy's bentgrass

A. tateyamensis Tateoka

Asia, Japan. See *Botanical Magazine* (Tokyo) 88(1010): 65-87. 1975.

in Japan: tateyamanukabo

A. tenerrima Trin. (*Agrostis elegans* Thore ex R.J. Loisel, nom. illeg., non *Agrostis elegans* (Walter) Salisb.; *Neoschischkinia elegans* Tzvelev)

West Mediterranean. Annual, tufted, flimsy, leaves linear, branched panicles, awns absent, see *Prodr. Stirp. Chap. Allerton* 25. 1796, *Journal de Botanique, rédigé par une société de botanistes* 2: 207, t. 8. 1809 [Desvaux], *De Graminibus unifloris et sesquifloris* 205. 1824 and *Bot. Zhurn. (Moscow & Leningrad)* 53: 309. 1968, *Anales del Jardín Botánico de Madrid* 45: 273. 1988, *Boletim da Sociedade Broteriana, ser. 2* 61: 81-104. 1988, *Boletim da Sociedade Broteriana, ser. 2* 63: 29-66. 1990, *Taxon* 45: 100. 1996.

A. tenuifolia Curtis (*Agrostis canina* L.; *Agrostis canina* var. *tenuifolia* (M. Bieb.) Boiss.; *Agrostis tenuifolia* M. Bieb., nom. illeg., non *Agrostis tenuifolia* Curtis; *Agrostis vinealis* Schreb.)

Eurasia, Asia. See *Species Plantarum* 1: 61-63. 1753, *Spicilegium Florae Lipsicae* 47. Lipsiae 1771, *Enumeration British Grasses* 42. London 1787, *Flora Taurico-Caucasica* 1: 56. 1808, *Flora Antarctica* 2: 372. 1846, *Flora Rossica* 4(13): 441. 1852, *Flora Orientalis* 5: 516. 1884 and *Taxon* 41: 556. 1992.

A. tenuis Sibth. (*Agrostis alba* var. *minor* Vasey; *Agrostis alba* var. *sylvatica* (Huds.) Sm.; *Agrostis alba* var. *tenuis* (Sibth.) Fiori; *Agrostis alba* var. *vulgaris* (With.) Sci.* 1919: 351. 1920, *Nuova Flora Analitica d'Italia* 1: 97. 1923, *Turun yliopiston julkaisu - Annales Universitatis Turkuensis, Sarja A II, Biologia-Geographica* 3: 1-12. 1982 [also *Ann. Univ. Fenn. Abo.*, A 3: 1-12. 1982], *Bot. Zhurn.* 72: 1069-1074. 1987, *Bot. Zhurn. (Moscow & Leningrad)* 75: 1185. 1990, *Bot. Zhurn. (Moscow & Leningrad)* 78(4): 36-47. 1993.

in English: New Zealand bent, colonial bent, common bent, fine bent, brown top

A. thurberiana A.S. Hitchc. (*Agrostis atrata* Rydb.; *Agrostis hillebrandii* Thurb. ex Bol.; *Podagrostis thurberiana* (Hitchc.) Hultén) (after George Thurber, 1821-1890, American botanist, naturalist and botanical collector, author and editor; see Joseph Ewan, *Rocky Mountain Naturalists*. 64, 321. The University of Denver Press 1950; J.H. Barnhart, *Biographical notes upon botanists*. 3: 382. 1965; J. Ewan, editor, *A Short History of Botany in the United States*. 45. New York and London 1969; Stafleu and Cowan, *Taxonomic literature*. 6: 334-335. 1986; Irving William Knobloch, compiled by, "A preliminary verified list of plant collectors in Mexico." *Phytologia Memoirs*. VI. Plainfield, N.J. 1983) (Latin *atratus, a, um* "blackened")

California, Montana, Alaska, Sierra Nevada. Perennial, sometimes rhizomatous, leaf blades flat, oblong inflorescence more or less open, lemma awnless, found in wet places, heavy soils, coniferous forest, intergrades with *Agrostis humilis* Vasey, see *Transactions of the California State Agricultural Society* 1864-5: 136. 1866 and *U.S. Department of Agriculture Bureau of Plant Industry Bulletin* 68: 23, t. 1, f. 1. 1905, *Bulletin of the Torrey Botanical Club* 36: 531. 1909, *Flora of the Aleutian Islands* 75. 1937.

in English: Thurber bent grass, Thurber redtop, Thurber bent, Thurber's bentgrass

A. toluensis Kunth (*Agrostis araucana* Phil.; *Agrostis glomerata* (J. Presl) Kunth; *Agrostis hoffmannii* Mez; *Agrostis nana* var. *aristata* Griseb.; *Agrostis nigritella* Pilg.;

Agrostis toluensis Willd. ex Steud.; *Agrostis virescens* Kunth; *Agrostis virescens* var. *pumila* Rupr.; *Vilfa glomerata* J. Presl (Mexico, Toluca)

Southern America, Mexico, Peru, Guatemala, Argentina, Bolivia. Perennial bunchgrass, alpine, herbaceous, open, tufted, bluish green stiff foliage, acute to truncate ligule hyaline or opaque, leaves erect to spreading, green to purplish erect inflorescence, forage, growing in or near rocky places, moist areas, grassland, cliffs, hollows and depressions, marshy sites, see *Nova Genera et Species Plantarum* 1: 135-136. 1815 [1816], *Reliquiae Haenkeanae* 1(4-5): 239. 1830, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 219, 226. 1833, *Bulletin de l'Académie Royale des Sciences et Belles-lettres de Bruxelles* 52: 229. 1842, *Synopsis Plantarum Glumacearum* 1: 164. 1854, *Abhandlungen der Königlichen Gesellschaft der Wissenschaften zu Göttingen* 24: 294. 1879 and *Annuaire du Conservatoire et Jardin Botaniques de Genève* 17: 292. 1914, *Repertorium Specierum Novarum Regni Vegetabilis* 18: 3. 1922, *Brittonia* 23(3): 293-324. 1971.

A. toluensis Kunth var. *andicola* (Pilg.) Rúgolo & A.M. Molina (*Agrostis nana* var. *andicola* Pilg.)

South America. Alpine, hummocks forming, see *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1(1): 226. 1833 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 37: 505. 1906, *Parodiiana* 8(2): 142. 1993.

A. toluensis Kunth var. *toluensis*

South America.

A. trachychlaena C.E. Hubb.

Tristan da Cunha. Rare species, see *Bulletin of the British Museum (Natural History)*, *Botany* 8: 383. 1981.

A. transcaspica Litv. (*Agrostis stolonifera* subsp. *transcaspica* (Litv.) Tzvelev)

Temperate Asia. Useful for erosion control, see *Schedae ad herbarium Florae Rossicae*, a Museo botanico Academiae imperialis scientiarum Petropolitanae editum Sanktpeterburg 1898-1911, *Journ. Bot. U.R.S.S.* 28: 245. 1943, *Novosti Sist. Vyss. Rast.* 8: 58. 1971.

A. triaristata (Hook.f.) Bor (*Agrostis triaristata* Knapp; *Calamagrostis triplifera* Hook.f.; *Deyeuxia triaristata* Hook.f.; *Deyeuxia tripilifera* (Hook.f.) Keng)

India, West Bengal, Sikkim. Lemma glabrous, growing in open fields, woods, rocky places, see *The Flora of British India* 7(22): 266. 1897 [1896] and *Sunyatsenia* 6(1): 68. 1941, *Grasses of Burma, Ceylon, India and Pakistan* 391. 1960.

A. trichodes (Kunth) Roem. & Schult. (*Agrostis bogotensis* Hack.; *Aira trichodes* (Kunth) Spreng.; *Vilfa trichodes* Kunth)

South America. See *Nova Genera et Species Plantarum* 1: 139. 1815 [1816], *Systema Vegetabilium* 2: 361. 1817, *Systema Vegetabilium, editio decima sexta* 1: 276. 1825 and *Repertorium Specierum Novarum Regni Vegetabilis* 8: 518. 1910.

A. trinii Turcz. ex M.A. Litv. (*Agrostis canina* subsp. *trinii* (Turcz.) Hultén; *Agrostis coarctata* subsp. *trinii* (Turcz.) H. Scholz; *Agrostis flaccida* subsp. *trinii* (Turcz. ex M.A. Litv.) in English: brown bent grass, brown bent

A. vinealis Schreb. subsp. *vinealis* (*Agrostis canina* f. *arida* (Schltdl.) Junge; *Agrostis canina* var. *arida* Schltdl.)

Europe, Russia. See *Flora Berlinensis* 1: 45. 1823 and *Jahrbuch der Hamburgischen Wissenschaftlichen Anstalten* 22(Beih. 3): 62. 1905.

in English: bent grass

A. virescens Kunth (*Agrostis tolucensis* Kunth)

North America, Mexico. See *Nova Genera et Species Plantarum* 1: 135-136. 1815 [1816], *Bulletin de l'Académie Royale des Sciences et Belles-lettres de Bruxelles* 52: 229. 1842, *Synopsis Plantarum Glumacearum* 1: 164. 1854 and *Circular, Division of Agrostology, United States Department of Agriculture* 30: 2-3. 1901.

A. viridis Gouan (*Agrostis semiverticillata* (Forssk.) C. Chr.; *Agrostis semiverticillatus* (Forssk.) C. Chr.; *Agrostis verticillata* Vill.; *Agrostis viridis* Raf. ex B.D. Jacks.; *Agrostis viridissima* Kom.; *Phalaris semiverticillata* Forssk.; *Polypogon semiverticillatus* (Forssk.) Hyl.; *Polypogon viridis* (Gouan) Breistr.)

Mediterranean. Perennial, loosely tufted, strongly decumbent at the base to long-trailing, stoloniferous with creeping stolons, erect, glabrous, smooth, often rooting at nodes, ligule scarious, sheath smooth, dense inflorescence narrowly lanceolate to elliptic, panicle contracted with whorled branches usually densely covered in spikelets, small spikelets 1-flowered, panicle more or less interrupted, spikelets falling entire, glumes falling with the spikelet, lemma 5-nerved more or less pubescent, awn absent, growing on open ground by streams, disturbed areas, moist places, irrigation ditches, canal banks, ponds and ditches, seepage areas, around springs, see *Hortus Regius Monspeliensis* 546. 1762, *Flora Aegyptiaco-Arabica* 17. 1775, *Index Kewensis* 1: 65. 1893 and *Repertorium Specierum Novarum Regni Vegetabilis* 13: 85. 1914, *Dansk Botanisk Arkiv* 4(3): 12. 1922, *Bulletin de la Société Botanique de France* 110(89 Sess. Extraord.): 56. 1966, *Journal of Cytology and Genetics* 21: 155. 1986, *Annali di Botanica* 45: 75-102. 1987, *Lagascalia* 15: 119-124. 1988, *Phytologia* 64: 390-398. 1988, *Journal of the Indian Botanical Society* 69: 447-451. 1990, *Cytologia* 56: 437-452. 1991, *Boletim da Sociedade Broteriana, ser. 2* 64: 35-74. 1991, *Bothalia* 26(1): 63-67. 1996.

in English: water bent grass, water bent

in Arabic: deil el-far

A. volkensii Stapf

Tanzania, Uganda. Perennial, erect, slender, densely tufted, leaf blades narrow and filiform, old basal leaf sheaths papery, open panicle lanceolate, glumes equal and acute, lemma lanceolate more or less hairy to pilose, awn geniculate, mountains, sometimes confused with *Agrostis producta* Pilger, see *Bulletin of Miscellaneous Information Kew* 1897: 289. 1897 and *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 9(87): 512. 1926.

A. wacei C.E. Hubb.

Tristan da Cunha. Indeterminate species, see N.M. Wace & M.W. Holdgate, *Man and Nature in the Tristan da Cunha Islands*. Gland and Cambridge, IUCN. (IUCN Monograph

No. 6) 1976, *Bulletin of the British Museum (Natural History)*, *Botany* 8: 383. 1981, Y.M. Chamberlain, M.W. Holdgate and N.M. Wace, "The littoral ecology of Gough Island, South Atlantic Ocean." *Tethys*. 11: 302-319. 1985.

A. wardii Bor

India, Manipur. Lemma awned, growing on open grassy slopes, see *Kew Bulletin* 1949: 444. 1949.

A. zenkeri Trin. (*Agrostis abnormis* Munro ex Hook.f.; *Agrostis pleiophylla* Mez; *Calamagrostis zenkeri* (Trin.) Davidse; *Deyeuxia abnormis* Munro ex Hook.f.; *Deyeuxia abnormis* Hook.f.; *Deyeuxia zenkeri* (Trin.) Veldkamp)

India, Sikkim, West Bengal, Tamil Nadu, Meghalaya. Glumes mostly equal or subequal, growing in open dry places, wastelands, coniferous forests, see *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 6,4(3-4): 363. 1841, *The Flora of British India* 7(22): 268. 1897 [1896] and *Repertorium Specierum Novarum Regni Vegetabilis* 17(19-30): 301. 1921, *Kew Bull.* 9: 441-442. 1954, *The Gardens' Bulletin Singapore* 37(2): 218-219. 1984 [1985], *Edinb. J. Bot.* 56(3): 384, 386, 399. 1999.

Agrostomia Cerv. = Chloris Sw.

Chloridoideae, Cynodonteae, type *Agrostomia mutica* Cerv., see *Nova Genera et Species Plantarum seu Prodrum* 25. 1788, *Flora Indiae Occidentalis* 1: 203. 179, *Nova Genera et Species Plantarum* 1: 167-168, pl. 50. 1815 [1816], *La Naturaleza [periódico científico de la Sociedad Mexicana de Historia Natural]* 1: 345-346. See *Nomencl. Fl. Ital., Pt. 1* 48. 1950, *Genera Graminum* 374. 1986.

Aikinia Wallich = *Aikinia* R. Br.
(Gesneriaceae), *Ratzeburgia* Kunth

For the British (b. Lancs) chemist Arthur Aikin, 1773-1854 (London), 1818 Fellow of the Linnean Society, son of the British naturalist and physician John Aikin (1747-1822); see Dawson Turner & Lewis Weston Dillwyn (1778-1855), *The Botanist's Guide through England and Wales*. London 1805, *Révision des Graminées* 2: 487, t. 158. 1831, *Plantae Asiaticae Rariores* 3: 46, 65, t. 273. 1832 and *Boissiera. Mémoires du Conservatoire de Botanique et de l'Institut de Botanique Systématique de l'Université de Genève* 85. 1960.

Aimeea Rifat = *Vietnamosasa* T.Q. Nguyen

Named for the French botanist Aimée Antoinette Camus, 1879-1965.

Southeast Asia, Vietnam, Thailand, Cambodia, Laos. Bambusoideae, Bambusodae, Bambuseae, Racemobambosinae, see *Bull. Mus. Nat. Hist. Paris* 25: 672. 1919, *Bull. Mus. Nat. Hist. Paris* 27: 450. 1921, *Journal Arnold Arboretum* 6: 151-152. 1925, *Kew Bulletin* 44(2): 365. 1989, *Bot. Zhurn.* 75: 221-225. 1990.

Aira L. = *Airella* (Dumort.) Dumort., *Aspris* Adans., *Caryophyllea* Opiz, *Fiorinia* Parl., *Fussia* Schur, *Salmasia* Bubani

From the Greek ancient name applied to another plant, possibly *Lolium temulentum* L.; Latin *aera* for a weed among grain, darnel, tare or cockle (Plinius). See Hippocrates, *De Morbis Mulierum*. II. 193, *De Natura Muliebri*. 105; Aristoteles, *De Somno et Vigilia*. 456b 30 (editor D. Ross, Oxford 1955).

About 8-12 species, Mediterranean, temperate Europe, North Africa, western Asia. Pooideae, Poodae, Aveneae, or Pooideae, Poeae, Airinae, annual or biennial, small and flimsy, herbaceous, delicate, slender, caespitose or tufted, glabrous to scabrous, erect or ascending, unbranched, glabrous nodes, hollow internodes, auricles absent, sheaths terete, ligule membranous and unfringed, leaves setaceous and short, leaf blade filiform or narrow-linear to linear, plants bisexual, inflorescence an open or contracted panicle, delicate panicles lax and branched, small and solitary spikelets laterally compressed and pedicellate, pedicels more or less thickened at the apex, short rachilla not prolonged beyond the florets, 2 bisexual florets, 2 papery and keeled glumes equal or subequal, reduced floret absent, lemmas

acuminate to lanceolate and bifid, awned or unawned, awn geniculate with a twisted column, palea tightly clasped by the lemma and apically notched, 2 acute to lanceolate lodicules free and membranous, 3 stamens, ovary glabrous, 2 stigmas, some species ornamental and cultivated, fodder grasses, little forage value, of limited importance as stock feed, weeds, not considered troublesome, found in dry and open habitats, sandy soils, disturbed areas, grasslands, sometimes confused with *Deschampsia* P. Beauv., type *Aira praecox* L., see *Species Plantarum* 1: 63-66. 1753, *Genera Plantarum* edition 5. 31. 1754, *Familles des Plantes* 2: 496. 1763, *Observations sur les Graminées de la Flore Belgique* 120, 121. 1824, *Compendium Florae Germaniae. Eurasia. Sea level to subalpine, see *Species Plantarum* 1: 66. 1753 and *New Zealand Journal of Botany* 29: 101-116. 1991.

A. caryophyllea L. subsp. *multiculmis* (Dumort.) Bonnier & Layens (*Aira caryophyllea* subsp. *multiculmis* (Dumort.) P. Fourn., nom. illeg., non *Aira caryophyllea* subsp. *multiculmis* (Dumort.) Bonnier & Layens; *Aira multiculmis* Dumort.)

Southwestern Europe. Sandy wasteland, along roadsides, see *Observations sur les Graminées de la Flore Belgique* 121, t. 7, f. 28. 1823 [1824], *Flore de France* 358. 1894 and *New Zealand Journal of Botany* 29: 101-116. 1991.

A. caryophyllea L. var. *caryophyllea*

Europe. Found in dry sand, waste places, see *Species Plantarum* 1: 66. 1753.

in English: silver hairgrass

A. cupaniana Guss. (*Aira capillaris* var. *cupaniana* (Guss.) Fiori; *Aira caryophyllea* var. *cupaniana* (Guss.) Cosson & Durand; *Airella cupaniana* (Guss.) Dumort.; *Avena cupaniana* (Guss.) Nyman) (after the Italian monk Francesco Cupani, 1657-1710/1711, botanist, a pupil of Silvio Boccone, in Misilmeri (near Palermo) founded the Botanic Garden of Giuseppe del Bosco principe della Cattolica, his works include *Hortus Catholicus*, seu Ill. et Excell. Principis Catholicae ducis Misilmeris, comitis Vicaris, baronis Prizi, nec non magni baronis Siculianae. Neapoli 1696, *Supplementum alterum ad Hortum Catholicum*. Panormi 1697, *Catalogus plantarum sicularum* noviter adinventarum. Panormi [Palermo] 1692, *Syllabus plantarum Siciliae nuper detectarum*. Panormi 1694 and *Pamphyton siculum*, sive historia naturalis de animalibus, stirpibus, fossilibus, etc. Panormi 1713; see Carl Linnaeus, *Species Plantarum*. 200. 1753 and *Genera Plantarum*. edition 5. 93. 1754; Mariella Azzarello Di Misa, a cura di, *Il Fondo Antico della Biblioteca dell'Orto Botanico di Palermo*. 80-81. Palermo 1988; Giuseppe M. Mira, *Bibliografia Siciliana*. 1: 285-286. Palermo 1881; *Ann. Naturhist. Mus. Wien* 103B: 461-472. 2001)

Europe, Mediterranean. Annual, variable, delicate, open, solitary or tufted or caespitose, slender, usually erect or geniculate at the base, sheaths scabrid, ligule acute and hyaline, leaf blades folded or involute, inflorescence open and spreading, loose and broadly ovoid silvery panicles, cleistogamous spikelets, glumes subobtusate to acuminate and often mucronate, glumes mostly denticulate, lower lemma often awnless, palea hyaline to membranous, anthers yellow or purple, fruit ventrally compressed and shallowly longitudinally grooved, forage, weed species naturalized elsewhere, found in disturbed areas, shallow soil, slopes, grasslands, disturbed woodland, in pastures, see *Flora Siculae Synopsis* 1: 148. 1843, *Exploration Scientifique de l'Algérie* 2: 95. 1854-1855, *Sylloge Florae Europaeae* 414. 1854-1855, *Compendio della Flora Italiana* 1: 59. 1869, *Bulletin de la Société Botanique de Belgique* 7: 68. 1868, *Synopsis der mitteleuropäischen Flora* 2: 284. 1899 and Michele Lojacono-Pojero (1853-1919), *Flora Sicula* 3: 297. Palermo 1908-1909, *Nuova Flora Analitica d'Italia* 1: 103. 1923, *Flore de l'Afrique du Nord*: 2: 352. 1953.

in English: English hairgrass, silver hairgrass, silvery hairgrass

in Italian: nebbia cupaniana, nebbia di Cupani

in Morocco: sibouss, ivraie aristée

in South Africa: haasgras

A. elegans Willd. ex Kunth (*Aira capillaris* Host, non Savi; *Aira caryophyllea* var. *capillaris* (Host) Mutel; *Aira elegans* Vill., *Aira elegans* Willd. ex Gaudin; *Aira elegans* subsp.

ambigua (Arcang.) Holub; *Aira elegantissima* Schur; *Aspris capillaris* (Host) A.S. Hitchc.)

Europe, Mediterranean. Erect, tufted, slender, leaf sheath membranous to submembranous, ligule smooth and denticulate, loose inflorescence ovate paniculate very delicate, scabrid glumes ovate-lanceolate, lemmas membranous and usually awned, lower lemma sometimes awnless, lowland, swamp margins, grassland, some authors used the name *Aira elegantissima* Schur, see *Agrostologia Helvetica, definitionem ...* 1: 130, 355. 1811, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 289. 1833, *Nomenclator Botanicus. Editio secunda* 1: 44. 1840, *Verhandlungen und Mittheilungen des Siebenbürgischen Vereins für Naturwissenschaften zu Hermannstadt* 4: 85. 1853, *Synopsis Plantarum Glumacearum* 1: 221. 1854, *Flore de France* 3: 505. 1855, *Verhandlungen des Botanischen Vereins von Berlin und Brandenburg* 3-4: 79. 1861-62, *Bulletin de la Société Botanique de Belgique* 7: 68. 1868 and *Phytologia* 69: 301-302. 1990, *New Zealand Journal of Botany* 29: 101-116. 1991, *Phytologia* 74: 49. 1993.

in English: annual hairgrass, elegant hairgrass

in Italian: nebbia minore

A. elegantissima Schur (*Aira ambigua* De Not., nom. illeg., non *Aira ambigua* Michx.; *Aira capillaris* Host, nom. illeg., non *Aira capillaris* Savi; *Aira capillaris* subsp. *ambigua* Arcang.; *Aira capillaris* var. *ambigua* (Arcang.) in English: early hairgrass, early hair grass, early silver hairgrass, yellow hairgrass, spike hairgrass

A. provincialis Jordan (*Aira caryophyllea* var. *provincialis* (Jordan) Fiori; *Aira provincialis* Gennar ex Nyman; *Airella*

provincialis (Jordan) Dumort.; *Avena provincialis* (Jordan) Nyman)

Europe. Annual, small, glaucous, slender, erect or geniculate at the base, solitary or clumped or tufted or caespitose, auricles absent, sheaths scabrous, ligule acute and membranous, scabrous leaves grooved or convolute, panicle very open and loose, hermaphrodite florets 2 per spikelet, glumes acute and scabrous, lemma acute and awned, palea 2-dentate, occurs in disturbed areas and woodland, sandy soils, similar to *Aira caryophyllea* L., see *Pugillus Plantarum Novarum* 142. 1852, *Sylloge Florae Europaeae*, Suppl., 71. 1865, *Bulletin de la Société Botanique de Belgique* 7: 68. 1868, *Flora Analytica d'Italia* 1: 67. 1886.

in English: hairgrass

in French: canche de Provence

in Italian: nebbia della Provenza

A. tenorei Guss. (*Aira capillaris* subvar. *tenorii* (Guss.) Cosson & Durand, also spelled *tenorei*; *Aira capillaris* var. *tenorii* (Guss.) Walp.; *Aira caryophyllea* var. *tenorii* (Guss.) T. Durand & Schinz; *Aira pulchella* Link; *Aira pulchella* subsp. *tenorei* (Guss.) Asch. & Graebn. ex Bonte; *Aira pulchella* var. *tenorei* (Guss.) Fiori; *Aira tenorei* Focke ex Willk. & Lange; *Airella tenorii* (Guss.) Dumort.; *Airopsis pulchella* Ten.) (for the Italian botanist Michele Tenore, 1780-1861, his writings include *Catalogo delle piante che si coltivano nel Regio Orto Botanico di Napoli*. Napoli 1845 and *Index Seminum in Horto Botanico Neapolitano Collectorum*. 1839, uncle of the Italian botanist Vincenzo Tenore (1825-1886); see Stafleu and Cowan, *Taxonomic literature*. 6: 212-219. 1986; Mariella Azzarello Di Misa, editor, *Il Fondo Antico della Biblioteca dell'Orto Botanico di Palermo*. 265-268. Palermo 1988; J.H. Barnhart, *Biographical notes upon botanists*. 3: 367. 1965; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 789. 1993; A. Lasègue, *Musée botanique de Benjamin Delessert*. Paris 1845; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 396. 1972; Ethelyn Maria Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. University of Pennsylvania Press, Philadelphia 1964; H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 252. Oxford 1964)

South Europe. Solitary or tufted, slender, panicles diffuse, spikelets unawned, glumes obtuse, see *Flora Napolitana* 3: 56, 102. 1824-1829, *Fl. Sic. Prodr.* 1: 62. 1827, *Exploration Scientifique de l'Algérie* 2: 96. 1854-1855, *Annals of Botany*. Oxford 6: 993. 1861, *Prodromus Florae Hispanicae* 1: 55. 1861, *Bulletin de la Société Botanique de Belgique* 7: 68. 1868 and *Flora Sicula* (Lojacono) 3: 300. 1909, *Nuova*

Flora Analytica d'Italia 1: 103. 1923, *Decheniana* 94: 118. 1937.

A. uniaristata Lag. & Rodr. (*Aira caryophyllea* subsp. *uniaristata* (Lag. & Rodr.) Maire; *Aira cupaniana* auct., non Guss.)

North Africa, Europe. See *Anales de Ciencias Naturales* 6(16): 148. 1803, *Compendio della Flora Italiana* 1: 59. 1869 and *Bulletin de l'Académie Internationale de Géographie, Botanique* 18: 469. 1908, *Catalogue des Plantes du Maroc* 1: 45. 1931, *Bulletin de la Société d'Histoire Naturelle de l'Afrique du Nord* 30: 307. 1939, *Flore de l'Afrique du Nord*: 2: 350. 1953.

Airella (Dumort.) Dumort. = *Aira* L.

The diminutive of *Aira*.

Pooideae, Poodae, Aveneae, or Pooideae, Poeae, Airinae, type *Airella caryophyllea* (L.) Dumort., see *Observations sur les Graminées de la Flore Belgique* 120, 121. 1824, *Bulletin de la Société Botanique de Belgique* 7: 68. 1868 and *N. Amer. Fl.* 17: 567. 1939, *Contributions from the United States National Herbarium* 48: 89-96. 2003.

Airidium Steud. = *Deschampsia* P. Beauv.

Resembling *Aira* L.

Pooideae, Poeae, Airinae, type *Airidium elegantulum* Steud., see *Essai d'une Nouvelle Agrostographie* 91, 149, 160. 1812, *A Manual of the Botany of the Northern United States* 605. 1848, *Synopsis Plantarum Glumacearum* 1: 423. 1854 and *Contributions from the United States National Herbarium* 48: 245-256. 2003.

Airochloa Link = *Koeleria* Pers.

Probably from the Greek *aira* "hair-grass" and *chloe*, *chloa* "grass."

Pooideae, Poodae, Aveninae, type *Airochloa cristata* (L.) Link, see *Syn. Pl.* 1: 97. 1805, *Hortus Regius Botanicus Berolinensis* 1: 126-127. 1827, *Genera Plantarum* 3(2): 1184. 1883, *Die Natürlichen Pflanzenfamilien* 2(2): 70. 1887 and *U.S. Dept. Agric. Bull.* 772: 107. 1920, *Contributions from the United States National Herbarium* 48: 97, 409-419. 2003.

Airopsis Desv. = *Aeropsis* Asch. & Graebn., *Sphaerella* Bubani

Resembling *Aira* L.

One species, Africa, northwest Africa, Sicily, southwest Europe. Pooideae, Poodae, Aveneae, Airopsidaeae, annual,

slender to very slender, herbaceous, auricles absent, uppermost sheath inflated, ligule an unfringed membrane, plants bisexual, inflorescence paniculate open or contracted, spikelets 2-flowered, 2 glumes equal or subequal, lemmas awnless orbicular 3-nerved, palea present, 2 free and membranous lodicules, 3 stamens, ovary glabrous, 2 stigmas, open habitats, sandy areas, see *Species Plantarum* 1: 79-81. 1753, *Icones et Descriptiones Plantarum, quae aut sponte ...* 3: 37, t. 274, f. 1. 1794, *Journal de Botanique (Desvaux)* 1: 200. 1809, *Fl. France* 3: 435. 499. 1855, *A Manual of the Botany of the Northern United States. Second Edition* 573. 1856, Paul Friedrich August Ascherson, *Synopsis der mitteleuropäischen Flora* 2(1): 298. Leipzig 1899 and *Boletim da Sociedade Broteriana, ser. 2* 43: 1-140. 1969, *Grana; an international journal of palynology ...* 15: 7-17. 1975, *Boletim da Sociedade Broteriana, ser. 2* 63: 153-205. 1990.

Species

A. tenella (Cav.) Cosson & Durand (*Airopsis tenella* (Cav.) Asch. & Graebn.)

Europe. Annual, lemma gibbous, open sandy places, see *Exploration Scientifique de l'Algérie* 2: 97. 1867.

in Italian: nebbia, nebbia globosa

in French: airopsis délicat

Alectoridia A. Rich. = *Arthraxon* P. Beauv.

Greek *alektor* “a cock.”

Panicoideae, Andropogoneae, Andropogoninae, type *Alectoridia quartiniana* A. Rich., see A.M.F.J. Palisot de Beauvois, *Essai d'une nouvelle Agrostographie* 111, t. 11, f. 6. (Dec.) 1812, *Tentamen Florae Abyssinicae ...* 2: 447-448, t. 102. 1850 and *Contributions from the United States National Herbarium* 46: 104-110. 2003.

Alexfloydia B.K. Simon

For the Australian botanist Alexander Geoffrey Floyd, forster, ecologist, botanical collector in Papua New Guinea and Australia, author of *Rainforest Trees of Mainland South-eastern Australia*. Melbourne 1989, *Australian Rainforests in New South Wales*. 2 vols. 1990; see Lawrence Alexander Sidney Johnson (1925-1997) and Barbara Gillian Briggs (1934-), in *Botanical Journal of the Linnean Society*. 70: 176. London (Sep.) 1975.

1 species, Australia, New South Wales. Panicoideae, Panicoideae, Paniceae, perennial, stoloniferous, unarmed, herbaceous, soft, branched, nodes hidden by leaf sheaths, internodes shorter than the leaf sheaths ligule a fringe of hairs, blades flat and smooth, leaves linear and glabrous, plants bisexual, inflorescence a reduced panicle, elliptic

spikelets pedicellate and compressed, 2 florets, lower floret male, upper floret bisexual, 2 glumes very unequal and papery, lower lemma elliptic and papery, upper lemma oblong and glabrous, palea present, 2 free and membranous lodicules, 3 stamens, sometimes referred to *Panicum* L., type *Alexfloydia repens* B.K. Simon, the caterpillar *Ocybadistes knightorum* Lambkin & Donaldson feeds at night on *Alexfloydia*, see B.K. Simon, “*Alexfloydia*, *Cliffordiochloa* and *Dallwatsonia*, three new panicoid grass genera from eastern Australia.” in *Austrobaileya* 3(4): 669-691. 1992.

Species

A. repens B.K. Simon

New South Wales. Perennial, threatened species, weak, stoloniferous, trailing, mat-forming, sheath loose and hairy, ligule a fringe of hairs, lower glume ovate and acute, upper glume elliptic, upper lemma apiculate, a food source of a butterfly living on the midnorth coast of New South Wales, ground cover, grows in moist places, mangrove forest, see *Austrobaileya* 3(4): 670, f. 1. 1992.

Allagostachyum Steud. = *Tribolium* Desv.

Greek *allage* “change” and *stachys* “spike,” see *Mémoires de la Société d'Agriculture, Sciences et Arts d'Angers* 1: 168, t. 7, f. 2. 1831, *Nomenclator Botanicus. Editio secunda* 1: 50. 1840.

Allelothea Steud. = *Lophatherum* Brongn.

Greek *allelon* “reciprocally, mutually” and *theke* “box, capsule.”

Centothecoideae, Centotheceae, see *Voyage Autour du Monde* 2(2): 49-50, t. 8. 1829 [1831], Ernst Gottlieb von Steudel (1783-1856), *Synopsis plantarum glumacearum*. 1: 117. Stuttgartiae [1853-] 1855 and *Bulletin of the Nanjing Botanical Garden, Mem. Sun Yat Sen* 14-20. 1988-1989 [Sun Yat-Sen Tomb and Memorial] [*Nanjing Zhongshan Zhiwuyuan yanjiu lunwenji*], *Investigatio et Studium Naturae* 12: 48-65. 1992 [*Kao cha yu yen chiu*. Shanghai].

Alloochaete (Rendle) C.E. Hubb. =

Alloochaete C.E. Hubb.

Probably from the Greek *allos* “different, other, diverse” and *chaite* “a bristle.”

About 6 species, Africa, south tropical Africa, Tanzania, Angola, Malawi. Arundinoideae, Danthonieae, perennial, herbaceous, unbranched, tufted, leaves mainly basal, auricles absent, sheath bases densely hairy to tomentose, ligule a fringe of hairs, plants bisexual, narrow inflorescence paniculate, spikelets compressed, 2 glumes more or less equal,

proximal lemmas awned, palea present, 3 stamens, 2 stigmas, open habitats, montane grassland, rocky places, moist peaty soils, shrubby hillsides, type *Alloeochoete andongensis* (Rendle) C.E. Hubb., see *Hooker's Icones Plantarum* 35: t. 3418. 1940, J.M.J. de Wet, "Leaf Anatomy and Phylogeny in the Tribe Danthoneieae." *American Journal of Botany* 43, 3: 175-182. Mar 1956, C.H.S. Kabuye and S.A. Renvoize, "The genus *Alloeochoete*, tribe Danthoneieae (Gramineae)." *Kew Bulletin* 30(3): 569-577. 1975.

Species

A. andongensis (Rendle) C.E. Hubb. (*Danthonia andongensis* Rendle)

Africa. See *Catalogue of the African Plants Collected by Dr. F. Welwitsch in 1853-61* 2(1): 212. 1899.

A. geniculata Kabuye

Africa. Perennial, tufted, procumbent, inflorescence lax.

A. gracillima Kabuye

Africa. Perennial, tufted, slender, bulbous, inflorescence contracted.

A. namuliensis Chippindall

Africa. See *Journal of South African Botany* 11: 101, f. 2. 1945.

A. oreogena Launert

Africa, Malawi. Tussock, large, tree trunk-like structure, leaves drooping, see *Garcia de Orta, Série de Botânica* 1(1-2): 91-92. Lisbon 1973.

A. ulugurensis Kabuye

Africa.

Alloiatheros Raf. = *Alloiatheros* Elliott ex Raf., *Gymnopogon* P. Beauv.

Chloridoideae, Cynodonteae, see *Essai d'une Nouvelle Agrostographie* 41, 164. 1812, *Bulletin Botanique [Genève]* 1: 221. 1830, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 284. 1833, *Nomenclator Botanicus* edition 2 2: 55. 1840, *Preliminary Catalogue of Anthophyta and Pteridophyta Reported as Growing Spontaneously within One Hundred Miles of New York* 69. 1888, *Index Kewensis* 1: 83. 1893 and E.D. Merrill (1876-1956), *Index rafinesquianus*. The plant names published by C.S. Rafinesque, etc. 74. Jamaica Plain, Massachusetts, U.S. 1949, *Contributions from the United States National Herbarium* 41: 124-127. 2001.

Allolepis Soderstr. & H.F. Decker

From the Greek *allos* "different, other, diverse" and *lepis* "a scale," referring to the unequal male and female lemmas.

One species, North America, Texas and Mexico, southern U.S. Chloridoideae, Cynodonteae, Monanthochloinae, perennial, herbaceous, erect, caespitose, unarmed, stoloniferous and rhizomatous, long robust stolons, auricles absent, leaf blades flat and not pungent, leaves with a non-distichous arrangement, ligule membranous with ciliate fringe, plants dioecious, inflorescence paniculate, short racemes appressed to an axis, male florets 3-staminate, subcoriaceous glumes 3- to 7-nerved, lemma acute and 3- to 5-nerved, palea margins overlapping the caryopsis, lodicules cuneate, ovary glabrous, 2 stigmas, found in open sandy places, open habitats, genus linked to *Monanthochloe* Engelm., similar to and segregate of *Distichlis* Raf., type *Allolepis texana* (Vasey) Soderstr. & H.F. Decker, see *Journal de Physique, de Chimie, d'Histoire Naturelle et des Arts* 89: 104. 1819, *Contributions to the United States National Herbarium* 1: 29-65. 1890, *United States Department of Agriculture, Division of Agrostology* 16: 1-6. 1899 and *Gram. Afr. Trop.* 1: 94. 1962, *Madroño* 18(2): 33-64. 1965, *Willdenowia* 5: 472. 1969, *Sida* 16: 529-544. 1995, *Contributions from the United States National Herbarium* 41: 15. 2001.

Species

A. texana (Vasey) Soderstr. & Decker (*Distichlis texana* (Vasey) Scribn.; *Poa texana* Vasey; *Sieglingia wrightii* Vasey)

Northern America. See *Contributions from the United States National Herbarium* 1(2): 60. 1890, *Contributions from the United States National Herbarium* 1(8): 269. 1893, *Circular, Division of Agrostology, United States Department of Agriculture* 16: 2. 1899 and *Madroño* 18(2): 36. 1965.

Alloteropsis J. Presl = *Alloteropsis* J.S. Presl ex C. Presl, *Axonopus* Hook.f., *Bluffia* Nees, *Coridochloa* Nees, *Holosectum* Steud., *Mezochloa* Butzin, *Pterochlaena* Chiov.

From the Greek *allotrios* "foreign, strange, stranger, alien," *allotereon* "foreign" and *opsis* "resemblance."

About 5-8/10-15 species, Old World tropics, Australia, Asia, India, tropical and South Africa. Panicoideae, Panicodae, Paniceae, Setariinae, or Panicoideae, Paniceae, Paspalinae, perennial or annual, herbaceous, unbranched, erect or ascending, caespitose or decumbent, tuberous or not, forming tussocks, tufted and hairy at the nodes, shoots more or less aromatic, ligule a fringed membrane, leaves mostly basal, auricles absent, hollow internodes, leaf blade rolled in bud, plants bisexual, slender racemes digitate or subdigitate, spikelets short-awned and paired or clustered, florets 2 and dissimilar, lower floret usually male, upper floret bisexual, 2 glumes very unequal, lower glume shorter than

the spikelet, upper glume ciliate on the margins, upper lemma shortly awned, palea present and hairy to papillate, 2 lodicules free and fleshy, 3 stamens, ovary glabrous, 2 stigmas, native pasture species, forage, drought resistant, marshes, weedy places, open or shaded habitats, rainforest, type *Alloteropsis distachya* J. Presl, see *Prodromus Florae Novae Hollandiae* 192. 1810, *Reliquiae Haenkeanae* 1(4-5): 343-344, t. 47. 1830, *Edinburgh New Philosophical Journal* 15: 381. 1833, *Delectus Seminum quae in Horto Hamburgensium Botanico* 1834: 8. 1834, *Fl. Afr. Austr. Ill. 1. Gramineae*, 61. 1841, *Synopsis Plantarum Glumacearum* 1: 118. 1854, *Index Kewensis* 1: 618. 1893, *The Flora of British India* 7(21): 63. 1897 [1896] and *Contributions from the United States National Herbarium* 12(6): 210. 1909, F.M. Bailey, in *Queensland Agricultural Journal*. 27: 69, t. XIX. 1911, *Annali di Botanica* 13: 47. 1914, *Willdenowia* 4: 209, 21. 1966, *Flora of Tropical East Africa* 451-898. 1982, *Annals of the Missouri Botanical Garden* 75: 866-873. 1988, *Botanical Journal of the Linnean Society* 97: 255-259. 1988, *ASBS Symposium 1990: Indo-Pacific Biogeography*, 14. 1990, *Contributions from the United States National Herbarium* 46: 16. 2003.

Species

A. angusta Stapf

Africa, Angola. See *Flora of Tropical Africa* 9: 485. 1919.

A. cimicina (L.) Stapf (*Agrostis cimicina* (L.) Poir.; *Agrostis digitata* Lam.; *Agrostis digitata* (Sw.) Retz.; *Urochloa cimicina* (L.) Kunth; *Urochloa quintasii* Mez)

Old World tropics, Southeast Asia, tropical Africa, Australia. Short-lived perennial or annual, erect or decumbent or ascending, tufted, low spreading habit, terete, often rooting from the lower nodes, fibrous roots, leaves lanceolate to ovate, inflorescence 1-whorled, spike-like racemes on the top of the peduncle, spikelets ovate-elliptic solitary or clustered, upper glume cartilaginous, upper lemma awned, palea hairy or papillate, weed species, hay, economic and useful plant, roots used in toothache by Lodhas (India), forage, moderate fodder value, useful for erosion control, found in moist areas, along roadsides, lowland, open habitats, weedy places, dry open forest, open dry soils, along water courses, sandy clay soil, sandy soils among rocks, waste places, see *Mantissa Plantarum Altera* 184. 1771, *Obs. Bot.* 3: 9. 1783, *Encyclopédie Méthodique, Botanique* 1: 59. 1783, *Nova Genera et Species Plantarum seu Prodromus* 24. 1788, *Encyclopédie Méthodique, Botanique*

Tropical Africa, Asia, Australia. Perennial, polymorphic, shortly rhizomatous, densely tufted, erect, herbaceous, tussock-forming, smooth basal stems, vigorous rootstock, the base thickened and coated with densely hairy scales, leaf blades linear, sheath silky tomentose, erect leaves silky to hairy, ligule a short silky rim, racemes digitate, spikelets shortly acuminate and awned, lower glume ovate, upper glume acuminate and more or less winged, upper lemma lanceolate, golden anthers, large seeds purple black, seeds heavily, attractive and ornamental, a decreaser species, economic plant, good grazing, good fodder value, pasture species, forage, grazed by cattle, palatable and nutritious when young, uprooted and eaten by pigs, can withstand burning and heavy grazing, very drought resistant, can withstand some waterlogging, in Australia stems used to dip honey out native bee hives, seed of this grass is a favourite food of hooded parrots and golden-shouldered parrots as well, occurs in open grassland or woodland, clay soil, savannah, see *Mant. Pl. Altera* 184. 1771, *Obs. Bot.* 3: 9. 1783, *Prodromus Florae Novae Hollandiae* 192. 1810, *Révision des Graminées* 1: 31. 1829, *Mémoires de la Société d'Agriculture, Sciences et Arts d'Angers* 1: 185. 1831, *Edinburgh New Philosophical Journal* 15: 381. 1833, *Delectus Seminum quae in Horto Hamburgensium Botanico* 1834: 8. 1834, *Journal of Botany* 2: 97. India, Assam, Kerala, Sri Lanka. Upper glumes winged, see *Notulae ad Plantas Asiaticas* 3: 54. 1851 and *Bulletin of the Botanical Survey of India* 13(3-4): 175. 1971[1974], *Journal of the Bombay Natural History Society* 70(3): 594. 1973[1974].

Alopecuropsis Opiz

Resembling the genus *Alopecurus* L.

Pooideae, Poaceae, Alopecurinae, type *Alopecuropsis textilis* (Boiss.) Opiz, see *Species Plantarum* 1: 60-61. 1753, *Lotos* 7: 84. 1857 and *Regnum Veg.* 127: 17. 1993, *Contributions from the United States National Herbarium* 48: 97-106. 2003.

Alopecurus L. = *Alopecuropsis* Opiz, *Colobachne* P. Beauv., *Tozzettia* Savi

From the Greek *alopekourous*, grass like a fox's tail, *alopex* "a fox" and *oura* "a tail," referring to the shape of the panicle, from the form of the spike-like panicle; Latin *alopecurus*, a kind of plant, according to Sprengel a species of *Saccharum*; see Carl Linnaeus, *Species Plantarum*. 60. 1753 and *Genera Plantarum*. edition 5. 30. 1754.

About 25-36(-50) species, northern temperate areas, Eurasia, temperate South America. Pooideae, Poodae, Aveneae, or Pooideae, Poaceae, Alopecurinae, annual or perennial, tufted, leafy, few- to many-noded, herbaceous, rhizomatous or stoloniferous, sometimes decumbent or geniculate at base, sometimes rooting at lower nodes, unbranched, glabrous nodes, hollow internodes, narrow leaf blades linear to linear-lanceolate, leaf sheath open, ligule an unfringed membrane, leaves flat, plants bisexual, inflorescence dense and cylindrical, a soft and narrow spike-like panicle, spikelets densely crowded and arranged in a dense spiral, spikelets with female-fertile florets only, 1 bisexual floret, reduced floret absent, 2 glumes more or less equal and strongly keeled and not awned, lemma 3- to 5-nerved enclosed within the glumes, obtuse lemma membranous and awned on dorsal surface, awn bent and twisted or straight, palea usually absent or very reduced, lodicules absent, 3 stamens, ovary glabrous, stigmas exerted, agricultural weed species, palatable forage for livestock, useful cultivated fodder grasses, native pasture species, ornamental, found in grasslands, swampy ground, irrigation channels, damp meadows, pampas, stony slopes, open habitats, similar to *Phleum* L., type *Alopecurus pratensis* L., see *Species Plantarum* 1: 60-61. 1753, *Species Plantarum, Editio Secunda* 89. 1762, *Memorie di Matematica e di Fisica della Società Italiana delle Scienze* 8(2): 477. 1799, *Annalen der Botanik ... Herausgegeben von Dr. Paulus Usteri ... Zürich 1791-1800, English Botany* 21: t. 1467. 1805, *Essai d'une Nouvelle Agrostographie* 22, 158. 1812, *Observations sur les Graminées de la Flore Belgique* 132. 1823 [1824], *Flora Rossica* 4(14): 640. 1853, *Nuovi Generi e Nuove Specie di Piante Monocotiledoni* 11. 1854, *Lotos* 7: 84. 1857 and *Flora Pyrenaea ...* 4: 274-275. 1901, *American Midland Naturalist* 4: 216. 1915, *Revista de la Facultad de Agronomía y Veterinaria* 7(2): 345-369. 1931, *Novosti Sist. Circumboreal. Annual or perennial bunchgrass, tufted, open, aquatic or semiaquatic, emergent, culms ascending and often bent at the nodes, mostly decumbent and sometimes rooting at the lower nodes, leaves erect to floating, auricles absent, culm leaf blades linear-lanceolate, leaf sheath smooth and loosely wrapped around the stem, ligule membranous, inflorescence of chasmogamous spikelets, compressed and narrow spike-like panicle, glumes membranous and keeled with silky hairs, palea absent, lemma awn weak and straight, straight awn included within or

arising from near middle of the lemma, seeds ground into a flour and used with other cereals in making bread, weed species of rice and other cereals, a good fodder plant, a famine food, ornamental, common in pastures, rice fields, wet places, edges of ponds and ditches, wet meadows, dry to damp bare soil, damp hilly slopes shores and stream banks, border of lake, bog edges, shallow water, water-filled ditches, open marshy ground, see *Flora Petropolitana* 16. 1799, *Flora Boreali-Americana* 1: 43. 1803, *Synopsis Plantarum* 1: 80. 1805, *English Botany* 21, t. 1467. 1805, *Flora Lapponica* 22. 1812, *A Flora of the Northern and Middle Sections of the United States* 1: 97. 1823, *Species Graminum* 3: t. 241. 1829-1830, *Linnaea* 12(4): 424. 1838, *Notulae ad Plantas Asiaticas* 3: 11. 1851, *Anales del Jardín Botánico de Madrid* 10: 312. 1852, *Flora von Nieder-Oesterreich* 35. 1859, *English Botany, ... third edition* 11: 23. 1873, *Bulletin of the Torrey Botanical Club* 15: 13. 1888, *Grasses of North America for Farmers and Students* 2: 278. 1896, *The Fur Seals and Fur Seal Islands of the North Pacific Ocean* 4 parts. 3: 573. in English: Cretan meadow-foxtail

A. dasyanthus Trautv. (*Alopecurus vaginatus* (Willd.) Boiss., nom. illeg., non *Alopecurus vaginatus* (Willd.) Pall. ex Kunth; *Polypogon vaginatus* Willd.) (from the Greek *dasy* "thick, shaggy, hairy" and *anthos* "flower")

Asia temperate, Eurasia. Useful for erosion control, see *Der Gesellschaft Naturforschender Freunde zu Berlin, neue Schriften* 3: 44. 1801, *Flora Orientalis* 5: 488. 1884.

A. geniculatus L. (*Alopecurus aequalis* Sobol.; *Alopecurus australis* Nees; *Alopecurus geniculatus* Lindh. ex Scheele, nom. illeg., non *Alopecurus geniculatus* L.; *Alopecurus geniculatus* Sibth. ex Steudel, nom. illeg., non *Alopecurus geniculatus* L.; *Alopecurus geniculatus* var. *aquaticus* Schltld.; *Alopecurus geniculatus* var. *viridis* Neillr.; *Alopecurus pallenscens* Piper; *Alopecurus paludosus* Crantz; *Alopecurus palustris* subsp. *geniculatus* (L.) Syme ex Sowerby; *Tozzetia geniculata* (L.) Bubani)

Eurasia. Perennial or annual, tufted, stoloniferous, rhizomatous, small, glabrous, spreading from geniculate base, creeping and ascending, rooted on the nodes, glaucous, stems often floating in water, auricles absent, membranous ligules pointed or blunt, leaf blades linear acute or acuminate, green to grayish green to bluish leaves, spike-like panicle linear or narrow-oblong with densely crowded spikelets, chasmogamous, silky dark green to black inflorescence cylindrical and slender, spikelets 1-flowered, glumes obtuse to mucronate and ciliate along the keel, glumes free or united, lemma truncate and awned, bent awn inserted below the middle of the lemma, palea absent, weed species, a good forage, cold resistant, drought sensitive, coastal and inland, grows in moist or dry places, damp areas, roadsides, shallow water, river flats, wet margins of rivers, ditches, meadows and seeps, swamp edges, in wheat field, see *Species Plantarum* 1: 60. 1753, *Flora Berolinensis* 1: 39. 1823, *Nomenclator Botanicus* edition 2 1: 61. 1840, *Hooker's Journal of Botany and Kew Garden Miscellany* 2: 412. 1843, *Linnaea* 22(3): 340. 1849, *Flora von Nieder-Oesterreich* 35. 1859, *English Botany, ... third edition* 11: 25. 1873 and *The Flora of the Palouse Region* ... 18. Pullman, Wash. 1901, *Flora Pyrenaea* ... 4: 275. 1901, *Fl.*

Iranica 70: 285. 1970, *Phytologia* 37(4): 317-407. 1977, *Flora Patagónica* 3: 134-136, 340-348. 1978, *Turkish Journal of Botany* 23(4): 254. 1999, *Taxon* 49(2): 245. 2000.

in English: marsh foxtail, marsh foxtail grass, marsh meadow-foxtail, water foxtail, water foxtail grass, floating foxtail, floating foxtail grass, kneed foxtail

in French: vulpin genouillé

in Italian: coda di topo ginocchiata

in German: Knich-Fuchsschwanz

in Mexico: cola de zorra

A. geniculatus L. var. *geniculatus*

America.

A. geniculatus L. var. *patagonicus* Parodi

South America. See *Revista de la Facultad de Agronomía y Veterinaria* (Buenos Aires) 7: 363, f. 71. 1931.

A. heleochloides Hack.

South America, Chile. See *Repertorium Specierum Novarum Regni Vegetabilis* 10(243-247): 166. 1911.

A. himalaicus Hook.f.

Russia, Iran, Afghanistan, Pakistan, Jammu-Kashmir. Panicle oblong and silky, glumes lanceolate densely hairy, alpine grass eaten by sheep and cattle, goats and yak, found near glaciers, on exposed hill slopes, see *The Flora of British India* 7(22): 238. 1897 [1896] and *Repertorium Specierum Novarum Regni Vegetabilis, Beihefte* 303: 339. 1932.

A. hitchcockii Parodi (*Alopecurus aequalis* Sobol.)

South America, Bolivia, Peru. Aquatic, floating, see *Flora Petropolitana* 16. 1799 and *Revista de la Facultad de Agronomía y Veterinaria* (Buenos Aires) 7(2): 366, f. 8. 1931.

A. laguroides Bal. (*Alopecurus vaginatus* var. *unipaleaceus* Boiss.)

Turkey. Rare species, alpine, see *Bulletin de la Société Botanique de France* 21: 11. 1874, *Flora Orientalis* 5: 488-489. 1884 and *Turkish Journal of Botany* 23(4): 245-262. 1999.

A. lanatus Sm. (*Alopecurus lanatus* Sibth. & Sm.; *Alopecurus phaleioides* K. Koch)

East Mediterranean, Turkey. Perennial, alpine, tiny, densely white tomentose to silver, caespitose, erect or curved, dwarf, slender, thick rootstock black and cylindrical, stems geniculate at node, sheaths tomentose and inflated, leaves linear and basal, brown blooms, panicles ovoid-globose, glumes lanceolate and hispid-pubescent, lemma oblique-truncate and ciliate, awn geniculate, attractive and ornamental, see *Florae Graecae Prodromus* 1: 43. 1806 and *Flora Mediterranea* 1: 238-240. 1991, *Turkish Journal of Botany* 23(4): 245-262. 1999.

in German: zottiger Fuchsschwanz

A. lechleri Steud. (*Alopecurus alpinus* f. *lechleri* (Steud.) Dusén; *Alopecurus antarcticus* Lechler ex Steud.; *Alopecurus antarcticus* var. *lechleri* (Steud.) Parodi)

Chile. See *Synopsis Plantarum Glumacearum* 1: 148. 1854 and *Reports of the Princeton University Expeditions to Patagonia 1896-1899, Botany, Volume viii, Supplement* 8(3): 34. 1914 [1915], *Revista de la Facultad de Agronomía y Veterinaria* 7(2): 356, f. 3. 1931.

A. longearistatus Maxim.

Asia temperate, Siberia, Eurasia. See *Primitiae Florae Amurensis* 327. St. Petersburg 1859.

Altoparadisium Filg. et al.

Two species, Brazil, Goiás, Alto Paraíso. Panicoideae, Paniceae, Arthropogoninae, perennial, caespitose, herbaceous, erect, hollow, contracted terminal panicle with verticillate branches, soft spikelets dorsiventrally compressed, only 2 spikelet bracts, lower floret absent, lower glume absent or awned, upper glume awned, 2 lodicules, 3 stamens, 2 stigmas, related to *Arthropogon*, *Canastra*, *Homolepis* and *Achlaena*, type *Altoparadisium chapadense* Filg. et al., see *Flora Brasiliensis seu Enumeratio Plantarum* 319. 1829 and T.S. Filgueiras, G. Davidse, F.O. Zuloaga & O. Morrone, "The establishment of the new genus *Altoparadisium* and a reevaluation of *Arthropogon* (Poaceae, Paniceae)," *Annals of the Missouri Botanical Garden* 88(2): 351-372. 2001 ["*Arthropogon bolivianus* and *Arthropogon rupestris* are reduced to varieties of *Altoparadisium chapadense*"], *Contributions from the United States National Herbarium* 46: 16-17. 2003.

Species

A. chapadense Filg. & al.

Chapada dos Veadeiros, Brazil. Erect, herbaceous, related to *Arthropogon scaber*, see *Annals of the Missouri Botanical Garden* 88(2): 363-366, f. 1-3. 2001.

A. scabrum (Pilg. & Kuhl.) Pilg. & al. (*Arthropogon scaber* Kuhl. & Pilg., nom. illeg., non *Arthropogon scaber* Pilg. & Kuhl.; *Arthropogon scaber* Pilg. & Kuhl.)

South America, Brazil. Erect, herbaceous, see *Comissão de Linhas Telegraficas Estratégicas de Matto-Grosso ao Amazonas, Botanica* 67 (Bot. 11): 37-38, t. 2. 1922, *Revista do Museu Paulista. Universidade de São Paulo* 13: 1249. 1922, *Annals of the Missouri Botanical Garden* 88(2): 366, f. 7. 2001.

A. scabrum (Pilg. & Kuhl.) Pilg. & al. var. ***bolivianum*** (Filg.) Filg. & al. (*Arthropogon bolivianus* Filg.)

South America. See *Brittonia* 38(1): 71, f. 1g. 1986, *Annals of the Missouri Botanical Garden* 88(2): 366. 2001.

A. scabrum (Pilg. & Kuhl.) Pilg. & al. var. ***rupestre*** (Filg.) Filg. & al. (*Arthropogon rupestris* Filg.)

South America. Rhizomatous, slopes, rocky places, see *Nordic Journal of Botany* 16(1): 69, f. 1. 1996, *Annals of the Missouri Botanical Garden* 88(2): 366. 2001.

A. scabrum (Pilg. & Kuhl.) Pilg. & al. var. ***scabrum***

South America. See *Annals of the Missouri Botanical Garden* 88(2): 366, f. 7. 2001.

Alvimia C.E. Calderón ex Soderstr. & Londoño = *Alvimia* Soderstrom & Londoño

Dedicated to the Brazilian botanist Paulo de T. Alvim, naturalist, Itabuna, Brazil.

About 3 species, Brazil. Bambusoideae, Bambusodae, Bambuseae, or Bambusoideae, Bambuseae, Arthrotyliidiinae, perennial, woody, strong, unarmed, leafy, solid, ascending, slender, scandent, climbing and hanging, smooth, persistent, branched, cylindrical culms, rhizomes pachymorph, auricles present, ligule ciliate, outer ligule sometimes lacking, sheath silky or pubescent, leaves disarticulating from the sheaths, plants bisexual, synflorescences spicate and paniculate, pseudospikelets slender and lax, glumes 0-3 awnless, palea present notched and awnless, 3 lodicules free and membranous, 2 or rarely 3 stamens, ovary glabrous without the apical appendage, stigmas plumose, fleshy fruits olives-like, forest, coastal forest, similar to *Atractantha*, type *Alvimia auriculata* Soderstr. & Londoño, see T.R. Soderstrom & X. Londoño, "A morphological study of *Alvimia* (Poaceae: Bambuseae), a new Brazilian bamboo genus with fleshy fruits," *American Journal of Botany* 75(6): 819-839. 1988, *Bonplandia* (Corrientes) 8(1-4): 81. 1994, *American Bamboos* 151-154. 1999, *Contributions from the United States National Herbarium* 39: 11. 2000.

Species

A. auriculata Soderstr. & Londoño

Brazil, Bahia. Smooth culms, climbing, forming dense clumps, shortly rhizomatous, coastal, sandy white soil, see *American Journal of Botany* 75(6): 833, f. 3-7, 12. 1988.

A. gracilis Soderstr. & Londoño

Brazil. Decumbent or curved, delicate, climbing, strong, solid, slender, smooth, small leaves, forming dense clumps, coastal, damp habitat, see *American Journal of Botany* 75(6): 835, f. 8, 11, 13-16. 1988.

A. lancifolia Soderstr. & Londoño

Brazil. Woody, slender, climbing, see *American Journal of Botany* 75(6): 837, f. 1-2, 9, 17. 1988.

***Alycia Willd. ex Steud.* = *Eriochloa* Kunth**

See *Nova Genera et Species Plantarum* 1: 94-95, t. 30. 1815 [1816], *Nomenclator Botanicus. Editio secunda* 1: 37, 66,

747. 1840 and *N. Amer. Fl.* 17: 157. 1912, *Flora Mesoamericana* 6: 333-335. 1994, *Contributions from the United States National Herbarium* 46: 233-239. 2003

Amagris Raf. = *Calamagrostis* Adans.

Derived from *Calamagrostis*.

Pooideae, Poaeae, Agrostidinae, see *Familles des Plantes* 2: 31, 530. 1763, *Tentamen Florae Germanicae* 1: 34. 1788, Constantine Samuel Rafinesque, *Principes Fondamentaux de Somiologie* 27. Palerme 1814, *Flora Telluriana*. 1: 17, 84. 1836 [1837] and *Contributions from the United States National Herbarium* 48: 191-227. 2003.

Amaxitis Adans. = *Dactylis* L.

Pooideae, Poodae, Poaeae, or Pooideae, Poaeae, Dactylidinae, see *Species Plantarum* 1: 71. 1753, *Familles des Plantes* 2: 34, 515. 1763 and *Flora Pyrenaea ...* 4: 359. 1901, *University of California Publications in Botany* 31(1): 1-40. 1959 [Cytogenetic and evolutionary studies in the genus *Dactylis*. I: Morphology, distribution, and interrelationships of the diploid subspecies.], *Contributions from the United States National Herbarium* 48: 242-244. 2003.

Amblyachyrum Hochst. & Steud. = *Amblyachyrum* Steud., *Apocopsis* Nees, *Apocopsis* Nees

From the Greek *amblys* “blunt, obtuse” and *achyron* “chaff, husk.”

Type *Amblyachyrum mangalorensis* Hochst. ex Steud., see *Synopsis Plantarum Glumacearum* 1: 413. 1854 [1855] and *Proceedings of the Linnean Society of London* 1: 93-94. 1841, *Monographiae Phanerogamarum* 6: 259. 1889 and *Blumea* 4(3): 523. 1941, *Taxon* 34: 159-164. 1985.

Amblychloa Link = *Sclerochloa* P. Beauv.

From the Greek *amblys* “blunt, obtuse” and *chloe, chloa* “grass.”

Pooideae, Poaeae, Puccinelliinae, type *Sclerochloa dura* (L.) P. Beauv., see *Species Plantarum* 1: 72. 1753, *Essai d'une nouvelle Agrostographie* 97, 98, 174, 177, t. 19, f. 4. 1812, *Commentationes Botanicae* 26-27. 1822, *Botanicon Gallicum* 1: 522. Paris 1828-1830, *Linnaea* 17(4): 399. 1844, *Spicilegium florum rumelicarum et bithynicarum ...* 2: 431. 1846, Carl Frederik Nyman (1820-1893), *Sylloge florum europaeae, seu Plantarum vascularium Europae indigenarum, enumeratio, adjectis synonymis gravioribus et indicata singularum distributione geographica*. 423. 1855, *Index Kewensis* 1: 104. 1895 and *Contr. U.S. Natl. Herb.* 10: 2.

1906, *American Journal of Botany* 18(8): 684-685, f. 1-4. 1931, *Journal of Cytology and Genetics* 21: 155. 1986, D.M. Brandenburg, J.R. Estes & J.W. Thieret, “Hard Grass (*Sclerochloa dura*, Poaceae) in the United States.” *Sida*. 14(3): 369-376. 1991, *Cytologia* 56: 437-452. 1991, *Flora Mediterranea* 8: 307-313. 1998, *Contributions from the United States National Herbarium* 48: 608-609. 2003.

Amblyopyrum (Jaub.) Eig = *Aegilops* L., *Amblyopyrum* Eig

From the Greek *amblys* “blunt, obtuse” and *pyros* “grain, wheat.”

One species, western Asia. Pooideae, Triticeae, or Pooideae, Triticeae, Triticinae, annual, herbaceous, ligule an unfringed membrane, plants bisexual, inflorescence a single spike, spikelets embedded in the rachis, 2 glumes more or less equal, palea present, 2 lodicules free and membranous, 3 stamens, ovary hairy, 2 stigmas, sometimes included in *Aegilops* L., see *Species Plantarum* 2: 1050-1051. 1753, *Illustrationes Plantarum Orientalium* 4: 23. 1851 and Alexander Eig (1894-1938), “*Amblyopyrum* Eig.: a new genus separated from the genus *Aegilops*.” Tel-Aviv 1929, *Feddes Repert.* 91: 225-228. 1980, *Feddes Repert.* 95: 425-521. 1984, *Taxon* 41: 555-556. 1992, *Nordic Journal of Botany* 13: 481-493. 1993, *Agric. Univ. Wageningen Pap.* 94-7: 1-512. 1994 [Wild wheats: a monograph of *Aegilops* L. and *Amblyopyrum* (Jaub. & Spach) Eig.], *Taxon* 44: 611-612. 1995, *Contributions from the United States National Herbarium* 48: 20-23. 2003.

Species

A. muticum (Boiss.) Eig (*Aegilops loliacea* Jaub.; *Aegilops mutica* Boiss.; *Aegilops mutica* f. *gandiljanii* K. Hammer; *Aegilops mutica* f. *liolacea* (Jaub.) K. Hammer; *Aegilops mutica* f. *mutica*; *Aegilops mutica* f. *nuluci* (Gandilyan) K. Hammer; *Aegilops mutica* f. *nurub* (Gandilyan) K. Hammer; *Aegilops mutica* f. *nuruni* (Gandilyan) K. Hammer; *Aegilops mutica* f. *puluci* (Gandilyan) K. Hammer; *Aegilops mutica* f. *puruni* (Gandilyan) K. Hammer; *Aegilops mutica* subsp. *liolacea* (Jaub.) Zhuk.; *Aegilops mutica* subsp. *tripsacoides* (Jaub.) Zhuk.; *Aegilops mutica* var. *liolacea* (Jaub.) Eig; *Aegilops mutica* var. *nual* Gandilyan; *Aegilops mutica* var. *nuluci* Gandilyan; *Aegilops mutica* var. *nurub* Gandilyan; *Aegilops mutica* var. *nuruni* Gandilyan; *Aegilops mutica* var. *pual* Gandilyan; *Aegilops mutica* var. *puluci* Gandilyan; *Aegilops mutica* var. *puruni* Gandilyan; *Aegilops mutica* var. *typica* Eig; *Aegilops tripsacoides* Jaub. & Spach; *Aegilops tripsacoides* Jaub.; *Amblyopyrum muticum* subsp. *liolaceum* (Jaub.) Á. Löve; *Amblyopyrum muticum* var. *liolaceum* (Jaub.) Eig; *Amblyopyrum muticum* var. *typicum* Eig; *Triticum muticum* (Boiss.) Hack.; *Triticum muticum* var. *tripsacoides* (Jaub.) Thell.; *Triticum tripsacoides* (Jaub. & Spach) Bowden; *Triticum tripsacoides*

(Jaub.) Bowden; *Triticum tripsacoides* f. *lohiaceum* (Jaub.) Bowden; *Triticum tripsacoides* f. *tripsacoides*)

Turkey. Related to wheat, see *Diagnoses plantarum orientarium novarum* 1(5): 73. 1844, *Illustrationes Plantarum Orientalium* 2: 121, t. 200. 1847, *Illustrationes Plantarum Orientalium* 4: 23, t. 317. 1851 and *Annals of Scottish Natural History* 103. 1907, *Bulletin de la Société Botanique de Genève* 19: 329. 1928, *Canad. J. Bot.* 37: 666. 1957, *Canadian Journal of Botany* 37: 666. 1959, *Feddes Repert.* 91: 119, 229-230. 1980, *Feddes Repert.* 95: 494. 1984, *Agric. Univ. Wageningen Pap.* 94-7: 405-406. 1994.

A. muticum (Boiss.) Eig var. **lohiaceum** (Jaub. & Spach) Eig (*Aegilops loliacea* Jaub. & Spach; *Aegilops loliacea* Jaub.; *Amblyopyrum muticum* var. *lohiaceum* (Jaub.) Eig)

Armenia, Turkey. See *Illustrationes Plantarum Orientalium* 4: 23, t. 317. 1851 and *Bulletin de la Société Botanique de Genève* 19: 329. 1928, *Agric. Univ. Wageningen Pap.* 94-7: 417. 1994.

A. muticum (Boiss.) Eig var. **muticum**

Turkey, Armenia. See *Agric. Univ. Wageningen Pap.* 94-7: 408. 1994.

Amblytes Dulac = *Molinia* Schrank

Greek *amblytes* “bluntness, dullness.”

Arundinoideae, Arundineae, see *Species Plantarum* 63. 1753, *Baiersche Flora* 1: 100, 334. 1789, *Methodus Plantas Horti Botanici* ... 183. 1794, *Flore du Département des Hautes-Pyrénées* 80. 1867 and *U.S. Dept. Agric. Bull.* 772: 50. 1920, *Fragmenta Floristica et Geobotanica* 21: 21-50. 1975, *Zlaki SSSR* 557. 1976, *Acta Facultatis Rerum Naturalium Universitatis Comenianae, Botanica* 33: 51-55. 1986, *Symbolae Botanicae Upsaliensis* 27(2): 139-145. 1986[1987], *Bot. Zhurn.* 74: 1675-1678. 1989, *Boletim da Sociedade Broteriana, ser. 2* 63: 29-66, 153-205. 1990, *Contributions from the United States National Herbarium* 46: 296. 2003.

Ammochloa Boiss. = *Cephalochloa* Coss. & Durieu, *Dictyochloa* (Murb.) E.G. Camus

From the Greek *ammos* “sand” and *chloe, chloa* “grass,” referring to the habitat.

About 3-4 species, Mediterranean. Pooideae, Poodae, Aveneae, annual, herbaceous, caespitose, unbranched, leaves mostly basal, auricles absent, ligule an unfringed membrane, plants bisexual, inflorescence paniculate contracted and ovoid, at the base of the inflorescence sterile spikelets reduced to small bracts, 2 glumes more or less equal, lemmas mucronate, palea present, lodicules absent, 2-3 stamens, ovary glabrous, 2 stigmas, open areas, sandy

places, dry areas, dry sandy places, see *Diagnoses plantarum orientarium novarum* ser. 1. 2(13): 51-52. 1854, *Annales des Sciences Naturelles, Botanique, sér. 4* 1: 229. 1854 and *Acta Universitatis Lundensis* 36(4): 12. 1900, *Repertorium Specierum Novarum Regni Vegetabilis, Beihefte* 63: 1. 45. 1931, *Kew Bulletin, Additional Series* 13: 109. 1986 [*Genera Graminum*].

Species

A. involucrata Murb.

Morocco. See *Acta Universitatis Lundensis* 36: 11-12, f. 3; t. 13, f. 3-7. 1900.

A. palaestina Boiss.

Palestine. See *Diagnoses plantarum orientarium novarum* 2(13): 52. 1854, *Bulletin de la Société Botanique de France* 1: 317. 1854 and Renato Pampanini (1875-1949), *Plantae tripolitanae ... florum vascularis Tripolitaniae*. Firenze 1914, *Flore de l'Afrique du Nord* 3: 10-11. 1955.

A. subacaulis Balansa ex Coss. & Durieu (*Ammochloa palaestina* f. *subacaulis* (Balansa ex Coss. & Durieu) Maire & Weiller; *Ammochloa palaestina* var. *subacaulis* (Balansa ex Coss. & Durieu) Pamp.)

Algeria. See *Bulletin de la Société Botanique de France* 1: 317. 1854 and *Bollettino della Società Botanica Italiana* 1914: 11. 1914, *Flore de l'Afrique du Nord* 3: 10-11. 1955.

A. unispiculata Eig

Palestine. See *Repertorium Specierum Novarum Regni Vegetabilis, Beihefte* 63: 1. 45. 1931.

Ammophila Host = *Psamma* P. Beauv.

From the Greek *ammos* “sand” and *philos* “loving,” referring to its habitat.

About 2-4 species, North temperate, Europe, North Africa, North America. Pooideae, Poodae, Aveneae, or Pooideae, Poeae, Agrostidinae, perennial, coarse, tough, stiff, erect, herbaceous, unbranched, rhizomatous with hard and long rhizomes scaly and spreading, clumped, forming compact tussock, production of great numbers of vertical tillers and culms, glabrous nodes, hollow internodes, heavy foliage cover, leaves mostly basal, ligule acute and membranous, auricles absent, linear leaves pungent and gray-green to glaucous, leaves adapted to avoid excessive water loss, plants bisexual, a dense spike-like panicle more or less cylindrical, spikelets flattened laterally and bisexual, 1 floret bisexual, 2 glumes equal or subequal, coriaceous lemmas awnless and carinate or sharply keeled, palea present, 2 lodicules membranous and not toothed, 3 stamens, ovary glabrous, 2 stigmas, fruit ellipsoid and longitudinally grooved, sand-binder, ornamental, plays an important role in the process of dune formation and stabilization of coastal dunes, highly adapted to colonize shifting sand, widely

planted to repair or stabilize dune areas, useful for erosion control, hybrids with *Calamagrostis* Adans., type *Ammophila arundinacea* Host, see *Icones et Descriptiones Graminum Austriacorum* 4: 24, t. 41. 1809, *Essai d'une Nouvelle Agrostographie* 143, 176. 1812, *A Manual of the Botany of the Northern United States* 583. 1848 and A.H.L. Huiskes, "Biological flora of the British Isles: *Ammophila arenaria* (L.) Link." in *Journal of Ecology* 67: 363-382. 1979, *Watsonia* 18: 415-417. 1991, *New York Flora Association Newsletter* 3(1): 4. 1992, *New York Flora Association Newsletter* 5(2): 5-7. 1994, Alfred M. Wiedemann and Andrea Pickart, "The *Ammophila* problem on the Northwest Coast of North America." *Landscape and Urban Planning* 34: 287-299. 1996, *Am. J. Bot.* 84: 118. 1997, *Am. J. Bot.* 85: 1638-1645. 1998, *Am. J. Bot.* 86: 703-710. 1999, *Opera Botanica* 137: 1-42. 1999, *Am. J. Bot.* 87: 1578-1583. 2000, *Journal of Ecology* 88(5): 825-839. Oct 2000, *Am. J. Bot.* 89: 479-485, 623-631, 1431-1438. 2002, *Journal of Ecology* 90(2): 394-403. Apr 2002, *Contributions from the United States National Herbarium* 48: 107. 2003, *Restoration Ecology* vol. 12, issue 1: 29-35. Mar 2004, *New Phytologist* vol. 162, issue 3: 697-704. June 2004, *Environmental Microbiology* 6(8): 769-779. Aug 2004, *Ecology Letters* 7(8): 721-733. Aug 2004, *Ecology Letters* 7(10): 975-989. Oct 2004, *Plant Species Biology* 19(3): 175-184. Dec 2004, *Functional Ecology* 18(6): 914-924. Dec 2004, *Biological Journal of the Linnean Society* 83(4): 509-525. Dec 2004, *Journal of Ecology* 93(1): 5-15. Feb 2005, *Restoration Ecology* 13(1): 215-222. Mar 2005, *Journal of Ecology* 93(2): 441-470. Apr 2005, *Botanical Journal of the Linnean Society* 147(4): 501-508. Apr 2005.

Species

A. arenaria (L.) Link (*Ammophila arundinacea* Host; *Ammophila littoralis* (P. Beauv.) Rothm.; *Arundo arenaria* L.; *Arundo littoralis* P. Beauv. ex Steud.; *Calamagrostis arenaria* (L.) Roth; *Phalaris ammophila* (Host) Link; *Phalaris maritima* Nutt.; *Psamma arenaria* (L.) Roem. & Schult.; *Psamma littoralis* P. Beauv.)

Europe. Perennial, robust, coarse, erect, herbaceous, rigid and smooth, growing in small dense compact tufts, spreading rapidly by underground tough rhizomes that send vertical shoots upward, roots rather thin and fibrous, leaf sheath glabrous, thin and long ligules, leaves erect, inflorescence cylindrical, dense spike-like panicles, spikelets ascending, glumes narrow and subequal, lanceolate lemmas stiff and glabrous, thatching, baskets and brooms, rhizomes used for making rope and mats, coastal species, sand and dunes binder or stabilizer, drought-tolerant, useful for erosion control, not suitable for permanent erosion control, this grass is the prime colonist of unstable and mobile sand hills in dune systems, highly and perfectly adapted to colonize shifting sands of the foredune, used to control shifting dunes in coastal regions, sometimes an invasive and aggressive

weed, introduced to the west coast of North America in 1868 to stabilize sand dunes in the San Francisco area, threatens coastal sand dunes in the eastern and western United States, dies out when sand ceases to move, grows naturally in sand dunes along the coast, see *Species Plantarum* 1: 82. 1753, *Tentamen Florae Germanicae* 1: 34. 1788, *Icones et Descriptiones Graminum Austriacorum* 4: 24, t. 41. 1809, *Essai d'une Nouvelle Agrostographie* 144, t. 6, f. 1,176. 1812, *Systema Vegetabilium* 2: 845. 1817, *The Genera of North American Plants* 1: 48. 1818, *Enumeratio Plantarum Horti Regii Berolinensis Altera* 1: 66. 1821, *Hortus Regius Botanicus Berolinensis* 1: 105. 1827, *Nomenclator Botanicus* edition 2. 1: 144. 1840 and *Feddes Repertorium* 52: 269. 1943, *The American Grass Book* 186. 1953, *Webbia* 49(2): 265-329. 1995, *Taxon* 49(2): 247. 2000, *Molecular Ecology* 9(9): 1223-1232. in English: marram grass, marram, beach grass, mel grass, Holland dune grass, European beach grass, European beachgrass

in French: élyme des sables, roseau des sables, ammophile des sables

in Spanish: grama de las dunas

A. arenaria (L.) Link subsp. **arenaria**

North and west Europe, southward to northwest Spain. Perennial, rhizomatous, branched, auricles absent, ligule long acuminate and hairy to scabrous, basal leaf sheaths not keeled, leaf blades linear and strongly involute, a panicle oblong and strongly contracted, inflorescence of chasmogamous spikelets, palea narrowly ovate to narrowly elliptic, sand and dunes binder or stabilizer, see *Hortus Regius Botanicus Berolinensis* 1: 105. 1827.

in English: marram grass

A. arenaria (L.) Link subsp. **arundinacea** (Husn.) H. Lindb. (*Ammophila arenaria* subsp. *arenaria* var. *australis* (Mabille) Hayek; *Ammophila australis* (Mabille) Porta & Rigo; *Ammophila littoralis* (P. Beauv.) Rothm.; *Ammophila pallida* (C. Presl) Fritsch; *Psamma australis* Mabille)

Europe, Morocco, Turkey. Useful for erosion control, see *Acta societatis scientiarum fennica. Series B. Opera biologica* 1(2): 10. Helsinki 1932.

A. arenaria (L.) Link subsp. *australis* (Mabille) M. Laínz (*Psamma australis* Mabille)

Europe. See *Recherches sur les plantes de la Corse* 1: 33. Paris 1867.

A. arenaria (L.) Link var. *arundinacea* (Host) Husn. (*Ammophila arundinacea* Host)

Europe. See *Icones et Descriptiones Graminum Austriae* 4: 24, t. 41. 1809, *Graminées. Descriptions ... France, Belgique, Isles Britanniques, Suisse* 19. 1896.

A. arenaria (L.) Link var. *australis* (Mabille) Durand & Barratte (*Psamma australis* Mabille)

Europe. See *Recherches sur les plantes de la Corse* 1: 33. 1867 and *Florae libycae prodromus* ou catalogue raisonné des plantes de Tripolitaine 255. Genève 1910, *Bull. Soc. Bot. France* 57: 629-630. 1910.

A. breviligulata Fernald (*Ammophila arenaria* var. *breviligulata* (Fernald) S.G. Archer & C.E. Bunch)

Northeast northern America, U.S., Canada. Perennial, herbaceous, erect, low-growing, dark green to bluish green, coarse, tough, stiff, with strong and deep creeping rhizomes, vigorous, stems surrounded by old leaf sheaths, ligules firm and short, leaves linear rolled inward, lanceolate spikelets in dense spike-like panicles, glumes slightly scabrous, lemma rough, grain brown, low palatability, a pioneer colonist, can become invasive, can tolerate severe maritime exposure, useful for erosion control, used for initial sand dune stabilization, primary stabilization and revegetation of coastal sand dunes, growing on sandy sea-beach, sand dunes dune bluff edges, see *Rhodora* 22(256): 71. 1920, *The American Grass Book* 186. 1953, Denise M. Seliskar, "The response of *Ammophila breviligulata* and *Spartina patens* (Poaceae) to grazing by feral horses on a dynamic mid-Atlantic barrier island." *Am. J. Bot.* 90: 1038-1044. 2003.

in English: American beach grass, American beachgrass, American marram, beachgrass

A. champlainensis F. Seymour (on Lake Champlain)

Northern America. Found in shores, margins of fresh water, lakes and riverbanks, see *Sida* 2: 349. 1966.

in English: Champlain beachgrass

x *Ammocalamagrostis* P. Fourn.

Ammophila x *Calamagrostis*.

See *Monde des Plantes; revue mensuelle de botanique* 35: 28. 1934, *Genera Graminum* 374. 1986.

Ampelocalamus S.L. Chen, T.H. Wen & G.Y. Sheng = *Patellocalamus* W.T. Lin, *Sinarundinaria* Nakai

Greek *ampelos* "a vine" and *kalamos* "a reed, cane."

About 11 species, China, Hainan. Bambusoideae, Bambuseae, Arundinariinae, unicaspitose, small, sympodial, shrubby, lianoid, clumping, scandent, scrambling, climbing, culms erect below and pendulous or drooping upward, rhizomes short-necked pachymorph, manifold-branching, branches slender and short, internodes cylindrical and glabrous, culm sheath shedding late and far shorter than internode, sheath auricles distinct with long radial cilia, sheath blade developed, leaf blades lacking cross-veins, flowering semelauctant, diffuse panicle, large spikelets, 1-2 thin glumes, 3 stamens, 2 plumose stigmas, subtropical bamboos, culms for weaving, leaves as animal fodder, type *Ampelocalamus actinotrichus* (Merr. & Chun) S.L. Chen, T.H. Wen & G.Y. Sheng, see *Linnaea* 9(4): 476. 1835 and *Journal of Japanese Botany* 11(1): 1. 1935, *Acta Phytotaxonomica Sinica* 19: 332-334, f. 1. 1981, *Journal of Bamboo Research* 2(1): 15. 1983, *Journal of South China Agricultural University* 10(2): 45-46. 1989, *Kew Bulletin* 51(4): 809-813. 1996.

Species

A. actinotrichus (Merrill & Chun) S.L. Chen, T.H. Wen & G.Y. Sheng (*Arundinaria actinotricha* Merr. & Chun; *Indocalamus actinotrichus* (Merr. & Chun) McClure; *Pleioblastus actinotrichus* (Merr. & Chun) Keng f.)

China, Hainan Island, Guangdong. Thin, upper portion drooping, clumping, young culms with deciduous tomentum, culms and culm sheaths setose, sheath shorter than internode and shedding late sheath blade long lanceolate, sheath auricles caducous with stellate cilia, sheath ligule very short and ciliate, leaf lanceolate, lateral veins distinct, rhizomes will not run sideways, ornamental, growing in forests, see *Sunyatsenia* 2(3-4): 206-207, pl. 36. 1935, *Sunyatsenia* 6(1): 32. 1941, *Flora Illustralis Plantarum Primarium Sinicarum: Gramineae* 34, f. 23. 1959, *Acta Phytotaxonomica Sinica* 19(3): 334, f. 1. 1981.

in English: radiant hairy bamboo

in Chinese: She mao xuan zhu

A. anhispidis Wen

China. See *Journal of Bamboo Research* 4(2): 11, f. 2. 1985.

A. calcareus C.D. Chu & C.S. Chao

China, Guizhou, Libo. Soft and slender, manifold branching, 5-7 branches at each node, culms top drooping to scandent, leaning, clumping, culms and culm sheaths pubescent, culm sheaths persistent shorter than the internode, sheath blade ovate lanceolate or lanceolate, lateral veins not distinct, sheath auricles ciliate, sheath ligule densely hairy to fimbriate, rhizomes will not run sideways, 2-3 leaves on each branch, leaves oblong-lanceolate, see *Acta Phytotaxonomica Sinica* 21(2): 204-206, pl. 1. 1983.

A. ludianensis Yi & R.S. Wang (*Drepanostachyum ludianense* (T.P. Yi & R.S. Wang) Keng f.)

China. See *Journal of Bamboo Research* 4(2): 3-5, f. 1. 1985, *Journal of Bamboo Research* 5(2): 35. 1986.

A. mianningensis (Q. Li & X. Jiang) D.Z. Li & Stapleton (*Dendrocalamus mianningensis* Q. Li & X. Jiang; *Patellocalamus mianningensis* (Q. Li & X. Jiang) T.P. Yi)

China. See *Journal of Southwestern Forestry College* 1984(1): 134, f. 1. 1984, *Journal of Bamboo Research* 12(2): 54. 1993, *Kew Bulletin* 51(4): 811. 1996.

A. microphyllus (Hsueh/Xue & Yi) Hsueh & Yi (*Drepanostachyum microphyllum* (J.R. Xue & T.P. Yi) Keng f. ex Yi; *Sinocalamus microphyllus* J.R. Xue & T.P. Yi)

China. See *Journal of the Yunnan Forestry College* 1: 71-73, f. 2. 1982, *Journal of Bamboo Research* 4(2): 7-8. 1985, *Journal of Bamboo Research* 12(4): 46. 1993.

A. naibunensis (Hayata) T.H. Wen (*Arundinaria naibunensis* Hayata; *Drepanostachyum naibunense* (Hayata) Keng f.)

Asia. See *Journal of the College of Science, Imperial University of Tokyo* 30(1): 408-409. 1911, *Journal of Bamboo Research* 5(2): 32, f. 4. 1986, *Journal of Bamboo Research* 6(3): 34. 1987.

in English: Naibun bamboo

in China: Nei men zhu

in Japan: Naibun medake

A. patellaris (Gamble) Stapleton (*Chimonobambusa jainiana* C.R. Das & D.C. Pal; *Dendrocalamus patellaris* Gamble; *Drepanostachyum jainianum* (C.R. Das & D.C. Pal) R.B. Majumdar; *Drepanostachyum patellaris* (Gamble) J.R. Xue & D.Z. Li; *Patellocalamus patellaris* (Gamble) W.T. Lin; *Sinarundinaria jainiana* (C.R. Das & D.C. Pal) H.B. Naithani; *Sinocalamus patellaris* (Gamble) T.Q. Nguyen)

India, Sikkim, Darjeeling. Pendulous, semiscandent above, internodes striate, leaf sheaths glabrous, culms for weaving, leaves as animal fodder, see *Annals of the Royal Botanic Garden, Calcutta* 7: 86-87, t. 75. 1896 and *Journal of Economic and Taxonomic Botany, Additional Series* 4(3): 1023. 1983, *Bulletin of the Botanical Survey of India* 25(1-4): 235. 1983 [1985], *Journal of South China Agricultural University* 10(2): 46. 1989, *Bot. Zhurn.* (Moscow & Leningrad) 74(11): 1662. 1989, *Edinburgh Journal of Botany* 51(3): 321-323, f. 7. 1994, *Kew Bulletin* 51(4): 811. 1996.

Local names: nibha, ghopi bans, pajiok

A. saxatilis (Hsueh & Yi) Hsueh & Yi (*Drepanostachyum saxatile* (J.R. Xue & T.P. Yi) Keng f. ex Yi; *Sinocalamus saxatilis* J.R. Xue & T.P. Yi)

China. See *Journal of the Yunnan Forestry College* 1: 69, f. 1. 1982, *Journal of Bamboo Research* 4(2): 5. 1985, *Journal of Bamboo Research* 12(4): 46. 1993.

A. scandens J.R. Xue & W.D. Li (*Drepanostachyum scandens* (J.R. Xue & W.D. Li) Keng f. & T.P. Yi)

China. See *Journal of Bamboo Research* 4(2): 5-7, f. 2. 1985 and 12(4): 46. 1993.

Ampelodesma T. Durand & Schinz =
Ampelodesma P. Beauv. ex Benth.,
Ampelodesma P. Beauv., *Ampelodesmos* Link

Pooideae, Stipeae, Ampelodesmeae, see *Essai d'une Nouvelle Agrostographie* 78, pl. 15, f. 11. 1812, *Conspectus Florae Africae* 5: 874. 1894 and *Contributions from the United States National Herbarium* 48: 108. 2003.

Ampelodesmos Link = *Ampelodesma* T. Durand & Schinz, *Ampelodesma* P. Beauv., *Ampelodonax* Lojacono

Latin and Greek *ampelodesmos*, ancient name for *Lygeum spartum*, used in Sicily for tying up vines (Plinius).

One species, Mediterranean, North Africa. Stipoideae, Ampelodesmeae, or Pooideae, Poeae, or Pooideae, Stipeae, Ampelodesmeae, perennial, coastal, herbaceous, robust, solid, coarse, leaf blades harsh, rhizomatous, internodes solid, auricles absent, ligule a fringed membrane, plants bisexual, dense inflorescence paniculate with slender branches, spikelets 2-6-flowered, 2 membranous glumes more or less equal, lemmas incised mucronate or awned, palea present 2-dentate, 3 lodicules free and membranously hairy, 3 stamens, ovary with hairy apical appendage, 2 white stigmas, in dry places, oak woodland, coastal, resembles *Festuca*, type *Ampelodesmos tenax* (Vahl) Link, see *Essai d'une Nouvelle Agrostographie* 78, pl. 15, f. 11. 1812, *Hortus Regius Botanicus Berolinensis* 1: 136. 1827, *Conspectus Florae Africae* 5: 874. 1894 and *Flora Sicula* 3: 282. 1909, *Brittonia* 16: 76-79. 1964, *Taxon* 29: 645-666. 1980, *Kew Bulletin, Additional Series* 13: 93. 1986 [W.D. Clayton and S.A. Renvoize, *Genera Graminum*], *Contributions from the United States National Herbarium* 48: 108. 2003.

Species

A. mauritanicus (Poir.) T. Durand & Schinz (*Ampelodesmos bicolor* (Poir.) Kunth; *Ampelodesmos effusus* Steud.; *Ampelodesmos effusum* Steud.; *Ampelodesmos mauritanica* (Poir.) T. Durand & Schinz; *Ampelodesmos tenax* (Vahl) Link; *Ampelodonax bicolor* (Poir.) Lojac.; *Arundo bicolor* Poir.; *Arundo mauritanica* Poir.; *Arundo tenax* Vahl)

Tunisia, Europe, Turkey. Perennial, clumped, ligule membranous and ciliate, terminal inflorescence panicle-like with drooping branches, bisexual spikelets, glumes acuminate, cultivated, naturalized, used for rope making, see J.L.M. Poir. (1755-1834), *Voyage en Barbarie*, ou lettres écrites de l'ancienne Numidie pendant les années 1785 & 1786, sur la religion, les coutumes & les mœurs des Maures & des arabes-bédouins; avec un essai sur l'histoire naturelle

de ce pays. 2: 104. Paris 1789, *Symbolae Botanicae*, ... 2: 25. 1791, *Hortus Regius Botanicus Berolinensis* 1: 136. 1827, *Révision des Graminées* 1: 79. 1829, *Synopsis Plantarum Glumacearum* 1(3): 195. 1855 [1854], *Exploration Scientifique de l'Algérie* 2: 127. 1855, *Conspectus Florae Africae* 5: 874. 1894.

in English: dis grass, diss grass, Mauritania vine reed

in Morocco: dîs, diss, âdles

Ampelodonax Lojacono = *Ampelodesmos* Link

From the Greek *ampelos* “a vine” and *donax*, *donakos* for “a kind of reed.”

Pooideae, Stipeae, Ampelodesmeae, type *Ampelodonax bicolor* (Poir.) Lojac., see *Hortus Regius Botanicus Berolinensis* 1: 136. 1827 and *Flora Sicula* 3: 282. 1908-1909, *Contributions from the United States National Herbarium* 48: 108. 2003.

Amphibromus Nees = *Helictotrichon* Besser, *Helictotrichon* Besser ex Schult. & Schult.f., *Helictotrichon* Schult.

From the Greek *amphi* “both, of two kinds, on both sides, around, double” and the grass genus *Bromus* L. or *bromos* “food, the oat,” possibly alluding to similarity with the genus *Avena* L.

About 6-12 species, Australia, New Zealand, South America. Pooideae, Poodae, Aveneae, or Pooideae, Poeae, Aveninae, perennial, aquatic or semi aquatic, slender, herbaceous, erect or geniculate at base, tufted or spreading, sometimes decumbent, stems with swollen nodes, rhizomatous, auricles absent, sheath margins free, ligule membranous and entire becoming lacerated with age, leaves often rough to scabrous, linear leaf blade flat or inrolled, glabrous nodes, hollow internodes, plants bisexual, hidden cleistogenes when present in the leaf sheaths, inflorescence a narrow loose elongated panicle with slender branches, solitary spikelets compressed laterally and pedicellate, flowering may be cleistogamous or chasmogamous, florets bisexual 3-10 or uppermost male, 2 subequal glumes acute or obtuse, firm lemmas longer than the glumes, lemmas toothed or bifid, awns more or less twisted geniculate or straight, callus hairy to silky, palea with 2 ciliate keels and apically notched, 2 lodicules free and membranous, 3 stamens, ovary glabrous or slightly hairy at apex, 2 stigmas white, common in damp areas, wet or inundated habitats, waterholes and swamps, lagoons, sometimes referred to *Helictotrichon* Besser, type *Amphibromus neesii* Steud., see *London Journal of Botany* 2: 420. 1843, *Synopsis Plantarum*

Glumacearum 1: 328. 1854 and Jason Richard Swallen (1903-1991), “The grass genus *Amphibromus*.” *Amer. J. Bot.* 18: 411-415. 1931, *Feddes Repertorium* 45: 7. 1938, S.W.L. Jacobs and L. Lapinuro, “The Australian species of *Amphibromus* (Poaceae).” in *Telopea* 2: 715-729. 1986, *A Key to Australian Grasses* 1-150. 1990, *Contributions from the United States National Herbarium* 48: 108-109. 2003.

Species

A. archeri (Hook.f.) P. Morris (*Amphibromus archeri* (Hook.f.) P. Morris var. *papillosus* P. Morris; *Amphibromus neesii* sensu Rodway, p.p., non Steudel; *Danthonia archeri* Hook.f.) (the species is dedicated to the Australian (born in Tasmania) botanist William Archer, 1820-1874 (d. Longford, Tasmania), architect, Fellow of the Linnean Society, correspondent of Sir Joseph D. Hooker (1817-1911), sent algae to William Henry Harvey; see G. Whiting, *The Products and Resources of Tasmania*. With an Appendix containing papers on the Vegetable Products ... By the Hon. W. Archer. [London. International Exhibition, 1862.] Hobart Town 1862; Joseph Dalton Hooker, *Flora Tasmaniae*. 1: 262, t. 80, 81. London 1857; J. Lanjouw & F.A. Stafleu, *Index Herbariorum*. Part II, *Collectors A-D*. Regnum Vegetabile vol. 2. 1954; R. Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 20. London 1994; Stafleu & Cowan, *Taxonomic literature*. 1: 58. Utrecht 1976)

South Australia, Victoria, Tasmania. Perennial, caespitose, erect, basal culm internodes often swollen, basal leaf sheaths not keeled, auricles absent, ligule acute and membranous, leaf blades ribbed or channelled, leaves often rough to scabrous, panicle erect, cleistogamous or chasmogamous spikelets, glumes unequal and glabrous, lemma bristled, scabrous awn bent and twisted, palea 2-keeled, lodicules hyaline, yellow-brown glabrous and oblong fruit, in damp areas, wet or inundated habitats, waterholes and swamps, lagoons, see *Flora Tasmaniae* 2: 122, t. 163B. 1858 and *Victorian Naturalist; Journal and Magazine of the Field Naturalists' Club of Victoria* 51: 146-147, t. 26, 2-3. Melbourne 1934, *Telopea* 2: 726. 1986.

in English: swamp wallaby-grass, pointed swamp wallaby-grass (wallaby = small kangaroo)

A. fluitans Kirk (*Amphibromus gracilis* P. Morris)

Victoria, Tasmania, New South Wales, New Zealand. Perennial, lowland to montane, rare or threatened or endangered, erect or floating above, decumbent culms rooting at lower nodes, rhizomatous or stoloniferous, glabrous to scabrous, weakly tufted, auricles absent, papery leaf sheaths not keeled, ligule entire, leaf blade flat or linear, panicle more or less erect enclosed below by uppermost leaf sheath, spikelets spreading and erect, cleistogamous or chasmogamous, glumes unequal, lemmas hispid and 2-toothed, awn straight and stout, palea smooth and 2-keeled, ovary

glabrous, fruit yellow-brown to dark, occurs in shallow waters, wetlands, open habitats, in permanent swamps, see *Transactions and Proceedings of the New Zealand Institute* 16: 374, t. 28. 1884 and *American Journal of Botany* 18: 411-415. 1931, *Victoria Naturalist* 51: 145, t. 26, f. 5. 1934, *Telopea* 2: 728-729. 1986, *Wellington Bot. Soc. Bull.* 43: 29-32. 1987, *Fl. New Zealand* 5: 298-299. 2000.

in English: graceful swamp wallaby-grass, water brome, river swamp wallaby-grass

A. macrorhinus S.W.L. Jacobs & Lapinpuro (*Amphibromus neesii* sensu Jessop)

South Australia, Western Australia, New South Wales, Victoria, Tasmania. Perennial, endangered grass, tufted, small tussocks, erect, coarse, auricles absent, ligule acute and membrane-like, basal leaf sheaths not keeled, leaves glabrous to scabrous, panicles erect and open with spreading spikelets, spikelets cleistogamous or chasmogamous, glumes more or less unequal, lemma papillose and rough, awn bent and slightly twisted, fruit yellow-brown to dark, similar to *Amphibromus nervosus* (Hook.f.) Druce, occurs on floodplains, riverbanks, inland and coastal rivers, grassland, riparian habitats, in damp soaks, in waterholes and low-lying wet places, see *Telopea* 2(6): 723. 1986.

in English: long-nosed swamp wallaby-grass

A. neesii Steudel (*Amphibromus nervosus* (Hook.f.) Druce; *Amphibromus nervosus* (Hook.f.) Baill.; *Avena nervosa* R. Br., nom. illeg., non *Avena nervosa* Lam.; *Avenastrum nervosum* (R. Br.) Vierh.; *Danthonia archeri* Hook.f.; *Danthonia nervosa* Colenso, nom. illeg., non *Danthonia nervosa* Hook.f.; *Danthonia nervosa* Hook.f., nom. illeg., non *Avena nervosa* R. Br.; *Helictotrichon neesi* (Steud.) Stace) (for the German (b. near Erbach, Hesse) botanist Christian Gottfried (Daniel) Nees von Esenbeck, 1776-1858 (d. Breslau, Wroclaw), physician, 1800 Dr. Med., editor of Robert Brown, professor of botany, botanical collector; see J.H. Barnhart, *Biographical notes upon botanists.* 2: 542. 1965)

New South Wales, Victoria, Tasmania. Perennial, rare, light green, graceful, tall and weeping, tufted, sometimes rhizomatous, forming erect tussocks and colonies, basal culm internodes not swollen, auricles absent, ligule acute, leaf sheaths glabrous or scabrous, leaves very rough to scabrous, panicle open and very loose, spreading spikelets cleistogamous or chasmogamous, glumes green and purplish, awn flexuous, palea acute and 2-keeled, fruit yellow-brown to dark, flowers in response to rain or flooding, growing in marshes and lagoons, open habitats, wetlands, wet ground, bog gardens, floodplains, river flats, often confused with *Amphibromus nervosus* (Hook.f.) Druce, see *Prodromus Florae Novae Hollandiae* 1: 178. 1810, *Synopsis Plantarum Glumacearum* 1: 328. 1854, *Flora Tasmaniae* 2: 121-122, t. 163A, B. 1858, *Histoire des Plantes* 12: 203. 1893, *Transactions and Proceedings of the New Zealand Institute* 28: 612. 1896 and *Verhandlungen der Gesellschaft Deutscher*

Naturforscher und Ärzte 85(2): 672. 1914, *Botanical Society and Exchange Club of the British Isles* 1916: 604. 1917, *Telopea* 2: 718, 721, 726. 1986, *Watsonia* 18: 413. 1991.

in English: swamp wallaby-grass, Southern swamp wallaby-grass

A. nervosus (Hook.f.) Druce (*Amphibromus neesii* sensu Jessop; *Amphibromus neesii* Steud.; *Amphibromus nervosus* (Hook.f.) Baill.; *Avena nervosa* R. Br., nom. illeg., non *Avena nervosa* Lam.; *Avenastrum nervosum* Vierh.; *Avenastrum nervosum* (R. Br.) Vierh.; *Danthonia nervosa* Colenso, nom. illeg., non *Danthonia nervosa* Hook.f.; *Danthonia nervosa* Hook.f., nom. illeg., non *Avena nervosa* R. Br.; *Helictotrichon neesii* (Steud.) Stace)

South Australia, Western Australia, New South Wales, Victoria. Perennial, tufted, erect, semiaquatic, sometimes rooting at the nodes, auricles absent, ligule acute, sheaths glabrous, leaves glabrous to scabrous, leaf blade linear, panicle erect, spreading spikelets cleistogamous or chasmogamous, glumes more or less unequal and acute, lemma scabrous, awn bent and twisted, palea acute and 2-keeled, fruit compressed and glabrous, flowers in response to rain or flooding, withstands summer drought, similar to *Amphibromus neesii* Steudel, found in open habitats, swamps, moist areas, on the floodplains and banks of rivers, see *Prodromus Florae Novae Hollandiae* 1: 178. 1810, *Synopsis Plantarum Glumacearum* 1: 328. 1854, *Flora Tasmaniae* 2: 121-122, t. 163A, B. 1858, *Histoire des Plantes* 12: 203. 1893, *Transactions and Proceedings of the New Zealand Institute* 28: 612. 1896 and *Verhandlungen der Gesellschaft Deutscher Naturforscher und Ärzte* 85(2): 672. 1914, *Botanical Society and Exchange Club of the British Isles* 1916: 604. 1917, *Telopea* 2: 718, 720-721, 726. 1986, *Watsonia* 18: 413. 1991.

in English: common swamp wallaby-grass, veined swamp wallaby-grass, swamp wallaby-grass

A. pithogastrus S.W.L. Jacobs & Lapinpuro (Greek *pithos* "a large jar" and *gaster* "belly, paunch")

New South Wales, Victoria. Perennial, rare, tufted, not stoloniferous, swellings on the lower nodes, auricles absent, short ligule acute and entire, leaf sheaths glabrous, leaves glabrous to scabrous, leaf blades linear, panicle erect and slender, green to cream to straw-colored flowers, cleistogamous spikelets, spikelets on hispid pedicels, flowers in response to rain or flooding, glumes green, lemmas swollen, awn bent and twisted, short palea glabrous and acute, fruit yellow-brown, rare or threatened or endangered, presumed extinct in the south eastern part of New South Wales, similar to *Amphibromus neesii* Steudel, found in seasonally wet places, marshes and intermittent wetlands, moist habitats, near swamps, riparian forests, in swampy areas, see *Telopea* 2(6): 724. 1986.

in English: plump swamp wallaby-grass

A. quadridentulus (Döll) Swallen (*Avena montevidensis* Hack.; *Avena quadridentula* Döll; *Helictotrichon quadridentulum* (Döll) Renvoize; *Uralepis quadridentata* Döll)

South America, Brazil, Argentina, Uruguay. Swamps and moist areas, see *Flora Brasiliensis* 2(3): 100, pl. 29, f. 2. 1878, *Flora Brasiliensis* 2(3): 240. 1880 and *Österreichische Botanische Zeitschrift* 52(5): 188. 1902, *American Journal of Botany* 18: 414. 1931, *Kew Bulletin* 42: 921-925. 1987.

A. recurvatus Swallen

Victoria, Tasmania, Western Australia, South Australia. Perennial, tufted, purplish, erect, auricles absent, ligule entire and acute, leaf sheaths glabrous or pubescent, leaves glabrous to scabrous, green and purple erect panicle, chasmogamous spikelets, glumes more or less unequal, lemma hispid, awn bent and slightly twisted, palea obtuse, purple anthers, fruit compressed and glabrous, found in swamps and lagoons, open habitats, marshes and margins, see *American Journal of Botany* 18: 415. 1931, *Telopea* 2(6): 719. 1986.

in Australia: dark swamp wallaby-grass

A. scabrivalvis (Trin.) Swallen (*Avena scabrivalvis* Trin.; *Bromus gilliesii* Nees ex Steud.; *Bromus holciformis* Steud. & Hochst.; *Helictotrichon scabrivalvis* (Trin.) Govaerts, also *scabrivalve*; *Helictotrichon scabrivalvis* (Trin.) Renvoize, nom. illeg., non *Helictotrichon scabrivalvis* (Trin.) Govaerts) (for the Scottish physician John Gillies, 1792-1834 (d. Edinburgh), botanist, naval surgeon, M.D. 1817, 1820-1828 in Argentina, plant collector in South America, correspondent of John Miers (1789-1879) and William Jameson (1796-1873); see J.H. Barnhart, *Biographical notes upon botanists*. 2: 50. 1965; A. Lasègue, *Musée botanique de Benjamin Delessert*. 486. Paris 1845; John Miers, *Travels in Chile and La Plata*. 1: 226. London 1826; H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 171. Oxford 1964; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993)

Southern America, Chile, Argentina. Perennial, erect, rhizomatous, aquatic, basal corms, cleistogamous reproduction, cleistogamous spikelets enclosed within the leaf sheaths, ovary hairy, growing in shallow water, see *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 2(1): 28. 1836, *Synopsis Plantarum Glumacearum* 1: 324, 328. 1854 and *American Journal of Botany* 18: 413. 1931, *World Checklist of Seed Plants* 2(1): 14. 1996, S.A. Renvoize, *Gramíneas de Bolivia* 155, f. 37. 1998.

in English: swamp wallaby grass

A. scabrivalvis (Trin.) Swallen var. **indigestus** Nicora

South America, Argentina, Chile. See *Darwiniana* 18: 101, f. 6. 1973, *Flora Patagónica* 3: 1-583. 1978 [Gramineae], *Monographs in Systematic Botany from the Missouri Botanical Garden* 47: i-xi, 1-178. 1994 [*Catálogo de la familia Poaceae en la República Argentina*].

A. scabrivalvis (Trin.) Swallen var. **scabrivalvis**

Chile, Argentina. See *American Journal of Botany* 18: 413. 1931.

A. sinuatus S.W.L. Jacobs & Lapinpuro

New South Wales, Victoria, Tasmania. Perennial, rare, threatened or endangered plants, stoloniferous and rooting at the lower nodes, decumbent and ascending, lower nodes occasionally swollen, auricles absent, basal leaf sheaths not keeled, ligule acuminate and entire, panicle erect and flexuous, spikelets cleistogamous or chasmogamous, lemmas with straight awns, palea acute and 2-keeled, fruit compressed and yellow-brown to dark, found in swamps and lagoons, areas with permanent swamps, open habitats, wet mud, wetlands, see *Telopea* 2(6): 727. 1986.

in English: wavy swamp wallaby-grass

A. vickeryae S.W.L. Jacobs & Lapinpuro

Western Australia, Darling region, coastal districts, wet areas. Perennial, tufted or caespitose, robust, basal internodes swollen, auricles absent, ligule acute, leaf sheaths not keeled, leaves more or less scabrous or glabrous, leaf blade flat and linear, panicle erect and contracted, chasmogamous spikelets, lemma 4-lobed, short bristle produced at the end of each lemma lobe, finely hispid lemma back, palea acute, red brown fruit, species close to and confused with *Amphibromus nervosus* (Hook.f.) Druce, found in wet areas, coastal districts, see *Telopea* 2(6): 725. 1986.

A. whitei C.E. Hubb.

Queensland. Perennial, tufted, ligule hyaline and long acute, auricles absent, basal leaf sheaths not keeled, leaves glabrous and scabrous, panicle green and erect, cleistogamous spikelets, palea hyaline and 2-keeled, anthers yellow, ovary glabrous, fruit dark yellow and compressed, extinct species, in freshwater swamp, see *Bulletin of Miscellaneous Information Kew* 1941: 30. 1941.

Amphicarpon Kunth

Greek *amphi* “both, on both sides” and *karpos* “fruit”; see *Manual of the Southeastern Flora* 88. 1933, E.D. Merrill, *Index rafinesquianus*. 74. 1949.

Amphicarpon Raf.

Greek *amphi* “both, on both sides” and *karpos* “fruit”; see C.S. Rafinesque, in *Am. Monthly Mag. Crit. Rev.* 2: 175. 1818 and *Manual of the Southeastern Flora* 88. 1933, E.D. Merrill, *Index rafinesquianus*. 74. 1949.

Amphicarpum Kunth

From the Greek *amphi* “both, on both sides” and *karpos* “fruit,” see *Révision des Graminées* 1(2): 28. 1829.

Two species, southeastern U.S. Panicoideae, Panicoideae, Paniceae, or Panicoideae, Paniceae, Paspalinae, annual or perennial, herbaceous, unarmed, decumbent, auricles absent, ligule a fringe of hairs, plants bisexual, cleistogamous and chasmogamous, inflorescence paniculate, hidden cleistogenes subterranean, spikelets pedicellate, 1 or 2 very unequal glumes per spikelet, lower glume reduced or absent, lemmas acuminate, palea present, 3 stamens, open habitats, sandy fields, riverbanks, pinewoods, type *Amphicarpum purshii* Kunth, see *Révision des Graminées* 1(2): 28. 1829 and *American Journal of Botany* 35: 382-396. 1948, *Taxon* 20(2-3): 351. 1971, *Contributions from the United States National Herbarium* 46: 17. 2003.

Species

A. amphicarpon (Pursh) Nash (*Amphicarpon amphicarpon* (Pursh) Nash; *Amphicarpon purshii* Kunth; *Amphicarpum purshii* Kunth; *Milium amphicarpon* Pursh)

U.S. See *Flora Americae Septentrionalis; or, ...* 1: 62-63, t. 2. 1814, *Révision des Graminées* 1: 28. 1829, *Memoirs of the Torrey Botanical Club* 5(23): 352. 1894.

A. muhlenbergianum (Schult.) Hitchc. (*Amphicarpon floridanum* Chapm.; *Amphicarpum floridanum* Chapm.; *Milium muhlenbergianum* Schult.)

U.S. See *Mantissa* 2: 178. 1824, *Flora of the Southern United States* 572. 1860 and *Bartonia* 14: 34. 1932.

A. purshii Kunth (*Amphicarpon amphicarpon* (Pursh) Nash; *Amphicarpon purshii* Kunth; *Milium amphicarpon* Pursh)

North America. Leaves mostly basal, ponds, roadsides, see *Flora Americae Septentrionalis; or, ...* 1: 62-63, t. 2. 1814, *Révision des Graminées* 1: 28. 1829, *Memoirs of the Torrey Botanical Club* 5: 352. 1894.

Amphidonax Nees ex Lindl. = *Amphidonax* Nees, *Arundo* L.

From the Greek *amphi* “both, on both sides” and *donax*, *donakos* for “a kind of reed.”

Arundinoideae, Arundineae, type *Amphidonax bengalensis* Roxb. ex Nees, see *Species Plantarum* 1: 81. 1753, *An Introduction to the Natural System of Botany* 449. 1836, *Synopsis Plantarum Glumacearum* 1: 197. 1855 [1854] and N.L. Britton (1859-1934), *Flora of Bermuda* 29. New York 1918, *Contributions from the United States National Herbarium* 46: 113-115. 2003.

Amphigenes Janka = *Festuca* L.

From the Greek *amphigenes* “of doubtful gender.”

Pooideae, Poaceae, type *Amphigenes nutans* Hack. ex B.D. Jacks., see *Species Plantarum* 1: 73-76, 81-82. 1753, F.G. Dietrich (1768-1850), *Nachtrag zum vollständigen Lexicon der Gärtnererei und Botanik ...* 3: 333. Berlin 1817, *Linnaea* 30(5): 619. 1860, *Index Kewensis* 1: 111. 1895 and *Watsonia* 16: 300. 1987, *Contributions from the United States National Herbarium* 48: 312-368. 2003.

Amphilophis Nash = *Amphilophis* (Trin.) Nash, *Bothriochloa* Kuntze

Greek *amphilophos* “encompassing the neck,” *amphi* “on both sides” and *lophos* “a crest.”

Panicoideae, Andropogoneae, Sorghinae, type *Amphilophis torreyanus* (Steud.) Nash, see *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 2(4): 285. 1832, *Revisio Generum Plantarum* 2: 762. 1891 and Nathaniel Lord Britton (1859-1934), *Manual of the Flora of the Northern States and Canada* 71. New York 1901, *Darwiniana* 38(1-2): 127-186. 2000, *Contributions from the United States National Herbarium* 46: 135-141. 2003.

Amphipogon R. Br. = *Gamelythrum* Nees, *Pentacraspedon* Steud.

From the Greek *amphi* “both, around, all round” and *pogon* “a beard,” referring to the hairy rachis of the spikelet, or to lemma and palea with ciliate awns, or to the bearded spikelets.

About 5-9 species, Australia. Arundinoideae, Amphipogoneae, perennial, more or less shortly rhizomatous, tufted or spreading or tussocky, herbaceous, more or less glandular, erect or geniculate at the base, unbranched, leaf blades convolute and pungent, auricles absent, ligule a fringe of hairs, narrow leaves stiff and hairy, glabrous and dark nodes, plants bisexual, inflorescence spiciform or capitate, terminal and dense spikes or panicles, bisexual spikelets awned and sessile, lower spikelets sometimes sterile, 2 glumes persistent and more or less equal, deeply cleft lemmas with ciliate awns, short hairy callus, palea deeply 2-lobed, 2 glabrous and fleshy lodicules, 3 stamens, 2 stigmas, fruit compressed, occur in dry sandy grassland, open habitats, rocky hillsides or ridges, genus of controversial placement, sometimes referred to and confused with *Enneapogon* Desv. ex P. Beauv., type *Amphipogon laguroides* R. Br., see *Species Plantarum. Editio quarta* 4(2): 899. 1805 [1806], *Prodromus Florae Novae Hollandiae* 175. 1810, *London J. Bot.* 2: 415. 1843, Ernst Gottlieb von Steudel (1783-1856), *Synopsis plantarum glumacearum* 1: 151. 1854 [1855] and

J.W. Vickery, "The species of *Amphipogon* R.Br." in *Contributions from the New South Wales National Herbarium* 1(5): 281-295. 1950, Nigel P. Barker, "The relationships of *Amphipogon*, *Elytrophorus* and *Cyperochloa* (Poaceae) as suggested by rbcL sequence data." *Telopea* 7(3): 205-213. 1997, Shauna Roche, John M. Koch and Kingsley W. Dixon, "Smoke enhanced seed germination for mine rehabilitation in the southwest of Western Australia." *Restoration Ecology* 5(3): 191-203. Sep 1997, Sarah Mathews, Rocky C. Tsai and Elizabeth A. Kellogg, "Phylogenetic structure in the grass family (Poaceae): evidence from the nuclear gene phytochrome B." *Am. J. Bot.* 87: 96-107. 2000, T.R. Read, S.M. Bellairs, D.R. Mulligan and D. Lamb, "Smoke and heat effects on soil seed bank germination for the re-establishment of a native forest community in New South Wales." *Austral. Ecology* 25(1): 48-57. Feb 2000, *Flora of Australia* vol. 44B, Poaceae 3: 9-18. 2005.

Species

A. amphipogonoides (Steud.) Vickery (*Amphipogon pentacraspedon* Wawra; *Pentacraspedon amphipogonoides* (Steudel) Vickery)

Western Australia. Lemma 3-dentate and awnless, palea 2-dentate, see *Synopsis Plantarum Glumacearum* 1: 151. 1854 and *Contributions from the New South Wales National Herbarium* 1(5): 286. 1950.

A. avenaceus R. Br. (*Aegopogon avenaceus* (R. Br.) P. Beauv.; *Amphipogon brownii* F. Muell.; *Amphipogon strictus* var. *avenaceus* (R. Br.) Benth.)

Western Australia. See *Prodromus Florae Novae Hollandiae* 175. 1810, *Essai d'une Nouvelle Agrostographie* 122, 146, 150. 1812, *Fragmenta Phytographiae Australiae* 8: 201. 1874, *Flora Australiensis: A Description ...* 7: 598. 1878 and *Contributions from the New South Wales National Herbarium* 1(5): 284-285. 1950.

A. caricinus F. Muell. (*Amphipogon brownii* F. Muell.; *Amphipogon strictus* R. Br.; *Amphipogon strictus* sensu J.M. Black, non R. Br.; *Amphipogon strictus* var. *desertorum* Domin; *Amphipogon strictus* var. *occidentalis* Pilg.) (like the genus *Carex* L., Latin classical name *carex*, *icis* (Vergilius) for a sedge, reed-grass or rush; see Carl Linnaeus, *Species Plantarum*. 972. 1753 and *Genera Plantarum*. edition 5. 420. 1754)

Western Australia, New South Wales, Northern Territory, Queensland, South Australia, Victoria. Perennial, harsh, shortly rhizomatous or forming erect tufts, rhizomes more or less oblique, stems erect and wiry, leafy, narrow and pointed leaves, dense purplish panicles oblong to narrow-cylindrical, shallow soils, dry areas, drought resistant, hot and dry positions, unpalatable, see *Prodromus Florae Novae Hollandiae* 175. 1810, *Linnaea* 25(4): 445. 1853, *Fragmenta Phytographiae Australiae* 8: 201. 1874 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und*

Pflanzengeographie 35: 71. 1904, *Repertorium Specierum Novarum Regni Vegetabilis* 10: 119. 1911, *Contr. New South Wales Herb.* 1(5): 289. 1950.

in English: long-gray-beard grass, long-beard grass, bearded heads

A. caricinus F. Muell. var. *caricinus*

Western Australia, New South Wales, Northern Territory, Queensland, South Australia, Victoria. Perennial, erect, rigid, sometimes rhizomatous, panicle spike-like, pale spikelets, palea smooth, sandy soils, see *Contributions from the New South Wales National Herbarium* 1(5): 291. 1950.

in English: long-gray-beard grass

A. caricinus F. Muell. var. *scaber* Vickery (also *scabra*)

Queensland. See *Contributions from the New South Wales National Herbarium* 1(5): 292. 1950.

A. debilis R. Br. (*Aegopogon debilis* (R. Br.) P. Beauv.; *Amphipogon brownii* F. Muell.; *Amphipogon debilis* var. *typica* Domin)

Western Australia. Glumes tridentate, see *Prodromus Florae Novae Hollandiae* 175. 1810, *Essai d'une Nouvelle Agrostographie* 122, 146, 150. 1812, *Fragmenta Phytographiae Australiae* 8: 201. 1874 and *Journal of the Linnean Society, Botany* 41: 275. 1912, *Contributions from the New South Wales National Herbarium* 1(5): 283-284. 1950.

A. debilis R. Br. var. *fallax* Domin

Western Australia. Some doubt about this var., see *Journal of the Linnean Society, Botany* 41: 275. 1912, *Contributions from the New South Wales National Herbarium* 1(5): 284. 1950.

A. imbricatus Gand. (*Amphipogon strictus* R. Br.)

New South Wales. See *Prodromus Florae Novae Hollandiae* 175. 1810 and *Bulletin de la Société Botanique de France* 66(7): 298. 1919 [1920], *Contributions from the New South Wales National Herbarium* 1(5): 292. 1950.

A. laguroides R. Br. (*Aegopogon laguroides* (R. Br.) P. Beauv.; *Amphipogon cygnorum* Nees; *Amphipogon cygnorum* Nees ex Lehmann)

Western Australia. See *Prodromus Florae Novae Hollandiae* 175. 1810, *Essai d'une Nouvelle Agrostographie* 122, 146, 150. 1812, *Plantae Preissianae* 2: 100. 1846-1847 and *Contributions from the New South Wales National Herbarium* 1(5): 287-288. 1950.

A. laguroides R. Br. subsp. *havelii* T. MacFarlane

Western Australia.

A. laguroides R. Br. subsp. *laguroides*

Western Australia.

A. sericeus (Vickery) T. MacFarlane (*Amphipogon caricinus* var. *sericeus* Vickery)

Western Australia, Northern Territory. Leaves flat, feathery lemma lobes hairy, see *Contributions from the New South Wales National Herbarium* 1(5): 290. 1950.

A. strictus R. Br. (*Aegopogon strictus* (R. Br.) P. Beauv.; *Amphipogon brownii* F. Muell.; *Amphipogon elatior* Gand.; *Amphipogon pinifolius* Mez)

Western Australia, New South Wales, Northern Territory, South Australia. Perennial, slender, forming dense tussocks, short and creeping rhizomes, stems erect and wiry, stiff leaves erect and narrow, dense purplish or dark gray panicles capitate, feathery awns, coastal regions, on damp and moist soils, see *Prodromus Florae Novae Hollandiae* 175. 1810, *Essai d'une Nouvelle Agrostographie* 122, 146, 150. 1812, *Plantae Preissianae* 2: 101. 1846-1847, *Linnaea* 25(4): 445. 1853, *Fragmenta Phytographiae Australiae* 8: 201. 1874, *Flora Australiensis: A Description ...* 7: 598. 1878 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 35: 71. 1904, *Bulletin de la Société Botanique de France* 66(7): 298. 1919 [1920], *Repertorium Specierum Novarum Regni Vegetabilis* 17: 212. 1921, *Contributions from the New South Wales National Herbarium* 1(5): 289, 292-295. 1950.

in English: gray-beard grass

A. turbinatus R. Br. (*Aegopogon turbinatus* (R. Br.) P. Beauv.; *Aegopogon turbinatus* (R. Br.) Nees ex Vickery; *Amphipogon restionaceus* Pilger; *Gamelythrum turbinatum* (R. Br.) Nees)

Western Australia. See *Prodromus Florae Novae Hollandiae* 175. 1810, *Essai d'une Nouvelle Agrostographie* 122, 146. 1812, *London Journal of Botany* 2: 415. 1843 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 35: 72, f. 3D-J. 1904, *Contributions from the New South Wales National Herbarium* 1(5): 285-286. 1950.

Amphochaeta N.J. Andersson = *Pennisetum* Rich.

From the Greek *amphi* “both, around” and *chaite* “a bristle.”

Panicoideae, Paniceae, Cenchrinae, type *Amphochaeta exaltata* Andersson, see *Syn. Pl.* 1: 72. 1805, *Kongliga Svenska Vetenskapsakademiens Handlingar* 1853: 136-137. 1855, *Index Kewensis* 1: 112. 1893 and *Contr. U.S. Natl. Herb.* 22: 210. 1921, *Flora Mesoamericana* 6: 371-374. 1994, *Sida* 19(3): 523-530. 2001, *Contributions from the United States National Herbarium* 46: 527-536. 2003.

Anachortus Jirásek & Chrtek = *Corynephorus* P. Beauv.

From the Greek *ana* “without” and *chortos* “green herbage, grass.”

Pooideae, Poeae, Airinae, type *Anachortus macrantherus* (Boiss. & Reut.) V. Jirásek & Chrtek, see *Essai d'une Nouvelle Agrostographie* 90, 149, 159. 1812 and *Preslia* 34: 383. 1962, *Contributions from the United States National Herbarium* 48: 109, 239. 2003.

Anachyris Nees = *Paspalum* L.

From the Greek *ana* “without” and *achyron* “chaff, husk.”

Panicoideae, Paniceae, Paspalinae, type *Anachyris paspaloides* Nees, see *Systema Naturae, Editio Decima* 846, 855, 1359. 1759, *Species Graminum* 3: t. 271. 1829-1830, *Hooker's Journal of Botany and Kew Garden Miscellany* 2: 103. 1850, *Genera Plantarum* 3(2): 1097-1098. 1883 and *Contr. U.S. Natl. Herb.* 12: 116. 1908, *Contributions from the United States National Herbarium* 24(8): 435. 1927, *Repertorium Specierum Novarum Regni Vegetabilis* 26(7-15): 229. 1929, *Contributions from the United States National Herbarium* 46: 443-527. 2003.

Anachyrium Steud. = *Anachyris* Nees, *Paspalum* L.

From the Greek *ana* “without” and *achyron* “chaff, husk.”

Panicoideae, Paniceae, Paspalinae, see *Synopsis Plantarum Glumacearum* 1: 33. 1855 [1853].

Anadelphia Hackel = *Diectomis* P. Beauv., *Monium* Stapf, *Pobeguinea* (Stapf) Jacq.-Fél.

From Greek *anadelphos* “without brother or sister.”

About 13-14 species, tropical Africa, Senegal to Zambia. Panicoideae, Andropogonodae, Andropogoneae, Andropogoninae, annual or perennial, caespitose, herbaceous, branched or unbranched, auricles present or absent, ligule an unfringed membrane, plants bisexual, inflorescence paniculate open or contracted, single loose racemes exerted or enclosed, spatheoles linear to narrowly lanceolate, few spikelets, male and female fertile spikelets in the same inflorescence, 2 glumes more or less equal, palea absent, 2 small free lodicules, 3 stamens, ovary glabrous, 2 stigmas, savannah, rainforest, on shallow soils, related to *Elymandra*, sometimes or often included in *Pobeguinea* (Stapf) Jacq.-Fél., type *Anadelphia virgata* Hack., see *Species Plantarum* 2: 1045. 1753, *Essai d'une Nouvelle Agrostographie* 132-133, 160, t. 23. 1812, *Mémoires du Muséum d'Histoire Naturelle* 2: 69. 1815, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 6: 240-241. 1885, *Die Natürlichen Pflanzenfamilien* 2(2): 27. 1887 and *Journal de Botanique (Morot)* 19: 100. 1905, *Flora of Tropical Africa* 9: 399-400. 1919, *Revue internationale de*

botanique appliquée et d'agriculture tropicale 30: 172. 1950, *Kew Bulletin* 20: 275-285. 1966.

Species

A. afzeliana (Rendle) Stapf (*Anadelphia arrecta* Stapf; *Andropogon afzelianus* Rendle)

West tropical Africa, Gabon. Perennial, tufted, slender, basally branched, wiry, geniculate, weakly stemmed, good thatching, grazed when young, savannah damp places, marshy areas, see *Journal of Botany, British and Foreign* 31: 357. 1893 and *Flora of Tropical Africa* 9: 397. 1919.

in English: thatchgrass

in Nigeria: bayan maraya, beere, bere

in Senegal: bati, fati, mu git, nantag

in Sierra Leone: anepel, enepel, enepel ebana, enepel ebira, enepel erekrek, foni, foni mayambe, fovo, gbolesehrena, gbongbonelo, kulusa-binyi, puile, tikolo mese

in Yoruba: beere, bere

A. bigeniculata W.D. Clayton

West tropical Africa, Sierra Leone, Guinea. Annual, see *Kew Bulletin* 20: 283, f. 3. 1966.

in Guinea: fugolo

A. chevalieri Reznik (*Pobeguinea chevalieri* (Reznik) Jacq.-Fél.)

Guinea. See *Revue internationale de botanique appliquée et d'agriculture tropicale* 14: 199. 1934, *Revue internationale de botanique appliquée et d'agriculture tropicale* 30: 173. 1950.

A. funerea (Jacq.-Fél.) Clayton (*Monium funereum* Jacq.-Fél.)

Tropical Africa. See *Revue internationale de botanique appliquée et d'agriculture tropicale* 30: 186. 1950, *Kew Bulletin* 20: 281. 1966.

A. leptocoma (Rendle) Stapf (*Andropogon leptocomus* Trin.)

West tropical Africa. Perennial, good thatching, low grazing value, low-lying savannah, see *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 2(3): 264. 1832 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 54: 284. 1917.

in English: thatch grass, thatchgrass, thatching grass

in Nigeria: beere, bere

in Sierra Leone: anbunthi, foni, foni mayambe, kilaichieyo

in Yoruba: beere, bere

A. macrochaeta (Stapf) Clayton (*Monium macrochaetum* Stapf)

Tropical Africa. See *Flora of Tropical Africa* 9: 400. 1919, *Kew Bulletin* 20: 281. 1966.

A. polychaeta Clayton

Tropical Africa, Senegal. See *Kew Bulletin* 20: 281, f. 2. 1966.

A. pumila Jacq.-Fél. (*Hypogynium pumilum* (Jacq.-Fél.) Roberty)

Tropical Africa. See *Revue internationale de botanique appliquée et d'agriculture tropicale* 30: 178, t. 6. 1950, *Boissiera. Mémoires du Conservatoire de Botanique et de l'Institut de Botanique Systématique de l'Université de Genève* 9: 187. 1960.

A. scyphofera W.D. Clayton

Zambia. Annual, herbaceous, leaf blades linear and very narrow, ligule an unfringed membrane, plants bisexual, open inflorescence paniculate, 2 glumes subequal, lower glume grooved, palea present, 2 fleshy lodicules, ovary glabrous, open habitats, see *Kew Bulletin* 20: 278, f. 1. 1966.

A. tenuifolia Stapf

West tropical Africa, Guinea. In damp places, see *Flora of Tropical Africa* 9: 392. 1919.

A. trepidaria (Stapf) Stapf (*Andropogon trepidarius* Stapf)

West tropical Africa, Guinea. Annual, grazed, thatching grass, see *Journal de Botanique (Morot)* 19: 100. 1905, *Flora of Tropical Africa* 9: 390. 1919.

in Guinea: tchelbi

A. trichaeta (Reznick) Clayton

Africa. A single fertile spikelet with 2 vestigial pedicels, see *Kew Bulletin* 20: 281. 1966.

A. virgata Hack.

Liberia. See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 6: 241. 1885.

Anastrophus Schldl. = Axonopus P. Beauv.

From the Greek *ana* "up, back again" and *strophos* "twisted, twisted cord or band," *stropho* "to twist, to twine."

Panicoideae, Paniceae, Paspalinae, type *Paspalum platyculmum* Thouars ex Nees, see *Systema Naturae, Editio Decima* 846, 855, 1359. 1759, *Essai d'une Nouvelle Agrostographie* 12, 154. 1812, *Flora Brasiliensis seu Enumeratio Plantarum* 2(1): 24. 1829, *Botanische Zeitung. Berlin* 8: 681. 1850, *Genera Plantarum* 3(2): 1098. 1883 and *Contr. U.S. Natl. Herb.* 12: 142. 1908, *Die natürlichen Pflanzenfamilien, Zweite Auflage* 14e: 53. 1940, *Revista de la Academia Colombiana de Ciencias Exactas, Físicas y Naturales* 26(98): 13-23. 2002, *Contributions from the United States National Herbarium* 46: 116-134. 2003.

Anatherostipa (Hack. ex Kuntze) Peñailillo= *Nicoraella* Torres

From the Greek *a* “without, negative” and *ather* “stalk, barb.”

About 11 species, Argentina, Bolivia, Chile, Ecuador, Peru. Pooideae, Stipeae, Stipinae, perennial, caespitose, erect, ligule membranous, auricles absent, plants bisexual, narrow inflorescence, 2 glumes papery equal or subequal, palea present, 2-3 lodicules, 3 stamens, some species known for their toxicity, arid regions, desert, mountains, type *Anatherostipa saltensis* (Kuntze) Peñailillo, see *Species Plantarum* 1: 78-79. 1753, Ernst Gottlieb von Steudel (1783-1856), *Synopsis plantarum glumacearum*. 1: 121. Stuttgartiae 1854, *Revisio Generum Plantarum* 3(2): 372. 1898 and *Anales del Museo Nacional de Montevideo* 4: III, 36. 1901, *Bulletin of Miscellaneous Information Kew* 1923(8): 301-303. 1923, *Contr. U.S. Natl. Herb.* 24(7): 216. 1925, *Blumea, Supplement* 3: 63. 1946, *Revista Argentina de Agronomía* 17(3): 201. 1950, *Gayana, Botánica* 13: 1-137. 1965, *Boletín de la Sociedad Argentina de Botánica* 12: 268-283. 1968, *Boletín de la Sociedad Argentina de Botánica* 11(4): 239. 1969, *Kew Bulletin* 40(4): 727-729. 1984[1985], Patricio Peñailillo B., “*Anatherostipa*, un nuevo género de Poaceae (Stipeae) / *Anatherostipa*, a new genus of Poaceae (Stipeae).” *Gayana, Botánica* 53(2): 277-284. 1996, A.M. Torres, “*Nicoraella* (Gramineae) un nuevo genero para America del Sur.” *Comisión de Investigaciones Científicas* 13: 69-77. 1997, *Gayana, Botánica* 54(2): 163-182. 1997, Khidir W. Hilu & Lawrence A. Alice, “Evolutionary implications of *matK* indels in Poaceae.” *Am. J. Bot.* 86: 1735-1741. 1999, Sarah Mathews, Rocky C. Tsai and Elizabeth A. Kellogg, “Phylogenetic structure in the grass family (Poaceae): evidence from the nuclear gene phytochrome B.” *Am. J. Bot.* 87: 96-107. 2000, J. Valdés-Reyna & M.E. Barkworth, “Poaceae II. Pooideae: Tribu Stipeae.” *Flora de Veracruz* 127: 1-28. 2002, *Contributions from the United States National Herbarium* 48: 109-110, 467. 2003.

Species

A. bomanii (Hauman) Peñailillo (*Nicoraella bomanii* (Hauman) Torres; *Stipa bomanii* Hauman) (named for E. Boman, botanical collector in Argentina and Andes)

Argentina, Bolivia. Perennial, leaf blades filiform acicular, linear panicle, lanceolate glumes acute, toxic, sandy soils, rocky places, see *Anales del Museo Nacional de Buenos Aires* 29: 397, f. 1. 1917, *Gayana, Botánica* 53(2): 279. 1996, *Comisión de Investigaciones Científicas* 13: 73. 1997.

A. brevis (Torres) Peñailillo (*Nicoraella brevis* Torres)

Argentina. See *Comisión de Investigaciones Científicas* 13: 73, f. 1H-I. 1997, *Contributions from the United States National Herbarium* 48: 109. 2003.

A. coroi F. Rojas (*Achnatherum coroi* F. Rojas ex Renvoize)

Bolivia. Perennial, leaf blades filiform, panicles linear, glumes subequal lanceolate and acuminate, see *Gayana, Botánica* 54(2): 170-171, f. 2. 1997, *Gramíneas de Bolivia* 84. 1998.

A. hans-meyeri (Pilg.) Peñailillo (*Anatherostipa hans-meyeri* (Pilg.) F. Rojas, nom. illeg., non *Anatherostipa hans-meyeri* (Pilg.) Peñailillo; *Stipa hans-meyeri* Pilg.; *Stipa nivalis* Steud. ex Lechler) (for Hans (Johannes August Theodor) Meyer, 1885-1935, botanical collector in Brazil and Ecuador)

Ecuador, Peru, Bolivia. Perennial, caespitose, leaves mainly basal, leaf blades involute rigid pungent, dense panicle narrowly oblong, glumes lanceolate acuminate, callus obtuse bearded, páramos, puna, montane, forming dense clumps and small tufts, sandy places, grasslands, see *Berberides Americae Australis* 56. 1857 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 56(Beibl 123): 24. 1920, *Contr. U.S. Natl. Herb.* 24(7): 216, 272. 1925, *Gayana, Botánica* 53(2): 279. 1996, *Gayana, Botánica* 54(2): 170. 1997.

A. henrardiana (Parodi) Peñailillo (*Nicoraella henrardiana* (Parodi) Torres; *Stipa henrardiana* Parodi)

Argentina. See *Blumea, Supplement* 3: 68 1946, *Gayana, Botánica* 53(2): 279. 1996, *Comisión de Investigaciones Científicas* 13: 74. 1997.

A. mucronata (Griseb.) F. Rojas (*Anatherostipa saltensis* (Kuntze) Peñailillo; *Nicoraella mucronata* (Griseb.) Torres; *Oryzopsis mucronata* (Griseb.) Parodi; *Piptochaetium mucronatum* Griseb.; *Stipa saltensis* Kuntze)

Argentina. See *Symbolae ad Floram Argentinam. Zweite ...* 296-297. 1879, *Revisio Generum Plantarum* 3(2): 372. 1898 and *Revista del Museo de La Plata (Nueva Serie), Sección Botánica* 6(25): 230, 306, f. 3D-E. 1944, *Gayana, Botánica* 53(2): 279. 1996, *Comisión de Investigaciones Científicas* 13: 72. 1997, *Gayana, Botánica* 54(2): 170. 1997.

A. obtusa (Nees & Meyen) Peñailillo (*Helopus obtusus* (Meyen) Steud.; *Nicoraella obtusa* (Nees & Meyen) Torres; *Oryzopsis neesii* Pilg.; *Piptatherum obtusum* Nees & Meyen; *Piptatherum obtusum* Meyen; *Stipa boliviensis* Hack.; *Stipa jujuyensis* Speg.; *Stipa obtusa* (Nees & Meyen) Hitchc.; *Urachne obtusa* (Nees & Meyen) Trin. & Rupr.)

Bolivia, Peru, Argentina. Perennial, caespitose, leaves mainly basal, leaf blades filiform rigid acuminate, panicle oblong, glumes ovate-oblong obtuse-acute, forming large clumps, puna, see *Reise um die Erde* 2: 32. 1835, *Nomenclator Botanicus. Editio secunda* 1: 747. 1840, *Gramineae* 18-19. 1841, *Species Graminum Stipaceorum* 22. 1842, *Nova Acta Phys.-Med. Acad. Caes. Leop.-Carol. Nat. Cur.* 19(Suppl. 1): 150-151. 1843 and *Repertorium Specierum Novarum Regni Vegetabilis* 11: 21. 1912, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 56(Beibl. 123): 26. 1920, *Contributions from*

the *United States National Herbarium* 24(7): 284. 1925, *Revista Argentina de Botánica* 1(1): 39. 1925, *Gayana, Botánica* 53(2): 279. 1996, *Comisión de Investigaciones Científicas* 13: 74. 1997.

A. orurenensis F. Rojas (*Achnatherum orurense* F. Rojas ex Renvoize)

Bolivia. Perennial, leaf blades convolute and pungent, loose panicles, subequal glumes ovate-lanceolate and acuminate, see *Gayana, Botánica* 54(2): 171-172, f. 3. 1997, *Gramíneas de Bolivia* 81. 1998.

A. rigidiseta (Pilg.) Peñailillo (*Nicoraella rigidiseta* (Pilg.) Torres; *Oryzopsis rigidiseta* Pilg.; *Stipa lechleriana* Steud. ex Lechler; *Stipa peruviana* Hitchc.; *Stipa rigidiseta* (Pilg.) Hitchc.)

Bolivia, Peru. Forming large clumps, see *Gramineae* 18-19. 1841, *Berberides Americae Australis* 56. 1857 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 56(Beibl. 123): 26. 1920, *Contributions from the United States National Herbarium* 24(7): 285. 1925, *Gayana, Botánica* 53(2): 279. 1996, *Comisión de Investigaciones Científicas* 13: 75. 1997.

A. rosea (Hitchc.) Peñailillo (*Stipa rosea* Hitchc.)

Ecuador. Open ground, see *Contributions from the United States National Herbarium* 24(7): 272. 1925, *Contributions from the United States National Herbarium* 48: 110. 2003.

A. venusta (Phil.) Peñailillo (*Nicoraella venusta* (Phil.) Torres; *Stipa venusta* Phil.)

Chile. See *Verzeichniss der von Friedrich Philippi auf der Hochebene der Provinzen Antofagasta und Tarapacá gesammelten Pflanzen* 81. 1891 and *Gayana, Botánica* 53(2): 279. 1996, *Comisión de Investigaciones Científicas* 13: 75. 1997.

Anatherum Nabelek = *Festuca* L.

Greek *a* “without, negative” and *ather* “stalk, barb,” see A.M.F.J. Palisot de Beauvois, *Essai d'une nouvelle Agrostographie*. 128. (Dec.) 1812.

Anatherum P. Beauv. = *Andropogon* L., *Vetiveria* Bory

Greek *a* “without, negative” and *ather* “stalk, barb.”

Panicoideae, Andropogoneae, Andropogoninae, type *Anatherum bicorne* (L.) P. Beauv., see *Species Plantarum* 2: 1045-1046. 1753, A.M.F.J. Palisot de Beauvois, *Essai d'une nouvelle Agrostographie* 128, 150, atlas t. 22, f. 11. 1812, *Bull. Sci. Soc. Philom. Paris* 1822: 43. 1822 and *Fl. Trop. E. Afr. Gramineae* 770. 1982, *Taxon* 41: 556. 1992, *Taxon* 44: 611-612. 1995, *Contributions from the United States National Herbarium* 46: 20-64. 2003.

Ancistrachne S.T. Blake

Greek *ankistron* “fish-hook” and *achne* “chaff, glume,” referring to the hooked or curved hairs on the spikelets.

About 3-4 species, Philippines, Australia. Panicoideae, Panicoideae, Paniceae, perennial, wiry, branched above, erect or spreading or decumbent, shrubby and persistent to herbaceous, caespitose, sometimes scrambling or tufted, glabrous nodes, solid internodes, leaves narrow, auricles absent, ligule fringed and hairy, plants bisexual, inflorescence paniculate and open, spikelets sessile, 2 florets, lower floret sterile, upper floret bisexual, 2 glumes very unequal, upper glume with hooked or curved hairs or spines, palea present, 2 lodicules free and fleshy, 3 stamens, ovary glabrous, 2 stigmas, fruit small and compressed, shade species, type *Ancistrachne uncinulata* (R. Br.) S.T. Blake, see *Nova Genera et Species Plantarum* 1: 94-95. 1815 [1816] and *Philippine Journal of Science* 37: 135. 1928, *University of Queensland Papers, Department of Biology* 1(19): 1-12. 1941 [Papers, Department of Biology, University of Queensland].

Species

A. maidenii (A.A. Ham.) Vickery (*Eriochloa maidenii* A.A. Ham.) (after the British-born (Londoner by birth) Australian botanist Joseph Henry Maiden, 1859-1925 (Sydney), studied botany under Prof. R. Bentley and Prof. D. Oliver, 1880 migrated to Australia, member of the Council of the Royal Society and Linnean Society of New South Wales and President of both Societies, Honorary Secretary of the Australasian Association for the Advancement of Science, Curator and Secretary of the Technological Museum, investigator of the economic botanical resources of Australia, 1896 succeeded the late Mr. Charles Moore as Government Botanist of New South Wales and Director of the Botanic Gardens of Sydney, 1889 Fellow of the Linnean Society (in 1915 was awarded its Gold Medal), from 1896 to 1924 New South Wales Government Botanist, 1916 admitted into the Royal Society of London, 1916 was appointed to the Imperial Service, among his writings are *The Useful Native Plants of Australia*. (Including Tasmania). London and Sydney 1889, *The Olive and Olive Oil*; being notes on the culture of the tree and extraction of the oil as carried out in South Australia and the Continent of Europe. Sydney 1887, *The Forest Flora of New South Wales*. Sydney [1903-] 1904-1925, *Mount Seaview and the Way Thither*. Sydney 1898 and *Sir Joseph Banks: the “Father of Australia.”* Sydney, London 1909, with Ernst Betche (1851-1913) wrote *A Census of New South Wales Plants*. Sydney 1916. See R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993; Stafleu & Cowan, *Taxonomic Literature*. 3: 249-255. 1981; J.H. Barnhart, *Biographical Notes upon Botanists*. 2: 437. 1965; I.C. Hedge & J.M. Lamond, *Index of Collectors in the Edinburgh Herbarium*. Edinburgh 1970; Ida Kaplan

Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. Philadelphia 1964; E.D. Merrill, *Bernice P. Bishop Mus. Bull.* 144: 129-130. 1937 and *Contr. U.S. Natl. Herb.* 30(1): 202-203. 1947; A.B. Rendle, *The Journal of Botany*. 54: 316, t. 545. 1916; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 249. 1972; H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 206. Oxford 1964; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. 1917-1933; Frans A. Stafleu, *Linnaeus and the Linnaeans. The Spreading of Their Ideas in Systematic Botany, 1735-1789*. Utrecht 1971)

Australia, New South Wales. Perennial, vulnerable species, scrambling, decumbent and ascending, slender and rigid, sheath hairy, ligule ciliate, racemes terminaly or axillary, fertile floret elliptic to lanceolate, upper glume and lower lemma with curved hairs, upper lemma mucronate, see *Proceedings of the Linnean Society of New South Wales* 37(4): 709-711. 1912[1913], *Contributions from the New South Wales National Herbarium* 3(2): 83. 1961.

A. numaeensis (Balansa) S.T. Blake (*Panicum numaeense* Balansa)

New Caledonia. Endangered species, see *Bulletin de la Société Botanique de France* 19: 325. 1872 and *Proceedings of the Royal Society of Queensland* 81: 1. 1969.

A. uncinulata (R. Br.) S.T. Blake (*Panicum uncinulatum* R. Br.)

Australia, Queensland, New South Wales. Perennial, shrubby, sheath pilose, upper glume and lower lemma with hooked spines, upper lemma acute, grows in woodland, useful for erosion control, forage, economic plant, see *Prodromus Florae Novae Hollandiae* 191. 1810 and *University of Queensland Papers: Department of Biology* 1(19): 5, t. 2. 1941.

in English: hooky grass, hooked-hairy panic grass

Ancistragrostis S.T. Blake = *Echinopogon* P. Beauv., *Hystericina* Steud.

From the Greek *ankistron* “fish-hook.”

Two species, Papua New Guinea. Pooideae, Poodae, Aveneae, perennial, caespitose, herbaceous, unbranched, leaves mostly basal, ligule an unfringed membrane, auricles absent, leaf blades convolute or rolled, plants bisexual, contracted inflorescence paniculate, spikelets with rachilla extension, 1-flowered, 2 glumes more or less equal and persistent, lemmas convolute and strongly hooked, short subulate subapical awn hooked or not, palea present, 2 free and membranous lodicules, 3 stamens, ovary glabrous, 2 stigmas, damp places, montane, grassland, related to *Calamagrostis*, type *Ancistragrostis uncinoides* S.T. Blake,

see *Essai d'une Nouvelle Agrostographie* 42-43, 148, 161. 1812, *Synopsis Plantarum Glumacearum* 1: 35, 37. 1855 [1853] and *Blumea, Supplement* 3: 56-62. 1946.

Species

A. uncinoides S.T. Blake (*Calamagrostis uncinoides* (S.T. Blake) Reeder; *Deyeuxia uncinoides* (S.T. Blake) P. Royen & Veldkamp)

New Guinea. Perennial, small, caespitose, inflorescence a narrow panicle, see *Journal of the Arnold Arboretum* 31: 324. 1950, *The Alpine Flora of New Guinea* 2: 1140. 1979.

Ancistrochloa Honda = *Calamagrostis* Adans.

From the Greek *ankistron* “fish-hook” and *chloe*, *chloa* “grass.”

Type *Ancistrochloa fauriei* (Hack.) Honda, see *Familles des Plantes* 2: 31, 530. 1763, *Tentamen Florae Germanicae* 1: 34. 1788, *Bulletin de l'Herbier Boissier* 7(9): 653. 1899 and *Journal of Japanese Botany* 12: 18. 1936, *Botanical Magazine* 89: 99-104. 1976, *Botanical Magazine* 91: 141-171. 1978.

Andropogon L. = *Anatherum* P. Beauv., *Arthrostachys* Desv., *Arthrolophis* (Trin.) Chiov., *Athrolophis* (Trin.) Chiov., *Diectomis* Kunth, *Dimeiostemon* Raf., *Eriopodium* Hochst., *Euklastaxon* Steud., *Eupogon* Desv., *Heterochloa* Desv., *Homoeatherum* Nees ex Lindl., *Hypogynium* Nees, *Leptopogon* Roberty

From the Greek *aner*, *andros* “a man, male” and *pogon* “a beard,” the hairy spikelets resemble a man’s beard, the pedicels of sterile spikelets are villous.

About 100-113 species, tropics and subtropics. Panicoideae, Andropogonodae, Andropogoneae, Andropogoninae, annual or perennial bunchgrass, herbaceous, caespitose or decumbent, rhizomatous with rhizomes creeping, mostly robust and solid culms, never aromatic, base may be purplish or reddish, sometimes branched, auricles absent, sheaths and culms smooth or hairy, ligules often conspicuous with or without hairs, long arching basal leaves, plants bisexual, when present hidden cleistogenes in the leaf sheaths, inflorescence terminal to compound, racemes paired and digitate or subdigitate, racemes non deflexed at maturity, racemes digitate or rarely single, spikelets paired, sessile spikelet bisexual and often awned, shape of the sessile spikelet lower glume variable, stalked spikelet sterile or male and unawned, 2 florets, upper floret bisexual in the

sessile spikelets, upper floret male or sterile or suppressed in the pedicellate spikelets, lower floret reduced to an empty lemma, glumes more or less equal, lower glume usually membranous to coriaceous and 2-keeled, upper glume occasionally awned, upper lemma bilobed and awned or sometimes entire and awnless, palea present or absent, 2 tiny lodicules glabrous, stamens 1-3, anthers brown, ovary glabrous, 2 stigmas, extrafloral nectaries, the dispersal unit winged and plumose, handsome foliage, thatching grass, good fodder, feed green or dried, eaten by cattle, used in erosion control, pasture weeds, savannah, ruderal habitats, tropical highlands, in neglected places, marginal lands, currently there is disagreement over the taxonomic treatment of the genus, see *Species Plantarum* 2: 1045-1046. 1753, *Genera Plantarum*. edition 5. 468. 1754, *Essai d'une Nouvelle Agrostographie* 128, 132, 150, 160. 1812, *Mémoires du Muséum d'Histoire Naturelle* 2: 69. 1815, *Observ. Gramin. Belg.* 84, 90, 141. 1824, *Neogenyton* 4. 1825, *Flora Brasiliensis seu Enumeratio Plantarum* 364, 366. 1829, *Rel. Species

A. sp.

in Nigeria: raneraneho, yakawre

in Upper Volta: coobol, soobol, yantaare

in Yoruba: eruwa pupa, kokofa, kokofia, koriko ifa, poponloro

A. abyssinicus R. Br. ex Fresen. (*Andropogon amethystinus* Steud.; *Andropogon glabrescens* Hochst. ex Steud.; *Andropogon multinervius* Hochst. ex Steud.; *Andropogon plagiopus* Hochst. ex Steud.; *Andropogon polyatherus* Hochst. ex A. Rich.; *Andropogon polyatherus* subvar. *glabrescens* (Hochst. ex Steud.) Hack.; *Andropogon polyatherus* subvar. *intermedius* Chiov.; *Andropogon polyatherus* subvar. *multinervis* (Hochst. ex Steud.) Hack.; *Andropogon polyatherus* subvar. *scabriglumis* Hack.; *Andropogon polyatherus* var. *plagiopus* (Hochst. ex Steud.) Hack.; *Exothea abyssinica* (Hochst. ex A. Rich.) Andersson; *Sorghum abyssinicum* (R. Br. ex Fresen.) Kuntze; *Sorghum abyssinicum* (Fresen.) Kuntze)

Ethiopia. Annual, loosely tufted, ascending, leaf blades flat, racemes paired and villous to almost glabrous, geniculate awn, pedicelled spikelet usually 2-awned and male, a weed of pasture, in open grassland, disturbed areas, arable land, sometimes confused with *Andropogon distachyos* L. and *Andropogon amethystinus* Steud., see *Methodus Plantas Horti Botanici ...* 207. 1794, *Museum Senckenbergianum* 2: 146. 1837, *Tentamen Florae Abyssinicae ...* 2: 455. 1850, *Synopsis Plantarum Glumacearum* 1: 371, 374. 1854, *Nova Acta Regiae Societas Scientiarum Upsaliensis, ser. 3, 2*: 253, t. 3. 1857, *Monographiae Phanerogamarum* 6: 467. 1889, *Revisio Generum Plantarum* 2: 791. 1891 and *Annuario del Reale Istituto Botanico di Roma* 8(3): 282. 1908, *American Journal of Botany* 43: 395-404. 1956.

A. aequatoriensis Hitchc.

Ecuador. See *Contributions from the United States National Herbarium* 24(8): 499. 1927.

A. africanus Franch. (*Anatherum africanum* (Franch.) Roberty; *Andropogon nardus* var. *prolixus* Stapf; *Andropogon prolixus* (Stapf) Stapf)

Tropical Africa. Perennial, caespitose, good cattle-grazing pasture, swampy sites, seasonally flooded plains, moist meadow, rocky places, wet sandy areas, see *Bulletin de la Société d'Histoire Naturelle d'Autun* 8: 325. 1895, *Flora Capensis* 7: 352. 1898 and *Bulletin de la Société Botanique de France* 55: 102. 1908, *Boissiera.* 9: 207. 1960.

in Nigeria: ranerane-ho, raneraneho, yakawre

A. amboinicus (L.) Merr. (*Eragrostis amboinica* (L.) Druce; *Poa amboinica* L.)

Philippines, Asia, India. See *Mantissa Plantarum* 557. 1771, *Symbolae Botanicae*, ... 2: 102. 1791 and *Report. Botanical Exchange Club. London*. 1916: 621. 1917, Elmer Drew Merrill (1876-1956), *An Interpretation of Rumphius's Herbarium Amboinense* Publication No. 9: 88. Manila 1917, Cornelis Andries B. Backer (1874-1963), *Handboek voor de Flora van Java* 2: 99. Batavia 1928, *Blumea* 37(1): 227-237. 1992.

A. amethystinus Steud. (*Andropogon abyssinicus* sensu Chippind., non R. Br. ex Fresen.; *Andropogon abyssinicus* R. Br. ex Fresen.; *Andropogon homogamus* Stapf; *Andropogon humilis* Hochst. ex A. Rich.; *Andropogon pilosellus* Stapf; *Andropogon polyatherus* A. Rich. var. *plagiopus* (Steud.) Hack.; *Andropogon pratensis* Hack.; *Andropogon pratensis* Hochst.; *Andropogon pratensis* Hochst. ex Hack.; *Andropogon pratensis* subvar. *pilosus* Hack.; *Andropogon pratensis* var. *pseudoabyssinicus* Chiov.; *Sorghum abyssinicum* (R. Br. ex Fresen.) Kuntze)

Tropical and southern Africa, Tanzania, Cameroon, Equatorial Guinea. Perennial, variable, straggling, loosely or densely tufted, erect to ascending, sometimes shortly rhizomatous with wiry rhizomes, basal leaf sheaths glabrous, ligule a ciliate membrane, leaves flat or inrolled, inflorescence not plumose, racemes paired and terminal, lower glume of sessile spikelet smooth and winged or wingless, fertile lemma awned, pedicelled spikelet 1- to 2-awned, sessile spikelet lanceolate to elliptic, geniculate awn, grazed by sheep and goats, whole plant eaten by baboons, common in mountain grassland, on steep slope, cliffs, hard soil, along roadsides, rocky mountain slopes, rock crevices, upland evergreen forest, open places, see *Museum Senckenbergianum* 2: 146. 1837, *Tentamen Florae Abyssinicae* ... 2: 455. 1850, *Synopsis Plantarum Glumacearum* 1: 371, 374. 1854, *Monographiae Phanerogamarum* 6: 463-464, 467. 1889, *Revisio Generum Plantarum* 2: 791. 1891 and *Annuario del Reale Istituto Botanico di Roma* 8(3): 282. 1908, *Flora of Tropical Africa* 9: 217, 221, 228. 1919, *Annals of the Missouri Botanical Garden* 75: 866-873. 1988, *Bothalia* 24: 241-246. 1994.

A. amethystinus Steud. var. *breviaristatus* Hack.

Abyssinia. See *Synopsis Plantarum Glumacearum* 1: 371. 1854, *Monographiae Phanerogamarum* 6: 464. 1889.

A. angustatus (J. Presl) Steud. (*Andropogon apricus* Trin.; *Andropogon aturensis* Maury; *Andropogon mocquersyisii* Benoist; *Cymbachne angustata* (J. Presl) Roberty; *Diectomis angustata* J. Presl; *Diectomis laxa* Nees; *Sorghum laxum* (Nees) Kuntze)

Mexico and West Indies, Venezuela, Brazil. Annual, erect, caespitose, slender, callus of sessile spikelet pungent, forming colonies, páramos, roadsides, savannah, white sandy soils, riverbanks, ponds, see *Flora Brasiliensis seu Enumeratio Plantarum* 2(1): 340-341. 1829, *Reliquiae Haenkeanae* 1(4-5): 333. 1830, *Mémoires de l'Académie Impériale des*

Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles 4,2(1): 83. 1836, *Journal de Botanique (Morot)* 3: 158, f. 4. 1889, *Synopsis Plantarum Glumacearum* 1: 370. 1854, *Revisio Generum Plantarum* 2: 790. 1891 and *Bulletin de la Société Botanique de France* 87: 340. 1940, *Boissiera*. 9: 254. 1960.

A. appendiculatus Nees (*Andropogon brazzae* Franch.; *Andropogon pseudapricus* Stapf; *Leptopogon appendiculatus* (Nees) Roberty)

Africa, Swaziland, Lesotho, South Africa. Perennial, erect, variable, stems strongly flattened, densely tufted, forming dense stands, sheaths keeled and compressed, broad leaves folded at the base, 1-2 flowering branches per culm, racemes arranged semidigitately, spikelets dark purple and paired, lower glume of the sessile spikelets grooved, useful palatable grass, high grazing value, can withstand heavy grazing, occurs in the seasonally wet areas, vleis, shady places, low-lying ground, stream banks, sandy soils, moist ground, loamy sand, see *Florae Africae Australioris Illustrationes Monographicae* 105. 1841, *Bulletin de la Société d'Histoire Naturelle d'Autun* 8: 326. 1895 and *Flora of Tropical Africa* 9: 242. 1919, *Boissiera*. 9: 197. 1960, *Bothalia* 24: 241-246. 1994.

in English: bluestem

in South Africa: tajwe, vlei bluestem, blougras, vleiblougras, marotlo a mafubedu

A. appendiculatus Nees var. *ischaemum* Nees

South Africa. See *Florae Africae Australioris Illustrationes Monographicae* 105. 1841.

A. appendiculatus Nees var. *polycladus* Hack.

South Africa. See *Florae Africae Australioris Illustrationes Monographicae* 105. 1841, *Bulletin de l'Herbier Boissier* 4: Append. 3. 11. 1896 and *Kew Bulletin* 32(1): 1. 1977.

A. appendiculatus Nees var. *serrulatus* (Link) Nees (*Andropogon serrulatus* Link)

South Africa. See *Hortus Regius Botanicus Berolinensis* 1: 241. 1827, *Florae Africae Australioris Illustrationes Monographicae* 105. 1841, *Bulletin de l'Herbier Boissier* 4: Append. 3. 11. 1896.

A. arctatus Chapman (*Andropogon distachyos* L.; *Andropogon tetrastachyus* Elliott var. *distachyus* Chapm.; *Leptopogon carinatus* (Nees) Roberty; *Leptopogon carinatus* subvar. *arctatus* (Chapman) Roberty; *Sorghum arctatum* (Chapm.) Kuntze)

U.S., Florida. Perennial, tufted culms, green, nodes smooth, sheaths smooth or pubescent, mostly smooth leaves, papery ligule thin and smooth, racemes paired and silky, pedicellate spikelet a sterile scale, fruit a minute grain, threatened plant, occurs in wetlands or nonwetlands, in pine flatwoods, bogs and disturbed areas, see *Species Plantarum* 2: 1046. 1753, *A Sketch of the Botany of South-Carolina and Georgia* 1:

150, t. 8, f. 4. 1816, *Flora of the Southern United States* 581. 1860, *Botanical Gazette* 3(3): 20. 1878, *Revisio Generum Plantarum* 2: 791. 1891 and *Boissiera*. 9: 197-198. 1960, *J. Arnold Arbor.* 64: 207. 1983.

in English: pinewoods bluestem

A. arenarius Hack. (*Anatherum virginicum* subvar. *arenarium* (Hack.) Roberty; *Andropogon arenarius* f. *arenarius*; *Andropogon arenarius* f. *subcompletus* Hack. ex Lindm.)

Brazil, Uruguay. See *Plantarum Minus Cognitarum Pugillus* 2: 16. 1815, *Flora* 68(8): 134. 1885 and *Kongliga Svenska Vetenskapsakademiens Handlingar* 34(6): 6. 1900, *Boissiera*. 9: 212. 1960, *Brittonia* 38(4): 411-414. 1986.

A. ariani Edgew.

India. See *Journal of the Proceedings of the Linnean Society* 6: 208. 1862.

A. aridus Clayton

Somalia. Perennial, branched, dense cushions forming, densely tufted, leaves folded or inrolled, terminal racemes paired or solitary, lower glume convex on the back, upper glume acute, upper lemma awned, stony hills, see *Kew Bulletin* 32(1): 1. 1977.

A. ascinodis C.B. Clarke (*Andropogon apricus* Hook.f., non Trinius; *Andropogon apricus* var. *indicus* Hack.)

India, Myanmar. Perennial, tufted, lower glume of sessile spikelet deeply grooved, a fodder grass, on exposed areas, slopes, hillsides, see *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 4,2(1): 83. 1836, *Journal of the Linnean Society, Botany* 25: 87, t. 36. 1889, *Monographiae Phanerogamarum* 6: 457. 1889, *Fl. Brit. Ind.* 7: 169. 1897.

A. auriculatus Stapf

Tropical Africa, Senegal. Perennial, caespitose, forage, on sandy beaches, see *Flora of Tropical Africa* 9: 258. 1919.

in Sierra Leone: puile

A. barretio G.A. Norrmann & Quarin (for Ismar L. Barreto, botanist in Brazil)

Brazil. See *Bonplandia* 5: 291-293. 1983, *Darwiniana* 39(1-2): 171, f. 1. 2001.

A. bentii Stapf (named for James Theodore Bent, 1852-1897, traveler, botanical collector in Arabia, Socotra and Sudan; see Theodore Bent and Mrs. Theodore Bent [Mabel Virginia Anna Bent, née Hall-Dare], *Southern Arabia*. London 1900)

Socotra. Similar to *Andropogon kelleri* Hack., see *Kew Bulletin* 6: 224. 1907.

A. bicornis L. (*Anatherum bicorne* (L.) P. Beauv.; *Andropogon bicornis* Forssk., nom. illeg., non *Andropogon bicornis* L.; *Andropogon bicornis* var. *absconditus* Hack.; *Andropogon bicornis* var. *angustifolius* Pilg.; *Andropogon*

bicornis var. *burchellii* Hack.; *Andropogon bicornis* var. *gracillimus* Hack.; *Andropogon bicornis* var. *hybridus* Hack.; *Andropogon bicornis* var. *paranensis* Bertoni; *Andropogon bicornis* var. *virginicoides* Hack.; *Andropogon brevicornis* L.; *Melochia graminifolia* A. St.-Hil.; *Saccharum bicorne* (L.) Griseb.; *Sorghum bicorne* (L.) Kuntze)

Brazil, Mexico to Argentina, Venezuela, Costa Rica. Perennial bunchgrass, herbaceous, erect, glabrous, branching from the base, robust, semiaquatic, emergent, rhizomatous, internodes reddish, leaves long and narrow with rough margins, straight racemes aggregated into large and profusely branched inflorescences, cottony white awns or awnless, sessile spikelets awnless, a prolific seeder forming dense stands, noxious weed, invasive, potential seed contaminant, propagation by seed dispersed by wind and water, naturalized, unpalatable, forage and paper production, roots diuretic and sudorific, decoction of roots is diuretic and emollient, occurs on pasture and road bank, old abandoned fields, canal banks, marshy areas, damp places, clearings, sandy soils, forest margins, savannah, riverbanks, along roadsides, pine savannah, disturbed areas, in seasonally inundated savannahs, ditches, see *Species Plantarum* 2: 1046. 1753, *Flora Aegyptiaco-Arabica* 173. 1775, *Essai d'une Nouvelle Agrostographie* 128, 150 atlas t. 22, f. 11. 1812, *Abhandlungen der Königlichen Gesellschaft der Wissenschaften zu Göttingen* 7: 266. 1857, *Flora Brasiliensis* 2(4): 284-285. 1883, *Monographiae Phanerogamarum* 6: 418. 1889, *Revisio Generum Plantarum* 2: 791. 1891, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 27(1-2): 23. 1899 and *Anales Científicos Paraguayos* 2(5): 144. 1918, *Biota* 2: 82. 1958, *Anuário Técnico do Instituto de Pesquisas Zootécnicas "Francisco Osorio"* 7: 317-410. 1980, *Bol. Soc. Argent. Bot.* 24: 137-149. 1985, *Brittonia* 38(4): 411-414. 1986, *Taxon* 48: 573. 1999.

in English: horse's tail, Indian beardgrass, West Indian fox-tail grass, West Indian foxtail, foxtail, seed grass, deer grass

in Spanish: paja, cola de caballo, rabo de zorro, matojo de techar, barba de indio

in Colombia: cola de venado, cola de zorro, rabo de gato

in Ecuador: puntero, rabo de zorro

in Brazil: capim rabo de raposa, capim-andaime, capim-rabo-de-burro, capim sapê, sapê, capim amargoso, capim d'agua, capim de bezerro, capim mole, capim peba, capim vassoura, capupuba, sapê

in Mexico: cola de zorra, cola de venado, rabo de mula, zacate agrio, zacate amarillo

Common names: Bartgras, z'herbe panache, cola de venado, pajón conojera

A. bogotensis (Hack.) A. Zanin & Longhi-Wagner (*Andropogon incanus* var. *bogotensis* Hack.; *Andropogon lateralis*

var. *bogotensis* (Hack.) Henrard; *Andropogon multiflorus* Renvoize)

South America, Colombia. Perennial, erect, caespitose, leaf blades linear, branched inflorescence, racemes delicate and exserted, wet savannahs, see *Flora Brasiliensis seu Enumeratio Plantarum* 2(1): 329-330. 1829, *Monographiae Phanerogamarum* 6: 433. 1889 and *Mededeelingen van's Rijks-Herbarium* 40: 43. 1921, *Gramíneas de Bolivia* 596, f. 138. 1998.

A. bourgeaei Hack. (*Anatherum bourgeaei* (Hack.) Roberty; *Sorghum bourgeaui* (Hack.) Kuntze) (named for the French traveler Eugène Bourgeau, 1813-1877, botanical collector in Europe and Mexico, North America and Algeria)

America, Mexico. Perennial, erect, see *Flora* 68(8): 134. 1885, *Revisio Generum Plantarum* 2: 791. 1891 and *Boissiera*. 9: 211. 1960.

A. brachyatherus Hochst. (*Andropogon brachyatherus* Hochst. ex A. Rich., nom. illeg., non *Andropogon brachyatherus* Hochst.; *Ischaemum brachyatherum* (Hochst.) Fenzl ex Hack.)

Africa. See *Flora* 27: 241. 1844, *Tentamen Florae Abyssinicae* ... 2: 457. 1850, *Monographiae Phanerogamarum* 6: 239. 1889.

A. brachystachyus Chapman (*Anatherum brachystachyum* (Chapm.) Roberty; *Sorghum brachystachyum* (Chapm.) Kuntze)

U.S., Florida. Perennial, caespitose, tufted culms, nodes and sheaths smooth, papery ligule thin and with a fringe of hairs, leaf blades scabrous, 2-branched racemes, pedicellate spikelet reduced to a single scale, fruit a minute grain, found in pine flatwoods, sand hill, wet roadsides and ecotones of depression marsh, abundant in seasonal ponds and swales, see *Flora of the Southern United States* Suppl. 668. 1883, *Revisio Generum Plantarum* 2: 791. 1891 and *Boissiera*. 9: 211. 1960, *Journal of the Arnold Arboretum* 64: 171-254. 1983.

in English: short-spike bluestem

A. brazzae Franch. (*Andropogon appendiculatus* Nees; *Andropogon appendiculatus* var. *genuinus* Durand & Schinz; *Leptopogon appendiculatus* (Nees) Roberty) (for the Italian-born (Castel Gandolfo, Rome) French explorer Count Pierre (Pietro) Paul François Camille Savorgnan de Brazza, 1852-1905 (Dakar, Senegal), colonial administrator who founded the French (Middle) Congo, 1874 became a French citizen, explored Equatorial Africa, between 1875 and 1878 this first mission covered 900 miles of inland territory (discovering many plant and animal species unknown in Europe), 1880 he reached the Congo River, founded Brazzaville, in 1886 he was named governor general of the French Congo, wrote *Conférences et lettres de P. Savorgnan de Brazza sur ses trois explorations dans*

l'Ouest africain, de 1875 à 1886. Paris 1887. See C. de Chavannes, *Avec Brazza*. Souvenir de la mission de l'Ouest-Africain. 1935; Francesco Savorgnan di Brazza, *L'Uomo che donò un Impero*. Vita e opera di Pietro Savorgnan di Brazza. Firenze 1945; Robert de Saint Jean, "Deux témoignages sur les colonies: Las Casas et André Gide." *La Revue hebdomadaire*. 36e année, n 47: 358-364. 19 novembre 1927)

Tropical Africa, Zambia. Perennial, robust, rare, tufted, rhizomatous, leaning, glaucous, basal sheaths keeled and flattened, 4-15 racemes per spathe, lower glume of sessile spikelets concave, found near water, dry sandy soils, see *Florae Africae Australioris Illustrationes Monographicae* I. Gramineae. 105. 1841, *Bulletin de la Société d'Histoire Naturelle d'Autun* 8: 326. 1895 and *Boissiera*. 9: 197. 1960.

A. brevifolius Sw. (*Andropogon obtusifolius* Poir.; *Pollinia brevifolia* (Sw.) Spreng.; *Schizachyrium brevifolium* (Sw.) Nees ex Büse; *Schizachyrium platyphyllum* (Franch.) Stapf; *Sorghum brevifolium* (Sw.) Kuntze)

Asia, Japan. Slender, decumbent, much-branched, leaves narrow and short, spikes solitary and very slender, limestone, see *Nova Genera et Species Plantarum seu Prodromus* 26. 1788, *Encyclopédie Méthodique, Botanique* Suppl. 1: 583. 1810, *Prodromus Florae Novae Hollandiae* 1: 202. 1810, *Plantarum Minus Cognitarum Pugillus* 2: 13. 1815, *Tentamen Florae Abyssinicae* ... 2: 452. 1850, *Plantae Junghuhnianae* 3: 359. 1854, *Enumeratio Plantarum in Japonia Sponte Crescentium* ... 2: 610. 1879, *Monographiae Phanerogamarum* 6: 363-365. 1889, *Revisio Generum Plantarum* 2: 791. 1891, *Bulletin de la Société d'Histoire Naturelle d'Autun* 8: 324. 1895 and *Contr. projectus Fernald & Griscom; *Andropogon gracilior* (Hack.) Nash ex Small; *Andropogon gyrans* Ashe; *Andropogon gyrans* var. *gyrans*; *Sorghum elliotii* (Chapm.) Kuntze)

Northern America. Tufted, compact, bearded node, inflated and coppery-colored upper sheaths, linear leaves, racemes paired and sericeous, awn geniculate, pedicellate spikelets vestigial and white-pubescent, forage, found in sterile soils along roads, in abandoned fields, dry or moist fields or open woods, sandstone, see *Flora of the Southern United States* 581. 1860, *A Class-book of Botany* 809. 1861, *Monographiae Phanerogamarum* 6: 415. 1889, *Revisio Generum Plantarum* 2: 791. 1891, *Bulletin of the Torrey Botanical Club* 23: 145-146. 1896, *Journal of the Elisha Mitchell Scientific Society* 15: 113. 1898 and *Flora of the Southeastern United States* ... 63. 1903, *Rhodora* 37(436): 139. 1935, *The Grasses of North Carolina* 203. 1948, *Boissiera*. 9: 212. 1960, *Journal Arnold Arboretum* 64: 210. 1983, *Memoirs of the New York Botanical Garden* 85: i-xi, 1-246. 2000.

in English: Elliott's broomsedge, Elliott's bluestem, Elliott bluestem, Elliott beardgrass, beardgrass, plumegrass

A. eucomus Nees (also spelled *eucomis*)

Africa, Malawi, Zambia, South Africa. Perennial, densely tufted, upright, leaf sheath flattened and glabrous, ligule membranous with scattered hairs, leaf blade keeled, inflorescence plumose, digitate racemes borne terminally on the branches, spikelets hairy and with a single awn, lower glume of sessile spikelets deeply grooved, pedicelled spikelets suppressed, ornamental, palatable, very low grazing value, indicator of poorly drained soils, occurs in the seasonally wet areas, waste ground, moist places, poorly drained soils, uncultivated lands, on disturbed soils, undisturbed sandveld vleis, wetland areas, along roadsides, seepage areas, see *Florae Africae Australioris Illustrationes Monographicae* 104. 1841 and *Cytologia* 19: 97-103. 1954, *Bothalia* 21(2): 163-170. 1991, *Bothalia* 24: 241-246. 1994.

in English: oldman's beard, silver thread grass, small silver andropogon, snowflake grass

in Southern Africa: fynblaar andropogon, kapokgras, kleinwitbaardandropogn, kleinwitbaardgras, veergras; mohlaala, mohlala (Sotho)

A. exaratus Hack.

Paraguay, Argentina. See *Flora* 68(8): 135. 1885 and *Arkiv för Botanik utgivet av K. Svenska Vetenskapsakademien* 11(4): 7. 1912, *Boletín de la Sociedad Argentina de Botánica* 24: 137-149. 1985.

Peru. See *Observationes Botanicae* 3: 25. 1783, *Reliquiae Haenkeanae* 1(4-5): 339. 1830 and *A Handbook to the Flora of Ceylon* 6: 334. 1931, *Annals of the Missouri Botanical Garden* 81(4): 768-774. 1994.

A. floridanus Scribn. (*Anatherum virginicum* (L.) Spreng. subvar. *floridanum* (Scribn.) Roberty; *Andropogon bakeri* Scribn. & C.R. Ball) (for C.H. Baker, botanical collector in Florida)

U.S., Florida. Perennial, caespitose, found in sand hill, swamp margin, pine flatwoods and scrub, coastal pinelands,

pinelands, occasional in oak scrub and scrubby flatwoods, see *Plantarum Minus Cognitarum Pugillus* 2: 16. 1815, *Bulletin of the Torrey Botanical Club* 23: 145. Apr 1896 and *Bulletin, Division of Agrostology United States Department of Agriculture* 24: 39, f. 14. 1901, *Boissiera. Mémoires du Conservatoire de Botanique et de l'Institut de Botanique Systématique de l'Université de Genève* 9: 212. 1960, *Journal of the Arnold Arboretum* 64: 171-254. 1983.

in English: Florida bluestem, Florida broomsedge

A. gabonensis Stapf (*Andropogon gayanus* Kunth)

Africa. Perennial, robust, herbaceous, grazed when young by buffaloes, found near water, see *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 491. 1833, *Synopsis Plantarum Glumacearum* 1: 371, 386. 1854 and *Journal de Botanique, rédigé par une société de botanistes sér. 2* 2(2): 207. 1909, *Bulletin de l'Institut Française d'Afrique Noire* 22: 108. 1960.

in Angola: titutu

A. gayanus Kunth (*Andropogon gabonensis* Stapf; *Andropogon gayanus* var. *squamulatus* (Hochst.) Stapf; *Andropogon guineensis* Schumach.; *Andropogon guineensis* Steud., nom. illeg., non *Andropogon guineensis* Schumach.; *Andropogon patris* Robyns; *Andropogon reconditus* Steud.; *Andropogon squamulatus* Hochst.; *Andropogon tomentellus* Steud.; *Cymbachne guineensis* (Schumach.) Roberty)

Tropical and South Africa. Perennial bunchgrass or rarely annual, polymorphic, tufted, waxy bloom, erect, caespitose, tussocky, herbaceous, robust, coarse, dense stands forming, reedlike flattened stems, roots more or less fibrous, blades linear and finely pointed, racemes axillary and paired in false loose panicles, pedicellate spikelets male and glabrous, sessile spikelets with a geniculate awn, weed, cultivated fodder, forage, grazed by ruminants, palatable and nutritious when young, hard and tall flowering stems, once flowering stems harsh and of little nutritional value, grains eaten, fiber from the stems for thatching and coarse matting, excellent drought tolerance, used for reclaiming badly overgrazed and eroded land, grows on sandy soils, grassland, high rainfall areas, edge of floodplains, moist bottomland, along roadsides, sandy clays, on sandy loams to loamy sands, sands to black cracking clays, wooded savannah, in open woodland and savannah, transitional woodland, deciduous bushland, see *Beskrivelse af Guineiske planter* 51-52. 1827, *Kongel. Danske Vidensk. Selsk. Naturvidensk. Math. Aft.* 3: 71-72. 1828, *Révision des Graminées* 1: 163. 1829, *Bull. Jard. Bot. Strawberry Press, California 1997; George Engelmann (1809-1884), Asa Gray & Joseph William Blankinship (1862-1938), *Plantae lindheimerianae*. Boston 1845-1850)

Northern America, Canada to Mexico, U.S. Long-lived perennial with tufted and solid culms, shortly stoloniferous, rhizomes short or absent, extensive root system, forming large glaucous upright clumps, vegetation gray to blue green to reddish bronze with lavender tones, bluish to red-purple nodes on the stems, ligule a fringed membrane, sheath compressed and purplish at the base, leaves glaucous and flattened, auricles absent, purplish red and terminal racemes, inflorescence in threes or multiples of three, flowering stalk grows in three finger-like branches, spikelets in pairs, stalked spikelet male and not reduced, pedicels and internodes stiffly hirsute, fruit a minute grain, ornamental and weed species, analgesic, carminative and diuretic, naturalized, cultivated, excellent and highly palatable livestock forage when actively growing, fodder, good prairie hay, used by wildlife for food and cover, provides nesting and concealment cover for birds, excellent drought tolerance,

good grass for erosion control and revegetation, tolerant of various soil types from wet clay to dry sand, occurs along riverbanks, on sandy soils, roadsides and moist meadows, open roadside, at edge of roadside ditch, coastal marshes, prairies and open fields, degraded prairie, foothills, sand hills, pine flatwoods, dry rocky soil, see Fulgenzio Vitman (1728-1806), *Species Plantarum* 2: 1046. mohrii (Hack.) Vasey; *Andropogon mohrii* (Hack.) Hack. ex Vasey; *Andropogon mohrii* Hack. ex B.D. Jacks.; *Andropogon mohrii* var. *pungensis* Ashe)

Northern America, Mexico, U.S., Florida. Perennial with tufted culms, nodes smooth, pubescent leaves, sheaths pubescent, ligule fringed and papery, racemes with silky hairs, pedicellate spikelet reduced to a single scale, minute grain, found in bogs, savannahs and wet pine flatwoods, see *Plantarum Minus Cognitarum Pugillus* 2: 16. 1815, *Bot. Gaz.* 13: 295. 1888, *Monographiae Phanerogamarum* 6: 413. 1889, *Contributions from the United States National Herbarium* 3(1): 11. 1892, *Journal of the Elisha Mitchell Scientific Society* 15: 113-114. 1899 and *Boissiera*. 9: 213. 1960.

in English: Mohr's bluestem, broomsedge

in Mexico: tallo azul mexicano

A. ligulatus (Stapf) Clayton (*Andropogon laxatus* var. *ligulatus* Stapf)

Tropical Africa. See *Flora of Tropical Africa* 9: 238. 1919, *Kew Bulletin* 32(1): 2. 1977.

A. lima (Hack.) Stapf (*Andropogon amethystinus* var. *breviaristatus* Hack.; *Andropogon amethystinus* var. *lima* Hack.; *Eulalia hydrophila* Chiov.; *Eulalia hydrophila* var. *filiformis* Chiov.)

Tropical Africa, East Africa. Perennial, densely tufted, coarse, erect, tussocky, leaf blades erect and scabrid, racemes terminal and paired, lower glume of the sessile spikelet flat or slightly concave, grazed when young, found in montane grasslands, see *Monographiae Phanerogamarum* 6: 464. 1889 and *Flora of Tropical Africa* 9: 217. 1919, *Atti della reale accademia d'Italia. Mem. Cl. Sci. Fis. Math. Nat.* 11(2): 62-63. 1940.

A. lindmannii Hack. (*Andropogon lateralis* Nees)

Brazil. See *Flora Brasiliensis seu Enumeratio Plantarum* 2(1): 329-330. 1829 and *Kongliga Svenska Vetenskapsakademien Handlingar* 34(6): 6, t. 2. 1900.

A. lividus Thwaites (*Cymbopogon lividus* (Thw.) Willis)

Sri Lanka, India, Tamil Nadu. Perennial, densely tufted, tussocky, ligule membranous, leaves erect and glabrous, paired racemes, upper glume winged, a fodder grass, grows on wet places, see *Enumeratio Plantarum Zeylaniae* 367. 1864 and *Handb. Fl. Ceylon* 5: 244. 1900, *A Revised Catalogue of the Indigenous Flowering Plants & Ferns of Ceylon* 110. Colombo 1911, *Handb. Fl. Ceylon* 6: 335. 1931, *Grasses of Ceylon* 195. 1956, *Grasses of Burma ...* 91. 1960, *Taxon* 34: 159-164. 1985.

in English: spear grass, purple grass

in Tamil: pandripul

A. longiberbis Hackel (*Anatherum virginicum* subvar. *longiberbe* (Hack.) Roberty; *Sorghum longiberbis* (Hack.) Kuntze)

Southeast U.S., Florida, Georgia. Wiry, branched above, leaves elongate and arching, panicle elongate with paired and flexuous racemes, sessile spikelet awned, pilose pedicels, found in sand dunes, dry sand hills, old fields and dry rocky soils, see *Plantarum Minus Cognitarum Pugillus* 2: 16. 1815, *Flora* 68(8): 131. 1885, *Revisio Generum Plantarum* 2: 792. 1891 and *Boissiera*. 9: 213. 1960, *Journal of the Arnold Arboretum* 64(2): 223. 1983.

in English: long-beard bluestem

A. longipes Hack.

Sri Lanka, India, Tamil Nadu. Lower glume of sessile spikelet flat or concave, see *Flora* 68(8): 138. 1885 and *Taxon* 34: 159-164. 1985.

A. macrophyllus Stapf

Tropical Africa. Perennial, robust, tough, fodder grass, palatable to cattle, see *Flora of Tropical Africa* 9: 264. 1919.

in Ghana: esire

in Sierra Leone: kofu-na, tofo, tofo-ke

A. macrophyllus Stapf var. **pilosus** Reznik

Tropical Africa. See *Flora of Tropical Africa* 9: 264. 1919, *Bulletin du Muséum d'Histoire Naturelle sér. 2* 5: 500. 1933.

A. macrothrix Trin. (*Anatherum virginicum* subvar. *nashianum* (Hitchc.) Roberty; *Andropogon nashianus* Hitchc.; *Andropogon ternatus* subsp. *macrothrix* (Trin.) Hack.)

South America, Brazil, Paraguay. Perennial, pedicellate spikelets vestigial, sessile spikelets awned, single terminal inflorescence, densely villous rachis internodes and pedicels, moist areas, similar to *Andropogon ternatus* (Sprengel) Nees, see *Flora Brasiliensis seu Enumeratio Plantarum* 2(1): 326-327. 1829, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 2(3): 270. 1832, *Flora Brasiliensis* 2(4): 287. 1883 and *Contributions from the United States National Herbarium* 12(6): 193-194. 1909, *Boissiera*. 9: 213. 1960.

A. mannii Hook.f. (*Andropogon platybasis* J.G. Anders.) (for the German botanist Gustav Mann, 1836-1916, Kew gardener 1859, plant collector, botanical explorer, traveler, 1859-1862 on William Balfour Baikie's Niger Expedition, 1863 India and Assam, 1863-1891 Indian Forest Service, sent plants and seeds to Kew, with the German botanist Hermann Wendland (1825-1903) wrote "On the palms of Western Tropical Africa." *Trans. Linn. Soc.* 24: 421-439. 1864; see J.H. Barnhart, *Biographical notes upon botanists.* 2: 443. 1965; H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford.* 206. Oxford 1964; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University.* 1917-1933; F.N. Hepper & F. Neate, *Plant Collectors in West Africa.* 53. 1971; René Letouzey, "Les botanistes au Cameroun." in *Flore du Cameroun.* 7: 48. Paris 1968; Ernest Nelmes & William Cuthbertson, *Curtis's Botanical Magazine Dedications, 1827-1927.* 274-276. [1931]; Joseph Vallot, "Études sur la flore du Sénégal." in *Bull. Soc. Bot. de France.* 29: 184. Paris 1882; Ronald William John Keay, "Botanical Collectors in West Africa prior to 1860." in *Comptes Rendus A.E.T.F.A.T.* 55-68. Lisbon 1962; I.C. Hedge and J.M. Lamond, *Index of Collectors in the Edinburgh Herbarium.* Edinburgh 1970; F. Nigel Hepper, "Botanical collectors in West Africa, except French territories, since 1860." in *Comptes Rendus de l'Association pour l'étude taxonomique de la flore d'Afrique, (A.E.T.F.A.T.).* 69-75. Lisbon 1962; Sir Clements Robert Markham (1830-1916), *Peruvian Bark.* A popular account of the introduction of *Cinchona* cultivation into British India ... London 1880; Claude Spencer et alii, "Survey of plants for antimalarial activity." *Lloydia.* 10(3): 145-174. [referring to *Mannia africana* Hook.] 1947)

Tropical Africa. Perennial, rare, variable, erect, densely and largely tufted, basal sheaths keeled and compressed, leaf blades erect and folded, inflorescence terminal, spikelets shortly hairy to glabrous, 2-3 racemes per spathe, lower glume of sessile spikelets concave or flat, growing in mountain grassland, moist places, riverbanks, see *Journal of the Proceedings of the Linnean Society* 7: 232. 1864 and *Kirkia* 1: 102. 1961.

A. multiflorus Renvoize (*Andropogon bogotensis* (Hack.) A. Zanin & Longhi-Wagner)

Bolivia. Perennial, caespitose, erect, leaf blades linear and acute, inflorescence much branched, racemes exserted and digitate, moist savannah, see *Gramineas de Bolivia* 596, f. 138. 1998.

A. munroi C.B. Clarke (*Andropogon gyirongensis* L. Liou; *Andropogon hookeri* Munro ex Hack.; *Andropogon tristis* Nees ex Hack.; *Cymbopogon hookeri* (Munro ex Hack.) Stapf ex Bor; *Cymbopogon munroi* (C.B. Clarke) Noltie; *Cymbopogon tibeticus* Bor)

India. Inflorescence of 4-8 racemes, see *Journal of the Linnean Society, Botany* 25: 87-88, t. 37. 1889, *Monographiae Phanerogamarum* 6: 439, 614. 1889 and *Indian Forest Records: Botany* 1: 92. 1939, *Kew Bulletin* 8(2): 275-276. 1953, *Kew Bulletin* 27(3): 447-450. 1972, *Flora Xizangica* 5: 329-331. 1987, *Edinburgh Journal of Botany* 56(3): 400. 2000.

A. perdignus Sohns

Venezuela. Bunchgrass, see *Memoirs of the New York Botanical Garden* 9(3): 274, f. 11. 1957.

A. perligulatus Stapf (*Andropogon canaliculatus* Schumacher.; *Andropogon patris* Robyns)

West tropical Africa, Togo. Perennial, robust, tufted, erect, leaf blades linear, paired racemes, loose false panicle, lower glume of sessile spikelet linear and deeply grooved, swampy places, moist meadow, see *Bull. Jard. Bot. Brux.* 8: 227. 1830 and *Bulletin of Miscellaneous Information Kew*

1908: 410. 1908, *Flore Agrostologique du Congo Belge* 137. 1929.

A. pinguipes Stapf

Tropical Africa. Annual, browsed, good forage when young, used for thatching and for making mats and screens, see *Bulletin of Miscellaneous Information Kew* 1908: 411. 1908.

in Senegal: banôbo, bohdo, goloba, gomgom, gongon, ngétiétiadi, ngolumban, taf

A. pohlianus Hack. (*Cymbachne amplexens* subvar. *pohliana* (Hack.) Roberty) (named for the Bohemian-born Austrian botanist Johann Baptist Emanuel Pohl, 1782-1834, traveler, physician, author of *Plantarum Brasiliae icones et descriptiones ... Vindobonae* [Wien]. See J.H. Barnhart, *Biographical notes upon botanists*. 3: 94. 1965; H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 226-227. 1964; A. Lasègue, *Musée botanique de Benjamin Delessert*. 332, 477, 505, 526. Paris 1845; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. Philadelphia 1964; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. 1917-1933; *Fl. Bras.* 1(1): 78-82. 1906).

Brazil. See *Flora Brasiliensis* 2(4): 304, pl. 69. 1883 and *Boissiera*. 9: 244. 1960, *Bulletin de l'Institut Française d'Afrique Noire* 22: 105. 1960.

A. polytychos Steud. (*Andropogon polytychus* Steud.; *Andropogon polypticus* Steud.; *Dichanthium polytychos* (Steud.) A. Camus) (also spelled *polytychon* or *polytychum*)

Sri Lanka, Myanmar (Burma). Perennial, densely tufted, tussocks, leaves erect and pilose, ligule membranous, auricles absent, subdigitate racemes terminal, upper glume not winged, see *Synopsis Plantarum Glumacearum* 1: 380. 1854 and *Handb. Fl. Ceylon* 5: 237. 1900, *Bulletin du Muséum d'Histoire Naturelle* 27: 549. 1921, *Handb. Fl. Ceylon* 6: 333, 335. 1931, *Grasses of Ceylon* 191, 195. 1956, *Grasses of Burma ...* 91, 135. 1960, *Phanerogamarum Monographiae* 12: 1-225. 1980, *Taxon* 34: 159-164. 1985.

A. polytychos Steud. var. *deccanensis* Bor ex Clayton (*Andropogon polytychos* var. *deccanensis* Bor)

India, Tamil Nadu. Leaf blades filiform, 1-2 racemes, peduncle below inflorescence hairy, see *Grasses of Burma, Ceylon, India and Pakistan* 91, 135. 1960, *Kew Bulletin* 27(3): 448. 1972.

A. polytychos Steud. var. *polytychos*

Myanmar, India, Kerala, Tamil Nadu. Leaf blades flat, peduncle below inflorescence glabrous, in swampy or dry areas.

A. pringlei Scribner & Merr. (*Anatherum argyraeum* var. *pringlei* (Scribn. & Merr.) Roberty)

North America, Mexico. Perennial, tufted, see *Bulletin, Division of Agrostology United States Department of Agriculture* 24: 7. 1901, *Boissiera*. 9: 207. 1960.

A. pseudapricus Stapf (*Anatherum africanum* (Franch.) Roberty; *Andropogon africanus* Franch.; *Andropogon appendiculatus* Nees; *Andropogon appendiculatus* var. *genuinus* Durand & Schinz; *Andropogon apricus* Trin.; *Andropogon apricus* var. *africanus* Hack.; *Andropogon brazzae* Franch.; *Leptopogon appendiculatus* (Nees) Roberty)

West tropical Africa, Chad, Benin, Burkina Faso, Togo. Annual bunchgrass with long cycle, tufted, grazed by stock, used for thatching and as a building material, used to make mats and screens, common on shallow or sandy soils, riverbanks, sandstone, irrigation ditches, loamy sand, on dry fallow land, see *Florae Africae Australioris Illustrationes Monographicae* 105. 1841, *Monographiae Phanerogamarum* 6: 457. 1889, *Bulletin de la Société d'Histoire Naturelle d'Autun* 8: 326. 1895 [or 1893] and *Flora of Tropical Africa* 9: 242. 1919, *Boissiera*. 9: 197, 207. 1960, *Bothalia* 24: 241-246. 1994.

A. pumilus Roxb. (*Andropogon demissus* Steud.; *Andropogon pachyarthrus* Hack.; *Arthrolophis pumilus* (Roxb.) Chiov.)

India, Maharashtra, Madhya Pradesh. Annual, tufted, quite glabrous, smooth, erect or geniculate, low, decumbent below, rather slender, leaf blades rather narrow and linear, numerous radiating branches growing all directions, glabrous racemes, good hay and very good silage, suitable for horses and cattle both green and dry, good fodder grass, palatable to livestock, common on dry or semidry places, heavy soil, black soils, shallow soil, waste ground, see *Hortus Bengalensis, or a catalogue ...* 7. 1814, *Flora Indica; or Descriptions ...* 1: 277. 1820, *Synopsis Plantarum Glumacearum* 1: 388. 1854, *Fodder Grasses N. India* 37. 1888, *Monographiae Phanerogamarum* 6: 449. 1889 and *Bollettino della Società Botanica Italiana* 1917(6/7): 57, 59. 1917.

in India: baerki, bairki, bhurbusi, chikkanuga hullu, chimanchara, gangerua, garren, ghondhani, gondad, gondavaala, gondwal, kaavattam pullu, lahan masrut, lal gondali, lalgavat, malakava, malakaya, malka-phalka, mushel, tagargoti, tambrut, zinzvo

A. pungens T.A. Cope (*Andropogon chinensis* auct. non (Nees) Merr.)

Somalia. Perennial, tufted, green, leaves flat, racemes paired, a false panicle, very pungent callus, lower glume of sessile spikelet deeply depressed and upper glume awned, upper lemma 2-toothed, often coastal, plains, see *Kew Bulletin* 50(1): 109-117. 1995.

A. ravus J.G. Anderson

Southern Africa. Perennial, glaucous, rhizomatous with knotted and branched rhizomes, ligule a fringed membrane, inflorescence spatheate, glumes awned, lower glume of sessile spikelets deeply grooved, palatable, low grazing value, grows in mountain sourveld, see *Bothalia* 7: 417. 1960.

var. *viridis* Hack.; *Cinna lateralis* Walter; *Dimeiostemon tetrastachys* Raf. ex B.D. Jacks.; *Dimeiostemon vaginatus* Raf. ex B.D. Jacks.; *Holcus virginicus* Muhl. ex Steud.; *Sorghum virginicum* (L.) Kuntze) (named for Moses Ashley Curtis, 1808-1872)

America. Perennial bunchgrass, erect, tufted, coarse, usually slender, compressed, branching above, solid culms, basal leaves curled when old and dry, nodes smooth, leaf blade flat or folded, membranous ligule a ciliate or ciliate rim, leaf sheaths more or less tuberculate-hirsute on the margins, upper sheaths somewhat inflated, leaves pubescent, inflorescence paniculate or corymbiform, racemes inserted singly and appearing alternate, rachis slender and sericeous to long-villous, 1 fertile floret above a sterile floret, sessile spikelet bisexual, pedicellate spikelet absent or reduced to a hairy pedicel or a minute scale, pedicellate spikelet undeveloped with only the villous pedicels present, awn straight, palea minute or absent, small seeds dispersed by wind, pioneer species, noxious weed, potential seed contaminant, invasive, naturalized, extremely durable to almost any adverse conditions such as drought or salt spray, medicinal value, astringent, a tea made from the leaves used in the treatment of diarrhoea, boil plant with sugar for a tea for fever, a yellow dye obtained from the stems, used for food by songbirds (seeds) and deer (plants) and for cover by quail, sometimes grazed, low palatability and nutritive value, commonly seen in abandoned old fields, poorly drained soils, savannah, seasonally inundated fields, open areas, clay soil, subhumid to humid subtropical areas on a wide range of soils, roadsides and road banks, riverbanks, disturbed and waste ground, in dry sterile soil, sandy fields, dry sandy soils, coastal sand dunes, along railroad tracks, on wet open and swampy places, open pastures, bogs, lake and pond margins, along dry lakeshores, wet ditches, grassy spots, hilltop and moist hillsides, see *Species Plantarum* 2: 1046. 1753, *Flora Caroliniana, secundum* ... 59. 1788, *Flora Boreali-Americana* 1: 57. 1803, *Plantarum Minus Cognitarum Pugillus* 2: 16. 1815, *A Sketch of the Botany of South-Carolina and Georgia* 1: 148, 150, t. 8, f. 4. 1816, *Nova Genera et Species Plantarum* 1: 187. 1815 [1816], *Reliquiae Haenkeanae* 1(4-5): 336. 1830, *Mémoires de la Société d'Agriculture, Sciences et Arts d'Angers* 1: 175. 1831, *Nomenclator Botanicus. in Mexico: popotillo pajon

A. virginicus L. var. **decipiens** C.S. Campbell

U.S., Florida. Found in pine flatwoods, open areas, disturbed areas in both wet and dry situations, see *Systematic Botany* 11(2): 290. 1986.

A. virginicus L. var. **glaucus** Hack. (*Andropogon capillipes* Nash; *Andropogon glaucus* Muhl., nom. illeg., non *Andropogon glaucus* Retz.; *Andropogon virginicus* var. *dealbatus* C. Mohr ex Hack.; *Andropogon virginicus* var. *glaucus* (Muhl.) Hack.; *Cymbopogon glaucus* (Muhl.) Schult.)

Northern America, U.S., Florida. Perennial, caespitose, green spikelets, found in wetlands and uplands, frequent in seasonal ponds and swales, scrub and dry woodlands, one form of this grass grows in wet roadsides, wet pine flatwoods and disturbed wetlands, the other form grows in a variety of disturbed upland sites, see *Descriptio uberior Graminum* 278. 1817, *Mantissa* 2: 459. 1824 *Monographiae Phanerogamarum* 6: 411. 1889 and *Bulletin of the New York Botanical Garden* 1(5): 431-432. 1900.

in English: chalky bluestem

A. virginicus L. var. **virginicus** (*Anatherum virginicum* subvar. *tetrastachyum* (Ell.) Roberty; *Andropogon curtisianus* Steud.; *Andropogon dissitiflorus* Michx.; *Andropogon eriophorus* Scheele, nom. illeg., non *Andropogon eriophorus* Willd.; *Andropogon tetrastachyus* Elliott; *Andropogon vaginatus* Elliott; *Andropogon vaginatus* J. Presl, nom. illeg., non *Andropogon vaginatus* Elliott; *Andropogon virginicus* subvar. *genuinus* Hack.; *Andropogon virginicus* var. *genuinus* Fernald & Griscom; *Andropogon virginicus* var. *tetrastachyus* (Ell.) Hackel; *Andropogon virginicus* var. *vaginatus* (Elliott) Alph. Wood; *Cinna lateralis* Walter; *Dimeiosstemon vaginatus* Elliott ex B.D. Jacks.) (dedicated to the American botanist Moses Ashley Curtis, 1808-1872, specialist in fungi and lichens, plant collector in Northern America; see J.H. Barnhart (1871-1949), *Biographical notes upon botanists*. 1: 406. Boston 1965; Stafleu and Cowan, *Taxonomic literature*. 1: 573-574. Utrecht 1976; Frans A. Stafleu and Erik A. Mennega, *Taxonomic literature. Supplement IV*. 515-517. 1997; S. Lenley et al., *Catalog of the manuscript and archival collections and index to the correspondence of John Torrey*. Library of the New York Botanical Garden. 451. 1973; Jeannette E. Graustein, *Thomas Nuttall, Naturalist. Explorations in America, 1808-1841*. Harvard University Press 1967)

North America, U.S., Florida. Perennial, caespitose, green spikelets, weed species, occurs in wetlands and nonwet-

lands, characteristic of disturbed places and disturbed wet areas, found in bogs, flatwoods and sand hills, old fields, wet pine flatwoods, wet ditches, fresh and brackish marshes, lake and pond margins and depression wetlands, see *Flora Caroliniana, secundum ...* 59. 1788, *Flora Boreali-Americana* 1: 57. 1803, *Plantarum Minus Cognitarum Pugillus* 2: 16. 1815, *Reliquiae Haenkeanae* 1(4-5): 336. 1830, *A Sketch of the Botany of South-Carolina and Georgia* 1: 148, 150, t. 8, f. 4. 1816, *Flora* 27: 51. 1844, *Synopsis Plantarum Glumacearum* 1: 390. 1854, *A Class-book of Botany* 808. 1861, *Monographiae Phanerogamarum* 6: 410-411. 1889, *Index Kewensis* 1: 760. 1893 and *Rhodora* 37(436): 142. 1935, *Boissiera. Mémoires du Conservatoire de Botanique et de l'Institut de Botanique Systématique de l'Université de Genève* 9: 213. 1960.

in English: broomsedge, broomsedge bluestem, Virginia broom beard grass

Andropterum Stapf

From the Greek *aner*, *andros* “a man, male” and *pteron* “wing.”

One species, tropical Africa, Mozambique. Panicoideae, Andropogonodae, Andropogoneae, Andropogoninae, perennial, decumbent, herbaceous, auricles absent, ligule a fringe of hairs, plants bisexual, inflorescence a single raceme, spikelets compressed, 2 glumes awnless, lower glume 2-keeled, type *Andropterum variegatum* Stapf, see *Flora of Tropical Africa* 9: 38. 1917, *Memoirs of the New York Botanical Garden* 9: 112. 1954.

Species

A. variegatum Stapf

Mozambique.

Androscepia Brongn. = Themeda Forssk.

From the Greek *aner*, *andros* “man” and *skepe* “a covering, shelter, protection.”

Panicoideae, Andropogoneae, Anthistiriinae, type *Androscepia gigantea* (Cav.) Brongn., see *Flora Aegyptiaco-Arabica* 178. 1775, *Icon. Pl. Rar.* 5: 36, t. 458. 1799, *Voyage Autour du Monde* 77-78. 1829 [1831], *Fodder Grasses North. India* 43. 1888 and *Grasses of Burma ...* 248-255. 1960, *Contributions from the United States National Herbarium* 46: 613. 2003.

Anelytrum Hackel = Avena L.

From the Greek *a* “without, not” and *elytron* “a sheath, a cover,” *elyo* “to wind.”

Pooideae, Poaeae, Aveninae, type *Anelytrum avenaceum* Hack., see *Species Plantarum* 1: 79-81. 1753 and *Repertorium Specierum Novarum Regni Vegetabilis* 8: 519. 1910, *Taxon* 40: 132. 1991, *Contributions from the United States National Herbarium* 48: 126-138. 2003.

Anemagrostis Trin. = *Apera* Adans.

From the Greek *anemos* “wind” and *agrostis*, *agrostidos* “grass, weed, couch grass,” referring to the spikes.

Pooideae, Poaeae, Agrostidinae, type *Anemagrostis spicaventi* (L.) Trin., see *Systema Naturae, Editio Decima* 2: 872. 1759, *Familles des Plantes* 2: 495. 1763, *Essai d'une Nouvelle Agrostographie* 31, 151. 1812, *Fundamenta Agrostographiae* 128-129, t. 11. 1820, *Observations sur les Graminées de la Flore Belgique* 127, 128. 1823 [1824], *Synopsis Plantarum Glumacearum* 1: 115. 1854 and *U.S. Dept. Agric. Bull.* 772: 127. 1920, *Grasses of Burma ...* 394. 1960, *Contributions from the United States National Herbarium* 48: 115. 2003.

Anemanthele Veldkamp = *Stipa* L.

Probably from the Greek *anemos* “wind” and *anthele* “a type of inflorescence, a little flower” or *thele* “nipple.”

Monotypic, New Zealand. Stipoideae, Stipeae, perennial, herbaceous, simple, densely caespitose, wiry, with short creeping rhizomes, leaves mostly basal, auricles absent, ligule an unfringed membrane, plants bisexual, inflorescence paniculate with capillary branchlets or branches, flowers bisexual, spikelets disarticulating above the glumes, 2 glumes subequal, lower glume 1-nerved, palea present, 2 free lodicules, 1 stamen, ovary glabrous, 2 stigmas, wild and cultivated, ornamental, type *Anemanthele lessoniana* (Steud.) Veldkamp, see *Species Plantarum* 1: 61-63, 78-79. 1753 and *Contr. U.S. Natl. Herb.* 24(7): 216. 1925, J. Veldkamp, “*Anemanthele* Veldk. (Gramineae: Stipeae) a new genus from New Zealand.” *Acta Botanica Neerlandica* 34: 105-109. 1985.

Species

A. lessoniana (Steud.) Veldkamp (*Agrostis lessoniana* Steud.; *Agrostis procera* A. Rich., nom. illeg., non *Agrostis procera* Retz.; *Agrostis rigida* A. Rich., nom. illeg., non *Agrostis rigida* (Kunth) Spreng.; *Agrostis rigida* Less. & A. Rich., nom. illeg., non *Agrostis rigida* (Kunth) Spreng.; *Apera arundinacea* Hook.f.; *Apera purpurascens* Colenso; *Dichelachne procera* Steud.; *Dichelachne rigida* Steud.; *Oryzopsis lessoniana* (Steud.) Veldkamp; *Oryzopsis rigida* (Steud.) Zotov; *Stipa arundinacea* (Hook.f.) Benth.) (after the French botanist René Primevère Lesson, 1794-1849, physician, pharmacist, ornithologist, professor of botany, explorer, from 1822 to 1825 took part in the voyage of the

Coquille commanded by Louis-Isidor Duperrey (1786-1865), from 1826 to 1829 with Dumont d'Urville on *Astrolabe* expedition, among his writings are *Flore rochefortine*. Rochefort 1835, *Voyage Médical autour du monde*. Paris 1829, *Notice historique sur l'Admiral Dumont d'Urville*. Rochefort 1846, *Journal d'un Voyage Pittoresque autour du Monde exécuté sur la Corvette La Coquille commandée par M. L.I. Duperrey*. Paris 1830 and *Voyage autour du Monde entrepris par ordre du Gouvernement sur la Corvette La Coquille*. Paris 1838-1839; see J.H. Barnhart, *Biographical notes upon botanists*. 2: 372. 1965; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 235. 1972; Günther Schmid, *Chamisso als Naturforscher. Eine Bibliographie*. Leipzig 1942; Stafleu and Cowan, *Taxonomic literature*. 2: 853. 1979; John Dunmore, *Who's Who in Pacific Navigation*. Honolulu 1991)

New Zealand. Perennial, densely tufted, unbranched, erect, bambusiform habit, rhizomatous, leaves drooping, nodding panicles, glumes acute to acuminate, found along streams, forest and forest margins, along roadsides, shady sites, sometimes confused with *Microlaena polynoda* (Hook.f.) Hook.f., see *Systema Vegetabilium, editio decima sexta* 1: 262. 1825., *Voyage de Découvertes autour du Monde ... sur la corvette L'Astrolabe pendant les Années 1826-1829 ... Botanique* 1: 124-125. 1832, *Nomenclator Botanicus. Editio secunda* 1: 41. 1840, *Flora Novae-Zelandiae* 295, t. 67. 1853, *Synopsis Plantarum Glumacearum* 1: 120-121. 1854, *Journal of the Linnean Society, Botany* 19: 81. 1881, *Transactions and Proceedings of the New Zealand Institute* 21: 106. 1889 and *Transactions of the Royal Society of New Zealand, Botany* 73: 235. 1943, *Blumea* 22(1): 11. 1974, *Acta Botanica Neerlandica* 34: 107-108. 1985, *New Zealand J. Bot.* 27: 580. 1989.

in English: New Zealand wind grass

Aneurolepidium Nevski = *Leymus* Hochst.

Greek *aneuros* “without nerve” and *lepidion* “a little scale.”

Pooideae, Triticeae, Hordeinae, type *Aneurolepidium multicaule* (Kar. & Kir.) Nevski, see *Flora* 31: 118. 1848 and *Flora URSS* 2: 229, 708. 1934, *Novosti Sist. Vyss. Rast.* 9: 62. 1972, *American Journal of Botany* 71: 609-625. 1984, *Contributions from the United States National Herbarium* 48: 422-425. 2003.

Anisachne Keng = *Calamagrostis* Adans.

From the Greek *anisos* “unequal” and *achne* “chaff, glume.”

Monotypic, China, Yunnan, Guizhou. Pooideae, Poaeae, Agrostidinae, perennial, glabrous, herbaceous, panicles terminal, spikelets 1-flowered, on grassland, type *Anisachne*

gracilis Keng, see *Familles des Plantes* 2: 31, 530. 1763, *Tentamen Florae Germanicae* 1: 34. 1788 and *Claves Generum et Specierum Graminearum Primarum Sinicarum Appendice Nomenclatione Systematica* 208. 1957, *Journal of the Washington Academy of Sciences* 48(4): 117-118, f. 2. 1958, *Bulletin of Botanical Research* 18(4): 398, f. 1. 1998, *Contributions from the United States National Herbarium* 48: 191-227. 2003.

Species

A. gracilis Keng

China.

Anisantha K. Koch = *Bromus* L.

From the Greek *anisos* “unequal” and *anthos* “flower.”

Pooideae, Bromeae, type *Anisantha pontica* Koch, see *Species Plantarum* 1: 76-78. 1753, *Observations sur les Graminées de la Flore Belgique* 116. 1823 [1824], *Linnaea* 21: 394. 1848 and *U.S.D.A. Div. Agrostol. Bull.* 23: 1-66. 1900, *Brittonia* 7: 421. 1952, *Notes Roy. Bot. Gard. Edinburgh* 30: 366. 1970, *Bot. Jahrb. Syst.* 102: 447. 1981, *Taxon* 41: 559. 1992, *Taxon* 44: 611-612. 1995, *Contributions from the United States National Herbarium* 48: 154-191. 2003.

Aniselytron Merr. = *Aulacolepis* Ettingsh. (Pinaceae), *Aulacolepis* Hack., *Calamagrostis* Adans., *Neoaulacolepis* Rauschert

From the Greek *anisos* “unequal” and *elytron* “a sheath, a cover.”

About 2-3 species. Asia, China, India, Malaysia, Indonesia. Pooideae, Poodae, Aveneae, perennial, herbaceous, tufted, decumbent, auricles absent, ligule a fringed membrane-like, plants bisexual, cleistogamous or chasmogamous, open inflorescence paniculate, spikelets pedicellate, 2 glumes unequal, lemma coriaceous and keeled, palea present, 2 free and membranous lodicules, 3 stamens, ovary glabrous, 2 stigmas, forest, montane, shade, sandy soil, type *Aniselytron agrostoides* Merrill, see *Familles des Plantes* 2: 31, 530. 1763, *Tentamen Florae Germanicae* 1: 34. 1788, *Sitzungsberichte der kaiserlichen Akademie der Wissenschaften. Wien. Mathematisch-naturwissenschaftlichen Classe. Abteilung I* 102: 135, 147. 1893, *Transactions of the Linnean Society of London, Botany* 4: 247, t. 20c, 10-16. 1894, *Hooker's Icones Plantarum* 27: sub t. 2607. 1899 and *Repertorium Specierum Novarum Regni Vegetabilis* 3(42-43): 241-244. 1906 [1907], *Philippine Journal of Science* 5(4): 328-330. 1910, *Journal of the Washington Academy of Sciences* 24(7): 291. 1934, *Brittonia* 2(2): 117. 1936, *Indian Forester* 107(7): 434. 1981, *Taxon* 31(3): 561. 1982, H.M. Korthof et J.F. Veldkamp, “A revision of *Aniselytron* with

some new combinations in *Deyeuxia* in SE. Asia (Gramineae).” *The Gardens' Bulletin Singapore* 37(2): 213-223. 1984, *Contributions from the United States National Herbarium* 48: 191-227. 2003.

Species

A. agrostoides Merr. (*Aulacolepis agrostoides* (Merr.) Ohwi; *Aulacolepis agrostoides* var. *formosana* Ohwi; *Calamagrostis aniselyton* Govaerts)

Philippines. See *Philippine Journal of Science* 5(4): 329-330. 1910, *Acta Phytotaxonomica et Geobotanica* 4(1): 30. 1935, *World Checklist of Seed Plants* 3(1): 9. 1999.

A. agrostoides Merr. var. *formosana* (Ohwi) N. Zhao (*Aulacolepis agrostoides* var. *formosana* Ohwi; *Aulacolepis formosana* (Ohwi) L. Liou)

Philippines, Taiwan. See *Acta Phytotaxonomica et Geobotanica* 4(1): 30. 1935, *Vascular Plants of the Hengduan Mountains* 2: 2254. 1994, *Journal of Tropical and Subtropical Botany* 3(2): 49. 1995.

A. gracilis (Keng) N. Zhao (*Anisachne gracilis* Keng)

China. See *Journal of the Washington Academy of Sciences* 48(4): 117-118, f. 2. 1958, *Journal of Tropical and Subtropical Botany* 3(2): 50. 1995.

A. treutleri (Kuntze) Soják (*Aniselytron clemensae* (Hitchc.) Soják; *Aniselytron clemensae* (Hitchc.) Bennet & Raizada; nom. illeg., non *Aniselytron clemensae* (Hitchc.) Rauschert; *Poa milioides* Honda) (for the British (b. India) physician William John Treutler, 1841-1915 (d. Sussex), plant collector in Sikkim, 1868 Fellow of the Linnean Society)

Southeast Asia, Borneo, Sumatra. See *Revisio Generum Plantarum* 2: 780. 1891, *Hooker's Icones Plantarum* 24(4): t. 2396. 1895 and *Repertorium Specierum Novarum Regni Vegetabilis* 3(42-43): 241-244. 1906 [or 1907], *Botanical Magazine* 41(491): 641. 1927, *Acta Phytotaxonomica et Geobotanica* 2(3): 161-162. 1933, *Journal of the Washington Academy of Sciences* 24(7): 290. 1934, *Acta Phytotaxonomica et Geobotanica* 6(3): 151. 1937, *Botanical*

Magazine (Tokyo) 55(656): 361. 1941, *Acta Botanica Neerlandica* 2: 363, f. 1. 1953, *Journal of Japanese Botany* 31: 137. 1956, *Indian Forester* 107(7): 434. 1981, *Taxon* 31(3): 561. 1982, *Gard. Bull. Singapore* 37(2): 216-217. 1985, *World Checklist of Seed Plants* 3(1): 11. 1999.

Anisopogon R. Br.

From the Greek *anisos* “unequal” and *pogon* “a beard,” referring to the hairy back of the lemmas.

One species, Australia. Stipoideae, Anisopogoneae, perennial, caespitose or shortly rhizomatous, erect, herbaceous, canelike stems, ligule a ciliate rim or a fringed membrane, leaf blade narrow and convolute, glabrous nodes, hollow internodes, plants bisexual, inflorescence paniculate, few spikelets, spikelets large and pendulous, 1 bisexual floret, 2 glumes linear, lemma densely hairy and awned, glumes more or less equal, 3 lodicules free and membranous, 3 stamens, ovary hairy, 2 or 3 stigmas, an attractive species, in open forest, open habitats, emerges through thick heath, see R. Brown, *Prodromus florae Novae Hollandiae*. 176. 1810, *Florae Africae Australioris Illustrationes Monographicae* 265. 1841, *Synopsis Plantarum Glumacearum* 1: 237. 1854, *Mémoires, Société d'Émulation du Doubs* 4: 391. 1860.

Species

A. avenaceus R. Br. (*Avena anisopogon* Raspail; *Danthonia anisopogon* Trin.; *Danthonia anisopogon* (R. Br.) Trin.; *Deyeuxia avenacea* (R.Br.) Sprengel)

Victoria, New South Wales, Queensland. Perennial, forming erect and tall tussocks, glabrous, leaves inrolled, auricles absent, panicle loose and slender, pedicellate spikelets, glumes subequal, lemma stalked and hairy, palea stiffly pointed, growing on heathy sandstones, in dry sclerophyll forest, open habitats, see *Annales des Sciences Naturelles (Paris)* 5: 439. 1825.

in English: oat spear-grass

Anisopyrum (Griseb.) Gren. & Duval = *Leymus* Hochst.

From the Greek *anisos* “unequal” and *pyros* “grain, wheat.”

Pooideae, Triticeae, Hordeinae, see *Flora* 31: 118. 1848, *Flora Rossica* 4(13): 343. 1852, Jean Charles M. Grenier (1808-1875), *Florula massiliensis advena*. Florule exotique des environs de Marseille ... Supplément 24. Besançon [1859 or 1860] [also in *Mémoires, Société d'Émulation du Doubs* 3(4): 369-392. 1860, and *Bull. Soc. Bot. Fr.* 7: 124-126. 1860] and *Novosti Sist. Vyss. Rast.* 9: 62. 1972, *American Journal of Botany* 71: 609-625. 1984, *Contributions*

from the United States National Herbarium 48: 422-425. 2003.

Anomalotis Steud. = *Agrostis* L.

From the Greek *anomalos* “abnormal, anomalous.”

Pooideae, Poeae, Agrostidinae, type *Anomalotis quinqueseta* Steud., see *Species Plantarum* 1: 61-63. 1753, *Synopsis Plantarum Glumacearum* 1: 198. 1854 [1855], *Flora* 38: 285. 1855 and *Flora of Tropical Africa* 10: 182. 1937, *Taxon* 41: 556. 1992, *Opera Botanica* 121: 159-172. 1993, *Taxon* 44: 611-612. 1995, *Contributions from the United States National Herbarium* 48: 42-89. 2003.

Anomochloa Brongn.

From the Greek *anomalos* “abnormal, irregular, uneven,” *anomia*, *anomios* “lawless, irregular” and *chloe*, *chloa* “grass.”

One species, Brazil, tropics. Anomochloideae, Anomochloaeae, or Bambusoideae, Oryzodae, Anomochloaeae, perennial, herbaceous, tufted, unbranched, solid, forming large clumps, ligule a band of hairs, rhizomatous, leaf blades cordate and pseudopetiolate, rhizomes pachymorph, plants bisexual, compound inflorescence leafy and spiciform, 3-6 spathes, 2 bracts derived from spathiform leaf-sheaths, anomalous spikelets 1-flowered, glumes absent, lodicules absent or present, 4 stamens, ovary glabrous, 1 stigma, forest shade, forest undergrowth, edge of forest, disturbed areas, type *Anomochloa marantoidea* Brongn., see *Ann. Sci. Nat. Bot.*, sér. 3, 16: 368, pl. 23. 1851, *Flora Brasiliensis* 2(2A): 1-32, t. 1-11. 1871 and *Fam. Pl., Monocot.* 2: 219. 1934, *Bot. Jahrb.* 76: 366-379. 1954, *Willdenowia* 1: 772. 1957, *Darwiniana* 29: 41-45. 1989, *Smithsonian Contributions to Botany* 68: 1-52. 1989, L.G. Clark, W. Zhang and J.F. Wendel, “A phylogeny of the grass family based on *ndhF* sequence data.” *Systematic Botany* 20: 436-460. 1995, L.G. Clark & E.J. Judziewicz, “The grass subfamilies Anomochloideae and Pharoideae.” *Taxon* 45: 641-645. 1996, M.R. Duvall & B.R. Morton, “Molecular phylogenetics of Poaceae: an expanded analysis of *rbcL* sequence data.” *Molecular Phylogenetics and Evolution* 5: 352-358. 1996, Khidir W. Hilu and Lawrence A. Alice, “Evolutionary implications of *matK* indels in Poaceae.” *Am. J. Bot.* 86: 1735-1741. 1999, *American Bamboos* 322-325. 1999, *Contributions from the United States National Herbarium* 39: 11. 2000, Sarah Mathews, Rocky C. Tsai and Elizabeth A. Kellogg, “Phylogenetic structure in the grass family (Poaceae): evidence from the nuclear gene phytochrome B.” *Am. J. Bot.* 87: 96-107. 2000, Brandon S. Gaut, “Evolutionary dynamics of grass genomes.” *New Phytologist* 154(1): 15-28. Apr 2002, Paula J. Rudall & Richard M. Bateman, “Evolution of zygomorphy in monocot flowers: iterative

patterns and developmental constraints." *New Phytologist* 162(1): 25-44. Apr 2004.

Species

A. marantoidea Brongn. (*Anomochloa macrantoidea* A. Braun ex Pritz.)

Brazil. Perennial, bambusoid leaf anatomy, see G.A. Pritzel (1815-1874), *Iconum Botanicarum Index locupletissimus* 74. Berlin 1866.

Anoplia Steud. = *Leptochloa* P. Beauv.

From the Greek *anoplos* "without the *hoplon* or large shield, unarmed."

Chloridoideae, Cynodonteae, see *Essai d'une Nouvelle Agrostographie* 71, 161. 1812, *Linnaea* 19(6): 691. 1847, *Synopsis Plantarum Glumacearum* 1: 210. 1854, *Biologia Centrali-Americana; ... Botany ...* 3(19): 558. 1885 and *Contr. U.S. Natl.* 24(6): 180. 1925, *Contributions from the United States National Herbarium* 41: 130-137. 2001.

Anthaenantia P. Beauv. = *Anthenantia* P. Beauv., *Aulaxanthus* Elliott, *Aulaxia* Nutt., *Leptocoryphium* Nees

Greek *anthos* "flower" and *enantion* "opposite, against."

About 2-4 species, North America, southeast U.S. Panicoideae, Paniceae, Paspalinae, perennial, erect, stiff, glabrous, solid, leaf sheaths terete, ligule a ciliate membrane, leaf blades flat, panicles narrow or loosely contracted, primary branches ascending and secondary spreading, spikelet terminal and solitary, florets 2, lower floret sterile and staminate, upper floret fertile, first glume absent, second glume present, upper lemma boat-shaped, lemmas of upper florets indurate or cartilaginous and awnless, palea of upper florets present, stamens 3, in wet or boggy habitat, similar to *Digitaria* and *Leptocoryphium* Nees, type *Anthaenantia villosa* (Michx.) P. Beauv., see *Essai d'une Nouvelle Agrostographie* 48, 151, t. 10, f. 7. 1812, *A Sketch of the Botany of South-Carolina and Georgia* 1: 102. 1816, *The Genera of North American Plants* 1: 47. 1818, *Flora Brasiliensis seu Enumeratio Plantarum* 2: 83-84. 1829 and *International Organization of Plant Biosystematists Newsletter* 13: 20-21. 1989, *Contributions from the United States National Herbarium* 46: 65-66. 2003.

Anthaenantiopsis Mez ex Pilger = Anthaenantiopsis Pilger

Resembling *Anthaenantia*.

About 4 species, South America, Brazil, Argentina. Panicoideae, Panicodae, Paniceae or Panicoideae, Paniceae, Paspalinae, perennial, tufted, herbaceous, hollow, auricles absent, narrow leaf blades linear, ligule a membrane unfringed or fringed, leaves pseudopetiolate, plants bisexual, inflorescence spicate, racemes divergent, spikelets shortly pedicellate, 1 or 2 glumes unequal per spikelet, lemmas smooth, indurated lower lemma, palea present, 2 free and fleshy lodicules, 3 stamens, ovary glabrous, 2 stigmas, open habitats, savannah, type *Anthaenantiopsis trachystachya* (Nees) Mez ex Pilg., see *Flora Brasiliensis seu Enumeratio Plantarum* 2(1): 125-127. 1829 and *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 11(104): 237-238. 1931, *Notas del Museo de la Plata, Botánica* 8(40): 75-100. 1943, *Kew Bulletin* 42(4): 924. 1987, O. Morrone et al., "Revision of *Anthaenantiopsis* (Poaceae: Panicoideae: Paniceae)." *Systematic Botany* 18(3): 434-453. 1993, *Flora Fanerogámica Argentina* 19(1): 11-16. 1995, A.M. Cialdella et Andrea S. Vega, "Estudios sobre la variación estructural de las espiguillas en géneros de la tribu Paniceae (Poaceae)." *Darwiniana* 34: 173. 1996, *American Journal of Botany* 88: 1670-1674. 2001 ["In *Anthaenantiopsis*, the lower lemma is usually membranous and similar to the upper lemma, or the lower lemma is crustaceous and similar to the upper glumes."], *Contributions from the United States National Herbarium* 46: 66-67. 2003.

Species

A. fiebrigii Parodi (*Anthaenantiopsis fiebrigii* Mez; *Anthaenantiopsis fiebrigii* Mez)

Bolivia. See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 56 (Beibl. 125): 11. 1921.

A. perforata (Nees) Parodi (*Anthaenantiopsis trachystachya* (Nees) Mez ex Pilg.; *Panicum perforatum* Nees; *Panicum trachystachyum* var. *lineare* Döll)

Brazil, Matto Grosso. See *Flora Brasiliensis seu Enumeratio Plantarum* 2(1): 125-127. 1829, *Flora Brasiliensis* 2(2): 192. 1877 and *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 11: 237. 1931.

A. perforata (Nees) Parodi var. *camporum* Morrone, Filg. & Zuloaga

Brazil. See *Systematic Botany* 18(3): 445. 1993.

A. perforata (Nees) Parodi var. *perforata*

Brazil.

A. rojasiana Parodi (*Panicum trachystachyum* Nees) (for T. Rojas, 1877-1954)

Brazil, Paraguay. Perennial, see *Flora Brasiliensis seu Enumeratio Plantarum* 2(1): 125-126. 1829 and *Notas del Museo de la Plata, Botánica* 8: 87, f. 3. 1943.

A. trachystachya (Nees) Mez ex Pilger (*Anthaenantiopsis perforata* (Nees) Parodi; *Anthaenantiopsis trachystachya* (Nees) Mez; *Anthaenantiopsis trachystachya* (Nees) Mez; *Panicum trachystachyum* Nees; *Panicum trachystachyum* var. *angustifolium* Döll; *Panicum trachystachyum* var. *trachystachyum*)

Southern Brazil, Matto Grosso, Bolivia, Paraguay. Perennial, acute leaf blades, spike-like inflorescence with spikelets in short racemes, in wet areas, see *Flora Brasiliensis seu Enumeratio Plantarum* 2(1): 125-127. 1829, *Flora Brasiliensis* 2(2): 192. 1877 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 56(Beibl. 125): 11. 1921, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 11: 237. 1931, *Notas del Museo de la Plata, Botánica* 8(40): 91. 1943.

Anthenantia P. Beauv. = Anthaenantia P. Beauv., Aulaxanthus Elliott, Aulaxia Nutt.

Orth. var. *Anthaenantia*.

Panicoideae, Paniceae, Paspalinae, type *Anthenantia villosa* (Michx.) P. Beauv., see *Essai d'une Nouvelle Agrostographie* 48, 151, t. 10, f. 7. 1812, *A Sketch of the Botany of South-Carolina and Georgia* 1: 102. 1816, *The Genera of North American Plants* 1: 47. 1818 and *Contributions from the United States National Herbarium* 46: 65-66. 2003, *Sida* 21: 303-308. 2004.

Anthephora Schreber = Hypudaerus A. Braun

From the Greek *anthos* "flower" and *phoros* "bearing, carrying," *phero, phoreo* "to bear."

About 12 species, Africa, Arabia, tropical America. Panicoideae, Panicodae, Paniceae, Cenchrinae, annual or perennial, erect, decumbent, geniculate, herbaceous, caespitose, long rhizomatous, auricles absent, ligule an unfringed or

fringed membrane, leaves flat, plants bisexual, inflorescence a cylindrical false spike with wavy rachis, clusters of spikelets surrounded by an involucre of coriaceous bristles or scales, lower floret reduced to a lemma, upper floret bisexual, spikelets flattened and lanceolate, 1 glume per spikelet, lower glume absent, upper lemma cartilaginous, palea present, lodicules absent or present, 3 stamens, ovary glabrous, 2 stigmas, open habitats, savannah, dry areas, sandy savannah, rainforest, type *Antheophora elegans* Schreb., see *Beschreibung der Gräser* 2: 105, t. 44. Leipzig 1769-1810, *Flora* 24: 275. 1841 and A.P. Goossens, "The genus *Antheophora* Schreb." *Transactions of the Royal Society of South Africa* 20: 189-200. 1932, *Trans. Amer. Microscop. Soc.* 79: 211-218. 1960, *Brittonia* 23(3): 293-324. 1971, *Annals of the Missouri Botanical Garden* 75: 866-873. 1988, *Flora Mesoamericana* 6: 376. 1994, *Flora of Ethiopia and Eritrea* 7: 279-283. 1995, *Memoirs of the New York Botanical Garden* 78: 509-540. 1996, *Contributions from the United States National Herbarium* 46: 67-68. 2003.

Species

A. ampullacea Stapf & C.E. Hubb.

Tropical Africa, Angola, Nigeria. Perennial, tussocky, hardy, persistent, robust, useful for erosion control, on sandy places, wasteland, see *Flora of Tropical Africa* 9: 939. 1930.

A. argentea Goossens (*Antheophora angustifolia* Goossens)

South Africa, central and southern Kalahari. Perennial, tufted, slender, wiry, upright, unbranched or occasionally branched, broad-leaved, shortly rhizomatous, leaf sheath glabrous and rounded, ligule membranous, rigid leaves, older leaves curled, silver woolly spike, acute lower glume, very high grazing value, valuable and palatable grass, high nutritive value, grows on loose sandy soils, on sand dunes, undisturbed veld, see *Transactions of the Royal Society of South Africa* 20: 194, 198, f. 2, 4. 1932.

in English: silver wool grass

in South Africa: silverborseltjiegras, silber kruggras

A. cristata (Döll) Hack. ex De Wildeman & T. Durand (*Antheophora appendiculata* A. Braun; *Antheophora cristata* (Döll) Hack.; *Antheophora elegans* Schreb.; *Antheophora elegans* var. *cristata* Döll)

Nigeria, Ghana, Guinea. See *Flora Brasiliensis* 2(2): 314. 1877 and É.A.J. De Wildeman (1866-1947), "Études de systématique et de géographie botaniques sur la flore du Bas- et du Moyen-Congo." in *Annales du Musée du Congo (Belge)*. Botanique. Sér. 5 Congo-Kasai. 255. 1910.

in English: oldfield grass

A. hermaphrodita (L.) Kuntze (*Antheophora cuspidata* Andersson; *Antheophora elegans* Schreb.; *Antheophora elegans* var. *armata* Döll; *Antheophora villosa* Spreng.; *Cen-*

chrus laevigatus Trin.; *Cenchrus pilosus* Kunth; *Cenchrus tripsacoides* Cav.; *Cenchrus villosus* (Spreng.) Spreng.; *Cenchrus villosus* (R. Br. ex Fresen.) Kuntze, nom. illeg., non *Cenchrus villosus* (Spreng.) Spreng.; *Tripsacum hermaphroditum* L.; *Tripsacum hermaphroditum* Panz., nom. illeg., non *Tripsacum hermaphroditum* L.)

South America, West Indies, Mexico. Annual or perennial bunchgrass, herbaceous, tufted, glabrous, low, inflorescence rachis zigzag and angled, ovate bracts, spikelets lanceolate and dorsally compressed, ornamental weed, forage, growing in hard dry soils, beaches, open areas, weedy places, among other shrubs and grasses, open grassland, abandoned fields, old lawns, along roadsides, dark brown soil, see *Systema Naturae, Editio Decima* 2: 1253, 1261, 1379. 1759, *Vollständiges Pflanzensystem* 12: 655. 1785, *Elenchus Plantarum Horti Regni Botanici Matritensis* 9. 1803, *Nova Genera et Species Plantarum* 1: 116, t. 36. 1815 [1816], *Fundamenta Agrostographiae* 172. 1820, *Neue Entdeckungen im ganzen Umfang der Pflanzenkunde* 3: 14. 1822, *Systema Vegetabilium, editio decima sexta* 1: 301. 1825, Nils Johann Andersson (Anderson) (1821-1880), *Om Galapagos-öarnes Vegetation*. Lund 1854, *Flora Brasiliensis* 2(2): 314. 1877, *Revisio Generum Plantarum* 3(3): 347. 1898 and *Feddes Repert.* 49: 52. 1940, *Taxon* 49(2): 257. 2000.

in English: oldfield grass

in Mexico: ne och, ne och suuk, pasto

A. laevis Stapf & C.E. Hubb. (*Antheophora elegans* Rupr. ex Steudel, nom. illeg., non *Antheophora elegans* Schreb.; *Antheophora elegans* var. *laevis* Schweinf.; *Antheophora hochstetteri* var. *tellinii* Chiov.) (named for the Italian naturalist Achille Tellini, botanical collector in Eritrea, see *Catalogo Ragionato delle Specie degli Uccelli*. Venezia 1904 [Estratto originale del: Reale Istituto Veneto di Scienze, Lettere ed Arti, *Catalogo ragionato delle specie di uccelli* raccolti dal prof. Achille Tellini nella colonia Eritrea dall'ottobre 1902 al marzo 1903.]; H. Schouteden, "Excursion del Dott. Achille Tellini nell'Eritrea. Hemiptera." *Annales de la Société Entomologique de Belgique* 49: 6-10. 1905; I.A.D. Robertson, "The Pyrrhocoroidea (Hemiptera - Heteroptera) of the Ethiopian region." *Journal of Insect Science* 4.14. (43pp.) 2004)

Red Sea, Sudan. Perennial, tufted, slender, ascending, leaf blades glabrous or pubescent, stiff inflorescence narrowly cylindrical, spikelets clusters erect, involucre scales glabrous and smooth, found in dry stony soils, see *Bull. Herb. Boiss.* 2, App. 2: 17. 1894, Georg August Schweinfurth (1836-1925), *Sammlung Arabisch-aethiopischer Pflanzen*. Ergebnisse von Reisen in den Jahren 1881 ... und 1894. Genève [1894-] 1896 [-1899] and *Annuario del Reale Istituto Botanico di Roma* 8(3): 291. 1908, *Flora of Tropical Africa* 9: 937. 1930.

A. nigrimana Stapf & C.E. Hubb. (*Antheophora lynesii* Stapf & C.E. Hubb.) (possibly dedicated to Hubert Lynes, 1874-1942, Rear-Admiral, retired 1922, botanical collector in Sudan and Morocco. See *Sudan Notes and Rec.* 119-137. 1921; H. Lynes, "On the birds of north and central Darfur, with notes on the west-central Kordofan and north Nuba provinces of British Sudan." *Ibis*, ser 11, 6: 399-446. 1924; Hubert Lynes, "Contribution to the ornithology of the southern Congo-basin. Lynes-Vincent tour of 1933-1934." *Rev. Zool. Bot. Afr.* 31: 1-129. 1938)

Nigeria, Kenya, Yemen, Sudan, Ethiopia. Perennial, tufted, leafy, erect or geniculately ascending, leaf blades flat and acute, narrow cylindrical inflorescence glabrous to hairy or sparsely pilose, spikelet clusters erect, clusters with pubescent peduncle, involucre bracts elliptic and pilose, lower lemma glabrous or ciliate, low seed production, grain used as a famine-food, low grazing value, a weed of arable land, found on rocky hillsides, dry rocky sites, dry sandy and gravelly soils, sandstone, fallows, open hills, sometimes confused with *Antheophora pubescens* Nees, see *Flora of Tropical Africa* 9: 937-938. 1930.

in Niger: dîrî, dyri, diriol, sangitia, zangitiya

in Nigeria: kashin bera

A. pubescens Nees (*Antheophora abyssinica* A. Rich.; *Antheophora cenchroides* (Hochst.) K. Schum. ex Engl.; *Antheophora hochstetteri* Nees ex Hochst.; *Antheophora hochstetteri* Nees; *Antheophora kotschy* Hochst.; *Hypudaerus cenchroides* Hochst.)

Tropical and South Africa. Perennial, erect, tufted to densely tufted, simple, unbranched, leafy, tussock grass, leaf blades usually shortly pubescent, leaf sheath usually round, ligule a papery membrane, shortly rhizomatous with strong creeping rhizome, leaves often curling when old, inflorescence a silky-hairy spike, spikelets clusters densely packed, clusters with bearded peduncle, involucre bracts lanceolate and densely villous, lower glumes shortly awned or acuminate, lower lemma ciliate, grain used as a famine-food, pasture grass, forage, usually very palatable, excellent drought resistance, useful to reduce soil erosion, occurs in undisturbed dry veld areas, hillsides, slopes, well-drained ground, rocky sites, deciduous bushland, low rainfall sandy areas, savannah, grassland, in dry areas, sandy soils, see *Flora Africae Australioris Illustrationes Monographicae* 1: 74. 1841, *Flora* 27: 249-250. 1844, *Tentamen Florae Abyssinicae* ... 2: 389. 1850, *Die Pflanzenwelt Ost-Afrikas* 50: 99. 1895 and *Vierteljahrsschrift der Naturforschenden Gesellschaft in Zürich* 56: 70. 1911.

in English: bottle brush grass, cat's tail grass, wool grass

in South Africa: bloubuffelsgras, borsel, borseltjiegras, krulblaargras, wolgras, kruggras

A. ramosa Goossens

South Africa. Perennial, tufted, shrub-like, branching from the base, leaf blade with thickened margins, ligule membranous, spikelets hairy, lower glume acute, good pasture, common in rocky places, stony sites, hillsides, see *Transactions of the Royal Society of South Africa* 20: 192, f. 1. 1932.

in South Africa: vertakte borseltjiegras, verzweigtes kruggras

A. schinzii Hack. (*Antheophora undulatifolia* Hack.)

South Africa. Annual, tufted, each culm with an inflorescence, leaf blade soft with wavy margins, ligule membranous, inflorescence a spike with long hairs, spikelets in group of five, lower glumes convex and curved, pioneer grass, pasture, tender and palatable, found on sandy soils, disturbed soil, see *Verhandlungen des Botanischen Vereins für die Provinz Brandenburg und die angrenzenden Länder* 30: 139. 1888, *Bulletin de l'Herbier Boissier* 4(App. 3): 12. 1896.

in English: annual wool grass

in South Africa: eenjarige borseltjiegras, einjähriges kruggras

A. truncata Robyns (*Antheophora gracilis* Stapf & C.E. Hubb.)

Zimbabwe. Savannah, old fields, see *Bulletin du Jardin Botanique de l'État* 9(3): 198. 1932, *Bulletin of Miscellaneous Information Kew* 1933: 271. 1933.

Anthipsimus Raf. = *Muhlenbergia* Schreb.

Chloridoideae, Cynodonteae, Muhlenbergiinae, type *Anthipsimus gonopodus* Raf., see *Genera Plantarum* 44. 1789, *Systema Naturae ... editio decima tertia, aucta, reformata* 2: 171. 1791, C.S. Rafinesque, in *Jour. Phys. Chim. Hist. Nat. et des Arts* 89: 105. 1819 and *Contributions from the United States National Herbarium* 41: 143-173. 2001.

Anthistiria L.f. = *Themeda* Forssk.

From the Greek *anthistemi* "to stand against, to resist, compare" (*anti* "against" and *istemi* "to stand"), or from *anthes-terion*, the eighth month of the Attic year, when *anthes-teria*, the Feast of Flowers, was held.

Panicoideae, Andropogoneae, Anthistiriinae, type *Anthistiria ciliata* L.f. (for *Andropogon quadrivalvis* L.), see *Flora Aegyptiaco-Arabica* 178. 1775, *Nova Graminum Genera* 35. 1779, *Supplementum Plantarum* 113. 1781 [1782] and *Contributions from the United States National Herbarium* 46: 613. 2003.

Anthochloa Nees & Meyen

From the Greek *anthos* "a flower" and *chloe, chloa* "grass."

About 1 species, South America, high Andes. Meliceae, or Pooideae, Poodae, Poeae, Poinae, perennial, low to dwarf, caespitose, forming small tufts, herbaceous, auricles absent, leaf blades narrow and linear, ligule an unfringed membrane, plants bisexual, contracted inflorescence paniculate, panicles partially included in the sheaths, spikelets several-flowered and shortly pedicellate, female and sterile florets distally in the spikelet, lower florets hemaphrodite and the uppermost sterile, 2 glumes subequal, lemmas toothed, palea 3-lobed and 2-keeled, 2 free and membranous lodicules, 3 stamens, ovary glabrous, 2 stigmas, growing in high-Andean punas, grasslands, moist soil, gravel, open habitats, high mountains, rocky slopes, type *Anthochloa lepidula* Nees & Meyen, unstable classification, see Franz Julius Ferdinand Meyen (1804-1840), *Reise um die Erde 2*: 14. 1834 and *Gayana, Botánica* 8: 11-15. 1963, *Contributions from the United States National Herbarium* 48: 111. 2003.

Species

A. lepidula Nees & Meyen (*Anthochloa lepidula* Nees & Meyen; *Anthochloa rupestris* J. Rémy)

Bolivia, Chile, Peru. See *Gramineae* 122. 1841, *Annales des Sciences Naturelles; Botanique, sér. 3* 6: 347. 1846.

Anthopogon Nutt. = *Gymnopogon* P. Beauv.

From the Greek *anthos* “flower” and *pogon* “beard,” referring to the hairy tube of the corolla.

Chloridoideae, Cynodonteae, see *Essai d'une Nouvelle Agrostographie* 41, 164. 1812, *The Genera of North American Plants* 1: 81. 1818, *Preliminary Catalogue of Anthophyta and Pteridophyta Reported as Growing Spontaneously within One Hundred Miles of New York* 69. 1888 and *Iowa State College Journal of Science* 45(3): 319-385. 1971, *Flora Mesoamericana* 6: 290. 1994, *Contributions from the United States National Herbarium* 41: 124-127. 2001.

Anthosachne Steud. = *Elymus* L.

From the Greek *anthos* “flower” and *achne* “chaff, glume.”

Pooideae, Triticeae, Hordeinae, type *Anthosachne australasica* Steud., see *Species Plantarum* 1: 83-84. 1753, Ernst Gottlieb von Steudel (1783-1856), *Synopsis plantarum glumacearum*. 1: 237. Stuttgartiae 1854 and *Canad. J. Bot.* 42: 554. 1964, *Novosti Sist. Vyss. Rast.* 10: 25. 1973, *Blumea* 34: 61-76. 1989, *Taxon* 41: 562-563. 1992, *Taxon* 44: 611-612. 1995, *Contributions from the United States National Herbarium* 48: 279-307. 2003.

Anthoxanthum L. = *Ataxia* R. Br., *Dimesia* Raf., *Disarrenum* Labill., *Flavia* Fabr., *Flavia* Heister ex Fabricius, *Foenodorum* Krause, *Hierochloe* R. Br., *Savastana* Schrank, *Savastana* Raf. (Melastomataceae), *Torresia* Ruiz & Pav., *Xanthonanthos* St.-Lag., *Xanthonanthus* St.-Lager

From the Greek *anthos* “flower” and *xanthos* “yellow,” the mature spikelets are yellowish.

About 15-25 species, temperate Asia and Africa, tropical mountains. Pooideae, Poodae, Aveneae, or Pooideae, Poeae, Phalaridinae, annual or perennial, slender, cylindrical, herbaceous, unbranched, ascending to erect, caespitose or decumbent, internodes hollow, leaf blades linear to lanceolate, no auricles, leaf sheath rounded, ligule membranous, leaves flat and more or less basal, rhizomes short or absent, plants bisexual, panicle contracted to spiciform, dense spike-like panicle erect, spikelets lanceolate and sessile, 3 florets per spikelet, the lower 2 florets sterile or male and reduced to empty lemmas, uppermost floret bisexual, 2 glumes unequal and papery, lower glume 1-veined, upper glume 3-veined, sterile floret lemmas papery and awned, fertile floret lemmas stiff and unawned, sterile lemmas longer than fertile, palea present, lodicules absent, stamens 2 or 3 in bisexual florets, ovary glabrous, stigmas pubescent, strongly sweetly coumarin scented, weed species, occurs in sunlight or shade, meadows, grasslands, hill pasture and heath, open habitats, very unstable classification, the genus is in great need of revision, sometimes including *Hierochloe* R. Br., type *Anthoxanthum odoratum* L., see *Species Plantarum* 1: 28. 1753, *Genera Plantarum*. edition 5. 17. 1754, *Enumeratio Methodica Plantarum* 206. 1759, *Baiersche Flora* 1: 100, 337. 1789, *Flora Peruviana, et Chilensis Prodromus* 125. 1794, *Systema Vegetabilium Florae Peruviana, et Chilensis* 1: 251. 1798 [authors: José Antonio Pavón (1754-1840) and Hipolito Ruiz Lopez (1754-1815)], *Novae Hollandiae Plantarum Specimen* 2: 82-83, f. 232. 1807, *Prodromus Florae Novae Hollandiae* 208. 1810, *Essai d'une Nouvelle Agrostographie* 62, 164, t. 12, f. 5. 1812, *American monthly magazine and critical review* 1: 442. 1817, *Chloris Melvilliana* 35. 1823, *Révision des Graminées* 1: 22. 1829, *Sylva Telluriana* 100. 1838, *Annales de la Société Botanique de Lyon* 7: 119. 1880, *Annales de la Société Botanique de Lyon* 8: 189. 1881, *Botanical Magazine* 11: 443. 1897, *Flora Capensis* 7: 466. 1899 and *Die Naturwissenschaften; Wochenschrift für die Fortschritte der Reinen ...* 10: 220. Species

A. alpinum Á. Löve & D. Löve (*Anthoxanthum alpinum* Schur; *Anthoxanthum odoratum* subsp. *alpinum* (Á. Löve & D. Löve) Hultén; *Anthoxanthum odoratum* subsp. *nipponicum* (Honda) Tzvelev)

Europe, Scandinavia. See *Enumeratio Plantarum Transsilvaniae* 725. 1866 and *Botanical Magazine* 40: 317. 1926,

Kongliga Svenska Vetenskaps Akademiens Handlingar 7: 9. 1958.

in English: sweet vernal grass

A. altissimum (Steud.) Veldkamp (*Hierochloe altissima* Steud.)

America, Chile. See *Synopsis Plantarum Glumacearum* 1: 13. 1854 and *Blumea* 30(2): 347. 1985.

A. amarum Brot. (*Anthoxanthum odoratum* var. *amarum* (Brot.) Trin.)

Portugal, Europe. Perennial, damp places, see *Flora Lusitana* 1: 32. 1804, *Species Graminum* 1: t. 15. 1824.

A. arcticum Veldkamp (*Hierochloe pauciflora* R. Br.; *Hierochloe pauciflora* f. *pauciflora*; *Hierochloe pauciflora* f. *setigera* Lepage)

America. See *Chloris Melvilliana* 35. 1823 and *Nature Canada* 81: 255. 1952, *Blumea* 30(2): 349. 1985.

A. aristatum Boiss. (*Anthoxanthum angustifolium* Planellas Giralt; *Anthoxanthum aristatum* Boiss. subsp. *puelii* (Lecoq & Lamotte) Pinto da Silva; *Anthoxanthum carrenianum* Parl.; *Anthoxanthum lloydii* Jord. ex Boreau; *Anthoxanthum odoratum* subsp. *aristatum* (Boiss.) Trab.; *Anthoxanthum odoratum* var. *aristatum* (Boiss.) Coss. & Durieu; *Anthoxanthum odoratum* var. *puelii* (Lecoq & Lamotte) Coss. & Durieu; *Anthoxanthum ovatum* subsp. *aristatum* (Boiss.) Litard.; *Anthoxanthum ovatum* var. *aristatum* (Boiss.) Pérez Lara; *Anthoxanthum puelii* Lecoq & Lamotte; *Anthoxanthum puelii* var. *lloydii* (Jord. ex Boreau) Marais & Menier) (after the French botanist Timothée Puel, 1812-1890, physician, wrote *Catalogue des plantes vasculaires qui croissent dans le département Lot*. Cahors 1845-1853; see J.H. Barnhart, *Biographical notes upon botanists*. 3: 114. 1965; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. 1917-1933; J.T. Timothée Puel, *Essai sur les causes locales de la différence de taille qu'on observe chez les habitants des deux cantons de Latronquièrre et de Livernon*. in Collection des thèses soutenues à la Faculté de Médecine de Paris. an 1839-1878. Paris 1839-1878)

Europe, Mediterranean. Annual, herbaceous, aromatic, caespitose, slender or filiform, glabrous or slightly hairy, erect or spreading, often much branched above and rooting at the lower nodes, upper blades softly hairy, leaf sheaths not keeled and submembranous, leaves nonauriculate, ligule membranous, a short panicle erect and spike-like, hermaphrodite florets 1 per spikelet, proximal incomplete florets 2 per spikelet, awn of lower floret more or less straight, awn of second floret geniculate, glumes unequal and glabrous, lodicules absent, ovary glabrous, fruit compressed, meadow grass, cultivated and occasionally escaped, weed species of cultivated and wasteland, disturbed sites, in open habitats, see *Species Plantarum* 1: 28. 1753, *Voyage botanique dans le midi de l'Espagne* 2: 638. 1842, *Catalogue Raisonné des*

Plantes Vasculaires du Plateau Central de la France 385. 1847, *Flore du Centre de la France* éd. 2 2: 576. 1849, *Ensayo de una Flora fanerogámica Gallega* 398. Santiago 1852, *Exploration Scientifique de l'Algérie* 2: 21-22. 1854, *Flore du Centre de la France* 2: 697. 1857, *Bulletin de la Société Botanique de France* 24: 381. 1877, *Anales de la Sociedad Española de Historia Natural* 15: 382. 1886 and *Candollea* 7: 231. 1937, *Agronomia Lusitana* 333(18): 1. 1971.

in English: small sweet vernal grass, sweet vernal grass, annual vernal grass

in Danish: enårig gulaks

in Finnish: Vihnesimake

in Spanish: antoxanto aristado

in French: flouve annuelle, flouve de Puel

A. aristatum Boiss. subsp. **aristatum**

Europe. See *Voyage botanique dans le midi de l'Espagne* 2: 638. 1839-1845.

A. aristatum Boiss. subsp. **macranthum** Valdez (*Anthoxanthum odoratum* f. *macranthum* (B. Valdez) G. López)

Europe, Spain, Italy. See *Lagascalia* 3(1): 130. 1973, *Anales del Jardín Botánico de Madrid* 51(2): 312. 1993[1994].

A. brevifolium Stapf

South Africa. Perennial, tufted, rhizomatous, very similar and confused with *Anthoxanthum ecklonii* (Nees ex Trin.) Stapf, see *Bulletin of Miscellaneous Information Kew* 1910: 59. 1910.

A. davidsei (R.W. Pohl) Veldkamp (*Hierochloe davidsei* R.W. Pohl)

America, Costa Rica. Páramos, see *Iowa State Journal of Research* 47: 71, f. 1. 1972, *Blumea* 30(2): 347. 1985.

A. dregeanum (Nees ex Trin.) Stapf (*Anthoxanthum dregeanum* (Nees) Stapf; *Hierochloe dregeana* Nees ex Trin.)

South Africa. Perennial, tufted, rhizomatous, rigid leaves, lower glume 3-nerved, common in mountain, mountain slopes, very similar to *Anthoxanthum tongo* (Nees ex Trin.) Stapf, see *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 5,3(3): 83. 1839, *Flora Capensis* 7: 466-467. 1899.

A. ecklonii (Nees) Stapf (*Anthoxanthum ecklonii* (Nees ex Trin.) Stapf; *Hierochloe ecklonii* Nees)

South Africa. Perennial, loosely or densely tufted, strongly aromatic, forming loose clumps, rhizomatous, stoloniferous, bulbous base, ligule an unfringed membrane, leaves soft and scabrid, inflorescence spicate contracted, lower glume 1-nerved, lower lemma brown, common in moist

places, streamsides, mountain slopes, shade, similar to *Anthoxanthum odoratum* L., see *Flora Capensis* 7: 466. 1899.

in South Africa: leshomo, lethu

A. gracile Bivona

Mediterranean. Annual, silvery-gray, loose tussocks, leaf blades downy and arching, ovate panicle of flowers, see *Stirpium Rariorum Minusque Cognitarum in Sicilia* ... 1: 13, t. 1, f. 2. Palermo 1813[1816].

A. gunckelii (Parodi) Veldkamp (*Hierochloe gunckelii* Parodi) (for Luer Hugo Gunckel (1901-1997), author of "Nombres indígenas de plantas chilenas." *Bol. Filol.* 11: 191-327. 1960, *Contribución al conocimiento de la flora valdiviana: botánica miscelánea: sexta contribución.* Santiago 1933, "Breve historia del antiguo jardín botánico de la Quinta Normal de Santiago de Chile." *Farm. Chilena* 24(12): 537-542. 1950 and "Fitonimia Atacameña, especialmente cunza." *Revista Universitaria*, Santiago 30, 1967. Trans.* 1864-1865: 132. 1866, *Grasses of North America for Farmers and Students* 2: 187. 1896 and *American Journal of Botany* 2: 300. 1915, *Blumea* 30(2): 348. 1985, *Harvard Papers in Botany* 1(9): 66. 1996.

A. odoratum L. (*Anthoxanthum odoratum* subsp. *odoratum*; *Anthoxanthum odoratum* var. *altissimum* Eaton; *Anthoxanthum pilosum* Döll; *Anthoxanthum villosum* Dumort.; *Hierochloe odorata* (L.) P. Beauv.; *Xanthanthos odoratum* (L.) St.-Lag.)

Europe, temperate Asia, northwest Africa. Perennial bunchgrass, herbaceous, fragrant, bitter-tasting, simple, erect or ascending or spreading, glabrous, slender or robust, small, loosely or densely tufted, roots quite shallow, leaf sheaths

firmly encircling the culm, auricles absent or reduced, ligule membranous and truncate, upper blades slightly ciliate, dense panicle spike-like green or purple and erect, chasmogamous, glumes unequal and rough or villous or glabrous, lower glume 1-nerved, lowest 2 florets sterile and with lemma pubescent and dark, uppermost floret bisexual and with smooth lemma, awns geniculate or straight, ovary glabrous, stigmas white, sweetly or strongly scented when the green blades are dried, yields essential aromatic oil, reproduces by seeds dispersed by wind, fodder grass, forage, cultivated in hay fields and widely naturalized in temperate regions, not palatable, little food value, weed and aggressive species but is not considered a major weed pest, very resistant to cold and heat, good resistance to drought, provocative of hay asthma, it produces a lot of pollen and is a major irritant to people who suffer from hay fever, in Europe inhalation of grass pollen is the predominant cause of hay fever and related hypersensitivity reactions, a useful expectorant when made up into gargles and sprays, used also as hair tonic and scalp cleanser, forms extensive ground cover in open mesic and dry habitats at high elevations, in a great variety of habitats and on a wide range of soils, invades disturbed areas, found in mixed pastures and meadows, open fields, along roadsides, waste places, woods, in damp sites, herbaceous swamp, hill pasture and heath, fields, moors, boggy sites, clay soils, similar to *Anthoxanthum ecklonii* (Nees) Stapf, see *Species Plantarum* 1: 28. 1753, *Essai d'une Nouvelle Agrostographie* 62, 164, t. 12, f. 5. 1812, *Manual of the Flora of the Northern States and Canada* 10. 1817, *Observations sur les Graminées de la Flore Belgique* 129, t. 10, f. 38. 1823, *Rheinische Flora* 122. 1843, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* edition 3 11: 17. 1873, *Annales de la Société Botanique de Lyon* 7: 119. 1880 and *Handb. A. tongo (Nees ex Trin.) Stapf (*Anthoxanthum tongo* (Trin.) Stapf; *Ataxia tongo* Nees ex Trin.)

South Africa. Perennial, tufted, straggling, leaves filiform, contracted panicle, lower glume 3- to 5-nerved, in damp sites, moist shady places, very similar to and not clearly distinguished from *Anthoxanthum dregeanum* (Nees ex Trin.) Stapf, see *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 5,3(3): 78. 1839, *Flora Capensis* 7: 467-468. 1889 and *Bothalia* 18: 114-119. 1988.

A. utriculatum (Ruiz & Pav.) Y. Schouten & Veldkamp
America.

Antichloa Steud. = *Bouteloua* Lag.,
Chondrosium Desv.

From the Greek *anti* “for, in place of, against” and *chloe*, *chloa* “grass.”

Chloridoideae, Cynodonteae, Boutelouinae, see *Varietades de Ciencias, Literatura y Artes* 2(4,21): 134, 141. 1805, *Nouveau Bulletin des Sciences, publié par la Société Philomatique de Paris* 2: 188. 1810, *Nomenclator Botanicus. Editio secunda* 1: 108. 1840 and *Contributions from the United States National Herbarium* 41: 20-33. 2001.

Antinoria Parl.

Two species, Mediterranean. Pooideae, Poodae, Aveneae, annual or perennial, herbaceous, tufted, erect, decumbent, auricles absent, narrow linear leaf blades, ligule an unfringed membrane, plants bisexual, open inflorescence paniculate with divaricate branchlets, spikelets pedicellate, upper floret stipitate, 2 glumes subequal, lemmas membranous, palea 2-keeled, 3 stamens, ovary glabrous, 2 stigmas, found in damp places, see *Species Plantarum* 1: 63-66. 1753, *Flora Palermitana* 1: 92, 94-95. 1845 and *Flora Sicula* 3: 294. 1909.

Species

A. agrostidea (DC.) Parl. (*Airopsis agrostidea* var. *annua* Lange; *Airopsis agrostidea* var. *natans* Hack.; *Antinoria agrostidea* f. *annua* (Lange) P. Silva; *Antinoria agrostidea* f. *genuina* P. Silva; *Antinoria agrostidea* subsp. *annua* (Lange) P. Maire; *Antinoria agrostidea* var. *natans* (Hack.) Richter; *Antinoria agrostidea* var. *perennis* Maire; *Poa agrostidea* DC.)

Sicily. Annual, floating, see *Syn. Gall.* 132. 1806, *Flore Française. Troisième Édition* 5: 262. 1815, *Catalogue Raisonné des Graminées de Portugal* 17. 1880, *Plantae Europaeae* 1: 54. 1890 and *Bulletin de la Société d'Histoire Naturelle de l'Afrique du Nord* 20: 41. 1929, *Agronomia Lusitana* 8: 8-9. 1946 [Estação Agronómica Nacional, Portugal], *Agronomia Lusitana* 40(1): 5. 1980, *Boletim da Sociedade Broteriana, ser. 2* 63: 29-66. 1990.

in Italian: nebbia di Antinori

in French: antinorie fausse-agrostide, la canche faux agrostis

A. insularis Parl. (*Aira insularis* (Parl.) Woods; *Aira insularis* (Parl.) Boiss., nom. illeg., non *Aira insularis* (Parl.)

Woods; *Airopsis insularis* (Parl.) Nyman; *Antinoria agrostidea* var. *insularis* (Parl.) Maire)

Mediterranean, Sicily. Erect, glabrous, geniculate, fibrous roots, ligule lancolate, branched panicle, glume scabrous, see *Flora Palermitana* 1: 94. 1845, Joseph Woods (1776-1864), *The Tourist's Flora* 403. London 1850, *Médecine Traditionnelle et Pharmacopée* 411. 1854-1855, *Flora Orientalis* 5: 528. 1884 and *Bulletin de la Société d'Histoire Naturelle de l'Afrique du Nord* 20: 41. 1929.

in French: antinorie insulaire, antinorie des îles

Antitragus Gaertn. = *Crypsis* Aiton

Greek *anti* “against” and *tragos* “a billy-goat, he-goat,” genus *Tragus*.

Chloridoideae, Cynodonteae, Sporobolinae, or Chloridoideae, Zoysieae, Sporobolinae, type *Crypsis aculeata* (L.) Aiton, see *Hortus Kewensis; or, a catalogue ...* 1: 48. 1789, *De Fructibus et Seminibus Plantarum ...* 2: 7, t. 80. 1790 and *Contributions from the United States National Herbarium* 41: 56-57. 2001.

Antonella J.A. Caro = *Tridens* Roem. & Schult.

Chloridoideae, Cynodonteae, type *Antonella nicorae* (Anton) Caro, see *Syn. Pl.* 2: 9. Nov 1806 [1807], *Essai d'une Nouvelle Agrostographie* 77, f. 15. 1812, *Systema Vegetabilium* 2: 34, 599. 1817 and *Kurtziana* 10: 51, f. 1. 1977, *Dominguezia* 2: 18-20. 1981, *Contributions from the United States National Herbarium* 41: 16, 121-122, 224-230, 239. 2001.

Antoschmidtia Boissier = *Schmidtia* Steud.
ex J.A. Schmidt

In honor of the German botanist Johann Anton Schmidt, 1823-1905, professor of botany, traveler, plant collector, 1851 Capo Verde Islands, author of *Beiträge zur Flora der Cap Verdischen Inseln*. Heidelberg 1852 and *Flora von Heidelberg*. Heidelberg 1857, and contributor to C.F.P. von Martius, *Flora Brasiliensis* (Labiatae, Scrophulariaceae, Phytolaccaceae, Nyctaginaceae, Plumbaginaceae, Plantaginaceae); see David Porter (1780-1843), *Journal of a Cruise Made to the Pacific Ocean ... in the United States Frigate Essex, in the Years 1812, 1813, and 1814*. Containing descriptions of the Cape Verd [*sic*] Islands, etc. Philadelphia 1815; J.H. Barnhart, *Biographical notes upon botanists*. 3: 232. 1965; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*.

353. 1972; Ethelyn Maria Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933.

See *Beiträge zur Flora der Cap Verdischen Inseln* 144-145. 1852, *Transactions of the Linnean Society of London, Botany* 2: 31. 1881, *Flora Orientalis* 5: 559. 1884 and *Flora Capensis* 7: 658. 1900, *Bothalia* 2: 421, 423. 1928, *Reperitorium Specierum Novarum Regni Vegetabilis, Beihefte* 40(1): 307. 1931, *Annals of the Transvaal Museum* 16: 405. 1935.

Apera Adans. = *Anemagrostis* Trin.

Greek *aperos* “unmaimed,” referring to the vestigial florets.

About 3 species, Eurasia, Europe, Afghanistan. Pooideae, Poodae, Aveneae or Pooideae, Poeae, Agrostidinae, annual, herbaceous, tufted, hollow, auricles absent, narrow leaf blades, ligule an unfringed membrane, plants bisexual, panicle open or contracted, spikelets with rachilla extension, 2 glumes unequal, lemma membranous long-awned, palea present, 2 free membranous lodicules, 3 stamens, ovary glabrous, 2 stigmas, agricultural weed species, waste ground, open habitats, old fields, arable land, dry sandy soils, type *Apera spica-venti* (L.) P. Beauv., see *Species Plantarum* 1: 61-63, 73-76. 1753, *Familles des plantes* 2: 495. 1763, *Genera Plantarum* 44. 1789, *Essai d'une Nouvelle Agrostographie* 31, 151. 1812, *Fundamenta Agrostographiae* 128-129, t. 11. 1820, *Observations sur les Graminées de la Flore Belgique* 127, 128. 1823 [1824] and *U.S. Dept. Agric. Bull.* 772: 127. 1920, Oscar R. Matthei, “La presencia del genero *Apera* (Gramineae) en Chile.” *Bol. Soc. Biol. Concepción* 48: 161-163. 1974, *Preslia* 51(3): 213-237. 1979, *Newslett. Int. Organ. Pl. Biosyst. (Oslo)* 26/27: 25-26. 1997, *Opera Botanica* 137: 1-42. 1999, *Taxon* 49(2): 243. 2000, *Contributions from the United States National Herbarium* 48: 115. 2003.

Species

***A. intermedia* Hack.**

Asia, Eurasia. Found in gray sandy loam, shallow soil, around saline seep, see *Annalen des K. K. Naturhistorischen Hofmuseums* 20: 430. 1905, Albert Bruce Jackson (1876-1947), “*Apera intermedia* as an alien in Britain.” *Ann. Scot. Nat. Hist.* 1907.

***A. interrupta* (L.) P. Beauv.** (*Agrostis interrupta* (L.) Bubani; *Agrostis anemagrostis* subsp. *interrupta* (L.) Syme; *Agrostis interrupta* L.; *Agrostis spica-venti* subsp. *interrupta* (L.) Hook.f.; *Agrostis spica-venti* var. *interrupta* (Gaertner, Meyer & Scherbius) G. Mey.; *Anemagrostis interrupta* (L.) Trin.; *Apera spica-venti* var. *interrupta* (L.) Beal; *Muhlenbergia interrupta* (L.) Steud.)

Asia, Europe. Annual, see *Systema Naturae, Editio Decima* 2: 872. 1759, *Oekonomisch-Technische Flora der Wetterau* 1: 88. Frankfurt am Main 1799, *Essai d'une Nouvelle Agrostographie* 31, 151. 1812, *Fundamenta Agrostographiae* 129. 1820, *Chloris Hanoverana* 655. 1836, *Synopsis Plantarum Glumacearum* 1: 177. 1854, *The Student's Flora of the British Islands* 432. 1870, *English Botany* edition 3 11: 43-44. 1873, *Grasses of North America for Farmers and Students* 2: 357. 1896 and *Flora Pyrenaea* ... 4: 289. 1901, *Bulletin de la Société Botanique de France* 74: 406. 1927. in English: dense silky-bent, interrupted wind grass

***A. spica-venti* (L.) P. Beauv.** (*Agrostis anemagrostis* Syme; *Agrostis anemagrostis* subsp. *spica-venti* (L.) Syme; *Agrostis gracilis* Salisb.; *Agrostis spica-venti* L.; *Agrostis ventosa* Dulac; *Anemagrostis spica-venti* (L.) Trin.; *Apera longiseta* Klokov; *Festuca spica-venti* (L.) Raspail; *Muhlenbergia spica-venti* (L.) Trin.)

Eurasia, Asia, Europe. Annual, herbaceous, weed, found in ballast and waste ground, meadows, see *Prodromus stirpium in horto ad Chapel Allerton vigentium*. 25. [London] 1796, *Essai d'une Nouvelle Agrostographie* 31, 151. 1812, *Fundamenta Agrostographiae* 129, t. 11. 1820, *Annales des Sciences Naturelles; Botanique, sér. 5*: 445. 1825, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 6,4(3-4): 285. 1841, *Flore de Département des Hautes-Pyrénées* 74. 1867, *English Botany* edition 3 11: 43. 1873. in English: loose silky-bent, silky bent grass, common wind grass, wind grass

in French: agrostide jouet-du-vent

Aphanelytrum Hackel

Greek *aphanes* “obscure, inconspicuous, invisible” and *elytron* (*elyo* “to wind”) “a sheath, a cover.”

One species, Ecuador, Colombia, Bolivia. Pooideae, Poeae, Poinae, or Pooideae, Poodae, Poeae, perennial, herbaceous, scrambling, decumbent, leaning, stoloniferous, auricles absent, leaf blades flat and glabrous, ligule an unfringed membrane, plants bisexual, lax inflorescence paniculate, rachilla internodes filiform, spikelets 2-3-flowered and pedicellate, 2 glumes vestigial, lemmas herbaceous and keeled, palea present, 2 free and membranous lodicules, 3 stamens, ovary glabrous, 2 stigmas, montane forests, moist places, shade, type *Aphanelytrum procumbens* Hack., see *Essai d'une Nouvelle Agrostographie* 39, 155. 1812, *Anales de la Universidad Central del Ecuador* 3(25): 480. 1889 and *Österreichische Botanische Zeitschrift* 52: 12-13. 1902, A. Chase, “The structure of spikelets of *Aphanelytrum*.” *Botanical Gazette* 61: 340-343. 1916, *Arnaldoa* 8(2): 53-56. 2002, *Contributions from the United States National Herbarium* 48: 115. 2003.

Species

A. procumbens Hack. (*Aphanelytrum decumbens* Hack. ex Sodiro; *Brachyelytrum procumbens* (Hack.) Hack.)

South America. Perennial, delicate, branched, smooth or scabrous, leaf blades linear, panicle oblong, spikelets erect or pendulous, lemmas lanceolate and acuminate.

Aplexia Raf. = *Leersia* Sw., *Leersia* Sol. ex Sw.

Greek *aplektos* “unplaited,” *a* “negative” and *plektos* “twisted, plaited,” *pleko* “to twist, enfold.”

Ehrhartoideae, Oryzeae, Oryzinae, type *Leersia virginica* Willd., see *Nova Genera et Species Plantarum seu Prodromus* 1, 21. 1788, *Species Plantarum. Editio quarta* 1(1): 325. 1797, C.S. Rafinesque, *Neogenyton* 4. 1825, *Index Kewensis* 1: 162. 1893 and E.D. Merrill, *Index rafinesquianus* 74, 75. 1949, *Annals of the Missouri Botanical Garden* 74: 432-433. 1987, *Contributions from the United States National Herbarium* 39: 64-67. 2000.

Aplocera Raf. = *Ctenium* Panzer

Greek *haplos* “simple, single” and *keras* “horn,” possibly referring to the genus *Monocera* Elliott.

Chloridoideae, Cynodonteae, see *Flora Caroliniana, secundum ...* 249. 1788, *Ideen zu einer künftigen Revision der Gattungen der Gräser*. 38, 61. 1813, *Denkschriften der Bayer[ischen]. Botanischen Gesellschaft in Regensburg* 4: 311, t. 13, f. 1-2. 1813 [1814], *Sketch Bot. S. Carolina* 1(2): 176. 1816, *Medical Flora* 2: 193. 1830, *A Class-book of Botany* 806. 1861 and E.D. Merrill, *Index rafinesquianus* 74. 1949, *Contributions from the United States National Herbarium* 41: 57-58. 2001.

Apluda L. = *Calamina* P. Beauv.

From the Latin name *apluda* (*appl-*) *ae* for chaff or bran, alluding to the involucre, or to the spikelets.

One species, tropical Asia. Panicoideae, Andropogonodae, Andropogoneae, Andropogoninae, or Panicoideae, Andropogoneae, Ischaeminae, perennial, rambling, woody, leafy, more or less glaucous, often scrambling or decumbent and rooting at the nodes, auricles absent, leaf sheath short, ligule an unfringed membrane, leaf blades linear-lanceolate and often falsely petiolate, plants bisexual, inflorescence racemose, large terminal open compound panicle, naviculate to boat-shaped spathe, raceme comprising 1 sessile and 2 pedicelled spikelets, central sessile branch composed of a fertile floret with a male floret below it, sessile spikelets awned or not, pedicellate spikelets unawned, lower floret staminate,

upper floret hermaphrodite, 2 glumes more or less equal and more or less leathery or thin, lemmas membranous, palea reduced to a membranous scale, 2 lodicules free and fleshy, stamens 2-3, ovary glabrous, 2 stigmas, a good fodder when young suitable for all classes of animals, good hay and silage, stalks used for making hats, growing at the edge of woodlands and in hedges, thickets, on moist or dry stony soils, forest margins, type *Apluda mutica* L., see *Species Plantarum* 1: 82. 1753, *Genera Plantarum* edition 5. 35. 1754, *Essai d'une Nouvelle Agrostographie* 128, 157. 1812 and *Flora of Tropical Africa* 9: 5. 1917, *Phytologia* 10(5): 321-406. 1964, *Journal of Cytology and Genetics* 15: 51-57. 1980, M. Lazarides, “The tropical grasses of Southeast Asia (excluding bamboos).” *Phanerogamarum Monographiae* 12: 1-225. Vaduz 1980, *Journal of Cytology and Genetics* 20: 205-206. 1985, *Journal of Cytology and Genetics* 25: 140-143, 322-323. 1990, *Regnum Veg.* 127: 20. 1993, *Annals of the Missouri Botanical Garden* 81(4): 775-783. 1994, *Contributions from the United States National Herbarium* 46: 68-69. 2003.

Species

A. mutica L. (*Andropogon aristatus* (L.) Raspail, nom. illeg., non *Andropogon aristatus* Poir.; *Andropogon glaucus* Retz.; *Andropogon glaucus* Torr., nom. illeg., non *Andropogon glaucus* Retz.; *Andropogon glaucus* Muhl., nom. illeg., non *Andropogon glaucus* Retz.; *Apluda aristata* L.; *Apluda cumingii* Büse ex de Vriese; *Apluda geniculata* Roxb.; *Apluda gigantea* (P. in Thailand: ya kom bang, ya phai, ya phrik phran, yaa phai, yaa phrik phraan

Apochaete (C.E. Hubb.) J.B. Phipps = *Tristachya* Nees

From the Greek *apo* "away, being away from, lack of" and *chaite* "bristle."

Panicoideae, Arundinelleae, type *Apochaete hispida* (L.f.) J.B. Phipps, see *Supplementum Plantarum* 111. 1781 [1782], *Flora Brasiliensis seu Enumeratio Plantarum* 2: 458. 1829, *Die Pflanzenwelt Ost-Afrikas* 109. 1895, *Bulletin de la Société d'Histoire Naturelle d'Autun* 8: 374. 1895 and *Bulletin of Miscellaneous Information Kew* 1936(5): 322.

1936, *N. Amer. Flora* 17(8): 578. 1939, *Bulletin de la Société Botanique de Belgique* 90: 187. 1958, *Kirkia* 4: 105. 1964, *Kirkia* 5: 235-258. 1966, *Boletim da Sociedade Broteriana, ser. 2* 41: 198. 1967, *Kew Bulletin* 21(1): 119-124. 1967, *Kew Bulletin* 26(1): 111-123. 1971, *Flora Mesoamericana* 6: 378. 1994, *Contributions from the United States National Herbarium* 46: 627-628. 2003.

Apochiton C.E. Hubb.

From the Greek *apo* "away, being away from, lack of" and *chiton* "a tunic, cover."

One species, tropical East Africa. Chloridoideae, Eragrostideae, annual, herbaceous, unarmed, loosely tufted, erect, decumbent, auricles absent, ligule membranous and fringed, narrow linear leaf blades, plants bisexual, inflorescence paniculate, spikelets pedicellate, 2 glumes 3-nerved, lemmas silky and awned, palea 2-awned, fleshy lodicules present, 3 stamens, ovary glabrous, 2 stigmas, savannah, open habitats, seasonally wet soils, related to *Triraphis*, type *Apochiton burttii* C.E. Hubb., see *Hooker's Icones Plantarum* 34: t. 3319. 1936.

Species

A. burttii C.E. Hubb. (after the British (b. York) botanist Bernard Dearman Burt, 1902-1938 (d. Tanganyika, Tanzania, killed in air crash), 1933 Fellow of the Linnean Society, cousin of Joseph Burt Davy (1870-1940); see Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 122. London 1994; F.N. Hepper and Fiona Neate, *Plant Collectors in West Africa*. 15. 1971)

Tanzania.

Apoclada McClure

From the Greek *apo* "away, being away from, lack of" and *klados* "a branch," referring to the separate branching.

About 1-2 species, Brazil. Bambusoideae, Bambusodae, Bambuseae, or Bambusoideae, Bambusodae, Guaduiniae, perennial, tufted, tall, sympodial, unarmed, shrub or small tree, solid or hollow, leafy, branch complement 5 subequal, ligule fringed, rhizomes pachymorph, plants bisexual, synflorescences terminal with a single spikelet, spikelets several- to many-flowered, glumes absent or present, palea present, free lodicules, 3-6 stamens, ovary glabrous, 2 plumose stigmas, growing in colonies, open woodland, damp and sunny places, mesic forests, sandy soil, type *Apoclada simplex* McClure et L.B. Smith, see *Flora Illustrata Catarinense Gramíneas* — Suplemento. Bambúseas 1(Gram.-Supl.): 1-78. 1967, *Smithsonian Contributions to Botany* 9: 1-148. 1973, *Systematic Botany* 20(3): 207-223. 1995 [A cladistic analysis and revision of the genus *Apoclada* (Poaceae: Bambusoideae: Bambusodae), by G.F. Guala,

American Bamboos 231-234. 1999, *Bamboo Science and Culture* 14(1): 15-20. 2000, G.F. Guala, "A brief note on the forage value of *Apoclada* species." *Bamboo Science and Culture* 15: 48. 2001, *Bamboo Science and Culture: The Journal of the American Bamboo Society* 17(1): 1-3. 2003.

Species

A. simplex McClure & L.B. Smith (*Apoclada diversa* McClure & L.B. Smith)

Southeastern Brazil. Erect, reedlike, see *Fl. Il. Catarin.* 1(GRAM-Suppl.): 59-62, t. 10, f. s-y. 1967.

Apocopsis Nees = *Amblyachyrum* Steud., *Amblyachyrum* Hochst. & Steud.

Possibly from the Greek *apokope* "cutting off, amputation," *apokopos* "castrated, abrupt."

About 15 species, China, Indomalaysian region, tropical Asia, Myanmar (Burma), India. Panicoideae, Andropogonaceae, Andropogoneae, Andropogoninae, annual or perennial, herbaceous, leaf blades flat and narrow, ligule an unfringed membrane, plants bisexual, inflorescence of 1-3 digitate racemes, imbricate spikelets, racemes paired and solitary, sessile and pedicellate spikelets, sessile spikelet bisexual and deciduous, lowermost spikelets barren and awnless, 2 florets, lower floret male and the upper bisexual, 2 glumes unequal, lower glume chartaceous to coriaceous, upper glume truncate, lemmas awned or not, upper lemma linear and awned, lodicules absent, stamens 2 or absent, ovary glabrous, 2 stigmas, pedicellate spikelets reduced to a little barren pedicel, found in open places, hillsides, damp ground, dry shallow soils, pans, slopes, type *Apocopsis royleanus* Nees, see *Proceedings of the Linnean Society of London* 1: 93-94. 1841, *Synopsis Plantarum Glumacearum* 1: 413. 1854, *Journal of the Linnean Society, Botany* 19: 67. 1881, *Monographiae Phanerogamarum* 6: 259. 1889, *J. Bot. (Morot)* 4: 84. 1890 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 44: 519. 1910, *Bulletin du Muséum d'Histoire Naturelle* 25: 285. 1919, *Blumea* 4(3): 523. 1941, *Kew Bull.* 7: 101-116. 1952, *Thai Forest Bulletin. Botany* 6: 46. 1972, *Taxon* 34: 159-164. 1985.

Species

A. anomalus Bor

Myanmar. See *Kew Bulletin* 12(3): 415. 1958.

A. breviglumis Keng & S.L. Chen

China. See *Acta Phytotaxonomica Sinica* 13(1): 59-60, pl. 3. 1975.

A. burmanicus Narayanaswami ex Bor

Myanmar. See *Kew Bulletin* 1951: 169. 1951.

A. cochinchinensis A. Camus

Vietnam. See *Bulletin du Muséum d'Histoire Naturelle* 25: 286. 1919.

A. collina Balansa (*Apocopsis borneensis* Ridl.; *Apocopsis collinus* Balansa)

Vietnam, Indonesia. Perennial, tufted, see *Journal de Botanique (Morot)* 4: 84. 1890 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 44: 519. 1910.

A. courtallumensis (Steud.) Henrard (*Andropogon courtallumensis* Steud.; *Apocopsis courtallumensis* Henrard; *Apocopsis wightii* Steud.; *Apocopsis wightii* Nees ex Thwaites; *Apocopsis wightii* Nees ex Steud.; *Apocopsis wightii* Nees ex Hack.)

India, Tamil Nadu, Sri Lanka. Perennial, in waste places, often confused with *Apocopsis mangalorensis* (Hochst.) Henrard, see *Synopsis Plantarum Glumacearum* 1: 377. 1854, *Enumeratio Plantarum Zeylanicae* 365. 1864, *Monographiae Phanerogamarum* 6: 258. 1889 and *Blumea* 4(3): 524. 1941, *Grasses of Ceylon* 171. 1956.

in Thailand: ya khon bung

A. floccosus Bor

Myanmar. See *Kew Bulletin* 12(3): 414. 1958.

A. mangalorensis (Hochst.) Henrard (*Amblyachyrum mangalorensis* Hochst.; *Amblyachyrum mangalorensis* Hochst. ex Steud.; *Apocopsis beckettii* Thwaites ex Hack.; *Apocopsis courtallumensis* sensu Senaratna, non (Steud.) Henrard; *Apocopsis mangalorensis* (Hochst. ex Steud.) Henrard; *Apocopsis wightii* subsp. *mangalorensis* (Hochst.) Hack.; *Apocopsis wightii* subsp. *mangalorensis* (Hochst. ex Steud.) Hack.; *Apocopsis wightii* subvar. *beckettii* Hack.; *Apocopsis wightii* var. *beckettii* Trimen; *Apocopsis wightii* var. *beckettii* Thwaites ex Trimen; *Apocopsis wightii* var. *zeylanica* Hack.)

Southern India, Tamil Nadu, Sri Lanka. Annual, geniculate ascending, well-exserted inflorescence racemose with 2 or 3 barren spikelets at the base, in waste places, see *Synopsis Plantarum Glumacearum* 1: 413. 1854, *Flora* 39: 26. 1856, *A Systematic Catalogue of the Flowering Plants and Ferns in Ceylon* 107. 1885, *Monographiae Phanerogamarum* 6: 259, 269. 1889 and *Blumea* 4(3): 523. 1941, *Grasses of Ceylon* 171. 1956, *Grasses of Burma ...* 96. 1960.

A. paleacea (Trinius) Hochr. (*Andropogon himalayensis* Steud.; *Andropogon paleaceus* (Trin.) Steud.; *Apocopsis himalayensis* (Steud.) W. Wats. & E.T. Atkinson; *Apocopsis paleaceus* (Trin.) Hochr.; *Apocopsis royleana* Nees; *Ischaemum paleaceum* Trin.)

Asia, Nepal. Perennial, creeping, rhizomatous, culms leafy near base, leaves acute and hairy, fodder grass, open places, rocky sites, near drains, see *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 2(3): 293. 1832, *Illustrations of the Botany ... of the Himalayan Moun-*

tains ... 1: 417. 1839, *Synopsis Plantarum Glumacearum* 1: 376-377. 1854, *Himalayan Districts of the North-western Provinces of India* 10: 392. 1882 and *Bulletin of the New York Botanical Garden* 6: 262. 1910.

A. peguensis Bor

Myanmar. See *Kew Bulletin* 1949: 28. 1949.

A. pulcherrimus Bor

Myanmar. See *Kew Bulletin* 1951: 168. 1951.

A. schmidianus A. Camus

Asia. See *Bulletin du Muséum d'Histoire Naturelle, sér. 2* 29: 187. 1957.

A. siamensis A. Camus

Thailand. See *Notulae Systematicae. Herbarium de Paris* 3(3): 83. 1914.

A. vaginata Hack. (*Apocopsis wightii* var. *vaginata* (Hack.) Hook.f.)

India, Tamil Nadu, Uttar Pradesh. Annual, inflorescence within the uppermost leaf-sheath, common in open pastures and forest clearings, see *Österreichische Botanische Zeitschrift* 41: 8. 1891, *The Flora of British India* 7(21): 143. 1897 [1896].

A. wrightii Munro (*Apocopsis wightii* var. *wrightii* (Munro) Hack.) (for Charles Wright, collector of the species)

Asia. See *Proceedings of the American Academy of Arts and Sciences* 4: 363. 1860, *Monographiae Phanerogamarum* 6: 259. 1889.

in Thailand: yaa khon bung

A. wrightii Munro var. *macrantha* S.L. Chen (*Apocopsis heterogama* Keng & S.L. Chen)

China. See *Acta Phytotaxonomica Sinica* 13(1): 60-61, pl. 4. 1975, *Bulletin of Botanical Research* 12(4): 317. 1992.

Apogon Steud. = *Apogon* S. Elliott
(Asteraceae, Compositae), *Chloris* Sw.

From the Greek *a* "negative, without" and *pogon* "beard."

See *Nova Genera et Species Plantarum seu Prodrumus* 1, 25. 1788, *A Sketch of the Botany of South-Carolina and Georgia* 2: 267. 1822 [1824], *Nomenclator Botanicus. Editio secunda* 1: 352. 1840 and *Contributions from the United States National Herbarium* 41: 39-52. 2001.

Apogonia (Nutt.) E. Fourn. = *Coelorachis*
Brongn., *Mnesithea* Kunth

From the Greek *a* "negative, without" and *pogon* "beard."

Panicoideae, Andropogoneae, Rottboelliinae, see *The Genera of North American Plants* 1: 83. 1818, *Révision des Graminées* 1: 153. 1829, *Voyage Autour du Monde* 2: 64,

f. 14. 1829 [1831], *Mexicanas Plantas* 2: 63. 1886 and *North American Flora* 17(1): 86. 1909, *Blumea* 31(2): 291, 293. 1986, *Flora Mesoamericana* 6: 396-397. 1994.

Arberella Soderstr. & C.E. Calderón

Dedicated to the British botanist Agnes Arber, 1879-1960, philosopher, plant morphologist, F.L.S. 1908, married Edward Alexander Newell Arber 1909, F.R.S. 1946, author of *Herbals*, their origin and evolution, a chapter in the history of botany 1470-1670. Cambridge (1938) 1953, "On grasses in herbal literature." *Darwiniana* 5: 20-30. 1941 and *Goethe's Botany. The Metamorphosis of Plants* (1790) and Tobler's *Ode to Nature* (1782). Waltham 1946, *The Gramineae: A Study of Cereal, Bamboo, and Grass*. Cambridge Univ. Press 1934. See Rudolf Schmid, "Agnes Arber, née Robertson (1879-1960): fragments of her life, including her place in biology and women's studies." *Annals of Botany*, 88, 2001; J.H. Barnhart, *Biographical notes upon botanists*. 1: 70. 1965; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 30. 1972; *Taxon* 9(9): 261-263. 1960; Harry Godwin, *Dict. Sci. Biogr.* 1: 205-206. 1970.

About 3-7 species, tropical America, Costa Rica to Brazil. Bambusoideae, Olyreae, Olyrinae, or Bambusoideae, Oryzodae, Olyreae, perennial, clump-forming, herbaceous, unarmed, caespitose, leafy, solid, leaf blades lanceolate, ligule membranous, plants monoecious, inflorescence a panicle bearing 1 female spikelet with male spikelets below, spikelets 1-flowered, 2 glumes 5- to 11-nerved, male spikelets 3-staminate, lemma pubescent, short callus, palea present, 3 free and fleshy lodicules, no stamens, ovary glabrous, 2 plumose stigmas, swollen internode between glumes and floret of female spikelet, forest, wet forests, slopes, forest floor, undergrowth, related to *Cryptochloa* and *Lithachne*, type *Arberella dressleri* Soderstr. & C.E. Calderón, see *Annals of the Missouri Botanical Garden* 29: 317. 1942, *Brittonia* 31(4): 433-445. 1979, *Brittonia* 34: 199-209. 1982, *Brittonia* 37(1): 22-35. 1985, *Flora of the Guianas. Series A, Phanerogams* 59-62, 1990, *Novon* 1(2): 76-87. 1991, *Novon* 2(2): 81-110. 1992, *Flora Mesoamericana* 6: 214-215. 1994, *American Bamboos* 264-266. 1999, *Contributions from the United States National Herbarium* 39: 12-13. 2000, *Taxon* 50: 559-568. 2001.

Species

A. bahiensis Soderstr. & Zuloaga

Brazil, Venezuela. See *Brittonia* 37(1): 23, f. 1, 2. 1985.

A. costaricensis (Hitchc.) Soderstr. & C.E. Calderón (*Radia costaricensis* Hitchc.)

Costa Rica, Panama. See *Proceedings of the Biological Society of Washington* 40: 87. 1927, *Brittonia* 31(4): 439. 1979.

A. dressleri Soderstr. & C.E. Calderón

Central America, Panama. See *Brittonia* 31(4): 433. 1979.

A. flaccida (Döll) Soderstr. & C.E. Calderón (*Olyra flaccida* Döll)

Central and South America, Brazil, Colombia. Perennial, variable, caespitose, glabrous, geniculate-ascending, erect, lowland forests, see *Flora Brasiliensis* 2(2): 326. 1877 and *Brittonia* 31(4): 443. 1979.

A. grayunii Davidse (for the agrostologist Michael Howard Grayum, b. 1949, Missouri Botanical Garden)

Costa Rica. See *Novon* 2(2): 94, f. 6. 1992.

A. lancifolia Soderstr. & Zuloaga

Panama. Without callus, see *Brittonia* 37(1): 25, f. 3, 4. 1985.

A. venezuelae Judz. & Davidse

Venezuela, Amazonas. See *Novon* 1(2): 76, f. 1. 1991.

Arcangelina Kuntze = *Kralikia* Coss. & Durieu, *Tripogon* Roem. & Schult.

For the Italian botanist Giovanni Arcangeli, 1840-1921, Director of the Botanical Gardens of Torino (1879-1883) and Pisa (1881-1915); see J.H. Barnhart, *Biographical notes upon botanists*. 1: 71. 1965; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 13. 1972; I.K. Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. 1964; Oreste Mattiolo (1856-1947), *Cronistoria dell'Orto Botanico della Regia Università di Torino*. in *Studi sulla vegetazione nel Piemonte* pubblicati a ricordo del II Centenario della fondazione dell'Orto Botanico della R. Università di Torino. Checchini, Torino 1929; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933; Frans A. Stafleu & Erik A. Mennega, *Taxonomic literature. Supplement I: A-Ba*. 143-145. ["Director botanical garden of Firenze 1877-1878."] Königstein 1992; O. Mattiolo, *Cenni cronologici sugli Orti Botanici di Firenze*. in Pubblicazioni R. Ist. Studi Superiori Pratici e di Perfezionamento, Sez. Scienze Fis. Natur. Firenze 1899; G. Martinoli, "L'Orto Botanico di Pisa." *Agricoltura*. 7: 59-66. Roma 1963.

Chloridoideae, see *Systema Vegetabilium* 2: 34, 600. 1817, *Bull. Soc. Bot. France* 14: 89. 1867, *Revisio Generum Plantarum* 2: 759. 1891 and *Contributions from the United States National Herbarium* 41: 231. 2001.

Arctagrostis Griseb.

Greek *arktos* "the north" (Akkadian *arqu*, *urqu* "yellow") plus *agrostis*, *agrostidos* "grass, weed," referring to the habitat, arctic.

About 1-6 species, Arctic, Europe, North America and Greenland. Pooideae, Poodae, Aveneae or Pooideae, Poae, Poinae, perennial, robust, rhizomatous, herbaceous, auricles absent, ligule an unfringed membrane, plants bisexual, open or contracted panicle, spikelets pedicellate and 1-flowered, 2 glumes nerved and acute, lemmas keeled and 3-nerved, palea present, 2 free and membranous lodicules, 2-3 stamens, ovary glabrous, 2 stigmas, open habitats, tundra, lakeshore, sandy soils, coastal tundra regions, marshy tundra, related to *Colpodium* Trin., type *Arctagrostis latifolia* (R. Br.) Griseb., see *Flora Rossica* 4: 434. 1852 and *Canadian Journal of Botany* 68: 2422-2432. 1990, *Canadian Journal of Botany* 70: 80-83. 1991, *Canadian Journal of Botany* 72: 1039-1050. 1994, Hong Qian, "Floristic analysis of vascular plant genera of North America north of Mexico: characteristics of phytogeography." *Journal of Biogeography* 26(6): 1307-1321. Arctophila (Rupr.) N.J. Andersson = *Arctophila* (Rupr.) Rupr. ex Andersson

From the Greek *arktos* “a bear, the north” and *philos* “lover, loving.”

One species, Arctic. Pooideae, Poeae, Poinae, or Pooideae, Poodae, Poeae, perennial, height variable, herbaceous, robust, hollow, rooting at the lower nodes, auricles absent, narrow linear leaf blades, ligule an unfringed membrane, leaves distichous, rhizomatous, stoloniferous, plants bisexual, inflorescence paniculate, spikelets pedicellate and 2- to 6-flowered, floret callus bearded, 2 glumes subequal and shorter than adjacent lemmas, lemmas keeled and 3-nerved, palea present, 2 free and membranous lodicules, 3 stamens, ovary glabrous, 2 stigmas, fodder with high nutritive value, open habitats, wet ground, margins of ponds, swamps, marshy places, bogs, crevices, seashore, along streams, similar to *Colpodium* Trin., type *Arctophila fulva* (Trin.) Andersson, see *Species Plantarum* 1: 67-70. 1753, *Baierische Flora* 1: 100, 334. 1789, *Nouveau Bulletin des Sciences, publié par la Société Philomatique de Paris* 2: 189. 1810, *Fundamenta Agrostographiae* 119, t. 7. 1820, *Handbok i Skandinaviens Flora, Tredje Upplagen* 24. 1838, *Flora Danica* 14: pl. 2343. 1843, *Beitr. in English: pendantgrass, Arctic march grass

Arctopoa (Griseb.) Probatova = *Poa* L.

Greek *arktos* "a bear, the north" and *poa* "grass, pasture grass."

Pooideae, Poodae, Poeae, or Pooideae, Poeae, Poinae, see *Species Plantarum* 1: 67-70. 1753, *Flora Altaica* 1: 96-97. 1829, *Reliquiae Haenkeanae* 1(4-5): 273. 1830, *Flora Rossica* 4(13): 392. 1852, *The Flora of British India* 7(22): 339. 1897 [1896] and *Arctic. Fl. SSSR* 2: 121-122. 1964 [*Flora Arctica URSS*], *Novosti Sist. Vyss. Rast.* 8: 34. 1971, *Novosti Sist. Vyss. Rast.* 11: 32, 49-52. 1974, *Novosti Sist. Vyss. Rast.* 13: 41. 1976, *Bot. Zhurn. SSSR* 69(12): 1699-1700. 1984, *Contributions from the United States National Herbarium* 48: 505-580. 2003.

Argillochloa W.A. Weber = *Festuca* L.

Greek *argillos* "white clay, argil" and *chloe, chloa* "grass."

Pooideae, Poeae, Loliinae, type *Argillochloa dasyclada* (Hack. ex Beal) W.A. Weber, see *Species Plantarum* 1: 73-76. 1753, *Grasses of North America (edition 2)* 2: 602. 1896 and *Phytologia* 55(1): 1. 1984, *Watsonia* 16: 300. 1987, *Contributions from the United States National Herbarium* 48: 312-368. 2003.

Argopogon Mimeur = *Ischaemum* L.

From the Greek *argos* "white" and *pogon* "beard."

Panicoideae, Andropogoneae, Ischaeminae, type *Argopogon vuilletii* Mimeur, see *Species Plantarum* 2: 1049. 1753 and *Revue internationale de botanique appliquée et*

d'agriculture tropicale 31: 211, 213. 1951, *Flora Mesoamericana* 6: 386-387. 1994, *Contributions from the United States National Herbarium* 46: 275-276. 2003.

Aristaria Jungh. = *Themeda* Forssk.

Latin *arista* for “the awn” or “beard” of grain.

Panicoideae, Andropogoneae, Anthistiriinae, type *Aristaria barbata* Jungh., see *Flora Aegyptiaco-Arabica* 178. 1775, *Tijdschrift voor Natuurlijke Geschiedenis en Physiologie* 7: 296-297. 1840, *Tijdschrift voor Natuurlijke Geschiedenis en Physiologie* 10: 117. 1843, *The Fodder Grasses of Northern India* 43. 1888, *Monographiae Phanerogamarum* 6: 676. 1889 and *Contributions from the United States National Herbarium* 46: 613. 2003.

Aristavena F. Albers & Butzin = *Deschampsia* P. Beauv.

Latin *arista* and *avena*.

Pooideae, Poeae, Airinae, type *Aristavena setacea* (Huds.) F. Albers & Butzin, see *Flora Anglica* 30. 1762, *Essai d'une Nouvelle Agrostographie* 91, 149, 160. 1812, *Catalogue Raisonné des Graminées de Portugal* 33. 1880 and *Willdenowia* 8(1): 83. 1977, *Watsonia* 19: 134-137. 1992, *Plant Systematics and Evolution* 205: 99-110. 1997, *Opera Botanica* 137: 1-42. 1999, *Contributions from the United States National Herbarium* 48: 245-246. 2003.

Aristella Bertol. = *Achnatherum* P. Beauv., *Aristella* (Trin.) Bertol., *Aristella* Kütz. (Algae), *Stipa* L.

From the Latin *arista* “the awn.”

Pooideae, Stipeae, Stipinae, type *Aristella bromoides* (L.) Bertol., see *Species Plantarum* 1: 78-79. 1753, *Mantissa Plantarum* 30. 1767, *Essai d'une Nouvelle Agrostographie* 19-20, 146, pl. 6, f. 7. 1812, *Fundamenta Agrostographiae* 110. 1820, *Flora Italica* 1: 690. 1833, *Linnaea* 8: 563. 1833 [1834] and *Contributions from the United States National Herbarium* 48: 15-18, 617-650. 2003.

Aristida L. = *Aristopsis* Catusus Guerra, *Arthratherum* P. Beauv., *Chaetaria* P. Beauv., *Curtopogon* P. Beauv., *Kielboul* Adans., *Moulinisia* Raf., *Schistachne* Fig. & De Not., *Stipagrostis* Nees, *Streptachne* Kunth, *Streptachne* R. Br., *Trixostis* Raf.

From the Latin *arista*, *ae* “the awn, the beard of an ear of grain,” because many of the species have extremely long awns.

About 250-350 species, cosmopolitan, warm-temperate, tropical and subtropical. Arundinoideae, Aristideae, or Aristidoideae, Aristideae, annual or perennial bunchgrass, herbaceous, caespitose, forming tussocks, slender wiry culms, solid or hollow internodes, no auricles, ligule shortly hairy, leaves flat or often inrolled and mostly basal, leaf blades acute linear to linear-lanceolate to filiform, plants bisexual, if present the hidden cleistogenes in the leaf sheaths, inflorescence a narrow panicle open or spicate, spikelets not secund and pedicellate, 1 bisexual floret, equal or unequal glumes membranous and keeled, lower glume 1-nerved, lemma convolute or involute, lemmas narrow and cylindrical with a 3-branched awn or 3 awns, all 3 awns quite glabrous or upwardly scabrous, callus long and pointed and shortly bearded, small and hyaline palea, lodicules absent or present, 2 or 3 lodicules membranous when present, 1-3 stamens, ovary glabrous, 2 stigmas reddish or dark brown, sharply pointed seeds spear-like, weed species, ornamental, native pasture species, usually not valuable as fodder, the awns of many species can injure livestock, drought-tolerant, growing in semiarid woodlands, bare land, savannah, degraded pastures, rainforest, grassland, pampas, in low rainfall areas, on poor dry soils, in stony arid soils, under certain conditions several species could develop toxic properties, genus divided according to the awn characters, a difficult genus taxonomically, type *Aristida adscensionis* L., see *Species Plantarum* 1: 82. 1753, *Genera Plantarum*. edition 5. 35. 1754, *Familles des Plantes* 2: 31, 539. 1763, *Neues Journal für die Botanik* 3: 255. 1809, *Prodromus Florae Novae Hollandiae* 174. 1810, *Essai d'une Nouvelle Agrostographie* 32, 152, 158-159, t. 8, f. 7. 1812, *Nova Genera et Species Plantarum* 1: 124, t. 40. 1815 [1816], *A Sketch of the Botany of South-Carolina and Georgia* 1: 142-143, t. 8, f. 3. 1816, *Conspectus Regni Vegetabilis* 50. 1828, *Bulletin Botanique [Genève]* 1: 221. 1830, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Species

A. sp.

in Nigeria: ulumboju

in Mexico: pasto

A. abnormis Chiov. (*Aristida redacta* auct. non Stapf)

Ethiopia, Somalia, Arabia. Annual, slender, tufted, wiry, erect, spreading, branched, loose and open inflorescence paniculate, glumes subequal narrowly lanceolate, lower glume usually deciduous, lemma scabrous to scabrid, column without an articulation, lateral awns absent or reduced, hillsides, limestone, dry sandy areas, stony soils, related to *Aristida refracta* Griseb., see *Annuario del Reale Istituto Botanico di Roma* 8(1): 48, t. 6. 1903.

in Somalia: tiif

A. achalensis Mez (*Aristida achalensis* var. *elongata* Henrard; *Aristida achalensis* var. *tucumana* (Henrard) Henrard; *Aristida decipiens* Henrard; *Aristida elongata* Henrard; *Aristida mandoniana* Henrard; *Aristida tucumana* Henrard)

Argentina, Sierra Achala. Perennial, erect, see *Mededeelingen van's Rijks-Herbarium* 40: 55. 1921, *Repertorium Specierum Novarum Regni Vegetabilis* 17(8-12): 149. 1921, *Mededeelingen van's Rijks-Herbarium* 54: 4. 1926, *Mededeelingen van's Rijks-Herbarium* 54(B): 641-642. 1928, *Mededeelingen van's Rijks-Herbarium* 58(A): 221, t. 102. 1932, *Meded. Rijks-Herb.* 54(C): 712. 1933.

A. achalensis Mez var. *achalensis*

America.

A. achalensis Mez var. *tucumana* (Henrard) Henrard (*Aristida tucumana* Henrard)

America. See *Mededeelingen van's Rijks-Herbarium* 54(B): 641-642. 1928, *Mededeelingen van's Rijks-Herbarium* 58: 234, t. 110. 1932.

A. acuta S.T. Blake

Australia, New South Wales, Queensland. Tufted, perennial, culms thin and few-noded, leaves scabrous, sheath smooth, panicle loose to open and sparse, unequal glumes linear to ovate, lower glume long-acuminate, upper glume abruptly acuminate and entire, lemma with purplish spots, awns flattened to concave to filiform, mostly in open forest, see *Proceedings of the Royal Society of Queensland* 51: 169, t. 4, f. 1-3. 1940.

in English: slender wiregrass

A. acutiflora Trin. & Rupr. (*Aristida brachyptera* var. *acutiflora* (Cosson & Bal.) T. Durand & Schinz; *Aristida zittelii* Asch.; *Arthratherum brachyatherum* var. *acutiflorum* (Trin. & Rupr.) Cosson & Durand; *Stipagrostis acutiflora* (Trin. & Rupr.) De Winter)

Central Africa. See *Species Graminum Stipaceorum* 167. 1842, *Exploration Scientifique de l'Algérie* 2: 291. 1867, *Verhandlungen des Botanischen Vereins für die Provinz Brandenburg und die angrenzenden Länder* 21: 70. 1880, *Conspectus Florae Africae* 5: 801. 1894 and *Meded. Rijks-Herb.* 54(B): 690. 1928, *Flore de l'Afrique du Nord*: 2: 41. 1953, *Kirkia* 3: 133. 1963.

in Niger: ematale, assoerdin, taerhemut, idébon

A. adoensis Hochst. (*Aristida adoensis* Hochst. ex A. Rich., nom. illeg., non *Aristida adoensis* Hochst.)

Africa, Ethiopia. Perennial, small, erect, tussocky, smooth, leaf blades filiform, basal leaves, inflorescence spiciform, panicle linear, densely crowded spikelets, glumes subequal, lemma keeled, awns subequal, seeds typically 3-awned, grains eaten by baboons, found along roadsides, clearings, well-drained grassland, scrubland, shrubland, wooded grassland, see *Schimperi iter Abyssinicum. Sectio III* 1806. 1844, *Tentamen Florae Abyssinicae ...* 2: 390. 1850.

A. adscensionis L. (*Aristida adscensionis* f. *modestina* Hack.; *Aristida adscensionis* f. *viridis* Kuntze; *Aristida adscensionis* L. subsp. *guineensis* (Trin. & Rupr.) Schultes; *Chaetaria humilis* (Kunth) Roem. & Schultes; *Chaetaria interrupta* (Cav.) P. Beauv.; *Chaetaria nana* Nees ex Steud.) Tropics, subtropics and warm temperate regions. Annual or short-lived perennial, extremely variable, tufted, yellow to bright green, simple or often branched, culms erect or ascending and many-noded, ligule a ring of hairs, leaf sheath tight and glabrous, narrow and long pointed leaves, flexuous and narrow inflorescence,

panicle usually contracted, young panicles feathery, seed head purplish, spikelets densely clustered on the branches, scabrous and stiff awns terete, glumes usually unequal, upper glume emarginate or bifid, lemma laterally compressed, awns very variable, sharp seeds may penetrate the skin of the sheep, a pioneer grass, useful for erosion control, unpalatable, poor forage, of little or no value for grazing, grazed when young and tender, weed species, in India used for making broomsticks, flowers used topically for itch and ringworm, found in sandy soils, semiarid situations, poor sandy and stony soils, plains and low hills, poor dry soil, cultivated areas, shallow soils on stony hills, open bush, open shrubland, disturbed poor soil, grassland, moist areas, on disturbed and bare soils, wasteland, roadsides, floodplains, along washes and canyons in desert scrub and desert grassland, rocky places, fallows, on rocky slopes, coarse sand, lawn, see *Species Plantarum* 1: 82. 1753, *Flora Atlantica* 1: 109, t. 21, f. 2. 1798, *Icones et Descriptiones Plantarum, quae aut sponte ...* 5: 45, t. 471, f. 2. 1799, *Flora Boreali-Americana* 1: 41. 1803, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 99. 1809, *Essai d'une Nouvelle Agrostographie* 30, 151, 158. 1812, *Nova Genera et Species Plantarum* 1: 121-122. 1815 [1816], *Systema Vegetabilium* 2: 396. 1817, *Annals of the Lyceum of Natural History of New York* 1(1): 154-155. 1824, *Mantissa* 3(Add.1): 578. 1827, *Flora Brasiliensis seu Enumeratio Plantarum* 2: 387. 1829, *Reliquiae Haenkeanae* 1(4-5): 223. 1830, *Nomenclator Botanicus* edition 2 1: 131, 340. 1840, *Florae Africae Australioris Illustrationes Monographicae* 186. 1841, *Species Graminum Stipaceorum* 129-134, 137, 140. 1842, *Abhandlungen der Böhmisches Gesellschaft der Wissenschaften, nebst der Geschichte derselben* 3: 550. 1845, *Tentamen Florae Abyssinicae ...* 2: 392. 1850, *Synopsis Plantarum Glumacearum* 1: 137-139. 1855 [1854], *Flora* 38: 200. 1855, *Biologia Centrali-Americana; ... in Spanish: flechilla, agujilla, plumilla, zacate, zacate de agua, zacate de semilla, zacate tres barbas, tres barbas anual, tres barbas, Aristida común, cola de zorra

in Mexico: pasto, tres barbas, tres barbas anual, zacate de agua, zacate de agua tres barbas, zacate cola de zorra

in Arabic: lhayet lehmar, thunayb

in Ghana: motodo

in Mali: dugun bee, allomoze, tezenat

in Mauritania: lhayet lehmar

in Morocco: chich-ed-dib, tizzit

in Niger: agaemmud, alaemos, budu, kalabon, kalau, seko, subu galigali, wutsiya'r kurege

in Nigeria: ba-zayyana, bazayyanao, datsi, gatsaura, iru ofe, katsaura, lale shamuwa, oka olongo, selbi, tsintsinyar dutse, tsintsinyar dutsee, wicco tenemeje, wutsiyar kurege baki

in Senegal: hetieb, mbol tieb

in Somalia: birre', birreh, bille, harfo, tinleh, madweed, ebateete

in Southern Africa: besemgras, eenjarige steekgras, einjäh-rige stechgras, lossteekgras, steekgras; lefielo (Sotho)

in Sudan: homra, gaaw

in Upper Volta: celbi, selbo

in Yoruba: oka olongo, iru ofe

A. adscensionis L. subsp. *guineensis* (Trin. & Rupr.) Henrard

Tropic, subtropic and warm temperate regions. See *Mededeelingen van's Rijks-Herbarium* 54: 216. 1926.

A. aequiglumis Hack.

South Africa. Tufted, stout, unbranched, short and stout rhizome, leaves mostly basal, dense and contracted inflorescence, glumes subequal to equal, lower glume mucronate, 3 awns, found in seasonally flooded areas, rocky slopes, highveld, bushveld, hillsides, sandy soils, eroded soils, see *Bulletin de l'Herbier Boissier* 3(8): 381. 1895.

in English: curly-leaved three-awned grass

A. altissima Arechav. (*Aristida laevis* (Nees) Kunth; *Chetaria laevis* Nees)

Uruguay. See *Flora Brasiliensis seu Enumeratio Plantarum* 2: 384-385. 1829, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 192. 1833 and *Anales del Museo Nacional de Montevideo* 4(1): 80-81, 73, t. 5. 1902.

A. amazonensis Longhi-Wagner

Brazil. See *Kew Bulletin* 49(4): 817, f. 1. 1994.

A. amplexifolia Caro & E.A. Sánchez (*Aristida antoniana* Steud. ex Döll)

Argentina. See *Flora Brasiliensis* 2(3): 19. 1878 and *Mededeelingen van's Rijks-Herbarium* 54: 31. 1926, *Darwiniana* 19(2-4): 413-417, f. 1. 1975.

A. anisochaeta Clayton

Ethiopia, Somalia. Perennial or annual, short lived, wiry, much-branched, tufted, delicate open and loose panicle, slender capillary branches, glumes very unequal, lemma fusiform, central awn stout and long, lateral awns very fine and short, found on red sandy soils, plains, limestone, see *Kew Bulletin* 23: 211. 1969, *Kew Bulletin*: 47(2): 277-282. 1992.

in Somalia: xalfo

A. annua B.K. Simon

Australia, Queensland. Vulnerable species, see *Austrobaileya* 2(1): 87, f. 1A. 1984, *Australian Systematic Botany* 5: 129-226. 1992.

A. anthoxanthoides (Domin) Henrard (*Aristida adscensionis* L. var. *anthoxanthoides* Domin; *Aristida adscensionis* var. *subaequiglumis* Domin; *Aristida depressa* sensu Benth., non Retz.; *Aristida peregrina* Henrard) (from the genus *Anthoxanthum* L. and *eidos*, *oides* "resemblance," Greek *anthos* "flower" and *xanthos* "yellow")

South Australia, Western Australia, Northern Territory, Queensland, New South Wales. Annual or rarely short-lived perennial, sparsely tufted, small, slender, erect, stems usually bent at the lower nodes, simple or sparsely branched, sheath usually scabrous, bluish green leaves minutely scabrous and rigid, dense oblong spike-like panicle pale yellow, glumes unequal, lower glume acute, upper glume obtuse, glumes mucronate and with scabrid keels, lemma strongly nerved and without an articulation, awns equal and flattened, on clay or heavy soils, palatable and grazed, attractive, see *Species Plantarum* 1: 82. 1753 and *Bibliotheca Botanica* 85(2): 343, t. 15, f. 9-12. 1915, *Mededeelingen van's Rijks-Herbarium* 54: 16, 29-30. 1926.

in English: yellow three-awned grass, yellow three-awn, pale wire grass

A. antoniana Steud. ex Döll (*Aristida amplexifolia* Caro & E.A. Sánchez; *Aristida antoniana* Steud. ex Lechler; *Aristida enodis* Hack.; *Aristida pflanzii* Mez)

South America, Bolivia. Perennial, caespitose, erect, ligule hairy, leaf blades pungent, panicles oblong, glumes lanceolate and subequal, lemma cylindrical, awns persistent and unequal, on rocky places, see *Berberides Americana Australis* 56. 1857, *Flora Brasiliensis* 2(3): 19. 1878 and *Repertorium Specierum Novarum Regni Vegetabilis* 11: 21.

1912, *Repertorium Specierum Novarum Regni Vegetabilis* 17(8-12): 151. 1921, *Darwiniana* 19(2-4): 413-417, f. 1. 1975.

A. appressa Vasey (*Aristida appressa* var. *brevior* Vasey; *Aristida orizabensis* var. *pseudospadicea* (F.T. Hubb.) Henrard; *Aristida pseudospadicea* F.T. Hubb.)

Mexico. Savannah, along roadsides, see *Mexicanas Plantas* 2: 78. 1886, *Contributions from the United States National Herbarium* 1(8): 282. 1893 and *Proceedings of the American Academy of Arts and Sciences* 49(8): 500. 1913, *Mededeelingen van's Rijks-Herbarium* 54(B): 473. 1928.

A. arida B.K. Simon

South Australia. Tufted, perennial, inflorescence narrow and spike-like, glumes smooth and keeled and unequal in length, lemma convolute and densely spiny-tuberculate, awns scaberulous and flattened, not palatable, see *Austrobaileya* 2(1): 87, f. 1B. 1984, *Acta Botanica Yunnanica* 10: 49-54. 1988, *Australian Systematic Botany* 5: 129-226. 1992.

A. arizonica Vasey

U.S. Erect, forage, growing on dry soils, see *Bulletin of the Torrey Botanical Club* 13(2): 27. 1886 and *Contr. U.S. Natl. Herb.* 22(7): 568. 1924, *Phytologia* 37(4): 317-407. 1977, *Memoirs San Diego Society of Natural History* 12: 1-140. 1981.

in English: Arizona three-awn, Arizona threeawn, needle grass

in Spanish: tres aristas

in Mexico: tres aristas arizónico

A. arubensis Henrard

Aruba, the Caribbean, Venezuela. Perennial, caespitose, see *Mededeelingen van's Rijks-Herbarium* 54: 41-42. 1926.

A. asplundii Henrard (for the Swedish botanist Eric (Erik) Asplund, 1888-1974, plant collector in Cuba and South America)

Bolivia, Argentina. Perennial, densely caespitose, coarse, stiff, leaves mostly basal, leaf blades stiff and more or less pungent, inflorescence pyramidal with single branches or rarely 2 together, the whole inflorescence often breaking off at maturity, glumes subequal linear-lanceolate, on grazed land, eroded places, open slopes, see *Mededeelingen van's Rijks-Herbarium* 54: 42-43. 1926, *Sida* 17: 709. 1997.

A. asplundii Henrard var. *asplundii*

America.

A. asplundii Henrard var. *pauciflora* Sulekic

Argentina. See *Darwiniana* 41(1-4): 167-168, f. 4. 2003.

A. australis B.K. Simon

South Australia. Tufted, perennial, leaf blades flat and flexuous, inflorescences loosely contracted, glumes smooth, lemma smooth, awns slender, see *Austrobaileya* 2(1): 88, f. 1C. 1984, *Australian Systematic Botany* 5: 129-226. 1992.

A. balansae Henr.

Asia, Indochina, Vietnam. See *Repertorium Specierum Novarum Regni Vegetabilis* 17: 397. 1921.

in Thailand: ya faek mai, ya phraek mai, ya hang suea, ya hang ma chingchok, yaa faek mai, yaa haang suea, yaa haangmaa ching chok, yaa phraek mai

A. barbicollis Trin. & Rupr. (*Aristida congesta* subsp. *barbicollis* (Trin. & Rupr.) De Winter)

Kenya, South Africa, Mozambique. Perennial, densely tufted, erect, leaf blades linear, leaf sheaths silky, panicle ovate, spikelets clustered, glumes unequal, lower glume lanceolate and acute, upper glume linear and bifid, on disturbed areas, closely related to *Aristida mutabilis* Trin. & Rupr., see *Species Graminum Stipaceorum* 152. 1842 and *Mededeelingen van's Rijks-Herbarium* 58: 132. 1929, *Mededeelingen van's Rijks-Herbarium* 54(C): 705. 1933.

in English: spreading prickle grass, spreading three-awn, spreading bristlegrass

in South Africa: witsteekgras, lossteekgras

A. basiramea Engelman ex Vasey (*Aristida basiramea* var. *basiramea*; *Aristida basiramea* var. *curtissii* (A. Gray) Shinners)

U.S. Annual, short, 3-awned, stems and leaves sparsely hairy, ligule a short ring of hairs, growing on dry sandy soil and open ground, in sand prairie and sand savannah, on sand barrens, abandoned sandy fields, see *Botanical Gazette* 9: 76. 1884, *A Manual of the Botany of the Northern United States (edition 6)* 640. 1890 and *Contr. U.S. Natl. Herb.* 22(7): 533. 1924, *American Midland Naturalist* 23: 633. 1940, *Rhodora* 88(855): 367-387. 1986.

in English: forked-tip three-awn grass, forked threeawn, forking three-awn, forktip three-awn, fork-tip three-awn grass, branching needle-grass

A. behriana F. Muell. (after the German botanist Hans Hermann Behr, 1818-1904, physician, traveler in Australia and California, wrote *Flora of the Vicinity of San Francisco*. San Francisco. 1888; see J.H. Barnhart, *Biographical notes upon botanists*. 1: 154. 1965)

South Australia, Victoria, New South Wales, Queensland, Northern Territory. Perennial, forming low open tussocks, small, short, erect, rigid, culms simple and compressed, sheath scaberulous, leaf blade convolute and scabrous, inflorescence dense and contracted, panicle brush-like and purplish, glumes unequal, lemma convolute and more or less smooth, awns often purple filiform and stiff, ornamental and showy, drought-resistant, growing in dry areas, open woodlands and grasslands, on loamy soils, see *Transactions and Proceedings of the Victorian Institute for the Advancement of Science* 1: 44. 1855 and *Mededeelingen van's Rijks-Herbarium* 54: 52. 1926, *Brunonia* 3(2): 271-333. 1980, *Australian Systematic Botany* 5: 129-226. 1992.

in English: brush wire grass, bunch wire grass, three-awned grass

A. benthamii Henrard (after the English (b. Devon) botanist George Bentham, 1800-1884 (London), son of Samuel Bentham and nephew of Jeremy Bentham, taxonomist, from 1829 to 1840 Secretary of the Horticultural Society, 1862 Fellow of the Royal Society of London and in 1826 of the Linnean Society, from 1861 to 1874 President of the Linnean Society, among his most valuable writings are *Handbook of the British Flora*. London 1858, *Flora hongkongensis*. London 1861, *Labiatarum genera et species*. London 1832-1836, *The Botany of the Voyage of H.M.S. Sulphur*, under the command of captain Sir Edward Belcher ... during the years 1836-1842. London 1844[-1846] and *Catalogue des plantes indigènes des Pyrénées et du bas Languedoc*. Paris 1826 author of most of the *Genera Plantarum* (London 1862-1883) of Bentham and Joseph Dalton Hooker (1817-1911) and in collaboration with Ferdinand Mueller of *Flora Australiensis*. London 1863-1878, his herbarium amounted to over 100,000 specimens. See J.H. Barnhart, *Biographical notes upon botanists*. 1: 165. 1965; Antoine Lasègue (1793-1873), *Musée botanique de M. Benjamin Delessert*. Paris, Leipzig 1845; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 34. 1972; George Taylor, in *D.S.B.* 2: 614-615. 1981; Leonard Huxley, *Life and Letters of Sir Joseph Dalton Hooker*. London 1918; B. Daydon Jackson, *George Bentham*. London 1906; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. Philadelphia 1964; Francis Wall Oliver (1864-1951), editor, *Makers of British Botany*. Cambridge 1913; H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 130. Oxford 1964; Mea Allan, *The Hookers of Kew*. London 1967; S. Lenley et al., *Catalog of the manuscript and archival collections and index to the correspondence of John Torrey*. Library of the New York Botanical Garden. 447. 1973; Merle A. Reinikka, *A History of the Orchid*. Timber Press 1996; Emil Bretschneider, *History of European Botanical Discoveries in China*. [Reprint of the original edition 1898.] Leipzig 1981; N. Hall, *Botanists of the Eucalypts*. Melbourne 1978 and Supplement 1980; M. Hadfield et al., *British Gardeners: A Biographical Dictionary*. London 1980)

Australia, Queensland, New South Wales, Tasmania. Perennial, densely and compactly tufted, slender, simple or branched, culms terete or compressed, sheath scabrous, leaves flexuous to curly, panicle contracted and narrow or loose and open, subequal or unequal glumes linear to ovate, lower glume long-acuminate, upper glume with a bifid apex and a mucro between the lobes, lemma linear to elliptic dark or purple, awns filiform, tolerates stock grazing, grows in sandy soils, in poor gravelly soils, in Tasmania endangered, see *Mededeelingen van's Rijks-Herbarium* 58(A):

246, t. 117. 1932, *Mededeelingen van's Rijks-Herbarium* 54(C): 705. 1933, *Brunonia* 3(2): 271-333. 1980, *Austrobaileya* 2(1): 87-102. 1984, *Australian Systematic Botany* 5: 129-226. 1992.

in English: three-awned spear-grass, wire grass

A. benthamii Henrard var. **benthamii**

Queensland, New South Wales. Lemma without tubercles, see *Australian Systematic Botany* 5: 129-226. 1992.

A. benthamii Henrard var. **spinulifera** B.K. Simon

Queensland, New South Wales. Lemma with tubercles, see *Austrobaileya* 2(1): 94. 1984, *Australian Systematic Botany* 5: 129-226. 1992.

A. beyrichiana Trin. & Rupr. (*Aristida stricta* auct. nonn.; *Aristida stricta* Michx.; *Aristida stricta* Michx. var. *beyrichiana* (Trin. & Rupr.) D.B. Ward)

U.S., Florida, South Carolina. Perennial, tufted, ground cover, bunchgrass, green, fire-stimulated flowering, cover for bird nesting, growing in scrubby flatwoods, fields, grasslands, bogs, roadsides, mesic flatwoods, open woods, savannahs, see *Flora Boreali-Americana* 1: 41. 1803, *Species Graminum Stipaceorum* 104. 1842 and *Rhodora* 95(881): 25-37. 1993, *Novon* 11(3): 362. 2001.

in English: wire grass, wiregrass, three-awn wiregrass, southern wiregrass, Beyrich's three-awn

A. biglandulosa J.M. Black (*Aristida biglandulosa* var. *laevis* B.K. Simon)

Australia, Northern Territory. See *Transactions and Proceedings of the Royal Society of South Australia* 57: 146, t. 8, f. 9. 1933, *Austrobaileya* 2(1): 95, f. 5C. 1984, *Australian Systematic Botany* 5: 177. 1992.

A. biglandulosa J.M. Black var. **biglandulosa**

South Australia, Queensland. Perennial, tufted, robust, branched, glaucous, leaf blades scabrous above, inflorescence narrow-cylindrical, glumes cuspidate and with scarbid keels, awns subequal, grazed when young.

in English: two-gland three-awn, two gland threeawn

A. bipartita (Nees) Trin. & Rupr. (*Chaetaria bipartita* Nees)

South Africa, Mozambique. Perennial, tufted, weak, erect or geniculate, hard leaves, open panicle with stiff branches, spikelets purplish 3-awned, lower glume awned, the whole inflorescence breaks off at maturity, unpalatable, very low grazing value, common in moist areas, on soils very clayey, overgrazed veld, in disturbed areas, near vleis, along roadsides, see *Florae Africae Australioris Illustrationes Monographicae* 187. 1841, *Species Graminum Stipaceorum* 144. 1842.

in English: rolling grass, rolling three-awned grass, three-awn rolling grass

in Southern Africa: krulgras, rolgras, rolsteekgras, steekgras; bohlayana-ba-pere (Sotho)

A. bissei Catusas

Cuba. See *Novosti Sist. Vyss. Rast.* 20: 7. 1983, *Acta Botanica Cubana* 24: 4. 1985.

A. blakei B.K. Simon (for Stanley Thatcher Blake, 1910-1973)

Queensland, New South Wales. Annual or very short-lived perennial, tufted, smooth, glaucous, many branched at the lower nodes, sheath smooth, narrow panicle loosely contracted and with branches erect, subequal or unequal glumes lanceolate and notched, mauve lemma linear-elliptic and tuberculate, awns filiform and divergent, grows on clay and sandy soils, see *Austrobaileya* 2(1): 88, f. 1D. 1984, *Australian Systematic Botany* 5: 129-226. 1992.

A. brachyathera Coss. & Balansa (*Aristida brachyathera* (Coss. & Durieu) Diels; *Arthratherum brachyatherum* (Coss. & Balansa) Coss. & Durieu; *Stipagrostis brachyathera* (Coss. & Balansa) De Winter)

Algeria. Rare species, see *Bulletin de la Société Botanique de France* 5: 169, 786. 1858, *Exploration Scientifique de l'Algérie* 2: 290. 1867 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 54. 1917, *Kirkia* 3: 133. 1963.

A. brainii Melderis

Zimbabwe. Rare species, see *Boletim da Sociedade Brotteriana, ser. 2* 44: 279. 1970.

A. brasiliensis Longhi-Wagner (*Aristida implexa* Trin.; *Aristida megapotamica* Spreng.)

Brazil. Solitary, on moist ground, see *Systema Vegetabilium, editio decima sexta* 4: 31. 1827, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 4: 48. 1836 and *Novon* 2(1): 36-37, 39, f. 1. 1992.

A. brittonorum Hitchc. (Nathaniel Lord Britton 1859-1934, Elizabeth Gertrude Britton 1858-1934)

Cuba. Endangered species, perennial, stout, erect, leaf blades involute, narrow panicle, glumes acuminate, awns subequal, found in white sand, see *Contributions from the United States National Herbarium* 22(7): 584. 1924, *Fontqueria* 46: [i-ii], 1-259. 1997.

A. burbridgeae B.K. Simon (*Aristida pruinosa* var. *tenuis* C. Gardner)

Western Australia. Perennial, loosely tufted, branched, inflorescence spicate, similar to *Aristida latzii*, see *Bibliotheca Botanica* 85(2): 345-346. 1915, *Flora of Western Australia* 1(1): 168. 1952, *Austrobaileya* 2(1): 89, f. 1G. 1984.

A. burraensis B.K. Simon

Queensland, North Kennedy District, Burra Range. Perennial, compactly tufted, branched or unbranched, congested inflorescence spicate, lemma with terete awns, similar to *Aristida nitidula* and *Aristida latzii*, see *Austral. Syst. Bot.* 5: 211, f. 15E, *Austrobaileya* 2(1): 89, f. 1G. 1984.

A. calcicola Hitchc. & Ekman

Cuba. See *North American Flora* 17(5): 405. 1935.

A. californica Thurber (*Aristida californica* var. *fugitiva* Vasey; *Aristida californica* var. *major* Vasey; *Aristida fugitiva* Vasey ex S. Watson; *Aristida jonesii* Vasey; *Aristida peninsularis* Hitchc.)

U.S., Sonora, California, Arizona, Baja California. Annual or perennial, erect or ascending, densely pubescent, densely tufted, leaf blades flat or involute, panicles few-flowered, florets reddish, good forage, sandy beaches, sandy deserts, see *Trans. Calif. State Agric. State Soc.* 134. 1864, *Geological Survey of California, Botany* 2: 289. 1880, *Proceedings of the California Academy of Sciences, Series 2, 2*: 212. 1889, *Proceedings of the American Academy of Arts and Sciences* 24: 80. 1889, *Contributions from the United States National Herbarium* 3(1): 48-49. 1892 and *Contributions from the United States National Herbarium* 22(7): 521. 1924, F. Shreve and I.L. Wiggins, *Vegetation and Flora of the Sonoran Desert* 1: 262-266. 1964, *Phytologia* 37(4): 317-407. 1977, *Memoirs of the San Diego Society of Natural History* 12: 1-140. 1981.

A. californica Thurb. var. **californica**

U.S., California. See *Great Basin Naturalist* 52(1): 41-52. 1992.

in English: California three-awn

in Spanish: tres barbas de California

A. californica Thurb. var. **glabrata** Vasey (*Aristida californica* Thurb. var. *major* Vasey; *Aristida glabrata* (Vasey) A.S. Hitchc.)

U.S., Baja California, Mexico. Perennial bunchgrass, small, green to gray-green, not very leafy, stems wiry and hard with sharp ends, short leaves glabrous, slender inflorescence, each spikelet bears at its tip three slender spreading awns, grazed, good forage, withstands rather heavy grazing, growing on dry sandy soils, see *Proceedings of the California Academy of Sciences, Series 2, 3*: 178. 1891 and *Contributions from the United States National Herbarium* 22(7): 522. 1924.

in English: Santa Rita threeawn, threeawn

A. calycina R. Br. (*Aristida glumaris* Henrard)

Western Australia, Queensland, New South Wales, Victoria, Northern Territory. Perennial, tufted, erect, wiry and branched, sheath smooth, leaves scabrous, panicle contracted and usually loose, equal or unequal glumes lanceolate, lower glume acute to acuminate, upper glume obtuse, lemma purple or brown, margins of involute lemma

with rows of tubercles, awns divergent and flattened, on poor and sandy soils, semiarid tropics, see *Prodromus Florae Novae Hollandiae* 1: 173. 1810 and *Bibliotheca Botanica* 85: 345. 1915, *Mededeelingen van's Rijks-Herbarium* 54: 71. 1926, *Mededeelingen van's Rijks-Herbarium* 58(A): 247, 297, t. 117. 1932, *Mededeelingen van's Rijks-Herbarium* 54(C): 708, 718-719. 1933, *Brunonia* 3(2): 271-333. 1980, *Austrobaileya* 2(1): 95. 1984, *Australian Systematic Botany* 5: 129-226. 1992.

in English: three-awned spear-grass, white spear grass

A. calycina R. Br. var. *calycina* (*Aristida glumaris* Henrard) Western Australia, Queensland, New South Wales, Victoria, Northern Territory. Lemma without tubercles, lower glume shorter than upper, grows on poor and sandy soils, see *Mededeelingen van's Rijks-Herbarium* 54: 71. 1926, *Mededeelingen van's Rijks-Herbarium* 58(A): 247, t. 117. 1932, *Mededeelingen van's Rijks-Herbarium* 54(C): 718-719. 1933, *Brunonia* 3(2): 271-333. 1980, *Australian Systematic Botany* 5: 129-226. 1992.

in English: dark wire grass, number nine wire-grass

A. calycina R. Br. var. *filifolia* B.K. Simon

Queensland. Loosely tufted, branched, leaf blades filiform, see *Austrobaileya* 2(1): 95. 1984.

A. calycina R. Br. var. *praealta* Domin (*Aristida armata* Henrard; *Aristida praealta* (Domin) Henrard)

Queensland, New South Wales, Northern Territory. Lemma furrow with tubercles, lower glume longer than upper, grows on poor and sandy soils, see *Bibliotheca Botanica* 85(2): 345. 1915, *Mededeelingen van's Rijks-Herbarium* 54: 72. 1926, *Mededeelingen van's Rijks-Herbarium* 54(A): 463-464. 1927, *Mededeelingen van's Rijks-Herbarium* 58(A): 197, t. 87. 1932, *Mededeelingen van's Rijks-Herbarium* 54(C): 703-704. 1933, *Austrobaileya* 2(1): 87-102. 1984, *Australian Systematic Botany* 5: 129-226. 1992.

in English: wiregrass

A. canescens Henr.

South Africa. See *Mededeelingen van's Rijks-Herbarium* 58(A): 210, 309, t. 95. 1932, *Mededeelingen van's Rijks-Herbarium* 54(C): 709. 1933.

A. canescens Henr. subsp. *canescens*

South Africa. Perennial, tufted, slender, erect, more or less unbranched, 3 awns, lower glume unawned, grows on poor and sandy soils, stony soils, eroded ground, disturbed areas.

in South Africa: vaalsteekgras

A. canescens Henr. subsp. *ramosa* De Winter

South Africa. Perennial, tufted, slender, erect, sometimes geniculate, more or less unbranched or culms branched from the upper nodes, contracted inflorescence, 3 awns, lower glume awned, see *Kirkia* 3: 132. 1963.

A. capillacea Lam. (*Aristida capillacea* Cav., nom. illeg., non *Aristida capillacea* Lam.; *Aristida elegans* Rudge; *Aristida sanctae-luciae* Trin.; *Chaetaria capillacea* (Lam.) P. Beauv.; *Chaetaria capillaris* Nees)

Mexico, Bolivia, Brazil. Annual, delicate, very slender, densely tufted, glabrous, erect, often profusely branching from the base, leaf blades linear, sheaths slightly inflated, ligule an irregular rim of hairs, inflorescence a diffuse panicle ovate to oblanceolate, small open spikelets, awns spreading to ascending, glumes unequal lanceolate, very short membranous palea, 2 narrow lodicules, dry savannah, along roads, road banks, open habitats, slopes, mountains, riverbanks, white sandy soil, seasonally humid habitats, see *Tableau Encyclopédique et Méthodique ... Botanique* 1: 156. 1791, *Icones et Descriptiones Plantarum, quae aut sponte ...* 5: 43, t. 468, f. 1. 1799, *Histoire des plantes de la Guiane Française* 22, pl. 30. 1805, *Essai d'une Nouvelle Agrostographie* 30, 158, t. 8, f. 5. 1812, *De Graminibus Paniceis* 25. 1826, *Flora Brasiliensis seu Enumeratio Plantarum* 2: 388. 1829 and *Mededeelingen van's Rijks-Herbarium* 54: 80. 1926, *Meded. Rijks-Herb.* 58(C): 531. 1928, *Bol. Inst. Bot.* (São Paulo) 12: 145. 1999.

A. capillifolia Henrard

South Australia. Perennial, tufted, slender, leaf blades filiform and scabrous, inflorescence spike-like and loose, glumes nerved, lemma scabrous, awns subequal and flattened, low palatability, see *Mededeelingen van's Rijks-Herbarium* 58(A): 298, t. 154. 1932, *Mededeelingen van's Rijks-Herbarium* 54(C): 711. 1933, *Journal of the Royal Society of Western Australia* 44(3): 77-83. 1961, *Brunonia* 3(2): 271-333. 1980, *Australian Systematic Botany* 5: 220. 1992.

in English: needle-leaved three-awn

A. caput-medusae Domin (*Aristida ramosa* var. *compacta* Benth.; *Aristida vagans* var. *compacta* Benth.)

Queensland, New South Wales. Perennial, erect, tufted, knotty rootstock, culms wiry and strongly branched, sheath smooth, leaves scabrous, dense spike-like panicle oblong-ovate, glumes acute to obtuse, upper glume acuminate and sometimes notched, lemma purple, awns divergent, on rocky hillsides, on loamy red earth soils, see *Icones Plantarum* 5: 45, t. 471, f. 1. 1799, *Prodromus Florae Novae Hollandiae* 1: 173. 1810, *Flora Australiensis: A Description ...* 7: 563. 1878 and *Bibliotheca Botanica* 85(2): 344, t. 14, f. 3-5. 1915, *Mededeelingen van's Rijks-Herbarium* 54(B): 654. 1928, *Brunonia* 3(2): 271-333. 1980, *Australian Systematic Botany* 5: 129-226. 1992.

in English: many-headed wiregrass

A. chapadensis Trin.

South America. Brazil. See *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série.*

Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles 4,2(1): 48. 1836.

A. chaseae A.S. Hitchc. (dedicated to the American botanist Mary Agnes Chase (née Merrill), 1869-1963, agrostologist, plant collector, traveler)

Puerto Rico. Perennial, decumbent, endangered species, found on stony places, open habitats, see *Contributions from the United States National Herbarium* 22(7): 575. 1924, *Sida* 13(4): 423-447. 1989.

in English: Chase's three-awn grass, Chase's three-awn

A. chichlayense Tovar (also *chichlayensis*) (Peru, Lambayeque, Chiclayo)

Peru. Rare species, small, annual, caespitose, see *Publicaciones del Museo de Historia Natural "Javier Prado." Serie B. Botánica* 32: 11. 1984, *Madroño* 40(4): 266-267. 1993.

A. circinalis Lindm. (*Aristida acuminata* Hack.; *Aristida aristiglumis* Caro; *Aristida leptochaeta* Hack.; *Aristida misionum* Mez; *Aristida rosacea* Mez; *Aristida succedanea* Henrard)

South America, Brazil. Perennial, caespitose, erect, leaf blades involute, panicle narrowly oblong, glumes lanceolate, awns ascending, low forage value, stony places, similar to *Aristida succedanea* Henrard and *Aristida aristiglumis* Caro, see *Kongliga Svenska Vetenskapsakademiens Handlingar* 34(6): 13, t. 7A. 1900, *Repertorium Specierum Novarum Regni Vegetabilis* 6(21-26): 344. 1909, *Repertorium Specierum Novarum Regni Vegetabilis* 7: 313. 1909, *Repertorium Specierum Novarum Regni Vegetabilis* 17(8-12): 151. 1921, *Mededeelingen van's Rijks-Herbarium* 58(A): 294, t. 144. 1932, *Mededeelingen van's Rijks-Herbarium* 54(C): 740-741. 1933, *Kurtziana* 1: 198-201, f. 18D-F. 1961.

A. cognata Trin. & Rupr. (*Aristida cognata* var. *media* Trin. & Rupr.)

West Indies. Forming clumps, see *Species Graminum Stipaceorum* 127-128. 1842 and *Manual of the Grasses of the West Indies* 1936, *Flora of the Netherlands Antilles* 1: 121-203. 1963, *Flora of the Lesser Antilles, Leeward and Windward Islands* 3: 25-220. 1979, *Sida* 13(4): 423-447. 1989, *Memoirs of the New York Botanical Garden* 78: 509-540. 1996.

in English: spreading three-awn

A. condensata Chapman (*Aristida combsii* Scribn. & C.R. Ball; *Aristida condensata* var. *combsii* (Scribn. & Ball) Henr.; *Aristida stricta* var. *condensata* (Chapm.) Vasey) (for Robert Combs, 1872-1899)

Warm regions, U.S., Florida. In dry soil, sandy soils, see *Flora Boreali-Americana* 1: 41. 1803, *Botanical Gazette* 3(3): 19. 1878, *Contributions from the United States National Herbarium* 3(1): 45. 1892 and *Bulletin, Division of Agrostology United States Department of Agriculture* 24:

43, f. 17. 1901, *Mededeelingen van's Rijks-Herbarium* 54: 108. 1926.

in English: Piedmont three-awn grass

A. condylifolia Caro

Argentina. See *Darwiniana* 14(2-3): 391. 1967.

A. congesta Roemer & Schultes (*Aristida alopecuroides* Hack.; *Aristida congesta* var. *megalostachya* Henrard; *Aristida congesta* var. *pilifera* Chiov.; *Aristida elyptrophoroides* Chiov.; *Chaetaria congesta* (Roem. & Schult.) Nees)

Southern Africa, Kenya, Namibia, Mozambique, Yemen. Perennial or annual, small, slender, erect, tufted or densely tufted, ligule a fringe of hairs, leaves rolled and glabrous, spike-like panicle dense and contracted with the primary branches erect, white flower heads, glumes unequal terminating in a short awn point, lemma scabrid, awns more or less equal, pioneer grass grazed by the sheep, stems eaten by baboons, found in waste ground, open sandy plains, deserts and xeric shrublands, semiarid woodlands, degraded sites, sandy soil, clayey soils, rocky sandy soils, similar to *Aristida barbicollis* Trin. & Rupr., see *Systema Vegetabilium* 2: 401. 1817, *Florae Africae Australioris Illustrationes Monographicae* I. Gramineae. 189. 1841, *Verhandlungen des Botanischen Vereins für die Provinz Brandenburg und die angrenzenden Länder* 30: 144. 1888 and *Annuario del Reale Istituto Botanico di Roma* 8(3): 333-334. 1908, *Agricoltura Coloniale* 18: 351. 1924, *Mededeelingen van's Rijks-Herbarium* 58: 126. 1929, *Mededeelingen van's Rijks-Herbarium* 54(C): 711. 1933, *Prodromus einer Flora von Südwestafrika* 160: 1-228. 1970.

in English: tassel bristlegrass, white stickgrass, tassel three-awn

in South Africa: katstertsteekgras, witsteekgras, steekgras, aapstertsteekgras, bolepo, lefielo

A. congesta Roemer & Schultes subsp. *barbicollis* (Trin. & Rupr.) De Winter (*Aristida barbicollis* Trin. & Rupr.)

Africa. Annual to perennial, tufted, slender, leaf sheath keeled, ligule a ring of hairs, open panicle, clusters of spikelets, a single floret with a tripartite awn, lower glume awned, very low grazing value, a pioneer grass, seeds penetrate the fleece, found in grassland areas, overgrazed veld, on disturbed areas, rocky hillsides, uncultivated lands, along roadsides, shallow sandy soils, dry areas, bushveld, see *Species Graminum Stipaceorum* 152. 1842.

in English: buffalo grass, piercing grass, spreading three-awn, spreading prickle grass, stick grass, tassel bristle grass, tassel three-awn, white stick grass, perennial stick grass, perennial bristle grass

in South Africa: aapstertsteekgras, besempol, duin(e)steekgras, katstertsteekgras, klossaadsteekgras, klitsgras, kortbeensteekgras, kortsteekgras, langsteekgras, lossteekgras, rotstertsteekgras, steekgras, witsteekgras; lefielo (Sotho)

A. congesta Roem. & Schult. subsp. **congesta** (*Aristida alopecuroides* Hack.; *Aristida longicauda* Hack. & Henriques; *Aristida longicauda* Hack.)

South Africa. Perennial or annual, densely tufted, slender, erect or geniculate, sometimes branched from the lower nodes, leaf sheath keeled, ligule a fringe of short hairs, leaf blades glabrous, spike-like panicle very dense and contracted, single floret with a 3-partite awn, lower glume awned, a pioneer grass, little value as grazing, grazed only when young, seeds penetrate the fleece, common in bushveld, grassland, hard or stony sites, semiarid regions, on loamy soil, denuded soil, savannah, along roadsides, uncultivated lands, overgrazed veld, see *Verhandlungen des Botanischen Vereins für die Provinz Brandenburg und die angrenzenden Länder* 30: 144. 1888, *Boletim da Sociedade Broteriana* 6: 143. 1888.

in English: buffalo grass, cat's-tail three-awned grass, piercing grass, stickgrass, tassel three-awned grass, tassel three-awn

in Southern Africa: katstertsteekgras, klossiesteekgras, kortbeen, meerjarige steekgras, steekgras, ausdauerndes stechgras; lefielo (Sotho)

A. constricta Longhi-Wagner

Brazil. See *Novon* 2(1): 39, f. 2. 1992.

A. contorta F. Muell. (*Aristida arenaria* Gaudich., nom. illeg., non *Aristida arenaria* Trin.; *Aristida arenaria* var. *brevistipitata* Henrard; *Aristida arenaria* var. *hirsuta* Henrard; *Aristida contorta* F. Muell. var. *hirsuta* (Henrard) H. Eichler; *Arthratherum arenarium* (Gaudich.) Nees ex Lehm.)

Australia. Ephemeral or annual or short-lived perennial, more or less drooping, densely tufted, small and weak, culms thin and wiry, sheath scabrous, leaves filiform and wavy, panicle contracted and often nodding, glumes nerved and mucronate to aristulate, lemma convolute and smooth, lemma brownish when mature and with an articulation below a twisted column, awns subequal or equal, the ripe florets can be harmful to animals, fruits round legs can immobilize sheep, grazing grass, moderate feed value when dry, readily eaten by stock especially when green, an increaser species, pioneer grass useful for erosion control and soil binding, coloniser on coastal plains and hind dunes, growing in dry areas, shallow soils, floodplains, mulga areas, on alluvial soils, alluvial plains, open woodlands, on loamy open woodland, on rocky slopes, fore dunes, on sandy soils, on sand clay and sandy loams, parklands, red-earth, sand plains, grasslands, see *Voyage autour du Monde, entrepris par Ordre du Roi, ... exécuté sur les Corvettes de S. M. l'Uranie et la Physicienne ... Botanique* 407. 1830, *Plantae Preissianae* 2: 98. 1846-1847, *Transactions and Proceedings of the Victorian Institute for the Advancement of Science* 1: 44. 1855 and *Mededeelingen van's Rijks-Herbarium* 54: 36. 1926, *Mededeelingen van's*

Rijks-Herbarium 54(C): 703. 1933, *Supplement to Black's Flora of South Australia* 48. 1965, *Brunonia* 3(2): 271-333. 1980, *Australian Systematic Botany* 5: 129-226. 1992.

in English: mulga grass, sand wire grass, wind grass, silver grass, curly wire grass, sand spear-grass, kerosene grass (= refers to its flammability as it dries), bunch kerosene grass, bunched kerosene grass

A. correlliae P.M. McKenzie, Urbatsch & Proctor (for the American botanist Donovan Stewart Correll, 1908-1983, orchidologist, USDA 1944-1956, Texas Research Foundation 1956-1972, Fairchild Tropical Garden 1973-1983, with Oakes Ames (1874-1950) wrote *Orchids of Guatemala*. Chicago 1952-1953, with Marshall Conring Johnston wrote *Manual of the Vascular Plants of Texas*. Texas Research Foundation, Renner, Texas 1970, he was married to Helen Elizabeth Butts on June 26, 1937. See J.H. Barnhart, *Biographical notes upon botanists* 1: 383. 1965; *Taxon* 32(3): 530. 1983; Donovan S. Correll, *Supplement to Orchids of Guatemala and British Honduras*. Chicago 1965; Helga Dietrich, *Bibliographia Orchidacearum*. Jena 1981)

West Indies. See *Systematic Botany* 15(3): 421-424. 1990.

A. cumingiana Trin. & Rupr. (*Aristida capillacea* Cav., nom. illeg., non *Aristida capillacea* Lam.; *Aristida cumingiana* var. *diminuta* (Mez) Jacq.-Fél.; *Aristida cumingiana* var. *reducta* Pilg.; *Aristida cumingiana* var. *uniseta* Stent & J.M. Rattray; *Aristida delicatula* Hochst. ex A. Rich.; *Aristida diminuta* (Mez) C.E. Hubb.; *Aristida trichodes* (Nees) Walp.; *Aristida tuberculosa* Nutt.; *Chaetaria trichodes* Nees; *Chaetaria tuberculosa* (Nutt.) Schult.; *Stipa diminuta* Mez)

Asia, Philippines. Annual, delicate, solitary or tufted, open inflorescence paniculate, very small spikelets, glumes unequal, lemma lanceolate, awns unequal, in moist areas, damp situations, see *Icones et Descriptiones Plantarum, quae aut sponte ...* 5: 43, t. 468, f. 1. 1799, *The Genera of North American Plants* 1: 57. 1818, *Mantissa* 2: 211. 1824, *Proceedings of the Rhodesia Scientific Association* 32: 48. 1833, *Species Graminum Stipaceorum* 141. 1842, *Hooker's Journal of Botany and Kew Garden Miscellany* 2: 101. 1850, *Tentamen Florae Abyssinicae ...* 2: 393. 1850, *Annals of Botany. Oxford* 3: 753. 1853 and *Repertorium Specierum Novarum Regni Vegetabilis* 17(13-18): 208. 1921, *Meded. Rijks-Herb.* 54: 80. 1926, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 11: 805. 1933, *Kew Bulletin* 4: 480. 1949, *Journal d'Agriculture Tropicale et de Botanique Appliquée* 13: 51. 1966, *Blumea* 37(1): 227. 1992.

in Thailand: ya khon kratai, ya lueat, yaa khon krataai, yaa lueat

A. curtifolia Hitchc.

Cuba. See *Contributions from the United States National Herbarium* 12(6): 235-236. 1909.

A. curvata Nees (*Aristida adscensionis* L.; *Aristida curvata* (Nees) Trin. & Rupr. ex Henrard; *Chaetaria curvata* Nees) Africa. See *Species Plantarum* 1: 82. 1753, *Florae Africae Australioris Illustrationes Monographicae* 186. 1841, *Tentamen Florae Abyssinicae ...* 2: 392. 1850 and *Mededeelingen van's Rijks-Herbarium* 54: 9, 124-126. 1926, *Mededeelingen van's Rijks-Herbarium* 54(B): 487. 1928.

A. cyanantha Steud. (*Chaetaria cyanantha* Nees)

Asia, India, Western Himalaya. Perennial, tufted, bushy, erect, solid, slender, purplish inflorescence, large spreading terminal panicle, a tripartite awn, grazed by cattle when tender, grows in dry places, on dry rocky soil, arid zones, stony soils, see *Synopsis Plantarum Glumacearum* 1: 141. 1855 [1854].

in India: matri jara, suhni, suhi

A. dasydesmis (Pilg.) Mez

South Africa. Perennial, densely tufted, erect, slender, much-branched, leaves folded and rigid, lower glume awnless, 3 awns, common in arid areas, see *Repertorium Specierum Novarum Regni Vegetabilis* 17(8-12): 148. 1921, *Mededeelingen van's Rijks-Herbarium* 54: 131. 1926.

A. depressa Retz.

Southern India, Sri Lanka. Annual, slender, hard, wiry, erect or ascending, more or less branched, narrow subulate leaves, panicle spike-like interrupted, spikelets sessile narrow and crowded, glumes muticous, thatching and matting grass, used to fill saddles of camels, probably not palatable, low nutritive value, flowers used for itch and ringworm, culms used for making brooms, dry and arid zones, saline habitats, sandy places, sometimes included in *Aristida adscensionis* L., see *Obs. Bot.* 4: 22. 1786 and *Grasses of Ceylon* 63. 1956, *Ceylon J. Sci., Biol. Sci.* 2(2): 126. 1959, *Grasses of Burma ...* 409. 1960.

in India: choti parba, ghyan, ghyani, lam, lam'e, lamb, lamba, lamp, nalli pootiki, rampla, sinka

in Sri Lanka: teli tana

A. desmantha Trin. & Rupr.

U.S., Texas. Annual, found in open sandy soil or sandy woods, see *Species Graminum Stipaceorum* 109. 1842.

in English: curly three-awn, three awn, curly threeawn, western tripleawn grass, western threeawn

A. dewinteri Giess (after the South African botanist Bernard De Winter (b. 1924), plant collector in the regions of Namibia, first collected this tree in the Kaokoveld, from 1973 to 1989 Director of the Botanical Research Institute, served as President of the South African Association for the Advancement of Science, as well as the South African Association of Botanists and as Chairman of the Advisory Committee for Botanical Research in Agriculture, his writings include "A morphological, anatomical and cytological study of *Potamophila prehensilis* (Nees) Benth." *Bothalia*. 6.

1951, "Plant life of the Namib Desert." *S. Afr. Biol. Soc.* 3: 19-20. 1962 and "South African trees." *S. Afr. For. J.* 88: 6-8. 1974, with M. De Winter and Donald Joseph Boomer Killick wrote *Sixty-Six Transvaal Trees*. Pretoria 1966 and *Know Your Trees. A Selection of Indigenous South African Trees*. Cape Town 1973, with J. Vahrmeijer wrote *The National List of Trees*. Pretoria 1972)

South Africa. Annual, rare, tufted, bright yellow spikelets, glumes with a dark spot, lower glume without a mucro or awn, 3 awns, see *Bothalia* 10(2): 365. 1971.

A. dichotoma Michaux (*Aristida dichotoma* f. *major* Shinnery; *Aristida dichotoma* var. *curtissii* Gray ex S. Watson & Coulter; *Aristida basiramea* Engelmann ex Vasey var. *curtissii* (A. Gray) Shinnery; *Avena paradoxa* Willd. ex Kunth; *Avena setacea* Muhl. ex Trin., nom. illeg., non *Avena setacea* Vill.; *Cyrtopogon dichotomus* (Michx.) P. Beauv.; *Cyrtopogon dichotomus* (Michx.) Spreng.)

U.S., Florida, Texas, Illinois, North Carolina, Canada, Ontario. Annual, central awn bent and basally coiled, side awns straight, growing in dry soil, open upland woods, sterile soils, along highways, rocky prairies, eroded slopes, often in hard white clay soil, see *Flora Boreali-Americana* 1: 41. 1803, *Essai d'une Nouvelle Agrostographie* 32, 159, t. 8, f. 7. 1812, *Systema Vegetabilium, editio decima sexta* 1: 266. 1825, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 1(1): 87. 1830, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 188. 1833, *Botanical Gazette* 9: 76. 1884, *A Manual of the Botany of the Northern United States (edition 6)* 640. 1890 and *Contr. U.S. Natl. Herb.* 22(7): 535. 1924, *American Midland Naturalist* 23: 633-634. 1940.

in English: Shinnery's three-awn, Shinnery's three-awned grass, churchmouse three-awn, church mouse three-awn, churchmouse threeawn, povertygrass, poverty-grass, three-awn grass

A. dichotoma Michx. var. *curtissii* Gray ex S. Watson & Coulter (*Aristida basiramea* var. *curtissii* (Gray ex S. Wats. & Coult.) Shinnery; *Aristida basiramea* var. *curtissii* (A. Gray) Shinnery; *Aristida curtissii* (Gray ex S. Wats. & Coult.) Nash; *Aristida curtissii* (A. Gray) Nash; *Aristida dichotoma* var. *curtissii* A. Gray)

U.S. Annual, caespitose, open sandy soils, eroded soils, dry open sites, see *Flora Boreali-Americana* 1: 41. 1803, *Botanical Gazette* 9: 76. 1884, *A Manual of the Botany of the Northern United States (edition 6)* 640. 1890 and *Manual of the Flora of the Northern States and Canada* 94. 1901, *Contr. U.S. Natl. Herb.* 22(7): 535. 1924, *American Midland Naturalist* 23: 633. 1940.

A. dichotoma Michx. var. *dichotoma*

U.S. See *Flora Boreali-Americana* 1: 41. 1803.

A. diffusa Trin. (*Aristida vestita* var. *diffusa* (Trin.) Trin. & Rupr.)

South Africa, Lesotho, Zimbabwe, Botswana. Perennial, caespitose, wiry, flexible leaves, unpalatable, very low grazing value, useful for erosion control, used for making soft brooms, found in shallow and stony soils, dry ground, on sandy soils, open places, poor overgrazed veld, roadsides, see *Prodromus Plantarum Capensium*, ... 19. 1794, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 1(1): 86. 1830, *Species Graminum Stipaceorum* 157-158. 1842 and *Mededeelingen van's Rijks-Herbarium* 54(B): 665-668. 1928.

in English: copper wiregrass, iron grass

in South Africa: koperdraadgras, ystergras, lefielo, monya

A. diffusa Trin. subsp. *burkei* (Stapf) Melderis (*Aristida burkei* Stapf; *Aristida diffusa* var. *burkei* (Stapf) Schweick.)

Transvaal, South Africa, Lesotho, Zimbabwe, Botswana. Perennial, densely tufted, unbranched or nearly so, slender, dark nodes, auricles glabrous, leaf sheath glabrous, hard leaves, inflorescence an open panicle, spikelets 3-awned, lower glume obtuse and unawned, unpalatable, of little value for grazing, growing on shallow stony soils, in open grassland, on slopes, in overgrazed veld, see *Flora Capensis* 7: 557. 1899 and *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 14(122): 195-196. 1938.

in English: iron grass

in South Africa: koperdraadgras, ystergras

A. diffusa Trin. subsp. *diffusa* (*Aristida diffusa* var. *genuina* Henr.; *Aristida diffusa* var. *pseudo-hystrix* (Trin. & Rupr.) Henr.; *Aristida diffusa* var. *pseudohystrix* (Trin. & Rupr.) Henrard)

South Africa. Perennial, erect, slender, densely tufted, unbranched or branched, leaves flexible, 3 awns, common in sandy soils, rocks, disturbed places, see *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 1(1): 86. 1830, *Species Graminum Stipaceorum* 158. 1842 and *Mededeelingen van's Rijks-Herbarium* 54(B): 471. 1928.

A. divaricata Humb. & Bonpl. ex Willd. (*Aristida barbata* E. Fourn.; *Aristida barbata* E. Fourn. ex Hemsl.; *Aristida divaricata* J. Jacq., nom. illeg., non *Aristida divaricata* Humb. & Bonpl. ex Willd.; *Aristida divaricata* Lag., nom. illeg., non *Aristida divaricata* Humb. & Bonpl. ex Willd.; *Aristida divaricata* Lag. ex Henrard, nom. illeg., non *Aristida divaricata* Humb. & Bonpl. ex Willd.; *Aristida havardii* Vasey; *Aristida humboldtiana* Trin. & Rupr.; *Aristida jacquiniana* var. *subaequilonga* Henrard; *Aristida lemmonii* Scribn.; *Aristida mexicana* Scribn. ex Henrard; *Aristida oligantha* Michx.; *Aristida palmeri* Vasey; *Aristida scova* Vasey ex Beal; *Chaetaria divaricata* (Humb. & Bonpl. ex

Willd.) P. Beauv.) (after the French-born American botanist Valéry Havard, 1846-1927, physician, botanical collector in Texas and the Southwest; see J.H. Barnhart, *Biographical notes upon botanists*. 2: 140. 1965; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. Philadelphia 1964; Ethelyn Maria Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933; Joseph Ewan, *Rocky Mountain Naturalists*. 224-225. The University of Denver Press 1950; Joseph William Blankinship (1862-1938), "A century of botanical exploration in Montana, 1805-1905: collectors, herbaria and bibliography." in *Montana Agric. Coll. Sci. Studies Bot.* 1: 1-31. 1904 [1905]; F.A. Stafleu and R.S. Cowan, *Taxonomic literature*. 2: 105. Utrecht 1979)

U.S., Texas, California, Mexico. Perennial bunchgrass, erect, simple, glabrous, dark green, leaves mostly basal, very open inflorescence, each spikelet with 3 spreading awns at its tip, twisted awn column, glumes subequal, poor forage, grows on dry rocky hills, sandy fields, desert grassland, see *Flora Boreali-Americana* 1: 41. 1803, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 99. 1809, *Essai d'une Nouvelle Agrostographie* 30, 158. 1812, *Eclogae Graminum Rariorum* 7, t. 6. 1813, *Nov. Gen. Sp.* 1: 123. 1816, *Genera et species plantarum* 3. 1816, *Flora* 19(2): 508. 1836, *Species Graminum Stipaceorum* 118. 1842, *Bulletin of the Torrey Botanical Club* 10: 42. 1883, *Biologia Centrali-Americana; ... Botany ...* 3: 532. 1885, *Mexicanas Plantas* 2: 78. 1886, *Bulletin of the Torrey Botanical Club* 13(2): 27. 1886, *Transactions of the New York Academy of Sciences* 14(2): 23. 1894, *Grasses of North America for Farmers and Students* 2: 199. 1896 and *Contr. U.S. Natl. Herb.* 22(7): 548. 1924, *Mededeelingen van's Rijks-Herbarium* 54: 150. 1926, *Mededeelingen van's Rijks-Herbarium* 54(A): 270, 345-347. 1927, *Phytologia* 37(4): 317-407. 1977.

in English: poverty three-awn, poverty threeawn, spreading threeawn, spreading three-awn grass

in Mexico: tres aristas barbado, tres barbas abierto, zacate

A. divulsa N.J. Andersson (*Chloris anisopoda* Rob.; *Chloris anisopoda* Scribn. ex B.L. Rob.)

Galápagos Islands, Ecuador. Rare species, perennial, erect, densely caespitose, open inflorescence, panicle branches naked at the base, glabrous glumes, awns minutely scabrous, see *Om Galapagos-öarnes Vegetation* 143. Lund 1854, *Kongl. Svensk. Vet.-Akad. Handl.* 1853: 143. 1855 and *Proceedings of the American Academy of Arts and Sciences* 38: 118. 1902, Ira L. Wiggins & Duncan M. Porter, *Flora of the Galápagos Islands* 827-828. Stanford, California 1971, *Patterns of Evolution in Galapagos Organisms* 33-54. 1983, *Reports from the Botanical Institute, University of Aarhus* 16: 1-74. 1987, *Libro Rojo de las Plantas Endémicas del Ecuador* 2000.

A. dominii B.K. Simon

Tropical Australia, Queensland. Annual, compact, tufted, confused with *Aristida hirta* and *Aristida superpendens* see *Austrobaileya* 2(3): 281, f. 1. 1986.

A. echinata Henrard (*Aristida ramosa* var. *scaberula* Henrard)

Queensland. Perennial, coarse, compact, tufted, strongly branched, lemmas tuberculate, see *Prodromus Florae Novae Hollandiae* 1: 173. 1810 and *Mededeelingen van's Rijks-Herbarium* 58(A): 285, t. 139. 1929, *Mededeelingen van's Rijks-Herbarium* 58(A): 260. 1932, *Meded. Rijks-Herb.* 54(C): 713-714, 736. 1933.

A. echinulata Roseng. & Izag.

Uruguay. Perennial, low forage value, see *Boletín de la Facultad de Agronomía de Universidad de la República, Montevideo* 94: 3, f. 1. 1967.

A. ecuadoriensis Henrard

Ecuador. Perennial, caespitose, erect, scabrid, ligule a rim of short hairs, blades of culm leaves folded or involute, narrow inflorescence paniculate, spikelets linear, panicle branches soft, glumes slightly unequal, lemma shortly bearded, palea membranous, lodicules narrowly obovate, 3 stamens, along roadsides, slopes, see *Mededeelingen van's Rijks-Herbarium* 58(A): 307, t. 149. 1932.

A. effusa Henr. (*Aristida caerulescens* var. *brevisetata* Hack.; *Aristida waibeliana* Henrard)

South Africa, Namibia. Annual, erect, tufted, branched, leaf blade glabrous, ligule a fringe of hairs, leaf sheath keeled, open ovate inflorescence, spikelets clustered at the end of the branches, lower glume acute and unawned, 3 awns, pioneer, found in dense stands, unsuitable for grazing, little forage value, common on stony soils, along roadsides, see *Flora Atlantica* 1: 109, t. 21, f. 2. 1798, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 11: 400. 1889 and *Mededeelingen van's Rijks-Herbarium* 54: 155-156. 1926, *Mededeelingen van's Rijks-Herbarium* 54(B): 679-681. 1928.

in English: spreading steekgras, spreading stick grass

in South Africa: pluimsteekgras, rispen-stechgras

A. ekmaniana Henr. (*Aristida ekmaniana* Henrard; *Aristida riparia* sensu Eckm., non Trin.; *Aristida trinii* Henrard) (for the Swedish botanist Erik Leonard Ekman, 1883-1931, explorer, plant collector in Argentina, Brazil, Cuba and Hispaniola. See J.H. Barnhart, *Biographical notes upon botanists*. 1: 502. 1965; Carl Frederik Albert Christensen (1872-1942), *The Collection of Pteridophyta Made in Hispaniola by E.L. Ekman 1917 and 1924-1930*. Stockholm 1936 in *Kongl. Vetenskaps Akademiens Handlingar*. Ser. 3. bd. 16. no. 2; [Por el Dr. Erik L. Ekman.], *Excursión Botánica al Nord-Oeste de la República Dominicana*. Santo Domingo 1930; Ida Kaplan Langman, *A Selected Guide to*

the Literature on the Flowering Plants of Mexico. Philadelphia 1964)

Brazil. Perennial, forming small tufts, see *Mededeelingen van's Rijks-Herbarium* 54: 160-161. 1926, *Mededeelingen van's Rijks-Herbarium* 54(B): 638-640. 1928, *Acta Botanica Brasilica* 4(1): 105-124. 1990, *Boletim do Instituto de Botânica* (São Paulo) 12: 113-179. 1999.

A. elliptica (Nees) Kunth (*Chaetaria elliptica* Nees)

America. See *Flora Brasiliensis seu Enumeratio Plantarum* 2: 389-390. 1829, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 93. 1833 and *Meded. Rijks-Herb.* 54: 166. 1926, *Bol. Inst. Bot.* (São Paulo) 12: 130. 1999.

A. eludens Allred & Valdés-Reyna

Mexico. See *Novon* 5(3): 212-214, f. 3. 1995.

A. engleri Mez

Africa, Namibia. Perennial, tufted, inflorescence a contracted panicle, pioneer grass, see *Repertorium Specierum Novarum Regni Vegetabilis* 17(8-12): 147. 1921.

in English: Engler's bristle grass

A. engleri Mez var. *engleri*

South Africa. Perennial, densely tufted, unbranched or sparsely branched, erect to geniculate, leaf blade glabrous, ligule a fringe of short hairs, leaf sheaths of lower leaves keeled, leaves flexible, inflorescence a contracted panicle, lower glume acute, column extending to form three awns, found in rocky places.

in English: Engler's bristle grass, bristle three-awn

in South Africa: Engler-se-steekgras, gelbes stechgras

A. engleri Mez var. *ramosissima* De Winter

South Africa. Perennial, much-branched, tufted, leaf blade more or less expanded, ligule a fringe of short hairs, leaf sheaths keeled, leaves flexible, inflorescence an open panicle, column extending to form three awns, little forage value, on red sandy soils, rocky places, stony soil, see *Kirkia* 3: 132. 1963.

in South Africa: Engler-se-steekgras, gelbes stechgras

A. erecta Hitchc.

Cuba. See *Contributions from the United States National Herbarium* 12(6): 236. 1909.

A. exserta S.T. Blake

Australia, western Australia, Northern Territory, Queensland. Perennial, tufted, compact, thin, fastigiate, inflorescences loosely contracted, small spiciform panicles, lower glumes 3-nerved, lemmas involute, close to *Aristida capillifolia*, see *Proceedings of the Royal Society of Queensland* 51(10): 172, t. 5, f. 6-9. 1940.

A. fendleriana Steud. (*Aristida fasciculata* var. *fendleriana* (Steud.) Vasey ex L.H. Dewey; *Aristida longiseta* var. *fendleriana* (Steud.) Merr.; *Aristida purpurea* Nutt. var. *fend-*

deri Vasey; *Aristida purpurea* Nutt. var. *fendleriana* (Steud.) Vasey; *Aristida subuniflora* Nash)

U.S., New Mexico. Perennial bunchgrass, often weedy, ligules hairy, short curly mostly basal leaves, inflorescence paniculate, tripartite awn, colonizer grass, forage, found on sandy or gravelly soils, dry sandy soils, disturbed sites, sandy loams soils, see *Annals of the Lyceum of Natural History of New York* 1(1): 154-155. 1824, *Transactions of the American Philosophical Society, new series*, 5: 145. 1837, *Synopsis Plantarum Glumacearum* 1: 420. 1855 [1854], *Catalogue of Plants* 55. 1874, *Contributions from the United States National Herbarium* 3(1): 46. 1892, *Contributions from the United States National Herbarium* 2(3): 515. 1894 and *Circular, Division of Agrostology, United States Department of Agriculture* 34: 5-6. 1901, *Flora of the Southeastern United States ...* 116. 1903, *Great Basin Naturalist* 50: 74. 1990.

in English: Fendler threeawn, threeawn

in Mexico: tres aristas largo

A. ferrilateris S.M. Phillips (*Aristida adoensis* auct.)

Arabia, Yemen. Perennial, erect, densely tufted, smooth, leaves flat or involute, panicle contracted with branches erect or spreading or deflexed, glumes more or less equal terminating in a short awn point, smooth lemma, awns unequal, grows on open grassy cliff edges, rocky slopes, in shallow grassland among rocks, related to *Aristida adoensis* Hochst., see *Kew Bulletin* 41(4): 1029. 1986.

A. filifolia (Arechav.) Herter (*Aristida pallens* f. *filifolia* Arechav.; *Aristida pallens* f. *rubelliana* Arechav.; *Aristida pallens* var. *patula* Trin. & Rupr.; *Aristida pallens* var. *tragopogon* Trin. & Rupr.; *Aristida rubelliana* (Arechav.) Herter)

Uruguay. Perennial, low forage value, stony places, hills, slopes, see *Icones et Descriptiones Plantarum, quae aut sponte ...* 5: 43, t. 468, f. 2. 1799, *Species Graminum Stipaceorum* 116-117. 1842 and *Anales del Museo Nacional de Montevideo* 4(1): 72, 75, pl. 2. 1902, *Revista Sudamericana de Botánica* 6(5-6): 141. 1940, *Revista Sudamericana de Botánica* 9: 99. 1953.

America. See *Kurtziana* 1: 150-151. 1961.

A. flaccida Trin. & Rupr. (*Aristida flaccida* var. *uniglumis* Döll; *Aristida laxa* Trin. ex Henrard, nom. illeg., non *Aristida laxa* Cav.)

Brazil. In dry areas, see *Species Graminum Stipaceorum* 117-118. 1842, *Flora Brasiliensis* 2(3): 13. 1878 and *Mededeelingen van's Rijks-Herbarium* 54: 178-179, 202. 1926.

A. flexuosa E. Fourn. (*Aristida flexuosa* E. Fourn. ex Hemsl.; *Aristida schiedeana* Trin. & Rupr.; *Aristida schiedeana* var. *schiedeana*)

Mexico. See *Species Graminum Stipaceorum* 120-121. 1842, *Biologia Centrali-Americana; ... Botany ...* 3: 533. 1885, *Mexicanas Plantas* 2: 77. 1886.

A. floridana (Chapman) Vasey (*Ortachne floridana* (Chapm.) Nash; *Streptachne floridana* Chapm.)

U.S., Florida. Endangered species, see *Flora of the Southern United States* 554. 1860, *A Descriptive Catalogue of the Grasses of the United States* 35. 1885 and *Flora of the Southeastern United States ... edition 2* 119. 1903, Robert W. Long and Olga Lakela, *A Flora of Tropical Florida* Coral Gables, Fla. 1971.

in English: Key West three-awn, Key West threeawn, Key West three-awned grass, Florida three-awned grass

A. forsteri B.K. Simon

Australia, southern Queensland. Perennial, compact, tufted, branched, inflorescences loosely contracted, lower glume 1-nerved, similar to *Aristida muricata*, see *Austrobaileya* 4(2): 147. 1994.

A. fragilis Hitchc. & Ekman

Cuba. Perennial, erect, caespitose, wiry, slender, glabrous, leaf sheaths glabrous, ligule a ciliate membrane, awn bent at the base, see *North American Flora* 17(5): 393. 1935.

A. friesii Hack. ex Henrard

Bolivia. See *Mededeelingen van's Rijks-Herbarium* 54: 186-187. 1926.

A. funiculata Trin. & Rupr. (*Aristida macrathera* A. Rich.)

North Africa to Pakistan, Somalia, Sudan, White Nile region, boundary between the Saharan and Sahelian zones. Annual, erect, wiry, very slender, densely tufted, short, many stemmed, leaves flat or folded, contracted panicle linear, unequal glumes linear-lanceolate, lower glume longer than the upper, awns more or less equal, long filiform awns with three capillary branches, used for fodder, eaten by cattle in the young stage and when tender, desert grass, on very poor dry rocky soil, dry sandy soils, stony plain, see *Nomenclator Botanicus. Editio secunda* 1: 131. 1840, *Species Graminum Stipaceorum* 159. 1842, *Tentamen Florae Abyssinicae ...* 2: 393. 1850, *Journal of the Asiatic Society of Bengal. Part 2. Svenska Vetenskapsakademien* 10(17): 23, t. 3, f. 2, t. 6, f. 12. 1911, *Proceedings of the American Academy of Arts and Sciences* 49(8): 500. 1913, *Mededeelingen van's Rijks-Herbarium* 54(B): 473. 1928.

A. glaziovii Hack. ex Henrard

Brazil. See *Mededeelingen van's Rijks-Herbarium* 54: 204. 1926.

A. gracilipes Henrard (*Aristida vagans* var. *gracilipes* Domin; *Aristida vagans* var. *gracillima* Benth.)

Queensland, New South Wales. Perennial, bushy, slender, loosely tufted, culms terete and branched, leaves finely pointed and long scabrous, panicle loose to open, glumes lanceolate and acuminate, upper glume obtuse and notched, beaked lemma linear to elliptic, awns erect or divergent, rainforest, in woodland, similar to *Aristida caput-medusae* and *Aristida vagans*, see *Icones Plantarum* 5: 45, t. 471, f. 1. 1799, *Flora Australiensis: A Description ...* 7: 563. 1878 and *Repertorium Specierum Novarum Regni Vegetabilis* 9: 551. 1911, *Mededeelingen van's Rijks-Herbarium* 54: 209. 1926.

in English: wire grass

A. gracillima Oliv.

Africa. See *Transactions of the Linnean Society of London* 29: 173, t. 114. 1875.

A. granitica B.K. Simon

Queensland. Perennial, compact, tufted, endangered species, lower glume shorter than the upper, similar to *Aristida dominii* and *Aristida superpendens*, see *Austrobaileya* 2(1): 91, f. 2A. 1984, *Australian Systematic Botany* 5: 129-226. 1992.

A. guayllabambensis Laegaard (Ecuador, Pichincha, near Guayllabamba, north of Quito)

Ecuador. Perennial, densely caespitose, erect, glabrous, leaf blades narrowly linear, ligule a dense rim of hairs, inflorescence a narrow panicle with branches erect, narrow spikelets, glumes subequal or unequal, lemma fusiform and slightly rough, palea membranous and 2-nerved, narrow membranous lodicules, 3 stamens, along roadsides, arid zones, dry slopes, open sandy slopes, related to *Aristida venezuelae* Henrard, see *Flora of Ecuador* 57: 49, f. 9A-C. 1997 [also *Flora of Ecuador*, no. 57. 214(1) *Gramineae* (part 1): 49-52. 1997], R. Valencia, N. Pitman, S. León-Yáñez & P.M. Jørgensen, *Libro Rojo de las Plantas Endémicas del Ecuador* 2000.

A. gypsophila Beetle (*Aristida gypsophila* f. *diffusa* Allred & Valdés-Reyna; *Aristida gypsophila* f. *gypsophiloides* Allred & Valdés-Reyna)

Warm regions, Mexico. Tufted, good forage, rocky soils, see *Phytologia* 49(1): 36-37. 1981, *Brittonia* 49(1): 65. 1997.

in English: gypsum threeawn

A. gypsophila Beetle f. *diffusa* Allred & Valdés-Reyna

Mexico. See *Brittonia* 49(1): 65. 1997.

A. gypsophila Beetle f. *gypsophila*

America.

A. gypsophila Beetle f. *gypsophiloides* Allred & Valdés-Reyna

Mexico. See *Brittonia* 49(1): 65. 1997.

A. gyrans Chapman (*Aristida refracta* Griseb.)

U.S., Florida. Perennial, green spikelets, growing in flatwoods, scrub, dry sandy pinelands, disturbed sites and dry sandy soils, see *Catalogus plantarum cubensium* ... 228. 1866, *Botanical Gazette* 3(3): 18-19. 1878.

in English: corkscrew three-awn, corkscrew three-awn grass

A. hackelii Arechav.

Uruguay. Perennial, stony ground, low forage value, see *Anales del Museo Nacional de Montevideo* 4(1): 73, 79. 1902.

A. hamulosa Henrard (*Aristida gentilis* var. *breviaristata* Henrard; *Aristida humboldtiana* var. *minor* Vasey; *Aristida imbricata* Henrard; *Aristida ternipes* var. *gentilis* (Henrard) Allred; *Aristida ternipes* var. *hamulosa* (Henrard) Trent)

U.S., Arizona. Perennial, simple, glabrous, basal leaves, open panicle, glumes subequal, forage, open soil, bare soil, dry open soils, rocky places, gravel, related to *Aristida ternipes* Cav., see *Icones et Descriptiones Plantarum, quae aut sponte* ... 5: 46. 1799, *Species Graminum Stipaceorum* 118. 1842, *Contributions from the United States National Herbarium* 3(1): 47. 1892 and *Contr. U.S. Natl. Herb.* 22(7): 548. 1924, *Mededeelingen van's Rijks-Herbarium* 54: 196-197, 219-221. 1926, *Mededeelingen van's Rijks-Herbarium* 54(A): 253-255. 1927, *Sida* 10(2): 260. 1990, *Phytologia* 77(5): 412. 1994 [1995].

A. hassleri Hack. (*Aristida hassleri* var. *aculeolata* Hack.; *Aristida longiramea* var. *boliviana* Henrard)

Paraguay. Perennial, caespitose, leaf blades spirally coiled when old, awns recurved, unpalatable, see *Reliquiae Haenkeanae* 1(4-5): 224. 1830, *Bulletin de l'Herbier Boissier, sér. 2*, 4(3): 277. 1904, *Repertorium Specierum Novarum Regni Vegetabilis* 7: 373. 1909, *Mededeelingen van's Rijks-Herbarium* 40: 56. 1921, *Mededeelingen van's Rijks-Herbarium* 54(A): 222. 1927.

A. havardii Vasey (*Aristida barbata* E. Fourn.; *Aristida barbata* E. Fourn. ex Hemsl.; *Aristida divaricata* Humb. & Bonpl. ex Willd.; *Aristida scova* Vasey ex Beal) (dedicated to the French-born American botanist Valery Havard, 1846-1927)

U.S., New Mexico, Texas. Perennial, decumbent, branched, leaves linear or curved, open panicles, straight column, prairies, see *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 99. 1809, *Essai d'une Nouvelle Agrostographie* 30, 158. 1812, *Biologia Centrali-Americana*; ... *Botany* ... 3: 532. 1885, *Mexicanas Plantas* 2: 78. 1886, *Bulletin of the Torrey Botanical Club* 13(2): 27. 1886, *Grasses of North America for Farmers and Students* 2: 199. 1896.

in English: Havard's three-awn, Havard threeawn

A. helicophylla S.T. Blake (Greek *helix*, *helikos* "whirl, convolution" and *phyllon* "a leaf")

Queensland, New South Wales, Northern Territory. Perennial, erect, glaucous or pruinose, simple or sparsely branched, sheath smooth, leaves curly or flexuous, panicle spike-like, glumes unequal, lower glume acute to acuminate, lemma brown or purple and narrow-elliptic, lemma much shorter than the glumes and with a pseudo-articulation, awns flattened and recurved to flexuous, grows on sandy soils, see *Proceedings of the Royal Society of Queensland* 51: 171, t. 4, f. 8-12. 1940, *Brunonia* 3(2): 271-333. 1980.

A. hintonii Hitchc.

Mexico. See *North American Flora* 17(5): 382. 1935.

A. hitchcockiana Henrard

Mexico. See *Mededeelingen van's Rijks-Herbarium* 54(A): 233-234. 1927.

A. holathera Domin (*Aristida browniana* Henrard; *Aristida muelleri* Henrard; *Aristida stipoides* R. Br., nom. illeg., non *Aristida stipoides* Lam.; *Aristida stipoides* var. *brachyathera* Domin; *Aristida stipoides* var. *normalis* Domin; *Aristida stipoides* var. *tenuisetulosa* Pilg.; *Aristida tenuisetulosa* (Pilg.) Mez)

Australia. Sand dune stabilizer, see *Tableau Encyclopédique et Méthodique ... Botanique* 1: 157. 1791, *Prodromus Florae Novae Hollandiae* 1: 174. 1810, *Essai d'une Nouvelle Agrostographie* 33, 152. 1812 and *Fragmenta Florae Philippinae* 2: 146. 1904, *Bibliotheca Botanica* 85(2): 337, 340, t. 13-14, f. 9, 12, 18-19. 1915, *Repertorium Specierum Novarum Regni Vegetabilis* 17(8-12): 147. 1921, *Mededeelingen van's Rijks-Herbarium* 54: 63-64. 1926, *Mededeelingen van's Rijks-Herbarium* 54(A): 358-359. 1927, *Mededeelingen van's Rijks-Herbarium* 54(B): 593, 627. 1928, *Austrobaileya* 2(1): 95, f. 3A. 1984, *Austrobaileya* 2: 283. 1986, *Blumea* 37(1): 228. 1992.

A. holathera Domin var. **holathera** (*Aristida browniana* Henrard; *Aristida browniana* var. *browniana*; *Aristida muelleri* Henrard; *Aristida stipoides* R. Br., nom. illeg., non *Aristida stipoides* Lam.) (Greek *holos* "entire" and *ather* "stalk, barb, spine, beard, awn")

Australia. Short-lived perennial or annual, tufted, stiffly erect, simple or branched, sheath striate, leaves rigid and scabrous, panicle sparse, glumes very unequal and nerved, lemma with an articulation or swollen joint below a twisted column, lemma purplish when mature, awns subequal and filiform, normally neglected by stock, low palatability and nutritional value when dry, grazed when young, found on sandy soils and sand dunes, alluvial plains, coarse sandy soils on riverbanks, see *Tableau Encyclopédique et Méthodique ... Botanique* 1: 157. 1791, *Prodromus Florae Novae Hollandiae* 1: 174. 1810, *Essai d'une Nouvelle*

Agrostographie 33, 152. 1812 and *Fragmenta Florae Philippinae* 2: 146. 1904, *Bibliotheca Botanica* 85(2): 337, 340, t. 13-14, f. 9, 12, 18-19. 1915, *Repertorium Specierum Novarum Regni Vegetabilis* 17(8-12): 147. 1921, *Mededeelingen van's Rijks-Herbarium* 54: 63-64. 1926, *Mededeelingen van's Rijks-Herbarium* 54(A): 358-359. 1927, *Mededeelingen van's Rijks-Herbarium* 54(B): 593, 627. 1928, *Austrobaileya* 2(1): 95, f. 3A. 1984, *Austrobaileya* 2: 283. 1986, *Blumea* 37(1): 228. 1992.

in English: kerosene grass, erect kerosene grass, tall kerosene grass, white grass

A. holathera Domin var. *latifolia* (B.K. Simon) B.K. Simon (*Aristida browniana* var. *latifolia* B.K. Simon)

Australia. Perennial, loosely tufted, unbranched, leaf blades flattened, see *Austrobaileya* 2(1): 95, f. 3A. 1984, *Austrobaileya* 2: 283. 1986.

A. hordeacea Kunth (*Aristida hordeacea* Hochst. ex Steud., nom. illeg., non *Aristida hordeacea* Kunth; *Aristida hordeacea* var. *longiaristata* Henrard; *Aristida steudeliana* Trin. & Rupr.)

Tropical Africa, Benin, Namibia. Annual, erect or geniculate, ascending, tufted, delicate to robust, coarse, much branched from the base, culm internodes pubescent, leaf blade expanded and linear, ligule a whorl of short hairs, leaves and sheaths scabrid, leaf sheath keeled and hairy, very dense inflorescence spicate, a dense compact panicle oblong, spikelets clustered in fascicles, glumes subequal, lower glume long-awned, column absent, three awns, a wet season grass, low grazing value, no forage value, pioneer, grows in dry situations, small pans, heavy soils, vleis, banks of vleis, open areas, open grassland, dry grassland, shallow depressions, swampy areas, mopane woodlands, waste places, deciduous bush savannah, see *Révision des Graminées* 2: 517, t. 173. 1831, *Species Graminum Stipaceorum* 155. 1842, *Synopsis Plantarum Glumacearum* 1: 142. 1854 and *Mededeelingen van's Rijks-Herbarium* 54(A): 244. 1927.

in English: fox brush

in Niger: alaemos, fari'n hatji, kalafhu, lillimo, milmilo, ngibi bulduy , sewuko, subu kur g , tazmei

in Nigeria: wutsiyar bera, wutsiyar 'bera

in South Africa: jakkalsstert, garssteekgras, gersten-stechgras

in Upper Volta: bonguburu, butakureje

A. hubbardiana Schweick.

Africa. Annual, branched, erect to geniculate, densely tufted, inflorescence dense and spicate, no articulation on the lemma, column absent, three awns, on damp soil, seasonally flood depressions, see *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 14(122): 196-197. 1938.

A. hygrometrica R. Br.

Australia tropical and semiarid. An increaser species, annual, loosely tufted, with spear-like callus, a severe hazard to sheep, in sandy and alluvial soils, similar to *Aristida holathera* and *Aristida contorta*, see *Prodromus Florae Novae Hollandiae* 174. 1810 and *Mededeelingen van's Rijks-Herbarium* 54(A): 248. 1927.

in English: northern kerosene grass

A. hystrix L.f.

Northern India. Branched, rigid, rather straggling, large oval panicle with spreading branches, probably not palatable or grazed by cattle only when tender, common on dry sandy or stony soils, see *Suppl. Pl.* 113. 1781 [1782] and *Handb. Fl. Ceylon* 6: 336. 1931, *Grasses of Ceylon* 64. 1956, *Ceylon J. Sci., Biol. Sci.* 2(2): 126. 1959, *Grasses of Burma ...* 410. 1960.

in India: bili unugada hullu, dolluba gaddi, kale kussal, lal rampla, lappa, lapri dhauli, mathari kussal, pavenburri, pavnburri, shilpuroo-kalli

A. inaequiglumis Domin

South Australia, Queensland, Western Australia, Northern Territory. Perennial, loosely tufted, robust, culms branched and leafy, leaves scabrous, inflorescence narrow-cylindrical, acuminate glumes inverse and nerved, lemma smooth with a pseudo-articulation at the apex, awns equal, unpalatable and normally neglected by stock, growing on alluvial soils, on floodplains, mulga shrublands, on red earths, on river frontages, on sandy soils, very similar to *Aristida pruinosa*, *Aristida ingrata* and *Aristida helicophylla*, see *Bibliotheca Botanica* 85(2): 347. 1915.

in English: wiregrass, speargrass, unequal threeawn, feathertop threeawn

A. ingrata Domin

Tropical Australia, Queensland. Perennial, loosely tufted, branched, leaf blades coiled at maturity, smooth lemma grooves, lemma with a pseudoarticulation, in alluvial soils and sand, similar to *Aristida sciuroides*, *Aristida inaequiglumis* and *Aristida helicophylla*, see *Bibliotheca Botanica* 85(2): 346. 1915.

A. jaliscana R. Guzm n & Jaramillo

Mexico. See *Phytologia* 51(7): 470. 1982.

A. jaucensis Catusus

Cuba. See *Novosti Sist. Vyss. Rast.* 21: 22. 1984, *Acta Botanica Cubana* 24: 2. 1985.

A. jerichoensis (Domin) Henrard (*Aristida ingrata* var. *jerichoensis* Domin)

Queensland, New South Wales, Northern Territory. Perennial, compactly tufted, culms simple or branched from the lower nodes, sheath smooth, flexuous leaves, panicle contracted and dense, glumes narrowly oblong-ovate and subequal, dark purplish lemma linear-oblong, awns flattened

and filiform, growing on sandy and clay loams, arid areas, similar to *Aristida benthamii*, see *Bibliotheca Botanica* 85(2): 346. 1915, *Mededeelingen van's Rijks-Herbarium* 54(A): 261, 270. 1927, *Mededeelingen van's Rijks-Herbarium* 58(A): 300. 1932, *Mededeelingen van's Rijks-Herbarium* 54(C): 722-723. 1933, *Austr. Syst. Bot.* 5: 175. 1992.

in English: Jericho wiregrass, number nine wiregrass, wiregrass

A. jerichoensis (Domin) Henrard var. *jerichoensis*

Queensland, New South Wales. Margins of the lemma furrow without tubercles, grows on poor soils.

A. jerichoensis (Domin) Henrard var. *subspinulifera* Henrard

Queensland, New South Wales, Northern Territory. Margins of the lemma with tubercles or spines, lemma without a pseudo-articulation, grows on rocky hillsides, see *Mededeelingen van's Rijks-Herbarium* 58(A): 300. 1932, *Mededeelingen van's Rijks-Herbarium* 54(C): 722-723. 1933, *Austr. Syst. Bot.* 5: 175. 1992.

in English: Jericho wire grass

A. jorullensis Kunth (*Aristida manzanilloana* Vasey; *Aristida pilosa* Labill.; *Ortachne pilosa* (Kunth) Nees; *Strep-tachne pilosa* Kunth)

Mexico. See *Nova Genera et Species Plantarum* 1: 124. 1815 [1816], *Sertum Austro-Caledonicum* 12, t. 17. 1824, *Révision des Graminées* 1: 62. 1829, *The Botany of the Voyage of H.M.S. Herald* 225. 1854, *Synopsis Plantarum Glumacearum* 1: 121. 1854, *Contributions from the United States National Herbarium* 1(8): 282. 1893.

A. jubata (Arechav.) Herter (*Aristida pallens* f. *jubata* Arechav.; *Aristida pallens* var. *macrochaeta* Hack.; *Aristida pallens* var. *major* Döll; *Aristida pallens* var. *tragopogon* Trin. & Rupr.; *Aristida tragopogon* (Trin. & Rupr.) Herter)

South America. Perennial, stony ground, low forage value, see *Icones et Descriptiones Plantarum, quae aut sponte ...* 5: 43, t. 468, f. 2. 1799, *Species Graminum Stipaceorum* 116-117. 1842, *Flora Brasiliensis* 2(3): 14. 1878 and *Anales del Museo Nacional de Montevideo* 4(1): 72, 74-75, t. 1. 1902, *Anales del Museo Nacional de Buenos Aires* 13: 452. 1906, *Revista Sudamericana de Botánica* 6(5-6): 141. 1940, *Revista Sudamericana de Botánica* 9(4): 98. 1953.

in Spanish: espartillo

A. junciformis Trin. & Rupr.

Africa, South Africa. Leaves wiry and rolled, dark green, a good ground cover, a very persistent pioneer virtually impossible to eradicate, useless as animal feed, unpalatable and not grazed, only the very young leaves are grazed, found in sour grassland, on poor soils of sandstone origin, see *Species Graminum Stipaceorum* 143-144. 1842 and *Cytologia* 19: 97-103. 1954.

in English: wire grass, Ngongoni bristlegrass, Ngongoni three-awn, Gongoni three-awn grass, Gongoni grass, Gongoni three-awn

in Southern Africa: ngongoni

A. junciformis Trin. & Rupr. subsp. *galpinii* (Stapf) De Winter (*Aristida galpinii* Stapf) (after Ernest Edward Galpin, 1858-1941, banker and plant collector, naturalist and botanist, author of "A contribution to the knowledge of the flora of Drakensberg." *S. Afr. J. Sci.* 6: 209-229. 1909, "The native timbers of the Springbok Flats." *Mem. Bot. Surv. S. Afr.* 7: 25. 1924 and *Botanical Survey of the Springbok Flats, Transvaal*. Cape Town [1927] [Botanical Survey of South Africa. Memoir. no. 12]; see J. Lanjouw and F.A. Stafleu, *Index Herbariorum*. Part II (2), *Collectors E-H*. Regnum Vegetabile vol. 9. 1957; Gilbert Westacott Reynolds, *The Aloes of South Africa*. Balkema, Rotterdam 1982; Mary Gunn & Leslie E. Codd, *Botanical Exploration of Southern Africa*. 160-164. 1981)

Africa. Perennial, erect, densely tufted, rhizomatous, long rhizome, leaves mostly basal, inflorescence contracted, lower glume mucronate to shortly awned, three awns, on shallow soils, rocky slopes, overgrazed areas, high mountainous sourveld, see *Species Graminum Stipaceorum* 143-144. 1842 and *Bulletin of Miscellaneous Information Kew* 1910: 130. 1910, *Kirkia* 3: 132. 1963.

A. junciformis Trin. & Rupr. subsp. *junciformis*

Namibia, South Africa. Perennial, erect, densely tufted, stout rhizome, usually unbranched, tough and fibrous when mature, leaf sheath round, narrow contracted panicle, tripartite awn, lower glume awned or mucronate, pioneer grass, invasive, very unpalatable, grazed only when young, used for brooms, found in open mountain grassveld, savannah, poor stony soils, stony hillsides, damp places, in bushveld, grassland, disturbed areas, overgrazed veld, fynbos [The word *fynbos* comes from the Dutch for fine-leaved plants; *fynbos* is the major vegetation type of the small botanical region known as the Cape Floral Kingdom; *fynbos* plants are readily recognised by the sclerophyllous (hard, tough and leathery leaved) and microphyllous (small leaved) nature of almost all woody plants and is characterised by having more than 5% cover of Cape reeds], along roadsides and depressions where water collects.

in English: bristle grass, Gongoni grass, Gongoni three-awn, Ngongoni three-awn (= Ngongoni veld, Natal), Ngongoni bristle grass, wire grass

in Southern Africa: assegaasteekgras, besemgras, Gongonisteekgras, heigras, koperdraadgras, Ngongonisteekgras, steekgras; lefielo (Sotho); nGongoni, umGongoni (Zulu)

A. kelleri Hack. (after A. Keller, plant collector in Somalia in 1891)

Somalia, Ethiopia, Kenya. Perennial, wiry, densely tufted, inflated uppermost leaf-sheath, branched rootstock,

compact inflorescence, spike-like panicle not fully exerted from the uppermost sheath, spikelets densely crowded, glumes linear and unequal, lower glume mucronate, upper glume awned, lemma smooth and glabrous, weakly twisted column, central awn curved outward, lateral awns straight, on sandy soil, light-orange sand, limestone, see *Mémoires de l'Herbier Boissier* 20: 8. 1900, *Kew Bulletin* 47(2): 277-282. 1992.

in Somalia: bajeh, machew, maar

A. kenyensis Henrard

Kenya. Annual, loosely tufted, slender, smooth, leaf blades linear, leaf sheaths glabrous, leaf blades linear, panicle open, glumes subequal and pointed, lemma linear and scarbrid, in dry areas, open habitats, clearings, overgrazed sites, grassland, see *Mededeelingen van's Rijks-Herbarium* 54(C): 722-724. 1933.

A. kerstingii Pilger

Tropical Africa. Annual or short-lived perennial, solitary or tufted, slender, inflorescence almost spike-like, spikelets very short, outer scales awned, good fodder, disturbed land, see *Meded. Rijks-Herb.* 54(A): 277. 1927, *Taxon* 36: 283. 1987, *Bulletin du Muséum National d'Histoire Naturelle, séries 4, Section B, Adansonia. Botanique Phytochimie* 10: 421-433. 1988.

in Nigeria: alkaman daji, datsi

in Upper Volta: celbi, selbo

A. kimberleyensis B.K. Simon

Australia, Western Australia. Perennial, decumbent, sprawling, loosely tufted, branched, lower glume 3-nerved, convolute lemmas, similar to *Aristida schultzei* and *Aristida sciuroides*, see *Austrobaileya* 2(1): 91. 1984.

A. kunthiana Trin. & Rupr.

Mali, Senegal. Rare species, see *Species Graminum Stipaceorum* 151-152. 1842.

A. laevigata Hitchc. & Ekman

Cuba. Perennial, erect, caespitose, glabrous, ligule a ciliate membrane, leaf blades involute, open panicle long-exserted, glumes subequal, see *North American Flora* 17(5): 390. 1935.

A. laevis (Nees) Kunth (*Aristida adscensionis* subvar. *densiflora* Hack.; *Aristida adscensionis* var. *argentina* Hack.; *Aristida altissima* Arechav.; *Aristida complanata* Trin.; *Aristida laevis* var. *argentina* (Hack.) Henrard; *Aristida subinterrupta* Arechav.; *Aristida subinterrupta* var. *argentina* (Hack.) Henrard; *Aristida subinterrupta* var. *subinterrupta*; *Chaetaria laevis* Nees)

Southern Brazil to Argentina. Perennial, low forage value, see *Species Plantarum* 1: 82. 1753, *Flora Brasiliensis seu Enumeratio Plantarum* 2: 384-385. 1829, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et*

Naturelles 1(1): 85-86. 1830, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 192. 1833 and *Anales del Museo Nacional de Montevideo* 4(1): 77-78, 80-81, t. 3, 5. 1902, *Anales del Museo Nacional de Buenos Aires* 11: 88. 1904, *Anales del Museo Nacional de Buenos Aires* 21: 65. 1911, *Mededeelingen van's Rijks-Herbarium* 54: 11. 1926, *Mededeelingen van's Rijks-Herbarium* 54(B): 609. 1928, *Kurtziana* 1: 123-206. 1961.

A. lanigera Longhi-Wagner

Brazil. See *Kew Bulletin* 49(4): 819, f. 2. 1994.

A. lanosa Muhl. ex Ell. (*Aristida gossypina* Bosc ex P. Beauv.; *Aristida lanata* Poir., nom. illeg., non *Aristida lanata* Forssk.; *Aristida lanosa* Muhl.; *Aristida lanosa* var. *lanosa*; *Aristida lanosa* var. *macera* Fernald & Griscom; *Aristida lanuginosa* Bosc ex Trin., nom. illeg., non *Aristida lanuginosa* Burch.; *Aristida lanuginosa* Clarion ex Steud.; *Chaetaria gossypina* P. Beauv. ex Roem. & Schult.; *Chaetaria gossypina* Bosc ex P. Beauv.; *Moulinsia lanosa* Raf. ex B.D. Jacks.)

U.S., Florida. Perennial, endangered species, leaf sheaths densely hairy to woolly, occurs in open woodlands, see *Encyclopédie Méthodique. Botanique ... Supplément* 1: 453. 1810, *Essai d'une Nouvelle Agrostographie* 30, 152, 158. 1812, *Catalogus Plantarum Americae Septentrionalis* 14. 1813, *A Sketch of the Botany of South-Carolina and Georgia* 1: 143. 1816, *Systema Vegetabilium* 2: 391. 1817, *Bulletin Botanique [Genève]* 1: 221. 1830, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 4,2(1): 46. 1836, *Synopsis Plantarum Glumacearum* 1: 565. 1854 and *Rhodora* 37(436): 135-136, pl. 335. 1935, *Rhodora* 87(850): 147-155. 1985, *Rhodora* 88(855): 367-387. 1986.

in English: woolly-sheath three-awn, woollysheat three-awn, woolly tripleawn grass, woolly three-awned grass, woolly tripleawn grass, woolly threeawn, woolly threeawn grass, woollyleaf threeawn, longleaf threeawn

A. latifolia Domin (*Aristida latifolia* var. *minor* J.M. Black) (with broad leaves)

South Australia, Queensland, Western Australia, Northern Territory, New South Wales. Perennial or short-lived perennial with a shallow root system, erect and slender, glabrous, densely caespitose, robust, forming slender tussocks, culms rigid and usually simple or sparsely branched, leaf-sheaths ciliate at the orifice, greenish to glaucous leaves twisted or curly at maturity, narrow and feathery purplish panicle spike-like with spreading or drooping branches, glumes subequal or unequal, lower glume 1-nerved, lemma brownish and purple with a twisted column, numerous awns subequal and filiform, dartlike seeds with a sharply pointed tip, three-awned seeds easily penetrate the staples of wool, hardy species, low nutritive value, it will not stand heavy grazing, relatively unpalatable and normally neglected by

stock, grows on clay soils, semiarid open grassland, heavy soils, marine soils, cracking clay soils, inland regions, alluvial silts, similar to *Aristida macroclada*, *Aristida psammophila*, *Aristida warburgii* and *Aristida schultzii*, see *Bibliotheca Botanica* 85(2): 339-340, t. 13, f. 13-14. 1915, *Transactions and Proceedings of the Royal Society of South Australia* 57: 147. 1933.

in English: feathertop wire grass, feathertop wiregrass, feathertop, feather-top wire grass, curly spear grass

A. latzii B.K. Simon

Australia, Northern Territory. Perennial, rigid culms, compact, tufted, rigid filiform leaves, smooth lemmas, flattened awns, similar to *Aristida nitidula*, *Aristida burraensis* and *Aristida burbidgeae*, see *Austrobaileya* 2(1): 91, f. 2B. 1984.

A. laxa Cav. (*Aristida divaricata* Lag. ex Henrard, nom. illeg., non *Aristida divaricata* Humb. & Bonpl. ex Willd.; *Aristida divaricata* Lag., nom. illeg., non *Aristida divaricata* Humb. & Bonpl. ex Willd.; *Aristida jacquiniana* Tausch; *Aristida jacquiniana* var. *jacquiniana*; *Aristida jacquiniana* var. *subaequilonga* Henrard; *Aristida karwinskiana* Trin. & Rupr.; *Aristida lagascae* Henrard; *Aristida laxa* Trin. ex Henrard, nom. illeg., non *Aristida laxa* Cav.; *Aristida laxa* Willd. ex Trin. & Rupr.; *Aristida laxa* var. *karwinskiana* (Trin. & Rupr.) Henrard; *Aristida laxa* var. *laxa*; *Aristida laxa* var. *longiramea* (J. Presl) Henrard; *Aristida longiramea* J. Presl; *Aristida oligophylla* Pilg.; *Aristida spadicea* Kunth; *Chaetaria spadicea* (Kunth) Roem. & Schult.; *Chaetaria spadicea* (Kunth) Nees, nom. illeg., non *Chaetaria spadicea* (Kunth) Roem. & Schult.)

South America. Perennial, caespitose, stiff, erect or divergent, more or less prostrate, foliage mainly basal, ligule a dense rim of hairs, leaves spirally curling when old, inflorescence a pyramidal panicle, spikelets more or less distally clustered, panicle branches erect to divergent, glumes subequal, on dry open slopes, grassland, see *Icones et Descriptiones Plantarum, quae aut sponte ...* 5: 44-45, t. 470, f. 1. 1799, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 99. 1809, *Nova Genera et Species Plantarum* 1: 123. 1815 [1816], *Genera et species plantarum* 3. 1816, *Systema Vegetabilium* 2: 397. 1817, *Flora Brasiliensis seu Enumeratio Plantarum* 2: 385. 1829, *Reliquiae Haenkeanae* 1(4-5): 224. 1830, *Flora* 19(2): 508. 1836, *Species Graminum Stipaceorum* 130. 1842, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzegeographie* 25(5): 711. 1898 and *Meded. Rijks-Herb.* 54: 150, 178-179, 202, 291. 1926, *Mededeelingen van's Rijks-Herbarium* 54(A): 270, 281-282, 311. 1927, *Mededeelingen van's Rijks-Herbarium* 54(B): 576. 1928, *Annals of the Missouri Botanical Garden* 82: 593-595. 1995.

A. laxa Cav. var. **karwinskiana** (Trin. & Rupr.) Henrard (*Aristida karwinskiana* Trin. & Rupr.)

Mexico. See *Species Graminum Stipaceorum* 121-122. 1842 and *Mededeelingen van's Rijks-Herbarium* 54(A): 274, 275. 1927.

A. laxa Cav. var. **laxa**

America.

A. laxa Cav. var. **longiramea** (J. Presl) Henrard (*Aristida longiramea* J. Presl; *Aristida longiramea* var. *longiramea*) America. See *Reliquiae Haenkeanae* 1(4-5): 224. 1830 and *Mededeelingen van's Rijks-Herbarium* 54(A): 311. 1927.

A. lazaridis B.K. Simon (also spelled **lazarides**)

Australia, Queensland. Perennial, tufted, compact, branched, open panicle, tropical and subtropical, similar to *Aristida leptopoda*, see *Austrobaileya* 2(1): 92, f. 2C. 1984.

A. leichhardtiana Domin (*Aristida ramosa* var. *leptathera* Benth.) (after the German scientist Friedrich Wilhelm Ludwig Leichhardt, 1813-1848 (lost on a wild journey across Australia, a mission in the interior of Queensland, and nothing certain is known of his fate), explorer, naturalist and botanist, 1842 in Australia, plant collector, lectured on botany in Sydney, remembered for his long journey in 1844-1845 from Darling Downs to Port Essington (an early settlement in the far north of the Northern Territory), author of *Journal of an Overland Expedition in Australia, from Moreton Bay to Port Essington ... during ... 1844-45*. London 1847, also published papers in *Tasmanian Journal of Natural Science*. See Keith Willey, *Strange Seeker: The Story of Ludwig Leichhardt*. London and New York 1966; M. Arousseau, *The Letters of F.W. Ludwig Leichhardt*. London and New York 1968; James A. Baines, *Australian Plant Genera. An Etymological Dictionary of Australian Plant Genera*. 210-211. Chipping Norton, N.S.W. 1981; Ferdinand von Mueller, *The Fate of Dr. Leichhardt, and A Proposed New Search for His Party*. [Melbourne 1865]; F. von Mueller, *Fragmenta Phytographiae Australiae*. 10: 67-68. 1876; J.F. Mann, *Eight Months with Dr. Leichhardt in the Years 1846-1847*. 1888; [Ludwig Leichhardt], *An Explorer at Rest. Ludwig Leichhardt at Port Essington and on the Homeward Voyage 1845-1846*. Introduction and annotations by E. M. Webster. Melbourne 1986; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 233. 1972; Ethelyn Maria Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933; Charles Sturt (1795-1869), *Narrative of an expedition into Central Australia, Performed ... during the Years 1844, 1845 and 1846*. 2: App. 81. London 1849; Douglas Pike, editor, *Australian Dictionary of Biography*. 2: 102-104. 1967)

Queensland, New South Wales. Perennial, slender to robust, tussocky, erect, thin and simply branched, loosely tufted, sheath smooth, leaves scabrous, panicle much branched loose to open, unequal glumes lanceolate and long-acuminate, lemma purple or brown and linear to elliptic, awns

filiform and divaricate, grows on sandy soils, in sclerophyll forest, similar to *Aristida personata*, see *Prodromus Florae Novae Hollandiae* 1: 173. 1810, *Flora Australiensis: A Description ...* 7: 563. 1878 and *Repertorium Specierum Novarum Regni Vegetabilis* 9: 551. 1911.

A. leptopoda Benth.

Queensland, New South Wales. Perennial, densely tussocky, compactly tufted, erect or ascending, strongly branched, sheath papery, leaves ending in a very long point, open-headed, panicle open at maturity with branches divaricate to drooping, spikelets terminal, glumes lanceolate and very long-acuminate, convolute lemma purplish linear to elliptic, awns filiform and stiff, young plants grazed, mature plants hard and prickly, grows on heavy soils, in arid and semiarid areas, similar to *Aristida behriana*, *Aristida lazardis*, *Aristida vickeryae* and *Aristida obscura*, see *Flora Australiensis: A Description ...* 7: 562. 1878 and *Austr. Syst. Bot.* 5: 206. 1992.

in English: white speargrass

A. leptura Cope

Somalia. Annual, panicle exerted from the uppermost sheath, glumes subequal finely awned, found in disturbed soil, marshes, edge of marshes, see *Kew Bulletin* 47(2): 277. 1992.

A. liebmanni E. Fourn. (*Aristida liebmanni* E. Fourn. ex Hemsl.)

Mexico. See *Biologia Centrali-Americana; ... Botany ...* 3: 534. 1855, *Mexicanas Plantas* 2: 78. 1886.

A. lignosa B.K. Simon

Queensland, New South Wales. Perennial, caespitose, compact, very robust and woody, branched and terete, strongly fasciculated branches, glabrous and smooth, sheath smooth, leaves scabrous and stiff to flexuous, panicle narrow with branches filiform, glumes lanceolate, lemma linear-elliptic and scabrous, awns subequal and slender, on stony or rocky soils, grows in dry sclerophyll forest, see *Austrobaileya* 2(1): 92, f. 2D. 1984, *Australian Systematic Botany* 5: 129-226. 1992.

A. longespica Poir. (specific epithet sometimes spelled **longispica**) (*Aristida geniculata* Raf.; *Aristida gracilis* Elliott; *Aristida gracilis* Elliott var. *depauperata* A. Gray; *Aristida longespica* var. *geniculata* Fernald; *Aristida longespica* var. *geniculata* (Raf.) Fernald; *Aristida simpliciflora* var. *texana* Vasey; *Curtopogon gracilis* Nees ex Trin. & Rupr.; *Trixostis gracilis* Raf.; *Trixostis gracilis* Raf. ex B.D. Jacks.)

U.S., North America. Annual, caespitose, good forage, on coastal meadow marshes, thin dry soils, seashores, open glade, see *Encyclopédie Méthodique. Botanique ... Supplément* 1: 452. 1810, *A Sketch of the Botany of South-Carolina and Georgia* 1: 142, t. 8, f. 3. 1816, *American Monthly Magazine and Critical Review* 2(2): 119. 1817, *Bulletin Botanique [Genève]* 1: 221. 1830, *Species Graminum*

Stipaceorum 101. 1842, *A Manual of Botany of the Northern United States (edition 5)* 618. 1867, *Botanical Gazette* 3(3): 18. 1878, *Contributions from the United States National Herbarium* 3(1): 44. 1892 and *Rhodora* 35: 318. 1933.

in English: slimspike threeawn, three-awn, three-awned grass

A. longespica Poir. var. **geniculata** (Raf.) Fernald (*Aristida geniculata* Raf.; *Aristida gracilis* Elliott; *Aristida gracilis* var. *gracilis*; *Aristida intermedia* Scribn. & Ball; *Aristida necopina* Shinnery)

U.S. Annual, awns can cause damage, growing on sandy soils, sandy ridges, open sandy prairies, sandy open ground, along railroads and roadsides, rocky prairies, on moist calcareous sand of interdunal flats, rocky dry open woods, see *Encyclopédie Méthodique. Botanique ... Supplément* 1: 452. 1810, *A Sketch of the Botany of South-Carolina and Georgia* 1: 142, t. 8, f. 3. 1816, *American Monthly Magazine and Critical Review* 2(2): 119. 1817 and *Bulletin, Division of Agrostology United States Department of Agriculture* 24: 44, f. 18. 1901, *Rhodora* 35: 318. 1933, *Rhodora* 56(662): 30. 1954.

in English: Kearney threeawn, red threeawn, plains three-awn, three-awn grass, false arrow feather, long-spike three-awned grass, spiked needlegrass

A. longespica Poir. var. **longespica**

U.S., North America. Annual, growing on sandy soil and especially in hard clayey soil, in fields, dry sandy soils, open and waste ground, along railroads and highways, rocky prairies, bluff edges, open woods and eroded slopes, see *Encyclopédie Méthodique. Botanique ... Supplément* 1: 452. 1810.

in English: three-awn, red threeawn, three-awn grass, slimspike threeawn

A. longicollis (Domin) Henrard (*Aristida adscensionis* var. *longicollis* Domin)

Australia, Queensland, Northern Territory, New South Wales. Perennial, compact, tufted, branched, erect, rigid, smooth, sheath scabrous to pubescent, panicle spike-like and dense, unequal glumes thinly membranous and entire or notched, lemma not tuberculate, awns capillary and divaricate, grows in open woodland and mallee communities, rocky and sandy soils, similar to *Aristida psammophila*, see *Species Plantarum* 1: 82. 1753 and *Bibliotheca Botanica* 85(2): 343, t. 15, f. 5-8. 1915, *Mededeelingen van's Rijks-Herbarium* 54: 14. 1926, *Mededeelingen van's Rijks-Herbarium* 54(A): 306-307. 1927.

A. longiflora Schum. (*Aristida longiflora* Schumach. & Thonn.)

Central Africa. See *Beskrivelse af Guineiske planter* 48. 1827, *Kongel. Danske Vidensk. Selsk. Naturvidensk. Math. Afh.* 3: 68. 1828.

in Niger: aggoer, alaenta, anasuwa, assoré, azoer, bata, bataré, buwird'y, siri nyéré, surungéji, yanta

A. longifolia Trin. (*Aristida bromoides* Salzm. ex Trin. & Rupr.; *Aristida temulenta* Luces)

Brazil, Venezuela. Perennial, densely tufted, herbaceous, forming large clumps, erect, deciduous leaf blades, ligule membranous, leaves linear tapering to a filiform tip, inflorescence very open, lax panicles sparsely branched, spikelets 1-flowered with narrowly lanceolate glumes, awned, central awn ascending, in forest, sandy soils, *cerrado*, shade of trees, savannah, river beds, forest edge, among trees, rocky places, see *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 1(1): 84. 1830, *Species Graminum Stipaceorum* 118. 1842 and *Boletín de la Sociedad Venezolana de Ciencias Naturales* 15(80): 16-19, f. 11. 1953.

in Bolivia: aguaraguai

A. macrantha Hack.

Paraguay. See *Repertorium Specierum Novarum Regni Vegetabilis* 7: 372. 1909, *Meded. Rijks-Herb.* 54(A): 321. 1927.

A. macroclada Henrard (*Aristida novae-guineae* Ohwi)

Australia, Northern Territory, New Guinea. Perennial, compact, tufted, sparsely branched, similar to *Aristida psammophila* and *Aristida longicollis*, see *Mededeelingen van's Rijks-Herbarium* 54(A): 325-326, f. 1927, *Botanical Magazine* (Tokyo) 56: 2. 1942.

A. macroclada Henrard var. **macroclada**

Australia, Northern Territory, New Guinea. Perennial, see *Mededeelingen van's Rijks-Herbarium* 54(A): 325-326, f. 1927, *Botanical Magazine* (Tokyo) 56: 2. 1942.

A. macroclada Henrard var. **queenslandica** (B.K. Simon) Veldkamp (*Aristida macroclada* subsp. *queenslandica* B.K. Simon)

Queensland, New Guinea. Perennial, see *Austrobaileya* 2(1): 95, f. 3B. 1984, *Reinwardtia* 12: 137. 2004.

A. macrophylla Hack. (*Aristida endomelas* Mez; *Aristida hassleri* var. *aculeolata* Hack.; *Aristida kleinii* L.B. Sm.; *Aristida subarticulata* Mez) (in honor of the Brazilian botanist Roberto Miquel (Miguel) Klein, born 1926, or 1923-1992, ecologist, his writings include "Árvores nativas da floresta subtropical do Alto Uruguai." *Sellowia*. 24(24): 9-62. Itajaí 1972, "Árvores nativas da Ilha de Santa Catarina." *Insula*, Boletim do Centro de Pesquisas e Estudos Botânicos. 3: 3-93, out. Florianópolis 1969, "Árvores nativas indicadas para o reflorestamento no sul do Brasil." *Sellowia*. 18: 29-40. Itajaí 1966, "Contribuição à identificação de árvores nativas nas florestas no sul do Brasil." *Silvicultura em São Paulo*. 16A pt. 1: 421-440. São Paulo 1982, "Ecologia da flora e vegetação do Vale do Itajaí." *Sellowia*. 31(31): 1-164, dez. Itajaí 1979 and "Observações e considerações sobre a vegetação do Planalto Nordeste

Catarinense." *Sellowia*. 15(15): 39-56, dez. Itajaí 1963; see *Sellowia* 15: 196. 1963; *Bradea* 1: 179. 1972; *Fl. Ilustr. Catarin.* (Loganiaceas) 34. 1976; *Ann. Missouri Bot. Gard.* 64: 318. 1977 [1978])

South America, Brazil. Perennial bunchgrass, caespitose, foliage coarse, awns spirally coiled, unpalatable, see *Bulletin de l'Herbier Boissier, sér. 2*, 4(3): 277. 1904, *Ergebnisse der Botanischen Expedition nach Südbrasilien* 1: 16. 1906, *Denkschr. Kaiserl. Akad. Wiss., Math.-Naturwiss. Kl.* 79: 77. 1908, *Repertorium Specierum Novarum Regni Vegetabilis* 7: 373. 1909, *Repertorium Specierum Novarum Regni Vegetabilis* 17(8-12): 150. 1921, *Phytologia* 22(2): 88, f. 4-8. 1971.

A. mandoniana Henrard (*Aristida achalensis* Mez; *Aristida adscensionis* L.) (for the French traveler Gilbert Mandon, 1799-1866)

Bolivia, Argentina. See *Species Plantarum* 1: 82. 1753 and *Mededeelingen van's Rijks-Herbarium* 40: 55. 1921, *Repertorium Specierum Novarum Regni Vegetabilis* 17(8-12): 149. 1921, *Meded. Rijks-Herb.* 54: 9. 1926.

A. marginalis Ekman

South America, Brazil. Blades of culm leaves flat, glumes subequal and distinctly awned.

A. megapotamica Spreng. (*Aristida implexa* Trin.; *Aristida paraguayensis* Lindm.; *Aristida sellowii* Mez; *Jarava megapotamica* (Spreng.) Peñailillo; *Stipa filifolia* Nees)

Bolivia, central Brazil to Argentina. Perennial, callus not 2-dentate, low forage value, in dry stony areas, see *Systema Vegetabilium, editio decima sexta* 4: 31. 1827, *Flora Brasiliensis seu Enumeratio Plantarum* 2: 379. 1829, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 4,2(1): 48. 1836 and *Kongliga Svenska Vetenskapsakademiens Handlingar* 34(6): 14, t. 7, f. B. 1900, *Repertorium Specierum Novarum Regni Vegetabilis* 17(8-12): 148. 1921, *Mededeelingen van's Rijks-Herbarium* 58(A): 216-217. 1932, *Mededeelingen van's Rijks-Herbarium* 54(C): 724-725. 1933, *Gayana, Botánica* 59(1): 31-32. 2002.

A. megapotamica Spreng. var. **brevipes** Henrard

Brazil. See *Mededeelingen van's Rijks-Herbarium* 58(A): 217. 1932, *Meded. Rijks-Herb.* 54(C): 724. 1933.

A. megapotamica Spreng. var. **longipes** Henrard

Paraguay. See *Meded. Rijks-Herb.* 58(A): 725. 1927, *Mededeelingen van's Rijks-Herbarium* 58(A): 216. 1932.

A. megapotamica Spreng. var. **megapotamica**

Bolivia.

A. mendocina Phil. (*Aristida cordobensis* Hack.; *Aristida inversa* Hack.; *Aristida inversa* f. *macrantha* Parodi; *Aristida mendocina* var. *macrantha* (Parodi) Henrard)

Argentina, Bolivia. Perennial, caespitose, foliage cauline, glumes unequal, unpalatable, colonizer on sand dunes, open habitats, sandy soil, stony ground, see *Anales de la Universidad de Chile* 36: 205. 1870 and *Anales del Museo Nacional de Buenos Aires* 11: 91. 1904, *Arkiv för Botanik utgivet av K. Svenska Vetenskapsakademien* 8: 37. 1908, *Revista de la Sociedad Argentina de Ciencias Naturales* 8: 76. 1925, *Meded. Rijks-Herb.* 54: 118. 1926, *Mededeelingen van's Rijks-Herbarium* 54(A): 267. 1927.

A. meridionalis Henrard

Tanzania, Botswana, Mozambique, South Africa. Perennial, hard, robust, fibrous, densely tufted, unbranched, erect and sometimes geniculate, hard and shiny leaf sheath, ligule a ring of woolly hairs, leaf blade inrolled, leaves flexible ending with a narrow point, inflorescence an open panicle, pendulous spikelets with a tripartite awn, moisture-loving grass, low grazing value, utilized in the young stage, thatching grass, used for broom-making, ornamental, growing in a low rainfall zone on sand dunes, open habitats, damp depressions, along roads, sandy and stony soils, moist places, deep sand, moist areas around vleis, see *Mededeelingen van's Rijks-Herbarium* 54(A): 344-345. 1927.

in English: giant three-awn, giant stick grass

in South Africa: langbeensteekgras, leeusteekgras, löwenstechgras

A. mexicana Scribner ex Henrard

Mexico. Sandy areas, see *Mededeelingen van's Rijks-Herbarium* 54(A): 344-345. 1927.

A. migiurtina Chiov.

Somalia, Arabia, Yemen. Perennial, tufted, dwarf, decumbent to erect, branched at the base, stiff leaf blades, leaves short and curved to involute, loosely contracted and obconical panicle, long-awned spikelets, glumes very unequal and awn-tipped, lower glume entire, upper glume bifid, awns subequal, growing in open areas, on barren stony slopes, sandy or stony soils, beaches and sand dunes, seasonally flooded places, see *Plantae Novae vel Minus Notae e regione Aethiopia* 29. 1928 [1911-1951, series published in different journals, also *Plantae Novae vel Minus Notae ex Aethiopia*], *Kew Bulletin* 47(2): 277-282. 1992.

in Somalia: gud lebah

A. minutiflora Caro

Argentina. Stony soils, see *Kurtziana* 1: 151-154, f. 2B, 4-5. 1961.

A. minutiflora Caro var. **glabriflora** Caro

Argentina. See *Kurtziana* 1: 154. 1961.

A. minutiflora Caro var. **minutiflora**

Argentina.

A. mohrii Nash (for the American botanist Charles T. Mohr, 1824-1901, born in Esslingen am Neckar, pharmacist, explorer, pioneer, botanical collector in Alabama and

Suriname, author of *The Forests [and Grasses] of Alabama*. 1878, *The Timber Pines of the Southern United States ...* New York 1884 [*Bull. U.S. Div. For.*, no. 13, 1897. 176 pp.], *Plant Life of Alabama*. 1901, *The Medicinal Plants of Alabama*. Mobile, Ala. 1893. See J.H. Barnhart, *Biographical notes upon botanists*. 2: 502. 1965; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 270. 1972; S. Lenley et al., *Catalog of the manuscript and archival collections and index to the correspondence of John Torrey*. Library of the New York Botanical Garden. 295-296. 1973; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. 1917-1933; Ignatz Urban, *Geschichte des Königlichen Botanischen Museums zu Berlin-Dahlem (1815-1913). Nebst Aufzählung seiner Sammlungen*. 1916; J. Ewan, editor, *A Short History of Botany in the United States*. 14, 92. 1969; I.C. Hedge and J.M. Lamond, *Index of Collectors in the Edinburgh Herbarium*. 111. 1970; *Man. Grass. U.S.* 987. 1951)

North America, U.S., Alabama. Perennial, green spikelets, found in sand hills, scrub and dry flatwoods, on sandy slopes, see *Bulletin of the New York Botanical Garden* 1(5): 436. 1900, K.W. Allred, "Studies in the *Aristida* (Gramineae) of the southeastern United States. IV. Key and conspectus.," *Rhodora* 88(855): 367-387. 1986.

in English: Mohr's three-awn, Mohr's threeawn grass

A. mollissima Pilg.

Africa, Botswana. See *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 40: 80. 1908.

A. mollissima Pilg. subsp. **argentea** (Schweick.) Melderis (*Aristida argentea* Schweick.)

Africa, Zimbabwe. Perennial, erect to geniculate, densely tufted, lower culm internodes woolly to densely tomentose, narrow lax inflorescence, lower glume awned, three awns, species of open habitats, mountain slopes, sandveld, sandy to stony sandy soils, disturbed areas, see *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 76(2): 218-220. 1954.

A. mollissima Pilg. subsp. **mollissima**

Africa, Kenya, Zimbabwe. Perennial, erect, densely tufted, lower culm internodes woolly to tomentose, contracted inflorescence spicate, lower glume awned, three awns, species of open habitats, sandy to stony sandy soils, red sands.

A. monticola Henrard

South Africa. Perennial, long rhizomatous, much-branched, densely tufted, hairy ligule, a contracted to lax panicle, lower glume sometimes mucronate but unawned, three awns, young leaves and inflorescences grazed, used to promote the birth of a calf, common in moist and shady areas, stream banks, mountain slopes, see *Mededeelingen van's Rijks-Herbarium* 54(A): 355-356. 1927.

in South Africa: seotla

A. moritzii Henrard

Venezuela. See *Mededeelingen van's Rijks-Herbarium* 54: 133. 1926, *Meded. Rijks-Herb.* 54(A): 356-357. 1927, *Flora of Ecuador*, no. 57. 214(1) *Gramineae* (part 1): 53. 1997.

A. multiramea Hack. (*Aristida adscensionis* var. *laevis* Hack.)

Argentina. Stony places, sandy soils, see *Anales del Museo Nacional de Buenos Aires* 11: 89. 1904, *Anales del Museo Nacional de Buenos Aires* 21: 67, t. 1, f. a-c. 1911, *Meded. Rijks-Herb.* 54(A): 364. 1927.

A. muricata Henrard (Latin *muricatus*, *a*, *um* "roughened, with hard points, full of prickles, pointed, shaped like a purple-fish")

Queensland, New South Wales. Perennial, tufted, compact, simple or branched from the lower nodes, panicle more or less dense with wavy branches, equal or unequal glumes cuspidate, lower glume acuminate 1-nerved, upper glume obtuse, lemma linear and densely spiny, awns filiform and flattened, grows on clay loam or sandy soils, similar to *Aristida forsteri* and *Aristida exserta*, see *Mededeelingen van's Rijks-Herbarium* 58(A): 286, t. 154. 1932, *Mededeelingen van's Rijks-Herbarium* 54(C): 727-729. 1933.

A. murina Cav. (*Aristida crinita* J. Presl; *Aristida pallens* var. *murina* (Cav.) Trin. & Rupr.)

South America. Perennial, leaves flat, low forage value, fields, moist ground, sandy meadow, hillsides, see *Icones et Descriptiones Plantarum, quae aut sponte ...* 5: 43-44, t. 468-469, f. 1-2. 1799, *Reliquiae Haenkeanae* 1(4-5): 223. 1830, *Species Graminum Stipaceorum* 117. 1842 and *Flora Illustrada de Entre Ríos (Argentina)* 6(2): 208-224. 1969, *Flora de la Provincia de Buenos Aires* 4(2): 352-369. 1970, *Flora Patagónica* 3: 1-583. 1978, *Acta Botanica Brasilica* 4(1): 105-124. 1990, *Boletim do Instituto de Botânica* (São Paulo) 12: 113-179. 1999.

A. mutabilis Trin. & Rupr. (*Aristida articulata* Edgew.; *Aristida astroclada* Chiov.; *Aristida cassanellii* A. Terracc.; *Aristida longeradiata* Steud.; *Aristida meccana* Hochst. ex Trin. & Rupr.; *Aristida meccana* Trin. & Rupr.; *Aristida mutabilis* var. *laeviglumis* Henrard; *Aristida tenuis* Hochst., nom. illeg., non *Aristida tenuis* (Kunth) Kunth)

Yemen, Sudan, Somalia, Saudi Arabia. Annual, rather variable, loosely tufted, sprawling, erect or ascending, wiry, slender, much-branched, short leaf blades, leaves usually convolute, open or contracted inflorescence, contracted or spreading panicle, spikelets clustered and terminal, more or less equal glumes acute mucronate or awned, lemma scabrid narrowed above the middle, awns more or less equal, fodder grass, low nutritional value, browsed by all stock when young and tender, sharp and pungent awns can cause injury to horses' mouths, used to make mats and basket sieves, used for stuffing saddles, abundant on sand dunes, open

waste places, desert, sandy soils, subdesert, grassland, stony plains, Sahara-Indian distribution, related to *Aristida barbicollis* Trin. & Rupr., see *Species Graminum Stipaceorum* 150-152. 1842, *Synopsis Plantarum Glumacearum* 1: 140. 1855 [1854], *Flora* 38: 200. 1855, *Journal of the Proceedings of the Linnean Society* 6: 209. 1862, *Annali di Botanica* 5: 94. 1894 and *Bulletin de la Société Botanique de France* 53: 32. 1906, *Annali di Botanica* 10(3): 409. 1912, *Mededeelingen van's Rijks-Herbarium* 54: 84. 1926, *Mededeelingen van's Rijks-Herbarium* 54(A): 239, 339, 367-369. 1927, *Mededeelingen van's Rijks-Herbarium* 58: 136. 1929, *Bulletin de la Société d'Histoire Naturelle de l'Afrique du Nord* 30: 368. 1939, *Grass. Saudi Arabia* 216. 1989, *Kew Bulletin* 47(2): 277-282. 1992, *Gram. Cameroun* 2: 101. 1992.

in English: white grass

in Nigeria: baya, gau, datsi, gatsuaa, gatsaua, kas makaru, katsaura

in Somalia: maruet, dub derigan, half, xalfo

in Upper Volta: celbi, selbo

A. neglecta León ex Hitchc. (*Aristida neglecta* subsp. *decumbens* Catusus; *Aristopsis bissei* Catusus)

Cuba, the Caribbean. See *Contributions from the United States National Herbarium* 22(7): 567. 1924, *Folia Geobotanica et Phytotaxonomica* 16(4): 439. 1981, *Bot. Zurn. (Kiev)* 69(6): 874. 1984.

A. nicorae Sulekic

Argentina. See *Darwiniana* 41(1-4): 175-177, f. 8. 2003.

A. niederleinii Mez (*Aristida pallens* var. *macrochaeta* Hack.)

Argentina. See *Icones et Descriptiones Plantarum, quae aut sponte ...* 5: 43, t. 468, f. 2. 1799 and *Anales del Museo Nacional de Buenos Aires* 13: 452. 1906, *Repertorium Specierum Novarum Regni Vegetabilis* 17(8-12): 150. 1921, *Kurtziana* 1: 178. 1961.

A. nitidula (Henrard) S.T. Blake ex J.M. Black (*Aristida echinata* Henrard var. *nitidula* Henrard)

Australia. Perennial, compactly tufted, culms usually simple, sheath tuberculate scabrous, leaves stiff and setaceous or bristly, spike-like and narrow inflorescence, glumes subequal and nerved, upper glume mucronate, lemma convolute and densely spiny-tuberculate toward the apex, awns subequal and flattened, moderately palatable to rabbits, grows on hills and stony sites, similar to *Aristida capillifolia*, *Aristida arida*, *Aristida blakei*, *Aristida australis*,

Aristida strigosa, *Aristida latzii* and *Aristida burraensis*, see *Mededeelingen van's Rijks-Herbarium* 58(A): 285, t. 139. 1929, *Transactions and Proceedings of the Royal Society of South Australia* 67: 46. 1943.

in English: flat-awned three-awn

A. obscura Henrard (*Aristida obscura* var. *luxurians* Henrard)

Queensland, South Australia, Western Australia, Northern Territory, New South Wales. Perennial, tussocky, rare, loosely tufted, semierect or sprawling, terete culms strongly branched and fastigiate, sheath scabrous to pubescent, leaves flat to convolute, inflorescence loose to open, glumes unequal and acuminate, lemma purple and densely tuberculate-spiny or scabrous, awns subequal and divergent, palatable, grows on loamy soils, similar to *Aristida behriana*, *Aristida vickeryae* and *Aristida leptopoda*, see *Mededeelingen van's Rijks-Herbarium* 54(A): 385-387. 1927, *Mededeelingen van's Rijks-Herbarium* 58(A): 262, t. 126. 1932.

in English: brush three-awn, brush threeawn, smallbrush wire grass, rough-seed wire-grass

A. obtusa Delile (*Arthratherum obtusum* (Delile) Nees; *Stipagrostis obtusa* (Delile) Nees)

North Africa, Sahara, Morocco, Saudi Arabia. See *Description de l'Égypte, ... Histoire Naturelle, Tom. Second* 175, t. 13, f. 2. 1812, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 198. 1833, *Florae Africae Australioris Illustrationes Monographicae* I. Gramineae. 179. 1841 and Roberto Corti (1909-1986), *Flora e vegetazione del Fezzán e della regione di Gat*. Firenze 1942 [Reale società geografica italiana. Il Sáhara italiano, pte. 1. Fezzán e oasi di Gat.], *Mémoires, Institut de Recherches Sahariennes. Algiers* 6: 16. 1959, *Bothalia* 21(2): 163-170. 1991, *Lagascalia* 20(2): 265-275. 1998.

in Morocco: sham, selyan

A. oligantha Michaux (*Aristida divaricata* Humb. & Bonpl. ex Willd.; *Aristida macrochaeta* Steud.; *Aristida micropoda* Trin. & Rupr.; *Aristida oligantha* var. *nervata* Beal; *Aristida pallens* Nutt.; *Aristida pauciflora* Buckley; *Aristida ramosissima* Engelm. ex Gray var. *chaseana* Henr.; *Chaetaria oligantha* (Michx.) P. Beauv., also spelled *olygantha*)

U.S., Florida, California, Texas, Illinois. Annual, tufted, culms glabrous to scabrous, branched at the woolly base and nodes, clumped, smooth sheath, ligules short-fringed, leaf blades flat to involute and pubescent, open inflorescence narrowly paniculate, glumes subequal and short-awned, lemmas tipped by three diverging awns, lemma awns free at the base, invasive weed, poor forage, mature awns may injure animals, grows on dry sterile soils, dry sandy areas, dry rocky soil, abandoned fields, overgrazed and disturbed sites, depressed situations, waste ground, eroded slopes, sandy alluvium, open grassy areas, hard clay soil, open habitats, along railroads, clayey roadsides, see

Flora Boreali-Americana 1: 41. 1803, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 99. 1809, *Essai d'une Nouvelle Agrostographie* 30, 158. 1812, *The Genera of North American Plants* 1: 57. 1818, *Species Graminum Stipaceorum* 107-108. 1842, *Synopsis Plantarum Glumacearum* 1: 134. 1855 [1854], *Proceedings of the Academy of Natural Sciences of Philadelphia* 14: 92-93. 1862, *Grasses of North America for Farmers and Students* 2: 202. 1896.

in English: Oldfield three-awn, Oldfield threeawn, plains three-awn grass, prairie three-awn, prairie three-awn grass, few-flowered aristida

A. oligospira (Hack.) Henrard

South America, Paraguay. Perennial, caespitose, densely clumped, savannah, see *Bulletin de l'Herbier Boissier, sér. 2*, 4(3): 277. 1904, *Mededeelingen van's Rijks-Herbarium* 54: 160. 1926, *Meded. Rijks-Herb.* 54(A): 391-392. 1927, *Bol. Inst. Bot.* (São Paulo) 12: 141. 1999.

A. orcuttiana Vasey (*Aristida hypomegas* Mez; *Aristida schiedeana* Trin. & Rupr.; *Aristida schiedeana* var. *orcuttiana* (Vasey) Allred & Valdés-Reyna) (dedicated to the American (California) botanist Charles Russell Orcutt, 1864-1929, plant collector and naturalist, 1882-1886 Baja California, editor of *The West American Scientist*. vol. 1-21. 1881-1919)

U.S., New Mexico, California, Mexico. Forage, see *Species Graminum Stipaceorum* 120-121. 1842, *Bulletin of the Torrey Botanical Club* 13(2): 27. 1886 and *Repertorium Specierum Novarum Regni Vegetabilis* 17(8-12): 146. 1921, *Contr. A. pansa Wooton & Standl. f. *pansa*

America.

A. paoliana (Chiov.) Henrard (*Aristida hemmingii* Clayton; *Aristida stipiformis* Lam. ex Poir. var. *paoliana* Chiov.)

Kenya, Somalia, Ethiopia. Perennial, woody, slender, freely branched from all nodes, loosely tufted, leaf blades narrowly linear, knotted base, nodding open and loose panicle, glumes unequal, lower glume emarginate to 2-lobed, upper glume 2-toothed and shortly awned, upper portion of the lemma narrowed and scabris, awns subequal, small grain, on orange sand, red sandy soil, related to *Aristida stenophylla* Henr., see *Encyclopédie Méthodique. Botanique ... Supplément* 1: 452. 1810 and *Annali di Botanica* 13(3): 371. 1915, *Mededeelingen van's Rijks-Herbarium* 54(A): 420-421. 1927, *Kew Bulletin* 23: 211. 1969, *Kew Bulletin* 47(2): 277-282. 1992.

in Somalia: ula dheere

A. parishii A.S. Hitchc. (*Aristida purpurea* Nutt. var. *parishii* (A.S. Hitchc.) Allred; *Aristida wrightii* var. *parishii* (A.S. Hitchc.) Gould) (collected by S.B. Parish and W.F. Parish, Colorado Desert, 1882) (dedicated to the brothers Samuel Bonsall Parish (1838-1928) and William F. Parish, American botanists and botanical collectors; Samuel Bonsall Parish wrote *A Catalogue of Plants Collected in the Salton Sink*. Washington, D.C. 1913. See George Neville Jones (1903-1970), *An Annotated Bibliography of Mexican Ferns*. Univ. Illinois Press 1966; J.H. Barnhart, *Biographical notes upon botanists*. 3: 48. 1965; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. 566. VI. 1983; George Edmund Lindsay (b. 1916), *Notes Concerning The Botanical Explorers and Exploration of Lower California, Mexico*. San Francisco 1955)

U.S., California, North America. Perennial, scattered, good forage, common on rocky slopes and along washes, see *Transactions of the American Philosophical Society, new series*, 5: 145. 1837 and *Flora of the Southeastern United States ...* 116, 1327. 1903, *A Flora of California* 1: 101. 1912, *Phytologia* 37(4): 317-407. 1977, *Journal of the Arnold Arboretum* 60(2): 320. 1979, *Brittonia* 36(4): 392. 1984.

in English: Parish's threeawn, threeawn, Parish three-awn

A. parodii Henrard

Argentina. See *Mededeelingen van's Rijks-Herbarium* 54(A): 428-429. 1927.

A. parvula (Nees) De Winter (*Stipa parvula* Nees)

South Africa. Annual, erect to geniculate, tufted, sometimes prostrate, lower glume awned, solitary awn, lateral awns missing, on stony soils, along water courses, rocky hillsides, disturbed areas, see *Florae Africae Australioris Illustrationes Monographicae* 169. 1841 and *Kirkia* 3: 132. 1963.

A. patula Chapman ex Nash (*Aristida scabra* sensu Chapm.)

U.S., Florida. Perennial, shortly rhizomatous, green spikelets, rare species growing in moist sandy barrens, sandy coast, open forest, savannah, flatwoods, grassland, ponds and disturbed sites, see *Bulletin of the Torrey Botanical Club* 23: 98. 1896 and *Rhodora* 88(855): 367-387. 1986.

in English: tall three-awn, threeawn

A. pedroensis Henrard

Argentina. See *Mededeelingen van's Rijks-Herbarium* 58(A): 232, t. 130. 1932, *Meded. Rijks-Herb.* 54(C): 731. 1933.

A. pendula Longhi-Wagner

Brazil. Perennial, erect, see *Bradea, Boletim do Herbarium Bradeanum* 5(5): 59-62, f. 1. 1988.

A. pennei Chiov. (*Aristida jemensis* Henrard ex Schwartz; *Aristida jemensis* Henrard)

Yemen, Arabia. Perennial, erect, short, smooth, tufted to densely tufted, foliage basal, leaves involute, panicle contracted, glumes unequal terminating in a short awn point, lemma scabrid, awns more or less equal stiff and spreading, widespread on stony and sandy plain, dry soil, on mountain slopes, see *Annali di Botanica* 2: 366. 1905, *Mitteilungen aus dem Institut für allgemeine Botanik in Hamburg* 10: 321. 1939.

A. pernicioso Domin

Western Australia, Northern Territory, tropical and subtropical Queensland. Perennial, compact, tufted, lemma awn column present, see *Bibliotheca Botanica* 85(2): 340-341, t. 13, f. 15-17. 1915.

A. personata Domin (*Aristida ramosa* var. *speciosa* Henrard)

Australia. Perennial, compact, tufted, slender to robust, branched, loose to open panicle, similar to *Aristida ramosa*, see *Mededeelingen van's Rijks-Herbarium* 58(A): 260, 290, t. 141. 1932, *Meded. Rijks-Herb.* 54(C): 731-732, 737. 1933, *Austr. Syst. Bot.* 5: 200. 1992.

A. peruviana Beetle (*Aristida adscensionis* L.)

Peru. Rare species growing on sand dunes near the ocean, see *Species Plantarum* 1: 82. 1753 and *Mededeelingen van's Rijks-Herbarium* 54: 9. 1926, *Phytologia* 30(5): 348. 1975, *Madroño* 40: 266. 1993.

A. petersonii Allred & Valdés-Reyna (for the American botanist Paul M. Peterson, born 1954, curator of grasses, National Museum of Natural History, Smithsonian Institution, interested in the subfamily Chloridoideae. See *Syst. Bot.* 14: 316. 1989; *Brittonia* 42(1): 47. 1990; P.M. Peterson & C.R. Annable, "Systematics of the annual species of *Muhlenbergia* (Poaceae: Eragrostideae)." *Syst. Bot. Monographs* 31: 1-109. 1991; *Madroño* 40: 71. 1993; *Amer. J. Bot.* 81: 622-629. 1994; *Novon* 5(3): 209. 1995; *Ann. Miss. Bot. Gard.* 82: 108. 1995; P.M. Peterson, R.D. Webster and J. Valdés-Reyna, "Genera of New World Eragrostideae (Poaceae: Chloridoideae)." *Gayana, Bot.* 54(2): 172. 1997; P.M. Peterson and J.J. Ortíz-Díaz, "Allelic variation in the amphitropical disjunct *Muhlenbergia torreyi* (Poaceae: Muhlenbergiinae)." *Brittonia* 50: 381-391. 1998; *Sida* 19(1): 66. 2000; S. Laegaard and P.M. Peterson, *Gramineae* (part 2) Subfam. Chloridoideae. Pp. 1-131. In: Harling, G. & L. Andersson (eds.). *Flora of Ecuador*. 2001; P.M. Peterson and Y. Herrera-Arrieta, "A leaf blade anatomical survey of *Muhlenbergia* (Poaceae: Muhlenbergiinae)." *Sida* 19: 469-506. 2001; *Contr. U.S. Natl. Herb.* 41: 1-255. 2001 [P.M. Peterson & al., Catalogue of New World grasses (Poaceae): II. subfamily Chloridoideae.]

Mexico. See *Novon* 5(3): 209-212, f. 1. 1995.

A. pilgeri Henr. (dedicated to the German botanist Robert Knuds Friedrich Pilger, 1876-1953, traveler, botanical explorer, plant collector in Brazil (Matto Grosso), Director at Botanical Garden Berlin-Dahlem, his works include "Gramineae novae, a cl. K. Skottsberg in Patagonia australi et in Fuegia collectae." *Repert. Spec. Nov. Regni Veg.* 12: 304-308. 1913 and "Sobra algunas gramíneas de América del Sur." *Revista Argent. Agron.* 11(4): 257-264. 1944. See L.R. Parodi, "Robert Pilger." *Revista Argent. Agron.* 20(2): 107-114. 1953; H. Melchior, "Zum Gedächtnis von Robert Pilger." *Bot. Jahrb. Syst.* 76(3): 385-409. 1954; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. University of Pennsylvania Press,

Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 310. 1972; S. Lenley et al., *Catalog of the manuscript and archival collections and index to the correspondence of John Torrey*. Library of the New York Botanical Garden. 327. 1973; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. 1917-1933; August Weberbauer, *Die Pflanzenwelt der peruanischen Andes in ihren Grundzügen dargestellt*. 39. Leipzig 1911)

South Africa. Perennial, densely tufted, coarse, robust, unbranched, leaf blade expanded at the base, lower internodes glabrous, ligule a fringe of short hairs, basal leaves leaf sheaths slightly keeled, inflorescence a compact panicle contracted and branched, spikelets with short pedicels, lower glume long awned, lemma articulation, three awns unequal, column twisted, very little forage value, tough and unpalatable, on sandy soils, veld, moist depressions, stony places, floodplains, riverbanks, see *Mededeelingen van's Rijks-Herbarium* 54(A): 443-445. 1927.

in English: Pilger's stick grass

in South Africa: Pilger-se-steekgras, Pilgers stechgras

A. pinifolia Catusas

The Caribbean, Cuba. Savannah, sandy soil, see *Novosti Sist. Vyss. Rast.* 20: 7. 1983, *Acta Botanica Cubana* 24: 3. 1985.

A. pittieri Henrard

Venezuela. Savannah, see *Mededeelingen van's Rijks-Herbarium* 54(A): 447-448. 1927.

A. platychaeta S.T. Blake

Queensland, New South Wales. Perennial, loosely tufted, slender, thin and smooth, unbranched, leaf blades flexuous to curly, sheath almost smooth, leaves scabrous, contracted inflorescences, usually loose panicle spike-like, equal or subequal glumes ovate to lanceolate, lemma linear-cylindrical white-tuberculate, awns filiform and divergent, grows in grassland, similar to *Aristida nitidula*, *Aristida blakei*, *Aristida strigosa*, *Aristida capillifolia* and *Aristida arida*, see *Proceedings of the Royal Society of Queensland* 51: 174, t. 5, f. 10-13. 1940.

A. polyclados Domin

Australia, Queensland. Annual, compact, tufted, branched, compressed, inverse glumes, twisted column, lemma articulation, see *Bibliotheca Botanica* 85(2): 338, t. 13, f. 10-12. 1915.

A. portoricensis Pilger

Puerto Rico. Largely tufted, culms spreading at base, endangered or threatened species, growing on red clay, rocky soils, sandy areas and dry fields, stony places, savannahs

and open fields, see *Symbolae Antillarum* 4: 100. 1903, *Flora of Puerto Rico and Adjacent Islands: A Systematic Synopsis* 1-342. 1982, *Sida* 13(4): 423-447. 1989.

in Spanish: pelos del diablo

A. pradana León

Cuba. Perennial, tufted, erect, wiry, rocky and stony soils, see *Bulletin of the Torrey Botanical Club* 53: 458. 1926.

A. protensa Henrard

Somalia. Perennial, densely tufted, short dense panicle spike-like cuneate below, glumes very unequal, lower glume linear-lanceolate, upper glume 2-toothed at the tip, linear upper glume with expanded base, slightly dilated distal end of the column, awns subequal, see *Mededeelingen van's Rijks-Herbarium* 54(B): 467-468. 1928, *Kew Bulletin* 47(2): 277-282. 1992.

A. pruinosa Domin

Western Australia, Queensland, Northern Territory. Perennial, loosely tufted, robust, branched, pruinose culms, subequal glumes, tuberculate lemma grooves, tropical and subarid, sands and alluvial soils, similar to *Aristida calycina* var. *praealta* and *Aristida biglandulosa*, see *Bibliotheca Botanica* 85(2): 345-346. 1915.

A. psammophila Henrard (Greek *psammos* "sand" and *philos* "lover, loving")

Queensland, New South Wales. Perennial, compact, tufted, culms sparsely branched and more or less terete, sheath scabrous, leaves scabrous, panicle more or less spike-like, glumes lanceolate and unequal, lemma pale brown, awns stiff and filiform, poor soils, sandy soils, similar to *Aristida longicollis*, *Aristida latifolia* and *Aristida macroclada*, see *Mededeelingen van's Rijks-Herbarium* 58(A): 229, t. 142. 1932, *Mededeelingen van's Rijks-Herbarium* 54(C): 734-735. 1932.

A. pubescens Caro & E.A. Sánchez

Argentina. See *Darwiniana* 19(2-4): 417-421, f. 2. 1975.

A. purpurascens Poiret (*Aristida affinis* (Schult.) Kunth; *Aristida elliotiana* Steud.; *Aristida geyeriana* Steud.; *Aristida neesiana* Trin. & Rupr.; *Aristida purpurascens* var. *alabamensis* Trin. & Rupr.; *Aristida purpurascens* var. *glauco-cissima* Kearney ex Scribn. & Ball; *Aristida purpurascens* var. *minor* Vasey; *Aristida racemosa* Muhl., nom. illeg., non *Aristida racemosa* Spreng.; *Aristida recurvata* Kunth; *Aristida riedeliana* Trin. & Rupr.; *Aristida stricta* Steud., nom. illeg., non *Aristida stricta* Michx.; *Aristida tenuispica* Hitchc.; *Chaetaria affinis* Schult.; *Chaetaria purpurascens* (Poir.) P. Beauv.; *Chaetaria recurvata* (Kunth) Roem. & Schult.)

U.S., Louisiana, Florida, Texas, North America, Mexico, Canada, Honduras. Perennial, growing on dry sandy soils, in open sterile ground, wetlands, gravelly soils, in sand barrens, see *Encyclopédie Méthodique. Botanique ...*

Supplément 1: 452. 1810, *Essai d'une Nouvelle Agrostographie* 30, 152, 158. 1812, *Nova Genera et Species Plantarum* 1: 123. 1815 [1816], *Descriptio uberior Graminum* 172. 1817, *Systema Vegetabilium, editio decima sexta* 2: 397. 1817, *Mantissa* 210. 1824, *Révision des Graminées* 1: 61. 1829, *Species Graminum Stipaceorum* 102, 113. 1842, *Nomenclator Botanicus. U.S., California, North America. Perennial bunchgrass, dark green, single-stemmed, branched, small leaves, open and drooping inflorescence, spikelets three-awned, poor forage, low palatability, growing in small dense clumps, on rocky or sandy plains and slopes, on clayey soils, along roadsides, dry upland, see *Annals of the Lyceum of Natural History of New York* 1(1): 154-155. 1824, *Transactions of the American Philosophical Society, new series*, 5: 145. 1837, *Species Graminum Stipaceorum* 107. 1842, *Linnaea* 22(3): 343. 1849, *Proceedings of the Academy of Natural Sciences of Philadelphia* 14: 93. 1862, *Mexicanas Plantas* 2: 79. 1886, *Contributions from the United States National Herbarium* 3(1): 47. 1892, *Contributions from the United States National Herbarium* 2(3): 515. 1894 and *Circular, Division of Agrostology, United States Department of Agriculture* 34: 5, 7-8. 1901, *Flora of the Southeastern United States* ... 117. 1903, *Contributions from the United States National Herbarium* 17(3): 280. 1913, *Contributions from the United States National Herbarium* 22(7): 556, 560. 1924.

in English: purple three-awn, purple threeawn, perennial threeawn, purple needle-grass

in Mexico: tres aristas morado

A. purpurea Nutt. var. **wrightii** (Nash) Allred (*Aristida brownii* Warnock; *Aristida wrightii* Nash)

Mexico, U.S., Texas. Clumping, spikelets reddish, found in gypsum soil, see also *Aristida wrightii* Nash, see *Transactions of the American Philosophical Society, new series*, 5: 145. 1837 and *Flora of the Southeastern United States* ... 116, 1327. 1903, *Brittonia* 36(4): 393. 1984.

in English: Wright's threeawn

A. purpusiana Hitchc.

North America, Mexico, Baja California. See *Contributions from the United States National Herbarium* 17(3): 276. 1913.

A. pycnostachya Cope

Somalia. Perennial, densely tufted, tussocky, woody base, elongate panicle fully exerted and without the cuneate base, glumes unequal, upper glume entire, column not dilated at the distal end, awns subequal, weed, found on sandy soil, see *Kew Bulletin* 47(2): 277. 1992.

in Somalia: meyro

A. queenslandica Henrard

Australia, Queensland. Perennial, loosely tufted, see *Mededeelingen van's Rijks-Herbarium* 54(B): 488-489. 1928, *Brunonia* 3(2): 271-333. 1980.

A. queenslandica Henrard var. **dissimilis** (S.T. Blake) B.K. Simon (*Aristida dissimilis* S.T. Blake)

Australia. Densely tufted, green to dark green, erect, culm internodes glabrous, on sandy soil, rocky slopes, see *Proceedings of the Royal Society of Queensland* 51: 170, t. 4, f. 4-7. 1940, *Austrobaileya* 2(1): 96. 1984, *Australian Systematic Botany* 5: 129-226. 1992.

A. queenslandica Henrard var. **queenslandica**

Australia, Queensland, New South Wales, Northern Territory. Perennial, wiry and more or less simple to branched, slender tussocks-forming, culm internodes hirsute or villous, sheath smooth, loose panicle contracted and often nodding, glumes lanceolate, lower glume acuminate, upper glume abruptly acuminate, lemma purplish and involute, awns dissimilar and more or less stiff, grain with a ventral furrow, on shallow soils, open forest.

in English: wire grass

A. ramosa R. Br. (*Aristida ramosa* var. *scaberula* Henrard; *Aristida ramosa* var. *speciosa* Henrard)

Western Australia, Queensland, New South Wales, Victoria, South Australia. Perennial, loosely tufted, erect, tough and rigid, usually much branched and fastigiate, canelike, forming slender tussocks, sheath often tuberculate, ligule membranous, leaves green and rolled, inflorescence branches more or less contracted, panicle loose and very narrow, glumes unequal and lanceolate, lower glume acute, upper glume obtuse, lemma smooth and not tuberculate apically, purplish lemma linear to elliptic, awns filiform spreading

or divergent, 3 stamens, ornamental, found on rocky areas, on poor soils, similar to *Aristida personata* and *Aristida echinata*, see *Prodromus Florae Novae Hollandiae* 1: 173. 1810, *Flora Australiensis: A Description ...* 7: 563. 1878 and *Repertorium Specierum Novarum Regni Vegetabilis* 9: 551. 1911, *Mededeelingen van's Rijks-Herbarium* 58(A): 260, 290, t. 141. 1932, *Mededeelingen van's Rijks-Herbarium* 54(C): 731-732, 736. 1933, *Brunonia* 3(2): 271-333. 1989, *New Zealand Journal of Botany* 29: 117-129. 1991, *Australian Systematic Botany* 5: 129-226. 1992.

in English: cane wire grass, purple wire grass

A. ramosissima Engelm. ex A. Gray (*Aristida ramosissima* f. *uniaristata* (A. Gray) Mohlenbr.; *Aristida ramosissima* var. *chaseana* Henrard; *Aristida ramosissima* var. *uniaristata* A. Gray) (named for the American botanist Mrs. Agnes Chase (née Merrill), 1869-1963)

U.S., Texas, Florida. Annual, growing on sterile or open clayey soils, roadsides and dry openings, see *A Manual of the Botany of the Northern United States. Second Edition* 550. 1856, *A Manual of Botany of the Northern United States (edition 5)* 618. 1867 and *Contr. U.S. Natl. Herb.* 22(7): 538. 1924, *Mededeelingen van's Rijks-Herbarium* 54(B): 498. 1928, *Illustrated Flora of Illinois* 329. 1973.

in English: slender three-awn, branched three-awn grass, s-curve three-awn, s-curve threeawn, Chase threeawn

A. recta Franch. (*Aristida atroviolacea* Hack.; *Aristida gossweileri* Pilg.; *Aristida hooki* De Wild.) (for the botanist John Gossweiler, 1873-1952, plant collector; see Alberto Judice Leote Cavaco (b.1916), *Contribution à l'étude de la flore de la Luanda d'après les récoltes de Gossweiler, 1946-1948*. Lisboa 1959 [Publicações culturais da Companhia de Diamantes de Angola, vol. 42], J. Lanjouw and F.A. Stafleu, *Index Herbariorum*. Part II, *Collectors A-D*. Regnum Vegetabile vol. 2. 1954)

Tropical Africa. Perennial, erect, tufted, rhizomatous, slender, basal leaf sheaths persistent, narrow leaves, contracted inflorescence, spikelets deep purple, lower glume awned, three awns, common around vleis, damp places, seepage areas, sour mountain grassland, slopes, in seepage meadow, see *Bulletin de la Société d'Histoire Naturelle d'Autun* 8: 365. 1895 and *Bulletin de l'Herbier Boissier, sér. 2*, 6(9): 707. 1906, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 39: 598. 1907.

A. recurvata Kunth (*Aristida neesiana* Trin. & Rupr.; *Aristida purpurascens* Poir.; *Aristida riedeliana* Trin. & Rupr.; *Chaetaria recurvata* (Kunth) Roem. & Schult.) (for the German traveler Ludwig Riedel, 1790-1861, plant collector in Brazil; see J.H. Barnhart, *Biographical notes upon botanists*. 3: 156. Boston 1965; H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 233. Oxford 1964; Stafleu and Cowan, *Taxonomic literature*. 4: 789-790. 1983)

Central America to Brazil. Perennial, erect, caespitose, sparsely branched, basal leaf sheaths persistent and curling, with awn branches twisted and reflexed, awns spirally coiled, unpalatable, forming dense clumps, found in rocky places, open areas, open grassy area, shallow soil, savannah, along forest edge, slopes, see *Encyclopédie Méthodique. Botanique ... Supplément* 1: 452. 1810, *Nova Genera et Species Plantarum* 1: 123. 1815 [1816], *Systema Vegetabilium, editio decima sexta* 2: 397. 1817, *Species Graminum Stipaceorum* 113. 1842.

A. refracta Griseb. (*Aristida gyrans* Chapm.)

India, U.S., North America, Cuba. Growing in clumps, lemma enclosing the grain, related to *Aristida abnormis* Chiov., see *Catalogus plantarum cubensium ...* 228. 1866, *Botanical Gazette* 3(3): 18-19. 1878 and *Sida* 13(4): 423-447. 1989, *Fontqueria* 46: [i-ii], 1-259. 1997.

in English: island-thicket three-awn

A. repens Trin. (*Aristida subspicata* Trin. & Rupr.; *Chloris anisopoda* Scribn. ex B.L. Rob.)

Ecuador, Galápagos. Annual, delicate, terete, weak, much-branched, erect ore ascending, decumbent at base, leaf sheaths more or less flattened, ligule a row of hairs, leaf blades flat and involute, panicle contracted, glumes awned, weedy species, see *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 1(1): 87. 1830 and *Flora of the Galápagos Islands* 828-829. 1971.

A. rhiniochloa Hochst. (*Aristida andoniensis* Henrard; *Aristida serrulata* Chiov.)

Tropical Africa, Niger, Namibia, Mali, Mauritania, South Africa. Annual, tufted, erect, branched, prickly, scabrid, coarse, spiny, leaf sheaths keeled and rough with long white hairs, ligule a ring of short hairs, leaf blades keeled and scabrous, leaves hard and prickly, panicle open to slightly contracted, coarse spikelets, awns at near right angles to the spikelet, glumes oblong and papery, lower glume awned, lemma linear-lanceolate and scabrid, three sharp awns ascending, column absent and no articulation, pioneer grass, low grazing value, growing on red clay soils, on stony slopes, sand to sandy loam, deciduous bushland, heavy soil, gravel plains, open grassveld, disturbed areas, rocky slopes, overgrazed veld, eroded soils, uncultivated lands, see *Flora* 38: 200. 1855 and *Agricultura Coloniale* 18: 351. 1924, *Mededeelingen van's Rijks-Herbarium* 54(B): 691-692. 1928.

in English: large-seeded three-awn

in South Africa: skurwe steekgras, skurwesteekgras, rauhspelzen stechgras

A. rhizomophora Swallen

U.S., Florida. Coarse and vulnerable species with well-developed rhizomes, very palatable, found in wet prairie,

mesic flatwoods, pine flatwood, see *Journal of the Washington Academy of Sciences* 19(10): 196, f. 1. 1929.

in English: Florida three-awn grass, Florida three-awn, Florida three-awned grass, Florida threeawn

A. riograndensis Severo & Boldrini

Warm regions, South America, North America. See *Bradea*, *Boletim do Herbarium Bradeanum* 3(30): 239-242, f. 1. 1982, *Acta Botanica Brasilica* 4(1): 105-124. 1990, *Boletim do Instituto de Botânica* (São Paulo) 12: 113-179. 1999.

A. riparia Trin. (*Aristida implexa* var. *aequa* Trin. & Rupr.; *Aristida planifolia* Swallen; *Aristida riparia* var. *andina* Henrard)

South America, Brazil, Panama. Perennial or annual, erect, caespitose, forming small clumps, foliage coarse, compact inflorescence densely flowered, glumes lanceolate, callus 2-dentate, unpalatable, savannah, overgrazed fields, *campo rupestre*, *cerrado*, see *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 4: 48. 1836, *Species Graminum Stipaceorum* 124. 1842 and *Bulletin de l'Herbier Boissier, sér. 2, 4(3)*: 277. 1904, *Meded. Rijks-Herb.* 54(A): 392. 1927, *Mededeelingen van's Rijks-Herbarium* 58(A): 185. 1932, *Meded. Rijks-Herb.* 54(C): 739. 1933, *Annals of the Missouri Botanical Garden* 30(2): 145. 1943, *Bol. Inst. Bot.* (São Paulo) 12: 141. 1999.

A. roemeriana Scheele (*Aristida fasciculata* var. *micrantha* (Vasey) Vasey ex L.H. Dewey; *Aristida micrantha* (Vasey) Nash; *Aristida muhlenbergioides* E. Fourn.; *Aristida purpurea* Nutt.; *Aristida purpurea* var. *micrantha* Vasey; *Aristida purpurea* var. *purpurea*)

U.S., Texas, Mexico. Branched, eaten by cattle, low forage value, found on reddish soils, grassy plains, see *Annals of the Lyceum of Natural History of New York* 1(1): 154-155. 1824, *Transactions of the American Philosophical Society, new series*, 5: 145. 1837, *Linnaea* 22(3): 343. 1849, *Mexicanas Plantas* 2: 79. 1886 and *Flora of the Southeastern United States* ... 117. 1903.

in English: Roemer threeawn

in Mexico: cola de zorra, tres aristas mexicano

A. rosei Hitchc.

Santo Domingo. See *Contributions from the United States National Herbarium* 22(7): 584. 1924.

A. sanctae-luciae Trin. (*Aristida capillacea* Lam.)

Warm regions, Brazil. Forming small clumps, found in moist areas, see *Tableau Encyclopédique et Méthodique ... Botanique* 1: 156. 1791, *Essai d'une Nouvelle Agrostographie* 30, 158, t. 8, f. 5. 1812, *De Graminibus Paniceis* 25. 1826 and *Mededeelingen van's Rijks-Herbarium* 58(C): 531. 1928, *Bol. Inst. Bot.* (São Paulo) 12: 145. 1999.

A. sandinensis Catusus

Cuba. Sandy soils, see *Novosti Sist. Vyss. Rast.* 21: 21. 1984, *Acta Botanica Cubana* 24: 2. 1985.

A. sayapensis Caro

Argentina. Sandy soil, see *Kurtziana* 1: 159-162, f. 6A, 7A-C. 1961.

A. scabrivalvis Hack.

South Africa. Annual, see *Bulletin de l'Herbier Boissier, sér. 2, 6(9)*: 708. 1906, *Kirkia* 3: 132. 1963.

A. scabrivalvis Hack. subsp. *contracta* (De Winter) Meld. (*Aristida scabrivalvis* subsp. *contracta* Melderis)

South Africa. Annual, tufted, erect to geniculate, spikelets in dense clusters at the ends of the branches, lower glume awned, three awns, usually in disturbed and open areas, along roadsides, hillslopes.

A. scabrivalvis Hack. subsp. *scabrivalvis*

South Africa. Annual, tufted, erect to geniculate, often branched, leaf sheath keeled, ligule membrane-like, leaf blade slightly rough, open panicle with spreading branches, three scabrid awns, lower glume strongly awned, no grazing value, usually in disturbed areas, old fields, undisturbed open bushveld, uncultivated lands, savannah, along roadsides, shallow and sandy soils, limy soil.

in English: purple three-awn

in South Africa: pers steekgras

A. schebehliensis Henrard (Uebi Scebeli, or Shebeli, Shebelli)

Somalia. Perennial, branched, wiry, tussocky, panicle contracted, glumes acuminate, lemma not narrowed above the middle, awns unequal to subequal, see *Mededeelingen van's Rijks-Herbarium* 54(B): 537-539. 1928, *Kew Bulletin* 47(2): 277-282. 1992.

A. schiedeana Trin. & Rupr. (*Aristida flexuosa* E. Fourn.; *Aristida orcuttiana* Vasey; *Aristida virletii* E. Fourn.; *Aristida virletii* E. Fourn. ex Hemsl.) (for the German botanist Christian Julius Wilhelm Schiede, 1798-1836, physician, traveler, gardener, traveling companion of Ferdinand Deppe (1794-1861), from 1828 to 1836 plant collector and botanical explorer in Mexico, his writings include *De plantis hybridis sponte natis*. Cassellis Catorum [Kassel] 1825, with A. de Chamisso wrote "Plantarum mexicanarum a cl. viris Schiede et Deppe collectarum recensio brevis." *Linnaea*. 1830-1831; see J.H. Barnhart, *Biographical notes upon botanists*. 3: 224. 1965; Ludolf Karl Adelbert von Chamisso and D.F.L. von Schlechtendal, "De plantis in expeditione speculatoria Romanzoffiana observatis." *Linnaea*. 1: 1-73. 1826; Stephan F. Ladislaus Endlicher, *Atakta botanika*. Nova genera et species plantarum descripta et iconibus illustrata. Vienna 1833; I.H. Vegter, *Index Herbariorum*. Part II (6), *Collectors S. Regnum Vegetabile* vol. 114. 1986; H.N. Clokie, *Account of the Herbaria of the*

Leipzig 1942; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. 678. 1964; Gordon Douglas Rowley, *A History of Succulent Plants*. Strawberry Press, Mill Valley, California 1997; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993; Irving William Knobloch, compil., "A preliminary verified list of plant collectors in Mexico." *Phytologia Memoirs*. VI. 1983)

Central America, Mexico. Perennial, densely caespitose, erect, simple, more or less scabrous, basal leaves, panicle ovate with diverging branches, lateral awns very short erect or divergent, good forage value, similar to *Aristida laxa*, see *Icones et Descriptiones Plantarum, quae aut sponte ...* 5: 46. 1799, *Species Graminum Stipaceorum* 120-121. 1842, *Biologia Centrali-Americana; ... Botany ...* 3: 535. 1885, *Mexicanas Plantas* 2: 76-77. 1886, *Bulletin of the Torrey Botanical Club* 13(2): 27-28. 1886 and *Contr. U.S. Natl. Herb.* 22(7): 525-526. 1924, *Journal of the Washington Academy of Sciences* 23(10): 453. 1933, *Taxon* 33: 126-134. 1984, *Novon* 5: 217. 1995.

in Mexico: tres barbas abierto, amarredera, raicilla, jokut-araku siruku (purépecha)

A. schiedeana Trin. & Rupr. var. *orcuttiana* (Vasey) Allred & Valdés-Reyna (*Aristida hypomegas* Mez; *Aristida orcuttiana* Vasey)

North America. See *Species Graminum Stipaceorum* 120-121. 1842, *Bulletin of the Torrey Botanical Club* 13(2): 27. 1886 and *Repertorium Specierum Novarum Regni Vegetabilis* 17(8-12): 146. 1921, *Contr. U.S. Natl. Herb.* 22(7): 526. 1924, *Mededeelingen van's Rijks-Herbarium* 54(A): 250. 1927, *Novon* 5(3): 217. 1995.

in English: singleawn aristida, beggarstick threeawn, Orcutt's threeawn

A. schiedeana Trin. & Rupr. var. *schiedeana*

America.

A. schultzii Mez

Tropical Australia, Northern Territory and Queensland. Perennial, compact, tufted, branched, fastigiate, inflorescence loosely contracted, lower glume 3- to 7-nerved, similar to *Aristida warburgii* and *Aristida kimberleyensis*, see *Repertorium Specierum Novarum Regni Vegetabilis* 17(8-12): 149. 1921.

A. sciuroides Domin (*Aristida borealis* B.K. Simon)

Tropical and subtropical Queensland. Perennial, robust, tufted, compact, branched, lemma pseudoarticulation absent, lemma involute, similar to *Aristida ingrata* and *Aristida kimberleyensis*, see *Bibliotheca Botanica* 85(2): 347.

1915, *Austrobaileya* 2(1): 89, f. 1E. 1984, *Austr. Syst. Bot.* 5: 178. 1992.

A. sciurus Stapf

South Africa. Perennial, tufted, erect, unbranched, robust, hard, fibrous, shortly rhizomatous, basal sheaths with woolly hairs, leaf blade narrower than the leaf sheaths, hanging panicle, spikelets with three awns, lower glume shorter than the upper, lemma not articulated, common on moist sandy soils, along roadsides, in mountainous sour grassland, mountain sourveld, see *Flora Capensis* 7: 557. 1899 and *Mededeelingen van's Rijks-Herbarium* 54(B): 549. 1928.

in English: bristle grass, tall three-awned grass, tall three-awn

in South Africa: steekgras, groot steekgras, langsteekgras

A. scribneriana Hitchc. (*Aristida lanuginosa* Burch.; *Aristida lanuginosa* Scribn. ex Hitchc., nom. illeg., non *Aristida lanuginosa* Burch.)

North America, Mexico. See *Travels in the Interior of South Africa* 2: 226. 1824 and *Contributions from the United States National Herbarium* 17(3): 278. 1913, *Contributions from the United States National Herbarium* 22(7): 566. 1924.

A. setacea Retz. (*Aristida caerulescens* sensu Thw., non Desf.; *Aristida quinqueseta* Steud.; *Aristida setacea* hort. ex Steud.; *Chaetaria setacea* (Retz.) P. Beauv.)

Southern India, Sri Lanka. Perennial, caespitose, slender, erect or ascending, more or less branched, nodes thickened and prominent, wiry, ligule a ciliate membrane, leaves wavy, panicle contracted or loose, spear-like florets, glumes awned, probably not palatable, culms used for making brooms and brushes, for paper manufacture and screens, dry and arid zones, roadsides, plantations, saline habitats, disturbed sites, sandy places, wet zones, coastal saline situations, grassland, savannah, scrubby forests, see *Observationes Botanicae* 4: 22. 1786, *Essai d'une Nouvelle Agrostographie* 30, 158. 1812, *Nomenclator Botanicus. Editio secunda* 1: 132. 1840, *Synopsis Plantarum Glumacearum* 1: 420. 1855 [1854] and *Handb. Fl. Ceylon* 5: 253. 1900, *Grasses of Ceylon* 64. 1956, *Ceylon J. Sci., Biol. Sci.* 2(2): 126. 1959, *Grasses of Burma ...* 412. 1960.

in India: cheepuru gaddi, dodda hanchi hullu, gaddi parakalu, hallu chuch-ho hullu, hayapuchhika, kamboji, maashaparni, moti kussal, naayi hanchi hullu, poochika gaddi, thoda pampillu

in Sri Lanka: et tuttili, et tuttiri

A. setifolia Kunth (*Aristida arenaria* Trin.; *Aristida doelliana* Henrard; *Aristida elatior* Döll ex Henrard; *Aristida elatior* Cav.; *Aristida gardneriana* Steud.; *Aristida sabulosa* Kunth; *Aristida setifolia* var. *arenaria* (Trin.) Trin. & Rupr.; *Aristida setifolia* var. *grandiflora* Döll; *Aristida setifolia* var. *grandiflora* Trin. & Rupr.; *Aristida setifolia* var. *intermedia*

Trin. & Rupr.; *Aristida setifolia* var. *parviflora* Döll; *Aristida tarapotana* Mez; *Chaetaria setifolia* (Kunth) Nees)

South America, Venezuela. Annual, densely tufted, contracted panicle, glumes narrowly lanceolate and keeled, lemma awns deciduous, savannah, open habitats, see *Icones et Descriptiones Plantarum, quae aut sponte ...* 6: 65, t. 589, f. 1. 1801, *Nova Genera et Species Plantarum* 1: 122. 1815 [1816], *De Graminibus Paniceis* 25. 1826, *Flora Brasiliensis seu Enumeratio Plantarum* 2: 381-383. 1829, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 196. 1833, *Species Graminum Stipaceorum* 126-127. 1842, *Synopsis Plantarum Glumacearum* 1: 137. 1855 [1854], *Flora Brasiliensis* 2(3): 22. 1878 and *Repertorium Specierum Novarum Regni Vegetabilis* 17(8-12): 151. 1921, *Mededeelingen van's Rijks-Herbarium* 54: 154, 161-163. 1926, *Bol. Inst. Bot.* (São Paulo) 12: 146. 1999.

A. sieberiana Trin. (also spelled *sieberana*) (*Aristida pallida* Steud.; *Aristida sieberiana* Trin. ex Spreng.; *Aristida sieberiana* var. *nubica* Trin. & Rupr.)

Tropical Africa, Somalia, Guinea, Mali, Chad, Mauritania, Sudan, Ghana. Perennial, branched, robust, woody, suffruticose, loosely tufted, mat-forming, strong root system, panicle contracted, lower glumes bifid and awned, cylindrical lemma not narrowed above, long sharp awns unequal, unpalatable and scarcely eaten or good for livestock and readily grazed, used for thatching, found in sandy soils, dry inland sandy areas, coastal sand, orange sand, dunes, see *Neue Entdeckungen im ganzen Umfang der Pflanzenkunde* 2: 61. 1821, *Species Graminum Stipaceorum* 161. 1842.

in Arabic: gau

in Nigeria: baya, datsi, gatsaura, gatsuara, gau, kas makaru, katsaura, suwulamè

in Somalia: marchain, birreh, baradooli

in Senegal: diarhat, negeret, paldinak, paldinaq, sirin

A. simpliciflora Chapman

U.S., Florida, Alabama, Georgia. Vulnerable and endangered species, growing in longleaf pine-wiregrass savannahs, moist pinewoods, grasslands, damp pine barrens, see *Encyclopédie Méthodique. Botanique ... Supplément* 1: 452. 1810, *Botanical Gazette* 3(3): 18. 1878, *Contributions from the United States National Herbarium* 3(1): 44. 1892 and *Contr. U.S. Natl. Herb.* 22(7): 580. 1924, *Mededeelingen van's Rijks-Herbarium* 54(B): 568. 1928.

in English: Southern three-awned grass, Southern threeawn, Southern three-awn, Chapman three-awn grass, Chapman threeawn

A. somalensis Stapf

Ethiopia, Somalia, Kenya. Perennial, tufted, ovate panicle, glumes unequal and acuminate, column without an articulation, found in granitic areas, dry bushland, slopes, see *Bulletin of Miscellaneous Information Kew* 1907: 216. 1907, *Mededeelingen van's Rijks-Herbarium* 54(B): 572. 1928, *Kew Bulletin* 47(2): 277-282. 1992.

in Somalia: soda'eleh, sodaheleh

A. spanospicula Allred, Valdés-Reyna & Sánchez-Ken

Mexico. See *Novon* 5(3): 214-217, f. 4. 1995

A. spectabilis Hack.

South Africa. Perennial, densely tufted, membranous lower glume without mucro or awn, lemma articulation, three awns, on shallow soils, sandy soils, rocky mountain slopes, see *Bulletin de l'Herbier Boissier* 3(8): 380. 1895.

in South Africa: bergsteekgras

A. spegazzinii Arechav. (*Aristida pampeana* Speg.; *Aristida spegazzinii* f. *colorata* Hack.; *Aristida spegazzinii* var. *abbreviata* Hack.; *Aristida spegazzinii* var. *genuina* Hack.; *Aristida spegazzinii* var. *pallescens* Hack.; *Aristida spegazzinii* var. *spegazzinii*)

South America, Uruguay, Argentina. Annual or short-lived perennial, tufted, low forage value, forming clumps, along roadsides, see *Anales Museo Nacional de Historia Natural de Buenos Aires* 4: 177, f. 1. 1895 Carlos Luigi Spegazzini (1858-1926), *Contribucion al estudio de la flora de la Sierra de la Ventana ...* 62. La Plata 1896 and *Anales del Museo Nacional de Buenos Aires* 11: 93-94. 1904, *Anales del Museo Nacional de Buenos Aires* 21: 70. 1911, *Meded. Rijks-Herb.* 54(B): 580, 582. 1928, *Bol. Inst. Bot.* (São Paulo) 12: 147. 1999.

A. spiciformis Elliott (*Aristida squarrosa* Trin.; *Aristida stricta* Muhl., nom. illeg., non *Aristida stricta* Michx.; *Chaetaria squarrosa* (Trin.) Schult.)

U.S., Florida, North America. Perennial, tufted, stiffly erect, inflorescence erect, dense panicle spike-like, column of awn twisted, found in moist-dry sites, droughty and poorly drained soils, flatwoods and wet flatwoods, wet prairie, dry prairie, coastal plain, coastal swales, sand hill, brackish marshes, savannahs and scrub, see *A Sketch of the Botany of South-Carolina and Georgia* 1(2): 141. 1816, *Descriptio uberius Graminum* 174. 1817, *Neue Entdeckungen im ganzen Umfang der Pflanzenkunde* 2: 52. 1821, *Mantissa* 3(Add. 1): 577. 1827.

in English: three-awn grass, bottlebrush three-awn, bottlebrush threeawn, bottlebrush three awn grass, bottlebrush grass, pine barren three-awned grass

A. spiciformis Elliott var. *antillarum* Cat. Guerra

America, the Caribbean. See *Bot. Zurn. (Kiev)* 69(6): 874. 1984.

A. spiciformis Elliott var. *spiciformis*

America.

A. spuria Domin

Australia, Queensland, New South Wales. Perennial, short-lived, erect, thin, slender, forming compact tufts, strongly branched, fastigiate, smooth glabrous culm internodes, sheath glabrous or pilose, leaf blades setaceous and involute, inflorescence loosely contracted, panicle linear, glumes linear and acuminate, lemma narrow-linear, awns dissimilar, similar to *Aristida utilis*, see *Bibliotheca Botanica* 85(2): 341-342. 1915, *Austr. Syst. Bot.* 5: 150. 1992.

A. stenophylla Henrard

Somalia. Perennial, branched, wiry, tussocky, panicle contracted, usually blunt awnless glumes, lemma not narrowed above the middle, awns unequal to subequal, grassland, limestone, dry sandy and stony soils, shrubland, open bushland, orange sand, related to *Aristida sieberiana* Trin., see *Mededeelingen van's Rijks-Herbarium* 54(B): 587-588. 1928, *Kew Bulletin* 47(2): 277-282. 1992.

in Somalia: xalfo, maad, marchain, birre', birreh

A. stenostachya W.D. Clayton

Tanzania, Somalia, Kenya, Zambia. Perennial, densely tufted, contracted or spike-like inflorescence, glumes subequal, lemma smooth, column without an articulation, growing in sandy soils, bushland, clearings, see *Boletín de la Sociedad Argentina de Botánica* 12: 111. 1968, *Kew Bulletin* 47(2): 277-282. 1992.

A. stipiformis Lam. ex Poir. (*Aristida stipiformis* Hochst. ex Steud., nom. illeg., non *Aristida stipiformis* Lam. ex Poir.)

Senegal, Africa. See *Encyclopédie Méthodique. Botanique ... Supplément* 1: 452. 1810, *Synopsis Plantarum Glumacearum* 1: 143. 1854 and *Annali di Botanica* 13(3): 371. 1915, *Mededeelingen van's Rijks-Herbarium* 54(A): 420-421. 1927.

A. stipitata Hack. ex Schinz

Africa, Zimbabwe, Namibia. Perennial, polymorphic, variable, tufted to densely tufted, coarse, smooth, glabrous, erect, unbranched or branched from the upper nodes, leaf sheath round, ligule a short ciliate membrane, leaf blades tapering to a narrow tip, inflorescence rigid and erect, compact spike-like panicle, spikelets with a twisted column, three rough awns, unpalatable, very low grazing value, found in open savannah, in open bushveld, deep sandy soils, in disturbed areas, rocky places, along vleis, see *Verhandlungen des Botanischen Vereins für die Provinz Brandenburg und die angrenzenden Länder* 30: 143. 1888.

in English: long-awned three-awn, sandveld long-awned stick grass

in South Africa: langnaaldsteekgras, sandveld stechgras, steifes stechgras

A. stipitata Hack. ex Schinz subsp. *graciliflora* (Pilg.) Meld. (*Aristida graciliflora* Pilg.; *Aristida stipitata* var. *graciliflora* (Pilg.) De Winter)

Africa, Zimbabwe. Perennial, loosely tufted, slender, erect, lower internodes glabrous or pubescent, narrow inflorescence, lower glume awned, three awns, found in disturbed areas, rocky places, seepage zones, see *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 39: 599. 1907, *Kirkia* 3: 133. 1963, *Prodromus einer Flora von Südwestafrika* 160: 34. 1970.

A. stipitata Hack. ex Schinz subsp. *ramifera* (Pilg.) Meld. (*Aristida ramifera* Pilg.; *Aristida stipitata* subsp. *ramifera* Hack.)

Africa, Zambia. Green to yellow, inflorescence yellowish to greenish, found in open areas, sandy places, see *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 39: 599. 1907, *Boletim da Sociedade Broteriana* 44: 288. 1970.

A. stipitata Hack. ex Schinz subsp. *robusta* (Stent & Rattray) Melderis (*Aristida graciliflora* var. *robusta* Stent & Rattray; *Aristida stipitata* var. *robusta* (Stent & Rattray) De Winter)

Africa, Zimbabwe, Zambia. Perennial, robust, tufted, lower internodes glabrous or pubescent, narrow inflorescence, lower glume awned, three awns, found in disturbed areas, sandy soils, see *Proceedings of the Rhodesia Scientific Association* 32: 44. 1933, *Kirkia* 3: 133. 1963, *Prodromus einer Flora von Südwestafrika* 160: 34. 1970.

A. stipitata Hack. ex Schinz subsp. *spicata* (De Winter) Meld. (*Aristida stipitata* var. *spicata* De Winter)

Africa, Zimbabwe, Zambia. Perennial, slender, erect, tufted, branched at the upper nodes, lower internodes glabrous or pubescent, narrow spicate inflorescence, panicle dense, lower glume awned, three awns, on deep sandy soils, see *Kirkia* 3: 133. 1963, *Prodromus einer Flora von Südwestafrika* 160: 34. 1970.

A. stipitata Hack. ex Schinz subsp. *stipitata*

Africa, Zimbabwe, Zambia. Perennial, robust, strong, erect, tufted, branched or unbranched, lower internodes glabrous or pubescent, narrow spicate inflorescence, panicles dense and spike-like, lower glume awned, three awns, pasture, low forage value, pioneer grass, thatching grass, on deep sandy soils, see *Verhandlungen des Botanischen Vereins für die Provinz Brandenburg und die angrenzenden Länder* 30: 143. 1888.

A. stipoides Lam. (*Aristida fontismagni* Schweick.; *Aristida stipoides* R. Br., nom. illeg., non *Aristida stipoides* Lam.; *Arthratherum stipoides* (R. Br.) P. Beauv.)

Tropical Africa. Annual, loosely tufted, robust, succulent and sweet nodes, galls in the basal joints, nodes and internodes glabrous, auricles woolly, leaf sheaths slightly keeled at the base, ligule a woolly fringe of hairs, leaf blades

expanded or rolled, inflorescence an open and drooping panicle, spikelets glabrous, lower glume lanceolate without mucro or awn, three awns, pioneer grass, worthless as grazing, grazed only when very young, thatching grass, ruderal, eaten by local people, on deep sandy soils, sandy depressions, uncultivated lands, seasonal floodplains, rocky hillsides, along roadsides, old cultivations, see *Tableau Encyclopédique et Méthodique ... Botanique* 1: 157. 1791, *Prodromus Florae Novae Hollandiae* 1: 174. 1810, *Essai d'une Nouvelle Agrostographie* 33, 152. 1812 and *Fragmenta Florae Philippinae* 2: 146. 1904, *Bibliotheca Botanica* 85(2): 337, 340, t. 13-14, f. 9, 12, 18-19. 1915, *Repertorium Specierum Novarum Regni Vegetabilis* 17(8-12): 147. 1921, *Mededeelingen van's Rijks-Herbarium* 54(B): 593, 627. 1928, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 76(2): 220-221. 1954, *Austrobailyea* 2: 283. 1986, *Blumea* 37(1): 228. 1992.

in Mali: teloloud, telolud

in Niger: aggur mumu, agilé mumu, fono sunfey, foon sumfey, fulam sugu, funsumfey, gudged'y, katchiema, katchierma, katsemu, kevel, korledo, shohon waynabé, sugunaly, suwu nalli

in Nigeria: garasa, garasà, garlasa, gwiiwar tsoohuwà, gwiiwar tsohuwa, hanhande, katsemu, sodo, sodoji, tsintsiyar kogi, tsintsiyar koogii, urleho, wutsiyar jaakii, yuus soroduk

in Senegal: bebela, budel, diahal dieg, gendarat, makir, makiro, mpal diinah, paldinaq, siraba, siriba

in South Africa: grootfonteinsteekgras, grootfonteiner stechgras

A. stipoides Lam. var. *meridionalis* Stapf

Tropical Africa. See *Tableau Encyclopédique et Méthodique ... Botanique* 1: 157. 1791, *Flora Capensis* 7: 562-563. 1899.

A. stricta Michx. (*Aristida beyrichiana* Trin. & Rupr.; *Aristida stricta* Muhl., nom. illeg., non *Aristida stricta* Michx.; *Aristida stricta* Steud., nom. illeg., non *Aristida stricta* Michx.; *Aristida stricta* var. *stricta*; *Chaetaria stricta* (Michx.) P. Beauv.)

Southeast U.S., North America. Perennial bunchgrass shallow rooted, upright, densely tufted, sometimes rhizomatous, clump-forming, smooth, stiff and flexible leaves folded together lengthwise, sheaths hairy, leaves densely hairy on the upper surface, loosely arranged spikelets in a slender panicle, spikelets with three distinctive awns, retains leaves all year, cattle forage, when mature is a low quality forage, tolerates seasonal flooding, usually flowers after its habitat has been burned, found in infertile sands and sandy loams, wetlands, wet prairies, scrub and uplands, in the coastal plain, sandy and seasonally wet areas, *Pinus palustris* savannahs, well-drained hills, boggy areas, wet pine savannahs and flatwoods, see *Flora Boreali-Americana* 1: 41.

1803, *Essai d'une Nouvelle Agrostographie* 30, 152, 158. 1812, *Descriptio uberior Graminum* 174. 1817, *Species Graminum Stipaceorum* 104. 1842, *Nomenclator Botanicus. West, J.F. Espeleta and L.A. Donovan, "Root longevity and phenology differences between two co-occurring savannah bunchgrasses with different leaf habits." *Functional Ecology* 17(1): 20-28. Feb 2003.

in English: pineland three-awn, pineland three-awn grass, pineland threeawn, wiregrass, Carolina wiregrass, bottlebrush threeawn

A. strigosa (Henrard) S.T. Blake ex J.M. Black (*Aristida calycina* var. *strigosa* Henrard) (Latin *strigosus* "covered with strigae, with stiff bristles")

Australia. Perennial, tufted, compact, coarse, tussocky, culms branched and rigid, sheath scabrous, leaves scabrous flat, spike-like and dense inflorescence with branches erect, glumes unequal and nerved, lemma hairy or bristly toward the apex, awns subequal and filiform, not grazed, growing on shallow soils, on sandy soils and rocky hills, similar to *Aristida capillifolia*, *Aristida platychaeta*, *Aristida nitidula* and *Aristida arida*, see *Mededeelingen van's Rijks-Herbarium* 58(A): 297. 1932, *Mededeelingen van's Rijks-Herbarium* 54(C): 708. 1933, *Transactions and Proceedings of the Royal Society of South Australia* 1 67: 45. 1943.

in English: rough three-awn, rough wire grass, wiregrass

A. subaequans Döll

Brazil. See *Flora Brasiliensis* 2(3): 19, pl. 4. 1878.

A. subspicata Trin. & Rupr. (*Aristida caudata* Andersson; *Aristida compacta* Andersson; *Stipa rostrata* Andersson)

Ecuador. Perennial, densely tufted, ligule a row of hairs, leaf sheaths scabrous or glabrous, leaf blades flat or involute, inflorescence spike-like densely contracted, spikelets congested and sessile, glumes unequal and more or less scabrous, awns scabrous, see *Species Graminum Stipaceorum* 125-126. 1842, *Om Galapagos-öarnes Vegetation* 142, 144-145. Lund 1854, *Kongl. Svensk. Vet.-Akad. Handl.* 1853: 142, 144. 1855 and *Flora of the Galápagos Islands* 829-831. 1971.

A. subulata Henrard

Argentina. See *Mededeelingen van's Rijks-Herbarium* 54(B): 612-614. 1928.

A. succedanea Henrard (*Aristida circinalis* Lindm.)

South America, Brazil. Perennial, caespitose, erect, leaves filiform, panicle oblong, glumes lanceolate and subequal, awns ascending, savannahs, see *Kongliga Svenska Vetenskapsakademiens Handlingar* 34(6): 13, t. 7A. 1900,

Mededeelingen van's Rijks-Herbarium 58(A): 294, t. 144. 1932, Henrard, *Meded. Rijks-Herb.* 54(C): 740-74. 1933.

A. *superpendens* Domin (*Aristida hirta* Domin)

Australia, Northern Territory, Queensland, Indonesia. Perennial, compact, tufted, branched, compressed, inflorescences contracted or more or less open, alluvial soils, similar to *Aristida dominii*, see *Bibliotheca Botanica* 85(2): 339, t. 13, 15, f. 8-9, 13-14. 1915.

A. *suringarii* Henr. (professor of botany Willem Frederik Reinier Suringar, 1832-1898)

The Caribbean. See *Mededeelingen van's Rijks-Herbarium* 54(B): 616-618. 1928, *Flora of the Netherlands Antilles* 1: 121-203. 1963, Sida 13: 293-301, 423-447. 1989.

in English: St. Eustatius three-awn

A. *swartziana* Steud. (named after the Swedish botanist Olof Peter Swartz (Svarts, Svartz, Swarts, Swarz), 1760-1818, traveler (West Indies and northeast South America), physician, he published *Nova genera et species plantarum seu Prodromus descriptionum vegetabilium maximam partem incognitorum*. Stockholm, Uppsala & Åbo 1788, *Icones plantarum incognitarum quas in Indiae occidentali ...* Erlangae 1794-1800 and *Flora Indiae occidentalis*. Erlangae 1797-1806; see J.H. Bosser, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 426. Boston, Mass. 1972; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 797. Stuttgart 1993; the British botanist and collector Edmund Frederic Warburg, 1908-1966, was the son of Oscar Emmanuel Warburg, 1876-1937)

Queensland, New South Wales. Perennial, compact, tufted, erect or sprawling, simple and few-noded, sheath glabrous, leaves bristly and scabrous, panicle loosely contracted or more or less open, inflorescence branches loosely appressed, glumes unequal, lower glume 3- to 7-nerved, lemma brown and purplish, column twisted, lemma awns dissimilar, on sandy soils, on rocky ridges, similar to *Aristida schultzii* and *Aristida latifolia*, see *Repertorium Specierum Novarum Regni Vegetabilis* 17(8-12): 149. 1921, *Mededeelingen van's Rijks-Herbarium* 54(A): 226-228. 1927, *Proceedings of the Royal Society of Queensland* 51(10): 172, f. 1-5. 1940.

in English: three-awned spear-grass

A. welwitschii Rendle

Tropical Africa. See *Catalogue of the African Plants Collected by Dr. F. Welwitsch in 1853-61* 21: 202. 1899 and *Meded. Rijks-Herb.* 54(B): 683. 1928.

in Angola: kipusu

A. welwitschii Rendle var. *minor* Rendle

Tropical Africa. See *Catalogue of the African Plants Collected by Dr. F. Welwitsch in 1853-61* 21: 202. 1899 and *Meded. Rijks-Herb.* 54(B): 683. 1928.

A. welwitschii Rendle var. *subtomentosa* Henrard

Tropical Africa. See *Catalogue of the African Plants Collected by Dr. F. Welwitsch in 1853-61* 21: 202. 1899 and *Mededeelingen van's Rijks-Herbarium* 54(B): 683-685. 1928.

A. wrightii Nash (*Aristida purpurea* Nutt. var. *wrightii* (Nash) Allred)

North America, U.S., Texas. Perennial bunchgrass, densely tufted, erect, seed head purplish and then yellow, spikelet with 3 spreading awns, poor forage value, useful for erosion control, habitat of gravelly, sandy or dry plains, rocky areas, see *Transactions of the American Philosophical Society, new series*, 5: 145. 1837 and *Flora of the Southeastern United States ...* 116, 1327. 1903, *A Flora of California* 1: 101. 1912, *Journal of the Arnold Arboretum* 60(2): 320. 1979, *Brittonia* 36(4): 393. 1984.

in English: Wright threeawn, Wright's threeawn, Wright tripleawn grass

in Mexico: tres barbas, tres barbas perenne, zacate tres barbas

Aristidium (Endl.) Lindley = *Bouteloua* Lag.

From the Latin *arista, ae* "the awn, the beard of an ear of grain."

Chloridoideae, Cynodonteae, Boutelouinae, type *Dinebra aristoides* Kunth, see *Varietades de Ciencias, Literatura y Artes* 2(4,21): 134, 141. 1805, *Fragmenta Botanica* 77. 1809, *Nova Genera et Species Plantarum* 1: 171-172. 1815 [1816], *Fundamenta Agrostographiae* 161. 1820, *De Graminibus unifloris et sesquifloris* 242. Petropoli 1824, *Genera Plantarum* 94. 1836, *The Vegetable Kingdom* 116. 1847 and *Contributions from the United States National Herbarium* 41: 20-33. 2001.

Aristopsis Catus Guerra = *Aristida* L.

Resembling *arista, ae* "the awn, the beard of an ear of grain, beard of grain."

Arundinoideae, Aristideae, or Aristidoideae, Aristideae, type *Aristopsis bissei* Catus, see *Species Plantarum* 1: 82. 1753 and *Folia Geobotanica et Phytotaxonomica* 16(4): 439. 1981, *Contributions from the United States National Herbarium* 46: 69-104. 2003.

Arrhenatherum P. Beauv. =

Pseudarrhenatherum Rouy, *Thorea* Rouy,
Thorea Briquet (Apiaceae, alt. Umbelliferae),
Thoreochloa Holub

From the Greek *arrhen* “male, masculine” and *ather* “a bristle, awn,” referring to the awn of staminate floret, to the bristled staminate florets, alluding to the awn of the male floret; see A.M.F.J. Palisot de Beauvois, *Essai d'une nouvelle Agrostographie*. 55, 152, 153, t. 11, f. 5. (Dec) 1812.

About 4-10 species, Europe, Mediterranean, North Africa. Pooideae, Poodae, Aveneae, or Pooideae, Poeae, Aveninae, perennial, loosely tufted, tall, herbaceous, erect or slightly spreading, slender, unbranched, glabrous nodes, hollow internodes, basal internodes occasionally swollen, auricles absent, ligule an unfringed membrane, sheaths smooth and rounded, leaves flat and linear, plants bisexual, flowers in narrow panicles, florets dimorphic, spikelets solitary and flattened or compressed laterally, 2 florets and falling together at maturity, spikelets pedicellate, upper floret hermaphrodite and shortly awned, 2 glumes very unequal acuminate and membranous to papery, lemmas acute and submembranous, lower lemma with a twisted geniculate awn, hairy callus present, callus short, palea 2-keeled, 2 lodicules free and membranous, 3 stamens, ovary apex hairy, 2 stigmas white, fruit not grooved, weed species, cultivated fodder, found in dry grassland, edges of woods, disturbed ground, open habitats, sometimes referred to *Helictotrichon* Besser, intergeneric hybrids with *Avena* L., type *Arrhenatherum avenaceum* P. Beauv. ex Boiss., see *Essai d'une Nouvelle Agrostographie* 55, 152, 153. 1812, *Voyage botanique dans le midi de l'Espagne* 2: 657. 1844 and *Archives des Sciences Physiques et Naturelles* sér. 4. 13: 614. 1902, *Flore de France* 14: 142. 1913, *Bulletin de la Société Botanique de France* 68: 401. 1921, *Bot. Jahrb. Syst.* 75: 321-332. 1951, *Kew Bulletin* 16: 247-250. 1962, *Acta Universitatis Carolinae: Biologica* 1962: 154. 1963, *Acta Botanica Malacitana* 10: 123-154. 1985, *Boletim da Sociedade Broteriana, ser. 2* 63: 29-66. 1990, *Fitologija* 39: 72-77. 1991, *Bot. Zhurn. (Moscow & Leningrad)* 76: 1331-1332. 1991, *Bot. Zhurn. (Moscow & Leningrad)* 78(4): 36-47. 1993, *Flora Mediterranea* 5: 340-345. 1995, *Annals of Botany. Oxford* 86: 1135-1142. 2000, Gary L. Hannan & Michael W. Orick, “Isozyme diversity in *Iris Cristata* and the threatened glacial endemic *I. Lacustris* (Iridaceae).” *Am. J. Bot.* 87: 293-301. 2000, *Contributions from the United States National Herbarium* 48: 119-121. 2003, Susan J. Mazer, Horacio Paz and Michael D. Bell, “Life history, floral development, and mating system in *Clarkia xantiana* (Onagraceae): do floral and whole-plant rates of development evolve independently?” *Am. J. Bot.* 91: 2041-2050. 2004.

Species

A. album (Vahl) Clayton (*Arrhenatherum album* var. *erianthum* (Boiss. & Reut.) Romero Zarco; *Arrhenatherum elatius* (L.) P. Beauv. ex J. Presl & C. Presl subsp. *erianthum* (Boiss. & Reut.) Cout.; *Arrhenatherum erianthum* Boiss. & Reut.; *Avena alba* Vahl)

Spain, Europe. Erect to prostrate, useful for erosion control, see *Symbolae Botanicae, ... 2*: 24. 1791, *Diagnoses Plantarum Novarum Hispanicarum praesertim in Castella nova lectarum* 121. Genève 1842 and *Memórias da Sociedade Broteriana* 6: 10. Coimbra 1950, *Kew Bulletin* 16: 250. 1962, *Agronomia Lusitana* 40(1): 6. 1980, *Acta Botanica Malacitana* 10: 145. 1985.

in English: tall oatgrass

A. calderae A. Hansen

Spain, Canary Islands. Rare species, see Alfred Hansen, “Contributions to the flora of the Canary Islands (especially Tenerife).” *Cuad. Bot. Canar.* 14-15: 59-70. 1972.

A. elatius (L.) P. Beauv. ex J. & C. Presl (*Arrhenatherum americanum* P. Beauv.; *Arrhenatherum avenaceum* (Scop.) P. Beauv.; *Arrhenatherum avenaceum* (Scop.) P. Beauv. subsp. *avenaceum*; *Arrhenatherum bulbosum* (Willd.) C. Presl; *Arrhenatherum elatius* (L.) Mertens & Koch, nom. illeg., non *Arrhenatherum elatius* (L.) P. Beauv. ex J. Presl & C. Presl; *Arrhenatherum tuberosum* F.W. Schultz; *Avena avenaceum* (Scop.) P. Jess.; *Holcus avenaceus* Scop.; *Holcus bulbosus* (Willd.) Schrad.; *Hordeum avenaceum* Wigg. ex P. Beauv.)

Europe, western Asia, Mediterranean, North Africa. Perennial bunchgrass, short-lived, robust, slender, coarse, loosely tufted, tussocks forming or culms solitary, erect or spreading or ascending, glabrous or hairy, basal internodes more or less swollen, auricles absent, blade rolled when young, ligule hairy, leaves scabrous and coarse, sheaths smooth and keeled, green to purple tinged inflorescence, shining panicle erect or nodding, chasmogamous spikelets, the upper floret sterile, lower flower usually male with a long bent awn on the lemma, the second bisexual with usually a shorter awn on the lemma, glumes acute, lemmas hairy at the base, awn bent and twisted, palea 2-keeled and hyaline, anthers yellow, ovary pubescent, fruit elliptical and laterally compressed, seed shatters at maturity, ornamental, does not tolerate shade, resistant to summer drought, weed of crops and roadsides, potentially invasive, cultivated fodder plant, planted pasture, used for making hay and for grazing, weed species of dry grasslands, fields, waste ground, disturbed places, gardens, roadside verges, grassland and hay meadows, on well-drained and dry soils, see *Species Plantarum* 1: 79. 1753, *Flora Carniolica, Editio Secunda* 2: 276. 1772, *Exercitia Phytologica* 2: 538. 1792, *Der Gesellschaft naturforschender Freunde zu Berlin Magazin für die neuesten*

Entdeckungen in der Gesamten Naturkunde 2: 116. Berlin 1799, *Flora Germanica* 1: 248. 1806, *Essai d'une Nouvelle Agrostographie* 55-56, 152-153, 165, t. 11, f. 5. 1812, *Flora Cechica* 17. 1819, *Cyperaceae et Gramineae Siculae* 29. 1820, *Prodromus stirpium in horto ad Chapel Allerton vigentium*. 23. Londini [London] (Nov-Dec) 1796, *Jahresbericht der Pollichia* 20-21: 272. 1863 and Cugen J. M. Acheroy A. L. Loutfi, D. Petit and P. Vernet, "Breeding system differentiation in *Arrhenatherum elatius* populations: evolution toward selfing?" *Evolutionary Trends in Plants* 3: 17-24. 1989, Ducouso, A., D. Petit, M. Valero and P. Vernet. 1990 Genetic variation between and within populations of a perennial grass: *Arrhenatherum elatius*. *Heredity* 65: 179-188. 1990.

in English: tall oatgrass, tall oat grass, tall oats, false oat, French rye-grass, meadow oatgrass, evergreen grass

in Colombia: avena alta

in South Africa: Franse hawergras, langswenkgras

A. elatius (L.) P. Beauv. ex J. Presl & C. Presl f. *striatum* F.T. Hubb. (*Arrhenatherum bulbosum* var. *variegatum* Hitchc.; *Arrhenatherum elatius* f. *striatum* (F.T. Hubb.) L.B. Sm.; *Arrhenatherum elatius* var. *bulbosum* (Willd.) Spenn.; *Arrhenatherum elatius* var. *striatum* (F.T. Hubb.) L.B. Sm.)

America. See *Flora Friburgensis* 1: 113. 1825 and *The Standard Cyclopedia of Horticulture* 1(A-B): 397. 1914, *Rhodora* 18: 235. 1916, *Mémoires de la Société Royale des Sciences, Lettres et Arts de Nancy* 49: 269. 1947, *Rhodora* 49: 267. 1947.

Litard.; *Avena tuberosa* Gilib., nom. inval.)

South and west Europe. Ornamental, culm with basal internodes swollen and bulbous, found in fields, roadsides, waste ground, lowland to montane, see *Der Gesellschaft naturforschender Freunde zu Berlin Magazin für die neuesten Entdeckungen in der Gesamten Naturkunde* 2: 116. Berlin 1799, *Cyperaceae et Gramineae Siculae* 29. 1820 and *Candollea* 15: 13. 1955, *New Zealand Journal of Botany* 29: 101-116. 1991.

in English: tuber oat grass, bulbous oat grass, onion twitch

A. elatius (L.) P. Beauv. ex J. Presl & C. Presl subsp. *elatius* (*Arrhenatherum avenaceum* (Scop.) P. Beauv.; *Avena elatior* L.)

Europe. Weed species widely naturalized in temperate regions, sea level to montane, useful for erosion control, fodder, forage weed species of dry grasslands, fields and old fields, waste ground, roadside verges, grassland and hay meadows, on well-drained and dry soils, border of woods, see *Flora Cechica* 17. 1819 and *New Zealand Journal of Botany* 29: 101-116. 1991.

in English: tall oat grass, meadow oat grass, false oat grass, French rye

A. elatius (L.) P. Beauv. ex J. Presl & C. Presl subsp. *sardoum* (Em. Schmid) Gamisans (*Arrhenatherum elatius* subsp. *braun-blauquetii* P. Monts. & L. Villar; *Arrhenatherum elatius* var. *sardoum* E. Schmid; *Arrhenatherum murcicum* Sennen)

Europe. See *Candollea* 29(1): 46. 1974.

Schultz; *Arrhenatherum tuberosum* F.W. Schultz; *Avena bulbosa* Willd.; *Avena elatior* L.; *Avena elatior* var. *bulbosa* (Willd.) St.-Amans; *Avena elatior* var. *tuberosa* (F.W. Schultz) Asch.; *Avena tuberosa* Gilib.; *Holcus avenaceus* Scop.; *Holcus avenaceus* var. *bulbosus* (Willd.) Gaudin; *Holcus bulbosus* (Willd.) Schr.)

Europe, Asia. Perennial, erect, stout, basal internodes occasionally swollen into bulbous structures or a chain of bulbous corms, propagules, nodes hairy, leaf blade channelled or grooved, panicle narrow, male lemmas awned, often a troublesome weed in arable land, pasture grass, ornamental, higher rainfall areas, wet ground, ornamental, rare in grassland, corms eaten by pigs, see *Flora Carniolica, Editio Secunda* 2: 276. 1772, *Exercitia Phytologica* 2: 538. 1792, *Flora Germanica* 1: 248. 1806, *Agrostologia Helvetica, definitionem ...* 1: 136. 1811, *Flora Cechica* 17. 1819, *Handbok i Skandinaviens Flora, edn. 8* 51. 1820, *Flora Agenaise* 47. 1821, *Flora Friburgensis* 1: 113. 1825, *Flora Germanica Excursoria* 1: 53. 1830, *Jahresbericht der Pollichia* 20-21: 272. 1863, *Flora der Provinz Brandenburg* 1: 826. 1864, *Bulletin de la Société Botanique de Belgique* 12:

184. 1873 and *The Standard Cyclopedia of Horticulture* 1(A-B): 397. 1914, *Rhodora* 18: 234-235. 1916, *Rhodora* 49: 267. 1947, *Grasses of Japan and its Neighboring Regions* 486. 1987, *A Key to Australian Grasses* 1-150. 1990, *Monographs in Systematic Botany from the Missouri Botanical Garden* 47: i-xi, 1-178. 1994.

in English: false oat, onion couch, onion twitch, bulbous false oat, bulbous oatgrass

in Mexico: avena falsa alta

A. elatius (L.) P. Beauv. ex J. & C. Presl var. **elatius** (*Arrhenatherum elatius* var. *biaristatum* (Peterm.) Peterm.; *Avena elatior* L.; *Avena elatior* var. *elatior*)

Europe, Asia. Leaf blade not grooved, glabrous nodes, basal internodes not swollen, palea acute or obtuse, found in grassland, semishade, wooded slopes, roadsides and waste ground, see *Flora Cechica* 17. 1819.

in English: false oats, false oatgrass, tall oatgrass

A. kotschyii Boiss. (*Avena kotschyii* (Boiss.) Steud.) (named for the Austrian botanist Carl (Karl) Georg Theodor Kotschy, 1813-1866, plant collector, traveler, from 1835 to 1843 botanical explorer of the Orient, from 1852 Curator of the Herbarium of the Vienna Natural History Museum, his writings include *Die Insel Cypern*. [with Franz Joseph Andreas Nicolaus Unger, 1800-1870.] Wien 1865 and *Die Sommerflora des Antilibanon und hohen Hermon*. Wien 1864. See Eduard Fenzl (1808-1879), *Abbildungen und Beschreibungen neuer und selthener Thiere und Pflanzen in Syrien und im westlichen Taurus gesammelt von T. Kotschy*. Stuttgart 1843; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. Philadelphia 1964; J.H. Barnhart, *Biographical notes upon botanists*. 2: 315. 1965; Joseph Vallot, "Études sur la flore du Sénégal." in *Bull. Soc. Bot. de France*. 29: 182-183. Paris 1882; Ignatz Urban, *Geschichte des Königlichen Botanischen Museums zu Berlin-Dahlem (1815-1913). Nebst Aufzählung seiner Sammlungen*. Dresden 1916; T.W. Bosser, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 218. 1972; H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 195. Oxford 1964; A. Lasègue, *Musée botanique de Benjamin Delessert*. Paris 1845; Ethelyn Maria Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933)

Turkey, Iran, Syria. Perennial, useful for erosion control, steep rocky slope, *Diagnoses plantarum orientalium novarum* 1(7): 122. 1846, *Synopsis Plantarum Glumacearum* 1: 235. 1854.

A. longifolium (Thore) Dulac (*Arrhenatherum longifolium* (Nees) Potzta, nom. illeg., non *Arrhenatherum longifolium* (Thore) Dulac; *Arrhenatherum thorei* Durieu; *Avena*

longifolia Thore; *Pseudarrhenatherum longifolium* (Thore) Rouy; *Trisetum longifolium* Nees)

Europe. Useful for erosion control, see *Florae Africae Australioris Illustrationes Monographicae* 348. 1841, *Flore du Département des Hautes-Pyrénées* 78. 1867 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 75: 327. 1951.

A. palaestinum Boiss. (*Arrhenatherum avenaceum* var. *palaestinum* (Boiss.) Hack.; *Arrhenatherum elatius* var. *palaestinum* (Boiss.) Boiss.; *Arrhenatherum erianthum* auct. balcan., non Boiss. & Reut.; *Avena palaestina* (Boiss.) Steud.)

Europe, Greece, Israel. Perennial, useful for erosion control, see *Diagnoses Plantarum Novarum Hispanicarum* 1852: 121. 1852, *Synopsis Plantarum Glumacearum* 1: 425. 1855, *Flora Orientalis* 5: 550. 1884, *Verhandlungen der kaiserlich-königlichen zoologisch-botanischen Gesellschaft in Wien* 127. 1890 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 61(Beibl. 140): 163. 1928.

Arrozia Schrad. ex Kunth = *Caryochloa* Trin., *Luziola* Juss.

The Spanish name for rice.

Ehrhartoideae, Oryzeae, Luziolinae, type *Arrozia micrantha* Schrad. ex Kunth, see *Genera Plantarum* 33. 1789, *Systema Naturae ... editio decima tertia, aucta, reformata* 2: 637. 1791, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 11. 1833, *Journal of the Linnean Society, Botany* 19(115, 116): 55. 1881 and *Flora Mesoamericana* 6: 222-223. 1994, *Contributions from the United States National Herbarium* 39: 69-71. 2000.

Arthragrostis Lazarides

Greek *arthron* "a joint" and *agrostis*, *agrostidos* "grass, weed, couch grass," referring to the spikelets.

About three species, Australia. Panicoideae, Panicoideae, Paniceae, or Paniceae, Panicinae, annual, herbaceous, simple or branched, internodes hollow, auricles absent, narrow leaf blades linear, ligule a ciliate membrane, leaves hirsute to hispid, plants bisexual, open inflorescence paniculate, a contracted loose panicle with deciduous branches, spikelets solitary and long-pedicelled, spikelet 2-flowered, upper floret hermaphrodite borne on a filiform internode, 2 glumes unequal and membranous, palea present, 2 free and fleshy lodicules, 3 stamens, ovary glabrous, 2 stigmas plumose, open habitats, open scrub, type *Arthragrostis deschampsoides* (Domin) Lazarides, see M. Lazarides, "New taxa of tropical Australian grasses (Poaceae)." *Nuytsia*. 5(2): 285-287. 1984.

Species

A. aristispicula B.K. Simon

Australia. See *Austrobaileya* 2(3): 238. 1986.

A. clarksoniana B.K. Simon

Australia. See *Austrobaileya* 3(4): 585, f. 1. 1992.

A. deschampsoides (Domin) Lazarides (*Panicum deschampsoides* Domin)

Australia. Annual, slender, flaccid, stipitate fertile floret, see *Bibliotheca Botanica* 85: 320. 1915.

Arthratherum P. Beauv. = *Aristida* L.,
Streptachne R. Br.

From the Greek *arthron* “a joint” and *ather*, *atheros* “chaff, spine, prickle, barb, awn.”

Arundinoideae, Aristideae, or Aristidoideae, Aristideae, type *Arthratherum hygrometricum* (R. Br.) P. Beauv., see *Species Plantarum* 1: 82. 1753, *Essai d'une nouvelle Agrostographie* 32, 152, t. 8, f. 8. 1812, *Conspectus Regni Vegetabilis* 50. 1828, *Species Graminum Stipaceorum* 155. 1842 and *Contr. U.S. Natl. Herb.* 22(7): 519. 1924, *Contributions from the United States National Herbarium* 46: 69-104. 2003.

Arthraxon P. Beauv. = *Alectoridia* A. Rich.,
Arthraxon (Eichler) Tiegh. (Loranthaceae),
Batratherum Nees, *Lasiolytrum* Steud., *Lucaea*
Kunth, *Pleuroplitis* Trin., *Psilopogon* Hochst.
ex A. Rich.

From the Greek *arthron* “a joint” and *axon* “axis,” referring to the rachis, to the jointed rachides; see A.M.F.J. Palisot de Beauvois, *Essai d'une nouvelle Agrostographie*. 111, t. 11, f. 6. (Dec) 1812.

About 7(-10)/20-25 species, Old World tropics, mainly in India. Panicoideae, Andropogonodae, Andropogoneae, Andropogoninae, annual or perennial, herbaceous, slender, often trailing, decumbent and rooting from lower nodes, auricles absent, ligule a ciliate membrane, leaf blades linear-lanceolate to ovate-lanceolate, plants bisexual, terminal and axillary slender subdigitate racemes, spikelets solitary and sessile or pairs of sessile and pedicellate spikelets, sessile spikelets awned and with 2 florets, lower floret reduced to a lemma, upper floret bisexual, glumes equal or subequal, lower glume convex or laterally 2-keeled, lemmas membranous, upper lemma entire and awned, awn sometimes basal, pedicellate spikelet much reduced or absent or vestigial, palea present or absent, 2 lodicules free and fleshy, 2-3 stamens, ovary glabrous, shade or open habitats, rainforest, wet places, moist pastures, rocky slopes, old cultivated fields, similar to *Schizachyrium*, type *Arthraxon ciliaris* P.

Beauv., see *Essai d'une Nouvelle Agrostographie* 111, t. 11, f. 6. 1812, *Fundamenta Agrostographiae* 174-175, t. 16. 1820, *Révision des Graminées* 2: 489, t. 159. 1831, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Species

A. breviaristatus Hack. (*Arthraxon hispidus* var. *hispidus*;
Arthraxon nitidulus Stapf ex Bor)

Eastern India, Southeast Asia, China. Found in moist and swampy places, used as cattle fodder, see *Monographiae Phanerogamarum* 6: 350. 1889 and *Botanical Magazine* 26(307): 214. 1912, *Grasses of Burma ...* 101, 688. 1960.

A. castratus (Griff.) Naray. ex Bor (*Andropogon castratus* Griff.; *Andropogon rudis* Nees ex Steud.; *Arthraxon dalatensis* A. Camus ex M. Schmid; *Arthraxon hainanensis* Keng & S.L. Chen; *Arthraxon pilipes* Backer; *Arthraxon rudis* (Nees ex Steud.) Hochst.)

India, Sri Lanka. Perennial, creeping, straggling, ascending, leaf sheaths villous to hirsute, racemes ascending, spikelets solitary, pedicellate spikelets reduced to a pedicel, lemma margin ciliate, for cattle fodder, hillsides, swampy places, forest openings, see *Notulae ad Plantas Asiaticas* 3: 89. 1851, *Synopsis Plantarum Glumacearum* 1: 383. 1854, *Flora* 39: 188. 1856, *Enum. Pl. Zeyl.* 368. 1864, Henry Trimen (1843-1896), *A Systematic Catalogue of the Flowering Plants and ferns indigenous to or growing wild in Ceylon* 107. Colombo 1885 and *Handb. Fl. Ceylon* 5: 224. 1900, *De Nuttige Planten van Nederlandsch-Indië* 1: 124. 1922, *Handb. Fl. Ceylon* 6: 331. 1931, *Flora of Assam* 5: 376. 1940, *Grasses of Ceylon* 187. 1956, *Grasses of Burma ...* 99. 1960, *Flora Hainanica* 4: 538, f. 1260. 1977, *Blumea* 27: 263. 1981.

in English: castrate carp grass

A. cuspidatus (Hochst. ex A. Rich.) Hochst. ex Hack. (*Andropogon cuspidatus* Hochst. ex A. Rich.; *Arthraxon cuspidatus* Hochst.; *Arthraxon cuspidatus* (Hochst. ex

A. Rich.) Hochst.; *Arthraxon hispidus* var. *hispidus*; *Batratherum cuspidatum* (Hochst. ex A. Rich.) Hochst.)

Ethiopia. Annual, slender, erect, ascending, leaf blades lanceolate, inflorescence of flexuous racemes silky-villous, sessile spikelet linear-lanceolate, pedicelled spikelet sterile, 2 stamens, wet ground, see *Tentamen Florae Abyssinicae* ... 2: 456. 1850, *Flora* 39(no.12): 178, 188. 1856.

A. deccanensis Jain

India, Maharashtra. Lower glume linear-lanceolate, see *Journal of the Bombay Natural History Society* 68(1): 297-299, t. 297. 1971.

A. depressus Stapf ex C.E.C. Fischer

India, Karnataka. Indeterminate species, lower glume of sessile spikelet linear-lanceolate, see *Bulletin of Miscellaneous Information Kew* 349. 1933.

A. echinatus (Nees) Hochst. (*Andropogon echinatus* (Nees) Heyne; *Andropogon echinatus* Heyne ex Steud., nom. illeg., non *Andropogon echinatus* (Nees) Heyne; *Arthraxon echinatus* (Nees) Heyne ex Kuntze, nom. illeg., non *Arthraxon echinatus* (Nees) Hochst.; *Arthraxon lanceolatus* var. *echinatus* (Nees) Hack.; *Arthraxon spathaceus* Hook.f.; *Batratherum echinatum* Nees)

India. Lower glume of sessile spikelet rarely smooth on the back, found in moist situations, see *Edinburgh New Philosophical Journal* 18: 181. 1835, *Nomenclator Botanicus* edition 2 1: 91. 1840, *Synopsis Plantarum Glumacearum* 1: 383. 1854, *Flora* 39: 188. 1856, *Monographiae Phanerogamarum* 6: 348. 1889, *Revisio Generum Plantarum* 2: 759. 1891, *The Flora of British India* 7(21): 145. 1897 [1896].

A. hispidus (Thunb.) Makino (*Alectoria quartiniana* A. Rich.; *Arthraxon antsirabensis* A. Camus; *Arthraxon ciliaris* P. Beauv.; *Arthraxon ciliaris* var. *cryptatherus* Hack.; *Arthraxon hispidus* (Thunb.) Merr.; *Arthraxon hispidus* var. *ciliaris* (P. Beauv.) Honda ex Nakai; *Arthraxon hispidus* var. *cryptatherus* (Hack.) Honda; *Arthraxon hispidus* var. *hispidus*; *Arthraxon hookeri* (Hackel) Henrard; *Arthraxon mauritianus* Stapf ex C.E. Hubb.; *Arthraxon micans* (Nees) Hochst.; *Arthraxon quartinianus* (A. Rich.) Nash; *Batratherum micans* Nees; *Clidemia gracilis* Pittier; *Phalaris hispida* Thunb.) (Madagascar, Antsirabe) (for the French botanist Léon Richard Quartin-Dillon, d. 1841, physician, explorer, plant collector, died during the Lefebvre expedition in Ethiopia, wrote *Des différences appréciables entre le sang de la veine porte et celui des autres veins*. in *Collection des thèses soutenues à la Faculté de Médecine de Paris*. an 1839-1878, tom. 14. Paris 1839-1878. See T. Lefebvre, *Voyage en Abyssinie exécuté ... par une Commission scientifique, composée de MM. T. Lefebvre, A. Petit et Quartin-Dillon, etc.* [1845]; I.H. Vegter, *Index Herbariorum*. Part II (5), *Collectors N-R*. Regnum Vegetabile vol. 109. 1983; Stafleu and Cowan, *Taxonomic literature*. 4: 452 and 763-764. Utrecht 1983; Achille Richard (1794-1852), *Tentamen florae abyssinicae*. [Collectors: R.

Quartin-Dillon and A. Petit] Parisiis [1847-1851]; J.H. Barnhart, *Biographical notes upon botanists*. 3: 118. 1965; A. Lasègue, *Musée botanique de Benjamin Delessert*. Paris 1845; Joseph Vallot, "Études sur la flore du Sénégal." in *Bull. Soc. Bot. de France*. 29: 187. Paris 1882; A. White and B.L. Sloane, *The Stapelieae*. Pasadena 1937)

Southeast Asia, China, Japan, India, Sikkim, Asia temperate and tropical, Philippines, Australia, New South Wales, Queensland. Perennial or annual, subshrub, wiry, arching, low-growing, creeping habit, very slender, hispid, ascending, much-branched, decumbent and rooting from the lower nodes, sometimes reddish purple, fibrous roots, leaf bases encircle the sheath, leaves lanceolate to ovate, ligule short and membranous, inflorescences deflexed, racemes greenish to purple, spikelets solitary, lower glume purplish and scabrous, greenish upper glume compressed and keeled, lemma margin glabrous, yellowish grains, invasive weed rapidly spreading and naturalized elsewhere, used as cattle fodder, weed in tea plantations, yellow dye, medicine in China, considered a vulnerable species in Australia, usually found in moist pastures, cultivated areas, hay fields and wet ditches, around margins of pools and lagoons, on muddy banks, floodplain forests, along shores, open disturbed sites, gravel, open areas, depressional wet areas, in scattered clumps on roadside, on road bank, edge of roadside, along trails, sometimes confused with *Commelina communis* L. and *Panicum clandestinum* Hochst. ex Chiov., *Arthraxon mauritianus* Stapf ex C.E. Hubb. considered a vulnerable species in Mauritius, see *Flora Japonica*, ... 44. 1784, *Essai d'une Nouvelle Agrostographie* 111, t. 11, f. 6. 1812, *Edinburgh New Philos. J.* 18: 182. 1835, *Tentamen Florae Abyssinicae* ... 2: 448, t. 102. 1850, *Flora* 39: 189. 1856 and *Botanical Magazine* (Tokyo) 26(307): 214. 1912, *Philippine Journal of Science* 7(4): 229. 1912, *North American Flora* 17(2): 99. 1912, *Bulletin of Miscellaneous Information Kew* 1939: 653. 1939, *Bulletin de la Société Botanique de France* 95: 149. 1948, *Grasses of Ceylon* 187. 1956, *Grasses of Burma* ... 101-102. 1960, *Webbia* 49(2): 265-329. 1995.

in English: small carp grass, jointhead arthraxon

in Spanish: zacate común, zacate

in Japan: ko-buna-gusa, kobunagusa

in China: jin cao

in India: nela bidira hullu, thurade, thurde, turade, undar gin, undri

Durand & Schinz; *Arthraxon serrulatus* Hochst.; *Batratherum serrulatum* Hochst. ex A. Rich.) (Greek *prion* "a saw")

Tropical East Africa, Ethiopia, Yemen, India, China, Thailand. Perennial, wiry, straggling, tufted to loosely tufted, ascending, knotty base, shortly rhizomatous, leaves acuminate with a fine point, racemes with villous internodes, spikelets always paired, sessile spikelet linear to lanceolate, lower glume papery and convex, pedicelled spikelet lanceolate to narrowly lanceolate, 3 stamens, found among

rocks, cliffs, damp places, scrubby hillsides, eroded hillsides, steep rocky slopes, often in partial shade, see *Hortus Regius Botanicus Berolinensis* 1: 241. 1827, *Tentamen Florae Abyssinicae ...* 2: 458. 1850, *Synopsis Plantarum Glumacearum* 1: 383. 1854, *Flora* 39: 188. 1856, *Monographiae Phanerogamarum* 6: 348. 1889, *Conspectus florum Africae*, ou, Enumération des plantes d'Afrique. 5: 704. Bruxelles (Jardin botanique de l'État), Berlin (R. Friedlaender & Sohn), Paris (Paul Klincksieck) 1895-1898 and *Annuario del Reale Istituto Botanico di Roma* 8(3): 278. 1908, *Blumea* 27: 292. 1981.

A. raizadae Jain, Hemadri & Deshpande (*Arthraxon lanceolatus* var. *raizadae* (Jain, Hemadri & Deshpande) Welzen)

India, Maharashtra. See *Journal of the Indian Botanical Society* 51: 103, 180, t. 21. 1972, *Blumea* 27(1): 287, f. 11A, Map 3. 1981.

A. submuticus (Nees ex Steud.) Hochst. (*Andropogon submuticus* Nees ex Steud.; *Arthraxon ciliare* subsp. *submuticus* (Nees ex Steud.) Hack.; *Arthraxon ciliaris* subsp. *submuticus* (Nees ex Steud.) Hack.; *Arthraxon cryptatherus* subsp. *submuticus* (Nees ex Steud.) Koidz.; *Batratherum submuticum* (Nees ex Steud.) Nees ex Steud.; *Batratherum submuticum* (Nees ex Steud.) Nees ex W. Watson)

India, Nepal. Spikelets awnless, see *Synopsis Plantarum Glumacearum* 1: 382. 1854, *Flora* 39: 188. 1856, *Monographiae Phanerogamarum* 6: 356. 1889 and *Botanical Magazine* (Tokyo) 39: 301. 1925.

A. villosus C.E.C. Fisch. (*Arthraxon lanceolatus* var. *villosus* (C.E.C. Fisch.) Welzen)

India. See *Bulletin of Miscellaneous Information Kew* 1933: 350. 1933, *Blumea* 27(1): 288. 1981.

Arthrochlaena Benth. = *Arthrochlaena* Boiv. ex Benth., *Sclerodactylon* Stapf

From the Greek *arthron* "a joint" and *chlaena*, *chlaenion* "cloak, blanket."

Eragrostideae, see *Journal of the Linnean Society, Botany* 19: 107. 1881 and *Bulletin of Miscellaneous Information Kew* 1911: 318. 1911.

Arthrochloa J.W. Lorch = *Acrachne* Wight and Arn. ex Chiov., *Normanboria* Butzin

Greek *arthron* "a joint" and *chloe*, *chloa* "grass."

Chloridoideae, Cynodonteae, or Chloridoideae, Eragrostideae, Eleusininae, type *Arthrochloa henrardiana* (Bor) Lorch, see *Annuario del Reale Istituto Botanico di Roma* 8(3): 361-362. 1908, *Blumea, Supplement* 3: 44. 1946, *Journal of the Indian Botanical Society* 39(3): 490, f. 1-5. 1960,

Taxon 27(2-3): 301. 1978, *Kew Bulletin* 37(1): 158-159. 1982, *Journal of Cytology and Genetics* 25: 322-323. 1990.

Arthrochloa R. Br. = *Arthrochloa* Schult.,
Holcus L.

Greek *arthron* “a joint” and *chloe*, *chloa* “grass.”

Pooideae, Poaceae, Holcinae, see *Species Plantarum* 2: 1047-1048. 1753, *Chloris Melvilliana* 35. 1823, *Mantissa* 2: 524. 1827 and *Annuario del Reale Istituto Botanico di Roma* 8(3): 361-362. 1908, *Blumea, Supplement* 3: 44. 1946, *J. Indian Bot. Soc.* 39: 490. 1960, *Taxon* 27(2-3): 301. 1978, *Contributions from the United States National Herbarium* 48: 387-388. 2003.

Arthrochortus Lowe = *Lolium* L.

From the Greek *arthron* “a joint” and *chortos* “green herbage, grass.”

Pooideae, Poaceae, Loliinae, type *Arthrochortus loliaceus* Lowe, see *Species Plantarum* 1: 83. 1753, *Hooker's Journal of Botany and Kew Garden Miscellany* 8: 301. 1856 and *Techn. Bull. U.S.D.A.* 1392: 7. 1968, *Contributions from the United States National Herbarium* 48: 426-431. 2003.

Arthrolophis (Trin.) Chiov. = *Andropogon* L., *Arthrolophis* Chiov.

From the Greek *arthron* “a joint” and *lophos* “a crest, back of the neck, ridge, tuft.”

Panicoideae, Andropogoneae, Andropogoninae, see *Flora Indica; or Descriptions ...* 1: 277. 1820 and *Bollettino Società Botanica Italiana* 1917(6-7): 57, 59. 1917, *Contributions from the United States National Herbarium* 46: 20-64. 2003.

Arthropogon Nees = *Achlaena* Griseb.

From the Greek *arthron* “a joint” and *pogon* “beard.”

About 5-7 species, West Indies, Brazil, Bolivia. Panicoideae, Paniceae, Arthropogoninae, or Panicoideae, Panicoideae, Paniceae (Arthropogoneae), perennial, herbaceous, tufted, narrow leaf blades, ligule fringed, plants bisexual, inflorescence a panicle with ascending branches or spicate and not branching, 2- to 3-awned, spikelets with bearded callus, 2 glumes unequal, lower glume linear to awnlike, upper glume coriaceous, lower lemma awned or not, palea present or absent, 2 lodicules, 3 stamens, ovary glabrous, 2 stigmas, savannahs, type *Arthropogon villosus* Nees, see *Flora Brasiliensis seu Enumeratio Plantarum* 319. 1829, *Catalogus plantarum cubensium ...* 228-229. 1866 and

Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie 69: 418. 1939, *Willdenowia* 6(3): 515-516. 1972, *Bradea (Bol. do Herbarium Bradeanum)* 3(36): 303-322. 1982, *Am. J. Bot.* 88: 1988-1992, 1993-2012. 2001, *Ann. Missouri Bot. Gard.* 88: 351-372. 2001, *Contributions from the United States National Herbarium* 46: 13, 110-111. 2003, *Am. J. Bot.* 90: 796-821. 2003.

Species

A. fitifolius Filg.

Brazil. Leaf blades cylindrical, upper glume apex entire.

A. lanceolatus Filg. (*Canastra lanceolata* (Filg.) Morrone & al.)

Brazil. Erroneously placed within this genus, now reclassified in the genus *Canastra*, see *Novon* 11(4): 429. 2001.

A. scaber Pilg. & Kuhl. (*Altoparadisium scabrum* (Pilg. & Kuhl.) Pilg. & al.; *Arthropogon bolivianus* Filg.; *Arthropogon scaber* Kuhl. & Pilg., nom. illeg., non *Arthropogon scaber* Pilg. & Kuhl.)

Brazil, Bolivia. Panicle narrowly elliptic, species transferred to the new genus *Altoparadisium*, see *Comissão de Linhas Telegraficas Estratégicas de Matto-Grosso ao Amazonas, Botanica* 67(Bot. 11): 37-38, t. 2. 1922, *Revista do Museu Paulista. Universidade de São Paulo* 13: 1249. 1922, *Brittonia* 38(1): 71, f. 1G. 1986, *Annals of the Missouri Botanical Garden* 88(2): 366, f. 7. 2001.

A. villosus Nees (*Arthropogon villosus* var. *glabrescens* S. Moore; *Deyeuxia brasiliensis* Spreng. ex Steud.; *Eutriana villosa* Steud.)

Central and southern Brazil. Erect, inflorescence a pyramidal panicle with ascending branches, spikelets 2-awned, lower lemma mucous, palatable, see *Flora Brasiliensis seu Enumeratio Plantarum* 2(1): 320. 1829, *Nomenclator Botanicus. Editio secunda* 1: 497, 620. 1840, *Transactions of the Linnean Society of London, Botany* 4: 508. 1895.

A. xerachne Ekman

Brazil. Inflorescence spicate, spikelets 3-awned, upper glume deeply bifid, lower lemma awned, see *Arkiv för Botanik utgivet av K. Svenska Vetenskapsakademien* 10(17): 9, t. 1, f. 4, t. 6, f. 4. 1911.

Arthrostachya Link = *Gaudinia* P. Beauv.

From the Greek *arthron* “a joint” and *stachys* “a spike.”

Pooideae, Poodae, Aveneae, or Pooideae, Poaceae, Aveninae, type *Arthrostachya coarctata* Link, see *Essai d'une Nouvelle Agrostographie* 95, 153, 164. 1812, *Hortus Regius Botanicus Berolinensis* 1: 151. 1827 and *Contr. U.S. Natl. Herb.* 24: 192. 1925, *Contributions from the United States National Herbarium* 48: 370. 2003.

Arthrostachys Desv. = *Andropogon* L.

From the Greek *arthron* “a joint” and *stachys* “a spike.”

Panicoideae, Andropogoneae, Andropogoninae, type *Arthrostachys gracilis* Desv., see *Species Plantarum* 2: 1045. 1753, *Mémoires de la Société d'Agriculture, Sciences et Arts d'Angers* 1: 178, t. 9, f. 2. 1831 and *Fl. Trop. E. Afr. Gramineae* 770. 1982, *Taxon* 41: 556. 1992, *Taxon* 44: 611-612. 1995, *Contributions from the United States National Herbarium* 46: 20-64. 2003.

Arthrostylidium Rupr.

From the Greek *arthron* “joint” and *stylidium* “a small pillar.”

About 20-32 species, tropical America, West Indies to Brazil, Caribbean Islands, Central and South America. Bambusoideae, Bambuseae, Arthrostylidiinae, or Bambusoideae, Bambusodae, Bambuseae, perennial, tufted, sympodial, woody, unarmed, scrambler or climber, viny or subviny, scandent or clambering, persistent, thick-walled, leaf blades pseudopetiolate, internodes cylindrical, 3-many branches per node, short auricular bristles around sheath margin, triangular meristem above node wanting, rhizomes pachymorph, plants bisexual, inflorescence a slender raceme, rachis zig-zag, spikelets solitary, lowermost floret usually sterile, glumes 1-3 unequal, palea present, 3 free lodicules, 3 stamens, ovary glabrous, 2 stigmas, forest, cloud-forest, wet places, along streams, primary forest, slopes, undergrowth, seasonally flooded areas, in moist forest, related to *Rhipidocladum* and *Merostachys*, type *Arthrostylidium cubense* Rupr., see *Bambuseae* 27-28, t. 4, f. 13. 1839, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 3: 117. 1840 and *Contr. U.S. Natl. Herb.* 24: 307. 1927, *Man. Grass. West Indies* 15-21. 1936, *Smithsonian Contributions to Botany* 9: 1-148. 1973, *Annals of the Missouri Botanical Garden* 72(4): 864-873. 1985, *Acta Botanica Cubana* 37: 1-7. 1987, *Novon* 2(2): 81-110. 1992, *Systematic Botany* 18(1): 80-99. 1993, *Flora Mesoamericana* 6: 197-198. 1994, *American Bamboos* 154-159. 1999, *Contributions from the United States National Herbarium* 39: 13-17. 2000.

Species***A. angustifolium* Nash**

Cuba. Climbing, short racemes on a central axis, see *Torreya* 3(11): 172. 1903, *Acta Botanica Cubana* 37: 1-7. 1987.

***A. auriculatum* Londoño & L.G. Clark**

Colombia. See *Novon* 8(4): 410, f. 1. 1998.

***A. banoense* Cat. Guerra**

The Caribbean. See *Acta Botanica Cubana* 37: 6. 1987.

***A. canaliculatum* Renvoize**

Bolivia. See *Gram. Bolivia* 33, f. 3. 1998.

***A. chiribiquetensis* Londoño & L.G. Clark**

Colombia. See *Novon* 8(4): 412, f. 2. 1998.

***A. cubense* Rupr. (*Arundinaria cubense* (Rupr.) Hack., also *cubensis*)**

Cuba. On cliffs, see *Bambuseae* 28, t. 4, f. 13. 1839 and *Oesterr. Bot. Z.* 53: 69. 1903, *Acta Botanica Cubana* 37: 1-7. 1987.

***A. distichum* Pilger**

The Caribbean. Montane, see *Symb. Antill.* 2: 342. 1901, *Acta Botanica Cubana* 37: 1-7. 1987.

***A. ecuadorensis* Judz. & L.G. Clark**

Ecuador, Colombia. Scandent, see *Syst. Bot.* 18(1): 82, f. 1. 1993.

***A. ekmanii* Hitchc.**

The Caribbean. See *Man. Grasses W. Indies* 16. 1936.

***A. excelsum* Griseb. (*Arundinaria excelsa* (Griseb.) Hack.)**

The Caribbean, Guatemala, Mexico, Honduras, Panama, Nicaragua. Wet forests, shade, see *Fl. Brit. West Indies* 529. 1864 and *Oesterr. Bot. Z.* 53: 69. 1903.

***A. farctum* (Aubl.) Soderstr. & Lourteig (*Arthrostylidium capillifolium* Griseb.; *Arthrostylidium pinifolium* Cat. Guerra; *Arundinaria capillifolia* (Griseb.) Hack.; *Arundo farcta* Aubl.; *Calamagrostis farcta* J.F. Gmel.)**

The Caribbean, West Indies. Filiform leaf-blades, sometimes only 1-3 spikelets, slopes, thickets, dry places, see *Familles des Plantes* 2: 31, 530. 1763, *Histoire des plantes de la Guiane Française* 1: 52. 1775, *Systema Naturae ... editio decima tertia, aucta, reformata* 2: 172. 1791, *Bambuseae* 27. 1839, *Mem. Amer. Acad. Arts, n.s.*, 8: 531. 1862 and *Oesterr. Bot. Z.* 53: 69. 1903, *Phytologia* 64(2): 163. 1987.

in Bolivia: siqinqa, siwinqa

***A. fimbriatum* Griseb. (*Arundinaria fimbriata* (Griseb.) Hack.)**

The Caribbean. Rocky places, mountains, see *Mem. Amer. Acad. Arts, n.s.*, 8: 531. 1862 and *Acta Botanica Cubana* 37: 1-7. 1987.

***A. fimbriodum* Judz. & L.G. Clark (*Arthrostylidium fimbriodum* Judz. & L.G. Clark ex Judz.)**

Brazil, Amazonian regions. Arching and hanging, erect, scandent, trailing, climbing, see *Ann. Missouri Bot. Gard.* 79(1): 170. 1992, *Syst. Bot.* 18(1): 84, f. 2. 1993.

***A. grandifolium* Judz. & L.G. Clark**

Brazil. More or less scandent, see *Syst. Bot.* 18(1): 88, f. 3. 1993.

in Brazil: taboquinha folha larga

A. haitiense (Pilg.) Hitchc. & Chase (*Arundinaria haitiensis* Pilg., also *haitiense*)

The Caribbean. Climbing, montane, see *Contr. U.S. Natl. Herb.* 18(7): 399. 1917.

A. judziewiczii Davidse

Costa Rica, Panama. Slender, scandent, primary forest, see *Novon* 2(2): 81-110. 1992.

A. longiflorum Munro (*Arundinaria longiflora* (Munro) Hack.; *Guadua exaltata* Döll)

Venezuela. Coastal, see *Trans. Linn. Soc. London* 26(1): 41, t. 1. 1868, *Fl. Bras.* 2(3): 181. 1880 and *Oesterr. Bot. Z.* 53: 69. 1903, *Systematic Botany* 18(1): 80-99. 1993.

A. merostachyoides R.W. Pohl (*Merostachys glabra* Pohl)

Costa Rica. Arching, see *Novon* 2(2): 83, f. 1. 1992.

A. multispicatum Pilger (*Arundinaria multispicata* (Pilg.) Hack.)

The Caribbean, Uruguay. Mountain forests, see *Symb. Antill.* 2: 340. 1901, *Oesterr. Bot. Z.* 53: 69. 1903, *Acta Botanica Cubana* 37: 1-7. 1987.

A. obtusatum Pilger (*Arundinaria obtusata* (Pilg.) Hack.)

The Caribbean. See *Symb. Antill.* 2: 340. 1901, *Oesterr. Bot. Z.* 53: 69. 1903, *Flora of the Lesser Antilles. Leeward and Windward Islands* 3: 25-220. 1979.

A. pinifolium Cat. Guerra

The Caribbean. Mountainous pine forests, see *Acta Botanica Cubana* 4: 4. 1980, *Acta Botanica Cubana* 37: 1-7. 1987.

A. pubescens Rupr. (*Arundinaria pubescens* (Rupr.) Hack.)

Colombia, Venezuela, the Caribbean. Erect, scandent, scrambling, montane, forests, see *Bambuseae* 29, t. 4. 1839, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 3: 119. 1840 and *Oesterr. Bot. Z.* 53: 69. 1903, *Acta Botanica Cubana* 37: 1-7. 1987, *Systematic Botany* 18(1): 80-99. 1993.

A. punctulatum Londoño & L.G. Clark

Colombia. See *Novon* 8(4): 415, f. 3. 1998.

A. reflexum Hitchc. & Ekman

The Caribbean. Climbing, forming dense thickets, on cliffs, see *Man. Grasses W. Indies* 19. 1936.

A. sarmentosum Pilger

The Caribbean, Venezuela. Climbing, found along streams, wet forests, see *Symb. Antill.* 4: 108. 1903, *Flora of Puerto Rico and Adjacent Islands: A Systematic Synopsis.* 1982, *J. Amer. Bamb. Soc.* 5(3-4): 69, f. 1a. 1984[1986], *Systematic Botany* 18(1): 90. 1993.

A. scandens McClure (*Arthrostylidium cacuminis* McClure)

Venezuela, Amazonas, Guyana. Erect, scandent, arching, climbing, decumbent, rooting at the lower nodes, woody, internodes hollow, loosely clumped, rhizomes sympodial, erect spicate racemes, 3-5-flowered, the lowest and uppermost florets sterile, forming extensive and dense thickets, in moist areas, forests, along streams and rivers, see *New York Bot. Gard.* 10(5): 3-4. 1964, *Systematic Botany* 18(1): 80-99. 1993.

in Venezuela: debeuni

A. schomburgkii (Benn.) Munro (*Arundinaria schomburgkii* Benn.)

(for the German (b. Freiburg) botanist Sir Robert Hermann Schomburgk, 1804-1865 (d. Berlin), traveler, explorer, in British Guiana (with his brother Richard), plant collector in Siam and Venezuela, 1844 knighted, 1859 Fellow of the Royal Society, British Consul in Santo Domingo and Bangkok, sent plants to Reichenbach, his writings include *A Description of British Guiana.* London 1840, *Reisen in Guayana u. am Orinoko.* Leipzig 1845, *The Natural History of the Fishes of Guiana.* 1841-1843 and *The History of Barbados.* London 1848, brother of the German botanist and explorer Moritz Richard Schomburgk (1811-1891); see A. Lasègue, *Musée botanique de Benjamin Delessert.* 216-219. 1845; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen.* 14. Aufl. 776. 1993; J.H. Barnhart, *Biographical notes upon botanists.* 3: 238. 1965; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection.* 354. 1972; S. Lenley et al., *Catalog of the manuscript and archival collections and index to the correspondence of John Torrey.* Library of the New York Botanical Garden. 361. 1973; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico.* 1964; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University.* Cambridge, Mass. 1917-1933; J.W. Harshberger, *The Botanists of Philadelphia and Their Work.* 190. 1899; Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists.* 612. 1994; Georg Christian Wittstein, *Etymologisch-botanisches Handwörterbuch.* 796. 1852; G. Murray, *History of the collections contained in the Natural History Departments of the British Museum.* 1: 181. 1904; Henri Pittier, *Manual de las Plantas Usuales de Venezuela y su Suplemento.* Caracas 1978; J.D. Milner, *Catalogue of Portraits of Botanists Exhibited in the Museums of the Royal Botanic Gardens.* Royal Botanic Gardens, Kew, London 1906; D.J. Carr and S.G.M. Carr, eds., *People and Plants in Australia.* 1981; Stafleu & Cowan, *Taxonomic literature.* 5: 295-301. 1985)

South America, Venezuela, Amazonas. Long culm internodes, cloud forest, see *Proceedings of the Linnean Society of London* 1: 51. 1840, *Transactions of the Linnean Society of London* 18(4): 562. 1841, *Transactions of the Linnean Society of London* 26(1): 41. 1868 and *Mem. New York Bot.*

Gard. 10(5): 2-3. 1964, *Annals and Mag. of Natural History* 30(1): 15. London 1981, *Systematic Botany* 18(1): 93. 1993.

in Venezuela; curatas, curas

A. simpliciusculum (Pilger) McClure (*Arundinaria simpliciuscula* Pilger)

Brazil, Colombia, Ecuador, Peru. Erect, scandent, along streams, forest margins, see *Bot. Jahrb. Syst.* 56(Beib. 123): 29. 1920, *Ruizia* 13: 1-480. 1993, *Systematic Botany* 18(1): 95. 1993.

A. urbanii Pilger (*Arundinaria urbanii* Pilger) (after the German botanist Ignatz Urban, 1848-1931, specialized on the flora of the West Indies, from 1889 professor Botanical Garden and Museum at Berlin-Dahlem, wrote on botanical biography, among his most valuable writings are *Morphologie der Gattung Bauhinia*. 1885, *Geschichte des Königlichen Botanischen Museums zu Berlin-Dahlem (1815-1913). Nebst Aufzählung seiner Sammlungen*. Dresden 1916, *Plantae novae Antillanae*. Berlin 1895 and *Zur Flora Südamerikas*. Halle a.S. 1882, edited *Symbolae Antillanae seu fundamenta florum Indiae occidentalis*. Berolini etc. 1898-1928; see J.H. Barnhart, *Biographical notes upon botanists*. 3: 417. 1965; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 411. 1972; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. 1917-1933; S. Lenley et al., *Catalog of the manuscript and archival collections and index to the correspondence of John Torrey*. Library of the New York Botanical Garden. 418. 1973; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993; Stafleu and Cowan, *Taxonomic literature*. 6: 606-619. 1986)

The Caribbean, Cuba. Montane, savannah, riverbanks, see *Symb. Antill.* 2: 339. 1901, *Oesterr. Bot. Z.* 53: 69. 1903, *Systematic Botany* 18(1): 80-99. 1993.

A. venezuelae (Steud.) McClure (*Arundinaria standleyi* Hitchc.; *Chusquea venezuelae* Steud.)

South and Central America. Erect, scandent, caespitose, woody, solid, aromatic, fodder, used for making baskets, found in wet forests, closely related to *Arthrostylidium excelsum* Griseb. and *Arthrostylidium pubescens* Rupr., see *Syn. Pl. Glumac.* 1: 337. 1854, *Trans. Linn. Soc. London* 26: 55. 1868 and *Proc. Biol. Soc. Wash.* 40: 79. 1927, *Journal Washington Academy of Sciences* 32(6): 172. 1942, *Smithsonian Contr. Bot.* 9: 21. 1973, *Annals of the Missouri Botanical Garden* 74(2): 424-428. 1987, *Systematic Botany* 18(1): 96. 1993.

in Venezuela: lata

A. virolinensis Londoño & L.G. Clark

Colombia. See *Novon* 8(4): 417, f. 4. 1998.

A. youngianum L.G. Clark & Judz. (for Stephen M. Young) Ecuador, Colombia. Erect, scandent, see *Syst. Bot.* 18(1): 98, f. 7. 1993.

in Colombia: tundillas

Arundarbor Kuntze = *Bambusa* Schreb.

Latin *arundo*, *dinis* (*harundo*) “a reed, cane” and *arbor* “a tree.”

Bambusoideae, Bambuseae, Bambusinae, type *Arundarbor arundinacea* (Retz.) Kuntze, see *Genera Plantarum* 1: 236. 1789, *Species Plantarum. Editio quarta* 2: 245. 1799, *Revisio Generum Plantarum* 2: 760-761. 1891 and *Contributions from the United States National Herbarium* 39: 29-35. 2000.

Arundinaria Michaux = *Bashania* Keng f. & T.P. Yi, *Butania* Keng f., *Clavinodum* T.H. Wen, *Ludolfia* Willd., *Ludolphia* Willd., *Macronax* Raf., *Miegia* Pers., *Nipponocalamus* Nakai, *Oligostachyum* Wang & Ye, *Omeiocalamus* Keng f., *Pleioblastus* Nakai, *Polyanthus* Y.C. Hu, *Triglossum* Roem. & Schult., *Triglossum* F.E.L. Fisch. ex Roem. & Schult., *Tschompskia* Aschers. & Graebn.

From the Latin *arundo*, *dinis* (*harundo*) “a reed, cane”; see André Michaux (1746-1803), *Flora Boreali-Americana* 1: 73. Paris 1803.

Monotypic or about 50/150 species, warm and temperate regions, China, northern India to Japan, North America. Bambusoideae, Bambusodae, Bambuseae, or Bambusoideae, Bambuseae, Arundinariinae, perennial, erect or climbing, unarmed, woody and persistent, slender, reedlike, shrub or small tree, cylindrical, usually not scandent, unicaespitose or pluricaespitose, forming thickets, the main branches dominant, internodes cylindrical, long or short leptomorph rhizomes, rhizomes monopodial or sympodial, flowering culms leafless or leafy, culm internodes hollow, ligule a fringed membrane, plants bisexual, flowering semeluctant, inflorescence a panicle or a raceme, bisexual spikelets, hermaphrodite florets, 1 or 3 very unequal glumes per spikelet, 3-6 stamens, ovary glabrous without the apical appendage, 2 or 3 stigmas, fruit grooved, often cultivated as ornamentals or used in bonsai, widespread in forest, grassland, mountains and high altitudes, *Bashania* Keng f. & Yi, *Fargesia* Franch. and *Pleioblastus* Nakai formerly included in and probable synonyms of *Arundinaria* Michx., type *Arundinaria macrosperma* Michx., see *Gen. Pl.* 786. 1791, *Flora Boreali-Americana*. 1: 73-74. Paris 1803, *Synopsis Plantarum* 1: 101, 102. Paris et Tubingae 1805, *Medical Repository* ser. 2, 5: 353. 1808, *Der Gesellschaft naturforschender Freunde zu Berlin Magazin für die neuesten Entdeckungen in der gesammten Naturkunde*. 2: 230, 320. Berlin 1808, *Catalogue du Jardin ... Razoumoffsky ...*

à Gorenki ... 6. 1812, *Systema Vegetabilium* 2: 55, 846. 1817, *The Genera of North American Plants, and Catalogue of the Species, to the Year 1817*. 1: 39. Species

A. alpina K. Schum. (*Sinarundinaria alpina* (K. Schum.) C.S. Chao & Renvoize; *Yushania alpina* (K. Schum.) W.C. Lin)

Kenya, Tanzania. Robust, hollow-stemmed, thick-walled, erect, rhizomes woody, leaf blades linear-lanceolate, culm sheaths densely pubescent, inflorescence paniculate,

spikelets 4- to 11-flowered, glumes ovate, lemmas pubescent and acuminate, forming extensive clumps, cultivated, growing gregariously, used for water piping, for hut building, found in montane forest, see *Bulletin of the Taiwan Forest Research Institute* 248: 14. 1974, *Kew Bulletin* 44(2): 361. 1989, Ib Friis, *Forests and Forest Trees of Northeast Tropical Africa: Their Natural Habitats and Distribution Patterns in Ethiopia, Djibouti and Somalia*. London: HMSO 1992.

in English: Green Mountain bamboo, mountain bamboo

in Burundi: umugano

in Kenya: murangi, ol-diani, terga, tegundet, tegat, mwanzi

in Malawi: mlasi, lulasi, musyombe, nsungwi

A. amabilis McClure (*Pseudosasa amabilis* (McClure) Keng f. 1957; *Pseudosasa amabilis* (McClure) Keng f. 1959, nom. illeg., non *Pseudosasa amabilis* (McClure) Keng f. 1957; *Pseudosasa amabilis* var. *amabilis*)

Asia, China. See *Lingnan Science Journal* 10(1): 6, t. 1-8. 1931, *Lingnan Sci. J.* 13: 503. 1934.

A. anceps Mitford (*Sinarundinaria anceps* (Mitford) C.S. Chao & Renvoize; *Yushania anceps* (Mitford) W.C. Lin)

Southeast U.S. A running bamboo, see *The Bamboo Garden* 181. 1896 and *Bulletin of the Taiwan Forest Research Institute* 248: 9. 1974, *Kew Bulletin* 44(2): 359. 1989.

in English: Mitford bamboo

A. basigibbosa McClure

China. Often cultivated, see *Lingnan University Science Bulletin* 9: 1. 1940.

A. chino (Franch. & Sav.) Makino (*Arundinaria laydekeri* Bean ex Vilm.; *Arundinaria simonii* var. *chino* (Franch. & Sav.) Makino; *Bambusa chino* Franch. & Sav.; *Pleioblastus chino* (Franch. & Sav.) Makino; *Pleioblastus maximowiczii* var. *chino* (Franch. & Sav.) Nakai)

Japan, Asia temperate. Perennial, ornamental, see *Botanical Magazine (Tokyo)* 14(161): 98. 1900, *Bulletin de la Société Dendrologique de France* 12: 80. 1909, *Botanical Magazine (Tokyo)* 26(300): 14. 1912, *Journal of Japanese Botany* 3(6): 23. 1926.

A. chino (Franch. & Sav.) Makino f. **angustifolia** (Mitford) C.S. Chao & Renvoize (*Arundinaria angustifolia* (Mitford) J. Houz.; *Bambusa angustifolia* Mitford; *Pleioblastus angustifolius* (Mitford) Nakai; *Pleioblastus chino* f. *angustifolia* (Mitford) Muroi; *Pleioblastus chino* f. *angustifolius* (Mitford) Muroi & H. Okamura)

Japan, Asia temperate. Cultivated, see *The Bamboo Garden* 46: 547. 1894 and *Journal of Japanese Botany* 10(5): 294. 1934, *Kew Bulletin* 44(2): 368. 1989.

A. chrysantha Mitford (*Arundinaria chrysantha* Mitford ex Bean; *Pleioblastus chrysanthus* (Mitford) D.C. McClint.; *Pleioblastus chrysanthus* (Mitford ex Bean) D.C. McClint.;

Sasa chrysantha (Mitford) E.G. Camus; *Sasa chrysantha* (Mitford ex Bean) E.G. Camus)

Presumably from Japan. See *Gardener's Chronicle & Agricultural Gazette* 15: 238. 1894 and *Les Bambusées* 23. 1913, *Plantsman* 4(3): 191. 1982.

A. debilis Thwaites (*Indocalamus debilis* (Thw.) Alston; *Sinarundinaria debilis* (Thwaites) C.S. Chao & Renvoize)

Sri Lanka. Scandent, vinelike, delicate, thin-walled, spreading, leaves linear to linear-lanceolate, 2 glumes early deciduous and papery, the branches hang from small trees, sympodial pachymorph rhizome, culm leaves tardily deciduous, 3 stamens, 2 plumose stigmas, cattle fodder, sometimes excluded from *Indocalamus* and *Arundinaria*, see *Enum. Pl. Zeyl.* 375. 1864, *Trans. Linn. Soc. London* 26: 24-25. 1868, *For. Man.* 230-233. 1873, *Ann. Roy. Bot. Gard. (Calcutta)* 7(1): 8, pl. 6. 1896 and *Handb. Fl. Ceylon* 5: 311-312. 1900, *Bambus.* 30, pl. 12. 1913, *Handb. Fl. Ceylon* 6: 341-342. 1931, *Grasses of Ceylon* 30-31. 1956, *Smithsonian Contr. Bot.* 72: 3. 1988, *Kew Bulletin* 44(2): 355. 1989.

A. decalvata Döll

Brazil. See *Fl. Brasil.* 2, 3: 170. 1880.

A. densifolia Munro (*Chimonobambusa densifolia* (Munro) Nakai; *Sinarundinaria densifolia* (Munro) C.S. Chao & Renvoize; *Yushania densifolia* (Munro) R.B. Majumdar)

Sri Lanka. Closely packed culms, thin-walled, dense thickets, erect, sympodial pachymorph rhizomes, culm leaves persistent, spikelets with 1 fertile floret, rhizomes with air cavities, 2 glumes, 3 stamens, 2 plumose stigmas, this bamboo grows in standing water, bogs, wet patanas, see *Transactions of the Linnean Society of London* 26(1): 32. 1868, *Fl. Brit. Ind.* 7: 379. 1896, *Ann. Roy. Bot. Gard. (Calcutta)* 7(1): 8-9, pl. 7. 1896 and *Handb. Fl. Ceylon* 5: 312. 1900, *Indian Trees* 664. 1906, *Bambus.* 31, pl. 21c. 1913, *Journal of the Arnold Arboretum* 6: 151. 1925, *Handb. Fl. Ceylon* 6: 342. 1931, *Grasses of Ceylon* 31. 1956, *Smithsonian Contr. Bot.* 72: 12. 1988, *Kew Bulletin* 44(2): 354. 1989.

A. flabellata (Fournier ex Hemsley) McClure (*Guadua flabellata* Fournier ex Hemsley)

Mexico. Sometimes excluded from *Arundinaria*, see *Biol. Centr.-Amer.* 3: 588. 1885, *Mexic. Pl.* 2: 131. 1886 and *Bamb.* 114. 1913, *Phytologia* 10(2): 162. 1964.

A. floribunda Thw. (*Indocalamus floribundus* (Thw.) Nakai; *Sinarundinaria floribunda* (Thwaites) C.S. Chao & Renvoize)

Sri Lanka. Shrubby, montane, forming small clumps, erect, sympodial pachymorph rhizomes, roots without air cavities, hollow culms, internodes green, nodes thick, culm leaves deciduous, spikelets with 2-3 fertile florets, 2 glumes, 3 stamens, orange anthers basifixed, see *Enum. Pl. Zeyl.* 375. 1864, *Trans. Linn. Soc. London* 26: 20. 1868, *For. Man.* 230. 1873, *Ann. Roy. Bot. Gard. (Calcutta)* 7(1): 5-6, pl. 3. 1896, *Fl. Brit. Ind.* 7: 377-378. 1896 and *Handb. Fl. Ceylon*

5: 310-311. 1900, *Bambus.* 28-29, pl. 16b. 1913, *Journal of the Arnold Arboretum* 6: 148. 1925, *Handb. Fl. Ceylon* 6: 342. 1931, *Grasses of Ceylon* 30. 1956, *Kew Bulletin* 44(2): 356. 1989.

A. funghomii McClure

Eastern Asia. Cultivated, see *Lingnan University Science Bulletin* 9: 3. 1940.

A. gigantea (Walter) Muhlenb. (*Arundinaria bambusina* (Fisch.) Trin.; *Arundinaria gigantea* Chapm., nom. illeg., non *Arundinaria gigantea* (Walter) Muhl.; *Arundinaria gigantea* Nutt.; *Arundinaria gigantea* (Walter) Muhlenb. subsp. *tecta* (Walter) McClure; *Arundinaria gigantea* var. *gigantea*; *Arundinaria gigantea* var. *tecta* (Walter) Scribn.; *Arundinaria macrosperma* Michx.; *Arundinaria macrosperma* var. *arborescens* Munro; *Arundinaria macrosperma* var. *suffruticosus* Munro; *Arundinaria macrosperma* var. *tecta* (Walter) Alph. A. wightiana Nees (*Indocalamus wightianus* (Nees) Nakai; *Sinarundinaria wightiana* (Nees) C.S. Chao & Renvoize; *Yushania wightiana* (Nees) R.B. Majumdar)

India. Culms used for mats and baskets, see *Linnaea* 9(4): 482. 1834 and *Journal of the Arnold Arboretum* 6: 149. 1925, *Kew Bulletin* 44(2): 356. 1989.

Arundinella Raddi = *Acratherum* Link, *Brandtia* Kunth, *Calamochloe* Rchb., *Goldbachia* Trin., *Riedelia* Kunth, *Thysanachne* Presl

Diminutive from the Latin *arundo*, *dinis* (*harundo*) “a reed, cane.”

About 47-55 species, pantropical and warm regions, tropics and subtropics, mainly in Asia. Panicoideae, Panicoideae, Arundinelleae, annual or perennial, erect and tough, simple or branched, tufted, spreading, herbaceous, rhizomatous or stoloniferous, short and branched rhizomes, glabrous nodes, solid or hollow internodes, leaves nonauriculate, ligule a very short fringed membrane, leaf blades linear and narrow, plants bisexual, inflorescence variable, an oblong panicle open or contracted, spikelets mostly in pairs or in triads, 2 florets, upper floret bisexual and early deciduous, lower floret sterile or male and more or less persistent, 2 glumes very unequal and membranous, lower lemma ovate-elliptic, upper lemma coriaceous and awned, 2 fleshy and glabrous lodicules, 3 stamens, ovary glabrous, 2 stigmas, native pasture species, weed species of open habitats, common on riverbanks, marshes and marshy places, rainforest, pampas, rocky slopes, related to *Melinis*, type *Arundinella brasiliensis* Raddi, see *Neue Entdeckungen im ganzen Umfang der Pflanzenkunde* 2: 81. 1820, *Agrostografia Brasiliensis* 36-37, t. 1, f. 3. 1823, *Hortus Regius Botanicus Berolinensis* 1: 230. 1827, *Thysanachne, Novum Plantarum Genus* 12, t. 6. 1829, *Linnaea* 7: 240 (or 224). 1832, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 515. 1833, *Flora Brasiliensis* 7: 171-172. 1863, *Hooker's Icones Plantarum* 15: 15. 1883 and *Kew Bull. Species

A. agrostoides Trin. (*Arundinella agrostoides* Hook.f., nom. illeg., non *Arundinella agrostoides* Trin.; *Arundinella holcoides* (Kunth) Trin.)

Warm regions. See *Species Graminum* 3: t. 265. 1829-1830, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 4,2(1): 107. 1836, *The Flora of British India* 7(21): 71. 1897 [1896].

A. bengalensis (Spreng.) Druce (*Arundinella stricta* (Roxb.) Janowski, nom. illeg., non *Arundinella stricta* Nees; *Arundinella wallichii* Nees ex Steudel; *Panicum bengalense* Spreng.; *Panicum strictum* Roxb., nom. illeg., non *Panicum strictum* R. Br.) (dedicated to the Danish (b. Copenhagen) physician Nathaniel Wallich (originally Nathan Wulff or Wolff), 1786-1854 (d. London), botanist and botanical collector (India, Malaya, Cape, Nepal), pupil of Vahl at Copenhagen, in 1807 went out to India as surgeon, 1809 with William Roxburgh (1751-1815) at Calcutta, 1813 with the Hon. East India Company, 1815-1846 Superintendent of the Calcutta Botanic Garden (like his predecessor W. Roxburgh), 1818 Fellow of the Linnean Society, 1820-1822 plant collector in Nepal, 1829 Fellow of the Royal Society, 1833 visited Assam, correspondent of the naturalist and plant collector John Reeves (1774-1856), among his most valuable writings are *Tentamen Florae Nepalensis*. Calcutta and Serampore 1824-1826, *Descriptions of Some Rare Indian Plants*. [Asiatic Researches 1820] 1820 and *Plantae Asiaticae rariores*. London [1829-] 1830-1832, father of George Charles Wallich (b. Calcutta 1815-d. Marylebone, London 1899); see J.H. Barnhart, *Biographical notes upon botanists*. 3: 454. 1965; I.H. Vegter, *Index Herbariorum*. Part II (7), *Collectors T-Z*. Regnum Vegetabile vol. 117.

Simonds Boulger, *A Biographical Index of Deceased British and Irish Botanists*. London 1931)

Subtropics, Southeast Asia, India. Perennial, creeping, leaves lanceolate, panicle cylindrical, weed species of tea, along roadsides, open places, sandy soil, under pine forests, see *Systema Vegetabilium, editio decima sexta* 1: 311. 1825, *Flora Indica; or, Descriptions of Indian Plants* 1: 306. 1832, *Synopsis Plantarum Glumacearum* 1: 114. 1854 and *Botanical Society and Exchange Club of the British Isles* 4: 605. 1916 [1917], *Repertorium Specierum Novarum Regni Vegetabilis* 17: 84. 1921.

in Bhutan: phurki, darkharey

in Ladakhi: berka (for cane)

A. berteroniana (Schult.) Hitchc. & Chase (*Arundinella berteroniana* (Schult.) Mez, nom. illeg., non *Arundinella berteroniana* (Schult.) Hitchc. & Chase; *Arundinella convoluta* Pilg.; *Arundinella crinita* Trin.; *Arundinella cubensis* Griseb.; *Arundinella peruviana* (J. Presl) Steud.; *Ischaemum peruvianum* (J. Presl) Kunth; *Muhlenbergia berteroniana*

(Schult.) Kunth; *Thysanachne peruviana* J. Presl; *Trichochloa berteroniana* Schult.)

Central America to northern Argentina, Brazil, Mexico. Herbaceous, caespitose, erect to arching, internodes glabrous, nodes hairy, panicle branches loose, forage, medicinal, terrestrial, riparian habitat, growing in small clumps, withstands seasonal flooding, found on rocks at river edge, riverbanks, slopes, silty beaches, see *Mantissa* 2: 209. 1824, *Révision des Graminées* 1: 64. 1829, *Reliquiae Haenkeanae* 1(4-5): 253. 1830, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 515. 1833, *Linnaea* 10(3): 299. 1836, *Synopsis Plantarum Glumacearum* 1: 115. 1854, *Memoirs of the American Academy of Arts and Science, new series* 8: 533. 1862, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 27(1-2): 25. 1899 and *Contributions from the United States National Herbarium* 18(7): 290. 1917, *Repertorium Specierum Novarum Regni Vegetabilis* 17(4-7): 85. 1921.

in Mexico: carricillo papachote, itsé toom ethem, privilegio

A. birmanica Hook.f. (*Arundinella setosa* Trin.)

Asia, Myanmar. See *De Graminibus Paniceis* 63. 1826, *The Flora of British India* 7(21): 73. 1897 [1896].

A. blephariphylla (Trimen) Hook.f. (*Arundinella blephariphylla* (Trimen) Trimen ex Hook.f.; *Panicum blephariphyllum* Trimen)

Asia, Sri Lanka. Perennial, leaf sheaths ciliate, ligule absent or membranous, inflorescence an open panicle, lower floret staminate, upper glume acuminate, upper lemma awnless, along marshy places, see *Journ. Bot. Brit. & For.* 23: 272. 1885, *Fl. Br. India* 7(21): 77. 1896 and *Handb. Fl. Ceylon* 5: 180. 1900, *Grasses of Ceylon* 100. 1956, *Grasses of Burma* ... 421. 1960.

A. kannanorica V.J. Nair, Sreek. & N.C. Nair

India, Kerala. See *Journal of the Bombay Natural History Society* 80(2): 396. 1984.

A. ciliata Nees ex Miq. (*Arundinella agrostoides* Hook.f., nom. illeg., non *Arundinella agrostoides* Trin.; *Arundinella ciliata* Nees; *Arundinella ciliata* (Roxb.) Miq.; *Arundinella ciliata* Thunb., nom. illeg., non *Arundinella ciliata* Nees ex Miq.; *Arundinella hirsuta* Nees ex Steud.; *Arundinella pilosa* Hochst.; *Holcus ciliatus* Roxb.)

India. Panicle congested, glumes subequal, along roadsides, evergreen forests, see *Flora Japonica*, ... 49. 1784, *Flora Indica; or Descriptions* ... 1: 321. 1820, *Cat. Indian Plants* no. 1666. 1833, *Synopsis Plantarum Glumacearum* 1: 115. 1854, *The Flora of British India* 7(21): 71. 1897 [1896].

in the Philippine Islands: salai-salai

A. decempedalis (Kuntze) Janowski (*Arundinella clarkei* Hook.f.; *Panicum decempedale* Kuntze)

India, Sikkim, Assam, Arunachal Pradesh. Perennial or annual, stout, large panicle, see *Revisio Generum Plan-*

tarum 2: 783. 1891, *The Flora of British India* 7(21): 75-76. 1897 [1896] and *Repertorium Specierum Novarum Regni Vegetabilis* 17(477-480): 84. 1921.

A. deppeana Nees ex Steud. (*Arundinella auletica* Rupr. ex E. Fourn.; *Arundinella auletica* Rupr.; *Arundinella latifolia* E. Fourn.; *Arundinella phragmitoides* Griseb.; *Arundinella robusta* E. Fourn.; *Arundinella scoparia* (J. Presl) E. Fourn.) (for Ferdinand Deppe, 1794-1861, gardener, traveler and botanical collector in Mexico and Guatemala, together with Schiede. See *Flora Telluriana* 2: 51. 1836 [1837], *Bonplandia* 9: 157. 1861, *Bot. Zeitung* 19: 104. 1861, *Zandera* 3: 39-42. 1984)

South America, Mexico. Coarse, more or less erect, simple or branched, tall, forage, found in disturbed sites at roadside, on open and disturbed slopes above river, white to green with purple shading flowers, yellowish to red anthers, see *Bulletin de l'Académie Royale des Sciences et Belles-lettres de Bruxelles* 9(2): 242. 1842, *Synopsis Plantarum Glumacearum* 1: 115. 1854, *Catalogus plantarum cubensium* ... 234. 1866, *Mexicanas Plantas* 2: 54-55. 1886.

in Spanish: cola de venado

A. fuscata Steud. (*Arundinella fuscata* Hook.f., nom. illeg., non *Arundinella fuscata* Steud.; *Arundinella fuscata* Nees ex Büse; *Arundinella fuscata* Nees ex Koord., nom. illeg., non *Arundinella fuscata* Steud.)

Asia, India. See *Synopsis Plantarum Glumacearum* 1: 114. 1854, *Plantae Junghuhnianae, Gramineae* 19. 1854, *The Flora of British India* 7(21): 74. 1897 [1896] and *Exkursionsflora von Java* ... 1: 119. 1911, *Reinwardtia* 2(2): 233. 1953.

A. grevillensis B.K. Simon (Mt. Greville, located southwest of Lake Moogerah, Queensland)

Australia, Queensland. Reed grass, rare species, see *Austrobaileya* 1(5): 463. 1982.

A. hirta (Thunb.) Tanaka (*Agrostis ciliata* Thunb.; *Agrostis thunbergii* (Kunth) Steud.; *Arundinella anomala* Steud.; *Arundinella hirta* (Thunb.) Koidz.; *Arundinella hirta* var. *ciliata* (Thunb.) Koidz.; *Panicum williamsii* Hance; *Poa hirta* Thunb.)

India, China, Japan, Taiwan, Korea. Herbaceous, rhizomatous, found in alpine grassland, useful for erosion control, see *Flora Japonica*, ... 49. 1784, *Synopsis Plantarum Glumacearum* 1: 116, 163. 1854, *Annales des Sciences Naturelles; Botanique, sér. 5*, 5: 250. 1866 and *Botanical Magazine* (Tokyo) 39: 302. 1925, *Bull. Sci. Hort. Inst. Kyushu Imp. Univ.* 1: 196, 208. 1925.

in Japan: todashiba

A. hispidia (Humb. & Bonpl. ex Willd.) Kuntze (*Acratherum miliaceum* Link; *Agrostis beteteriana* Spreng. ex Steud.; *Aira brasiliensis* Spreng., nom. illeg., non *Aira brasiliensis* Raddi; *Andropogon hispidus* Humb. & Bonpl. ex Willd.; *Andropogon virens* Spreng.; *Arundinaria hispidia* var.

glabrivaginata Kuntze; *Arundinella brasiliensis* Raddi; *Arundinella confinis* (J.A. Schultes) A.S. Hitchc. & Chase; *Arundinella elata* Pilg.; *Arundinella hispida* (Humb. & Bonpl. ex Willd.) Hack., nom. illeg., non *Arundinella hispida* (Humb. & Bonpl. ex Willd.) Kuntze; *Arundinella hispida* Hack.; *Arundinella hispida* (Willd.) Kuntze; *Arundinella hispida* var. *glabrivaginata* Kuntze; *Arundinella martinicensis* Trin.; *Arundinella mikanii* (Trin. ex Spreng.) Nees; *Arundinella pallida* Nees; *Arundinella palmeri* Vasey ex Beal; *Arundinella scoparia* (J. Presl) E. Fourn.; *Goldbachia mikanii* Trin. ex Spreng.; *Holcus nervosus* Roxb.; *Ischaemum hispidum* (Humb. & Bonpl. ex Willd.) Kunth; *Piptatherum confine* J.A. Schultes; *Riedelia mikanii* Trin. ex Kunth; *Thysanachne scoparia* J. Presl)

Mexico, Argentina, Brazil, Bolivia, Venezuela, Paraguay. Perennial, stout, simple, erect to semidecumbent, internodes glabrous, nodes hairy, stiff panicle stiffly branched, forage, commonly growing in wet ground, savannah marsh, in seasonally inundated savannah, see *Species Plantarum. Editio quarta* 4: 908. 1806, *Nova Genera et Species Plantarum* 1: 194-195. 1815 [1816], *Flora Indica; or Descriptions ...* 1: 320. 1820, *Neue Entdeckungen im ganzen Umfang der Pflanzenkunde* 2: 42. 1820, *Agrostografia Brasiliensis* 37, t. 1, f. 3. 1823, *Mantissa* 2: 184. 1824, *De Graminibus Paniceis* 62. 1826, *Hortus Regius Botanicus Berolinensis* 1: 230. 1827, *Flora Brasiliensis seu Enumeratio Plantarum* 2: 465. 1829, *Thysanachne, Novum Plantarum Genus* 12, t. 6. 1829, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 515. 1830, *Nomenclator Botanicus edition 2* 1: 39, 143. 1840, *Mexicanas Plantas* 2: 55. 1886, *Revisio Generum Plantarum* 2: 761. 1891, *Grasses of North America for Farmers and Students* 2: 67, f. 20A, a. 1896, *Revisio Generum Plantarum* 3(3): 341. 1898, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 25(5): 710. 1898 and *Bulletin de l'Herbier Boissier, sér. 2*, 4(6): 527. 1904, *Contributions from the United States National Herbarium* 18(7): 290. 1917, *J. Bot. British & Foreign* 62: 166. 1924.

in English: arundinella

in Spanish: rabo de gato

in Mexico: papachota, popote, tlacopopôtl, tepopôtl, (*tlacopopotl ahnôzo tepopotl* = medicinal plant)

in Thailand: yaa khaai luang, yaa khaai yai, ya khai luang, ya khai yai

A. holcoides (Kunth) Trin. (*Arundinella agrostoides* Trin.; *Brandtia holcoides* Kunth)

Southeast Asia, India, Thailand, Philippines. Panicle congested, near riverbanks, on rocky slopes, see *Révision des Graminées* 2: 511, t. 170. 1831, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 4,2(1): 107. 1836 and *Reinwardtia* 2(2): 231. 1953.

A. hookeri Munro ex Keng (*Arundinella hookeri* Munro ex Hook.f.; *Arundinella villosa* Arnott ex Steudel var. *himalayica* Hook.f.)

India, Himalaya. Tufted, shortly rhizomatous, leaves triangular, inflorescences purple, peduncle glabrous below the inflorescence, low forage value, fodder, grows on rocky slopes, see *The Flora of British India* 7(21): 73. 1897 [1896] and *Journ. Ind. Bot. Soc.* 27: 66. 1948.

A. khaseana Nees ex Steud. (*Arundinella khaseana* Nees)

India. Perennial, stout, densely hairy at nodes, grows in rice fields, see *Synopsis Plantarum Glumacearum* 1: 115. 1854.

A. lasiostoma K. Schum. (*Arundinella setosa* var. *lasiostoma* (K. Schum.) Jansen)

Asia, Pacific. See *Die Flora der deutschen Schutzgebiete in der Südsee* 174. 1901, *Reinwardtia* 2(2): 235. 1953.

A. laxiflora Hook.f. (*Arundinella nervosa* Thw.)

Asia, Sri Lanka. Perennial or annual, leaf sheaths glabrous, ligule a short ciliate membrane, inflorescence an open panicle, lower floret staminate, upper lemma awnless or awned, grassland, open areas, open dry soils, along roadsides, see *Enum. Pl. Zeyl.* 362. 1864, *Fl. Br. Ind.* 7(21): 75. 1896 and *Handb. Fl. Ceylon* 5: 180. 1900, *Grasses of Ceylon* 99. 1956, *Grasses of Burma ...* 422. 1960.

A. leptochloa (Steud.) Hook.f. (*Arundinella gigantea* Dalz.; *Arundinella lawsonii* Hook.f.; *Arundinella leptochloa* (Nees ex Steud.) Hook.f.; *Arundinella laxiflora* Hook.f.; *Panicum leptochloa* Nees ex Steud.; *Panicum zeylanicum* Arn. ex Hook.f.)

Southern India, Sri Lanka, Tamil Nadu. Perennial, unbranched, leaf sheaths glabrous or villous, ligule a short membrane, inflorescence a narrow panicle, glumes acute, open areas, forests, shade places, wastelands, open woodlands, along fields margins, often confused with *Arundinella metzii* Hochst. ex Miq., see *Synopsis Plantarum Glumacearum* 1: 62. 1854, *The Bombay Flora ...* 293. 1861, *The Flora of British India* 7(21): 75-76. 1897 [1896] and *Handb. Fl. Ceylon* 5: 178. 1900, *Grasses of Ceylon* 100. 1956, *Grasses of Burma ...* 423. 1960.

A. mesophylla Nees ex Steud. (*Arundinella khaseana* Nees)

India. Perennial, slender, in wet river beds, along rock crevices, grasslands, see *Synopsis Plantarum Glumacearum* 1: 115. 1854.

A. metzii Hochst. ex Miq. (*Arundinella decomposita* Janowski; *Arundinella lawii* Hook.f.; *Arundinella pygmaea* Hook.f.)

Southern India, Sri Lanka. Perennial, slender, leaf blades sparsely hispid, leaf sheaths hispid or villous, ligule membranous, loosely contracted panicle, lower floret staminate, glumes unequal, forage, common in moist shady places, in open grasslands, see *Nieuwe Verh. Eerste Kl. Kon. Ned. Inst. Wetensch. Amsterdam* ser. 3, 4: 31. 1851 [Verh. Konink.

Nederl. Inst.], *Analecta botanica indica* ... 2: 19. 1851, *Fl. Br. Ind.* 7(21): 72. 1896 and *Handb. Fl. Ceylon* 5: 180. 1900, *Repertorium Specierum Novarum Regni Vegetabilis* 17: 84. 1921, *Grasses of Burma* ... 423. 1960.

A. montana S.T. Blake

Australia, Queensland, Mt. Ngungun. Rare species, found in rock crevices, see *University of Queensland Papers: Department of Biology* 1(18): 16. 1941.

in English: mountain reed

A. nepalensis Trinius (*Acratherum miliaceum* Link; *Arundinella acratherum* Nees ex Steudel; *Arundinella ecklonii* Nees; *Arundinella glabra* Nees; *Arundinella miliacea* (Link) Nees; *Arundinella miliacea* (Link) Druce, nom. illeg., non *Arundinella miliacea* (Link) Nees; *Arundinella ritchei* Munro ex Lisboa; *Arundinella virgata* Janowski) (after the Danish botanist Christian Friedrich (Frederik) Ecklon, 1795-1868, apothecary and botanical collector, traveler, sent plants to Bentham (1835), author of *Topographisches Verzeichniss der Pflanzensammlung von C.F. Ecklon*. Esslingen 1827 and "A list of plants found in the district of Uitenhage between the months of July 1829 and February 1830." *S. Afr. Quart. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. Oxford 1964; Günther Schmid, *Chamisso als Naturforscher*. Eine Bibliographie. Leipzig 1942)

Tropical Africa, China, India, South Africa. Perennial, very variable, woody, tough, coarse, tufted, unbranched or branched, erect, shortly rhizomatous with scaly rhizomes, hard rootstock, forming spreading patches, reedlike, ligule short and densely ciliate, leaves usually linear to oblong and glabrous to hirsute, inflorescence a contracted oblong purple panicle with straight ascending racemes, spikelets lanceolate, 2 florets, lower floret male or sterile, female-fertile floret with awned lemma, lower glume ovate and acuminate, lower lemma obtuse, upper lemma hardened and brownish, no bristles at the base of the awn, palea with doorlike germination flaps, eaten by cattle in time of scarcity, little forage value, browsed before anthesis, unpalatable when in seed or dry, ornamental ground cover, useful for erosion control, windbreak and shelter for the wildlife, may become a nuisance, used to make a lotion for washing wounds, sometimes used as thatching grass, grows in dry

woodland and grassland, wet grassland, marshes and margins of marshes, damp places, in vleis, moist areas and along stream banks, ponds and dams, on riverbanks and moist grasslands, savannah, see *De Graminibus Panicis* 62. 1826, *Hortus Regius Botanicus Berolinensis* 1: 230. 1827, *The Botany of Captain Beechey's Voyage* 237. 1837, *Nomenclator Botanicus* edition 2 1: 143. 1840, *Florae Africae Australioris Illustrationes Monographicae* 80. 1841, *Hooker's Journal of Botany and Kew Garden Miscellany* 2: 102. 1850, *Journal of the Bombay Natural History Society* 5: 343. 1890 and *Botanical Exchange Club of the British Isles. Asia, India, Sri Lanka. Perennial, stiff, erect, base bulbous and woolly, narrow panicle, glumes acuminate, along roadsides, see *Syn. Pl. Glumac.* 1: 115. 1854, *The Flora of British India* 7(21): 73. 1897 [1896] and *Handb. Fl. Ceylon* 5: 178. 1900, *Grasses of Ceylon* 98. 1956, *Grasses of Burma* ... 426. 1960.

Arundo L. = *Amphidonax* Nees, *Amphidonax* Nees ex Lindl., *Donacium* Fries, *Donax* P. Beauv., *Eudonax* Fries, *Scolochloa* Mert. & Koch

From the Latin *arundo*, *dinis* (*harundo*) "a reed, cane."

About 3-12 species, from Mediterranean region to China. Arundinoideae, Arundineae, perennial, robust, erect, in large tall clumps, sometimes almost woody, persistent, robust, thick and stout, creeping thick and knotty rhizomes, flowering culms leafy, glabrous nodes, hollow internodes, branched, ligule a fringed membrane, sheath ribbed or smooth, leaves alternate and glaucous, leaves linear-lanceolate to lanceolate to oblong-lanceolate, plants bisexual, large inflorescence paniculate and open, feathery plume-like terminal panicle, fascicled lower branches, spikelets pedicellate and solitary, uppermost flower reduced or usually empty or all flowers perfect, 2 large glumes keeled and more or less equal, lemma hairy to villous and awned, female-fertile lemmas densely hairy, callus shortly hairy, 2 free fleshy glabrous lodicules irregularly toothed, 3 stamens, ovary glabrous, 2 stigmas, weed species, native pasture species, invasive, several cultivars cultivated as ornamentals, can be grown as a windbreak screen, highly flammable, leaves made into matting and baskets, occurring in riversides and in ditches, riparian habitats, in poor sandy soil, along riverbanks and wet places, pampas, on sand dunes near seashores, type *Arundo donax* L., see *Species Plantarum* 1: 81-82. 1753, *Genera Plantarum*. edition 5. 35. 1754, *Familles des Plantes* 2: 34, 559. 1763, *Essai d'une Nouvelle Agrostographie* 77-78, 152, 161. 1812, *J. Gaudin) (Greek *donax*, *donakos* for a kind of reed)

Mediterranean. Perennial, semiaquatic, large, erect, tall, woody, vigorous, thick, quick growing, rhizomatous, stems forming clumps and dense monotypic stands, roots extensive, large root systems, creeping horizontal rhizomes, ligule papery and truncate, leaf sheaths hairy at base, leaves stiff with an auriculate base, glaucous and arching distichous leaves, very large compact inflorescence, feathery plume-like inflorescences, florets in large branched panicles, dense and silky-hairy panicle, spikelets pedicellate and

solitary, glumes subequal and glabrous, long pilose to pubescent lemmas, palea 2-nerved, cultivated, medicinal value, native pasture species, browsed only the young leaves, unpalatable when old, can form dense floating mats in streams and rivers, forming large colonies, strong winds tolerant, invasive and quite aggressive, useful for erosion control, ornamental, stems used for light construction work and for making woodwind reeds, windbreaks, pipe instruments, reed for clarinets, walking sticks and fishing rods, a source of paper pulp, a decoction of rhizomes said to stimulate menstrual discharge, growing in damp places and along riverbanks, riparian habitats, floodplains, hillsides, moist disturbed places, in coastal areas, along roadsides, marshes, on sand dunes near seashores, along irrigation ditches and waste places, open forest, on edge of streams and ponds, along lakeshore, streams, see *Species Plantarum* 1: 81. 1753, *Amoenitates Academicae* ... 4: 450. 1759, *The Gardeners Dictionary: ... eighth edition* 3. 1768, *Flore de France* 3: 616. 1778, *Observationes Botanicae* 4: 21. 1786, *Observationes Botanicae* 5: 20. 1789, *Prodromus stirpium in horto ad Chapel Allerton vigentium*. 24. Arundoclaytonia Davidse & R.P. Ellis

Named for W.D. Clayton, British agrostologist.

One species, Brazil. Arundinoideae, Steyermarkochloaeae, or Panicoideae, Steyermarkochloaeae, perennial, tufted, plants monoecious, ligule a fringed membrane, 2 glumes very unequal, male florets 2-staminate, palea present, lodicules absent, no stamens, ovary glabrous, 2 stigmas, open habitats, type *Arundoclaytonia dissimilis* Davidse & R.P. Ellis, see *Annals of the Missouri Botanical Garden* 74(3): 479-490. 1987, *Contributions from the United States National Herbarium* 46: 115. 2003.

Species

A. dissimilis

Brazil.

Asperella Humb. = *Asperella* Juss., *Elymus* L., *Hystrix* Moench

Diminutive of the Latin *asper, era, erum* "rough," referring to the leaves.

Pooideae, Triticeae, Hordeinae, type *Asperella hystrix* (L.) Humb., see *Species Plantarum* 1: 83-84. 1753, *Botanisches Magazin (Römer & Usteri)* 7: 5. 1790, *Methodus Plantas Horti Botanici ...* 294-295. 1794, *Dictionnaire des Sciences Naturelles* 3: 214. 1804 [1805] and *Amer. J. Bot.* 21: 133-134. 1934, *Canad. J. Bot.* 42: 554. 1964, *Taxon* 41: 562-563. 1992, *Taxon* 44: 611-612. 1995, *Contributions from the United States National Herbarium* 48: 279-307. 2003.

Asperella Juss. = *Leersia* Sw., *Leersia* Sol. ex Sw.

Ehrhartoideae, Oryzeae, Oryzinae, see *Nova Genera et Species Plantarum seu Prodrum* 1, 21. 1788, *Dictionnaire des Sciences Naturelles* 3: 214. 1804 [1805] and *Contributions from the United States National Herbarium* 39: 64-67. 2000.

Asprella Host = *Psilurus* Trin.

Latin *asper, era, erum* "rough."

Type *Asprella nardiformis* Host, see *Icones et Descriptiones Graminum Austriacorum* 4: 17. 1809, *Fundamenta Agrostographiae* 93. 1820.

Asprella Schreber = *Leersia* Sw., *Leersia* Sol. ex Sw.

From the Latin *asper, era, erum* "rough."

Ehrhartoideae, Oryzeae, Oryzinae, see *Nova Genera et Species Plantarum seu Prodromus* 1, 21. 1788, Johann Christian Daniel von Schreber (1739-1810), *Genera Plantarum*. 45. 1789 and *Contributions from the United States National Herbarium* 39: 64-67. 2000.

Asprella Willd. = *Elymus* L.

Pooideae, Triticeae, Hordeinae, see *Species Plantarum* 1: 83-84. 1753, *Enumeratio Plantarum Horti Botanici Bero-linensis*, ... 1: 132. 1809 and *Canad. J. Bot.* 42: 554. 1964, *Taxon* 41: 562-563. 1992, *Taxon* 44: 611-612. 1995, *Contributions from the United States National Herbarium* 48: 279-307. 2003.

Aspris Adans. = *Aira* L.

Latin *asper, era, erum* "rough, bitter, harsh."

Pooideae, Poeae, Airinae, see *Species Plantarum* 1: 63-66. 1753, *Familles des Plantes* 2: 496. 1763, *Icones et Descriptiones Graminum Austriacorum* 4: 20, t. 35. 1809 and *An Illustrated Flora of the Northern United States* 1: 214-215. 1913, *United States Department of Agriculture: Bulletin* 772: 116. 1920, *Amer. J. Bot.* 21: 135. 1934, *Taxon* 41: 556. 1992, *Taxon* 44: 611-612. 1995, *Contributions from the United States National Herbarium* 48: 89-96. 2003.

Asthenatherum Nevski = *Centropodia* Rchb., *Centropodia* (R. Br.) Reichenbach

Greek *asthenes* "weak, feeble" and *ather, atheros* "barb, spine," see *Narrative of Travels and Discoveries in Northern and Central Africa* 244. 1826, *Conspectus Regni Vegetabilis* 212a. 1828 and *Senck. Biol.* 43(4): 239-266. 1962, *Kew Bulletin* 37(4): 657-659. 1982, T.A. Cope, "Centropodia: an earlier name for *Asthenatherum* (Gramineae)." *Kew Bulletin* 37(4): 657-659. 1983, *Bothalia* 15(1/2): 153-159. 1984, *Flora of Ethiopia and Eritrea* 7: 73. 1995.

Asthenochloa Büse = *Garnotiella* Stapf

From the Greek *asthenes* "weak, feeble" and *chloe, chloa* "grass."

One species, Indonesia, Southeast Asia. Panicoideae, Andropogonodae, Andropogoneae, Andropogoninae, annual or perennial, decumbent, herbaceous, slender, branched, plants bisexual, open inflorescence paniculate, spikelets paired, lower floret suppressed, pedicellate spikelets reduced to barren pedicels, 2 glumes subequal, keeled upper glume, lower glume convex, upper lemma bilobed and awned, palea and lodicules absent, 2 stamens, ovary glabrous, 2 stigmas, in damp ground, type *Asthenochloa*

tenera Büse, see *Voyage Autour du Monde* 2(2): 132-133, pl. 21. 1830, *Plantae Junghuhnianae* 3: 367, 368. 1854, *Hooker's Icones Plantarum* 25: t. 2494. 1896 and *Kew Bulletin* 27: 515-562. 1972.

Species

A. tenera Büse (*Garnotia leptos* (Steudel) Stapf; *Garnotia philippinensis* Stapf)

Indonesia. See *Bulletin of Miscellaneous Information Kew* 1910: 302. 1910.

Astrebla F. Muell. = *Astrebla* F. Muell. ex Benth., *Astrebla* Benth.

Straight awned, from the Greek *a* "without, not" and *streblos* "twisted," referring to the straight awns; *Astrebla* spp. were first discovered near Bourke in New South Wales by the explorer, Sir Thomas Livingstone Mitchell, in 1835.

4 species, subtropical areas of Australia. Chloridoideae, perennial or annual, coarse, caespitose and forming a tussock grassland, xerophytic, adapted to a harsh environment, leafy, deep rooted and long-lived grassland, tough rootstock, short stout thick branched and scaly rhizomes, stems jointed and erect, herbaceous and branched above, glabrous nodes, solid internodes, ligule a fringe of hairs or a ciliate rim, leaves narrow, no auricles, plants bisexual, inflorescence a single spike or a spike-like raceme, spikelets sessile or nearly so, bisexual and solitary spikelets, 2-9 florets and the uppermost often reduced, 2 glumes subequal acute and persistent, lemmas silky-hairy and 3-lobed, untwisted awn, palea 2-keeled with keels ciliate, 2 free and fleshy lodicules, 3 stamens, ovary glabrous, 2 stigmas, produce abundant nutritious seeds, cultivated fodder, forage grasses, native pasture species, all species palatable and acceptable to stock, low in nutritive value, loses much of its nutritive value with age, normally continuously grazed, growth responses are determined by rainfall, extraordinary resistance to drought and continuous grazing, tolerant of mild salinity, plants do not break up when dry, no toxicity has been reported, useful for erosion control, common in dry areas, floodplains, alluvial plains, on relatively fertile cracking clay soils, on shallow clays on limestones, subtropical areas of Australia, arid and semiarid inland plains, on the heavy gray clays, on heavy soils, heavy clay soils, downs and coolibah clay soils in drier areas, open habitats, common on the black and red soils in the interior of New South Wales, Queensland and the Northern Territory, nomenclature very confused, see George Benthams (1800-1884), *Flora Australiensis*. 7: 602. 1878, F.M. Bailey (1827-1915), *A Few Queensland Grasses*, with short notes, range of each species, etc., etc. Brisbane 1888 and *Bull. Misc. Inform. Kew* 1928: 257-266. 1928, *Austral. J. Bot.* 17: 359-374. 1969, *Austral. Ecology* 26(4): 338-348. Aug 2001, *Journal*

of *Applied Ecology* 38(5): 897-909. Oct 2001, Ian J. Radford, Mike Nicholas, Fleur Tiver, Joel Brown and Darren Kriticos, "Seedling establishment, mortality, tree growth rates and vigour of *Acacia nilotica* in different *Astrebla* grassland habitats: Implications for invasion." *Austral. Ecology* vol. 27, issue 3: 258-268. June 2002, *Austral. Ecology* vol. 27, issue 6: 706-713. Dec 2002, *Austral. Ecology* 28(3): 227-236. June 2003, *Austral. Ecology* 28(4): 423-443. Aug 2003, *Austral. Ecology* 29(1): 51-58. Feb 2004, *Australian Journal of Entomology* 43(3): 216-234, 293-303. July 2004, *Physiologia Plantarum* 121(3): 409-420. July 2004, Qing Liu, Nan-Xian Zhao, Gang Hao, Xiao-Ying Hu and Yun-Xiao Liu, "Caryopsis morphology of the Chloridoideae (Gramineae) and its systematic implications." *Botanical Journal of the Linnean Society* 148(1): 57-72. May 2005, *Flora of Australia* vol. 44B, Poaceae 3: 452-457. 2005.

Species

A. elymoides F. Muell. ex F.M. Bailey

Northern Territory, Queensland, New South Wales. Perennial, tufted, erect, tussock grass with a thickened hairless butt, stems branched and bluish green, leaves flat and narrow, leafy tussocks, narrow inflorescences, recurved mature flowering culms, spikelets or racemes slender and curved or drooping to the ground, weeping seed-heads long and narrow, spikelets solitary distant or loosely imbricate, glumes often deciduous, lemmas shortly villous at the base, palea lanceolate, cleistogamy, a decreaser species, moderately palatable and nutritious when young, grazed, growing in alluvial areas, heavy cracking gray clay soils, in wetter or heavily grazed areas, on heavy self-mulching clays, see *A Few Queensland Grasses*, with short notes, range of each species, etc., etc. Brisbane 1888.

in English: hoop Mitchell grass, weeping Mitchell grass, weeping Mitchell, slender Mitchell

A. lappacea (Lindley) Domin (*Astrebla pectinata* var. *curvifolia* F.M. Bailey; *Astrebla triticoides* (Lindley) F. Muell.; *Astrebla triticoides* (Lindl.) F. Muell. ex Benth.; *Danthonia lappacea* Lindley; *Danthonia triticoides* Lindley)

Western Australia, Queensland, Northern Territory, New South Wales. Perennial, densely tufted, with stout rhizomes and a thickened butt, numerous wiry roots, stems jointed, bluish green or glaucous leaves, inflorescence a long narrow spike-like raceme, wavy backed seed heads, spikelets loosely imbricate and alternate, each floret ends in three long and bristle-like lobes, glumes acuminate and unequal, lemma villous on the back, broad lateral lemma lobes, short awn, bristly seeds, cleistogamy, cultivated fodder, very nutritious, drought resistant and very tolerant of grazing, recommended for sowing, growing on heavy clay and clay loam soils of river floodplains, on deep cracking clays in arid zones, arid open areas, degraded pastures, sometimes grows on sandy alluvium, see *Three Expeditions into the*

Interior of Eastern Australia 1: 309. 1838, *Journal of an Expedition into the Interior of Tropical Australia* 365. 1848 and *Bibliotheca Botanica* 85: 372, f. 86. 1915, Oula Ghanoum et al., "Nonstomatal limitations are responsible for drought-induced photosynthetic inhibition in four C4 grasses." *New Phytologist* 159(3): 599-608. Sep 2003, K. Siebke et al. "Photosynthetic oxygen exchange in C4 grasses: the role of oxygen as electron acceptor." *Plant, Cell and Environment* vol. 26, issue 12: 1963-1972. Dec 2003. in English: curly Mitchell grass, wheat Mitchell, wheat Mitchell grass

A. pectinata (Lindley) F. Muell. ex Benth. (*Astrebla pectinata* (Lindl.) F. Muell.; *Astrebla pectinata* (Lindl.) Benth.; *Danthonia pectinata* Lindley)

South Australia, Western Australia, Northern Territory, Queensland, New South Wales. Short-lived perennial or annual, vigorous tussock grass, tufted, leafy, bluish green, compact, erect and smooth, short rhizome, butt and rhizome hairless often knotty and covered with reduced and sparsely hairy leaves, stems many branched or unbranched, leaves flat and basal with long tapering points, cleistogamy common, a barley-like seed head short and straight, spikelets closely packed together or densely imbricate along the entire raceme, flower heads compact, glumes acute, lemma villous on the back, straight and conspicuous awn, the relatively large seeds are easily separated from the chaff, ornamental, decreaser species, drought-resistant or tolerant, heavy stocking resistant, useful for erosion control, very palatable when green, pasture grass, good fodder, food for wild budgerigars, dominant in arid and drier areas, on slight cracking clays, red clays, very similar to curly Mitchell *Astrebla lappacea* (Lindley) Domin, see *Three Expeditions into the Interior of Eastern Australia* 2: 26. 1838, *Dept. Agr. Brisbane Bot. Bull.* 13: 15. 1896 [also *Bot. Bull. Dept. Agric., Queensland*] and *The Queensland Flora* 6: 1897, t. 82. 1902 [Printed by H.J. Diddams & co., 1899-1902. Published under the authority of the Queensland government.]. in English: barley Mitchell grass, barley Mitchell, Mitchell grass, common Mitchell

A. squarrosa C.E. Hubbard

Western Australia, Northern Territory, Queensland, New South Wales. Perennial, large, compact, leafy, tufted, butt densely coated with persistent leaf sheaths, culms erect from a short rhizome, stems strong and prominent, spikelet or raceme quite dense to loose, spikelets closely imbricate and 3- to 9-flowered, glumes acuminate, lemma 3-lobed and densely silky-villous, lobes of the lemma with hooked awns, palea elliptic, seed heads dense and large, usually dominant in the wetter northern Mitchell grasslands and is least palatable and nutritious, on water run-on areas, see *Bulletin of Miscellaneous Information Kew* 1928(7): 259-261. 1928.

in English: bull Mitchell grass, wheateared Mitchell grass, tall Mitchell grass

Ataxia R. Br. = *Anthoxanthum* L., *Hierochloa* R. Br.

Greek *ataxia* “disorder, confusion, irregularity, indiscipline,” *a* “negative, absence” and *taxis* “a series, order, arrangement.”

Pooideae, Poaceae, Phalaridinae, type *Ataxia horsfieldii* Kunth, see *Species Plantarum* 1: 28. 1753, *Prodromus Florae Novae Hollandiae* 208. 1810, *Essai d'une Nouvelle Agrostographie* 62, 164, t. 12, f. 5. 1812, *Chloris Melvilliana* 35. 1823, *Révision des Graminées* 1: 22. 1829 and *Regnum Veg.* 127: 19. 1993, *Contributions from the United States National Herbarium* 48: 111-115, 123, 384-387. 2003.

Athernotus Dulac = *Calamagrostis* Adans.

From the Greek *ather*, *atheros* “barb, spine, chaff, prickle” and *notos* “back.”

Pooideae, Poaceae, Agrostidinae, see *Familles des Plantes* 2: 31, 530. 1763, *Tentamen Florae Germanicae* 1: 34. 1788, *Flore de Département des Hautes-Pyrénées* 74. 1867 and *Contributions from the United States National Herbarium* 48: 123, 191-227. 2003.

Atherophora Steud. = *Aegopogon* Humb. & Bonpl. ex Willd.

From the Greek *ather*, *atheros* “barb, spine, chaff, prickle” and *phoros* “bearing, carrying,” *phero*, *phoreo* “to bear.”

Chloridoideae, Cynodonteae, Muhlenbergiinae, type *Hymenothecium tenellum* (Cav. ex DC.) Lag., see *Species Plantarum. Editio quarta* 4(2): 899. 1805 [1806], *Genera et species plantarum* 4. 1816, *Nomenclator Botanicus. Editio secunda* 1: 167. 1840 and *Contributions from the United States National Herbarium* 41: 9-11. 2001.

Atheropogon Willd. = *Atheropogon* Muhl. ex Willd., *Bouteloua* Hornem. ex P. Beauv., *Bouteloua* Lag.

From the Greek *ather*, *atheros* “barb, spine, chaff, prickle” and *pogon* “beard.”

Chloridoideae, Cynodonteae, Boutelouinae, type *Atheropogon apludioides* Muhl. ex Willd., see *Varietades de Ciencias, Literatura y Artes* 2(4,21): 134, 141. 1805, *Species Plantarum. Editio quarta* 4(2): 937. 1805 [1806], *Essai d'une Nouvelle Agrostographie* 40. 1812, *Gen. Sp. Nov.* 5. 1816, *A Manual of the Botany of the Northern United States. Second Edition* 553. 1856, *Genera Plantarum* 3(2):

1168-1169. 1883 and *Contributions from the United States National Herbarium* 41: 20-33. 2001.

Athrolophis (Trin.) Chiov. = *Andropogon* L.

From the Greek *athroos* “crowded, crowded together” and *lophos* “a crest, back of the neck, ridge, tuft.”

Panicoideae, Andropogoneae, Andropogoninae, see *Species Plantarum* 2: 1045-1046. 1753, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 2(3): 268. 1832 and *Bolletino della Società Botanica Italiana* 1917: 57. 1917, *Fl. Trop. E. Afr. Gramineae* 770. 1982, *Taxon* 41: 556. 1992, *Taxon* 44: 611-612. 1995, *Contributions from the United States National Herbarium* 46: 20-64. 2003.

Athroostachys Benth. = *Achroostachys* Benth.

Crowded spike, from the Greek *athroos* “crowded, crowded together” and *stachys* “a spike.”

One species, South America, Brazil. Bambusoideae, Bambusoideae, Bambuseae, or Bambusoideae, Bambuseae, Arthrostylidiinae, perennial, sympodial, arching, scrambler, vining, scandent, climbing, woody, nearly solid, unarmed, branched, clumped, hollow, leaf blades pseudopetiolate, rhizomes pachymorph, plants bisexual, inflorescence compound and short-stalked, spikelets with 1 fertile floret and 1 sterile or rudimentary, racemes in globose head with branchlets subtended by small bracts, 2 glumes unequal, palea present, 3 free lodicules, 3 stamens, ovary glabrous, 2 stigmas, lowland forests, type *Athroostachys capitata* (Hook.) Benth., see *Journal de Physique, de Chimie, d'Histoire Naturelle et des Arts* 95: 151. 1822, *Transactions of the Linnean Society of London* 26(1): 50. 1868, *J. Linn. Soc. Bot.* 19: 134. 1881, *Genera Plantarum* 3: 1208-1209. 1883 and F.A. McClure, “Genera of bamboos native to the New World (Gramineae: Bambusoideae).” *Smithsonian Contributions to Botany* 9: 1-148. 1973, *Annals of the Missouri Botanical Garden* 74(2): 424-428. 1987, *Thaiszia* 3: 53-88. 1993, *American Bamboos* 160-162. 1999, *Bamboo Science & Culture: The Journal of the American Bamboo Society* 14(1): 1-3. 2000, *Contributions from the United States National Herbarium* 39: 25. 2000.

Species

A. capitata (Hooker) Benth. (*Chusquea fimbriata* Steud.; *Chusquea glomerata* Munro; *Merostachys capitata* Hook.; *Merostachys capitata* var. *angustifolia* Döll; *Merostachys capitata* var. *capitata*)

Eastern Brazil. Shortly rhizomatous, condensed inflorescence capitate, see *Icones Plantarum* 3: t. 273, 274. 1840,

Synopsis Plantarum Glumacearum 1: 338. 1854, *Flora Brasiliensis* 2(3): 217. 1880, *Genera Plantarum* 3: 1209. 1883.

Atractantha McClure

From the Greek *atraktos* “a spindle” and *anthos* “flower,” referring to the inflorescence, to the slender pseudospikelets.

About 2-5/10 species, South America, eastern Brazil. Bambusoideae, Bambuseae, Arthrotyliidiinae, or Bambusoideae, Bambusodae, Bambuseae, perennial, woody, unarmed, sympodial, erect, decumbent, arching, scandent, vining, climber, pendulous, hanging down, solid, branched, narrow sheaths or bracts together in a globose head, ligule an unfringed membrane, leaf blades deciduous or persistent, short rhizomes pachymorph, plants bisexual, inflorescence capitate or racemose, usually pseudospikelets, spikelets solitary, 1-flowered, pungent and needle-like florets, rachilla extension, glumes absent, lemma thorn-like and convolute, palea present, 3 free and fleshy lodicules, 3 stamens, ovary hairy, 2 or rarely 3 stigmas, forming clumps, forest, riverine, coastal, rain forest, sandy soils, edge of rivers, low forest, humid forest, similar to *Alvimia*, type *Atractantha radiata* McClure, see *Smithsonian Contributions to Botany* 9: 42, 50, f. 21-23. 1973, *Novon* 1(2): 76-87. 1991, *Annals of the Missouri Botanical Garden* 79(1): 160-183. 1992 [A revision of *Atractantha* (Poaceae: Bambusoideae: Bambuseae).], *American Bamboos* 162-165. 1999, *Contributions from the United States National Herbarium* 39: 25. 2000.

Species

A. amazonica Judz. & L.G. Clark

Venezuela, Brazil. Leaf blades erect and persistent, true spikelets, see *Novon* 1(2): 78, f. 2. 1991.

A. aureolanata Judz.

Brazil, Bahia.

A. cardinalis Judz.

Brazil, Bahia.

A. falcata McClure

Brazil, Bahia. See *Smithsonian Contributions to Botany* 9: 48, f. 21. 1973.

A. radiata McClure

Brazil, Bahia. Very small leaf blades, condensed inflorescence capitate, see *Smithsonian Contributions to Botany* 9: 50, f. 22-23. 1973.

Atractocarpa Franchet = *Puelia* Franch.

From the Greek *atraktos* “a spindle” and *karpos* “fruit.”

Bambuseae, type *Atractocarpa olyrififormis* Franch., see *Bulletin Mensuel de la Société Linnéenne de Paris* 1:

674-675, 676. 1887, *Conspectus Florae Africae* 5: 945. 1894 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 30(1): 124-125. 1901, *Kew Bulletin* 20: 273. 1966, *Hooker's Icones Plantarum* 37: t. 3642. 1967, *Fl. Trop. E. Afr. Gramin.* 1: 15. 1970.

Atropis (Trinius) Grisebach = *Atropis* (Trin.) Rupr. ex Griseb., *Atropis* Rupr., *Puccinellia* Parl.

From the Greek *a* “lacking” and *tropis* “ship, keel.”

Poaceae, see *Prodromus Florae Novae Hollandiae* 179. 1810, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 4,2(1): 68. 1836, *Beiträge zur Pflanzenkunde des Russischen Reiches* 2: 64. 1845, *Flora italiana, ossia descrizione delle piante ...* 1: 366-367, 370. 1848, *Flora Rossica* 4(13): 388. 1852, *Genera Plantarum* 3(2): 1198. 1883 and *Flora URSS* 2: 470. 1934, N.L. Bor (1893-1972), *Flora Iranica: Gramineae* 70: 62. Graz 1970, *Zlakii SSSR* 500. 1976, *Contributions from the United States National Herbarium* 48: 591-601. 2003.

Aulacolepis Hackel = *Aniselytron* Merr., *Aulacolepis* Ettingsh. (Pinaceae), *Calamagrostis* Adans.

Greek *aulax*, *aulakos* “a furrow” and *lepis* “a scale.”

Aveneae, type *Aulacolepis treutleri* (Kuntze) Hack., see *Familles des Plantes* 2: 31, 530. 1763, *Tentamen Florae Germanicae* 1: 34. 1788, *Sitzungsberichte der kaiserlichen Akademie der Wissenschaften. Wien. Mathematisch-naturwissenschaftlichen Classe. Abteilung I* 102: 135, 147. 1893, *Transactions of the Linnean Society of London, Botany* 4: 247, t. 20c, 10-16. 1894, *Hooker's Icones Plantarum* 27: sub t. 2607. 1899 and *Repertorium Specierum Novarum Regni Vegetabilis* 3(42-43): 241-244. 1906 [1907], *Philippine Journal of Science* 5: 328-330. 1910, *Brittonia* 2(2): 117. 1936, *Indian Forester* 107(7): 434. 1981, H.M. Korthof and J.F. Veldkamp, “A revision of *Aniselytron* with some new combinations in *Deyeuxia* in SE. Asia (Gramineae).” *The Gardens' Bulletin Singapore* 37(2): 213-223. 1984.

Aulaxanthus Elliott = *Anthaenantia* P. Beauv., *Anthenantia* P. Beauv.

Greek *aulax*, *aulakos*, *alox*, *alokos* “a furrow” and *anthos* “flower.”

Panicoideae, Paniceae, Paspalinae, type *Aulaxanthus ciliatus* Elliott, see *Essai d'une Nouvelle Agrostographie* 48,

151, t. 10, f. 7. 1812, *A Sketch of the Botany of South-Carolina and Georgia* 1(2): 102-103. 1816, *Mantissa* 2: 258. 1824, *Révision des Graminées* 1: 35. 1829, *Memorie della Reale Accademia delle Scienze dell'Istituto di Bologna* 2: 596, t. 41, f. 1. 1850 and *Contributions from the United States National Herbarium* 46: 65-66. 2003.

Aulaxia Nutt. = *Anthaenantia* P. Beauv.,
Anthenantia P. Beauv., *Aulaxanthus* Elliott

Greek *aulax*, *aulakos*, *alox*, *alokos* “a furrow.”

Panicoideae, Paniceae, Paspalinae, see *A Sketch of the Botany of South-Carolina and Georgia* 1(2): 102-103. 1816, *Genera Plantarum* 1: 47-48. 1818 and *Contributions from the United States National Herbarium* 46: 65-66. 2003.

Aulonemia Goudot = *Matudacalamus*
Maekawa

Greek *aulos* “a tube, flute” and *nemos* “wooded pasture, glade, a grove,” some suggest from *nema* “thread, filament.”

About 24-34 species, Mexico to Bolivia, Brazil. Bambusoideae, Bambuseae, Arthrostylidiinae, or Bambusoideae, Bambusodae, Bambuseae, perennial, sympodial, unarmed, erect, hollow or solid, bushy or scrambling, scandent, climbing over the low vegetation, woody, rather succulent, caespitose, viscid band at nodes, slender internodes, clump-forming, leaf blades pseudopetiolate and not coriaceous, rhizomes pachymorph, plants bisexual, inflorescence an open panicle, glumes 2-3, lemmas often or sometimes awned, palea present, 3 free lodicules, 3 stamens, ovary glabrous, 2 stigmas, savannah, in grassy páramo, boggy areas of páramo, tropical forests, on cliffs, open forest, margins of swampy places, type *Aulonemia queko* Goudot, see *Annales des Sciences Naturelles; Botanique*, sér. 3 5: 75-76. 1846 and *Journal of Japanese Botany* 36(10): 343-345. 1961, *Smithsonian Contributions to Botany* 9: 1-148. 1973, *Annals of the Missouri Botanical Garden* 72(4): 864-873. 1985, *Brittonia* 40: 22-31. 1988, *Annals of the Missouri Botanical Garden* 77(2): 353-358. 1990, *Novon* 1(2): 76-87. 1991, *Novon* 2(2): 81-110. 1992, *American Journal of Botany* 79(4): 478-480. 1992, *Flora Mesoamericana* 6: 198-199. 1994, *Brittonia* 49(4): 503-507. 1997, *American Bamboos* 165-172. 1999, *Contributions from the United States National Herbarium* 39: 25-29. 2000, *Botanical Journal of the Linnean Society* 138(1): 45-55. Jan 2002 [Cauline anatomy of native woody bamboos in Argentina and neighbouring areas: epidermis].

Species

A. amplissima (Nees) McClure (*Arthrostylidium amplissimum* (Nees) McClure; *Arundinaria amplissima* Nees)

Brazil. See *Linnaea* 9(4): 479. 1834 and *Fieldiana Bot.* 28(1): 33. 1951.

A. aristulata (Döll) McClure (*Arundinaria aristulata* (Döll) McClure; *Arundinaria aristulata* Döll; *Arundinaria mucronata* Munro ex E.G. Camus; *Sieglingia aristulata* (Döll) Kuntze)

Brazil. See *Flora Brasiliensis* 2(3): 165, pl. 44. 1880 and *Smithsonian Contributions to Botany* 9: 56. 1973.

A. bogotensis L.G. Clark

Colombia. See *Brittonia* 49(4): 504, f. 1. 1997.

A. boliviana Renvoize

Bolivia. Bushy or scrambling, scandent, climbing over the low vegetation, open inflorescence, spikelets linear, glumes oblong to ovate, lemmas lanceolate, moist woods, forest, see *Gramíneas de Bolivia* 39, f. 3A. 1998.

A. chimantaensis Judz. & Davidse

Venezuela. See *Novon* 1(2): 80, f. 3G-J. 1991.

A. clarkiae Davidse & R.W. Pohl (for the agrostologist Lynn G. Clark, b. 1956)

Mexico. See *Novon* 2(2): 84, f. 2. 1992.

A. deflexa (N.E. Br.) McClure (*Arthrostylidium steyermarkii* McClure; *Arundinaria deflexa* N.E. Br.; *Aulonemia steyermarkii* (McClure) McClure) (for to the American botanist Julian Alfred Steyermark, 1909-1988, botanical explorer, specialist on Rubiaceae, traveler, with Paul C. Standley curator of the *Flora of Guatemala*. [Fieldiana, Botany, vol. 24, etc.] Published by Chicago Natural History Museum; see J.A. Steyermark & collaborators, “Botanical Exploration in Venezuela.” in *Fieldiana, Bot.* 1951-1952; T.W. Bossert, compil., *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 383. 1972; J.H. Barnhart, *Biographical notes upon botanists*. 3: 330. 1965; S. Lenley et al., *Catalog of the manuscript and archival collections and index to the correspondence of John Torrey*. Library of the New York Botanical Garden. 388. 1973; Stafleu & Cowan, *Taxonomic literature*. 5: 925-926. 1985)

Venezuela, Guyana. See *Trans. Linn. Soc. London, Bot.* 6(1): 75. 1901, *Fieldiana, Botany* 28(1): 31, f. 3. 1951, *Smithsonian Contributions to Botany* 9: 56, 61. 1973.

A. effusa (Hack.) McClure (*Arthrostylidium effusum* (Hack.) McClure; *Arundinaria effusa* Hack.; *Arundinaria glaziovii* Hack.; *Aulonemia aristulata* (Döll) McClure; *Aulonemia glaziovii* (Hack.) McClure)

Brazil. See *Flora Brasiliensis* 2(3): 165, pl. 44. 1880 and *Österreichische Botanische Zeitschrift* 53(2): 71-72. 1903, *Fieldiana, Botany* 28(1): 31. 1951, *Smithsonian Contributions to Botany* 9: 56. 1973.

A. fulgor Soderstr.

Mexico. See *Brittonia* 40(1): 22, f. 1b, 2. 1988.

- A. glaziovii** (Hack.) McClure (*Arundinaria glaziovii* Hack.; *Arundinaria glaziovii* var. *glaziovii*) (for the French botanist Auguste François Marie Glaziou, 1828-1906, traveler, plant collector in Brazil, author of "Plantae Brasiliae centralis a Glaziou lecta. Liste des plantes du Brésil Central recueillies en 1861-1895." in *Mém. Soc. Bot. France*. 1(3): 1-661. 1905-1913, collaborator of Antoine L.A. Fée (1789-1874) for *Cryptogames vasculaires du Brésil* ... avec le concours ... de ... F.M.G. Strasbourg 1869. See J.H. Barnhart, *Biographical notes upon botanists*. 2: 54. 1965; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 145. 1972; I. Urban, *Geschichte des Königlichen Botanischen Museums zu Berlin-Dahlem (1815-1913). Nebst Aufzählung seiner Sammlungen*. 1916; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. 715. Stuttgart 1993; D. de Andrade Lima, "Plantas das Caatingas." *Academia Brasileira de Ciências*, Rio de Janeiro. 218-219. 1989; Raymond M. Harley, "Plant Diversity: Kew's Role in North-east Brazil." *The Kew Magazine*. vol. 9. 3: 103-116. Genast, *Etymologisches Wörterbuch der botanischen Pflanzennamen*. 667. 1996; August Weberbauer (1871-1948), *Die Pflanzenwelt der peruanischen Andes in ihren Grundzügen dargestellt*. Leipzig 1911; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. Philadelphia 1964)

Brazil. See *Österreichische Botanische Zeitschrift* 53(2): 75. 1903, *Flora Illustrada Catarinense* 1(GRAM-Supl.): 57, t. 10, f. j-r. 1967.

A. viscosa (Hitche.) McClure (*Arundinaria viscosa* Hitche.)

Venezuela, Costa Rica. See *Proc. Biol. Soc. Wash.* 40: 79. 1927, *Smithsonian Contributions to Botany* 9: 61. 1973.

Australopyrum (Tzvelev) Á. Löve = Agropyron Gaertn.

From the Latin *australis* "southern" and Greek *pyros* "grain, wheat," a small genus from Eastern Australia; in *Feddes Rept.* 95: 442. 1984.

About 5 species, Australia, New Zealand, New Guinea. Pooideae, Triticoideae, Triticeae, or Pooideae, Triticeae, Hordeinae, perennial, caespitose, herbaceous, unbranched, erect, stiff, leaf sheath hairy, ligule membranous and lacerate, auricles clasping, leaf blade softly pubescent and erect, plants bisexual, chasmogamous or cleistogamous, inflorescence a single spike-like raceme or a dense spike, spikelets solitary and spreading, spikelet shortly pedicelled, 2 unequal glumes persistent and rigid, hairy or glabrous

glumes more or less sharply reflexed outward and downward, lemmas pointed and awned, palea apically notched and awnless, 2 lodicules ciliate or glabrous, 3 stamens, ovary hairy with hairy apical corona, 2 stigmas, formerly included in and sometimes referred to *Agropyron* Gaertner, sometimes included in *Agropyron* Gaertn., see *Novi Commentarii Academiae Scientiarum Imperialis Petropolitanae* 14(1): 539-540. 1770 and *Willdenowia* 5: 473. 1969, *Novosti Sist. Vyss. Rast.* 10: 35. 1973, *Feddes Repertorium* 95(7-8): 442-443. 1984, *Pl. Syst. Evol.* 166: 159-171. 1989, J.F. Veldkamp & H.J. van Scheindelen, "Australopyrum, Brachypodium, and Elymus (Gramineae) in Malesia." *Blumea* 34: 61-76. 1989, H.E. Connor, B.P. Molloy, M.I. Dawson, "Australopyrum (Triticeae: Gramineae) in New Zealand." in *New Zealand Journal of Botany* 31: 1-10. 1993, *Bot. Rev.* 59: 273-343. 1993, *Genome* 36: 147-151. 1993, H.E. Connor, "Indigenous New Zealand Triticeae: Gramineae." in *New Zealand Journal of Botany* 32: 125-154. 1994, *Syst. Bot.* 21: 321-347. 1996, *Phytologia* 83(5): 345-365. 1997, *Bot. Rev.* 64: 372-417. 1998, *Flora of New Zealand* 5: 378-383. 2000, *Contributions from the United States National Herbarium* 48: 25-42. 2003.

Species

A. calcis Connor & Molloy

New Zealand. Perennial, tufted, slender, geniculate and decumbent, stoloniferous, ligule lacerate, leaf sheath more or less glabrous or hairy, auricles clasping, short spike-like raceme, see *New Zealand Journal of Botany* 31(1): 2, f. 1-2. 1993 and 32: 37-51. 1994.

in English: limestone wheatgrass

A. calcis Connor & Molloy subsp. *calcis*

New Zealand. Stout, rachis glabrous, limestone wheat grass, confined to limestone ecosystems, rare and endangered grass, grows in partial shade, unpalatable to grazing animals, see B.P. Molloy, "Observations on the ecology and conservation of *Australopyrum calcis* (Triticeae: Gramineae) in New Zealand." in *N.Z. J. Bot.* 32(1): 37-51. 1994.

in English: limestone wheat grass

A. calcis Connor & Molloy subsp. *optatum* Connor & Molloy

New Zealand. Rachis hairy, vulnerable grass, unpalatable to grazing animals, see *New Zealand Journal of Botany* 31(1): 4, f. 2, 4. 1993.

in English: limestone wheat grass

A. pectinatum (Labill.) Á. Löve (*Agropyron brownei* (Kunth) Tzvelev; *Agropyron pectinatum* (Labill.) P. Beauv.; *Agropyron retrofractum* Vickery; *Australopyrum retrofractum* (Vickery) Á. Löve; *Eremopyrum brownei* (Kunth) Candargy; *Festuca pectinata* Labill.; *Triticum brownei* Kunth;

Triticum pectinatum (Labill.) R. Br.; *Vulpia pectinata* (Labill.) Nees)

Australia, Victoria, New South Wales, Tasmania. Perennial, erect or geniculate at the base, tufted, slender, smooth and glabrous to coarse and hairy, compact, culm internodes hairy, leaf sheath villous, auricles present, ligule hyaline to membranous, leaf blade involute or flat, inflorescence a single spike to a raceme to a spike-like raceme, cleistogamous and distichous spikelets divaricate or spreading, lower spikelets pointed downward, glumes more or less equal and coriaceous, florets and sharp glumes reflexed and pungent-pointed, lemma keeled, palea narrowly ovate to narrowly elliptic, 2 lodicules free and hyaline, fruit obovoid and slightly dorsiventrally compressed, alpine and subalpine, growing in alpine heaths, high elevations, subalpine subhumid grasslands, on swampy lands, temperate wet sclerophyll forests, see *Novae Hollandiae Plantarum Specimen* 1: 21, t. 25. 1805, *Essai d'une Nouvelle Agrostographie* 102, 146, 180. 1812 and *Contributions from the New South Wales National Herbarium* 1(6): 340. 1951, *Taxon* 34(2): 86. 1983, *Feddes Repertorium* 95(7-8): 443. 1984.

in English: comb wheatgrass, wheatgrass

A. retrofractum (Vickery) Á. Löve (*Agropyron retrofractum* Vickery; *Australopyrum pectinatum* (Labill.) Á. Löve subsp. *retrofractum* (Vickery) Á. Löve)

Victoria, New South Wales, Tasmania. Perennial, spiny, coarse, erect or ascending and geniculate at the base, loosely tufted, culm internodes glabrous, leaf sheath pilose, auricles present and clasping, ligule truncate to erose, leaves stiff, erect and dense single spike with cleistogamous spikelets stiff and distichous, florets appressed to rachis, rachis with retrorse hairs, glumes subequal and reflexed with short pungent awns, lemmas lanceolate, ciliate palea narrowly ovate to narrowly elliptic and membranous to chartaceous, fruit compressed, unpalatable, alpine grass, found in rocky slopes, alpine herbfields, black cracking clay, grasslands, lowland, temperate subhumid grassland, see *Novae Hollandiae Plantarum Specimen* 1: 21, t. 25. 1805, *Hooker's Journal of Botany and Kew Garden Miscellany* 2: 417. 1843 and *N.Z. J. Agric.* 3: 1-8. 1911, *New Zealand DSIR Bull.* 49. 1936, *New Zealand DSIR Bull.* 83. 1940, *Contributions from the New South Wales National Herbarium* 1(6): 340. 1951, *Taxon* 34(2): 86. 1983, *Feddes Repertorium* 95(7-8): 443. 1984, *Telopea* 3: 601-603. 1990.

A. uncinatum Veldkamp

Papua New Guinea, Asia tropical. See *Blumea* 34(1): 67, f. 1a. 1989.

A. velutinum (Nees) B.K. Simon (*Agropyron velutinum* Nees; *Australopyrum retrofractum* (Vickery) Á. Löve subsp. *velutinum* (Nees) Á. Löve)

Australia, Victoria, Victorian Alps, New South Wales, Kosciuszko National Park, Tasmania. Perennial, erect, tufted, smooth and glabrous, auricles present and short,

ligule membranous and truncate, leaf blade scabrous or densely hirsute, a single spike to a raceme, greenish chasmogamous spikelets, glumes acuminate and reflexed, lemmas with awnlike points, palea 2-keeled, fruit obovoid to oblong and ventrally compressed, rare species, alpine and subalpine, humid grassland, high plains, alpine herbfields, high altitudes, snowy flats, see *Hooker's Journal of Botany and Kew Garden Miscellany* 2: 417. 1843 and *Feddes Repertorium* 95(7-8): 443. 1984, *Austrobaileya* 2(3): 238-242. 1986.

in English: mountain wheatgrass, velvet wheatgrass

Austrochloris Lazarides

A genus from Australia, Queensland, Latin *australis* "southern" plus *Chloris* Swartz.

One species, Australia. Chloridoideae, perennial, herbaceous, tufted, leaf blades linear, auricles absent, ligule a ciliate membrane, plants bisexual, racemes digitate, spikelets dorsally compressed and solitary, 1 bisexual floret, 2 glumes narrow and divergent, upper glume deciduous and acuminate, 1 fertile floret, lemma sterile cuneate, fertile lemma awned and acute, palea present, 2 free and fleshy lodicules, 3 stamens, ovary glabrous, 2 stigmas, open habitats, savannah, type *Austrochloris dichanthioides* (Everist) Lazarides, see *Nova Genera et Species Plantarum seu Prodromus* 1, 25. 1788 and *Australian Journal of Botany. Supplementary Series*. 5: 1-51. (Nov) 1972, D.E. Anderson, "Taxonomy of the genus *Chloris* (Gramineae)." *Brigham Young University Science Bulletin: Biological Series* 19(2): 1-133. 1974, *Contributions from the United States National Herbarium* 41: 39-52. 2001.

Species

A. dichanthioides (Everist) Lazarides (*Chloris dichanthioides* Everist)

Queensland. See *Queensland Agricultural Journal* 49(5): 432, t. 155. 1938, *Australian Journal of Botany, Supplementary Series* 5: 35. 1972.

Austrodanthonia H.P. Linder

From the Latin *australis* (*auster* "the south wind, the south") "southern" and the genus *Danthonia* DC., referring to the southern species; sometimes referred to *Danthonia* s.l., *Rytidosperma* s.l., *Notodanthonia* s.l., *Thonandia* superfluous, *Austrodanthonia* proposed.

A genus of 28 species, New Zealand, Australia and New Guinea. Arundinoideae, or Danthonioideae, Danthonieae, perennial, caespitose, herbaceous, erect, rarely decumbent, ligule a fringe of hairs, culm leaves absent, solid internodes, leaf blades linear-lanceolate, auricles absent, plants bisexual, inflorescence spicate or paniculate, large callus, 2

glumes more or less equal, lemmas smooth, lemma indumentum more or less tufted, palea present, 2 fleshy and free lodicules, 3 stamens, ovary glabrous, 2 stigmas, valuable native pasture species, tolerant of heavy grazing and drought, open habitats, some species adapted to acid soils, very similar to *Notodanthonia*, *Joycea*, *Rytidosperma* and *Karroochloa*, type *Austrodanthonia caespitosa* (Gaudich.) H.P. Linder, see *Flore Française. Troisième Édition* 3: 32. 1805, *Synopsis Plantarum Glumacearum* 1: 425. 1854 and *New Zealand Journal of Botany* 1: 104, 122. 1963, S.T. Blake, "*Plinthanthesis* and *Danthonia* and a review of the Australian species of *Leptochloa* (Gramineae)." *Contributions from the Queensland Herbarium* 14: 3. 1972, H.P. Linder & G.A. Species

A. acerosa (Vickery) H.P. Linder (*Danthonia acerosa* Vickery; *Notodanthonia acerosa* (Vickery) Veldkamp; *Rytidosperma acerosa* (Vickery) Connor & Edgar; *Rytidosperma acerosum* (Vickery) Connor & Edgar)

Australia. Perennial, tufted, see *Contributions from the New South Wales National Herbarium* 1: 296. 1950, *New Zealand Journal of Botany* 17(3): 331. 1979, *Taxon* 29: 296. 1980.

A. alpicola (Vickery) H.P. Linder (*Danthonia alpicola* Vickery; *Danthonia semiannularis* var. *alpina* Benth.; *Notodanthonia alpicola* (Vickery) Veldkamp; *Rytidosperma alpicola* (Vickery) Connor & Edgar; *Rytidosperma alpicolum* (Vickery) Connor & Edgar)

New South Wales, Victoria, Tasmania. Perennial, tufted, erect, small or dwarf, somewhat prickly, leaves stiff and rigid and almost pungent-pointed, culms geniculate at the nodes, dense panicle, spikelets crowded and hairy, 4-6 florets, glumes subequal, long exerted awns, grows at high altitude, rocky areas, pot specimen, see *Flora Australiensis: A Description ...* 7: 595. 1878 and *Contributions from the New South Wales National Herbarium* 1: 297. 1950, *Contr. New South Wales Natl. Herbarium* 2: 300. 1956, *New Zealand Journal of Botany* 17(3): 331. 1979, *Taxon* 29: 296. 1980.

in English: crab wallaby-grass, crag wallaby-grass, alpine grass

A. auriculata (J.M. Black) H.P. Linder (*Danthonia auriculata* J.M. Black; *Notodanthonia auriculata* (J.M. Black) Zotov; *Rytidosperma auriculatum* (J.M. Black) Connor & Edgar)

South Australia, Victoria, New South Wales. Perennial, erect and slender, tufted or caespitose, sometimes geniculate at the base, leaves flat or inrolled, leaf blades fine and pilose, compact inflorescence ovate to oblong, dense panicle much exserted sometimes reduced to a raceme, spikelets circa 6-flowered, glumes much longer than the florets, natural pastures, usually on loamy or clay soils, see *Transactions and Proceedings of the Royal Society of South Australia* 53: 261. 1929, *Contr. New South Wales Natl. Herbarium* 2: 309. 1956, *New Zealand Journal of Botany* 1: 113. 1963, *New Zealand Journal of Botany* 17(3): 322. 1979.

in English: lobed wallaby-grass

A. biannularis (Zotov) H.P. Linder (*Notodanthonia biannularis* Zotov; *Rytidosperma biannulare* (Zotov) Connor & Edgar)

New Zealand. See *New Zealand Journal of Botany* 1: 116. 1963, *New Zealand Journal of Botany* 17(3): 324. 1979.

A. bipartita (Link) H.P. Linder (*Avena bipartita* Link; *Danthonia linkii* Kunth; *Notodanthonia bipartita* (Link) Veldkamp; *Notodanthonia linkii* (Kunth) H.P. Linder; *Rytidosperma linkii* Connor & Edgar; *Rytidosperma linkii* (Kunth) Connor & Edgar)

Victoria, South Australia, Queensland, New South Wales. Perennial, densely caespitose, erect, variable, leaf blade flat to loosely or closely involute, panicle spreading or contracted, spikelets 6-flowered, glumes subequal with membranous margins, lemma body hairy, grows on heavy clay or loamy soils, see *Hortus Regius Botanicus Berolinensis* 1: 113. 1827, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 315. 1833 and *Taxon* 29: 296. 1980, *Telopea* 6(4): 616. 1996, *New Zealand Journal of Botany* 17(3): 332. 1979.

A. bonthainica (Jansen) H.P. Linder (*Danthonia bonthainica* (Jansen) Veldkamp; *Danthonia pilosa* var. *bonthainica* Jansen; *Notodanthonia bonthainica* (Jansen) H.P. Linder; *Notodanthonia penicillata* subsp. *bonthainica* (Jansen) Veldkamp; *Rytidosperma bonthainicum* (Jansen) Veldkamp) (Bonthain Bay, southeast of Makassar, Sulawesi (formerly Celebes). The *Swallow*, of Captain Carteret, reached the Strait of Macassar (14/11/1767), and then sailed to Macassar on Sulawesi (15/12/1767), and then on to Bonthain (21/12/1767), where they spent some five months recuperating and trying to make the *Swallow* seaworthy. Philip Carteret, (circumnavigator, born in Jersey (Channel Islands) on 22 January 1733, died at Southampton on 21 July 1796, voyager, sailed as First Lieutenant of the *Tamar*

(later transferred to the *Dolphin*) in John Byron's voyage of discovery round the world 1764-1766, commanded the sloop *Swallow* in Samuel Wallis's expedition round the world 1766, in 1777 commanded the *Druid* for an expedition to the West Indies, he discovered and named Pitcairn, Queen Charlotte's Islands, Vanikoro, Ndai, Kilinailau Islands (Carteret Islands), Buka, Admiralty Islands, etc. See John Byron (1723-1786), *A Journal of a Voyage round the World in ... Dolphin*. London 1767; H. Carrington, editor, *The Discovery of Tahiti: A Journal of the Second Voyage of HMS Dolphin under the command of Captain Wallis RN*. London 1948, R.E. Gallagher, editor, *Byron's Journal of His Circumnavigation 1764-1766*. Cambridge 1964; John Dunmore, *Who's Who in Pacific Navigation*. 48-50. Honolulu 1991; John Hawkesworth (c. 1715-1773), *An Account of the Voyages ... by Commander Byron, Captain Wallis, Captain Carteret and Captain Cook*. London 1773; H. Wallis, editor, *Carteret's Voyage Round the World 1766-1769*. Cambridge 1965; [John Barrow], *A Description of Pitcairn's Island and its Inhabitants, with an Authentic Account of the Mutiny of the Ship Bounty and of the Subsequent Fortunes of the Mutineers*. J. & J. Harper, New York 1833)

Asia, Indonesia. See *Prodromus Florae Novae Hollandiae* 177. 1810 and *Reinwardtia* 2(2): 258. 1953, *Taxon* 29(2-3): 298. 1980, *Blumea* 38(1): 217. 1993, *Telopea* 6(4): 615. 1996, *Telopea* 7(3): 270. 1997, *Reinwardtia* 12(2): 139. 2004.

A. caespitosa (Gaudich.) H.P. Linder (*Danthonia caespitosa* Gaudich.; *Notodanthonia caespitosa* (Gaudich.) Zotov; *Danthonia semiannularis* sensu J. Black, non (Labill.) R. Br.; *Rytidosperma caespitosum* (Gaudich.) Connor & Edgar)

Australia. Perennial, slender to robust, decorative, tufted, forming dense tussocks, erect, leaf sheaths densely hairy, hirsute to glabrous flat or involute leaves, inflorescences compact and bristled, soft panicles exserted and linear-lanceolate to lanceolate, spikelets pale and light green, 4-9 florets, glumes subequal with membranous margins, lemma with hairy callus, native pasture grass, very variable and highly palatable, useful in the drier regions, can withstand heavy grazing, see *Voyage autour du Monde, entrepris par Ordre du Roi, ... exécuté sur les Corvettes de S. M. l'Uranie et la Physicienne ... Botanique* 4: 408. 1826 and *New Zealand Journal of Botany* 1: 117. 1963, *New Zealand Journal of Botany* 17(3): 325. 1979.

in English: common wallaby-grass, white top, ringed wallaby-grass

A. carphoides (Benth.) H.P. Linder (*Austrodanthonia carphoides* (F. Muell. ex Benth.) H.P. Linder; *Danthonia carphoides* F. Muell. ex Benth.; *Notodanthonia carphoides* (Benth.) Zotov; *Notodanthonia carphoides* (F. Muell. ex Benth.) Zotov; *Rytidosperma carphoides* (Benth.) Connor

& Edgar; *Rytidosperma carphoides* (F. Muell. ex Benth.) Connor & Edgar)

New South Wales, Victoria, Tasmania, South Australia. Perennial, very hardy, shortly tufted, small, erect or geniculate at the nodes, leaves filiform and usually inrolled, scabrous and hairy, panicle or raceme dense and ovoid, greenish to purple spikelets on very short pedicels, 3-5 florets, lemma pilose on the back, grows in grassland or woodland, on heavy soils, see *Flora Australiensis: A Description ...* 7: 592. 1878 and *Contr. N.S.W. Herb.* 2: 277. 1956, *New Zealand Journal of Botany* 1: 113. 1963, *New Zealand Journal of Botany* 17(3): 331. 1979.

in English: short wallaby-grass

A. clavata (Zotov) H.P. Linder (*Notodanthonia clavata* Zotov; *Rytidosperma clavatum* (Zotov) Connor & Edgar)

New Zealand. See *New Zealand Journal of Botany* 1: 119. 1963, *New Zealand Journal of Botany* 17(3): 326. 1979.

A. diemenica (D.I. Morris) H.P. Linder (*Danthonia diemenica* D.I. Morris; *Notodanthonia diemenica* (D.I. Morris) H.P. Linder)

Australia, Tasmania. See *Muelleria* 7(2): 153-155, f. 5b, 6. 1989, *Telopea* 6(4): 616. 1996.

A. duttoniana (Cashmore) H.P. Linder (*Danthonia duttoniana* Cashmore; *Notodanthonia duttoniana* (Cashmore) Veldkamp; *Rytidosperma duttonianum* (Cashmore) Connor & Edgar) (species dedicated to the German-born Hon. Francis Staker Dutton, 1816-1877, in 1840s to Australia, Commissioner for Crown Lands in South Australia and Premier, algae collector, wrote *Constitution fuer Suedaustralien*. Im 13 und 14 Regierungsjahre Ihrer Majestaet der Koenigin Victoria. Gesetz zur bessern Regierung der australischen Colonien Ihrer Majestaet. Adelaide 1900 and *South Australia and its Mines*; with an historical sketch of the colony, under its several administrations, to the period of Captain Grey's departure. London 1846; see F. von Mueller, in *Linnaea*. 25: 409. 1853 and *Transactions and Proceedings of the Victorian Institute for the Advancement of Science*. 40. 1855)

South Australia, Victoria, New South Wales. Perennial, robust, stout, densely tufted, forming tussocks, erect, erect, very leafy, culms smooth and shining, sheaths smooth, leaves firm and green to glaucous with blunt apices, panicle finally exserted and oblong to ovate with numerous and clustered spikelets, 5-8 florets, body of the lemma golden brown, central awn strong, anthers orange, pasture species, ornamental, palatable and nutritious feed, clay soils, on poorly drained soils, see *Contr. New South Wales Herb.* 2(3): 304. 1956, *New Zealand Journal of Botany* 17: 332. 1979, *Taxon* 29: 296. 1980.

in English: brown-back wallaby-grass

A. eriantha (Lindl.) H.P. Linder (*Danthonia eriantha* Lindl.; *Notodanthonia eriantha* (Lindl.) Veldkamp; *Rytidosperma erianthum* (Lindley) Connor & Edgar)

Australia. Perennial, erect, densely tufted, sheaths slender and glabrous or hairy, leaves fine and strongly inrolled, culms slender and smooth, inflorescences hairy and loosely compact or contracted, panicle finally much exserted and lanceolate to ovate, panicle branches pilose or pubescent, greenish 4- to 8-flowered spikelets, glumes subequal and longer than the florets, lemma lanceolate, central awn twisted, anthers yellow, ornamental, very hardy, dry conditions, grows in open woodland and plains, native pasture species, grazing species, see *Three Expeditions into the Interior of Eastern Australia* 2: 304. 1838 and *New Zealand Journal of Botany* 17(3): 323. 1979, *Taxon* 29: 296. 1980.

in English: wallaby-grass, woolly wallaby-grass

A. fulva (Vickery) H.P. Linder (*Danthonia linkii* Kunth var. *fulva* Vickery; *Danthonia semiannularis* (Labill.) R. Br. var. *browniana* Domin; *Notodanthonia bipartita* var. *fulva* (Vickery) Veldkamp; *Notodanthonia fulva* (Vickery) H.P. Linder; *Rytidosperma linkii* (Kunth) Connor & Edgar var. *fulvum* (Vickery) Connor & Edgar) (named after the German botanist Johann Heinrich Friedrich Link, 1767-1851, philosopher, medical doctor, traveler, from 1815 to 1851 professor of botany at Berlin, plant collector, his works include *Enumeratio plantarum horti regii berlinensis altera*. Berolini [Berlin] 1821-1822 and *Elementa philosophiae botanicae*. Berolini 1824; see J.H. Barnhart, *Biographical notes upon botanists*. 2: 388. 1965; M. Colmeiro y Penido, *La Botánica y los Botánicos de la Peninsula Hispano-Lusitana*. Madrid 1858)

South Australia, Victoria, New South Wales. Perennial, densely tufted, erect, very leafy, leaves flat or involute, culms smooth and slender, spikelets pale and crowded, glumes with an acuminate tip, lemma lanceolate, hairy callus, central awn brown and twisted, anthers pale, pasture grass, ornamental, see *Contributions from the New South Wales National Herbarium* 1: 299. 1950, *New Zealand Journal of Botany* 17(3): 332. 1979, *Taxon* 29: 296. 1980, *Telopea* 6(4): 616. 1996, Ian Cole, Jean Metcalfe and Terry Koen, "The effect of removing seed from florets on germination and field establishment in a Wallaby Grass (*Austroanthonia fulva*) accession." *Ecological Management and Restoration* vol. 5, issue 2: 134-136. Aug 2004.

in English: wallaby-grass, Link's wallaby-grass

A. geniculata (J.M. Black) H.P. Linder (*Danthonia geniculata* J.M. Black; *Notodanthonia geniculata* (J.M. Black) Zotov; *Rytidosperma geniculatum* (J.M. Black) Connor & Edgar)

South Australia, Victoria, Tasmania. Perennial, very slender, erect, tufted, often geniculate near the base, leaves filiform and inrolled, panicle dense and ovoid to oblong, spikelets pale and crowded, the central awn geniculate from the base

and loosely twisted, coastal and near-coastal regions, a graceful species, see *Transactions and Proceedings of the Royal Society of South Australia* 53: 261. 1929, *Contr. New South Wales Natl. Herb.* 2: 279. 1956, *New Zealand Journal of Botany* 1: 114. 1963, *New Zealand Journal of Botany* 17(3): 323. 1979.

in English: kneed wallaby-grass

A. *induta* (Vickery) H.P. Linder (*Danthonia induta* Vickery; *Notodanthonia induta* (Vickery) Veldkamp; *Rytidosperma indutum* (Vickery) Connor & Edgar) (Latin *induo, ui, utum, ere* “to put on an article of dress or ornament,” *indutus* “apparel”)

Victoria, New South Wales, Queensland. Perennial, caespitose, ornamental, robust, vigorous, forming erect tussocks, leaf blade flat to loosely inrolled, culms thick and smooth, panicle loose and spreading with numerous spikelets mostly 3-flowered, glumes subequal and longer than the florets, palea membranous, anthers orange-yellowish, moist soils, rocky hillsides, in eucalypt forest, see *Contributions from the New South Wales National Herbarium* 1(5): 298. 1950, *New Zealand Journal of Botany* 17(3): 332. 1979, *Taxon* 29: 296. 1980.

in English: wallaby-grass

A. *laevis* (Vickery) H.P. Linder (*Danthonia laevis* Vickery; *Notodanthonia laevis* (Vick.) Zotov; *Rytidosperma laevis* (Vick.) Connor & Edgar)

South Australia, Victoria, New South Wales, Tasmania. Perennial, densely caespitose, decorative, erect, forming small tussocks, leaves fine and inrolled rigid and pointed, short panicle much exserted, inflorescence loosely racemose or paniculate, spikelets 4- to 6-flowered greenish and white, florets rather divergent, glumes subequal and longer than the florets, lemma lanceolate to fusiform, grows in open woodland and grassland, in dry areas, see *Contributions from the New South Wales National Herbarium* 1(5): 299. 1950, *New Zealand Journal of Botany* 1: 117. 1963, *New Zealand Journal of Botany* 17(3): 325. 1979.

in English: wallaby-grass, smooth wallaby-grass

A. *mera* (Connor & Edgar) H.P. Linder (*Notodanthonia mera* (Connor & Edgar) H.P. Linder; *Rytidosperma merum* Connor & Edgar)

New Zealand. See *New Zealand Journal of Botany* 17(3): 328, f. 3. 1979, *Telopea* 6(4): 616. 1996.

A. *monticola* (Vickery) H.P. Linder (*Danthonia monticola* Vickery; *Notodanthonia monticola* (Vickery) Veldkamp; *Rytidosperma monticola* (Vickery) Connor & Edgar; *Rytidosperma monticulum* (Vickery) Connor & Edgar)

Victoria, Tasmania, New South Wales. Perennial, densely caespitose, erect, leaf blade inrolled-setaceous and hirsute, spikelets 4- to 6-flowered often purplish, florets much shorter than the glumes, glumes subequal with purplish margins, lemma with 2 rows of hairs, sometimes a weed,

grows on sandy soils, in exposed or disturbed sites, granitic soils, see *Contributions from the New South Wales National Herbarium* 1(5): 299. 1950, *New Zealand Journal of Botany* 17(3): 332. 1979, *Taxon* 29: 296. 1980, *Telopea* 7(3): 272. 1997.

A. *occidentalis* (Vickery) H.P. Linder (*Danthonia occidentalis* Vickery; *Notodanthonia occidentalis* (Vickery) Veldkamp; *Rytidosperma occidentale* (Vickery) Connor & Edgar)

Australia. See *Contributions from the New South Wales National Herbarium* 1(5): 300. 1950, *New Zealand Journal of Botany* 17(3): 332. 1979, *Taxon* 29: 297. 1980.

A. *oreophila* (H.P. Linder & N.G. Walsh) H.P. Linder (*Notodanthonia oreophila* (H.P. Linder & N.G. Walsh) H.P. Linder; *Rytidosperma oreophilum* H.P. Linder & N.G. Walsh) (from the Greek *oros* “mountain” and *philos* “lover, loving”)

Australia. Caespitose, see *Muelleria* 8(3): 283. 1995, *Telopea* 6(4): 616. 1996.

A. *penicillata* (Labill.) H.P. Linder (*Arundo penicillata* Labill.; *Danthonia penicillata* (Labill.) Muell., nom. illeg., non *Danthonia penicillata* (Labill.) R. Br. ex P. Beauv.; *Danthonia penicillata* (Labill.) P. Beauv.; *Danthonia racemosa* var. *penicillata* (Labill.) Benth.; *Notodanthonia penicillata* (Labill.) Zotov; *Rytidosperma penicillatum* (Labill.) Connor & Edgar) (from the Latin *penicillum, i* “a pencil, a painter’s brush”)

Tasmania, Victoria, New South Wales. Perennial, erect, slender, loosely tufted, forming open and straggly tussocks, leaf blade hairy or glabrous, leaves flat and narrow, culms very slender and shortly pubescent, inflorescence subracemose and not crowded, panicle sparse and hairy, spikelets purplish 4- to 7-flowered, palea lanceolate, glumes subequal with narrow membranous margins, lemma slender, central awn twisted and brown, palea lanceolate, shade species, grows in grassland and open woodland, moist soils, often on slopes, forest, see *Novae Hollandiae Plantarum Specimen* 1: 26, t. 34. 1804, *Essai d’une Nouvelle Agrostographie* 92, 153, 160. 1812, *Fragmenta Phytographiae Australiae* 8: 135. 1873, *Flora Australiensis: A Description ...* 7: 594. 1878 and *New Zealand Journal of Botany* 1: 122. 1963, *New Zealand Journal of Botany* 17(3): 327. 1979.

in Australia: slender wallaby-grass

A. *pilosa* (R. Br.) H.P. Linder (*Danthonia penicillata* var. *pilosa* (R. Br.) Rodway; *Danthonia penicillata* var. *pilosa* (R. Br.) F. Muell. ex Maiden & Betche; *Danthonia pilosa* R. Br.; *Notodanthonia pilosa* (R. Br.) Zotov; *Rytidosperma pilosum* (R. Br.) Connor & Edgar)

South Australia, Victoria, New South Wales, Tasmania, Western Australia, Queensland, New Zealand. Perennial, tufted, erect or geniculate, slender tussocks forming, hairy leaves flat or inrolled, panicle exserted, spikelets crowded

and often overlapping in a short panicle, 6-9 florets, glumes subequal, purple awns, central awn twisted in the lower part, palea oblanceolate, hairy callus, ornamental, useful pasture grass, quite palatable, widespread, various habitats, see *Prodromus Florae Novae Hollandiae* 177. 1810 and *A Census of New South Wales Plants* 22. 1916, *New Zealand Journal of Botany* 1: 118. 1963, *New Zealand Journal of Botany* 17(3): 326. 1979.

in English: hairy oat grass, velvet wallaby-grass, purple-awned wallaby-grass, smooth-flowered wallaby-grass

A. popinensis (D.I. Morris) H.P. Linder (*Danthonia popinensis* D.I. Morris; *Notodanthonia popinensis* (D.I. Morris) H.P. Linder)

Tasmania. Endangered species, see *Muelleria* 7(2): 157-159, f. 8b, 9. 1989, *Telopea* 6(4): 616. 1996.

A. racemosa (R. Br.) H.P. Linder (*Danthonia penicillata* var. *racemosa* (R. Br.) Rodway; *Danthonia penicillata* var. *racemosa* (R. Br.) F. Muell. ex Maiden & Betche; *Danthonia racemosa* R. Br.; *Notodanthonia racemosa* (R. Br.) Zotov; *Rytidosperma racemosum* (R. Br.) Connor & Edgar)

New South Wales, South Australia, Queensland, Victoria, Tasmania, New Zealand. Perennial, tufted, forming slender tussocks, erect or straggling, slender, variable, narrow leaves flat or inrolled, panicles much exerted and racemose, clusters of spikelets, 6-10 florets, glumes subequal with membranous margins, lemma linear to lanceolate, hairy callus, central awn basally twisted, useful pasture grass, extremely variable, ornamental, grows in grassland or woodland, see *Prodromus Florae Novae Hollandiae* 177. 1810, *Flora Australiensis: A Description ...* 7: 594. 1878 and *A Census of New South Wales Plants* 22. 1916, *New Zealand Journal of Botany* 1: 121. 1963, *New Zealand Journal of Botany* 17(3): 327. 1979.

in Australia: wallaby-grass

A. racemosa (R. Br.) H.P. Linder var. **obtusata** (Benth.) H.P. Linder (*Austrodanthonia racemosa* (R. Br.) H.P. Linder var. *obtusata* (F. Muell. ex Benth.) H.P. Linder; *Danthonia racemosa* var. *obtusata* Benth.; *Danthonia racemosa* var. *obtusata* F. Muell. ex Benth.; *Notodanthonia racemosa* var. *obtusata* (Benth.) Veldkamp; *Notodanthonia racemosa* var. *obtusata* (F. Muell. ex Benth.) Veldkamp; *Rytidosperma racemosum* var. *obtusatum* (Benth.) Connor & Edgar; *Rytidosperma racemosum* var. *obtusatum* (F. Muell. ex Benth.) Connor & Edgar)

Queensland, New South Wales. Lateral lobes of the lemma obtuse or truncate, see *Flora Australiensis: A Description ...* 7: 594. 1878 and *New Zealand Journal of Botany* 17(3): 332. 1979, *Taxon* 29: 297. 1980.

A. racemosa (R. Br.) H.P. Linder var. **racemosa**

Queensland.

A. remota (D.I. Morris) H.P. Linder (*Danthonia remota* D.I. Morris; *Notodanthonia remota* (D.I. Morris) H.P. Linder)

Tasmania. Rare species, see *Muelleria* 7(2): 160-162, f. 10, 11a. 1989, *Telopea* 6(4): 617. 1996.

A. richardsonii (Cashmore) H.P. Linder (*Danthonia richardsonii* Cashmore; *Notodanthonia richardsonii* (Cashmore) Veldkamp; *Rytidosperma richardsonii* (Cashmore) Connor & Edgar) (after M. Richardson)

South Australia, New South Wales, Queensland, Victoria, Tasmania. Perennial, leafy, robust, erect, densely tufted or caespitose, forming large tussocks, leaves acuminate and smooth, culms stout and erect, inflorescence lanceolate to ovate, dense and exerted panicle much branched, spikelets pale green, florets closely packed, glumes subequal, densely hairy callus, central awn fine and twisted, common in natural pastures, fodder grass, palatable and nutritious feed, eaten by stock, ornamental, in dry areas, useful plant for revegetation of roadsides, see *Trans. & Proc. Roy. Soc. S. Austral.* 57: 72. 1933, *New Zealand Journal of Botany* 17(3): 332. 1979, *Taxon* 29: 297. 1980.

in English: wallaby-grass

A. setacea (R. Br.) H.P. Linder (*Danthonia penicillata* var. *setacea* (R. Br.) J.M. Black; *Danthonia penicillata* var. *setacea* (R. Br.) Rodway; *Danthonia setacea* R. Br.; *Notodanthonia setacea* (R. Br.) Veldkamp; *Rytidosperma setaceum* (R. Br.) Connor & Edgar) (from the Latin *saeta* (*seta*), *ae* "a bristle, hair")

South Australia, Tasmania, Victoria, New South Wales, Queensland, Western Australia. Perennial, erect and slender, densely tufted, leaves setaceous and filiform, culms geniculate at the base, slender panicles crowded and narrow-oblong or linear-to lanceolate, hairy panicle usually contracted, silvery 4- to 10-flowered spikelets, florets closely packed, glumes subequal, awns slender and shortly exerted, central awn twisted at the base, lemmas long-mucronate and with narrow lobes, hairy callus, extremely hardy and drought resistant, pasture grass, ornamental, this widespread and common species often confused with *Austrodanthonia caespitosa* (Gaudich.) H.P. Linder (*Danthonia caespitosa* Gaudich.), often growing with *Austrodanthonia caespitosa* (Gaudich.) H.P. Linder and *Austrodanthonia eriantha* (Lindl.) H.P. Linder (*Danthonia eriantha* Lindl.), see *Prodromus Florae Novae Hollandiae* 177. 1810 and *Tasmanian Fl.* 267. 1903, *Flora South Australia (edition 2)* 73. 1922, *New Zealand Journal of Botany* 17(3): 332. 1979, *Taxon* 29: 297. 1980.

in English: small-flowered wallaby-grass

A. tenuior (Steud.) H.P. Linder (*Danthonia purpurascens* Vickery; *Danthonia tenuior* (Steud.) Conert; *Notodanthonia purpurascens* (Vickery) Zotov; *Notodanthonia tenuior* (Steudel) S.T. Blake; *Plinthanthesis tenuior* Steudel; *Rytidosperma tenuius* (Steud.) O.E. Erikss., Alfred Hansen & P. Sunding; *Rytidosperma tenuius* (Steudel) Connor & Edgar, nom. illeg., non *Rytidosperma tenuius* (Steud.) O.E. Erikss., A. Hansen & Sunding)

New South Wales, South Australia, Queensland, Victoria, Tasmania. Perennial, erect, tufted, leaves glabrous to hirsute, panicle much exerted lanceolate to ovate usually with numerous spikelets, 4-6 florets, glumes subequal with purplish margins and much longer than the florets, lemma lanceolate, palea oblong-elliptic, hairy callus, central awn twisted in the lower part, grows in dry sclerophyll forest on sandy soils, see *Synopsis Plantarum Glumacearum* 1: 14. 1855 [1853] and *Contributions from the Queensland Herbarium* 14: 3. 1972, *Senckenbergiana Biologica* 56: 163. 1975, *Flora of Macaronesia: Checklist of Vascular Plants (2nd revised edition)* 1: 93. Botanical Garden and Museum, University of Oslo, Oslo 1979, *New Zealand Journal of Botany* 17(3): 324. 1979.

in English: wallaby-grass

Austrofestuca (Tzvel.) E.B. Alexeev = *Festucella* E.B. Alexeev, *Hookerchloa* E.B. Alexeev, *Schedonorus* P. Beauv.

Latin *australis* "southern" plus *Festuca* L., a genus from Australia and New Zealand segregated from *Festuca* L.

About 2-4 species, Australia and New Zealand. Pooideae, Poodae, Poeae, perennial, tufted, tussock forming, rhizomatous and caespitose, herbaceous, unbranched, unarmed, halophytic, leaves mostly basal, culm nodes glabrous exposed or hidden by the leaf sheaths, internodes hollow, auricles present or absent, leaf sheaths terete and open, ligule membranous and unfringed, leaves linear and flat, plants bisexual, panicle open or contracted almost spike-like, rachilla hairy, inflorescence of chasmogamous spikelets, spikelets solitary, bisexual florets several, uppermost floret reduced, vestigial foliar structure subtending the inflorescence present or absent, glumes nerved, lemma leathery and keeled, palea awnless and 2-keeled with wingless keels, 2 hairy lodicules free and toothed, 3 stamens, ovary glabrous, stigmas plumose white, small fruit grooved and compressed, open habitats, inland woodland, littoral sand, dunes, coastal sand dunes, a difficult genus commonly included in *Festuca*, type *Austrofestuca littoralis* (Labill.) E.B. Alexeev, see *Species Plantarum* 1: 73-76. 1753, *Novae Hollandiae Plantarum Specimen* 1: 22, t. 27. 1804[1805] and *Bot. Zhurn. (Moscow & Leningrad)* 56(9): 1257. 1971, *New Zealand Journal of Botany* 24: 425-503. 1986, *New Zealand Journal of Botany* 36: 329-367. 1998, *Flora of New Zealand* 5: 85-87. 2000, Cameron E. Webb, Ian Oliver and Anthony J. Pik, "Does coastal foredune stabilization with *Ammophila arenaria* restore plant and arthropod communities in Southeastern Australia?" *Restoration Ecology* 8(3): 283-288. Sep 2000.

Species

A. eriopoda (Vickery) S.W.L. Jacobs (*Festuca eriopoda* Vickery; *Festucella eriopoda* (Vickery) E.B. Alexeev)

Victoria, New South Wales. Perennial, erect, densely caespitose, almost glabrous, leaves mostly basal, auricles absent, sheaths striate or ribbed, ligule pubescent, leaves very scabrous and channelled, green to purple panicle open with slender branches, chasmogamous spikelets, hermaphrodite florets 3-5 per spikelet, vestigial foliar structure subtending the inflorescence present or absent, glumes acute, lemmas awned, ovary glabrous, anthers yellow or purple, small fruit grooved and ventrally compressed, in damp sites, open habitats, grassland, near water, in eucalypt forests, see *Contributions from the New South Wales National Herbarium* 1: 10. 1939, *Telopea* 3(4): 602. 1990.

in English: snow fescue

A. hookeriana (F. Muell. ex Hook.f.) S.W.L. Jacobs (*Festuca hookeriana* F. Muell. ex Hook.f.; *Hookerchloa hookeriana* (F. Muell. ex Hook.f.) E.B. Alexeev; *Poa hookeriana* (F. Muell.) F. Muell.; *Poa hookeriana* (F. Muell. ex Hook.f.) F. Muell.; *Schedonorus hookerianus* (F. Muell. ex Hook.f.) Benth.) (after the British botanist W.J. Hooker, 1785-1865, from 1841 to 1865 director Royal Botanic Gardens, Kew, see Stafleu and Cowan, *Taxonomic literature*. 2: 283-301. 1979)

Victoria, New South Wales, Tasmania. Perennial, erect, caespitose, culms stout and robust, bright green, forming coarse and leafy tussocks, glabrous, auricles present or absent, sheath striate, ligule obtuse, leaves scabrous, very loose panicle spreading to nodding, green or purplish spikelets 3- to 5-flowered, chasmogamous spikelets, vestigial foliar structure subtending the inflorescence present or absent, glumes lanceolate or narrowly elliptic, lemma bidentate, palea lanceolate, ovary glabrous, fruit compressed and grooved, will not tolerate heavy grazing, found in swampy places, boggy or waterlogged sites, near streams, open moist sites, in subalpine swamp, open habitats, in open forest or grassland, in eucalypt woodland, dry sclerophyll forest, in Tasmania grows on dry hillsides under light eucalypt forest in the Central Highlands and East Coast, rough pasture, see *Flora Tasmaniae* 2: 127, t. 165. 1858, *Fragmenta Phytographiae Australiae* 8: 131. 1873 and *Telopea* 3(4): 602. 1990.

in English: Hooker's fescue, Hooker fescue

A. littoralis (Labill.) E.B. Alexeev (*Arundo triodioides* Trin.; *Festuca littoralis* Labill.; *Festuca littoralis* (Roem. & Schult.) Steud., nom. illeg., non *Festuca littoralis* Labill.; *Poa billardierei* (Spreng.) St.-Yves; *Schedonorus billardiereanus* Nees; *Schedonorus billardierianus* Nees; *Schedonorus littoralis* (Labill.) P. Beauv.; *Schedonorus littoralis* var. *minor* Hook.f.; *Schenodorus littoralis* (Labill.) P. Beauv.; *Triodia billardierei* Spreng.)

Victoria, New South Wales, Tasmania, South Australia, New Zealand. Perennial, caespitose, dense, tussock forming, erect and slender, very stiff to pungent, leaves mostly basal, rhizomatous with vertical rhizomes, leaf sheath striate and coriaceous, ligule obtuse and thick to stiffly membranous, narrow leaves rigid and scabrous, almost spike-like panicle erect and contracted, vestigial foliar structure subtending the inflorescence present or absent, chasmogamous and overlapping spikelets, glumes acute and keeled, lemmas obtuse shortly mucronate, palea lanceolate, lodicules bilobed and ciliate, ovary glabrous, fodder plant, provide refuge for wildlife, pioneer and dominant sand-binding grass, sand dunes restoration, high salt wind tolerance, high wind tolerance, high drought tolerance, species variable, can colonize and stabilize coastal dunes, occurs on coastal sand dunes, open habitats, on sand near the sea, sand plains behind dunes, flat rocky shores and cliffs in coastal regions, see *Novae Hollandiae Plantarum Specimen* 1: 22, t. 27. 1804 [1805], *Essai d'une Nouvelle Agrostographie* 177. 1812, *Systema Vegetabilium* 2: 740. 1817, *Systema Vegetabilium, editio decima sexta* 1: 330. 1824, *Species Graminum* 3: t. 351. 1836, *London Journal of Botany* 2: 419. 1843, *Flora Novae-Zelandiae* 2(1): 310. 1853, *Synopsis Plantarum Glumacearum* 1: 317. 1854, *Indig. Grasses N.Z.* t. 54. 1880 and *Candollea* 3: 284. 1927, *New Zealand J. Bot.* 6: 268. 1968.

in English: beach fescue, sand tussock, coast fescue, coastal fescue

in New Zealand: hinarepe (Maori name)

A. pubinervis (Vickery) S.W.L. Jacobs (*Austrofestuca triticoides* (Steud.) E.B. Alexeev; *Festuca pubinervis* Vickery; *Festuca triticoides* Steud., nom. illeg., non *Festuca triticoides* Lam.; *Schedonorus littoralis* var. *triticoides* Benth.)

Western Australia. Perennial, erect, caespitose, rhizomatous with vertical rhizome, leaves mostly basal, sheath striate, ligule thick, narrow leaves rigid, yellowish panicle erect and contracted, spikelets 3-4-flowered, chasmogamous spikelets, lemma coriaceous, ovary glabrous, fruit compressed and grooved, maritime-arenicolous, open habitats, coastal grasslands, dunes, similar to and confused with *Austrofestuca littoralis* (Labill.) E.B. Alexeev, see *Essai d'une Nouvelle Agrostographie* 177. 1812, *Synopsis Plantarum Glumacearum* 1: 315. 1854, *Indig. Grasses N.Z.* t. 54. 1880 and *Contributions from the New South Wales National Herbarium* 1: 7. 1939, *N.Z. J. Bot.* 6: 268. 1968, *Austrobaileya* 2(3): 241. 1986.

Austrostipa S.W.L. Jacobs & J. Everett

Latin *australis* "southern" plus *Stipa* L., a genus from Australia.

About 60-65 species, Australia. Stipoideae, Stipeae, or Pooideae, Stipeae, Stipinae, perennial, simple or bambusiform, caespitose or rhizomatous, branching intravaginal or extravaginal, inflorescence paniculate and much branched, spikelets 1-flowered, flowers bisexual, mature florets dark and tough, awn often very long, glumes 2 enclosing the floret, lemma margins overlapping, lemma coriaceous and cylindrical, callus pungent to sharply pointed, palea enclosed by lemma, 2 or 3 lodicules, 3 stamens, ovary glabrous, plumose or feathery stigmas, segregated from *Stipa* L., type *Austrostipa mollis* (R. Br.) S.W.L. Jacobs & J. Everett, see *Species Plantarum* 1: 78-79. 1753, *Species Graminum Stipaceorum* 47. 1842 and *Telopea* 3: 1-132. 1986, *N.Z. J. Agric. Res.* 36: 301-307. 1993, K.A. Robson and J. Maze, "A comparison of rare and common grasses of the Stipeae. I. Greenhouse studies of growth and variation in four species from parapatric populations." *International Journal of Plant Sciences* 156(4): 530-541. 1995, S.W.L. Jacobs and J. Everett, "Austrostipa, a new genus, and new names for Australasian species formerly included in *Stipa* (Gramineae)." *Telopea* 6(4): 579-595. 1996, Khidir W. Hilu & Lawrence A. Alice, "Evolutionary implications of *matK* indels in Poaceae." *Am. J. Bot.* 86: 1735-1741. 1999, Sarah Mathews, Rocky C. Tsai and Elizabeth A. Kellogg, "Phylogenetic structure in the grass family (Poaceae): evidence from the nuclear gene phytochrome B." *Am. J. Bot.* 87: 96-107. 2000, *Flora of New Zealand* 5: 68-79. 2000, S.W.L. Jacobs, J. Everett, M.E. Barkworth, and C. Hsiao, "Relationships with the Stipoid grasses (Gramineae)." 75-82. 2000 in S.W.L. Jacobs & J. Everett (Editors), *Proceedings of the Third International Symposium on Grass Systematics and Evolution*. CSIRO, Canberra, Australia, *Contributions from the United States National Herbarium* 48: 126. 2003.

Species

A. acrociliata (Reader) S.W.L. Jacobs & J. Everett (*Stipa acrociliata* Reader; *Stipa readeri* F. Muell. ex Reader)

Australia. Sandy desert, see *Victoria Naturalist* 13: 167-168. Melbourne 1897 and *Telopea* 6(4): 584. 1996.

A. aphylla (Rodway) S.W.L. Jacobs & J. Everett (*Stipa aphylla* Rodway; *Stipa aphylla* (Rodway) Townrow; *Stipa pubescens* var. *aphylla* Rodway)

Australia, Tasmania. Dry hills, see *Tasmanian Fl.* 262. 1903, *Papers and Proceedings of the Royal Society of Tasmania* 104: 85, 96. 1970, *Telopea* 3: 27. 1986.

A. aquarii (Vickery, S.W.L. Jacobs & J. Everett) S.W.L. Jacobs & J. Everett (*Stipa aphylla* (Rodway) Townrow; *Stipa aquarii* J. Vickery, S.W.L. Jacobs & J. Everett)

Australia, Northern Territory. Perennial, erect, sandy soils, see *Telopea* 3(1): 27. 1986, *Telopea* 6(4): 584. 1996.

A. aristiglumis (F. Mueller) S.W.L. Jacobs & J. Everett (*Stipa aristiglumis* F. Mueller)

Australia. Desert, see *Transactions and Proceedings of the Victorian Institute for the Advancement of Science* 43. 1855 and *Telopea* 6(4): 584. 1996.

A. bigeniculata (Hughes) S.W.L. Jacobs & J. Everett (*Stipa bigeniculata* Hughes)

Australia, New South Wales. Perennial, erect, tussocky, tall, cataphylls hairy, ligule ciliate, stiff leaves, inflorescence paniculate and hairy, glumes unequal, lemma with white hairs, awn geniculate, column twisted, 3 lodicules, in grassland and disturbed areas, see *Bulletin of Miscellaneous Information Kew* 1922: 20. 1922, *Telopea* 6(4): 584. 1996.

A. blackii (C.E. Hubbard) S.W.L. Jacobs & J. Everett (*Stipa aristiglumis* var. *cana* Reader; *Stipa blackii* C.E. Hubbard; *Stipa clelandii* Summerh. & C.E. Hubb.; *Stipa pubescens* var. *comosa* J.M. Black) (named for the Scottish-born Australian botanist John McConnell Black, 1855-1951, author of *Flora of South Australia*. 1922-1929; see J.H. Barnhart, *Biographical notes upon botanists*. 1: 194. 1965; Frans A. Stafleu and Erik A. Mennega, *Taxonomic literature. Supplement II: Be-Bo*. 186-188. 1993; N. Hall, *Botanists of the Eucalypts*. Melbourne 1978 and Supplement 1980; Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 65. London 1994) (*Stipa clelandii* Summerh. & C.E. Hubb. dedicated to the Australian naturalist Sir John Burton Cleland, 1878-1971, botanist, ethnologist, explorer and plant collector, 1920-1948 professor of pathology at the University of Adelaide, between Aug 1929 and Aug 1936 made numerous excursions into Central Australia (in connection with the Board for Anthropological Research, University of Adelaide, and the South Australian Museum), knighted in 1964, his works include *The Ancient Family of Cleland*. London 1905, *Royal Society of New South Wales, Sydney*. Presidential Address. Sydney 1918, *Toadstools and Mushrooms and Other Larger Fungi of South Australia*. Adelaide 1934, with Edwin Cheel (1872-1951) wrote Notes on Australian Fungi. no. IV. *Polyporus, Fomes and Hexagona*. 1918 and *Notes on the Early Stages of Development of *Lysurus gardneri*-L. australiensis*, etc. 1918, with Thomas Harvey Johnston (1881-1951) wrote *Notes on Worm Nests in Australian Cattle due to *Filaria, Onchocerca gibsoni*, and on Similar Structures in Camels*. 1911, with Dr. C. Fenner wrote *The Geography and Botany of the Adelaide coast*. Adelaide 1935. See E.C. Black, editor, *Memoirs of John McConnell Black*. Adelaide 1971; Constance Margaret Eardley (1910-1978), "John McConnell Black, A.L.S., M.B.E. (1855-1951)." *Trans. R. Soc. S. Aust.* 76: i-vi. 1953, and "John Burton Cleland - a tribute on his eightieth birthday." *Trans. R. Soc. S. Aust.* 82: 339-341. 1959; John Anderson Gilruth (1871-1937) and Georgina Sweet, *Onchocerca gibsoni: The Cause of Worm Nodules in Australian Cattle*. 1911; J.H. Barnhart, *Biographical notes upon botanists*. 1: 356. 1965; J. Lanjouw and F.A. Stafleu, *Index Herbariorum. Collectors A-D*. Utrecht 1954; John McConnell Black (1855-1951), in *Transactions and Proceedings of the Royal*

Society of South Australia. 56: 46, t. II, f. 3. 1932; Dennis John Carr and S.G.M. Carr (1912-1988), eds., *People and plants in Australia*. London 1981; Garrison and Morton, *Medical Bibliography*. 4648, 5474. 1961)

South Australia. Perennial, tall, coarse, tough, stout, smooth, erect, strong rootstock, culms compressed, nodes pubescent, scabrid to scabrous leaves, open panicle, chasmogamous and cleistogamous, lemma hairy to densely villous, awn stiffly hairy, column strongly twisted, 3 lodicules, sandy soil, desert, see *Victoria Naturalist* 17: 156. 1901, *Bulletin of Miscellaneous Information Kew* 1925: 431. 1925, *Bulletin of Miscellaneous Information Kew* 1927: 362. 1927, *Telopea* 6(4): 584. 1996.

A. blakei (Vickery, S.W.L. Jacobs & J. Everett) S.W.L. Jacobs & J. Everett (*Stipa blakei* Vickery, S.W.L. Jacobs & J. Everett) (for the Australian botanist Stanley Thatcher Blake, 1910-1973, traveler, plant collector, 1946-1973 Brisbane Queensland Herbarium; see Frans A. Stafleu and Erik A. Mennega, *Taxonomic literature. Supplement II: Be-Bo*. 195-196. [b. on 3 September 1911] 1993; Selwyn Lawrence Everist (1913-1981), *Queensl. Nat.* 21(1-2): 31-32. 1974; N. Hall, *Botanists of the Eucalypts*. Melbourne 1978 and Supplement 1980)

Australia, Queensland. Erect, tufted, dark green, open places, sandy areas, see *Telopea* 3(1): 34. 1986, *Telopea* 6(4): 584. 1996.

A. breviglumis (J.M. Black) S.W.L. Jacobs & J. Everett (*Stipa breviglumis* J.M. Black)

South Australia. See *Transactions and Proceedings of the Royal Society of South Australia* 65: 333. 1941, *Telopea* 3: 35. 1986, *Telopea* 6(4): 584. 1996.

A. campylachne (Nees) S.W.L. Jacobs & J. Everett (*Stipa campylachne* Nees; *Stipa semibarbata* R. Br. var. *campylachne* (Nees) Benth.) (from the Greek *kampylos* "curved" and *achne* "chaff, glume")

Australia. See *Plantae Preissianae* 2: 99. 1846 and *Telopea* 3: 37. 1986, *Telopea* 6(4): 584. 1996.

A. centralis (Vickery, S.W.L. Jacobs & J. Everett) S.W.L. Jacobs & J. Everett (*Stipa centralis* Vickery, S.W.L. Jacobs & J. Everett)

Australia, Northern Territory. Perennial, erect, see *Telopea* 3(1): 39. 1986, *Telopea* 6(4): 584. 1996.

A. compressa (R. Brown) S.W.L. Jacobs & J. Everett (*Stipa compressa* R. Brown; *Stipa longearistata* Steud.)

Western Australia. See *Prodromus Florae Novae Hollandiae* 175. 1810, *Synopsis Plantarum Glumacearum* 1: 127. 1854 and *Telopea* 6(4): 584. 1996.

A. crinita (Gaudichaud) S.W.L. Jacobs & J. Everett (*Stipa crinita* Gaudichaud)

Western Australia. See Charles Gaudichaud-Beaupré (1789-1854), [Botany of the Voyage.] *Voyage autour du*

Monde ... sur ... l'Uranie et la Physicienne, pendant ... 1817-1820. 407. Paris 1826 [-1830] and *Telopea* 6(4): 585. 1996.

A. curticoma (Vickery) S.W.L. Jacobs & J. Everett (*Stipa curticoma* Vickery)

South Australia. See *Telopea* 2(1): 11. 1980 and *Telopea* 6(4): 585. 1996.

A. densiflora (Hughes) S.W.L. Jacobs & J. Everett (*Stipa congesta* Summerh. & C.E. Hubb.; *Stipa densiflora* Hughes; *Stipa krylovii* Roshev.)

South Australia, New South Wales, Victoria, Queensland. Perennial, caespitose, ligule truncate and ciliate, auricles present or absent, blade rolled and ribbed, panicle dense or moderately dense, floret elliptic, spikelets gaping, hairy glumes unequal and acuminate, lemma scabrous and silky, densely silky callus straight and sharp or weakly bent at the tip, pubescent awn strongly twice bent, forage, decorative grass, suitable for revegetating eroded hilly areas, for dry sites in sun or semishade, usually grows in woodland, see *Bulletin of Miscellaneous Information Kew* 1921: 18, f. 20. 1921, *Bulletin of Miscellaneous Information Kew* 1925: 362. 1927, *Telopea* 6(4): 585. 1996.

in English: foxtail speargrass

A. dongicola (Vickery, S.W.L. Jacobs & J. Everett) S.W.L. Jacobs & J. Everett (*Stipa dongicola* Vickery, S.W.L. Jacobs & J. Everett) (Blackoak Donga, Kanandah Station, Naretha Donga)

Western Australia. See *Telopea* 3(1): 46. 1986, *Telopea* 6(4): 585. 1996.

A. drummondii (Steudel) S.W.L. Jacobs & J. Everett (*Stipa drummondii* Steudel; *Stipa horrifolia* J.M. Black; *Stipa luehmannii* Reader; *Stipa scabra* Lindl. var. *auriculata* J.M. Black; *Stipa scabra* var. *subtricha* Reader)

Australia. Perennial, rigid blades subulate-involute, ligule membranous-ciliate, glumes hyaline to membranous and acuminate, lemma white-pubescent, awn geniculate, bristle curved, sandy areas, desert, see *J. Trop. Australia* 31. 1848, *Synopsis Plantarum Glumacearum* 1: 128. 1854 and *Victoria Naturalist* 16: 158. 1900, *Victoria Naturalist* 17: 156. 1901, *Transactions and Proceedings of the Royal Society of South Australia* 44: 191. 1920, *Telopea* 3: 47. 1986, *Telopea* 6(4): 585. 1996.

in English: cottony speargrass

A. echinata (Vickery, S.W.L. Jacobs & J. Everett) S.W.L. Jacobs & J. Everett (*Stipa echinata* Vickery, S.W.L. Jacobs & J. Everett)

South Australia. See *Telopea* 3(1): 50. 1986, *Telopea* 6(4): 585. 1996.

A. elegantissima (Labill.) S.W.L. Jacobs & J. Everett (*Stipa elegantissima* Labillardière)

Western Australia, South Australia, New South Wales, Victoria. Perennial, caespitose, tussock-forming, shortly rhizomatous, stems glabrous wiry and decumbent, nodes glabrous, ligule obtuse and membranous, leaves acuminate and yellow-green, auricles glabrous, feathery inflorescence, panicle pyramidal with few-flowered branches, spikelets gaping at maturity, callus straight and silky, glumes hirsute and acute, lemma tuberculate, awn with one bend, highly palatable to stock, found growing on dune and coast above salt marsh, swampy near-coastal areas, suitable for revegetation in salt marshes, chenier ridges, coastal berms and tidal/freshwater wetlands, full sun, see *Novae Hollandiae Plantarum Specimen* 1: 23, t. 29. 1805 and *Telopea* 3(1): 51. 1986, *Telopea* 6(4): 585. 1996.

in English: elegant speargrass, feather speargrass

A. eremophila (Reader) S.W.L. Jacobs & J. Everett (*Stipa dura* J.M. Black; *Stipa eremophila* Reader; *Stipa fusca* C.E. Hubb.; *Stipa pubescens* var. *auricoma* Reader; *Stipa variegata* Summerh. & C.E. Hubb.)

South Australia. Sandy areas, desert, see *Victoria Naturalist* 17: 154, 156. 1901, *Bulletin of Miscellaneous Information Kew* 1925: 432. 1925, *Bulletin of Miscellaneous Information Kew* 1927: 363. 1927, *Transactions and Proceedings of the Royal Society of South Australia* 65: 333. 1941, *Telopea* 6(4): 585. 1996.

A. exilis (Vickery) S.W.L. Jacobs & J. Everett (*Stipa exilis* Vickery)

South Australia. See *Telopea* 2(1): 13. 1980, *Telopea* 6(4): 585. 1996.

A. feresetacea (Vickery, S.W.L. Jacobs & J. Everett) S.W.L. Jacobs & J. Everett (*Stipa feresetacea* Vickery, S.W.L. Jacobs & J. Everett)

Australia, Northern Territory. Perennial, spreading, see *Telopea* 3(1): 58. 1986, *Telopea* 6(4): 585. 1996.

A. flavescens (Labillardière) S.W.L. Jacobs & J. Everett (*Stipa aphanoneura* Hughes; *Stipa compacta* Hughes; *Stipa flavescens* Labillardière; *Stipa flavescens* Hook.f. non Labill.; *Stipa hirsuta* Hughes; *Stipa laeviculmis* Nees; *Stipa laevis* Mez; *Stipa pubescens* var. *maritima* J.M. Black; *Stipa scabra* var. *elatio* Benth.; *Stipa scabra* var. *striata* Benth.; *Stipa tenuiglumis* Hughes)

Australia. Perennial, coarse, tussocky, dense, tall, erect or decumbent, shortly rhizomatous, cataphylls, leaf sheath scabrid, leaf blade rigid, ligule ciliate, contracted panicle, lemma cylindrical, awn geniculate, column tightly and loosely twisted, palea internerve glabrous, 3 lodicules, in grassland, see *Novae Hollandiae Plantarum Specimen* 1: 24, t. 30. 1804 [1805], *Plantae Preissianae* 2: 99. 1846, *J. Trop. Australia* 31. 1848, *Flora of Australia* 7: 571. 1878 and *Bulletin of Miscellaneous Information Kew* 1921: 22, 24-25, f. 29 & 29A, 31 & 31A. 1921, *Repertorium Specierum Novarum Regni Vegetabilis* 17: 210. 1921,

Transactions and Proceedings of the Royal Society of South Australia 67: 36. 1943, *Telopea* 3(1): 59. 1986, *Telopea* 6(4): 585. 1996.

A. geoffreyi S.W.L. Jacobs & J. Everett

Western Australia. See *Telopea* 6(4): 585. 1996.

A. gibbosa (Vickery) S.W.L. Jacobs & J. Everett (*Stipa gibbosa* Vickery)

South Australia. See *Telopea* 2: 14. 1980, *Telopea* 6(4): 586. 1996.

A. hemipogon (Bentham) S.W.L. Jacobs & J. Everett (*Stipa hemipogon* Bentham; *Stipa indepressa* J.M. Black; *Stipa nobilis* Pilg.; *Stipa semibarbata* R. Br.; *Stipa semibarbata* var. *gracilis* J.M. Black)

Western Australia, South Australia. See *Prodromus Florae Novae Hollandiae* 174. 1810, *Flora Australiensis: A Description ...* 7: 569. 1878 and *Transactions and Proceedings of the Royal Society of South Australia* 65: 334. 1941, *Transactions and Proceedings of the Royal Society of South Australia* 67: 36. 1943, *Telopea* 3: 63-64. 1986, *Telopea* 6(4): 586. 1996.

A. juncifolia (Hughes) S.W.L. Jacobs & J. Everett (*Stipa juncifolia* Hughes)

Australia. See *Bulletin of Miscellaneous Information Kew* 1921: 11. 1921, *Telopea* 6(4): 586. 1996.

A. lanata (Vickery, S.W.L. Jacobs & J. Everett) S.W.L. Jacobs & J. Everett (*Stipa lanata* Vickery, S.W.L. Jacobs & J. Everett)

Australia. See *Telopea* 3(1): 68. 1986, *Telopea* 6(4): 586. 1996.

A. macalpinei (Reader) S.W.L. Jacobs & J. Everett (*Stipa compressa* var. *lachnocolea* Benth.; *Stipa lachnocolea* (Benth.) Hughes; *Stipa macalpinei* Reader; *Stipa scelerata* Behr ex Benth.; *Stipa setacea* var. *latifolia* Benth.) (named for the English-born Australian botanist Daniel McAlpine, 1849-1932, a student of fungi, Victoria Dept. of Agriculture 1890-1915 plant pathologist; see Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 447. London 1994)

Australia. Annual, stems stout, nodes glabrous, sheaths with flattened transparent flexuous hairs, panicle contracted, floret elliptic, lemma white, callus straight and sharp, awn twice bent, sandy areas, see *Prodromus Florae Novae Hollandiae* 174. 1810, *Flora of Australia* 7: 567-568. 1878, *Victoria Naturalist* 15: 143. 1899 and *Bulletin of Miscellaneous Information Kew* 1921: 26. 1921, *Telopea* 3: 70. 1986, *Telopea* 6(4): 587. 1996.

in English: annual spear-grass, one year grass

A. metatoris (J. Everett & S.W.L. Jacobs) S.W.L. Jacobs & J. Everett (*Stipa metatoris* J. Everett & S.W.L. Jacobs)

Australia. See *Telopea* 2(4): 399. 1983, *Telopea* 6(4): 587. 1996.

A. mollis (R. Brown) S.W.L. Jacobs & J. Everett (*Stipa mollis* R. Br.; *Stipa plagiopogon* J.M. Black; *Stipa semibarbata* var. *mollis* (R. Br.) Benth.)

Australia. See *Prodromus Florae Novae Hollandiae* 174. 1810, *Flora of Australia* 7: 569. 1878 and *Transactions and Proceedings of the Royal Society of South Australia* 65: 334. 1941, *Telopea* 3: 74. 1986, *Telopea* 6(4): 587. 1996.

A. muelleri (Tate) S.W.L. Jacobs & J. Everett (*Stipa muelleri* Tate)

South Australia. Forests, scrublands, see *Transactions and Proceedings of the Royal Society of South Australia* 7: 70. 1885 and *Telopea* 6(4): 587. 1996.

A. multispiculis (J.M. Black) S.W.L. Jacobs & J. Everett (*Stipa multispiculis* J.M. Black)

South Australia. See *Transactions and Proceedings of the Royal Society of South Australia* 65: 333. 1941, *Telopea* 3: 78. 1986, *Telopea* 6(4): 587. 1996.

A. mundula (J.M. Black) S.W.L. Jacobs & J. Everett (*Stipa mundula* J.M. Black)

South Australia. See *Transactions and Proceedings of the Royal Society of South Australia* 65: 333. 1941, *Telopea* 6(4): 587. 1996.

A. nitida (Summerhayes & C.E. Hubbard) S.W.L. Jacobs & J. Everett (*Stipa nitida* Summerhayes & C.E. Hubb.; *Stipa scabra* Lindley var. *pallida* Reader)

Australia. Perennial, caespitose, tussocky, erect, tall, simple, nodes glabrous, ligule truncate and membranous, leaf blades filiform and long-acuminate, ligule fimbriate, auricle glabrous or hirsute, leaf sheath glabrous or woolly-pubescent, panicle dense and exserted, floret elliptic, spikelets linear-lanceolate, glumes subequal and thinly membranous, lower glume linear-lanceolate, upper glume lanceolate and acuminate, lemma brown and silky, densely silky callus straight and sharp or weakly bent at the tip, awn falcate, on sandy soils, along roadsides, grasslands, see *J. Trop. Australia* 31. 1848 and *Victoria Naturalist* 17: 156. 1901, *Bulletin of Miscellaneous Information Kew* 1927: 60, 80. 1927, T.G.B. Osborn, J.G. Wood and T.B. Paltridge, "On the autecology of *Stipa nitida*, a study of a fodder grass in arid Australia." in *Proc. Linn. Soc. NSW*. 56: 299-324. 1931, *Telopea* 6(4): 587. 1996.

in English: Balcarra grass, Balcarra speargrass, speargrass

A. nivicola (J.H. Willis) S.W.L. Jacobs & J. Everett (*Stipa nivicola* J.H. Willis)

Australia. Grassy slopes, see *Victoria Naturalist* 73: 149. 1957.

A. nodosa (S.T. Blake) S.W.L. Jacobs & J. Everett (*Stipa effusa* Hughes, nom. illeg., non *Stipa effusa* Mez; *Stipa falcata* var. *minor* J.M. Black; *Stipa nodosa* S.T. Blake)

South Australia. Perennial, caespitose, open at the base, tussocky, erect to nodding, hairy cataphylls, ligule usually

ciliate, pinkish inflorescence, panicle subtended by hairy bracts, callus long sharp, awn falcate, 3 lodicules, flowers chasmogamous and cleistogamous, often confused with *Stipa variabilis* Hughes, found in waste places, dry areas, pastures, along roadsides, riverbeds and along streams, see *Bulletin of Miscellaneous Information Kew* 1922: 20. 1922, *Transactions and Proceedings of the Royal Society of South Australia* 65: 334. 1941, *Proceedings of the Royal Society of Queensland* 62: 89. 1952, *Telopea* 3: 86. 1986, *Telopea* 6(4): 587. 1996.

A. nullarborensis (Vickery, S.W.L. Jacobs & J. Everett) S.W.L. Jacobs & J. Everett (*Stipa nullarborensis* Vickery, S.W.L. Jacobs & J. Everett)

Australia. See *Telopea* 3(1): 88. 1986, *Telopea* 6(4): 587. 1996.

A. nullanulla (J. Everett & S.W.L. Jacobs) S.W.L. Jacobs & J. Everett (*Stipa nullanulla* J. Everett & S.W.L. Jacobs)

Australia, New South Wales, Nulla Nulla. See *Telopea* 2(4): 398. 1983, *Telopea* 6(4): 587. 1996.

A. oligostachya (Hughes) S.W.L. Jacobs & J. Everett (*Stipa oligostachya* Hughes)

Australia. Tussocky, see *Bulletin of Miscellaneous Information Kew* 1921: 12. 1921, *Telopea* 6(4): 587. 1996.

A. petraea (Vickery) S.W.L. Jacobs & J. Everett (*Stipa petraea* Vickery)

Australia. See *Telopea* 2: 15. 1980, *Telopea* 6(4): 587. 1996.

A. pilata (S.W.L. Jacobs & J. Everett) S.W.L. Jacobs & J. Everett (*Stipa pilata* S.W.L. Jacobs & J. Everett)

South Australia. Growing under mallee, see *Telopea* 3(1): 92. 1986, *Telopea* 6(4): 587. 1996.

A. platychaeta (Hughes) S.W.L. Jacobs & J. Everett (*Stipa acrociliata* var. *minor* Reader; *Stipa platychaeta* Hughes)

Australia. Perennial, glabrous, smooth, ligule membranous, leaf blades flat and long-acuminate, loose panicle, glumes with acuminate apex, lemma entire and shortly pilose, awn flattened and recurved, mallee, see *Victoria Naturalist* 23: 25. 1906, *Bulletin of Miscellaneous Information Kew* 1921: 16, f. 17 & 17A. 1921, *Telopea* 6(4): 587. 1996.

in English: flat-awned speargrass

A. plumigera (Hughes) S.W.L. Jacobs & J. Everett (*Stipa eremophila* var. *dodrantaria* J.M. Black; *Stipa gracilis* (Speg.) Speg., nom. illeg., non *Stipa gracilis* Roshev.; *Stipa plumigera* Hughes; *Stipa plumosa* Trin. var. *gracilis* Speg.) (Latin *dodrants*, *antis* “nine twelfths or three fourths of any thing, nine inches,” Latin *dodrantarius*, *a*, *um* “belonging to a *dodrants*: *tabulae*, the debt-books introduced in consequence of the *lex Valeria feneratoria*”)

Australia. Perennial, pubescent, few-noded, ligule densely ciliate, leaf sheath pubescent, leaf blades linear more or less convolute, panicle dense, glumes acuminate and entire, lemma cylindrical, awn slender, bristle and column feathery,

see *Anales del Museo Nacional de Montevideo* 4(2): 41. 1901, *Bulletin of Miscellaneous Information Kew* 1921: 20, f. 25 & 25A. 1921, *Transactions and Proceedings of the Royal Society of South Australia* 46: 565. 1922, *Revista Argentina de Botánica* 1: 16. 1925, *Telopea* 6(4): 588. 1996.

A. puberula (Steudel) S.W.L. Jacobs & J. Everett (*Stipa arachnopus* Pilg.; *Stipa puberula* Steudel)

Australia. See *Synopsis Plantarum Glumacearum* 1: 128. 1854 and *Telopea* 3: 96. 1986, *Telopea* 6(4): 588. 1996.

A. pubescens (R. Brown) S.W.L. Jacobs & J. Everett (*Stipa commutata* Trin. & Rupr.; *Stipa pubescens* R. Brown)

New South Wales, Queensland. Perennial, caespitose, short rhizome, extravaginal shoots, ligule leathery, auricles present, blade rolled and ribbed, panicle exerted and sparse, spikelets gaping, glumes unequal, lemma finely tuberculate and reddish brown, callus bent and reddish brown, awn twice bent, in woodland, sandstone areas, see *Prodromus Florae Novae Hollandiae* 174. 1810, *Species Graminum Stipaceorum* 49. 1842 and *Telopea* 3: 97. 1986, *Telopea* 6(4): 588. 1996.

in English: tall speargrass

A. pubinodis (Trinius & Ruprecht) S.W.L. Jacobs & J. Everett (*Stipa pubescens* var. *semiglabra* Reader; *Stipa pubinodis* Trinius & Ruprecht)

Australia. See *Species Graminum Stipaceorum* 50. 1842 and *Victoria Naturalist* 17: 155. 1901, *Telopea* 6(4): 588. 1996.

A. pycnostachya (Bentham) S.W.L. Jacobs & J. Everett (*Stipa pycnostachya* Bentham)

Australia. See *Flora Australiensis: A Description ...* 7: 568. 1878 and *Telopea* 6(4): 588. 1996.

A. ramosissima (Trinius) S.W.L. Jacobs & J. Everett (*Stipa ramosissima* Trinius; *Stipa ramosissima* (Trin.) Nees; *Stipa ramosissima* (Trin.) Trin.; *Streptachne ramosissima* (Trin.) Trin. & Rupr.; *Urachne ramosissima* Trin.)

Australia. Branched, large feathery flower heads, growing in wet conditions, full sun, see *Flora* 11(1: 19): 301. 1828, *Species Graminum Stipaceorum* 7. 1842 and *Bulletin of Miscellaneous Information Kew* 1921: 28. 1921, *Telopea* 3: 101. 1986, *Telopea* 6(4): 588. 1996.

in English: bamboo grass

A. rudis (Sprengel) S.W.L. Jacobs & J. Everett (*Stipa rudis* Sprengel)

Australia. Perennial, see *Telopea* 6(4): 588. 1996.

A. rudis subsp. **australis** (S.W.L. Jacobs & J. Everett) S.W.L. Jacobs & J. Everett (*Stipa rudis* subsp. *australis* S.W.L. Jacobs & J. Everett)

Australia. Robust, stout, coarse, spreading panicle, see *Telopea* 2(4): 396. 1983, *Telopea* 6(4): 588. 1996.

A. rudis subsp. *nervosa* (Vickery) S.W.L. Jacobs & J. Everett (*Stipa nervosa* Vickery; *Stipa nervosa* subsp. *nervosa* Vickery; *Stipa rudis* subsp. *nervosa* (Vickery) S.W.L. Jacobs & J. Everett; *Stipa rudis* subsp. *nervosa* (Vickery) J. Everett and S.W.L. Jacobs)

Australia. See *Contributions from the New South Wales National Herbarium* 1: 335. 1951, *Telopea* 6(4): 588. 1996.

A. rudis (Sprengel) S.W.L. Jacobs & J. Everett subsp. *rudis* Eastern Australia. Perennial, tall, stout, wiry, erect, open, tussocky, cataphylls glabrous, ligule apex shortly ciliate, panicle loosely contracted and subtended by hairy bracts, glumes subequal, lemma tuberculate, awn geniculate, column tightly twisted, 2 lodicules, along roadsides, see *Telopea* 6(4): 588. 1996.

A. scabra (Lindley) S.W.L. Jacobs & J. Everett (*Stipa scabra* Lindley)

Australia. Perennial or annual or short-lived perennial, few-noded, caespitose to densely tufted, tussocky, simple, nodes glabrous, hairy leaf sheaths loose and ribbed, ligule shortly ciliate and membranous, auricles present or absent, blade folded or inrolled or tightly convolute, leaves hispid, dense panicle exerted, spikelets linear usually gaping at maturity, glumes unequal and acute to long-acuminate, lemma convolute and notched, lemma brown and densely silky, callus straight and densely silky, awn falcate and twice bent, palea apex glabrous, 3 lodicules, cleistogamous and chasmogamous florets, seed harmful to the skin of sheep, found in loam with mulga, readily eaten when young and green, see *J. Exped. Trop. Australia* 31. 1848 and *Telopea* 6(4): 588. 1996.

in English: speargrass, rough speargrass, delicate speargrass, slender speargrass, rough needle-grass

A. scabra (Lindley) S.W.L. Jacobs & J. Everett subsp. *falcata* (Hughes) S.W.L. Jacobs & J. Everett (*Stipa falcata* Hughes; *Stipa scabra* Lindl. subsp. *falcata* (Hughes) S.W.L. Jacobs & J. Everett; *Stipa scabra* Lindl. subsp. *falcata* (Hughes) Vickery, S.W.L. Jacobs & J. Everett)

Australia. Spreading spikelets, open panicle, useful for erosion control, grows in woodland, grassland, see *Bulletin of Miscellaneous Information Kew* 1921: 14. 1921, *Telopea* 3: 110. 1986, *Telopea* 6(4): 588. 1996.

in English: slender speargrass

A. scabra (Lindley) S.W.L. Jacobs & J. Everett subsp. *scabra* (*Stipa scabra* Lindley subsp. *scabra*)

Australia. Narrow dense inflorescence paniculate, grows in dry areas, grassland, see *Telopea* 6(4): 588. 1996.

in English: rough speargrass

A. semibarbata (R. Brown) S.W.L. Jacobs & J. Everett (*Stipa semibarbata* R. Brown)

South Australia, Victoria, Tasmania, New South Wales. Perennial, caespitose, nodes pubescent, leaf blades subulate

to filiform, ligule ciliate and truncate, auricles hirsute and thickened, blade rolled and ribbed, leaves pubescent, oblong panicle dense and contracted, spikelets gaping, floret elliptic, narrow glumes unequal and acuminate, lemma black or white silky-pubescent, densely silky callus straight and sharp or weakly bent at the tip, awn twice bent, stout column pubescent to villous, usually on sandy soils, in sclerophyll forest, see *Prodromus Florae Novae Hollandiae* 174. 1810 and *Telopea* 6(4): 588. 1996.

in English: fibrous speargrass, barbed speargrass

A. setacea (R. Brown) S.W.L. Jacobs & J. Everett (*Dichelachne setacea* (R. Br.) Nees; *Stipa brachystephana* S.T. Blake; *Stipa setacea* R. Brown; *Stipa setacea* var. *latiglumis* J.M. Black)

Australia. Perennial, slender, leaf blades filiform-involute, ligule membranous, leaves glabrous mostly basal, panicle loosely contracted, glumes acuminate, lemma more or less fusiform, awn twice-geniculate, see *Prodromus Florae Novae Hollandiae* 174. 1810, *Plantae Preissianae* 2: 98. 1846 and *Transactions and Proceedings of the Royal Society of South Australia* 46: 565. 1922, *Proceedings of the Royal Society of Queensland* 62: 90, t. 6. 1952, *Telopea* 3: 113. 1986, *Telopea* 6(4): 589. 1996.

in English: corkscrew grass

A. stipoides (Hooker f.) S.W.L. Jacobs & J. Everett (*Dichelachne stipoides* Hooker f.; *Stipa stipoides* (Hooker f.) Veldkamp; *Stipa teretifolia* Steud.)

Southeast Australia, Tasmania. Perennial, tall, caespitose, clumped, erect, stiff, swollen base, small cataphylls, leaf sheath smooth, rigid leaves more or less sharply pointed, ligule acute to subacute, narrow panicle with ascending branches, 3 lodicules, found in muddy places, mudflats, see *Flora Novae-Zelandiae* 1: 294, t. 66. 1853, *Synopsis Plantarum Glumacearum* 1: 128. 1854 and *Blumea* 22(1): 11. 1974, *Pap. Proc. Roy. Soc. Tasmania* 112: 277-287. 1978, *Telopea* 6(4): 589. 1996.

A. stuposa (Hughes) S.W.L. Jacobs & J. Everett (*Stipa eriopus* Benth.; *Stipa incurva* Hughes; *Stipa leptophylla* Hughes; *Stipa scabra* Lindl. var. *occidentalis* Benth.; *Stipa scabra* var. *pubescens* Benth.; *Stipa stuposa* Hughes)

Southeast Australia, Tasmania. Perennial, tall, coarse, densely tufted, erect, stiff, stout, tussocky, swollen bases, hairy cataphylls, ligule fringed, harsh leaves, narrow panicle, glumes unequal, lemma hairy, awn geniculate, column twisted and hairy, 2 lodicules, cleistogamous and chasmogamous flowers, in grassland, among shrubs, see *J. Trop. Australia* 31. 1848 and *Bulletin of Miscellaneous Information Kew* 1921: 14, f. 10 & 10A, 16, f. 16 & 16A, 20f, 24 & 24A. 1921, *Telopea* 3: 119. 1986, *Telopea* 6(4): 589. 1996.

A. tenuifolia (Steudel) S.W.L. Jacobs & J. Everett (*Stipa tenuifolia* Steudel) Australia.

See *Synopsis Plantarum Glumacearum* 1: 128. 1854 and *Telopea* 6(4): 589. 1996.

A. trichophylla (Bentham) S.W.L. Jacobs & J. Everett (*Stipa trichophylla* Bentham)

Australia. See *Flora Australiensis: A Description ...* 7: 570. 1878 and *Telopea* 6(4): 589. 1996.

A. tuckeri (F. Mueller) S.W.L. Jacobs & J. Everett (*Stipa tuckeri* F. Mueller)

Australia. Rhizomatous, highly palatable, see *Fragmenta Phytographiae Australiae* 9: 129. 1881 and *Telopea* 6(4): 589. 1996.

A. variabilis (Hughes) S.W.L. Jacobs & J. Everett (*Stipa pubescens* var. *effusa* Benth.; *Stipa variabilis* Hughes)

Australia. Perennial, few-noded, blades linear and long acuminate, ligule ciliate, glumes membranous with acuminate apex, lemma cylindrical white-pilose, awn with recurved bristle, see *Prodromus Florae Novae Hollandiae* 174. 1810, *Flora of Australia* 7: 570. 1878 and *Bulletin of Miscellaneous Information Kew* 1921: 15. 1921, *Telopea* 6(4): 589. 1996.

in English: variable spear-grass

A. velutina (Vickery, S.W.L. Jacobs & J. Everett) S.W.L. Jacobs & J. Everett (*Stipa velutina* Vickery, S.W.L. Jacobs & J. Everett)

Australia. See *Telopea* 3(1): 126. 1986, *Telopea* 6(4): 589. 1996.

A. verticillata (Nees ex Sprengel) S.W.L. Jacobs & J. Everett (*Stipa micrantha* R. Br. ex Hughes, nom. illeg., non *Stipa micrantha* Cav.; *Stipa verticillata* Nees ex Sprengel; *Streptachne ramosissima* (Trin.) Trin. & Rupr.; *Streptachne verticillata* (Nees ex Spreng.) Trin. & Rupr.)

Eastern Australia. Perennial, bambusiform, erect, stout, vigorous, caespitose, shortly rhizomatous, erect, cataphylls, leaf sheaths glabrous and hairy, branched inflorescence, panicle verticillate to subverticillate, lemma hairy, awn geniculate or straight, column straight, 2 lodicules, cultivated, see *Prodromus Florae Novae Hollandiae* 175. 1810, *Species Graminum Stipaceorum* 7-9. 1842 and *Telopea* 3: 127. 1986, *Telopea* 6(4): 589. 1996.

in English: slender bamboo grass

A. vickeryana (S.W.L. Jacobs & J. Everett) S.W.L. Jacobs & J. Everett (*Austrostipa vickeryana* (J. Everett & S.W.L. Jacobs) S.W.L. Jacobs & J. Everett; *Stipa vickeryana* S.W.L. Jacobs & J. Everett; *Stipa vickeryana* J. Everett & S.W.L. Jacobs)

Australia. Forming dense clumps, inflorescence spreading, see *Telopea* 2(4): 397. 1983, *Telopea* 6(4): 589. 1996.

A. wakoolica (Vickery, S.W.L. Jacobs & J. Everett) S.W.L. Jacobs & J. Everett (*Stipa wakoolica* Vickery, S.W.L. Jacobs & J. Everett) (Shire of Wakool, Murray River, Moulamein, New South Wales)

New South Wales. Perennial, endangered species, densely caespitose, ligule firm and ciliate, auricles present, pubescent blades expanded and ribbed, panicle spreading, spikelets gaping, glumes unequal and acuminate, lemma silky and dark at maturity, callus hairy and straight, awn twice bent, open woodland floodplains, see *Telopea* 3(1): 129. 1986, *Telopea* 6(4): 589. 1996.

Avellinia Parl. = *Trisetaria* Forssk.

After the Italian botanist Giulio Avellino, he seems to have flourished from 1840-1843, wrote *Su di una nuova specie di Clematide*. Napoli 1842, coauthor with Giuseppe Antonio Pasquale (1820-1893) of *Flora Medica della provincia di Napoli*. Napoli 1841; see J.H. Barnhart, *Biographical notes upon botanists*. 1: 93. 1965.

About 1-2 species, Mediterranean. Pooideae, Poodae, Aveneae, annual, caespitose, small, herbaceous, auricles absent, ligule membranous, internodes hollow, plants bisexual, inflorescence loosely paniculate or a contracted narrow panicle, spikelets solitary, bisexual and pedicellate spikelets compressed laterally, hermaphrodite florets, 2 glumes very unequal and awnless, lower glume bristle-like, upper glume acuminate, lemmas awned, awn straight and short, palea bifid, 2 free lodicules membranous, 3 stamens, ovary glabrous, 2 stigmas, sometimes referred to *Trisetum* Pers. and *Trisetaria* Forssk., see *Flora Aegyptiaco-Arabica* 60. 1775, Gaetano Savi (1769-1844), *Botanicon Etruscum: sistens plantas in Etruria sponte crescentes*. Pisis 1808-1825, Filippo Parlatore, *Plantae Novae*. 59. Parisiis 1842, *Conspicuum Florae Europaeae: seu Enumeratio methodica plantarum phanerogamarum Europae indigenarum, indicatio distributionis geographicae singularum etc.* 815. 1882, *Plantae Europaeae* 1: 74. 1890 and F. Mediterranean. Annual, small, slender, delicate, leaves pubescent, narrow panicle loose, awned, weed, see *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 397. 1833, *Florae Siculae Synopsis* 151. 1843, *Exploration Scientifique de l'Algérie* 2: 120. 1855 and *Catalogue des Plantes du Maroc* 4: 935. 1941, *Bulletin de la Société d'Histoire Naturelle de l'Afrique du Nord* 48: 481. 1957, *Conspectus Florae Orientalis* 6: 92. 1991.

in English: avellinia

Avena L. = *Anelytrum* Hack., *Avena* Scop., *Preissia* Opiz

From the Latin *avena*, *ae*, classical name for oats used by Plinius, Horatius and Vergilius ("avenae steriles vanae").

About 25-30 species, Old World, Europe, Mediterranean, north and northeastern Africa, western and central Asia. Pooideae, Poodae, Aveneae, or Pooideae, Poeae, Aveninae, annual or biennial or perennial, erect or geniculate, rarely prostrate, upright stems solitary or tufted, herbaceous, hollow internodes, auricles absent, leaf sheath chartaceous, ligule a scarious membrane, leaves linear and narrow or broad, plants bisexual, inflorescence a very loose open panicle more or less cylindrical with awned pendulous or nodding large spikelets, uppermost floret sometimes male, 2 smooth rounded glumes more or less equal, spikelets surrounded by glumes, lemmas hairy at base and stiff, awn twisted and bent, tough palea entire to apically notched, 2 free and membranous lodicules, 3 stamens, ovary hairy, 2 stigmas, differences between the species often obscure, grain crop, pasture and hay grasses, a weed species of other

cereals, cultivated ground and in meadows, bushland, pampas, pasture, open habitats, weedy places, roadsides, grasslands, dry wasteland and heavy places, some species a serious annual grass weed in winter cereals in North Africa and Mediterranean regions, southern Spain, Italy, Turkey and in Greece, potentially nitrate-poisonous, hybrids with *Arrhenatherum* P. Beauv., type *Avena fatua* L., see *Species Plantarum* 1: 79-81. 1753, *Genera Plantarum*. edition 5. 34. 1754, *Introductio ad Historiam Naturalem* 74. 1777, Pietro Bubani, *Flora Virgiliana*. 24-25. Europe, Egypt to Morocco. Annual, solitary or tufted, clumping, robust, erect or decumbent and rooting at base, herbaceous, flat and not grooved leaves, auricles absent, basal leaf sheaths not keeled, sheaths loose, finely denticulate ligule membranous to chartaceous, inflorescence very variable in shape, pyramidal green nodding terminal panicle 1-sided, cleistogamous and drooping spikelets, glumes subequal or equal, lower glume dorsally rounded and narrowly ovate, lemmas glabrous and shortly 2-toothed at the top, awn with a distinct column, palea cartilaginous and 2-keeled, anthers yellow, pilose to spiny golden fruit ventrally compressed and longitudinally grooved, cultivated in many varieties, frequently escaped and naturalized, Ayurvedic use, tonic and diuretic, laxative and calmativ, vulnerary, soil improver, fodder, forage, grain crop, a very nutritious source of food, crushed grain and straw for feeding horses, under some circumstances capable of poisoning livestock,

open grass plain, common in waste places, fallow fields, along roadsides, disturbed areas, dry soil, occasionally in damp ground, see *Species Plantarum* 1: 79. 1753, *Species Plantarum, Editio Secunda* 1: 118. 1762, *Spicilegium Florae Lipsicae* 52. 1771, *Novi Commentarii Societatis Regiae Scientiarum Göttingensis* 6: f. 32, f. 33. 1775, *Saggi scientifici e letterarj dell' accademia di Padova* 2: 101. 1789, *Exercitia Phytologica* 2: 539. 1792, *Prodromus Plantarum Capensium, ...* 22. 1794, *Flore des Environs de Paris* 59. 1799, *Collectanea* 126. 1809, *Systema Vegetabilium, editio decima sexta* 2: 669. 1817, *Topographische Nachrichten von der Insel Oesel* 20. 1823, *Linnaea* 14(6): 544. 1841, *A Class-book of Botany* edition 2. 610. 1847, *Linnaea* 21(4): 392. 1848, *Flora von Nieder-Österreich* 58. 1859, *Enumeratio Plantarum Transsilvaniae* 756. 1866, *Landwirthschaftliche Flora* 321. 1866, *Österreichische Botanische Zeitschrift* 20: 22. 1870, *Mitteilungen der Geographischen Gesellschaft zu Jena* 3: 238. 1885, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 6: 244. 1885 and *Bulletin Agricole de l'Algérie et de la Tunisie* 16: 354-356, f. i-f, f. 4. 1910, *Vierteljahrsschrift der Naturforschenden Gesellschaft in Zürich* 56: 325. 1911, *Index to the Linnean Herbarium, with Indication of ...* 42. 1912, *La flore adventice de Montpellier* 110. 1912, *Repertorium Specierum Novarum Regni Vegetabilis* 13: 53. 1913, *Journal of Heredity* 5: 77. 1914, *Revista Agronómica* (Lisbon) 19(4): 19. 1931, *Flora URSS* 2: 268. 1934, *Boletim da Sociedade Broteriana, ser. 2* 13: 611. 1938-1939, *Revista Sudamericana de Botánica* 6: 141. 1940, *Grasses of Ceylon* 50. 1956, *Grasses of Burma ...* 434. 1960, *Taxon* 23: 579-583. 1974, *N.Z. A. x glabrata Hausskn. (*Avena sativa* x *Avena fatua*)

Japan, Asia, Europe. See *Nomenclator Botanicus. Editio secunda* 1: 172. 1840.

A. x haussknechtii Nevski (*Avena haussknechtii* Nevski; *Avena sativa* x *Avena sterilis*)

Europe, Asia.

Avena Scop. = *Avena* L., *Lagurus* L.

Nom. illeg., non *Avena* L.

Pooideae, Poeae, Agrostidinae, see *Species Plantarum* 1: 81. 1753, *Introductio ad Historiam Naturalem* 74. 1777 and *Contributions from the United States National Herbarium* 48: 126-138, 420. 2003.

Avenaria Fabr. = *Avenaria* Heist. ex Fabricius, *Bromus* L.

Referring to the genus *Avena* L.

Pooideae, Bromae, see *Species Plantarum* 1: 76-78. 1753, *Enumeratio Methodica Plantarum* 206. 1759 and *U.S.D.A. Div. Agrostol. Bull.* 23: 1-66. 1900, *Brittonia* 7: 421. 1952, *Notes Roy. Bot. Gard. Edinburgh* 30: 366. 1970, *Taxon* 41: 559. 1992, *Taxon* 44: 611-612. 1995, *Contributions from the United States National Herbarium* 48: 154-191. 2003.

Avenastrum Opiz = *Avenastrum* Jess., *Helictotrichon* Besser, *Helictotrichon* Besser ex Schult. & Schult.f., *Helictotrichon* Schult.

Resembling the genus *Avena* L., *astrum* is a Latin substantial suffix indicating inferiority or incomplete resemblance.

Pooideae, Poeae, Aveninae, type *Avenastrum sempervirens* (Vill.) Vierh., see *Deutschlands Gräser und Getreidearten* 53, 214, f. 95. Leipzig 1863 and *Verhandlungen der Gesellschaft Deutscher Naturforscher und Ärzte* 85(2): 671-672. 1914, *Introd. S. African Grasses* 32. 1931, *Feddes Repertorium* 45: 7. 1938, *Folia Geobot. Phytotax.* 2: 402. 1967, *Contributions from the United States National Herbarium* 48: 382-383. 2003.

Avenella (Bluff & Fingerh.) Drejer = *Avenella* Parl., *Deschampsia* P. Beauv.

The genus *Avena* L. plus the diminutive.

Pooideae, Poeae, Airinae, type *Avenella flexuosa* (L.) Drejer, see *Species Plantarum* 1: 63-66. 1753, *Essai d'une Nouvelle Agrostographie* 91, 149, 160. 1812, *Compendium Florae Germaniae. Editio altera* 1(1): 139. 1836, *Flora Excursoria Hafniensis* 32. 1838, *Flora italiana, ossia descrizione delle piante ...* 1: 246. 1848, *Die Natürlichen Pflanzenfamilien* 2(2): 54. 1887 and *Bot. Not.* 1953(3): 356. 1953, *Folia Geobotanica et Phytotaxonomica* 1(3): 294. 1976, *Contributions from the United States National Herbarium* 48: 245-256. 2003.

Avenochloa Holub = *Avenula* (Dumort.) Dumort., *Helictotrichon* Besser, *Helictotrichon* Besser ex Schult. & Schult.f., *Helictotrichon* Schult.

The genus *Avena* L. and *chloe*, *chloa* "grass."

Pooideae, Poeae, see *Bulletin de la Société Botanique de Belgique* 7: 68. 1868 and *Feddes Repertorium* 45: 7. 1938, *Acta Horti Botanici Pragensis* 1962: 82. 1962, *Contributions*

from the United States National Herbarium 48: 139-140, 382-383. 2003.

Avenula (Dumort.) Dumort. = *Avenastrum* Jess., *Avenochloa* Holub, *Danthorhiza* Tenore, *Helictotrichon* Besser, *Helictotrichon* Besser ex Schult. & Schult.f., *Helictotrichon* Schult.

Referring to the genus *Avena* L., a diminutive.

About 30 species, most of which are European. Pooideae, Poaceae, perennial, caespitose or stoloniferous, unribbed leaves, sheaths usually open, ligules membranous and acute, leaf blades flat or folded, inflorescence a reduced panicle, flattened awns, unlobed lodicules, liquid to semiliquid endosperm, related to and frequently included in *Helictotrichon*, type *Avenula pubescens* (Huds.) Dumort., see *Flora Napolitana* 1: x. 1811, *Observations sur les Graminées de la Flore Belgique* 122. 1824, *Deutschlands Gräser und Getreidearten* 53, 214, f. 95. 1863, *Bulletin de la Société Botanique de Belgique* 7(1): 68. 1868 and *Feddes Repertorium* 45: 7. 1938, *N. Amer. Fl.* 17: 568. 1939, *Acta Horti Botanici Pragensis* 1962: 82. 1962, *Folia Geobot. Phytotax.* 11(3): 294. 1976, *Preslia* 49: 203-221. 1977, *Phyton. Annales Rei Botanicae* 24: 193-223. 1984, *Acta Botanica Croatica* 43: 315-328. 1984, *Annali di Botanica* 45: 75-102. 1987, *International Organization of Plant Biosystematists Newsletter* 17: 7-8. 1991, *Restoration Ecology* 5(1): 66-76. Species

A. albinervis (Boiss.) M. Láziz (*Avena albinervis* Boiss.; *Avena sulcata* J. Gay ex Delastre var. *albinervis* (Boiss.) DC.)

Europe. See *Voyage botanique dans le midi de l'Espagne* 2: 656, t. 176. 1839-1845 and M. Láziz, "Aportaciones al conocimiento de la flora gallega, viii." *Comun. I.N.I.A.*, no. 2, 26 p. 1974.

A. bromoides (Gouan) H. Scholz (*Avena bromoides* Gouan; *Avenula bromoides* (Gouan) M. Láziz, nom. illeg., non *Avenula bromoides* (Gouan) H. Scholz)

Europe. See *Hortus Regius Monspelienis* 52. 1762 and *Willdenowia* 7(2): 420. 1974, *Comunicaciones I.N.I.A. Serie: Recursos Naturales* 2: 23. 1974.

A. crassifolia (Font Quer) Holub (*Avena crassifolia* Font Quer)

Spain. See *Folia Geobotanica et Phytotaxonomica* 2 11(3): 295. 1976.

A. dahurica (Kom.) W. Sauer & H. Chmelitschek (*Avena planiculmis* subsp. *dahurica* Kom., *Avenastrum dahuricum* (Kom.) Roshev., *Avenochloa dahurica* (Kom.) Holub; *Avenula dahurica* (Kom.) Holub, nom. illeg., non *Avenula dahurica* (Kom.) W. Sauer & H. Chmelitschek)

Eurasia. See *Flora Germanica* 1: 381, t. 6, f. 2. 1806 and *Flora Peninsulae Kamtschatka* 1: 159. 1927, *Flora URSS* 2: 275. 1934, *Report of the Institute of Scientific Research, Manchoukuo* 3(1): 77. 1939, *Acta Horti Botanici Pragensis* 1962: 84. 1962, *Mitteilungen der Botanischen Staatssammlung München* 12: 582. 1976, *Folia Geobotanica et Phytotaxonomica* 11(3): 295. 1976.

A. delicatula Franco

Spain, Portugal. See *Botanical Journal of the Linnean Society* 76(4): 359. 1978.

A. hackelii (Henriq.) Holub (*Avena hackelii* Henriq.)

Spain, Portugal. See *Boletim da Sociedade Broteriana* 20: 87. 1905, *Folia Geobotanica et Phytotaxonomica* 11(3): 295. 1976.

A. hookeri (Scribner) Holub (*Arrhenatherum hookeri* (Scribn.) Potzta; *Avena americana* (Scribn.) Scribn.; *Avena hookeri* Scribn.; *Avena pratensis* var. *americana* Scribn.; *Avenastrum asiaticum* Roshev.; *Avenochloa asiatica* (Roshev.) Holub; *Avenochloa hookeri* (Scribn.) Holub; *Helictotrichon asiaticum* (Roshev.) Grossh.; *Helictotrichon hookeri* (Scribn.) Henrard)

Europe. See *Essai d'une Nouvelle Agrostographie* 55, 152, 153. 1812, *Botanical Gazette* 11: 177. 1886, E. Hackel (1850-1926), *The True Grasses* 123. New York 1890 [translated by F. Lamson-Scribner (1851-1938) and Effie A. Southworth], *Bulletin, Division of Agrostology United States Department of Agriculture* 7; 183, f. 165. 1897 and *Blumea* 3(3): 429. 1940, *Acta Horti Botanici Pragensis* 1962: 82, 84. 1962, *Willdenowia* 4: 400. 1968, *Folia Geobotanica et Phytotaxonomica* 11(3): 295. 1976.

A. hookeri (Scribner) Holub subsp. **hookeri**

Europe.

Caespitose, erect, leaf blades blades glabrous to scabrid, sheath glabrous to scabrid, ligule usually lacerate, glumes acute, grows on open prairie slopes

in English: spike oat

A. marginata (Lowe) Holub (*Avena marginata* Lowe)

Europe. See *Transactions of the Cambridge Philosophical Society* 6: 529. 1838 and *Preslia* 49(3): 219. 1977.

A. marginata (Lowe) Holub subsp. **sulcata** (J. Gay ex Delastre) Franco (*Avena sulcata* J. Gay ex Delastre; *Avena sulcata* Gay ex Boissier; *Avena sulcata* J. Gay ex Delastre var. *sulcata*; *Avenula sulcata* (J. Gay ex Delastre) Dumort.; *Avenula sulcata* (Gay ex Boissier) Dumort.; *Helictotrichon sulcatum* (Delastre) Henrard)

Europe.

A. pubescens (Hudson) Dumort.

Eurasia. Shortly stoloniferous, leaf blades blades pubescent, sheath pubescent, grows in meadows, pastures, and woodland clearings.

in English: oat

A. pubescens (Hudson) Dumort. subsp. **laevigata** (Schur) Holub

Eurasia.

Smooth leaves.

A. pubescens (Hudson) Dumort. subsp. **pubescens**

Eurasia.

Pilose to pubescent leaves.

A. sulcata (Gay ex Boissier) Dumort. (*Avena sulcata* J. Gay ex Delastre; *Avena sulcata* Gay ex Boissier; *Avenastrum sulcatum* (Gay ex Boissier) Vierh.; *Avenochloa sulcata* (Gay ex Boissier) Holub; *Avenula sulcata* (J. Gay ex Delastre) Dumort.

Europe. See *Elenchus Plantarum Novarum* 88. 1838, *Bulletin de la Société Botanique de Belgique* 7(1): 68. 1868 and *Acta Horti Botanici Pragensis* 1962: 85. 1962.

Axonopus P. Beauv. = *Anastrophus* Schldl., *Axonopus* Hook.f., *Cabrera* Lag., *Lappagopsis* Steud.

From the Greek *axon*, *axonos* “axis, stem, axle” and *pous*, *podos* “a foot,” referring to the stolons or to the digitate inflorescences; Latin *axon*, *onis* (*axis*, *is* “axle, pivot,” from *ago*, *egi*, *actum*, *ere* “to move”); from the ancient Indian *aksa*; from the ancient German *ahsa* and the Avestic *asa*; see A.M.F.J. Palisot de Beauvois, *Essai d'une nouvelle Agrostographie*. 12, 154. (Dec.) 1812.

About 35/(110-)114 species, tropical and subtropical America, Africa. Panicoideae, Panicoideae, Paniceae, or Panicoideae, Paniceae, Paspalinae, annual or perennial, erect,

stoloniferous or rhizomatous, caespitose, sometimes mat-forming, herbaceous, ligule an unfringed membrane, leaves oblong and blunt, plants bisexual, inflorescence of spicate main branches digitate or nondigitate, 2 to many racemes linear, spikelets solitary and dorsally compressed, 2 florets, lower floret sterile, upper floret bisexual, glumes 1 per spikelet, lower glume absent or suppressed, upper lemma hardened and obtuse, upper glume and lower lemma as long as spikelet, palea present, 2 minute lodicules free and fleshy, usually 3 stamens, ovary glabrous, 2 stigmas, lawn grass, weed species, cultivated fodder, native pasture species, playing fields, usually in grassland, on dry pampas near woods, disturbed soil, open grassy plain, sandy open hillsides, open meadow, pampas, evergreen forest, rocky dry ground, low moist ground, degraded pastures, wet sandy soil, open habitats, moist and weedy places, marshy areas, savannah, forest clearings, along a drainage ditch, type *Axonopus aureus* P. Beauv., see *Species Plantarum* 1: 55. 1753, *Systema Naturae, Editio Decima* 846, 855, 1359. 1759, *Prodr.* 24. 1788, *Essai d'une Nouvelle Agrostographie* 12, 154. 1812, *Genera et species plantarum* 5. 1816, *Flora Brasiliensis seu Enumeratio Plantarum* 2: 24. 1829, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Giraldo-Cañas], *Contributions from the United States National Herbarium* 46: 18-19, 116-134, 143-144, 278. 2003, *Am. J. Bot.* 90: 796-821. 2003.

Species

A. affinis Chase (*Axonopus compressus* (Sw.) P. Beauv.; *Axonopus compressus* sensu Chippind., non (Swartz) P. Beauv.; *Axonopus compressus* var. *affinis* (Chase) Henderson; *Axonopus fissifolius* (Raddi) Kuhl.; *Axonopus fissifolius* var. *fissifolius*)

Tropical America, West Indies, southern U.S. Perennial creeping grass, leafy, shallow-rooted, glabrous, caespitose, compact, forming dense mats, shortly rhizomatous and with slender stolons, poor root development and poor drought resistance, flat stems, culms erect or ascending, glabrous nodes, leaves with a rounded apex, sheath compressed and keeled, ligule a ciliolate rim, racemes on a long slender stem, erect or spreading straight spikes, spikelets arranged in two neat rows, spikelets usually obtuse and fuzzy, upper glume and sterile lemma membranous on the back, fertile floret white to pale yellow in color and subequal to the spikelet, light seeds, often a weed species and a prolific seeder, adapted to light-textured soils, fair grazing for wildlife and livestock, a good horse feed, fairly palatable till flowering, very low nutritive value, cultivated fodder, lawn grass, ground cover, baseball fields, sown in tropical pastures, widely naturalized in the wild, stands heavy defoliation and tolerates overgrazing, does not withstand prolonged flooding or permanently swampy conditions, rapidly spreading by stolons and rhizomes, useful to prevent erosion, often confused with and usually referred to *Axonopus fissifolius* (Raddi) Kuhl., occurs in disturbed habitats and places, improved pastures, grows on poor soil, sandy moist to alluvial soils, subhumid and humid woodland and savannah, sandy or sandy-loam soils with readily available moisture, often in waterlogged sites, cultivated fields, see *Essai d'une Nouvelle Agrostographie* 12, 154, 167. 1812, *Agrostografia Brasiliensis* 26. 1823 and *Comissão de Linhas Telegraphicas Estratégicas de Matto-Grosso ao Amazonas*, *Botanica* 67(Bot. 11): 87. 1922, *Journal of the Washington Academy of Sciences* 28: 180, f. 2. 1938, *Malayan Wild Flowers, Monocotyledons*. Mal. Nat. Soc. Kuala Lumpur 339. 1954, *Grasses of Ceylon* 147, pl. 34. 1956, *Ceylon J. Sci.*, *Biol. Sci.* 2(2): 128. 1959, *Grasses of Burma ...* 277. 1960.

in English: common carpet grass, carpet grass, compressum, narrow-leaved carpet grass, Swazi grass, Durrington grass, mat grass, lawn-grass

in Mexico: pasto chato común

in South Africa: gewone matgras

in Sri Lanka: sinna sappu pul, hin potu tana

A. amapaensis G.A. Black

Brazil. See *Advancing Frontiers of Plant Sciences* 5: 104, f. 3 e-f. 1963.

A. anceps (Mez) Hitchc. (*Axonopus aturensis* Lucas; *Axonopus caracarhyensis* G.A. Black & Fróes; *Axonopus*

erectus Swallen; *Axonopus pruinosis* Henrard; *Paspalum anceps* Mez; *Paspalum scoparium* var. *parviflorum* Döll)

West Indies, Venezuela. Perennial, not stoloniferous, leaf sheaths keeled and overlapping, leaf blades elongate, loosely spreading racemes, spikelets silky pubescent, savannah, open grassland, see *Graminum Monographiae ... Pars. I. Paspalum. Reimaria* 124. 1810, *Flora Brasiliensis* 2(2): 107. 1877 and *Repertorium Specierum Novarum Regni Vegetabilis* 15: 61. 1917, *Manual of the Grasses of the West Indies* 190. 1936, *Blumea* 5(3): 527-529. 1945, *Boletim Técnico do Instituto Agrônômico do Norte* 20: 34, t. 3. 1950, *Fieldiana, Botany* 28(1): 19. 1951, *Boletín de la Sociedad Venezolana de Ciencias Naturales* 15(80): 23-24, f. 16. 1953.

A. andinus G.A. Black

Bolivia. Perennial, caespitose, geniculate, glabrous nodes, leaf blades linear or lanceolate and acuminate, inflorescences terminal, racemes solitary or paired, spikelets lanceolate or oblong, see *Advancing Frontiers of Plant Sciences* 5: 111. 1963.

A. apricus G.A. Black

Brazil. Erect, tufted, open habitats, slopes, rocky places, see *Advancing Frontiers of Plant Sciences* 5: 43. 1963.

A. arcuatus (Mez) G.A. Black (*Axonopus arcuatus* (Mez) Dedecca; *Paspalum arcuatum* Mez)

Hitchc.) (named for Christen Christiansen Raunkiaer, 1860-1938)

Northern and southern America, tropical America. Perennial or annual, vigorous and rather coarse, creeping, sward-forming, shallow-rooted, rhizomatous and distinctly stoloniferous, stolons compressed, erect culms arising from the older nodes, nodes usually hairy to densely villous, flattened internodes, leaf blades linear-lanceolate and not folded, sheath compressed and keeled, ligule membranous, blunt-ended leaves, inflorescence with 2-3 racemes, erect or spreading spikes, spikelets acute and 1-sided in 2 rows, rachis and spikelets glabrous to pubescent, lower glume absent, upper glume and sterile lemma membranous on the back, fertile floret shorter than the spikelet, small lodicules, 3 stamens, white stigmas, weed species, potential seed contaminant, spreads quickly by stolons and rhizomes forming dense mats in grazed pasture, a good pasture grass in wet areas, forage, cultivated fodder, fairly palatable to stock, utilized for whooping cough, sometimes used as abortifacient, ornamental, used in soil conservation schemes, useful for erosion control, stabilizes erosive soils in the higher rainfall tropics, used in the establishment of a hard-wearing turf, used widely as a lawn and sward grass, playing fields, withstands poor conditions and heavily grazing, survives seasonal flooding but it is not tolerant of swampy conditions, grows well in the shade, economic plant, introduced and widely naturalized into most tropical and subtropical countries, allergic contact dermatitis, common in open second growth and old horse pastures, marshy places, sandy prairies, low moist ground, subhumid and humid woodland and savannah, in shaded moist grassland, roadsides and disturbed moist places, pathsides, moist sandy soils, forest margins, savannah margins, see *Species Plantarum* 57. 1753, *Nova Genera et Species Plantarum seu Prodrum*

Asia.

A. obtusifolius (Raddi) Chase (*Anastrophus obtusifolius* (Raddi) Nash; *Axonopus chaseanus* (Raddi) Herter; *Axonopus obtusifolius* (Raddi) Kuhl.; *Paspalum furcatum* var. *grandiflorum* Döll; *Paspalum obtusifolium* Raddi)

Brazil. Stoloniferous, inflorescence of 1-2 racemes, found in disturbed places, moist ground, arid places, shady woodland margins, see *Graminum Monographiae ... Pars I. Paspalum. Reimaria* 114. 1810, *Agrostografia Brasiliensis* 23. 1823, *Flora Brasiliensis* 2(2): 104. 1877 and *North American Flora* 17(2): 162. 1912, *Journal of the Washington Academy of Sciences* 13(9): 171. 1923, *Revista Sudamericana de Botánica* 9: 111. 1953, *Advancing Frontiers of Plant Sciences* 5: 71. 1963.

A. obtusifolius (Raddi) Chase var. *obtusifolius* (*Anastrophus obtusifolius* (Raddi) Nash; *Axonopus chaseanus* (Raddi) Herter; *Paspalum furcatum* var. *grandiflorum* Döll; *Paspalum obtusifolium* Raddi)

South America.

A. obtusifolius (Raddi) Chase var. *rolfsii* G.A. Black

Brazil. Stoloniferous, found in disturbed places, moist ground, see *Advancing Frontiers of Plant Sciences* 5: 71. 1963.

A. oiapocensis G.A. Black (after Rio Oiapoque or Oyapock River)

Brazil. Annual, rare, tufted, unbranched, foliage mostly basal, ligule a ciliate membrane, peduncles filiform, divergent racemes, spikelets acute to acuminate, rocky places, related to *Axonopus capillaris* (Lam.) Chase, see *Advancing Frontiers of Plant Sciences* 5: 154, t. 13. 1963.

A. paniceus (Sw.) P. Beauv. (*Digitaria panicea* (Sw.) Urb.; *Milium paniceum* Sw.)

South America. See *Nova Genera et Species Plantarum seu Prodomus* 24. 1788, *Essai d'une Nouvelle Agrostographie* 12, 154, 168. 1812 and *Symbolae Antillarum* 8: 23. 1920.

A. paschalis (Stapf) Pilg. (*Paspalum paschale* Stapf; *Paspalum scoparium* var. *oligostachyum* Hack. ex Fuentes)

America, Easter Islands. See *Bulletin of Miscellaneous Information Kew* 1913: 117. 1913, C. Skottsberg (1880-1963), editor, *The Natural History of Juan Fernandez and Easter Island* 2(5): 63, t. 6, f. 2. Uppsala 1922.

A. passourae G.A. Black

America. Perennial, caespitose, robust, leaves basal, leaf sheaths keeled, ligules fringed, racemes loosely ascending, spikelets acute, savannah, related to *Axonopus equitans* Hitchc. & Chase, see *Advancing Frontiers of Plant Sciences* 5: 117, t. 8. 1963.

A. pellitus (Nees ex Trin.) Hitchc. & Chase (*Anastrophus pellitus* Schlecht. ex Jackson; *Axonopus swallenii* G.A. Black; *Paspalum barbatum* var. *pellitum* (Nees ex Trin.) Döll; *Paspalum dolichostachyus* Trin. ex Nees; *Paspalum pellitum* Nees ex Trin.; *Paspalum pellitum* Nees, nom. illeg., non *Paspalum pellitum* Nees ex Trin.)

Brazil. Erect or spreading, large, villous or pilose leaf blades, open sandy ground, see *De Graminibus Paniceis* 89. 1826, *Flora Brasiliensis seu Enumeratio Plantarum* 2: 30. 1829, *Flora Brasiliensis* 2(2): 108. 1877, *Index Kewensis* 1: 118. 1893 and *Contributions from the United States National Herbarium* 18(7): 301. 1917, *Advancing Frontiers of Plant Sciences* 5: 92, f. 3 m-n. 1963.

A. pennellii G.A. Black (for the American botanist Francis Whittier Pennell, 1886-1952, bibliographer, traveler, plant collector, specialist on Scrophulariaceae, collected with E.P. Killip and T.E. Hazen in Colombia, 1924-1952 edited *Bartonia*, his works include "What is *Commelina communis*?" *Proc. Acad. Nat. Sci. Philadelphia*. 90: 31-39. 1939 and "Veronica in North and South America." *Rhodora*. 23(265): 1-22, 23(266): 29-41. 1921. See J.H. Barnhart, *Biographical notes upon botanists*. 3: 66. Boston 1965; Walter Mackinnett Benner (1888-1970), "Francis Whittier Pennell." *Bartonia*. 26: 16-17. 1952; Joseph Ewan, *Rocky Mountain Naturalists*. The University of Denver Press 1950; J. Ewan,

editor, *A Short History of Botany in the United States*. 1969; J. Ewan and Nesta Dunn Ewan, "Biographical dictionary of Rocky Mountain naturalists." *Reg. Veget.* 107: 1-253. 1981; Irving William Knobloch, compil., "A preliminary verified list of plant collectors in Mexico." *Phytologia Memoirs*. VI. 1983; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993; George Neville Jones, *An Annotated Bibliography of Mexican Ferns*. Sci. Philadelphia* 95: 4, 10. 1942; *Proc. Acad. Nat. Sci. Philad.* 99: 161. 1947; *Fieldiana* 31: 228. 1967; *Phytologia* 19: 370. 1970; *Castanea* 65(2): 112. 2000)

Colombia. See *Advancing Frontiers of Plant Sciences* 5: 142-143, f. 4g. 1963.

A. piccae Giraldo-Cañas

Colombia. See *North American Flora* 17(2): 163. 1912, *Caldasia* 21(2): 133, f. 1-3. 1999.

A. poiophyllus Chase (*Anastrophus poiophyllus* (Chase) Nash; *Axonopus blakei* Hitchc.; *Axonopus caespitosus* Swallen; *Axonopus fissifolius* (Raddi) Kuhlm.; *Axonopus lineatus* G.A. Black; *Axonopus reederii* G.A. Black; *Axonopus rhizomatosus* Swallen)

Guatemala, Panama, Colombia, Belize. Erect, bunchgrass, savannah, see *Proceedings of the Biological Society of Washington* 24: 133. 1911, *North American Flora* 17(2): 163. 1912, *Proceedings of the Biological Society of Washington* 40: 85. 1927, *Journal of the Washington Academy of Sciences* 23(10): 458. 1933, *Annals of the Missouri Botanical Garden* 30(2): 185. 1943, *Advancing Frontiers of Plant Sciences* 5: 45, 67, f. 2k. 1963.

A. poiretii Roem. & Schult. (*Sporobolus poiretii* (Roem. & Schult.) Hitchc.)

Neotropics, warm and hot regions, Pacific Islands. Perennial, invasive grass, widely naturalized in disturbed areas of tropical regions, often confused with *Sporobolus indicus* (L.) R. Br., see *Systema Vegetabilium* 2: 318. 1817 and *Bartonia* 14: 32. 1932.

in English: smut grass, smutgrass, wiregrass, Indian dropseed

A. polydactylus (Steud.) Dedecca (*Agrostis polydactyla* Salzm. ex Steud.; *Axonopus gracilis* G.A. Black; *Axonopus*

polydactylos (Steud.) Dedecca; *Paspalum polydactylon* Steud.)

Brazil. Perennial, caespitose, erect, sheaths strongly compressed and keeled, leaf blades linear, leaves glabrous to pilose, glabrous spikelets solitary and alternate, on rocky or sandy soils, savannah, open areas, deep sandy soil, see *Bragantia* 15: 273, f. 16. 1956, *Memoirs of the New York Botanical Garden* 9(3): 254. 1957.

A. polystachyus Black (*Axonopus compressus* var. *itirapinensis* G.A. Black; *Axonopus fissifolius* var. *polystachyus* (G.A. Black) L.B. Sm. & Wassh.; *Axonopus polydactylus* (Steud.) Dedecca)

Eastern and southern Brazil. Perennial, tufted, erect, common in damp places, forest margins and along roadsides, edge of marsh, see *Essai d'une Nouvelle Agrostographie* 12, 154. 1812 and *Advancing Frontiers of Plant Sciences* 5: 62, 82, f. 2, q-r. 1963, *Flora Ilustrada Catarinense* 1(Gramin.): 1125. 1982.

A. pressus (Nees ex Steud.) Parodi (*Axonopus derbyanus* G.A. Black; *Axonopus derbyanus* var. *derbyanus*; *Axonopus derbyanus* var. *parvispicula* G.A. Black; *Axonopus pressus* (Steud.) Parodi; *Axonopus pressus* Nees ex Torrend; *Paspalum pressum* Nees ex Steud.; *Paspalum pressum* Nees)

Argentina, Brazil. Perennial, stoloniferous, rhizomatous, robust, caespitose, erect, ascending, vigorous, largely clumped, leaf blades usually folded or strongly keeled, ligules ciliate, nodes glabrous, panicle nodding, gravelly sites, savannah, sandy soils, see *Synopsis Plantarum Glumacearum* 1: 23. 1855 [1853] and *Broteria* 3(2): 119. 1933, *Notas del Museo de la Plata, Botánica* 3(17): 23. 1938, *Advancing Frontiers of Plant Sciences* 5: 127, 130. 1963.

A. pubivaginitus Henrard (*Axonopus maguirei* G.A. Black; *Axonopus pressus* (Nees ex Steud.) Parodi; *Axonopus pubivaginitus* var. *limae* G.A. Black; *Axonopus pubivaginitus* var. *pubivaginitus*; *Axonopus pubivaginitus* var. *tomentosus* G.A. Black) (after the American botanist Bassett Maguire, 1904-1991, explorer, plant collector, from 1943 New York Botanical Garden, among his writings are "Guttiferae." in R.E. Schultes, "Plantae Austro-Americanae VII." *Bot. Mus. Leaflet* 15(2): 55-69. 1951, "Guttiferae." in B. Maguire, J.J. Wurdack and collaborators, "The Botany of the Guayana Highland-part IV(2)." *Mem. New York Bot. Gard.* 10(4): 21-32. 1961, "Rapateaceae." in B. Maguire, J.J. Wurdack and collaborators, "The Botany of the Guayana Highland-part VI." *Mem. New York Bot. Gard.* 12(3): 69-102. 1965 and "Notes on the Clusiaceae - chiefly of Panama. III." *Phytologia* 39(2): 65-77. 1978, with Y.-C. Hung wrote "Styracaceae." in B. Maguire, J.J. Wurdack and collaborators, "The Botany of the Guayana Highland-part X." *Mem. New York Bot. Gard.* 29: 204-223. 1978, with R.E. Weaver, Jr., wrote "The neotropical genus *Tachia* (Gentianaceae)." *J. Arnold Arbor.* 56(1): 103-125. 1975,

with J.A. Steyermark and D.G. Frodin wrote "Araliaceae." in B. Maguire, J.J. Wurdack and collaborators, "The Botany of the Guayana Highland-part XII." *Mem. New York Bot. Gard.* 38: 46-84. 1984; see J.H. Barnhart, *Biographical notes upon botanists*. 2: 436. 1965; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. Philadelphia 1964; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 249. 1972; S. Lenley et al., *Catalog of the manuscript and archival collections and index to the correspondence of John Torrey*. Library of the New York Botanical Garden. 279. 1973; J. Ewan, editor, *A Short History of Botany in the United States*. 22. 1969; Laurence J. Dorr, "In Memoriam. John J. Wurdack, 1921-1998." in *Plant Science Bulletin*. 44(2): 41. Summer 1998)

Suriname, Brazil, Colombia. Perennial bunchgrass, coarse, nodes densely hairy, forming clumps, leaf blades narrowly acute, ligules ciliate, racemes loosely ascending, spikelets acute, in disturbed areas, dry lowland, open areas, savannah, cerrado, related to *Axonopus equitans* Hitchc. & Chase, see *Blumea* 5(1): 276-278. 1942, *Memoirs of the New York Botanical Garden* 9: 252, f. 5a. 1957, *Advancing Frontiers of Plant Sciences* 5: 110-111. 1963.

Reimaria* 124. 1810, *Neue Entdeckungen im ganzen Umfang der Pflanzenkunde* 2: 46. 1821, *Flora Brasiliensis* 2(2): 107. 1877, *Revisio Generum Plantarum* 3(3): 361, 364. 1898 and *Anales Museo Nacional de Historia Natural de Buenos Aires* 13: 427. 1906, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 56(Beibl. 125): 10. 1921, *Anales del Museo de Historia Natural de Montevideo* ser. 2, 3(1): 49. 1929, *Revista del Jardín Botánico y Museo de Historia Natural del Paraguay* 2: 159-160. 1930, *Notas del Museo de la Plata, Botánica* 3(17): 15, 19, 21, 23, f. 1. 1938, *Revista Sudamericana de Botánica* 6: 136, f. 5. 1940, *Blumea* 4: 510. 1941, *Revista Sudamericana de Botánica* 10: 130, 131. 1953, *Advancing Frontiers of Plant Sciences* 5: 140-141. 1963.

in English: carpet grass

A. sulcatus G.A. Black

Brazil. See *Advancing Frontiers of Plant Sciences* 5: 94. 1963.

A. surinamensis (Hochst. ex Steud.) Henrard (*Axonopus fockei* (Mez) Henrard; *Axonopus fockei* (Mez) Swallen, nom. illeg., non *Axonopus fockei* (Mez) Henrard; *Axonopus surinamensis* var. *imberbis* G.A. Black; *Axonopus surinamensis* var. *surinamensis*; *Panicum surinamense* Hochst. ex Steud.; *Paspalum fockei* Mez)

Venezuela to Brazil. Perennial bunchgrass, robust, caespitose, nodes villous or bearded, foliage basal, base of leaf sheaths hispid on the back, ligule ciliate, inflorescence cylindrical, racemes loosely ascending, dry areas, savannahs, see *Synopsis Plantarum Glumacearum* 1: 42. 1853 and *Enum. Pl. Suriname* 48. 1906, *Repert. Spec. Nov. Regni Veg.* 15: 62. 1917, *Blumea* 4(3): 510. 1941, *Blumea* 5(1): 275. 1942, *Fieldiana, Botany* 28(1): 21. 1951, *Advancing Frontiers of Plant Sciences* 5: 125. 1963.

A. tamayonis Luces (*Axonopus flabelliformis* Swallen; *Axonopus kaietukensis* Swallen)

Venezuela. Bunchgrass, caespitose, sandy soil, rocky ground, see *Bulletin of the Torrey Botanical Club* 75: 82-83. 1948, *Boletín de la Sociedad Venezolana de Ciencias Naturales* 15(80): 21-22, f. 14. 1953, *Advancing Frontiers of Plant Sciences* 5: 1-186. 1963.

A. tenuis Renv. (*Axonopus aureus* P. Beauv.)

Brazil. Perennial, tufted, slender, filiform leaf blades acute or acuminate, spikelets solitary and dorsally compressed, growing on marshy ground, see *Essai d'une Nouvelle Agrostographie* 12. 1812, *Nova Genera et Species Plantarum* 1: 93, t. 27. 1815 [1816], *Systema Vegetabilium, editio decima sexta* 1: 272. 1825 and *Kew Bulletin* 39(1): 182. 1984.

A. triglochinosides (Mez) Dedecca (*Paspalum triglochinosides* Mez)

Brazil. See *Repertorium Specierum Novarum Regni Vegetabilis* 15: 61. 1917, *Bragantia* 15: 280, f. 22. 1956.

A. ulei (Hack.) Dedecca (*Axonopus barbigerus* (Kunth) Hitchc.; *Axonopus barbigerus* var. *barbigerus*; *Axonopus siccus* (Nees) Kuhl.; *Paspalum barbigerum* Kunth; *Paspalum siccum* Nees; *Paspalum ulei* Hack.)

Warm regions. See *Révision des Graminées* 1: 24. 1829, *Flora Brasiliensis seu Enumeratio Plantarum* 2: 28. 1829 and *Österreichische Botanische Zeitschrift* 51: 240. 1901, *Comissão de Linhas Telegraphicas Estratégicas de Matto-Grosso ao Amazonas, Botanica* 67(Bot. 11): 87. 1922, *Contributions from the United States National Herbarium* 24(8) 433. 1927, *Bragantia* 15: 276. 1956.

A. uninodis (Hack.) G.A. Black (*Axonopus plumosus* (Henrard) Henrard; *Paspalum plumosum* Henrard; *Paspalum uninode* Hack.)

South America, Brazil. See *Ergebnisse der Botanischen Expedition nach Südbrasilien* 1: 6. 1906, *Denkschr. Kaiserl. Akad. Wiss., Math.-Naturwiss. Kl.* 79: 67. 1908, *Mededeelingen van's Rijks-Herbarium* 47: 1-2. 1922, *Advancing Frontiers of Plant Sciences* 5: 102. 1963.

A. villosus Swallen

Venezuela. See *Fieldiana, Botany* 28(1): 21. 1951.

A. volcanicus R.W. Pohl

Costa Rica. Vulnerable species, compact, terrestrial, leaves green-whitish, green inflorescences, stigmas dark purplish, see *Fieldiana: Botany, New Series* 4: 84. 1980.

A. yutajensis G.A. Black (*Axonopus arundinaceus* G.A. Black)

Venezuela. See *Memoirs of the New York Botanical Garden* 9(3): 251. 1957.

A. zuloagae Giraldo-Cañas

Colombia. See *Caldasia* 20(2): 89, f. 3-4. 1998.

B

Balansochloa Kuntze = *Germainia* Balansa & Poitrasson

For the French botanist Benedict Balansa, 1825-1891, explorer and botanical collector in Asia Minor, North Africa, Indo-China and Paraguay. See J.H. Barnhart (1871-1949), *Biographical notes upon botanists*. 1: 110. 1965; Gaston Astre, *La vie de Benjamin Balansa, botaniste explorateur*. Toulouse 1947; Ernest Saint-Charles Cosson (1819-1889), *Compendium florae atlanticae*. Paris 1881-1887; Carlo Luigi Spegazzini (1858-1926), *Fungi guaranitici pugillus i-ii*. Buenos Aires 1883-1888 and *Fungi guaranitici nonnulli novi v. critici*. Buenos Aires 1891; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 22. 1972; H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 124-125. Oxford 1964; Clyde F. Reed, *Bibliography to Floras of Southeast Asia*. 1969.

Panicoideae, Andropogonodae, Andropogoneae, Andropogoninae, see *Bulletin de la Société d'Histoire Naturelle de Toulouse* 7: 344, f. 1-9. 1873, *Flora Australiensis: A Description ...* 7: 518-519. 1878, *Monogr. Phan.* 6: 255. 1889, *Journal de Botanique (Morot)* 4: 83. 1890 and *Lexikon Generum Phanerogamarum* 247. 1903 [1904], *Bulletin du Muséum d'Histoire Naturelle* 25: 285. 1919, *Hooker's Icones Plantarum*. Ser. 5. 3, t. 3262. 1935, *Die natürlichen Pflanzenfamilien, Zweite Auflage* 14e: 124. 1940, *Australian Journal of Botany* 2: 108. 1954, *Journal of the Royal Society of Western Australia* 44(3): 77-83. 1961, *Dansk Botanisk Arkiv* 23(4): 467-471. 1968, *Thai Forest Bulletin. Botany* 6: 29-59. 1972, *Blumea* 45: 443-475. 2000.

Baldingera P. Gaertner, B. Meyer & Scherbius = *Phalaris* L., *Phalaroides* Wolf

After the German botanist Ernst Gottfried Baldinger, 1738-1804, physician, author of *Ueber das Studium der Botanik und die Erlernung derselben*. Jena 1770, *Ueber Litterar-Geschichte der theoretischen und praktischen Botanik ...* Marburg 1794 and *Index plantarum horti et agri jenensis ...* Gottingae et Gothae 1773. See J.H. Barnhart, *Biographical notes upon botanists*. 1: 111. 1965; Jonas C. Dryander, *Catalogus bibliothecae historico-naturalis Josephi Banks*. London 1796-1800.

Pooideae, Poaeae, Phalaridinae, see *Genera Plantarum* 11. 1776, *Flora der Wetterau* 1: 43, 96. 1799 and *Iowa State College Journal of Science* 36(1): 1-96. 1961, *Webbia* 49(29): 265-329. 1995, *Contributions from the United States National Herbarium* 48: 140, 479-488. 2003.

Baldomiria Herter = *Leptochloa* P. Beauv.

Chloridoideae, Cynodonteae, type *Baldomiria chloridiformis* (Hack.) Herter, see *Essai d'une Nouvelle Agrostographie* 71, 161. 1812 and *Anales del Museo Nacional de Buenos Aires* 13: 498. 1906, *Physis. Revista de la Sociedad Argentina de Ciencias Naturales* 4: 184, f. 5-6. 1918, *Contr. U.S. Natl.* 24(6): 180. 1925, *Revista Sudamericana de Botánica* 6(5-6): 145, f. 10. 1940, *Contributions from the United States National Herbarium* 41: 18, 130-137. 2001.

Bambos Retz. = *Bambusa* Schreb.

The Indian name.

Bambusoideae, Bambuseae, Bambusinae, type *Bambos arundinacea* Retz., see *Contributions from the United States National Herbarium* 39: 29-35. 2000.

Bambusa Mutis ex Caldas = *Bambusa* Caldas

See *Bambusa* Schreber.

Bambusoideae, Bambuseae, Bambusinae, type *Bambusa aculeata* Caldas, see *Semanario del Nuevo Reino de Granada* 17: 131-132. 1809 and *Contributions from the United States National Herbarium* 39: 29-35. 2000.

Bambusa Schreber = *Arundarbor* Kuntze, *Bambos* Retz., *Bambus* J.F. Gmel., *Bambusa* Mutis ex Caldas, *Bonia* Balansa, *Criciuma* Söderstrom & Londoño, *Dendrocalamopsis* (L.C. Chia & H.L. Fung) Keng f., *Eremocaulon* Söderstrom & Londoño, *Guadua* Kunth, *Holttumochloa* K.M. Wong, *Ischurochloa*

Büse, *Kinabaluchloa* K.M. Wong, *Leleba* Nakai, *Lingnania* McClure, *Ludolfia* Adans., *Neosinocalamus* Keng f., *Maclurochloa* K.M. Wong, *Soejatmia* K.M. Wong, *Tetragonocalamus* Nakai

From the Malayan native name; see Johann Christian Daniel von Schreber (1739-1810), *Genera Plantarum*. 236, 828. 1789.

About 100/120-140 species, tropics and subtropics, Asia. Bambusoideae, Bambusodae, Bambuseae, or Bambusoideae, Bambuseae, Bambusinae, perennial, woody, thick-walled, tree or shrub-like, fast-growing, sympodial, closely tufted, forming dense clumps, armed or unarmed, twigs of most species hardened into spines, erect or drooping, scandent or not scandent, erect and leaning to arching, rarely climbing, rhizomes thick and shortened, rhizomes pachymorph, multibranch pattern, main branch often developed, culms hollow and cylindrical, usually glabrous and terete, flowering culms leafless or leafy, culm sheaths with erect triangular blades and large auricles, leaf sheaths usually deciduous, ligule membranous, leaves small, plants bisexual, flowering iterant, inflorescence a spike, pseudospikelets fascicled, at the inflorescence base bracts with two ciliate keels, 1-3 glumes present, subequal lemmas awnless or mucronate, palea keels winged or wingless, 2-3 or 0 lodicules free and membranous, 6 stamens, ovary hairy, 1-3 plumose stigmas, fruit grooved, rectangular caryopsis, they flower but rarely, new culms with pale waxy deposit, some species with thorny branches, ornamental, fodder or food, the young bamboo shoots of probably all species are eaten for food (the Chinese name: *chuk sun*), the stems are used for constructional works, bows for archery, split bamboo used for making ropes, the stems a source of material for paper-making, culms closely clumped, many species resistant to honey fungus, siliceous concretion inside the stems (*tabasheer* or *tabashir*), the genus planted or naturalized in wastelands or along riverbanks, species usually found growing in open areas, lowlands, hill sides, in moist places, in monsoon and wet tropics, species often escape from cultivation and become naturalized, type *Bambusa arundinacea* (Retz.) Willd., see *Familles des Plantes* 2: 244. 1763, *Observationes Botanicae* 5: 24. 1788, *Genera Plantarum*. 236, 828. 1789, *Obs. Bot.* 5: 24. 1789, *Systema Naturae ... editio decima tertia, aucta, reformata* 2: 579. 1791, *Species Plantarum. Editio quarta* 2: 245. 1799, *Semanario del Nuevo Reino de Granada* 17: 131-132. 1809, *Synopsis Plantarum* 1: 253. 1822, *Journal de Physique, de Chimie, d'Histoire Naturelle et des Arts* 95: 150. 1822, *Rel. Stevenson, "Phylogenetic relationships among Poaceae and related families as inferred from morphology, inversions in the plastid genome, and sequence data from the mitochondrial and plastid genomes." *Am. J. Bot.* 90: 93-106. 2003.

Species

B. sp.

In Hong Kong, *Bambusa* sp. is the host plant of the pathogen *Phyllachora shiraiana* Syd., the disease is called "tar spot," both surfaces of the leaf are affected.

in Micronesia: bamboo, pehri

B. spp.

in Arabic: crasen el-kharazan

in China: wu jiao lu zhu

in India: bans

in Japan: diasan-chiku, ryoku-chiku

in Malay: rebung

in Tagalog: labong, tambo

B. affinis Munro (*Arundarbor affinis* (Munro) Kuntze)

India. Shrubby, tufted, low, nodes with black hairs, used for fishing rods and javelins, see *Transactions of the Linnean Society of London* 26(1): 93. 1868, *Revisio Generum Plantarum* 2: 761. 1891.

Local names: lai lo paa, wa buk, waa buai, wabuk

in Thailand: lai lo pa, wa buk, wa buai

B. alamii Stapleton

Bhutan, Nepal, India. Erect, drooping, many branches, culm sheaths persistent, inflorescence spicate, fodder, used for weaving, see *Edinburgh Journal of Botany* 51(1): 10, f. 3. 1994.

Common name: mugl bans

B. albofolia Wen & X.J. Hua

China, Guangxi. See *Journal of Bamboo Research* 8(1): 20-22, f. 4. 1989.

B. albolineata Chia (*Bambusa albo-lineata* Chia; *Bambusa albolineata* (McClure) L.C. Chia; *Bambusa dolichomerit-*

halla Hayata; *Bambusa textilis* var. *albo-lineata* McClure; *Bambusa textilis* var. *albo-striata* McClure; *Leleba dolichomerithalla* (Hayata) Nakai

China, Guangdong, Taiwan. Branches usually arising from basal fourth to sixth node upward, culm sheaths caducous leathery rigid, nodes and sheaths at the culm base with white stripes, sheath scar at nodes of lower culm with a ring of white silky hairs, sheath coriaceous, sheath auricles unequal, sheath blade triangular, linear-lanceolate pseudospikelets usually 3-5 fasciculate on each node of flowering branches, spikelets bearing 5-7 florets apical one sterile, glume ovate glabrous 15- to 17-nerved, lemma elliptic glabrous 17- to 19-nerved, 3 stigmas plumose, ornamental, used as living hedge, cultivated on lower hills, riversides, plains, see *Icones plantarum formosandarum nec non et contributiones ad floram formosanam*. 6: 146-148, f. 55. 1916, *Journal of Japanese Botany* 9(1): 16. 1933, *Lingnan University Science Bulletin* 9: 15. 1940, *Guihaia* 8(2): 121-122. 1988.

B. albostriata (McClure) Ohrnb.

China.

B. amahussana Lindley (*Arundarbor amahussana* (Lindl.) Kuntze; *Bambusa atra* var. *amahussana* (Lindl.) Merr.; *Bambusa rumphiana* Kurz; *Leleba amahussana* Roem. & Schult.; *Leleba rumphiana* var. *amhussana* Kurz; *Neoleleba amahussana* (Lindl.) Widjaja)

Indonesia. Erect, slanting, reclining, scandent, leaning, thin-walled, culm sheath hairy on the back, sheath blade narrowly triangular, small auricles long bristly, short ligule, 3-6 pseudospikelets at each node, used for weaving, string, rope, growing on lowlands, near the sea, see *Journal of the Asiatic Society of Bengal* 39(2): 86. 1870, *Revisio Generum Plantarum* 2: 761. 1891 and E.D. Merrill (1876-1956), *An Interpretation of Rumphius's Herbarium amboinense*. Manila 1917 [Work begun by Charles Budd Robinson, 1871-1913], *Reinwardtia* 11(2): 112-113. 1997.

in Indonesia: bambu nitu

B. amplexicaulis W.T. Lin & Z.M. Wu

China, Guangdong. Culms internodes glabrous, nodes slightly prominent ± geniculate branches usually arising from basal third node upward, culm sheaths deciduous, leaf blades linear-lanceolate glabrous adaxially pubescent abaxially, on open fields, low hills, see *Bulletin of Botanical Research* 12(4): 349-350, f. 1. 1992.

B. andamanica Kurz (*Gigantochloa andamanica* (Kurz) Kurz)

Burma, India. See *Journal of the Asiatic Society of Bengal* 39(2): 88. 1870, *Preliminary Report on the Forest and other Vegetation of Pegu* App. A. 137; App. B. 93. 1875, *Forest Flora of British Burma* 2: 556. 1877.

B. angulata Munro (*Arundarbor angulata* (Munro) Kuntze; *Arundinaria angulata* (Munro) Porterf.; *Chimonobambusa*

angulata (Munro) T.Q. Nguyen; *Tetragonocalamus angulatus* (Munro) Nakai)

Asia, China, Taiwan. See *Transactions of the Linnean Society of London* 26(1): 94. 1868, *Revisio Generum Plantarum* 2: 761. 1891 and *United States Department of Agriculture. Inventory* 105: 48. 1932, *Journal of Japanese Botany* 9(2): 86, 88-89, 90, pl. 10. 1933, *Bot. Zhurn. (Moscow & Leningrad)* 76(6): 880. 1991.

B. angustiaurita W.T. Lin

China, Guangdong. Erect and slightly curved, scattered branches usually emerged from second to fifth node upward, culm sheath deciduous and thickly leathery, sheath blade erect and ovate-triangular, sheath ligule irregularly linear, leaf blades linear-lanceolate, leaves glabrous upper and pubescent beneath, on lower hills, near or around villages, see *Bamboo Res.* 1983(2): 52, f. 2-1. 1983.

B. angustissima Chia & H.L. Fung

China, Guangdong. Culm wall thick, culm lower portions slightly zigzag, branches usually emerged from basal first node, culm sheaths slightly caducous, sheath auricle narrow and linear to drooping, leaves glabrous beneath, leaf blades lanceolate to narrowly lanceolate, cultivated as windbreaks and frames, growing on riverbanks, see *Acta Phytotaxonomica Sinica* 19(3): 367-368, pl. 13, f. 1. 1981.

B. annulata W.T. Lin & Z.J. Feng (*Bambusa annulata* (J.R. Xue & W.P. Zhang, nom. illeg., non *Bambusa annulata* W.T. Lin & Z.J. Feng) D.Z. Li; *Bambusa glaucescens* var. *annulata* (W.T. Lin & Z.J. Feng) N.H. Xia; *Glaucescens annulata* (W.T. Lin & Z.J. Feng) N.H. Xia; *Schizostachyum annulatum* J.R. Xue & W.P. Zhang)

China, Guangdong. See *Philippine Journal of Science* 7(4): 230. 1912, *Journal of Bamboo Research* 5(1): 77. 1986, *Journal of Bamboo Research* 12(2): 33. 1993, *Journal of Tropical and Subtropical Botany* 9(1): 8. 1993, *Acta Botanica Yunnanica* 16(1): 41. 1994.

B. arnhemica F. Muell.

Australia. See *Australasian Journal of Pharmacy* 1: 447. 1886.

in Australia: Arnhem Land bamboo

B. atra Lindley (*Arundarbor atra* (Lindl.) Kuntze; *Arundinaria papuana* Lauterb. & K. Schum.; *Bambusa lineata* Munro; *Bambusa papuana* (Lauterb. & K. Schum.) K. Schum.; *Dendrocalamus latifolius* Lauterb. & K. Schum.; *Dendrocalamus multispiculatus* Lauterb. & K. Schum.; *Dendrocalamus papuanus* (Lauterb. & K. Schum.) Pilg.; *Leleba alba* Roem. & Schult.; *Leleba lineata* Roem. & Schult.; *Leleba picta* Roem. & Schult.;

Leleba prava Roem. & Schult.; *Neoleleba atra* (Lindl.) Widjaja

New Guinea, Moluccas, Andaman Islands. Densely or loosely tufted, variable, reedlike, nodes prominent, sympodial, thin-walled, culm sheath thin, leaf blades oblong-lanceolate, inflorescence terminal, clusters of spikelets laterally compressed, 1-3 glumes ovate, lemma pointed, lodicules absent, stamens exerted, ovary pubescent, 3 purple stigmas plumose, used for building materials, basketry, binding material, screens, sometimes cultivated, propagation by rhizome cuttings, found on wet soils, on limestone, lowlands, poor or dry soils, hill slopes, along riverbanks, see *Species Plantarum. Editio quarta* 2: 245. 1799, *Systema Vegetabilium* 7(2): 1345-1346. 1830, *Transactions of the Linnean Society of London* 26(1): 118-119. 1868, *Journal of the Asiatic Society of Bengal* 39(2): 86. 1870, *Revisio Generum Plantarum* 2: 761. 1891 and *Die Flora der deutschen Schutzgebiete in der Südsee* 186-188. 1900, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 52: 175. 1914, *Kew Bulletin* 21: 268-271. 1967, *Reinwardtia* 11(2): 114. 1997.

in Indonesia: loleba, nena, loleba putih (with green culms), loleba hitam (purplish green culms)

B. atrovirens Wen (*Dendrocalamopsis atrovirens* (T.H. Wen) Keng f. ex W.T. Lin; *Dendrocalamopsis oldhamii* f. *oldhami*)

China. See *Journal of Bamboo Research* 2(1): 12. 1983, *Journal of Bamboo Research* 5(2): 15. 1986, *Guihaia* 10(1): 15. 1990.

B. auriculata Kurz (*Gigantochloa auriculata* Kurz; *Gigantochloa auriculata* (Kurz) Kurz; *Oxytenanthera auriculata* (Kurz) Prain)

India, Bangladesh. Tufted, evergreen, branches curved downward, nodes brown, thick wall, leaves a good fodder, culms locally used, see *Journal of the Asiatic Society of Bengal* 39(2): 86. 1870, *Preliminary Report on the Forest and other Vegetation of Pegu* App. A. 137; App. B. 94. 1875, *Forest Flora of British Burma* 2: 557. 1877 and *Bengal Plants* 2: 1234. 1903.

B. aurinuda McClure

Vietnam, China, Hainan. Sheath deciduous and coriaceous, sheath auricle well-developed, sheath blade erect triangular or ovate-lanceolate, leaves ovate or linear-lanceolate, pseudospikelets linear, spikelets with 5-12 perfect florets, uppermost 2 or 3 or sometimes lowermost one sterile, 3 stigmas plumose, in forest edge or along riverside, see *Lingnan University Science Bulletin* 9: 3. 1940.

B. australis Chia & H.L. Fung (*Bambusa atra* Lindl.; *Lingnaniana atra* McClure)

Vietnam. See *Journal of the Arnold Arboretum* 23(1): 98-99. 1942, *Acta Phytotaxonomica Sinica* 18(2): 214. 1980.

B. balcooa Roxburgh (*Arundarbor balcooa* (Roxb.) Kuntze; *Bambusa balcooa* Roxb.; *Dendrocalamus balcooa* (Roxb.) Voigt)

Northeastern India, Bangladesh. Sympodial, large, tall, caespitose or densely tufted, stout, coarse, thick-walled, branched from the base, densely clumped, thick furry culm wax, erect or drooping with pointed recurved branchlets toward the base, nodes swollen, young shoots with acute tip, thorny branchlets, rhizomatous, lower nodes with aerial roots, culm sheath auricles always absent, densely hairy culm sheaths, leaf sheaths with dark or brown hairs, branches from the lower nodes leafless, compound inflorescence paniculate, spicate branches, pseudospikelet groups, ovoid-lanceolate spikelets, 0-2 glumes, lemmas mucronate, palea 2-keeled, 3 lodicules fimbriate, ovary hairy, 3 stigmas plumose, known from cultivation and wild, flowering cycle at 35-45 years, useful for soil stabilisation, young shoots used as a vegetable, a source of fiber, foliage as animal fodder, the strongest bamboo used for building purposes, very durable and insect resistant, making pillars, raw material for paper, common on stream banks and forest margins, heavy soil with good drainage, tropical monsoon climate, could be confused with *Dendrocalamus Calostachyus* (Kurz) Kurz, see *Hortus Bengalensis, or a Catalogue ...* 25. Serampore 1814, *Flora Indica; or, Descriptions of Indian Plants* 2: 196. 1832, *Hortus Suburbanus Calcuttensis* 718. 1845, *Revisio Generum Plantarum* 2: 761. 1891 and *The Indian Forester* 114: 576-583, 726-736. 1988, *Bangladesh Journal of Forest Science* 20: 31-36. 1991, *The Indian Forester* 119: 205-211. 1993, *Edinb. J. Bot.* 51: 12. 1994.

Local names: bamboo, Cape bamboo, boro bans, jhushing in India: balko bans, balku bans, baluka, barak, beru, bhalu bans, bhaluka, borak bans, boro bans, dhanu bans, wamnah in Nepali: dhanu bans, ban bans

in South Africa: bamboesriet

B. bambos (L.) Voss (*Arundarbor arundinacea* (Retz.) Kuntze; *Arundarbor orientalis* (Nees) Kuntze; *Arundo bambos* L.; *Bambos arundinacea* Retz.; *Bambos bambos* (L.) Wight; *Bambus arundo* C.C. Gmel.; *Bambusa arundinacea* (Retz.) Willd.; *Bambusa arundinacea* Retz.; *Bambusa bambos* (L.) Druce, nom. illeg., non *Bambusa bambos* (L.) Voss; *Bambusa bambos* Becker, nom. illeg., non *Bambusa bambos* (L.) Voss; *Bambusa orientalis* Nees; *Bambusa spinosa* Roxb.; *Bambusa vulgaris* Schrad. ex J.C. Wendl.; *Ischurochloa arundinacea* var. *orientalis* (Nees) Büse)

Southern China, India, Thailand. Tall, armed, giant, woody, erect and leaning to arching, flowering sporadically, very densely tufted, wall very thick, large and very dense clumps of closely placed culms, clumps almost impenetrable, spiny lower branches, when young the culms covered with wax, sympodial and pachymorph rhizomes, cylindrical and hollow culms, spiny branches arising from all nodes, spines usually in groups of 3, interlacing thorny branches,

internodes green, nodes rooting at the lower ones with small roots in rings, culm sheath coriaceous, flowers and fruits gregariously at long intervals, large panicles, 3-7 fertile florets, 1-3 imperfect florets, at the nodes of leafless branches small clusters of pseudospikelets, slender lanceolate spikelets, 0-2 empty glumes, 6 stamens, ovary glabrous and hairy, 2-3 stigmas plumose, readily establishes from seed, propagated also by rhizome cuttings and by tissue culture, a multipurpose bamboo cultivated elsewhere in tropical Asia, valuable for building purposes, useful for erosion control, young shoots or newly sprouted buds eaten, young shoots cooked into curries, in India leaves used in the Ayurvedic system of medicine, a decoction of the roots used in case of anuria, leaves anthelmintic, a source of fiber, animal food, forage, raw material for paper and pulp, highly palatable seeds eaten as rice substitute (India), growing buds used for vegetable and pickled, siliceous concretion inside the stems (*tabasheer* or *tabashir*), the split stems used for making sieves, trays, fishtraps, leaves given to horses for coughs and colds, very variable species related to and resembling *Bambusa blumeana* J.A. & J.H. Schultes, humid tropical climate, along riverbanks, moist conditions, rich moist soils, moist deciduous forest, ravines, along river valleys, riverbanks, alluvial soil, mixed dry deciduous forest, hills, semievergreen forest, see *Species Plantarum* 1: 81. 1753, *Systema Naturae, Editio Decima* 2: 878. 1759, *Observationes Botanicae* 5: 24. 1789, *Systema Naturae ... editio decima tertia, aucta, reformata* 2(1): 579. 1791, *Species Plantarum, Editio quarta* 2: 245. 1799, J.C. B. basihirsuta McClure (*Bambusa prasina* T.H. Wen; *Dendrocalamopsis basihirsuta* (McClure) Keng f. & W.T. Lin; *Dendrocalamopsis prasina* (T.H. Wen) P.C. Keng; *Sinocalamus basihirsutus* (McClure) W.T. Lin)

Southeast Asia, Hong Kong, China, Guangdong. Young culms pruinose, slightly hispid and with white powder when young, branches many from middle portion of culms, culm sheath caducous and coriaceous, sheath auricles tiny with hirsute margin, sheath ligule denticulate, erect sheath blade broadly lanceolate, leaves lanceolate to long elliptic densely pubescent beneath, pseudospikelets 5- to 7-flowered subtended by a prophyll, 1-2 glumes, 3 lodicules ciliate, 3 stigmas, cultivated, shoots bitter and not used for eating, see *Lingnan University Science Bulletin* 9: 6. Canton 1940, *Bamboo Research in Asia* 1990(1): 4. 1990, *Flora Reipublicae Popularis Sinicae* 9(1): 143. 1996.

B. beecheyana Munro (*Arundarbor beecheyana* (Munro) Kuntze; *Dendrocalamopsis beecheyana* (Munro) Keng f.; *Dendrocalamopsis beecheyana* var. *beecheyana*; *Neosinocalamus beecheyanus* (Munro) Keng f. & T.H. Wen; *Sinocalamus beecheyanus* (Munro) McClure)

China, Guangdong, Guangxi, Hainan, Taiwan. Culms slightly pubescent and with white powder when young, recurved or long pendulous apically, nodes flat, branches several 1-3 dominant, culm sheaths deciduous leathery, leaves sheaths hirtellous when young, pseudospikelets 6- to 8-flowered, glumes 2 cordate ciliate, lodicules 3 ciliate, 2-4 stigmas rarely 1, edible shoots a bit bitter, commonly cultivated, see *Transactions of the Linnean Society of London* 26(1): 108. 1868, *Revisio Generum Plantarum* 2: 761. 1891 and *Lingnan University Science Bulletin* 9: 67. 1940, *Journal of Bamboo Research* 2(1): 12. 1983, *Journal of Bamboo Research* 4(2): 18. 1985.

Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 133-134. Oxford 1964; A. Lasègue, *Musée botanique de Benjamin Delessert*. Paris 1845)

Borneo, Indonesia, Java, Sumatra, Lesser Sunda Islands. Erect, tall, densely tufted, sympodial, young culms pruinose green, spiny basal branches, stout curved spines, lower nodes with aerial roots, culm sheaths with dark brown hairs and narrowly triangular blades, auricles of the culm sheath prominent with curly hairs and bristles, ligule irregularly toothed, leaf blades linear-lanceolate with rounded base, clusters of pseudospikelets on branches of a leafless culm, spikelet laterally compressed, 5-12 florets, 2-3 empty glumes, propagation by culm cuttings, tolerates flooding, flowers very rarely, plants die after flowering, raw material for paper, cane for construction and basketry, binding, living fences, windbreaks, used for water pipe in pond fields, wild and naturalized, forming densely interlaced thicket, cultivated elsewhere in tropical Asia, used to prevent soil erosion, may be grown for soil reclamation in highly eroded areas, young shoots eaten as a vegetable, growing on irrigation ditch, tropical lowlands, along water courses, canal bank, riverbanks, often on heavy soils, hill slopes, at low and medium altitudes, freshwater creeks, resembles *Bambusa bambos* (L.) Voss, see *Hortus Bengalensis, or a catalogue ...* 25. 1814, *Flora* 8: 580. 1825, *Systema Vegetabilium* 7(2): 1343. 1830, *The Botany of Capt. Beechey's Voyage*; comprising an account of the Plants collected by Messrs. Lay and Collie ... during the voyage to the Pacific and Bering's Strait, performed in H.M.S. *Blossom ...* 1825-1828. 254. London [1830-] 1841, *Flora van Nederlandsch Indië* 3: 418. 1859, *Revisio Generum Plantarum* 2: 761. 1891 and *Phil. J. Sci.* 7: 413-415. 1912, *The Gardens' Bulletin, Singapore* 16: 59-62. 1958, *Bulletin of the Forestry and Forest Products Research Institute* 301: 79-118. 1978,

Journal of Tropical Forest Science 2(3): 227-234. 1990, *Sandakanian* 3: 22. 1993, *Journal of Tropical Forest Science* 6(2): 159-170. 1993.

in English: spiny bamboo, thorny bamboo

in Cambodia: russèi roliek

in Indonesia: bambu duri, haur cucuk, pring gesing

in Laos: phaix ban:nz

in Malaysia: buloh duri, buloh sikai, buluh duri, buluh sikai

Local names: bambu, buluh duri, buluh sikai, kawayen, tongkungon

in the Philippines: aonoo, batakan, baugin, /bengwil/, caña espina, dugian, kaaono, kabugauan, kauayan, kauayan gid, kauayan ng bayog, kauayan potog, kauayan siitan, kauayan-tinik, kauayan totoo, kawayan-siitan, lamnuan, marurugi, pasingan, paua, rugian

in Thailand: phai see suk, phai si suk, phai-sisuk, seesuk, si suk, waa mee bo, wa mi bo

in Vietnam: tre gai

B. blumeana Schult. & Schult.f. cv. **wei-fang Lin** (W.C. Lin) Chia (*Bambusa stenostachya* cv. *wei-fan Lin* W.C. Lin)

Asia, Taiwan. See *Bulletin de l'Herbier Boissier* 7(9): 725. 1899 and *Bulletin of the Taiwan Forest Research Institute* 98: 12, f. 13. 1964, *Guihaia* 8(2): 122. 1988.

B. boniopsis McClure (*Bambusa fecunda* McClure)

Southeast Asia, Hong Kong, China, Hainan. Young culms pruinose, several to numerous fasciculate branches usually arising from basal third to fifth node, culm sheaths caducous, sheath almost pruinose and glabrous, unequal sheath auricles elliptic to broadly elliptic, sheath ligule tip ciliate, sheath blade narrowly lanceolate and erect, leaves narrow-lanceolate, linear or linear-lanceolate pseudospikelets solitary or 2 to 3 fasciculate on each node of flowering branches, spikelets with 3-7 florets, middle 2 or 3 florets fertile, one glume ovate-oblong glabrous 11- to 13-nerved acute, lemma oblong-lanceolate glabrous 17- to 19-nerved acute and mucronate, 3 stigmas plumose, cultivated, around villages, forest, ravines, see *Lingnan University Science Bulletin* 9: 7, 9. 1940, *Journal of Zhejiang Forestry College* 8(1): 127-130. Hangzhou 1991. [*Zhejiang linxueyuan xuebao*].

B. breviflora Munro (*Arundarbor breviflora* (Munro) Kuntze, also spelled *brevifolia*; *Bambusa longiflora* W.T. Lin; *Bambusa pallescens* (Döll) Hack.; *Bambusa tuldooides* Munro; *Bambusa tuldooides* cv. *tuldooides*; *Bambusa ventricosa* McClure; *Guadua pallescens* Döll; *Leleba breviflora* (Munro) Nakai; *Leleba tuldooides* (Munro) Nakai; *Leleba ventricosa* (McClure) W.C. Lin)

Asia, China, Taiwan, Hong Kong. Clumping grass, see *Transactions of the Linnean Society of London* 26(1): 93, 96. 1868, *Revisio Generum Plantarum* 2: 761. 1891 and *Journal of Japanese Botany* 9(1): 16-17. 1933, *Lingnan*

Science Journal 17(1): 5, f. 17-62, t. 5. 1938, *Bulletin of the Taiwan Forest Research Institute* 150: 1305, f. 1. 1963, *Bulletin of Botanical Laboratory of North-Eastern Forestry Institute* 1980(6): 85, f. 1. 1980.

B. breviflora Munro var. *hainanensis* G.A. Fu

China. See *Acta Phytotaxonomica Sinica* 20(4): 491, pl. 2. 1982.

B. brevispicula Holttum

Indonesia, New Guinea. See *Kew Bulletin* 21: 277. 1967.

B. brunneoaciculia G.A. Fu

China. See *Guihaia* 13(2): 108-109. 1993.

B. burmanica Gamble

India, Myanmar, Thailand. Erect, drooping to slightly drooping, thick-walled, caespitose, solid, branching at the lower part of the culm, 3 prominent main branches, young culms pruinose, nodes with white ring of hairs and waxy powder, culm sheath coriaceous and caducous, sheath blade erect and ovate or broadly triangular, sheath auricles rather large and distinct with ciliate margins, sheath ligule with an irregular margin minutely dentate, leaves lanceolate and shortly tomentose beneath, inflorescence on leafless branch, pseudospikelets in groups of 2-5 at the nodes 2 glumes mucronate, 3 stigmas, used for fence and hedge, in weaving, roofing and thatching, basket making, as construction materials, related to *Bambusa tulda* Roxb. and *Bambusa polymorpha* Munro, found on dry hill slopes, see *Annals of the Royal Botanic Garden, Calcutta*. 7: 35-36, t. 33. 1896, *Fl. Brit. Ind.* 7: 388. 1896.

in India: thaikawa

in Myanmar: thaikwa, thaikawa

in Thailand: bong naam, bong nam, phai-bongnam, tai waa, tai waa yee, wa ther, wa thoe

B. cacharensis Majumdar (Cachar Hills of Assam)

India. Arborescent, erect, young shoots without the white powdery excretions below the culm sheaths, sheath blades orange-yellow and spreading at right angle to the axis, inflorescence paniculate, 2 glumes unequal, paleas 2-keeled, 3 lodicules ciliate, 6 stamens, used locally for various purposes, see *Bulletin of the Botanical Survey of India* 25(1-4): 237. 1983[1985].

B. cerosissima McClure (*Lingnania cerosissima* (McClure) McClure)

Indonesia, South China, Guangdong. Long top drooping, manifold branching, branches many from apical portion of culms, young culms heavily and strongly pruinose, culm sheaths late deciduous thick-papery much shorter than internodes, sheath auricles long and narrow, sheath blade dark and ovate-triangular to broadly lanceolate, 4-8 leaves on each twig, leaves linear-lanceolate, glumes 1-2, used in weaving, along roadside, near villages, see *Lingnan Science*

Journal 15(4): 637-639, f. 1. 1936, *Lingnan University Science Bulletin* 9: 35. 1940.

B. chacoensis Rojas (*Guadua angustifolia* subsp. *chacoensis* (Rojas) S.M. Young & Judd, *Guadua chacoensis* (Rojas) Londoño & P.M. Peterson)

Northern Argentina, southern Brazil. See *Synopsis Plantarum* 1: 253. 1822 and *Bulletin de l'Académie Internationale de Géographie, Botanique* 26(4): 157, f. 1. 1918, *Hickenia* 1: 73-78. 1977, *Novon* 2(1): 41-46, f. 1-2. 1992, *Ann. Missouri Bot. Gard.* 79(4): 763. 1992.

B. chungii McClure (*Lingnania chungii* (McClure) McClure; *Lingnania chungii* var. *petilla* T.H. Wen)

China, Guangdong, Guangxi, Hong Kong. Culm wall thin, culms heavily and strongly pruinose, branches many from apical portion of culms, most of branches fascicled, culm sheaths deciduous, sheath pruinose, sheath auricles narrow oblong with ciliate margin, sheath ligule margin dentate or ciliate, leaves linear-lanceolate to oblong-lanceolate, 1-2 glumes, 2 or 3 stigmas, ornamental, medicinal, used for weaving, in papermaking, see *Lingnan Science Journal* 15(4): 639-643, f. 1, pl. 28, 29. 1936, *Lingnan University Science Bulletin* 9: 35. 1940, *Journal of Bamboo Research* 1(1): 34. 1982.

B. chungii McClure var. *barbellata* (Q.H. Dai) Ohrnb.

China.

B. chungii McClure var. *petilla* (Wen) Ohrnb.

China.

B. chunii Chia & H.L. Fung

China, Hong Kong. Culm wall thick, culm lower portions zigzag, swollen base, nodes slightly convex, three or more branches at each node, branches at lower portion of the culm sharply thorny, coriaceous sheath shedding late, sheath blade erect and broad-lanceolate, sheath auricles linear-lanceolate rugose to hirsute, leaves lanceolate shortly pubescent beneath, cultivated around villages, see *Kew Bulletin* 37(4): 593. 1983.

B. clavata Stapleton

Bhutan. Erect, drooping, a ring of white pubescence below each node, used for construction, leaves as animal fodder, see *Edinburgh Journal of Botany* 51(1): 12, f. 4. 1994.

Local names: chile bans, pagshing

B. contracta L.C. Chia & H.L. Fung

China, Guangxi. Glabrous, branches usually arising from basal fourth to six node upward, most of the branches fascicled, culm sheaths caducous, sheath base almost cordate, sheath auricles unequal, sheath ligule serrate, leaves shortly pubescent beneath, used in weaving, growing around villages, similar to *Bambusa textilis* McClure, see *Acta Phytotaxonomica Sinica* 19(3): 376-377, pl. 14, f. 6. 1981.

B. copelandi Gamble (also spelled *copelandii*) (*Bambusa copelandii* Gamble ex Brandis; *Dendrocalamopsis copelan-*

dii (Gamble ex Brandis) Keng f.; *Dendrocalamus copelandii* (Gamble ex Brandis) N.H. Xia & Stapleton; *Sinocalamus copelandi* (Gamble) Raizada; *Sinocalamus copelandi* (Gamble ex Brandis) Raizada)

Myanmar. Tufted, large, thick-walled, nodes prominent, culm sheaths covered with golden hairs, large compound panicle, uppermost floret sterile, spikelets clustered in a head with 2 small bracts at the base, 3 lodicules hairy on the margins, 6 stamens exerted, ovary hairy, 1 stigma plumose, cultivated, see *Indian Trees* 671. 1906, *Indian Forester* 74(1): 10. 1948, *Journal of Bamboo Research* 2(1): 12. 1983, *Kew Bulletin* 52(2): 484. 1997.

B. corniculata Chia & H.L. Fung

China, Dongxing, Guangxi, Guangzhou, Guangdong. Internodes short, a ring of white pubescence below each node, branches usually arising from basal second or third node, twigs of the lower branches shortened into spines, culm sheaths caducous, sheath blade triangular and erect, sheath auricles unequal, sheath ligule back hirsute to densely hairy, leaves pubescent beneath, cultivated, near or around villages, low hills, see *Acta Phytotaxonomica Sinica* 19(3): 368-369, pl. 13, f. 2. 1981.

B. cornigera McClure

China. Young culms pruinose, manifold branching, branches usually arising from second node upward with primary ones being thicker and longer, branchlets of lower branches sometimes specialized into fine weak thorn, sheath irregularly spotted, small sheath auricles oblong and ciliate, sheath ligule margin entire or finely ciliate, sheath blade triangular and erect, culm sheaths caducous, leaves ovate-lanceolate, used for construction, along riversides, see *Lingnan University Science Bulletin* 9: 7. 1940.

B. cornuta Munro (*Arundarbor cornuta* (Munro) Kuntze) Southeast Asia, Indonesia, Philippines. See *Transactions of the Linnean Society of London* 26(1): 113. 1868, *Revisio Generum Plantarum* 2: 761. 1891.

B. crispiaurita W.T. Lin & Z.M. Wu

China, Guangdong. Culms internodes upper parts ± covered with brown stiff hairs, wall thick, nodes slightly prominent, branches usually arising from basal first or second nodes upward, culm sheaths deciduous with apex truncate, blades erect ovate-lanceolate, leaf blades linear-lanceolate glabrous adaxially pubescent abaxially, usually on lower hill slopes, see *J. S. China Agric. Univ.* 13(2): 81. 1992.

B. daii (P.C. Keng) D.Z. Li (*Dendrocalamopsis daii* P.C. Keng; *Dendrocalamopsis grandis* Q.H. Dai & X.L. Tao; *Neosinocalamus grandis* (Q.H. Dai & X.L. Tao) T.H. Wen, nom. illeg.)

China, Guangxi. Culms sparsely hispid when young, nodes flat, slightly swollen basally and recurved apically, branches several, culm sheaths deciduous leathery, pseudospikelets 4- to 8-flowered with a sterile terminal one, 1 glume ciliate,

lemmas ciliate, 3 lodicules, 1 stigma, cultivated for shoots and culms, see *Acta Phytotax. Sin.* 20: 201. 1982, *J. Bamboo Res.* 2(1): 13. 1983, *J. Bamboo Res.* 4(2): 18. 1985, *Fl. Reipubl. Popularis Sin.* 9(1): 149. 1996.

B. diaoluoshanensis Chia & H.L. Fung

China. Young culms covered with dark minute hairs, branches usually arising from basal first node, solitary branches on basal three nodes, twigs of the lower branches shortened into spines, culm sheath covered with blackish brown appressed stiff hairs, sheath blade triangular and erect, sheath auricles unequal, leaves pubescent beneath, cultivated, similar to *Bambusa ramispinosa* L.C. Chia & H.L. Fung, see *Acta Phytotaxonomica Sinica* 19(3): 369, pl. 13, f. 3. 1981.

B. disseimulator (also *dissimulator*) McClure

China, Guangxi, Guangdong. Clumps unicaespitose, erect or semierect, arching at the top, branches solitary and armed, setulose, sheath caducous and tough, internodes green and thick-walled, sheath auricles subequal or unequal, erect sheath blade ovate to ovate-lanceolate with cordate base, culm leaves tardily deciduous, 5-14 leaves on each twig, leaf blades long slender lanceolate, cultivated, pseudospikelets solitary or fasciculate on each node of flowering branches, spikelets with 4 or 5 perfect florets and 2 to several sterile florets at apex, 3 stigmas, used a green living fence, windbreak, see *Lingnan Science Journal* 19(3): 413-415, t. 20. 1940.

in English: muddy bamboo

B. disseimulator McClure var. *albinodia* McClure

China, Guangdong. Internodes near the base with white streaks, culm internodes hairy, cultivated around villages, see *Lingnan Science Journal* 19(3): 415. 1940.

B. disseimulator McClure var. *dissimulator*

China. Culm internodes glabrous.

B. disseimulator McClure var. *hispidia* McClure

China, Guangdong. Nodes and internodes hispid, cultivated around villages, used as a fence, see *Lingnan Science Journal* 19(3): 415. 1940.

B. dissimilis W.T. Lin

China, Guangdong. Internodes more or less glabrous, twigs of the lower branches shortened into spines, sheath green deciduous, sheath auricles more or less different, sheath blade erect and narrow triangular, leaves pubescent beneath, leaf blades linear-lanceolate, cultivated, see *Bamboo Res.* 1983(2): 50, f. 1. 1983.

B. distegia (Keng & Keng f.) Chia & H.L. Fung (*Bambusa funghomii* McClure; *Bambusa guangxiensis* L.C. Chia & H.L. Fung; *Lingnan distegia* (Keng & Keng f.) Keng f.; *Lingnan funghomii* McClure; *Sinocalamus distegia* Keng & Keng f.; *Sinocalamus distegius* Keng & Keng f.)

China, Sichuan. Culm top slightly bending, rarely drooping, hairy and covered by white powder when young, branches many from apical portion of culms, sheath ligule low and short with denticulate margin, leathery culm sheaths deciduous, sheath blade triangular to lanceolate, more than 10 leaves on each twig, leaves long lanceolate pubescent beneath, 1-2 glumes, 1-3 stigmas, used in weaving and handicrafts, raw material for papermaking, along streams, see *Lingnan University Science Bulletin* 9: 36. 1940, *Lingnan Science Journal* 19(4): 535-536, t. 37. 1940, *Journal of the Washington Academy of Sciences* 36: 76, f. 1. 1946, *Acta Phytotaxonomica Sinica* 18(2): 213-214. 1980, *Acta Phytotaxonomica Sinica* 19(1): 142. 1981.

B. dolichoclada Hayata (*Leleba dolichoclada* (Hayata) Odash.).

Southern China, Hainan Island, Taiwan. Caespitose, young culms pruinose, branching from the basal nodes, 3 to numerous branches on each node, culm sheaths pilose and coriaceous, sheath auricles unequal and ciliate at the margin, sheath blade erect and triangular to narrow lanceolate, 8-14 leaves on each twig, leaves chartaceous, leaf blades linear-lanceolate, inflorescence a lateral panicle of spicate branchlets, pseudospikelets 3- to 9-fasciculate on each node of flowering branches, spikelets linear to narrowly lanceolate with 5-7-12 florets 2 glumes ovate 14-nerved, lemmas ovate acute 18- to 20-nerved, palea present, 3 obovoid lodicules, 3 stamens, ovary narrowly ovoid and hairy above, 3 feathery stigmas, cultivated, used in weaving and as shelter-belts, on riverbanks, around villages, forest edges, hills, see *Icones plantarum formosandarum nec non et contributiones ad floram formosanam* 6: 144-146, f. 54. Taihoku [= Taipei, Taiwan] 1916, *Journal of the Society of Tropical Agriculture* 8: 58. 1936, *Bulletin of the Taiwan Forest Research Institute* 98: 15, f. 9, 10. 1964.

in Japan: choshi-chiku

B. dolichomerithalla Hayata (*Bambusa albolineata* (McClure) L.C. Chia; *Bambusa multiplex* var. *multiplex*; *Leleba dolichomerithalla* (Hayata) Nakai)

China, Japan. See *Systema Vegetabilium* 7(2): 1350. 1830 and *Icones plantarum formosandarum nec non et contributiones ad floram formosanam* 6: 146-148, f. 55. 1916, *Journal of Japanese Botany* 9(1): 16. 1933, *Guihaia* 8(2): 121-122. 1988.

B. duriuscula W.T. Lin (*Bambusa breviligulata* L.C. Chia & H.L. Fung; *Bambusa insularis* L.C. Chia & H.L. Fung) Hainan, China. Lower portion of the culm white striped, branches usually arising from basal fifth or sixth node upward, branches clustering, often aerial roots on nodes, culm sheath deciduous, sheath auricles flat and different, sheath ligule serrate with hairy margin, sheath blade cordate, leaves pubescent beneath, pseudospikelets 2- to 3-fasciculate on each node of flowering branches, spikelets bearing 6-7 florets apical 1 sterile, glume absent, lemma

oblong acute, 3 stigmas plumose, used for general constructional work, for weaving, frame and fences, usually cultivated, on slopes, near villages, similar to *Bambusa pachinensis* Hayata, see *Bulletin of Botanical Laboratory of North-Eastern Forestry Institute* 1980(6): 87-88, f. 2. Harbin 1980 [*Chih wu yen chiu shih hui kan.*], *Acta Phytotaxonomica Sinica* 19(3): 370-371, 375-376, pl. 13, f. 5 and pl. 14, f. 5. 1981.

B. emeiensis L.C. Chia & H.L. Fung (*Bambusa affinis* Munro; *Dendrocalamus affinis* Rendle; *Lingnan affinis* (Rendle) P.C. Keng; *Neosinocalamus affinis* (Rendle) P.C. Keng; *Neosinocalamus affinis* cv. *affinis*; *Sinocalamus affinis* (Rendle) McClure)

China, Guizhou, western Hunan, Sichuan, Yunnan. Culms covered by appressed stiff pale brown hairs when young, nodes flat, long pendulous apically, branches many from middle portion of culms, culm sheaths deciduous leathery, pseudospikelets 3- to 5-flowered plus a terminal sterile floret, 0-1 glumes, 3 lodicules rarely 4, 2-4 stigmas, cultivated, used for various purposes, agricultural tools, weaving, materials, ornamental, soil protection, the spikelet structure linking to subg. *Dendrocalamopsis*, vegetative parts of subgen. *Lingnania*, see *Transactions of the Linnean Society of London* 26(1): 93. 1868 and *Journal of the Linnean Society, Botany* 36(254): 447-448. 1904, *Acta Phytotaxonomica Sinica* 18(2): 214. 1980.

B. emeiensis Chia & H.L. Fung f. *chrysotricha* (Hsueh & Yi) Ohrnb.

China.

B. emeiensis Chia & H.L. Fung f. *flavidorivens* (Yi) Ohrnb. China.

B. emeiensis Chia & H.L. Fung f. *viridiflava* (Yi) Ohrnb. China.

B. eutuldoides McClure

Southern China. Young culms pruinose, some culms with longitudinal yellow and green stripes, branches usually arising from basal second or third node upward, several or numerous branches fasciculate with central 3 thicker and longer, culm sheaths caducous leathery with arched apex extremely asymmetrical, sheath auricles unequal and different in size, sheath ligule serrate and ciliate, sheath blade erect more or less triangular to broadly lanceolate, 4-8 leaves on each twig, leaves linear-lanceolate, linear pseudospikelets stalkless fasciculate at each node of flowering branches and branchlets, spikelets 5- to 6-flowered subtended by several bud-bearing bracts at base, 3 stigmas plumose, used for handicrafts, furniture, construction material, usually cultivated along riverbanks or around villages, related to *Bambusa tuldooides* Munro, see *Lingnan University Science Bulletin* 9: 8, f. 4. 1940.

B. eutuldoides McClure var. *basistriata* McClure

Guangdong, Guangxi, China. Basal internodes green with longitudinal yellow and green stripes, culm sheath auricles strongly wrinkled, see *Lingnan University Science Bulletin* 9: 9. 1940.

B. eutuldoides McClure var. *eutuldoides*

Guangdong, Guangxi, China. Culms internodes green, usually cultivated along riverbanks or around villages.

B. eutuldoides McClure var. *viridivittata* (W.T. Lin) Chia (*Bambusa eutuldoides* McClure var. *viridi-vittata* (W.T. Lin) Chia; *Bambusa viridi-vittata* W.T. Lin; *Bambusa viridivittata* W.T. Lin)

China, Guangdong. Culms internodes yellow with green stripes, culm sheaths green with yellow stripes when young, culm sheath auricles strongly wrinkled, ornamental, see *Journal of Bamboo Research* 1983(2): 54, f. 2-2. 1983, *Guihaia* 8(2): 123-124. 1988.

B. farinacea K.M. Wong

Peninsular Malaysia. See *Sandakania* 3: 23. 1993.

Malayan name: buluh aur bukit

B. fecunda McClure (*Bambusa boniopsis* McClure)

Asia, China. See *Lingnan University Science Bulletin* 9: 9. 1940.

B. fimbriiligulata McClure

China. See *Lingnan University Science Bulletin* 9: 10. 1940.

B. flavonoda W.T. Lin

China. See *Bamboo Res.* 1986(2): 23. 1986.

B. flexuosa Munro (*Arundarbor flexuosa* (Munro) Kuntze; *Bambusa bambos* auct.; *Bambusa flexuosa* Carrière, nom. illeg., non *Bambusa flexuosa* Munro; *Bambusa flexuosa* hort. ex Rivière & C. Rivière; *Bambusa scabriculum* W.T. Lin; *Bambusa stenostachya* auct.; *Phyllostachys flexuosa* A. Rivière & C. Rivière)

Guangdong, China. Erect, scandent or drooping, lower portions zigzag, branching from the lower part of the culm, internodes thick-walled, twigs of the lower branches shortened into spines, sheath shedding late, sheath auricles minute or narrowly linear, sheath blade erect or extending outward, leaves narrow and glabrous, pseudospikelets solitary or fasciculate slightly compressed with 8-12 florets, middle florets perfect, glumes usually absent, 3 stigmas plumose, cultivated, used as bushy fences, found along riversides, hills, see *Transactions of the Linnean Society of London* 26(1): 101. 1868, *Revue Horticole* 1870: 320. 1870, *Bulletin de la Société Nationale d'Acclimatation de France* 3: 5: 758. 1878, *Revisio Generum Plantarum* 2: 760. 1891 and *Acta Phytotaxonomica Sinica* 29(5): 452-455. 1991.

in Thailand: phai see suk, phai si suk

B. forbesii (Ridley) Holttum (*Arundinaria coboni* F.M. Bailey; *Dendrocalamus forbesii* Ridley; *Gigantochloa novoguineensis* Rendle)

Papua New Guinea, Indonesia. Erect, drooping, leaning, spreading, thin-walled, densely tufted, culm sheath hairy, sheath blade broadly ovate with cordate base, large sheath auricles with long bristles, leaf sheaths completely surround the culm, leaf blade base cordate, pseudospikelets several to many in a cluster at each node of a leafy branch, shoots said to be eaten, culm used for making arrow head, vessels, water pipes, handicrafts, found in lowland and hills, on riverbanks, disturbed lower montane forest, highlands, undergrowth and regrowth vegetation, see *J. Bot. Brit. Foreign* 24: 360. 1886 and *Queensland Agricultural Journal* 20: 71. 1908, L.S. Gibbs (1870-1925), *A Contribution to the Phytogeography and Flora of the Arfak Mountains* 199. London 1917 [Dutch N.W. New Guinea.], *Kew Bulletin* 21: 271. 1967.

in Indonesia: akoya, sasa, warire

in Papua New Guinea: aku, hodzjima, k'link

B. fruticosa Holttum

Papua New Guinea. See *Kew Bulletin* 21: 275. 1967.

B. funghomii McClure

China, Guangdong, Guanxi. Erect, culms thorny and drooping, branching from lower part, all branches have spines, internodes pubescent, nodes at lower portion crooked, culm sheath shedding late, sheath auricles unequal and ciliate, sheath blades erect, 3-6 leaves on each twig, leaves long lanceolate, raw material for paper, cane for construction and basketry, scaffolding and poles, binding, living fences, windbreaks, used for water pipe in pond fields, forming densely interlaced thickets, used to prevent soil erosion, young shoots eaten as a vegetable, open places, hills, near villages, see *Lingnan Science J.* 19(4): 535-536, pl. 37. 1940.

B. gibba McClure (*Bambusa tulda* sensu Merrill & Chun, not Roxburgh)

China, Guangdong, Guanxi. Erect, clumps unicaespitose, young culms pruinose, branches thorny, internodes pruinose and slightly swollen at base, branches emerged from basal or second node upward, culm leaves tardily deciduous, sheath auricles unequal, sheath blade erect and long triangular, culm sheaths caducous, leaf blades lanceolate, leaves both surfaces glabrous or minutely pubescent to tomentose, pseudospikelets linear, spikelets 4- to 8-flowered, one glume ovate-elliptic 15-nerved apex acute and mucronate, lemma ovate-oblong 17-nerved apex acute and mucronate, 3 stigmas plumose, strips pulverized for oil extraction, used as a natural green fence, culms used in scaffolding and in making farm and fishing appliances, on lower hills, around villages, see *Sunyatsenia* 2: 207. 1935, *Lingnan University Science Bulletin* 9: 10. 1940.

Common name: nai bamboo

B. gibboides W.T. Lin

China, Guangdong, Hong Kong. Erect, more or less swollen in the lower portion, young culms pruinose, branches usually arising from basal first or second node upward, culm sheath deciduous, small sheath auricles subequal and oblong, sheath blade erect ovate lanceolate or narrowly triangular, leaves linear-lanceolate densely minutely shortly pubescent beneath, pseudospikelets several fasciculate on each node of flowering branches, spikelets bearing 5-7 florets, 1 or 2 apical florets usually sterile, cultivated, used for bamboo wares, shoots edible and eaten, see *Acta Phytotaxonomica Sinica* 16(1): 70-71, f. 3. 1978.

in English: tender shoot bamboo

B. glabrovagina G.A. Fu (*Bambusa glabro-vagina* G.A. Fu)

China. Erect, internodes cylindrical and glabrous, culm sheath deciduous, sheath blade erect and narrow triangular, sheath auricle ovate, leaves linear lanceolate shortly pubescent beneath, pseudospikelets several fasciculate on each node, spikelets 6- to 7-flowered middle 3 or 4 perfect, glumes absent, lemma ovate-oblong, 9- to 11-nerved, 3 stigmas plumose, used for framing and construction, on low hills, around villages, see *Acta Phytotaxonomica Sinica* 20(4): 489-491, pl. 1. 1982.

B. glaucophylla Widjaja

Indonesia. See *Reinwardtia* 11(2): 57-152. 1997.

B. grandis (Q.H. Dai & X.L. Tao ex Keng f.) Ohrnb.

China.

B. griffithiana Munro (*Arundarbor griffithiana* (Munro) Kuntze; *Dendrocalamus griffithianus* (Munro) Kurz)

India. Scandent or subscandent, slender, soft, hollow culms fistular, leaves lanceolate and acuminate, terminal panicle with spicate branches, heads of spikelets, 2 glumes ovate-acute, lemmas mucronate, 3 lodicules fimbriate, ovary smooth, 3 plumose stigmas, used locally for various purposes, see *Transactions of the Linnean Society of London* 26(1): 99. 1868, *Preliminary Report on the Forest and other Vegetation of Pegu* App. B: 94. 1875, *Revisio Generum Plantarum* 2: 761. 1891.

B. guadua Bonpl. (*Arundarbor guadua* (Bonpl.) Kuntze; *Guadua aculeata* Rupr. ex E. Fourn.; *Guadua angustifolia* Kunth; *Guadua angustifolia* subsp. *angustifolia*; *Nastus guadua* (Bonpl.) Spreng.)

South America. Large, woody, erect, caespitose, thorny with thorns from the nodes, armed with straight and hooked spines, clumped, rhizome pachymorph, arching descending branches, lower branches strongly thorny, sheaths deciduous, culm sheaths covered with brown hairs, inflorescence variable, spikelets 1-3 at nodes, glumes keeled, paleas acute, 3 slender lodicules, ovary stipitate, 2-3 stigmas, forming extensive impenetrable thickets and groves, pulp for paper, found along riverbanks, forest edge on riverbank, along streams, see *Plantae Aequinoctiales* 1: 68, t. 20. 1808, *Synopsis Plantarum* 1: 253. 1822, *Systema Vegetabilium*, editio

decima sexta 2: 113. 1825, *Revisio Generum Plantarum* 2: 761. 1891 and *Flora of the Guianas* 235. 1990, *Ann. Missouri Bot. Gard.* 79(4): 737-769. 1992.

in English: bamboo

in Bolivia: tacuara, tacuar-guasú

in Colombia: guadua

in Ecuador: guadúa, caña de Guayaquil, caña guadúa, caña mansa, caña brava, gadúa, amisa

in Paraguay: tacuara

in Venezuela: guafa, guajua, juajua

B. guangdongensis N.H. Xia & R.S. Lin (*Bambusa breviflora* Munro var. *hainanensis* G.A. Fu; *Bambusa longispiculata* not Gamble ex Brandis; *Bambusa tuldooides* auct., not Munro)

China, Guangdong, Hainan. Culms lower part slightly zigzag, tips erect or slightly drooping, internodes glabrous, lower internodes with yellowish green or pale green stripes, wall thick, basal one or two nodes bearing short aerial roots, branches usually arising from basal third or fourth node upward, culm sheaths deciduous leathery, leaf blades linear or linear-lanceolate glabrous adaxially and densely pubescent abaxially, spikelets 46 florets, glume absent, cultivated, culms used for scaffolding.

B. guangxiensis Chia & H.L. Fung (*Bambusa distegia* (Keng & Keng f.) L.C. Chia & H.L. Fung; *Bambusa fung-homii* McClure; *Lingnania fung-homii* McClure)

China, Guangxi. Tuberculately hairy when young, internodes with deciduous pubescence, node rings densely hairy, many branches, culm sheaths deciduous leathery densely covered by brownish tuberculate hairs, sheath auricles scabrous, sheath ligule very short to extremely short, sheath blade lanceolate, used in weaving, building material, lowland areas, see *Lingnan University Science Bulletin* 9: 36. 1940, *Lingnan Science Journal* 19(4): 535-536, t. 37. 1940, *Acta Phytotaxonomica Sinica* 18(2): 213-214. 1980.

B. hainanensis Chia & H.L. Fung (*Bambusa scandens* Blume ex Nees; *Lingnania scandens* McClure)

China, Hainan. Climber, scrambling, wall very thin, culms covered with appressed stiff hairs, internodes glabrous, thin and slender branches, sheath thick, leaves oblong-lanceolate to linear-lanceolate and pubescent beneath, 3 lodicules, 3 stigmas, tropical forest, see *Flora* 7: 291. 1824, *Lingnan University Science Bulletin* 9: 38. 1940, *Acta Phytotaxonomica Sinica* 18(2): 213. 1980.

B. heterostachya (Munro) Holttum (*Bambusa heterostachya* (Gamble) Holttum; *Bambusa latispiculata* (Gamble) Holttum; *Gigantochloa heterostachya* Munro; *Gigantochloa latispiculata* Gamble)

Origin unknown, Malaysia, Singapore. Stiffly erect, open or loosely tufted, straight, strong, sympodial, culm sheaths covered with dark hairs, blades erect narrowly to broadly

triangular, auricles with curly bristles, leaf blades glabrous, inflorescence interauctant, up to 10 florets, groups of 2-3 pseudospikelets at each inflorescence node, spikelets flattened, 2 glumes glabrous, 3 lodicules, 6 stamens with filaments connate, 1-3 plumose stigmas, flowers regularly, only found in cultivation, propagated by rhizome cuttings, ornamental, culms suitable for poles, basketry, adapted to a humid tropical lowland climate, see *Transactions of the Linnean Society of London* 26(1): 125. 1868, *Annals of the Royal Botanic Garden. Calcutta*. 7: 67, t. 59. 1896, *The Flora of British India* 7(22): 400. 1897 [1896] and *Journal Arnold Arboretum* 27: 341. 1946, *Gard. Bull. Sing.* 16: 65-67. 1958, *Nature Malaysiana* 7: 34-39. 1982, *Bamboo Journal* 11: 20-28. 1993, *Sandakania* 3: 27-28. 1993.

Malayan vernacular names: buloh galah, buloh pengait, buloh telang, buluh galah, buluh minyak, buluh pengahit, buluh pering, buluh telang, buluh telang minyak, buluh tilah, buluh tilan

B. hirsuta Holttum (*Neoleleba hirsuta* (Holttum) Widjaja) Indonesia, New Guinea. Inflorescences terminating leafy branches, see *Kew Bulletin* 21: 271. 1967, *Reinwardtia* 11(2): 118. 1997.

B. horsfieldii Munro (*Bambusa cornuta* Munro; *Fimbriambusa horsfieldii* (Munro) Widjaja) (named for Dr. Thomas Horsfield, 1773-1859 (London), American physician, botanist and zoologist, M.D. Philadelphia 1798, from 1800 to 1818 naturalist and plant collector in Malesian islands, in 1820 a Fellow of the Linnean Society and in 1828 of the Royal Society of London, from 1820 Keeper of the East India Company Museum at London, among his most valuable writings are Part I (-II) of a descriptive *Catalogue of the Lepidopterous Insects Contained in the Museum of the Honorable East-India Company*. London 1828-1829, with Frederic Moore (1830-1907) wrote *A Catalogue of the Birds in the Museum of the Honorable East-India Company*. London 1854-1858, with Nicholas Aylward Vigors (1785-1840) wrote *A Description of the Australian Birds in the Collection of the Linnean Society*. London 1827. See D.G. Crawford, *A History of the Indian Medical Service, 1600-1913*. 2: 170-171. London 1914; Lady Sophia Raffles, *Memoir of the Life and Public Services of Sir Thomas Stamford Raffles*. London 1830; Colin Clair, *Sir Stamford Raffles*. Founder of Singapore. Herts. 1936; Emily Hahn, *Raffles of Singapore: A Biography*. New York 1946 (1st American edition); J.H. Barnhart, *Biographical notes upon botanists*. 1: 163, 2: 205. 1965; John Joseph Bennett (1801-1876) & Robert Brown (1773-1858), *Plantae Javanicae rariores*, descriptae iconibus illustratae, quas in insula Java, annis 1802-1818, legit et investigavit Thomas Horsfield, M.D. London 1838-1852; A. Lasègue, *Musée botanique de Benjamin Delessert*. Paris 1845; Mea Allan, *The Hookers of Kew 1785-1911*. London 1967; J. Ewan, editor, *A Short History of Botany in the United States*. 38. New York and London 1969; M. Archer, *Natural History Drawings in the India Office Library*. 46-

48, 80-82. London 1962; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933)

Southeast Asia. Culms scandent, young shoots edible, see *Transactions of the Linnean Society of London* 26(1): 115. 1868 and *Reinwardtia* 11(2): 81. 1997.

in the Philippine Islands: lopa

B. indigena Chia & H.L. Fung (*Bambusa dissimilis* W.T. Lin)

China, Guangdong, Hainan. Young culms pruinose, twigs of the lower branches shortened into soft spines, culm sheaths glabrous or only stiff hairy near base abaxially, sheath deciduous, sheath blade erect and triangular, sheath auricles unequal, leaves beneath densely covered with short pubescence, pseudospikelets linear, spikelets with 5-12 florets, apical 1 floret sterile, 1 glume ovate elliptic 11-nerved apex acute and mucronate, lemma lanceolate glabrous 13- to 15-nerved apex acuminate, 3 stigmas plumose, cultivated as green fence and for building purposes, on low hills, similar to *Bambusa diaoluoshanensis* L. C. Chia & H. L. Fung, see *Acta Phytotaxonomica Sinica* 19(3): 370, pl. 13, f. 4. 1981, *Bamboo Res.* 1983(2): 50, f. 1. 1983.

B. insularis Chia & H.L. Fung (*Bambusa duriuscula* W.T. Lin)

China, Hainan. Basal internodes glabrous with purple spots, a ring of brown silky hair below each node, branches usually arising from basal first or second node, solitary branches on basal nodes and 3 to numerous on other nodes, twigs of the lower branches shortened into soft spines, culm sheaths caducous, sheath blade erect with margins long ciliate, sheath auricles unequal and wrinkled, sheath ligule serrate and pubescent, leaves narrow lanceolate and shortly pubescent beneath, cultivated, near or around villages, lower hills, see *Bulletin of Botanical Laboratory of North-Eastern Forestry Institute* 1980(6): 87-88, f. 2. 1980, *Acta Phytotaxonomica Sinica* 19(3): 370-371, pl. 13, f. 5. 1981.

B. intermedia Hsueh & Yi

China, Guangzhou, Yunnan. Young culms pruinose, branches many from basal portion of culms, culm sheaths caducous and coriaceous, sheath auricles inconspicuous often ciliate, sheath ligule hirsute, sheath blade ovate lanceolate, leaves long lanceolate, 1-2 glumes, 3 stigmas, widely cultivated, used for weaving, an intermediate form of subg. *Leleba* and sub. *Lingnania*, see *Journal of Bamboo Research* 3(1): 43, f. 1. 1984.

B. jacobsii Widjaja

Indonesia. See *Reinwardtia* 11(2): 57-152. 1997.

B. jaintiana Majumdar (of Jaintia Hills of Meghalaya)

India. Shrubby habit, culm sheaths glabrous, similar to *Bambusa tulda* Roxb., see *Fl. Ind. Enumerat.-Monocot.* 274. 1989.

B. khasiana Munro (for Khasi Hills) (*Arundarbor khasiana* (Munro) Kuntze)

India. Culms solitary, fistular, singly growing, thin-walled, soft, nodes not prominent, creeping rhizomes, culm sheath densely hairy, leaf sheaths glabrous, elongate panicle, spikelets in subverticillate groups, lower glumes mucronate, paleas ciliate on the keels, lodicules shortly fimbriate, 3 stigmas plumose, see *Transactions of the Linnean Society of London* 26(1): 97. 1868, *Revisio Generum Plantarum* 2: 761. 1891.

in India: bewar, chatur, serim, tirriah, tumoh, tyrah, wachiusa

B. kingiana Gamble

India. Leaves linear-lanceolate with a rather thick petiole, see *Annals of the Royal Botanic Garden. Calcutta.* 7: 46. 1896, *Flora British India* 7: 393. 1896.

B. kyathaungtu Brandis ex Camus

Myanmar. See *Les Bambusées* 116. 1913.

B. lako Widjaja

Indonesia. See *Reinwardtia* 11(2): 57-152. 1997.

B. lapidea McClure (*Bambusa miyiensis* T.P. Yi)

China, Guangdong, Guangxi, Yunnan, Sichuan. Culms strong and pliant, erect, clumps unicaespitose, nodes swollen, aerial roots from the nodes, internodes glabrous and thick-walled to solid, primary branches strong, twigs of the lower nodes often shortened into soft or hard spines, secondary branches often thorny, branches emerged from the basal third or fourth node upward, culm leaves promptly deciduous, culm sheaths thick-leathery and glabrous and shiny and olive-green with purple streaks when fresh, sheath auricles with wavy corrugation and margins shortly hirsute, sheath blade erect ovate to broadly ovate, slender leaves lanceolate, pseudospikelets linear compressed, spikelets containing 5 or 6 perfect florets, apex usually with 2 sterile florets, glumes absent, lemma glabrous many-nerved, 3 stigmas, tough culms borer resistant, used for scaffolding, bamboo pegs, carrying poles, along riversides and villages, hills, plains, see *Lingnan Science Journal* 19(4): 531-533, t. 35. 1940, *Bulletin of Botanical Research* 2(4): 99-100. 1982.

in English: horse-hoof bamboo

B. latideltata W.T. Lin (also *latideltada*)

China. Culms internodes glabrescent, nodes covered with a ring of pale hispid below and above sheath scars, branches fasciculate usually arising from basal first node upward, lower branches sometimes shortened into weak or tough thorns, culm sheaths deciduous densely covered with brown stiff hairs, leaf blades linear glabrous adaxially and pubescent abaxially, similar to *Bambusa lapidea* McClure, see *Journal of Bamboo Research* 13(2): 15-16, f. 1. 1994.

B. laxa K.M. Wong

Peninsular Malaysia. See *Sandakanian* 3: 29. 1993.

Malayan name: buluh tilan payong

B. lenta L.C. Chia

China, Fujian. Thin, pruinose, zigzag, asymmetrical, branches usually arising from basal eighth to tenth node upward, culm sheath deciduous and coriaceous, sheath auricles different in size, sheath ligule serrate, sheath blade erect and rough, leaves linear densely pubescent beneath, easy to split, material for weaving, cultivated at lower altitude, along riversides and around villages, see *Guihaia* 8(2): 125-126. 1988.

B. liangchiana N.H. Xia (*Bambusa burmanica* not Gamble)

China, Yunnan, Malaysia, Myanmar, Thailand. Culms internodes subsolid brown hairy when young, nodes slightly prominent with a ring of grayish white or yellowish white silky hairs below and above sheath scars, basal nodes bearing short aerial roots, culm sheaths caducous, leaf blades linear-lanceolate glabrous adaxially glaucous and densely pubescent abaxially.

B. lingnanioides W.T. Lin (*Bambusa parviflora* (J. Presl) Schult. & Schult. f.; *Lingnania parviflora* McClure)

China. See *Systema Vegetabilium* 7(2): 1350. 1830 and *Lingnan University Science Bulletin* 9: 37. 1940, *Acta Phytotaxonomica Sinica* 26(2): 146. 1988.

B. lixin Hsueh & T.P. Yi (*Bambusa nutans* Munro subsp. *cupulata* Stapleton; *Bambusa tulda* not Roxb.)

China, Bangladesh, Bhutan, India, Myanmar, Nepal. Culms lower parts straight, tips slightly drooping, internodes white powdery when young, thick-walled, nodes flat, several to many fasciculate branches usually arising from basal first node upward, lower branches bent downward, culm sheaths caducous thick leathery, leaf blades broad-linear to linear-lanceolate glabrous or sometimes hispidulous near base adaxially, pseudospikelets solitary or 2-5 fasciculate on each node of flowering branches, spikelets linear to linear lanceolate, 4-6 florets, glumes 1 or 2 many-nerved apex acute, lemma ovate to oblong glabrous many-nerved apex acute or acuminate and fine tipped, palea 2-keeled, 3 stigmas plumose, along riversides, around villages, in open fields, see *Flora Indica; or, Descriptions of Indian Plants* 2: 193. 1832 and *Bamboo Research in Asia* 2(1): 30, f. 2. 1983, *Edin. J. Bot.* 51: 19. 1994.

B. longipalea W.T. Lin

China. Culms lower parts ± zigzag, culm internodes deep green and with purple stripes when young, nodes glabrous, branches usually arising from basal first or second node upward, branchlets of lower ones sometimes shortened into weak thorns, culm sheaths deciduous, leaf blades linear-lanceolate glabrous adaxially and pubescent abaxially, 7-8 florets, 0-1 glumes, lemma subglabrous, ovary obovoid sim-

ilar to *Bambusa indigena* L.C. Chia & H.L. Fung, see *Acta Phytotaxonomica Sinica* 26(3): 224, pl. 1. 1988.

B. longispiculata Gamble ex Brandis (*Bambusa tulda* var. *longispiculata* (Gamble) Bois & Grignan)

Asia tropical, India, Thailand. Arborescent, culms cylindrical, densely clumped, evergreen or deciduous, large dense clumps, straight, appressed black spicules, a ring above and below each joint, culm sheaths densely appressed, blades glaucous beneath, sheath auricles unequal, sheath ligule serrate and densely pubescent, leaves linear-lanceolate pubescent beneath, few branches flowering, clump blooming and often dying, inflorescence erect often branching, large compound panicle with branching spikes, 2 empty glumes, lemmas acuminate, paleas 2-keeled, 2-3 lodicules, 6 stamens or rarely 3, ovary stipitate, 3 stigmas plumose, cultivated, naturalized elsewhere, used for frame and fencing, natural resistance to insects, found in rainforest, moist areas, see *Indian Trees* 668. 1906, *Ceiba* 19(1): 1-118. 1975, *Cuscatlania* 1(6): 1-29. 1991.

in India: metenga, thaikwa

in Thailand: phai lam malok, phai yai ko, phar malok

B. macrolemma Holttum

Papua New Guinea. Ornamental, see *Kew Bulletin* 21: 274. 1967.

B. macrotis Chia & H.L. Fung

China, Guangdong. Basal nodes with white silky hairs, branches usually emerged from basal nodes, branches of the lower basal part spinescent, glabrous culm internodes, culm sheaths slightly tardily deciduous with apex slightly asymmetrical broad arched, sheath auricles unequal, leaves linear lanceolate shortly pubescent beneath, cultivated, used for living fences and as fishing tools, along riversides, similar to *Bambusa rutila* McClure, see *Acta Phytotaxonomica Sinica* 19(3): 371-372, pl. 13, f. 6. 1981.

B. maculata Widjaja

Indonesia. See *Reinwardtia* 11(2): 57-152. 1997.

B. magica Ridl. (*Bambusa elegans* Ridl.; *Holttumochloa magica* (Ridl.) K.M. Wong)

Malay Peninsula. See *Journal of the Straits Branch of the Royal Asiatic Society* 44: 208-209. 1905, *Kew Bulletin* 48(3): 520, f. 1-2. 1993.

B. malingensis McClure

China, Hainan. Culms strong, stout, erect or semierect, clump forming, thick-walled, clumps unicaespitose, black when mature, branches of the lower basal part often spinescent with soft to hard spines, often branching from the culm base, branches several from the nodes, branches emerged from basal nodes upward, sheath auricles bristly and irregular, sheath scars slightly swollen, sheaths glabrous and ribbed-striate when dry, sheath blade erect triangular to narrowly triangular, leaf blades lanceolate to narrow

lanceolate, cultivated, culms can be used for frames and making farm appliances, windbreak, hedge, shelter for stock, in open places, hills, see *Lingnan University Science Bulletin* 9: 11. 1940.

in English: maling bamboo

B. marginata Munro (*Arundarbor marginata* (Munro) Kuntze; *Dinochloa marginata* (Munro) Brandis)

Myanmar. See *Transactions of the Linnean Society of London* 26(1): 114. 1868, *Revisio Generum Plantarum* 2: 761. 1891 and *Indian Trees* 681. 1906.

in Thailand: waa me, wa me

B. mastersii Munro (*Arundarbor mastersii* (Munro) Kuntze; *Melocalamus mastersii* (Munro) R.B. Majumdar)

India, Assam. Climbing, very small, reedlike, ligule very short, leaves attenuate at the base into a short petiole, see *Transactions of the Linnean Society of London* 26(1): 113. 1868, *Revisio Generum Plantarum* 2: 761. 1891 and *Fl. Ind. Enumerat.-Monocot.* 278. 1989.

in India: benti bans, bentibans, beti bans

B. membranacea (Munro) Stapleton & N.H. Xia (*Dendrocalamus membranaceus* Munro)

Asia, China, Laos, Vietnam, Thailand. Vegetable, human food, see *Transactions of the Linnean Society of London* 26(1): 149. 1868 and *Kew Bulletin* 52(1): 238. 1997.

Local name: waya

in Thailand: lai lo, sang doi, wa mi, wa mu, wae mi, wa tong tiang

B. merrillii Gamble

Philippines. See *Philippine Journal of Science* 5: 269. 1910.

B. microcephala (Pilger) Holttum

Papua New Guinea.

B. minutiligulata W.T. Lin & Z.M. Wu

China. See *Journal of Bamboo Research* 11(1): 27. 1992.

B. mitis (Lour.) Steud. (*Arundinaria japonica* Sieb. & Zucc.; *Arundo mitis* Lour.; *Bambos mitis* Poir.; *Bambusa mitis* Blanco; *Bambusa mitis* Poir.; *Bambusa mitis* (Lour.) Poir.; *Bambusa mitis* Hort. ex Carr.; *Bambusa mitis* Hort. ex Munro)

Asia. See *Flora Cochinchinensis, denuo in Germania edita* 1: 57. 1790, *Encyclopédie Méthodique. Botanique ... Supplément* 8: 704. 1808, *Flora de Filipinas* 271. 1837, *Revue Horticole* 380. 1866, *Transactions of the Linnean Society of London* 26: 18. 1868.

B. mollis Chia & H.L. Fung

China, Guangxi. Branches arising from basal third to fifth node upward, culm base nodes densely covered with white silky pubescence, culm sheath caducous, sheath auricles unequal, sheath ligule glabrous, sheath blade ovate-lanceolate, leaf blades linear-lanceolate shortly pubescent

beneath, used in weaving, growing around villages, see *Acta Phytotaxonomica Sinica* 19(3): 377-378, pl. 14, f. 7. 1981.

B. montana (Ridl.) Holttum (*Bambusa pauciflora* Ridl.; *Dinochloa montana* Ridl.; *Maclurochloa montana* (Ridl.) K.M. Wong)

Malay Peninsula. See *Journal of the Straits Branch of the Royal Asiatic Society* 44: 210. 1905, *Kew Bulletin* 11: 206. 1956, *Kew Bulletin* 48(3): 528, f. 6. 1993.

B. moreheadiana F.M. Bailey

Australia, Queensland. See *Report of the Government Scientific Expedition to the Bellenden-Ker Range upon the Flora and Fauna of that Part of the Colony* 71. Brisbane 1889 [botany by F.M. Bailey; zoology by Charles Hedley & Henry Tryon].

in Australia: Queensland climbing bamboo

B. multiplex (Lour.) Räsch. ex Schultes & Schultes f. (*Arundarbor multiplex* (Lour.) Kuntze; *Arundarbor nana* (Roxb.) Kuntze; *Arundinaria glaucescens* (Willd.) P. Nakai; *Leleba shimadai* (Hayata) Nakai; *Ludolfia glaucescens* Willd.; *Ludolphia glaucescens* Willd.)

Indochina, southern China. Perennial, shrubby, slender and weak, erect or arching above, top slightly bending, spineless, young culms pruinose, thickly growing, variable and polymorphic, spreading, densely tufted, forming dense clumps of closely placed culms, sympodial and pachymorph rhizomes, clumps unicaspitose, culms very numerous, internodes green throughout and waxy, branches small and usually emerged from the seventh node upward, auricles of culm sheath absent, culms leaves deciduous, ligule short, culm sheath with caducous black hairs, leaf sheath with white apical bristles, leaves usually at the end of a branch, 5-10 leaves on each twig, leaves lanceolate densely pubescent beneath, at the nodes of a leafless branch several slender pseudospikelets sessile in small clusters, up to ten fertile florets, uppermost floret rudimentary, spikelet linear-lanceolate, 2 glumes or none or rarely one, lemmas ovate-lanceolate, palea keels slightly fringed, 3 unequal ovate lodicules membranous, 6 stamens long-exserted and pendulous, ovary cylindrical narrow at the base and pubescent above, 3 plumose stigmas, sometimes die after flowering,

usually propagated by rhizome cuttings, garden plant, ornamental, widely cultivated for hedging and for construction purposes, windbreak, green fences, in weaving or a binding material, dwarf cultivars suitable as indoor pot plant (*pen-jing*), paper is made from the culms, canes split easily, culms are used for making umbrellas, mats and handicrafts, a tea prepared from a handful of the shoots is used as an abortient, young shoots bitter tasting, culms often used as fishing rods, only known from cultivation, well on sandy loams, see *Fl. Cochinch.* edition 1. 1: 58. 1790, *Nomenclator Botanicus* edition 3 103. 1797, *Der Gesellschaft naturforschender Freunde zu Berlin Magazin für die neuesten Entdeckungen in der gesammten Naturkunde.* 2: 320. Berlin 1808, *Ess. Agrostogr.* 144, 152. 1812, *Systema Vegetabilium* 7(2): 1350-1351. 1830, *Fl. in English: hedge bamboo, Chinese goddess bamboo, Chinese dwarf bamboo, Oriental hedge bamboo, Chinese bamboo, bambu China

Local names: marona, China una

in Indonesia: bambu china, buluh pagar, aor selat

in Japan: horai-chiku, hourai-chiku, houshou-chiku (white stripes), suou-chiku (green stripes on yellow background), hou-ou-chiku (*Hou-ou*, is a legendary bird), beni-hou-ou (green stripes on the culms and the branches), fu-iri-hou-ou (white stripes on the leaves), mikisuji-hou-ou (green stripes on a yellowish culm), komachi-dake, houbi-chiku

in Okinawa: ubidai, njadaki

in the Philippine Islands: kauayang tsina, kawayan sa song, kawayan tsina

in Malaysia: buloh china, buloh pagar, buluh Cina, buluh pagar

in Myanmar: pa-lau-pinan-wa

in Sri Lanka: China una

in Thailand: phai Chiang Phrai, phai-liang, phai sang phrai, phak

in Vietnam: cay hop

B. multiplex (Lour.) Räsch. ex Schultes & Schultes f. var. **elegans** (Koidzumi) Muroi (*Bambusa multiplex* var. *elegans* (Koidzumi) Muroi; *Leleba elegans* Koidz.)

South China. Caespitose, culm-sheaths glabrous, leaves distichous and minutely pubescent, cultivated, see *Acta Phytotaxonomica et Geobotanica* 3(1): 27. 1934, *New Keys of Japanese Trees*, Revised Edn. 457. Osaka 1961.

in Japan: hoo-chiku, hobi-chiku

B. multiplex (Lour.) Räsch. ex Schultes & Schultes f. var. **incana** B.M. Yang (*Bambusa glaucescens* var. *strigosa* (T.H. Wen) L.C. Chia; *Bambusa glaucescens* var. *pubivagina* (W.T. Lin & Z.M. Wu) Xia; *Bambusa multiplex* var. *pubivagina* W.T. Lin & Z.J. Feng; *Bambusa pubivaginata* W.T. Lin & Z.J. Feng; *Bambusa strigosa* T.H. Wen)

China, Hunan. Back of the culm sheath densely shortly whitish tomentose, on open fields, along riversides, see *Journal of Bamboo Research* 1(1): 31, f. 8. 1982, *Journal of Hunan Normal Univ.* 1983(1): 77, f. 1. 1983.

B. multiplex (Lour.) Räsch. ex Schultes & Schultes f. var. **multiplex** (*Arundinaria glaucescens* P. Beauv.; *Arundo multiplex* Loureiro; *Bambusa albofolia* T.H. South and southeastern China. Culms ultimate branches 5- to 12-foliate, see *Journal of Bamboo Research* 8(1): 20-22, f. 4. 1989.

B. multiplex (Lour.) Räsch. ex Schultes & Schultes f. var. **pubivagina** W.T. Lin & Z.J. Feng (*Bambusa glaucescens* var. *pubivagina* (W.T. Lin & Z.J. Feng) N.H. Xia)

Guangdong, China. See *Philippine Journal of Science* 7(4): 230. 1912, *Journal of Bamboo Research* 12(2): 35. 1993, *Journal of Tropical and Subtropical Botany* 1(1): 9. 1993.

B. multiplex (Lour.) Räsch. ex Schultes & Schultes f. var. **riviereorum** R. Maire (*Bambusa glaucescens* var. *riviereorum* (Maire) L.C. Chia & H.L. Fung)

China. Clumped, solid, soft, drooping, 13-25 leaves on each twig, leaves lanceolate, ornamental, potted plants, used as a green living fence or shelter, on low hills, riversides, see *Flore de l'Afrique du Nord* 1: 355. 1952, *Phytologia* 52(4): 257. 1982.

B. multiplex (Lour.) Räsch. ex Schultes & Schultes f. var. **shimadae** (Hayata) Sasaki (also spelled **shimadai**) (*Bambusa glaucescens* var. *shimadai* (Hayata) L.C. Chia & But; *Bambusa multiplex* var. *shimadae* Sasaki; *Bambusa shimadai* Hayata; *Leleba shimadai* (Hayata) Nakai)

Japan, China, Taiwan. Culm sheaths nearly symmetrically broadly arched, used for hedge or windbreak, usually cultivated in fields or mountains, see *Transactions of the Linnean Society of London* 26(1): 89. 1868 and *Icones plantarum formosandarum nec non et contributiones ad floram formosanam*. 6: 151-152, f. 59. 1916, *Journal of Japanese Botany* 9(1): 17. 1933, *Phytologia* 52(4): 258. 1982.

B. mutabilis McClure

China, eastern Asia, Hainan. Clumps unicaespitose, culm wall thin, young culms slightly pruinose, internodes thin-walled and more or less glabrous, branches slender, branches usually emerged from around the fifth to seventh nodes upward, culm sheaths promptly deciduous, sheaths smooth and glabrous, sheath auricles subequal and oblong, sheath ligule short, leaf blades narrowly lanceolate, leaves densely hairy on the underside, used for weaving, along riversides or forest edge, see *Lingnan University Science Bulletin* 9: 12. 1940.

in English: lesser yellow bamboo

B. nepalensis Stapleton

Nepal. See *Edinburgh Journal of Botany* 51(1): 15, f. 5. 1994.

B. nguyenii Ohrenb.

Vietnam.

B. nutans Wallich ex Munro (*Arundarbor nutans* (G.C. Wall. ex Munro) Kuntze; *Bambusa nutans* Wall.)

China, Yunnan, Thailand, Myanmar. Elegant, straight, graceful, strong, creeping, culm top drooping, young culm pruinose, loosely clumped and much-branched, branches usually arising from basal fourth node upward, numerous fasciculate branches with central 3 conspicuously longer and thicker, sheaths coriaceous and caducous, sheath auricles prominent and unequal or subequal, sheath ligule with a ciliate margin, leaves narrow-lanceolate its underside sparsely tomentose, inflorescence variable, leafless panicle, 2-3 glumes mucronate, paleas 2-keeled, 3 lodicules fimbriate, 6-7 stamens, ovary pubescent, 2-3 stigmas plumose or glabrous, ornamental, raw material for making paper, culms used as poles, as building construction, fences, on slopes, see *Transactions of the Linnean Society of London* 26(1): 92. 1868, *Revisio Generum Plantarum* 2: 761. 1891 and *Edin. J. Bot.* 51(1): 17. 1994.

in India: badia bansa, beng, bidhuli, deobans, jotia-makal, kali, mahi bans, mahlu mallo, makla, malabans, mallo, mukial, seringjai, wakla, wa malang

in Thailand: phai bong

B. nutans Wall. ex Munro subsp. *cupulata* Stapleton

Nepal, India, Bangladesh, Bhutan. Erect, culm top drooping, inflorescence spicate, spikelets cylindrical, cultivated, used for construction, foliage as animal fodder, see *Edinburgh Journal of Botany* 51(1): 17, f. 6. 1994.

Vernacular names: mal bans, wahlo, jhushing

B. nutans Wall. ex Munro subsp. *nutans*

Nepal, India.

B. odashimae Hatusima

China.

B. oldhamii Munro (*Arundarbor oldhamii* (Munro) Kuntze; *Bambusa atrovirens* T.H. Wen; *Dendrocalamopsis atrovirens* (T.H. Wen) P.C. Keng ex W.T. Lin; *Dendrocalamopsis oldhamii* (Munro) Keng f.; *Dendrocalamopsis oldhamii* f. *oldhamii*; *Leleba oldhamii* (Munro) Nakai; *Sinocalamus oldhamii* (Munro) McClure)

China, Fujian, Guangdong, Guangxi, Hainan, Taiwan. Culms slightly zigzag, glabrous and with white powder when young, nodes flat, branches many from middle portion of culms, culm sheaths deciduous leathery, leaves sheaths hispid when young, pseudospikelets 5- to 9-flowered, 1 glume, ovate lemmas similar to glumes, 3 lodicules, 3 stigmas, commonly cultivated, shoots of very good quality, see *Transactions of the Linnean Society of London* 26(1): 109. 1868, *Revisio Generum Plantarum* 2: 761. 1891 and *Journal of Japanese Botany* 9(1): 16. 1933, *Lingnan University Science Bulletin* 9: 67. 1940, *Journal of Bamboo Research* 2(1): 12. 1983.

B. oldhamii Munro f. *revoluta* W.T. Lin & J.Y. Lin (*Dendrocalamopsis oldhamii* f. *revoluta* (W.T. Lin & J.Y. Lin) W.T. Lin; *Neosinocalamus revolutus* (W.T. Lin & J.Y. Lin) T.H. Wen; *Sinocalamus oldhamii* f. *revolutus* (W.T. Lin & J.Y. Lin) W.T. Lin)

China. See *Acta Phytotaxonomica Sinica* 26(3): 225, pl. 2. 1988, *Guihaia* 10(1): 15. 1990, *Journal of Bamboo Research* 10(1): 23. 1991, *Journal South China Agricultural University* 14(3): 111. 1993.

B. oliveriana Gamble

India, Myanmar. Tufted, thick-walled, much branched from the base upward, much-branched panicle of 1-sided spikes, bracteate clusters of spikelets, spikelets flattened, 1-2 glumes ovate-lanceolate, terminal floret imperfect, lemmas tip bristly, paleas 2-keeled, 3 lodicules long-fimbriate, stamens long-exserted, 2 stigmas plumose, used locally for various purposes, found in moist deciduous forests, see *Annals of the Royal Botanic Garden, Calcutta*. 7: 130. 1896, *Fl. Brit. India* 7: 392. 1896.

in English: bush bamboo

B. pachinensis Hayata (*Leleba pachinensis* (Hayata) Nakai)

Taiwan, China, Fujian. Dark green, branches arising from basal eighth to tenth nodes upward, culm sheaths caducous leathery rigid, sheath coriaceous and densely pubescent, sheath ligule slightly circular, sheath blade lanceolate to triangular, oblong sheath auricles distinct and ciliate, leaf blade linear lanceolate, pseudospikelets lanceolate to linear-lanceolate, lemma ovate-elliptic acute and mucronate, 3 lodicules, 3 stigmas plumose, usually cultivated along riverbanks, in lower hills and around villages, see *Icones plantarum formosandarum nec non et contributiones ad floram formosanam*. 6: 150-151, f. 58. 1916, *Journal of Japanese Botany* 9(1): 17. 1933.

B. pachinensis Hayata var. *hirsutissima* (Odashima) Lin (*Bambusa textilis* McClure var. *fusca* McClure; *Leleba beisitiku* var. *hirsutissima* Odashima; *Leleba pachinensis* var. *hirsutissima* (Odashima) Lin)

Taiwan, China, Guangdong, Guangxi. Branch sheath with short silver white pubescence, culm sheaths ligules long fimbriate, cultivated in lower hills and around villages, used as windbreak, see *Journal of the Society of Tropical Agriculture* 8(1): 58, f. 3. 1936, *Lingnan University Science Bulletin* 9: 14, 16. 1940, *Bulletin of the Taiwan Forest Research Institute* 98: 21. 1964.

B. pachinensis Hayata var. *pachinensis* (*Bambusa beisitiku* (Odashima) P.C. Keng; *Leleba beisitiku* Odashima; *Leleba pachinensis* (Hayata) Nakai)

Taiwan, China. Culm sheaths ligules irregularly dentate, usually cultivated along riverbanks, in lower hills and around villages.

B. pallida Munro (*Arundarbor pallida* (Munro) Kuntze; *Bambusa critica* Kurz)

Northeastern India, Bhutan, China, Myanmar, Thailand. Caespitose, culm wall thin, growing in thick clumps, branching at the upper part of the culm, branches usually arising from basal sixth or seventh node upward, many slender and short branches, basal internodes with aerial roots, young culms pruinose, culm sheaths caducous, sheath pruinose and glabrous, sheath auricles small almost round to semicircular, sheath blade erect, 7-9 leaves at each twig, leaves narrowly lanceolate densely shortly tomentose beneath, large branching panicle, heads of many sterile and few fertile spikelets, 1-2 glumes ovate acute, lemmas ciliate on the keels, 3 lodicules fimbriate, stamens exserted, 3 plumose stigmas, used for house building and screens, cultivated, hills and plains, open areas, see *Transactions of the Linnean Society of London* 26(1): 97. 1868, *Revisio Generum Plantarum* 2: 761. 1891.

in India: bakhhal, bijli, bongshing, burwal, jowa, ka-sken, kalinga, loto, makal, pashipo, pshi, pushee, seskien, shen,

skhen, tesero, teusng, tneng, tounng, usken, walkthai, watai, wathai, watoi

in Thailand: phai phio, phai phiu

B. papillata (Q.H. Dai) K.M. Lan (*Bambusa papillata* (Q.H. Dai) Q.H. Dai, nom. illeg., non *Bambusa papillata* (Q.H. Dai) K.M. Lan; *Lingnania papillata* Dai)

Guangxi, China. Bending and drooping at the top, covered by tuberculately spinous hairs when young, young culm with a pruinose ring on each joint, internodes densely hairy, most of branches fascicled, deciduous culm sheaths rectangular leathery, sheath auricles narrow oblong, sheath ligule low and short with dentate margin, sheath blade ovate-lanceolate and erect, leaves lanceolate to linear-lanceolate, used in papermaking and weaving, see *Acta Phytotaxonomica Sinica* 20(2): 213-215, pl. 4. 1982, *Flora Guizhouensis* 5: 281. 1988, *Flora Reipublicae Popularis Sinicae* 9(1): 129, pl. 31, f. 6-7. 1996.

B. parvifolia W.T. Lin

Guangdong, China. See *Bamboo Res.* 1986(2): 22. 1986.

B. pauciflora Ridl. (*Dinochloa montana* Ridl.; *Maclurochloa montana* (Ridl.) K.M. Wong)

Malay Peninsula. See *The Journal of the Straits Branch of the Royal Asiatic Society* 44: 210. 1905, *Flora of the Malay Peninsula* 5: 259. 1925, *Kew Bulletin* 48(3): 528, f. 6. 1993.

B. pervariabilis McClure

Southern China, Guangxi, Guangdong. Strong and straight culms, culms top not drooping, erect or nearly erect, young culms pruinose with white deciduous pubescence, clumps unicaespitose, internodes thick-walled covered with a white bloom, branches stiff and straight, branching low, branches usually emerged from the basal first node upward, culm leaves promptly deciduous, basal internodes with yellow vertical stripes, culm sheaths caducous, sheath auricles prominent, sheath ligule margin dentate, sheath blade erect, leaves long lanceolate densely pubescent beneath, pseudospikelets linear, spikelets 5- to 10-flowered subtended by 2 or 3 bud-bearing bracts, one glume oblong glabrous 9-nerved acute, lemma oblong-lanceolate glabrous 13- to 15-nerved acute, 3 hairy stigmas, shavings of culm-cortex used in China for treating febrile diseases and hematuria, used for house building and screens, construction materials, furniture, in weaving, on riverbanks, low hills, loose wet soils, around villages, related to *Bambusa tuldoidea* Munro, see *Lingnan University Science Bulletin* 9: 13. 1940, *Journal of Bamboo Research* 4(2): 9-10, f. 1. 1985.

in English: punting pole bamboo

B. pervariabilis McClure *pervariabilis*

Southern China. Basal several culm internodes green with yellowish white stripes, on riverbanks, low hills, loose wet soils, around villages.

B. pervariabilis McClure var. *viridistriata* Q.H. Dai & X.C. Liu

China, Guangxi. Internodes of culms and branches yellow with green stripes, cultivated, ornamental, see *Acta Phytotaxonomica Sinica* 24(5): 395. 1986.

B. pierreana Camus

Laos, Thailand. See *Notulae Systematicae. Herbarium de Paris* 2(8): 245. 1912.

Local names: lammalo mai, mammalo mai

in Thailand: lam malo

B. piscatorum McClure

Hainan, China. Branches usually arising from basal fourth to sixth node upward, culm sheath caducous, small sheath auricles ciliate and subequal, sheath ligule margin entire or denticulate, caducous sheath blade lanceolate-triangular and erect, leaves linear-lanceolate shortly pubescent beneath, used as fishing rod, cultivated around villages, very similar to *Bambusa mutabilis* McClure, see *Lingnan University Science Bulletin* 9: 14. 1940.

B. polymorpha Munro (*Arundarbor polymorpha* (Munro) Kuntze; *Bambusa cyanostachya* Kurz ex Gamble, also spelled *cyanestachya*)

Thailand, Bangladesh, India, Burma, China. Large, tree-like, densely clumped, very densely tufted, evergreen or sometimes deciduous, sympodial, erect, drooping or curving outward at the top, densely covered with persistent grayish white silky hairs, hollow culms, numerous fasciculate slender and arched branches usually arising from midculm upward, auricles of culm sheath present and equal, culm sheath thick, leaf blades lanceolate or linear-lanceolate or narrow-lanceolate, scabrous both surfaces of leaves, much-branched panicle, groups of pseudospikelet on long branches, spikelets cylindrical, long curved bract enclosing pseudospikelet, 2-3 florets, 1-3 empty glumes, lemmas many-nerved, paleas lanceolate and keeled, 3 lodicules fimbriate, ovary hirsute, 3 hairy stigmas, natural propagation by seed, normally flowers gregariously, suitable for landscaping, ornamental, young shoots edible with sweet taste or reputed to taste very bitter, canes used for construction and for the production of pulp and paper, matting, handicrafts, in weaving, roofing and flooring, found in humid mixed deciduous forest, rich and well-drained soils, deep fertile loams, in mountain forest, see *Transactions of the Linnean Society of London* 26(1): 98. 1868, *Revisio Generum Plantarum* 2: 761. 1891, *The Flora of British India* 7(22): 389. 1897 [1896] and *Unasylva* 13: 36-43. 1959, *Bano Biggyan Patrika* 13(1-2): 67-73. 1984 [by R.L. Banik].

in India: bari, bethua, betua, betwa, jaibarooa, jama, jama betua, jama betwa, narangi bhas, narangibans, paura

in Myanmar: kyathaungwa

in Thailand: hop, phai-hom, sa lom, salon, waa kheh, wa khe

B. procera A. Chevalier & Camus

Vietnam. See *Bulletin du Muséum d'Histoire Naturelle* 28: 379. 1922.

B. prominens H.L. Fung & C.Y. Sia

China. Culm thick, fast growing, tough, branching at the lower part, aerial roots in some internodes near the culm base, numerous fasciculate branches usually arising from basal first node, twigs on lower branches often or sometimes shortened into soft spines or weak thorns, culm sheath tardily deciduous with a triangular protuberance at one side of apex, sheath blade triangular and erect, sheath auricles unequal, leaves densely shortly pubescent beneath, cultivated, used as construction material and fishing devices, along riversides, on hills, near and around villages, similar to *Bambusa tuldoidea* Munro, see *Acta Phytotaxonomica Sinica* 18(3): 372-373, pl. 14, f. 1. 1981.

B. pseudopallida Majumdar

India, Assam, Meghalaya. Shrubby habit, auricles pointed, see *Fl. Ind. Enumerat.-Monocot.* 275. 1989.

B. pubivaginata W.T. Lin & Z.M. Wu

China. See *Journal of Bamboo Research* 11(1): 29. 1992.

B. ramispinosa Chia & H.L. Fung

China, Guangxi. Smooth, glabrous, some basal internodes pruinose, branches usually arising from basal third node, twigs on lower branches often or sometimes shortened into soft spines, culm sheaths caducous, sheath auricles unequal, sheath ligule ciliate with a denticulate margin, sheath blade narrowly lanceolate and erect, leaves lanceolate, plains and slopes, see *Acta Phytotaxonomica Sinica* 19(3): 373, pl. 14, f. 2. 1981.

B. remotiflora (Kuntze) Chia & H.L. Fung (*Arundarbor remotiflora* Kuntze; *Bambusa remotiflora* Kuntze; *Lingnania fimbriiligulata* McClure; *Lingnania remotiflora* McClure; *Lingnania remotiflora* (Kuntze) McClure)

China, Guangdong, Guangxi, Vietnam. Top slightly bending, young culms pubescent, branches many from basal portion of culms, culm sheaths deciduous tough to coriaceous, sheath auricles narrow oblong with ciliate margin, 8-16 leaves on each twig, leaves glabrous, leaf blades lanceolate to oblong-lanceolate, 1-2 glumes, 3 stigmas, woven into stripes, used in weaving, lowland riverbank, see *Revisio Generum Plantarum* 2: 760. 1891 and *Lingnan Univ. Sci. Bull.* no. 9: 35. 1940, *Journal of the Arnold Arboretum* 23(1): 101. 1942, *Acta Phytotaxonomica Sinica* 18(2): 214. 1980.

B. riauensis Widjaja

Indonesia. See *Reinwardtia* 11(2): 57-152. 1997.

B. ridleyi Gamble (*Soejatmia ridleyi* (Gamble) K.M. Wong) (for the British botanist Henry Nicholas Ridley, 1855-1956 (Kew, Surrey), plant collector, botanical explorer, traveler, Botany Dept. British Museum 1880-1888, in 1888 was

appointed Singapore's first Scientific Director of the Botanic Gardens, he was largely responsible for establishing the rubber industry in the Malay Peninsula, he fathered the region's rubber industry by convincing Malaya's planters of the superior worth of *Hevea brasiliensis* (eleven seedlings arrived at the Singapore Botanical Garden where H.N. Ridley developed a method to propagate them rapidly and tap them for their lucrative white sap; today the method of collecting the latex from the trees is basically the same as when devised by H.N. Ridley over a century ago), his writings include *The Flora of the Malay Peninsula*. London 1922-1925, *The Dispersal of Plants Throughout the World*. Ashford, Kent 1930 and "A monograph of the genus *Liparis*." *J. Linn. Soc., Bot.* 22: 244-297. 1886; see J.H. Barnhart, *Biographical notes upon botanists*. 3: 155. 1965; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 332. 1972; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. 1917-1933; S. Lenley et al., *Catalog of the manuscript and archival collections and index to the correspondence of John Torrey*. Library of the New York Botanical Garden. 1973; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. Philadelphia 1964; E.D. Merrill, *An Enumeration of Philippine Flowering Plants*. 4: 221-222. Manila 1925-1926; I.C. Hedge & J.M. Lamond, *Index of Collectors in the Edinburgh Herbarium*. Edinburgh 1970; G. Murray, *History of the Collections Contained in the Natural History Departments of the British Museum*. 177. London 1904; Ernest Nelses & William Cuthbertson, *Curtis's Botanical Magazine Dedications, 1827-1927*. 314-316. [1931]; Merle A. Reinikka, *A History of the Orchid*. Timber Press 1996; R. Zander, F. Encke, G. Buchheim & S. Seybold, *Handwörterbuch der Pflanzennamen*. 14 Aufl. Stuttgart 1993)

Asia, India, Singapore. See *Annals of the Royal Botanic Garden, Calcutta*. 7: 34, t. 32. 1896, *Flora British India* 7: 388. 1896 and *Kew Bulletin* 48(3): 532, f. 7. 1993.

B. rigida Keng & Keng f. (*Bambusa stipitata* W.T. Lin)

China, Guangdong, Guangxi. Young culm covered with white waxy powder, several to numerous fasciculate branches usually arising from basal first or second node, culm sheaths caducous, sheath ligule dwarf and dentate, sheath blade erect and broadly lanceolate, 5-12 leaves on each twig, leaf blades narrowly lanceolate to linear-lanceolate to rectangular, pseudospikelets solitary or several to numerous fasciculate on each node of flowering branches, fasciculate pseudospikelets usually sterile, solitary pseudospikelets usually fertile 3- to 7-flowered subtended by several gemmiferous bracts, 3 stigmas, culm used as punt poles and in papermaking, bitter shoots not edible, cultivated along riversides, around villages, plains, see *Journal of the Washington Academy of Sciences* 36(3): 81, f. 2. 1946.

B. riparia Holttum (*Bambusa brassii* A. Camus; *Schizostachyum brassii* A. Camus) (for Leonard John Brass,

1900-1971, the leader and official botanist of the Archbold Collecting Expeditions to tropical areas, Papua New Guinea, British Solomon Islands, etc.)

Papua New Guinea. See *Journal of the Arnold Arboretum* 9(4): 144-146. 1928, *Kew Bulletin* 21: 275. 1967.

B. rugata (W.T. Lin) Ohrenb.

China.

B. rutila McClure (*Bambusa shuangliuensis* T.P. Yi)

China, Guangdong, Guangxi. Culms thick-walled and strong, lower part of culm somewhat sigmoid, culms erect or nearly erect, clumps unicaespitose, nodes swollen, internodes thick-walled and densely covered with appressed brown bristled hairs on the lower nodes, branches always emerged from the basal third or fourth node upward, main branches thick and drooping, culm leaves tardily deciduous, sheath auricles unequal, sheath ligule with dentate margin, sheath blade erect and triangular, 10 leaves on each twig, leaves underside shortly pubescent or glabrous, leaf blades narrowly lanceolate to linear lanceolate, pseudospikelets linear-lanceolate compressed, spikelets with 9 florets, apical 1 or 2 florets sterile, glumes absent, lemma ovate-lanceolate many-nerved, young shoots edible, culms used for poles and scaffolding, open areas, fields, around villages, see *Lingnan Science Journal* 19(4): 533-535, t. 36. 1940, *Bulletin of Botanical Research* 2(4): 100-102, f. 2. 1982.

in English: muk bamboo

B. sanzaoensis W.T. Lin

China. See *Journal of Bamboo Research* 12(3): 1-2, f. 1. 1993.

B. semitecta W.T. Lin & Z.M. Wu

China, Guangdong. Culms internodes glabrous, nodes slightly prominent, branches usually arising from basal seventh to eighth node upward, culm sheaths deciduous, leaf blades linear-lanceolate glabrous adaxially pubescent abaxially, on lower hills, see *Journal South China Agricultural University* 14(3): 111. 1993.

B. serracta (Q.H. Dai) Q.H. Dai (*Lingnaniania serracta* Q.H. Dai)

China, Guangxi. Culms sparsely covered by glaucous hairs, nodes flat, sheath scars densely covered by a ring of strigose hairs, branches many from basal portion of culms, culm sheaths deciduous thick-leathery densely hispid abaxially, leaf sheaths glabrous, culms used for weaving, growing on riverbanks and near villages, see *Acta Phytotax. Sin.* 20: 213. 1982, *Fl. Reipubl. Popularis Sin.* 9(1): 119. 1996.

B. sesquiflora (McClure) Chia & H.L. Fung (*Lingnaniania sesquiflora* McClure)

Vietnam. See *Journal of the Arnold Arboretum* 23(1): 99-100. 1942, *Acta Phytotaxonomica Sinica* 18(2): 214. 1980.

B. sinospinosa McClure (*Bambusa spinosissima* Hack.; *Guadua spinosissima* (Hack.) E.G. Camus)

China, Guangdong, Guangxi, Guizhou. Culms thick and tough and straight, bushy, clumps unicaespitose, internodes thick-walled and smooth and glabrous, internodes green, branches usually emerged from the basal first or second node upward, twigs on lower branches often or sometimes shortened into soft spines, secondary branches from nodes at culm base often hardened into sharp spines, sheath coriaceous and tardily deciduous, long ovate sheath auricles ciliate and almost equal, sheath ligule margin dentate, sheath blade ovate more or less erect, leaves linear-lanceolate, pseudospikelets linear to linear-lanceolate slightly compressed solitary or several fasciculate in each node of flowering branches, spikelets with 6-12 perfect florets, glumes usually absent, 3 stigmas plumose, giant bamboo, shoots edible, cultivated as a natural green fence and as a windbreak, shelter belt, water pipes, carrying poles, construction material, culms are often used for scaffolding, found along riversides, near villages, see *Österreichische Botanische Zeitschrift* 53(5): 197. 1903, *Les Bambusées* 1: 112. 1913, *Lingnan Science Journal* 19(3): 411, t. 19. 1940, *Journal of the Washington Academy of Sciences* 36(3): 80. 1946.

in English: Chinese thorny bamboo, spiny bamboo, Chinese spiny bamboo

B. sinthana Brandis ex Camus (*Bambusa sinthana* Brandis)

Myanmar. Erect, silky, along banks of streams, low moist ground, see *Indian Trees* 685. 1971.

B. solomonensis Holttum

Indonesia, New Guinea. Inflorescences terminating leafy branches, spikelets flattened, see *Kew Bulletin* 21: 274. 1967.

B. stenoaurita (W.T. Lin) Wen (*Bambusa stenoaurita* (W.T. Lin) D.Z. Li; *Dendrocalamopsis stenoaurita* (W.T. Lin) Keng f. ex W.T. Lin; *Neosinocalamus stenoauritus* (W.T. Lin) W.T. Lin; *Sinocalamus stenoauritus* W.T. Lin)

China, Guangdong, Guangxi. Glabrous, green, recurved apically, a waxy or pruinose ring below joint, clustered branching, branches several from middle portion of culms, culm sheaths deciduous leathery, sheath auricles narrow and linear, sheath ligule with denticulate margin, sheath blade ovate-lanceolate, leaves linear-lanceolate, pseudospikelets 6-flowered bracts 1-2, glumes ciliate 1-2, ciliate lodicules 3, stigmas 2-4 rarely 1, edible shoots, culms used for construction, see *Bulletin of Botanical Laboratory of North-Eastern Forestry Institute* 1980(6): 89, f. 3. 1980, *Guihaia* 10(1): 15-16. 1990, *Journal of Bamboo Research* 10(1): 22. 1991.

B. stenostachya Hack. (*Bambusa blumeana* cv. *blumeana*; *Ischurochloa stenostachya* (Hack.) Nakai)

Indochina, Taiwan. Clustered culms, caespitose, thorny, more or less flexuous, each node with many branches at a right angle to culms, twigs usually spiny, leaves oblong-

lanceolate, culm sheaths densely hairy, inflorescence a panicle of spicate branchlets, spikelets linear-lanceolate with 4-6 florets, 1-3 glumes broadly ovate and acute, lemmas acute, palea present, 3 ovate lodicules, stamens exserted, ovary narrowly ovoid, 3 plumose stigmas, shoots bitter and eaten, cultivated, used as living fences, windbreaking, building, furniture, see *Systema Vegetabilium* 7(2): 1343. 1830, *Bulletin de l'Herbier Boissier* 7(9): 725. 1899 and *Science Education [Rika Kyô-iku]* 15: 68. Tokyo 1932, *Bulletin of the Taiwan Forest Research Institute* 98: 12, f. 13. 1964.

in Japan: shi-chiku, rinshi-chiku (green stripes on the culm and branches and white stripes on the leaves)

B. striata Lodd. ex Lindl. (*Arundarbor striata* (Lodd. ex Lindl.) Kuntze; *Bambusa vulgaris* cv. *vittata* McClure; *Bambusa vulgaris* hort. f. *vittata* McClure; *Bambusa vulgaris* var. *striata* (Lodd. ex Lindl.) Gamble; *Bambusa vulgaris* var. *vittata* Rivière & C. Rivière; *Phyllostachys striata* (Lodd. ex Lindl.) Nakai)

China, Japan. Tufted, glabrous, ornamental, graceful, commonly cultivated, culms used as poles and in building construction, see *Collectio Plantarum* 2: 26, t. 47. 1808, *Revisio Generum Plantarum* 2: 761. 1891, *Annals of the Royal Botanic Garden. Calcutta.* 7: 44. 1896 and *Science Education [Rika Kyô-iku]* 15: 69. 1932, *Fieldiana: Botany, New Series* 24(2): 60. 1955, *Agriculture Handbook* 193: 46. 1961.

in India: bansini bans, basini bans, sundrogai

B. subaequalis H.L. Fung & C.Y. Sia

China. Smooth, straight, hard, nodes glabrous, branching at the lower part of the culm, twigs on lower branches usually spiny, culm sheaths caducous, sheath glossy and not pruinose, sheath blade erect and triangular with ciliate margin, leaves linear pubescent beneath and shortly petiolate, cultivated, used for farm tools, similar to *Bambusa indigena*, see *Acta Phytotaxonomica Sinica* 19(3): 374, pl. 14, f. 3. 1981.

B. subtruncata Chia & H.L. Fung

China, Guangdong. Lower internodes with yellowish green stripes, numerous fasciculate branches usually arising from basal third or fourth node, young sheath with yellowish green stripes, sheath auricles long elliptic to elliptic and unequal, leaves densely pubescent beneath, culm sheaths caducous and truncate at apex, leaf blades linear-lanceolate, on slopes or around villages, similar to *Bambusa guangdongensis*, see *Acta Phytotaxonomica Sinica* 19(3): 378, pl. 14, f. 8. 1981.

B. superba (Huber) McClure (*Bambusa tessmannii* (Pilg.) McClure; *Guadua superba* Huber; *Guadua tessmannii* Pilg.) (for the German ethnographer Günther (Guenther) Tessmann, explorer and plant collector in Africa and Peru, western tropical Africa, missionary, among his writings are

Die Bubi von Fernando Poo. Herausgegeben von Prof. Dr. O. Reche. Hagen & Darmstadt 1923, *Menschen Ohne Gott*. Stuttgart 1928 and *Die Pangwe. ... Ergebnisse der Lübecker Pangwe-Expedition 1907-1909 und früherer Forschungen 1904-1907*. Berlin 1913; see J.H. Barnhart, *Biographical notes upon botanists*. 3: 369. 1965; Stafleu & Cowan, *Taxonomic literature*. 6: 228-229. 1986; René Letouzey, "Les botanistes au Cameroun." in *Flore du Cameroun*. 7: 58. Paris 1968; F.N. Hepper & Fiona Neate, *Plant Collectors in West Africa*. 78-79. 1971; Anthonius Josephus Maria Leeuwenberg, "Isotypes of which holotypes were destroyed in Berlin." *Webbia*. 19(2): 861-863. 1965; J. Vivien & J.J. Faure, *Arbres des Forêts denses d'Afrique Centrale*. Agence de Coopération Culturelle et Technique. Paris 1985; Gottfried Wilhelm Johannes Mildbraed (1879-1954), "Plantae Tessmannianae Peruvianae I." *Notizbl. Bot. Gart. Berlin-Dahlem*. 9: 136-144. 1924, "Plantae Tessmannianae Peruvianae II." *Notizbl. Bot. Gart. Berlin-Dahlem*. 9(84): 260-268. 1925 and "Plantae Tessmannianae Peruvianae III." *Notizbl. Bot. Gart. Berlin-Dahlem*. 9(89): 964-997. 1926, etc.)

South America. Spiny, upright, canes used to build fences, see *Boletim do Museu Paraense de Historia Natural e Ethnographia* 4: 479. 1904, "Plantae Tessmannianae Peruvianae II." *Notizbl. Bot. Gart. Berlin-Dahlem*. 9(84): 260-268. 1925, "Plantae Tessmannianae Peruvianae III." *Notizbl. Bot. Gart. Berlin-Dahlem*. 9(89): 964-997. 1926, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 10(100): 124. 1927, *Smithsonian Contributions to Botany* 9: 68. 1973.

Local names: chingana, marona

B. surrecta (Q.H. Dai) Q.H. Dai (*Lingnania surrecta* Dai)

China, South Guangxi. Top bending, young culm dark and minutely hairy, basal internodes with green stripes, sheath coriaceous, sheath auricles long ovate with ciliate margin, sheath blade erect and long ovate, 10-12 leaves on each twig, leaf blades lanceolate and glabrous on both surfaces, cultivated, used for weaving and as construction material, see *Acta Phytotaxonomica Sinica* 20(2): 213, pl. 3. 1982, *Flora Reipublicae Popularis Sinicae* 9(1): 119-120, pl. 27, f. 6-8. 1996.

B. taiwanensis L.C. Chia & H.L. Fung (*Leleba edulis* Odashima; *Bambusa edulis* (Odashima) P.C. Keng, not Carrière; *Dendrocalamopsis edulis* (Odashima) P.C. Keng; *Sinocalamus edulis* (Odashima) P.C. Keng)

Taiwan. Nodes flat, branches many from basal portion of culms, culm sheaths deciduous leathery hispid, pseudospikelets slender 8- to 13-flowered with 2-3 terminal sterile ones, glumes 1, lodicules 2-3, stigmas 3, lowland and hilly areas, used for delicious shoots and widely cultivated, see *J. Trop. Agric.* 8: 59. 1936, *Acta Phytotax. Sin.* 18: 215. 1980.

B. teres Buch.-Ham ex Munro (*Arundarbor teres* (Buch.-Ham. ex Munro) Kuntze)

India, Bangladesh. Tufted, large, smooth, leaves oblong-lanceolate with an oblique base, culm sheaths deciduous, large compound panicle, fertile and sterile spikelets grouped and bracteate, glumes mucronate, lodicules fimbriate, 6 stamens, ovary hairy and beaked, 3 hairy stigmas, used locally for making mats and baskets, agarbati sticks and food grain containers, see *Transactions of the Linnean Society of London* 26(1): 95. 1868, *Revisio Generum Plantarum* 2: 761. 1891.

in India: bhaluki makel, paora

B. textilis McClure

China, Guangdong, Guangxi. Straight, clumps uniceapitose, culms with nodding or slightly pendulous tips, culm top bending, young culm pruinose, internodes green densely bristled, long cylindrical internodes, branching high, primary branches small and short, branches usually oriented from around the seventh to eleventh nodes upward, culm sheaths promptly deciduous, small sheath auricles narrow oblong with ciliate margin, sheath ligule with dentate margin, sheath blade erect ovate-triangular to broadly lanceolate, 8-12 leaves on each twig, leaves lanceolate, pseudospikelets solitary or several to numerous fasciculate on each node of flowering branches, spikelets bearing 5-8 florets apical one sterile, glume ovate apex acute and mucronate, lemma elliptic glabrous apex acute and mucronate, lodicules unequal, 3 stigmas plumose, extremely ornamental, tough and pliant fibers, good material for handicrafts and utensils, used in weaving; from the culm-internodes collected tabasheer (*Concretio Silicea Bambusae Textilis*, note that the fully natural product is rare), siliceous secretions used for the treatment of childhood convulsions, especially useful in treating children, cultivated, lower altitude, along riversides, around villages, see *Lingnan University Science Bulletin* 9: 14. 1940.

in English: weaver's bamboo

in Chinese: zhu huang, zhu huang jing, tian zhu huang (all names for tabasheer)

in Japanese: tenjikuo

in Korean: ch'onhwabun

B. textilis McClure var. **albo-striata** McClure (*Bambusa albolineata* (McClure) L.C. Chia; *Bambusa textilis* var. *albo-lineata* McClure)

Southeast Asia, China. See *Lingnan University Science Bulletin* 9: 14-15. 1940, *Guihaia* 8(2): 121-122. 1988.

B. textilis McClure var. **fusca** McClure (*Bambusa pachinensis* var. *hirsutissima* (Odashima) W.C. Lin; *Leleba beisitiku* var. *hirsutissima* Odashima)

Southeast Asia, China. Culm sheath covered with brown setae on its back, used in weaving, see *Journal of the Society of Tropical Agriculture* 8(1): 58, f. 3. 1936, *Lingnan*

University Science Bulletin 9: 14, 16. 1940, *Bulletin of the Taiwan Forest Research Institute* 98: 21. 1964.

B. textilis McClure var. **glabra** McClure

China, Guangxi, Guangdong. Culm and sheath glabrous or almost glabrous, culms internodes glabrous when young, used for weaving, for making utensils, usually cultivated in gardens, see *Lingnan University Science Bulletin* 9: 14, 16. 1940.

in English: smooth weaver's bamboo

B. textilis McClure var. **gracilis** McClure

Southeast Asia, China, Guangxi, Guangdong. Slender culms, internodes more or less glabrous, culm sheath sparsely covered with dull brown stiff hairs, cultivated, extremely ornamental, tough and pliant fibers, good material for handicrafts and utensils, used in weaving, usually cultivated in gardens, see *Lingnan University Science Bulletin* 9: 14, 16. 1940.

in English: slender weaver's bamboo

B. textilis McClure var. **maculata** McClure (*Bambusa textilis* cv. *maculata* L.C. Chia & al.)

Southeast Asia, China. See *Lingnan University Science Bulletin* 9: 14, 16. 1940, *Guihaia* 8(2): 127. 1988.

B. textilis McClure var. **textilis** (*Bambusa annulata* W.T. Lin & Z.J. Feng; *Bambusa glaucescens* (Willdenow) E.D. Merrill var. *annulata* (W.T. Lin & Z.J. Feng) N.H. Xia; *Bambusa minutiligulata* W.T. Lin; *Bambusa varioaurita* W.T. Lin & Z.J. Feng)

Southeast Asia, China.

B. thalaw-wa Brandis ex Camus (*Bambusa thalaw-wa* Brandis)

Myanmar. Erect, tufted, silky, culm sheaths thick, see *Indian Trees* 685. 1971.

B. thorelii Camus (*Bambusa thorelii* E.G. Camus)

Laos. See *Noticiero Botánico* 2(8): 245. 1912.

B. truncata B.M. Yang

China, Hunnan. Culms internodes glabrous covered with white powder when young, branches usually arising from midculm, culm sheaths caducous, leaf blades oblong-lanceolate glabrous on both surfaces, cultivated on riverbanks and around villages, see *J. Hunnan Norm. Univ., Nat. Sci. Ed.* 12: 337. 1989.

B. tsangü McClure

Vietnam. See *Journal of the Arnold Arboretum* 23(1): 97-98. 1942.

B. tulda Roxb. (*Bambusa lixin* Hsueh & T.P. Yi; *Dendrocalamus tulda* (Roxb.) Voigt)

Asia tropical, northern India and Bangladesh to Burma and Thailand, Nepal, Bhutan, China, Guangdong, Guangxi. Sympodial, evergreen or deciduous, pruinose, caespitose, usually erect to ascending, spineless, walls very thick,

culms sometimes striped, numerous branches developing from all nodes, branching strong and heavy, almost unbranched below, swollen nodes, internodes green and hollow, leaf sheath auricles with bristles, culm sheath auricles large and broad, culm sheath with brown hairs, leaves linear-lanceolate densely pubescent beneath, inflorescence variable, 4-6 fertile florets, 1-2 imperfect or male terminal florets, pseudospikelets in clusters of 2-5, spikelet linear-lanceolate, 2-4 glumes, 6 stamens rarely 3, ovary stipitate hairy on the tip, 3 stigmas plumose, normally flowers gregariously, under dry conditions may shed its leaves, propagated by rhizome cuttings and seeds, more or less edible succulent shoots taste slightly bitter, the stems are very strong and are used for scaffolding and roofing, windbreak, raw material for paperpulp, culms for building construction and handicraft, when split the stems are used for making hats, used in the manufacture of fly rods or split-bamboo fishing-rods, the leaves used as animal fodder, growing in moist alluvial soils, flats, in moist mixed deciduous forest, along water courses, in relatively low rainfall areas, valleys, see *Hortus Bengalensis, or a Catalogue ...* 25. 1814, *Fl. Ind.* (Carey edn.) 2: 193. 1832 [*Flora Indica; or, Descriptions of Indian Plants* 2: 193. 1832], *Hortus Suburbanus Calcuttensis* 718. 1845 and *Bamboo Research in Asia* 2(1): 30, f. 2. 1983, *The Indian Forester* 114: 539-548, 549-559, 576-583, 613-621, 637-649, 701-710. 1988, D.N. Tewari, *A Monograph on Bamboo*. Dehra Dun, India 1992, *Edin. J. Bot.* 51: 19. 1994.

in English: Calcutta bamboo, spineless Indian bamboo, Bengal bamboo, tulda, common bamboo of Bengal

in Vietnam: tre xi[ee]m

B. tuldooides Munro (*Arundarbor breviflora* (Munro) Kuntze; *Bambusa angulata* Munro; *Bambusa blumeana* Hook. & Am.; *Bambusa breviflora* Munro; *Bambusa fauriei* Hack.; *Bambusa flavonoda* W.T. Lin, syn. nov.; *Bambusa longiflora* W.T. Lin; *Bambusa pallescens* (Döll) Hack.; *Bambusa parvifolia* W.T. Lin, syn. nov.; *Bambusa tulda* sensu Benth., not Roxburgh; *Bambusa ventricosa* McClure; *Guadua pallescens* Döll; *Leleba breviflora* (Munro) Nakai;

Leleba tuldooides (Munro) Nakai; *Tetragonocalamus angulatus* (Munro) Nakai, syn. nov.)

Southern China, Vietnam, Asia temperate and tropical. Open or densely tufted, sympodial, culms erect or nearly erect or slightly nodding, culms top slightly drooping or arching horizontal when old, dark green, pruinose, glabrous, nodes slightly prominent, internodes thick-walled and covered with a white bloom when young, branches stiff and straight, branching low, branches usually emerged from the basal first node upward, culm leaves promptly deciduous, culm sheath caducous, the culm sheath and the culm sheath blade both are completely hairless and smooth, leaf blades linear-lanceolate to narrowly lanceolate, inflorescence on long leafless branches, pseudospikelets several on each node of flowering branches subtended by sheath-like bracts, 2-5 perfect florets and above 1-2 reduced florets, one glume ovate-oblong glabrous acute, lemma ovate-oblong 19-nerved glabrous obtuse and mucronate, 3 stigmas plumose, large and dense clumps unicaespitose, usually cultivated near or around villages, occurs in two forms depending on where it grows, flowers occur very rarely, ornamental species, propagated by rhizome and culm cuttings, young shoots bitter and edible, the canes used as punting poles and as scaffolding, for farm equipment, the splits employed in weaving handicrafts and utensils, shavings of culm-cortex used in China for treating febrile diseases and hematuria, cultivated as a tall hedge and pot plants, growing at low altitudes, on lower hills, along riverbanks, closely related to *Bambusa pervariabilis* McClure and *Bambusa eutuldooides* McClure, see *Transactions of the Linnean Society of London* 26(1): 93, 96. 1868 and *Repertorium Specierum Novarum Regni Vegetabilis* 6(113-118): 69. 1908, *Journal of Japanese Botany* 9(1): 16-17. 1933, *Lingnan Science Journal* 17(1): 5, f. 17-62, t. 5. 1938, *Economic Botany* 11: 235-243. 1957, *Bragantia* 29: 11-22. 1970, *Bulletin of Botanical Laboratory of North-Eastern Forestry Institute* 1980(6): 85, f. 1. 1980, *Journal of the American Bamboo Society* 2: 2-20. 1981, *Journal of the American Bamboo Society* 6: 43-57. 1985, *Bragantia* 47: 239-246. 1988, *Sandakania* 3: 33-34. 1993.

in English: verdant bamboo, punting pole bamboo, Buddha bamboo, Buddha's belly bamboo

in Indonesia: bambu blenduk

in Malaysia: buloh balai

in Vietnam: h[os]p

B. utilis Lin

Taiwan. Several to many fasciculate ranches arising from lower nodes, tough culm sheath caducous and densely shortly pubescent, sheath auricles irregular, sheath ligule prominent and serrate, 5-11 leaves on each twig, leaves linear-lanceolate, 4- to 6-flowered pseudospikelets solitary or numerous fasciculate on each node of flowering branches, two glumes subovate 9- to 11-nerved acute and

mucronate, lemma ovate-lanceolate 17- to 20-nerved acute and mucronate, 3 plumose stigmas, on lower hills, around villages, see *Bulletin of the Taiwan Forest Research Institute* 98: 2, f. 1, 2. 1964.

B. valida (Q.H. Dai) W.T. Lin (*Dendrocalamopsis validus* Q.H. Dai)

China, Guangxi. Drooping, young culm internodes densely pubescent, culm sheath orange-purple to purplish and deciduous, sheath auricles linear, sheath ligule truncate with dark ciliate margin, sheath blade erect ovate-lanceolate, cultivated, edible shoots, culm used as construction materials, see *Acta Phytotaxonomica Sinica* 24(5): 393-394, pl. 1. 1986, *Guihaia* 10(1): 15. 1990.

B. variostrata (W.T. Lin) Chia & H.L. Fung (*Bambusa vario-striata* (W.T. Lin) L.C. Chia & H.L. Fung; *Dendrocalamopsis vario-striata* (W.T. Lin) Keng f.; *Dendrocalamopsis variostrata* (W.T. Lin) Keng f.; *Sinocalamus variostratus* W.T. Lin)

Guangdong, Guangxi, China. Culm top bending and drooping, internodes swollen, branches many from basal portion of culms, branches clustered, culm base with longitudinal streaks, lower joints with a ring of short pubescence, culm sheath deciduous, sheath auricles with a ciliate margin, sheath blade erect, leaves linear-lanceolate, pseudospikelets 5- to 6-flowered plus a terminal sterile floret, 1 glume, 3 lodicules, 3 stigmas, cultivated, edible shoots, culm used as construction materials, lowland, hills, see *Acta Phytotaxonomica Sinica* 16(1): 66-68, pl. 1. 1978, *Acta Phytotaxonomica Sinica* 18(2): 215. 1980, *Journal of Bamboo Research* 2(1): 13. 1983.

B. ventricosa McClure (*Bambusa tuldoidea* Munro; *Bambusa ventricosa* cv. *nana* Wen; *Leleba ventricosa* (McClure) L.; *Leleba ventricosa* Lin; *Leleba ventricosa* (McClure) W.C. Lin; *Leleba ventricosa* Borss. Waalk.)

South China, Vietnam, Taiwan. A valuable ornamental garden plant, interesting and decorative, erect, spineless or lower part of the culm somewhat sigmoid with soft spines, glabrous, shrub-like, flowers unknown, clumps unicaespitose, length of culms very variable, internodes cylindrical and dark green, branches frequently arise from the basal third or fourth node upward, culm sheath purple when young and hairless, culm blade erect and smooth, culm leaves promptly to tardily deciduous, ligule short, linear-lanceolate slightly compressed pseudospikelets solitary or many fasciculate on each node of flowering branches, spikelets with 6-8 florets, basal one or 2 and apical 2 or 3 usually sterile, 3 stigmas plumose, widely cultivated, excellent tall hedge, often grown as a potted plant, this bamboo exists in several forms: normal, dwarf and intermediate, the dwarf form is much treasured in bonsai, see *Transactions of the Linnean Society of London* 26(1): 93, 96. 1868, *Revisio Generum Plantarum* 2: 761. 1891 and *Journal of Japanese Botany* 9(1): 16-17. 1933, *Lingnan Science Journal* 17(1):

5, f. 17-62, t. 5. 1938, *Bulletin of the Taiwan Forest Research Institute* 150: 1305, f. 1. 1963, *Bulletin of Botanical Laboratory of North-Eastern Forestry Institute* 1980(6): 85, f. 1. 1980, *Journal of Bamboo Research* 4(2): 18. 1985.

in English: Buddha's belly bamboo, Buddha bamboo

Tropical Asia, unknown origin. Woody, greatly variable, tall, strong thick walls, culms strong and cylindrical but not straight, not flexible, clumps unicaespitose, loosely tufted to open tufted, not densely tufted, culms yellow with narrow longitudinal green stripes, erect and slightly arched above, rooting at lower nodes, more or less glabrous, internodes cylindrical dark green, sympodial and pachymorph rhizomes, branches usually emerged only from the higher nodes, culm sheath auricles slightly pointed and curved backwards, culm leaves promptly deciduous, sheaths hairy, leaves lanceolate, leaves borne on lateral branches, small groups of pseudospikelets fasciculate at each node, spikelets laterally flattened, 5-10 perfect florets and a terminal vestigial floret, glumes 1 or 2 ciliate toward the apex, lemmas

fimbriate, palea 2-keeled, 3 lodicules unequal, stamens exerted, ovary hairy, 1-3 stigmas plumose, flowering is extremely rare, cultivated extensively, propagated by culm or branch cuttings, ornamental and vigorous clump-forming of closely placed culms, a source of fiber, landscape, light timber, planted as source for banana support, stems used for houses and for light construction, canes used in building huts, used as stake and for pig fences, a source of paper pulp, split stems used for brooms and baskets, young shoots edible, young culms used for the making of boards, sometimes used as abortifacient, a cold decoction of the roots used for kidney troubles, leaves used as sudorific and febrifuge agents, sap from the young shoot recommended to treat fever and hematuria, tabasheer from culm-internodes used to treat infantile epilepsy, in China roots, shoots, bark and leaves are used, bark astringent and emmenagogue, can be planted on slopes to control erosion, usually found commonly along creek, along rivers and lakes, low altitudes, humid conditions, wastelands, open ground, see *Observationes Botanicae* 5: 24. 1789, *Sp. Pl.* 2: 245. 1799, *Coll. Pl.* 2: 26-30, pl. 47. 1808, Alexander Moon (d. 1825), *A Catalogue of the Indigenous and Exotic Plants Growing in Ceylon* 26. Colombo 1824, *Revis. in English: common bamboo, striped bamboo, golden bamboo, yellow bamboo, soft bamboo, feathery bamboo

in French: bambou, grand bambou

in Spanish: bambú, bambúa, bambu, caña india

in Portuguese: bambu-vulgar

in Cuba: caña brava, cañambú, pito

in Mexico: bacáu, bambú, bambú patamba, cupamu, otate, sacaú

in Nicaragua: itikna

in Panama: cañaza

in West Indies: bamboo, bambu

in Cameroon: mfele, mfelè, lefyog

in Congo: linetso

in Guinea: ko-tatami, tatami

in Ivory-Coast: balé

in Malawi: mlasi, lulasi, musyombe, nsungwi

in Nigeria: agarabà, igbon ikirai, vyo

in Senegal: i n'gol, i ngol

in Sierra Leone: baran, boo, kanale, kasul, ken, kenye, kewe, pilanda, semi, sen, seni, senye, sii, simine, tatami, tatamina, wusle

in Upper Volta: ngmalu

in Burma: wanet

in Cambodia: russèi kaèw

in India: bakal, bannada bidiru, basini bans, basinibans, davike, haladi bidiru, kalaka, ponmungil, seemamula, sunderkania bansa

in Indonesia: bambu ampel (green culms), bambu blenduk, bambu kuning (yellow culms), domar, haur

in Japan: dai-san-chiku, daisan-chiku, kinshi-chiku (green stripes on the yellowish culm)

in Laos: s'a:ng kh'am'

in Sri Lanka: ponmungil

Malayan names: aur beting, aur gading, bambu kuning, buloh aur, buloh gading, buloh kuning, buloh minyak, buloh minyak has, buloh pau, buluh aur, buluh minyak, buluh pau, tamalang, tamalang silau, tambalang, tamelang

in the Philippines Islands: bolinao, bolinau, burirau, butong, kabaloan, kauayan, kauayan-china, kauayan-kiling, kauayan-kiting, kawayan, kawayang-china, kawayang-kiling, kawayang-kiting, kawayang-tsina, kiling, labong (bamboo shoots), limas, lunas, maribal, marobal, patong, patung, sinambang, sinamgang, taiu-anak, taring, teuanak, tewanak, tiling, yellow bamboo

in Thailand: chan kham, mai-luang, phai cheen, phai chin, phai-luang, phai lueang, phai-ngachang, rai yai, ree sai, ri sai

in Vietnam: phai-bongkham, tre m[owx], tre tr[owf]

in Pacific: kaho palangi, kaho papalangi

in New Guinea: mambu kakar

B. vulgaris Schrader ex J.C. Wendl. var. *constrictinoda* Proudloch (*Bambusa vulgaris* var. *constrictinoda* Proudlock ex Houz. de Lehaie)

Asia. See *Le Bambou, son étude, sa culture, son emploi* 1: 115. 1906.

B. vulgaris Schrader ex J.C. Wendl. var. *striata* (Lodd. ex Lindl.) Gamble (*Arundarbor striata* (Lodd. ex Lindl.) Kuntze; *Bambusa striata* Lodd. ex Lindl.; *Bambusa vulgaris* cv. *vittata* McClure; *Bambusa vulgaris* f. *vittata* McClure; *Bambusa vulgaris* Schrader ex J.C. Wendl. var. *striata* (Lodd.) Gamble; *Bambusa vulgaris* var. *vittata* Rivière & C. Rivière; *Phyllostachys striata* (Lodd. ex Lindl.) Nakai)

Asia. Large and tall, clump forming, ornamental, culms normally yellow with green streaks, adventitious roots often develop from the lowermost nodes, culm-blade yellow when young, edible bamboo shoots, water from boiled shoots used as a medicine, culms used for structural material, used for light construction, roots very easily, commonly cultivated, see *Bulletin de la Société Nationale d'Acclimatation de France*, sér. 3, 5: 640. 1878, *Revisio Generum Plantarum* 2: 761. 1891, *Annals of the Royal Botanic Garden, Calcutta*. 7: 44. 1896 and *Fieldiana, Botany, New Series* 24(2): 60. 1955.

in English: golden bamboo, golden common bamboo, yellow bamboo, striped bamboo

in Colombia: bambú

in Malay: aur gading, buloh gading, buloh kuning, buluh gading, buluh kuning

in the Philippine Islands: kauayan China, kawayang-tsina

in Indonesia: bambu kuning

in Japan: kinshi-chiku

in New Guinea: wok, mambu yang

in Thailand: saang kham, sang kham

B. wamin Camus (*Bambusa vulgaris* f. *waminii* T.H. Wen; *Bambusa vulgaris* cv. *wamin* McClure; *Bambusa wamin* Brandis ex Camus)

Asia. Erect, loosely tufted, bending, usually arching at the top, leaf sheaths keeled, internodes swollen in the lower half, commonly cultivated, culms used for handicrafts, see *Indian Trees* 685. 1911.

in English: Buddha's belly bamboo

in Indonesia: bambu blenduk

in Myanmar/Burma: wamin

B. wenchouensis (Wen) Q.H. Dai (*Bambusa wenchouensis* (Wen) Ohrnberger; *Lingnania wenchouensis* Wen)

China. Pubescent when young, nodes tomentose, branches many from basal portion of culms, culm sheaths deciduous coriaceous, sheath auricles lacking or weak, sheath blade retroflexed and lanceolate, leaves broadly lanceolate, 2-4 glumes, lodicules ovate, 3 stigmas, shoots bitter but edible after treatment, used for making fishing cord and farm tools, along riverbanks, around villages, see *J. Bamb. Res.* 1(1): 32-33, f. 9. 1982, *Fl. Reipubl. Pop. Sin.* 9(1): 117, pl. 27, f. 5. 1996.

B. wrayi Stapf (*Kinabaluchloa wrayi* (Stapf) K.M. Wong) (named for the English botanical collector Leonard Wray, 1853-1942, traveler and explorer, collected plants in Malaya with Herbert Christopher Robinson (1874-1929), author of "Journal of a collection expedition to the mountain of Batang Padang, Perak." *Jour. Straits Branch Roy. Asiatic Soc.* 21: 123-165. 1890; see Spenser Buckingham St. John

(1825-1910), *Life in the Forests of the Far East*. London 1862; [Sir Hugh Low], *The Journal of Sir Hugh Low, Perak, 1877*. Edited by Emily Sadka. [Journal of the Malayan Branch, Royal Asiatic Society. vol. 27. pt. 4.] Singapore 1955; Alice Margaret Coats, *The Quest for Plants. A History of the Horticultural Explorers*. London 1969; Shirley Heriz-Smith, "Western collectors on eastern islands." *Hortus*. 7: 83-92. 1988; Merle A. Reinikka, *A History of the Orchid*. Timber Press 1996; Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 758. London 1994; Charles Brooke (1829-1907), *Ten Years in Sarawak*. London 1866; Captain Henry Keppel, *Expedition to Borneo of H.M.S. Dido for the Suppression of Piracy with Extracts from the Journal of James Brooke, Esq., of Sarawak*. New York 1846 (1st American edition); S. Baring-Gould & C.A. Bampfylde, *A History of Sarawak under its Two White Rajahs 1839-1908*. 1909; Henry Nicholas Ridley (1855-1956), *The Flora of the Malay Peninsula*. London 1922-1925; Benedetto Scortechini, 1845-1886, *Nuovo Giorn. Bot. Ital.* 18: 308. 25 Oct 1886)

Malaysia, Malay Peninsula. See *Bulletin of Miscellaneous Information Kew* 1893: 14. 1893 and *Kew Bulletin* 48(3): 524, f. 4. 1993.

B. xiashanensis Chia & H.L. Fung (*Bambusa sanzaoensis* W.T. Lin)

China, Guangdong. Tough, firm, young culms purplish green, above and below each node a ring of whitish silky hairs, branches usually arising from basal first or second nodes, solitary branches on basal two nodes and 3 to numerous on other nodes with primary one dominant, twigs on lower branches often shortened and hardened into spines, culm sheath caducous, sheath auricles unequal, leaves underside densely covered with short pubescence, cultivated, fast growing bamboo, used to construct sheds, on lower hills, plains, near villages, similar to *Bambusa rutila* McClure, see *Acta Phytotax. Sin.* 19(3): 374-375, pl. 14, f. 4. 1981.

B. xueana Ohrnb. (*Bambusa yunnanensis* (Hsueh & J.R. Hsueh) D.Z. Li, nom. illeg., non *Bambusa yunnanensis* N.H. Xia; *Neosinocalamus yunnanensis* Hsueh & J.R. Hsueh)

China. See *Acta Phytotax. Sin.* 29(3): 274, f. 1. 1991, *Acta Bot. Yunn.* 16(1): 41. 1994.

B. yunnanensis N.H. Xia (*Bambusa annulata* (Hsueh & W.P. Zhang) D.Z. Li, nom. illeg., non *Bambusa annulata* W.T. Lin & Z.J. Feng; *Schizostachyum annulatum* Hsueh & W.P. Zhang)

China. Used in weaving, ornamental, edible shoots, see *J. Bamb. Res.* 5(1): 77. 1986, *J. Trop. Subtrop. Bot.* 1(1): 8. 1993, *Acta Bot. Yunn.* 16(1): 41. 1994.

Baptorhachis Clayton & Renvoize

Greek *bapto* "to dip, to dip in dye, color," *baptos* "dipped, dyed, bright-colored" and *rhachis* "rachis, axis, midrib of a leaf."

One species, Mozambique. Panicoideae, Panicodae, Paniceae, annual, herbaceous, hollow, auricles present, ligule a fringed membrane, leaf blades linear-lanceolate, plants bisexual, inflorescence a solitary raceme, broad colorful rhachis, spikelets paired sessile and pedicellate, or subsessile and pedicellate, lower glume suppressed, upper floret acute, lower lemma bilobed and awned, palea present, lodicules absent, 3 stamens, ovary glabrous, 2 stigmas, on stony places, open habitats, slopes, type *Baptorhachis foliacea* (Clayton) Clayton (*Stereochlaena foliacea* Clayton), see *Proceedings of the Rhodesia Scientific Association* 7(2): 65. 1908, *Kew Bulletin* 33(2): 175-179, 295-297. 1978, *Kew Bulletin* 42(2): 401. 1987.

Species

B. foliacea (Clayton) Clayton (*Stereochlaena foliacea* Clayton)

Africa.

Bashania P.C. Keng & T.P. Yi = *Arundinaria* Michx.

Four to six species, China, Guizhou, Sichuan, Yunnan, Hunan. Bambusoideae, Bambuseae, Arundinariinae, solid, rhizomes sympodial, culms cylindrical, internodes hollow, three or manifold branches, leaves lanceolate and hard, sheath shedding late or persistent, sheath blade erect, sheath auricles absent or present and indistinct, panicles or racemes terminal, spikelets 3- to 5-flowered, 3 stamens, 2 stigmas, often in *Arundinaria*, type *Bashania qingchengshanensis* Keng f. & T.P. Yi, see *Flora Boreali-Americana* 1: 73-74. 1803 and *Journal of Bamboo Research* 1(2): 38, 171. 1982, *Contributions from the United States National Herbarium* 39: 18-24. 2000.

Species

B. auctiaurita T.P. Yi

China. Auricles present, purple, see *Bulletin of Botanical Research* 6(4): 27, f. 2. 1986.

B. faberi (Rendle) Yi (*Arundinaria faberi* Rendle; *Arundinaria fangiana* A. Camus; *Arundinaria racemosa* subsp. *fangiana* A. Camus; *Bashania fangiana* (A. Camus) P.C. Keng & T.H. Wen; *Gelidocalamus fangianus* (A. Camus) Keng & Wen; *Gelidocalamus fangianus* (A. Camus) T.H. Wen & Keng f.; *Sarocalamus faberi* (Rendle) Stapleton; *Sinarundinaria faberi* (Rendle) Keng f.; *Sinarundinaria fangiana* (A. Camus) Keng & Keng f.; *Sinarundinaria*

fangiana (A. Camus) Keng ex Keng f.; *Sinarundinaria fangiana* Keng)

China. Food for giant panda, see *Journal of the Linnean Society, Botany* 36(254): 435. 1904, *Journal of the Arnold Arboretum* 11(4): 192-193. 1930, *Technical Bulletin of the National Forestry Research Bureau* 8: 13. 1948, *Journal of Bamboo Research* 12(2): 52-53. 1993, *Novon* 14(3): 348. 2004.

in Chinese: Leng qing li zhu, Leng jian zhu

in English: Fang's cane-bamboo

B. fangiana (A. Camus) P.C. Keng & T.H. Wen (*Arundinaria fangiana* A. Camus; *Gelidocalamus fangianus* (A. Camus) Keng & Wen; *Gelidocalamus fangianus* (A. Camus) T.H. Wen & Keng f.; *Sinarundinaria fangiana* (A. Camus) Keng & Keng f.; *Sinarundinaria fangiana* (A. Camus) Keng ex Keng f.; *Sinarundinaria fangiana* Keng)

China, Sichuan. Cylindrical, glabrous, many branches clustered, sheath glabrous and ciliate often shorter than the internode, no sheath auricles and cilia, 2-4 leaves on each twig, see *Technical Bulletin of the National Forestry Research Bureau* 8: 13. 1948, *Journal of Bamboo Research* 2(1): 20. 1983, *Journal of Bamboo Research* 4(2): 17-18. 1985.

B. fansipanensis Nguyen

Vietnam. See *Bot. Zhurn. (Moscow & Leningrad)* 76(6): 876. 1991.

B. fargesii (Camus) P.C. Keng & T.P. Yi (*Arundinaria dumetosa* Rendle; *Arundinaria fargesii* E.G. Camus; *Arundinaria fargesii* var. *grandifolia* Camus; *Indocalamus dumetosus* (Rendle) Nakai; *Indocalamus dumetosus* (Rendle) Keng f.; *Indocalamus fargesii* (E.G. Camus) Nakai; *Indocalamus scariosus* McClure)

China, Sichuan, Hubei, Shaanxi. Forming thickets, thick-walled, rhizome amphipodial, 3 or more branches on each node, sheath shedding late or persistent and coriaceous, no sheath auricles and cilia, sheath ligule convex, sheath blade lanceolate and deciduous, leaves hard and tough, codl resistant, used for papermaking, construction, framework, see *Notulae Systematicae. Herbarium du Museum de Paris* 2(8): 244. 1912, *Les Bambusées* 198. 1913, *Plantae Wilsonianae* 2(1): 63. 1914, *Journal of the Arnold Arboretum* 6(3): 148. 1925, *Lingnan University Science Bulletin* 9: 23, 27. 1940, *Journal of Bamboo Research* 1(2): 37. 1982.

in Chinese: Fa shi ruo zhu

in English: Farges indocalamus

B. qingchengshanensis P.C. Keng & T.P. Yi

China, Sichuan. Solid or nearly solid, grayish yellowish, sheath persistent coriaceous, sheath auricles absent, sheath ligule arcuate or truncate, sheath blade lanceolate or broadly lanceolate, 1-3 leaves on each twig, leaf long-lanceolate, leaves hard and papery, cultivated, ornamental, see *Journal*

Nanjing University. *Natural Sciences Edition* 3: 728. f. 2. 1982.

B. spanostachya Yi (*Sarocalamus spanostachyus* (T.P. Yi) Stapleton)

China, Sichuan. Erect, cylindrical, pruinose, light yellow sheath coriaceous persistent, sheath auricle absent, no cilia, sheath ligule purple, sheath blade erect more or less flat or wrinkled, leaves linear-lanceolate, see *Acta Botanica Yunnanica* 11(1): 35-37, f. 1. 1989, *Novon* 14(3): 348. 2004.

Bathratherum Hochst. = *Batratherum* Nees

See *Tentamen Florae Abyssinicae* ... 2: 458. 1850, *Flora* 39: 177. 1856.

Batratherum Nees = *Arthraxon* P. Beauv.,
Bathratherum Nees

Panicoideae, Andropogoneae, Andropogoninae, type *Batratherum micans* Nees, see A.M.F.J. Palisot de Beauvois, *Essai d'une nouvelle Agrostographie*. 111, t. 11, f. 6. (Dec) 1812, *Edinburgh New Philosophical Journal* 18: 180-181, 182-183. 1835 and *Contributions from the United States National Herbarium* 46: 104-110, 134. 2003.

Bauchea E. Fourn. = *Sporobolus* R. Br.

Chloridoideae, Cynodonteae, Sporobolinae, type *Bauchea karwinskyi* E. Fourn., see *Prodromus Florae Novae Hollandiae* 169-170. 1810, *Nom. Bot.* 2: 1274. 1874, *Bulletin of the Torrey Botanical Club* 9: 103. 1882, *Biologia Centrali-Americana*; ... *Botany* ... 3: 550. 1885, *Mexicanas Plantas* 2: 87. 1886 and *Contributions from the United States National Herbarium* 41: 18, 200-219. 2001.

Bealia Scribner = *Muhlenbergia* Schreb.

For the American botanist William James Beal, 1833-1924, agrostologist, student of Asa Gray and Louis Agassiz; see J.H. Barnhart, *Biographical notes upon botanists*. 1: 145. 1965; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933; J. Ewan, editor, *A Short History of Botany in the United States*. 11, 47, 63. New York and London 1969; Charles J. Édouard Morren, *Correspondance botanique*. Liège 1874 and 1884.

One species, North America, Mexico. Chloridoideae, Cynodonteae, Muhlenbergiinae, or Chloridoideae, Eragrostideae, annual, erect, caespitose, herbaceous, much branched at lower nodes, lacking stolons and rhizomes, leaf sheaths not ciliate, ligule a membrane, leaves with sheath auricles, leaf blades linear not pungent, plants bisexual,

inflorescence a panicle exerted, disarticulation above glumes, spikelets solitary and compressed, 1 floret per spikelet, 2 glumes more or less equal, first glume 1-nerved, second glume 1-nerved and awnless, lemma lobed and awned, palea hairy and membranous, 2 free and fleshy lodicules truncate, 3 stamens, ovary glabrous, 2 stigmas, type *Bealia mexicana* Scribn., see *Genera Plantarum* 44. 1789, *Systema Naturae ... editio decima tertia, aucta, reformata* 2: 171. 1791, *Reliquiae Haenkeanae* 1(4-5): 235. 1830, *Bulletin of the Torrey Botanical Club* 13(12): 231. 1886, *True Grasses* 104, f. 45a. 1890, W.J. Beal, *Grasses of North America for Farmers and Students* 2: 268. Lansing 1896, *Proceedings of the California Academy of Science* 2: 210-214. 1899 and *Die natürlichen Pflanzenfamilien, Zweite Auflage* 14d: 71. 1956, *Madroño* 35(4): 320-324. 1988 [*Chromosome numbers in the annual Muhlenbergia (Poaceae)*, by P.M. Peterson], *Nordic Journal of Botany* 8: 575-583. 1989, *Madroño* 36(4): 260-265. 1989 [by P.M. Peterson], *Madroño* 40(3): 148-160. 1993 [by P.M. Peterson, M.R. Duvall & A.H. Christensen], *American Journal of Botany* 81: 622-629. 1994, *Taxon* 43: 383-422. 1994, *Grasses: Systematics and Evolution* 195-212. 2000, *Contributions from the United States National Herbarium* 41: 18-19. 2001.

Species

B. mexicana Scribn. (*Bealia mexicana* Scribn. ex Beal, nom. illeg., non *Bealia mexicana* Scribn.; *Epicampes mexicana* (Scribn.) M.E. Jones; *Muhlenbergia biloba* Hitchc.; *Muhlenbergia mexicana* (L.) Trin.)

Mexico. Sandy soil, see *De Graminibus unifloris et sesquifloris* 189, 190, 297, t. 5, f. 8. Beckeria Heynh.

See *Nomenclator Botanicus* 2: 63. 1846.

Beckeropsis Figari & De Notaris = *Pennisetum* Rich.

For the German botanist Johannes Becker, 1769-1833; see J.H. Barnhart, *Biographical notes upon botanists*. 1: 150. 1965.

About 6 species, tropical and southern Africa. Panicoideae, Panicodae, Paniceae, or Panicoideae, Paniceae, Cenchrinae, annual or perennial, herbaceous, unarmed, tufted, hollow, auricles absent, ligule fringed, rhizomatous, plants bisexual, inflorescence paniculate, spikelets solitary and pedicellate subtended by bristles, two glumes unequal to very unequal, palea present, 2 free and fleshy lodicules, 3 stamens, ovary glabrous, 2 stigmas, native pasture species, shade, woodland, wooded grassland, along riverbanks, often in *Pennisetum*, type *Beckeropsis nubica* (Hochst.) Fig. & De Not., see *Syn. Pl.* 1: 72. 1805, Antonio Bey Figari (1804-1870), *Agrostographiae Aegyptiacae Fragmenta* 2: 49. [Augustae Taurinorum] 1853 [*Mem. Acc. Tor.*, II. xii., xiv.], *Memorie della Reale Accademia delle Scienze di Torino*, ser. 2 2: 49, t. 28. 1853, *Die Natürlichen Pflanzenfamilien* 2(2): 38. 1887 and *Contr. U.S. Natl. Herb.* 22: 210-211. 1921, *Flora Mesoamericana* 6: 371-374. 1994, *Sida* 19(3): 523-530. 2001, *Contributions from the United States National Herbarium* 46: 134-135, 527-536. 2003.

Species

B. laxior Clayton (*Pennisetum laxior* (Clayton) Clayton; *Pennisetum laxior* (Clayton) Zon, nom. illeg., non *Pennisetum laxior* (Clayton) Clayton)

Africa, Nigeria, Benin. See *Bulletin of the British Museum (Natural History)*, *Botany* 3: 118. 1963, *Hooker's Icones Plantarum* 7: t. 3643. 1967, *Kew Bulletin* 32(3): 580. 1978, *Wageningen Agricultural University Papers* 92-1(2): 338, 557. 1992, *Willdenowia* 32(2): 237-238. 2002 [J. Müller, R. Sieglstetter, Y. Boni & H. Scholz: *Notulae Florae Beninensis - Beckeropsis laxior and Heteranthoecia guineensis (Poaceae)* new for Benin (W Africa)].

B. nubica (Hochst.) Fig. & De Not. (*Gymnotrix nubica* Hochst.; *Pennisetum nubicum* (Hochst.) K. Schum. ex Engl.)

Africa, Sudan, northern Yemen. Annual, tufted, much-branched, leaf blades linear and false-petiolate, inflorescence axillary from the upper leaf sheaths, false panicle, spikelets narrowly elliptic each subtended by a single fine bristle, lower lemma sterile, along roadsides, waste places, closely related to *Beckeropsis petiolaris*, see *Flora* 27: 251. 1844, *Memorie della Reale Accademia delle Scienze di Torino*, ser. 2 2: 49, t. 28. 1853, *Memorie della Reale Accademia delle Scienze di Torino* ser. 2 14: 366. 1854, *Abhandlungen der Preussischen Akademie der Wissenschaften. Physikalisch-mathematische Klasse* 1894: 58. 1894.

B. petiolaris (Hochst.) Fig. & De Not. (*Beckera petiolaris* (Hochst.) Hochst.; *Gymnotrix petiolaris* Hochst.; *Pennisetum dioicum* Hochst. ex A. Rich.; *Pennisetum petiolaris* (Hochst.) Chiov.; *Setaria dioica* Hochst.)

Africa. Annual, tufted, slender, branched, leaf blades flaccid, lower leaf blades cordate, inflorescence axillary on long peduncles, spikelets narrowly elliptic each subtended by a single bristle, lower lemma sterile, field margins, along roadsides, disturbed places, see *Flora* 24: 1, *Intell.* 19. 1841, *Flora* 27: 250, 512. 1844, *Tentamen Florae Abyssinicae ...* 2: 380. 1850, *Memorie della Reale Accademia delle Scienze di Torino*, ser. 2 2: 52. 1853, *Memorie della Reale Accademia delle Scienze di Torino* ser. 2 14: 368. 1854 and *Annuario del Reale Istituto Botanico di Roma* 8(3): 324. 1908.

B. pirottae (Chiov.) Stapf & C.E. Hubb. (*Pennisetum pirottae* Chiov.) (named for the Italian botanist Pietro Romualdo Pirota, 1853-1936, professor of botany, 1880-1883 Praefectus of the Botanical Garden of Modena, 1883-1925 Praefectus of the 4th Orto Botanico of Roma (Giardini di Villa Corsini, Gianicolo), 1886-1902 editor of vols. 1-16 of *Malpighia*, editor of *Annuario del Regio Istituto Botanico di Roma*, edited Federico Cesi (1585-1630) *Phytosopharum tabularum pars prima ... Ad fidem exemplaris castigatioris iterum edita per R. Pirota*. 1904, wrote "Sul genere Keteheria di Carrière (*Abies Fortunei* Murr.)." *Bull. Soc. Tosc. Ort.* 12: 269-274. 1887. See J.H. Barnhart, *Biographical notes upon botanists*. 3: 89. 1965; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 311. 1972; Ethelyn Maria Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. 585. Philadelphia 1964; L. Pirota, "Il Regio Orto Botanico di Roma." *Annali di Botanica*. no. 23. 1941)

Africa, Sudan. Perennial, robust, smooth, densely tussocky, hard, inflorescences crowded in fascicles, spikelets subtended by a single basal bristle, lower lemma sterile, sandy soil, on riverbanks, low-lying areas, see *Annuario del Reale Istituto Botanico di Roma* 8: 37, t. 2. 1903, *Bulletin of Miscellaneous Information Kew* 1933: 269. 1933.

B. procera Stapf (*Beckeropsis procera* Stapf ex Stent; *Pennisetum purpureum* subsp. *flexispica* (K. Schum.) Maire & Weiler; *Pennisetum procerum* (Stapf) Clayton)

Africa. See *Die Pflanzenwelt Ost-Afrikas* 5(C): 105. 1895 and *Bulletin of Miscellaneous Information Kew* 1933: 272. 1933, *Proceedings of the Rhodesia Scientific Association* 32: 38. 1933, *Flore de l'Afrique du Nord* 1: 340. 1952, *Kew Bulletin* 32(3): 580. 1978.

B. uniseta (Nees) K. Schum. (*Beckera uniseta* (Nees) Nees ex Hochst.; *Beckera uniseta* (Nees) Steud., nom. illeg., non *Beckera uniseta* (Nees) Nees ex Hochst.; *Beckeropsis uniseta* (Nees) Stapf ex Robyns; *Gymnotrix uniseta* Nees; *Pennisetum dioicum* Hochst. ex A. Rich.; *Pennisetum unisetum* (Nees) Benth.; *Setaria dioica* (Hochst. ex A. Rich.) Hochst. ex Walp.)

Central Africa. Perennial, tufted, robust, leaf blades coarse, lower lemma male or sterile, inflorescence on long slender peduncles, large nodding false panicles, medicinal value, for the cough a decoction roots of a partial mixing of *Andropogon gayanus*, *Beckeropsis uniseta*, *Aframomum latifolium*, *Landolphia owariensis*, see *Florae Africae Australioris Illustrationes Monographicae* 66. 1841, *Flora* 27: 512. 1844, *Tentamen Florae Abyssinicae ...* 2: 380. 1850, *Annales Botanicae Systematicae* 3: 721. 1852-53, *Synopsis Plantarum Glumacearum* 1: 118. 1854, *Journal of the Linnean Society, Botany* 19: 47, 49. 1881, *Die Pflanzenwelt Ost-Afrikas* 5(8): 52. 1895 and *Bull. Jard. Bot. Bruxelles* 9: 199. 1932 [*Bulletin du Jardin Botanique de l'État* 9(3): 199. 1932], S. Mbarubukeye, *La médecine vétérinaire traditionnelle: rapport du 1er atelier des guérisseurs traditionnels du bétail au Rwanda*. Éditions ISAR/LVNR - IRST/CURPHAMETRA – MINAGRI 1992.

in English: beckeropsis, Duncan grass, Natal grass, silky grass

in Central Africa, Rwanda: umuhihi

Local name: kantentwa

Beckmannia Host = *Bruchmannia* Nutt., *Ioackima* Ten., *Joachima* Ten., *Joachimia* Ten. ex Roem. & Schult.

For the German botanist Johann Beckmann, 1739-1811, traveler, naturalist, author of *Lexicon botanicorum*. Gottingae 1801. See J.H. Barnhart, *Biographical notes upon botanists*. 1: 151. 1965; Jonas C. Dryander, *Catalogus bibliothecae historico-naturalis Josephi Banks*. London

1796-1800; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933; Friedrich Klemm, in *D.S.B.* 1: 554-555. 1981.

Two species, north temperate zones, Eurasia, America. Pooideae, Poodae, Aveneae, or Pooideae, Poodae, Alopecurinae, perennial or annual, herbaceous, tufted, hollow, forming large bunches, auricles absent, ligule membrane-like, leaf blades soft, leaf sheaths overlapping, rhizomatous, plants bisexual, inflorescence spicate or paniculate, unilateral racemes on a central axis, panicle branches strongly ascending to appressed, orbicular spikelets imbricate and compressed, 1- to 2-flowered, 2 glumes herbaceous and inflated, lemmas cartilaginous acute or tapering to an awn-point, palea present, 2 free and membranous lodicules, 3 stamens, ovary glabrous, 2 stigmas, when perennial lowest culm internode tuberous, native pasture species, tolerant of high soil salinity, found in sloughs, meadows, along the edge of ponds and ditches, shores, open habitats, moist places, usually in the presence of water, similar to *Phleum* L., type *Beckmannia eruciformis* (L.) Host, see *Icones et Descriptiones Graminum Austriacorum* 3: 5. 1805, *Flora Napolitana* 1: ix, 16. 1811, *Catalogus Plantarum Hortii Regii Neapolitani* 53. 1813, *Systema Vegetabilium* 2: 695. 1817, *The Genera of North American Plants* 1: 48. 1818 and *Bulletin of the Torrey Botanical Club* 80(3): 187-196. 1953, *Index Kewensis* Suppl. 12: 74. 1959, *Webbia* 49(2): 265-329. 1995, *Contributions from the United States National Herbarium* 48: 140-141, 191, 402, 409. 2003.

Species

B. eruciformis (L.) Host (*Paspalum aristatum* Moench; *Paspalum eruciforme* (L.) Spreng.; *Phalaris erucaeformis* L.)

America. Strongly flattened spikelets, see *Species Plantarum* 1: 55. 1753, *Methodus Plantas Horti Botanici ...* 178. 1794, *Der Botanische Garten der Universität zu Halle, Erster Nachtrag* 31. 1801, *Icones et Descriptiones Graminum Austriacorum* 3: 5. 1805 and *Taxon* 49(2): 253. 2000.

in English: American sloughgrass

B. syzigachne (Steud.) Fernald (*Beckmannia baicalensis* (I.V. Kusn.) Hultén; *Beckmannia eruciformis* auct. non (L.) Host; *Beckmannia eruciformis* (L.) Host subsp. *baicalensis* (Kusnez.) Hultén; *Beckmannia eruciformis* subsp. *syzigachne* (Steud.) Breitung; *Beckmannia eruciformis* var. *baicalensis* I.V. Kusn.; *Beckmannia eruciformis* var. *uniflora* Scribn. ex Gray; *Beckmannia syzigachne* subsp. *baicalensis* (Kusnez.) Koyama & Kawano; *Beckmannia syzigachne* subsp. *baicalensis* (Kusnez.) Hultén; *Beckmannia syzigachne* var. *syzigachne*; *Beckmannia syzigachne* var. *uniflora* (Scribn. ex Gray) B. Boivin; *Panicum syzigachne* Steud.)

U.S., New Mexico. Stout, annual or short-lived perennial, solitary or clumped, often with stolons, ligule membranous, leaf sheath open, narrow and congested flower head, many 1-sided spikes arranged in a narrow panicle, glumes equal and strongly keeled, lemma acute or awned, glumes joined when the whole spikelet falls from the flowering head, weed, infests cereals and wheat, palatable to livestock, important hay crop, found in damp habitats, wet meadows, marshes, stream banks, see *Flora* 29: 19. 1846, *A Manual of the Botany of the Northern United States* (edition 6) 628. 1890 and *Rhodora* 30: 27. 1928, *American Midland Naturalist* 58: 10. 1957, *Canad. Journ. Bot.* 42: 879. 1964, *Le Naturaliste Canadien* 94: 521. 1967, Li Yi Wei, Chen Yi Feng, Li Yong Feng, Tang Ri Sheng, Mei Chuan Sheng, "Inductive resistance to chlorsulfuron in *Beckmannia syzigachne* and *Alopecurus japonicum* in vitro." *Jiangsu Journal of Agricultural Sciences*. 13: 85-89. 1997.

in English: western sloughgrass, sloughgrass, American sloughgrass

Beesha Kunth = *Melocanna* Trin.

Bambusoideae, Bambuseae, Melocanninae, see *Neue Entdeckungen im ganzen Umfang der Pflanzenkunde* 2: 43. 1820 [1821], *Journal de Physique, de Chimie, d'Histoire Naturelle et des Arts* 95: 151. 1822 and *Contributions from the United States National Herbarium* 39: 71. 2000.

Beesha Munro = *Ochlandra* Thwaites

Bambusoideae, Bambuseae, Melocanninae, see George Henry Kendrick Thwaites (1812-1882) & Joseph Dalton Hooker (1817-1911), *Enumeratio plantarum zeylaniae: an enumeration of Ceylon plants*. 376. London [1858-] 1864, *Transactions of the Linnean Society of London* 26: 144. 1868, *The Flora Sylvatica for Southern India* 239, t. 234. 1873, *Annals of the Royal Botanic Garden, Calcutta*. 7: 125. 1896 and *Bull. de la Société Linnéenne de Lyon* 9: 185-188. 1945, *Rheedea* 5(1): 63-89. 1995, *Contributions from the United States National Herbarium* 39: 81-82. 2000.

Bellardiochloa Chiov. = *Poa* L.

After the Italian botanist Carlo Antonio Lodovico Bellardi, 1741-1826, physician, pupil of the Italian physician and botanist Carlo Allioni (1728-1804), author of *Osservazioni botaniche*. Torino 1788, *Appendix Ludovici Bellardi ad Floram pedemontanam*. Torino 1792 and *Mezzo facile ed economico per nodrire i bachi da seta ...* Torino 1787. See J.H. Barnhart, *Biographical notes upon botanists*. 1: 158. 1965; Carlo Allioni, *Flora pedemontana*. 1: 61. Torino 1785; Jonas C. Dryander, *Catalogus bibliothecae historico-*

naturalis Josephi Banks. London 1796-1800; Antoine Lasègue (1793-1873), *Musée botanique de M. Benjamin Delessert*. 344. Paris, Leipzig 1845; O. Mattiolo, *Cronistoria dell'Orto Botanico della Regia Università di Torino*. in *Studi sulla vegetazione nel Piemonte* pubblicati a ricordo del II Centenario della fondazione dell'Orto Botanico della R. Università di Torino. Torino 1929.

One species, Europe, Asia. Pooideae, Poodae, Poeae, or Pooideae, Poeae, Poinae, perennial, herbaceous, densely tufted, auricles absent, narrow linear leaf blades, ligule an unfringed membrane, plants bisexual, inflorescence paniculate, spikelets pedicellate and flattened, two glumes unequal or subequal, palea present, 2 free and membranous lodicules, 3 stamens, ovary glabrous, 2 stigmas, often referred to *Poa*, type *Bellardiochloa violacea* (Bellardi) Chiov., see *Species Plantarum* 1: 67-70. 1753, *Tableau Encyclopédique et Méthodique ... Botanique* 1(1): 182. 1791, *Mémoires de l'Académie Royale des Sciences* 5: 214, t. 3. 1792, *Essai d'une Nouvelle Agrostographie* 99, 162, 177. 1812, *Hortus Regius Botanicus Berolinensis* 1: 171. 1827, *Hortus Regius Botanicus Berolinensis* 1: 171. 1829 and *Studi Vegetazione nel Piemonte* 13, 60. 1929, *Fragmenta Floristica et Geobotanica* 19: 265-270. 1973, *Lejeunia* 110: 56. 1983, *Denkschriften der Schweizerischen [Naturforschenden Gesellschaft] [Akademie der Naturwissenschaften]* 100: 1-130. 1987, *American Journal of Botany* 77(11): 1383-1400. Nov 1990, *Fitologija* 39: 72-77. 1991, *Flora Reipublicae Popularis Sinicae* 9(2): 178-179, 198, 210. 2003, *Contributions from the United States National Herbarium* 48: 505-580. 2003.

Species

B. variegata (Lam.) Kerguelen (*Bellardiochloa violacea* (Bellardi) Chiov.; *Bellardiochloa violacea* var. *aetnensis* (C. Presl) Chiov.; *Bellardiochloa violacea* var. *anthoxanthoides* Chiov.; *Bellardiochloa violacea* var. *breunia* (Facchini) Chiov.; *Poa variegata* Lam.; *Poa violacea* Bellardi; *Schedonorus violaceus* (Bellardi) Link; *Schoenodorus violaceus* (Bellardi) Link)

Europe.

in French: paturin violet

Bennetia Raf. = *Sporobolus* R. Br.

Chloridoideae, Cynodonteae, Sporobolinae, type *Agrostis juncea* Michx. (*Bennetia juncea* Raf. ex Jacks.; *Bennetia juncea* (Kunth) Jacks.; *Heleochoa juncea* P. Beauv.; *Sporobolus junceus* (Michx.) Kunth), see *Flora Boreali-Americana* 1: 52. 1803, *Prodromus Florae Novae Hollandiae* 169-170. 1810, *Essai d'une Nouvelle Agrostographie* 24, 147, 164, t. 7, f. 2. 1812, *Révision des Graminées* 1: 68. 1829, *Bulletin Botanique [Genève]* 1: 220. 1830,

Linnaea 8: Lit.-Ber. 85. 1838, *Nom. Botanicus* 2: 1274. 1874, *Index Kewensis* 1: 291. 1893 and *Contributions from the United States National Herbarium* 41: 200-219. 2001.

Berchtoldia J. Presl = *Chaetium* Nees

Dedicated to the Czech botanist Friedrich Berchtold, 1781-1876, traveler and plant collector in Brazil; see J.H. Barnhart, *Biographical notes upon botanists*. 1: 166. 1965.

Panicoideae, Paniceae, Melinidinae, type *Berchtoldia bromoides* J. Presl, see *Species Plantarum* 1: 55. 1753, *Nova Genera et Species Plantarum* 1: 107. 1815 [1816], *Flora Brasiliensis seu Enumeratio Plantarum* 2(1): 269-271. 1829, *Reliquiae Haenkeanae* 1(4-5): 323-324, t. 43. 1830, *Flora Brasiliensis* 2(2): 149. 1877, *Biologia Centrali-Americana*; ... *Botany* ... 3: 503. 1885 [Biologia Centrali-Americana; or, Contributions to the knowledge of the fauna and flora of Mexico and Central America. Edited by F. Du Cane Godman & Osbert Salvin. Botany ... By W. Botting Hemsley.], *Mexicanas Plantas* 2: 41. 1886 and *Contributions from the United States National Herbarium* 22(3): 136, f. 27. 1920, *Brittonia* 23(3): 293-324. 1971, *Annals of the Missouri Botanical Garden* 85(3): 404-424. 1998 [Revisión sistemática y análisis cladístico del género *Chaetium* (Poaceae: Panicoideae: Paniceae), by O. Morrone et al.], *Contributions from the United States National Herbarium* 46: 152-153. 2003.

Berghausia Endl. = *Garnotia* Brongn., *Miquelia* Arn. & Nees, *Miquelia* Meisn. (Icacinaceae), *Miquelia* Blume (Gesneriaceae)

For the German cartographer Heinrich Karl Wilhelm Berghaus, 1797-1884, professor of mathematics, see J.H. Barnhart, *Biographical notes upon botanists*. 1: 169. 1965.

Arundinelleae, see *Voyage Autour du Monde* 2(2): 132-133, pl. 21. 1830, *Plantarum vascularium genera secundum ordines* ... 1: 152. 1838, *Bulletin des Sciences Physiques et Naturelles en Neerlande* 1: 94. 1838, *Gramineae* 45-46, 47-48. 1841, *Nova Acta Phys.-Med. Acad. Caes. Leop.-Carol. Nat. Cur.* 19(Suppl. 1): 177-178. 1843, *Genera Plantarum* Suppl. 3: 57. 1843.

Bewsia Goossens

After the Scottish ecologist John William Bews, 1884-1938 (Pietermaritzburg, Natal), philosopher, traveler, from 1910-1938 professor of botany at Natal University College, Pietermaritzburg, South Africa, in 1926 a Fellow of the Linnean Society, author of *The World's Grasses*. London 1929, *The Grasses and Grasslands of South Africa* ... Pietermaritzburg 1918, *Human Ecology*. London 1935, *Life*

as a Whole. London 1937, *Plant Forms and their Evolution in South Africa*. London 1925, *An Introduction to the Flora of Natal and Zululand*. Pietermaritzburg 1921 and *Studies in the Ecological Evolution of the Angiosperms*. London 1927, co-author with Robert Douglas Aitken of *Researches on the Vegetation of Natal*. Pretoria 1923, 1925 [Botanical Survey of South Africa. Memoir no. 5, 8]. See G.W. Gale, *John William Bews*. Pietermaritzburg 1954; J.H. Barnhart, *Biographical notes upon botanists*. 1: 180. 1965; Mary Gunn & Leslie E. Codd, *Botanical Exploration of Southern Africa*. 93-94. Cape Town 1981.

One species, tropical Africa. Chloridoideae, Eragrostideae, Eleusininae, perennial, unarmed, herbaceous, tufted, solid, with short and creeping rhizomes, leaves basal, auricles absent, ligule an unfringed membrane, plants bisexual, inflorescence spicate, spikelets solitary 2- to 4-flowered, 2 glumes subequal, lemmas rounded and shortly awned, palea present, 2 lodicules free and fleshy, 3 stamens, ovary glabrous, 2 stigmas, grazed by stock when young, savannah woodland, open flats, grassveld, sandy soils, rocky hillsides, a segregate from *Leptochloa*, type *Bewsia biflora* (Hack.) Goossens, see *South African Journal of Science* 37: 183. 1941.

Species

B. biflora (Hack.) Goossens (*Diplachne biflora* Hack.)

Central and southern Africa. Perennial, tufted, erect, tough, sometimes shortly rhizomatous, leaf sheath round, ligule membranous, racemes arranged irregularly on the primary axis, spikelets shortly pedicellate, lemmas dorsally awned, low grazing value, ornamental, common in open habitats, grassveld, plains, on damp soils, sandy soils, on riverbanks, open grassland, along vleis, sour bushveld, drainage canals, stony slopes, see *Essai d'une Nouvelle Agrostographie* 80. 1812, *Bulletin de l'Herbier Boissier* 3(8): 387. 1895 and *South African Journal of Science* 37: 184. 1941.

in English: false love grass

in South Africa: blousaadgras, vals-eragrostis

Bhidea Stapf ex Bor = *Bhidea* Stapf

Named for R.K. Bhide, collector of *Bhidea borii*.

About two to three species, India. Panicoideae, Andropogonodae, Andropogoneae, Andropogoninae, annual, herbaceous, auricles absent, leaf blades narrow linear, ligule an unfringed membrane, plants bisexual, inflorescence terminal and axillary, racemes paired or solitary, spikelets in pairs of sessile and pedicelled ones, sessile spikelet dorsally compressed, 2 glumes very unequal, lower glumes asymmetrical winged, male spikelets with glumes, upper lemma bilobed and awned, palea present, 2 lodicules cuneate, open

habitats, dry soils, type *Bhidea burnisiana* Bor, segregate from *Andropogon* sect. *Andropogon*.

Species

B. borii U.R. Deshpande, Ved Prakash & N.P. Singh

India. Annual, slender, upper nodes hairy, leaf blade linear acuminate, leaf sheath glabrous, racemes solitary and non-digitate, spikelets in pairs, glumes of all spikelets with awns, in open grassland, on rocky soils, see *Kew Bulletin* 42(3): 683. f. 1. 1987, *Current Science* 58(19): 1094. 1989.

B. burnisiana Bor

India. Rare, annual, erect, leaves basal, leaf blades linear, ligule an unfringed membrane, inflorescence of two racemes, two glumes unequal to very unequal, lower glume of sessile spikelets oblong and 2-nerved, upper glume awned, pedicelled and basal spikelets awnless, upper lemma 2-lobed and awned, a pioneer, in dry places, abandoned fields, on rocky plains, see *Kew Bulletin* 3: 445-447, figs. 1-3. 1949, *Grasses of Burma* ... 103, fig. 2. 1960.

B. fischeri Sreekumar & Shetty

India. Annual, in open grasslands, dry rocky plains, see *Kew Bulletin* 42: 3 683. 1987.

Biatherium Desv. = *Gymnopogon* P. Beauv.

From the Latin *bis* “twice” and Greek *ather* “barb, spine, chaff, prickle, awn.”

Chloridoideae, Cynodonteae, type *Biatherium foliosum* (Willd.) Desv., see *Species Plantarum. Editio quarta* 4: 924. 1806, *Essai d'une Nouvelle Agrostographie* 41, 164. 1812, *Flora Brasiliensis seu Enumeratio Plantarum* 2: 426. 1829, *Mémoires de la Société d'Agriculture, Sciences et Arts d'Angers* 1: 172, 176, t. 8, f. 2. 1831, *Preliminary Catalogue of Anthophyta and Pteridophyta Reported as Growing Spontaneously within One Hundred Miles of New York* 69. 1888 and *Contributions from the United States National Herbarium* 41: 124-127. 2001

Bifaria (Hack.) Kuntze = *Bifaria* Tiegh.

(Loranthaceae), *Mesosetum* Steud.

Latin *bifarius*, *a*, *um* “twofold, double,” lower glume awned.

Panicoideae, Paniceae, Paspalinae, see *Synopsis Plantarum Glumacearum* 1: 118. 1855 [1854], *Bulletin de la Société Botanique de France* 43: 164. post 24 Apr 1896, *Österreichische Botanische Zeitschrift* 47(3): 75-77. 1897, *Revisio Generum Plantarum* 3[3]: 359. 1898 and *Proceedings of the Biological Society of Washington* 24: 121, 123. 1911, *Contributions from the United States National Herbarium* 46: 288-292. 2003

Blakeochloa Veldkamp = *Plinthanthesis* Steud.

Arundineae, type *Blakeochloa urvillei* (Steud.) Veldkamp, see *Synopsis Plantarum Glumacearum* 1: 14. 1855 [1853] and *Taxon* 29: 296. 1980, *Taxon* 30(2): 478. 1981

Blepharidachne Hackel = *Eremochloa* Büse, *Eremochloe* S. Watson

Greek *blepharon* “an eyelid,” *blepharis* “eyelash” and *achne* “chaff, glume,” referring to the ciliate lemmas.

About 4 species, western U.S., Argentina, Mexico. Chloridoideae, Cynodonteae, Munroinae, annual or perennial, decumbent, knotty base, lacking stolons, rhizomatous, auricles absent, ligule absent or a line of hairs, sheaths ciliate, short leaves, hermaphrodite or monoecious, inflorescence a panicle exerted or partially included in upper sheath, disarticulation above glumes, few spikelets 4-flowered and shortly peduncled, spikelets solitary and laterally compressed, single fertile floret embraced by two sterile florets, the 2 lowest florets male or barren, the third female or bisexual, the fourth reduced, 2 glumes more or less equal, second glume awnless, rounded lemmas deeply bilobed and ciliate on the margins, ciliate awn, palea keels ciliate or smooth, lodicules absent, 1-3 stamens, ovary glabrous, 2 stigmas, found in rocky slopes, open habitats, desert, related to *Munroa* Torrey, type *Blepharidachne kingii* (S. Watson) Hack., see *Plantae Junghuhnianae* 357. 1854, *U.S. Geol. Explor. 40th Par.* 5: 382, t. 40, f. 1-16. 1871 [also *United States Geological Exploration [sic] of the Fortieth Parallel. Botany*], *Nat. Pfl.-Fam.* 2, 2: 68, 126. 1887, *Monographiae Phanerogamarum* 6: 261. 1889 and *U.S.D.A Bull.* 772: 78. 1920 [also *Bulletin, Division of Agrostology United States Department of Agriculture*, or *Bull. Div. Agrostol., U.S.D.A.*], *Journal of the Colorado-Wyoming Academy of Science* 7(4): 29. 1973 [*Blepharidachne*, an anomalous eragrostoid grass.], *Brittonia* 31: 446-453. 1979, *Lilloa* 36: 131-138. 1983, *Revista del Museo Argentino de Ciencias Naturales* 4(3): 73-87. 1983, Hong Qian, “Floristic analysis of vascular plant genera of North America north of Mexico: characteristics of phytogeography.” *Journal of Biogeography* 26(6): 1307-1321. Nov 1999, *Contributions from the United States National Herbarium* 41: 19, 115. 2001, *Flora Fanerogámica Argentina* 86: 1-68. 2003.

Species

B. benthamiana (Hack. ex Kuntze) Hitchc. (*Munroa benthamiana* Hack. ex Kuntze)

South America, Argentina. See *Rev. Mus. La Plata* 5: 303. 1893, *Revisio Generum Plantarum* 3(3): 357. 1898 and *Bulletin, Division of Agrostology United States Department of Agriculture* 772: 78. 1920.

B. bigelovii (S. Watson) Hackel (*Eremochloe bigelovii* S. Watson; *Eremochloe thurberi* S. Watson)

U.S., Texas, Mexico. See *Blumea* 46: 416. 2001.

B. hitchcockii Lahitte

South America, Argentina. See *Physis* (Buenos Aires) 15: 305. 1939.

B. kingii (S. Watson) Hackel (*Eremochloe kingii* S. Watson)

U.S., Nevada. See *Monogr. Phan.* 6: 261. 1889.

in English: king's eyelash grass

Blepharochloa Endl. = *Leersia* Sol. ex Sw.,
Leersia Sw.

From the Greek *blepharon* "an eyelid" and *chloe*, *chloa* "grass."

Ehrhartoideae, Oryzeae, Oryzinae, type *Blepharochloa ciliata* Endl. ex B.D. Jacks., see *Nova Genera et Species Plantarum seu Prodromus* 1, 21. 1788, *Genera Plantarum* 1352. 1840, *Index Kewensis* 1: 312. 1895 and *Contributions from the United States National Herbarium* 39: 35, 64-67. 2000

Blepharoneuron Nash

From the Greek *blepharon* "an eyelid" and *neuron* "nerve," referring to the lemmas.

About 1-2 species, North America, southwestern U.S., Texas, Mexico. Chloridoideae, Cynodonteae, Muhlenbergiinae, annual or perennial, erect or decumbent, herbaceous, unarmed, caespitose or not, auricles absent, sheaths not ciliate, ligule membranous, leaf blades ribbed and involute, inflorescence a panicle exserted, pedicels glandular, disarticulation above glumes, spikelets 1-flowered without rachilla extension, 2 glumes subequal or unequal, second glume awnless, lemma entire and awnless, palea densely villous or hairy, 2 lodicules free and fleshy, 3 stamens, ovary glabrous, 2 stigmas, found in dry open places, woodland, close to *Erioneuron* Nash, type *Blepharoneuron tricholepis* (Torr.) Nash, see *Bulletin of the Torrey Botanical Club* 14: 133-134. 1887, *Bulletin of the Torrey Botanical Club* 25(2): 83-89. 1898 and *Contributions from the United States National Herbarium* 29: 203-208. 1947, *Brittonia* 23: 105-117. 1971, *Kew Bull.* 37: 133-162. 1982, *Phytologia* 64: 390-398. 1988, *Madroño* 35(4): 320-324. 1988, *Systematic Botany* 15(4): 515-525. 1990, *Sida* 14: 531-549. 1991, *American Journal of Botany* 81: 622-629. 1994, *Grasses: Systematics and Evolution* 195-212. 2000, *Contributions from the United States National Herbarium* 41: 19-20. 2001.

Species

B. shepherdii (Vasey) P.M. Peterson & Annable (*Muehlenbergia shepherdii* (Vasey) Swallen; *Muhlenbergia shepherdii* (Vasey) Swallen; *Sporobolus shepherdii* Vasey)

Southern U.S., Colorado to central Mexico. Annual, branched, see *Genera Plantarum* 44. 1789, *Bulletin of the Torrey Botanical Club* 14: 8. 1887 and *Contributions from the United States National Herbarium* 29(4): 204. 1947, *Systematic Botany* 15(4): 519. 1990.

B. tricholepis (Torr.) Nash (*Sporobolus tricholepis* (Torr.) J.M. Coult.; *Vilfa tricholepis* Torr.)

Southern U.S., Colorado to central Mexico. Perennial, caespitose, herbaceous, forage, grows in dry areas, see *Pacific Railr. Reports* 4(5): 155. 1857, *Manual of the Botany ... of the Rocky Mountain Region* . . 411. 1885, *Bulletin of the Torrey Botanical Club* 25(2): 88. 1898.

in Mexico: popotillo del pinar

Bluffia Nees = *Alloteropsis* Presl

After the German botanist Mathias Joseph Bluff, 1805-1837, physician; see J.H. Barnhart, *Biographical notes upon botanists*. 1: 204. 1965; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933; Mariella Azzarello Di Misa, a cura di, *Il Fondo Antico della Biblioteca dell'Orto Botanico di Palermo*. 42. Palermo 1988.

Panicoideae, Paniceae, Paspalinae, type *Bluffia eckloniana* Nees, see *Göttingische gelehrte Anzeigen (unter der Aufsicht der Königl. Gesellschaft der Wissenschaften)* 1825: 1705. 1825 [also *Gött. gel. Anz.*], *Reliquiae Haenkeanae* 1(4-5): 343-344, t. 47. 1830, *Delectus Seminum quae in Horto Hamburgensium Botanico* 1834: 8. 1834 and *Proceedings of the Biological Society of Washington* 29: 128. 1916, *Contributions from the United States National Herbarium* 46: 16. 2003

Blumenbachia Koeler = *Blumenbachia*
Schrad. (Loasaceae), *Sorghum* Moench

For the German botanist Johann Friedrich Blumenbach, 1752-1840, biologist, physician, anthropologist, 1775 medical doctor, Göttingen; see J.H. Barnhart, *Biographical notes upon botanists*. 1: 204. 1965; Jonas C. Dryander, *Catalogus bibliothecae historico-naturalis Josephi Banks*. London 1796-1800; Walter Baron, in *D.S.B.* 2: 203-205. 1981; Bentley Glass et al., eds., *Forerunners of Darwin: 1745-1859*. Edited by ... O. Temkin, William Strauss, Jr. First Edition. John Hopkins Press, Baltimore 1959; Jeanette E. Graustein, *Thomas Nuttall, Naturalist. Explorations in America, 1808 - 1841*. Harvard University Press 1967; Giulio Giorello & Agnese Grieco, a cura di, *Goethe*

scenziato. Einaudi Editore, Torino 1998; G. Schmid, *Goethe und die Naturwissenschaften*. Halle 1940.

Panicoideae, Andropogoneae, Sorghinae, type *Blumenbachia halepensis* (L.) Koeler, see *Species Plantarum* 2: 1047-1048. 1753, *Methodus Plantas Horti Botanici ...* 207. 1794, *Descriptio Graminum in Gallia et Germania* 28-29. 1802, *Flora Brasiliensis* 2(4): 271. 1883 and *Novosti Sist. Vyss. Rast.* 10: 79. 1973, *Contributions from the United States National Herbarium* 46: 135, 598-606. 2003

Blyttia Fr. = *Blyttia* Arn. (Asclepiadaceae),
Cinna L.

Named for the Norwegian botanist Matthias [Matias, Mathias] Numsen Blytt (1789-1862), naturalist, traveler, professor of botany, 1843-1862 Director University Botanical Garden of Christiania, father of Axel Gudbrand Blytt (1843-1898), author of *Norges flora, eller Beskrivelser over de i Norge vildtvoxende Karplanter tilligemed Angivelser af de geografiske Forholde, under hvilke de forekomme*. Oslo 1861-1877 and *Enumeratio plantarum vascularum, quæ circa Christianiam sponte nascuntur ... Christianiae* 1844. See J.H. Barnhart, *Biographical notes upon botanists*. 1: 205. 1965; A. Lasègue, *Musée botanique de Benjamin Delessert*. Paris 1845; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933; Ignatz Urban, *Geschichte des Königlichen Botanischen Museums zu Berlin-Dahlem (1815-1913). Nebst Aufzählung seiner Sammlungen*. Dresden 1916; *Blyttia* 1: 2-15, 16-18, 19-20. 1943; *Blyttia* 45: 102. 1987.

Pooideae, Poeae, Aveninae, see *Species Plantarum* 1: 5. 1753, *Magazine of Zoology and Botany* 2: 420. 1838, *Kongliga Svenska Vetenskapsakademiens Handlingar* 1837: 256. 1838, *Novit. Fl. Suec. Mant.* 2: 2. 1839 [also E.M. Fries (1794-1878), *Novitarum Florae Suecicae Mantissa* Lund 1832-1845], *Flora Rossica* 4(13): 435. 1852 and *Bot. Zhurn.* 70(1): 126-128. 1985, *Bot. Zhurn. (Moscow & Leningrad)* 75: 1185. 1990, *Contributions from the United States National Herbarium* 48: 142, 234-236. 2003

Boissiera Hochst. ex Steud. = *Boissiera*
Hochst. ex Griseb., *Boissiera* Steud., *Euraphis*
(Trin.) Lindley, *Schnizleinia* Steud., *Wiesta*
Boiss.

After the Swiss botanist and traveler Pierre-Edmond Boissier, 1810-1885, botanical collector. See Frans A. Stafleu & Erik A. Mennega, *Taxonomic literature. Supplement II: Be-Bo.* 279-282. 1993; Pierre Edmond Boissier, *Pugillus plantarum novarum Africae borealis Hispaniaeque australis*, auctoribus E. Boissier et G.F. Reuter. Geneva, Ex Typographia

F. Ramboz et Socii, 1852; Pierre Edmond Boissier, *Diagnoses plantarum novarum hispanicarum praesertim in Castella nova lectarum / auctoribus E. Boissier et G.F. Reuter*. Geneva: Typis Ferdinandi Ramboz, 1842; I.C. Hedge & J.M. Lamond, *Index of Collectors in the Edinburgh Herbarium*. 61. 1970; J.H. Barnhart, *Biographical notes upon botanists*. 1: 211. 1965; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 43. 1972; Eugène John Benjamin Autran (1855-1912), *Hortus boissierianus*. Genève 1896.

One species, western Asia, Turkey to Pakistan. Pooideae, Triticodae, Bromeae, annual, herbaceous, tufted or solitary, hollow, auricles present, leaf sheaths margins connate, narrow linear leaf blades, ligule an unfringed membrane, plants bisexual, capitate inflorescence, panicle densely contracted and more or less ovoid, spikelets narrowly lanceolate and pedicellate, florets with 5-9 awns, upper florets reduced to a cluster of awns, 2 glumes membranous and subequal, lemmas papery to coriaceous, palea present, 2 free and membranous lodicules, 3 stamens, ovary hairy, 2 stigmas, open places, dry stony sites, native pasture species, sometimes referred to *Bromus* and to *Enneapogon*, type *Boissiera bromoides* Hochst. & Steud., see *Species Plantarum* 1: 76-78. 1753, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 1(1): 92. 1830, *Flora* 21: 25. 1838, *Nomenclator Botanicus. Editio secunda* 1: 213. 1840, *The Vegetable Kingdom* 115. 1846, *Flora Rossica* 4(13): 404. 1852, *Syn. Pl. Glum.* 1: 200. 1854, *Flora Orientalis* 5: 559. 1884, *Revisio Generum Plantarum* 1: 776. 1891 and *Feddes Rep.* 79: 337-345. 1969, *Notes from the Royal Botanic Garden, Edinburgh* 42(3): 491-501. 1985, *Flora Mediterranea* 5: 340-345. 1995, *Annales Botanici Fennici* 35: 123-130. 1998.

Species

B. squarrosa (Banks & Sol.) Nevski (*Boissiera bromoides* Hochst. & Steud.; *Boissiera pumilio* (Trin.) Hack.; *Boissiera squarrosa* (Banks & Sol.) Eig, nom. illeg., non *Boissiera squarrosa* (Banks & Sol.) Nevski; *Bromus pumilto* (Trin.) P.M. Sm.; *Bromus pumilto* (Trin.) P.M. Sm.; *Euraphis pumilio* (Trin.) Kuntze; *Euraphis squarrosa* (Banks & Sol.) Soják; *Pappophorum pumilio* Trin.; *Pappophorum sinaicum* Trin.; *Pappophorum squarrosum* Banks & Sol.)

Eurasia. See *The Natural History of Aleppo* 2: 224. 1794, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 4,2(1): 54. 1836, *Akademie der Wissenschaften in Wien, Mathematisch-Naturwissenschaftliche Klasse, Denkschriften* 50(2): 9. 1885 and *Journal of Botany, British and Foreign* 75: 189. 1937, *Feddes Repertorium* 79: 338. 1969.

Boivinella A. Camus = *Boivinella* (Pierre ex Baillon) Aubrév. & Pellegr. (Sapotaceae), *Cyphochlaena* Hack.

For the French botanist Louis Hyacinthe Boivin, 1808-1852 (Brest), traveler and plant collector (Corsica, islands of the Indian Ocean and coasts of Africa, Canary Islands, Madagascar), explorer, 1846-1852 served as botanist on the *Oise* expedition. See F.N. Hepper & Fiona Neate, *Plant Collectors in West Africa*. 11. 1971; J.H. Barnhart, *Biographical notes upon botanists*. 1: 212. 1965; A. Lasègue, *Musée botanique de Benjamin Delessert*. Paris 1845; Mary Gunn & Leslie Edward W. Codd, *Botanical Exploration of Southern Africa*. Cape Town 1981; J. Lanjouw & F.A. Stafleu, *Index Herbariorum*. Part II, *Collectors A-D*. Regnum Vegetabile vol. 2. 1954; I.C. Hedge & J.M. Lamond, *Index of Collectors in the Edinburgh Herbarium*. Edinburgh 1970; Laurence J. Dorr, *Plant Collectors in Madagascar and the Comoro Islands*. 1997.

About two species, Madagascar. Panicoideae, Panicodae, Paniceae, Boivinelleanae, annual or perennial, herbaceous, unarmed, leaf sheaths inflated at the base, ligule membranous, plants bisexual, inflorescence nondigitate, unilateral racemes, paired dimorphic spikelets, sterile spikelets sessile, female spikelets pedicelled and laterally compressed, two glumes subequal, upper glume coriaceous, lower lemma gibbous, male spikelet upper glume and lower lemma membranous, palea present, 6 stamens, ovary glabrous, 2 stigmas, in damp places, often in *Cyphochlaena* Hackel, type *Boivinella sclerioides* (Boivin ex A. Camus) A. Camus, see *Linnaea* 23: 72. 1850 and *Österreichische Botanische Zeitschrift* 51: 465. 1901, *Bulletin de la Société Botanique de France* 72: 175-176. 1925, *Flora of West Tropical Africa* edition 1 2: 9. 1931, *Bulletin de la Société Botanique de France* 105: 37. 1958, *Adansonia* n.s., 5: 411-413. 1965.

Bonia Balansa = *Bambusa* Schreb.

Dedicated to the French botanist Père Henry François Bon, Missionary of the Missions Étrangères, botanical collector, traveler, see Emil Bretschneider, *History of European Botanical Discoveries in China*. 911-912. Leipzig 1981.

About five species, China, Vietnam. Bambusoideae, Bambuseae, Bambusinae, often in *Bambusa*, type *Bonia tonkinensis* Balansa, see *Genera Plantarum* 1: 236. 1789, *Species Plantarum*. Editio quarta 2: 245. 1799, *Journal de Botanique (Morot)* 4: 29. 1890 and *Les Bambusées* 136. 1913, *Acta Phytotaxonomica Sinica* 26(3): 212-215, pl. 1. 1988, N.H. Xia, "A study of *Bonia* (Gramineae: Bambusoideae)." *Kew Bulletin* 51(3): 565-569. 1996, *Contributions from the United States National Herbarium* 39: 29-35. 2000.

Species

B. amplexicaulis (Chia, H.L. Fung & Y.L. Yang) N.H. Xia (*Monocladus amplexicaulis* Chia & al.)

China. Stony hills, mountains, calcareous, see *Acta Phytotax. Sin.* 26(3): 215-216, f. 2: 1-3. 1988, *Kew Bulletin* 51(3): 568. 1996.

in China: yuang xiang zhu, mei-gom

B. levigata (Chia, H.L. Fung & Y.L. Yang) N.H. Xia (*Monocladus levigatus* Chia & al.)

China. Montane forests, mountains, see *Acta Phytotax. Sin.* 26(3): 216, f. 2: 4-5. 1988, *Kew Bulletin* 51(3): 568. 1996.

in China: xiang zhi zhu

B. saxatilis (Chia, H.L. Fung & Y.L. Yang) N.H. Xia (*Monocladus saxatilis* Chia & al.; *Monocladus saxatilis* Y.L. Yang)

China. Stony hills, mountains, calcareous, see *Acta Phytotax. Sin.* 26(3): 213, f. 1. 1988, *Kew Bulletin* 51(3): 567. 1996.

in China: dan zhi zhu

B. solida (C.D. Chu & C.S. Chao) N.H. Xia (*Indocalamus solidus* C.D. Chu & C.S. Chao; *Monocladus saxatilis* var. *solidus* (C.D. Chu & C.S. Chao) Chia; *Monocladus solidus* (C.D. Chu & C.S. Chao) Chia)

China. Stony hills, mountains, calcareous, cultivated, see *Acta Phytotax. Sin.* 18(1): 26, f. 2. 1980, *Acta Phytotax. Sin.* 26(3): 215. 1988, *Fl. Reipubl. Pop. Sin.* 9(1): 40. 1996, *Kew Bulletin* 51(3): 568. 1996.

in China: jang gang zhu

B. tonkinensis Balansa (*Bambusa tonkinensis* (Balansa) Baillon)

Vietnam. Mountains, see *J. Bot. Paris* 4: 29. 1890, *Hist. Pl.* 12: 147. 1894 [1893].

in Vietnam: câi le

Borinda Stapleton = *Sinarundinaria* Nakai

For the Irish (b. at Tramore, County Waterford) botanist Norman Loftus Bor, 1893-1972 (London), agrostologist, plant collector in India and Tibet, 1921-1948 Indian Forest Service, 1936 Botanical Officer Assam, Forest Botanist of the Forest Research Institute (Dehra Dun), 1945 President of the Indian Botanical Society, 1948-1959 Assistant Director Kew, 1931 Fellow of the Linnean Society, author of *Manual of Indian Forest Botany*. Oxford University Press, London 1953, *The Grasses of Burma, Ceylon, India and Pakistan*. London 1960, with Mukat Behari Raizada wrote *Some Beautiful Indian Climbers and Shrubs*. Bombay Natural History Society - Oxford University Press, Bombay 1982, contrib. to *Indian Forester*. See J.H. Barnhart, *Biographical notes upon botanists*. 1: 220. 1965; C.E. Hubbard,

“Norman Loftus Bor (1893-1972).” in *Kew Bulletin*. 30(1): 1-4. 1975; Carolyn M.K. Pope, “A bibliography of the work of Dr. N.L. Bor.” in *Kew Bulletin*. 30(1): 4-10. 1975; Ray Desmond, *Dictionary of British & Irish Botanists and Horticulturists*. 86. 1994.

About 8 species or more, subtropical to temperate, southern Vietnam, Tibet, Nepal, Sikkim, Bhutan. Bambusoideae, Bambusodae, Bambuseae, Thamnocalaminae, perennial, clump-forming, woody and persistent, branched, culms flexible, finely grooved culm internodes, rhizomes pachymorph, uniaespitose, erect or curving below, nodding to drooping above, internodes lightly waxy, culm sheaths deciduous, flowering culms leafy, leaf blades persistent or deciduous, plants unarmed and bisexual, flowering semelactant, without pseudospikelets, spikelets solitary and pedicellate, 2 glumes unequal to subequal and shortly awned, palea present, 3 free and membranous lodicules, 3 stamens, 2-3 stigmas, used for weaving, for making fences, see *Journal of Japanese Botany* 11(1): 1. 1935, *Edinburgh Journal of Botany* 51(2): 275-295. 1994, C.M.A. Stapleton, *Bamboos of Nepal*. Kew: Royal Botanic Gardens 1994, C.M.A. Stapleton, *Bamboos of Bhutan*. Kew: Royal Botanic Gardens 1994, *Flora of Bhutan* [The Grasses of Bhutan] 3(2): 501-502. 2000.

Species

B. albocerea (J.R. Xue & T.P. Yi) Stapleton (*Fargesia albocerea* J.R. Xue [also Hsueh] & T.P. Yi)

China. See *Journal of Bamboo Research* 7(2): 45-47, f. 11. 1988, *Kew Bulletin* 53(2): 455. 1998.

B. chigar Stapleton

China, Nepal. See *Edinburgh Journal of Botany* 51(2): 286, f. 2. 1994.

Local name: chigar

B. edulis (J.R. Xue & T.P. Yi) Stapleton (*Fargesia edulis* J.R. Xue & T.P. Yi)

China. See *Journal of Bamboo Research* 7(2): 53-57, f. 14. 1988, *Kew Bulletin* 53(2): 455. 1998.

B. emeryi Stapleton (*Yushania emeryi* (Stapleton) Demoly)

China, Nepal. See *Edinburgh Journal of Botany* 51(2): 286. 1994, *Bambou*, Association Européenne du Bambou, EBS Section France 29: 13. 1998.

Local name: kalo nigalo

B. extensa (T.P. Yi) Stapleton (*Fargesia extensa* T.P. Yi; *Sinarundinaria extensa* Yi)

China. See *Journal of Bamboo Research* 2(2): 163. 1983, *Edinburgh Journal of Botany* 51(2): 288. 1994.

B. fansipanensis (T.Q. Nguyen) Stapleton (*Fargesia fansipanensis* T.Q. Nguyen)

Vietnam. See *Kew Bulletin* 53(2): 455. 1998.

B. farcta (Yi) Stapleton (*Fargesia farcta* Yi)

China. See *J. Bamb. Res.* 2(2): 165, f. 5. 1983.

B. frigidorum (T.P. Yi) Stapleton (*Fargesia frigidorum* T.P. Yi)

China. See *Journal of Bamboo Research* 7(2): 17-20, f. 1. 1988, *Fl. Reip. Pop. Sin.* 9(1): 406. 1996, *Kew Bulletin* 53(1): 456. 1998.

B. fungosa (T.P. Yi) Stapleton (*Fargesia fungosa* T.P. Yi; *Yushania fungosa* (Yi) Demoly)

China. See *Bulletin of Botanical Research* 5(4): 121-123, f. 1. 1985, *Kew Bulletin* 53(2): 456. 1998.

B. glabrifolia (Yi) Stapleton (*Fargesia glabrifolia* Yi; *Sinarundinaria glabrifolia* Yi)

China. See *Journal of Bamboo Research* 2(2): 32, 168, f. 6. 1983, *Edinburgh Journal of Botany* 51(2): 288. 1994.

B. grossa (T.P. Yi) Stapleton (*Fargesia bhutanensis* Stapleton; *Fargesia grossa* Yi; *Sinarundinaria grossa* Yi; *Thamnocalamus bhotanica* Munro)

Bhutan, China. Densely clumped, thin-walled, erect and drooping, internodes waxy, nodes densely waxy and pubescent, culm sheaths triangular and deciduous, leaf sheaths glabrous, auricles absent, also cultivated, used for house roofing and for making fence sections, see *J. Bamb. Res.* 2(2): 171, f. 7. 1983, *Edinburgh Journal of Botany* 51(2): 288. 1994.

in Bhutan: baa, rhui

B. hsuehana (T.P. Yi) Stapleton (also spelled *hsuehiana*) (*Fargesia hsuehana* T.P. Yi)

China. See *Journal of Bamboo Research* 7(2): 104-108, f. 32. 1988, *Kew Bulletin* 53(2): 456. 1998.

B. lushuiensis (J.R. Xue & T.P. Yi) Stapleton (*Fargesia lushuiensis* J.R. Xue & T.P. Yi)

China. See *Journal of Bamboo Research* 7(2): 111-113, f. 34. 1988, *Kew Bulletin* 53(2): 457. 1998.

B. macclureana (Bor) Stapleton (*Arundinaria macclureana* Bor; *Fargesia macclureana* (Bor) Stapleton; *Sinarundinaria macclureana* (Bor) C.S. Chao & G.Y. Yang)

China. See *Journal of Bamboo Research* 7(2): 42-45, f. 10. 1988, *Kew Bulletin* 53(2): 457. 1998.

B. perlonga (J.R. Xue & T.P. Yi) Stapleton (*Fargesia perlonga* J.R. Xue & T.P. Yi)

China. See *Journal of Bamboo Research* 7(2): 79-81, f. 23. 1988, *Kew Bulletin* 53(2): 457. 1998.

B. setosa (Yi) Stapleton (*Fargesia setosa* Yi; *Sinarundinaria setosa* Yi; *Sinarundinaria setosa* J.J.N. Campbell)

China. See *Journal of Bamboo Research* 2(2): 179, f. 10. 1983.

in English: Tibetan arrow bamboo

in China: xizang jian zhu

Boriskellera Terekhov = *Eragrostis* Wolf

Chloridoideae, Cynodonteae, or Chloridoideae, Eragrostidae, Eragrostidinae, type *Boriskellera arundinacea* (L.) Terekhov, see *Species Plantarum* 1: 64. 1753, *Genera Plantarum* 23. 1776, *Icones et Descriptiones Graminum Austriacorum* 4: 15. 1809 and *Delectus Seminum Hortus Botanicus Reg. Kujbyshev* 13. 1938, *Acta Bot. Neerl.* 15: 157. 1966, *Contributions from the United States National Herbarium* 41: 81-115. 2001.

Botelua Lagasca

Orthographic variant, see *Bouteloua* Lag.

Chloridoideae, Cynodonteae, Boutelouinae, see *Varietades de Ciencias, Literatura y Artes* 2(4): 134. 1805 and *Contributions from the United States National Herbarium* 41: 20-33. 2001.

Bothriochloa Kuntze = *Amphilophis* Nash, *Amphilophis* (Trin.) Nash, *Amphilopsis* Nash, *Dichanthium* Willemet, *Gymnandropogon* (Nees) Duthie

From the Greek *bothros* "a pit, hole," *bothrion* "a little pit" and *chloe*, *chloa* "grass," in allusion to the glumes, joints and pedicels, or to the pitted lower glumes of sessile spikelets.

About (20-)28/35 species, cosmopolitan, warm temperate to tropical regions. Panicoideae, Andropogonodae, Andropogoneae, Andropogoninae, or Panicoideae, Andropogoneae, Sorghinae, perennial, tough, stiff, herbaceous, stout and erect, tufted, rhizomatous or stoloniferous, sometimes decumbent, often branched, solid internodes, shoots more or less aromatic, auricles absent, ligule membranous and short, sheaths terete with margins open, plants bisexual, spike-like racemes in a panicle or digitately, racemes ascending to erect, rachis joints with a translucent groove, spikelets paired, sessile spikelets awned and fertile with one fertile floret above a sterile floret, sessile spikelet callus obtuse, pedicellate spikelets unawned and sterile or male, 1 pair of spikelets may be unisexual, 2 glumes more or less equal and sometimes with small indentations or with a pit on the back, lower glumes nonpitted or pitted, upper lemma of fertile spikelet entire and awned, palea absent or present, 2 lodicules free and fleshy, 1-3 stamens, ovary glabrous without the apical appendage, 2 stigmas red, caryopses

dorsiventrally compressed and lanceolate, weed species, native pasture species, important livestock forage in grasslands or savannahs, cultivated for fodder, palatability to stock varies with its stage of growth, most species are hardy, attractive and ornamental, drought-resistant, found in grassy places, open habitats, roadsides, poor soils, heavy soils, rainforest, grassland, pampas, dry areas, similar to *Andropogon* L., hybrids with *Capillipedium* Stapf and *Dichanthium* Willemet, sometimes included in and referred to *Dichanthium* Willemet, type *Bothriochloa anamitica* Kuntze, see *Species Plantarum* 2: 1045. 1753, *Annalen der Botanik.* editor Usteri 18: 11. 1796, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. B. biloba S.T. Blake

Australia, Queensland, New South Wales. Perennial, caespitose, erect or decumbent, often branching from the nodes, sheath keeled and glabrous, ligule ciliolate, racemes subdigitate white or purple and sparsely hairy, sessile spikelets acute and with densely bearded callus, pedicellate spikelets acute and linear-lanceolate, awn bent or twisted, a vulnerable and endangered species, occurs in dry sclerophyll woodland, grassy sclerophyll woodland, grasslands and pastures, poor soils, see *University of Queensland Papers: Department of Botany* 2(3): 27. 1944.

Harlan; *Dichanthium ischaemum* (L.) Roberty; *Dichanthium ischaemum* subvar. *intermedium* (R. Br.) Roberty) (species dedicated to the Finnish botanist Peter Johan Bladh, 1746-1816, plant collector, with the Swedish East India Company, correspondent of Thunberg, Anders Jahan Retzius (1742-1821), Bäck, Bergius & Sir Joseph Banks; see J.H. Barnhart, *Biographical notes upon botanists*. 1: 195. 1965; Carl Edvard Bladh, *Minnen från finska kriget, åren 1808-1809*. Stockholm 1809; Carl Peter Thunberg (1743-1828), *Nova Genera Plantarum*. 6. 1781; Emil Bretschneider, *History of European Botanical Discoveries in China*. Leipzig 1981)

Tropical Africa, China, Japan, India, Indonesia, Nepal, Malaysia, Australia. Perennial or annual, very variable decreaser species, very vigorous, shortly rhizomatous, tufted or loosely tufted, bluish green, aromatic, tall, erect and stout, often robust, stems stiff and yellowish, unbranched or branched, ligule a short membrane, sheaths hairless and round, blades flat or folded, foliage scented, ascending racemes whorled and flexuous, rachis with simple branches, spikelets hairy and dark, callus shortly bearded, pedicellate spikelets male or sterile and unawned, sessile spikelet awned, lower glumes pitted, upper glume boat-shaped with a slender tip, lemmas membranous, palea absent, stamens 3, yellow anthers, weed species, sometimes invasive, native pasture species, cultivated, suitable for hay and silage, grazed while still young, low grazing value, palatable or not, excellent fodder, forage, revegetator, useful for erosion control, drought- and short-term flooding-resistant, hybridize freely with other species and genera, naturalized in dry zones on open hillsides, common along roadsides, swamp margins, streamsides, damp places, rough grassland, on riverbanks, moist sites, low lying areas, woodlands, borders of woods, margins of fields, vleis, disturbed habitats, see *Observationes Botanicae* 2: 27. 1781, *Prodrum Florae Novae Hollandiae* 1: 202. 1810, *Flora Indica; or Descriptions ...* 1: 268. 1820, *Reliq. Southern America. See *Flora Brasiliensis* 2(4): 293. 1883, *Monographiae Phanerogamarum* 6: 496. 1889 and *Nederl. Dendrologische Ver. Gedenkboek J.V. Suringar* 187. 1942.

B. bunyensis B. Simon (Queensland, Bunya Mountains)

Australia, Queensland. A vulnerable species, see *Austrobaileya* 1(5): 455. 1982.

B. campii (Swallen) de Wet (*Andropogon campii* Swallen)

Ecuador. See *Memoirs of the New York Botanical Garden* 9(2): 143-144. 1955, *American Journal of Botany* 55(10): 1249. 1968.

B. caucasica (Trin.) C.E. Hubb. (*Andropogon caucasicus* Trin.; *Andropogon intermedius* var. *caucasicus* (Trin.) Hack.; *Dichanthium caucasicum* (Trin.) S.K. Jain & Deshp.; *Sorghum caucasicum* (Trin.) Griseb.)

Southern Russia. Perennial bunchgrass, leafy, tufted, stiff, deep rooted and fine stemmed, erect, ornamental purple inflorescences, panicles or racemes loose and open, fluffy seeds, drought-tolerant or resistant, used for pasture and hay, palatable while succulent, sprawling habit, can become a weed in crop fields, aggressive invader, rapid growth, a prolific seed producer, grows well on poor shallow soils, especially useful for erosion control, used for stabilizing waterways, tolerant of heavy grazing pressure, similar to and sometimes considered as a synonym of *Bothriochloa bladhii* (Retz.) S.T. Blake, see *Prodromus Florae Novae Hollandiae* 1: 202. 1810, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 2(3): 286. 1832, *Flora Rossica* 4(14): 476. 1853, *Monographiae Phanerogamarum* 6: 486. 1889 and *Bulletin of Miscellaneous Information Kew* 1939: 101. 1939, *Bulletin of the Botanical Survey of India* 20(1-2): 133. 1978 [1979], *Journal of Cytology and Genetics* 25: 140-143. 1990.

in English: purple beard grass, Caucasian bluestem

B. compressa (Hook.f.) Henrard (*Amphilophis compressa* (Hook.f.) Blatt. & McCann; *Andropogon compressus* Hook.f.; *Dichanthium compressum* (Hook.f.) S.K. Jain & Deshp.)

Asia, India. See *The Flora of British India* 7: 172. 1896 and *Journal of the Bombay Natural History Society* 32: 421. 1928, *Blumea* 3(3): 456. 1940, *Bulletin of the Botanical Survey of India* 20(1-4): 133. 1978 [1979].

B. concanensis (Hook.f.) Henrard (*Amphilophis concanensis* (Hook.f.) Blatt. & McCann; *Andropogon concanensis* Hook.f.; *Dichanthium concanensis* (Hook.f.) S.K. Jain & Deshp.)

Hassan, Karnataka, India. See *The Flora of British India* 7: 174. 1896 and *Journal of the Bombay Natural History Society* 32: 422. 1928, *Blumea* 3(3): 457. 1940, *Bulletin of the Botanical Survey of India* 20(1-4): 134. 1978 [1979].

B. decipiens (Hackel) C.E. Hubb. (*Amphilophis decipiens* (Hack.) Moodie; *Andropogon decipiens* (Hack.) Domin; *Andropogon pertusus* var. *decipiens* Hack.) (from the Latin *decipio, cepi, ceptum, ere (de e capio)* "to deceive, to trick")

Australia, Queensland, New South Wales, Victoria. Perennial, caespitose, basal tussock, more or less glabrous sheath keeled and loose, ligule ciliolate, bluish green leaves narrow and glabrous, purplish stems erect and slender, spreading or subdigitate inflorescence, purplish and long-awned

spikelets paired and hairy, sessile spikelets lanceolate and with hairy callus, pedicellate spikelets subulate and reduced to one glume, attractive and ornamental, pastures, colonisers of disturbed and degraded areas, see *Monographiae Phanerogamarum* 6: 483. 1889 and *Bibliotheca Botanica* 85(2): 266. 1915, *Bulletin of Miscellaneous Information Kew* 1934: 444. 1934, *Agricultural Gazette of New South Wales* 45: 603. 1934.

in English: red-leg grass, red grass, pitted bluegrass

B. edwardsiana (Gould) Parodi (*Andropogon edwardsianus* Gould) (Edwards Co., Texas)

Southern America, U.S., Argentina. Erect, stiff, densely clumped, see *Field & Laboratory* 19(4): 184-185. 1951, *Gramineas Bonaerenses* (edition 5) 116, 120. 1958.

in English: Merrill bluestem, Edwards plateau beard grass

B. erianthoides (F. Muell.) C.E. Hubb. (*Amphilophis erianthoides* (F. Muell.) Roshev.; *Andropogon erianthoides* F. Muell.) (like the genus *Erianthus* Michaux, from the Greek *erion* "wool" and *anthos* "flower")

Australia, Queensland, New South Wales. Perennial, caespitose, densely tufted, dense tussock forming, expanded sheath, bright green and rigid leaves, ligule obtuse and ciliate, stout and channelled stems, inflorescence with long and dense hairs, white to golden silky and spreading spike-like racemes, sessile spikelets acute and with densely bearded callus, pedicellate spikelets linear or linear-oblong, awn straight, grassland, heavy soils, ornamental when in flower, very adaptable species and very hardy, see *Fragmenta Phytographiae Australiae* 10: 75. 1876 and *Bulletin of Miscellaneous Information Kew* 1934: 444. 1934, *Zlaci SSSR* 570. 1937.

in English: satin-top grass

B. eurylemma M Marchi & Longhi-Wagner

Brazil, Argentina. See *Candollea* 50(2): 432, f. 1-2, 7. 1995.

B. ewartiana (Domin) C.E. Hubb. (*Andropogon ewartianus* Domin; *Andropogon ischaemum* sensu Benth., non L.; *Dichanthium ewartianum* (Domin) C. Gardner) (after the British born botanist Alfred James Ewart, 1872-1937 (Melbourne), plant collector, 1898 Fellow of the Linnean Society, from 1906 to 1937 professor of botany at the Melbourne University, from 1906 to 1937 Victoria Government botanist, 1922 Fellow of the Royal Society of London, his works include *Flora of Victoria*. [Melbourne] 1930, *The New Matriculation Botany*. Specially prepared to meet the requirements of the Matriculation syllabus of London University. 1902, *The Poisonous Action of Ingested Saponins*. [Commonwealth of Australia. Council for Scientific and Industrial Research. Bulletin no. 50.] Melbourne 1931 and the *Rural Calendar*. Birmingham [1904, etc.], co-author with Olive Blanche Davies (fl. 1917) of *The Flora of the Northern Territory*. Melbourne 1917, with Daniel Murnane

wrote *Kimberley Horse Disease*. [Commonwealth of Australia. Council for Scientific and Industrial Research. Bulletin no. 36.] Melbourne 1928; see J.H. Barnhart, *Biographical notes upon botanists*. 1: 521. 1965; Gustave Beauverd (1867-1942), in *Bull. Soc. Bot. Genève* 2: 236. 1910; A.J. Ewart & James Richard Tovey (1873-1922), *The Weeds, Poison Plants and Naturalized Aliens of Victoria*. Melbourne 1909)

South Australia, Western Australia, Northern Territory, Queensland, New South Wales. Perennial, stout, erect, caespitose, forming tall and thick leafy tussocks, ligule membranous, glaucous or bluish green and slightly reddish leaves, shiny stems stiff and hairy at the base, reddish and silvery inflorescence, sessile spikelet with a short bearded callus, first glume more or less glabrous and rarely pitted, second glume membranous and hairy, pedicellate spikelet sterile or rarely male and unawned, anthers yellow and linear, native pasture species, grazed, hot areas, wet areas, see *Bibliotheca Botanica* 85: 269. 1915, *Kew Bulletin* 1934: 444. 1934 [*Bulletin of Miscellaneous Information Kew* 1934: 444. 1934], *Flora of Western Australia* pt. 1: 328. pl. 96. 1952.

in English: desert bluegrass

B. exaristata (Nash) Henr. (*Amphilophis exaristatus* Nash; *Andropogon exaristatus* (Nash) Hitchc.; *Andropogon hassleri* Hack.; *Andropogon saccharoides* Sw.; *Andropogon saccharoides* subvar. *muticus* Hack.; *Andropogon saccharoides* var. *hassleri* (Hack.) Ekman; *Andropogon saccharoides* var. *inermis* Vasey ex Beal; *Andropogon saccharoides* var. *submuticus* Vasey ex Hack.; *Bothriochloa hassleri* (Hack.) Henrard; *Bothriochloa hassleri* (Hack.) Cabrera, nom. illeg., non *Bothriochloa hassleri* (Hack.) Henrard; *Bothriochloa hassleri* (Hack.) Herter, nom. illeg., non *Bothriochloa hassleri* (Hack.) Henrard)

U.S., Texas, South America. Inflorescence plumose, upper lemma awnless, see *Nova Genera et Species Plantarum seu Prodromus* 26. 1788, *Monographiae Phanerogamarum* 6: 495. 1889, *Grasses of North America for Farmers and Students* 2: 57. 1896 and *Flora of the Southeastern United States ...* 65. 1903, *Bulletin de l'Herbier Boissier, sér. 2*, 4(3): 266. 1904, *Arkiv för Botanik utgivet av K. Svenska Vetenskapsakademien* 11(4): 8. 1912, *Proceedings of the Biological Society of Washington* 41: 163. 1928, *Blumea* 4(3): 520. 1941, *Nederlandsche Dendrologische Vereeniging. Gedenkboek J. Valckenier Suringar*, 24 December, 1864 - 17 October, 1932. Camus; *Dichanthium insculptum* (Hochst. ex A. Rich.) Clayton; *Holcus pertusus* L.) (Latin *insculptus*, a, um "engraved, embedded in, cut into")

Africa, Arabia. Perennial or annual, branching, hard and fibrous, reddish purple, tufted, upright, often decumbent and rambling, often stoloniferous with woody stolons, shortly rhizomatous, white hairs around the nodes, leaf blade usually flattened, leaf sheath round, ligule a papery membrane, the leaves and stems have a strong characteristic scent when crushed, spike-like racemes arranged semidigitately, sessile spikelets shiny, 0-4 pitted pedicelled spikelets, lower glume of both spikelets pitted, a pit on one side of the seed hull, grains eaten by baboons, cultivated fodder, low grazing value, unpalatable or moderately to reasonably palatable, forage, native pasture species, hay aromatic, slow to establish, useful for erosion control and for thatching, spreads by horizontal runners, drought-tolerant, colonizes disturbed sites, generally occurs on all well-drained soils, vleis, low-lying areas, in open grassland, stony hillsides, open woodland, grassy plains, grassy banks around fields, borders of irrigated fields, bushveld, along roadsides, in heavily grazed areas, turf, on clay, cultivated ground, similar to *Bothriochloa bladhii* (Retz.) S.T. Blake and *Bothriochloa ewartiana* (Domin) C.E. Hubb., very similar to *Bothriochloa pertusa* (L.) A. Camus, see *Mantissa Plantarum* 2: 301-302. 1771, *Species Plantarum. Editio quarta* 4(2): 922. 1806, *Tentamen Florae Abyssinicae ...* 2: 458. 1850, *Synopsis Plantarum Glumacearum* 1: 380. 1854, *Monographiae Phanerogamarum* 6: 481-483. 1889 and *Flora of Tropical Africa* 9: 176. 1917, *Annales de la Société Linnéenne de Lyon, sér. 2*, 76(1930): 164-165. 1931, *Bulletin of Miscellaneous Information Kew* 1934: 109. 1934, *Kew Bulletin* 32(1): 3. 1977, *Journal of Cytology & Genetics* 15: 51-57. 1980, *Journal of Cytology and Genetics* 20: 205-206. 1985, *Journal of Cytology and Genetics* 25: 140-143. 1990, *Bol. Inst. Bioci.* 57: 38. 1998.

in English: pinhole grass, tassel grass, turf grass, creeping bluegrass, sweet pitted grass, sweet pit grass, stippel grass

in India: hennu ganjalub garikai hullu

in southern Rhodesia: umKunena

in southern Africa: klosgras, lidjiesgras, stinkgras, stippelgras, terpentyn gras, turfgras, turfklosgras, turfklossiegras; imbutane (Zulu); motsamabudi (Sotho); uhatshi (Ndebele)

Asia tropical, India, Indonesia. Perennial, herbaceous, prostrate, matted, culms erect or geniculately ascending and branching, spreading, stoloniferous or tufted, numerous creeping shoots which root at the nodes, shortly rhizomatous, leaf blades flat, ligule ciliate, sheaths rounded, inflorescence purplish and scented when crushed, panicles well-exserted, racemes villous, pedicelled spikelets usually with one pit but occasionally with three or none, awn of sessile spikelet geniculate, awns dark purple, first glume glabrous, stamens 3, stigmas reddish purple, native pasture species, quite palatable, best fed green, eaten when mixed with other grasses, good fodder grass, forage, used for grazing and for stacking, suitable for silage and hay, erosion control, revegetator, turf, lawns, recommended for reseeding eroded land in India, ornamental, cultivated, naturalized, moderate periods of drought-tolerant, withstands heavy grazing and trampling, survives fire, vigorous weed species, sometimes difficult to eradicate, rather common in disturbed as well as undisturbed areas, in moderately damp areas, along roadsides and in rather dry areas, grassland on clay soils and open woodland, limestone, loamy soils, open disturbed roadsides, dry pastures, very close to *Bothriochloa insculpta* (Hochst. ex A. Rich.) A. Camus, closely related to *Bothriochloa panormitana* (Parl.) Pilg., *Bothriochloa decipiens* (Hack.) C.E. Hubbard, *Bothriochloa longifolia* (Hack.) Bor and *Bothriochloa radicans* (Lehm.) A. Camus, see *Mantissa Plantarum* 2: 301-302. 1771, *Species Plantarum. Ethiopia, Sudan, Arabia, South Africa. Perennial, shrub-like, geniculate, usually ascending, tufted, branched, nodes hairy, often stoloniferous, sometimes rooted at the lower nodes, leaf blade flattened, leaf sheath of basal leaves loose and open, ligule a ring of white hairs, inflorescence subdigitate with sessile or shortly pedunculated racemes, spikelets paired, pedicelled spikelet awnless, sessile spikelet

lanceolate, glumes unpitted, lower glume of sessile spikelets hairy, very low grazing value, unpalatable grass, cultivated, naturalized, useful for erosion control, indicator of disturbed veld, common in dry warm regions, on stony slopes, rocky hillsides, heavy clay soils, limestone, vleis, low-lying areas, see *Semina in Horto Botanico Hamburgensi* 4: 16. 1827 [1828], *Monographiae Phanerogamarum* 6: 476. 1889 and *Bulletin of Miscellaneous Information Kew* 6: 210. 1907, *Flora of Tropical Africa* 9: 173. 1917, *Annales de la Société Linnéenne de Lyon, sér. 2*, 76: 164. 1931, *Kew Bulletin* 32(1): 4. 1977.

in English: buffalo grass

in Spanish: hierba búfalo, zacate búfalo

B. dimorpha Columbus (*Opizia stolonifera* J. Presl)

South America, Mexico, Cuba. See *Reliquiae Haenkeanae* 1(4-5): 293, t. 41, f. 1-11. 1830 and *Aliso* 18: 61-65. 1999.

B. distans Swallen

Mexico. Good forage, see *Contributions from the United States National Herbarium* 29(9): 401. 1950.

in Mexico: pasto

B. disticha (Kunth) Benth. (*Atheropogon distichus* (Kunth) Spreng.; *Bouteloua pilosa* (Hook.f.) Benth. ex S. Watson; *Bouteloua piurensis* Pilg.; *Eutriana gracilis* Hook.f., nom. illeg., non *Eutriana gracilis* (Kunth) Trin.; *Eutriana mucronata* F. Aresch.; *Eutriana pilosa* Hook.f.; *Eutriana polyodon* Trin.; *Leptochloa hirta* Nees ex Steud.; *Polydon distichum* Kunth; *Polyodon distichum* Kunth)

South America, Ecuador. Annual or short-lived perennial, very variable, weak, spreading, straggling, geniculate, often procumbent or scrambling, usually densely branched from base, leaf blades flat, ligule a very short fringed membrane, leaf blades linear and long-attenuate, inflorescence spike-like, 1-8 densely clustered spikelets fusiform with 1 fertile and 1 sterile floret, awned, glumes delicate, first glume acicular, second glume lanceolate, lemma of first floret oblong-lanceolate and shortly awned, 3 stamens, sterile floret reduced to an awned lemma, weed, along roadsides, dry hills, open disturbed ground, dry coastal lowland, see *Nova Genera et Species Plantarum* 1: 175, t. 55. 1815 [1816], *Gram. Unifl. Sesquifl.* 242. 1824, *Systema Vegetabilium, editio decima sexta* 1: 294. 1825, *Transactions of the Linnean Society of London* 20: 173, 175. 1847, *Synopsis Plantarum Glumacearum* 1: 209. 1854, *Journal of the Linnean Society, Botany* 19: 105. 1881, *Proceedings of the American Academy of Arts and Sciences* 18: 179. 1883 and F.W.C. Areschoug (1830-1908), *Plantae sub itinere navis bellicae Eugeniae anno 1852 a N. J. Andersson circa Guayaquil collectae* 3: 118. 1910, *Repertorium Specierum Novarum Regni Vegetabilis* 17(19-30): 447. 1921.

B. diversispicula Columbus (*Bouteloua brevifolia* Buckley; *Cathestecum brevifolium* Swallen; *Cathestecum brevifolium* var. *brevifolium*)

South America, U.S., Mexico. See *Proceedings of the Academy of Natural Sciences of Philadelphia* 14: 93. 1862 and *Journal of the Washington Academy of Sciences* 27(12): 500. 1937, *Ann. Missouri Bot. Gard.* 66: 397. 1979, *Aliso* 18(1): 63. 1999.

B. elata Reeder & C. Reeder (*Chondrosium elatum* (Reeder & C. Reeder) Clayton)

Mexico. See *Brittonia* 15(3): 215, f. 1-2. 1963, *Kew Bulletin* 37: 418. 1982.

B. eludens Griffiths

North America, U.S., Arizona. Perennial, unbranched, leaf sheaths glabrous or sparsely ciliate near the throat, without rhizomes or stolons, pubescent panicle branches, spikelets appressed with 1-2 bisexual florets and 1 rudimentary floret, glumes acuminate or shortly awned, third florets if present pubescent and variable, forage, grows on dry rocky slopes and rolling desert flats, resembles *Bouteloua chondrosoides*, see *Contributions from the United States National Herbarium* 14(3): 401, pl. 78-80A. 1912, *Desert Plants* 10(1): 19-22, 31-32. 1990.

in English: Santa Rita Mountain grama, elusive grama

in Mexico: navajita Santa Rita

B. erecta (Vasey & Hack.) Columbus (*Cathestecum erectum* Vasey & Hack.)

America, Mexico, U.S., Guatemala. See *Bulletin of the Torrey Botanical Club* 11: 37, pl. 45. 1884 and *Aliso* 18: 61-65. 1999.

in English: grama, grama grass, false grama

in Spanish: grama, grama china

B. eriopoda (Torrey) Torrey (*Bouteloua brevifolia* Buckley; *Chondrosium eriopodum* Torr.; *Chondrosium eriopodum* Torr.)

North America, Mexico, U.S. Perennial, decumbent, wiry, caespitose, rooting at the lower nodes, shortly rhizomatous, sometimes stoloniferous, panicle branches pubescent to woolly, spikelets appressed with 1 bisexual floret and 1 rudimentary floret, glumes unequal, upper glume sharply acute, upper floret base hairy-tufted, good forage, highly palatable, rocky places, dry plains, open areas, slopes, waste ground, woodland, see *Notes of a Military Reconnaissance* 154. 1848, *Pacif. Railr. Rep.* 4(5): 155. 1857, *Proceedings of the Academy of Natural Sciences of Philadelphia* 14: 93. 1862 and *Proceedings of the Biological Society of Washington* 56: 81. 1943, *Annals of the Missouri Botanical Garden* 66: 397-398. 1979, Debra P. C. Peters, "Recruitment potential of two perennial grasses with different growth forms at a semiarid-arid transition zone." *Am. J. Bot.* 89: 1616-1623. 2002.

in English: black grama, woolly foot grama

in Mexico: navajita negra

B. eriostachya (Swallen) Reeder (*Botelua eriostachya* Reeder; *Bouteloua eriopoda* var. *eriostachya* Swallen; *Chondrosium eriostachyum* (Swallen) Clayton)

South America, Mexico. See *Proceedings of the Biological Society of Washington* 56: 81. 1943, *Bulletin of the Torrey Botanical Club* 94: 7. 1967, *Kew Bulletin* 37: 418. 1982.

Mexico. Erect, delicate, prostrate, caespitose, leaf blades glabrous, ligule shortly pubescent, good forage, ornamental, moist places, shade, see *Nova Genera et Species Plantarum* 1: 179, t. 61. 1815 [1816], *Gram. Unifl. Sesquifl.* 239. 1824, *Systema Vegetabilium, editio decima sexta* 1: 293. 1825, *Reliquiae Haenkeanae* 1(4-5): 293. 1830, *Mémoires de la Société d'Agriculture, Sciences et Arts d'Angers* 1: 176. 1831, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 281. 1833, *Las Gramíneas de México* 141. 1881, *Mexicanas Plantas* 2: 141. 1886, *Proceedings of the Academy of Natural Sciences of Philadelphia* 43(2): 307-308, f. 2. 1891.

in Mexico: pasto, navajita

B. trifida Thurber (*Bouteloua burkii* Scribn. ex S. Watson, also spelled *burkei*; *Bouteloua burkii* Scribn.; *Bouteloua*

trinii (E. Fourn.) Griffiths; *Chondrosium trinii* Fourn.; *Chondrosium polystachyum* Trin. ex E. Fourn.; *Chondrosium trifidum* (Thurb.) Clayton; *Chondrosium trinii* E. Fourn.; *Chondrosium virletii* E. Fourn. ex Hemsl.; *Chondrosium virletii* E. Fourn.)

U.S., Mexico. Perennial, erect, geniculate, caespitose, delicate, slender, wiry, sometimes shortly rhizomatous, leaf sheaths glabrous, panicle branches ascending and slightly arching, spikelets 3-awned and purplish, 1 bisexual floret and 1 rudimentary floret, glumes 2-lobed and unequal, upper glume acute or notched, central awns of lemmas without membranous lobes, good forage, a drought-resistant species, found in sandy areas, dry open plains, rocky places, sandy plains, shrubby hills, slopes, see *Proceedings of the American Academy of Arts and Sciences* 18: 177, 179. 1883, *Bulletin of the Torrey Botanical Club* 11: 5. 1884, *Biologia Centrali-Americana; ... Botany ...* 3: 564. 1885, *Mexicanas Plantas* 2: 136. 1886, *Contributions from the United States National Herbarium* 2(3): 532. 1894 and *Contributions from the United States National Herbarium* 14(3): 387, 423, f. 41, 42, t. 74. 1912, *Kew Bulletin* 37: 418. 1982.

in English: red grama

in Mexico: navajita roja

B. trifida Thurber var. **burkii** (Scribn. ex S. Wats.) Vasey ex L.H. Dewey (*Bouteloua burkii* Scribn. ex S. Watson; *Bouteloua burkii* Scribn.; *Bouteloua trifida* Thurb.; *Chondrosium trinii* Fourn.)

U.S., New Mexico, Texas, Mexico. Perennial, lower lemmas densely appressed pubescent, see *Proceedings of the American Academy of Arts and Sciences* 18: 177, 179. 1883, *Bulletin of the Torrey Botanical Club* 11: 5. 1884, *Mexicanas Plantas* 2: 136. 1886, *Contributions from the United States National Herbarium* 2(3): 532. 1894 and *Contributions from the United States National Herbarium* 14(3): 387, f. 41, 42, t. 74. 1912.

in English: red grama

B. trifida Thurber var. **trifida**

U.S. Perennial, lower lemmas glabrous or sparsely appressed pubescent, grows in dry plains and rocky slopes, see *Proceedings of the American Academy of Arts and Sciences* 18: 177, 179. 1883.

in English: red grama

B. uniflora Vasey (*Bouteloua uniflora* var. *uniflora*)

North America, Texas, Mexico, U.S. Perennial, caespitose, erect, glabrous, without rhizomes or stolons, leaf blades involute, panicle branches with 1 spikelet, spikelets appressed with 1 bisexual and 0-1 rudimentary florets, glumes acute, second florets absent or reduced to short awns, good forage, in limestone soils, see *Botanical Gazette* 16(1): 26-27. 1891 and *Annals of the Missouri Botanical Garden* 66: 368. 1979.

in English: oneflower grama, Nealley's grama, oneflowered grama

in Mexico: banderilla simple, pasto

B. uniflora Vasey var. *coahuilensis* Gould & Kapadia

North America, Mexico, U.S. Good forage, see *Brittonia* 16(2): 191, f. 27, 41. 1964.

B. uniflora Vasey var. *uniflora*

North America, Mexico, U.S.

in Mexico: pasto

B. vaneedenii Pilg.

West Indies. Perennial, caespitose, erect, slender, leaf blades involute and filiform, leaves glabrous, spikes finally reflexed, awns very short, see *Symbolae Antillarum* 6: 2. 1909.

B. varia (Swallen) Columbus (*Cathestecum varium* Swallen)

South America. See *Journal of the Washington Academy of Sciences* 27(12): 498. 1937, *Aliso* 18(1): 63. 1999.

B. warnockii Gould & Kapadia (named for B. Warnock, botanical collector)

U.S., Texas, Mexico. Perennial, erect, glaucous, caespitose, stiff, leaf sheaths glabrous, forming clumps, leaf blades erect or curving, rhizomes or stolons absent, spikelets appressed with 1 bisexual and 1 sterile floret, glumes subequal, lowest lemmas 3-awned, on dry slopes, see *The Southwestern Naturalist* 7(3-4): 176-181, f. 1-10. 1962

in English: Warnock's grama

B. williamsii Swallen (dedicated to the American botanist Louis Otho (Otto) Williams, 1908-1991, traveler, orchidologist, botanical collector in Brazil, Honduras, Costa Rica, Guatemala and United States of America, his works include *Orchid studies*. Harvard University [1937-1947], with P.H. Allen wrote "Orchids of Panama." *Monogr. Syst. Bot. Missouri Botanical Garden*. vol. 4. 1980. See J.H. Barnhart, *Biographical notes upon botanists*. 3: 499. 1965; T.W. Bosser, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 437. 1972; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. 805-806. Bot.* 1: 131. 1934; *Phytologia* 2: 234. 1947; *Phytologia* 24: 85-86, 90. 1972; *Fieldiana, Bot.* 34: 101. 1972; *Wrightia* 5: 70. 1974; *Phytologia* 31: 443. 1975; *Wrightia* 7: 23. 1981; *Mem. New York Bot. Gard.* 35: 713.

1982; *Wrightia* 7: 272. 1984; *Brittonia* 37: 290. 1985; *Ann. Missouri Bot. Gard.* 74: 919. 1987; *Taxon* 42: 930. 1993)

Mexico, Honduras. Erect, delicate, leaves mostly basal, leaf blades glabrous to hirsute, lower spikelets perfect, glumes acuminate, good to excellent forage, grows in dry rocky sites, hillsides, see *Ceiba* 4(5): 285. 1955.

in Mexico: navajita

Brachatera Desv. = *Danthonia* DC.,
Sieglingia Bernh.

From the Greek *brachys* "short" and *ather* "barb, spine, chaff, prickle, awn."

Danthonioideae, Danthonieae, see *Syst. Verz.* 20, 44. 1800, *Flore Française. Troisième Édition* 3: 32. 1805, *Nouveau Bulletin des Sciences, publié par la Société Philomatique de Paris* 2: 189. 1810, *Systema Vegetabilium* 2: 690. 1817 and *Contributions from the United States National Herbarium* 46: 170-177. 2003.

Brachiaria (Trin.) Griseb. = *Leucophrys*
Rendle, Pseudobrachiaria Launert

Latin *brachium*, *ii* (*bracchium*) "the arm, the forearm," referring to the shape of the grass or to the racemes, armlike; Greek *brachion*; see Carl Friedrich (Carolus Fridericus) von Ledebour (1785-1851), *Flora rossica*. 4: 469. Stuttgartiae 1853.

About (1-3-)(50-)90/100 species warm areas and tropics, mainly Old World. Panicoideae, Panicodae, Paniceae, or Panicoideae, Paniceae, Melinidinae, or Panicoideae, Paniceae, Setariinae, mostly annual or sometimes perennial, variable, herbaceous, caespitose, creeping, sprawling, sometimes stoloniferous or rhizomatous, hollow internodes, auricles absent, ligule fringed to ciliate, sheaths open, leaves linear to lanceolate, plants bisexual, inflorescence of compound spike-like racemes along a central axis with filiform rachis, ovate or oblong spikelets, spikelets pedicellate and solitary or in pairs, florets 2, upper floret bisexual, lower floret sterile or male, 2 glumes very unequal, lower glume a small scale and much smaller than the second, lower lemma and upper glume equal and similar, upper lemma acute and coriaceous or hardened when ripe, palea present, 2 cuneate lodicules free and fleshy, 3 stamens, ovary glabrous without the apical appendage, anthers brown or yellowish brown, 2 plumose stigmas, fruit small and compressed, weed species, lawn grass, cultivated fodder, native pasture species, grain crop species, in shade or open habitats, rainforest, swamps, semidesertic habitats and disturbed ground, serious taxonomic problems and relationships between *Brachiaria*, *Panicum* and *Urochloa*, particularly difficult to separate from *Panicum* L. and from

a number of other genera, *Brachiaria* has been nearly completely reduced to *Urochloa* P. Beauv., see also *Panicum* L. and *Urochloa* P. Beauv., type *Brachiaria holosericea* (R. Br.) Hughes, see *Species Plantarum* 1: 55. 1753, *Flora Graeca* 1(2): 44, t. 59. 1808, *De Graminibus Paniceis* 51, 125, 266. 1826, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 3: 233. 1834, C.F. von Ledebour, *Flora Rossica sive enumeratio plantarum in totius imperii Rossici provinciis Europaeis, Asiaticis et Americanis hucusque observatarum*. 4: 469. Species

B. spp.

in Niger: akasufe, garabo, garaji, garza, garzahi, gmero sunsaye, ishibaen, ishiban, ngarwo, ngono, sabéri, sung suns

B. ambigens Chiov.

Ethiopia. Perennial, densely tufted, leaf blades linear and pubescent, racemes ascending, spikelets borne singly in 2 rows, upper glume pubescent, upper lemma rugose, lower lemma fringed, see *Webbia* 8: 62. 1951.

B. annulatum (Forssk.) Stapf

U.S.

in English: ringed signal grass

B. argentea (R. Br.) Hughes (*Panicum argenteum* R. Br.; *Urochloa argentea* (R. Br.) Hughes)

Australia, Northern Territory. See *Prodromus Florae Novae Hollandiae* 190. 1810 and *Bulletin of Miscellaneous Information Kew* 1923: 315. 1923.

in English: silver panic

B. arida (Mez) Stapf (*Panicum aridum* Mez)

Somalia, Socotra. Perennial, erect or sprawling, shortly rhizomatous, tufted, leaves linear, paired spikelets elliptic and acute, stipe present, glumes separated by a short internode, lower glume clasping, upper lemma rugose, see *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 34(1): 139. 1904, *Flora of Tropical Africa* 9: 540. 1919.

B. arrecta (Hack. ex T. Durand & Schinz) Stent (*Brachiaria arrecta* (T. Durand & Schinz) Stent; *Brachiaria latifolia* Stapf; *Brachiaria radicans* Napper; *Panicum arrectum* Hack. ex T. Durand & Schinz; *Panicum multifolium* Peter; *Urochloa arrecta* (Hack. ex T. Durand & Schinz) Morrone & Zuloaga)

Tropical Africa, Mozambique. Perennial, wiry, sprawling, straggling, rambling, prostrate, decumbent, geniculate, ascending, slender, stoloniferous, rooting at the lower nodes, succulent, leaf blades narrowly lanceolate, racemes unbranched, spikelets solitary in 2 rows, wavy rachis, readily grazed by cattle, pasture grass naturalized elsewhere in tropics, it does not tolerate drought, found in marshy areas, along lake and stream margins, humid tropics, swampy and seasonally flooded grassland, see *Conspectus Florae Africae* 5: 741. 1894 and *Flora of Tropical Africa* 9: 526. 1919, *Bothalia* 1: 263. 1924, *Abhandlungen der Königlichen Gesellschaft der Wissenschaften zu Göttingen* N.F. 13(2): 44. 1928, *Bulletin de la Société Botanique de France* 101: 395. 1954, *Kirkia* 3: 125. 1963, *Darwiniana* 31(1-4): 69. 1992.

in English: Tanner grass, Joe Tanner's grass

in Mali: kussein

in Nigeria: ladikoro

in Yoruba: ladikoro

B. bovonei (Chiov.) Robyns (*Brachiaria hians* Stapf; *Brachiaria viridula* Stapf; *Panicum bovonei* Chiov.)

Tropical Africa, South Africa, Zaire. Perennial, densely tufted, spikelets in two rows, usually in damp areas, marshy places, deciduous bushland, sandy soils, dams, streams, mountain slopes, see *Annali di Botanica* 13: 43. 1914, *Flora of Tropical Africa* 9: 514-515. 1919, *Bulletin du Jardin Botanique de l'État* 9(3): 174. 1932.

in English: wiry signal grass

B. breviglumis Clayton

Africa, Kenya, Ethiopia. Annual, ascending, slender, loosely tufted, leaf blades narrowly lanceolate, silvery inflorescence, erect racemes appressed, spikelets elliptic and silky-villous, upper floret rugulose, lower glume round, upper lemma granulose, on silty soils, shrubland, see *Kew Bulletin* 34(3): 557-558. 1979.

B. brizantha (A. Rich.) Stapf (*Brachiaria brizantha* (Hochst. ex A. Rich.) Stapf; *Brachiaria brizantha* (Hochst.) Stapf; *Brachiaria brizantha* var. *angustifolia* Stent & Rat-tray; *Panicum brizanthum* Hochst. ex A. Rich.; *Panicum brizanthum* var. *lasiochloa* Chiov.; *Panicum brizanthum* var. *latifolium* Oliv.; *Panicum brizanthum* var. *pandanifolium* Peter; *Panicum brizanthum* var. *polystachyum* De Wild. & T. Durand; *Urochloa brizantha* (Hochst. ex A. Rich.) R.D. Webster)

Tropical and South Africa. Perennial, stout, robust, tufted, shortly rhizomatous, prostrate to rather erect, usually unbranched, leaf blades boat-shaped at the base, ligule a fringe of short white hairs, basal leaf sheaths open and keel-shaped, leaf margins thickened and wavy, spike-like racemes arranged along an axis, spikelets in a single row on the rachis and the rachis never branching, upper floret not beaked, upper glume acute, grains eaten by people, palatable with high nutritive value, good hay, cultivated, fodder, high grazing value, grains and young leaves eaten by baboons and chimpanzees, weed of crops, sandy and acid soils, grassy fields borders, montane grassland, high rainfall areas, humid and subhumid tropics, it does not tolerate poorly drained soils, intergrades with *Brachiaria decumbens* Stapf, cultivar *Marandú* is spittlebug-resistant, see *Tentamen Florae Abyssinicae* ... 2: 363. 1850, *Transactions of the Linnean Society of London* 29: 170. 1875 and *Plantae Thonnerianae congolenses*; ou, *Énumération des plantes récoltées en 1896 par M. Fr. Thonner dans le district des Bangalas, par É. De Wildeman ... et Th. Durand ... Avec une introduction de M. Fr. Thonner. in Colombia: bracherón

in Mexico: señal

in Thailand: ya siknaentontang

B. chusqueoides (Hack.) Clayton (*Panicum chusqueoides* Hack.)

Tropical Africa, Yemen, South Africa, Natal. Annual or perennial, scandent or creeping, branched, trailing, slender, wiry, delicate, brittle, tufted, knotty base, rhizomatous, leaf blades pseudopetiolate at the base, leaves narrowly lanceolate, racemes lax and spaced, solitary or paired spikelets elliptic with a short basal stipe, pedicels unequal, glumes separated by a short internode, lower glume clasping, upper lemma rugose and coriaceous, found in open habitats, coastal bushland, dense scrub, bushland, deep sand, coastal dune forest, wet ground, see *Bulletin de l'Herbier Boissier* 3(8): 377. 1895 and *Kew Bulletin* 34(3): 558. 1979 [1980], *Annals of the Missouri Botanical Garden* 75: 866-873. 1988.

in West Africa: saba kunku, omafé

B. decumbens Stapf (*Brachiaria bequaertii* Robyns; *Brachiaria brizantha* sensu Senaradna; *Brachiaria eminii* (Mez) Robyns; *Panicum eminii* Mez; *Urochloa decumbens* (Stapf) R.D. Webster; *Urochloa eminii* (Mez) Davidse)

Tropical Africa. Perennial, decumbent, low-growing, prostrate to ascending, rhizomatous and stoloniferous, forming a dense cover, spikelets hairy membranous on a flattened rachis, lower floret staminate, glumes and lower lemma sparsely pubescent, upper glume membranous, lower glume clasping, widely cultivated, suitable for erosion control, forage, palatable to ruminants, ground cover, grazed, withstands dry seasons and heavy grazing, does not tolerate flooding, moderately shade tolerant, adapted to humid and subhumid tropics, tolerant of low soil-fertility, intergrades with *Brachiaria brizantha* (A. Rich.) Stapf, causes photosensitisation in sheep, see *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 34(1): 135. 1904, *Fl. Trop. Launert; *Urochloa deflexa* (Schumach.) H. Scholz)

Arabia to Pakistan, Senegal to Yemen. Annual, slender, solitary or tufted to loosely tufted, erect or weakly ascending, sheaths rounded, ligule a ring of short hairs, open inflorescence paniculate with distant spikelets, spikelets solitary or paired or in small clusters arranged along the primary branches, 2-flowered, secondary branchlets present, upper floret bisexual, lower floret reduced to lemma and palea, 2 glumes, upper glume and lower lemma cartilaginous, upper

lemma rugose, 3 stamens, stigmas red, cultivated as a cereal, edible grains, forage, grains and young leaves eaten by baboons and chimpanzees, drought-resistant, found in alluvial plains, weedy areas, disturbed land, often in shade, dampish places, arable land, margins of riverine forests, along roadsides, cultivated fields, dry regions, stony hillsides, woodland, open bushland, deciduous bush, closely related to *Brachiaria ramosa* (L.) Stapf, see *Species Plantarum* 1: 55. 1753, *Mantissa Plantarum* 1: 29-30. 1767, *Essai d'une Nouvelle Agrostographie* 52, 53, t. 11, f. 1. 1812, *De Graminibus Paniceis* 51, 125, 144, 266. 1826, *Beskrivelse af Guineiske planter* 63-64. 1827, *Kongel. Schum. ex Engl.; *Panicum dictyoneurum* Fig. & De Not.; *Panicum humidicola* Rendle; *Urochloa dictyoneura* (Fig. & De Not.) Veldkamp; *Urochloa humidicola* (Rendle) Morrone & Zuloaga)

East Africa, Sudan. Perennial, tufted, ascending, coarse, leaf blades linear, silky spikelets borne singly in 2 rows, in bushland, open woodland, see *Memorie della Reale Accademia delle Scienze di Torino, ser. 2* 14: 329, t. 8. 1854, *Die Pflanzenwelt Ost-Afrikas* 5(C): 101. 1895, *Catalogue of the African Plants Collected by Dr. F. Welwitsch in 1853-61* 2(1): 169. 1899 and *Flora of Tropical Africa* 9: 511-512. 1919, *Bulletin of Miscellaneous Information Kew* 1936(5): 297. 1936, *Blumea* 3(3): 432. 1940, *Darwiniana* 31(1-4): 80. 1992, *Blumea* 41(2): 418. 1996, *Fontqueria* 55(4): 16. 2001.

B. distachya (L.) Stapf (*Brachiaria subquadrifera* (Trin.) Hitchc.; *Digitaria distachya* (L.) Pers.; *Panicum distachyon* L.; *Panicum subquadrifera* Trin.; *Urochloa distachya* (L.) T.Q. Nguyen)

East Africa, tropical Asia, Sri Lanka. Perennial or annual, erect, creeping, ascending from a prostrate base, rooting at the nodes, stoloniferous, sheaths rounded, spikelets solitary 2-rowed, lower floret sterile, lower glume clasping, upper lemma rugulose, fodder grass good for cattle, high palatability, freely grazed, does not tolerate waterlogging, tolerant of light shade and poor soils, useful as a soil-binder, found along roadsides and forest edges, lowlands, waste places, old plantations, secondary vegetation, beaches, sand dunes and coastal sand dunes, orchards, tidal flats, resembling *Brachiaria subquadrifera* (Trin.) Hitchc., see *Mant. Pl. Altera* 183-184. 1771, *Syn. Pl.* 1: 85. 1805, *De Graminibus Paniceis* 145. 1826 and *Flora Trop. Africa* 9: 565. 1919, *Flore Générale de l'Indo-Chine* 7: 437. 1922, *Handb. in Vietnam: co'mât

B. dura Stapf

Tropical Africa, Central Eastern Africa, Zambia. Perennial, simple, caespitose to compactly caespitose, smooth, wiry, slender, erect, more or less geniculate and branched, shortly rhizomatous with rhizomes oblique, masses of root hairs, intravaginal innovations, leaf sheaths hard and hairy, ligule a ciliolate rim, leaf sheath terete, blades narrowly linear, spikelets glabrous and in one or two rows, grains eaten by local people, drought-resistant, very high palatability, forage, heavily grazed, on sandy soils of low fertility, coarse sandy soils, floodplains, dunes, along dry rivers, in shade, see *Flora of Tropical Africa* 9: 531. 1919.

in English: signal grass

B. dura Stapf var. *pilosa* J.G. Anderson

South Africa, Cape Province. Perennial, rare, rhizomatous, leaves wiry, spikelets pilose and in one or two rows, common on sand dunes.

B. echinulata (Mez) Parodi (*Panicum adpersum* Trin.; *Panicum adpersum* var. *exile* Lindm.; *Panicum adpersum*

var. *neesi* Lindm.; *Panicum echinulatum* Mez; *Panicum echinulatum* var. *boliviense* Henrard; *Panicum keyense* Mez; *Panicum thomasianum* Steud. ex Döll)

Southern America, Argentina, Bolivia, Brazil. Annual, herbaceous, erect, decumbent and rooting, leaning, upper floret ovate, glumes and lower lemma hirsute, weed in cultivated fields, growing on sandy soils, deciduous and semideciduous forests, near water, see *De Graminibus Paniceis* 146. 1826, *Flora Brasiliensis* 2(2): 188. 1877 and *Kongliga Svenska Vetenskapsakademiens Handlingar* 34(6): 8, t. 3. 1900, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 7: 61-62. 1917, *Mededeelingen van's Rijks-Herbarium* 40: 50. 1921, *Darwiniana* 15: 94, 96. 1969, *Proceedings of the Royal Society of Queensland* 81: 4. 1969, *Systematic Botany* 13(4): 607. 1988.

Rich.; *Panicum wightii* Nees; *Urochloa eruciformis* (Sm.) C. Nelson & Fern. Casas) (Latin *eruca*, *ae*, ancient name for a caterpillar and for *Brassica eruca* L., see Plinius, L. Junius Moderatus Columella, Q. Horatius Flaccus, M. Valerius Martialis)

India, Sri Lanka, Mediterranean region, Pakistan, Kenya, Namibia, Swaziland, Sudan, Egypt, Tanzania, Uganda, South Africa. Annual, stoloniferous, loosely tufted, slender, fine, delicate, soft, spreading, creeping, geniculately ascending, prostrate or decumbent at the base and often rooting at the lower nodes, rounded sheaths glabrous to pubescent with short hairs, minute ligule membranous, leaves linear to narrowly lanceolate, several racemes on a common axis, spikelets solitary and pedicellate arranged in two rows on the rachis, lower floret sterile, upper floret shiny and smooth, lower glume encircling the base of the spikelet, upper glume and lower lemma pubescent, lower lemma 2-keeled, valuable pioneer grass, naturalized, found to increase the milk yield, animal food, forage, palatable or relatively palatable, low grazing value, best time to feed in the flowering stage, invasive weed species, one of the worst weeds of cropping, weed in cotton fields, an indicator of poorly drained soil, a common weed in irrigation fields and gardens, grows on disturbed ground and moist sites, black clays, black turf, weedy embankments, cultivated fields and wasteland, alluvial plains, damp disturbed places, gardens, on heavy clay or loam soils, along roadsides, trampled clay soil, overgrazed vleis, in wet sandy soil and on termite

mounds, see *Fl. Graeca* 1(2): 44, t. 59. 1806, *Syst. Veg.* 2: 426, 458. 1817, *Systema Vegetabilium* 2: 458. 1819, *Species Graminum* 3: t. 262. 1829-1830, *Flora Germanica Excursionaria* 3: 45. 1833, *Hortus Mauritianus* 364. 1837, *Flora Africæ Australioris Illustrationes Monographicae* 29. 1841, *Linnaea* 21(4): 437. 1848, *Tentamen Floræ Abyssinicae ...* 2: 363. 1850, *Enum. in Sudan: um sileika

B. glomerata (Hack.) A. Camus (*Leucophrys glomerata* Stapf; *Panicum glomeratum* Hack. ex Schinz)

South Africa. Annual, tufted, velvety and soft, erect or geniculate, decumbent, branched from nodes, sometimes rooting at the lower nodes, ligule a fringe of short hairs, leaf sheaths hairy and rounded, leaf blade expanded, leaf margins sometimes wavy, inflorescence a panicle, spikelets densely clustered, rachilla extension short, palatable, usually on red sand dunes, sandy patches, see *Verhandlungen des Botanischen Vereins für die Provinz Brandenburg und die angrenzenden Länder* 30: 141. 1888 and *Flora of Tropical Africa* 9: 504. 1919, *Bulletin de la Société Botanique de France* 77: 640. 1930.

in English: annual sweet grass

in Southern Africa: eenjarige soetgras, knäuelarmgras

B. grossa Stapf (*Brachiaria grossaria* Griseb. ex E. Fourn.; *Panicum nudiglume* var. *major* Rendle)

Tropical Africa. Annual, tufted, leaf blades rounded at the base, inflorescence ovate, spikelets spaced, upper lemma rugose, pasture species, weed, found on rocky mountain slopes, see *Flora* 27: 253. 1844, *Mexicanas Plantas* 2: 15. 1886, *Catalogue of the African Plants Collected by Dr. F. Welwitsch in 1853-61* 2: 170. 1899 and *Flora of Tropical Africa* 9: 547. 1919.

B. humidicola (Rendle) Schweick. (*Brachiaria dictyoneura* (Fig. & De Not.) Stapf; *Brachiaria dictyoneura* subsp. *humidicola* (Rendle) Catasús; *Brachiaria rautanenii* (Hack.) Veldkamp; *Urochloa humidicola* (Rendle) Morrone & Zuloaga)

Sudan, Kenya, Tanzania. Perennial, strongly stoloniferous, procumbent, slender, geniculate and rooting at the nodes, leaf blades broadly linear, leaf sheaths villous, silky inflorescence, spikelets in two rows, upper lemma shiny, ground cover, pasture grass, forage, palatable, grazed, high-yielding grass, useful for erosion control, can withstand very heavy grazing, tolerates shade and poor drainage, found in swampy sites, damp grassland, can be confused with *Brachiaria dictyoneura* (Fig. & De Not.) Stapf, see *Memorie della Reale Accademia delle Scienze di Torino, ser. 2* 14: 329, t. 8. 1854, *Catalogue of the African Plants Collected by Dr. F. Welwitsch in 1853-61* 2(1): 169. 1899 and *Bulletin de l'Herbier Boissier, sér. 2*, 2: 935. 1902, *Annali di Botanica* 13: 43. 1914, *Flora of Tropical Africa* 9(2): 512-513. 1919, *Repertorium Specierum Novarum Regni Vegetabilis* 40: 167, 173 & Anhang, 22, t. 10, f. 2. 1930, *Kew Bulletin* 1936: 297. 1936 [or *Bulletin of Miscellaneous Information Kew* 1936(5): 297. 1936], *Darwiniana* 31(1-4): 80. 1992, *Blumea* 41(2): 418. 1996, *Fontqueria* 55(4): 16. 2001.

in English: koronivia grass

in West Africa: inte-rere, interere

in Thailand: ya humidicola

B. jubata (Fig. & De Not.) Stapf (*Brachiaria bomaensis* Vanderyst; *Brachiaria brevis* Stapf; *Brachiaria fulva* Stapf; *Brachiaria soluta* Stapf; *Panicum jubatum* Fig. & De Not.; *Urochloa jubata* (Fig. & De Not.) Sosef)

Tropical Africa. Perennial, tufted, slender, decumbent, fibrous roots, leaf blades linear, racemes rachis winged and ribbon-like, spikelets singly in two rows, good pasture, edible grain, useful for erosion control, growing in alluvium, in seasonally waterlogged places, shallow soils, grassland, bottomland, swamp margins, scrubland, damp places, see *Memorie della Reale Accademia delle Scienze di Torino, ser. 2* 14: 331, f. 9. 1854 and *Flora of Tropical Africa* 9: 518-519, 563. 1919, *Bulletin agricole du Congo Belge* 16: 654, 665. 1925, *Flore du Gabon* 5 bis (Gramineae, Supplément): 64. Paris 1999.

B. lata (Schumach.) C.E. Hubb. subsp. *caboverdiana* Conert & C. Kohler

Capo Verde Islands. See *Senckenbergiana Biologica* 64(4-6): 432. 1987.

B. latifolia Stapf (*Brachiaria arrecta* (Hack. ex T. Durand & Schinz) Stent; *Panicum arrectum* Hack. ex T. Durand & Schinz)

Tropical Africa, Mozambique. Perennial, wiry, decumbent, slender, succulent, rambling, rooting at the lower nodes, pasture grass, in marshy areas, see *Conspectus Florae Africae* 5: 741. 1894 and *Flora of Tropical Africa* 9: 526. 1919, *Bothalia* 1: 263. 1924.

B. leersioides (Hochst.) Stapf (*Brachiaria distichophylla* sensu Cufodontis, non (Trin.) Stapf; *Brachiaria villosa* (Lam.) A. Camus; *Panicum leersioides* Hochst.)

East Africa, Mozambique. Annual, ascending, tufted, glaucous, slender, branched, leaf blades linear, slender racemes spreading or deflexing, spikelets paired and elliptic without a stipe, glumes separated by an internode, lower glume clasping, upper glume and lower lemma membranous, upper lemma rugose and acute, found in sandy areas, semi-arid regions, in light shade, dry bushland, woodland, shallow stony soils, red sand, open scrub, in coarse sand, often waxy deposits in the inflorescence, see *Flora* 38: 196. 1855 and *Flora of Tropical Africa* 9: 551. 1919, *F.T.E.A., Gramineae*: 591. 1982.

in English: blue signal grass

B. leucacrantha (Schum.) Stapf (*Panicum leucacranthum* Schum.)

Tanzania, Zaire, Mozambique, Uganda. Annual, loosely tufted, prostrate, decumbent, rooting from the nodes, leaves velvety, leaf blades linear to narrowly lanceolate, single spikelets pubescent and pilose with a stipe, upper lemma papillose and acute, on deciduous bushland, sandy soil, disturbed places, see *Die Pflanzenwelt Ost-Afrikas* C: 102. 1895, *Catalogue of the African Plants Collected by Dr. F. Welwitsch in 1853-61* 2: 170. 1899 and *Flora of Tropical Africa* 9: 540. 1919.

B. longiflora W.D. Clayton

Africa, Kenya, Ethiopia. Perennial, stiff, wiry, slender, straggling, tufted, woody to knotty rootstock, leaves

narrowly lanceolate, paired spikelets narrowly elliptic and pubescent, stipe present, glumes separated by a short internode, lower glume clasping, upper glume and lower lemma papery, upper lemma smooth, on stabilized dunes, open areas, open bushland, see *Kew Bulletin* 34(3): 558. 1980 [1979].

B. lorentziana (Mez) Parodi (*Brachiaria platyphylla* (Munro ex C. Wright) Nash; *Panicum lorentzianum* Mez; *Panicum velutinsum* f. *violascens* Stuck.; *Panicum velutinsum* f. *viride* Stuck.; *Urochloa lorentziana* (Mez) Morrone & Zuloaga)

Northern Argentina. Glumes and lower lemma glabrous, upper floret subglobose, herbaceous, weed, in seasonal forest, see *Anales de la Academia de Ciencias Medicas* ... 8: 206. 1871 and *Flora of the Southeastern United States* ... 81: 1327. 1903, *Anales Museo Nacional de Historia Natural de Buenos Aires* 11: 75. 1904, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 56(Beibl. 125): 1. 1921, *Darwiniana* 15(1-2): 99. 1969, *Darwiniana* 31(1-4): 82. 1992.

B. malacodes (Mez & K. Schum.) H. Scholz (*Brachiaria poaeoides* Stapf; *Moorochloa malacodes* (Mez & K. Schum.) Veldkamp; *Panicum malacodes* Mez & K. Schum.)

South Africa. Annual, soft, loosely to very loosely tufted, straggling, branched, erect or geniculate, often decumbent and rooting at the lower nodes, leaf sheath hairy and rounded, ligule a fringe of hairs, leaf margins sometimes wavy and spinous, panicle compound with filiform branches, 1-sided spike-like racemes, spikelets pilose arranged in two rows, pioneer grass, relatively palatable, pasture, often in seasonally moist depressions, partial shade, under bushes and trees, disturbed land, see *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 7: 70. 1917, *Flora of Tropical Africa* 9: 554. 1919, *Willdenowia* 8(2): 384. 1978, *Reinwardtia* 12(2): 139. 2004.

in Southern Africa: pluimarmgras, rispen armgras

B. marlothii (Hack.) Stent (*Panicum marlothii* Hack.) (after the South African botanist Hermann Wilhelm Rudolf Marloth, 1855-1931, pharmacist, chemist, botanical explorer, plant collector, from 1833 in South Africa, he is best known for "The historical development of the geographical botany of South Africa." *S. Afr. J. Sci.* 1: 251-257. 1903, "Notes on the vegetation of Southern Rhodesia." *S. Afr. J. Sci.* 2: 300-307. 1904, *The Chemistry of South African Plants and Plant Products*. Cape Town 1913, *The Flora of South Africa*. Capetown and London 1913-1932, *Dictionary of the Common Names of Plants with a List of Foreign Plants Cultivated in the Open*. Cape Town 1917, *Cape Flowers at Home*. Cape Town [1922]. See J.H. Barnhart, *Biographical notes upon botanists*. 2: 449. 1965; R. Zander, F. Encke, G. Buchheim and S. Strawberry Press, Mill Valley, California 1997)

Southern Africa, Namibia. Annual or weak perennial, variable, creeping growth form, profusely branched, erect or geniculate, with stolons, decumbent and rooting from the lower nodes, leaf sheaths hairy or glabrous, ligule a ring of short hairs, leaf blades expanded, inflorescences of racemes arranged irregularly on the primary axis, spikelets 2-flowered, spikelets unilateral and arranged in four rows, hardy pioneer grass, palatable, suitable pasture for sheep, weed, useful grass for disturbed soils, occurs in overgrazed veld or disturbed places such as roadsides, gardens, lawns and cultivated lands, in shallow sandy to loamy soils, heavily grazed areas, see *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 11: 398. 1889 and *Bothalia* 1: 263. 1924.

in English: small signal grass, creeping grass

in Southern Africa: kleinsinjaalgras, kruipgras, wortelklitsgras; phetola (Sotho)

B. meziana Hitchc. (*Urochloa meziana* (Hitchc.) Morrone & Zuloaga)

North America, Mexico. See *Contributions from the United States National Herbarium* 12(3): 140. 1908, *Darwiniana* 32(1-4): 68. 1993.

in Mexico: almejita lisa

B. miliiformis (Presl & C. Presl) A. Chase (*Brachiaria miliiformis* (J. Presl) Chase; *Brachiaria subquadripara* var. *miliiformis* (J. Presl) S.L. Chen & Y.X. Jin; *Panicum miliiforme* J. Presl; *Urochloa distachya* (L.) T.Q. Nguyen; *Urochloa subquadripara* (Trin.) R.D. Webster)

Malaysia, Sri Lanka, Australia, Kimberley Region, India. Annual, fodder grass, grain, human food, water treatment, shade tolerant plant, closely related to *Brachiaria subquadripara* (Trin.) Hitchc., see *Reliquiae Haenkeanae* 1(4-5): 300. 1830 and *Contributions from the United States National Herbarium* 22(1): 35. 1920, *Lingnan Science Journal* 7: 214. 1929 [1931], *Novosti Sist. Vyss. Rast.* 1966: 13. 1966, *Acta Phytotaxonomica Sinica* 22(6): 472. 1984, *The Australian Paniceae (Poaceae)* 252. 1987.

in English: green summer grass, two-spiked panic, arm grass millet

B. mutica (Forssk.) Stapf (*Brachiaria numidiana* (Lam.) Henrard; *Brachiaria purpurascens* (Raddi) Henrard; *Panicum amphibium* Steud.; *Panicum barbinode* Trin.; *Panicum equinum* Salzm. ex Steud.; *Panicum molle* Sw.; *Panicum molle* sensu Trimen, non Swartz; *Panicum molle* Griseb., nom. illeg., non *Panicum molle* Sw.; *Panicum muticum* Forssk.; *Panicum numidianum* Lam.; *Panicum numidianum* J. Presl, nom. illeg., non *Panicum numidianum* Lam.; *Panicum numidianum* Sieber ex Schult., nom. illeg., non *Panicum numidianum* Lam.; *Panicum pictigluma* Steud.; *Panicum punctatum* Burm.f.; *Panicum punctulatum* Arn. ex Steud.; *Panicum purpurascens* Raddi; *Panicum sarmentosum* Benth.; *Paspalidium punctatum* (Burm.f.) Nguyen; *Urochloa mutica* (Forssk.) R.D. Webster ex Zon)

Tropics and subtropics. Perennial, long-lived, robust, coarse, densely hairy, long-decumbent, prostrate and ascending, shortly rhizomatous, stoloniferous, creeping, spreading, sprawling, trailing and intertwining, rooting at the lower joints, spikelets mostly paired in several rows and the rachis usually simple, lower floret staminate, good quality hay, forage grass of lowland pastures, grazed on pasture or cut, very competitive and vigorous, very troublesome weed in cultivated areas and in irrigation ditches, tolerates salinity, can survive severe drought, suitable for erosion control, sometimes attacked by a leafhopper, common in swampy places, poorly drained or periodically waterlogged areas, riverbanks, damp and wet regions, wastelands, along roadsides, wet pastures, margins of streams, marshes, close to *Brachiaria arrecta* (Th. Dur. & Schinz) Stent, see *Flora Indica ... nec non Prodrum Florae Capensis* 26. 1768, *Flora Aegyptiaco-Arabica* 20. 1775, *Nova Genera et Species Plantarum seu Prodrum* 22. 1788, *Tableau Encyclopédique et Méthodique ... in English: Para grass, tall panicum, California grass, buffalo grass, water grass, Mauritius grass, mountain grass

in French: herbe de Para, herbe de Guinée

in Arabic: feflik, aelaek, faelek, faeq, feleq

in Mexico: camalote, camelote, egipto, leh-toom, pará, paraná, pasto pará, piojillo para, quixi-coba, zacate camalote, zacate colorado, zacate egipto, zacate pará

in Nicaragua: sagádi pará

in Cambodia: smau kôô

in India: nardul

in Indonesia: jukut inggris, rumput malela, sukut kolonjono

in Malaysia: rumput melela, rumput para

in the Philippines: babaka-nalabaga, mara-kawayan

in Sri Lanka: tannipul, diya tana

in Thailand: yaa khon, ya khon

in Vietnam: co' lông tây

in Mali: konya, kussein

in Niger: burgu, shémé, talud, talul

in Nigeria: bauna, birbet, ladikoro, zarin bauna, zaza

B. nigropedata (Munro ex Ficalho & Hiern) Stapf (*Brachiaria melanotyla* (Hack.) Henrard; *Panicum melanotylum* Hack.; *Panicum nigropedatum* Munro ex Ficalho & Hiern)

Tropical Africa, South Africa, Swaziland, KwaZulu-Natal, Namibia. Perennial, loosely or densely tufted, leafy, unbranched culms, woolly nodes, creeping rhizomes, basal sheaths with velvety hairs, ligules a fringe of short hairs, long wiry leaves, racemes arranged singly on the primary axis, spikelets arranged in two rows, mature spikelets with dark stalks or a typical short black pedicel, tightly clasping lower glume acuminate to long-acuminate, upper glume and lower lemma acuminate, forage, palatable, animal food, very high grazing value, native pasture species, economic plant, useful for erosion control, indicator of veld in good condition, occurs in undisturbed veld, on red soil in relatively dry areas, on stony and rocky slopes and in sandveld, well-drained sandy and stony soils, sandy soils, lowveld, arid mountain bushveld, loamy to gravelly soil, disturbed vlei areas, see *Transactions of the Linnean Society of London, Botany* 2: 29. 1881, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 11: 398. 1889 and *Flora of Tropical Africa* 9: 535. 1919, *Blumea* 3(3): 436. 1940.

in English: spotted false paspalum, spotted signal grass, black-footed brachiaria, blackfoot signal grass, black-footed signal grass, sweet grass

in Southern Africa: haasgras, krulgras, soetgras, swartvoetjie, swartvoetjiegras, schwarzfüsschen, wurmpiesgras, wurmsinjaalgras; mlabie (Tswana); phetola (Sotho)

B. notochthona (Domin) Stapf (*Panicum helopus* sensu Benth., non Trin.; *Panicum notochthonum* Domin;

Urochloa gilesii subsp. *gilesii*; *Urochloa notochthona* (Domin) Hughes) (from the Greek *heleos*, *helos* “a marsh, wet, low ground, meadow” and *pous* “a foot;” Greek *notos* “back” and *chthon*, *chthonos* “the earth, ground”)

South Australia, Northern Territory, New South Wales, Queensland. Annual or perennial, erect, leaves lanceolate, racemes spreading-erect, spikelets in two rows along the rachis, grazed, see *Repertorium Specierum Novarum Regni Vegetabilis* 10: 60. 1911, *Flora of Tropical Africa* 9: 597. 1920, *Bulletin of Miscellaneous Information Kew* 1923(9): 319. 1923.

in English: naked arm grass

B. obtusiflora (Hochst.) Stapf (*Brachiaria obtusiflora* (Hochst. ex A. Rich.) Stapf; *Echinochloa obtusiflora* Stapf; *Echinochloa rotundiflora* Clayton; *Panicum obtusiflorum* Hochst. ex A. Rich.)

Tropical Africa, Sudan. Annual, culms erect or bent, racemes irregularly many-rowed, spikelets densely crowded and very swollen, fodder plant, ripe seeds edible, low rainfall savannah, semidesert, moist and cultivated habitats, see *Tentamen Florae Abyssinicae ...* 2: 367. 1850 and *Flora of Tropical Africa* 9: 533. 1919, *Flora of Tropical Africa* 9: 606. 1920, *Kew Bulletin* 34(3): 560. 1979 [1980].

in Sudan: um khirr

B. orthostachys (Mez) W.D. Clayton (*Brachiaria xantholeuca* (Hack.) Stapf, in part; *Brachiaria xantholeuca* (Hack. ex Schinz) Stapf; *Brachiaria xantholeuca* (Schinz) Stapf; *Panicum orthostachys* Mez)

Tropical Africa. Annual, glabrous spikelets, upper glume 7-nerved, grazed, found on sandy soils, poor areas, resembles *Brachiaria xantholeuca*, see *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 7: 66. 1917, *Kew Bulletin* 20: 265. 1966.

B. ovalis Stapf (*Brachiaria glauca* Stapf; *Brachiaria somalensis* C.E. Hubb.; *Panicum nudiglume* var. *major* Balf.f.; *Panicum ovale* R. Br.)

Sudan, Kenya, Pakistan, Arabia. Annual, tufted, densely pubescent, leaves linear to lanceolate, racemes appressed or spreading or widely diverging, spikelets loosely arranged, smooth and shiny spikelets single or in pairs, secondary branchlets absent, pedicels shorter than the spikelets, lower glume ovate, upper glume and lower lemma cartilaginous and glossy, upper lemma granulose, palatable, weedy, found in open woodland, dry stony hills, open *Acacia* scrub, open sandy areas, slopes and dry rocky slopes, plains grassland, semidesert scrubland, cultivated lands, alluvial soils, limestone hills, light shade, fixed or stabilized dunes, loose sandy soil, see Henry Salt (1780-1827), *A Voyage to Abyssinia, and Travels into the Interior of that Country ... in the years 1809 and 1810 ...* London 1814, *Flora* 27: 253. 1844, I.B. Balfour (1853-1922), *Botany of Socotra* 311. Edinburgh 1888 [*Trans. Roy. Soc. Edinb.* xxxi]

and *Flora of Tropical Africa* 9: 546, 550. 1919, *Kew Bulletin* 1941: 189. 1941.

B. paspaloides (Presl) C.E. Hubb. (*Panicum ambiguum* Trin.; *Panicum glumare* Trin.; *Panicum paspaloides* Pers.; *Urochloa ambigua* (Trin.) Pilg.; *Urochloa glumaris* (Trin.) Veldkamp; *Urochloa paspaloides* J. Presl)

Tropical Asia. Short-lived perennial, decumbent, slender, suberect, rooting at the lower nodes, leaves pubescent, sheath apex hairy, inflorescence rachis pubescent, spikelets apiculate and ovate, increases flow of milk, good fodder grass relished by cattle, hay, suitable for turfs, a weed of open places, growing in waste ground, low coastal forest, disturbed places, see *Syn. Pl.* 1: 81. 1805, *De Graminibus Paniceis* 143. 1826, *Reliquiae Haenkeanae* 1(4-5): 318. 1830, *Voyage Autour du Monde* 121. 1832, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 3,1(2-3): 243. 1834, *Nomenclator Botanicus. Editio secunda* 2: 264. 1841 and *Flore Générale de l'Indo-Chine* 7: 433. 1922, *Hooker's Icones Plantarum* 4: t. 3363. 1938, *Die natürlichen Pflanzenfamilien, Zweite Auflage* 14e: 35. 1940, *Blumea* 4(3): 503. 1941, *Blumea* 41(2): 420. 1996.

in English: crab grass

in India: chikhari, karkoljodi, takri, takria

B. paucispicata (Morong) Clayton (*Acroceras paucispicatum* (Morong) Henrard; *Panicum paucispicatum* Morong; *Urochloa paucispicata* (Morong) Morrone & Zuloaga)

Paraguay, Argentina, Gran Chaco. Perennial or annual, herbaceous, erect, decumbent, rooting at the lower nodes, upper floret beaked, in seasonally inundated swamps, seasonally humid savannahs, see *Annals of the New York Academy of Sciences* 7: 262. 1893 and *Blumea* 3(3): 449. 1940, *Kew Bulletin* 42(4): 401. 1987, *Darwiniana* 31(1-4): 95. 1992.

B. piligera (F. Muell. ex Benth.) Hughes (*Brachiaria piligera* var. *intercedens* (Domin) Hughes; *Panicum intercedens* Domin; *Panicum piligerum* F. Muell. ex Benth.; *Urochloa piligera* (F. Muell. ex Benth.) R.D. Webster)

South Australia, Northern Territory, New South Wales, Queensland, Western Australia. Annual or perennial, erect or ascending, glabrous, leafy, leaves linear-lanceolate, racemes spreading or reflexed, more or less hairy spikelets in two rows along the rachis, fodder, highly palatable especially when young, erosion control, natural host of sugarcane mosaic virus in Australia, see *Flora Australiensis: A Description ...* 7: 477. 1878 and *Journal of the Linnean Society, Botany* 41: 271. 1912, *Bulletin of Miscellaneous Information Kew* 1923(9): 315. 1923, *The Australian Paniceae (Poaceae)* 246. 1987.

in English: hairy arm grass, hairy signal grass, narrow leaf signal grass, signal grass

B. plantaginea (Link) Hitchc. (*Brachiaria extensa* Chase; *Brachiaria platyphylla* (Munro ex C. Wright) Nash; *Panicum disciferum* E. Fourn.; *Panicum distans* Salzm. ex Steud.; *Panicum plantagineum* Link; *Panicum platyphyllum* Munro ex C. Wright; *Paspalum platyphyllum* Schult.; *Paspalum platyphyllum* Griseb., nom. illeg., non *Paspalum platyphyllum* Schult.; *Urochloa discifera* (E. Fourn.) Morrone & Zuloaga; *Urochloa extensa* (Chase) C. Nelson & Fern. Casas; *Urochloa plantaginea* (Link) R.D. Webster; *Urochloa platyphylla* (Munro ex C. Wright) R.D. Webster; *Urochloa platyphylla* (Griseb.) R.D. Webster)

Mexico to Paraguay, west tropical Africa. Annual, decumbent, rooting at the nodes, spikelets in 1-2 rows on the rachis, glumes and lower lemma glabrous, weed, forage, cut as fodder for horses, found in disturbed places, gardens, see *Hortus Regius Botanicus Berolinensis* 1: 206. 1827, *Mantissa* 2: 557. 1827, *Synopsis Plantarum Glumacearum* 1: 61. 1853, *Catalogus plantarum cubensium* ... 230. 1866, *Anales de la Academia de Ciencias Medicas* ... 8: 206. 1871, *Mexicanas Plantas* 2: 19. 1886 and *Flora of the Southeastern United States* ... 81: 1327. 1903, *Contributions from the United States National Herbarium* 12(6): 212. 1909, *Contributions from the United States National Herbarium* 28: 240. 1929, *Systematic Botany* 13(4): 606-607. 1988, *Darwiniana* 32(1-4): 65. 1993, *Fontqueria* 51: 4. 1998.

in Ghana: gyemsa

B. psammophila (Welw. ex Rendle) Launert (*Leucophrys psammophila* (Welw. ex Rendle) Dandy; *Panicum psammophilum* Welw. ex Rendle; *Panicum psammophilum* Nash, nom. illeg., non *Panicum psammophilum* Welw. ex Rendle)

Africa, Angola. Annual, rare, tufted, erect or decumbent, densely yellow hairy, spikelets clustered and without the rachilla extension, found on sand dunes, dry river beds, see *Bulletin of the Torrey Botanical Club* 26(11): 576. 1899, *Catalogue of the African Plants Collected by Dr. F. Welwitsch in 1853-61* 2(1): 171. 1899 and *Journal of Botany, British and Foreign* 69(2): 54. 1931, *Mitteilungen der Botanischen Staatssammlung München* 8: 149. 1970.

B. pubescens (Chiov.) S.M. Phillips (*Brachiaria serrifolia* var. *pubescens* Chiov.)

Ethiopia. Short-lived perennial, stiff, slender, ascending, branched, villous nodes, loosely tufted, sometimes rooting at the lower nodes, leaf blades narrowly lanceolate and velvety, divergent racemes, spikelets narrowly ovate and shortly acuminate, upper lemma subacute and mucronate, in bushland, see *Flora of Tropical Africa* 9: 548. 1919, *Webbia* 8: 65. 1951, *Kew Bulletin* 46(3): 536. 1991.

B. ramosa (L.) Stapf (*Brachiaria regularis* (Nees) Stapf; *Brachiaria regularis* var. *nidulans* (Mez) Täckh. & G. Täckh.; *Echinochloa ramosa* (L.) Roberty; *Panicum arvense* Kunth; *Panicum brachylachnum* Steud.; *Panicum*

breviradiatum Hochst.; *Panicum canescens* Roth ex Roem. & Schult.; *Panicum cognatissimum* Steud.; *Panicum nidulans* Mez; *Panicum pallidum* Peter; *Panicum patens* Bojer, nom. illeg., non *Panicum patens* L.; *Panicum petiveri* var. *puberulum* Chiov.; *Panicum ramosum* L.; *Panicum sorghum* Delile ex Steud.; *Panicum supervacuum* C.B. Clarke; *Urochloa ramosa* (L.) R.D. Webster; *Urochloa ramosa* (L.) T.Q. Nguyen; *Urochloa supervacua* (C.B. Clarke) Noltie)

Tropics of Old World. Annual, variable, loosely tufted, branching, spreading, erect or geniculate, ascending, sometimes rooting at the lower nodes, sheaths keeled and ciliate, ligule more or less membranous, leaf blades velvety-pubescent, leaves linear, loose inflorescence paniculate with spike-like racemes erect to ascending, spikelets apiculate usually paired and pubescent, lower floret staminate or sterile, upper floret bisexual and rugose, upper lemma rugose and acute, grown as a cereal, edible grains used in preparing traditional foods, palatable, grazed, straw and grains readily eaten by baboons and cattle, bird feed, a weed of cultivation, growing on sand dunes, coastal dunes, sandy plains, rocky slopes, forest undergrowth, waste places, irrigated land, stony ground, field borders, along roadsides, open *Acacia* scrub, cottonfields, shallow soil, plantations, closely related to *Brachiaria deflexa* (Schumach.) C.E. Hubb. ex Robyns, can be confused with *Brachiaria villosa*, see *Mantissa* 29-30. 1767, *Systema Vegetabilium* 2: 457. 1817, *De Graminibus Paniceis* 144. 1826, *Révision des Graminées* 2: 391, t. 109. 1831, *Hortus Mauritianus* 365. 1837, *Synopsis Plantarum Glumacearum* 1: 58, 62, 69. 1854, *Flora* 38: 195. 1855, *Journal of the Linnean Society, Botany* 24(164): 407-408, f. A-E. 1888 and *Handb. Fl. Ceylon* 5: 140. 1900, *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 34(1): 136. 1904, *Annuario del Reale Istituto Botanico di Roma* 8(3): 302-303. 1908, *Fl. Trop. Africa* 9(3): 542-544. 1919, *Bulletin of Miscellaneous Information Kew* 1923(2): 315. 1923, *Abhandlungen der Königlichen Gesellschaft der Wissenschaften zu Göttingen* N, f. 13(2): 45. 1928, *Handb. Fl. Ceylon* 6: 319. 1931, *Bulletin of the Faculty of Science Egyptian University* 17: 432. 1941, *Petite Flore de l'Ouest-Africain* 398. 1954, *Bull. Inst. Franc. Afr. Noire, Sér. Ceylon* 6: 318. 1931, *Grasses of Ceylon* 145. 1956, *Grasses of Burma ...* 285. 1960, *Bulletin of the Botanical Survey of India* 35(1-4): 29. 1993.

in India: chapar, chaprur, chaprura

B. remota (Retz.) Haines var. *lanceolata* Davidse

Sri Lanka. Perennial, decumbent, erect, coastal, branched, rooting at the lower nodes, ligule ciliate, leaf blades lanceolate, spikelets often paired and densely arranged, lower floret staminate, on the beaches, dunes and beaches, rocky soils, see *Revised Handbook to the Flora of Ceylon* 8: 93. 1994.

B. remota (Retz.) Haines var. *remota*

Sri Lanka, India. Perennial, sprawling, rooting at the nodes, branched, ligule ciliate, leaf blades linear, spikelets usually solitary, lower floret sterile, on dunes, beaches, along roadsides.

B. reptans (L.) C.A. Gardner & C.E. Hubb. (*Brachiaria prostrata* (Lam.) Griseb.; *Echinochloa reptans* (L.) Roberty; *Panicum brachythyrsum* Peter; *Panicum procumbens* Lam. ex Nees; *Panicum prostratum* Lam.; *Panicum prostratum* var. *pilosum* Eggers; *Panicum reptans* L.; *Panicum reptans* (Lam.) Tropics. Annual or subperennial, tufted, running, usually prostrate or creeping, mat-forming, stoloniferous, at first decumbent and rooting at the nodes and finally ascending, nodes ciliate, sheath embracing the culm, ligule a minute fringed membrane, leaves cordate or ovate-lanceolate, 1-sided spike-like racemes ascending, racemes solitary, glabrous spikelets mostly paired and broadly elliptic, lower floret sterile or staminate, first glume very short, upper

lemma mucronate and rugose, grains eaten in times of scarcity, fodder, highly palatable especially when young, eaten by cattle and goats, common weed on the alluvial plains, waste places, irrigation ditches, sand bars, weedy areas, irrigated land, cultivated fields, clearings, sand dunes, along roadsides, see *Systema Naturae, Editio Decima* 2: 870. 1759, *Observationes Botanicae* 4: 16. 1786, *Tableau Encyclopédique et Méthodique ... Botanique* 1: 155, 171. 1791, *Flora Brasiliensis seu Enumeratio Plantarum* 2(1): 109. 1829, *Révision des Graminées* 2: 219, t. 21. 1830, *Abhandlungen der Königlichen Gesellschaft der Wissenschaften zu Göttingen* 7: 263. 1857, *Enum. in India: emme thappare hullu, sanna kaadu bili saame hullu, shani pullu

in Thailand: yaa phak kai, ya phak kai, yaa ton tit, ya ton tit

B. ruziziensis R. Germ. & C.M. Evrard (*Brachiaria decumbens* var. *ruziziensis* (R. Germ. & Evrard) Ndab.; *Urochloa ruziziensis* (R. Germ. & C.M. Evrard) Crins; *Urochloa ruziziensis* (R. Germ. & Evrard) Morrone & Zuloaga, nom. illeg., non *Urochloa ruziziensis* (R. Germ. & Evrard) Crins) (Ruzizi plains in Zaire)

Tropical Africa. Perennial, tufted, creeping, leafy and hairy, stoloniferous, shortly rhizomatous, spikelets in one or two rows, flattened and winged rachis, sexual reproduction, ground cover, aromatic, high nutritive value, palatable, forage grass, readily grazed, best on well-drained sites, closely related to *Brachiaria decumbens* Stapf, see *Flora of Tropical Africa* 9: 528. 1919, *Bulletin du Jardin Botanique de l'État* 23: 373, f. 36, 37. 1953, *Lejeunia* 132: 16. 1989, *Journal of the Arnold Arboretum, Supplementary Series* 1: 269. 1991, *Darwiniana* 31(1-4): 101. 1992.

in English: Congo grass, Congo signal grass, prostrate signal grass, ruzi grass, Kennedy ruzi grass, bongo grass

in Spanish: yerba congo

in Thailand: ya ruzi, ya susi

B. scalaris (Mez) Pilger (*Brachiaria heterocraspeda* (Peter) Pilg.; *Brachiaria pilgerana* H. Scholz; *Brachiaria scalaris* Pilg.; *Panicum heterocraspedum* Peter; *Panicum scalarum*

Schweinf.; *Panicum scalare* Mez, nom. illeg., non *Panicum scalarum* Schweinf.)

East Africa, Tanzania, Zimbabwe. Annual, straggling, erect, decumbent or ascending, leaf blades lanceolate, inflorescence pyramidal with divergent racemes, spikelets acute, secondary branchlets absent, upper lemma acute, closely related to *Brachiaria villosa* (Lam.) A. Camus, found in weedy places, along roadsides, see *Bulletin de l'Herbier Boissier* 2, App. 2: 20. 1894 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 34: 138. 1904, *Abhandlungen der Königlichen Gesellschaft der Wissenschaften zu Göttingen* 13(2): 45. 1928, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 10(93): 269. 1928, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 13: 263. 1936, *Willdenowia* 8(2): 385. 1978.

B. schoenfelderi C.E. Hubb. & Schweick. (*Moorochloa schoenfelderi* (C.E. Hubb. & Schweick.) Veldkamp) (named for E.B.W. Schoenfelder, in 1913 emigrated to Southwest Africa from Germany)

Namibia. Annual or perennial, straggling, open, erect or geniculate, branched or unbranched, tufted or stoloniferous, often decumbent and rooting at the nodes, leaf sheaths rounded, leaf blade expanded, ligule a fringe of short hairs, spike-like racemes, spikelets densely pilose arranged in two rows, pioneer grass, forming dense stands, soft and palatable, growing in damp places, vleis, closely related to *Brachiaria poaeoides* Stapf, see *Bulletin of Miscellaneous Information Kew* 1936(5): 323. 1936, *Reinwardtia* 12(2): 139. 2004.

in South Africa: Schoenfelder-se-armgras, Schoenfelders armgras

B. semiundulata (Hochst. ex A. Rich.) Stapf (*Brachiaria villosa* sensu Senaratna; *Panicum coccospermum* sensu Thw.; *Panicum nilagiricum* Steud.; *Panicum semiundulatum* Hochst. ex A. Rich.; *Panicum villosum* sensu Hook.f., nom. illeg., non *Panicum villosum* Lam.; *Panicum villosum* var. *erythraeum* Chiov.; *Urochloa semiundulata* (Hochst. ex A. Rich.) Ashalatha & V.J. Nair)

India, Sri Lanka, East Africa. Annual, slender, decumbent, straggling, loosely tufted, delicate, ascending, leaf blades lanceolate to ovate, sheaths villous, ligule with minute membrane, ascending racemes, overlapping spikelets solitary and strongly gibbous, upper lemma swollen and longer than the upper glume, lower floret sterile, weed species, growing in disturbed situations, grassland, arable fields, open areas, rocky slopes, bushland, see *Tableau Encyclopédique et Méthodique ... Botanique* 1: 173. 1791, *Tent. Fl. Abyss.* 2: 364. 1850, *Syn. Pl. Glumac.* 1: 62-63. 1854, *Enum. Pl. Zeyl.* 359. 1864, *A Systematic Catalogue of the Flowering Plants ... in Ceylon* 105. 1885, *The Flora of British India* 7(21): 34. 1897 [1896] and *Handb. Fl. Durand & Schinz; *Panicum serratum* var. *hirtum* Kuntze; *Panicum serratum* var. *holosericeum* Hack. ex T. Durand & Schinz; *Sorghum serratum* (Thunb.) Roem. & Schult.; *Tricholaena abbreviata* K. Schum. ex Engl.)

Tropical Africa, Benin, Namibia, Swaziland, South Africa, Malawi. Perennial, variable, slender, erect to decumbent, tufted to densely tufted, sometimes rhizomatous, culms grow upright with leaves alternate and horizontal, ligule a fringe of hairs, leaf sheath hairy to silky-tomentose and round, basal leaf sheaths clustered, pungent blades, leaf short with crinkled to serrate margins, tough rootstock, narrow inflorescence, unilateral velvety racemes arranged on a hairy primary axis, racemes erect and compact, spikelets densely hairy and thickened, lower glume subacute and villous, upper glume and lower lemma usually fringed and cartilaginous, mucronate lower lemma and palea, upper lemma coriaceous and acute with a cuspidate tip, native

pasture species, high grazing value, heavily grazed by stock, reasonably palatable, useful for erosion control, indicator of veld in a good condition, occurs in stony places in undisturbed veld, in heavily grazed veld, deciduous bushland, red soils, shallow sandy soils, woodland clearings, sandy and loam soil, sandveld and vlei areas, wooded grassland, vlei edges, highveld grassland, clay highveld grassland, upland grass savannah, open bushland on stony hillsides, open bushveld, see *Prodromus Plantarum Capensium*, ... 20. 1794, *Systema Vegetabilium* 2: 839. 1817, *Systema Vegetabilium, editio decima sexta* 1: 309. 1824, *Species Graminum* 2: t. 165. 1829, *The Botany of Captain Beechey's Voyage* 100. 1841, *Tentamen Florae Abyssinicae ... 2*: 366. 1850, *Transactions of the Linnean Society of London, Botany* 2: 29. 1881, *Conspectus Florae Africae* 5: 765. 1894, *Abhandlungen der Preussischen Akademie der Wissenschaften. Büse; *Panicum setigerum* Retz.; *Panicum setigerum* (Roth) Boerl.; *Panicum setigerum* P. Beauv., nom. illeg., non *Panicum setigerum* Retz.; *Panicum trichopodioides* Mez & Schum.; *Urochloa setigera* (Retz.) Stapf; *Urochloa trichopodioides* (Mez & Schum.) S.M. Phillips & S.L. Chen)

Tropical East Africa, India, Thailand. Perennial, trailing, leaf blades lanceolate, single or paired spikelets narrowly ovate, in forest, under tree shade, see *Observationes Botanicae* 4: 15. 1786, *Tableau Encyclopédique et Méthodique ... Botanique* 1: 171. 1791, *Essai d'une Nouvelle Agrostographie* 53, 161, 171. 1812, *Systema Vegetabilium* 2: 474. 1817, *Flora Brasiliensis seu Enumeratio Plantarum* 2(1): 109. 1829, *Plantae Junghuhnianae* 3: 372. 1854, *Annales*

du Jardin Botanique de Buitenzorg 8: 52. 1890, *Fl. Br. India* 7: 36. 1897 and *Handb. Fl. Ceylon* 5: 141. 1900, *Flora of Tropical Africa* 9(1): 15. 1917, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 7: 60. 1917, *Flora of Tropical Africa* 9(4): 598, 746. 1920, *Abhandlungen der Königlichen Gesellschaft der Wissenschaften zu Göttingen* N.F. 13(2): 45. 1928, *Hooker's Icones Plantarum* 34(3): t. 3363. 1938, *Grasses of Ceylon* 144. 1956, *Fl. Ind. Enumerat.-Monocot.* 273. 1989, *Novon* 13(4): 470. 2003.

B. soluta Stapf (*Brachiaria jubata* (Fig. & De Not.) Stapf; *Panicum jubatum* Fig. & De Not.)

Tropical Africa, Tanzania, Kenya. Perennial, loosely tufted, inflorescence of dense spike-like racemes, spikelets in two rows, very important for grazing, grassland, in seasonally waterlogged places, see *Memorie della Reale Accademia delle Scienze di Torino, ser. 2* 14: 331, f. 9. 1854 and *Flora of Tropical Africa* 9: 519, 563. 1919.

in East Africa: arombo, atoch-toch

B. stefaninii Chiov. (*Panicum stefaninii* Chiov.) (named for the Italian naturalist Giuseppe Stefanini, 1882-1938, traveler and collector in eastern Africa, Ethiopia and Somalia, author of *In Somalia. Note e impressioni di viaggio*. Firenze 1922; see J.H. Barnhart, *Biographical notes upon botanists*. 1: 342. 1965; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 73. 1972; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933; F.A. Stafleu & E.A. Mennega, *Taxonomic literature. Supplement IV*. 104-110. 1997; Gordon Douglas Rowley, *A History of Succulent Plants*. Mill Valley, California 1997)

Ethiopia. Perennial, glaucous, branched, erect, woody base, densely tufted, basal sheaths pubescent to velvety pubescent, rigid leaves linear to lanceolate and distichous, spikelets villous and acuminate with a short stipe, lower glume clasping, upper glume and lower lemma membranous, upper lemma acute, on sandy soils, plains, see *Plantae Novae vel Minus Notae ex Aethiopia* 23. 1928.

B. stigmatisata (Mez) Stapf (*Panicum stigmatisatum* Mez)

Tropical Africa. Annual, small, prostrate to semiprostrate, grain edible, turf forming, good fodder, in disturbed areas, see *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 34(1): 140. 1904, *Flora of Tropical Africa* 9: 520. 1919.

in Mali: dionguenianin tioke, donguenianin tioke, kamimbi, kononimbi, larba, lahrba, niarukeho

in Nigeria: aparum odan, takoure, takure

in Senegal: kamimbi

in Upper Volta: bassangui, kamimbi, kononimbi, kouloumogo, kulumogo, naganouoyo, naganuoyo, naumé

B. subquadripara (Trin.) A. Hitchc. (*Brachiaria distachya* (L.) Stapf; *Brachiaria miliiformis* (Presl & C. Presl) A.

Chase; *Panicum distachyum* sensu Thw.; *Panicum miliiforme* Presl; *Panicum miliiforme* Presl & C. Presl; *Panicum subquadruparum* Trin.; *Urochloa distachya* (L.) T.Q. Nguyen; *Urochloa subquadrupara* (Trin.) Webster)

Tropical and subtropical Asia, Sri Lanka, Pacific Islands. Perennial or annual, ascending, prostrate, decumbent, erect, creeping, slender, stoloniferous, rooting at the lower nodes, mat-forming, sheaths pubescent or glabrous, spaced racemes, spikelets solitary in two rows, peduncle glabrous or hairy, lower floret sterile, upper lemma rugulose, very palatable, grazed, forage for ruminants, shade tolerant, once established can withstand heavy grazing, moderately drought-tolerant, ground cover, grassy roadsides, open habitats, waste places, along stream banks, taxonomic situation not clear, closely related to *Brachiaria distachya* (L.) Stapf, confused with *Brachiaria miliiformis* (Presl & C. Presl) A. Chase, see *Mantissa Plantarum* 2: 183-184. 1771, *De Graminibus Paniceis* 145. 1826, *Reliquiae Haenkeanae* 1(4-5): 300. 1830 and *Flora of Tropical Africa* 9: 565. 1919, *Contributions from the United States National Herbarium* 22(1): 35. 1920, *Lingnan Sci. J.* 7: 214. 1931, *Grasses of Ceylon* 140. 1956, *Grasses of Burma ...* 286. 1960, *Novosti Sist. Vyss. Rast.* 1966: 13. 1966, *Proceedings of the Indian Science Congress Association* 70(3-vi): 94. 1983, *Acta Phytotaxonomica Sinica* 22(6): 472. 1984, *The Australian Paniceae (Poaceae)* 252. 1987.

in English: cori grass

B. subulifolia (Mez) Clayton (*Brachiaria filifolia* Stapf; *Panicum subulifolium* Mez)

South Africa. Perennial, rare, tufted, rhizomatous with oblique rhizomes, filiform leaves, spikelets arranged in two rows, lower glume 7-nerved, usually in damp areas, seepage, sandy soils, see *Flora of Tropical Africa* 9: 516. 1919, *Kew Bulletin* 34(3): 559. 1979 [1980], *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 34(1): 135. 1979 [1980].

B. villosa (Lam.) A. Camus (*Brachiaria coccosperma* (Steud.) Stapf ex Reeder; *Brachiaria distichophylla* (Trin.) Stapf; *Panicum coccospermum* Steud.; *Panicum despreauxii* Steud.; *Panicum distichophyllum* Trin.; *Panicum grossarium* Roxb.; *Panicum nanum* Nees ex Steud.; *Panicum pauperulum* Steud.; *Panicum serrulatum* Schumacher, nom. illeg., non *Panicum serrulatum* Roxb.; *Panicum villosum* Lam.; *Panicum viviparum* Schumacher.; *Urochloa villosa* (Lam.) T.Q. Nguyen)

Southeast Asia, Sudan. Sharply acute spikelets, lower glume acute, upper glume as long as the spikelet, on sandy soils, exposed areas, see *Tableau Encyclopédique et Méthodique ... Botanique* 1: 173. 1791, *Flora Indica; or Descriptions ...* 1: 300. 1820, *De Graminibus Paniceis* 147. 1826, *Beskrivelse af Guineiske planter* 62-63. 1827, *Kongel. Danske Vidensk. Selsk. Naturvidensk. Math. Afh.* 3: 82-83. 1828, *Synopsis Plantarum Glumacearum* 1: 58, 62. 1854 and

Flora of Tropical Africa 9: 557. 1919, *Flore Générale de l'Indo-Chine* 7: 433. 1922, *Journal of the Arnold Arboretum* 29: 273. 1948, *Novosti Sist. Vyss. Rast.* 1966: 13. 1966.

B. xantholeuca (Schinz) Stapf (*Brachiaria pubifolia* Stapf; *Brachiaria ukambensis* (Mez) Henrard; *Brachiaria xantholeuca* (Hack. ex Schinz) Stapf; *Panicum anisotrichum* Mez; *Panicum distichophylloides* Mez; *Panicum pubifolium* Nash; *Panicum pubifolium* Mez, nom. illeg., non *Panicum pubifolium* Nash; *Panicum xantholeucum* Hack. ex Schinz; *Urochloa xantholeuca* (Hack. ex Schinz) H. Scholz)

Namibia. Annual, tufted, leaf blades broadly linear and velvety-pubescent, leaves acute, ascending racemes, spikelets acute to cuspidate and overlapping, upper glume and lower lemma membranous, upper lemma acute and rugose, in weedy places, deciduous bushland, see *Verhandlungen des Botanischen Vereins für die Provinz Brandenburg und die angrenzenden Länder* 30: 141. 1888, *Bulletin of the Torrey Botanical Club* 26: 577. 1899 and *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 34(1): 137. 1904, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 7: 70. 1917, *Flora of Tropical Africa* 9: 541, 549. 1919, *Blumea* 3(3): 436. 1940, *Bulletin du Muséum National d'Histoire Naturelle, séries 4, Section B, Adansonia. Botanique Phytochimie* 11(4): 443. 1989 [1990].

Brachyachne (Benth. & Hook.f.) Stapf = Brachyachne (Benth.) Stapf

From the Greek *brachys* "short" and *achne* "chaff, glume," referring to the lemmas, shorter than the glumes.

About 8/10 species, tropical Africa, Australasia, Java to Australia. Chloridoideae, Cynodonteae, Chloridinae, perennial or annual, herbaceous, slender, stoloniferous or caespitose, rarely erect, usually decumbent, sometimes or usually creeping or not creeping, culms branching, solid internodes, auricles absent, leaf sheath smooth and loose, ligule membranous and ciliate, leaf blade with scabrous margins, narrow leaves flat and linear or folded, plants bisexual, racemes single or digitate, solitary and sessile spikelets strongly compressed laterally and imbricate, one bisexual floret, two glumes subequal and narrow, awnless and keeled lemmas shorter than the glumes, palea present, 2 fleshy lodicules joined or free, 3 stamens, ovary glabrous, 2 stigmas, small ellipsoid fruit, weed species, fodder grasses, growing in seasonal swamps and wet places, open habitats, rockpools, open grasslands, rainforest, depressions, in tropical and subtropical arid and semiarid regions, moist rock crevices, plants contain cyanogenetic glycosides, hydrocyanic or prussic acid (HCN), lectotype *Brachyachne convergens* (F. Muell.) Stapf, see *Syn. Pl.* 1: 85. 1805, *Prodromus Florae Novae Hollandiae* 208. 1810, *Essai d'une Nouvelle Agrostographie* 122, 146, 150. 1812, *Gen-*

Species

B. ambigua Ohwi

Australia, Indonesia. Annual, decumbent or geniculate, without stolons, glume keels wingless, see *Bulletin of the National Science Museum, Tokyo*: 11. 1947.

B. ciliaris (Kuntze) C.E. Hubb. (*Brachyachne ciliaris* (Benth.) C.E. Hubb.; *Capriola ciliaris* Kuntze; *Cynodon ciliaris* (L.) Raspail; *Cynodon ciliaris* Benth., nom. illeg., non *Cynodon ciliaris* (L.) Raspail; *Microchloa ciliaris* (Kuntze) Domin; *Poa ciliaris* L.)

Australia, Queensland, Northern Territory, South Australia, New South Wales. Annual or short-lived perennial, small, erect or geniculate, spreading, creeping or not creeping, basal leaf sheaths villous, leaf blades villous, spikes paired and digitate, spikelets 1-flowered, subapically bearded floret, glumes obtuse or bifid, upper glume rounded on back, lemma villous and concave, grows on red sandy soils, grassland, young growth contains hydrocyanic or prussic acid (HCN), species similar to *Cynodon dactylon* (L.) Pers., see *Systema Naturae, Editio Decima* 875. 1759, *Annales des Sciences Naturelles, Botanique* 5: 302. 1825, *Flora Australiensis: A Description ...* 7: 610. 1878, *Revisio Generum Plantarum* 2: 764. 1891 and *Bibliotheca Botanica* 85: 364. 1915, *Bulletin of Miscellaneous Information Kew* 1934: 448. 1934.

in English: hairy native couch

B. convergens (F. Muell.) Stapf (*Capriola convergens* (F. Muell.) Kuntze; *Cynodon convergens* F. Muell.; *Microchloa convergens* (F. Muell.) Domin)

Western Australia, Queensland, Northern Territory, New South Wales. Annual or biennial, ascending or erect,

branched, geniculate at the base, usually stoloniferous, sheath overlapping, leaves glabrous, erect or spreading spikes, spikelets 1-flowered, glumes acute or mucronate and laterally compressed, upper glume with a winged keel, lemma acute with densely ciliate margins, palea keels contiguous, strongly flattened grain, weed, an increaser species, a valued fodder grass, useful for erosion control, grows in floodplains, young shoots contain cyanogenetic glycosides, hydrocyanic or prussic acid (HCN), see *Fragmenta Phytographiae Australiae* 8: 113. 1873, *Revisio Generum Plantarum* 2: 764. 1891 and *Repertorium Specierum Novarum Regni Vegetabilis* 10: 119. 1911.

in English: common native couch, common couch, water couch, Kimberley couch, spider grass, gulf star grass, gulf spider grass

B. kundelungensis Van der Veken

Zaire. Erect, see *Bulletin du Jardin Botanique de l'État* 28(1): 86. 1958.

B. patentiflora (Stent & Rattray) C.E. Hubb. (*Microchloa patentiflora* Stent & Rattray)

Tropical Africa. Perennial, tufted, basal sheaths break up into fine fibers when old, spikes slender and usually solitary, leaves revive after desiccation, common in seasonal swamps, waterlogged soils, see *Bulletin of Miscellaneous Information Kew* 1933: 503. 1933, *Proceedings of the Rhodesia Scientific Association* 32: 59. 1933.

B. pilosa Van der Veken

Zaire. Erect, see *Bulletin du Jardin Botanique de l'État* 28(1): 84. 1958.

B. prostrata C.A. Gardner & C.E. Hubb.

Western Australia, central Queensland Annual or biennial, prostrate, without stolons, arid areas, see *Icones Plantarum [Hooker's]* Edn. Ser. 5, 4(1): t. 3362. 1936.

B. simonii Kupicha & Cope

Zambia. See *Kew Bulletin* 40(1): 89. 1985.

B. tenella (R. Br.) C.E. Hubbard (*Capriola tenella* (R. Br.) Kuntze; *Cynodon altior* F. Muell.; *Cynodon tenellus* R. Br.; *Microchloa tenella* (R. Br.) Domin)

Western Australia. Annual or perennial, erect, decumbent or geniculate, slender inflorescence branches, spikelets elliptic or obovate, glumes with acute wingless keels, grain not compressed, in swampy areas, floodplains, sometimes in water, contains cyanogenetic glycosides, hydrocyanic or prussic acid (HCN), see *Prodromus Florae Novae Hollandiae* 187. 1810, *Fragmenta Phytographiae Australiae* 8: 113. 1873, *Revisio Generum Plantarum* 2: 764. 1891 and *Repertorium Specierum Novarum Regni Vegetabilis* 10: 119. 1911, C.E. Hubbard, Gramineae Australienses: II. *Bulletin of Miscellaneous Information* 10: 448. 1934 [also *Bulletin of Miscellaneous Information Kew* 1934: 448. 1934].

in English: slender native couch

B. upembaensis Van der Veken

Zaire. Erect, see *Bulletin du Jardin Botanique de l'État* 28(1): 85. 1958.

**Brachyathera Kuntze = *Danthonia* DC.,
Sieglingia Bernh.**

From the Greek *brachys* "short" and *ather* "barb, spine, chaff, prickle, awn."

Danthonioideae, Danthonieae, see *Flore Française. Troisième Édition* 3: 32. 1805, *Systema Vegetabilium* 2: 690. 1817 and *Lexicon Generum Phanerogamarum* 77. 1903, *Contributions from the United States National Herbarium* 46: 170-177. 2003.

Brachychloa S.M. Phillips

From the Greek *brachys* "short" and *chloe, chloa* "grass, young grass."

About two species, Mozambique and southern Africa, Kwa-Zulu-Natal. Chloridoideae, Eragrostideae, Eleusininae, annual or perennial, tufted, decumbent, herbaceous, stoloniferous, unbranched, leaf blades rigid, auricles absent, ligule a short fringed membrane, plants bisexual, racemes on a central axis, spikelets compressed and solitary, florets 3-7 bisexual or uppermost floret reduced and sterile, 2 glumes subequal and coriaceous, lower glume acute and awnless, upper glume acuminate to shortly mucronate, lemmas bidentate and mucronate, palea gibbous, 2 free lodicules, 3 stamens, ovary glabrous, 2 stigmas plumose, shade species and species of open habitats, sandy sites, dunes, in coastal forests on sandy soil, clearings, type *Brachychloa schiemaniana* (Schweick.) S.M. Phillips, see *Kew Bulletin* 37(1): 145,158-159. 1982.

Species

B. fragilis S.M. Phillips

South Africa, Mozambique. Annual, rare, tufted, decumbent, long and deciduous racemes, lemmas 3-nerved, common on sandy soils, coastal dunes, see *Kew Bulletin* 37(1): 159. 1982.

B. schiemaniana (Schweick.) S.M. Phillips (*Heterocarpha schiemaniana* Schweick.) (for the German botanist Elisabeth Schieman, 1881-1972, *Berliner Botanikerin*, 1908-1912 among the first girl-students officially admitted to study natural science at the Friedrich-Wilhelms-Universität at Berlin, one of the first women scientists to penetrate the German academic establishment, professor of genetics, authority on the history of cultivated plants, she was greatly influenced by Erwin Bauer. See Elvira Scheich, "Science, Politics, and Morality: The Relationship of Lise Meitner

and Elisabeth Schieman." *Osiris* 12: 143-168. 1997; Mathilde Schmitt, Elisabeth Schieman, Genetikerin und Kulturpflanzenhistorikerin. In: Inhetveen, Heide/Schmitt, Mathilde (Hg.) *Pionierinnen des Landbaus*. Uetersen: Heydorn, S. 81-86. 2000; J.H. Barnhart, *Biographical notes upon botanists*. 3: 224. 1965; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 352. 1972; *Der Züchter*. 21(7-8): 193-195. 1951; *Der Züchter*. 31(4): 117-118. 1961)

South Africa. Perennial, rare, stoloniferous, short and persistent racemes, lemmas 5- to 7-nerved, common on sandy soil, sand dunes, see *Bulletin of Miscellaneous Information Kew* 1929: 263. 1929, *Der Züchter. Zeitschrift für theoretische und angewandte Genetik* 31(4): 192-193, f. 1. 1961.

Brachyelytrum P. Beauv.

From the Greek *brachys* "short" and *elytron (elyo* "to wind") "a sheath, a cover."

One species, eastern North America, China to Japan, eastern Asia. Bambusoideae, Oryzodae, Brachyelytreae, or Stipoideae, or Pooideae, Brachypodieae, perennial, herbaceous, slender, auricles absent, leaf blades narrowly lanceolate, ligule membranous, shortly rhizomatous, plants bisexual, inflorescence a panicle, spikelets all alike, 1-flowered, bristle-like rachilla extension, 2 unequal tiny glumes or one per spikelet, upper glume subulate, lower glume often absent or reduced to vestigial, lemma herbaceous with straight awn, palea and lodicules present, stamens 2-3, ovary hairy, 2 stigmas, in woodland, forest shade, open woods, type *Brachyelytrum erectum* (Schreb.) P. Beauv., see *Essai d'une Nouvelle Agrostographie* 39, 155. 1812 and *Botanical Magazine* (Tokyo) 55: 361. 1941, *Acta Phytotaxonomica et Geobotanica* 11: 183. 1942, *Journal of Japanese Botany* 32: 111-114. 1957, *Canad. in China: duan ying cao

B. erectum (Schreb.) P. Beauv. subsp. ***erectum***

Eastern North America.

B. erectum (Schreb.) P. Beauv. subsp. ***japonicum*** (Hack.) Koyama & Kawano (*Brachyelytrum erectum* var. *japonicum* Hackel; *Brachyelytrum japonicum* (Hackel) Matsumura ex Honda)

China. Perennial, slender, erect, solitary or loosely tufted, soft leaf blades linear-lanceolate and acuminate at apex, unbranched, short knotty rhizome, narrow panicle, lemma narrowly lanceolate, in woodland shade, see *Bulletin de l'Herbier Boissier* 7(9): 647. 1899 and *Journal of the Faculty of Science: University of Tokyo, Botany* 3(1): 210. 1930, *Canadian Journal of Botany* 42: 866, f. 5. 1964.

in China: ri ben duan ying cao

Brachypodium P. Beauv. = *Brevipodium* Á. & D. Löve, *Hemibromus* Steud., *Trachynia* Link, *Tragus* Panzer

From the Greek *brachys* "short" and *podion* "a little foot," referring to the short pedicels of the spikelets, to subsessile spikelets; see Ambroise Marie François Joseph Palisot de Beauvois, *Essai d'une nouvelle Agrostographie*. 100, 101, 155, 156, t. 19, f. 35. Paris 1812.

About 10/17 species, temperate Eurasia, Africa, tropical America, Mexico to Bolivia, tropical mountains. Pooideae, Triticoideae, Brachypodioideae, or Pooideae, Triticeae, annual or perennial, herbaceous, stems upright and flimsy, wiry,

erect or decumbent, often rooting at nodes, rhizomatous or tufted, forming tussocks, internodes hollow, leaf blades linear, auricles absent, ligule a short unfringed or fringed membrane, leaves often hairy, rhizomes branching when present, plants bisexual, inflorescence linear or arched or nodding, short spike-like loose racemes, spikelets elongated usually solitary pedicellate or subsessile, 5-22 florets bisexual or uppermost floret sometimes reduced and sterile, 2 unequal glumes persistent and stiff, lemma herbaceous to membranous, lemmas 7- to 9-nerved and with a straight terminal awn, hairy callus absent, palea oblong and ciliate, 2 ciliolate lodicules free and membranous, 3 stamens, ovary with apex hairy or villous, 2 stigmas white plumose, weed species, adapted to disturbed habitats, shade species, foodplant, ornamental, woodland, shady hedgebanks, rainforest, open habitats, intergrades with *Elymus* L., a difficult genus, type *Brachypodium pinnatum* (L.) P. Beauv., see *Prodromus Florae Novae Hollandiae* 179. 1810, *Essai d'une Nouvelle Agrostographie* 100-101, 155-156, 180. 1812, G.W.F. Panzer (1755-1829), "Ideen zu einer künftigen Revision der Gattungen der Gräser." *Denkschr. Akad. Wiss., Wien* 4: 253-312. 1813, *Observations sur les Graminées de la Flore Belgique* 99, 100. 1824, Johann Heinrich Friedrich Link (1767-1851), *Enumeratio plantarum horti regii berlinensis altera*. 1: 39, 42-43. Species

B. arbuscula Gay ex Knoche (*Brachypodium arbuscula* Gay; *Brachypodium arbuscula* Knoche)

Europe, Spain, Canary Islands. Rare species, see *Bulletin de la Société Botanique de France* 3: 56-59. 1856 and *Vagandi mos* 272. Strasbourg, Paris 1923, *Candollea* 5: 460, 468, t. 17. 1934.

B. bolusii Stapf

South Africa. Perennial, densely tufted, erect, ligule a fringe of hairs, leaves mostly basal and rigid, spike-like racemes straight on a central axis, 1-4 spikelets crowded, unknown grazing value, mountain grassland, shallow soil, slopes, rocky places, see *Flora Capensis* 7: 737-738. 1900.

B. distachyon (L.) P. Beauv. (*Agropyron distachyos* (L.) Chevall.; *Brachypodium distachyum* (L.) P. Beauv.; *Brachypodium geniculatum* K. Koch; *Brachypodium schimperi* (Hochst. ex A. Rich.) Chiov.; *Bromus distachyos* L.; *Bromus geniculatus* (K. Koch) Steud., nom. illeg., non *Bromus geniculatus* L.; *Festuca distachyos* (L.) Roth.; *Festuca schimperi* (Hochst. ex A. Rich.) Steud.; *Trachynia distachya* (L.) Link; *Triticum schimperi* Hochst. ex A. Rich.; *Zerna distachyos* (L.) Panz. ex B.D. Jacks.) (for the German botanist and plant collector Georg Heinrich Wilhelm Schimper, 1804-1878, traveler, botanical explorer, author of *Reise nach Algier ...* Stuttgart 1834, he was the brother of Karl Friedrich Schimper (1803-1867) and cousin of the Alsatian bryologist and palaeontologist Wilhelm Philipp (Guillaume Philippe) Schimper (1808-1880); see H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 239. Oxford 1964; John Hendley Barnhart (1871-1949), *Biographical notes upon botanists*. 3: 226. Boston 1965; [British Museum], *Catalogue of the Books, manuscripts, maps and drawings in the British Museum (Natural History)*. 2: 1833. Weinheim 1964; J.B. Gillett, "W.G. Schimper's botanical collecting localities in Ethiopia." *Kew Bulletin*. 27(1): 115-128. 1972; A.P.M. Sanders, in *D.S.B.* 12: 165-167. 1981; Heinz Tobien, in *D.S.B.* 12: 167-168. 1981; P.W. Richards, in *D.S.B.* 12: 168-169. 1981; A. Lasègue, *Musée botanique de Benjamin Delessert*. Paris 1845)

Mediterranean. Annual or perennial, herbaceous, loosely tufted or tufted, small size, erect or geniculate, often branching near the base, slender or robust, auricles absent, ligule

membranous, short leaves flat and sparsely pilose, hairy to densely pubescent nodes, chasmogamous and cleistogamous, spikelets in short erect spike-like racemes, spikelets crowded at the top of the stem, glumes unequal, lemmas stiff and nerved, straight terminal awn, palea stiffly keeled, anthers very small, ovary pubescent to hispid, fruit laterally compressed and deeply furrowed, undemanding growth requirements, more or less 15 weeks seed-to-seed lifecycle, invasive, naturalized elsewhere, a weedy species in dry disturbed areas, upland, dry wasteland, cliff slopes, dry rocky soil, scrubland, dry red soil, open habitats, along roadsides, gardens, see *Centuria II. Plantarum ...* 8. 1756, *Amoen. Acad.* 4: 304. 1759, *Voyage en Barbarie* 2: 98. 1789, *Catalecta Botanica* 1: 11. 1797, *Flore Générale des Environs de Paris* 2: 196. 1827, *Hortus Regius Botanicus Bero-linensis* 1: 43. 1827, *Fl. Paris* éd 2, 2: 196, 1836, *Florae Siculae Synopsis* 1: 73. 1843, *Linnaea* 21(4): 422. 1848, *Tentamen Florae Abyssinicae ...* 2: 441. 1850, *Synopsis Plantarum Glumacearum* 1: 316, 318. 1854, *Index Kewensis* 2: 1249. 1895 and *Flora Analitica d'Italia* 1: 101. 1908, *Flora Sicula* 3: 376. 1909, *Bulletin de l'Académie Internationale de Géographie, Botanique* 21: 133. 1911, *Bollettino della Società Botanica Italiana* 1914: 11. 1914, *Plantae Tripolitanae* 13. Bot. de France*. 29: 187. Paris 1882; A. White & B.L. Sloane, *The Stapelieae*. Pasadena 1937)

Tropical Africa. Perennial, diffuse, rough, sometimes decumbent and rooting at the lower nodes, straggling, tufted, wiry, weak-stemmed, mat-forming, often climbing on and scrambling through shrubs, slender, leaf sheaths scabrid, flexuous racemes with 3-9 spikelets, 6-12 florets, glumes acute and lanceolate, lemmas narrowly oblong and pubescent, possibly an useful grazing grass, usually in moist shady places, clearings, near streams, upland forest, riverbanks, bushland, bamboo thickets, see *Essai d'une Nouvelle Agrostographie* 101, 155, 156, t. 3, f. 115. 1812, *Florae Africae Australioris Illustrationes Monographicae* 456. 1841, *Tentamen Florae Abyssinicae ...* 2: 435, 441. [Collectors: R. Quartin-Dillon and A. Petit] Parisiis 1850, *Synopsis Plantarum Glumacearum* 1: 316. 1854 and *Flora Capensis* 7: 737. 1900, *Annuario del Reale Istituto Botanico di Roma* 8(3): 379-380. 1908, *Botaniska Notiser* 116: 420. 1963, *Bulletin du Jardin Botanique National de Belgique* 38: 1215. 1968.

B. japonicum Miq. (*Agropyron japonicum* (Miq.) P. Candargy; *Agropyrum japonicum* (Miq.) P. Candargy)

Asia. See *Annales Museum Botanicum Lugduno-Batavi* 2: 286-287. 1866 and *Flora of Japan* 153. 1965, *Grasses of Japan and its Neighboring Regions* 483. 1987.

B. kotschy Boiss. (for the Austrian botanist Carl (Karl) Georg Theodor Kotschy, 1813-1866, plant collector, traveler, from 1835 to 1843 botanical explorer of the Orient, from 1852 Curator of the Herbarium of the Vienna Natural History Museum, his writings include *Die Insel Cypern*. [with Franz Joseph Andreas Nicolaus Unger, 1800-1870] Wien 1865 and *Die Sommerflora des Antilibanon und hohen Hermon*. Wien 1864. See Eduard Fenzl (1808-1879), *Abbildungen und Beschreibungen neuer und selthener Thiere und Pflanzen in Syrien und im westlichen Taurus gesammelt von T. Kotschy*. Stuttgart 1843; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. Philadelphia 1964; J.H. Barnhart, *Biographical notes upon botanists*. 2: 315. 1965; Joseph Vallot, "Études sur la flore du Sénégal." in *Bull. Soc. Bot. de France*. 29: 182-183. Paris 1882; Ignatz Urban, *Geschichte des Königlichen Botani-*

schens Museums zu Berlin-Dahlem (1815-1913). Nebst Aufzählung seiner Sammlungen. Dresden 1916; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 218. 1972; H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 195. Oxford 1964; A. Lasègue, *Musée botanique de Benjamin Delessert*. Paris 1845; Ethelyn Maria Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933)

Turkey. Rare species, see *Flora Orientalis* 5: 659. 1884.

B. mexicanum (Roem. & Schult.) Link (*Brachypodium latifolium* E. Fourn.; *Brachypodium latifolium* E. Fourn. ex Hemsl.; *Brachypodium mexicanum* var. *mexicanum*; *Brachypodium subulatum* E. Fourn.; *Brachypodium subulatum* E. Fourn. ex Hemsl.; *Brachypodium sylvaticum* var. *scabrum* (Lag.) Kuntze; *Bromus mexicanus* hort. ex Steud.; *Festuca mexicana* Roem. & Schult.; *Festuca mexicana* Lag. ex Link; *Festuca scabra* Lag., nom. illeg., non *Festuca scabra* Vahl; *Triticum mexicanum* (Roem. & Schult.) Schrad. ex Steud.)

Northern America, Mexico. Tufted, weak, herbaceous, branching, decumbent, internodes glabrous, ligule ciliate, linear racemes, spreading spikelets, greenish flowers, pedicels densely pubescent, lemmas coriaceous, good forage, clambering through shrubs, grassland, along roadsides, tussock grassland, see *Genera et species plantarum* 4. 1816, *Systema Vegetabilium* 2: 732. 1817, *Hortus Regius Botanicus Berolinensis* 1: 41. 1827, *Nomenclator Botanicus. Editio secunda* 1: 228. 1840, *Nomenclator Botanicus. Editio secunda* 2: 716. 1841, *Biologia Centrali-Americana; ... Botany ...* 3: 584. 1885, *Mexicanas Plantas* 2: 125. 1886, *Colo. Agr. Exp. Sta. Bull.* 12: 52. 1890, *Revisio Generum Plantarum* 2: 763. 1891 and *Phytologia* 49(1): 38. 1981.

in Mexico: sacapipilo, zacapipilo

B. mexicanum (Roem. & Schult.) Link var. *inermis* Beetle Northern America, Mexico. Perennial, tufted, see *Phytologia* 49(1): 38. 1981.

B. mexicanum (Roem. & Schult.) Link var. *mexicanum* Northern America, Mexico.

B. phoenicoides (L.) Roemer & Schultes (*Brachypodium macropodium* Hack.; *Brachypodium mucronatum* Willk.; *Brachypodium phoenicoides* (L.) P. Beauv.; *Brachypodium phoenicoides* (L.) P. Beauv. ex Roem. & Schult.; *Festuca phoenicoides* L.)

Europe, Spain. Perennial, erect, simple, stiff, shortly rhizomatous, branched stock, pubescent at nodes, auricles absent, leaf sheath cylindrical, leaves glaucous or silvery green, ligule membranous and dentate, elongate spike distichous, narrow curved yellowish flower plumes with spikelets on long stems, ornamental, propagates vegetatively, establishment from seedling is rare, useful for ero-

sion control, found in dry fields, moist places, see *Mantissa Plantarum* 33. 1767, *Descriptio Graminum in Gallia et Germania* 201. 1802, *Flora Lusitana* 1: 121. 1804, *Essai d'une Nouvelle Agrostographie* 101. 1812, *Systema Vegetabilium* 2: 737, 740. 1817, *Nomenclator Botanicus* 120. 1821, *Catalogue des Plantes Indigènes des Pyrénées et du Bas-Languedoc* 64. 1826, *Hortus Regius Botanicus Bero-linensis* 2: 191. 1833, *Synopsis Florae Germanicae et Hel-veticae* (edition 2) 944. 1843, *Österreichische Botanische Zeitschrift* 27: 48. 1877, *Flora Analitica d'Italia* 1: 102. 1896 and *Synopsis der mitteleuropäischen Flora* 2(1): 637. 1901, *Boletim da Sociedade Broteriana* 20: 154. 1903[1905], *Cavanillesia* 4: 129. 1931, *Candollea* 5: 448-449, 451-453. 1934, *Bulletin de la Société d'Histoire Naturelle de l'Afrique du Nord* 28: 387. 1937, *Boletim da Sociedade Broteriana* 60: 157. 1987, *Taxon* 37: 158-164. 1988.

in English: false brome, perennial falsebrome, fallow-land falsebrome

in Spanish: botea, braquipodio, fenàs, fenàs de marge, fenassos

B. pinnatum (L.) P. Beauv. (*Agropyron pinnatum* (L.) Chevall.; *Bromus corniculatus* (L.) Lam.; *Bromus pinnatus* L.)

Europe, northwestern Africa, southwestern Asia. Perennial, herbaceous, slender, tufted, forming tussocks, spreading, smooth, upright, strongly rhizomatous, wiry rhizomes narrow and scaly, leaf sheaths rounded glabrous, ligule truncate and ciliate, green to yellowish green, leaves linear to linear-lanceolate, spike-like racemes more or less erect, erect spikelets on long stems and smooth, slender spikelets green to yellow 7- to 20-flowered, glumes acute to linear-lanceolate and convex, lemmas awned, ornamental grass naturalized elsewhere, found in waste areas, grassy hillsides, along roadsides, wet meadows, see *Species Plantarum* 78. 1753, *Mantissa Plantarum* 33-34. 1767, *Flora Halensis* edition 2, 26: 116. 1783, *Icones et Descriptiones Graminum Austriacorum* 4: 10-11, t. 17, 18. 1809, *Systema Vegetabilium* 2(15): 737. 1817, *Observations sur les Graminées de la Flore Belgique* 99-100, t. 3, f. 9. 1823, *Flore Générale des Environs de Paris* 2: 195. 1827, *Flora Germanica Excursoria* 19. 1830, *Synopsis Florae Germanicae et Hel-veticae* 2: 818. 1837, *Prodromus Florae Hispanicae* 1: 111. 1861, *Anales de la Sociedad Española de Historia Natural* 15: 420-421. 1886, *Proceedings of the Academy of Natural Sciences of Philadelphia* 43(2): 305-306, t. 13, f. 5, 5a-5e. 1891, *Flora Analitica d'Italia* 1: 102. 1896, *Bollettino della Società Botanica Italiana* 1899: 289. 1899 and *Synopsis der mitteleuropäischen Flora* 2(1): 633-634. 1901, *Flora Analitica d'Italia* 102. 1908, *Acta Botanica Academiae Scientiarum Hungaricae* 17(1-2): 115. 1971[1972], *Flora Republicii Socialiste Romania* 12: 343-344. 1972.

in English: false brome, chalk false brome, pinnate false brome, slender false brome, wood false brome, heath false brome, Japanese false bromegrass, tor grass

B. pinnatum (L.) P. Beauv. subsp. **pinnatum**

Europe.

B. pringlei Scribn. ex Beal (after the American botanist Cyrus Guernsey Pringle, 1838-1911, Quaker, plant collector (Pacific States and Mexico), wrote *The Record of a Quaker Conscience: C. Pringle's Diary*. New York 1918. See J.H. Barnhart, *Biographical notes upon botanists*. 3: 111. 1965; T.W. Bossert, compil., *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 318. 1972; Ethelyn Maria Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933; Ezra Brainerd (1844-1924), "Cyrus Guernsey Pringle." *Rhodora*. 13: 225-232. 1911; Irving William Knobloch, compil., "A preliminary verified list of plant collectors in Mexico." *Phytologia Memoirs*. VI. 1983; Helen Burns Davis, *Life and Work of Cyrus Guernsey Pringle*. Burlington, Vt. 1936; S. Lenley et al., *Catalog of the manuscript and archival collections and index to the correspondence of John Torrey*. Library of the New York Botanical Garden. 335-336. 1973; Ira L. Wiggins, *Flora of Baja California*. 42. Stanford, California 1980; Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. 596. University of Pennsylvania Press, Philadelphia 1964; Gordon Douglas Rowley, *A History of Succulent Plants*. California 1997; I.C. Hedge & J.M. Lamond, *Index of Collectors in the Edinburgh Herbarium*. Edinburgh 1970)

Northern America, Mexico. Growing in moist places, moist banks, see *Grasses of North America for Farmers and Students* 2: 627. 1896.

in Mexico: falso bromo regiomontano

B. retusum (Pers.) P. Beauv. (*Brachypodium boissieri* Nyman; *Brachypodium flexum* sensu Schwartz; *Brachypodium ramosum* (L.) Roem. & Schult.; *Brachypodium ramosum* Schult.; *Bromus ramosus* L.; *Bromus retusus* Pers.)

Temperate Asia, Turkey, Algeria, North Africa, Europe. Perennial, variable, pale green or glaucous, slender, smooth, densely tufted, erect or geniculately ascending, glabrous, rooting at the lower nodes, leaf sheaths smooth and glabrous, leaf blades distichous, rhizome much branched, leaves scabrid or glabrous, spikelets linear or linear-oblong loosely arranged at the top of the stem, short-awned, 8- to 15-flowered, glumes acute, lemma awned and narrowly oblong, widespread in dry pastures, exposed mountain ridges, dry rocky places, limestone, rocky grassland, protected cliffs, see *Syn. Pl.* 1: 96. 1805.

in French: brachypode rameux

in Italian: paleo ramoso

in Spain: cervero, cerverol, fenal, fenàs reüll, fenazo, lastón, llistó

B. rupestre (Host) Roem. & Schult. (*Brachypodium caespitosum* (Host) Roem. & Schult., also spelled *cespitosum*; *Brachypodium caespitosum* (Desf.) C. Presl, nom. illeg., non *Brachypodium caespitosum* (Host) Roem. & Schult.; *Brachypodium gracile* (Leyss.) P. Beauv.; *Brachypodium pinnatum* subsp. *caespitosum* (Host) Hack.; *Brachypodium pinnatum* subsp. *rupestre* (Host) Tzvelev, nom. illeg., non *Brachypodium pinnatum* subsp. *rupestre* (Host) Schübl. & G. Lyons; *Bromus sylvaticus* (Huds.) Pollich; *Festuca misera* C.P. Thunb. ex A. Murray; *Festuca sylvatica* Huds.; *Triticum sylvaticum* (Huds.) Parnell, nom. illeg., non *Triticum sylvaticum* Moench; *Triticum sylvaticum* Moench)

North Africa, Europe, temperate Asia. Perennial bunchgrass, densely and compactly tufted, lax, smooth, pale yellow-green, unbranched, slender, weak, geniculate at the base, upright or spreading, apparently not rhizomatous or sometimes very shortly rhizomatous, forming tussocks or large clumps, hollow culms pilose or hairy, auricles absent, open leaf sheaths hairy, ligule membrane-like, broad flat leaves linear-lanceolate, erect to arching spike-like racemes, spikelets either sessile or short-pedicellate, produces slender stalkless pale green flower spikelets alternating along the usually arching tops of stems, unequal glumes acute and ribbed, lemmas strongly ciliate, awns straight, invasive grass, often misidentified or mistaken for a brome, occasionally cultivated for ornamental purposes, growing in subalpine meadows, in rock crevices, lowland to montane grasslands, woodlands, open habitats, shade of trees or shrubs, forested habitats, open grassland, riparian forests, gravelly silt loam, forest edges, closely related to *Brachypodium pinnatum* (L.) P. Beauv., see *Flora Anglica* 1: 38. 1762, *Fasciculus Plantarum Circa Cantabrigiam nascentium, quae post Rajum observatum fuere*. 15. Londini 1763, *Systema Vegetabilium. Editio decima quarta* 119. 1784, *Histoire des Plantes de Dauphiné* 2: 119. 1787, *Essai d'une Nouvelle Agrostographie* 101, 115, 155, 156, pl. 3, f. 11. 1812, *Genera et species plantarum* 4. 1816, *Flore Générale des Environs de Paris* 2: 196. 1827, *Compendium Florae Belgicae* 1: 100. 1828, *The Grasses of Scotland* 1(1): 132, t. 61. 1842, *Enum. Pl. Zeyl.* 374. 1864, *A Systematic Catalogue of the Flowering Plants and Ferns Indigenous to or Growing Wild in Ceylon* 110. Ceylon* 5: 306. 1900, *Annuario del Reale Istituto Botanico di Roma* 8(3): 380. 1908, *Nuova Flora Analitica d'Italia* 1: 151. 1923, *Botanical Magazine* 39: 303. 1925, *Florae Symbolae Orientali-Asiaticae* 80. 1930, *Brittonia* 2(2): 108. 1936, *Reinwardtia* 2(2): 242. 1953, *Grasses of Ceylon* 41. 1956, *Grasses of Burma ...* 450. 1960, *Botaniska Notiser* 114: 36. 1961, *Agronomia Lusitana* 34(3): 180. 1972[1973], *Novosti Sist. Vyss. Rast.* 10: 89. 1973, *Willdenowia* 15(1): 30. 1985, *Blumea* 34: 71. 1989, Gert Meijer & Adrian Leuchtman, "Multistrain infections of the grass *Brachypodium sylvaticum* by its fungal endophyte *Epichloë sylvatica*." *New Phytologist* 141(2): 355-368. Feb 1999, Gert Meijer & Adrian Leuchtman, "The effects of genetic and environmental

factors on disease expression (stroma formation) and plant growth in *Brachypodium sylvaticum* infected by *Epichloë sylvatica*." *Oikos* 91(3): 446-458. Dec 2000.

in English: slender false brome, slender false brome grass, wood false brome, false brome

B. sylvaticum (Huds.) P. Beauv. subsp. ***creticum*** H. Scholz & Greuter

Greece, Crete. Rare grass, see *Willdenowia* 15(1): 30. 1985.

Brachystachyum Keng = *Semiarundinaria*
Nakai, *Semiarundinaria* Makino ex Nakai

From the Greek *brachys* "short" and *stachys* "spike," referring to the short spike-like racemes.

Monotypic, China, Jiangsu, Zhejiang, Guangdong. Bambusoideae, Bambuseae, Shibataeinae, shrubby or arborescent, rhizomes monopodial, three branches at each node, several branchlets, sheath caducous, sheath auricles developed and ciliate, sheath ligule short, racemes spiciform, 3 stamens, 3 stigmas, open slopes, low hills, mountains, type *Brachystachyum densiflorum* (Rendle) Keng, see *Journal of the Arnold Arboretum* 6(3): 150-151. 1925, *Sunyatsenia* 4(3-4): 151, 153. 1940, *Taxon* 6(7): 208. 1957, *Agriculture Handbook* 193: i-iii, 1-74. 1961, *Compendium Chinese Bamboo* 105. 1994, *Flora Reipublicae Popularis Sinicae* 9(1): i-xxvi, 1-761. 1996, *Contributions from the United States National Herbarium* 39: 112. 2000.

Species

B. densiflorum (Rendle) Keng (*Arundinaria densiflora* (Rendle) Nakai; *Fargesia densiflora* (Rendle) Nakai; *Semiarundinaria densiflora* (Rendle) Wen)

China, Hubei, Anhui. Pruinose below the joint, glabrous, cylindrical or grooved, sheath whitish purplish, sheath blade long lanceolate, sheath auricles purplish red and sickle-shaped, sheath ligule truncate, used for making fishing poles, frames, see *J. Linn. Soc. Bot.* 36: 434. 1904, *Journal of the Arnold Arboretum* 6(3): 152. 1925, *Sunyatsenia* 4(3-4): 153. 1940, *J. Bamb. Res.* 8(1): 24. 1989.

in English: short spiked bamboo, short spike bamboo

in China: duan sui zhu shu

B. densiflorum (Rendle) Keng var. ***villosum*** S.L. Chen & C.Y. Yao (*Semiarundinaria densiflora* f. *villosa* (S.L. Chen & C.Y. Yao) Wen)

China. Culm sheaths pilose or villous, sheath ligule conspicuous, used for making fishing poles, living frames, see *Acta Phytotax. Sin.* 21(4): 404. 1983, *J. Bamb. Res.* 8(1): 24. 1989.

in China: maohuan duan sui zhu

Brachystylus Dulac = *Airochloa* Link,
***Koeleria* Pers.**

From the Greek *brachys* "short" and *stylos* "style, column."

Pooideae, Poaceae, Aveninae, see *Species Plantarum* 1: 63. 1753, *Syn. Pl.* 1: 97. 1805, *Flore de Département des Hautes-Pyrénées* 84-85. 1867 and *Contributions from the United States National Herbarium* 48: 97, 145, 409-419. 2003.

Braconotia Godr. = *Elymus* L., *Elytrigia*
Desv.

Pooideae, Triticeae, Hordeinae, see *Species Plantarum* 1: 83-84. 1753, *Flore de Lorraine* 3: 191. 1844 and *Canad. J. Bot.* 42: 554. 1964, *Taxon* 41: 562-563. 1992, *Contributions from the United States National Herbarium* 48: 279-307. 2003.

Bracteola Swallen = *Chrysochloa* Swallen

The diminutive of Latin *bractea*, *brattea* "bract, a thin leaf."

Chloridoideae, Cynodonteae, type *Bracteola lucida* Swallen, see *Catalogue of the African Plants Collected by Dr. F. Welwitsch in 1853-61* 2(1): 222. 1899 and *American Journal of Botany* 20: 118, f. 1. 1933, *Bulletin of Miscellaneous Information Kew* 1934: 117. 1934, *Proceedings of the Biological Society of Washington* 54: 44. 1941.

Brandtia Kunth = *Arundinella* Raddi

For the German botanist Johann Friedrich von Brandt, 1802-1879, zoologist, surgeon, paleontologist, 1826 obtained the M.D., 1826-1831 worked with Julius T.C. Ratzeburg, from 1831 at St. Petersburg Director of the Zoological Museum, among his writings are *Flora berlinensis* ... Berlin 1825 and *Untersuchungen über die fossilen und subfossilen Cetaceen Europa's*, [*Mém. Acad. Imp. Sci. St. Pétersbourg*, 7. Sér., 20/1: 1-372.] 1873. See Ida Kaplan Langman, *A Selected Guide to the Literature on the Flowering Plants of Mexico*. Philadelphia 1964; Ethelyn Maria Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933; J.H. Barnhart, *Biographical notes upon botanists*. 1: 24. 1965; T.W. Bossert, compil., *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 50. Boston, Mass. 1972; Albert V. Carozzi, in *D.S.B. (or Dictionary of Scientific Biography*. Editor in Chief Charles Coulston Gillispie) 2: 422-423. New York 1981.

Panicoideae, Arundinelleae, type *Brandtia holcoides* Kunth, see *Agrostografia Brasiliensis* 36, 37, t. 1, f. 3. 1823, *Révision des Graminées* 2: 511, t. 170. 1831, *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles. Seconde Partie: Sciences Naturelles* 4,2(1): 107.

1836 and *Reinwardtia* 2(2): 231. 1953, *Kew Bulletin* 21(1): 119-124. 1967, *Kew Bulletin* 26(1): 111-123. 1971, *Flora Mesoamericana* 6: 377-378. 1994, *Annals of the Missouri Botanical Garden* 81(4): 768-774. 1994, J.F. Veldkamp, "Name changes in *Agrostis*, *Arundinella*, *Deyeuxia*, *Helictotrichon*, *Tripogon* (Gramineae)." *Blumea* 41: 407-411. 1996, *Contributions from the United States National Herbarium* 46: 111-113. 2003.

Brasilocalamus Nakai = *Merostachys* Spreng.

From Brazil and the Greek *kalamos* "a reed, cane."

Bambusoideae, Bambuseae, Arthrostylidiinae, type *Brasilocalamus pubescens* Nakai, see *Systema Vegetabilium* 1: 132, 249, f. 37b-n. 1824, *Revue Horticole* 48: 22. 1876, *Flora Brasiliensis* 2(3): 189, pl. 51. 1880 and *Journal of Japanese Botany* 9(1): 10. 1933, *Botanical Magazine* (Tokyo) 49: 74. 1935, *Fieldiana, Botany* 24(2): 38-331. 1955, *Flora Illustrata Catarinense* 1(Gram.-Supl.): 1-78. 1967, *Smithsonian Contributions to Botany* 9: 1-148. 1973, *Novon* 8(4): 408-428. 1988, *Novon* 2(2): 81-110, 111-113. 1992, *Flora Mesoamericana* 6: 201-202. 1994, *Novon* 5(1): 76-96. 1995, *Novon* 7(3): 285-307. 1997, *Contributions from the United States National Herbarium* 39: 71-75. 2000, *Kew Bulletin* 56(3): 627-638. 2001.

Brevipodium Á. Löve & D. Löve = *Brachypodium* P. Beauv.

Latin *brevis* "short," Greek *brachys* "short" and *podion* "a little foot."

Pooideae, Brachypodieae, type *Brevipodium sylvaticum* (Huds.) Á. Löve & D. Löve, see *Essai d'une Nouvelle Agrostographie* 100, 155, pl. 19, f. 35. 1812 and *Botaniska Notiser* 114: 36. 1961, *Flora Mesoamericana* 6: 246. 1994, *Anales del Jardín Botánico de Madrid* 51(2): 280. 1994, *Botanical Journal of the Linnean Society* 117: 263-280. 1995, *Linzer Biologische Beiträge* 29(1): 5-43. 1997, *Lagscalia* 20(2): 223-230, 265-275. 1998, *Willdenowia* 28: 173. 1998, *Opera Botanica* 137: 1-42. 1999, *Contributions from the United States National Herbarium* 48: 143-145. 2003.

Briza L. = *Brizochloa* V. Jirásek & Chrtek; *Calosteca* Desv., *Calotheca* P. Beauv., *Calotheca* Desv., *Chascolytrum* Desv., *Chondrachyrum* Nees, *Lombardochloa* Roseng. & B.R. Arrill., *Macrobriza* (Tzvelev) Tzvelev, *Tremularia* Fabr., *Tremularia* Heist. ex Fabr.

Greek *briza* "rye" (Galenus), "a root" (Apollonius Dyscolus, *De Adverbiis*. 157.20), *brizo* "to be sleepy, nod;" see

Carl Linnaeus, *Species Plantarum*. 70. 1753 and *Genera Plantarum*. edition 5. 32. 1754.

About (12-)16/20 species, cosmopolitan. Pooideae, Pooideae, Poeae, or Pooideae, Poeae, Brizinae, perennial or sometimes annual, loosely tufted, herbaceous, shortly rhizomatous, erect or ascending or decumbent, unbranched above, glabrous, culm nodes glabrous, hollow internodes, auricles absent, ligule membranous and obtuse, leaf sheath open at maturity, leaves flat and linear to linear-lanceolate, plants bisexual, inflorescence open or loosely contracted, flowers in dense or loose panicle with drooping or erect spikelets, florets bisexual, reduced floret at apex, spikelets broadly ovate or ovoid and solitary on filiform pedicels, 2 glumes more or less equal, ribbed glumes ovate or boat-shaped, lustrous and smooth lemmas alternate and ovate, closely overlapping lemmas membranous and deeply concave, lemmas as broad as long and cordate at base, palea 2-keeled with keels often winged, 2 membranous lodicules joined or free, 1 or 3 stamens, ovary glabrous, anthers light brown, stigmas white, small fruit dorsiventrally compressed, ornamental, grown for drying and dyeing, panicles persist for several weeks after flowering, weed species, chalk hills, pampas, on dry to moist soils, natural grasslands, open habitats, type *Briza minor* L., see *Species Plantarum* 70-71, 73-76. 1753, *Enumeratio Methodica Plantarum* 207. 1759, *Nouveau Bulletin des Sciences, publié par la Société Philomatique de Paris* 2: 190. 1810, *Essai d'une Nouvelle Agrostographie* 85. 1812, *A Natural System of Botany* edition 2: 449-450. 1836, *Synopsis Plantarum Glumacearum* 1: 288. 1854, *Genera Plantarum* 3(2): 1195. 1883 and *Arkiv för Botanik utgivet av K. Species

B. bipinnata L. (*Desmostachya bipinnata* (L.) Stapf; *Desmostachys bipinnata* (L.) Stapf; *Eragrostis cynosuroides* (Retzius) P. Beauvois; *Eragrostis bipinnata* (L.) Schum.; *Eragrostis bipinnata* (L.) Muschl., nom. illeg., non *Eragrostis bipinnata* (L.) Schum.; *Leptochloa bipinnata* (L.) Hochst.; *Poa cynosuroides* Retzius; *Pogonarthria bipinnata* (L.) Chiov.; *Stapfiola bipinnata* (L.) Kuntze; *Uniola bipinnata* (L.) L.)

Europe, Asia, China. Perennial, coarse, tough, rigid, creeping, vigorous, branched at base, forming large leafy tussocks, spreading scaly rhizomes, leathery yellowish sheaths, racemes ascending or spreading, spikelets elliptic or elliptic-oblong in two rows from the under side of each branch, glumes ovate-lanceolate, useful as a soil-binder, found in arid regions, see *Flora Palaestina* 12. 1756, *Species Plantarum, Editio Secunda* 1: 204. 1762, *Flora* 38: 422. 1855, *Die Pflanzenwelt Ost-Afrikas* 50: 113. 1895 and *Flora Capensis* 7: 632. 1900, *Lexicon Generum Phanerogamarum* 532. 1903, *Verhandlungen des Botanischen Vereins für die Provinz Brandenburg und die angrenzenden Länder* 49: 74. 1907, *Annuario del Reale Istituto Botanico di Roma* 8(3): 362. 1908, *Taxon* 49(2): 248. 2000.

in India: aswalayana darbha gaddi, barhi, chir, daab, daabh, dab, dabhat, dabvi, dabwi, darbh, darbha, darbha pull, darbhapullu, davoli, davolia, dhab, dharbe, dib, drab, drabh, dubha, durbha, durbka, durpa, durva, garbha, hrasva, khusa, koosha, kurava, kus, kusa, kush, kusha, kushadarbh, kushadarbha, kutha, kutupa, pavithra, sadanapu veduru, soochyagra, yainabhooshana

B. brachychaete Ekm. (*Microbriza brachychaete* (Ekman) Parodi ex Nicora & Rúgolo; *Poidium brachychaetum* (Ekman) Matthei)

Brazil. Lemmas scaberulous, spikelets 2-flowered, see *Arkiv för Botanik utgivet av K. Svenska Vetenskapsakademien* 13(10): 60, t. 4, f. 3. 1913, *Darwiniana* 23(1): 296. 1981.

B. brizoides (Lam.) Kuntze (*Briza brizoides* Lam.; *Briza elegans* (P. Beauv.) Döll; *Briza patula* Phil.; *Briza tandilensis* Parodi; *Bromus brizoides* Lam.; *Calotheca brizoidea* (Lam.) Desv.; *Calotheca brizoides* (Lam.) Desv.; *Calotheca elegans* (P. Beauv.)

Southern America, Argentina. Erect, leaves erect, lemmas shortly awned, found in wet places, often considered to be a synonym of *Calotheca brizoides* (Lam.) Desv., see *Tableau Encyclopédique et Méthodique ... Botanique* 1: 193, no. 1060. 1791, *Essai d'une Nouvelle Agrostographie* 157, t. 17, f. 7. 1812, *Anales de la Universidad de Chile* 94: 163. 1896, *Revisio Generum Plantarum* 3(3): 341. 1898 and *Revista de la Facultad de Agronomía y Veterinaria* 3: 132, f. 4(1b). 5. Buenos Aires 1920.

B. calotheca (Trin.) Hack. (*Briza neesii* Döll; *Briza poa* Nees ex Steud.; *Briza scabra* Nees ex Steud.; *Eragrostis calotheca* Trin.; *Eragrostis crassa* Jedwabn.; *Poa calotheca* (Trin.) Kunth; *Poidium calotheca* (Trin.) Matthei)

Central Brazil to Argentina. Spikelets 3- to 6-flowered, smooth lemmas, common in swampy places, see *Mémoires de l'Académie Impériale des Sciences de Saint Pétersbourg. Sixième Série. Sciences Mathématiques, Physiques et Naturelles* 1(4): 414. 1830, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 340. 1833, *Synopsis Plantarum Glumacearum* 1: 276, 283. 1854, *Flora Brasiliensis* 2(3): 132. 1878 and *Bulletin de l'Herbier Boissier, sér. 2, 4*(3): 282. 1904, *Botanisches Archiv* 5(3-4): 187. 1924.

B. erecta Lam. (*Briza macrostachya* (J. Presl) Steud.; *Briza montevidensis* Trin. ex Steud.; *Calotheca brizoidea* P. Beauv.; *Calotheca brizoides* (Lam.) Desv.; *Calotheca macrostachya* J. Presl; *Calotheca montevidensis* Spreng. ex Steud.; *Chascolytrum erectum* (Lam.) Desv.; *Festuca brizoides* Spreng.; *Festuca erecta* (Lam.) Spreng. ex Kunth, nom. illeg., non *Festuca erecta* (Huds.) Wallr.)

Southern America, Uruguay. Often considered to be a synonym of *Chascolytrum erectum* (Lam.) Desv., see *Tableau Encyclopédique et Méthodique ... Botanique* 1: 187. 1791, *Essai d'une Nouvelle Agrostographie* 86, 155, t. 17, f. 6. 1812, *Reliquiae Haenkeanae* 1(4-5): 268, 351. 1830, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 373. 1833, *Nomenclator Botanicus. Editio secunda* 1: 225, 261. 1840, *Flora Brasiliensis* 2(3): 132. 1878 and *Contr. U.S. Natl. Herb.* 24(8): 334. 1927.

B. humilis M. Bieb. (*Briza spicata* Sm., nom. illeg.; *Briza spicata* Sibth. & Sm., non Burm.f.; *Brizochloa humilis* (M. Bieb.) Chrték & Hadac; *Brizochloa humilis* (M. Bieb.) V. Jirásek & Chrték)

Europe, Asia, Syria, Turkey. Annual, low- and many-stemmed, branched from the base, leaves short, inflorescence paniculate, forage, found in rocky dry mixed forest and grassland, see *Flora Taurico-Caucasica* 1: 66. 1808 and *Candollea* 24: 170. 1969, *Journal of Cell Science* 97: 565-570. 1990.

in English: spiked quaking grass

B. lamarckiana Nees (*Briza fusca* (Parodi) Parodi; *Briza lindmanii* Ekman; *Briza subaristata* var. *fusca* Parodi; *Chascolytrum lamarckianum* (Nees) Matthei)

Southern America, southern Brazil to Argentina, Uruguay. Panicle spreading with long and flexuous branches, occurs in sandy fields near small streams, often considered to be a synonym of *Chascolytrum lamarckianum* (Nees) Matthei, see *Flora Brasiliensis seu Enumeratio Plantarum* 2: 481. 1829 and *Arkiv för Botanik utgivet av K. Svenska Vetenskapsakademien* 13(10): 54, t. 4, f. 2. 1913, *Revista de la Facultad de Agronomía y Veterinaria* 3: 127, f. 2(1). 1920, *Revista de la Facultad de Agronomía y Veterinaria* 4: 93. 1922, *Willdenowia*, Beih. 8: 74. 1975.

B. lindmanii Ekman (*Briza fusca* (Parodi) Parodi; *Briza lamarckiana* Nees; *Briza subaristata* var. *fusca* Parodi; *Chascolytrum lamarckianum* (Nees) Matthei)

Brazil, Uruguay. Often considered to be a synonym of *Chascolytrum lamarckianum* (Nees) Matthei, see *Flora Brasiliensis seu Enumeratio Plantarum* 2: 481. 1829 and *Arkiv för Botanik utgivet av K. Svenska Vetenskapsakademien* 13(10): 54, t. 4, f. 2. 1913, *Revista de la Facultad de Agronomía y Veterinaria* 3: 127, f. 2(1). 1920, *Revista de la Facultad de Agronomía y Veterinaria* 4: 93. 1922, *Willdenowia*, Beih. 8: 74. 1975.

B. marcowiczii Woronow ex B. Fedtsch.

Northern America, Russia.

B. maxima L. (*Briza grandis* Salisb.; *Briza major* C. Presl; *Macrobriza maxima* (L.) Tzvelev; *Poa maxima* (L.) Cav.)

Mediterranean, Europe, Asia temperate. Annual, small, erect or geniculate at base, slender, glabrous, solitary or tufted, simple or branched, auricles absent, leaf sheath smooth and papery, ligule oblong and hyaline, flat linear leaves glabrous and tapering to an acute apex, panicles of translucent dangling seed heads on wiry stems, flowers in nodding and loose panicles simple or slightly branched, drooping spikelets cordate or ovate to oblong, filiform pedicels, glumes dark-brown or purplish or red and brown, lemmas glabrous and closely imbricate, paleas winged, ovary glabrous and without a conspicuous apical appendage, fruit ventrally compressed, palatable, low grazing value, widespread weed species, attractive, ornamental grass cultivated and naturalized elsewhere, common in disturbed areas, open sandy soil, along irrigated fields, wetlands and woodlands, well-drained soil, gardens, wasteland, granite rocks, shallow granitic soils, pastures, along roadsides, orchards, see *Species Plantarum* 1: 70. 1753, *Prodromus stirpium in horto ad Chapel Allerton vigentium* 21. 1796, A.J. Cavanilles (1745-1804), *Descripción de las Plantas ...* 314. 1802 and *Grasses of Ceylon* 43. 1956, *Grasses of Burma* 527. 1960, *Fl. Libya* 145: 82. 1988, *Bot. Zhurn. (Moscow & Leningrad)* 78(10): 91. 1993.

in English: quaking grass, great quaking grass, greater quaking grass, big quaking grass, large quaking grass, quake grass, shaky grass, shaking grass, blow fly grass, bronco grass, lady's heart grass, large fairy bells

in South Africa: bewertjiesgras, grootbewertjiesgras, grootbewertjie, grootklokkiesgras, Janbewertjies, klokkies, trilgras

in Japan: koban-sô (koban = a gold coin)

in Colombia: corazoncitos

B. media L. (*Briza australis* Prokudin; *Briza intermedia* Samp.; *Poa media* (L.) Cav.)

Eurasia. Perennial, herbaceous, slender, small, hairless, few-stemmed, forming tussocks, shortly rhizomatous, rhizomes spreading, stems upright, no auricles, ligule short and rounded to truncate on the top, leaf sheath submembranous, finely bristled blue-green leaves, blade rolled when young, flowers in an erect and spreading pyramidal panicle, purple-green to purplish hanging spikelets ovate to deltoid or heart shaped, glumes ribbed, lemmas nerved, seed pods round, weed species, forage, ornamental, cut for hay, good resistance to cold and to drought, groundcover, on dry and poor soils, mountain meadow, black soil, roadsides, moist soils, fallow fields and wet meadows, see *Species Plantarum* 1: 70. 1753, *Elenchus Plantarum Horti Regni Botanici Matritensis* 28. 1803 and *Feddes Repertorium* 49: 52. 1940, K.J. Milnes, W.J. Davies, J.S. Rodwell and B.J. Francis, "The responses of *Briza media* and *Koeleria macrantha* to drought and re-watering." *Functional Ecology* 12(4): 665-672. Aug 1998, J.M. Dixon, "*Briza media* L." *Journal of Ecology* 90(4): 737-752. Aug 2002.

in English: quaking grass, common quaking grass, perennial quaking grass, rattlesnake grass, rattle grass, didder, totter, totter grass, doddering-dillies, dillies, doddering dickies, jiggle-joggles, shivering grass, trembling grass, cow quakes, lady's hair grass, maidenhair grass, pearl grass

in French: amourette commune

in India: jai

B. media L. subsp. *elatior* (Sm.) Rohlena (*Briza australis* Prokudin; *Briza elatior* Sibth. & Sm.; *Briza elatior* Sm.; *Briza media* subsp. *elatior* (Sibth. & Smith) Tutin)

Europe, Iran, Russia, Turkey. Perennial bunchgrass, vigorous.

B. media L. subsp. *media*

Europe.

B. minor L. (*Bouteloua media* (E. Fourn.) Gould & Kapadia; *Briza gracilis* hort.; *Briza gracilis* G. Nicholson; *Briza minima* hort. ex Nichols.; *Briza virens* L.)

Eurasia, Mediterranean. Annual, slender, short, loosely tufted, forming loose tussocks, glabrous, herbaceous, often-branched, stems flimsy and erect or slightly geniculate at base, dark nodes, leaves nonauriculate, sheath loose and smooth, ligule hyaline and oblong to lanceolate, linear leaves glabrous and scabrous, flowers in a loose and compound panicle very open, panicle branches ascending to erect, cleistogamous spikelets, pale green and purple

spikelets erect to drooping on slender but straight pedicels, spikelets numerous rounded to deltoid-ovate to triangular, glumes ribbed and greenish to purplish, lemmas imbricate, palea elliptic and finely winged, anthers and stigmata enclosed within the lemma, ovary glabrous and without a conspicuous apical appendage, fruit ventrally compressed, palatable grass, good forage, tillering grass, ornamental, naturalized elsewhere, widespread weed of gardens and disturbed areas, moist soils, swamp margins, moist open sandy sites, drainage ditches, orchards, open habitats, shady areas, fields under irrigation, near rivers or vleis, ballast, wetlands, wastelands, granite rocks, along roadsides, loam or clay, see *Species Plantarum* 1: 70. 1753, *Species Plantarum, Editio Secunda* 103. 1762, *The Illustrated Dictionary of Gardening, ...* 1: 212. 1884 and *Handb. Fl. Ceylon* 6: 341. 1931, *Grasses of Ceylon* 43. 1956, *Grasses of Burma ...* 528. 1960, *Fl. Trop. E. Afr. Gram.* 53. 1970, *Darwiniana* 23: 288. 1981, *Taxon* 41: 558. 1992.

in English: little fairy bells, little quaking grass, quaking grass, small quaking grass, lesser quaking grass, shivery grass, little rattlesnake grass

in French: petite amourette, petite brize

in Danish: dværg-hjertegræs

in South Africa: bewertjiesgras, kleinbewertjies, kleinklokkiesgras, kleinklokkiegras, trilgras

in Japan: hime-koban-sô (hime = small)

in Colombia: corazoncitos

in Mexico: briza corta

B. monandra (Hack.) Pilg. (*Briza lilloi* Parodi; *Briza mandoniana* (Griseb.) Henr.; *Briza stricta* var. *mandoniana* (Griseb.) Hauman; *Calotheca stricta* var. *mandoniana* Griseb.; *Poa monandra* Hack.; *Poidium monandrum* (Hack.) Matthei)

Colombia to Argentina, Bolivia. Lemmas puberulous, see *Nomenclator Botanicus. Editio secunda* 1: 225. 1840, *Abhandlungen der Königlichen Gesellschaft der Wissenschaften zu Göttingen* 24: 289. 1879 and *Österreichische Botanische Zeitschrift* 52(10): 376. 1902, *Revista de la Facultad de Agronomía y Veterinaria* 3: 133, f. 6(1), f. 7(1). 1920, *Mededeelingen van 's Rijks-Herbarium* 40: 70. 1921, *Notizblatt des Botanischen Gartens und Museums zu Berlin-Dahlem* 10(97): 725. 1929, *Publications of the Field Columbian Museum, Botanical Series* 8(5): 298. 1931.

B. rufa (J. Presl) Steud. (*Briza glomerata* Arechav.; *Briza glomerata* Kuntze & Hack. ex Kuntze, nom. illeg., non *Briza glomerata* Arechav.; *Briza scabra* Ekman; *Briza scabra* (Nees ex Steud.) Ekman; *Chascolytrum rufum* J. Presl; *Chondrachyrum scabrum* Nees ex Steud.; *Lombardochloa rufa* (J. Presl) Roseng. & B.R. Arrill.; *Poidium rufum* (J. Presl) Matthei)

South America, southern Brazil to northern Argentina. Perennial, tufted, erect, short ascending rhizomes, leaf

sheath submembranous ribbed and keeled, ligule rounded, contracted to condensed panicle with very short branches, glumes more or less equal, lemmas rufous and coriaceous, palea keels ciliate, often considered to be a synonym of *Poidium rufum* (J. Presl) Matthei, see *Reliquiae Haenkeanae* 1(4-5): 282. 1830, *Nomenclator Botanicus. Editio secunda* 1: 225. 1840, *Synopsis Plantarum Glumacearum* 1: 288. 1854, *Anales del Museo Nacional de Montevideo* 1: 469, t. 59. 1897, *Rev. Gen. Pl.* 3(3): 342. 1898 and *Willdenowia* 8: 98. 1975, *Anales de la Facultad de Química de Montevideo* 9: 260. 1979[1982], *Darwiniana* 23: 279-309. 1981.

B. subaristata Lam. (*Briza microstachya* (J. Presl) Steud.; *Briza poiformis* (Spreng.) Kuntze; *Briza reniformis* (J. Presl) Steud.; *Briza rotundata* (Kunth) Steud.; *Briza stricta* (Hook. & Arn.) Steud.; *Briza subaristata* var. *interrupta* (Hack. ex Stuck.) Roseng. B.R. Arrill. & Izag.; *Briza triloba* Nees; *Briza triloba* f. *pumila* Hack. ex Kneuck.; *Briza triloba* f. *violascens* Hack.; *Briza triloba* var. *alpha* Nees; *Briza triloba* var. *beta* Nees; *Briza triloba* var. *grandiflora* Döll; *Briza triloba* var. *interrupta* Hack.; *Briza triloba* var. *typica* Parodi; *Briza violascens* Steud.; *Bromus rotundatus* Kunth; *Calotheca microstachya* J. Presl; *Calotheca poiformis* Spreng.; *Calotheca reniformis* J. Presl; *Calotheca rotundata* (Kunth) Roem. & Schult.; *Calotheca rotundata* (Kunth) Steud.; *Calotheca stricta* Hook. & Arn.; *Calotheca triloba* (Nees) Kunth; *Chascolytrum rotundatum* (Kunth) Kunth; *Chascolytrum subaristatum* (Lam.) Desv.; *Chascolytrum trilobum* (Nees) Desv.; *Festuca commersonii* Spreng.)

Mexico, Chile, southern Brazil to Argentina, Uruguay, Paraguay. Perennial or annual, caespitose or clump forming, glabrous, leaves nonauriculate, basal sheaths persistent, ligule hyaline and smooth, sheath loose and smooth, rough and green leaves, cleistogamous spikelets, purplish or green compact inflorescence linear to ovate, small curled spikelets in small airy heads on stems, glumes green or purplish, lower glume narrowly obovate, upper glume elliptic, lemmas imbricate and mucronate or shortly awned, upper lemmas with a mid-nerve shortly aristate, palea winged with glabrous wings, ovary glabrous and without a conspicuous apical appendage, fruit ventrally compressed, good forage, useful for erosion control, usually in moist cultivated areas, along roadsides, see *Tableau Encyclopédique et Méthodique ... Botanique* 1: 187. 1791, *Nova Genera et Species Plantarum* 1: 152-153. 1815 [1816], *Systema Vegetabilium* 2: 632. 1817, *Systema Vegetabilium, editio decima sexta* 1: 348, 353. 1825, *Flora Brasiliensis seu Enumeratio Plantarum* 2: 482. 1829, *Révision des Graminées* 1: 121. 1829, *Reliquiae Haenkeanae* 1(4-5): 268. 1830, *The Botany of Captain Beechey's Voyage* 50. 1832, *Enumeratio Plantarum Omnium Hucusque Cognitarum* 1: 374. 1833, *Nomenclator Botanicus. Brizochloa Jirásek & Chrtek = *Briza* L.

From the Greek *briza* “rye” and *chloe*, *chloa* “grass, young grass.”

Pooideae, Poodae, Poeae, or Pooideae, Poeae, Brizinae, type *Brizochloa spicata* (Sibth. & Sm.) V. Jirásek & Chrtek, see *Species Plantarum* 1: 70-71. 1753 and *Novitates Botanicae et Delectus Seminum Horti Botanici Universitatis Carolinae Pragensis* 1966: 40. 1966 [1967], *Flora Mediterranea* 5: 340-345. 1995, *Cladistics* 14: 287-296. 1998 [N.D. Bayón, Cladistic analysis of the *Briza* Complex (Poaceae, Poeae)], *Opera Botanica* 137: 1-42. 1999, *Contributions from the United States National Herbarium* 48: 146-151. 2003.

Brizopyrum Link = *Desmazeria* Dumort.

Greek *briza* “rye” and *pyros* “grain, wheat.”

Pooideae, Poeae, Ammochloinae, type *Brizopyrum siculum* (Jacq.) Link, see *Commentationes Botanicae* 26-27. 1822, Johann Heinrich Friedrich Link (1767-1851), *Hortus regius botanicus berolinensis*. 1: 159. Berolini [Berlin] 1827 and *Nord. J. Bot.* 1: 20. 1981, *Contributions from the United States National Herbarium* 48: 256. 2003.

Brizopyrum Stapf = *Plagiochloa* Adamson & Sprague, *Tribolium* Desv.

Greek *briza* “rye” and *pyros* “grain, wheat.”

Danthonioideae, Danthonieae, see *Mémoires de la Société d'Agriculture, Sciences et Arts d'Angers* 1: 168, t. 7, f. 2. 1831, *Flora Capensis* 7: 318. 1898 and *Journal of South African Botany* 7(2): 89-90. 1941, H.P. Linder & G. Davidse, “The systematics of *Tribolium* Desv. (Danthonieae: Poaceae).” *Botanische Jahrbücher für Systematik, Pflanzengeschichte und Pflanzengeographie* 119(4): 445-507. 1997, *Contributions from the United States National Herbarium* 46: 622. 2003.

Bromelica (Thurb.) Farw. = *Melica* L.

Bromus and *Melica*.

Pooideae, Meliceae, see *Species Plantarum* 1: 66-67. 1753, *Proceedings of the American Academy of Arts and Sciences* 8: 409. 1872, *Geological Survey of California, Botany* 2: 304. 1880 and *Gray's Manual of Botany* (edition 7) 152. 1908, *Rhodora* 21: 77. 1919, *U.S.D.A. Bull.* 772: 69, 71. 1920, *Madroño* 8: 8. 1945, *Taxon* 41: 566. 1992, *Taxon* 44: 611-612. 1995, *Contributions from the United States National Herbarium* 48: 432-450. 2003.

Bromidium Nees & Meyen = *Agrostis* L., *Didymochaeta* Steud.

Referring to *Bromus*.

Pooideae, Poeae, Agrostidinae, type *Bromidium hygrometricum* (Nees) Nees & Meyen, often placed in *Agrostis*, see *Species Plantarum* 1: 61-63. 1753, *Gramineae* 22-23. 1841, *Nova Acta Phys.-Med. Acad. Caes. Leop.-Carol. Nat. Cur.* 19(Suppl. 1): 154. 1843, *Flora Chilena* 6: 317. 1854, *Synopsis Plantarum Glumacearum* 1: 185. 1854 [1855] and *Boletín de la Sociedad Argentina de Botánica* 1: 119, 121, f. 1. 1946, *Fl. Fenn.* 5: 29. 1971, *Darwiniana* 24(1-4): 187-216. 1982 [Revalidación del género *Bromidium* Nees et Meyen emend. Pilger (Gramineae)], *Taxon* 41: 566. 1992, *Taxon* 44: 611-612. 1995, *Contributions from the United States National Herbarium* 48: 152-153. 2003.

Bromuniola Stapf & C.E. Hubb.

Bromus and *Uniola* L.

One species, Africa, Angola. Bambusoideae, Oryzodae, Centothecae, or Centothecoideae, Centothecae, perennial, herbaceous, loosely tufted, solid, auricles absent, narrowly lanceolate leaf blades, ligule a fringed membrane, plants bisexual, loose panicle, 4- to 9-flowered, the lowest floret usually reduced to an empty lemma, 2 glumes subequal or very unequal, lemma awned, palea gibbous on the back, 2 free and fleshy lodicules, 3 stamens, ovary glabrous, 2 stigmas, forest shade, type *Bromuniola gossweileri* Stapf & Hubbard, see *Kew Bulletin* 1926: 366. 1926.

Species

B. gossweileri Stapf et Hubbard

Angola.

Bromus L. = *Aechmophora* Steudel, *Anisantha* K. Koch, *Avenaria* Fabr., *Avenaria* Heister ex Fabricius, *Boissiera* Hochst. ex Steud., *Bromopsis* (Dumort.) Fourr., *Bromus* Scop., *Ceratochloa* DC. & P. Beauv., *Ceratochloa* P. Beauv., *Forasaccus* Bubani, *Genea* (Dumort.) Dumort., *Libertia* Lejeune, *Michelaria* Dumort., *Nevskiella* Krecz. & Vved., *Serrafalcus* Parlato, *Stenofestuca* (Honda) Nakai, *Triniusa* Steud., *Triniusia* Steud., *Trisetobromus* Nevski, *Zerna* Panz.

From the Latin and Greek *bromos* "oats" (Hippocrates, *De victus ratione*. 2.43, Plinius, etc.); see Carl Linnaeus, *Species Plantarum*. 76. 1753 and *Genera Plantarum*. Edition 5. 33. 1754.

About 100/150 species, temperate and tropical climates, north temperate regions, tropical mountains. Pooideae, Triticoideae, Bromeae, or Pooideae, Bromeae, annual, biennial or perennial, herbaceous and leafy, tufted or solitary, shortly rhizomatous or stoloniferous, erect or decumbent, unbranched above, stems flimsy to rigid, auricles present or absent, ligule a membrane, hairy tubular leaf sheaths, leaf blades linear, plants bisexual, inflorescence an open or contracted panicle, panicles erect or nodding, spikelets all alike, chasmogamous or facultatively cleistogamous, hermaphrodite florets, incomplete florets present and distal to the hermaphrodite florets, apical florets usually sterile or imperfect, 2 glumes subequal or very unequal and acute or

- shortly awned, lemma rounded or keeled herbaceous or coriaceous, subapical or apical lemma awns, 2 glabrous lodicules entire and connate below, 1-3 stamens, anthers exerted and florets chasmogamous, hairy ovary apical appendage, 2 stigmas white, fruit laterally compressed, mesophytic or xerophytic, intergeneric hybrid with *Festuca* L., shade species, cultivated fodder, native pasture species, grain crop species, ornamental, important livestock forage, several species with callus or awns or spear-like bristles which can contaminate wool or cause injury to stock, growing in woodland and meadow, grassland, in damp areas, pampas, open habitats, disturbed ground, ruderal habitats, this genus is taxonomically difficult and has been divided into sections and subgenera, *Bromus* is confused with *Festuca* and *Helictotrichon*, very similar to *Poa*, type *Bromus secalinus* L., see *Species Plantarum* 1: 76. 1753, *Genera Plantarum*. Edition 5. 33. 1754, *Enumeratio Methodica Plantarum* 206. 1759, *Introductio ad Historiam Naturalem sistens genera lapidum, plantarum et animalium hactenus detecta ...* 74. Species

B. aleutensis Trin. ex Griseb. (*Bromus sitchensis* var. *aleutensis* (Trin. ex Griseb.) Hultén)

North America. Perennial, nonrhizomatous, auricles absent or present, leaf sheaths hairless to moderately hairy, panicle erect and slightly lax, flattened spikelets, four to eight flowers per spikelet, lemma keeled and nerved, lemma softly hairy with a wide and almost hyaline margin, awn straight, occurs on sandy and disturbed soil, very similar to *Bromus sitchensis* Trin., see *Flora Rossica* 4(13): 361. 1852 and

Flora of Alaska and Neighboring Territories: A Manual of the Vascular Plants 254. 1942.

in English: Aleut brome

B. alopecuroides Poir. (*Bromus alopecuroides* Poir.; *Bromus alopecurus* Pers.; *Bromus alopecurus* Poir. ex Pers.; *Bromus contortus* Desf.; *Serrafalcus alopecuroides* (Poir.) Parl.; *Serrafalcus alopecuroides* (Poir.) C.A. Gardner)

Europe, Mediterranean. Annual, slender, tufted, ascending and geniculate at the base, leaf sheath villous, dense panicle erect and compact, spikelets hairy, flattened and twisted awns, common along roadsides, on dry soil, waste grounds, cultivated fields, see *Voyage en Barbarie* 2: 100. 1789, *Flora Atlantica* 1: 95, t. 25. 1798, *Syn. Pl.* 1: 95. 1805, *Encyclopédie Méthodique. Botanique ... in English: weedy brome

B. angrenicus Drobow (*Bromopsis angrenica* (Drobow) Holub; *Bromopsis paulsenii* subsp. *angrenica* (Drobow) Tzvelev; *Zerna angrenica* (Drobow) Nevski; *Zerna paulsenii* subsp. *angrenica* (Drobow) Tzvelev)

Europe, Eurasia, Russia. See *Repertorium Specierum Novarum Regni Vegetabilis* 21(581-587): 38. 1925, *Novosti Sist. Vyss. Rast.* 7: 57. 1970 [1971], *Folia Geobotanica et Phytotaxonomica* 8(2): 167. 1973.

B. angustifolius Schrank (*Bromus angustifolius* Hornem., nom. illeg., non *Bromus angustifolius* Schrank; *Bromus erectus* var. *angustifolius* (Schrank) Beck)

Europe. See *Baiersche Flora* 1: 366. 1789, *Hortus Regius Botanicus Hafniensis* 13. 1819, *Flora von Nieder-Österreich* 1: 106. 1890 and *Acta Botanica Academiae Scientiarum Hungaricae* 17(1-2): 115. 1971[1972].

B. anomalus Rupr. ex E. Fourn. (*Bromopsis anomala* (Rupr. ex Fourn.) Holub; *Bromus anomalus* Rupr., also spelled *anomala*; *Bromus ciliatus* var. *minor* Munro ex L.H. Dewey; *Bromus ciliatus* var. *montanus* Vasey ex Beal; *Bromus ciliatus* var. *porteri* (J.M. Coult.) Rydb.; *Bromus exaltatus* Bernh.; *Bromus kalmii* var. *major* Vasey ex Shear; *Bromus kalmii* var. *occidentalis* Vasey ex Beal; *Bromus kalmii* var. *porteri* J.M. Coult.; *Bromus porteri* (J.M. Coult.) Nash; *Bromus porteri* var. *havardii* Shear; *Bromus scabratus* Scribn., nom. illeg., non *Bromus scabratus* Link; *Zerna anomala* (Rupr. ex E. Fourn.) Henrard)

Mexico, North America, California. Perennial, leaf sheaths hairless to hairy with long soft hairs, auricles present or absent, ligules blunt, open and spreading flower head, spikelets more or less laterally compressed, glumes hairy, lemma with a central awn, good forage, can be confused with

Bromus ciliatus L., occurs under dry conditions, rocky slopes, shade, see *Species Plantarum* 1: 76-77. 1753, *Bull. Académie Royale Sciences Bruxelles* 9(2): 236. 1842, *A Manual of the Botany of the Northern United States* 600. 1848, *Bot. Wheeler Exped.* 6: 292. 1878, *Manual of the Botany ... of the Rocky Mountain Region ...* 425. 1885, *Mexicanas Plantas* 2: 126. 1886, *Contributions from the United States National Herbarium* 2(3): 548. 1894, *Bulletin of the Torrey Botanical Club* 22(12): 512. 1895, *Contributions from the United States National Herbarium* 3(3): 192. 1895, *Grasses of North America for Farmers and Students* 2: 619, 624. 1896, *Bulletin, Division of Agrostology United States Department of Agriculture* 13: 46. 1898 and *Bull. Div. Agrostol., U.S.D.A.* 23: 35, 37. 1900, *Journal of the Washington Academy of Sciences* 23: 449. 1933, *Blumea* 4(3): 499. 1941, *Brittonia* 7: 415-480. 1952, *Publications of the Museum. Michigan State University. Biological Series* 3(5): 465-519. 1968, *Folia Geobotanica et Phytotaxonomica* 8(2): 167. 1973, *Phytologia* 37(4): 317-407. 1977.

in English: nodding brome, anomalous brome

in Mexico: bromo dormilón

B. araucanus Phil. (*Bromus alpestris* Steud.; *Bromus araucanus* var. *araucanus*; *Bromus araucanus* var. *obtusiflorus* (Hack.) J.A. Cámara; *Bromus araucanus* var. *obtusiflorus* (Hack.) J. Hern.; *Bromus obtusiflorus* Hack.)

Southern America, Argentina, Chile. See *Berberides Americae Australis* 52. 1857, *Anales de la Universidad de Chile* 94: 343. 1896 and *Anales del Museo Nacional de Buenos Aires* 21: 171. 1911, *Flora Patagónica* 3: 86. 1978.

B. arenarius Labill. (*Bromus arenarius* Desm., nom. illeg., non *Bromus arenarius* Labill.; *Serrafalcus arenarius* (Labill.) C.A. Gardner)

Australia. Annual, loosely tufted or solitary, erect or ascending, procumbent or geniculate, glabrous stems, internodes hollow, auricles absent, leaf sheaths more or less villous and not keeled, ligule truncate and hyaline, leaves pubescent to villous to densely villous, a raceme or a panicle loose and drooping, cleistogamous spikelets oblong-lanceolate, spikelets loosely hairy, glumes subequal, lower glume elliptic to obovate, lemmas awned and lanceolate, callus glabrous, palea membranous to chartaceous and 2-keeled with keels wingless, palea interkeels glabrous, ovary with the hairs only at the apex, fruit oblong and compressed, grows on sandy soils in dry areas, rocky places near the coast, sandy dunes, ballast, very similar to *Bromus japonicus* var. *vestitus* (Schrad.) Halácsy, see *Novae Hollandiae Plantarum Specimen* 1: 23, t. 28. Parisii 1805, *Mémoires de la Société Linnéenne du Calvados* 1824: 40. 1824, *Flora Australiensis: A Description ...* 7: 661. 1878 and *Flora of Western Australia* 1: 96. 1952.

in English: sand brome, Australian brome, Australian chess

B. arizonicus (Shear) Stebbins (*Bromus carinatus* var. *arizonicus* Shear; *Ceratochloa arizonica* (Shear) Holub)

North America, U.S. Annual, occurs under dry conditions, chaparral, see *The Botany of Captain Beechey's Voyage* 403. 1840 and *Bulletin, Division of Agrostology United States Department of Agriculture* 23: 62. 1900, *Proceedings of the California Academy of Sciences, Series 4*, 25: 309. 1944, *Folia Geobotanica et Phytotaxonomica* 8(2): 170. 1973, *Phytologia* 37(4): 317-407. 1977.

in English: Arizona brome

B. armenus Boiss. (*Bromopsis armena* (Boiss.) Holub)

Turkey. Rare species, see *Flora Orientalis* 5: 642. 1884 and *Folia Geobotanica et Phytotaxonomica* 8(2): 167. 1973.

B. arvensis L. (*Bromus arvensis* Lam., nom. illeg., non *Bromus arvensis* L.; *Bromus arvensis* Weigel, nom. illeg., non *Bromus arvensis* L.; *Bromus arvensis* L. subsp. *billotii* (F.W. Schultz) Hegi; *Bromus arvensis* subsp. *segetalis* H. Scholz; *Bromus billotii* F.W. Schultz; *Bromus erectus* var. *arvensis* (L.) Huds.; *Bromus japonicus* Thunb.; *Bromus multiflorus* Weigel; *Bromus patulus* Mert. & W.D.J. Koch; *Bromus versicolor* Pollich; *Bromus verticillatus* Cav.; *Forasaccus arvensis* (L.) Bubani; *Serrafalcus arvensis* (L.) Godr.; *Serrafalcus scoparius* (L.) Parl.)

Temperate Asia, Europe. Annual and biennial bunchgrass, extensive fibrous root system, leaves pubescent, spikelets lanceolate to oblong, flimsy branchlets, lemmas spreading at maturity, weed species widely naturalized in temperate regions, palatable, soil improver, cover crop, useful for erosion control, common along roadsides, fields, disturbed soils, see *Species Plantarum* 1: 77. 1753, *Observationes Botanicae* 2-4, 6-7, t. 1, f. 1. 1772, *Historia Plantarum in Palatinatu Electorali sponte nascentium incepta, secundum systema sexuale digesta* ... Mannheim 1: 190. 1776-1777, *Flora Anglica*, edition 2 50. 1778, *Systema Vegetabilium. Editio decima quarta* 119. 1784, *Icones et Descriptiones Plantarum, quae aut sponte* ... 6: 66, f. 590. 1801, *Flore de Lorraine* 3: 185. 1844 and *Flora Pyrenaea* ... 4: 385. 1901, *Bull. Nat. Sci. Mus.* 31: 136. 1952, *Willdenowia* 6: 145. 1970, *Notes Royal Bot. Gard. Edinburgh* 42: 499. 1985.

in English: field brome, field chess, field bromegrass

in French: brome des champs

B. arvensis L. subsp. *segetalis* H. Scholz (*Bromus secalinus* L. subsp. *billotii* (F.W. Schultz) Asch. & Graebn.)

Central Europe. See *Species Plantarum* 1: 77. 1753 and *Willdenowia* 6: 145. 1970.

B. attenuatus Swallen (*Bromopsis attenuata* (Swallen) Holub)

Mexico. See *Contr. U.S. Natl. Herb.* 29(9): 397. 1950, *Folia Geobot. Phytotax.* 8(2): 167. 1973.

B. auleticus Trin. ex Nees (*Bromopsis auletica* (Trin. ex Nees) Herter; *Bromus erectus* var. *auleticus* (Trin. ex Nees) Döll)

South America, Brazil, Uruguay, Argentina. Perennial bunchgrass, rhizomatous, very leafy, erect, leaves mostly basal, narrow or broad leaves, useful for erosion control and for stabilizing sand dunes, growing on sandy soils, sandy soil near small stream, see *Flora Brasiliensis seu Enumeratio Plantarum* 2: 468. 1829, *Flora Brasiliensis* 2(3): 109. 1878 and *Revista Sudamericana de Botánica* 6(5-6): 144. 1940, *Flora de la Provincia de Buenos Aires* 4(2): 85-101. 1970.

B. barcensis Simonk. (*Bromopsis riparia* subsp. *barcensis* (Simonk.) Holub; *Bromus fibrosus* Hack. subsp. *barcensis* (Simonk.) Hayek; *Bromus fibrosus* var. *barcensis* (Simonk.) Jav.; *Bromus riparius* subsp. *barcensis* (Simonk.) Soó)

Europe, Bulgaria. Useful for erosion control, see *Enumeratio Plantarum Transsilvaniae* 584. 1886 and *Acta Botanica Academiae Scientiarum Hungaricae* 17(1-2): 115. 1971[1972], *Flora Republicii Socialiste Romania* 12: 311. 1972, *Folia Geobotanica et Phytotaxonomica* 8(2): 169. 1973.

B. benekenii (Lange) Trimen (*Bromopsis benekenii* (Lange) Holub; *Bromopsis ramosa* (Huds.) Holub subsp. *benekenii* (Lange) Tzvelev; *Bromus asper* var. *benekenii* Syme; *Bromus benekenii* (Syme) Beck.; *Bromus benekenii* (Syme) Trimen; *Bromus ramosus* Huds.; *Schedonorus benekenii* Lange; *Zerna benekenii* (Lange) Lindm.)

Asia, Europe. Perennial, robust, panicle nodding, useful for erosion control, adapted to shady areas, see *Flora Anglica* 40. 1762, *Flora Danica* 48: 5. 1871, *English Botany, ... third edition* 11: 157. 1873, *Flora von Nieder-Österreich* 1: 107. 1890 and *Svensk Fanerogamflora* 101. 1918, *Bulletin de la Société d'Histoire Naturelle de l'Afrique du Nord* 1506. 1933, *Arkiv för Botanik* 5: 1. 1959, *Folia Geobotanica et Phytotaxonomica* 8(2): 168. 1973.

B. berterioanus Colla (also spelled *berterianus* or *berteriana*) (*Avena paupercula* Phil.; *Avena symphicarpa* Trin. ex Steud.; *Avena villosula* Kunze ex E. Desv.; *Bromus barbatooides* Beal; *Bromus barbatooides* var. *sulcatus* Beal; *Bromus berterioanus* var. *excelsus* (Shear) Pavlick; *Bromus bicuspis* Nees ex Steud.; *Bromus leyboldtii* Phil.; *Bromus rudis* Sodiro; *Bromus trinii* E. Desv.; *Bromus trinii* var. *effusa* E. Desv.; *Bromus trinii* var. *excelsus* Shear; *Bromus trinii* var. *manicata* E. Desv.; *Bromus trinii* var. *micranthera* E. Desv.; *Bromus trinii* var. *pallidiflorus* E. Desv.; *Bromus trinii* var. *stricta* E. Desv.; *Danthonia pseudo-spicata* Müll. Hal.; *Trisetobromus hirtus* (Trin.) Nevski; *Trisetum barbatooides* Beal; *Trisetum barbatooides* var. *sulcatus* Beal; *Trisetum barbatum* Steud., nom. illeg., non *Trisetum barbatum* Nees; *Trisetum barbatum* var. *major* Vasey; *Trisetum hirtum* Trin.; *Trisetum litorale* Phil.; *Trisetum trinii* (Trin.) Louis-Marie; *Trisetum trinii* var. *effusum* (E. Desv.) Louis-Marie;

Trisetum trinii var. *litorale* (Phil.) Louis-Marie; *Trisetum trinii* var. *majus* (Vasey) Louis-Marie; *Trisetum trinii* var. *manicatum* (E. Desv.) Louis-Marie; *Trisetum trinii* var. *micrantherum* (E. Desv.) Louis-Marie; *Trisetum trinii* var. *pallidiflorus* (E. Desv.) Louis-Marie; *Trisetum trinii* var. *strictum* (E. Desv.) Louis-Marie (after the Italian botanist Carlo Giuseppe Bertero, 1789-1831, physician, traveler, botanical collector, plant collector in Chile. See J.H. Barnhart, *Biographical notes upon botanists*. 1: 175. 1965; Frans A. Stafleu & Erik A. Mennega, *Taxonomic literature. Supplement II*. 118-119. 1993; T.W. Bossert, *Biographical dictionary of botanists represented in the Hunt Institute portrait collection*. 36. 1972; Antoine Lasègue, *Musée botanique de M. Benjamin Delessert*. Paris, Leipzig 1845; H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 131. Oxford 1964; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933; Irving William Knobloch, compil., "A preliminary verified list of plant collectors in Mexico." *Phytologia Memoirs*. VI. 1983; J. Lanjouw & F.A. Stafleu, *Index Herbariorum*. Part II, *Collectors A-D*. Regnum Vegetabile vol. 2. 1954; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993)

U.S., South America, Argentina, Chile. Annual, tufted, herbaceous, open, loose inflorescence, green spikelets, weed species, found in grassland, see *Memorie della Reale Accademia delle Scienze di Torino* 39: 25, t. 58. 1836, *Linnaea* 10(3): 300. 1836, *Nomenclator Botanicus. Editio secunda* 1: 173. 1840, *Florae Africae Australioris Illustrationes Monographicae* 345. 1841, *Flora Chilena* 6: 441-442. 1854, *Synopsis Plantarum Glumacearum* 1: 229, 322. 1854, *Botanische Zeitung. Berlin* 14(20): 348. 1856, *Linnaea* 29(1): 92, 94. 1858, *U.S. Department of Agriculture. Division of Botany. Bulletin* 13(2): 60. 1893, *Grasses of North America for Farmers and Students* 2: 614-615. 1896, *Anales de la Universidad de Chile* 94: 344. 1896 and *Bulletin, Division of Agrostology United States Department of Agriculture* 23: 25. 1900, *Rhodora* 30: 243. 1928 [1929], *Bromus L. of North America* 128, 144. 1995.

in English: Chilean brome

B. berterioanus Colla var. *berterioanus* (*Bromus trinii* var. *trinii*)

U.S., South America, Argentina, Chile. See *Fl. Chile* 6: 441. 1854.

B. berterioanus Colla var. *excelsus* (Shear) Pavlick (*Bromus berterioanus* Colla; *Bromus trinii* var. *excelsus* Shear)

U.S., South America, Argentina, Chile. See *Bulletin, Division of Agrostology United States Department of Agriculture* 23: 25. 1900, *Bromus L. of North America* 128, 144. 1995.

B. biebersteinii Roem. & Schult. (*Bromopsis biebersteinii* (Roem. & Schult.) Holub; *Bromus albidus* M. Bieb.; *Zerna*

biebersteinii (Roem. & Schult.) Nevski) (for the German explorer Friedrich August Marschall von Bieberstein, 1768-1826, author of *Flora taurico-caucasica*. Charkouiae [Charkow] 1808-1819, *Beschreibung der Länder zwischen den Flüssen Terek und Kur am Caspischen Meere*. Frankfurt am Main 1800 and *Centuria plantarum rariorum Rossiae meridionalis praesertim Tauriae et Caucasi iconibus descriptionibusque illustrata*. Charkoviae 1810. See J.H. Barnhart, *Biographical notes upon botanists*. 2: 450. 1965; Stafleu and Cowan, *Taxonomic literature*. 3: 305-306. 1981; E.M. Tucker, *Catalogue of the library of the Arnold Arboretum of Harvard University*. Cambridge, Mass. 1917-1933; H.N. Clokie, *Account of the Herbaria of the Department of Botany in the University of Oxford*. 207. Oxford 1964; Warren R. Dawson, *The Banks Letters*. London 1958; Antoine Lasègue (1793-1873), *Musée botanique de M. Benjamin Delessert*. Paris, Leipzig 1845; R. Zander, F. Encke, G. Buchheim and S. Seybold, *Handwörterbuch der Pflanzennamen*. 14. Aufl. Stuttgart 1993)

Asia, Iran. Perennial bunchgrass, tall, leafy, leaves mostly basal, see *Systema Vegetabilium* 2: 638. 1817, *Flora Taurico-Caucasica* 3: 79. 1819, *Flora Analitica d'Italia* 1: 98. 1896 and *Folia Geobotanica et Phytotaxonomica* 8(2): 167. 1973.

in English: Bieberstein brome, meadow brome

B. bonariensis Parodi & Cámara

Argentina. See *Revista Argent. Agron.* 29(1-2): 12-15, f. 1. 1962 [1963].

B. brachyanthera Döll (*Bromus uruguayensis* Arechav. var. *glabrescens* Arechav.; *Bromus uruguayensis* var. *robustior* Arechav.)

Southern America, Uruguay, southern Brazil to Argentina. Lemmas with a stiff awn, common on low shaded forest, disturbed places, often confused with *Festuca ulochaeta* Nees ex Steud., see *Flora Brasiliensis* 2(3): 110. 1878, *Anales del Museo Nacional de Montevideo* 1: 493, 496, t. 54. 1897 and *Revista Sudamericana de Botánica* 6(5-6): 144. 1940, *Gramíneas Uruguayas* 113, f. 39. 1970, *Flora de la Provincia de Buenos Aires* 4(2): 93. 1970.

B. brachyanthera Döll subsp. *brachyanthera*

Southern America, Uruguay, Brazil, Argentina. See *Flora Brasiliensis* 2(3): 110. 1878.

B. brachyanthera Döll subsp. *uruguayensis* (Arechav.) Roseng. & al. (*Bromopsis uruguayensis* (Arechav.) Herter; *Bromus uruguayensis* Arechav.)

Southern America, Uruguay, Argentina. Useful for erosion control, see *Flora Brasiliensis* 2(3): 110. 1878, *Anales del Museo Nacional de Montevideo* 1: 493, t. 54. 1897 and *Revista Sudamericana de Botánica* 6(5-6): 144. 1940, *Gramíneas Uruguayas* 113, f. 39. 1970, *Flora de la Provincia de Buenos Aires* 4(2): 93. 1970.

B. brachyanthera Döll var. **uruguayensis** (Arechav.) J.A. Cámara (*Bromopsis uruguayensis* (Arechav.) Herter; *Bromus brachyanthera* subsp. *uruguayensis* (Arechav.) Roseng., B.R. Arrill. & Izag.; *Bromus uruguayensis* Arechav.; *Bromus uruguayensis* var. *genuinus* Arechav.)

Southern America. See *Anales del Museo Nacional de Montevideo* 1(6): 493, 496, t. 54. 1897 and *Revista Sudamericana de Botánica* 6(5-6): 144. 1940, *Flora de la Provincia de Buenos Aires* 4(2): 93. 1970, *Gramíneas Uruguayas* 113, f. 39. 1970.

B. brachystachys Hornung
